ANCHORAGE, ALASKA
AR No. 2023-97, As Amended

A RESOLUTION OF THE ANCHORAGE MUNICIPAL ASSEMBLY ADOPTING
THE "CLEAN SLATE STRATEGY"

WHEREAS, since 2020, the Municipality has tried and failed multiple times to create a new permanent year-round low-barrier shelter; and

WHEREAS, on June 19, 2020, Mayor Ethan Berkowitz brought forward a proposal to, among other things, purchase the Alaska Club for usage as shelter\(^1\); and

WHEREAS, throughout the public hearing of AO 2022-66(S), there was community pushback on the proposal, and in the end the Assembly decided to approve the purchase of the Alaska Club\(^2\); and

WHEREAS, in May of 2021, Acting Mayor Austin Quinn-Davidson announced that the Municipality had entered into a purchase agreement on the Alaska Club, but left the final decision up to the newly elected Mayor\(^3\); and

WHEREAS, shortly after being sworn in on July 1, 2021, Mayor Dave Bronson made the decision not to move forward with the purchase of the Alaska Club\(^4\); and

WHEREAS, in June, before getting sworn into office, Mayor-Elect Bronson brought forward the idea of a mass shelter known as the Tudor and Elmore Navigation Center, which would have 450 beds with the potential to go up to 1,000 beds\(^5\); and

WHEREAS, this proposal brought forward mixed reactions, with much community pushback from East Anchorage residents\(^6\); and

WHEREAS, in the end, the Assembly decided to halt progress on the Tudor and Elmore Navigation Center through the rejection of AM 496-2022; and

\(^1\) “Anchorage wants to buy 4 properties to relieve homelessness”: https://apnews.com/article/virus-outbreak-ak-state-wire-ethan-berkowitz-alaska-anchorage-ab0154c9b7db2738ccf192846913d74c

\(^4\) See footnote 3.

\(^5\) “Here’s what we know about the new Anchorage mayor’s plan for a massive homeless shelter”: https://www.yahoo.com/now/bronson-administration-not-buy-former-220500436.html

\(^6\) See footnote 5.
WHEREAS, in October of 2021, the facilitated collaborative process put out a
Request for Information (RFI) for any potential sites for a navigation center; and

WHEREAS, on October 14, 2021, Faith Christian Community, the owner of the
Arctic Recreation Center, submitted an Intent to Respond to the navigation center
RFI; and

WHEREAS, the Arctic Recreation Center did not meet the criteria of the facilitated
collaborative process, namely that they were looking for a facility that could
accommodate 330 beds, be open by May 2022, and cost under $10 million, so the
facilitated collaborative process took the Arctic Recreation Center off the table; and

WHEREAS, in October of 2022, the Emergency Cold Weather Shelter Task Force
brought forward a comparison between the Arctic Recreation Center and the Tudor
and Elmore Navigation Center as the Assembly considered AM 496-2022; and

WHEREAS, in February of 2023, the Emergency Shelter Task Force officially
recommended that the Municipality of Anchorage consider the purchase of the
Arctic Recreation Center; and

WHEREAS, some Assembly members traveled to Juneau in February of 2023 to
attend the Alaska Municipal League Winter Legislative Conference and, based on
a recommendation, spoke to Anchorage legislators about the potential of the Arctic
Recreation Center to meet shelter needs in the Municipality; and

WHEREAS, a press release sent out on February 24 regarding the Arctic
Recreation Center caused alarm from the Taku Campell and Midtown Community
Councils and residents of Windemere; and

WHEREAS, since the press release, feedback has mirrored the beginning of
community pushback we saw from both the Alaska Club and the Tudor and Elmore
Navigation Center; and

WHEREAS, this “Clean Slate Strategy” will help to create a realistic pathway
forward towards achieving the goal of creating a new permanent year-round low-
barrier shelter in 2023; now, therefore,

THE ANCHORAGE ASSEMBLY RESOLVES

Section 1. No decisions on permanent year-round low barrier shelter shall be
made prior to meeting the obligations in sections 2 and 3.

