2 3 4		MEMORANDUM	June 25, 2002			
5 6 7	TO:	THE HONORABLE GEORGE V ANCHORAGE ASSEMBLY	WUERCH			
8 9	FROM:	OFFICE OF THE SUPERINTEN	NDENT Caral Cameau			
10 11 12	SUBJECT	APPROVAL OF THE PRELIMITHE EAGLE RIVER HIGH SCI	INARY (CONCEPTUAL) DESIGN FOR HOOL			
13 14 15 16	In accordance with AO NO. 2000-106(S), this memorandum provides information required for submission and approval of the preliminary design for Eagle River High School. The Conceptual Design was approved by the School Board on June 24, 2002.					
17 18 19 20	The School Board approved the selection of USKH, Inc. to be the Architects of Record on December 10, 2001 and the Assembly approved selection on December 18, 2001 (AR 2001-360).					
21 22 23 24 25 26	AO NO. 2000-106(S) requires a description of the proposed school site, school building and building program; the projected student population; the total construction budget and the funding source; the projected project schedule; and any known neighborhood impacts, comments, reactions, which reflect potential impacts of the school building on the neighboring community. These responses follow:					
27 28 29 30 31 32 33 34 35	In April, 1999, the voters approved funding for design of a new high school in Eagle River. In March 2001, the School Board approved the selection of a site for the New Eagle River High School. Also in March 2001, the School Board authorized the Superintendent to use the Dimond High School design, with modification, to deliver the New Eagle River High School. The School Board approved the selection of USKH, Inc. to be the Architects of Record on December 10,2001 (ASD Memorandum #138 2001-2002) and the Municipal Assembly approved the selection on December 18, 2001 (AR #2001-360).					
36 37 38 39 40 41 42 43	The 50-acre site is located at the southern end of the Chugiak-Eagle River community, near the intersection of Eagle River Loop Road and Hiland Road. It is part of Heritage Land Bank (HLB) Parcel 1-085 and currently consists of numerous unsubdivided Bureau of Land Management lots. The site has a general shape of a triangle and is bounded by Alaska Mental Health Land Trust property to the south, Eagle Pointe Subdivision and Eklutna Inc land to the east, and Yosemite Drive to the northwest. The property across Yosemite Drive is part of the same HLB parcel.					
44 45 46 47	approximately	y five acres of the total site area. I	ter, with one steep area that comprises it is entirely undeveloped and undisturbed shool building would be built on the upper			

2 3

tier of the site, with the rest of the site developed for parking, sports fields, and other school amenities.

The scope of this project is to design a high school building for 800 students allowing for expansion to 1,600 students in the future. The School Board approved Education Specifications for both the 800 and 1,600 student phases in October 2000. More recently, there has been discussion of providing alternative programs such as SAVE, Benson, School-Within-A-School, Alaska Native, The Seminar School, Steller Secondary and School Through the Arts and addressing high demand vocational and technical programs at the Eagle River High School.

USKH, Inc. has evaluated the Education Specifications, use of Dimond High as a prototype, and alternative programs to develop the conceptual plan for the Eagle River High School. Public meetings were held in April and May 2002 and the Building Design Committee met in May and June of 2002.

The project schedule is to complete the Schematic Design (35%) in August 2002 and to be well into the Design Development (65%) in the fall in order to validate the construction cost estimate for the Capital Project bond process. Subject to voter approval, the construction contract would be awarded in late 2003, with construction beginning in spring 2004 and the school opening in the fall of 2006.

It has been clear during the site selection and design process to date that a vast majority of the interested Eagle River residents and neighbors highly support the Eagle River High School. Community meeting participants have been very supportive and interested in how they could expedite the process. Issues of concern that have been raised include proximity to the prison, traffic impact, buffers to the adjacent neighborhood, and the single access to the high school site.

Attached is a set of Preliminary (Conceptual) design drawings for Phase 2
