

Alaska Department of Transportation and Public Facilities

2024 Construction Project Overview

Project Name: Anchorage Airport Access Gate, Headbolt Outlets, and Ditch Grading

Project Number: CSAPT00931

Project Description: Through this project we will construct a new vehicle access control gate at Airfield Maintenance West and install head bolt outlets at the taxiway A and DeHavilland Avenue snow disposal sites.

The existing Airfield Maintenance West gate is a padlock swing gate. Replacing this gate with a vertical access control gate will allow Airfield Maintenance expedited access between landside and airside operations areas and help increase security. The snow disposal sites currently do not have electrical power. Airfield Maintenance requires heavy equipment like dozers and loaders at these sites during the winter and need the head bolt outlets in order to keep the equipment in a state of readiness.
