RAPA states that in Order U-18-102(44) we established several conditions applicable to the certificate issued to AHP, including that "before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project…." RAPA also states that we clarified "that the term of the MOA's voting rights surrender must be at least equal to the terms of the Eklutna PPA and the MEA PPA.[35]

RAPA states that in Order U-24-024(8) we confirmed the MOA's voting rights surrender had a minimum time period tied to the terms of the Eklutna PPA and the MEA PPA.[36] RAPA notes that in Order U-24-024(8) we provided guidance for future AHP filings, that in addition to addressing the minimum term of EOC voting rights surrender issue, AHP should provide the information to show that it can bring to EOC meetings a depth and breadth of technical and managerial expertise at least comparable to the level of expertise that MEA and Chugach bring to the meetings.[37] RAPA argues that this guidance does not "eviscerate" the minimum time period for the surrender of voting rights required in Order U-18-102(44) and confirmed in Order U-24-024(8). RAPA contends that the guidance instead explains what should be filed when a future filing is appropriate. RAPA states this is clarified when we discussed the dismissal of the Docket U-24-024 Notice and Request, pointing to our ruling that the dismissal was without prejudice for refiling closer to the time the Eklutna PPA and MEA PPA will expire.[38]

RAPA states that Order U-24-024(8) shows there is a minimum time period for the surrender of voting rights and when the MOA makes a filing for restoration of EOC

voting rights it should be close to the time the PPAs expire. RAPA states that filing should include all of the information noted in the guidance in Order U-24-024(8).[39] RAPA states that AHP has not shown that its current filing is close to the time when the PPAs will expire and therefore the Application is premature and should be dismissed.[40]

Chugach and MEA Joinder in Motion to Dismiss

MEA and Chugach joined In RAPA's Motion to Dismiss. MEA and Chugach state that we have now considered and decided this matter twice and the matter should be dismissed. MEA and Chugach also state that if we proceed with further consideration of AHP's request, the reinstatement of those voting rights would result in AHP regaining majority voting rights on the EOC, despite AHP's much narrower involvement and economic stake in the Eklutna Project than its predecessor, ML&P.[41] MEA and Chugach state that given the current PPAs among the owners of the Eklutna Project and the utility expertise within the MOA and AHP, Chugach and MEA cannot support the reinstatement of the AHP's majority voting rights.[42]

MEA and Chugach agree with RAPA that AHP's filing in this docket is premature due to the surrender term. MEA and Chugach state that in Order U-24-024(8) we reiterated our prior decision that the surrender of voting rights on the EOC was a condition of our approval of AHP's certificate, and that the surrender was required to last as long at the minimum term of the PPAs. MEA and Chugach state that the PPAs are still in effect and therefore the minimum term of the surrender has not been satisfied. Chugach and MEA believe that we have been clear on this point, and consequently, they

[39]Motion to Dismiss at 6-7.

[40]Motion to Dismiss at 7.

again join in RAPA's Motion to Dismiss because there is no reason to relitigate the fundamental question in this new docket.[43]

MEA and Chugach state that AHP has failed to provide reasonable justification for why we should revisit the surrender requirement and our recent and clear prior decisions on the matter. MEA and Chugach state that first, the PPAs are still in effect and therefore the minimum term of the surrender has not been satisfied. MEA and Chugach state that, second, the circumstances have not materially changed with respect to the underlying basis for the surrender requirement. MEA and Chugach state that the relevant facts with respect to AHP's function and with respect to its relationship with the Eklutna Project, remain very similar to those in existence immediately after the transaction between Chugach and ML&P and at the time of Order U-24-024(8).[44] MEA and Chugach state that AHP, unlike its predecessor ML&P, is not operating as a ratepayer-serving utility and even with the creation of two new staff roles, AHP still has minimal staff and no bench of utility expertise, and therefore only has limited "knowledge of prudent utility practice and the Railbelt electric generation and transmission system."[45] MEA and Chugach state that AHP is responsible for only 19.05% of Eklutna Project costs despite its majority ownership stake.[46] MEA and Chugach state that AHP exists only to sell power generated by the Eklutna Project on a wholesale basis to Chugach and MEA via the PPAs and bears significantly less responsibility, cost, and risk associated with the Eklutna Project. MEA and Chugach state that until the PPAs have otherwise expired or terminated, or the facts

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

change materially, there is simply no new justification for us to revisit our decision on this matter and the request is therefore premature.[47]

MEA and Chugach make an additional comment in opposition to the reinstatement of AHP's majority vote structure and state that if we deny RAPA's Motion to Dismiss and believe that AHP's request raises new issues and therefore necessitates further proceedings, Chugach and MEA will fight the reinstatement of AHP's majority voting rights vigorously. Chugach and MEA state that under a reinstatement of a majority vote framework for AHP, MEA and Chugach will no longer be able to determine how to operate and maintain the Eklutna Project in a manner consistent with prudent utility practice without AHP's agreement. MEA and Chugach state that they will bear the vast majority of the costs and risks of decisions or lack of action, specifically noting that Chugach bears 64.29% of the costs of operations, maintenance, capital, and environmental costs of the Eklutna Project and MEA bears 16.67% of such costs. MEA and Chugach state that with their 46.67% of EOC voting rights, independent or joint decisions cannot be made on the Eklutna Project without AHP's agreement.[48] MEA and Chugach state that the majority vote framework requiring majority owner approval for every decision only made sense and served the public interest when the majority owner was a large operating utility, proportional risk sharer, and majority cost contributor, which will not be the case for AHP so long as the two PPAs are in effect.[49]

Opposition to Motion to Dismiss

AHP opposes RAPA's Motion to Dismiss.[50] AHP argues that the Motion to Dismiss appears to seek dismissal in order to avoid expending resources reviewing and

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

litigating the merits of the Application. AHP takes the position that our holding in Order U-24-024(8) does not preclude or limit its ability to request a finding of good cause to modify or lift the minimum surrender term. AHP states that RAPA's Motion to Dismiss incorrectly interpreted Order U-24-024(8) and for that reason should be denied.[51]

AHP first argues that RAPA's Motion to Dismiss is based on an incorrect interpretation of Order U-24-024(8).[52] AHP asserts that RAPA is relying on a single sentence contained in Order U-24-024(8) where we dismissed the Docket U-24-024 Notice and Request "without prejudice to refiling closer to the time that Eklutna PPA and the MEA PPA will expire."[53]

AHP argues that the sentence in question refers only to AHP's filing of a notice and request for acknowledgement that it had satisfied the applicable requirements and not to a request to lift a condition or an application to amend AHP's certificate. AHP states that it has filed such a request and application. AHP argues that Order U-24-024(8) expressly contemplated that an application to amend AHP's certificate to remove the minimum term would be appropriate at any time during the minimum term provided that such applications includes the necessary information regarding AHP's ability to participate on the EOC.[54] In support of this, AHP cites Order U-24-024(8) where we declined to consider AHP's alternative application to amend the certificate to remove the minimum term requirement due to the time remaining in Docket U-24-024.[55]

AHP also argues that if Order U-24-024(8) forever precludes AHP from seeking relief from the minimum term until after the minimum term has ended the

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

guidance provided in Order U-24-024(8) would be gratuitous and superfluous.[56] AHP also argues that we can modify the minimum term for good cause shown.[57] AHP states that granting the Motion to Dismiss would deny AHP the procedural opportunity to show good cause to modify or lift the minimum surrender term before assessing whether such good cause exists. AHP states this would also incorrectly imply that a present Commission is bound by a prior Commission's ruling even if the present Commission finds good cause to modify or deviate from the prior ruling.[58]

AHP additionally argues that Chugach and MEA's Joinder in Motion to Dismiss addresses the merits of the Application, and not whether Order U-24-024(8) precludes us from consideration of the Application.[59] AHP states that Chugach and MEA argue that until the PPAs have otherwise expired or terminated, or the material facts have changed, there is simply no new justification for us revising our recent decision on this matter.[60] AHP argues that whether material facts have changed goes to the merits of the Application, not whether Order U-24-024(8) precludes AHP from filing the Application in the first place. AHP also states that MEA and Chugach ignore our ability to modify or vacate the minimum surrender term.[61]

RAPA Reply

RAPA states in its reply, that in Order U-18-102(44) we required a minimum term for the voting rights surrender by AHP.[62] RAPA states that Order U-24-024(8)

[56]Opposition to Motion to Dismiss at 6.

[62]RAPA Reply at 1.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

interpreted Order U-18-102(44), and that it confirmed the minimum term for the voting rights surrender, quoting the order: "[i]n its briefing, AHP has not shown good cause for modifying or interpreting this certificate condition in a manner that nullifies the minimum term of EOC voting rights surrender specified in Order U-18-102(44)."[63] RAPA concludes its motion to dismiss is simple:

> [Order U-18-102(44)] contained a minimum term for the EOC voting rights surrender. [Order U-24-024(8)] interpreted [Order U-18-102(44)] and confirmed the voting rights surrender minimum term. The minimum voting rights surrender term in [Order U-18-102(44)] has not been nullified. The Commission, MOA/AHP, RAPA, and any intervenors should not have to expend scarce resources (that are ultimately funded by ratepayers) if the minimum term has not expired or is not about to expire.[64]

Decision

With Order U-18-102(44), we conditionally approved Chugach's Petition for Approvals and ML&P's Application. This approval included conditional approval of the Eklutna PPA and the MEA PPA. One of the conditions imposed was a surrender of ML&P's voting rights. We stated:

> Under these circumstances, we cannot unconditionally find that [the successor to ML&P, now known as AHP] is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that [A]HP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without [A]HP having a vote on operation or management decisions. This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as [A]HP has shown to our satisfaction that [A]HP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit [A]HP from attending EOC meetings, but may not allow [A]HP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.[65]

---

[63]RAPA Reply at 1 (quoting Order U-24-024(8) at 28).

[64]RAPA Reply at 2.

[65]Order U-18-102(44) at 67.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

No petitions for reconsideration or appeals of the decisions in Order U-18-102(44) were timely filed. In compliance with the condition quoted above, ML&P filed a written surrender of its EOC voting rights on October 30, 2020.[66]

In Order U-24-024(8), following briefing on whether this surrender was subject to a minimum term, we concluded that AHP had not shown good cause for modifying or interpreting this condition in a manner that nullifies the minimum term of EOC voting rights surrender. We concluded that "AHP's voting rights on the EOC are surrendered for at least the term of the Eklutna PPA and the MEA PPA."[67] We dismissed the Docket U-24-024 Notice and Request on the grounds that it was premature under the terms of Order U-18-102(44). This dismissal was without prejudice for refiling closer to the time the Eklutna PPA and the MEA PPA will expire.[68]

AHP now seeks to restore its voting rights on the EOC by requesting that we lift the minimum surrender condition rather than finding that they have satisfied the condition as they did in the Docket U-24-024 Notice and Request. While this may be a separate procedural request, it ultimately is seeking the same result. The basis on which AHP argues relief from the minimum term of surrender is warranted is that the objective of the condition has been met and that the continued surrender of its voting rights on the EOC is not necessary to protect and promote the public interest.[69] Central to AHP's Application is the acquisition of what AHP contends is sufficient technical expertise to address our concerns. AHP asserts that Mark Stafford (Stafford) has assumed the role as Director of AHP and that he is qualified to participate in meetings and knowledgably

[66]Notice of Surrender.

[67]Order U-24-024(8) at 28.

[68]Order U-24-024(8) at 29.

[69]Application at 8-16.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

discuss all issues related to management and operation of the Eklutna Project.[70] AHP states also that Stafford will be assisted in managing the workload of AHP by Schimscheimer who will be moving from his engineering role at AWWU to a new role at AHP.[71] AHP states also that the MOA has entered into contracts that can be used by AHP with engineering and accounting contractors and consultants with the breadth and scope of relevant knowledge that the Chugach and MEA representatives bring to the EOC meetings.[72]

AHP, in the Application, asserts as the only change in facts or circumstances that it has acquired qualified personnel to sit on the EOC and exercise voting rights. However, the surrender condition that we imposed on AHP had both a minimum surrender provision, as well as a requirement that AHP show, to our satisfaction, sufficient technical expertise to fully participate on the EOC. That is, for the restoration of EOC voting rights, it must be shown that both the minimum term has elapsed and that AHP has qualified personnel and technical expertise to participate in the EOC. If the demonstration of personnel and technical expertise on its own was sufficient good cause for the restoration of voting rights, the minimum term provision would have been unnecessary. At any point prior to the expiration of the PPAs, AHP could simply present personnel and technical expertise it believes is sufficient for the restoration of EOC voting rights. The condition imposed by Order U-18-102(44) set a time and circumstances where a showing of technical expertise to restore EOC voting rights would be appropriate. We will not entertain a request for relief from the minimum surrender term imposed in Order U-18-102(44) based only on a showing of AHP acquiring what it contends to be qualified personnel and technical expertise until at or near the time that the Chugach and

[70]Application at 8.

[71]Application at 8.

[72]Application at 9.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

MEA PPAs are set to expire. Additional changes in facts or circumstances that might warrant relief from the minimum term of surrender must be pled.

AHP argues that, in Order U-24-024(8), we expressly contemplated that an application to amend AHP's certificate to remove the minimum term would be appropriate at any time during the minimum term, provided that such an application includes the necessary information regarding AHP's ability to participate on the EOC.[73] The basis for this assertion appears to be the fact that in Order U-24-024(8) we declined to consider AHP's Docket U-24-024 Notice and Request as an application to amend AHP's certificate to remove the minimum term of surrender on the grounds that there was too little time remaining in that docket.[74] We did deny the request to construe the Docket U-24-024 Notice and Request as an application to amend certificate on the grounds that there was not sufficient time to resolve the request.[75] However, we did not rule on the sufficiency of the Docket U-24-024 Notice and Request as an application to amend the certificate. Denying a request on one ground does not imply that it would be sufficient on other grounds.

AHP also argues that we provided guidance for future filings seeking relief from the minimum term of EOC voting rights surrender in Order U-24-024(8), and that guidance would be superfluous if AHP was barred from seeking relief until the minimum term had expired.[76] AHP is correct that, in Order U-24-024(8), we provided guidance for future filings. In Order U-24-024(8) we stated:

> In addition to addressing the minimum term of EOC voting rights surrender issue, we suggest that in future filings seeking reinstatement of EOC voting rights AHP provide the information to show that it can bring to EOC meetings

[73]Opposition to Motion to Dismiss at 5.

[74]Opposition to Motion to Dismiss at 5, n.20.

[75]Order U-24-024(8) at 31.

[76]Opposition to Motion to Dismiss at 6.

Regulatory Commission of Alaska

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

a depth and breadth of technical and managerial expertise at least comparable to the level of expertise that MEA and Chugach bring to those meetings.[77]

The "in addition" language reflects that the need for AHP to demonstrate sufficient technical expertise is an issue separate from the basis for relief from the minimum term of EOC voting rights surrender. The guidance was not superfluous, but addressed deficiencies in the Docket U-24-024 Notice and Request regarding the proposed technical expertise that must be addressed in *any* future filing for restoration of EOC voting rights, whether presented after the termination of the PPAs, or earlier in a request for relief from the minimum term. The guidance regarding technical expertise was provided because, in Docket U-24-024, we determined AHP had failed to adequately support its request for reinstatement of EOC voting rights, and we saw no way of moving forward without taking the time for prefiled testimony, discovery, and holding hearings to gather information necessary to determine if AHP had acquired the expertise required to fully participate as a voting member of the EOC.[78] The guidance was provided so that the issue of expertise could be more efficiently addressed in future filings, but that does not equate to technical expertise being sufficient grounds for relief from the minimum term of surrender, or AHP providing more details regarding technical expertise relieving them from the need to address the minimum term of surrender if seeking relief from that provision.

We find that AHP's Application did not present on its face changes in facts or circumstances that would warrant our reconsideration of the Order U-18-102(44) minimum term of surrender requirement prior to the expiration of the minimum term. We do not find that the facts as presented in the Application, the acquisition of technical

[77]Order U-24-024(8) at 34.

[78]Order U-24-024(8) at 35.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

expertise, would constitute good cause to modify AHP's certificate or otherwise grant AHP relief from the condition. This is not a determination on the merits or sufficiency of the technical expertise and personnel presented in the Application for the restoration of EOC voting rights, but rather a determination that AHP acquiring what it contends is sufficient technical expertise is not a change in facts or circumstance that on its own provides a basis for relief from the minimum term of surrender. Order U-18-102(44) imposed both a minimum term of surrender as well as a requirement that the successor to ML&P, AHP, demonstrate sufficient technical expertise to participate in the EOC for voting rights to be restored. Order U-18-102(44) set the time when a demonstration of technical expertise would be appropriate. While AHP is not forever barred from seeking relief from the minimum term of surrender, such a request must be accompanied by a showing of facts or circumstances that warrant relief from that minimum term separate from the acquisition of appropriate technical expertise as the acquisition of technical expertise was contemplated in Order U-18-102(44), and the time at which the restoration of EOC voting rights would be appropriate on those grounds was set. AHP acknowledges that it must procedurally show good cause to modify or lift the minimum surrender term.[79] The good cause for this articulated by AHP in the Application ultimately is only the contention that AHP has acquired sufficient technical expertise to participate in the EOC, with no other changes in facts or circumstances which would warrant lifting the minimum surrender term. As pled, we do not find that AHP has articulated sufficient changes in facts or circumstances that might constitute good cause for relief.

We have recently considered a petition by Chugach to modify elements of Order U-18-102(44), stating:

> Almost three years have passed since we issued Order U-18-102(44) et al., which was a large multi-party settlement that resulted from many negotiations and compromises. The economic and financial landscape are entirely different

[79]Opposition to Motion to Dismiss at 6.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

> today. It is impossible to adjust one part of Order U-18-102(44) et al. without it affecting other parts of the settlement.[80]

This caution to modifying Order U-18-102(44) is applicable to this Application as well. Over five years have passed since we issued Order U-18-102(44), which was a large multi-party settlement that resulted from many negotiations and compromises. The economic and financial landscapes have shifted substantially, and it is impossible to adjust one part of Order U-18-102(44) without it affecting other parts of the settlement. While circumstances might be presented that warrant reconsideration of the minimum term of surrender from Order U-18-102(44), AHP has not done so in the Application.

We concur with the conclusion reached by RAPA in the RAPA Reply. Order U-18-102(44) contained a minimum term for the EOC voting rights surrender. Order U-24-024(8) interpreted Order U-18-102(44) and confirmed the voting rights surrender minimum term. The minimum voting rights surrender term in Order U-18-102(44) has not been nullified. AHP has not articulated facts or circumstances that might warrant relief from the minimum term in Order U-18-102(44). For these reasons, we find that when viewing all reasonable inferences of fact in favor of AHP, there are no genuine issues as to any material fact. We grant RAPA's Motion to Dismiss.

Final Order

This order constitutes the final decision in this proceeding. This decision may be appealed within 30 days of this order in accordance with AS 22.10.020(d) and Alaska Rule of Appellate Procedure 602(a)(2). In addition to the appellate rights afforded by AS 22.10.020(d), a party has the right to file a petition for reconsideration in accordance with 3 AAC 48.105. If such a petition is filed, the time period for filing an

determining that RCA Order No. U-18-102(44)/U-19-020(39)/U-19-021(39)[1] imposed both a minimum term of surrender of AHP's voting rights on the Eklutna Operating Committee ("EOC") and a demonstration that AHP had sufficient technical expertise to participate in the EOC before its voting rights could be restored.

2. The RCA erred and acted in a manner that was unreasonable, arbitrary, capricious, or contrary to law by finding AHP failed to articulate sufficient changes in fact or circumstances to constitute good cause for relief from the minimum term of surrender of AHP's voting rights on the EOC.

3. The RCA erred and acted in a manner that was unreasonable, arbitrary, capricious, or contrary to law by failing to grant AHP's request to either lift the condition requiring the surrender of its voting rights on the EOC or amend AHP's certificate of public convenience and necessity.

The foregoing points on appeal are stated generally and are not intended to be limited to only related or similar points of appeal stated specifically. Instead, a point of appeal stated generally is intended to include all points of appeal that could be included within the general statement.

Pursuant to Alaska Rule of Appellate Procedure 602(i), and the Alaska Rule of Civil Procedure 42(a), Appellant the Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP"), by and through its undersigned counsel, hereby moves the Court for an order consolidating the Notice of Appeal of the Regulatory Commission of Alaska's ("RCA's") Order No. U-25-025(2) ("Order No. 2"), which was filed today, into the existing appeal in Case No. 3AN-24-10554CI, currently before the Honorable Josie Garton. The proceedings in Case No. 3AN-24-10554CI are currently stayed until April 1, 2026, at which time the Court is to issue a revised briefing schedule.[1] AHP requests that the Court issue a consolidated briefing schedule after the RCA prepares and transmits the agency record for Docket U-25-025.

I. BACKGROUND

A. The Eklutna Operating Committee

At issue is AHP's voting rights as a member of the Eklutna Operating Committee ("EOC"), which was created by the MOA d/b/a Municipal Light & Power ("ML&P"), Chugach Electric Association, Inc. ("Chugach"), and Matanuska Electric Association, Inc. ("MEA") to make all management decisions related to the operation,

maintenance, and budget for the Eklutna Hydroelectric Project ("Eklutna Project").[2] The RCA described the Eklutna Project as follows:

> The Eklutna Project was built and operated by the federal government pursuant to the Eklutna Power Act of 1950. In 1995, Congress authorized sale of the Eklutna Project to [the Municipality of Anchorage d/b/a Municipal Light & Power Department (ML&P)], Chugach, and MEA under the terms of the 1989 Eklutna Purchase Agreement. Under this agreement, the three utilities received an undivided interest in all of the Eklutna Project, water rights, generation plant and the transmission assets interconnecting the Eklutna Project with ML&P, Chugach, and MEA. ML&P obtained a 53.33% ownership interest, Chugach obtained a 30% ownership interest, and MEA obtained a 16.67% interest in the Eklutna Project.
>
> . . .
>
> ML&P, Chugach, and MEA each have a representative on the EOC. Decisions by the EOC are made based upon a double majority consisting of affirmative votes by at least two of the three utilities whose ownership shares total at least 51% of the Eklutna Project ownership. Effectively, management of the Eklutna Project is limited to actions approved by ML&P and at least one of Chugach or MEA.[3]

[3] *Id*.

