Non-Operating Expenses	\$0	\$0	\$0	\$0	\$0
Total Non-Operating Expenses:	\$0	\$0	\$0	\$0	\$0
NET INCOME	\$0	\$0	\$0	\$0	\$0
Positions: FT/PT/TEMP	0	0	0	0	0

Impact on General Government: NO

The increases in charges and fees have no economic impact on the Utility overall because the increased revenues obtained through the updated charges and fees offset, dollar for dollar, the increases obtained through AWU's revenue requirements study.

Public Sector Economic Effects: N/A

Private Sector Economic Effects: Minimal. Charges and fees represent only a small portion (less than one percent) of the overall revenues collected by the utility from the private sector.

MUNICIPALITY OF ANCHORAGE

ASSEMBLY MEMORANDUM

No. AM 706-2008

Meeting Date: October 14, 2008

From: MAYOR

Subject: AN ORDINANCE OF THE MUNICIPALITY OF ANCHORAGE, ALASKA APPROVING SUBMISSION BY THE ANCHORAGE WATER & WASTEWATER UTILITY (AWWU) OF RATE CHANGES BASED ON A NON-RECURRING CHARGES AND FEES (NRC) UPDATE TO THE REGULATORY COMMISSION OF ALASKA (RCA).

In accordance with Anchorage Municipal Code section 31.20.030, this ordinance is submitted for review and approval by the Assembly of AWWU's submission of a 2007 Test Year Non-Recurring Charges (NRC) Study to the Regulatory Commission of Alaska (RCA).

Explanation of NRCs

1. Field Service Dispatch Fee (Water and Wastewater).

The Field Service dispatch fee (dispatch) is charged whenever AWWU personnel are dispatched to a customer's service location at the request of the customer or due to activities of the customer and other AWWU charges are not applicable. There are four rates, one for scheduled dispatches during business hours (\$98.00) including customer "no shows"; the second for emergency (unscheduled) dispatches (\$124.00), the third for dispatches after normal business hours (\$256.00), and the fourth is a penalty for unauthorized water turn on or off (\$196.00).

The dispatch fee during business hours is based upon one labor hour plus administrative and general expense. The emergency dispatch fee includes an additional ½ hour of labor costs, in order to recover additional efforts associated with the interruption of scheduled activities. The non-business hours dispatch fee is based upon labor contract requirements to pay personnel a minimum of four overtime hours, at straight time rates, when called out after normal scheduled work hours. A customer is charged the applicable dispatch fee even though the customer fails to show. The penalty for unauthorized turn on and off is twice the dispatch fee during normal business hours. The dispatch fee replaces the previously separate charges for water turn on and off, duplicate locate service, reconnection or restoral charge, water for test purposes, inspection of connection or extension, and return visit necessitated by restricted access.

Revenues from the Field Service dispatch fee, based upon 2007 activity, are \$85,000 for Water and \$40,000 for Wastewater, an increase of \$25,000 and

1 \$20,000, respectively. Part of the wastewater increase is a charge for visits not
2 previously charged, such as emergency dispatches and no shows.

3
4 2. Permit Administration Fee (Water and Wastewater).

5
6 A permit is required to connect, modify, repair or disconnect to/from Utility
7 facilities. The fee covers the review of the permit application to establish, on a
8 preliminary basis, if the proposed connection conforms to the tariff, the AWWU
9 Design Criteria, and applicable law. The fee also covers administration of the
10 permit.

11
12 The proposed permit administration fee is \$63, an increase of \$15 over the
13 current \$48. Revenues from the permit administration fee based upon the 2007
14 activity are expected to be \$43,000 for Water and \$30,000 for Wastewater, an
15 increase of \$10,000 and \$6,000, respectively.

16
17 3. Discontinuance of Service (shut off) Hanger Fee (New) (Water and
18 Wastewater).

19
20 The Utility may discontinue service, with proper notice, when a customer does
21 not pay a bill by the due date (delinquent date). The Utility notifies the customer
22 by mail or electronically not less than fifteen days before the discontinuance of
23 service. In addition to the notice, the Utility is required to place a door hanger on
24 a door of each dwelling unit at a service location not less than 48 hours before
25 discontinuance of service.