[Section 1. The Arctic Recreation Center will be taken off the table for consideration
as a permanent year-round low-barrier shelter.]

[Section 2. The Tudor and Elmore Navigation Center will be taken off the table for
consideration as a permanent year-round low-barrier shelter.]
Section 2[3]. The Assembly reaffirms its policy in AR 2018-167, As Amended, which “declares it a public policy of the Municipality to, when it has the opportunity to do so, first consider locating or recommending locations dispersed throughout all other areas of the Anchorage Bowl” and “this public policy also recognizes that to end homelessness in the long term and simultaneously support the revitalization of east downtown and north Fairview, dispersed placement of such services throughout the Anchorage Bowl is reasonable and necessary.”

Section 3[4]. The Assembly will develop criteria for any future proposed permanent shelter regarding the interaction between shelter and neighborhoods as well as shelter and other institutions. Criteria will be brought before the Assembly for adoption via Assembly Resolution and have a public hearing.

Section 4[5]. It is the policy goal of the Municipality of Anchorage to open a new permanent year-round low-barrier shelter by November 1, 2023.

Section 5[6]. All decision points towards the selection of a permanent year-round low-barrier shelter will be discussed in publicly noticed meetings. The Assembly will develop and publish on its website a timeline and process to allow the community to engage as much as possible.

PASSED AND APPROVED by the Anchorage Assembly this 21st day of March, 2023.

Chair

ATTEST:

Jennifer Veenklaas
Municipal Clerk
From: ASSEMBLY MEMBER RIVERA

Subject: Assembly Resolution adopting the “Clean Slate Strategy”

6. Arctic Rec and Tudor and Elmore Comparison
7. Emergency Shelter Task Force Recommendations
8. Legislative Handout on Housing and Homelessness
10. AR 2018-165, As Amended

Prepared by: Assembly Counsel’s Office
Respectfully submitted: Felix Rivera, Assembly Member
District 4, Midtown
FROM: MAYOR

SUBJECT: AMENDMENT 2 TO CONTRACT (2022001049) WITH ROGER HICKEL CONTRACTING (RHC) FOR CONSTRUCTION MANAGER/GENERAL CONTRACTOR (CM/GC) SERVICES FOR THE NAVIGATION CENTER BUILDING FOR THE MUNICIPALITY OF ANCHORAGE (MOA), MAINTENANCE AND OPERATIONS DEPARTMENT (M&O) ($4,900,000.00).

On March 21, 2022, MOA Purchasing approved a Contract with RHC for Pre-Construction Management (CM) services for the MOA Navigation Center as the result of Request for Proposal 2022P007. Of the two proposals received, reviewed, and evaluated, RHC received the highest score. The contract amount was $50,000.00 and the period of performance was through December 31, 2022. M&O is now requesting approval of the addition of General Contractor (GC) construction services at a Not to Exceed (NTE) cost of $4,900,000.00 and a contract extension through June 30, 2023. This will increase the contract amount from $50,000.00 to $4,950,000.00.

Amendment No. 1, approved May 31, 2022, added certain construction documents to the Contract with no increase to the NTE or extension of the expiration date.

Proposed Amendment 2 adds GC services for an additional amount of $4,900,000.00. Due to complexities associated with design, construction, and current market conditions, it was decided early on that the CM/GC (aka Contractor Manager at Risk or CMAR) approach would best deliver the project in the least amount of time and cost, versus the traditional design, bid, build, or design-build process.

The CM/GC approach is a common contracting method commonly used on large and complex construction projects. It has been used on several large MOA projects, so it is not a new concept. In the first phase, the Contract is approved as a CM contract only, where the Contractor assists others in the design of the project by providing input on constructability, risk, safety, scheduling, and cost reconciliation. The result of this effort is that one or multiple Work Packages are in progress. The CM may construct the Work Packages (GC) based on a negotiated Guaranteed Maximum Price (GMP) validated by a third-party estimator. If the MOA and the CM cannot agree on the GMP, then the Scope of Work identified in the Work Package(s) is bid through the standard Invitation to Bid process.
Based upon the above information and attached Memorandum, it is recommended that the Assembly approve the contract increase from $50,000 to $4,950,000.00 and a contract extension through June 3, 2023.

