SUBJECT: Observer Complaints – Vendor Representative On-Site

On April 19, 2022, a vendor representative visited the Election Center. All of the above complaints involve questions about this visit.

The MOA Election Center team noticed that the Election Summary Reports of four (4) LSRAs were not correct on the results reports. After consultation, the vendor thought the reports were not “sync-ing” with the vote tabulation, namely the votes of write-in candidates were not being reported. An MOA election Center staff member downloaded the April 2022 election onto an encrypted thumb drive and gave it to a vendor technician. The technician tested a correction on the vendor’s laptop. It worked, so the technician made the same correction to the Election Center server, and the four (4) LSRAs were now “sync-ed.” A copy of the corrected Election Summary Report was given to Observers in the Election Center at the time of the correction.

COMPLAINT	SPECIFIC INFORMATION REGARDING COMPLAINT, INCLUDING ELECTION OFFICIAL NAME, IF APPLICABLE:
	<p>Arriving at 10:30am, I observed a gentleman working at his laptop in the adjudication area. When I inquired what he was working on he said he was "validating the database." A while later after the green progress bar function completed, he went to get election worker Liz and had her enter her login credentials in a window on his laptop. He resumed control of his computer (laptop). A couple hours after that, the server cage was unlocked, server case opened and thumb drive inserted. Upon questioning, Liz said that they were cleaning data on the tables because they had used the names "Jane Doe" and "John Doe" to test write-in and had been unable to delete them. We then learned the worker conducting the work on the laptop and server manipulation is employed by Dominion. I made a comment that in my software testing experience, test data isn't entered in the live environment. There shouldn't be any reason that data is deleted from the tables in the live environment.</p>
