Note: The values for this measure have been completely revised from previous reporting, as it was discovered in the third quarter 2012 calculations that all previous values were prepared in error, in a manner that gave falsely high values (i.e. longer response times than accurate). This measure intends to focus on Patrol's response times, and thus measures the average time from a Patrol Officer receiving a Priority 1 call for service to his/her arrival on scene. The previous values added the time it took for Dispatch to receive, process, and transmit Priority 1 calls for service to Patrol Officers in the field. The data as reported now accurately isolates Patrol's response times to Priority 1 calls for service, as initially intended.