B. Order No. 39

In 2019, Chugach filed a petition with the RCA seeking approval to acquire all service obligations and most assets of ML&P (the "Acquisition").[4] As part of the same transaction, ML&P filed an application to amend its certificate of public convenience and necessity ("CPCN"), deleting the current service territory and adding the Eklutna Project Power Plant site.[5] The RCA approved the Acquisition in Order No. 39,[6] subject to conditions. The MOA retained its 53.33% ownership interest in the Eklutna Project, from which it sells wholesale electric power to Chugach and MEA, pursuant to agreements approved by the RCA.[7] Under the Eklutna PPA, Chugach receives 64.29% of the MOA's share of energy output from the Eklutna Project, and has "the obligation to pay a proportionate share of [the MOA's] Eklutna Project costs, including capital and Fish and Wildlife Agreement costs, for the 35-year term of the Eklutna PPA."[8] Thus, Chugach is

currently responsible for 64.29% of the operations, maintenance, capital, and environmental compliance costs associated with the Eklutna Project, MEA is responsible for 16.67%, and the MOA continues to bear responsibility for 19.05%.[9]

The RCA also granted the AHP[10] a new CPCN to "provide wholesale public electric utility service through its ownership share of the Eklutna Project" subject to conditions, including the MOA's surrender of its voting rights on the EOC.[11] The RCA was concerned that after the Acquisition, the MOA would no longer be "managerially and technically fit to maintain majority ownership of the Eklutna Project" without the surrender of its voting rights on the EOC.[12] With the surrender, the Eklutna Project would be "jointly manage[d] and operate[d]" by Chugach and MEA.[13] The RCA stated that the surrender "must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to [the RCA's] satisfaction that MHP has acquired the expertise required to fully participate

as a voting member of the EOC."[14] On October 30, 2020, the MOA filed notice with the RCA of its October 27, 2020, Surrender of Eklutna Operating Committee Voting Rights.[15]

C. Order No. 8

On July 18, 2024, AHP filed a Notice and Request for Acknowledgment of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee ("Request for Acknowledgment"). AHP submitted documentation showing that Mark Corsentino, P.E., had been approved as the Utility Director of AHP.[16] AHP provided documentation of Mr. Corsentino's experience as the General Manager of Anchorage Water and Wastewater Utility ("AWWU") and also documentation of the additional technical and managerial resources and support available to Mr. Corsentino, including the assistance of Mark Schimscheimer, Engineering Director of AWWU, as well as access to various MOA contractors.[17]

At the prehearing conference held on August 30, 2024, the Administrative Law Judge requested briefing "on the minimum term of the EOC voting rights surrender required by [Order No. 39]."[18] AHP, Chugach and MEA, and the Office of the Attorney

General, Regulatory & Public Advocacy Section ("RAPA") filed briefs.[19] The RCA found that AHP's Request for Acknowledgement was premature and "AHP's voting rights on the EOC are surrendered for at least the term of the Eklutna PPA and the MEA PPA."[20] The RCA "provided AHP with guidance on future filings seeking relief from the minimum term of EOC voting rights surrender."[21] The RCA stated:

> In addition to addressing the minimum term of voting rights surrender issue, we suggest that in future filings seeking reinstatement of EOC voting rights AHP provide the information to show that it can bring to EOC meetings a depth and breadth of technical and managerial expertise at least comparable to the level of expertise that MEA and Chugach bring to those meetings. This suggestion does not just include the technical expertise of AHP's representative to the EOC, but also includes the team of employees, contractors, and consultants supporting that representative.
>
> We denied AHP's motion for expedited consideration of its Notice and Request because AHP had failed to adequately support its request for reinstatement of its EOC voting rights. Upon initial review of AHP's filings in this docket we could see no way of moving forward without taking the time for prefiled testimony, discovery, and holding a hearing to gather the information necessary to determine if AHP had acquired the expertise required to fully participate as a voting member of the EOC. We believe that efficient resolution of future filings on this issue by AHP will be more likely if AHP provides adequate information in its initial filing.[22]

(907) 277-1604

On December 13, 2024, AHP appealed Order No. 8 to the Alaska Superior Court (Case No. 3AN-24-10554CI). The Superior Court has extended the stay of the briefing schedule through April 1, 2026.[23]

D. Order No. 2

On July 30, 2025, AHP filed a Request to Lift Condition Requiring the Surrender of Voting Rights from Certificate of Public Convenience and Necessity No. 780; and Alternative Application to Amend Certificate of Public Convenience and Necessity No. 780. Following the RCA's guidance in Order No. 8, AHP provided documentation showing that it had two experienced and qualified employees and agreements with several contractors and consultants with technical expertise to support AHP's representative on the EOC.

RAPA filed a motion to dismiss, claiming AHP's filing was premature because "Order No. 8 confirmed the [AHP's] surrender of voting rights is subject to a minimum time period."[24] Chugach and MEA joined the motion. The RCA, in Order No. 2, granted RAPA's motion to dismiss, finding that Order No. 39 "contained a minimum term for the EOC voting rights surrender" and Order No. 8 interpreted Order No. 39 and

[23] Order Extending Stay of Proceedings, Case No. 3AN-24-10554CI (Jan. 6, 2026).

[24] AG's Motion to Dismiss at 7 (Aug. 8, 2025).

"confirmed the voting rights surrender minimum term."[25] The RCA's decision in Order No. 2 is the subject to AHP's Notice of Appeal.

II. ARGUMENT

Alaska R. Civ. P. 42(a) allows the Court to consolidate "actions involving a common question of law or fact." As discussed above, AHP's appeal in 3AN-24-10554CI (concerning Order No. 8) and the present action (concerning Order No. 2) center on the RCA's interpretation of Order No. 39, which established that AHP was required to surrender its voting rights on the EOC for a period of time. This requirement is the basis of the factual and legal disputes carried forward into Orders No. 8 and 2. Further, the RCA relied on its interpretation in Order No. 8 to support its decision in Order No. 2. Consolidating both proceedings would avoid potentially conflicting rulings from the Court.

III. CONCLUSION

For the reasons stated above, AHP respectfully requests that the Court consolidate its Notice of Appeal of the RCA's Order No. U-25-025(2) with the existing appeal in Case No. 3AN-24-10554CI. If the Court grants AHP's request for consolidation, AHP requests that the Court issue a consolidated Notice Setting Appeal Procedure after the agency record is transmitted.

THIRD JUDICIAL DISTRICT AT ANCHORAGE

Municipality of Anchorage, Appellant, vs. Regulatory Commission of Alaska et al, Appellee.	Appeal CASE NO: 3AN-24-10554CI **NOTICE SETTING APPEAL PROCEDURE** (Administrative Appeals)

The agency record is available for review in the superior court at Anchorage, Alaska. The appeal is assigned to Judge Josie Garton.

The following procedures will govern this appeal:

1. BRIEFS: The following time schedule applies to the filing of briefs on appeal, unless an extension is granted. If appellant fails to file a brief, the appeal may be dismissed. Failure to timely file appellee's brief or appellant's reply brief will waive the filing of same.

   APPELLANT: within 30 days after service of this notice
   APPELLEE: within 30 days after service of appellant's brief
   APPELLANT'S REPLY BRIEF: within 20 days after service of appellee's brief

   Add 10 days if there are multiple appellants or appellees filing separate briefs and a single excerpt. See appellate Rules 212(a)(1) and 210(c)(1)(B).

2. EXCERPT OF RECORD: Briefs must be accompanied by excerpts of record as provided in Appellate Rule 210(c).

3. ORAL ARGUMENT: Either party may serve and file a written request for oral argument no later than 10 days after the date on which appellant's reply brief is due. If no appellee's brief is filed, the appellant's request for oral argument must be filed within 10 days after the due date of the appellee's brief was due.

4. MOTIONS: Appellate Rule 612 applies to any request for court action not otherwise covered above, including motions to extend time for filing memoranda and motions to accept late briefs.

Dear Residents of our Great State,

We are proud to present you with the Alaska State Constitution. This Constitution represents the diverse and unique heritage of our young state. Alaska has one of the most advanced, coherent, and forthright constitutions, allowing the people to have a clear and firm understanding of State law.

"All political power is inherent in the people. All government originates with the people, is founded upon their will only, and is instituted solely for the good of the people as a whole." (Article 1, Sec. II)

With a direct and straightforward narrative, the Alaska State Constitution gives the people the power to balance the authority and responsibilities split between the three branches of government.

As Governor and Lieutenant Governor, it is our goal to ensure Alaskans enjoy what is rightfully theirs and insure that the government remains of, for, and by the People.

Alaskans are diverse in many ways, but we are unified in our admiration and commitment to this, our grand and unparalleled state.

Sincerely,

Mike Dunleavy
Governor

Nancy Dahlstrom
Lieutenant Governor

Adopted by the Constitutional Convention
February 5, 1956

Ratified by the People of Alaska
April 24, 1956

THE ALASKA CONSTITUTION

~ An Introduction ~

In 1955 the Territorial Legislature passed the Constitutional Convention Act, putting in motion the election of convention delegates by district ensuring territory-wide representation for the convention. Thirteen of the delegates were from Anchorage, 11 from Fairbanks, seven from Juneau and the remainder from 18 other communities. Fifty-five delegates from Election Districts, Federal Judicial Districts and from the Territory at large were elected by popular vote in the fall of that year. They were instructed to meet at the University of Alaska in Fairbanks, Alaska on November 8, 1955. These delegates, all Alaskans by choice or birth, had 75 days to study and write a constitutional document for the civil authority of a new state, "Alaska." The hour arrived, the Colors presented, and the gathering united in prayer as they took on this new task – crafting a document that Alaskans would have to approve by vote. It began with tedium amidst our excitement to get on to the larger issues. We had to adapt meeting times to bus schedules; agree on rules governing the Convention and acquire a gavel – all interesting tidbits of the beginnings of history. These minor concerns were soon forgotten in the wake of arguments for unicameralism and for bicameralism; whether judges should be elected and how to ensure the wise use of our resources. This document is the product of Alaska pioneers, a spirit of independence and self-government. It is your guarantee that the Individual will always be in charge. Surely one is moved by the simplicity and power of this document. As delegates to the 1955-56 Constitutional Convention, we each sought to create a document that was powerful and personal. Please read it and understand its continuing dedication to you as the governor, not the governed.

John B. "Jack" Coghill
Convention Delegate, former Senator and Lieutenant Governor

~ Preamble ~

We the people of Alaska, grateful to God and to those who founded our nation and pioneered this great land, in order to secure and transmit to succeeding generations our heritage of political, civil, and religious liberty within the Union of States, do ordain and establish this constitution for the State of Alaska.

Article I – Declaration of Rights

Article I, Sections:

1. Inherent Rights
2. Source of Government
3. Civil Rights
4. Freedom of Religion
5. Freedom of Speech
6. Assembly; Petition
7. Due Process
8. Grand Jury
9. Jeopardy and Self-Incrimination
10. Treason
11. Rights of Accused
12. Criminal Administration
13. Habeas Corpus
14. Searches and Seizures
15. Prohibited State Action
16. Civil Suits; Trial by Jury
17. Imprisonment for Debt
18. Eminent Domain
19. Right to Keep and Bear Arms
20. Quartering Soldiers
21. Construction
22. Right of Privacy
23. Resident Preference
24. Rights of Crime Victims
25. Marriage

§1. Inherent Rights – This constitution is dedicated to the principles that all persons have a natural right to life, liberty, the pursuit of happiness, and the enjoyment of the rewards of their own industry; that all persons are equal and entitled to equal rights, opportunities, and protection under the law; and that all persons have corresponding obligations to the people and to the State.

§ 2**. Source of Government** - All political power is inherent in the people. All government originates with the people, is founded upon their will only, and is instituted solely for the good of the people as a whole.

§ 3**. Civil Rights –** No person is to be denied the enjoyment of any civil or political right because of race, color, creed, sex, or national origin. The legislature shall implement this section. [Amended 1972]

§ 4**. Freedom of Religion –** No law shall be made respecting an establishment of religion, or prohibiting the free exercise thereof.

§ 5**. Freedom of Speech –** Every person may freely speak, write, and publish on all subjects, being responsible for the abuse of that right.

§ 6. Assembly; Petition – The right of the people peaceably to assemble, and to petition the government shall never be abridged. § 7. Due Process – No person shall be deprived of life, liberty, or property, without due process of law. The right of all persons to fair and just treatment in the course of legislative and executive investigations shall not be infringed.

§ 8. Grand Jury– No person shall beheld to answer for a capital, or otherwise infamous crime, unless on a present mentor indictment of a grand jury, except incases arising in the armed forces in time of war or public danger. Indictment maybe waived by the accused. In that case the prosecution shall be by information. The grand jury shall consist of at least twelve citizens, a majority of whom concurring may return an indictment. The power of grand juries to investigate and make recommendations concerning the public welfare or safety shall never be suspended.

§ 9. Jeopardy and Self-Incrimination–No person shall be put in jeopardy twice for the same offense. No person shall be compelled in any criminal proceeding to be a witness against himself.

§ 10. Treason – Treason against the State consists only in levying war against

it, or in adhering to its enemies, giving them aid and comfort. No person shall be convicted of treason, unless on the testimony of two witnesses to the same overt act, or on confession in open court.

§ 11. Rights of Accused– In all criminal prosecutions, the accused shall have the right to a speedy and public trial, by an impartial jury of twelve, except that the legislature may provide for a jury of not more than twelve nor less than six in courts not of record. The accused is entitled to be informed of the nature and cause of the accusation; to be released on bail, except for capital offenses when the proof is evident or the presumption great; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defense.

§ 12. Criminal Administration–Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted. Criminal administration shall be based upon the following: the need for protecting the public, community condemnation of the offender, the rights of victims of crimes, restitution from the offender, and the principle of reformation. [Amended 1994]

§ 13. Habeas Corpus– The privilege of the writ of habeas corpus shall not be suspended, unless when in cases of rebellion or actual or imminent invasion, the public safety requires it.

§ XIV. Searches and Seizures– The right of the people to be secure in their persons, houses and other property, papers, and effects, against unreasonable searches and seizures, shall not be violated. No warrants shall issue, but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

§ 15. Prohibited State Action– No bill of attainder or ex post facto law shall be passed. No law impairing the obligation of contracts, and no law making any irrevocable grant of special privileges or immunities shall be passed. No conviction shall work corruption of blood or forfeiture of estate.

§ 16. Civil Suits; Trial by Jury – In civil cases where the amount in controversy exceeds two hundred fifty dollars, the right of trial by a jury of twelve is preserved to the same extent as it existed at common law. The

legislature may make provision for a verdict by not less than three-fourths of the jury and, in courts not of record, may provide for a jury of not less than six or more than twelve.

§ 17. Imprisonment for Debt– There shall be no imprisonment for debt. This section does not prohibit civil arrest of absconding debtors.

§ 18. Eminent Domain – Private property shall not be taken or damaged for public use without just compensation.

§ 19. Right to Keep and Bear Arms – A well-regulated militia being necessary to the security of a free state, the right of the people to keep and bear arms shall not be infringed. The individual right to keep and bear arms shall not be denied or infringed by the State or a political subdivision of the State. [Amended 1994]

§ 20. Quartering Soldiers – No member of the armed forces shall in time of peace be quartered in any house without the consent of the owner or occupant, or in time of war except as prescribed by law. The military shall be in strict subordination to the civil power.

§ 21. Construction – The enumeration of rights in this constitution shall not impair or deny others retained by the people.

§ 22. Right of Privacy – The right of the people to privacy is recognized and shall not be infringed. The legislature shall implement this section. [Amended 1972]

§ 23. Resident Preference – This constitution does not prohibit the State from granting preferences, on the basis of Alaska residence, to residents of the State over nonresidents to the extent permitted by the Constitution of the United States. [Amended 1988]

§ 24. Rights of Crime Victims – Crime victims, as defined by law, shall have the following rights as provided by law: the right to be reasonably protected from the accused through the imposition of appropriate bail or conditions of release by the court; the right to confer with the prosecution; the right to be treated with dignity, respect, and fairness during all phases of the criminal and juvenile justice process; the right to timely dis-position of the case following the arrest of the accused; the right to obtain information about and be allowed to be present at all criminal or juvenile proceedings

where the accused has the right to be present; the right to be allowed to be heard, upon request, at sentencing, before or after conviction or juvenile adjudication, and at any proceeding where the accused's release from custody is considered; the right to restitution from the accused; and the right to be informed, upon request, of the accused's escape or release from custody before or after conviction or juvenile adjudication. [Amended 1994]

§ 25. Marriage – To be valid or recognized in this State, a marriage may exist only between one man and one woman. [Amended 1998]

Article II – The Legislature

Article II, Sections:

1. Legislative Power; Membership
2. Members: Qualifications
3. Election and Terms
4. Vacancies
5. Disqualifications
6. Immunities
7. Salary and Expenses
8. Regular Sessions
9. Special Sessions
10. Adjournment
11. Interim Committees
12. Rules
13. Form of Bills
14. Passage of Bills
15. Veto
16. Action Upon Veto
17. Bills Not Signed
18. Effective Date
19. Local or Special Acts
20. Impeachment
21. Suits Against the State

§ 1. Legislative Power; Membership–The legislative power of the State is vested in a legislature consisting of senate with a membership of twenty and a house of representatives with a membership of forty.

§ 2. Members: Qualifications– A member of the legislature shall be a qualified voter who has been a resident of Alaska for at least three years and of the district from which elected for at least one year, immediately preceding his filing for office. A senator shall be at least twenty-five years of age and a representative at least twenty-one years of age.

§ 3. Election and Terms– Legislators shall be elected at general elections. Their terms begin on the fourth Monday of the January following election unless otherwise provided by law. The term of representatives shall be two years, and the term of senators, four years. One-half of the senators shall be elected every two years. Editor's Note. The legislature has provided that the terms of legislators begin on the second Monday in January following a presidential election year and on the third Tuesday in January following a gubernatorial election year. See AS 24.05.080.

§ 4. Vacancies– A vacancy in the legislature shall be filled for the unexpired term as provided by law. If no provision is made, the governor shall fill the vacancy by appointment.

§ 5. Disqualifications– No legislator may hold any other office or position of profit under the United States or the State. During the term for which elected and for one year thereafter, no legislator may be nominated, elected, or appointed to any other office or position of profit which has been created, or the salary or emoluments of which have been increased, while he was a member. This section shall not prevent any person from seeking or holding the office of governor, secretary of state, or member of Congress. This section shall not apply to employment by or election to a constitutional convention. Editor's Note. Senate Joint Resolution No. 2, "changing the name of the secretary of state to lieutenant governor" in 16 sections of the Alaska Constitution, approved by the voters August 25, 1970, inadvertently omitted express amendment of this section.

§ 6. Immunities – Legislators may not be held to answer before any other tribunal for any statement made in the exercise of their legislative duties while the legislature is in session. Members attending, going to, or returning from legislative sessions are not subject to civil process and are privileged from arrest except for felony or breach of the peace.

§ 7. Salary and Expenses – Legislators shall receive annual salaries. They may receive a per diem allowance for expenses while in session and are entitled to travel expenses going to and from sessions. Presiding officers may receive additional compensation.

§ 8. Regular Sessions – The legislature shall convene in regular session each year on the fourth Monday in January, but the month and day may be changed by law. The legislature shall adjourn from regular session no later than one hundred twenty consecutive calendar days from the date it convenes except that a regular session may be extended once for up to ten consecutive calendar days. An extension of the regular session requires the affirmative vote of at least two-thirds of the membership of each house of the legislature. The legislature shall adopt as part of the uniform rules of procedure deadlines for scheduling session work not inconsistent with provisions controlling the length of the session. [Amended 1984]

§ 9. Special Sessions – Special sessions may be called by the governor or by vote of two-thirds of the legislators. The vote may be conducted by the legislative council or as prescribed by law. At special sessions called by the governor, legislation shall be limited to subjects designated in his proclamation calling the session, to subjects presented by him, and the reconsideration of bills vetoed by him after adjournment of the last regular session. Special sessions are limited to thirty days. [Amended 1976]

§ 10. Adjournment – Neither house may adjourn or recess for longer than three days unless the other concurs. If the two houses cannot agree on the time of adjournment and either house certifies the disagreement to the governor, he may adjourn the legislature.

§ 11. Interim Committees – There shall be a legislative council, and the legislature may establish other interim committees. The council and other interim committees may meet between legislative sessions. They may perform duties and employ personnel as provided by the legislature. Their members may receive an allowance for expenses while performing their duties.

§ 12. Rules – The houses of each legislature shall adopt uniform rules of procedure. Each house may choose its officers and employees. Each is the judge of the election and qualifications of its members and may expel a member with the concurrence of two-thirds of its members. Each shall keep a journal of its proceedings. A majority of the membership of each house constitutes a quorum to do business, but a smaller number may adjourn from day to day and may compel attendance of absent members. The legislature shall regulate lobbying.

§ 13. Form of Bills–Every bill shall be confined to one subject unless it is an appropriation bill or one codifying, revising, or rearranging existing laws. Bills for appropriations shall be confined to appropriations. The subject of each bill shall be expressed in the title. The enacting clause shall be: "Be it enacted by the Legislature of the State of Alaska."

§ 14. Passage of Bills– The legislatures shall establish the procedure for enactment of bills into law. No bill may become law unless it has passed three readings in each house on three separate days, except that any bill may be advanced from second to third reading on the same day by concurrence of three fourths of the house considering it. No bill may become law without an affirmative vote of a majority of the membership of each house. The yeas and nays on final passage shall be entered in the journal.

§ 15. Veto– The governor may veto bills passed by the legislature. He may, by veto, strike or reduce items in appropriation bills. He shall return any vetoed bill, with a statement of his objections, to the house of origin.

§ 16. Action Upon Veto– Upon receipt of a veto message during a regular session of the legislature, the legislatures shall meet immediately in joint session and reconsider passage of the vetoed bill or item. Bills to raise revenue and appropriation bills or items, although vetoed, become law by affirmative vote of three fourths of the membership of the legislature. Other vetoed bills become law by affirmative vote of two thirds of the membership of the legislature. Bills vetoed after adjournment of the first regular session of the legislature shall be reconsidered by the legislature sitting as one body no later than the fifth day of the next regular or special session of that legislature. Bills vetoed after adjournment of the second regular session shall be reconsidered by the legislature sitting as one body no later than the fifth day of a special session of that legislature, if one is called. The vote on reconsideration of a vetoed bill shall be entered on the journals of both houses. [Amended 1976]

§ 17. Bills Not Signed– A bill becomes law if, while the legislature is in session, the governor neither signs nor vetoes it within fifteen days, Sundays excepted, after its delivery to him. If the legislature is not in session and the governor neither signs nor vetoes a bill within twenty days, Sundays excepted, after its delivery to him, the bill becomes law.

§ 18. Effective Date– Laws passed by the legislature become effective ninety days after enactment. The legislature may, by concurrence of two thirds of the membership of each house, provide for another effective date.

§ 19. Local or Special Acts– The legislature shall pass no local or special act if a general act can be made applicable. Whether a general act can be made applicable shall be subject to judicial determination. Local acts necessitating appropriations by a political subdivision may not become effective unless approved by a majority of the qualified voters voting thereon in the subdivision affected.

§ 20. Impeachment – All civil officers of the State are subject to impeachment by the legislature. Impeachment shall originate in the senate and must be approved by a two-thirds vote of its members. The motion for impeachment shall list fully the basis for the proceeding. Trial on impeachment shall be conducted by the house of representatives. A supreme court justice designated by the court shall preside at the trial. Concurrence of two-thirds of the members of the house is required for a judgment of impeachment. The judgment may not extend beyond removal from office, but shall not prevent proceedings in the courts on the same or related charges.

§ 21. Suits Against the State – The legislature shall establish procedures for suits against the State.

Article III – The Executive

Article III, Sections:

1. Executive Power
2. Governor: Qualifications
3. Election
4. Term of Office
5. Limit on Tenure
6. Dual Office Holding
7. Lieutenant Governor Duties
8. Election
9. Acting Governor
10. Succession: Failure to Qualify
11. Vacancy
12. Absence
13. Further Succession
14. Title and Authority
15. Compensation
16. Governor's Authority
17. Convening Legislature
18. Messages to Legislature
19. Military Authority
20. Martial Law
21. Executive Clemency
22. Executive Branch
23. Reorganization
24. Supervision
25. Department Heads
26. Boards and Commissions
27. Recess Appointments

§ 1. Executive Power– The executive power of the State is vested in the governor.

§ 2. Governor: Qualifications– The governor shall be at least thirty years of age and a qualified voter of the State. He shall have been a resident of Alaska at least seven years immediately preceding his filing for office, and he shall have been a citizen of the United States for at least seven years.

§ 3. Election– The governor shall be chosen by the qualified voters of the State at a general election. The candidate receiving the greatest number of votes shall be governor.

§ 4. Term of Office– The term of office of the governor is four years, beginning at noon on the first Monday in December following his election and ending at noon on the first Monday in December four years later.