26
27 AWWU proposes to initiate a new fee for "Service Discontinuance Notice by
28 Hanger" for customers who received two hangers in the preceding twelve month
29 period. The purpose of the charge is to recover the cost of placing a hanger
30 notification at the customer service location from habitually delinquent customers,
31 but not to penalize or add financial burden to those who are occasionally
32 delinquent. Approximately 2,400 customers received 7,200 (73%) of the 9,800
33 hanger notifications left in 2007. It is projected that, after instituting the charge,
34 behavior will change and the number of chargeable hangers will drop to an
35 estimated 3,600 per year, representing a 37% reduction in overall hanger activity.

36
37 The proposed hanger fee is \$43 and is a new charge. Revenues from the
38 hanger fee are expected to be \$77,400 per Utility, or a total of \$154,000 for both
39 Utilities.

40
41 4. Special Assessment Collection Charge (Water, Wastewater, roads, natural
42 gas).

43
44 This charge is posted to each active assessment account, levied with an effective
45 date of November 17, 1992 or later, to defray the Utility's cost of administering
46 the accounts.

The proposed special collection charge is \$90 per year per active assessment, an increase of \$23 over the current \$67 per year. Revenue from the collection charge is expected to be \$57,000 for Water and \$32,000 for Wastewater, an increase of \$15,000 and \$10,000, respectively.

5. Cross Connection Control Program Fee (Water).

The purpose of the cross connection control program is to protect public water distribution systems from contamination by connected non-potable water or other contaminants. Where the potential for contamination exists MOA Building Safety may require one or more cross-connection control devices. AWWU is responsible for ensuring the assemblies and devices remain in place by requiring periodic testing and the reporting of the test results to AWWU. The fee is charged to recover the costs of compliance monitoring and record keeping (Water Rule 5.10 Cross Connection Control Program).

The proposed cross connection control program fee is \$26 per year, billed at \$2.17 per month, an increase of \$11 per year or \$0.92 per month. Revenue from program fees is \$52,000 per year for Water, an increase of \$22,000 per year.

6. Meter Test Fee (Water).

Customers may request a meter test in order to ensure a meter is working properly. If the meter is found to be outside of specifications and tolerances set by the American Water Works Association (AWWA), AWWU bears the cost of the meter test and adjusts billings as appropriate. If the meter is found to be within AWWA tolerances, then the customer is responsible for the cost of the meter test. The fee recovers the average cost of removing, testing, and reinstalling the meter, including costs of labor and equipment (Water Rule 7.5 Meters Standards and Testing).

AWWU proposes a flat fee be charged for meter tests, whereas previously the tests were performed on a reimbursable basis if the meter was found to be within tolerances. The proposed meter test fee is \$229, an increase of \$67 over the previously collected deposit of \$162. Revenue is expected to be \$458 for Water.

7. Plan Review For Private System and Inspection Deposit (Water and/or Wastewater).

Private System – a water or wastewater service connection or service extension providing service to a multifamily residence(s) with three or more units, or to commercial and industrial building(s).

A. Small Private System Project – a private system project that does not include any fire hydrants or fire lines, involves only one structure, may

1 include one manhole and has one wastewater and/or one water service
2 connection/extension.

- 3
4 B. Large Private System Project – a private system project that is not
5 classified as small.

6
7 Private system customers are required to submit detailed information outlined in
8 the tariff and pay for the cost of the review and inspection. Currently, developers
9 pay a set rate for small or large private system plan reviews. Because of the
10 wide variation in the time required to review various private system plans, the
11 Utility is proposing to return to the practice of charging the actual cost of each
12 project instead of a flat rate. The deposit will be collected upfront based on the
13 average cost per plan review and inspection for small or large projects,
14 respectively, with the balance to be refunded or billed accordingly.

15
16 8. Relinquishment of Easement Deposit (Water and Wastewater).

17
18 An easement no longer required now or in the future, as determined by the Utility,
19 may be relinquished or disposed of in accordance with the Anchorage Municipal
20 Charter, Code and Regulations. Since 2004, the requestor of the removal of a
21 water easement is responsible for the payment of a \$360.00 fee. The Utility is
22 now proposing to charge the actual cost of relinquishing an easement because of
23 the wide variation in the amount of time individual relinquishment efforts take.
24 The Utility is also proposing Wastewater to charge the actual cost of
25 relinquishment.

26
27 9. Meter Deposits (Mobile or temporary meters) (Water).

