Introduction

The charter for the Complex Behavioral Health Needs Task Force (AR-2023-145, As Amended) is to identify and propose solutions to the Anchorage Assembly and Municipal Administration for individuals with complex behavioral health needs who are at risk of or experiencing homelessness.

The task force submitted recommendations for immediate solutions on June 1, 2023. This final report provides recommendations for medium to long term solutions submitted on September 5, 2023.

Goal of the Task Force

Identify optimal solutions to address the needs of individuals with complex behavioral health conditions who are experiencing or at risk of homelessness in the immediate term and consider complex behavioral health needs community-wide for the medium and long-term.

People

First and foremost, this task force focused on the needs of community members who have severe, chronic health conditions and who have inadequate or nonexistent access to appropriate care for their health needs. This is not a large number of people, however, the severity of their health conditions and the lack of access to care can mean each person may have many repeat visits to emergency departments, the Alaska Psychiatric Institute (API), and sometimes jails. When people with severe untreated illness are unable to maintain housing, they often experience additional traumas, become even less able to access care and supports, and can require hours of public safety and emergency health care response.

The task force has developed this plan to address the untreated severe health issues that put community members who experience them at great risk for homelessness and often result in the person experiencing unsheltered homelessness for significant periods.

Process

The task force included 70 community members, content experts, and stakeholders who participated in a series of facilitated sessions. A full list of members is in Appendix A. Publicly noticed weekly meetings were held from May 4th to May 25th, 2023. Between each meeting correspondence and feedback were incorporated into the report as it was developed.

After additional meetings in July, on August 29th, the task force hosted a leadership summit at the Mountain View Library in Anchorage. The participant list is provided in Appendix B. The task force presented the priority objectives and facilitators used the World Café model to identify barriers, what is currently in place, quick fixes, and commitments. Results from the Leadership Summit are included in Appendix C.
Acknowledgements

Thank you to all the task force members who contributed their time and expertise to this process.

Thank you very much to the 60+ community members and leaders who attended the Summit on August 29th, 2023 and the 100+ community members who viewed the video stream. Your leadership, expertise, and input enhanced this process, and we look forward to your commitment to implement this plan.

Thank you to the team that supported and led the task force’s work:

- Clare Ross, Municipality of Anchorage
- Allie Hartman, Municipality of Anchorage
- Jennifer Veneklasen, Municipality of Anchorage
- Felix Rivera, Anchorage Assembly
- Daniel Volland, Anchorage Assembly
- Thea Agnew Bemben, Agnew::Beck
- John Gregoire, Professional Growth Systems
Recommendations

Outcomes

The task force recommends priority actions to work towards the following short-, medium- and long-term outcomes. The full Theory of Change is included in Appendix D.

**Long term outcome:** People with complex behavioral health conditions experiencing or at risk of homelessness achieve whole person health and well-being.

*Measured by:*
- Self-reported reductions in harm, increased wellness, and recovery from trauma.
- Increased engagement in health care services with one provider or organization.
- Increased length of time in safe shelter or housing.
- Increased number of individuals with chronic medical and behavioral health conditions managed without the use of inpatient care.
- Increased retention of frontline health care workforce.

**Short and medium-term outcomes:** People with complex behavioral health conditions experiencing or at risk of homelessness:

*Increase engagement in comprehensive primary and behavioral healthcare.*

*Measured by:*
- Decreased use of law enforcement and EMS callouts for behavioral health crisis.
- Increased availability of mobile and same-day medical and behavioral health appointments.
- Increased use of peer supports.
- Increased development of core skills among staff: resilience, stress reduction, motivational interviewing, relationship building and others.
- Improved public safety and reduced negative public impacts.

*Decrease experience of unsheltered homelessness and increase use of emergency shelter, exits to housing, and retention of housing.*

*Measured by:*
- Decrease in unauthorized camping.
- Decrease in number of days unsheltered.
- Increase in exits to shelter and housing and length of time housing retained.

