ANCHORAGE, ALASKA
AO No. 2023-136(S)

AN ORDINANCE OF THE ANCHORAGE MUNICIPAL ASSEMBLY AMENDING
BUILDING CODES AT ANCHORAGE MUNICIPAL CODE CHAPTER 23.10,
ANCHORAGE ADMINISTRATIVE CODE 2018 EDITION, TO ALLOW OPTIONAL
INDEPENDENT PLAN REVIEW OF STRUCTURAL DESIGN FOR COMMERCIAL
BUILDING PERMITS.

WHEREAS, Title 23 of Anchorage Municipal Code provides applicants applying for a
residential single-family or two-family building permit the option to use independent
reviewing professionals for plan review; and

WHEREAS, the Anchorage building community utilizes this option frequently, saving
Anchorage residents and Municipality of Anchorage staff, time and resources; and

WHEREAS, this ordinance would provide applicants applying for a commercial
building permit the option to use an independent reviewing professional for review of
structural plans only; now, therefore,

THE ANCHORAGE ASSEMBLY ORDAINS:

Section 1. Anchorage Municipal Code section 23.10.104.9 is hereby amended to
read as follows:

23.10.104.9 – Optional independent single-family, [AND] two-family, and
three-unit dwelling plan review; commercial plan review.

A. Residential one-, two-, and three-family dwellings. For residential one-
family, [SINGLE-FAMILY OR] two-family, or three-unit dwelling permit
applications, the permit applicant shall have the qualified option for
independent reviewing professionals, as described in this subsection [B
BELOW], to accept responsibility for plan review and building code
compliance for the permit. For permit applications submitted under this
provision, it shall not be the responsibility of the building official to
review the application for compliance with applicable building codes.
The building official shall conduct or cause to be conducted reviews for
zoning, address, flood, NPDES, storm water and any other reviews
necessary for the project.

1. [A.] The applicant’s exercise of the option and the identity of the
independent reviewing professionals shall be designated on the
building permit application in accordance with this section.

2. [B.] Plan review shall be conducted by independent reviewing
professionals as follows:

a. [1.] Review of the structural plans and calculations shall be conducted by a professional engineer currently registered by the State of Alaska Board of Registration for Architects, Engineers and Land Surveyors as either a structural engineer or a civil engineer. A reviewing civil engineer must be able to demonstrate experience in structural engineering.

b. [2.] Review of the plans for fire code compliance and building safety shall be conducted by either

i.[(i)] an individual certified as a Building Plans Examiner or Residential Plans Examiner by the International Code Council (ICC), or

ii.[(ii)] a professional architect registered by the State of Alaska Board of Registration for Architects, Engineers and Land Surveyors.

c. [3.] The structural review and the review for fire code compliance and building safety may be conducted by a single individual if that individual meets the certification requirements set forth in both subsections 2.a. and 2.b.[B.1 AND B.2], above.

d. [4.] No application will be accepted where an independent reviewing professional [HAS] also serves[D] as the designer or builder of the project.

3. [C.] A complete building permit application reviewed pursuant to this section shall include:

a.[1.] Complete building plans and structural calculations;

b. [2.] Plot plan;

c. [3.] Completed storm water discharge permit application;

d. [4.] Letter of review signed by the appropriate independent reviewing professional demonstrating experience in structural engineering certifying structural plans, calculations, fire code compliance, building safety, accepting responsibility for plan review, as required by this section;

e. [5.] Signed release of liability, as required by this section; and

4. [D.] The plans, calculations and all documents required under this section may be submitted electronically via the department's electronic plan review software [KNOWN AS E-PLANS].

5. [E.] The building official shall confirm the application includes the materials required by sections 23.10.104.9 and 23.10.104.10. If complete and compliant with Title 21 regulations, the application shall be accepted, and the building official shall issue the permit provided that:

a. [1.] The permit application demonstrates the plans and specifications for residential single-family, [AND/OR] two-family, and/or three-unit dwellings have been reviewed by independent reviewing professionals. Each reviewing
professional must submit a signed letter of review with
the plans describing the scope of their review and
including the details of their credentials to conduct such
review. Each reviewing professional must include their
registration number and the related expiration date.

b. [2.] The permit applicant and the independent reviewing
professionals confirm in writing that the independent
reviewing professionals accept responsibility for the plan
review.

