TO: Ruby E. Smith - Municipal Clerk
FROM: Data Processing Review Board (DPRB)
SUBJECT: Municipal Election of October 7, 1986

It is the opinion of this Board that the computer tests performed prior to and during the election process, and all their related procedures resulted in an accurate tally of all ballots processed on the computer. In support of this opinion the Board has given you all the control tests, console logs and testing materials. Attached is an outline of testing procedures we used for this election.

The computer operations group and election personnel were well prepared for this election. Operations personnel, particularly those assigned to the card readers, carried out their functions accurately and professionally. There was an improvement in the availability of computer time resulting in more efficient testing. The support from the Municipality's applications programming personnel was very professional. The Board would like to commend the professional participation and expertise of Tony Tyskiewicz, Les Parsons and Bill Smith. This level of support is greatly appreciated and is significant in providing a well organized environment to work in.

Again, we were pleased to have the computer systems personnel provide us with a stand-alone system on the IBM 3081. We fully understand the hardships it places on other on-line systems and production work loads. The added security of a stand-alone system assures us that no other computer activity is possible while the ballot counting program is in execution. We recommend this procedure be provided in future elections.

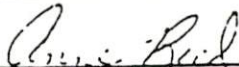

The increased security and roped-off areas for workers and observers, and an Election Central in the Egan Center is an added plus. The DPRB was able to concentrate on counting ballots and not be overly concerned with non-workers in a secured area.

The Board would like to commend the Clerk's Office, particularly Ruby Smith and Judy Flitter for their professional participation and expertise in making this an efficient, well-run election. Their constant and professional assistance during the entire election process was appreciated.

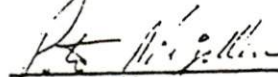

The Board reaffirms our position that all phases of computer processing performed in support of the October 7, 1986 Municipal Election resulted in an accurate tally of all computer counted ballots.
