

Annual Statistical Report

2010

Anchorage Police Department

Introduction

Purpose

This annual report reflects the current criminal activity level within the Anchorage Metropolitan Police Service Area and compares it to years past. It also identifies crime trends and documents services provided to the community by the Anchorage Police Department. Many factors influence the numbers herein, including population changes, economics, reporting procedures, law enforcement resources, and legislative actions. These elements should be kept in mind when reviewing the data.

Organization

The report is divided into two parts. Part I, the *Uniform Crime Report (UCR) Section (page 1)* contains statistics related to offenses and incidents as defined by the Federal Bureau of Investigation (FBI) in its annual report, *Crime in the United States*. Part II, the *APD Section (page 13)* contains statistics related to offenses and incidents as defined by Alaska Statute and Anchorage Municipal Code.

The difference between these two parts is significant and the result of differing definitions and reporting hierarchy. For example, the State and Municipal definitions of *Sexual Assault* are different from the FBI definition of *Forcible Rape*. Since these differences routinely exist across the country, a comparison of jurisdictions would be difficult. Thus, the UCR program provides a common yardstick for measurement.

The UCR program also offers a national view of crime based on a codified reporting structure. The system divides crime into two categories: *Part I* crimes are eight, serious and frequently-occurring crimes that make up the national crime index. They are classified according to a strict hierarchy in which only the most serious crime in each incident is counted. *Part II* crimes encompass the remainder of crimes reported to the FBI and consist of less serious crimes and misdemeanors.

The *hierarchy rule* used in the UCR states that if two or more offenses occur in one event, the most serious crime is the one reported. For example, if an assault occurs while the victim's property is being damaged, only the assault is reported to the FBI. Or, if the victim of a burglary were killed during commission of the burglary, only the homicide would be reported. The Hierarchy of UCR Part I crimes is: 1- Murder, 2 - Forcible Rape, 3 - Robbery, 4 - Aggravated Assault, 5 - Burglary, 6 - Theft, 7- Motor Vehicle Theft 8 - Arson¹.

Source of Data

The majority of this data is gathered from the APD Records Management System and the Computer Aided Dispatch system. Other contributors include the Department of Community Planning and Development, the State of Alaska and the Anchorage Parking Authority.

Some statistics for 1997 are incomplete due to a mid-year replacement of police records management and dispatch systems. These have been noted accordingly.

Police Reports 2006-2010

Police Reports are Calls for Service that results in official documentation of the incident. These reports form the basis of local, state, and federal crime statistics. Beginning in 2008 the method of counting reports changed to reflect the introduction of Mobile Data Computers and the automation of entering reports into the Records Management System. Reports will now be counted using report numbers issued rather than the number of paper reports received.