*Increase cost-effectiveness of community resources through access to lower-cost health care and services.*

*Measured by:*
- Increased use of community physical and behavioral health care and supports.
- Decreased costs associated with emergency department and inpatient care.
- Decreased readmission rates to emergency department and inpatient care.
Goals + Priority Objectives

1. **GOAL 1: System Coordination: Outreach and Triage:** Identify and address care needs of people with complex behavioral health conditions who are experiencing or at risk of homelessness in Anchorage, many of whom are currently unsheltered.

   **PRIORITY OBJECTIVE:**
   a. By December 31, 2023, identify and, if necessary, fund a coordinator and team at the Anchorage Health Department or other municipal entity to manage and coordinate contractors, funding streams, and Municipal, State, and non-Municipal entities to implement this plan.

   **RATIONALE:**
   To increase participation from other public and private funders, braid funding, manage contracts, and leverage other municipal resources, which are necessary to implement this plan, Anchorage needs a coordinating entity. A municipal department is uniquely situated to provide these functions.

   **OTHER OBJECTIVES FOR GOAL 1:**
   b. Partner with State entities to reduce system-level barriers and increase funding and resources to rapidly meet the needs of people experiencing or at risk of homelessness and complex behavioral health issues.
   c. Engage funders, leaders, and community groups to implement this plan.
   d. Work with Anchorage Chamber of Commerce and local businesses to address community needs, share information, and increase resources.
   e. Coordinate referrals from ACEH and the Coordinated Entry system, shelter providers, outreach, health care providers, mobile crisis team, and hospitals to identify and triage potential clients.
   f. Conduct mobile screening, identify a shared level of care (LOC) assessment and triage process, and implement the use of Z codes in Electronic Health Records (EHR) to facilitate data sharing with HMIS, healthcare organizations, and healtheConnect Alaska.¹
   g. Facilitate and conduct regular case conferencing to review referrals and develop and manage care plans.
   h. Address lack of Public Guardianship.
   i. Ensure culturally relevant services and supports are available to all.
   j. Build mobile workforce, especially peers, personal care, direct service providers, and certified nursing assistants.
   k. Increase and improve public communications to build understanding of people with unmet health and wellness needs that sometimes result in homelessness.

¹ [https://www.healtheconnectak.org/](https://www.healtheconnectak.org/)
2. **GOAL 2: Shelter:** Provide immediate, no-barrier, appropriate, safe, year-round emergency shelter, and navigation to access health care and supports.

**PRIORITY OBJECTIVE:**

a. By April 30, 2024, create no-barrier shelter options that serve smaller groups of people (approximately 50 at each site), with a mix of individual shelters (such as the Pallet structures) and small-scale congregate shelter (such as a small portable building), portable toilet and shower facilities, and locked storage. All facilities must be safe, secure, and year-round. Sites will be managed by contracted health care and/or behavioral health peer providers to provide daily supports with healthcare and basic needs. Case management must be provided to guests at the sites to facilitate transitions to housing and ongoing healthcare. The task force estimates 2-5 of these sites are needed to serve people with complex behavioral health issues in need of emergency shelter.

**RATIONALE:**

Individuals with complex behavioral health issues often have barriers to shelter and housing, require daily visits with health care providers, may not be able to live in larger congregate settings, and may require time to stabilize before moving into housing.

This approach requires lower capital costs than larger shelters, could be situated on existing municipal lands such as parking lots, and would provide a stable location for health care providers and case managers to work with guests to support transitions. These sites could also be moved, if needed, or de-mobilized if demand decreased.

**OTHER OBJECTIVES FOR GOAL 2:**

b. Implement the recommendations of the Sanctioned Camping Task Force released May 22, 2023, as finalized by the Sanctioned Camping Task Force and Anchorage Assembly.

c. Add one low-barrier navigation center to provide daytime services, located near to new shelter sites and not in downtown Anchorage.

3. **GOAL 3: Health Care, Care Coordination and Housing:** Rapidly assess and address housing, behavioral health, medical, and longer-term care needs.

