

DAN ZIPAY

SUMMARY

Over 40 years of municipal, state, and federal project management experience, overseeing more than \$150 million in business transactions relating to refuse and material handling. I bring my skills, leadership, national contacts with waste industry leaders, and experience to bear in the management of Anchorage Solid Waste Services.

EXPERIENCE

1997 – Founded Alaska Waste, now the state's largest waste company; managed municipal contracts (school district), as well as private contracts; managed human resources, business development, contract development and execution, dispute resolution, safety plans, OSHA and state compliance. Was at the forefront of recycling in Alaska. Grew it to a multi-million-dollar company before selling it in 2009. **Unusual project:** Spearheaded Alaska's first glass recycling project.

1983 – Founded Alaska Power Sports, largest Polaris snowmachine dealership in Alaska. Sold 1986.

1979 – Present – Founded Alaska Pro Truck, a commercial trucking business in Anchorage, including work at Anchorage International Airport, Port of Alaska, JBER. **Unusual projects:** Hauled all the aggregate for the windmills on Fire Island. Accompanied trucks to Louisiana to assist in cleanup of Hurricane Katrina, and was on station for three months in New Orleans.

EDUCATION

Dimond High School Class of '73

Private Pilot's license / CDL / Certified septic/water installer