c. [3.] Each independent reviewing professional either:
   i. [a.] Submits to the building official, in concert with the
      letter of review, a waiver of claims against the
      Municipality of Anchorage for all damages, losses
      and expenses, arising out of or resulting from the
      performance of the review, to the fullest extent
      permitted by law and on a form satisfactory to the
      Municipality of Anchorage Office of Risk
      Management, executed by
         (A) [(i)] the reviewing professional;
         (B) [(ii)] the building construction contractor; and
         (C) [(iii)] the current owner of the property and any
                  party under contract to purchase the
                  property within a year of its completion; or
   ii. [b.] Provides proof that they maintain professional
          liability insurance meeting each of the following
          requirements:
             (A) [i.] Plan review and building code compliance
                     review under Anchorage Municipal Code
                     are within the scope of the professional
                     liability insurance coverage.
             (B) [ii.] The professional liability insurance
                       provides a minimum of $250,000 in
                       coverage.
             (C) [iii.] Coverage extends for no less than two
                         years from completion of the project
                         construction. If the existing policy does not
                         extend for the duration of this period, the
                         independent reviewing professional must
                         specify in his or her reviewing letter when
                         the policy expires and that it will be
                         renewed to ensure continuous coverage for
                         no less than two years from the date of
                         completion.

d. [4.] Each independent reviewing professional indemnifies,
       holds harmless and states they shall defend the
       Municipality of Anchorage from and against all claims,
       damages, losses and expenses, including but not limited
       to attorney fees and costs, arising out of or resulting from
       the performance of the review to the fullest extent
       permitted by law.
6. [F.] Reviewing professionals do not have authority to approve code modifications or alternative materials, designs, and methods of construction and equipment as defined in this code. Any request for consideration of code modifications or alternative materials, designs, and methods of construction and equipment shall be submitted to the building official for approval prior to or along with the permit application under the optional process.

7. [G.] The building official may
   a. revoke the privilege afforded by this section of any individual who displays incompetence or lack of knowledge in matters relevant to the design and construction of [ONE- AND TWO-FAMILY] dwellings covered by this section, or who commits fraudulent acts.
   b. issue a notice to any individual finding the person is grossly negligent in conducting independent plan reviews for residential dwellings submitted under this subsection. The building official shall have the right to audit all submitted plans reviewed by that independent reviewing professional for a time period stated in the notice, not to exceed two years. Such notice is subject to appeal pursuant to section 23.10.103.4.

B. Commercial. For commercial permit applications, the permit applicant shall have the qualified option for an independent reviewing professional, as described in this subsection, to accept responsibility for structural plan review for the permit. For permit applications submitted under this provision, it shall not be the responsibility of the building official to review the application for compliance with applicable building codes regarding structural design requirements. The building official shall conduct or cause to be conducted reviews for fire, electrical, plumbing, zoning, address, flood, NPDES, storm water and any other reviews necessary for the project.

1. The applicant's exercise of the option and the identity of the independent reviewing professional shall be designated on the building permit application in accordance with this section.
   [a. Exclusions. This option is not available for significant structures as defined in state regulation, 12 AAC 36.990.]

2. Plan review shall be conducted by independent reviewing professionals as follows:
   a. Review of the structural plans and calculations shall be conducted by a professional engineer currently registered by the State of Alaska Board of Registration for Architects, Engineers and Land Surveyors as either a structural engineer or a civil engineer. A reviewing civil engineer must be able to demonstrate experience in structural engineering.
   b. If the application is for a significant structure, as defined in state law at 12 AAC 36.990, the review may only be by a person
i. who has engaged in professional work as a registered structural engineer with the state for more than four years and experienced responsible control for significant structure designs, and has been the design professional in responsible charge for at least two significant structure building permits in the state, or the equivalent role in another jurisdiction; or

ii. that has been previously approved by the building official to be an independent plan reviewer for a significant structure and has not had that privilege revoked under this section.

c. No application will be accepted where an independent reviewing professional also serves as the designer or builder of the project.

3. A complete building permit application reviewed pursuant to this section shall include:

a. Complete building plans and structural calculations;

b. Plot plan;

c. Completed storm water discharge permit application;

d. Letter of review signed by the appropriate independent reviewing professional demonstrating experience in structural engineering certifying structural plans and calculations, and accepting responsibility for plan review, as required by this section;

e. if the permit application is for a significant structure, a resume or other documentation showing the person meets the requirements to be an independent plan reviewer for such structures;

f. Signed release of liability, as required by this section; and

g. Any geotechnical reports required by Titles 21 and 23 of the Anchorage Municipal Code.