Recommended by: Lance Wilber, Public Works Director
Approved by: Rachelle A. Alger, Purchasing Director
Fund certification: Ross Risvold, Acting CFO

401800-PF22001-540640 – NRB - $4,900,000.00 (Areawide General CIP Contributions)

Concur: Amy Demboski, Municipal Manager
Respectfully submitted: Dave Bronson, Mayor
Date: August 31st, 2022

To: Rachelle Alger, Purchasing Director
To: Lance Wilber, Public Works Director

From: Saxton Shearer, Director, Maintenance & Ops

Subject: Navigation Center Roger Hickel General Contractor Award

Maintenance and Operations is currently under contract with Roger Hickel Contracting for pre-construction services previously awarded March 21, 2022, this is for the Navigation Center. Award the GC part of the CM/GC contract to Hickel. To date, $50,000 has been granted to Roger Hickel Contracting through the competitive process for construction management. In accordance with Title 7 section 7.15.040, Assembly approval was not required.

The project is transitioning from Pre-Construction services into guaranteed maximum price negotiations. Maintenance & Operations is requesting (General Contract award) to Roger Hickel Construction in the amount of $4,900,000 reappropriated from previously appropriated funds on AO 18 2020-99, As Amended for property acquisition, within the Areawide General Capital 19 Improvement Projects Fund (401800).

401800 – PF22001 – 540640 – NRB - $4,900,000

Municipality of Anchorage    Email: wwpur@muni.org
Purchasing Department
632 W. 6th Ave
Anchorage, AK 99501

Attn: Joel Hayenga, Deputy Purchasing Officer

Re: RFI 2021RFI001
   Community Sites for Navigation and Housing
   Intent to Respond

Joel:

Attached is the Intent to Respond from Faith Christian Community. The location of the property is 4855 Arctic Blvd., Anchorage, AK. This is a building with approximately 25,306 square feet, with concrete slab foundation and metal construction. The building sets on a 16.5 acre lot.

The property legal description is: Doubletree Center #1, Blk 2 Tr A.

Presently the building is used for the Arctic Recreation Center, a 501(c)3 non-profit corporation and a ministry of Faith Christian Community.

A church without walls releasing the kingdom of God by carrying the light of Christ into the darkness.
The requirements of the site follows:

Vacant Lot Site Requirements:

1. Lot size is 16.5 acres (720,339 square feet) in total with building, parking, ball fields, etc.
2. All utilities are connected to the building and on site.
3. There are two access roads on each side of the building and use Arctic Blvd as their main road.
4. A copy of the property tax exempt status is available, parcel identification number 009-221-27-000.
5. Zoning for the property is R-3.
6. The bus stop is within 100 feet from the property with bus pull off for passenger loading and unloading.

Existing Structure Requirements:
1. Occupancy by AFD is 1989 in the gymnasium. Common area is 384.
2. The bus stop is within 100 feet from the property.
3. All utilities are connected to the Municipal utilities.
4. Properly working HVAC on site.
5. There is capacity to add a back-up emergency generator.
6. Building has ADA compliant bathrooms available.
7. Parking for people with disabilities is provided.
9. Emergency exit plan is posted in the facility.
10. A floor plan is being obtained from NVision Architecture.
11. Current conditional use permit is available.
12. Building and fire inspections are compliant.
13. No tax liability as the property is church exempt.
14. No outstanding building or fire violations.
15. Proof of zoning type available from the Municipality.

