

2025-26 Snow Removal By the Numbers

11 pieces of new heavy snow removal equipment ordered

14 acres of new snow dump site available

4% (max) vacancy rate

40 inches of (record-breaking) snow in January 2026

700 million pounds of snow hauled (71,686 loads)

Sub-84-hour plow-out achieved

Still to Come:

Completion of non-motorized snow removal study

Consideration of addition of GPS trackers to sanding fleet

Further analysis of possible steps to continue to drive down overall plow-out time