**PRIORITY OBJECTIVE:**

a. By January 31, 2023, contract with behavioral health clinical and peer providers to do mobile outreach and provide medical and behavioral health services to people with complex behavioral health needs who are experiencing or at risk of homelessness.

**RATIONALE:**

Individuals with complex behavioral health care needs who are experiencing or at risk of homelessness may not be enrolled in healthcare coverage or other benefits for which they are eligible. Because of housing instability and lack of shelter, individuals may be in camps or other locations in the community. Providing contracts with behavioral health
clinician and peer providers to provide mobile outreach and care to people wherever they are will engage them in ongoing medical, mental health, and Substance Use Disorder (SUD) care, and with shelter, case management, and housing options.

OTHER OBJECTIVES FOR GOAL 3:

b. Identify and treat behavioral, medical, and other care needs.
   i. Support the development of Crisis Now services and facilities:
      1. Promote the connection of APD Dispatch to the Alaska Careline and the expansion of the APD Mobile Intervention Teams
      2. Support the AFD Mobile Crisis Team to operate 24/7
      3. Support Providence and Southcentral Foundation’s projects to develop Crisis Stabilization Centers (CSC)
      4. Support the development of the Crisis Care and Connectors group
   ii. Contract with peer providers to develop trusting relationships to increase client engagement.
   iii. Coordinate and provide transportation to health clinics for primary and behavioral health care and other supports.

c. Assess individuals for benefit eligibility, such as Medicaid and Social Security, and secure all eligible benefits.

d. Identify housing options and help clients secure long-term housing.

e. Add residential treatment beds and outpatient capacity for behavioral health care and conduct collaborative advocacy to decrease barriers and help providers add treatment capacity.

f. Increase behavioral health workforce.

g. Fill funding gaps to add units of supportive housing and other housing options
   i. Quantify units needed, secure funding, develop capacity
      1. Transitional housing
      2. Permanent Supportive Housing, very low barrier
      3. Assisted Living Homes for people with complex behavioral health conditions
      4. Structured group homes for people with combination of Intellectual and Developmental Disabilities (IDD) and behavioral health conditions
      5. Specialized care for Elders with cognitive impairments and behavioral health conditions
      6. Specialized supportive housing options for youth and young adults
Background

What are complex behavioral health needs?

Many experiencing or at risk of homelessness have high rates of chronic and co-occurring health conditions, mental and substance use disorders. Individuals who are homeless also may be dealing with trauma, and children experiencing homelessness are at risk for emotional and behavioral problems (Perlman et al., 2014). Additionally, research has shown that individuals who are homeless have a risk of mortality that is 1.5 to 11.5 times greater than the general population (Gambatese et al., 2013). Preventive services, including mental health, substance use disorder treatment, medical care, and social supports, are needed for people who are homeless, irrespective of whether they present with diagnosable conditions. According to data collected as part of a 2015 national survey, over half of adults living in permanent supportive housing either had a mental disorder or co-occurring mental and substance use disorder (HUD, 2016). Further, people experiencing homelessness are at high risk of overdose from illicit drug use (SAMHSA, 2020).

Which services and supports help people with complex care needs remain housed?

Complex care uses a cross-sector approach to improve outcomes for people with multiple health conditions who also experience social barriers such as homelessness, systemic racism, and poverty. Health conditions can include chronic physical issues, behavioral health conditions, and substance use disorders. This approach is person-centered and team-oriented, meaning that a team works with the individual to holistically assess and coordinate care to meet their needs, and recognizes that stable housing with appropriate supports is ultimately what is needed to address the person’s medical and other health and wellness needs.

People with complex care needs need a safe place to stay, meals, access to medical and behavioral health treatment, and connection to permanent housing and benefits such as Medicaid, Social Security, and assessment for specialized services. Complex care includes access to medical and behavioral health care and other supports, such as connecting people to benefits and assistance in securing government identification documents.

Appropriately providing complex care requires a workforce with the skills and abilities to listen to patients to understand their story and properly assess them. This approach is person-centered, meaning it respects individual autonomy of individuals and families and care planning is directed by the person’s goals and strengths.