28
29 The Utility issues a permit for temporary water service from a fire hydrant or a
30 permit for a vehicle to transport water obtained from a hydrant. In such cases,
31 the customer is issued a meter and charged based upon the metered
32 consumption. Hydrant meter deposits are refundable; if there be damage to the
33 meter, however, the cost of repairs or replacement is deducted from the deposit.
34 The deposit amount is the approximate cost of a new meter of the same size.

35
36 10. Wastewater Discharge Permit (Wastewater).

37
38 The rules and regulations relevant to pretreatment are governed by Anchorage
39 Municipal Code. Significant industrial users are required to obtain a wastewater
40 discharge permit. There are three types of discharge permit fees:

- 41
42 A. Discharge Authorization Temporary Permit Fee - recovers the cost of
43 issuing a permit and administrative duties for issuing a discharge permit
44 that is temporary in nature, such as the dewatering of a construction
45 excavation. The proposed charge is \$203, an increase of \$45 over the

current \$158. The projected Wastewater revenue is \$2,842, an increase of \$314.

B. Industrial Discharge Application and Permit Fee - recovers the cost of the review and permit issuance. The proposed charge is \$620, an increase of \$131 over the current \$489. The projected Wastewater revenues are \$3,100 per year.

C. Permitted Industrial Discharge Annual Fee - recovers the cost of annual monitoring and reporting requirements. The proposed charge is \$1,344, an increase of \$528 over the current \$816. The projected Wastewater revenues are \$15,000 per year.

Exhibits.

The detail of the changes to individual charges and fees and the impact on the overall revenue collected through these charges and fees is attached as Exhibit 1 for AWU and Exhibit 2 for ASU.

AWWU Board of Directors.

The AWWU Board of Directors (Board) held a noticed public hearing on October 1, 2008, on the proposed charges and fees changes. The Board approved the NRC for submission to the Assembly and RCA.

RCA Approval Required.

This NRC will be filed with the RCA with a tariff advice letter. The proposed changes are again noticed to the public by the RCA, with the RCA allowing a thirty-day comment period. AWWU does not expect the filing to be suspended for further investigation into a docket. If the RCA does not suspend the filing into a docket, AWWU expects the proposed charges and fees to be made effective January 1, 2009.

THE ADMINISTRATION RECOMMENDS APPROVAL OF AN ORDINANCE OF THE MUNICIPALITY OF ANCHORAGE, ALASKA APPROVING SUBMISSION BY THE ANCHORAG WATER & WASTEWATER UTILITY (AWWU) OF RATE CHANGES BASED ON A NON-RECURRING CHARGES AND FEES (NRC) UPDATE TO THE REGULATORY COMMISSION OF ALASKA (RCA).

ANCHORAGE WATER AND WASTEWATER UTILITY
BOARD MEMORANDUM
No. 2008-118

Meeting Date: October 1, 2008

1 **From:** Mark Premo, P.E., General Manager

2
3 **Subject:** 2007 Test Year Non-Recurring Charges and Fee Study

4
5 The Regulatory Affairs Section staff of the Finance Division has prepared a 2007 Test Year
6 Non-recurring Charges and Fee (NRC) Study. The purpose of the study was to update
7 miscellaneous fees and charges to reflect the current costs of providing those services. The
8 types of services in this category include: water turn on and turn off, permit administration,
9 connection inspections, and administration of special assessments. A thorough review and
10 discussion with Customer Service personnel resulted in a proposal to reduce the number of
11 separate charges in an effort to better align them with AWWU's current business practices.
12 Included in the proposed charges is a new fee for door hanger notices of pending
13 discontinuance of service for habitually delinquent customers. Most of the fees and charges
14 currently in place were based on a 2002 Test Year. The increases in the proposed charges are
15 primarily related to increases in labor and benefit costs occurring since 2002.

16
17 AWWU proposes to replace the currently separate charges for water turn on/off, duplicate
18 locate service, unauthorized turn on/off, water turn on for test purposes, and inspection fee
19 with a "Field Service Dispatch Fee". The change is being proposed because each of these
20 activities requires a similar AWWU response in terms of dispatch and site visit time, and
21 involves the same Field Services and O&M employees.

22
23 AWWU proposes to initiate a new fee for "Service Discontinuance Notice by Hanger" for those
24 customers who have had two previous hangers in the preceding twelve month period. The
25 purpose of the charge is to recover the cost of placing a hanger notification at the customer's
26 service location from those customers who are habitually delinquent, but not to penalize those
27 who are occasionally delinquent. Approximately 2,400 customers received 7,200 (73%) of the
28 9,800 hanger notifications left in 2007. It is projected that after instituting the charge, behavior
29 will change, and the number of chargeable hangers will be 3,600 per year, a 37% reduction in
30 hanger activity.

