Fund 0562 is an enterprise fund providing solid waste processing and disposal services for municipal residents on an areawide basis. The Merrill Field and Peters Creek Landfills, the Municipal Shredder Facility and the Girdwood Transfer Facility are all operated by this Utility. Solid Waste Processing and Disposal is regulated by the Anchorage Assembly who is responsible for budget and rate approval. This Utility receives no financial support from property taxes. Approximately 88 percent of the revenues needed to fund the proposed 1987 budget will come from user fees while the remaining 12 percent will come from non-operating sources such as interest income. During 1987, a significant change is planned with the closure of the Merrill Field and Peters Creek Landfills, the opening of the new Anchorage Regional Landfill and the conversion of the Shredder Plant to a Transfer Facility.

Fund 0563 is a capital improvement fund which accounts for all capital assets purchased for Solid Waste Processing and Disposal purposes.

Operating Budget

The Processing and Disposal budget will increase by 22 percent in 1987. The specific adjustments resulting in the net change are as follows:

o	Cost reductions associated with closing the Municipal Shredder	\$(1,105,400)	(18)%
o	Cost associated with the operation of the Anchorage Anchorage Regional Landfill	\$ 1,171,700	19%
o	Cost associated with the operation of the Anchorage Transfer Facility	\$ 1,290,900	21%
	TOTAL ADJUSTMENTS	\$ 1,357,200	22%

Capital Budget

Capital expenditures planned for 1987 consist of \$1,075,000 to construct a Hazardous Waste Storage/Transfer Facility and \$462,000 for equipment replacement. Funding for the Hazardous Waste Storage/Transfer Facility consists of \$375,000 from a State Department of Environmental Conservation grant and \$700,000 in general obligation bonds which will appear on the October, 1986 ballot. Funding for the scheduled replacement of solid waste equipment will come from accumulated depreciation.

PUBLIC UTILITIES	8000	SOLID WASTE SERVICES	8900		

Fund 0566 is an internal service fund which provides the Solid Waste Services Department with administrative and equipment maintenance services. One hundred percent of the cost incurred by this fund is charged to either Processing and Disposal, Fund 0562/0563 or to Refuse Collection, Fund 0560/0561.

Administration

The budget unit cost for Solid Waste Administration is planned to increase by 24 percent in 1987. About 21 percent, or \$203,000 is associated with the planned assumption of customer billing and accounts receivable activities. These functions were previously performed by Utility Customer Service and Municipal Data Processing. The remaining 3 percent is the result of inflationary impacts.

Equipment Maintenance

The budget unit cost for Equipment Maintenance is planned to increase by 13 percent in 1987. Approximately 9 percent is due to the increased support required by the new landfill and transfer facility. Two Mechanics and two Equipment Servicemen are required to maintain the additional equipment. The remaining 4 percent is caused by inflationary impacts.
