MAKER NIGHTS

2nd and 4th Tuesdays 6-9PM

Loussac Library, 4th floor, Innovation Lab

Like to make things?

Enjoy working with your hands?

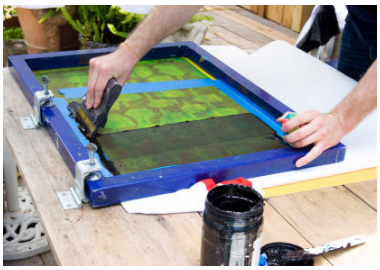
Have an idea that you've wanted to bring to life?

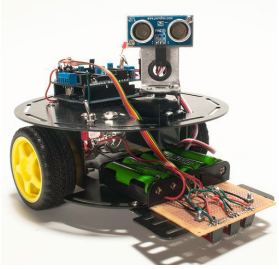
Join the Anchorage Makerspace as they lead Maker Nights at the Loussac Library.

What is a Maker Night? Maker Nights are nights where the 4th floor of the library turns into an invention lab. You will have the opportunity to collaborate with makers with all backgrounds ranging from those who knit to those who build their own 3D printers. A large part of the Maker culture is a passion for educating. If there is anything you want to learn about making something, come ask around, your bound to find an expert!

Who can attend? Anyone! If you want to come and make a project or help make a project, you're welcome to join! If you want to come hang out and see what it's all about, you're welcome too!

How much does it cost? FREE, FREE, FREE! Members of the Anchorage Makerspace will be bringing in tools such as 3D Printers, soldering irons and other basic hand tools necessary to complete projects. If you have a special project in mind, be sure to bring the appropriate materials. If you have small hand tools of your own, you're welcome to bring those as well. *Please do not bring any electric saws, nail guns, gas powered tools, welders, torches or any other dangerous tools.*





For more information contact Paul Baker by email at bakerpb@muni.org or by phone at 343-2926.
