TITLE 8 - POSITIVE IMPACT ON PUBLIC SAFETY

- Promoting Connection to Services (The “Multi-Pronged Approach”)
  - ***Issue:*** *Criminalization alone does not solve the root cause.*
  - ***Impact:*** *The ordinance is designed to be enforced "firmly and humanely." The provision regarding refusing transport specifically encourages a "service-first" approach. Enforcement creates an opportunity to connect individuals in crisis with treatment, shelter, or our Crisis Response Teams rather than simply arresting them, similar to the strategy used for camping enforcement.*
  - ***Data:*** *The camping and abatement enforcement strategies recently resulted in hundreds of individuals voluntarily complying or accepting services, moving them into "safer, more stable options“.*
