

SOLAR AT THE EGAN CENTER

BY THE NUMBERS

Alaska's largest rooftop solar array

76.68 kW system is expected to produce 80.72 megawatt hours per year

Nearly \$700,000 in savings

Expected to save over \$20,000 in year 1, with savings increasing as electricity rates go up. It will pay for itself in less than 8 years

No Cost to Taxpayers

The project was paid for out of the Convention Center Capital Reserve Fund, a pool of money reserved for capital improvements from the Convention Center Room Tax Fund

12 homes

The project will offset the equivalent energy use of 12 Anchorage homes each year
