## **Information Technology Department**

Anchorage: Performance. Value. Results.

#### **Mission**

Provide economical, structured, controlled and secured computing environment that delivers responsible and cost-efficient services to Municipal Departments and the community at large.

#### **Core Services**

- IT Infrastructure (Network, Email, Servers)
- Application Development and Support (PeopleSoft, Hansen, CAMA)
- Web Services (Intranet, Internet)
- Mail/Courier Services
- Phones
- Reprographics
- Data Services
- Records Management
- Desktop Support
- Security

#### **Accomplishment Goals**

- Reduce the total of IT operational cost as a percentage of overall MOA operational cost.
- Deliver effective municipal services to MOA departments and citizens via technology.
- Provide effective Customer Service.
- Improve IT service delivery and the development of processes, standards and policies by applying industry best practice frameworks.

#### **Performance Measures**

#### Explanatory Information

IT has undertaken an enterprise move toward establishing a 'best-practice' approach to IT standardization—from security policies and change management to adopting new technologies. We have developed a roadmap to transform IT that serves as the action plan for how we will deliver MOA IT services at a lower cost.

Progress in achieving goals is measured by:

<u>Measure #1:</u> IT Operational cost as a percentage of the total Municipal Operating Budget (excludes AWWU and MLP cost).

The Gartner Key Metrics indicate that for a government entity our size (\$500M to \$1B) the overall average for IT operational cost is 3.6%.

Our current percentage is 3.29% of the total operating budget.

IT 2015 Operating Budget as 3.29% of Total MOA 2015 Operating Budget

2014 Budget

2015 Budget

#### Year

In accordance with Gardner's IT Key Metrics Data 2015 publication, which outlines the methodology for calculating the percent of IT operating budget to MOA operating budget, depreciation has been removed and occupancy and support functional costs have been added to the above percentages.

Measure #2: Number of IT employees as a percentage of total Municipal employees (excludes AWWU and MLP personnel).

Our current percentage is 3.0 of total Municipal employees.

IT Staff as 3.0% of Total MOA Staff

Year

# **Application Services Division Information Technology Department**

Anchorage: Performance. Value. Results.

#### **Purpose**

Provide professional software development and support services to municipal departments.

#### **Division Direct Services**

- Production Support—implement, integrate, test, troubleshoot, administer, and support applications. Including training and application hosting.
- New Development—analysis, requirements gathering, coding, testing, and deploying custom in-house developed applications and interfaces.

#### **Accomplishment Goals**

- Reduce the total of IT spend as a percentage of overall MOA operational spend.
- Deliver new municipal services to citizens via technology.
- Provide effective Customer Service.
- Improve IT service delivery and the development of processes, standards and policies by applying industry best practice frameworks.

#### **Performance Measures**

Progress in achieving goals shall be measured by:

#### Measure #3: Application system availability during normal MOA business (7am to 6pm).

Period: 10/1/2015 through 12/31/2015

## <u>Application</u> <u>Total Uptime</u>

## Data Services Division Information Technology Department

Anchorage: Performance. Value. Results.

#### **Purpose**

Deliver data services that are in alignment with the business requirements and the objectives of MOA, by using the most secure, efficient and cost effective methods.

#### **Division Direct Services**

- Administer, maintain and secure municipal data assets.
- Provide print production, digital copies and graphic design to all municipal agencies.
- Provide secure and reliable courier services to all municipal agencies.
- Provide orderly identification, management, retention, preservation and disposal of MOA records.

#### **Accomplishment Goals**

- Reduce the total of IT spend as a percentage of overall MOA operational spend.
- Deliver effective municipal services to citizens via technology.
- Provide effective Customer Service.
- Improve IT service delivery and the development of processes, standards and policies by applying industry best practice frameworks.

#### **Performance Measures**

#### Explanatory Information:

Provides the quarterly progress made in updating departmental Records Retention Schedules (RRS), which are currently in their update cycle. The progress varies by department depending on a number of factors including: how out of date the current retention schedule is, whether the department has been absorbed into another department through a departmental reorganization, resources available to put toward the update process by the department, and how close they are to RRS completion.

Progress in achieving goals shall be measured by:

### Measure #4: Percent of time spent on tasks.

Measure #5: Percent of Annual Records Retention Schedules updated.

Updating the Records Retention Schedules is one segment of the Records Management Program. It continues to develop with progress in many of the Municipal Departments. A reorganization of the Public Works Departments will alter the landscape of records for those affected divisions.

# **Technology Services Division Information Technology Department**

Anchorage: Performance. Value. Results.

#### **Purpose**

Provide a computing environment that meets the needs of each department.

#### **Division Direct Services**

- Service Desk support.
- Desktop services and support.
- Voice and data network service and support.
- Enterprise level computing services and support.
- Data resources management and development.

