

**2013 Capital Projects
Huffman/O'Malley - Community Council Priority List
Municipality of Anchorage**

Area Wide - Parks and Recreation Project

PRIORITY #		Estimated Cost	Funds on Hand	Additional Funds Required
	Greenbelt Trails	\$1,000,000	#N/A	\$1,000,000
	Scope:	Asphalt repair, lighting assessment and improvements, bridge repair/replacement, signage improvements		
	Need:	Anchorage has over 250 miles of paved trails. Current infrastructure is outdated, unsafe and in need of repair. Trail use, both summer and winter, will continue to increase and safety and quality condition of trail infrastructure and amenities needs to be a priority.		
	Status:	Bond funding and State legislative grant requests are pending. Areawide greenbelt trails (Campbell Creek Greenbelt, Chester Creek Greenbelt Coastal Trail and Ship Creek Trail) need a repair program to address safety and security concerns (over 250 miles).		

PRIORITY #		Estimated Cost	Funds on Hand	Additional Funds Required
	Multi-use Athletic Field Rehabilitation	\$600,000	\$0	\$600,000
	Scope:	Funds will be used to rehabilitate existing fields to a reasonable standard for all users and increase field amenities to offer quality statewide and local spectator and player use.		
	Need:	Athletic fields in Anchorage play an important role by promoting healthy recreational activities and helping young athletes develop positive life skills. They also play a significant role in statewide athletics. Anchorage is one location for the State C		
	Status:	Anchorage has 110 athletic fields to serve the community and state needs for healthy sports activities. Funds will be used to rehabilitate existing fields to safe and current field standards.		

Parks and Recreation Project

PRIORITY #		Estimated Cost	Funds on Hand	Additional Funds Required
	Forsythe Park	\$250,000	#N/A	\$250,000
	Scope:	Funds will be used to implement community identified and supported park and playground improvements including tennis court repairs, trail and bridge repairs and park and playground improvements.		
	Need:	This neighborhood park is in a residential area and the playground and park facilities are in need of upgrade and repair.		
	Status:	Residents near Forsythe Park completed an Anchorage Park Report Card in the fall of 2011 identifying park deficiencies and needed repairs and upgrades.		

Project Management and Engineering Projects

PRIORITY #		Estimated Cost	Funds on Hand	Additional Funds Required
	ARDSA Residential Pavement Rehabilitation - Senate District P Area	\$3,000,000	\$0	\$3,000,000
	Scope:	This project will resurface local roads through reclaiming, overlaying, or rotomilling. Occasional spot dig outs and some curb repair work is also anticipated.		
	Need:	There were many roads in the district that were rated as Condition E or F in the last GASB survey. Resurfacing will extend the life of the road base. Resurfacing is far more cost effective than road reconstruction. Approximately two to three miles of locals roads can be resurfaced with the requested grant.		
	Status:	This project has not started. State grant funding is proposed.		

PRIORITY #		Estimated Cost	Funds on Hand	Additional Funds Required
	ARDSA Storm Drain System Rehabilitation	\$1,000,000	\$0	\$1,000,000
	Scope:	This project will investigate the status of the Anchorage Roads and Drainage Service Area storm drain system and rehabilitate the system as needs are identified and prioritized. This goal will be accomplished by evaluating the degree of degradation and functionality in our existing storm drain systems through CCTV (Closed Circuit Television) videoing augmented and by field inspecting segments of pipe.		

	Need:	There are approximately 2,213,000 linear feet of underground storm drain pipe in the Anchorage Road and Drainage Service Area. Metal pipe was primarily used prior 1990 and in some instances developers were creative and even used substitutes such as metal barrels/55 gallon drums laid end to end to divert or convey storm water from their properties. Much of the storm drain pipe that Anchorage has in the ground today is now deteriorated to the extent that in some instances it has completely vanished. Obviously these system failures impact the public in many ways, two primary impacts are; health & safety consequences and property damage through flooding.			
	Status:	This project has not started. This is an annual program with bond funding anticipated.			
PRIORITY #			Estimated Cost	Funds on Hand	Additional Funds Required
		Birch Rd Safety Improvements - Huffman Rd to Naknek Ln	\$500,000	\$0	\$500,000
	Scope:	This project will realign the road, increase the vertical sight-distance, and improve the drainage.			
	Need:	Segments of this roadway have line-of-sight concerns either from vegetation and curves or from humps in the road. In addition, portions of the road are out of the right of way. Flooding and glaciation are also concerns on the roadway.			
	Status:	Preliminary scoping and public involvement were funded with state grant funding. A state grant has been requested for design and construction of the desired safety improvements.			
PRIORITY #			Estimated Cost	Funds on Hand	Additional Funds Required
		Davis Rd Upgrade RID - 135th Ave to DeArmoun Rd	\$3,500,000	\$0	\$3,500,000
	Scope:	Upgrade road to include a new road base, drainage, and pavement.			
	Need:	The road has never been constructed to standards.			
	Status:	No work is currently scheduled in the 6-year Capital Improvement Program. Funding will be through the Road Improvement District program in which the project is initiated by property owners who agree to pay 70% of the costs through special assessments.			