31
32 The proposed nonrecurring charges and fees result in proforma revenues of \$315,000 for water,
33 and \$201,000 for wastewater; an increase of \$150,000 and \$131,000, respectively. Attached is a
34 summary of the current and proposed nonrecurring charges and fees.

35
36 AWWU has attached a proposed draft Assembly Ordinance and Assembly Memorandum
37 approving the submission of the NRC filing to the Regulatory Commission of Alaska (RCA).

38
39 The AWWU Administration recommends approval of the proposed nonrecurring charges and
40 fees for submission to the Anchorage Assembly and the RCA.

Anchorage Water Utility

1.0 DEFINITIONS (Cont'd)

(D)
(D)

Large Private System means one which has more than two (2) structures and or multiple connections and extensions with two (2) or more hydrants.

(T)
(T)

PRIVATE WATER COMPANY means an organization supplying water service to less than ten (10) customers, and, therefore, that is not subject to regulation by the RCA.

PROPERTY OWNER means a person who owns a parcel of land.

PUBLIC WATER SYSTEM means a water system operated by a public utility, as defined in AS 42.05.990, supplying water service to 10 or more customers for compensation. Such a utility is subject to regulation by the RCA.

RECORD DRAWING means a reproducible project drawing revised to depict and record horizontal and vertical location of improvements as installed and reflected on survey notes, contractor's notes, line and grade notes and/or engineer's notes and bearing the certification of a registered engineer.

RECREATIONAL VEHICLE PARK means a park designated for use by temporary travel dwelling such as recreational vehicles (R.V.'s) i.e. campers, buses, motor homes and travel trailers. Water service provided to R.V. parks is commercial service.

RCA means the Regulatory Commission of Alaska, the state agency that regulates public utilities. The RCA was established on July 1, 1999, by Alaskan State Legislative enactment to replace the APUC.

REGULATORY COST CHARGE means the mandatory surcharge applied to all regulated customer billings to pay the Utility's share of the budget of the RCA.

RESIDENTIAL SERVICE means water service to a dwelling or mobile home park.

Pursuant to:
U-04-22 (4) 03-04-02 M14 Effective: July 8, 2005

Original Sheet No. 60

Anchorage Water Utility

4.0 SERVICE CONDITIONS

4.1 SCHEDULING OF SERVICE

A customer shall schedule an appointment for Utility services requiring a Utility employee to come to the customer's premises (including without limitation: turning water on or off, inspections, locates, troubleshooting and meter readings) not less than twenty-four (24) hours in advance, excluding weekends and holidays.

4.2 EMERGENCY SERVICE

The Utility provides twenty-four (24) hour emergency turn-on or turn-off service. A customer may request emergency service by calling the Utility number listed under general information in a local telephone directory or 564-2762. Emergency call out service is subject to a turn-on or turn-off charge whenever Utility personnel are dispatched as provided in Rule 15.1, Rate Schedule No. 1 - Fees and Special Charges - Nonrecurring.

4.3 ACCESS TO PREMISES REQUIRED

A customer shall permit properly identified Utility employees to enter the customer's premises at all reasonable hours for inspection, sampling, testing or records examination. The Utility may inspect a customer's facilities to determine compliance with the requirements of this tariff and provisions of the Anchorage Municipal Code related to the Utility's service. The Utility may set up on a customer's property devices that are necessary for sampling, testing, inspecting, compliance monitoring or metering.

4.0 SERVICE CONDITIONS (Cont'd.)

4.3 ACCESS TO PREMISES REQUIRED (Cont'd.)

If a customer does not provide properly identified Utility employees reasonable access to the customer's premises as required by this Rule, at the time requested by the Utility, the Utility will notify the customer by door hanger or other written notice of the obstruction of access. In addition, the Utility may attempt to notify occupants of a dwelling by telephone, or other means reasonably calculated to provide notice of a restricted access. The customer will be charged the return visit necessitated by restricted access fee for each return visit provided in Rule 15.1, rate Schedule No. 1 - Fees and Special Charges - Nonrecurring. If access is not available after the expiration of 24 hours from posting or delivery of other written notice, AWU may discontinue water service until assurances of future access, satisfactory to AWU, have been provided.