#### **Accomplishment Goals**

- Reduce the total of IT spend as a percentage of overall MOA operational spend.
- Deliver effective municipal services to citizens via technology.
- Provide effective Customer Service.
- Improve IT service delivery and the development of processes, standards and policies by applying industry best practice frameworks.

#### **Performance Measures**

Progress in achieving goals shall be measured by:

## Measure #6: Overall KiloWatt Hours IT systems consume.

## Performance Measure Methodology Sheet Information Technology Department

Measure #1: IT Operational cost as a percentage of the total Municipal Operating Budget (excludes AWWU and MLP cost).

#### **Type**

Efficiency

#### **Accomplishment Goal Supported**

Reduce the total of IT operational cost as a percentage of overall MOA operational cost.

#### Definition

This measure reports cost of IT labor and operating budgets for ITD, APD, AFD, SWS, and HHS as a percentage of the total Municipal operating budget. We are using 2010 Gartner Group "IT Key Metrics" benchmarks for government IT to gauge the efficiency of IT cost.

#### **Data Collection Method**

Budget numbers recorded in a spreadsheet.

#### Frequency

The measurement will be performed at the annually as budgets are finalized and during the year if budget revisions occur.

#### Measured by

IT Management Team.

#### Reporting

The department's IT Budget Analyst will create and maintain a report in Excel that will display the most recent information.

#### **Used By**

The department director and management team will use the information to report to the CFO and the IT Steering Committee.

## Performance Measure Methodology Sheet Information Technology Department

Measure #2: Number of IT employees as a percentage of total Municipal employees (excludes AWWU and MLP personnel).

#### **Type**

Efficiency

#### **Accomplishment Goal Supported**

Reduce the total of IT operational cost as a percentage of overall MOA operational cost.

#### Definition

This measure reports the count of IT personnel for ITD, APD, AFD, SWS, and HHS as a percentage of total MOA employees. We are using 2010 Gartner Group "IT Key Metrics" benchmarks for government IT to gauge the efficiency of IT staffing levels.

#### **Data Collection Method**

Budget numbers recorded in a spreadsheet

#### Frequency

Annually

#### Measured by

IT Management Team.

#### Reporting

The department's IT Budget Analyst will create and maintain a report in Excel that will display the most recent information.

#### **Used By**

The department director and management team will use the information to report to the CFO and the IT Steering Committee.

# Performance Measure Methodology Sheet Application Services Division Information Technology Department

Measure #3: Application system availability during normal MOA business hours (7am to 6pm).

#### **Core Services**

Application Development and Support

#### **Type**

Effectiveness

#### **Accomplishment Goal Supported**

- Provide excellent Customer Service.
- Improve IT service delivery and the development of processes, standards and policies by applying industry best practice frameworks.

#### Definition

Measure effectiveness of application support services on production systems. Success will be determined by comparing application uptime versus unscheduled outages, compiled on a quarterly and annual basis.

#### **Data Collection Method**

Downtime monitored at a system level and recorded on an IT log register; percentage will be calculated.

#### Frequency

Beginning of each quarter

#### Measured by

IT Management Team. Data will be stored and compiled in an Excel Spreadsheet.

#### Reporting

The department's Application Services Manager will create and maintain a quarterly report in Excel that will display the information both numerically and graphically.

#### **Used By**

The department director and management team will use the report to monitor and adjust support services as well to gain a sense of how effective IT services have been provided.

# Performance Methodology Sheet Data Services Division Information Technology Department

#### Measure #4: Percent of time spent on tasks.

#### **Core Services**

Mail/Courier Services Reprographics

#### **Type**

Effectiveness

#### **Accomplishment Goal Supported**

- Provide excellent Customer Service.
- Improve IT service delivery and the development of processes, standards and policies by applying industry best practice frameworks.

#### Definition

This measure reports on the amount of time spent completing administrative tasks relating to the Reprographics Service Request. Currently, this section spends an average of 24 hours each month to track and enter information from the request form. This information is used to bill the departments requesting service, as well as for statistical analysis.

By creating an online form for use by customers, data normally entered manually will be entered automatically into a database. This should result in a 30% reduction (for administrative overhead) within the first year, and an additional 30% the following year.

#### **Data Collection Method**

Using an Excel spreadsheet, staff will keep detailed statistics on time spent entering information from the Reprographics Service Request form.

#### Frequency

Monthly

#### Measured By

Graphics Services supervisor and data will be stored and compiled in an Excel spreadsheet.

#### Reporting

The Graphics Services supervisor will create and maintain a monthly report in an Excel spreadsheet and will display the information both numerically and graphically.

#### **Used By**

The Graphics Services supervisor and IT Management team will use the information for industry comparison, analysis and forecasting, as well as to gain a sense of how effective graphics and courier services have been provided.