§ 5. Limit on Tenure– No person who has been elected governor for two full successive terms shall be again eligible to hold that office until one full term has intervened.

§ 6. Dual Office Holding– The governor shall not hold any other office or position of profit under the United States, the State, or its political sub-divisions.

§ 7. Lieutenant Governor Duties–There shall be a lieutenant governor. He shall have the same qualifications as the governor and serve for the same term. He shall perform such duties as may be prescribed by law and as may be delegated to him by the governor. [Amended 1970]

§ 8. Election – The lieutenant governor shall be nominated in the manner provided by law for nominating candidates for other elective offices. In the general election the votes cast for a candidate for governor shall be considered as cast also for the candidate for lieutenant governor running jointly with him. The candidate whose name appears on the ballot jointly with that of the successful candidate for governor shall be elected lieutenant governor. [Amended 1970]

§ 9. Acting Governor – In case of the temporary absence of the governor from office, the lieutenant governor shall serve as acting governor. [Amended 1970]

§ 10. Succession: Failure to Qualify – If the governor-elect dies, resigns, or is disqualified, the lieutenant governor elected with him shall succeed to the office of governor for the full term. If the governor-elect fails to assume office for any other reason, the lieutenant governor elected with him shall serve as acting governor, and shall succeed to the office if the governor-elect does not assume his office within six months of the beginning of the term. [Amended 1970]

§ 11. Vacancy – In case of a vacancy in the office of governor for any reason, the lieutenant governor shall succeed to the office for the remainder of the term. [Amended 1970]

§ 12. Absence – Whenever for a period of six months, a governor has been continuously absent from office or has been unable to discharge the duties of his office by reason of mental or physical disability, the office shall be deemed vacant. The procedure for determining absence and disability shall be prescribed by law.

§ 13. Further Succession – Provision shall be made by law for succession to the office of governor and for an acting governor in the event that the lieutenant governor is unable to succeed to the office or act as governor. No election of a lieutenant governor shall be held except at the time of electing a governor. [Amended 1970]

§ 14. Title and Authority – When the lieutenant governor succeeds to the office of governor, he shall have the title, powers, duties and emoluments of that office. [Amended 1970]

§ 15. Compensation – The compensation of the governor and the lieutenant governor shall be prescribed by law and shall not be diminished during their term of office, unless by general law applying to all salaried officers of the State. [Amended 1970]

§ 16. Governor's Authority – The governor shall be responsible for the faithful execution of the laws. He may, by appropriate court action or proceeding brought in the name of the State, enforce compliance with any constitutional or legislative mandate, or restrain violation of any constitutional or legislative power, duty, or right by any officer, department, or agency of the State or any of its political subdivisions. This authority

shall not be construed to authorize any action or proceeding against the legislature.

§ 17. Convening Legislature– Whenever the governor considers it in the public interest, he may convene the legislature, either house, or the two houses in joint session.

§ 18. Messages to Legislature– The governor shall, at the beginning of each session, and may at other times, give the legislature information concerning the affairs of the State and recommend the measures he considers necessary.

§ 19. Military Authority– The governor is commander-in-chief of the armed forces of the State. He may call out these forces to execute the laws, suppress or prevent insurrection or lawless violence, or repel invasion. The governor, as provided by law, shall appoint all general and flag officers of the armed forces of the State, subject to confirmation by a majority of the members of the legislature in joint session. He shall appoint and commission all other officers.

§ 20. Martial Law– The governor may proclaim martial law when the public safety requires it in case of rebellion or actual or imminent invasion. Shall not continue for longer than twenty days without the approval of a majority of the members of the legislature in joint session.

§ 21. Executive Clemency– Subject to procedure prescribed by law, the governor may grant pardons, commutations, and reprieves, and may suspend and remit fines and forfeitures. This power shall not extend to impeachment. A parole system shall be provided by law.

§ 22. Executive Branch– All executive and administrative offices, departments, and agencies of the state government and their respective functions, powers, and duties shall be allocated by law among and within not more than twenty principal departments, so as to group them as far as practicable according to major purposes. Regulatory, quasi-judicial, and temporary agencies may be established by law and need not be allocated within a principal department.

§ 23. Reorganization– The governor may make changes in the organization of the executive branch or in the assignment of functions among its units which he considers necessary for efficient administration. Where these

changes require the force of law, they shall be set forth in executive orders. The legislature shall have sixty days of a regular session, or a full session if of shorter duration, to disapprove these executive orders. Unless disapproved by resolution concurred in by a majority of the members in joint session, these orders become effective at a date thereafter to be designated by the governor.

§ 24. Supervision– Each principal department shall be under the supervision of the governor.

§ 25. Department Heads – The head of each principal department shall be a single executive unless otherwise provided by law. He shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session, and shall serve at the pleasure of the governor, except as otherwise provided in this article with respect to the secretary of state. The heads of all principal departments shall be citizens of the United States. Editor's Note. Senate Joint Resolution No. 2, "changing the name of the secretary of state to lieutenant governor" in 16 sections of the Alaska Constitution, approved by the voters August 25, 1970, inadvertently omitted express amendment of this section.

§ 26. Boards and Commissions – When a board or commission is at the head of a principal department or a regulatory or quasi-judicial agency, its members shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session, and may be removed as provided by law. They shall be citizens of the United States. The board or commission may appoint a principal executive officer when authorized by law, but the appointment shall be subject to the approval of the governor.

§ 27. Recess Appointments – The governor may make appointments to fill vacancies occurring during a recess of the legislature, in offices requiring confirmation by the legislature. The duration of such appointments shall be prescribed by law.

Article IV – The Judiciary

Article IV, Sections:

1. Judicial Power and Jurisdiction
2. Supreme Court
3. Superior Court
4. Qualifications of Justices and Judges
5. Nomination and Appointment
6. Approval or Rejection
7. Vacancy
8. Judicial Council
9. Additional Duties
10. Commission on Judicial Conduct
11. Retirement
12. Impeachment
13. Compensation
14. Restrictions
15. Rule-Making Power
16. Court Administration

§ 1. Judicial Power and Jurisdiction –The judicial power of the State is vested in a supreme court, a superior court, and the courts established by the legislature. The jurisdiction of courts shall be prescribed by law. The courts shall constitute a unified judicial system for operation and administration. Judicial districts shall be established by law.

§ 2. Supreme Court–(a) The supreme court shall be the highest court of the State, with final appellate jurisdiction. It shall consist of three justices, one of whom is chief justice. The number of justices may be increased by law upon the request of the supreme court. (b) The chief justice shall be selected from among the justices of the supreme court by a majority vote of the justices. His term of office as chief justice is three years. A justice may serve more than one term as chief justice but he may not serve consecutive terms in that office. [Amended 1970]

§ 3. Superior Court– The superior court shall be the trial court of general jurisdiction and shall consist of five judges. The number of judges may be changed by law.

§ 4. Qualifications of Justices and Judges– Supreme court justices and superior court judges shall be citizens of the United States and of the State, licensed to practice law in the State, and possessing any additional qualifications prescribed by law. Judges of other courts shall be selected in a manner, for terms, and with qualifications prescribed by law.

§ 5. Nomination and Appointment–The governor shall fill any vacancy in an office of supreme court justice or superior court judge by appointing one of two or more persons nominated by the judicial council.

§ 6. Approval or Rejection– Each supreme court justice and superior court judge shall, in the manner provided by law, be subject to approval or rejection on a nonpartisan ballot at the first general election held more than three years after his appointment. Thereafter, each supreme court justice shall be subject to approval or rejection in a like manner every tenth year, and each superior court judge, every sixth year.

§ 7. Vacancy – The office of any supreme court justice or superior court judge becomes vacant ninety days after the election at which he is rejected by a majority of those voting on the question, or for which he fails to file his declaration of candidacy to succeed himself.

§ 8. Judicial Council – The judicial council shall consist of seven members. Three attorney members shall be appointed for six-year terms by the governing body of the organized state bar. Three non-attorney members shall be appointed for six-year terms by the governor subject to confirmation by a majority of the members of the legislature in joint session. Vacancies shall be filled for the unexpired term in like manner. Appointments shall be made with due consideration to area representation and without regard to political affiliation. The chief justice of the supreme court shall be ex-officio the seventh member and chairman of the judicial council. No member of the judicial council, except the chief justice, may hold any other office or position of profit under the United States or the State. The judicial council shall act by concurrence of four or more members and according to rules which it adopts.

§ 9. Additional Duties – The judicial council shall conduct studies for improvement of the administration of justice, and make reports and recommendations to the supreme court and to the legislature at intervals of not more than two years. The judicial council shall perform other duties assigned by law.

§ 10. Commission on Judicial Conduct – The Commission on Judicial Conduct shall consist of nine members, as follows: three persons who are justices or judges of state courts, elected by the justices and judges of state courts; three members who have practiced law in this state for ten years, appointed by the governor from nominations made by the governing body of the organized bar and subject to confirmation by a majority of the members of the legislature in joint session; and three persons who are not judges, retired judges, or members of the state bar, appointed by the governor and subject to confirmation by a majority of the members of the legislature in joint session. In addition to being subject to impeachment under Section 12 of this article, a justice or judge may be dis-qualified from acting as such and may be suspended, removed from office, retired, or censured by the supreme court upon the recommendation of the commission. The powers and duties of the commission and the bases for judicial disqualification shall be established by law. [Amended 1968 & 1982]

§ 11. Retirement – Justices and judges shall be retired at the age of seventy except as provided in this article. The basis and amount of retirement pay shall be prescribed by law. Retired judges shall Judiciary20render no further service on the bench except for special assignments as provided by court rule.

§ 12. Impeachment– Impeachment of any justice or judge for malfeasance or misfeasance in the performance of his official duties shall be according to procedure prescribed for civil officers.

§ 13. Compensation– Justices, judges, and members of the judicial council and the Commission on Judicial Qualifications shall receive compensation as prescribed by law. Compensation of justices and judges shall not be diminished during their terms of office, unless by general law applying to all salaried officers of the State. [Amended 1968]

§ 14. Restrictions– Supreme court justices and superior court judges while

holding office may not practice law, hold office in a political party, or hold any other office or position of profit under the United States, the State, or its political subdivisions. Any supreme court justice or superior court judge filing for another elective public office forfeits his judicial position.

§ 15. Rule-Making Power– The supreme court shall make and promulgate rules governing the administration of all courts. It shall make and promulgate rules governing practice and procedure in civil and criminal cases in all courts. These rules may be changed by the legislature by two-thirds vote of the members elected to each house.

§ 16. Court Administration– The chief justice of the supreme court shall be the administrative head of all courts. He may assign judges from one court or division thereof to another for temporary service. The chief justice shall, with the approval of the supreme court, appoint an administrative director to serve at the pleasure of the supreme court and to supervise the administrative operations of the judicial system. [Amended 1970]

Article V – Suffrage and Elections

Article V, Sections:

1. Qualified Voters
2. Disqualifications
3. Methods of Voting; Election Contests
4. Voting Precincts; Registration
5. General Elections

§ 1. Qualified Voters – Every citizen of the United States who is at least eighteen years of age, who meets registration residency requirements which may be prescribed by law, and who is qualified to vote under this article, may vote in any state or local election. A voter shall have been, immediately preceding the election, a thirty day resident of the election district in which he seeks to vote, except that for purposes of voting for President and Vice President of the United States other residency requirements may be prescribed by law. Additional voting qualifications may be prescribed by law for bond issue elections of political sub-divisions. [Amended 1966, 1970 & 1972]

§ 2. Disqualifications – No person may vote who has been convicted of a felony involving moral turpitude unless his civil rights have been restored. No person may vote who has been judicially determined to be of unsound mind unless the disability has been removed.

§ 3. Methods of Voting; Election Contests – Methods of voting, including absentee voting, shall be prescribed by law. Secrecy of voting shall be preserved. The procedure for determining election contests, with right of appeal to the courts, shall be prescribed by law.

§ 4. Voting Precincts; Registration – The legislature may provide a system of permanent registration of voters, and may establish voting precincts within election districts.

§ 5. General Elections – General elections shall be held on the second Tuesday in October of every even-numbered year, but the month and day may be changed by law. Editor's Note. Exercising its authority under this section, the legislature has provided that the date of general elections is the Tuesday after the first Monday in November in every even-numbered year. See AS 15.15.020.

Article VI – Legislative Apportionment

Article VI, Sections:

1. House Districts
2. Senate Districts
3. Reapportionment of House and Senate
4. Method of Redistricting
5. Combining Districts
6. District Boundaries
7. Modification of Senate Districts
8. Redistricting Board
9. Board Actions
10. Redistricting Plan and Proclamation
11. Enforcement

§ 1. House Districts– Members of the house of representatives shall be elected by the qualified voters of the respective house districts. The boundaries of the house districts shall be set under this article following the official reporting of each decennial census of the United States. [Amended 1998]

§ 2. Senate Districts – Members of the senate shall be elected by the qualified voters of the respective senate districts. The boundaries of the senate districts shall be set under this article following the official reporting of each decennial census of the United States. [Amended 1998]

§ 3. Reapportionment of House and Senate– The Redistricting Board shall reapportion the house of representatives and the senate immediately following the official reporting of each decennial census of the United States. Reapportionment shall be based upon the population within each house and senate district as reported by the official decennial census of the United States. [Amended 1998]

§ 4. Method of Redistricting– The Redistricting Board shall establish forty house districts, with each house district to elect one member of the house of representatives. The board shall establish twenty senate districts, each composed of two house districts, with each senate district to elect one senator. [Amended 1998]

§ 5. Combining Districts– Repealed by1998 Ballot Measure No. 3

§ 6. District Boundaries– The Redistricting Board shall establish the size and area of house districts, subject to the limitations of this article. Each house district shall be formed of contiguous and compact territory containing as nearly as practicable a relatively integrated socioeconomic area. Each shall contain a population as near as practicable to the quotient obtained by dividing the population of the state by forty. Each senate district shall be composed as near as practicable of two contiguous house districts. Consideration may be given to local government boundaries. Drainage and other geographic features shall be used in describing boundaries wherever possible.

§ 7. Modification of Senate Districts – Repealed by 1998 Ballot Measure No. 3

§ 8. Redistricting Board – (a) There shall be a redistricting board. It shall consist of five members, all of whom shall be residents of the state for at least one year and none of whom may be public employees or officials at the time of or during the tenure of appointment. Appointments shall be made without regard to political affiliation. Board members shall be compensated. (b) Members of the Redistricting Board shall be appointed in the year in which an official decennial census of the United States is taken and by September 1 of that year. The governor shall appoint two members of the board. The presiding officer of the senate, the presiding officer of the house of representatives, and the chief justice of the supreme court shall each appoint one member of the board. The appointments to the board shall be made in the order listed in this subsection. At least one board member shall be a resident of each judicial district that existed on January 1, 1999. Board members serve until a final plan for redistricting and proclamation of redistricting has been adopted and all challenges to it brought under Section 11 of this article have been resolved after final remand or affirmation. (c) A person who was a member of the Redistricting Board at any time during the process leading to final adoption of a redistricting plan under Section 10 of this article may not be a candidate for the legislature in the general election following the adoption of the final redistricting plan. [Amended 1998]

§ 9. Board Actions – The board shall elect one of its members chairman and may employ temporary assistants. Concurrence of three members of the

Redistricting Board is required for actions of the Board, but a lesser number may conduct hearings. The board shall employ or contract for services of independent legal counsel. [Amended 1998]

§ 10. Redistricting Plan and Proclamation – (a) Within thirty days after the official reporting of the decennial census of the United States or thirty days after being duly appointed, whichever occurs last, the board shall adopt one or more proposed redistricting plans. The board shall hold public hearings on the proposed plan, or, if no single proposed plan is agreed on, on all plans proposed by the board. No later than ninety days after the board has been appointed and the official reporting of the decennial census of the United States, the board shall adopt a final redistricting plan and issue a proclamation of redistricting. The final plan shall set out boundaries of house and senate districts and shall be effective for the election of members of the legislature until after the official reporting of the next decennial census of the United States. (b) Adoption of a final redistricting plan shall require the affirmative votes of three members of the Redistricting Board. [Amended 1998]

§ 11. Enforcement– Any qualified voter may apply to the superior court to compel the Redistricting Board, by mandamus or otherwise, to perform its duties under this article or to correct any error in redistricting. Application to compel the board to perform must be filed not later than thirty days following the expiration of the ninety-day period specified in this article. Application to compel correction of any error in redistricting must be filed within thirty days following the adoption of the final redistricting plan and proclamation by the board. Original jurisdiction in these matters is vested in the superior court. On appeal from the superior court, the cause shall be reviewed by the supreme court on the law and the facts. Notwithstanding Section 15 of Article IV, all dispositions by the superior the supreme court under this sections hall be expedited and shall have priority over all other matters pending before the respective court. Upon a final judicial decision that a plan is invalid, the matter shall be returned to the board for correction and development of a new plan. If that new plan is declared invalid, the matter may be referred again to the board. [Amended 1998]Editor's Note: The Division of Elections publishes maps and district descriptions resulting from the Proclamation of Redistricting by the Alaska Redistricting Board, April 25, 2002

Article VII – Health, Education and Welfare

Article VII, Sections:

1. Public Education
2. State University
3. Board of Regents
4. Public Health
5. Public Welfare

§ 1. Public Education – The legislature shall by general law establish and maintain a system of public schools open to all children of the State, and may provide for other public educational institutions. Schools and institutions so established shall be free from sectarian control. No money shall be paid from public funds for the direct benefit of any religious or other private educational institution.

§ 2. State University – The University of Alaska is hereby established as the state university and constituted a body corporate. It shall have title to all real and personal property now or hereafter set aside for or conveyed to it. Its property shall be administered and disposed of according to law.

§ 3. Board of Regents – The University of Alaska shall be governed by a board of regents. The regents shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session. The board shall, in accordance with law, formulate policy and appoint the president of the university. He shall be the executive officer of the board.

§ 4. Public Health – The legislature shall provide for the promotion and protection of public health.

§ 5. Public Welfare – The legislature shall provide for public welfare.

Article VIII – Natural Resources

Article VIII, Sections:

1. Statement of Policy
2. General Authority
3. Common Use
4. Sustained Yield
5. Facilities and Improvements
6. State Public Domain
7. Special Purpose Sites
8. Leases
9. Sales and Grants
10. Public Notice
11. Mineral Rights
12. Mineral Leases and Permits
13. Water Rights
14. Access to Navigable Waters
15. No Exclusive Right of Fishery
16. Protection of Rights
17. Uniform Application
18. Private Ways of Necessity

§ 1. Statement of Policy– It is the policy of the State to encourage the settlement of its land and the development of its resources by making them available for maximum use consistent with the public interest.

§ 2. General Authority– The legislature shall provide for the utilization, development, and conservation of all natural resources belonging to the State, including land and waters, for the maximum benefit of its people.

§ 3. Common Use– Wherever occurring in their natural state, fish, wildlife, and waters are reserved to the people for common use.

§ 4. Sustained Yield– Fish, forests, wildlife, grasslands, and all other replenish able resources belonging to the State shall be utilized, developed,

and maintained on the sustained yield principle, subject to preferences among beneficial uses.

§ 5. Facilities and Improvements– The legislature may provide for facilities, improvements, and services to assure greater utilization, development, reclamation, and settlement of lands, and to assure fuller utilization and development of the fisheries, wildlife, and waters.

§ 6. State Public Domain– Lands and interests therein, including submerged and tidal lands, possessed or acquired by the State, and not used or intended exclusively for governmental purposes, constitute the state public domain. The legislature shall provide for the selection of lands granted to the State by the United States, and for the administration of the state public domain.

§ 7. Special Purpose Sites– The legislature may provide for the acquisition of sites, objects, and areas of natural beauty or of historic, cultural, recreational, or scientific value. It may reserve them from the public domain and provide for their administration and preservation for the use, enjoyment, and welfare of the people.

§ 8. Leases – The legislature may provide for the leasing of, and the issuance of permits for exploration of, any part of the public domain or interest therein, subject to reasonable concurrent uses. Leases and permits shall provide, among other conditions, for payment by the party at fault for damage or injury arising from noncompliance with terms governing concurrent use, and for forfeiture in the event of breach of conditions.

§ 9. Sales and Grants – Subject to the provisions of this section, the legislature may provide for the sale or grant of state lands, or interests therein, and establish sales procedures. All sales or grants shall contain such reservations to the State of all resources as may be required by Congress or the State and shall provide for access to these resources. Reservation of access shall not unnecessarily impair the owners' use, prevent the control of trespass, or preclude compensation for damages.

§ 10. Public Notice – No disposals or leases of state lands, or interests therein, shall be made without prior public notice and other safeguards of the public interest as may be prescribed by law.

§ 11. Mineral Rights – Discovery and appropriation shall be the basis for establishing a right in those minerals reserved to the State which, upon the date of ratification of this constitution by the people of Alaska, were subject to location under the federal mining laws. Prior discovery, location, and filing, as prescribed by law, shall establish a prior right to these minerals and also a prior right to permits, leases, and transferable licenses for their extraction. Continuation of these rights shall depend upon the performance of annual labor, or the payment of fees, rents, or royalties, or upon other requirements as may be prescribed by law. Surface uses of land by a mineral claimant shall be limited to those necessary for the extraction or basic processing of the mineral deposits, or for both. Discovery and appropriation shall initiate a right, subject to further requirements of law, to patent of mineral lands if authorized by the State and not prohibited by Congress. The provisions of this section shall apply to all other minerals reserved to the State which by law are declared subject to appropriation.

§ 12. Mineral Leases and Permits – The legislature shall provide for the issuance, types and terms of leases for coal, oil, gas, oil shale, sodium, phosphate, potash, sulfur, pumice, and other minerals as may be prescribed by law. Leases and permits giving the exclusive right of exploration for these minerals for specific periods and areas, subject to reasonable concurrent exploration as to different classes of minerals, may be authorized by law. Like leases and permits giving the exclusive right of prospecting by geophysical, geochemical, and similar methods for all minerals may also be authorized by law.

§ 13. Water Rights – All surface and subsurface waters reserved to the people for common use, except mineral and medicinal waters, are subject to appropriation. Priority of appropriation shall give prior right. Except for public water supply, an appropriation of water shall be limited to stated purposes and subject to preferences among beneficial uses, concurrent or otherwise, as prescribed bylaw, and to the general reservation of fish and wildlife.

§ 14. Access to Navigable Waters–Free access to the navigable or public waters of the State, as defined by the legislature, shall not be denied any citizen of the United States or resident of the State, except that the legislature may by general law regulate and limit such access for other beneficial uses or

public purposes.

§ 15. No Exclusive Right of Fishery–No exclusive right or special privilege of fishery shall be created or authorized in the natural waters of the State. This section does not restrict the power of the State to limit entry into any fishery for purposes of resource conservation, to prevent economic distress among fishermen and those dependent upon them for a livelihood and to promote the efficient development of aquaculture in the State. [Amended 1972]

§ 16. Protection of Rights– No person shall be involuntarily divested of his right to the use of waters, his interests inlands, or improvements affecting either, except for a superior beneficial use or public purpose and then only with just compensation and by operation of law.

§ 17. Uniform Application– Laws and regulations governing the use or disposal of natural resources shall apply equally to all persons similarly situated with reference to the subject matter and purpose to be served by the law or regulation.

§ 18. Private Ways of Necessity–Proceedings in eminent domain may be undertaken for private ways of necessity to permit essential access for extraction or utilization of resources. Just compensation shall be made for property taken or for resultant damages to other property rights.

