

## **MANAGEMENT INFORMATION SYSTEMS**

### **Department Goal**

The goal of the 1997-2002 Capital Improvement Budget/Program is to continue to provide cost effective, quality computer processing and telecommunications services to the Municipality while at the same time reducing costs by:

- consolidation of application systems where appropriate,
- integration of existing and new application systems to reduce redundant data entry, storage and management,
- automation of after-hours computer operations where possible, and
- ensuring the appropriate use of technology.

### **Program Statement**

The department goal can be accomplished through continued application system development and enhancement and implementation of various new software packages. All project costs will be funded via a commercial loan to Management Information Systems which will be repaid through realized savings and allocations to other departments.