The customer shall keep the mailbox lid and thaw wire exposed and their location marked, if necessary, and shall maintain access to the mailbox at all times. If access to the mailbox is restricted, the Utility may require the customer to reimburse the Utility for all costs that the Utility incurs to obtain access to commence or terminate service.

4.4 EASEMENTS AND RIGHTS OF WAY REQUIRED

The Utility will construct, own, operate and maintain its facilities only within public rights-of-way, or within permitted corridors or dedicated easements on public or private property respectively which the Utility may obtain by grant, purchase or condemnation under terms the Utility determines to be economically feasible. As a condition of providing service to a parcel, the Utility may require the owner of the parcel to provide an easement on the parcel for the construction, operation and maintenance of the facilities that the Utility determines is necessary to provide the service. A water easement that is no longer required and will not be required as determined by the Utility, for the ownership, construction, operation and maintenance of Utility facilities, may be relinquished or disposed of in accordance with the Anchorage Municipal Charter, Code and Regulations. Each water easement relinquishment shall be subject to fees and charges as set forth in Rule 15.1, Rate Schedule No. 1 - Fees and Special Charges - Nonrecurring.

4.0 SERVICE CONDITIONS (Cont'd.)

4.10 RESALE OR REDISTRIBUTION OF WATER

No customer may provide water supplied by the Utility from an unmetered service connection, with or without charge, for any use other than that implicitly intended for the customer.

4.11 REQUIRED FACILITIES AND INSPECTION

The Utility will not provide service to any building that is not equipped with an inside shut-off valve. The Utility will not provide service to any parcel unless the Utility has inspected the service connection/extension for the parcel, and found that the service extension conforms to this tariff, the most current edition of the Uniform Plumbing Code and other legal requirements applying to its construction and location. The Utility will charge the customer an inspection fee for the service connection/extension as provided in Rule 15.1, Rate Schedule No. 1 - Fees and Special Charges - Non-recurring.

4.12 SERVICE TO AIR-CONDITIONED PREMISES

The Utility will not provide service to any air-conditioned building constructed at any time unless the air-conditioning system or cooling system recycles water and uses water after the initial filling only for the purpose of replacing evaporated water. Water from an air conditioning or cooling system shall not be reintroduced into Utility facilities.

Service will not be provided after January 1, 1992 to any temperature conditioning (chiller) systems which receive cooling through a heat exchanger from circulating water directly intended to the distribution main.

ANCHORAGE WATER UTILITY

5.0 TYPES OF SERVICE OFFERED

5.1 WATER PRESSURE

The Utility generally provides water at a minimum average pressure of 40 pounds per square inch (psi) and a maximum average pressure of 100 psi. A customer in an area which experiences pressures less than 40 psi or greater than 100 psi may elect or may be required to install and maintain at their expense a booster pump or pressure reducing equipment, respectively, within the plumbing of the structure. The Utility will not be liable for damages caused from the customer's failure to install or maintain booster or pressure reducing equipment. The water provided contains an adequate residual of chlorine and fluoride to meet the minimum health requirements established by the State of Alaska.

5.2 TEMPORARY SERVICE

At the customer's request, the Utility annually will turn on water service to accommodate seasonal needs to AWWU customers such as but not limited to a camper park, public park, undeveloped lots, irrigation system or recreation facility in the spring, and discontinue the service in the fall, on dates designated by the customer. The customer shall be charged turn-on and turn-off fee for each service at the rate provided in Rule 15.1. Rate Schedule No. 1 - Fees and Special Charges - Nonrecurring. To receive service under this Rule, a customer shall install in accordance with Utility specifications, and maintain, an appropriate backflow prevention device and water meter.

6.0 SERVICE CONNECTIONS AND SERVICE EXTENSIONS (Cont'd)

6.2 PROVISIONS FOR SERVICE CONNECTIONS

A. Service connections required by this tariff two (2) inches or less will be constructed by the customer at the customer's expense. Only AWU may install water service connections greater than two (2) inches. The Utility will require that the property owner pay a deposit under the Fees for Water Service Connection as provided in Rule 15.1, Rate Schedule No. 1 - Fees and Special Charges - Non-Recurring. Deposits required by this rule secure payments and do not represent a final bill for construction. The property owner is obligated to pay the actual cost of installing the service connection and will be billed for any costs that exceed the deposit or refunded any portion of the deposit that exceeds the cost of installation.

