

ON-SITE SYSTEMS TECHNICAL REVIEW BOARD

SUMMARY OF ACTION

September 14, 2005

Members Present: Mark Musial PE, Chairman, David Beveridge PE,
Joel Neimeyer PE, Linda Kovac, Homeowner

Advisory Members:

Staff Present: Dan Roth, Program Manager, Kathy Maricle, Permit
Clerk, Hallie Stewart, AWWU

Guests:

Meeting called to order at 1200. Introductions were made.

June minutes were reviewed. Motion was made by Joel Neimeyer to accept the minutes, Linda Kovac seconded the motion.

Dan Roth spoke with Michael Johnson who said he does need an Annual Report, but it can be brief. Linda Kovac made the suggestions for the Annual Report to include work done on the well code, testing of the new advanced wastewater system (SCAT), and NPDES. Mark Musial will work on the Annual Report, and may present it at the next Tech Board meeting.

Dan Roth mentioned that some of the Tech Board member terms are expiring, and they will re-up for another term. Tech Board members reviewed the submittal from Garness Engineering of two (2) homes that currently have the new advanced wastewater system SCAT installed. Dan Roth stated that currently it is approved as a category 2 system, but that Garness Engineering will do further testing to try to upgrade to a category 3 system. Dan Roth also stated that the Anchorage Assembly will be reviewing the Well Code, sometime within the next 2 weeks, and that Ron Thompson and Dan will be there to answer any questions that may arise.

The Tech Board also talked about starting a review of the Wastewater Code some time this fall. Joel Neimeyer would like any comments from the On-Site staff concerning the wastewater code be emailed to board members.

Meeting adjourned at 1255.
