If you have concerns about an immediate structural collapse please call 911 and request assistance from the fire department.

All business listed employ structural engineers with training in post-earthquake damage assessment.

When calling to inquire about a structural engineering damage evaluation please have the following information available:

- Address of the property to be inspected
- Description of property (single family residence? 10-story office building?)
- Description of any damage observed
- List of any other specific concerns