Facilitated Collaborative Process
between Administration and Legislative Drafting Group
for Mass Care and Long-Term Navigation Decisions

Talking Points 112421

- The workgroup is meeting on a weekly basis and remains aligned and committed to implementing the client / community focused approach that was approved in AR2021-350.
- The group is identifying specific funding sources and discussing a collaborative funding strategy for implementing the overall plan.
- The group is exploring partnerships to secure potential funding source from ANCSA Regional Corporation Cares Act funds that expire at the end of 2021.
- The group is moving immediately to secure facilities to provide shelter and medical convalescence care for the most fragile. The location is expected to be available for service within 1-2 weeks to move of medically fragile out of Sullivan and other locations.
- The Administration will be issuing an RFP for construction of the navigation center / shelter for single adults (capacity of 200 beds with possible surge capacity of up to 150) within the next 7-10 days with a 3 week response time.
- A site has been identified for providing substance abuse treatment beds and plans are underway.

As previously communicated:

- AR2021-350: A Resolution of the Anchorage Assembly and Mayor’s Office in support of an Exit Strategy to End Mass Care and Implement an Integrated Client and Community Centered Approach to Addressing Homelessness was unanimously approved by the Assembly on November 1.
- The facilitated process is now transitioning to planning for implementation.
- Implementation planning will include refining homelessness census data, further evaluation of shelter / navigation center / treatment site locations, finance plans, operating plans, project plans and timelines, state/ federal government advocacy plans, community impact mitigation plans and ongoing community engagement efforts.
- Responses received to the RFI for Land and Sites for Navigation Centers / Shelters identified the following additional potential sites that will be evaluated for suitability:
  - Sockeye Inn
  - Alex Lodge & Suites (Former Barratt Inn)
  - Aptel Studio Hotel (Northway Mall)
  - 4855 Arctic Blvd (Faith Christian Community)
Former Alaska Club on Tudor

- We are all working together with commitment to collaborative process.
- We share goals to end homelessness and belief that navigation is only one part of the continuum of care; housing always a goal; shelter will be a part of navigation plans.
- Not politically focused – it’s about getting it right for the benefit of the community.
- Have agreed to a decision process that supports reaching agreement on quality decisions that are best for our community.
- Have agreed to a decision frame that includes problem statements, timeline, outcome goals, ranking criteria, alternatives to be considered and analysis to support decisions.
- Will socialize / communicate / vet progress with rest of Assembly and other key stakeholders and community partners to include Community Council’s as discussions move forward.

Timeline - TBD
March 19, 2023

Felix Rivera, Chair
Anchorage Assembly Housing and Homelessness Committee

Re: Arctic Rec Center History Summary

The Arctic Rec Center property was first identified as a potential shelter location in response to 2021RF1001 as part of the mass care exit strategy facilitated process. The Faith Christian Community response to the RFI is dated October 14, 2021.

In late 2021 the MOA Administration was pursuing the construction of a low barrier shelter navigation center at Tudor / Elmore with a 200 bed + 130 bed surge capacity as part of the mass care exit strategy approved in Resolution AR2021-350. The MOA Administration advised the facilitation group that the RFP for construction of the Tudor / Elmore facility would be issued in December 2021 with a targeted completion by May 2022 and an estimated cost of $9M. The facilitation group estimated that the Arctic Rec Center would likely cost more than $9M, have a capacity of approximately 150 beds and that it would not be likely to have the shelter in place in time for the scheduled mass care closure. Based on that information the Arctic Rec Center was not considered a feasible solution for the mass care exit strategy due to cost, schedule and capacity.

However, the RFP for the Tudor / Elmore shelter navigation center was not issued until late February 2022 and by April 2022 it was apparent that both the cost and schedule for the Tudor/Elmore facility were not on track with original estimates. The critical path schedule for Tudor / Elmore showed startup in February 2023 and the cost estimate had escalated by over 50% to nearly $14M.

In fall 2022 the Emergency Shelter Task Force re-evaluated the Arctic Rec Center as a potential site for emergency cold weather shelter and determined that it should be formally reviewed as a potential solution for a long term shelter navigation center with the additional opportunity for the development of affordable housing.

