Subject: RE: NC - Meeting today with Mayor's office

Thanks John for putting this together. Such as your outline identifies, ordering the building will be the emphasis of discussion. The budget will be a matter of managing expectations. The Mayor and executive staff have made compromises to reduce the size in order to reduce costs. They are aware that the estimate is a living document at this stage of design but remain optimistic to bring this project closer to \$10M. This meeting will be great to manage expectations.

Thanks everyone for making the time on short notice ! See you there