Article IX – Finance and Taxation

Article IX, Sections:

1. Taxing Power
2. Nondiscrimination
3. Assessment Standards
4. Exemptions
5. Interests in Government Property
6. Public Purpose
7. Dedicated Funds
8. State Debt
9. Local Debts
10. Interim Borrowing
11. Exceptions
12. Budget
13. Expenditures
14. Legislative Post-Audit
15. Alaska Permanent Fund
16. Appropriation Limit
17. Budget Reserve Fund

§ 1. Taxing Power – The power of taxation shall never be surrendered. This power shall not be suspended or contracted away, except as provided in this article.

§ 2. Nondiscrimination – The lands and other property belonging to citizens of the United States residing without the State shall never be taxed at a higher rate than the lands and other property belonging to the residents of the State.

§ 3. Assessment Standards – Standards for appraisal of all property assessed by the State or its political subdivisions shall be prescribed by law.

§ 4. Exemptions – The real and personal property of the State or its political subdivisions shall be exempt from taxation under conditions and exceptions which may be provided by law. All, or any portion of, property

used exclusively for non-profit religious, charitable, cemetery, or educational purposes, as defined by law, shall be exempt from taxation. Other exemptions of like or different kind may be granted by general law. All valid existing exemptions shall be retained until otherwise provided by law.

§ 5. Interests in Government Property – Private leaseholds, contracts, or interests in land or property owned or held by the United States, the State, or its political subdivisions, shall be taxable to the extent of the interests.

§ 6. Public Purpose – No tax shall be levied, or appropriation of public money made, or public property transferred, nor shall the public credit be used, except for a public purpose.

§ 7. Dedicated Funds – The proceeds of any state tax or license shall not be dedicated to any special purpose, except as provided in section 15 of this article or when required by the federal government for state participation in federal programs. This provision shall not prohibit the continuance of any dedication for special purposes existing upon the date of ratification of this section by the people of Alaska. [Amended 1976]

§ 8. State Debt– No state debt shall be contracted unless authorized by law for capital improvements or unless authorized by law for housing loans for veterans, and ratified by a majority of the qualified voters of the State who vote on the question. The State may, as provided by law and without ratification, for the purpose of repelling invasion, suppressing insurrection, defending the State in war, meeting natural disasters, or redeeming indebtedness outstanding at the time this constitution becomes effective. [Amended 1982]

§ 9. Local Debts– No debt shall be contracted by any political subdivision of the State, unless authorized for capital improvements by its governing body and ratified by a majority vote of those qualified to vote and voting on the question.

§ 10. Interim Borrowing– The State and its political subdivisions may borrow money to meet appropriations for any fiscal year in anticipation of the collection of the revenues for that year, but all debt so contracted shall be paid before the end of the next fiscal year.

§ 11. Exceptions– The restrictions on contracting debt do not apply to

debt incurred through the issuance of revenue bonds by a public enterprise or public corporation of the State or a political subdivision, when the only security is the revenues of the enterprise or corporation. The restrictions do not apply to indebtedness to be paid from special assessments on the benefited property, nor do they apply to refunding indebtedness of the State or its political subdivisions.

§ 12. Budget– The governor shall submit to the legislature, at a time fixed by law, a budget for the next fiscal year setting forth all proposed expenditures and anticipated income of all departments, offices, and agencies of the State. The governor, at the same time, shall submit a general appropriation bill to authorize the proposed expenditures, and a bill or bills covering recommendations in the budget for new or additional revenues.

§ 13. Expenditures– No money shall be withdrawn from the treasury except in accordance with appropriations made by law. No obligation for the payment of money shall be incurred except as authorized by law. Unobligated appropriations outstanding at the end of the period of time specified by law shall be void.

§ 14. Legislative Post-Audit– The legislature shall appoint an auditor to serve at its pleasure. He shall be a certified public accountant. The auditor shall conduct post-audits as prescribed by law and shall report to the legislature and to the governor.

§ 15. Alaska Permanent Fund– At least twenty-five per cent of all mineral lease rentals, royalties, royalty sale proceeds, federal mineral revenue sharing payments and bonuses received by the State shall be placed in a permanent fund, the principal of which shall be used only for those income-producing investments specifically designated by law as eligible for permanent fund investments. All income from the permanent fund shall be deposited in the general fund unless otherwise provided by law. [Amended 1976]

§ 16. Appropriation Limit – Except for appropriations for Alaska permanent fund dividends, appropriations of revenue bond proceeds, appropriations required to pay the principal and interest on general obligation bonds, and appropriations of money received from a non-State source in trust for a specific purpose, including revenues of a public enterprise or public corporation of the State that issues revenue bonds, appropriations

from the treasury made for a fiscal year shall not exceed $2,500,000,000 by more than the cumulative change, derived from federal indices as prescribed by law, in population and inflation since July 1, 1981. Within this limit, at least one-third shall be reserved for capital projects and loan appropriations. The legislature may exceed this limit in bills for appropriations to the Alaska permanent fund and in bills for appropriations for capital projects, whether of bond proceeds or otherwise, if each bill is approved by the governor, or passed by affirmative vote of three-fourths of the membership of the legislature over a veto or item veto, or becomes law without signature, and is also approved by the voters as prescribed by law. Each bill for appropriations for capital projects in excess of the limit shall be confined to capital projects of the same type, and the voters shall, as provided by law, be informed of the cost of operations and maintenance of the capital projects. No other appropriation in excess of this limit may be made except to meet a state of disaster declared by the governor as prescribed by law. The governor shall cause any unexpended and unappropriated balance to be invested so as to yield competitive market rates to the treasury. [Amended 1982]

§ 17. Budget Reserve Fund – (a) There is established as a separate fund in the State treasury the budget reserve fund. Except for money deposited into the permanent fund under Section 15 of this article, all money received by the State after July 1, 1990, as a result of the termination, through settlement or otherwise, of an administrative proceeding or of litigation in a State or federal court involving mineral lease bonuses, rentals, royalties, royalty sale proceeds, federal mineral revenue sharing payments or bonuses, or involving taxes imposed on mineral income, production, or property, shall be deposited in the budget reserve fund. Money in the budget reserve fund shall be invested so as to yield competitive market rates to the fund. Income of the fund shall be retained in the fund. Section 7 of this article does not apply to deposits made to the fund under this subsection. Money may be appropriated from the fund only as authorized under (b) or (c) of this section. (b) If the amount available for appropriation for a fiscal year is less than the Taxation32amount appropriated for the previous fiscal year, an appropriation may be made from the budget reserve fund. However, the amount appropriated from the fund under this subsection may not exceed the amount necessary, when added to other funds available for appropriation, to provide for total appropriations equal to the amount of appropriations made in the previous calendar year for

the previous fiscal year. (c) An appropriation from the budget reserve fund may be made for any public purpose upon affirmative vote of three-fourths of the members of each house of the legislature. (d) If an appropriation is made from reserve fund, until the amount appropriated is repaid, the amount of money in the general fund available for appropriation at the end of each succeeding fiscal year shall be deposited in the budget reserve fund. The

legislature shall implement this subsection by law. [Amended 1990]

Article X – Local Government

Article X, Sections:

1. Purpose and Construction
2. Local Government Powers
3. Boroughs
4. Assembly
5. Service Areas
6. Unorganized Boroughs
7. Cities 8. Council
9. Charters
10. Extended Home Rule
11. Home Rule Powers
12. Boundaries
13. Agreements; Transfer of Powers
14. Local Government Agency
15. Special Service Districts

§ 1. Purpose and Construction – The purpose of this article is to provide for maximum local self-government with a minimum of local government units, and to prevent duplication of tax-levying jurisdictions. A liberal construction shall be given to the powers of local government units.

§ 2. Local Government Powers – All local government powers shall be vested in boroughs and cities. The State may delegate taxing powers to organized boroughs and cities only.

§ 3. Boroughs – The entire State shall be divided into boroughs, organized or unorganized. They shall be established in a manner and according to standards provided by law. The standards shall include population, geography, economy, transportation, and other factors. Each borough shall embrace an area and population with common interests to the maximum degree possible. The legislature shall classify boroughs and prescribe their powers and functions. Methods by which boroughs may be organized,

incorporated, merged, consolidated, reclassified, or dissolved shall be prescribed by law.

§ 4. Assembly – The governing body of the organized borough shall be the assembly, and its composition shall be established by law or charter. [Amended 1972]

§ 5. Service Areas – Service areas to provide special services within an organized borough may be established, altered, or abolished by the assembly, subject to the provisions of law or charter. A new service area shall not be established if, consistent with the purposes of this article, the new service can be provided by an existing service area, by incorporation as a city, or by annexation to a city. The assembly may authorize the levying of taxes, charges, or assessments within a service area to finance the special services.

§ 6. Unorganized Boroughs – The legislature shall provide for the performance of services it deems necessary or advisable in unorganized boroughs, allowing for maximum local participation and responsibility. It may exercise any power or function in an unorganized borough which the assembly may exercise in an organized borough.

§ 7. Cities – Cities shall be incorporated in a manner prescribed by law, and shall be a part of the borough in which they are located. Cities shall have the powers and functions conferred by law or charter. They may be merged, consolidated, classified, reclassified, or dissolved in the manner provided by law.

§ 8. Council– The governing body of a city shall be the council.

§ 9. Charters– The qualified voters of any borough of the first class or city of the first class may adopt, amend, or repeal a home rule charter in a manner provided by law. In the absence of such legislation, the governing body of a borough or city of the first class shall provide the procedure for the preparation and adoption or rejection of the charter. All charters, or parts or amendments of charters, shall be submitted to the qualified voters of the borough or city, and shall become effective if approved by a majority of those who vote on the specific question.

§ 10. Extended Home Rule– The legislature may extend home rule to other boroughs and cities.

§ 11. Home Rule Powers– A home rule borough or city may exercise all legislative powers not prohibited by law or by charter.

§ 12. Boundaries– A local boundary commission or board shall be established by law in the executive branch of the state government. The commission or board may consider any proposed local government boundary change. It may present proposed changes to the legislature during the first ten days of any regular session. The change shall become effective forty-five days after presentation or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house. The commission or board, subject to law, may establish procedures whereby boundaries may be adjusted by local action.

§ 13. Agreements; Transfer of Powers– Agreements, including those for cooperative or joint administration of any functions or powers, may be made by any local government with any other local government, with the State, or with the United States, unless otherwise provided by law or charter. A city may transfer to the borough in which it is located any of its powers or functions unless prohibited by law or charter, and may in like manner revoke the transfer.

§ 14. Local Government Agency– An agency shall be established by law in the executive branch of the state government to advise and assist local governments. It shall review their activities, collect and publish local government information, and perform other duties prescribed by law.

§ 15. Special Service Districts– Special service districts existing at the time a borough is organized shall be integrated with the government of the borough as provided by law.

Article XI – Initiative, Referendum, and Recall

Article XI, Sections:

1. Initiative and Referendum
2. Application
3. Petition
4. Initiative Election
5. Referendum Election
6. Enactment
7. Restrictions
8. Recall

§ 1. Initiative and Referendum – The people may propose and enact laws by the initiative, and approve or reject acts of the legislature by the referendum.

§ 2. Application – An initiative or referendum is proposed by an application containing the bill to be initiated or the act to be referred. The application shall be signed by not less than one hundred qualified voters as sponsors, and shall be filed with the lieutenant governor. If he finds it in proper form he shall so certify. Denial of certification shall be subject to judicial review. [Amended 1970]

§ 3. Petition – After certification of the application, a petition containing a summary of the subject matter shall be prepared by the lieutenant governor for circulation by the sponsors. If signed by qualified voters who are equal in number to at least ten per cent of those who voted in the preceding general election, who are resident in at least three-fourths of the house districts of the State, and who, in each of those house districts, are equal in number to at least seven percent of those who voted in the preceding general election in the house district, it may be filed with the lieutenant governor. [Amended 1970, 1998 & 2004]

§ 4. Initiative Election – An initiative petition may be filed at any time. The lieutenant governor shall prepare a ballot title and proposition summarizing the proposed law, and shall place them on the ballot for the first statewide

election held more than one hundred twenty days after adjournment of the legislative session following the filing. If, before the election, substantially the same measure has been enacted, the petition is void. [Amended 1970]

§ 5. Referendum Election – A referendum petition may be filed only within ninety days after adjournment of the legislative session at which the act was passed. The lieutenant governor shall prepare a ballot title and proposition summarizing the act and shall place them on the ballot for the first statewide election held more than one hundred eighty days after adjournment of that session. [Amended 1970]

§ 6. Enactment – If a majority of the votes cast on the proposition favor its adoption, the initiated measure is enacted. If a majority of the votes cast on the proposition favor the rejection of an Recall36act referred, it is rejected. The lieutenant governor shall certify the election returns. An initiated law becomes effective ninety days after certification, is not subject to veto, and may not be repealed by the legislature within two years of its effective date. It may be amended at any time. An act rejected by referendum is void thirty days after certification. Additional procedures for the initiative and referendum may be prescribed by law. [Amended 1970]

§ 7. Restrictions– The initiative shall not be used to dedicate revenues, make or repeal appropriations, create courts, define the jurisdiction of courts or prescribe their rules, or enact local or special legislation. The referendum shall not be applied to dedications of revenue, to appropriations, to local or special legislation, or to laws necessary for the immediate preservation of the public peace, health, or safety.

§ 8. Recall– All elected public officials in the State, except judicial officers, are subject to recall by the voters of the State or political subdivision from which elected. Procedures and grounds for recall shall be prescribed by the

legislature.

Article XII – General Provisions

Article XII, Sections:

1. State Boundaries
2. Intergovernmental Relations
3. Office of Profit
4. Disqualification for Disloyalty
5. Oath of Office
6. Merit System
7. Retirement Systems
8. Residual Power
9. Provisions Self-Executing
10. Interpretation
11. Law-Making Power
12. Disclaimer and Agreement
13. Consent to Act of Admission
14. Approval of Federal Amendment to Statehood Act Affecting an Interest of the State Under that Act

§ 1. State Boundaries – The State of Alaska shall consist of all the territory, together with the territorial waters appurtenant thereto, included in the Territory of Alaska upon the date of ratification of this constitution by the people of Alaska.

§ 2. Intergovernmental Relations – The State and its political subdivisions may cooperate with the United States and its territories, and with other states and their political subdivisions on matters of common interest. The respective legislative bodies may make appropriations for this purpose.

§ 3. Office of Profit – Service in the armed forces of the United States or of the State is not an office or position of profit as the term is used in this constitution.

§ 4. Disqualification for Disloyalty – No person who advocates, or who aids or belongs to any party or organization or association which advocates,

the overthrow by force or violence of the government of the United States or of the State shall be qualified to hold any public office of trust or profit under this constitution.

§ 5. Oath of Office – All public officers, before entering upon the duties of their offices, shall take and subscribe to the following oath or affirmation: "I do solemnly swear (or affirm) that I will support and defend the Constitution of the United States and the Constitution of the State of Alaska, and that I will faithfully discharge my duties as . . . to the best of my ability." The legislature may prescribe further oaths or affirmations.

§ 6. Merit System – The legislature shall establish a system under which the merit principle will govern the employment of persons by the State.

§ 7. Retirement Systems – Membership in employee retirement systems of the State or its political subdivisions shall constitute a contractual relationship. Accrued benefits of these systems shall not be diminished or impaired.

§ 8. Residual Power– The enumeration of specified powers in this constitution shall not be construed as limiting the powers of the State.

§ 9. Provisions Self-Executing– The provisions of this constitution shall be construed to be self-executing whenever possible.

§ 10. Interpretation– Titles and subtitles shall not be used in construing this constitution. Personal pronouns used in this constitution shall be construed as including either sex.

§ 11. Law-Making Power – As used in this constitution, the terms "by law" and "by the legislature," or variations of , are used interchangeably when related to law-making powers. Unless clearly inapplicable, the law-making powers assigned to the legislature may be exercised by the people through the initiative, subject to the limitations of Article XI.

§ 12. Disclaimer and Agreement– The State of Alaska and its people forever disclaim all right and title in or to any property belonging to the United States or subject to its disposition, and not granted or confirmed to the State or its political subdivisions, by or under the act admitting Alaska to the Union. The State and its people further disclaim all right or title in or to any property, including fishing rights, the right or title to which may be held

by or for any Indian, Eskimo, or Aleut, or community thereof, as that right or title is defined in the act of admission. The State and its people agree that, unless otherwise provided by Congress, the property, as described in this section, shall remain subject to the absolute disposition of the United States. They further agree that no taxes will be imposed upon any such property, until otherwise provided by the Congress. This tax exemption shall not apply to property held by individuals in fee without restrictions on alienation.

§ 13. Consent to Act of Admission–All provisions of the act admitting Alaska to the Union which reserve rights or powers to the United States, as well as those prescribing the terms or conditions of the grants of lands or other property, are consented to fully by the State and its people.

§ 14. Approval of Federal Amendment to Statehood Act Affecting an Interest of the State under that Act– A federal statute or proposed federal statute that affects an interest of this State under the Act admitting Alaska to the Union is ineffective as against the State interest unless approved by a two-thirds vote of each house of the legislature or approved by the people of the State. The legislature may, by a resolution passed by a majority vote of each house, place the question of approval of the federal statute on the ballot for the next general election unless in the resolution placing the question of approval, the legislature requires the question to be placed before the voters at a special election. The approval of the federal statute by the people of the State is not effective unless the federal statute described in there solution is ratified by a majority of the qualified voters of the State who vote on the question. Unless a summary of the question is provided in the resolution passed by the legislature, the lieutenant governor shall prepare an impartial summary of the question. The lieutenant governor shall present the question

to the voters so that a "yes" vote on the question is a vote to approve the federal statute. [Amended 1996]

Article XIII – Amendment and Revision

Article XIII, Sections:

1. **Amendments**
2. **Convention**
3. **Call by Referendum**
4. **Powers**

§ 1. Amendments – Amendments to this constitution may be proposed by a two-thirds vote of each house of the legislature. The lieutenant governor shall prepare a ballot title and proposition summarizing each proposed amendment, and shall place them on the ballot for the next general election. If a majority of the votes cast on the proposition favor the amendment, it shall be adopted. Unless otherwise provided in the amendment, it becomes effective thirty days after the certification of the election returns by the lieutenant governor. [Amended 1970, 1974]

§ 2. Convention– The legislature may call constitutional conventions at anytime.

§ 3. Call by Referendum– If during any ten-year period a constitutional convention has not been held, the lieutenant governor shall place on the ballot for the next general election the question: "Shall there be a Constitutional Convention?" If a majority of the votes cast on the question are in the negative, the question need not be placed on the ballot until the end of the next ten-year period. If a majority of the votes cast on the question are in the affirmative, delegates to the convention shall be chosen at the next regular statewide election, unless the legislature provides for the election of the delegates at a special election. The lieutenant governor shall issue the call for the convention. Unless other provisions have been made by law, the call shall conform as nearly as possible to the act calling the Alaska Constitutional Convention of 1955, including, but not limited to, number of members, districts, election and certification of delegates, and submission and ratification of revisions and ordinances. The appropriation provisions of

the call shall be self-executing and shall constitute a first claim on the state treasury. [Amended 1970]

§ 4. Powers– Constitutional conventions shall have plenary power to amend or revise the constitution, subject only to ratification by the people. No call for a constitutional convention shall limit these powers of the convention.

Revision Article XIV – Apportionment Schedule

5. Corresponding Qualifications
6. Governor to Proclaim Election
7. First State Elections
8. United States Senators and Representative
9. Terms of First Governor and Lieutenant Governor
10. Election of First Senators
11. Terms of First State Legislators
12. Election Returns
13. Assumption of Office
14. First Session of Legislature
15. First Legislators: Office Holding
16. First Judicial Council
17. Transfer of Court Jurisdiction
18. Territorial Assets and Liabilities
19. First Reapportionment
20. State Capital
21. Seal
22. Flag
23. Special Voting Provision
24. Ordinances
25. Effective Date
26. Appropriations for Relocation of the Capital

27. Reconsideration of Amendment Limiting Increases in Appropriations
28. Application of Amendment
29. Applicability of Amendments Providing for Redistricting of the Legislature To provide an orderly transition from a territorial to a state form of government, it is declared and ordained:

§ 1. Continuance of Laws – All laws in force in the Territory of Alaska on the effective date of this constitution and consistent therewith shall continue in force until they expire by their own limitation, are amended, or repealed.

§ 2. Saving of Existing Rights and Liabilities – Except as otherwise provided in this constitution, all rights, titles, actions, suits, contracts, and liabilities and all civil, criminal, or administrative proceedings shall continue unaffected by the change from territorial to state government, and the State shall be the legal successor to the Territory in these matters.

§ 3. Local Government – Cities, school districts, health districts, public utility districts, and other local subdivisions of government existing on the effective date of this constitution shall continue to exercise their powers and functions under existing law, pending enactment of Measures42legislation to carry out the provisions of this constitution. New local subdivisions of government shall be created only in accordance with this constitution.

§ **4. Continuance of Office–** All officers of the Territory, or under its laws, on the effective date of this constitutions hall continue to perform the duties of their offices in a manner consistent with this constitution until they are superseded by officers of the State.

§ 5. Corresponding Qualifications–Residence, citizenship, or other qualifications under the Territory may be used toward the fulfillment of corresponding qualifications required by this constitution.

§ 6. Governor to Proclaim Election– When the people of the Territory ratify this constitution and it is approved by the duly constituted authority of the United States, the governor of the Territory shall, within thirty days after receipt of the official notification of such approval, issue a proclamation and take necessary measures to hold primary and general elections for all state elective offices provided for by this constitution.

§ 7. First State Elections– The primary election shall take place not less than forty nor more than ninety days after the proclamation by the governor of the Territory. The general election shall take place not less than ninety days after the primary election. The elections shall be governed by this constitution and by applicable territorial laws.

§ 8. United States Senators and Representative– The officers to be elected at the first general election shall include two senators and one representative to serve in the Congress of the United States, unless senators and a representative have been previously elected and seated. One senator shall be elected for the long term and one senator for the short term, each term to expire on the third day of January in an odd-numbered year to be determined by authority of the United States. The term of the representative shall expire on the third day of January in the odd-numbered year immediately following his assuming office. If the first representative is elected in an even-numbered year to take office in that year, a representative shall be elected at the same time to fill the full term commencing on the third day of January of the following year, and the same person may be elected for both terms.

§ 9. Terms of First Governor and Lieutenant Governor– The First Governor and Lieutenant Governors hall hold office for a term beginning with the day on which they assume office and ending at noon on the first Monday in December of the even-numbered year following the next presidential election. This term shall count as a full term for purposes of determining eligibility for re-election only if it is four years or more in duration. [Amended 1970]

§ 10. Election of First Senators– At the first state general election, one senator shall be chosen for a two-year term from each of the following senate districts, described in Section 2 of Article XIV: A, B, D, E, G, I, J, L, N, and O. At the same election, one senator shall be chosen for a four-year term from each of the following senate districts described in Section 2 of Article XIV: A, C, E, F, H, J, K, M, N, and P.

§ 11. Terms of First State Legislators – The first state legislators shall hold office for a term beginning with the day on which they assume office and ending at noon on the fourth Monday in January after the next general

election, except that senators elected for four-year terms shall serve an additional two years thereafter. If the first general election is held in an even-numbered year, it shall be deemed to be the general election for that year.

§ 12. Election Returns – The returns of the first general election shall be made, canvassed, and certified in the manner prescribed by law. The governor of the Territory shall certify the results to the President of the United States.

§ 13. Assumption of Office – When the President of the United States issues a proclamation announcing the results of the election, and the State has been admitted into the Union, the officers elected and qualified shall assume office.

§ 14. First Session of Legislature – The governor shall call a special session of the first state legislature within thirty days after the presidential proclamation unless a regular session of the legislature falls within that period. The special session shall not be limited as to duration.

