- **Next Steps (5 minutes)**
- **Public Comment (10 minutes)**
- **Adjourn**

MEMO

To: Spenard Advisory Committee (SAC)

From: MOA Staff, Winter & Company

Date: January 4, 2017

Subject: Draft Spenard Corridor Plan Concept,
Upcoming Advisory Committee Meetings

MOA staff and the consultant team were charged under the Spenard Corridor Plan scope with preparing an interim memorandum identifying a broad vision and concept for public and private investment in the Plan Area based on community and Advisory Committee input, as well as analysis by the project team. The Draft Plan Concept document (available on the project website at: <http://www.spenardcorridorplan.com/progress/>) is a working document that identifies overarching principles and preliminary design concepts. The document is intended to provide the Advisory Committee an opportunity to review and respond to a high-level, working document prior to more detailed analysis, feasibility studies and Draft Plan preparation.

Advisory Committee Review of the Plan Concept

Project consultants will facilitate a series of two meetings with the Advisory Committee to get input on the Draft Plan Concept. The purpose of holding two separate meetings is to ensure that there is adequate time for Advisory Committee feedback and discussion at each meeting.

Please review the Plan Concept and come prepared to provide feedback on its components. Please consider the following questions as you review the document:

- Do you feel the general direction established in the Draft Plan Concept is appropriate?
- Are there any major topic areas that are not included but are critical to the core vision for Spenard?
- Are the principles and concepts presented clearly?
- Do you have any specific feedback on individual components (illustrations, diagrams, photos, language, etc.) of the Plan Concept?

The following pages provide anticipated agendas for Spenard Advisory Committee meetings on January 19 and February 2 to review the Draft Plan Concept.
