

2024 Construction Project Overview

Project Name: Anchorage Airport Security Fencing Improvements 2023

Project Number: CFAPT00983

Project Description: We will work to remove the old security fence and reinstall approximately 1,000 feet of new security fencing and one swing gate. Work also includes installing a new culvert, grading, and work on the subbase, topsoil, and seeding.

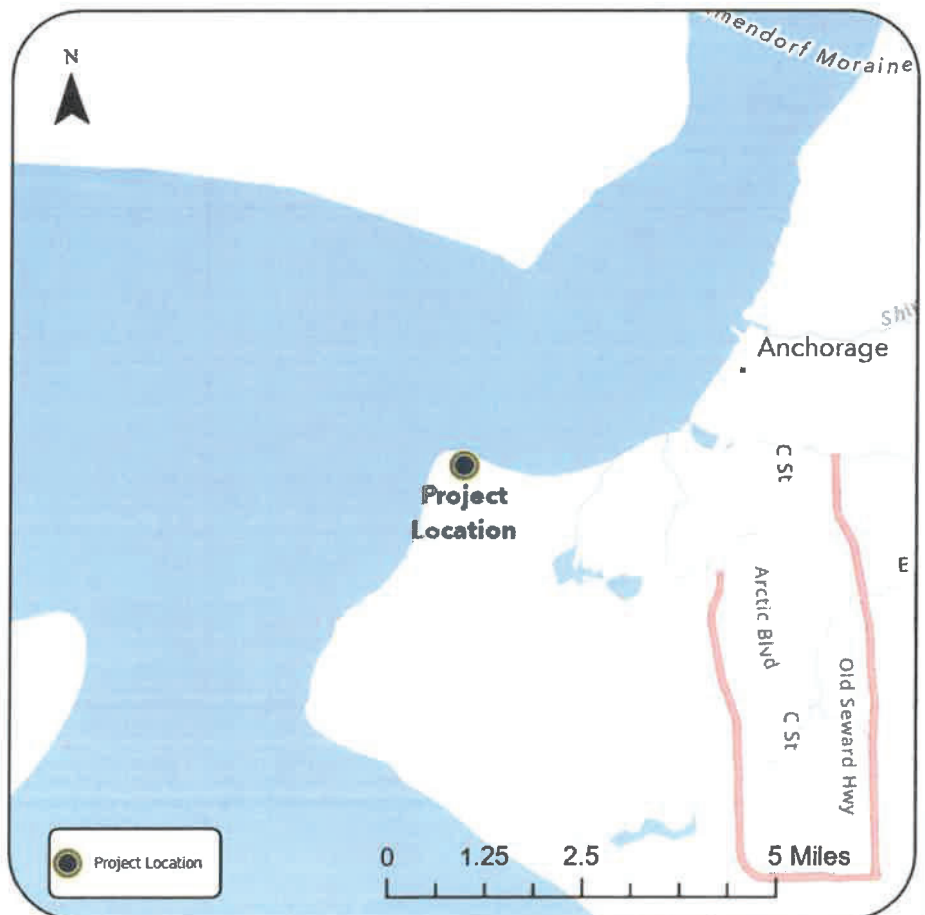

The purpose of the project is to improve airport security. The existing fence is in poor condition and needs significant repair. It would cost nearly as much to repair as it does to replace.