The goal of home- and community-based services is to help people safely maintain functioning outside of a medical facility or other institutional setting. Figure 1 depicts the full spectrum of services that can help a person live independently and the higher levels of care that may be needed periodically. The goal is always to help a person move back towards the lowest level of

4 Developed by Agnew::Beck Consulting under contract to the Alaska Mental Health Trust Authority related to HB172 and the protection of psychiatric patient rights. For more information and updated versions of the graphic see
care possible and to access care as close to home as possible. Examples include supportive living environments, access to housing, food security, access to healthcare including medication management and physical healthcare, supportive employment, peer support, and mental and behavioral health treatment and counseling. These are all services that may prevent a person from going into psychiatric crisis and decrease the severity of crisis. For the healthcare system, home and community-based services reduce the need for inpatient care and involuntary treatment, reduce suicide rates, and improve public safety. Some of these services are available over the phone such as 9-8-8 or Alaska Careline; others, such as a mobile crisis team, should be available in a person’s home or community; others might be facility-based, such as the newly created crisis stabilization centers.

Critical for people who are experiencing or at risk of homelessness and have complex behavioral health care needs is immediate access to outreach and mobile resources, engagement with behavioral health and medical care, and safe shelter. Once a trusting relationship starts to develop, assessment and case management are needed to help the person access housing, ongoing healthcare, financial supports, community connections, and employment. Shelter and housing are critical, but by themselves will not lead to success for most people experiencing severe mental illness, addiction, or other complex conditions.

Figure 1. Draft Vision for Comprehensive Behavioral Health Continuum of Care

5 See here for more information and resources: https://alaskamentalhealthtrust.org/alaska-mental-health-trust-authority/what-we-do/crisis-continuum-of-care/
How many people experience homelessness and complex conditions including behavioral health conditions in Anchorage today?

Anchorage’s Homelessness Management Information System (HMIS) system managed by Anchorage Coalition to End Homelessness (ACEH) tracks the total number of people who are actively experiencing homelessness in Anchorage, the proportion that report experiencing a disabling condition, meet criteria as chronically homeless, and those considered beneficiaries of the Alaska Mental Health Trust Authority. By using these criteria and HMIS data, we can estimate the number of people experiencing homelessness and complex conditions including behavioral health conditions in a given period. Figure 2 summarizes the criteria that can be used to identify the group of people who could benefit from the interventions identified in this plan.

Figure 2. HMIS Criteria for those who could benefit from enhanced care for Complex Behavioral Health conditions

How can we best help and support all Anchorage residents by engaging people with complex behavioral health conditions who are experiencing or at risk of homelessness?

This plan identifies steps to improve health and well-being for people with complex behavioral health needs who are experiencing or at risk of homelessness. With the closure of the Sullivan Arena in May 2023, many people have no place to shelter and no access to healthcare, housing, or other supports to help them regain stability. This crisis made the work of the task force urgent; coordinated resources must be deployed immediately to address the needs of people with complex behavioral health needs, and to create a safe and well community for all in Anchorage.

---

\(^6\) [https://aceh.org/data/](https://aceh.org/data/)

\(^7\) Chronic Homelessness is defined by HUD as a person having at least one disabling condition (see following note) and either: 12 months or longer of consecutive homelessness, or 12 months documented homelessness in the last 36 months.

\(^8\) Disability is defined by HUD as one or more of the following conditions: alcohol abuse; both alcohol and drug abuse; chronic health condition; developmental disability; drug abuse; HIV/AIDS diagnosis; mental health problem; physical disability.

