

PROJECT MANAGEMENT & ENGINEERING

Department Goal

The goal of the Department of Project Management and Engineering for the 2007-2012 Capital Improvement Budget/Program is to improve the road and drainage facilities in Anchorage by:

- enhancing the safe and efficient movement of people and goods while minimizing adverse environmental and neighborhood impacts,
- enhancing the safe and efficient collection and discharge of drainage while minimizing flooding, erosion, and adverse impacts on water quality, and
- promoting economic development and neighborhood revitalization.

Projects are chosen on the basis of recommendations of existing plans and studies, consideration of impacts on public safety and operations and maintenance costs, and input from community councils, the public, elected officials and municipal staff.

Roadway Improvements

The Roadway Improvement element of the Capital Improvement Program (CIP) establishes a plan for funding transportation needs on municipally owned roads. Roadway Improvements include new road connections, road upgrades, road reconstruction, and surface rehabilitation of existing roads (including recycled asphalt pavement). Plans and studies used for project selection include the Long Range Transportation Plan (LRTP), the Official Streets and Highways Plan (OS&HP), the Transportation Improvement Program (TIP), and the Pavement Management System. Criteria used in selecting roadway projects include public safety, congestion relief, road condition, public support, bid readiness, and size of the population served by the improvements.

Safety Improvements

The Safety Improvement element of the CIP compliments the Roadway Improvements by identifying projects that enhance the safety and efficiency of vehicular and pedestrian movement throughout the Municipality. Safety Improvements include projects such as signalization, intersection channelization, illumination, walkways, signage, and striping. Studies used for project selection include traffic studies, accident reports and Hazardous Route Reports. Criteria used in selecting safety projects include public safety, congestion relief, public support, bid readiness, and size of the population served by the improvements.

Drainage Collection

The Drainage Collection element of the CIP establishes a plan for funding the drainage infrastructure needs in Anchorage. This program includes projects such as drainage studies, storm trunks, storm drain reconstruction, culverts and creek improvements. Existing plans and studies used in project selection include storm drainage studies, flood plain reports, and the Areawide Water Quality Management Plan. Criteria used in selecting projects also include operations and maintenance cost impact, public safety, reduction of flooding and glaciation, bid readiness, public support, and size of the population served by the improvements.

Drainage Treatment

The Drainage Treatment element of the CIP complements the Drainage Collection Program by identifying projects which will enhance, maintain, and protect the natural environment as the Drainage Collection System is further developed. This program includes projects such as storm outfall water quality improvements and water quality enhancement ponds. Plans and studies used for project selection include storm drainage studies, National Pollutant Discharge Elimination System (NPDES) study, and the Areawide Water Quality Management Plan. Criteria used in selecting projects also include water quality impacts, public safety, bid readiness, operations and maintenance cost impact, and size of the population served.

Public Works Miscellaneous

This element of the CIP complements all other programs with projects that support road and drainage projects. This program includes projects such as matching funds for AMATS projects, snow disposal site development, right-of-way acquisition for future projects, and facility development for Maintenance and Traffic Departments.

Communications

This category addresses capital equipment needs that support the communications system used by the Anchorage Police Department, Anchorage Fire Department, and Operations and Maintenance. Typical projects include communication tower upgrades, rehab, and replacement, and safety and equipment upgrades such as safety restraints, generators, test equipment, service monitors, fire station alerting service kits, and welders. The communications system provides area-wide benefit.

32ND AVE UPGRADE- MULDOON RD TO BROOKRIDGE DR This project will upgrade a local road to collector standards. Improvements are expected to include pavement, curbs, lighting, pedestrian facilities, traffic calming, and landscaping. Design and public involvement efforts have been funded. Easement and utility funding is proposed for 2009 with construction funding to follow in 2011. Future funding is contingent upon reclassification as a collector. The 2007 State Grant funding and would would accelerate easement acquisition and utility work.	S= 600	.0	0.0	Scenic Foothills
40TH AVE EXTENSION - ARCTIC BLVD TO CENTERPOINT DR This project will construct a new collector road to urban standards. Improvements are expected to include pavement, curbs, pedestrian facilities on both sides, and a right-turn-in/right-turn-out intersection at Arctic. Design funding is proposed for 2007 with easement acquisition and utility phase funding to follow in 2008. Construction funding is proposed for 2009. The 2007 State Grant would provide a 50/50 funding partnership.	B= 500 S= 1300	.0	41.0	Midtown
40TH AVE EXTENSION - LAKE OTIS PKWY TO DALE ST This project will construct a new collector road to urban collector standards. Improvements are expected to include pavement, curbs, pedestrian facilities on both sides, lighting, storm drains, landscaping, a signal at Lake Otis Parkway, and retaining walls. Design Study efforts have been funded. Final design,easement acquisition, and utility phase funding is proposed for 2007 and 2008. Construction funding is proposed for 2010. The 2007 State Grant would provide a match for preconstruction efforts.	B= 700 S= 700	.0	57.4	University Area

