(the remainder of the section is not affected and therefore not set out):

15.85.740 **List of aftermarket parts.**

*** *** ***

D. In addition to the listed aftermarket parts, certified I/M stations may use other aftermarket replacement parts that are functionally identical to the original equipment parts in all respects that in any way affect emissions. An example of such a part would be a replacement engine hose [NOSE]. Explicit approval of such a replacement part by either the CARB or the I/M program administrator is not required, although the CARB does require the manufacturers of such parts to maintain records such as test data to substantiate that the replacement parts are functionally identical to the original equipment parts.

REVENUES:			(\$72)	(\$172)	no further reductions anticipated		
CAPITAL:							
POSITIONS: FT/PT and Temp			-1	-2			

PUBLIC SECTOR ECONOMIC EFFECTS:

As a result of this ordinance, in 2006 and in 2007 two-year old vehicles will not be I/M tested for the first time. Due to the mid-year implementation of changing I/M test frequency from annual to biennial in 1997, the number of vehicles tested in a typical even year is somewhat higher than in an odd year.

Reorganization of I/M and air quality staff as well as reduction in other direct and indirect charges will be necessary.

PRIVATE SECTOR ECONOMIC EFFECTS:

The I/M test industry will see similar reductions in number of vehicles to be I/M tested. There may also be decreases in numbers of repairs performed on new vehicles, however many new vehicle repairs will continue to be performed by dealers on vehicles still under warranty. Vehicle owners may defer routine maintenance.

Owners of three and four most recent model year vehicles will save the cost of I/M tests and certificates. Should repairs and maintenance be deferred, those costs will also be saved.

MUNICIPALITY OF ANCHORAGE

ASSEMBLY MEMORANDUM

No. AM 52 -2006

Meeting Date: January 24, 2006

1 **From: MAYOR**

2
3 **Subject: AN ORDINANCE AMENDING ANCHORAGE MUNICIPAL CODE CHAPTERS**
4 **15.80 AND 15.85 TO COMPLY WITH STATE I/M REGULATIONS AND TO**
5 **COMPLY WITH DMV ELECTRONIC PROCEDURES.**
6
7

8 Over the past 30 years, Anchorage has made substantial progress in reducing carbon monoxide (CO) air
9 pollution. This has been an important public health challenge and the community has expended
10 substantial resources to bring CO levels in to compliance with clean air standards.
11

12 During the twenty years the Vehicle Inspection and Maintenance Program has been in place in
13 Anchorage, it has been the most important tool to reduce CO levels. CO levels dropped by about 60%
14 since 1985 and Anchorage is currently in compliance with the CO air quality standards.
15

16 A comprehensive scientific study is now being conducted to evaluate the current I/M Program. It is
17 essential the "real world Anchorage" CO reducing benefit of I/M be assessed to determine whether
18 substantial modifications are needed and when it may be justified to begin to phase-out of the Program.
19

20 In the meantime, I/M test failure rates and improved emissions technology of the newest model year
21 vehicles indicate exempting the four most recent model years, rather than the current two, will likely not
22 substantially compromise air quality. The State of Alaska and Fairbanks Northstar Borough I/M
23 Programs have moved forward to exempt these model years beginning January 1, 2006. The local I/M
24 code must be consistent with State requirements.
25

26 Notable amendments proposed include:

- 27 • Exempt most recent four (instead of current two) model year vehicles
 - 28 • Update and clarify references to I/M certificate for a windshield sticker only
 - 29 • Add definitions for OBD test
 - 30 • Housekeeping verbiage changes including definitions
- 31
32

33 THE ADMINISTRATION RECOMMENDS APPROVAL OF ORDINANCE AMENDING CHAPTERS
34 15.80 AND 15.85 TO COMPLY WITH STATE I/M REGULATIONS AND TO COMPLY WITH DMV
35 ELECTRONIC PROCEDURES.