### PRIORITY OBJECTIVE

**By December 31, 2023, identify and, if necessary, fund a position and team at the Anchorage Health Department or other municipal entity to manage and coordinate contractors, funding streams, and Municipal, State, and non-municipal entities to implement this plan**

| Immediate; by December 31, 2023 | MOA AHD or other municipal department | Lack of capacity at AHD | Fill the currently vacant Community Resource Coordinator and Assistant Community Resource Coordinator at AHD; add contract resources to support AHD positions; develop clear workplan and monitor success over the year. | Identify positions and procure contract support | If necessary, add resources, defer to AHD | Fill two currently funded and vacant positions with existing budget; add approximately $150,000 for contract support | Set annual workplan that includes funding plan, identify sustainability targets and incorporate into work plan, monitor completion |

---

GOAL 2: SHELTER: Provide immediate, very low-barrier, and appropriate safe overnight shelter, and navigation to access health care and supports.

### PRIORITY OBJECTIVE

<table>
<thead>
<tr>

GOAL 2: SHELTER: Provide immediate, no-barrier, appropriate, safe, year-round emergency shelter, and navigation to access health care and supports.

**OBJECTIVES**

**Implement the recommendations of the Sanctioned Camping Task Force**

Immediate: 30-60 individuals, temporary structure that can be year-round at 40th and Denali; will include some MOA or contractor

Who will operate the pilot program?

Need to be able to provide mobile healthcare to pilot program

Contract with healthcare providers to

TBD

Funding for contracted providers

Municipal funding
| **individual spaces; open campus; may be an expansion in 2024** | **operate the project** | **By April 2024:** Create no-barrier shelter options that serve smaller groups of people (approximately 50 at each site), with a mix of individual shelters (such as the Pallet options) and small-scale congregate shelter (such as a portable building), portable toilet and shower facilities, and locked storage for belongings. All facilities must be safe, secure, and year-round. Sites managed by contracted health care and/or behavioral health peer providers to provide daily supports with healthcare and basic needs. Case management must also be provided to guests at these sites to facilitate | **Medium; by April 2024** | **MOA or contractor** | **Funding**
Locations
Capital and operational funding
Community Support contracts for supports | **Construct sites on Municipal-owned sites in Anchorage, with access to healthcare, EMS located close to where people are currently camping, where providers can get to them. Multiple sites with providers providing services on a daily basis on site.** | **Approximately $956,000 in capital costs per location (assume Municipal-owned site), 50 people per location; start with two locations for a capital cost of $1,912,000. Contract with a healthcare provider/peer organization to provide staff coverage at site and daily behavioral/medical clinical services. Base contract approximately $680,000 per site per year.** |
transitions to housing and ongoing healthcare. The task force estimates 5 of these sites are needed to serve people with complex behavioral health issues in need of emergency shelter.

| Add one low-barrier navigation center to provide daytime services, located near to new shelter sites and not in downtown Anchorage. | Medium, Long-range | MOA or contractor | Long delays, paperwork trails for people needing assistance. Difficult to navigate even for healthcare providers and especially clients who have impairments, speak languages other than English. Medicaid requires a 28-page application for people to enroll. No seats in the waiting.

Jim Meyers, Alaska Behavioral Health
Angela Michaud, Cook Inlet Tribal Council
Description of Task Force Process

Community members, content experts, and stakeholders were invited to participate in a series of facilitated task force sessions. Publicly noticed weekly meetings were held from May 4th to May 25th, 2023. Between each meeting correspondence and feedback were incorporated into the report as it was developed.

In our initial meeting, the group brainstormed known gaps and urgent needs resulting in the identification of four key areas of focus: Health Care, Care Coordination, Housing, and Community Resources & State Support.

In meeting two, the four categories were used to evaluate the “Draft Vision for Comprehensive Behavioral Health Continuum of Care” (Fig.1) and identify gaps and urgent needs along that continuum.

In meeting three, the work from meeting two was further assessed using a World Cafe model so that all present at the meeting were able to contribute and participate in each category. The
group began building the action table (included in this report). An initial draft of this report was developed following the meeting and sent out to the participant list from all three meetings.

In meeting four, the group completed a detailed review of the report and recommended action plan to finalize the recommended “Immediate Needs”. Following the meeting, an updated draft of the report was shared with the entire participant list. Comments and suggestions were incorporated. On June 1, 2023 the initial recommendations report was submitted to the Anchorage Assembly.

