MANAGEMENT INFORMATION SYSTEMS

Department Goal

The goal of the 1997-2002 Capital Improvement Budget/Program is to continue to provide cost effective, quality computer processing and telecommunications services to the Municipality while at the same time reducing costs by:

- consolidation of application systems where appropriate,
- integration of existing and new application systems to reduce redundant data entry, storage and management,
- automation of after-hours computer operations where possible, and
- ensuring the appropriate use of technology.

Program Statement

The department goal can be accomplished through continued application system development and enhancement and implementation of various new software packages. All project costs will be funded via a commercial loan to Management Information Systems which will be repaid through realized savings and allocations to other departments.
