

Just in time for the holidays...

Anchorage has installed 4,300 energy-efficient LED street lights. This will save the City about \$360,000/year. Soon, all 16,500 street lights in the Anchorage bowl will be replaced with LED lights!

LEDs are already all over Anchorage! Town Square is draped in blue and white LED holiday lights and residents are realizing their benefits too. LED lights can easily pay for themselves in just one season, as they use about 3 watts per 100 bulbs compared to traditional mini-lights that use 45 watts per 100 bulbs or standard large bulbs that can use between 240 and 1000 watts per 100 lights. They last years longer, are more durable, save energy, and look great! See page 11 for more energy efficiency ideas for your home.

Holiday trash getting you down? The Alaska Aces have teamed up with the Anchorage 5th Avenue Mall for Return, Recycle & Score! All you have to do is collect your holiday gift wrap and boxes:

- Return to Anchorage's 5th Avenue Mall between December 26 and January 4.
- Recycle your gift wrap and boxes at the Ace's kiosk on the 3rd floor by the sky bridge.
- Score a single game ticket voucher to use at any home game during the regular season.

Remember, no bows, ribbons, foil or plastic wrapping, foam peanuts, or other packaging materials; just paper gift wrap and paperboard boxes. See page 6 for more places to recycle your holiday wrapping and boxes.
