On November 20, 2001, the Anchorage Assembly approved AO 2001-183/AM 923-2001, a City Hall lease between the Municipality of Anchorage and Anchorage Public/Private Partnership. Under the terms of the lease regarding "Additional Rent" (Section 5.05, attached as Appendix A), the Lessee (MOA) is responsible for minimum annual payments to both a Capital Reserve Account and a Tenant Improvement Account. The annual contribution to the City Hall Capital Reserve Account is calculated as \$77,503, the original base payment, and adjusted for inflation as measured by changes in the Consumer Price Index (CPI) for Anchorage (attached as Appendix B). The cumulative change in CPI between 2001 and 2008 is 22.1% so the 2009 minimum deposit to the City Hall Capital Reserve Fund is \$94,650 (attached as Appendix C).

222324

The minimum deposit to the Tenant Improvement Account is a fixed \$75,000, and thus does not change from year-to-year.

252627

28

Funding for the \$94,650 and the \$75,000 contributions comes from the Areawide General Fund (101) 2009 Operating Budget (Real Estate Services). Both contributions are being appropriated in the Areawide Capital Fund (401).

What's It Worth Now What does \$100 in 1980 dollars equal today?

The Anchorage CPI-U can help answer the question. Use the equation below or use the quick calculator in excel.

Step 1:

2008 Anchorage CPI divided by 1980 Anchorage CPI <u>189.5</u> = 2.22 85.5

Calculating Index Changes

Movements of the indexes from one period to another are usually expressed as percent changes rather than changes in index points because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example below illustrates the computation of index points and percent changes.

Index Point Change:

CPI- Anchorage 2008
Less CPI for previous 189.5
period- Anchorage 2007
Equals index point change 8.3

Percent Change:

Step 2:

Multiply 2.22 by any number of 1980 dollars and you will have the 2008 equivalent.

So, \$222 in 2008 would have the same purchasing power as \$100 did in 1980. (100 x 2.22= \$222)

The formula can be reversed to deflate current dollars. Use the <u>quick deflation</u> <u>calculator</u> in excel.

For US data prior to 1960, <u>click here</u> to use an inflation calculator based upon the U.S. CPI-U.
