

**21.02.080 - Geotechnical advisory commission.**

**A. *Powers and duties.***

1. The geotechnical advisory commission shall serve as a technical advisory board in the municipality.
2. The commission shall act in an advisory capacity to the assembly, the mayor, boards, commissions, and heads of municipal departments and agencies, and shall have the following responsibilities:
  - a. To make recommendations and give advice on geotechnical engineering issues and natural hazards risk mitigation.
  - b. To recommend and review special studies relating to geotechnical engineering and natural hazards risk mitigation issues.
  - c. To act in an advisory capacity regarding proposed development located in high or moderate snow avalanche hazard zones, in areas designated with high or very high susceptibility to seismically induced ground failure, and in areas susceptible to other natural hazards.
