FIRE DEPARTMENT

NEW DEARMOUN ROAD FIRE STATION #19 LAND ACQ.

Problem:

Scope: Build new 4-bay fire station to better facilitate arrival at fire scenes within the six minute response time from receipt of dispatch call. □□2013-site selection, initial design, and land acquisition.

Status:

PROJECT MANAGEMENT & ENGINEERING

Hillside District Plan for Transportation

Problem: The Anchorage Hillside development is challenging many community infrastructure needs to include land use, transportation, drainage, on-site systems and water & sewer service. This multi-agency effort is necessary to support all these elements, including

Scope: The transportation element of the project will provide planning for road and infrastructure development to promote adequate transportation, circulation, and access for the Hillside Area. Plan to recommend capital, maintenance and operations options for H

Status: This is a combined multi-agency planning effort. A public review draft is complete. A public hearing draft will be available in April. Adoption of the plan is anticipated in the fall. Alternatives regarding roads & trail connectivity, funding, maintenance and operations are being addressed.

Hillside Drainage Improvements

Problem: Many areas on the Anchorage Hillside suffer from poor drainage. There are many unimproved roads that contribute to the drainage issues. No clear plan has been developed for the future. This project is a high priority for the Rabbit Creek Community Council and a priority for some other councils.

Scope: This project will complete a drainage study of the Anchorage Hillside area regarding existing and evolving drainage patterns and problem areas. The study is expected to identify and prioritize problem areas and capital projects to address the problems.

Status: Substantial drainage analysis and inventory has been completed on the Hillside and a more detailed study of future needs will begin soon. A 2009 state grant has been requested to begin funding the prioritized problem areas.

PROJECT MANAGEMENT & ENGINEERING**Hillside LRSA's Road and Drainage System Rehab**

Problem: Many local roads remain dirt or gravel streets with high maintenance costs. In addition, these roads are a source of dust which reduces air quality for the community. This project is a priority for the hillside area community councils.

Scope: Reconstruction of road and drainage facilities within Hillside Area Limited Road Service Areas (LRSAs). Specific projects to be identified by the local road boards.

Status: No work has begun, but state grant funding is proposed annually in the approved CIP to supplement local mill levies.

Hillside LRSA's Traffic Calming

Problem: Many areas on the Anchorage Hillside suffer from poor drainage. There are many unimproved roads that contribute to the drainage issues. No clear plan has been developed for the future. This project is a high priority for the Rabbit Creek Community Council and a priority for some other councils.

Scope: This project will complete a drainage study of the Anchorage Hillside area regarding existing and evolving drainage patterns and problem areas. The study is expected to identify and prioritize problem areas and capital projects to address the problems.

Status: Substantial drainage analysis and inventory has been completed on the Hillside and a more detailed study of future needs will begin soon. A 2009 state grant has been requested to begin funding the prioritized problem areas.

Toilsome Hill Dr/Glen Alps Rd /Canyon Rd Improvements

Problem: All three roads are in need of upgrade. This project is a priority for the Glen Alps Community Council. These roads serve Chugach State Park. There is significant year-round usage, especially at the Flat Top Trailhead. The existing roads are mostly poor gravel roads with steep slopes, winding curves, and limited visibility. There are no pedestrian facilities or even shoulders to accommodate hikers and cyclists.

Scope: Specific improvements will be identified in the design study phase.

Status: Initial analysis and public involvement are underway. Options regarding paving, right-of-way acquisition, and long range plan development are being prepared for community input.