Two task force meetings were held (June 22 & 29) to further develop the action plan and finalize the long-range goals. The task force discussed a priority objective for each of the three goals. to present to statewide and local leadership at a September 29th summit.

A survey was sent to all task force participants requesting feedback on the priority objectives for each goal. Survey respondents overwhelmingly supported the priority objectives and offered minor additions and edits that were incorporated.

On August 29th, the task force hosted a leadership summit at the Mountain View Library in Anchorage. The participant list is provided in Appendix B. The task force presented the priority objectives and facilitators used the world café model to identify barriers, what is currently in place, quick fixes, and commitments. Results from the Leadership Summit are included in Appendix C.

The task force met for a final time on August 30th to review the results from the Summit. The full Action Plan included in this report addresses feedback from Summit participants.
B: Leadership Summit Participants

Commissioner Kim Kovol, SOA Dept. of Family & Community Services
Kim Rash, Anchorage Health Department
Jennifer Osput, Alaska Regional Hospital
Rep. Genevieve Mina, Alaska Legislature
Emily Ricci, Alaska Department of Health
Sarah Skeel, Providence Medical Center
Ray Michaelson, Mat-Su Health Foundation

Michael Riley, Anchorage Fire Department
Jennifer Pierce, Anchorage Fire Department
Ruth Adolf, Anchorage Police Department
Sean Case, Anchorage Police Department
Tanya Vandenbos, Anchorage Police Department
Michael Hughes, Anchorage Health Department
C: Complex Behavioral Health Task Force Leadership Summit

August 29, 2023, 10 am to 1 pm

Meeting Results

Goal 1 - System Coordination: Outreach and Triage: Identify the most vulnerable individuals experiencing or at risk of homelessness in Anchorage who also have complex behavioral health conditions, many of whom are currently unsheltered, and address care needs.

Priority Objective: Identify and, if necessary, fund a position and team at the Anchorage Health Department or other municipal entity to manage contractors, leverage municipal, State, private and public resources, and coordinate Municipal, State, and non-Municipal entities to implement this plan.

Barriers Identified
• Limitations of the 1115 Medicaid waiver, and many people who need assistance are not yet enrolled and some are not eligible for Medicaid
• Lack of Staffing/providers, clinicians
• Grant funding limited
• Length of waiver process for barrier crimes makes it difficult to hire peer workers
• Some MOUs in place/more are needed
• Orgs all use different assessment tools to establish level of care needed
• Construction and start-up costs make it hard to start and sustain needed programs
• Supervision/host availability for practicum work to license new clinicians
• We must address gaps in care within the year
• Lack of dual diagnosis treatment for those with substance use disorders and psychiatric conditions
• Limited access to neuropsychological evaluation to qualify for 1915c waivers - could this requirement change?

Currently in Place
• Working towards 1115 waiver amendments
• Mobile teams
• Outreach pop-ups
• Chanlyut 3.1 Residential SUD treatment step down
• Some outreach groups in place
• 1115 regulations in process of being updated

What is needed?
• Digital fingerprint scanning/sharing
• Review variance requirements for peer support services
• Expand to next levels of care/treatment (Mobile Teams)
• Leverage Alcohol Tax
• Decoupling fee for service for outreach
• Increase funding for docs pharma.
• Outreach with correctional facilities
• Re-entry plan
• Better Medicaid application process
• Capture data of recently relapsed entering homelessness
• Outreach vs. voluntary/involuntary behavioral health facilities
Way to signal needs for housing in ref. to construction/space increases
Comprehensive HIE
Involve OCS/DJJ for youth transition
Built for zero re-implementation

**Goal 2 – Shelter:** Provide immediate, no-barrier, appropriate safe year-round shelter, and navigation to access health care and supports.

**Priority Objective:** Create no-barrier shelter options that serve smaller groups of people (approximately 50 at each site), with a mix of individual shelters (such as the Pallet options) and small-scale congregate shelter (such as a portable building), portable toilet and shower facilities, and locked storage for belongings.