§ 15. First Legislators: Office Holding – The provisions of Section 5 of Article II shall not prohibit any member of the first state legislature from holding any office or position created during his first term.

§ 16. First Judicial Council – The first members of the judicial council shall, notwithstanding Section 8 of Article IV, be appointed for terms as follows: three attorney members for one, three, and five years respectively, and three non-attorney members for two, four, and six years respectively. The six members so appointed shall, in accordance with Section 5 of Article IV, submit to the governor nominations to fill the initial vacancies on the superior court and the supreme court, including the office of chief justice. After the initial vacancies on the superior and supreme courts are filled, the chief justice shall assume his seat on the judicial council.

§ 17. Transfer of Court Jurisdiction – Until the courts provided for in Article IV are organized, the courts, their jurisdiction, and the judicial system shall remain as constituted on the date of admission unless otherwise provided by law. When the state courts are organized, new actions shall be commenced and filed therein, and all causes, other than those under the jurisdiction of the United States, pending in the courts

existing on the date of admission, shall be transferred to the proper state court as though commenced, filed, or lodged in those courts in the first instance, except as otherwise provided by law.

§ 18. Territorial Assets and Liabilities – The debts and liabilities of the Territory of Alaska shall be assumed and paid by the State, and debts owed to the Territory shall be collected by the State. Assets and records of the Territory shall become the property of the State.

§ 19. First Reapportionment– The first reapportionment of the house of representatives shall be made immediately following the official reporting of the1960 decennial census, or after the first regular legislative session if the session occurs thereafter, notwithstanding the provision as to time contained in Section 3 of Article VI. All other provisions of Article VI shall apply in the first reapportionment.

§ 20. State Capital – The capital of the State of Alaska shall be at Juneau.

§ 21. Seal– The seal of the Territory, substituting the word "State" for "Territory," shall be the seal of the State.

§ 22. Flag– The flag of the Territory shall be the flag of the State.

§ 23. Special Voting Provision–Citizens who legally voted in the general election of November 4, 1924, and who meet the residence requirements for voting, shall be entitled to vote not with-standing the provisions of Section 1 of Article V.

§ 24. Ordinances – Ordinance No. 1 on ratification of the constitution, Ordinance No. 2 on the Alaska-Tennessee Plan, and Ordinance No. 3on the abolition of fish traps, adopted by the Alaska Constitutional Convention and appended to this constitution, shall be submitted to the voters and if ratified shall become effective as provided in each ordinance. Editor's Note: All three ordinances were ratified on April 24, 1956 – See Appendix A

§ 25. Effective Date– This constitution shall take effect immediately upon the admission of Alaska into the Union as a state.

§ 26. Appropriations for Relocation of the Capital– If a majority of those voting on the question at the general election in 1982 approve the ballot proposition for the total cost to the State of providing for relocation of the capital, no additional voter approval of appropriations for that

purpose within the cost approved by the voters is required under the 1982 amendment limiting increases in appropriations (art. IX, sec. 16). [Amended 1982]

§ 27. Reconsideration of Amendment Limiting Increases in Appropriations–If the 1982 amendment limiting appropriation increases (art. IX, sec. 16) is adopted, the lieutenant governor shall cause the ballot title and proposition for the amendment to be placed on the ballot again at the general election in1986. If the majority of those voting on the proposition in 1986 rejects the amendment, it shall be repealed. [Amended 1982]

§ 28. Application of Amendment –The 1982 amendment limiting appropriation increases (art. IX, sec. 16)applies to appropriations made for fiscal year 1984 and thereafter. [Amended 1982]

§ 29. Applicability of Amendments Providing for Redistricting of the Legislature– The 1998 amendments relating to redistricting of the legislature (art. VI and art. XIV) apply only to plans for redistricting and proclamations of redistricting adopted on or after January1, 2001. [Amended 1998]

Proposed Amendment failed

Appendix A ~ Ordinances

Appended to the constitution were three ordinances (Article XV, Section 24) which dealt with (1) ratification of the constitution; (2) adoption of the Alaska–Tennessee Plan; and (3) abolition of fish traps. The ratification ordinance simply placed the constitution on the ballot for ratification by the voters. The Alaska–Tennessee Plan provided for the immediate election of two senators and a representative who, although not official members of the Congress, could promote the cause of statehood in Washington, D.C. The ordinance prohibiting fish traps reflected widespread opposition in Alaska to fishing practices condoned by federal fishery managers, and it was designed to rally support for statehood and the constitution among the voters.

Ordinance No. 1 – Ratification of Constitution

Section 1. Election– The Constitution for the State of Alaska agreed upon by the delegates to the Alaska Constitutional Convention on February5 , 1956, shall be submitted to the voters of Alaska for ratification or rejection at the territorial primary election to beheld on April 24, 1956. The election shall be conducted according to existing laws regulating primary elections so far as applicable.

Section 2. Ballot– Each elector who offers to vote upon this constitution shall be given a ballot by the election judges which will be separate from the ballot on which candidates in the primary election are listed. Each of the propositions offered by the Alaska Constitutional Convention shall be set forth separately, but on the same ballot form. The first proposition shall be as follows:

"Shall the Constitution for the State of Alaska prepared and agreed upon by the Alaska Constitutional Convention be adopted?"

Yes [ ] No [ ]

Section 3. Canvass– The returns of this election shall be made to the governor of the Territory of Alaska, and shall be canvassed in substantially the manner provided by law for territorial elections.

Section 4. Acceptance and Approval–If a majority of the votes cast on the preposition favor the constitution, then the constitution, shall be deemed to be ratified by the people of Alaska to become effective as provided in the constitution.

Section 5. Submission of Constitution– Upon ratification of the constitution, the governor of the Territory shall forthwith transmit a certified copy of the constitution to the President of the United States for submission to the Congress, together with a statement of the votes cast for and against ratification.

Ordinance No. 2– Alaska-Tennessee Plan

Section1. Statement of Purpose– The election of senators and a representative to serve in the Congress of the United States being necessary and proper to prepare for the admission of Alaska as a state of the Union, the following sections are hereby ordained, pursuant to Chapter46, SLA 1955.

Section 2. Ballot– Each elector who offers to vote upon the ratification of the constitution may, upon the same ballot, vote on a second proposition, which shall be as follows:

"Shall Ordinance Number Two (Alaska-Tennessee Plan) of the Alaska Constitutional Convention, calling for the immediate election of two United States Senators and one United States Representative, be adopted?"

Yes [ ] No [ ]

Section 3. Approval – Upon ratification of the constitution by the people of Alaska and separate approval of this ordinance by a majority of all votes cast for and against it, the remainder of this ordinance shall become effective.

Section 4. Election of Senators and Representative – Two United States senators and one United State representative shall be chosen at the 1956 general election.

Section 5. Terms – One senator shall be chosen for the regular term expiring on January 3, 1963, and the other for an initial short term expiring on January 3, 1961, unless when they are seated the Senate prescribes other expiration dates. The representative shall be chosen for the regular term of two years expiring January 3, 1959.

Section 6. Qualifications – Candidates for senators and representative shall have the qualifications prescribed in the Constitution of the United States and shall be qualified voters of Alaska.

Section 7. Other Office Holding – Until the admission of Alaska as a state, the senators and representative may also hold or be nominated and elected to other offices of the United States or of the Territory of Alaska, provided that no person may receive compensation for more than one office.

Section 8. Election Procedure – Except as provided herein, the laws of the Territory governing elections to the office of Delegate to Congress shall, to the extent applicable, govern the election of the senators and representative. Territorial and other officials shall perform their duties with reference to this election accordingly.

Section 9. Independent Candidates – Persons not representing any political party may become independent candidates for the offices of senator or representative by filing applications in the manner provided in Section 38-5-10, ACLA 1949, insofar as applicable. Applications must be filed in the office of the director of finance of the Territory on or before June 30, 1956.

Section 10. Party Nominations – Party nominations for senators and representative shall, for this election only, be made by party conventions in the manner prescribed in Section 38-4-11, ACLA 1949, for filling a vacancy in a party nomination occurring after a primary election. The names of the candidates nominated shall be certified by the chairman and secretary of the central committee of each political party to the director of finance of the Territory on or before June 30, 1956. Ordinances 50

Section 11. Certification– The director of finance shall certify the names of all candidates for senators and representatives to the clerks of court by July15, 1956. The clerks of court shall cause the names to be printed on the official ballot for the general election. Independent candidates shall be identified as provided in Section 38-5-10, ACLA 1949. Candidates nominated at party conventions shall be identified with appropriate party designations as is provided by law for nominations at primary elections.

Section 12. Ballot Form; Who Elected– The ballot form shall group separately the candidates seeking the regular senate term, those seeking the short senate term, and candidates for representative. The candidate for each office receiving the largest number of votes cast for that office shall be elected.

Section 13. Duties and Emoluments– The duties and emoluments of the offices of senator and representative shall be as prescribed by law.

Section14. Convention Assistance–The president of the Alaska Constitutional Convention, or a person designated by him, may assist in carrying out the purposes of this ordinance. The unexpended and unobligated funds appropriated to the Alaska Constitutional Convention by Chapter 46, SLA 1955, may be used to defray expenses attributable to the referendum and the election required by this ordinance

Section15. Alternate Effective Dates–If the Congress of the United States seats the senators and representative elected pursuant to this ordinance and approves the constitution before the first election of state officers, then Section 25 of Article XV shall be void and shall be replaced by the following: **"The provisions of the constitution applicable to the first election of state officers shall take effect immediately upon the admission of Alaska into the Union as a state. The remainder of the constitution shall take effect when the elected governor takes office."**

Ordinance No. 3 – Abolition of Fish Traps

Section1. Ballot– Each elector who offers to vote upon the ratification of the constitution may, upon the same ballot, vote on a third proposition, which shall be as follows:

"Shall Ordinance Number Three of the Alaska Constitutional Convention, prohibiting the use of fish traps for the taking of salmon for commercial purposes in the coastal waters of the State, be adopted?"

Yes [ ] No [ ]

Section 2. Effect of Referendum– If the constitution shall be adopted by the electors and if a majority of all the votes cast for and against this ordinance favor its adoption, then the following shall become operative upon the effective date of the constitution: "As a matter of immediate public necessity, to relieve economic distress among individual fishermen and those dependent upon them for a livelihood, to conserve the rapidly dwindling supply of salmon in Alaska, to insure fair competition among those engaged in commercial fishing, and to make manifest the will of the people of Alaska, the use of fish traps for the taking of salmon for commercial purposes is hereby prohibited in all the coastal waters of the State."

STATEHOOD CELEBRATION

~ June 30, 1958 ~

Photo courtesy of Alaska State Library - Alaska Statehood - 8

Alaska's governor, Mike Stepovich, and congressional advocates for statehood were jubilant in the nation's capital on June 30, 1958 after Senate passage of the Alaskan statehood bill by a vote of 64-20. Celebrating Alaska's official statehood over a 49-star flag outside the Senate chamber after the bill's passage were (front row left to right): Ernest Gruening, former Alaska governor; Sen. Frank Church (D-Idaho); Sen.Thomas Kuchel (R-California); Gov. Stepovich; Sen. Henry Jackson (D-Washington), floor manager of the bill; Wally Hickel, GOP chairman for Alaska; Sen. Arthur Watkins (R-Utah); and Sen. Richard Neuberger (D-Oregon).

LAID-ON-THE-TABLE

MUNICIPALITY OF ANCHORAGE

Assembly Memorandum

No. AM 557- 2024 (A)

Meeting Date: July 19, 2024

From: **MAYOR**

Subject: Comments to the Governor from the Municipality of Anchorage, in response to stakeholder comments to the Eklutna Hydroelectric Project's Proposed Final Fish and Wildlife Program put forth on April 25, 2024.

Attached are the Mayor's **updated** comments for submittal to the Governor from the Municipality of Anchorage, the majority owner of the Eklutna Hydroelectric Project, in response to stakeholder comments to the Proposed Final Fish and Wildlife Program put forth on April 25, 2024. Pursuant to AMC 26.30.025B.2., as amended by AO 2024-28, these comments are put forth for approval by the Anchorage Assembly before the comment deadline on July 24, 2024.

Updates have been made to pp. 2-3 of the mayor's July 15 letter to the governor. The updated version, dated July 19, clarifies the Municipality's request to the governor to establish a final program that requires the owners to use two years of the three-year implementation period to identify an alternative infrastructure and engineering solution to ensure continuous water flow to all 12 miles of the Eklutna River.

THE ADMINISTRATION RECOMMENDS APPROVAL.

Prepared by:	Katie Scovic, Chief of Staff
Approved by:	Lance Wilber, Acting Municipal Manager
Concur:	Mark Corsentino, Anchorage Hydropower Director
Concur:	Eva Gardner, Municipal Attorney
Respectfully submitted:	Suzanne LaFrance, Mayor

Municipality of Anchorage
Mayor Suzanne LaFrance

July 19, 2024

The Honorable Mike Dunleavy
Governor of Alaska
Office of the Governor
P.O. Box 110001
Juneau, AK 99811

Governor Dunleavy:

I write to you on behalf of the Municipality of Anchorage (MOA), the majority owner of the Eklutna Hydroelectric Project. On April 25, 2024, Chugach Electric Association and Matanuska Electric Association, on behalf of the Eklutna Hydroelectric Project Owners, submitted to you a Proposed Final Fish and Wildlife Program.

Stakeholders subsequently provided comments on the proposed Program. This letter represents the MOA's formal response to the stakeholder comments received.

Under prior mayoral administrations, the MOA lost its right to vote on the Owners' Council and thus did not have the option to approve or disapprove the proposed Program; but my Administration is working to regain the MOA's vote, which reflects a majority ownership.[1]

The MOA has, by law, adopted an official position on Eklutna River restoration:

> It is the policy of the Municipality of Anchorage and the Anchorage Hydropower utility to restore the continuous water flow of the Eklutna River and the fish populations of the River and Eklutna Lake, to the greatest extent possible, subject to all provisions of the 1991 Fish and Wildlife Agreement.[2]

It is also a priority of my Administration to protect our local water supply and ensure a reliable energy future for Anchorage residents.

In this, the MOA is aligned with the Native Village of Eklutna (NVE). In its comments, NVE notes that it, like the MOA, "seek[s] a fair balance of energy production, drinking water protection, river conservation, public recreation, and cultural restoration."

Of note, the majority of comments submitted by stakeholders express doubt about whether the optimal "balance" between these interests would actually be achieved by the alternative advanced

---

[1] As part of the 2018 sale of Municipal Light & Power to Chugach Electric, Inc., the Regulatory Commission of Alaska (RCA) required the Municipality to temporarily surrender its vote on all matters regarding the implementation of the 1991 Fish and Wildlife Agreement until the Municipality hired a qualified manager for the Anchorage Hydropower utility. The Anchorage Assembly currently has a challenge to the legality of the RCA's order pending in Alaska Superior Court (Case No. 3AN-24-06001CI), and, additionally, the Municipality has placed Mark Corsentino in that role and filed with the RCA to regain its vote (Notice and Request for Acknowledgement of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee, submitted to the RCA on July 18, 2024).

[2] Anchorage Municipal Code 26.30.025A.

by the proposed Program.

The current Proposed Final Fish and Wildlife Program would not result in a "continuous water flow of the Eklutna River," or restoration of "fish populations...to Eklutna Lake."[3] The agencies that submitted stakeholder comments recognized that the proposed Program therefore "has limitations" [4] and "does not meet the goal of full ecosystem connectivity."[5] They expressed preferences for an alternative that would "re-water[] the river with staged implementation of meaningful mitigation measures to support restoration and resilience of salmon runs in the Eklutna River watershed,"[6] and "[return] flows to the river that provide wetland connectivity, both instream and off-channel spawning and rearing habitats, and the return of salmon runs and marine derived nutrients into the entire river, lake, and its tributaries."[7]

Alternatives that would preserve power production while also resulting in this majority-preferred "continuous water flow" were proposed. As a result of time pressures, at least one received only an "initial analysis."[8]

My Administration believes that all practical alternatives to the proposed Program should be fully developed. Some of these alternatives have already been identified. The best alternative may not yet be discovered.

It is incumbent upon us to take the time to convene the necessary stakeholders and seriously consider practical alternatives to the proposed Program—including those, as yet generally undeveloped, that could lead to better outcomes.

The 1991 Agreement gives you the authority to establish the final program, which could incorporate and include further process. The 1991 Agreement also states: "The Governor shall attempt to reconcile any differences between the parties."[9]

The Municipality respectfully requests that you consider its position and reconcile the Parties' differences by establishing a final program that requires the owners to use two years of the three-year pre-implementation period to identify an alternative infrastructure and engineering solution to ensure continuous water flow to all 12 miles of the Eklutna River. This will enable the owners to define and develop a practical alternative that will:

- Ensure continuous water flow to all 12 miles of the Eklutna River,
- Protect drinking water supply for Anchorage residents, and
- Further contribute to a reliable, affordable energy future for Southcentral Alaska.

In addition, the "limited reopeners" in the proposed final Program are unnecessary, as under the existing 1991 Agreement, the Owners can and should remain open on an ongoing basis to additional river restoration solutions as technology and conditions evolve. We propose you

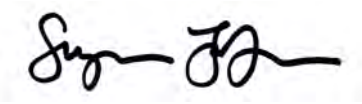
remove the limited reopeners from the final program to ensure clarity on this point.

Ultimately, the Proposed Final Program should reflect the will of Anchorage residents, who will bear significant financial, social, and environmental costs of the final restoration plan for the next several decades.

MOA welcomes the opportunity to collaborate with your administration and stakeholders to identify a productive path forward.

Respectfully,



Mayor Suzanne LaFrance

ANCHORAGE, ALASKA
AO No. 2023-131, As Amended

AN ORDINANCE OF THE ANCHORAGE ASSEMBLY AMENDING ANCHORAGE MUNICIPAL CODE TO ADD NEW SECTION 26.30.025 TO ESTABLISH AN OFFICIAL POLICY FOR THE RESTORATION OF THE EKLUTNA RIVER, SUBJECT TO THE 1991 FISH AND WILDLIFE AGREEMENT WITH THE EKLUTNA POWER PURCHASERS, STATE OF ALASKA AND THE FEDERAL GOVERNMENT.

WHEREAS, the Native Village of Eklutna is the oldest and largest Dena'ina settlement in the Municipality of Anchorage; and

WHEREAS, the Native Village of Eklutna is a federally recognized Tribe with all of the attached responsibilities, powers, and obligations of a sovereign, also being recognized by the State of Alaska and the Municipality of Anchorage, and having a government to government relationship with both the federal government and the government of the Municipality of Anchorage; and

WHEREAS, the Eklutna River historically was a major subsistence and cultural resource for the Native Village of Eklutna; and

WHEREAS, the Eklutna River watershed has been in a badly degraded condition since 1929 due to hydropower dams and water diversions; and

WHEREAS, a principal impact from hydropower development in the Eklutna watershed is the loss of the Eklutna River's salmon runs; and

WHEREAS, the Eklutna River is still capable of supporting five species of salmon, including Cook Inlet king salmon and sockeye salmon, though in greatly diminished numbers from historical levels; and

WHEREAS, Eklutna Incorporated, the village corporation for Eklutna, is the largest landowner in the Municipality of Anchorage and owns most of the land along the Eklutna River and around Eklutna Lake; and

WHEREAS, the Native Village of Eklutna and Eklutna Inc. have made substantial contributions to the development of the Municipality of Anchorage providing land for school sites, highways, railroads, powerlines and rights-of-way; and

WHEREAS, The Native Village of Eklutna, Eklutna Inc., and The Conservation Fund collaborated on a $7.5 million project to dismantle the Lower Eklutna River dam; and

WHEREAS, little to no water flows out of Eklutna Lake into the Eklutna River because of water diversions for the Eklutna Hydroelectric Project; and

WHEREAS, restored instream flow is necessary to flush the accumulated sediments downstream and allow for the recovery of salmon habitat; and

WHEREAS, stabilized lake levels and fish passage for migrating salmon to and from Eklutna Lake would restore important spawning and rearing habitat for salmon; and

WHEREAS, the Municipality of Anchorage retains **an ownership interest (53%) [~~a majority interest (52%)~~]** in the Eklutna Hydroelectric Project **with Chugach Electric Association (CEA) and Matanuska Electric Association (MEA)**; and

WHEREAS, pursuant to RCA Order U-18-102 (44), the Municipality of Anchorage was required to and surrendered its voting rights on operation and management decisions on the Eklutna Operating Committee regarding the Eklutna Project and the 1991 Fish and Wildlife Agreement; and

WHEREAS, the Municipality of Anchorage, [**~~Chugach Electric Association (~~**]CEA**~~)~~]**, and **~~[Matanuska Electric Association (~~**]MEA**~~)~~]**, are parties to the 1991 Agreement with the State of Alaska and federal agencies to study the impacts of the Eklutna Hydroelectric Project to fish and wildlife, examine and develop proposals for the protection, mitigation, and enhancement of fish and wildlife affected by such hydroelectric development (the "1991 Agreement"), and prepare a Fish and Wildlife Program for the Governor; and

WHEREAS, the RCA ordered that the voting right of the Municipality of Anchorage can be cured if an appropriate person is hired to run the Eklutna Hydropower and the RCA signs off on hire as adequate; and

WHEREAS, the restoration of instream flow to the Eklutna River and restored fish passage to and from Eklutna Lake are the most desirable forms of mitigation for impacts caused by the Eklutna Hydroelectric Project; and

WHEREAS, the Anchorage Assembly supported restoration of the Eklutna River with the passage of AR 2017-324(S) titled "A Resolution in Support of Efforts to Restore the Eklutna River"; and

WHEREAS, the Watershed and Natural Resources Advisory Commission of the Municipality of Anchorage supported restoration of the Eklutna River with the passage of Resolution WNRC 2019-03 titled "A Resolution Regarding Restoration of the Eklutna River"; and

WHEREAS, the Alaska Federation of Natives (AFN) supported restoration of the Eklutna River with passage of Resolution 20-17 "to restore traditional rivers and streams for fish and wildlife habitat…in particular, the efforts of tribes like the Native Village of Eklutna"; and

WHEREAS, the Traditional Tribal Council of the Native Village of Eklutna supported restoration of Eklutna River and Eklutna Lake with the passage of Resolution 2022-04 for "1) continuous flow in the river below the lake sufficient to support thriving salmon populations, with intermittent higher, habitat maintenance and re-creation flows, 2) salmon passage between Eklutna River and Lake, and 3) moderation of

Eklutna Lake level variability, at levels sufficient to facilitate sockeye spawning"; now, therefore,

THE ANCHORAGE ASSEMBLY ORDAINS:

Section 1. Anchorage Municipal Code is amended to insert a new section 26.30.025 to read as follows (*requiring no legislative drafting*):

26.30.025 Eklutna River Restoration

A. It is the policy of the Municipality of Anchorage and the Anchorage Hydropower utility to restore the continuous water flow of the Eklutna River and the fish populations of the River and Eklutna Lake, to the greatest extent possible, subject to all provisions of the 1991 Fish & Wildlife Agreement.

B. Under the 1991 Agreement with the State of Alaska, federal agencies, and utility partners, the Municipality of Anchorage, through its Anchorage Hydropower utility and ownership share in the Eklutna Hydroelectric Project, bears responsibility to study and develop proposals for the protection, mitigation, and enhancement of fish and wildlife affected by the hydroelectric development.

1. The Anchorage Hydropower utility shall provide a report to each joint session of the Anchorage Assembly and the Native Village of Eklutna under section 2.30.135B. regarding the restoration of the Eklutna River and Lake and the municipality's performance of its obligations under the 1991 Agreement and the Final Fish and Wildlife Program.

