

MUNICIPALITY OF
ANCHORAGE

Hyland OnBase is replacing the current PACE/Sire/Granicus applications used for Agenda and Meeting Management.

The Administration, Assembly, certain Boards and Commissions, and the Clerk's Office currently utilize several applications for their Agenda creation and Meeting Management process: PACE, Sire, and Granicus. Converting to Hyland's OnBase solution will consolidate three applications into one, streamlining the Agenda and Meeting Management experience for both Municipal users and public viewers.

UPGRADE BENEFITS

- Improve productivity
- Improved public services
- Reduce costs
- Decrease workflow complexity