72ND AVE UPGRADE - BRAYTON DR TO LAKE OTIS PKWY This project would upgrade this major local road to urban standards. Funding is conditioned upon reclassification as a collector in the OS&HP. Improvements are expected to include pavement, curbs, storm drains, pedestrian facilities, street lights, water line installation, and landscaping. Initial public involvement funding is proposed for 2007. Design study funding is proposed for 2009 with design funding to follow in 2010. Easement and utility phase funding is proposed for 2011 with construction funding to follow in 2012. The 2007 State Grant would complete pre-construction funding and allow construction to be accelerated.	B= 50 S= 950	.0	4.1	Abbott Loop
76TH AVE RECONSTRUCTION - CHAD ST TO C ST This project will reconstruct a deteriorating collector street. Improvements are expected to include a new road base, curbs, pedestrian facilities, pavement, street lighting, storm drains, traffic calming, and landscaping. Design, easement, and utility phases have been funded. Construction funding is proposed for 2007. A 2005 state grant funded pedestrian facilities to be constructed with the project.	B= 4300	.0	352.6	Taku/Campbell
9TH AVE SURFACE REHAB - L ST TO INGRA ST This project will provide pavement and signal rehab improvements on a minor arterial street. Specific improvements will be coordinated with the recommendations of the "E" Street Corridor Study, currently underway. Design, easement acquisition, utility, and partial construction phases have been funded. The proposed 2007 and 2008 funding is expected to complete construction phase funding. Construction between A Street and Ingra Street is planned for 2007.	B= 1700	18.0	139.4	Downtown Fairview

ALASKA RAILROAD CROSSING REHABS

This funding will reimburse the Alaska Railroad Corporation for road and track rehabilitation work at railroad crossings on municipal routes. Reimbursement is a requirement of road crossing permits in ARR right-of-way. Reimbursement funding is proposed annually.

B= 500 .0 41.0 ARDSA Councils

ARCTIC BLVD RECONSTRUCTION - 36TH AVE TO TUDOR RD

A design study for this route indicates an immediate need for a 5-lane road section. Improvements are expected to include pavement, curbs, a center turn lane, medians, upgraded street lighting, storm drain reconstruction, pedestrian facilities on both sides, and a new signal at 40th Avenue. Design phase efforts have been funded. Easement acquisition and utility relocation are proposed for 2007 thru 2009. Construction funding is proposed for 2010.

B= 200 30.0 16.4 Midtown
Spenard

ARDSA ROAD AND DRAINAGE SYSTEM REHABILITATION

Reconstruct street and drainage facilities which require quick response. Improvements are generally focused on pavement, curb, sidewalk, and storm drain reconstruction. Funding is proposed annually.

B= 600 .0 49.2 ARDSA Councils

ARLBERG ST EXTENSION - WINNER CREEK/GLACIER CREEK ACCESS

Arlberg St would be extended to provide trailhead access to the Winner Creek/Glacier Creek area. Design study and environmental evaluation is proposed in a 2007 state grant.

S= 500 .0 0.0 Girdwood Valley

For specific funding needed in later years, please review the same project name/description included in the Capital Improvement Program section.

**100TH AVE RECONSTRUCT/UPGRADE(RTP)-VICTOR RD TO
 POINTE RESOLUTION DRIVE**

This project will reconstruct 100th Avenue between Victor Road and Bayshore Drive and upgrade 100th Avenue between Bayshore Drive and Pointe Resolution Drive. Design, utility easement acquisition, and construction funding was provided with a 2005 State grant. This project is a Road Transfer Project (RTP). The segment between Victor Road and Bayshore Drive is State-owned and transfer of ownership and maintenance responsibility to the Municipality is anticipated, and subject to written agreement with the State. The 2007 funding is an additional State grant request to cover cost increases. The 2008 funding is a local bond match.

S= 1500 150.0 0.0 Bayshore/Klatt

36TH AVE UPGRADE (RTP)- PATTERSON ST TO MULDOON RD

This project will upgrade a State-owned collector street to urban standards. Improvements are expected to include a new road base, pavement, curbs, pedestrian facilities, storm drains, street lighting, and landscaping. Design, easement, utility, and construction funding is proposed for 2007 as a state grant. This is a Road Transfer Project (RTP) and ownership and maintenance will transfer to the Municipality after funding and construction of the project. The 2009 funding is a local match.

FIREWEED LN RECONSTRUCTION - SPENARD RD TO SEWARD HWY

D= 53
F= 472

B= 130
F= 6370

This project will reconstruct an arterial street to replace deteriorated pavement and construct safety improvements. Intersections with safety concern include the Seward Highway, Gambell Street, Eagle Street, and Arctic Boulevard. The design process will evaluate a possible change in street section from a 4-lane to a 3-lane section. Design has been funded. Easement acquisition funding is proposed for 2008 with construction funding to follow in 2011. All funding is proposed through the AMATS program, except for a local construction match for the municipally owned segment, west of Arctic Boulevard.