AWU does not perform trench excavation for purposes of installing water service connections. All trenching for water service connections is the property owner's responsibility.

A customer may construct a new service connection to a previously served parcel provided the customer will disconnect the original service connection at the main. If a customer elects to install a new service connection, they shall pay the required Permit Administration Fee and Inspection fee for service connection and or service extension as provided in Rule 15.1, Rate Schedule No. 1- Fees and special Charges - Nonrecurring.

6.0 SERVICE CONNECTIONS AND SERVICE EXTENSIONS (Cont'd)

6.2 PROVISIONS FOR SERVICE CONNECTIONS

A. Service connections required by this tariff two (2) inches or less will be constructed by the customer at the customer's expense. Only AWU may install water service connections greater than two (2) inches. The Utility will require that the property owner pay a deposit under the Fees for Water Service Connection as provided in Rule 15.1, Rate Schedule No. 1 - Fees and Special Charges - Non-Recurring. Deposits required by this rule secure payments and do not represent a final bill for construction. The property owner is obligated to pay the actual cost of installing the service connection and will be billed for any costs that exceed the deposit or refunded any portion of the deposit that exceeds the cost of installation.

AWU does not perform trench excavation for purposes of installing water service connections. All trenching for water service connections is the property owner's responsibility.

A customer may construct a new service connection to a previously served parcel provided the customer will disconnect the original service connection at the main. If a customer elects to install a new service connection, they shall pay the required Permit Administration Fee and Field Service Dispatch fee for service connection and or service extension as provided in Rule 15.1, Rate Schedule No. 1- Fees and special Charges - Non-Recurring.

11.0 SERVICE CHARGE ADMINISTRATION (Cont'd.)

11.3 RESPONSIBILITY FOR PAYMENT (Cont'd.)

3. If a customer has notified the Utility of a disputed item on a bill and withheld payment of the disputed amount in accordance with Rule 11.7, the disputed amount will not be considered delinquent until the dispute has been resolved by the Utility or abandoned by the customer.
4. A person who receives service from the Utility without an approved application for service or otherwise complying with the procedure for obtaining service shall pay the applicable rate for the service, plus the authorized turn-on/turn-off fee provided in Rule 15.1, Rate Schedule No. 1 - Fees and Special Charges - Non-Recurring, for unauthorized turn-on of service. If the Utility cannot determine the date from which the person began to receive service, the person shall be liable for charges for the service at the applicable rate from the later of (i) the date of construction of the facilities where the service was received, or (ii) the last date as of which the Utility was paid for service to the parcel.
5. For residential service to a dwelling containing more than one dwelling unit, the Utility may establish a new customer account in the name of the owner of the property, or in the name of another person having responsibility for payment of the bill; for residential service to a condominium, the Utility will establish a new customer account only in the name of the condominium homeowner's association.

ANCHORAGE WATER UTILITY	
12.0 DISCONTINUANCE, DISCONNECTION, NOTIFICATION AND RESTORATION OF SERVICE POLICY	
12.1 REMEDIES FOR TARIFF VIOLATIONS	
If a customer fails or refuses to comply with this tariff, or to pay charges for Utility service before the delinquent date, the Utility may pursue any available remedy to correct the tariff violation or collect the amount due, including, without limitation, discontinuance or disconnection of service in accordance with this Rule.	
12.2 DISCONTINUANCE OF SERVICE	
A. Discontinuance in General	The Utility discontinues service to a parcel by turning off the flow of water to the parcel at the keybox. Only the Utility may restore service after it has been discontinued under this Rule. A person who turns on water service without Utility authorization shall pay the applicable rate for service taken plus the unauthorized turn-on/turn-off fee for unauthorized turn-on/turn-off of service provided in Rule 15.1, Fees and Special Charges - Nonrecurring, and disconnection of service under Rule 12.4.
B. Discontinuance for Non-Payment	1. When a customer fails to pay for Utility service to a parcel when due, or fails to meet or maintain the Utility's deposit requirements for service to that parcel, the Utility may discontinue service to that parcel and to any other parcel where the same customer receives the same class of Utility service.

ANCHORAGE WATER UTILITY

12.0 DISCONTINUANCE, DISCONNECTION, NOTIFICATION AND RESTORATION
OF SERVICE POLICY (Cont'd.)

12.3 RESTORATION OF DISCONTINUED SERVICE (Cont'd.)

C. Time for Restoration of Service; Service Restoration Fee

The Utility shall restore service that has been discontinued under Rule 12.2 no later than three (3) working days after (i) the cause for discontinuance of service has been corrected and the Utility has approved the customer's new application for service, and (ii) the customer has scheduled an appointment with the Utility for restoration of service. The customer shall pay the Field Service Dispatch fee for reconnection or restore fee for restoring service as provided in Rule 15.1, Rate Schedule No. 1 - Fees and Special Charges - Nonrecurring, which shall be billed on the customer's next monthly bill for service charges. The Utility will not restore service to a parcel unless the customer or a representative of the customer is present at the time of restoration. If the customer or a representative is not present at the time scheduled for restoration of service, the customer must schedule a new appointment for restoration of service, and pay the return visit necessitated by restricted access fee provided in Rule 15.1, Rate Schedule No. 1 - Fees and Special Charges - Nonrecurring, for each such appointment.

12.4 DISCONNECTION OF SERVICE

A. Disconnection in General

The Utility disconnects service to a parcel by removing all or a portion of the facilities connecting the distribution main to the parcel (service connection, keybox, service extension). Only the Utility may restore service after it has been disconnected under this Rule.

Anchorage Wastewater Utility

1.0 DEFINITIONS (continued)

MULTI-FAMILY RESIDENTIAL USER is a user who discharges wastewater into the sewer system from a building containing three (3) or more dwelling units not served by individual service connections where the building is designed solely for residential purposes, that is, as for living accommodations for occupants.

MUNICIPALITY is the Municipality of Anchorage.

PARCEL is an area of land enclosed by boundaries established lawfully by a subsequent conveyance or plat of record.

PRIVATE SYSTEM means a sewer service connection and/or service extension that serves any use other than providing service to a single family residential unit or duplex residential unit on a given parcel. These systems are privately operated and are connected to the Utility's sewer system. Private systems enable sewer service to multifamily residences with three or more units, and to commercial and industrial buildings.

SMALL PRIVATE SYSTEM PROJECT is one that involves only a single structure, has one sewer service connection and extension, and requires no manholes.

LARGE PRIVATE SYSTEM PROJECT is one which has more than two structures with more than two service connections and extensions and has more than two manholes.

RCA means the Regulatory Commission of Alaska, the state agency that regulates public utilities. The RCA was established on July 1, 1999, by Alaskan State Legislative enactment to replace the APUC.

4.0 APPLICATION AND ACCEPTANCE FOR SERVICE

4.1 APPLICATION

A customer desiring sewer service from the Utility shall make application by completing an Application for Service form. The application may be completed electronically, or in person at our customer service office at the Utility, or completed over the phone with a customer service representative. A copy of the form is on file with the RCA.

If a person fails to complete an application for service, yet accepts service delivered by the Utility, the person shall be obligated to pay for the service in accordance with the appropriate rate schedule and must abide by these rules and regulations. The furnishing of service by the Utility may not be construed as a waiver of the requirement of completing an application or satisfying other requirements established by these rules and regulations.

4.2 SERVICE WITHOUT APPLICATION AND AUTHORIZED CONNECTION

A. No source of wastewater shall be connected to a Utility facility without written permission of the Utility in the form of a connection permit, together with the payment of a permit fee and inspection fee as provided in Rule 8.7. The Utility shall not provide service to a customer until the Utility has approved the customer's application for service under Section 4.1, the customer has obtained a permit from the Utility, and the Utility has inspected and approved any connection to the Utility facilities required to provide the service. An application by a new customer for service at a premise previously permitted and inspected shall not require payment of a new permit fee or inspection fee unless there has been a material change in the character of the premise's use.

The application for service shall be approved within one (1) working day of its receipt and the inspection of new connections or extensions shall be completed within two (2) working days of when the customer requests a scheduled inspection. Approval of the connection or extension shall be given at the conclusion of the inspection, providing the installation meets Standard Construction Specifications, with the inspector signing the customer's copy of the permit.

If the installation fails the inspection, the customer will be required to pay an additional Field Service Dispatch fee as shown in Section 8 of this tariff, before scheduling another inspection. Each re-inspection that is required in order to determine whether or not to grant approval of the installation requires payment of a Field Service Dispatch fee.