- All facilities must be safe, secure, and year-round.
- Sites managed by contracted health care and/or behavioral health peer providers to provide daily supports with healthcare and basic needs.
- Case management must also be provided to guests at these sites to facilitate transitions to housing and ongoing healthcare.
- The task force estimates 5 of these sites are needed to serve people with complex behavioral health issues in need of emergency shelter.

**Barriers Identified**
- Lack of sustainable funding for case managers and providers
- Lack of workforce
- Lack of community buy-in “NIMBY”
- Use of Alcohol Tax funds
- Use existing facilities Providence, SCF
- Use of technology to coordinate use of beds
- No year-round solution – disrupts progress
- Shelters not integrated into case management

**Currently in Place**
- Policy solutions
- Talented providers
- Variety of innovative solutions
- APD & AFD response teams
- Coming: Providence & SCF crisis centers
- ARC of Anchorage residential treatment
- Use university for innovative design or facilities
• Outdated inventory of empty spaces
• Tiered residence system

*What is needed?*

• 300 beds for recovery & treatment

**Goal 3 – Health Care Coordination and Housing:** *Rapidly assess and address housing, behavioral health, medical and longer-term care needs.*

*Priority Objective:* Contract with behavioral health clinical and peer providers to do mobile outreach and provide medical and behavioral health services to people who are experiencing or at risk of homelessness.

**Barriers Identified**

• Lack of billing and enrollment support from State for behavioral health providers
• No (limited) coordinated care outside of 9-5
• Lack of roundtrip transportation to resources (outside of ER), including back to camp/wherever they are staying
• Not enough guardianship
• Lack of workforce, funding
• Many people don’t have a phone, address, license/ID needed to apply for Medicaid or services or healthcare
• Coordination for funding streams - funding is confusing
• Unified correctional system, so no local stakeholders
• Gaps in system & people persistently in the system - need for lifelong care
• Many are not enrolled in Medicaid, some aren’t eligible - meeting people where they are at
• General Relief funding/Medicaid 1915c waiver
• Went from immediate placement to waitlist due to finding cuts
• Triage - expedite processes while in care
• HCBS needed for expanded/different eligibility groups
• Setting for billing (camp, shelter, wherever the person is)

**Currently in Place**

• $5M in AK State looking at rates/how providers are paid
• Engaging in this work now
• AFD mobile crisis team in in place
• Complex care working group statewide
• Looking at waiver modifications
• Outreach to health care providers
• Medical respite at BFS
• Online Medicaid application coming soon!
• New ID law
• Third Ave. Resource Center with access to medical clinic for coordination

What is needed?
• Pharmacy access/roundtrip transportation non-medical
• Expand transitional housing
• OPA needs more capacity for guardianship
• Permanent no or low barrier shelter with navigation center
• Follow through
• Expand to 24/7 operation of AFD mobile crisis team in place
• Block funding for provider groups non-Medicaid and non-billable services
• Strengthen ADRC connection - would require additional $$
• Space near where clients are located
• DOC & Dept. Health need coordination
• More flexibility in use of GR funds & more options for them
• Support in learning how to be housed

For All Goals and Objectives:

Quick Fixes & Low Hanging Fruit
• Find other cities/locations that have had success
• Complex/triage coordination efforts leveraged at higher level with shared end product
• Coordinate with additional providers & outreach pop-ups managed
• Centralized list of resources (website, phone, etc.)
• Alaska Mental Health Trust partnership grants up to $50k
• Research grants that are applicable
• Church volunteers
• Identify those in shelters who can be place in housing
• Use high school & career center volunteers
• Welcome new nonprofit to open a shelter
• Get DOC involved, to include local stakeholders
• Funding for General Relief + reform GR so it can be used for supportive housing and not only assisted living
• Better coordination of what services are available
• Potential to use Alcohol Tax funds on providers and access to care

