

MUNICIPALITY OF ANCHORAGE
DEPARTMENT GOAL/PROGRAM STATEMENT
Department: Information Systems

Department Goal

The goal of the Information Systems Department, through the 1984-1989 CIP, is to insure the protection and continued timely processing of vast quantities of information vital to Municipal agencies and citizen clients. The requisite blend of centralized data processing and distributed processing capabilities will be provided, and altered as needs demand and technology allows.

Equipment Acquisition

1984 funding for acquisition of an Uninterruptible Power Supply (UPS) and necessary building modifications to accommodate the equipment will permit the uninterrupted processing of vital Municipal information during times of electrical power outages caused by mechanical failure or vandalism. A guaranteed in-house power source will insure timely processing of such critical functions as election returns, tax statements and utility billings. Additional benefits include emergency lighting and communication capabilities for key mayoral and executive offices and other essential services in the Municipal Hill Building.