PRIORITY #			Estimated Cost	Funds on Hand	Additional Funds Required
	Elmore Rd Extension - Abbott Rd to O'Malley Rd		\$25,000,000	\$0	\$25,000,000
	Scope:	This project will install a new road base, curbs, pavement, pedestrian facilities, drainage, and lighting. Elmore Road is classified as a collector street in the Official Streets and Highways Plan (OS&HP) and will be constructed accordingly.			
	Need:	Portions of this collector are constructed to gravel standards, but there is no connection between Abbott Road and O'Malley Road. The existing road does not meet standards regarding pavement, pedestrian facilities, drainage, and lighting. The need for this connection has increased with the connection north to Tudor Road. This project is a priority for the Abbott Loop Community Council.			
	Status:	Funding is proposed as a funding partnership of state grants and local road bonds.			
PRIORITY #			Estimated Cost	Funds on Hand	Additional Funds Required
	Furrow Creek Improvements - Turnagain Arm to Elmore Rd		\$1,700,000	\$100,000	\$1,600,000
	Scope:	The project will start as a study of the area that will include identification of problems and recommended solutions, including capital project recommendations.			
	Need:	Increased development on the hillside has increased drainage flows in Furrow Creek. The existing creek channel and culverts are not adequate to handle flows. As a result, flooding occurs.			
	Status:	A drainage study is underway which will identify specific improvements to be funded.			
PRIORITY #			Estimated Cost	Funds on Hand	Additional Funds Required
	Hillside Drainage Improvements		\$0	\$0	\$0
	Scope:	This project will complete a drainage study of the Anchorage Hillside area regarding existing and evolving drainage patterns and problem areas. The study is expected to identify and prioritize problem areas and capital projects to address the problems.			
	Need:	Many areas on the Anchorage Hillside suffer from poor drainage. There are many unimproved roads that contribute to the drainage issues. No clear plan has been developed for the future. This project is a high priority for the Rabbit Creek Community Council and a priority for some other councils.			
	Status:	Substantial drainage analysis and inventory has been completed on the Hillside. Annual state grant funding is proposed to begin implementing solutions for the prioritized problem areas. 2011 grant funding was provided for initial construction activities. The 164th Ave/Betty area is the target site for 2012 construction.			
PRIORITY #			Estimated Cost	Funds on Hand	Additional Funds Required
	Hillside Integration Commission for Drainage and Roads		\$0	\$0	\$0
	Scope:	Road and drainage challenges in the Anchorage Hillside demonstrate the need for integrated coordination among the divergent home and property owner governing organizations. This project will provide the seed money for review of organizational structures necessary for proactive and efficient local decision making to redress Hillside roads and drainage, maximize the strength and interdependence of current controls, and identify the organizational structure best suited to coordinate effective solutions to these continuing and escalating needs.			
	Need:	This project was a recommendation on the Anchorage Hillside Plan.			
	Status:	State grant funding has been requested. This project has not started.			
PRIORITY #			Estimated Cost	Funds on Hand	Additional Funds Required
	Hillside LRSA's Road and Drainage System Rehab		\$0	\$0	\$0
	Scope:	This project will reconstruct road and drainage facilities within Hillside Area Limited Road Service Areas (LRSAs). Specific projects will be identified by the local road boards.			
	Need:	Many local roads remain dirt or gravel streets with high maintenance costs. In addition, these roads are a source of dust which reduces air quality for the community. This project is a priority for the hillside area community councils.			
	Status:	No work has begun, but state grant funding is proposed annually in the approved CIP to supplement local mill levies.			
PRIORITY #			Estimated Cost	Funds on Hand	Additional Funds Required
	Hillside LRSA's Traffic Calming		\$200,000	\$0	\$200,000
	Scope:	This project will fund traffic calming improvements in the Anchorage Hillside.			
	Need:	The project will improve safety by reducing speeds in local neighborhoods.			
	Status:	No work is currently scheduled in the 6-year Capital Improvement Program. Project will remain on the Capital Project Needs List for future funding consideration.
