Whole long tubular fluorescent lamps, round tubular lamps, small screw-in or pop-in compact fluorescent lamps of all styles	Ballasts, broken lamps, incandescent light bulbs, LED lamps

Flatten Your Cardboard

Whether you're recycling curbside or at a drop-off location, flatten your cardboard so it fits! Unflattened cardboard increases the labor costs of recycling by increasing the number of times bins need to be hauled.

Curbside Tips

Observe all rules of your curbside program. Leave at least three feet of space around and between your carts so the automated trucks have enough room to pick them up. Close the lid completely on your cart, and be sure the handle is facing your house. Check for obstacles like snow banks, mailboxes, trees, cars, and telephone poles when setting out your carts. Items left outside the cart are only collected if you have called in a request prior to your collection day.

Bottle Caps Are Okay

You can now recycle plastic caps from your bottles and jugs. The best way to do this is to empty the bottle or jug, flatten or crush it if possible and put the screw cap back on before tossing it in your recycling bin.

Left Items Are Litter

Items left outside of the designated bins at any recycling location are considered litter and will be discarded as trash. If the bin is full, please don't leave your items near the bin as it will not be recycled. Excessive littering around bins jeopardizes the future of the recycling program.

If In Doubt, Leave It Out

Read all signage on recycling bins and follow instructions. If an item is not on the list of acceptable items, don't put it in the bin.
