

Appendix T **Structure of Municipal Funds**

Funds represent accounting entities established to track resources available for and costs needed to provide for functions or activities. A fund is a grouping of related accounts used to maintain control over resources segregated for specific activities or objectives. Fund accounting is used to ensure and demonstrate compliance with finance related legal requirements and are established based on generally accepted accounting standards.

As a rule, the effect of interfund activity (IGCs, Transfers to/from Other Funds) has been eliminated from the government-wide financial statements. Exceptions to this rule are charges between Anchorage's various business-type functions and various other functions of Anchorage. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

The Municipality of Anchorage uses Governmental, Proprietary, and Fiduciary Fund types. All the funds listed in this section are included in the Municipality's audited financial statements, unless otherwise noted.

The chart on page T - 2 displays the structure of all Municipal funds.

Governmental Funds

Governmental operations are supported by various funding sources and so have been grouped into the following fund-types – general fund, special revenue funds, capital projects funds, debt service funds, and permanent funds. Any one fund may support various functions and all the fund's financial reports reflect relevant information for those functions.

The Anchorage Assembly approves operating budgets and appropriations of direct costs at the department level. The function cost (direct costs and IGCs) is appropriated at the fund level.

Governmental Fund Basis of Accounting

The governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting – revenues are recognized as soon as they are both measurable and available and expenditures are generally recorded when a liability is incurred. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments are recorded only when payment is due.

Property taxes, lodging and other taxes, licenses and interest associated with the current fiscal period are all considered to be susceptible to accrual. Only the portion of special assessment receivable due within the current period is considered to be susceptible to accrual as revenue of the current period. All other revenue items are considered to be measurable and available only when cash is received by the Municipality.

Following are descriptions of the governmental fund-types and funds:
