

**PUBLIC WORKS**

**MUNICIPALITY OF ANCHORAGE  
DEPARTMENT OF PUBLIC WORKS**

**Department Goal:**

The goal of the Department of Public Works for the 1994-1999 Capital Improvement Program is to establish and maintain efficient and effective transportation and drainage systems within the Municipality of Anchorage. Our Capital Improvement Program is an integrated planning and funding document which calls for development and implementation of transportation and drainage capital programs. The focus of the transportation program is to enhance the safe and efficient movement of people and goods while minimizing adverse environmental and neighborhood impacts. The focus of the drainage program is to enhance the safe and efficient collection and discharge of drainage while minimizing flooding, erosion, and adverse impacts on vegetation and water quality. Projects are chosen on the basis of recommendations of existing plans and studies, considering impacts on public safety and operations and maintenance costs, and involving input from community councils, the public, and staff.

**Roadway Improvements:**

The Roadway Improvement Program is an integrated planning and funding approach to transportation needs for Municipally owned roads. This program includes projects such as new roads, road reconstruction, asphalt overlays, and chip seals of existing roads. Plans and studies used for project selection include the Comprehensive Development Plan, Official Streets and Highways Plan and Transportation Improvement System. Additionally, many streets have been chosen for inclusion in the Capital Improvement Program on the basis of plans cooperatively developed by the Municipality and the State, and adopted by the Anchorage Metropolitan Area Transportation Study and Technical Policy Committees. Criterion used in selecting roadway projects include operation and maintenance cost impact, public safety, bid readiness, and local match availability.

**Safety Improvements:**

The Safety Improvement Program complements the Roadway Improvement Program by identifying projects which improve the safety and efficiency of vehicular and pedestrian movement throughout the Municipality. This program includes projects such as signalization, intersection channelization, illumination, walkways, signage, and striping. Studies

**MUNICIPALITY OF ANCHORAGE  
DEPARTMENT OF PUBLIC WORKS**

used for project selection include traffic studies, accident reports and Hazardous Route Reports. Criterion used in selecting safety projects include public safety, bid readiness, road capacity, and local match availability.

**Drainage Collection:**

The Drainage Collection Program is an integrated planning and funding approach to the drainage needs in Anchorage. This program includes projects such as drainage studies, storm trunks, storm drains, culverts and creek improvements. Existing plans and studies used in project selection include Storm Drainage Studies, Flood Plain Reports, and the Areawide Water Quality Management Plan. Criterion used in selecting projects include operation and maintenance cost impact, public safety, bid readiness and local match availability.

**Drainage Treatment:**

The Drainage Treatment Program complements the Drainage Collection Program by identifying projects which will enhance, maintain, and protect the natural environment as the Drainage Collection System is further developed. This program includes projects such as Oil and Grease Separators, Sedimentation Basins, and Environmental Protection Improvements on Snow Disposal Sites. Plans and studies used for project selection include Storm Drainage Studies and the Areawide Water Quality Management Plan. Criterion used in selecting projects include water quality impacts, public safety, bid readiness, operations and maintenance cost impact, and local match availability.

**Public Works Miscellaneous:**

This category complements all other programs by containing projects which will assist in accomplishing road and drainage projects. The Department of Public Works intends to purchase heavy equipment for use in road and drainage projects; construct a soils remediation facility to use as temporary storage for contaminated materials excavated during road construction which will allow the work to continue uninterrupted while a permanent solution can be found; acquire land to facilitate handling and storage of snow removed from local roads; and develop land for street maintenance operations and other industrial needs in the Girdwood area.

**MUNICIPALITY OF ANCHORAGE  
DEPARTMENT OF PUBLIC WORKS**

**Non-Capital/Legislative:**

This section of the Capital Improvement Program includes legislative requests for Public Works activities which do not meet the traditional definition of capital projects. The section focuses on funding for National Pollution Discharge Elimination System permits and an AMATS transportation study for alternative North-South corridors.

<p>NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM (NPDES) REIMBURSEMENT</p> <p>Amendments in 1987 to the Clean Water Act require Municipal and Industrial permits to be obtained from EPA to discharge storm water into U.S. waters. The NPDES requires permit applications to be submitted which test surface water runoff for pollutants and provide methods to reduce or eliminate pollutants from being discharged into receiving waters. Unless otherwise designated the ADEC requires water entering the receiving stream to meet drinking or aquatic life water standards. Application cost for the Municipal permit should be around \$1.5 million and reimbursement is being pursued in 1994. Industrial permitting costs are estimated at \$300,000 and will be pursued in 1995.</p>	S= 1,500		Areawide

<p>AMATS ALTERNATIVE CORRIDOR STUDY</p> <p>The AMATS Long Range Transportation Study has identified the need to plan for the expansion of the traffic carrying capacity of various North-South arterials. This need is predicated on both existing and projected community development patterns. Some of the facilities identified raise significant concerns related to community, neighborhood and environmental impacts. Funding is required to evaluate those impacts, identify remedial measures that would accompany the facilities and consider trade-offs relative to the various alternatives. North-South corridors of concern include:</p> <p style="margin-left: 20px;">C Street - Int'l Airport Rd. to Minnesota                      Old Seward Hwy. - Dimond Blvd. to Dowling                      New Seward Hwy. - 36th Ave to Rabbit Ck.                      Lake Otis Pkwy. - Dowling Rd. to Tudor Rd.                      Bragaw St. - Northern Lights to O'Malley                      Boniface Pkwy. - Tudor Rd. to Dowling Rd.                      extended</p>	S= 1,200		Areawide

<p>NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM (NPDES) REIMBURSEMENT            Amendments in 1987 to the Clean Water Act require Municipal and Industrial permits to be obtained from EPA to discharge storm water into U.S. waters. The NPDES requires permit applications to be submitted which test surface water runoff for pollutants and provide methods to reduce or eliminate pollutants from being discharged into receiving waters. Unless otherwise designated the ADEC requires water entering the receiving stream to meet drinking or aquatic life water standards. Application cost for the Municipal permit should be around \$1.5 million and reimbursement is being pursued in 1994. Industrial permitting costs are estimated at \$300,000 and will be pursued in 1995.</p>	S= 1,500	S= 300

<p>AMATS ALTERNATIVE CORRIDOR STUDY            The AMATS Long Range Transportation Study has identified the need to plan for the expansion of the traffic carrying capacity of various North-South arterials. This need is predicated on both existing and projected community development patterns. Some of the facilities identified raise significant concerns related to community, neighborhood and environmental impacts. Funding is required to evaluate those impacts, identify remedial measures that would accompany the facilities and consider trade-offs relative to the various alternatives. North-South corridors of concern include:            C Street - Int'l Airport Rd. to Minnesota Old Seward Hwy. - Dimond Blvd. to Dowling New Seward Hwy. - 36th Ave to Rabbit Ck. Lake Otis Pkwy. - Dowling Rd. to Tudor Rd. Bragaw St. - Northern Lights to O'Malley Boniface Pkwy. - Tudor Rd. to Dowling Rd. extended</p>	S= 1,200
