## ***Salmon in the City* Pledge**

Anchorage's diverse economy, vibrant neighborhoods and natural assets – creeks, salmon, and watersheds – are the envy of the world. Ship Creek offers a chance to catch a King salmon within walking distance from downtown Anchorage. What other city in America can offer the fishing and natural areas that exist in Anchorage? These attributes provide important economic and quality of life benefits for our community.

I support Anchorage's *Salmon in the City* program and local efforts to ensure salmon sustainability in our creeks. I pledge to do my part to be a good steward of Anchorage's creeks, salmon and watersheds so that our community continues to enjoy these benefits for years to come.