Sincerely

Belinda Breaux / Tom Barrett
Facilitators
On February 21, 2022, the Emergency Shelter Task Force met with 22 participants. The ES Task Force reached consensus as follows:

- The Sullivan Arena should be considered as an emergency shelter option regardless of cold weather triggers until there is an alternative, and there should be an immediate earnest look for an alternative location.
  - There should be substantial investigation and discussion about a year-round low barrier shelter option. The most viable option to date is the Arctic Rec Center. Not only is it nearly turnkey but it also comes with capacity for housing development. This shelter should be done like BFS or other privately run shelters. The MOA should maintain its role as funding agency.
- ES Taskforce has done considerable work in this area and is willing to continue to develop plans for the location if there is the will to find the capital and operating funding.
- There will be more unsheltered individuals in the summer regardless of whether an emergency shelter is available. Outreach to those individuals should be both contact and housing driven.

  **Two different outreach methodologies that can co-exist**

  **Contact Driven**
  - Meet basic needs, provide human contact, sometimes provide transportation services
  - Great at more immediate response
  - Engagement with a large volume of unsheltered persons
  - Most often highly visible
  - Can struggle with meeting the needs of people with complex, co-occurring issues
  - Can struggle to have time or does not have resources to navigate people through the process of getting housed
  - Most often measured by number of engagements
  - Current MOA investment

  **Housing Driven**
  - Intensive, assertive and housing focused with a smaller group of people
  - Struggles to provide a more immediate response; more focused on engagement for the long game
  - Can struggle with how to support people while waiting on other parts of the system to make decisions/allocate resources
  - Very deliberate in deciding who to engage and why – using Coordinated Entry
  - Not always highly visible
  - Capable of effectively working with people with higher acuity and complex needs
  - Effectiveness measured by how many people have positive exits from homelessness

- The Assembly should increase its investment in coordinated robust outreach that is coordinated with Healthy Spaces and MOA Parks and Rec to mitigate community impacts. Communication with the Outreach teams should occur BEFORE any abatement or cleaning occurs. Support for Outreach teams to be in the field 7 days per week with hours that go later in the evening should also occur.

Thank you for your consideration.
Legislative briefing: Housing & Homelessness
A STATEWIDE RESPONSE IS URGENTLY NEEDED

Why invest in housing & homelessness

- Anchorage has a significant housing gap and affordability crisis: it takes 72 work hours a week at minimum wage to be able to afford a 1-bdrm rental at market rate in Anchorage (1)
- Investing in housing is a good deal: housing people in converted hotels costs $26 dollars per person/day versus over $100 per person/day for congregate shelter (2)
- Increasing affordable housing simultaneously reduces homelessness and grows economies (3)

Homelessness in Anchorage is a state issue

- This is not just an Anchorage issue. Communities from Fairbanks to Sitka to Newtok are in a housing crisis and the negative impacts are overwhelming state services – public safety, health care, nonprofits, jobs, and education – and cause missed economic opportunities, worker shortages, and out-migration
- Anchorage is the only community in Southcentral with low-barrier emergency shelters; these shelter options serve people from the Mat-Su to the Kenai Peninsula
- State government has a mandate to “provide for the promotion and protection of public health” and to “provide for public welfare.” The homelessness crisis is a public health crisis
- As the state’s largest city, Anchorage’s economic and housing issues impact the entire state

Recent progress – a formula for success in Anchorage

- Despite a large-scale housing crisis during the pandemic, 500 fewer people were experiencing homelessness in Anchorage in September 2022 than in March 2020 (4)
- This is because partners in Anchorage have developed a winning approach: align private and public dollars to provide housing and the resources that help people stay housed
- In 2021-22, the Municipality of Anchorage invested more than $54 million in housing
  - Rasmuson Foundation, Calista Corporation, Chugach Alaska Corporation, Doyon Limited, CIRI Foundation, Providence Anchorage, Weidner Apartments and many others have also contributed millions to housing

Local communities can't do it alone – a statewide response is needed

State & local investments can work in tandem to leverage private investments. **2023 MOA Request to State:**

