

MUNICIPALITY OF ANCHORAGE – UCIP - 1  
UTILITY CAPITAL NEEDS ANALYSIS

Department	Municipal Utilities
Program Category	Anchorage Sewer Utility

POLICY GOALS

The primary goal of the Sewer Utility is to provide a high level of service and to accommodate reasonable development in all the service areas in accordance with the Comprehensive Development Plan and the new Sewer Master Plan.

SIX-YEAR DEPARTMENT GOALS AND STRATEGY

The Sewer Utility will emphasize expansion into those areas where normal and/or planned development has generated a public need and provide funding to extend public sewers by means of lateral improvement districts to presently developed areas where on-site disposal systems are no longer feasible. Additionally, the Sewer Utility will optimize use of existing operational resources and activities by computerized mechanization of routine work functions.

Construction of the 78" West Interceptor and Southeast Interceptor will provide downstream capacity for the expansion of the lateral system in the east, northwest, and south sections of the Anchorage Bowl Sewer Service Area. Upgrade and expansion of the Pt. Woronzof Treatment Plant will enable the Utility to meet the more stringent discharge requirements of the EPA, prevent the imminent overload situation, and bring the plant to ultimate design capacity of 60 MGD to provide capacity for the normal and planned development of sewers in the Anchorage Bowl Sewer Service Area.

With completion of the Eagle River Treatment Plant, the expansion of the Interceptor and Trunk collection system will provide for the normal and planned development of sewers in the Eagle River Sewer Service Area.

With completion of the Girdwood/Alyeska Treatment Plant, Interceptors and collection system, extension of public sewers by means of lateral improvement districts will proceed as requested by property owners in developed areas.

 CAPITAL IMPROVEMENT PROJECT SCOPE SUMMARY

Department MUNICIPAL UTILITIES	Account Code 551-8008-9400
Program Category ANCHORAGE SEWER UTILITY – ABSSA	Project Category TREATMENT
PROJECT TITLE	SUMMARY OF PROJECT SCOPE
1. Replace Screening Equipment	Project to replace screening equipment to improve solids collection/handling to attain more efficient use of downstream equipment as well as reduce maintenance costs. Necessary in order to comply with terms of EPA Discharge Permit.
2. Laboratory Equipment	Equipment for collection of samples to provide information now requested by regulatory agencies.
3. Lathe, Grinder, Miller	Equipment for mechanical work and parts restoration.
4. Woronzof Expansion Ultimate Capacity 60 MGD	Project will construct the additional facilities required to increase plant capacity from 34 MGD to ultimate design capacity.
5. Maintenance Shop Building	Project will increase work area for mechanical maintenance of treatment plant and lift station equipment. Design to be completed in 1981.
6. Outfall Extension	Project is for extension of the existing outfall to provide improved dispersion of plant effluent.
7. Covers for Clarifiers, Thickeners & Distribution Boxes	Project to provide all weather protection for equipment and treatment processes and to make it possible to perform operations and maintenance more efficiently during winter months.
8. Sludge Incinerator No. 2	Project will provide capability to dispose of solids volume relative to plant expansion listed above and to community growth. Heat recovery will be included and the heat used within the plant.
9. Scum Incinerator	Project will provide means to dispose of very volatile grease and oil portion of sewage solids, thereby reducing load on sludge incinerator and eliminating relative to the combustion of two materials with very different characteristics. Unit to be connected to the waste heat recovery system.

PROJECT TITLE	SUMMARY OF PROJECT SCOPE	
1. 36th Avenue - Turnagain Pump Station and Force Main	This pump station and force main will intercept a substantial portion of the flow into the Chester Creek dumping station, indefinitely delaying further expansion of that facility. The force main will direct a large portion of Fish Creek's trunk flow direct to interceptor in Wisconsin Street. Site acquisition initiated in 1980.	
2. Chester Creek Pump Station Emergency Generator	Project to provide emergency power for all pumps in pump station. Design 1981, construction 1982.

