MUNICIPALITY OF ANCHORAGE — UCIP - 1 UTILITY CAPITAL NEEDS ANALYSIS

Department Enterprise Activities

Program Category Telephone Utility

POLICY GOALS

The primary goal of the Anchorage Telephone Utility is to provide reliable, quality telecommunications services to consumers within our serving area at reasonable rates.

SIX-YEAR DEPARTMENT GOALS AND STRATEGY

The demand for all forms of telecommunications services continues to grow each year. This demand is expected to remain relatively strong throughout the coming five-year period.

In order to attain our primary goal, ATU must continue its program of updating its Central Office equipment (COE) to state-of-the-art digital switching systems from the current electromechanical XY systems. Planning dictates the establishment of the new Central Wire Center to phase out the existing North Wire Center XY over a period of four years; replacement of the existing South Wire Center XY with new digital COE in 1984; and replacement of the existing Girdwood Wire Center XY with new digital COE in 1982. Additional plans call for the inclusion of Elmendorf AFB into the ATU network in 1981.

Outside Plant facilities will continue to be expanded to meet demands for telecommunications services. Such facility expansion includes new conduit and manhole systems, feeder cables, distribution cables, etc.

The ongoing demand for more sophisticated business systems necessitates the increasing need for purchase of large PABX systems during the next five years.

To reduce operating costs, ATU will be centralizing a major portion of its maintenance and plant administrative activity into a Technical Assistance and Control (TAC) Center. Through increased utilization of automation, ATU will realize the benefits of greater operational efficiencies and reduced costs.

MUNICIPALITY OF ANCHORAGE — UCIP - 2 EXISTING CAPITAL BUDGET SUMMARY
