## **Site Description and Proposal**

This is a request for a special land use permit for a marijuana manufacturing facility within a B-3 district. The site is located north of the intersection of Spenard Road and Northwood Drive. The proposed facility is of similar character and scale to surrounding structures. Approximately 566ft<sup>2</sup> of available building space will be dedicated to marijuana manufacturing. This facility will be open seven days a week, from 8:00am until midnight.

## **Public and Agency Comments**

On January 8, 2019 the Planning Department mailed 277 public hearing notices in accordance with AMC 21.03.020H. As of this writing, no responses have been received. A public hearing notice was also mailed to the Spenard Community Council. No comments from the Spenard Community Council have been received.

## **Approval Criteria (AMC 21.03.105C.7.)**

The assembly may approve a special land use permit for marijuana if, in the judgment of the assembly, the application meets the following approval criteria.

- a. The proposed use is consistent with the comprehensive plan, all applicable provisions of this title, and applicable state regulations.**

The 2040 Anchorage Land Use Plan defines this site as “Main Street Corridor” and the 2012 West Anchorage District Plan defines this site as “Spenard Commercial Corridor.” The proposed use of this site as a marijuana manufacturing facility is consistent with its classification in the Anchorage 2040 Land Use Plan, the 2012 West Anchorage District Plan, and its current B-3 (General Commercial) zoning designation.

Per the October 16, 2017 nonconforming determination (NCD), this site is compliant with AMC 21.06.020, *Table 21.06-2: Table of Dimensional Standards – Commercial and Industrial Districts*.

Adequate snow storage area is provided on-site in accordance with AMC 21.07.040F *Snow Storage and Disposal*. 5% of the surface area on-site shall be dedicated towards snow storage. This requires the petitioner to provide a total of 157ft<sup>2</sup> of snow storage space. 160ft<sup>2</sup> of snow storage space is provided.

Per the October 16, 2017 NCD, this site is compliant with AMC 21.07.060F *Pedestrian Amenities* for lack of available pedestrian facilities.

Per the October 16, 2017 NCD, this site is compliant with AMC 21.07.080 *Landscaping, Screening, and Fences* for the lack of visual enhancement landscaping along the southern, western, and northern lot lines. However, all existing landscaping located along applicable lot lines shall be maintained.

Adequate parking on-site is provided per AMC 21.07.090E, Table 21.07-4: *Off-Street Parking Spaces Required*. The gross floor area of the building is approximately 2,116ft<sup>2</sup>. Considering all current and planned uses on-site, the total parking requirement is to provide five parking spaces, with one being van-accessible. A total of 5 parking spaces with one being van-accessible are shown on the submitted site plan.

In accordance with AMC 21.07.090H.8. *Vehicular Access and Circulation*, the standard is met. Compliant vehicle turning and maneuvering space is provided on-site.

In accordance with AMC 21.07.090J, *Table 21.07-8: Accessible Parking Spaces* the standard is met. A parking lot providing five parking spaces is required to provide one van-accessible parking space. One van-accessible parking space is shown on the submitted site plan.

**b. The proposed use is consistent with the purpose and intent of the zoning district in which it is located, including any district-specific standards set forth in chapter 21.04.**

There are no applicable district-specific standards for the B-3 district regarding this use.

The purpose of the B-3 district is:

*“The B-3 district is intended primarily for general commercial uses in commercial centers and areas exposed to heavy traffic. These commercial uses are intended to be located on arterials, or within commercial centers of town, and to be provided with adequate public services and facilities. They are subject to the public view and should provide an attractive appearance with landscaping, sufficient parking, and controlled traffic movement. Environmental impacts should be minimized. Abutting residential areas should be protected from potentially negative impacts associated with commercial activity. While B3 district areas shall continue to meet the need for auto-related and other auto-oriented uses, it is the municipality’s intent that the B-3 district also shall provide for safe and convenient personal mobility in other forms. Planning and design shall accommodate pedestrians and bicyclists. In addition to a wide range of commercial office, retail*

*and commercial services, other use categories such as residential and community uses, and mixed-use projects, are allowed.”*

- c. **The proposed use is consistent with applicable use-specific standards set forth in chapter 21.05**

See attached code compliance checklist.