- **$20M in capital budget:** $14M for 100-125 units for building conversions to house low and extremely low income individuals (such as the Arctic Rec Center) + $6M toward low barrier shelter development
- **$5M in operating funds** for emergency shelters and extremely low income housing units
- Additionally, **state support is needed for substance misuse treatment and mental and behavioral health services** – some of the factors that increase the risks for people facing homelessness
A disabled veteran who had been experiencing unsheltered homelessness for almost 20 years, living in a tent and going to shelter occasionally, was recently housed in a hotel conversion. He now has income and paid his own security deposit, and had agency support with his first month rent so he could use his remaining income on supplies to set up his new home. Now that he is housed he will qualify for more assistance to help him continue to maintain his housing.
Anchorage Assembly Members Take Local Priorities to Juneau

This week, Assembly Members Kevin Cross, Pete Petersen and Austin Quinn-Davidson joined Assembly Chair Suzanne LaFrance on a trip to Juneau to advocate for Anchorage’s Legislative Priorities.

The Anchorage Assembly collaborated with the Administration to prepare the 2023 Anchorage Legislative Program, which outlines funding and policy requests made to the Alaska State Legislature.

While the program includes requests to fund projects in each Anchorage Senate District and throughout the Municipality, Assembly members brought four key priorities to legislators in Juneau:

- Maintain a commitment to investment in the Port of Alaska Modernization Program;
- Improvements to Alaska Statute 15 to strengthen Alaska’s Voter Registration Rolls and lower election costs for the Municipality;
- Investment in Anchorage’s Housing First approach, specifically to direct $20 million
ANCHORAGE, ALASKA  
AR No. 2018-167, As Amended

A RESOLUTION OF THE ANCHORAGE MUNICIPAL ASSEMBLY DECLARING A POLICY 
OF DISPERSED PLACEMENT IN THE ANCHORAGE BOWL OF SERVICES AND 
PROGRAMS FOR HOMELESS PERSONS.

WHEREAS, for years, the Municipality of Anchorage has placed or supported services to 
assist homeless persons in the east downtown and north Fairview areas;

WHEREAS, services operated by the Municipality and concentrated in this area include the 
Anchorage Safety Patrol, Anchorage Safety Center (sleep off center), Anchorage Community 
Mental Health Services Adult Services, and Alaska Mental Health Consumer Net;

WHEREAS, [ref[ shelter[, housing][ and core emergency [support] services concentrated 
located in this area provided by social service agencies and supported through grants, 
leases, contracts, permits or partnerships with the Municipality include Brother Francis 
Shelter, Bean's Cafe, Downtown Soup Kitchen Hope Center, any many other providers 
[Karlu Monk (housing first), Covenant House, RurAL CAP programs, Anchorage Jail 
Complex];

WHEREAS, the Anchorage 2017 Housing Inventory Chart produced by the Alaska Coalition 
on Housing and Homelessness indicates of the 357 emergency overnight shelter beds 
(excluding those only for women and children) available year-round in the Municipality 295 
are located in the downtown/Fairview area, and of an additional 92 available seasonally during 
cold weather 75 are located in this area in Bean's Cafe;

WHEREAS, in addition to hosting 82% of the Municipality's emergency overnight shelter beds 
in this area, it also is the site of the Anchorage Safety Center where people with chronic 
addictions [chronic inebriates] can sleep during the sobering process[, the housing first 
project at Karluk Manor housing 46 individuals, and another Rur\L CAP supported housing 
project for 20 individuals];

WHEREAS, the placement and support of these shelter[ and housing sites] attract[ the 
chronically homeless, intoxicated persons [public inebriates] and others, and the 
concentration in this area of unsheltered people consequently results in social services for 
the most vulnerable citizens also being concentrated, visible and accessible here. The 35 
circumstances create a tendency for vulnerable persons and social services support to 36 
congregate in the downtown and Fairview areas, which as a result bears the brunt of 
secondary effects produced thereby;

WHEREAS, the Municipality's applicable land use and neighborhood plans have the goal of 
revitalizing the downtown and Fairview areas to make them attractive and walkable centers 
of economic and community activity; and

WHEREAS, the current Administration has made strides in planning for and developing
scattered site placements throughout the Anchorage Bowl for housing vulnerable persons and providing other core services, a trend that must be continued; and