2. The Proposed Final Fish and Wildlife Program to protect, mitigate, and enhance fish and wildlife resources in the Eklutna River shall be submitted to the Assembly with a proposed resolution in support for action, prior to its submission to the Governor of Alaska.

Section 2. This ordinance shall be effective immediately upon passage and approval by the Assembly.

PASSED AND APPROVED by the Anchorage Assembly this 19th day of December, 2023.

Christopher Constant
Chair

ATTEST:

Municipal Clerk

MUNICIPALITY OF ANCHORAGE

ASSEMBLY MEMORANDUM

No. AM 953-2023

Meeting Date: December 5, 2023

From: **Assembly Vice Chair Zaletel**

Subject: **AN ORDINANCE OF THE ANCHORAGE ASSEMBLY AMENDING ANCHORAGE MUNICIPAL CODE TO ADD NEW SECTION 26.30.025 TO ESTABLISH AN OFFICIAL POLICY FOR THE RESTORATION OF THE EKLUTNA RIVER, SUBJECT TO THE 1991 FISH AND WILDLIFE AGREEMENT WITH THE EKLUTNA POWER PURCHASERS, STATE OF ALASKA AND THE FEDERAL GOVERNMENT.**

The proposed ordinance creates a new section in the Anchorage Municipal Code governing the Eklutna Hydroelectric Project, specific to the alteration of the dam at Eklutna Lake and restoration of continuous water flow in Eklutna River. The intent of this ordinance is to involve the Native Village of Eklutna to the greatest extent possible in the reclamation of the Eklutna River and Lake and acknowledge the legitimate interests and voice of a people who were excluded under the 1991 Agreement. The Agreement has been attached to this AM as Exhibit A for the members' reference. Detailed information on the development of the Fish and Wildlife Program under the Agreement can be viewed at https://eklutnahydro.com/ .

The proposed new Code section would accomplish three things:

First, the ordinance would clearly establish the policy of the Municipality and the Anchorage Hydropower utility as one of the owners of the Eklutna Hydroelectric Project under the 1991 Agreement.

Second, the proposed language requires the regular reporting of the status of the reclamation project to both the Assembly and the Native Village of Eklutna.

Third, the code would require the Final Plan to be submitted to Assembly for review and potential action by a resolution of support or proposed revisions, prior to submitting to the Governor of Alaska, under the terms of Paragraph 5 of the 1991 Agreement.

There are no anticipated economic effects from adding the section to Code, so a SEE is not provided.

I request your support for the ordinance.

AGREEMENT BETWEEN
THE MUNICIPALITY OF ANCHORAGE,
DBA ANCHORAGE MUNICIPAL LIGHT AND POWER,
CHUGACH ELECTRIC ASSOCIATION, INC.,
MATANUSKA ELECTRIC ASSOCIATION, INC.,
U.S. FISH AND WILDLIFE SERVICE,
NATIONAL MARINE FISHERIES SERVICE,
ALASKA ENERGY AUTHORITY,
AND THE
STATE OF ALASKA,
RELATIVE TO THE EKLUTNA AND SNETTISHAM
HYDROELECTRIC PROJECTS

This Agreement is entered into on August 7, 1991, between The Municipality of Anchorage, dba, Anchorage Municipal Light and Power, Chugach Electric Association, Inc., and Matanuska Electric Association, Inc. (hereinafter collectively "Eklutna Purchasers"), the United States Fish and Wildlife Service (hereinafter "USFWS"), the National Marine Fisheries Service (hereinafter "NMFS"), the Alaska Energy Authority (hereinafter "AEA") and the State of Alaska (hereinafter "the State"), regarding protection, mitigation of damages to, and enhancement of fish and wildlife (including related spawning grounds and habitat) affected by hydroelectric development of the Eklutna and Snettisham Projects. With respect to the implementation provisions called for in this Agreement, the Eklutna Purchasers will be responsible for the consultation, study and implementation provisions applicable to the Eklutna Project and AEA shall be responsible for the consultation, study and implementation provisions applicable to the Snettisham Project.

WITNESSETH THAT:

WHEREAS, subject to the approval of Congress, the Eklutna and Snettisham Projects will be transferred from the Federal Alaska Power Administration to the Eklutna Purchasers and AEA (collectively, "the Purchasers") without the necessity of their having to obtain a Federal Energy Regulatory Commission (FERC) License for project operation; and

WHEREAS, the Eklutna and Snettisham hydroelectric developments may have resulted in a yet to be quantified impact to fish and wildlife resources; and

WHEREAS, concerns have been expressed that without FERC licensing, there is no opportunity to determine the extent of that fish and wildlife impact, develop measures to protect, mitigate

damages to, and enhance fish and wildlife (including related spawning grounds and habitat), and implement fish and wildlife measures found to be in the public interest.

NOW THEREFORE, the parties agree as follows:

1. **FERC Licensing.**

NMFS, USFWS and the State agree that the following mechanism to develop and implement measures to protect, mitigate damages to, and enhance fish and wildlife (including related spawning grounds and habitat) obviate the need for the Eklutna Purchasers and AEA to obtain FERC licenses.

2. **Study Plan.**

The Purchasers agree to fund studies to examine, and quantify if possible, the impacts to fish and wildlife from the Eklutna and Snettisham Projects. The studies will also examine and develop proposals for the protection, mitigation, and enhancement of fish and wildlife affected by such hydroelectric development. This examination shall consider the impact of fish and wildlife measures on electric rate payers, municipal water utilities, recreational users and adjacent land use, as well as available means to mitigate these impacts.

3. **Carrying Out The Study Plan.**

Study Plans shall be developed by the Purchasers in consultation with the USFWS, NMFS, the Alaska Department of Fish and Game, the Alaska Department of Environmental Conservation and the Alaska Department of Natural Resources (the "State Resource Management Agencies"), or their successors to aid in the formulation of the Program called for in this Agreement. Prior to implementation, the parties to this Agreement shall review the plans and concur with their scope of work.

The Purchasers shall conduct the studies and prepare the evaluations called for in the plans, seeking input from the USFWS, NMFS, the State Resource Management Agencies and other interested parties as the studies progress. The USFWS, NMFS, and State Resource Management Agencies shall have an opportunity to comment on draft study reports, and their comments and a response to their comments shall be included in the final study reports. All study plans, data, reports and comments will be made available to the parties and, upon request, to the public.

4. Review of Findings.

After final study reports are prepared, the Purchasers shall prepare a draft Summary of Study Results and prepare a draft Fish and Wildlife Program. The draft Fish and Wildlife Program shall consist of the measures recommended by the Purchasers for the protection, mitigation of damages to, and enhancement of fish and wildlife (including related spawning grounds and habitat) and set a tentative schedule for their implementation. The Purchasers shall provide copies of the draft Summary and draft Fish and Wildlife Program to the USFWS, NMFS, and State Resource Management Agencies for comments or recommendations. If USFWS, NMFS, or the State Resource Management Agencies' comments or recommendations differ from those of the Purchasers, the Purchasers will attempt to resolve such differences giving due weight to the recommendations, expertise, and statutory responsibilities of USFWS, NMFS, and the State Resource Management Agencies.

Once comments and recommendations have been received, the Purchasers shall hold at least one public meeting each in Anchorage and the Matanuska Valley (with respect to the Eklutna Project) and in Juneau (with respect to the Snettisham Project) to receive public comment on the draft Summary, the draft Fish and Wildlife Program, and the comments and recommendations of the USFWS, NMFS, and the State Resource Management Agencies. At least thirty days prior to the proposed public meetings, copies of the draft Fish and Wildlife Program, reports and recommendations will be distributed to representative public libraries in the Anchorage and Matanuska Valley areas (in the case of the Eklutna Project) and in the Juneau area (in the case of the Snettisham Project). Public notice will also be posted in at least two newspapers serving the Anchorage and Matanuska Valley areas (for Eklutna) and the Juneau area (for Snettisham). The public notice shall specify meeting places, times and dates; where studies, reports and recommendations may be obtained for review; and where written comments may be sent. The Purchasers will provide copies of the draft Summary, draft Fish and Wildlife Program, and the comments and recommendations of the USFWS, NMFS, and State to interested members of the public at no charge.

5. Public Interest Determination.

The Purchasers shall compile all comments and testimony received; prepare a summary and analysis of them; develop a Proposed Final Fish and Wildlife Program to protect, mitigate, and enhance fish and wildlife resources; and prepare an explanatory statement describing the basis for its Proposed Final Fish and Wildlife Program. All comments, testimony, summary, and analysis materials and the Proposed Final Fish and Wildlife Program shall be provided to the parties to this Agreement and to the Governor

of Alaska. The parties shall have 60 days to submit written comments on the proposed Fish and Wildlife Program, and any alternative recommendations for the protection, mitigation, and enhancement of fish and wildlife resources, to the Governor. The Purchasers shall have 30 days to submit written reply comments to the Governor.

The Governor shall review the Proposed Final Fish and Wildlife Program, the comments, testimony, summary and analysis materials, and any alternative recommendations for the protection, mitigation, and enhancement of fish and wildlife resources. The Governor shall attempt to reconcile any differences between the parties, giving due weight to the recommendations, expertise, and statutory responsibilities of USFWS, NMFS, the State Resource Management Agencies and the Purchasers. In order to ensure that Eklutna and Snettisham are best adapted for power generation and other beneficial public uses, the Governor shall give equal consideration to the purposes of efficient and economical power production, energy conservation, the protection, mitigation of damage to, and enhancement of fish and wildlife (including related spawning grounds and habitat), the protection of recreation opportunities, municipal water supplies, the preservation of other aspects of environmental quality, other beneficial public uses, and requirements of State law. Based on his/her review and consideration, the Governor shall establish a final Fish and Wildlife Program that adequately and equitably protects, mitigates damage to, and enhances fish and wildlife resources (including affected spawning grounds and habitat) affected by the Eklutna Project and the Snettisham Project.

6. Implementation.

The Purchasers shall implement the Fish and Wildlife Program established by the Governor, subject to their right to judicial review as provided in Section 9 hereof. However, the Purchasers will implement all provisions of the Program that do not require major capital expenditures pending judicial review, unless otherwise agreed among the Parties or unless a stay is granted by the Court.

7. Schedule.

The consultation process leading to the Programs shall be initiated no later than 25 years after the Transaction Date specified in the respective Eklutna and Snettisham Agreements. The Study Plans shall include a schedule for the consultation, comment, and decision making, called for in this Agreement, which shall be adopted by the parties in consultation with the Governor. The schedule shall call for implementation of all provisions of the Fish and Wildlife Program by the Eklutna Purchasers to begin no

later than 30 years after the Transaction Date, and to be completed no later than 35 years after the Transaction Date. The schedule shall call for implementation of all provisions of the Fish and Wildlife Program by AEA (Snettisham) to begin no later than 35 years after the Transaction Date, and to be completed no later than 40 years after the Transaction Date. The schedules shall call for the issuance of the Fish and Wildlife Program by the Governor at least three years prior to the commencement of the period for implementation.

The Purchasers shall repeat the process called for in Sections 2 through 6 of this Agreement on a recurring basis every 35 years, beginning within 25 years of the time implementation of the Fish and Wildlife Program has been completed for the prior consultation process. In addition, prior to undertaking any major structural or operational modification substantially affecting water usage or fish and wildlife at the projects, the Purchasers shall follow the process called for in Sections 2 through 6 of this Agreement. Compliance with the terms of the Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska, entered into between the Alaska Power Administration and the Municipality of Anchorage on February 17, 1984, as amended by a Supplemental Agreement dated August 2, 1988, shall not be construed to be a major structural or operational modification. However, the Eklutna Purchasers will discuss major structural or operational changes from current operations with NMFS and USFWS and will consider any recommendations they have for fisheries mitigation related to such changes.

8. **Dam Construction, Modification, Removal or Abandonment.**

The Purchasers agree to comply with 11 AAC 93.151-.201 with respect to safety inspections, new construction or modifications to existing structures, removal and/or abandonment of all or part of the project.

9. **Enforcement of Fish and Wildlife Program and Agreement.**

The provisions of this Agreement, including the decisions of the Governor and the provisions of the Fish and Wildlife Program, shall be reviewable and enforceable in the United States District Court for the District of Alaska and the Court may order specific performance thereof.

At least thirty days prior to seeking review or enforcement in the United States District Court for the District of Alaska, a party shall send written notice of its concerns to all parties and hold a meeting to attempt informal resolution of its concerns. During the period of informal resolution, any statute of limitations shall toll.

10. Authority of Parties.

Each party to this Agreement warrants that it has the legal authority to sign this Agreement and be fully bound by its terms, subject to any administrative or regulatory approval, if required. This Agreement shall be binding upon and inure to the benefit of the parties and their successors and assigns.

11. Term of Agreement.

This Agreement shall be effective, as to each project, upon the Transaction Date specified in the respective Purchase Agreement and shall remain in full force and effect so long as that project remains in operation. The Agreement shall terminate, as to either project, if that Project becomes subject to the provisions of the Federal Power Act.

12. Severability.

If any section, paragraph, clause or provision of this Agreement or any agreement referred to in this Agreement shall be finally adjudicated by a court of competent jurisdiction or administrative agency to be invalid or unenforceable as to either project, the Agreement shall nonetheless remain in full force and effect as to the other project.

13. Cooperation With Studies.

The Parties agree that they will cooperate with one another in conducting studies pertaining to fish and wildlife other than those called for in this Agreement by:

a. Notifying and consulting with the other parties before beginning a new fish and wildlife study,

b. Providing each other with data on flows, fish populations, and other data already in their possession,

c. Having the option of funding fish and wildlife studies before the process called for in Sections 2 and 3 of this Agreement would otherwise require, whether such studies are conducted by the parties themselves, or by third parties.

IN WITNESS WHEREOF, the parties hereto have executed this agreement as of the day and year first above written.

ANCHORAGE, ALASKA
AO No. 2024-28, As Amended

AN ORDINANCE OF THE ANCHORAGE ASSEMBLY AMENDING ANCHORAGE MUNICIPAL CODE SECTIONS 3.20.070, 25.20.020, 25.30.020, 26.30.025, AND INSERTING A NEW SECTION 26.40.090 TO REQUIRE ASSEMBLY APPROVAL OF ACTIONS TO ACQUIRE OR DISPOSE OF PROPERTY RIGHTS TO WATER, MINERAL, WIND OR SOLAR RESOURCES, AND OF THE FISH AND WILDLIFE PROGRAM FOR THE EKLUTNA HYDROPOWER PROJECT AND RESTORATION OF CONTINUOUS WATER FLOWS TO THE EKLUNTA RIVER.

THE ANCHORAGE ASSEMBLY ORDAINS:

Section 1. Anchorage Municipal Code section 3.20.070 is hereby amended to read as follows (*the remainder of the section is not affected and therefore not set out)*:

3.20.070 Executive branch organization.

*** *** ***

C. Office of the municipal manager. Within the office of the municipal manager and reporting to the municipal manager or designee are: the office of equal opportunity, the office of emergency management; risk management; health and safety; transportation inspection; culture, entertainment, and arts venues (including the Egan Center, the Dena'ina Civic and Convention Center, the Anchorage Museum at Rasmuson Center, the Anchorage Golf Course, the Sullivan Sports Arena, the Alaska Center for the Performing Arts, and the Boeke and Dempsey Ice Arenas); and the following departments:

*** *** ***

3. Anchorage Water and Wastewater Utility. The Water and Wastewater Utility is responsible for providing water and sanitary sewage services. The utility is also responsible for billing and collecting special assessments.

a. The municipal manager shall have operational oversight of the utility; and

b. The mayor shall be responsible for **operational** policy decisions of the utility, subject to the limitations of subsection c.

c. Pursuant to section 26.30.025, the assembly shall be responsible for all **other** policy decisions **, including those** related to the municipality's performance under the 1991 Fish and Wildlife agreement regarding the Eklutna hydroelectric project.

*** *** ***

6. Anchorage Hydropower Utility. The Anchorage Hydropower Utility is responsible for supplying wholesale electric service to utilities in southcentral Alaska.

   a. The municipal manager shall have operational oversight of the utility; and

   b. The mayor shall be responsible for **operational** policy decisions of the utility, subject to the limitations of subsection c.

   c. Pursuant to section 26.30.025, the assembly shall be responsible for all **other** policy decisions **, including those** related to the municipality's performance under the 1991 Fish and Wildlife agreement regarding the Eklutna hydroelectric project.

(AO No. 79-170; AO No. 84-61(S))

Section 3. Anchorage Municipal Code section 25.30.020 is hereby amended to read as follows *(the remainder of the section is not affected and therefore not set out)*:

25.30.020 Disposal by ordinance.

A. Except as required or provided otherwise by law, the municipality may dispose of municipal land or any interest therein only by ordinance.

B. For purposes of this section, an interest in municipal land means any estate in real property or improvements thereon, including an interest in mineral, wind, solar, or water rights, but excluding the following if found by the assembly to be without substantial value to the municipality:

1. Revocable permits;

2. Revocable Licenses;

3. Rights-of-way; or

4. Easements.

*** *** ***

(AO No. 79-170; AO No. 80-48(S); AO No. 2007-102, § 1, 8-14-07; AO No. 2015-47, § 2, 5-14-15 , AO No. 2023-107, § 1, 10-10-2023)

Section 4. Anchorage Municipal Code section 26.30.025 is hereby amended to read as follows:

26.30.025 Eklutna River Restoration

A. It is the policy of the Municipality of Anchorage and the Anchorage Hydropower utility to restore the continuous water flow of the Eklutna River and the fish populations of the River and Eklutna Lake, to the greatest extent possible, subject to all provisions of the 1991 Fish & Wildlife Agreement.

B. Under the 1991 Agreement with the State of Alaska, federal agencies, and utility partners, the Municipality of Anchorage, through its Anchorage Hydropower utility and ownership share in the Eklutna Hydroelectric Project, bears responsibility to study and develop proposals for the protection, mitigation, and enhancement of fish and

wildlife affected by the hydroelectric development.

1. The Anchorage Hydropower utility shall provide a report to each joint session of the Anchorage Assembly and the Native Village of Eklutna under section 2.30.135B. regarding the restoration of the Eklutna River and Lake and the municipality's performance of its obligations under the 1991 Agreement and the Final Fish and Wildlife Program.

2. The Proposed Final Fish and Wildlife Program to protect, mitigate, and enhance fish and wildlife resources in the Eklutna River shall be subject to assembly approval [SUBMITTED TO THE ASSEMBLY WITH A PROPOSED RESOLUTION IN SUPPORT FOR ACTION], prior to its submission to the Governor of Alaska.

(AO No. 2023-131 § 1, 12-5-23)

Section 5. Anchorage Municipal Code is amended to insert a new section 26.40.090 to read as follows (requiring no legislative drafting):

26.40.090 Water rights.

The utility may enter agreements for water and water rights for use by or within the municipality, subject to approval by the assembly.

Section 6. This ordinance shall be effective immediately upon passage and approval by the Assembly.

PASSED AND APPROVED by the Anchorage Assembly this 27th day of March, 2024.

ATTEST:

Municipal Clerk

MUNICIPALITY OF ANCHORAGE
ASSEMBLY MEMORANDUM

No. AM 280-2024

Meeting Date: March 27, 2024

From: **Assembly Chair Constant**

Subject: **AO 2024-28 – AN ORDINANCE OF THE ANCHORAGE ASSEMBLY AMENDING ANCHORAGE MUNICIPAL CODE SECTIONS 3.20.070, 25.20.020, 25.30.020, 26.30.025, AND INSERTING A NEW SECTION 26.40.090 TO REQUIRE ASSEMBLY APPROVAL OF ACTIONS TO ACQUIRE OR DISPOSE OF PROPERTY RIGHTS TO WATER, MINERAL, WIND OR SOLAR RESOURCES, AND OF THE FISH AND WILDLIFE PROGRAM FOR THE EKLUTNA HYDROPOWER PROJECT AND RESTORATION OF CONTINUOUS WATER FLOWS TO THE EKLUNTA RIVER.**

The proposed Ordinance is submitted in response to the apparent effort by the Eklutna Owners group to incur financial obligations and dispose of Municipal resources and assets without the approval of or any formal consultation with the Assembly. That is in derogation to the Assembly's legislative powers; it has sole authority to obligate Municipal revenues through its appropriations power, and dispositions of Municipal property, which is apparent in the proposed Draft Fish and Wildlife Plan under the 1991 Agreement, requires Assembly approval. The proposed Ordinance clarifies incurring and obligating the Municipality in these circumstances where the proposed Final Fish and Wildlife Plan will become effective upon approval by the Governor, requires Assembly prior approval.

Section 1. The Proposed AO corrects an oversight in the language of AMC 3.20.070 which had apparently delegated broad policy-making decisions for utilities to the Mayor. This language is an improper delegation of the Assembly's authority as the legislative policy-making branch of the municipal government and directly conflicts with the language of AMC section 26.30.025 as codified in AO 2023-131. The changes proposed in this section will clarify that except for operational policies, the policy making authorities, such as budgetary, financial, construction, and other policy considerations reside with the Assembly and thereby resolves the conflict in the Code.

Sections 2 & 3. These proposed changes clarify the Assembly's approval authority over any agreements acquiring or disposing of any interest in real property, including water rights. Specifically, these changes are meant to address a perceived gap in the Code where creative legal instruments have previously been used to grant private parties exclusive use of Municipal property. These proposed amendments make plain that the Assembly's approval must be obtained for the Municipality to grant, dispose, or alter any parties' right to acquire, dispose of, control or access public property, including wind, solar, mineral and water rights.

Section 4. This proposed change inserts a new requirement for the Assembly to approve the final Fish and Wildlife program proposed under the 1991 Eklutna Dam agreement, prior to submission the Governor. This change has proven necessary, as the Eklutna Owners have made clear their intention to alter the Municipality's access to drinking water and obligate the Municipality to fund the final program inside the tax cap. These decisions have been made ignoring meaningful input from and policy guidance passed and approved by the Assembly over the past seven years and often in direct conflict to the guidance provided time and time again.

Section 5. Finally, Section 5 inserts a new section of code that requires AWWU submit any agreement for water rights to the Assembly for approval.

I request your support for the ordinance.

Prepared by: Assembly Counsel's Office

Respectfully submitted: Christopher Constant, Assembly Chair
District 1- Northern Anchorage

MUNICIPALITY OF ANCHORAGE
MAYOR DAVE BRONSON

OFFICE OF THE MAYOR

RECEIVED
OFFICE OF
APR 03 2024
MUNICIPAL CLERK

Date: April 3, 2024

To: Anchorage Assembly

From: Mayor Dave Bronson

Subject: Veto of Ordinance No. AO 2024-28 (As Amended)

Today, in accordance with Section 2.30.100 of the Anchorage Municipal Code (AMC) and Section 5.02 of the Municipal Charter, I am issuing a veto for AO 2024-28 (As Amended), which was approved during the Assembly's special meeting of March 27, 2024.

History is instructive here. Seven years ago, the Assembly passed a resolution supporting the restoration of the hydrology and fisheries of the Eklutna River "subject to all provisions of the Fish and Wildlife agreement of August 7, 1991." (AR 2017-324(S)). While the Assembly at that time appropriately urged support from the utilities to restore hydrology and fisheries of the Eklutna River, the Assembly never presumed the power to second guess the operational decisions of the utilities themselves. (Anchorage Assembly, Regular Meeting of October 24, 2017 (51:30 - 58:38)).