B. If the Utility discovers an unauthorized connection to, or use of, the Utility's facilities, the Utility may remove the unauthorized connection and terminate the unauthorized use. The user of unauthorized service shall pay the charges for that service set forth in this tariff, from the time of the unauthorized connection to the time the Utility terminates the unauthorized use. A user of an unauthorized connection also shall pay the costs incurred by the Utility to remove the connection, or to inspect the connection to determine whether or not it conforms to the Utility's construction standards and applicable law.

First Revision Sheet No. 47

Anchorage Wastewater Utility

10.0 GENERAL SERVICE CONDITIONS

10.1 EMERGENCY SERVICES

The Utility provides a twenty-four (24) hour emergency service. A customer may request emergency service by calling the Utility number listed under general information in the local telephone directory or 564-2762. Emergency services for maintenance that is not the Utility's responsibility are subject to after hour call-out charges whenever Utility personnel are dispatched as provided in Rule 8.7. (C)

10.2 REVISION OF PERMITTER DISCHARGES

The Utility's permission to discharge a specified volume or strength of sewage into its system shall be subject to such revision as the Utility determines to be necessary to effect the purpose of its limits on the volume or strength of discharges or to protect the public health and safety. (C)

10.3 ACCESS TO PREMISES REQUIRED

The Utility may inspect a user's monitoring or other facilities to determine compliance with the requirements of the Anchorage Municipal Code. The user shall allow properly identified employees of the Utility to enter upon the premises at all reasonable hours for the purposes of inspection, sampling, testing or records examination. The Utility shall have the right to set up on the user's property such devices as are necessary to conduct sampling, testing, inspection, compliance monitoring and/or metering operations.

10.4 EASEMENTS AND/OR RIGHTS-OF-WAY REQUIRED

The Utility will construct, own, operate, and maintain wastewater facilities only in the right-of-way of public streets, roads or highways which the Utility has a legal right to occupy, or on public or private property across which easements or rights-of-way have been obtained by grant, purchase or condemnation under terms the Utility determines to be economically feasible. As a condition of service, the Utility may require the execution by the owner of the property served of an easement providing suitable right-of-way for the construction and maintenance of the sewer lines, connections and associated collection facilities deemed necessary by the Utility.

RCA No. 126 Third Revision C Cancelling Sheet No. 47
Second Revision Sheet No. 47

Anchorage Wastewater Utility

10.0 GENERAL SERVICE CONDITIONS

10.1 EMERGENCY SERVICES

The Utility maintains a twenty-four (24) hour emergency service. A customer may request emergency service by calling the Utility headquarters office at 564-2762 or such other number as may from time to time be published in the local telephone directory. Emergency services for maintenance that is not the Utility's responsibility are subject Field Service Dispatch fee as provided in Rule 8.0. (C)

10.2 REVISION OF PERMITTED DISCHARGES

The Utility's permission to discharge a specified volume or strength of sewage into its system shall be subject to such revision as the Utility determines to be necessary to effect the purpose of its limits on the volume or strength of discharges or to protect the public health and safety. (C)

10.3 ACCESS TO PREMISES REQUIRED

The Utility may inspect a user's monitoring or other facilities to determine compliance with the requirements of the Anchorage Municipal Code. The user shall allow properly identified employees of the Utility to enter upon the premises at all reasonable hours for the purposes of inspection, sampling, testing or records examination. The Utility shall have the right to set up on the user's property such devices as are necessary to conduct sampling, testing, inspection, compliance monitoring and/or metering operations.

10.4 EASEMENTS AND/OR RIGHTS-OF-WAY REQUIRED

The Utility will construct, own, operate, and maintain its facilities only within the right-of-way which the Utility has a legal right to occupy, or within easements on public or private property which the Utility may obtain by grant, purchase or condemnation under terms the Utility determines to be economically feasible. As a condition of providing service to a parcel, the Utility may require the owner of the parcel to provide an easement on the parcel for the construction, operation and maintenance of the sewer lines, connections and associated collection facilities that the Utility determines is necessary to provide service. A sewer easement that is no longer required and will not be required as determined by the Utility, for the ownership, construction, operation and maintenance of Utility facilities, may be relinquished or disposed of in accordance with the Anchorage Municipal Charter, Code and Regulations. Each sewer easement relinquishment shall be subject to fees and charges on reimbursable basis as set forth in Rule 15.1, Rate Schedule No. 1 - Fees and Special Charges - Non-Recurring. (N)
