

MUNICIPALITY OF ANCHORAGE
FLOOD DAMAGE CAPITAL PROGRAM
Department PUBLIC WORKS/PARKS AND REC

Program Statement:

The heavy rainfall in the Anchorage area on August 25-27 caused extensive damage to public and private property and facilities. The persistent rainfall, which has set a new annual rainfall record, continues to keep the water table very high and will cause even more damage during the winter. The Federal Government has not provided any emergency aid. State emergency aid is limited to one million dollars, and may only be utilized for repairs and cannot fund all of the work required. Municipal General Government agencies and the Water and Wastewater Utility have already drawn upon fund balance to make emergency repairs. Although the state emergency aid has been of great assistance, it will only cover a little more than half the costs incurred by the Municipality. General Government projects that must still be accomplished, repairs that are still required, and work that has been accomplished but has been absorbed in already stretched Capital and Operations and Maintenance budgets include: Drainage, traffic and flood gate repairs; Repairing erosion on trails and in parks throughout the Municipality; and Repairing damage to ongoing Public Works projects caused by water saturation, erosion, etc.