4. The plans, calculations and all documents required under this section may be submitted electronically via the department’s electronic plan review software.

5. The building official shall confirm the application includes the materials required by sections 23.10.104.9 and 23.10.104.10. If complete and compliant with Title 21 regulations, the application shall be accepted, and the building official shall issue the permit provided that:

a. The permit application demonstrates the plans and specifications for the commercial building has been reviewed by an independent reviewing professional. The reviewing professional must submit a signed letter of review with the plans describing the scope of the review and including the details of the professional’s credentials to conduct such review. The reviewing professional must include registration number and the related expiration
b. The permit applicant and the independent reviewing professional confirm in writing that the independent reviewing professional accepts responsibility for the plan review.

c. The independent reviewing professional provides proof that the person maintains professional liability insurance meeting each of the following requirements:

i. Plan review and building code compliance review under Anchorage Municipal Code are within the scope of the professional liability insurance coverage.

ii. The professional liability insurance provides a minimum coverage of $1,000,000 or fifty percent (50%) of the estimated valuation of the building or project, whichever is greater.

iii. Coverage extends for no less than two years from completion of the project construction. If the existing policy does not extend for the duration of this period, the independent reviewing professional must specify in his or her reviewing letter when the policy expires and that it will be renewed to ensure continuous coverage for no less than two years from the date of completion.

d. The independent reviewing professional indemnifies, holds harmless and states he/she shall defend the Municipality of Anchorage from and against all claims, damages, losses and expenses, including but not limited to attorney fees and costs, arising out of or resulting from the performance of the review to the fullest extent permitted by law.

6. Reviewing professionals do not have authority to approve code modifications or alternative materials, designs, and methods of construction and equipment as defined in this code. Any request for consideration of code modifications or alternative materials, designs, and methods of construction and equipment shall be submitted to the building official for approval prior to or along with the permit application under the optional process.

7. The building official may

a. revoke the privilege afforded by this section of any individual who displays incompetence or lack of knowledge in matters relevant to the design and construction of commercial buildings, or who commits fraudulent acts.

b. issue a notice to any individual finding the person is grossly negligent in conducting independent structural plan reviews. The building official shall have the right to audit all submitted plans reviewed by that independent reviewing professional for a time period stated in the notice, not to exceed two years. Such notice is subject to
appeal pursuant to section 23.10.103.4.

C[H]. The building official may audit the reviews conducted by independent reviewing professionals as necessary to enforce the provisions of this code.

1. At a minimum, the building official shall audit ten percent of the structural plans submitted for commercial permit applications under subsection B.

2. At the direction of the owner or the owner’s authorized agent, the building official shall audit a plan submitted under this section.

(AO No. 2020-85, § 1, 10-27-20; AO No. 2021-88(S), § 3, 2-15-22)

Section 2. Anchorage Municipal Code 23.10. Table 3-B, Plan Review Fees, is hereby amended to read as follows (the remainder of the section is not affected and therefore not set out):

23.10. Table 3-B - Plan review fees.

Municipal Clerk
From: Assembly Members Cross, Sulte and Brawley

Subject: AO 2023-136(S): AN ORDINANCE OF THE ANCHORAGE MUNICIPAL ASSEMBLY AMENDING BUILDING CODES AT ANCHORAGE MUNICIPAL CODE CHAPTER 23.10, ANCHORAGE ADMINISTRATIVE CODE 2018 EDITION, TO ALLOW OPTIONAL INDEPENDENT PLAN REVIEW OF STRUCTURAL DESIGN FOR COMMERCIAL BUILDING PERMITS.

This supplemental memorandum is provided with the (S) version of the ordinance pursuant to AMC 2.30.050E. The original AO 2023-136 excluded review of plans for “significant structures” from the option for an independent plan reviewing professional. The proposed (S) version includes a significant change by allowing an independent plan reviewer for significant structures only the person is able to demonstrate they have a proven record of experience and professional performance in the field of structural engineering, including with significant structure designs. If a professional engineer can show they have this proven work history, there is no reason to limit the scope of their work by excluding significant structures from this option for independent plan review.

The changes in the (S) version are on:

- Page 4, line 36: to delete the exclusion of significant structures.
- Page 4, line 48: to establish the minimum requirements for a person to qualify as a reviewer for plans for a significant structure.
- Page 5, line 28: to require the permit application submitted for a significant structure, if using an independent plan reviewer, to include the information necessary for the Building Official to determine the person is qualified.
- Page 7: In addition to the above, AO 2023-130(S) passed by the Assembly on January 16, 2024, amended AMC 23.10.Table 3-B, and its changes are included in 1.A.(3) as well as the history note at the end of the table.

