

Previous Project Updates:

The project kicked off in March 2018 with several outreach events and meetings with stakeholders. The events helped to form an initial set of goals for the Coordinated Human Services Transportation Plan to pursue.

1. Transportation systems must support and promote individual independence, freedom, and opportunity.
2. Creative and efficient use of funding for transportation systems.
3. Increased collaboration between public and private agencies.

To learn more about the meetings and the input gathered at the March outreach events please see the summary pdf posted below along with the a PowerPoint presentation that was shared at the 8 March 2018 Technical Advisory Committee meeting.

Since March the project team has prepared and is currently fielding a survey of transportation providers to gather more specific information about the strength and extent of the transportation system that supports individuals with disabilities, seniors and low income Anchorage residents. The team is also preparing for a few additional focused outreach events to learn more about the transportation needs of job seekers and individuals with limited English proficiency.

Over the summer, the project team will work to draft the plan for public input in the fall. The general project schedule is below. The plan should be completed in 2018. If you have any suggestions or input to offer please don't hesitate to contact AMATS Project Manager, Jamie Acton