Under Charter Section 16.01, municipal utilities are required to be operated as utilities, not as political tools. Municipal utilities combine subject-matter expertise and decision-making that is in the best interest of the Municipality and its citizens. In the past six months, however, the Assembly has shifted its stance to one of imposing operational control over the proposed Eklutna Fish and Wildlife Program to achieve a political purpose. This shift has resulted in legislation that pits politicians against subject matter experts, both inside and outside of the of the Municipality (AR 2024-75 (as amended)). This imposition by the Assembly has created tension between the utilities, affected departments, and executive staff charged with making operational decisions in the best interests of the Municipality. The ordinance I am vetoing today, AO 2024-28 (as amended), removes the policymaking power of the mayor as it was historically established in code for utilities – AWWU and the Anchorage Hydropower Utility.

There is no need to change Title 3 of the Anchorage Municipal Code to shift policymaking from one government branch to the other. As was stated at the March 27, 2024 meeting (32:05 – 32:30), and has been repeated numerous times before, serious concerns arise when powers are shifted between branches. Previous mayors signed documents on behalf of the Municipality relating to Eklutna Lake. Those actions were valid and binding upon the Municipality as a whole. The Municipality of Anchorage Charter grants executive and administrative power to the mayor. Assembly action that purports to strip executive and

administrative power from the mayor or municipal manager and grant that same power to itself raises the question of a charter violation.

The executive branch has held the power to make policy and execute agreements when the original agreements were signed in 1984 and 1991 and continues to hold this power today. Should the Assembly wish to disapprove executive branch actions, there are ways to accomplish its goals without dismantling the structure of our home rule municipal government as defined by the Anchorage Municipal Charter.

For the above reasons, I hereby veto AO 2024-28 (As Amended).

MUNICIPALITY OF ANCHORAGE

ASSEMBLY MEMORANDUM

No. AM 350-2024

Meeting Date: A p r i l 9 , 2024

From: **Assembly Chair Constant and Vice Chair Zaletel**

Subject: **Response to Mayoral vetoes of AR 2024-103 and AO 2024-28, As Amended.**

We request the Assembly override the Mayoral vetoes of AR 2024-103, dated April 2, 2024 and AO 2024-28, As Amended, dated April 3, 2024. Both vetoes are either woefully uniformed, or deliberately misleading. For the sake of clarity this memo addresses each veto in turn:

AR 2024-103

In the veto message of AR 2024-103, Mayor Dave Bronson states that "[b]ecause the Assembly is part of the Municipality of Anchorage, we have no objection to Assembly members making their own copies of the confidential term sheet and of the confidential Common Interest Agreement."[1] This statement is remarkable, not only for its sound logic, but particularly because it is the first time **any** member of the Administration has expressed this view to members of the Assembly, and it came in the form of a Mayoral veto.

On January 23, 2024, the Assembly learned of the existence of a "binding term sheet" between the Eklutna Owners and AWWU. It is notable that neither the Administration, nor the Department of Law saw fit to inform the Assembly of the existence of this document, but rather the Assembly Leadership was forced to send the Municipal Attorney a request asking to inspect it. The following day, the Municipal Attorney confirmed the existence of a document titled as a binding term sheet, but refused to allow us to see it, asserting that its terms and conditions were "confidential." This assertion of confidentiality notably lacked reference or citation to any legal authority, merely that, whatever its basis for a claim of confidentiality, the Municipal Attorney did not consider the Assembly to have the appropriate standing to see this document upon request.

Further, when Assembly Leadership agreed to take up this agreement in executive session on February 2, 2024, the Administration only provided a copy of the binding term sheet after receiving the consent of the other Eklutna Owners. When the Assembly requested to see correspondence between the Municipal Attorney and the Eklutna Owners, this was also refused as being "confidential." And finally, on April 4th when the Chair recently attempted to review the term sheet with the Assembly's attorneys, as the Mayor's veto clearly stated he would be able to, he was denied the opportunity to either retain a copy or even review and discuss it

[1] Veto of AR 2024-103.

without a municipal attorney present until the Eklutna Owners approved the language of a confidentiality agreement she intended to have both the Chair and the Attorneys sign. In this extraordinary change in Municipal policy, the Municipal Attorney didn't bother to apprise the Assembly Chair of her unilateral decision to restrict his ability to confer with counsel. Until the language of the confidentiality agreement was approved, the Chair and the Assembly's attorneys would only be allowed to view the document with a member of the Department of Law physically present in the room.

Despite the repeated affirmations of the Municipal Attorney that their office works for the Municipality of Anchorage and that its job is to advise both branches of the Municipal Government, the Assembly has been consistently treated as a third party, if not a party opponent, to the Eklutna Owners, and has been denied meaningful access to these documents.

AO 2024-28, As Amended.

The Mayor's veto quite condescendingly states that "[h]istory is instructive here"[2]. Ironically, we cannot agree more.

As the legislative branch of the Municipal Government, it is inherently the Assembly's role to articulate and codify the policy of the Municipal Government.[3]

The Administration's assertion that "[t]he executive branch held the power to make policy and executive agreements when the original agreements were signed in 1984 and 1991"[4] strikes us as statement that could be best described as grossly inaccurate.

The Mayor describes previous mayors as having "signed documents on behalf of the Municipality relating to Eklutna Lake. Those actions were valid and binding upon the Municipality as a whole."[5] However, the historical record of the Eklutna Project reflects substantial involvement by the Assembly and the public in those agreements.

In 1987, Mayor Tony Knowles presented the prospect of purchasing the Eklutna Hydropower Project and requested both public hearings and the Assembly's endorsement to even begin the negotiations for its purchase.[6] In 1989, Mayor Tom Fink presented the purchase agreement to the Assembly and requested authority from them to sign on behalf of the Municipality,[7] and again in 1991, requesting the Assembly's approval of the final amendment to the agreement.[8] The actions of these previous mayors were "valid and binding" not because there were the inherent prerogative of the executive, but rather, because they were done openly, with the

advice, consultation, and **consent** of the Assembly.

History is instructive indeed.

By way of comparison, should we examine the actions of this administration? Not just with regard to Eklutna Lake, but his management of public utilities and public finances as a whole?

It is this Mayor who disregarded the requirements of code and unilaterally discontinued the fluoridation of the Municipality's water supply in violation of AMC 26.40.050.[9]

It is this Mayor who ignored the Assembly's authority to over contracts under AMC and illegally executed a multi-million dollar contract on a tent purportedly intended to shelter human beings but lacking any approved and verifiable engineering data pertaining to its capacity to hold snow load or withstand wind as required by Title 23 of the Municipal Code.[10]

It is this Mayor who ignored the State Legislative Program, duly enacted by the Assembly under AMC 2.10.075 and its published advocacy pamphlet, and instead printed a separate program and advocated his own personal policies to the State Legislature, undermining his own government, betraying the people of Anchorage, and violating subsection 2.10.075B.[11]

This Mayor clandestinely negotiated and is presently attempting to bind the Municipality to a series of agreements implicating tens of millions of taxpayers' and ratepayers' funds and access to drinking water for decades in direct contradiction of policies duly established and codified by the Assembly. Moreover, the Mayor's actions were done without clearly informing the public of the substance and effect of the unauthorized agreements he is attempting to make.

Nevertheless, with this historical context, this Mayor still has the temerity to assert that it is the action of the Assembly which "raises the question of a charter violation."[12]

History is instructive here, but not nearly so instructive as the law. We strongly encourage the Administration to apprise itself of both before implying that we have strayed from our sworn duties under the Charter. That the code had previously

[12] Veto supra note 2, pg.2

delegated certain policy-making powers to the executive branch, does not, should not, and cannot be presumed to create an insurmountable impediment to returning such power to the policy-making branch: the legislative. This is particularly important now, when that power has been so grossly abused by an Administration so seemingly incapable of performing the most basic of functions of government without violating the law.

Regardless of the characterizations implied by the Mayor's vetoes, the actions of this body do not constitute an expansion of the Assembly's power or an impermissible intrusion into the authority of the executive. Rather, these are the measured and reasonable actions of a body attempting to secure information to which it is already entitled, to exercise legislative powers it has not had to exercise in the past, and to implement policies inherently within its authority.

We request your support for overriding the veto of both the ordinance and resolution.

RCA Modeling and Analysis

Background

As explained in the body of this order, to assess North and South District ratepayer savings from the acquisition we need to properly calculate and allocate the expected benefits. These benefits, such as they are, matter to rates in their totality; attention to base rates alone is insufficient.

We rely heavily upon the Strunk Model. For the vast majority of data inputs and calculations we simply adopt the Witness Strunk's data projections work. However, a number of structural modifications needed to be made. This Appendix details those modifications. We detail and explain the structural modifications to the Strunk Model that were made, consistent with our reasoned analysis of the record and our findings.

Our acquisition adjustment analysis requires an assessment of comparative ratepayer benefits both with and without the transaction. A comparison of savings requires – were the transaction to not close – a reasonable determination of the total costs that ML&P ratepayers and that Chugach ratepayers might expect to pay in rates. Such costs can then be compared with the total utility costs that, respectively, the post-acquisition rates North and South District ratepayers would each pay.

We make various additions and modifications to Witness Strunk's approach. We modify the timing of various events in the Strunk Model. To reflect the date of this order, and the subsequent period before closing can occur, we shift initiation of modeled combined COPA revenue requirements to the beginning of 2021 (rather than 2020). The initiation of PILT payments, BRU North District ratepayer rebates, and regulatory assets were similarly shifted, consistent with our findings in the order. Finally, we shift the start of modeled combined base rates to the beginning of 2024, consistent with our finding that Chugach must file a general rate case no later than 12/31/2023.

The analysis requires calculation of several revenue requirement model modules and sub-modules. For the reader's reference and orientation we outline the Strunk Model modules that were subject to modification, as well as module additions:

A) Total ML&P revenue requirement to be paid on a stand-alone basis
    a. Base rate revenue requirement
        i. MUSA payments
        ii. Weighted Average Cost of Capital (WACC)
    b. COPA revenue requirement
        i. BRU Cost of Service
        ii. Economy Energy Contra-Cost

B) Total Chugach revenue requirement to be paid on a stand-alone basis:
    a. Base rate revenue requirement
    b. COPA revenue requirement
        i. BRU Cost of Service

C) Total revenue requirement costs allocated to North and South District Ratepayers:
    a. Total base rate revenue requirement
        i. Adjusting Chugach TIER from 1.35 to 1.55
        ii. PILT Agreement payments
    b. Total COPA revenue requirement
        i. BRU Cost of Service
        ii. Economy Energy Revenue Credit
    c. Joint Dispatch Savings
    d. Rebate credit/surcharge of ML&P ratepayer contributed capital in the BRU
    e. Allocation of costs and credits to North and South District Ratepayers

Description of the model modifications and additions follows, below.

A) ML&P Stand Alone Revenue Requirement (Schedule J)

The calculations for total ML&P Revenue Requirement are shown in Schedule J. Inputs into that schedule – Base Rate revenue requirement, COPA revenue requirement, and economy energy sales – are discussed below.

ML&P Base Rate Revenue Requirement

The base rate revenue requirement is modeled using the projected base revenue requirement from the Strunk Model,[1] after correcting for one improper parameter input and modifications to the Strunk Model's MUSA calculation, as discussed below.

[1]*Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/U-19-020(30)/U-19-021(30)*, filed November 1, 2019, at CHU-020789, Sheet "Rev Req" row 14, after adjustments with updated MUSA and ML&P's cost of capital.

ML&P Cost of Capital (Schedule I)

The Strunk Model holds ML&P's weighted average cost of capital (WACC) at 6.75% for the duration of the analysis.[2] As discussed in the Order's body, this implies that $217 million of ML&P debt associated with Plant 2A, currently being floated using a short-term credit facility, would be financed on a long term basis at over 5% were the Chugach acquisition to not proceed. There is no reason to think that ML&P, with a thicker equity position and with the ability to issue tax exempt debt, would be forced to finance this debt on terms materially worse than would Chugach. However, there is no basis in the record to support any particular discount to the assumed cost of debt associated with Chugach's financing of the acquisition. Accordingly, we assume that ML&P's cost of refinancing Plant 2A debt is the same as Chugach's. This lower cost of debt is used to calculate a revised WACC and replaces the Strunk Model input.

We assume that the roughly $217 million in new bonds would be financed at the same cost of debt as would apply to Chugach's financing of the transaction (assumed by Witness Strunk to be 4.10%). Consistent with our last adjudicated rate case, we retain the interest rate of 3.93% as the embedded cost of debt for the roughly $300 million remainder on ML&P's balance sheet.[3] ML&P's capital structure, as assessed by the Strunk model in 2019,[4] and the previously adjudicated ROE,[5] result in WACC of 6.59 percent. This is 0.16% lower than in the Strunk Model. The calculation detail is shown in Schedule I. The results from Schedule I replace Row 9, "Rate of Return", of the

[5]Order U-16-094(9)/U-17-008(13) *Order Resolving All Revenue Requirement and Cost-Of-Service Issues, Approving Depreciation Rates, Approving Revised Cost of Power Adjustment, Requiring Filings, and Allowing Parties to File Comment*, dated March 23, 2018, at p. 41.

"Rev Req" worksheet at columns F through S of the Strunk Model. This updates the Strunk Model's Row 10, "Capital Costs".

MUSA (Schedule G)

In its bottom-up assessment of MUSA costs for the ML&P stand-alone case, the Strunk Model used the applicable MUSA levy rate of 2016 and held it constant for all subsequent years. We do not believe that the 2016 property tax assessment rates are appropriately representative for a long-term projection given the significant variability in MUSA rates that have occurred. We find that the average mill rate in each ML&P tax assessment district 2008-2019 is a more appropriate approximation of long term trends.[6] Accordingly, we adopt the average mill rate for each district over the last 12 years to develop a weighted average mill rate for purposes of projecting MUSA; Schedule G shows the derivation.

We calculate an average millage rate of 12.85 that is used in our calculation of PILT and MUSA. We calculate the average mill rate using the data for the years 2008 through 2019[7] for each district within ML&P's service area- District Nos. 1, 3, 5, 10, 16,

[6] The Strunk Model holds fixed the 2016 weighted average mill rate that is used to calculate MUSA for the ML&P stand-alone case. We observed neither trend nor pattern in the historical data on the relevant Anchorage district mill rates.

[7] The referenced mill rates can be found at:

https://www.muni.org/Departments/finance/treasury/PropTax/Documents/Approved%20Mill%20Rates%202008.pdf

22, and 51. We use the Net ML&P Classified Plant in Service Values found in Amendment No. 1 to the PILT Agreement in our calculation of the proportion of total plant by district.[8] We calculate the proportion of total plant by district by dividing the Net ML&P Classified Plant in Service for each district by the Total Net ML&P Classified Plant in Service. To calculate the plant by district in 2020, we apply the proportion of total plant by each district to the 2020 Net ML&P Classified Plant in Service. We calculate the average mill rate by summing the product of the average historical mill rate for each service area and the plant by district in 2020 for each service area, and then divide this result by the total plant by district in 2020.

We determined the net book value of plant for the years 2017 through 2034 based on electric plant data as contained in the Strunk Model.[9] With one exception, for plant values after 2034, we averaged the yearly change in plant value between 2017 and 2034 and applied that to the current plant value for each additional year.[10] We reduced net book value by depreciation at the same rates used in the Strunk Model for the years 2017 through 2034, extended out beyond 2034 using a calculated average historical rate of change for ML&P and Chugach plant, respectively.[11]

[8]*See* Appendix F, attached to this Order, at page 20 of 24.

[9]*See Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/U-19-020(30)/U-19-021(30*), filed November 1, 2019, at CHU-020789.

[10]Contributed plant was held constant after 2034. These projections of plant data beyond the period sponsored by Witness Strunk play no role in our decision either to approve the acquisition adjustment or with respect to our findings concerning rate discrimination.

[11]*See* Schedule H.

Schedule H shows detailed calculations used for MUSA. Starting in 2021 the MUSA figures calculated in Schedule H replace Row 20 ("Municipal Utility Service Assessment") at Sheet "ML&P EMP" of the Strunk Model. This adjusts the figures in Columns F through S at Row 11 ("Operating Expenses Total Operating Expenses (Includes MUSA, Excludes Reg Debits/Credits)") of the Strunk Model at Sheet "Rev Req". Our reported figures ML&P Base Revenue Requirement [J8 at Schedule J] reflect the resultant changes in Columns F through S at Row 14 ("Revenue Requirements – Base Rates") from Sheet "Rev Req" of the Strunk Model.[12]

ML&P COPA Revenue Requirement (Schedule C)

The Strunk Model does not model ML&P's COPA; rather, it simply assumes that COPA costs will be held constant for the duration of the analysis period. Accordingly, the Strunk Model fails to capture important COPA cost dynamics that are important to performing a comparative assessment of rate impacts for ML&P ratepayers pre- and post-transaction. In particular:

- The Stunk Model does not address the rate impact of declining BRU production. Instead, the BRU production volume appears to have been assumed to equal ML&P's total load requirement,[13] which is inconsistent with both Applicant's views of ML&P's projected share of the BRU production.[14] It is, further, significantly higher than both the PRA and Ryder Scott reserves assessments;[15]
- The means by which ML&P 'balances' BRU production volumes in excess of its native load – through, for example, sales of BRU gas to third parties, or the use of BRU gas in economy energy sales, has not been modeled;
- ML&P's need to make market gas purchases when BRU gas volumes are insufficient to meet its native load has been ignored, despite the significant cost differences for ML&P ratepayers of BRU and third-party gas. As a result, the

[12]*See Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/U-19-020(30)/U-19-021(30)*, filed November 1, 2019, at CHU-020789.

[13]*Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/U-19-020(30)/U-19-021(30*), filed November 1, 2019, at CHU-020789, sheet "EData," row 229.

[14]*Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/U-19-020(30)/U-19-021(30)*, filed November 1, 2019, at CHU-020789, sheet "GData," row 164.

[15]Exhibit H-111; Exhibit H-112.

ratepayer impacts of the changes market prices has not been addressed, particularly in view of increasing purchases from market.

- The Strunk Model fails to incorporate the COPA contra-costs (credits) associated with economy energy sales. Because Chugach has historically been a significant economy energy ratepayer of ML&P this closes off consideration of how the transaction may affect earned margins.

In addition to the foregoing particularly important and dynamic cost considerations, the Strunk Model fails to project a wheeling and diesel fuel expenses.

As described in the body of this order the Strunk Model approach is inadequate given the questions that we must address before approving the transaction. Accordingly, we were forced to construct an ML&P stand-alone COPA model. This model is constructed on the basis of, and largely emulates, the structure of ML&P's historical COPA filings. Whenever it is not inappropriate we adopt COPA data that are contained in the Strunk Model. The model's structure, inputs and assumptions are discussed below.

The ML&P COPA model and supporting calculations and data is presented in Schedule C. The model includes all cost items filed in ML&P's quarterly COPA. This includes the costs of:

- BRU gas
- purchased gas
- stored gas in Cook Inlet Natural Gas Storage Agreement (CINGSA)
- gas transportation
- gas storage service
- purchased power
- wheeling
- diesel fuel

It also includes the contra-costs of economy energy sales.[16]

The ML&P COPA model uses the BRU gas production volume projections, and resulting gas transfer prices, in a manner consistent with the gas production forecasts sponsored by the Applicants. ML&P's total stand-alone gas needs are taken from the Strunk Model. We assume that ML&P's share of BRU gas – volumes are calculated in Schedules A.1 and A.2 – is used first to supply ML&P's own needs. Excess BRU gas

[16]Strictly speaking, as a matter of modeling convenience, the contra-cost credits to COPA from economy energy sales are captured in the total ML&P revenue requirement calculation (Schedule J). There is no difference in rates that results from this modeling convenience.

(only available during 2021-2023 for the ML&P stand-alone case, and only under Ryder Scott reserves assessment modeled in Schedule A.2) is assumed to be sold at market prices. For years where there are gas supply shortfalls, additional volumes are assumed to be purchased at market prices.[17] Under the PRA production forecast, BRU gas is less than the ML&P native load throughout the forecast horizon.

BRU Cost Model (Schedules A.1 and A.2)

The production cost of BRU gas, which is affected by the volume assumptions just described, is modeled separately from and fed into the ML&P COPA calculation (*see* Schedules A.1 and A.2). To avoid redundancy, the following discussion addresses not only how we calculate the production cost of BRU gas for ML&P in the stand-alone case, but also for the Chugach stand-alone case and the combined-ownership case that is consistent with our findings in this Order.[18] The output from the BRU Model is used to forecast COPA revenue requirement for each utility on a stand-alone basis and as a combined entity. During 2016-2018, the BRU gas costs were accounted differently by ML&P and Chugach in their respective COPA filings. Adjustments have been made to apply a consistent set of assumptions to the analysis. The detailed structural changes and input assumptions related to the BRU Model are discussed below.

There are three primary drivers of BRU's future annual production cost. The first are the field's operating and capital expenditures, which are invoiced by the field operator to the working interest owners. The second are each working interest owner's separate expenses associated with ownership; these will include, for example, an allocation of company administrative and general overhead expenses, or the owner's tax obligations. The third is BRU's future annual production volume, which not only determines the production cost per Mcf, but also determines the annual depletion expense. The BRU

[17]To simplify our analysis, "market prices" for both ML&P purchases and sales are assumed to mirror Chugach's third-party purchases from Hilcorp for 2021-2028; see TA481-8, filed January 20, 2020, at Hilcorp Agreement - Fourth Amendment. Thereafter, during 2029-2034, "market prices" are assumed to be flat at the 2028 contract price.

[18]For the combined entity, a single pooled GTP [A61] is calculated by dividing total pooled revenue requirement by total pooled production volume.

Model approach is consistent with ML&P's EMP filings[19] which use a unit-of-throughput depletion method.

For each entity, the total revenue requirement for BRU gas includes its proportional share of the field operating and maintenance costs (Opex), separate company administration and general (A&G) costs, royalties, depletion costs, and investment return. The total revenue requirement is then divided by the net production volume to calculate the unit cost in $/Mcf terms. The summary output of the BRU Model is shown in Schedules A.1 and A.2.

The BRU Model is developed to analyze the impact from key factors driving BRU production costs, such as production volume projections, Capex, and other costs. To avoid double counting, the BRU Model has not explicitly modeled the property tax and production tax components. Instead, the projected property tax savings for ML&P and additional production tax to Chugach in the Strunk Model are adopted and incorporated in base revenue requirement and savings.[20]

Production Volumes

The BRU Model has analyzed two production scenarios: the Petrotechnical Resources of Alaska (PRA) reserve assessment[21] and the Ryder Scott reserve assessment (Ryder Scott)[22]. PRA has forecasted the gross field production to increase from approximately 10.2 Bcf in 2019 to over 12 Bcf in 2020, maintain that level through 2031, and decline at the historical rate afterwards. Ryder Scott has estimated the 2019 gross field production at approximately 9.5 Bcf, projected higher production volumes than the PRA model from 2020 onwards with a peak volume of approximately 14.3 Bcf in 2022 and an earlier decline starting in 2027. The BRU Model deducted an estimated field use

[21]Exhibit H-112, at Attachment G, Beluga River Unit Remaining Reserves Determination, Petrotechnical Resources of Alaska, June 11, 2019.

[22]Exhibit H-111 (Ryder Scott Study)

of approximately 1.2 Bcf/year from the gross production, consistent with the reserve assessments for both production scenarios. The net production is then allocated to the utilities according to the respective share of interest in the BRU: 56.67 percent for ML&P [A10][23], 10 percent for Chugach [A35][24], and 66.67 percent for the combined entity.

