

Commercial Glass Recycling

Participants Needed!

Solid Waste Services is testing commercial glass recycling in Anchorage. Glass recycling will help Anchorage businesses save money, protect the environment and leverage community support.

How it works:

SWS will provide 96-gallon roll carts for GLASS ONLY. Carts will be serviced at least once a week with the option for twice weekly if necessary. All glass will be recycled LOCALLY by Central Recycling Services. Recycled glass is used in local construction projects and one of the few recycled materials that stays in Southcentral Alaska.

Collection begins as soon as your business signs up and is ongoing.

What you get back:

- Money – Glass can make up a significant portion of your trash. By reducing your dumpster size or collection frequency you could save hundreds of dollars a year
- Community support – Glass is the most requested recycling service by Anchorage residents
- Environmental benefits – Reduce your overall waste and help extend the life of Anchorage's only landfill by keeping material out of it

What it costs:

\$27.89 per month for weekly service per 96-gallon roll cart. Additional carts and more frequent servicing available at additional cost.

To participate contact SWS Sustainability Coordinator Pierce Schwalb at (907) 343-6274 or pierce.schwalb@anchorageak.gov
