APPROVAL CRITERIA

The Planning Director may only approve a request to replicate a nonconformity if the director finds that **all** of the following standards are satisfied. Each standard must have a response in as much detail as it takes to explain how your project satisfies the standard. The burden of proof rests with you.

AMC 21.13.030D.2. Approval Criteria for Nonconforming Uses

- a. The nonconforming use is or shall be made compatible with uses allowed on adjacent properties, in terms of site design and operating characteristics (such as lighting, noise, odor, dust, and other external impacts);
- b. The nonconforming use will not limit, impair, or impede the normal and orderly development and improvement of surrounding property for uses permitted on those properties;
- c. Utilities, access roads, drainage, and other necessary facilities are sufficient to service the use, or will be provided;
- d. Adequate measures have been or will be taken to provide ingress and egress that are designed to minimize traffic congestion on the streets; and
- e. The nonconforming use will not result in the creation of additional nonconformities or the need for any variances.

(continued on p. 3)

AMC 21.13.040D.2. Approval Criteria for Nonconforming Structures

- a. The nonconforming structure is or can be made compatible with uses allowed on adjacent properties, in terms of site design and operating characteristics (such as lighting, noise, odor, dust, and other external impacts);
- b. The nonconforming structure will not limit, impair, or impede the normal and orderly development and improvement of surrounding property for uses permitted on those properties;
- c. The parking, landscaping, and lighting either conform to the requirements of this title, or are moving towards conformity to the maximum extent feasible;
- d. Utilities, access roads, drainage, and other necessary facilities are sufficient to service the use, or will be provided; and
- e. Adequate measures have been or will be taken to provide ingress and egress that are designed to minimize traffic congestion on the streets.