The minimum qualifications for a person to qualify as an independent reviewing professional for a significant structure relies on terms of art that are defined in the State of Alaska’s regulations for a professional engineer registered structural engineer. Understanding these facilitates understanding and confidence in allowing this option for significant structures. The following terms are used in AMC subsection 23.10.104.9.B.2.b., new in the (S) version on p. 4 line 48, and defined in State of Alaska regulations for licensing of professional engineers at 12 AAC 36.990(a):

(18) “professional work” means the time the applicant has been occupied in architecture, engineering, land surveying, or landscape architecture work of higher grade and responsibility than that of subprofessional work;
(30) “responsible control” means that amount of control over and detailed knowledge of the content of technical submissions during their preparation as is ordinarily exercised by registered engineers, land surveyors, and landscape architects applying the required professional standard of care;

(42) “structural engineering” means the branch of professional engineering that embraces the studies and activities relating to the investigation, evaluation, analysis, design and construction of buildings, bridges, and other structures such as walls, columns, slabs, beams, trusses, or similar members requiring force-resisting and load bearing members and their connections, or similar members used singly or as a part of a larger structure, and the organizational and economic aspects of these studies and activities.

(47) “progressive structural experience” means the experience gained by an applicant as a structural engineer while designing one or more significant structures under the responsible charge of a registered structural engineer; This term “progressive structural experience” is relevant to qualifications because at least two years of this experience is required before a person may take the State of Alaska’s structural engineering examination to become registered, in addition to already holding a professional engineering license in a branch of engineering other than structural, set forth in 12 AAC 36.063(k):

(k) To be eligible for the structural engineering examination, an applicant must
(1) be currently registered as a professional engineer in this state; and
(2) have at least two years of progressive structural experience, in addition to the eight years of education and work experience or both that are equivalent to the requirements set out in the applicable table of education and work experience requirements for a professional engineering examination in this section. Finally, the full definition of the types of structures is provided in 12 AAC 36.990(a)(44):

(44) “significant structures” means
(A) hazardous facilities; in this paragraph, “hazardous facilities” means structures, housing, supporting, or containing sufficient quantities of toxic or explosive substance to be of danger to the safety of the public if released;
(B) special occupancy structures; in this paragraph, “special occupancy structures” means
(i) buildings and other structures whose primary occupancy is public assembly with an occupant load greater than 300;
(ii) buildings and other structures containing an elementary school, secondary school, or day care facility with an occupant load greater than 250;
(iii) buildings and other structures containing adult education facilities, such as colleges and universities, with an occupant load greater than 500;
(iv) medical facilities with 50 or more resident, incapacitated patients;
(v) jails and detention facilities; and
(vi) all buildings or structures with an occupant load greater than 5,000;
(C) essential facilities that have a ground area of more than 4,000 square
feet and are more than 20 feet in mean roof height above average ground
level; in this paragraph, “essential facilities” means
(i) hospitals and other medical facilities having surgery and emergency
treatment areas;
(ii) fire and police stations;
(iii) tanks or other structures containing, housing, or supporting water or fire
suppression material or equipment required for the protection of essential or
hazardous facilities or special occupancy structures;
(iv) emergency vehicle shelters and garages;
(v) structures and equipment in emergency preparedness centers;
(vi) standby power-generating equipment for essential facilities;
(vii) structures and equipment in government communication centers and
other facilities requiring emergency response;
(viii) aviation control towers, air traffic control centers, and emergency aircraft
hangars; and
(ix) buildings and other structures having critical national defense functions;
(D) structures exceeding 100 feet in height above average ground level;
(E) buildings that are customarily occupied by human beings and are four
stories or 45 feet or more above average ground level; and
(F) bridges having a total span of more than 200 feet and piers having a
surface area greater than 10,000 square feet;

The stringent requirements to first become a professional structural engineer
registered with the State, coupled with the minimum experience working with
significant structure designs, including as the primary design professional in
responsible charge for at least two significant structure building permits, should
instill the confidence in such persons to perform as an independent reviewer. The
Municipality and developers should be able to utilize these skills of a person
possessing such high qualifications for significant structure projects, as well as other
commercial construction.

We request your support for the (S) version of the ordinance.