WHEREAS, planning and housing resources have recently worked to shift populations who can access services elsewhere to appropriate service locations rather than cycling everyone through these high volume areas; now, therefore

THE ANCHORAGE ASSEMBLY RESOLVES and declares it a public policy of the Municipality to, when it has the opportunity to do so, first consider locating or recommending locations dispersed throughout all other areas of the Anchorage Bowl for new or relocated sites for programs [and services] providing emergency overnight services [shelter] or transitional housing for unsheltered homeless persons, and the supportive medical care and mental health care provided proximate to and on-site at such facilities. The Assembly recognizes the work of social services and support in the east downtown and north Fairview areas as important, compassionate, and essential for the Municipality’s objectives to end homelessness in our community and therefore locating sites there are not precluded as an option. However, this public policy also recognizes that to end homelessness in the long term and simultaneously support the revitalization of east downtown and north Fairview, dispersed placement of such services throughout the Anchorage Bowl is reasonable and necessary.

PASSED AND APPROVED by the Anchorage Assembly this 12th day of June, 2018.

Anchorage Assembly – via email

Re: AR Laid on the Table – Clean Slate Approach

Dear Assembly Members –

The Anchorage Coalition to End Homelessness (ACEH) has reviewed the proposed above referenced resolution by Assembly Member Rivera and provides the following feedback:

1. A Clean Slate Approach makes sense. Anchorage, as a community, needs to lay the foundation for why emergency shelter is needed, what it is and how it can be done while also addressing community concerns and relying on recognized best practices. Anchorage is not alone in doing this foundational work. Many jurisdictions are engaged in the same conversation. Without community understanding of the role of emergency shelter and no or limited experience with well-run emergency shelter, the need to build trust with the community and people experiencing homelessness is essential.

So, what does that look like? Luckily, Anchorage isn’t the first community to need to do this. It starts with hearing from the community and people experiencing homelessness. What is their understanding of emergency shelter, what do they worry about, what are their concerns and hopes for this type of service. Next, the conversation turns to why emergency shelter is needed and a part of the solution to homelessness. This conversation is housing focused. Next is examining the best practices for emergency shelter. What emergency shelter can be is not necessarily what it has always been in Anchorage. Finally, turning to the details, how to implement the best practices and examine whether current policy (shelter licensing and emergency cold weather sheltering) is aligned or needs further refinement. Only after all of that has been done would specific locations and providers be discussed.

Each step of this process must be done with the community, through forums, community councils and many conversations. Policymakers are essential, but only one part of the larger group of stakeholders. We must involve people experiencing homelessness, neighbors, friends, and providers. Shared understanding is essential and will take time. Please make the space to dedicate no less than 90-120 days and probably more for this essential engagement.

2. Please do not remove any sites permanently. After the foundation is laid in the community and possible policy changes are made, the calculus for what may constitute an appropriate location for an emergency shelter may change.

3. A November 1, 2023, start for a new year-round emergency shelter is optimistic, but probably unrealistic. For a point of comparison, the Complex Care Shelter from
conception to operation took approximately 7 months. That shelter was already being piloted by an experienced operator who agreed to move that operation to a standalone location. Additionally, the facility purchased was turnkey. Finally, the 7 months was a monumental lift for all involved with uncertainty about whether the facility would be realized up until 30 days before its opening and only with last minute considerable generosity from philanthropy tipping the scales did the facility become a reality.

For a new emergency shelter, there is not an identified operator, location, or owner, three of the largest hurdles to clear. Operations funding is the fourth, with an estimated cost of at least $4M for 120 individuals. ACEH appreciates the ambitious timeline but wants to be realistic as we consider plans for next winter and the intersection of this approach with emergency cold weather sheltering.

All that said, ACEH is ready, willing, and able to convene with the community, people experiencing homelessness, and policymakers to have these foundational conversations, reach understanding, and ultimately bring to fruition housing focused emergency shelter consistent with the identified need in our community.

Sincerely,

Meg Zaletel
Executive Director