LAKE OTIS PKWY UPGRADE - DEBARR RD TO NORTHERN LIGHTS BLVD

F= 2000 F= 8300

This project will upgrade a major arterial route to a 5-lane roadway. Pedestrian facilities will be constructed in compliance with ADA requirements and may include a 5 ft. sidewalk on one side and an 8 ft. bike trail on the other. Separation from the curb and number of pedestrian facilities will be evaluated in the design phase. The estimate assumes 5 ft. of separation on each side. The storm drain system would be upgraded to improve drainage. Street lighting will be upgraded to comply with current standards. The actual scope will be developed in the design phase which includes public involvement. Complete reconstruction will include significant right-of-way acquisition. Design funding is proposed for 2010 with right-of-way and utility phase funding proposed for 2011. Construction funding is not currently programmed. All funding is through the AMATS program.

LOCAL ROAD RID RECONSTRUCTION AND UPGRADES

B= 1100 B= 1500 B= 4000 B= 3000 B= 4000 B= 4000

This program provides design and construction funding for property owner approved local road reconstruction and upgrade projects through the Road Improvement District (RID) program. In this program, property owners agree to pay a portion of the project costs through special assessments. Funding is proposed annually. Several RID's have been requested and petitioning will continue. RID's approved by property owners which require additional CIP funding are listed separately in the CIP. Portions of this funding will be used to fund municipal and property owner shares of project costs.

LOIS DR/ 36TH AVE UPGRADE - NORTHERN LIGHTS BLVD TO MINNESOTA DR

B= 50

B= 800

B= 1200

Upgrade collector street to urban standards. Improvements are expected to include a new road base, pavement, curbs, pedestrian facilities, storm drainage, street lighting, and landscaping. Initial public involvement funding is proposed for 2008. Design funding is proposed for 2011 with easement and utility phase funding to follow in 2012. Construction funding is proposed for future years.

MARSTON DR/FORAKER DR RID CONSTRUCTION

B= 2700

Property owners have approved a Road Improvement District (RID) to construct these local roads near Lyn Ary Park. Water and Sewer Improvement Districts have also been approved and created by the Assembly. Design funding has been provided and construction funding is proposed for 2008. The project is being re-balloted to reflect updated cost estimates.

MILKY WAY DR SURFACE REHAB - AERO AVE TO WISCONSIN ST

B= 400

This project will address the deteriorating pavement and curb conditions on a collector route by replacing worn curbs and overlaying the existing pavement. Design, easement acquisition, and utility phase funding is proposed for 2012. Construction funding is anticipated after 2012.

MOUNTAIN AIR DR/HILLSIDE DR EXTENSION

S= 4500

This project will construct a new collector connection south of Rabbit Creek Road and east of Goldenview Drive. Currently all traffic is routed to Goldenview Dr. Improvements are expected to include pavement, curbs, street lighting, storm drains, pedestrian facilities, and landscaping. 2007 state grant funding is proposed for all phases of the project. The area must be annexed into a Limited Road Service Area prior to construction.

NORTHWOOD DR EXTENSION - 88TH AVE TO DIMOND BLVD

B= 9600

This project will extend Northwood Drive from 88th Avenue to Dimond Boulevard, including a bridge over Campbell Creek. This extension will complete a north/south arterial connection and reduce traffic congestion on Dimond Boulevard and Arlene Street. Design, easement, and utility phases have been funded. Construction funding is proposed for 2011.

NORTHWOOD DR SURFACE REHAB - RASPBERRY RD TO STRAWBERRY RD

B= 900

This project will rehabilitate the pavement on a minor arterial street. Design efforts have been funded and construction funding is proposed for 2009.

C ST AT KLATT RD INTERSECTION SAFETY

This project will construct safety improvements at the intersection of Klatt Road with C Street where Klatt Road extends to the east toward the Old Seward Hwy. Design and utility phase funding is proposed for 2007 with construction funding to follow in 2008. A 50/50 funding partnership with the State is proposed. Congestion is expected to increase at this intersection when the C St Extension is opened.

EAGLE RIVER CBD STUDY

F= 150

The project will conduct a comprehensive circulation study for the entire road network within the downtown core of Eagle River. The study will include an assessment of pedestrian improvement needs, access management alternatives, the need for improved connectivity between the Old Glenn Highway and Business Boulevard, and traffic flows along the Old Glenn Highway, including the movement of freight vehicles.

ELECTRICAL LOAD CENTER UPGRADES

B= 50

B= 50

B= 50

B= 50

B= 50

Replace load centers which have exceeded their useful life and do not meet current electrical codes. Load centers supply electricity to street lighting, traffic lights, and heat tape systems. Design and construction funding is proposed annually starting in 2008. Specific locations will be identified annually by Street Maintenance and Traffic.

EMERGENCY SIGNAL SYSTEM PREEMPT PROGRAM

B= 300
S= 950

This project will install a signal preempt capability for emergency vehicles with the goal of improving response time. Design and Phase I construction has been funded. Phase II construction funding is proposed for 2007.
