APD Expansion Phase II Indoor Secure Storage

Project ID: APD060014 **Dept:** Anchorage Police Department
Project Type: New **Start Date:** July 2014
Location: Assembly: Areawide, Community: Anc Metro **End Date:** June 2015
 Police Service Area

Description:

This project addresses the construction of an Indoor Secure Evidence Storage 32,000 sqft facility. This building will securely house large evidence items and department owned mission essential emergency response specialty vehicles. With construction of the new Outdoor Secure Evidence Lot in 2013 and closure of the previous facility, this project will allow for the collocation of Indoor and Outdoor Secure Evidence Storage on the same secure campus to increase security and decrease man power management costs.

Comments:

The department plan is an expansion of its campus consisting of approximately 70 acres of developable land. This phase of the project will address the need to relocate the current Indoor Secure Evidence Storage area from the Transit/Public Works Campus. Additionally, the department will relocate its specialty response vehicles to this indoor secure storage facility. By August of 2011, the department will have completed 35% Schematic Designs with cost estimates to enable a rapid submission for competitive bid once project construction funding is secured. Wetlands permit is secured and a site review plan has been approved by the Urban Design Commission. This project is "shovel ready".

MDT Technology Refresh

Project ID:	APD10009	Dept:	Anchorage Police Department
Project Type:	Rehabilitation	Start Date:	July 2014
Location:	Assembly: Areawide, Community: Areawide	End Date:	June 2015

Description:

This will replace aged in-car laptops for marked patrol officers and expand MDT issue to Detective personnel, in an effort to keep pace with expanding technology requirements. The department deploys a total of 470 laptop computers with 40 units held as "hot spares" for replacement or periodic software enhancement roll outs. This project considers the replacement of 1/3 the total units each year.

In an effort to maintain technological standards and keep pace with ongoing system software upgrades and enhancements, the average computer life has been established (industry wide) as no more than three (3) years. The department must maintain this technology refresh cycle for critical systems to ensure the safety to the officer and the delivery of police services to the community.

Comments:

The original system laptops were replaced in 2006/2007 through the award of a Department of Justice, Community Oriented Policing (COPS) Office program grant.