- d. **The proposed use is compatible with uses allowed on adjacent properties, in terms of its scale, site design, and operating characteristics (e.g., hours of operation, traffic generation, lighting, noise, odor, dust, and other external impacts).**

Compatibility is defined in AMC 21.14 as:

*“The characteristics of different uses, activities, or designs which allow them to be located near or next to each other in harmony. Some elements affecting compatibility include the height, scale, mass, bulk, and setbacks of structures. Other characteristics include traffic, parking, access and circulation, landscaping and buffering, drainage and storm water runoff, exterior lighting, dust, noise, hours of operation, and demand on public facilities and services. Compatible does not necessarily mean “the same as.” Rather, compatibility refers to the sensitivity of development proposals in maintaining the character of the surrounding context and avoiding adverse impacts on neighboring uses.”*

This marijuana manufacturing facility will be located within a well-traveled commercial corridor within Spenard. The building is of conventional construction, consistent with the character and appearance of surrounding buildings. Various commercial uses neighbor the petition site along Spenard Road, with mixed-residential uses neighboring to the north. The proposed establishment will occupy approximately 566ft<sup>2</sup> of space within the existing 2,116ft<sup>2</sup> building. The lot totals 8,125ft<sup>2</sup>. Daily hours of operation will be Monday through Sunday, 8:00am-midnight. The proposed hours of operation may extend beyond those of neighboring businesses. However, this business will be accessed by employees only. Thus, minimal disturbance from vehicular noise and traffic is anticipated from this use.

- e. **The proposed use is appropriately located with respect to existing and/or planned water supply, power supply, fire and police protection, wastewater disposal, storm water disposal, and similar facilities and services.**

The site is served by public water and sewer.

The site is located within the Anchorage Roads and Drainage Service Area, the Building Service Area, and the Police and Fire Service Areas.

Fixed-route public transportation is available on 15-minute headways within one-quarter mile of the petition site via routes 40 and 65.

- f. Any significant adverse impacts anticipated to result from the use can and will be mitigated or offset to the maximum extent feasible.**

This proposed marijuana manufacturing facility will be located within an existing building that has historically served various commercial and light-industrial uses. The surrounding land uses are zoned B-3 (General Commercial) along Spenard Road and R-3 (Mixed-Residential) to the north. The petition site has direct access to Northwood Drive, and quick access to Spenard Road. Northwood Drive is classified as a “local street” in this area under the 2014 Official Streets and Highways Plan; seeing less than 2,000 vehicle trips daily. Spenard Road is classified as a Class II-Minor Arterial, seeing between 10,000-20,000 vehicle trips daily. Additionally, the applicant has provided both a security and waste disposal plan in accordance with the requirements of AMC 21.03.105C.3.a. It does not appear that this manufacturing facility will cause significant adverse impacts to traffic flow, or neighboring residences and businesses.

- g. The owner/operator of the establishment has no previous denials or revocations of a marijuana license or special land use permit, or previous documented violations of municipal or state law/regulation relating to marijuana establishments. Alternately, the owner/operator has provided sufficient evidence of rehabilitation to the assembly.**

The owner and/or operator of this establishment has no previous denials or revocations of a marijuana license or special land use permit.

- h. The owner/operator of a marijuana retail establishment has meaningfully engaged in neighborhood responsibility planning with residents and other neighborhood businesses to mitigate concerns such as odor, parking, and security. Neighborhood responsibility planning guidelines may be included in AMC chapter 2.40.**

This criteria does not apply to a marijuana manufacturing facility.

## Recommendation

The Planning Department recommends APPROVAL subject to the following conditions:

1. All uses shall conform to the plans and narrative submitted with the license/special land use permit application and with all applicable portions of Anchorage Municipal Code, and may be modified in accordance with AMC 21.03.105C.9.

3. The establishment shall be open for inspection and examination by the municipality during municipal business hours and establishment business hours.

5. The Conditions Certificate, issued by the Planning Department and containing conditions imposed by the Assembly on this special land use permit, shall be displayed in a visible location near the main entrance at all times.
6. In accordance with AMC 21.05.010E, *Table 21.05-1 Table of Allowed Uses – Residential, Commercial, Industrial and Other Districts*, this marijuana manufacturing facility shall be limited to producing extracts using water-based, food-based, closed-loop carbon dioxide extraction systems, or other methods not employing solvents or gases, as described in 3 AAC 306.555.