Commitments
• Continued involvement and resource sharing: Recover Alaska
• Share policies, procedures, operational expertise for emergency shelter: Catholic Social Services
• Assist with implementation of 1115 waiver: Catholic Social Services, Alaska Mental Health Trust Authority technical assistance
• Outsource high school volunteers: Jasmine Sanders
• Advocate for 24/7 MCT: Assembly/AFD
• Advocate for GR behavioral health grants: Representative Genevieve Mina
• Provide education to masters and PhD level providers - mental health training and experiences: AFD MCT
• Convening - goal of coordinating efforts and keeping communication open: Catholic Social Services
• Expand health care and homelessness partnership: Catholic Social Services
• Healthcare liaison/homelessness liaison at every hospital: ACEH
• Continued and expanded outreach coordination with additional partners and providers: ACEH
D: Theory of Change: Resources, Activities, and Desired Outcomes

<table>
<thead>
<tr>
<th>Potential Resources</th>
<th>Activities</th>
<th>Outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td>• People with complex behavioral health conditions experiencing or at risk of homelessness</td>
<td>Increase immediate access and navigation to appropriate services to meet physical and behavioral healthcare needs</td>
<td>Increase number of people engaged in comprehensive primary and behavioral healthcare Measured by:</td>
</tr>
<tr>
<td>• Health care providers: Southcentral Foundation, Anchorage Neighborhood Health Center, Providence Health and Services, Mountain View Health Services, Choices, Alaska Behavioral Health, Arc of Anchorage, others TBD</td>
<td>Develop and sustain 2-5 no-barrier emergency shelter sites (~50 pp each) with access to peer supports and physical and behavioral health services</td>
<td>1. Decreased use of law enforcement and EMS callouts for behavioral health crisis</td>
</tr>
<tr>
<td>• Peer Support: Henning, Inc. CITC, True North Recovery, Choices, AK Mental Health Consumers Web, others TBD</td>
<td>Increase mobile and on-site physical and behavioral health including addiction treatment, mobile health care, MAT, and medication management</td>
<td>2. Increased availability of mobile and same-day medical and behavioral health appointments</td>
</tr>
<tr>
<td>• 3rd Avenue Navigation Center</td>
<td>Develop appropriate data sharing to connect patients with providers and track outcomes</td>
<td>3. Increased use of peer support specialists</td>
</tr>
<tr>
<td>• Homelessness Prevention and Response System</td>
<td>Develop partnerships between health care providers and homelessness response system</td>
<td>4. Increased development of core skills among staff: resilience, stress reduction, motivational interviewing, relationship building and others</td>
</tr>
<tr>
<td>• Anchorage Coalition to End Homelessness</td>
<td>Train providers to deliver care using a low-barrier, harm reduction, recovery-oriented, trauma-informed approach</td>
<td>5. Improved public safety and reduced negative public impacts</td>
</tr>
<tr>
<td>• State of Alaska Departments of Health; FCS; Corrections</td>
<td>Work with system leaders and payers to develop payment models to support comprehensive approach to complex care</td>
<td>People with complex behavioral health conditions experiencing or at risk of homelessness achieve whole person health and well-being Measured by:</td>
</tr>
<tr>
<td>• MOA: Anchorage Health Department, Anchorage Assembly, Administration, APD, AFD, others TBD</td>
<td></td>
<td>1. Self-reported reductions in harm and increased sense of wellness and recovery from trauma.</td>
</tr>
<tr>
<td>• Anchorage hospital providers: Alaska Regional, Providence Alaska, Alaska Native Medical Center</td>
<td></td>
<td>2. Increased length of engagement in health care services with one provider or provider organization.</td>
</tr>
<tr>
<td>• Healthcare payers: Alaska Medicaid Program, Tricare, others TBD</td>
<td></td>
<td>3. Increased length of time in safe shelter or housing.</td>
</tr>
<tr>
<td>• Rasmuson Foundation, others TBD</td>
<td></td>
<td>4. Increased number of individuals with chronic medical and behavioral health conditions managed without the use of inpatient care.</td>
</tr>
<tr>
<td>• Alaska Mental Health Trust Authority, Crisis Now, Anchorage Crisis Collaborative</td>
<td></td>
<td>5. Increased retention of frontline health care workforce.</td>