# Performance Methodology Sheet Data Services Division Information Technology Department

#### Measure #5: Percent of Records Retention Schedules updated.

#### **Core Services**

Records Management

#### Type

Effectiveness

#### **Accomplishment Goal Supported**

Improve IT service delivery and the development of processes, standards and policies by applying industry best practice frameworks.

#### Definition

Records retention schedules (RRS) list out the information assets of departments rolled up into related groups referred to as records series. Each records series provides a length of time for which it must be retained. Providing standardized retention periods for records series common across MOA departments will streamline individual department information asset management and enhance the ability for departments to manage these assets. Tracking the progress for RRSs throughout the entire municipality provides information on which departments need more assistance from Records Management.

#### **Data Collection Method**

The Records Management Supervisor will work with departmental Records Coordinators to establish a percentage complete measurement for that department's RRS based on the estimated number of departmental personnel interviews completed and records series documented with proposed retention periods.

#### Frequency

Monthly

#### **Measured By**

The Records Management Supervisor will take information gathered monthly from departmental coordinators as well as consolidate and store the information about the progress for each department in an Excel Spreadsheet.

#### Reporting

The Records Management Supervisor will create and maintain a monthly report in Excel that will display the information both numerically and graphically.

#### **Used By**

The ITD director and management team will use the progress reports to gain a sense of the number of records series that are common across the municipality as well as the number of records series that are department specific. The RRSs will serve as a basis for eventual digital management of the information assets of the municipality.

## Performance Measure Methodology Sheet Technology Services Division Information Technology Department

Measure #6: Percentage change in overall kilowatt hours IT systems consume.

#### **Core Services**

Infrastructure

#### Type

Effectiveness

#### **Accomplishment Goal Supported**

- Reduce the total of IT operational cost as a percentage of overall MOA operational cost.
- Improve IT service delivery and the development of processes, standards and policies by applying industry best practice frameworks.

#### Definition

This measure reports on how much power IT system are consuming across the city. This would include Server, Network, and Desktop hardware devices. As the IT Department moves to consolidating services and managing desktop power-up options, the overall reduction in kilowatt hours would be reduced. Consolidation, virtualization, and power management will drive the power requirements for IT systems down measurably.

#### **Data Collection Method**

Maintain a complete inventory with vendor's specification on power consumption.

#### Frequency

Beginning of each quarter

#### **Measured By**

The departments Desktop Services lead will create and maintain a quarterly report in and Excel spreadsheet and provide it to the Technology Services Manager.

#### Reporting

The department's Technology Services Manager will create a graph and add data to the graph quarterly.

#### **Used By**

The department managers will use the report to identify any saving in a quarter and report that saving to the individual departments where savings occurred.

## Performance Measure Methodology Sheet Technology Services Division Information Technology Department

Measure #7: Percentage change in the cost of voice and data communications combined.

#### **Type**

Effectiveness

#### **Accomplishment Goal Supported**

- Reduce the total of IT operational cost as a percentage of overall MOA operational cost.
- Deliver new municipal services to MOA departments and citizens via technology.
- Improve IT service delivery and the development of processes, standards and policies by applying industry best practice frameworks.

#### **Definition**

This measure reports on the total cost of communications to the MOA for voice and data. By consolidating communications the MOA effectively delivers both circuits over the same transportation medium. The overall effect would be a reduction in the amount of services required to provide these networks thus reducing the cost. By converging these networks, we would establish one network cost to deliver voice and data to each of the MOA's 98 facilities.

#### **Data Collection Method**

Tracking the cost all departments paid to providers (ACS, GCI, and AT&T).

#### Frequency

Beginning of each quarter

#### **Measured By**

The departments Network Services supervisor will create and maintain a quarterly report in and Excel spreadsheet and provide it to the Technology Services Manager.

#### Reporting

The department's Technology Services Manager will create a graph and add data to the graph quarterly.

#### **Used By**

The department managers will use the report to identify any saving in the quarter and report that saving to the individual departments where savings occurred.

## Performance Measure Methodology Sheet Technology Services Division Information Technology Department

#### Measure #8: Time to close open problem tickets.

#### **Core Services**

Desktop

#### **Type**

Effectiveness

#### **Accomplishment Goal Supported**

- Provide excellent Customer Service.
- Improve IT service delivery and the development of processes, standards and policies by applying industry best practice frameworks.

#### Definition

This measure reports on how much time per incident support personnel are spending addressing customer incidents categorized as 'problems'.

#### **Data Collection Method**

Using the reporting capability of the IT Incident Management System, a report would be generated to track 'problem' tickets.

#### Frequency

Monthly

#### **Measured By**

The departments Desktop Services lead will create and maintain a monthly report in and Altiris and provide it to the Technology Services Manager.

#### Reporting

The department's Technology Services Manager will create a graph and add data to the graph monthly.

#### **Used By**

The department managers will use the report to determine the overall staffing levels and priority for the Technology Services Division and the departmental projects.