MUNICIPALITY OF ANCHORAGE – UCIP - 5  
 CAPITAL IMPROVEMENT PROJECT SCOPE SUMMARY

Department	MUNICIPAL UTILITIES	Account Code	551-8008-9400
Program Category	ANCHORAGE SEWER UTILITY - ABSSA	Project Category	TRUNKS & INTERCEPTORS
PROJECT TITLE	SUMMARY OF PROJECT SCOPE		
1. Southeast Interceptor	<p>Connects E-1, E-2, E-3, E-4, E-5, E-6, E-7 and E-8 trunks with the 78-inch West Interceptor. Interceptor will be located for the most part along the Alaska Railroad right-of-way and New Seward Highway for a distance of 7 miles. Construction schedule of the interceptor to be as follows:</p> <p style="padding-left: 40px;">1981 - From O'Malley to Huffman Road                  1982 - From Huffman to DeArmoun Road                  1983 - Crossing of DeArmoun and New Seward Highway Interchange                  1984 - From DeArmoun to E-7 Trunk                  1985 - From E-7 Trunk to E-8 Trunk</p>		
2. Projects with Alaska Department of Transportation	Reimbursement to the State of Alaska Department of Transportation for installation of sewer improvements in conjunction with State projects.		
3. Private Development Oversizing	Reimbursement to developers for oversizing of systems designed to serve the entire service area.		
4. Public Works Projects	Miscellaneous projects that occur as a result of various Public Works paving projects that require relocation or construction of new facilities prior to paving. These projects are designed and constructed as planned.		
5. E-3 Trunk	Project will extend the collection system to serve an area east of the Alaska Railroad to Lake Otis Parkway between 94th Avenue and O'Malley Road. Will connect to the Southeast Interceptor.		
6. E-1 Trunk (addn. appropriation)	Project will provide for construction of approximately 5,300 feet of 16-inch trunk sewer on Lake Otis Parkway from 84th Ave. to Abbott. Design complete, construction to complete in 1981.		
7. 78-Inch West Interceptor - Phase II	Project to connect Northeast and Southeast Interceptors with Phase I of 78" West Interceptor (constructed in 1980), thereby diverting flow via gravity away from Campbell Creek pump station and avoiding overflow into Campbell Lake during peak periods of infiltration and inflow. Project is 6,000 L.F. long.		
8. C-3 Trunk (North)	Project will serve an area north of 80th Ave. and west of Jewel Lake Road around Sand Lake.		
9. C-5-2 Trunk - Phase II	Project consists of an extension of trunk system from the vicinity of 96th Ave. and Victor Road east for about 3/4 of a mile.

 CAPITAL IMPROVEMENT PROJECT SCOPE SUMMARY

Department	MUNICIPAL UTILITIES	Account Code	551-8008-9400
Program Category	ANCHORAGE SEWER UTILITY – ABSSA	Project Category	REPAIR & REHABILITATION
PROJECT TITLE	SUMMARY OF PROJECT SCOPE		
1. R&R Emergency	These are emergency repairs to the sewerage system as a result of line failures and other malfunctions that make the system inoperable.		
2. R&R Planned	Projects consist of miscellaneous repair and rehabilitation to maintain existing sewage collection system and reduce mainline plugs, clean up charges incurred because of flooding.		
3. International Airport Road Trunk R&R	Project consists of design and construction of a gavity sewer line from the terminal building to Jewel Lake Road. Construction of this trunk sewer will eliminate four existing pump stations and provide additional capacity needed for future development along the trunk alignment.		
4. Implementation of SSES	Project is for completion in 1981 of the 201 Facilities Plan and Pretreatment Study, both of which are required by EPA in order to qualify Service Area 40 for Federal Grant funding. In 1982 through 1986 the projects consist of planned repair of the sanitary sewer systems according to the recommendations of the Sanitary Sewer Evaluation Study completed in 1979.		
5. R&R Fish Creek Interceptor	Project is for planned repair and rehabilitation of selected segments of the Fish Creek Interceptor to eliminate recurring problem areas, reduce infiltration, and respond to emergency situations.		
6. R&R Knik Interceptor	This project is for planned repair and rehabilitation of selected segments of the Knik Interceptor to eliminate recurring problem areas, reduce infiltration, and respond to emergency situations.