Capex

It is clear, despite our questions of the parties in this and prior proceedings, that neither Applicant has a firm grip on future capital expenditure needs in the field. The historical Capex for BRU has shown large year-over-year variances since ML&P acquired its initial 33 percent BRU interest. Field capital investment projections contained in the Strunk Model project significantly less future investment in the field than has historically occurred.[25]

We recognize that there is a large uncertainty in future drilling programs and related annual Capex. The BRU Model (Schedules A.1 and A.2) assumes Capex for the next ten years at long-term average historical levels. Capex [A7] is assumed to be approximately $16.7 million per year from 2020 to 2029.[26] Capex includes the cost to drill new wells, well workovers, and other facility upgrades and improvements. Our capital expenditure projections play no role in our finding of the appropriate treatment of BRU

[24]Order U-16-012(14), *Order Affirming Bench Ruling Granting Joint Request, Affirming Bench Ruling Granting Petition for Confidential Treatment, Affirming Bench Ruling Accepting Stipulation, Affirming Bench Ruling Granting Federal Executive Agencies' Request to Withdraw Participation as a Party, and Closing Docket*, dated April 21, 2016.

[25]*Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/U-19-020(30)/U-19-021(30),* filed November 1, 2019, at CHU-020789, worksheet "GData", row 185-188.

[26]For 1996-2015 ML&P annual Capex (CHU-020788 Gdata, row 187-188) grossed up by 33.33% of BRU interest; For 2017-2019, ML&P quarterly Tariff Advisories (TA360-121, filed May 18, 2017; TA361-121, August 23, 2017; TA362-121, November 22, 2017; TA364-121, filed March 1, 2018; TA367-121, filed May 16, 2018; TA368-121, filed August 15, 2018; TA369-121, filed March 15, 2019; TA370-121, filed February 15, 2019; TA372-121, filed May 22, 2019; TA373-121, filed August 16, 2019; and TA374-121, filed December 11, 2019) grossed up by 56.67% of BRU interest.

production under the BRU Fuel Agreement, or of the appropriateness of allocating future costs between North and South District ratepayers in a manner that reasonably approximates load ratio share.

PRA and Ryder Scott have estimated the end of field life as 2037 and 2038, respectively. To provide a decent period of capital recovery Capex spending is assumed to cease starting in 2030; field production declines at the rates assumed by PRA and Ryder Scott thereafter.

Opex

Opex [A6] is the same as what was assumed in the Strunk Model, including BRU lifting costs, operator's maintenance fee, other production expenses, and BRU airstrip and road maintenance cost.[27] Consistent with the Strunk Model, total Opex is projected to be approximately $13.4 million in 2020, and thereafter assumed to increase at an inflation rate of 2 percent per year. Except for the BRU airstrip and road maintenance cost, all other costs are allocated proportional to the BRU interest share.

Depletion

Depletion expenses are calculated based on the percentage of production method. This is consistent with the depletion calculation approach for ML&P contained in the Strunk Model. For a given year, the depletion percentage [A8] is equal to projected production for that year divided by the projected total production from 2020 to the end of the field life. The annual depletion expense is equal to the average Property Plant and Equipment balance during the year multiplied by the depletion percentage for the year.

For ML&P, the net PPE is $2.36 million at the end of 2019 [A14], based on its COPA filing.[28] The Chugach net PPE at the end of 2019 is $37.56 million [A44], based on its COPA filing.[29] The acquisition case simply sums the BRU property balances of the two utilities.

---

[27]*Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/U-19-020(30)/U-19-021(30),* filed November 1, 2019, at CHU-020789, at G data, row 219-222.

[28]TA370-121 filed February 15, 2019, at Exhibit 56.

[29]TA441-8, filed January 21, 2020 at Exhibit 12.

Return

Consistent with current practice, in modeling ML&P's stand-alone gas production cost, we use the historical weighted average cost of capital (WACC) approach. For ML&P on a stand-alone basis, the WACC is calculated according to Schedule I. The forgoing rates of return are applied to its net property balances.

Similarly, we follow current practice in modeling Chugach's stand-alone production cost and use TIER to determine an appropriate return on Chugach's 10 percent BRU interest. For Chugach's acquisition of BRU reserves in 2016, an interest rate of 2.58 percent is assumed[30] [A48]. For new investment, an interest rate of 4.10 percent ([A19] [A46]) is assumed. A TIER of 1.35 ([A20] [A47]) is assumed for all investment, consistent with the TIER for BRU gas production accepted by the Commission[31].

For the combined utility (acquisition) case, under unified Chugach ownership, we assume that Chugach will continue to use a TIER approach to determine required return.

A&G Cost

For MLP on a stand-alone basis, A&G cost [A26] is assumed to be the same as the historical cost in 2018[32]. For Chugach, A&G cost [A52] is assumed to be the same as the historical cost for 2018.[33] For the combined utility, A&G cost is assumed to be the sum of each utility's A&G costs.

Miller*, filed January 20, 2017; and *Notice of Filing Prefiled Reply Testimony*, filed July 5, 2017, in Docket U-16-094, entitled "In the Matter of the Petition Filed by CHUGACH ELECTRIC ASSOCIATION, INC. for approval to Create a Regulatory Asset for the Recovery of Costs from the Acquisition of a Portion of ConocoPhillips Alaska, Inc.'s Interest in the Beluga River Unit," and Docket U-16-074, entitled "In the Matter of the Tariff Revision Designated as TA425-8 Filed by CHUGACH ELECTRIC ASSOCIATION, INC."

[31]Order U-19-003(8), *Order Accepting Stipulation, Granting Petition, and Closing Docket,* dated October 11, 2019, at Schedule A on page 3.

[32]TA373-121, filed August 16, 2019, at Attachment 15, ML&P 2018 actual cost.

[33]TA473-8, filed June 28, 2019, at Exhibit 12, page 2, Chugach 2018 actual cost.

Royalty Payment

Royalty payment is calculated at 12.5 percent[34] [A9] multiplied by the net gas production volume and the subtotal production cost before taxes ([A27] [A31] [A53]).

Taxes

The BRU Model does not directly model production or property taxes for BRU gas. Accordingly, no property tax savings is shown in the combined-utility case on Schedules A.1 and A.2. Nevertheless, as does the Strunk Model,[35] the avoidance of BRU property tax costs associated with Chugach's status as an electric cooperative is reported in the total savings calculation.

Other ML&P Stand-Alone COPA Elements

Because of their relatively small contribution to overall COPA costs, and because they vary comparatively little, we have followed the Strunk Model and simply adopt constant costs, at 2020 levels, for all costs other than for BRU and purchased gas.

For cost items in COPA not included in the Strunk Model – wheeling costs and diesel costs – data from historical COPA filings for the period of July 2018 to June 2019 were relied upon. This full year period is chosen for several reasons. First, this data reflects the most recent filed data available to the Parties at the time of the proceeding. The data for the last quarter ending June 2019 was filed by ML&P on August 15, 2019, (TA373-121).

Second, subsequent historical COPA filings are impacted by the wildfires on the Kenai Peninsula that started in June and continued through September 2019, which damaged the high-voltage transmission line that delivers power from Bradley Lake to the Railbelt. The reduction in the availability of hydropower from Bradley Lake has reduced wheeling revenue opportunities, while increasing the dependency of natural gas, and the overall costs included in COPA which would not have been incurred if not for the wildfires. Our approach thus helps ensure that wheeling costs are reasonably representative.

---

[34]Exhibit H-111 (Ryder Scott Study).

[35]*See Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/U-19-020(30)/U-19-021(30),* filed November 1, 2019, at CHU-020789, worksheet "Savings", row 47, and worksheet "Combined Proforma", row 172 and row 177, respectively.

Third, the same historical period is used in Jeff Warner's analysis and testimony on the potential joint dispatch savings.[36] Warner's Aurora analysis utilized the actual historical electric loads during the July 2018-July 2019 period to dispatch stand-alone ML&P, Chugach, and combined generation assets to estimate fuel and cost savings from the formation of a joint dispatch pool. This ensures wheeling costs are internally consistent with ML&P modeled load and economy energy savings.

To be consistent with the Strunk Model, the projected COPA related savings and additional cost,[37] like Eklutna fuel savings, BRU Property Tax and IT savings, and additional BRU Production Tax remain allocated to base rate revenue requirements and are not explicitly modeled in the COPA models. Additional COPA savings associated with the joint dispatch of ML&P and Chugach generation assets against the combined electric loads were separately included and directly allocated to combined COPA revenue requirements.

ML&P Economy Energy Sales Margins

The ML&P stand-alone COPA model shown in Appendix C does not calculate ML&P's profits from economy energy sales. Instead, profits from GVEA and Chugach economy energy sales are calculated separately and act to reduce the overall COPA in our calculation of total ML&P stand-alone costs (Schedule J). The megawatt hours of economy energy sales to GVEA [J1], and Chugach [J3] are assumed to stay constant at the historical levels realized between July 2018 and June 2019. The GVEA margin [J2] is calculated as historical average sales price minus average costs.[38] ML&P's average revenue per megawatt hour from Chugach economy energy sales [J4] is calculated as the average sales price per megawatt hour as all costs are either reimbursed or directly covered.[39]

---

[37]*Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/U-19-020(30)/U-19-021(30),* filed November 1, 2019, at CHU-020789, sheet "Combined Proformas," row 76-78, 142, 54.

[38]Consistent with our earlier discussion, gas is assumed to be valued at the most recent Chugach-Hilcorp contract market prices.

[39]Chugach supplies its own gas to ML&P.

B) Chugach Stand Alone Revenue Requirement (Schedule K)

The calculations for the total Chugach stand-alone Revenue Requirement are shown in Schedule K. Inputs into that schedule – Base Rate revenue requirement, COPA revenue requirement, and economy energy sales – are discussed below.

Chugach Base Rate Revenue Requirement

The Chugach base rate revenue requirement is modeled using the Strunk Model's projected base revenue requirement.

Chugach Stand Alone COPA Revenue Requirement (Schedule D)

Chugach's historical cost of power in tariff filings is called Fuel and Purchased Power Cost Adjustment (FPPCA). Despite the naming differences, FPPCA has similar cost elements as the ML&P COPA. For consistency, we have used the term "COPA" for ML&P, Chugach, and the combined entity.

The Strunk Model did not provide a line-by-line buildup of the COPA model for Chugach. Instead, it simply makes a constant linear projection. There are no formula references for the Chugach base COPA.[40] The values appear to be extrapolated from historical costs but the COPA revenue requirements appear to be significantly lower than the values in the historical COPA filings.

The Strunk Model thus fails to capture important COPA cost dynamics that are important to performing a comparative assessment of rate impacts for Chugach ratepayers pre- and post-transaction. The major structural deficiencies in Strunk's approach to ML&P's COPA are also evident in his approach to Chugach's COPA. To address these issues a detailed COPA model was developed for Chugach on a stand-alone basis.

Chugach's COPA cost items include: BRU gas supplies, Hilcorp contracted gas supplies through 2028, other gas purchases at market price, CINGSA gas storage costs (includes cost of gas and services charges), gas transportation costs, power purchase

[40] *See Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/U-19-020(30)/U-19-021(30),* filed November 1, 2019, at CHU-020789, worksheet "Chugach Base" and "Chugach Base (Extended)," at row 13.

from Bradley Lake, Fire Island Wind and Qualified Generation, power purchase from other utilities, and transmission costs (less wheeling revenues).

BRU gas is a relatively small part of the Chugach supply portfolio. The Hilcorp Agreement provides the majority of the gas supplies.[41] To the extent there are calculated gas supply shortfalls relative to these two supply sources the volume of additional gas needed to meet the Chugach load requirement is calculated. The cost for balancing gas is assumed to be purchased at the same market price as is reflected in Chugach's current Hilcorp Agreement.

For other cost components, we rely primarily on historical COPA TA filings. The historical period used for ML&P stand-alone COPA, from July 2018 to June 2019 was also used as a starting point for several COPA accounts. As described in Appendix C, this data reflects the most recent filed data available to Parties at the proceeding, is consistent with joint dispatch saving estimates, presented in Schedule F, and avoids dispatch anomalies resulted from the Kenai Peninsula fire. We rely on the load projections provided in these proceedings for projections of Chugach's load. [42]

Chugach COPA includes the following major cost components:

- Cost of Gas for Power Generation
    - BRU Gas [D3]
    - Hilcorp Gas [D6]
    - CINGSA Gas Withdrawal ([D7], [D10])
    - Balancing Gas [D22]
    - Cost of Gas Transportation ([D31], [D32], [D33])

- Cost of Purchased Power
    - Purchased Power from Bradley Lake, Fire Island Wind and Qualifying Generation [D41]
    - Purchased Power from Other Utilities [D44]

- Other (transmission) ([D45], [D46])

[41]TA481-8, filed January 21, 2020.

[42]*Chugach Electric Association Inc.'s Notice of Errata to Compliance with Order U-18-102(36)/U-19-020(31)/U-19-021(31),* filed November 5, 2019, at CHU-020812.

Cost of Gas for Power Generation

Historically, out of the total gas requirement of approximately 7.8 Bcf per year for Chugach, BRU gas supplies approximately 1.3 Bcf, Hilcorp supplies approximately 6.0 Bcf, and the rest is supplied through gas withdrawals from Cook Inlet Gas Supply Agreement (CINGSA).[43]

Under both PRA and Ryder Scott production forecasts, Chugach's share of BRU gas supply is projected to be lower than historical levels.[44] The fourth amendment of the Hilcorp Agreement specifies the base supply volume of approximately 5.84 Bcf per year (16 MMcf per day) from March 2020 through March 2023, and 3.65 Bcf per year (10 MMcf per day) from March 2023 through March 2028. In addition, Chugach has the option to purchase approximately 1.8 Bcf per year (5 MMcf per day) from Hilcorp, providing the flexibility for its gas balancing needs. The CINGSA gas supplies are assumed to remain at historical levels.

To calculate the gas volume balancing requirement for Chugach, the additional electric generation requirement is calculated as the difference between the projected load and historical baseline generation. The gas purchase balancing volume is then converted from the electricity requirement divided by the historical average heat rate of approximately 7,572 Btu/kWh.

The cost of BRU gas [D3] is calculated as Chugach's share of the BRU gas volume [D1][45] multiplied by Chugach's Production Cost on a stand-alone basis [D2][46], as determined in Schedules A.1 or A.2.Cost for Hilcorp gas [D6] is calculated as contracted gas volume [D4][47] multiplied by contract price [D5][48].The gas balancing volume is assumed to be purchased at market price. The contract price in the Hilcorp Agreement

[48]TA 481-8, filed January 21, 2020, at Table 1.

is used as a proxy for market price.[49] Cost for balancing gas [D22] is calculated as balancing gas volume [D20] multiplied by market price of gas [D21]. To calculate balancing gas volume, the balancing power [D19] is calculated as the difference between projected load [D11],[50] less loss adjustment [D12],[51] other power purchases [D14], and projected power generation [D16] using BRU gas, Hilcorp gas, and CINGSA gas, based on projected gas volume from each source and the average heat rate implied in historical gas usage and power generation. The market price of gas [D21] is assumed to be same as the contract price for the Hilcorp agreement through 2028, and flat at the 2028 price thereafter.

Cost of gas withdrawn is assumed to remain at constant historical levels, including reservation and capacity costs for Firm Storage Service (FSS) [D7],[52] and cost of stored gas [D10]. Cost of Gas Transportation [D28][53] is similarly held constant.

Cost of Purchased Power

Cost of Purchased Power from Generation ([D42]) includes Bradley Lake ([D29], [D30])[54], Fire Island Wind ([D31], [D32])[55] and Qualified Generation ([D33], [D34]).[56] As with the Cost of Purchased Power from Other Utilities, including MEA and ML&P ([D39],

[D40]),[57] we assume all such costs are held at historical levels. Purchases from ML&P are assumed to be priced at the same structure in which Chugach provides ML&P with gas to be used, reimburses the cost of gas transportation, and pays an allowance for O&M in addition to generation margins.[58]

Other

Exchange Credits [D46],[59] and Wheeling Revenues [D47],[60] are assumed to be the same as historical levels.

C) Total revenue requirement costs that North and South District Ratepayers each pay (Schedule L.2)

Combined Base Rates

As noted in the body of the Order, Chugach's proposed rate moratorium for base rates during 2020-2023 means that there can be no savings in the base rate revenue requirement during this period. The Eklutna PPA payment does not have any impact on either North or South District ratepayers from 2021 to 2023 because of the rate moratorium and Chugach's agreement to expense these costs. However, we do include and model the Stipulation's $12 million per annum rebate to North District ratepayers during 2021-2023.

After 2023 we significantly adopt Strunk's assessment of the combined revenue requirement, which embodies base rate revenue requirement savings. However, we make several adjustments.

First, as noted in the body of the Order, we adjust Chugach's TIER from the Strunk Model's assumption of 1.35. To be consistent with our earlier Orders,[61] our concern for

[57]TA459-8, filed June 26, 2018; TA461-8, filed September 27, 2018; TA465-8, filed December 20, 2018; and TA470-8, filed March 22, 2019, at Fuel_PP_Exh_06, row 86.

[58]TA459-8, filed June 26, 2018; TA461-8, filed September 27, 2018; TA465-8, filed December 20, 2018; and TA470-8, filed March 22, 2019, at Fuel_PP_Exh_06, row 88.

[59]TA459-8, filed June 26, 2018; TA461-8, filed September 27, 2018; TA465-8, filed December 20, 2018; and TA470-8, filed March 22, 2019, at Fuel_PP_Exh_06, row 112.

[60]TA459-8, filed June 26, 2018; TA461-8, filed September 27, 2018; TA465-8, filed December 20, 2018; and TA470-8, filed March 22, 2019, Fuel_PP_Exh_05, row 25.

[61]Order U-19-003(8), *Order Accepting Stipulation, Granting Petition, and Closing Docket*, dated October, 11, 2019.

the financial position that Chugach will be in following transaction close, and an insufficient record to support a lower TIER, we assume that Chugach's TIER will remain at 1.55 following its next rate case. Accordingly, the TIER for the combined case under Chugach ownership is revised from the 1.35 assumed in row 36 (Chugach TIER) of the Strunk Model's "Rev Req" worksheet.[62] Strunk Model calculations of the combined base rates are automatically adjusted on that worksheet at row 35 (Chugach Assignable Margins), row 38 (Capital Costs), row 45 (Revenue Requirement) and row 47 (Revenue Requirement – Base Rates).

Second, we adjust the Strunk Model's assessment of each year's Personnel Savings. Schedule L.1 embodies a reduction of Personnel Savings of 25% compared to the level assumed by Witness Lovas. We do so by multiplying the Personnel Savings projected by Lovas [63] in each department by 75%; the recalculated total savings is then reflected in row 40 (Savings), row 43 (Operating Costs), row 45 (Revenue Requirement), and 47 (Revenue Requirement – Base Rates) on Sheet "Rev Req" of the Strunk Model.

Third, we adjust the combined base rate revenue requirement for the difference between calculated PILT and MUSA. We describe our modeling of the PILT, below.

PILT Calculation (Schedule H)

Assuming that the transaction is consummated, Chugach will be required to pay to the Municipality of Anchorage (MOA) make annual payments consistent with the PILT Agreement. Although that Agreement contains an illustrative exhibit demonstrating how the PILT will be calculated, no party presented us with PILT calculations based on data projections. Accordingly, we review how PILT is calculated under the Agreement.

The Agreement determines payments as the product, for each district in the Legacy Service Territory of: (i) the Adjusted Net Book Value for the current year, and (ii)

[62] *Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/U-19-020(30)/U-19-021(30)*, filed November 1, 2019, at CHU-020789.

[63] *Chugach Electric Association Inc.'s Filing In Compliance With Bench Order,* filed October 30, 2019, at CHU-020787.

the current Millage Rate for each such district.[64] The term Legacy Service Territory means ML&P's service area as in existence at the closing date.[65]

The term Adjusted Net Book Value is defined by a series of nested definitions. Adjusted Net Book Value means, for any year, the product of (i) the Net ML&P Classified Plant in Service located within each district in the Legacy Territory as of the Closing Date and (ii) the Overall Plant in Service Change.[66] Net ML&P Classified Plant in Service means the net book value of ML&P classified and unclassified plant in service within the Municipality of Anchorage as of the Closing Date, including contributed plant but not including intangible plant and construction work in progress (CWIP).[67] Overall Plant in Service Change means a fraction of which (i) the numerator is the Net Plant in Service of Chugach located within the Municipality of Anchorage as of January 1 of the current year, and ii) the denominator is the sum of: (a) ML&P's Net Plant in Service in the Legacy Territory that is located within the Municipality of Anchorage on the Closing Date, plus (b) Chugach's Net Plant in Service in the Chugach legacy territory that is located within the Municipality of Anchorage on the Closing Date.[68] Net Plant in Service means the net book value of plant in service, exclusive of contributed plant, intangible plant, and CWIP.[69] Millage Rate means the means the rate, as in effect at January 1 of each year, that is determined pursuant to AS 29.45.240 for property in each district of the Legacy Territory.[70]

We calculate the mill rate to be used in PILT on the same basis as we do for MUSA, described previously (Schedule G).

To calculate Adjusted Net Book Value we first calculate Chugach Net Plant in Service by subtracting CWIP from Chugach Net Plant. We then apply then apply a factor

[64]Appendix F *See* Section 2.01 of Original PILT Agreement.

[65]Appendix F at page 2 of 24.

[66]Appendix F at Amendment No.1.

[67]Appendix F at Amendment No. 1.

[68]Appendix F at Amendment No.1.

[69]Appendix F at Amendment No.1.

[70]*See* Appendix F at page 2 of 24.

of 70% to the Chugach Electric Plant to reflect the plant located within the Municipality of Anchorage.[71] We calculate ML&P Net Plant in Service by subtracting net intangible plant, and net contributed plant, from ML&P Electric Plant. We calculate the Overall Plant in Service Plant Change by dividing the Overall Plant in Service in the current year by the overall plant in service at close (assumed to be in 2021). We calculate Net ML&P Classified Plant in Service by subtracting net intangible plant from ML&P Electric Plant. Finally, we calculate the Adjusted Net Book Value by multiplying the Net ML&P Classified Plant in Service at close by the Overall Plant in Service Change in the current year.

We multiply the average Millage Rate by Adjusted Net Book Value to calculate PILT.

Combined COPA Surcharge (Schedule E)

Consistent with our finding in this Order, the cost of service of BRU gas is determined by pooling all field costs and adjusting specific BRU owner costs (see Schedules A.1 and A.2). With this adjustment made, the costs that determine the COPA surcharge for the combined utility become the sum of the two stand-alone utilities.

Calculation of COPA Credits (Contra Costs) Associated with Economy Energy Sales

As with the ML&P stand-alone case, we make subsequent adjustments to the effective COPA surcharge to reflect credits from economy energy sales. However, in the combined case there are no contra costs associated with economy energy sales to Chugach. We make this adjustment by pulling suitable data from Schedule J, which assumes that economy energy sales to GVEA will remain unchanged from the stand-alone case. The assumption is consistent with our calculation of the combined utility dispatch savings, discussed below.

Combined Utility Dispatch Savings (Schedule F.1)

The transaction will form one utility that owns or has rights to the generation assets, currently separately owned by Chugach and ML&P. After the transaction those assets will be optimally deployed to meet the combined load requirements from legacy Chugach

[71] *Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/ U-19-020(30)/U-19-021(30)*, filed November 1, 2019, at CHU-019065.

and ML&P ratepayers. The day-to-day generation dispatch of the combined utility should produce essentially the same efficiencies that would be provided by a two-party power pool – a subject that has been discussed for the past several years.[72] As explained in the body of this Order, if the parties are left on their own, we find that the enhanced efficiencies of a tight pool to be speculative. Accordingly, it is appropriate for us to consider the positive contribution of dispatch savings in our consideration of the transaction's public interest benefits. We look to the record to develop an indicative assessment of dispatch savings.

Aurora Runs and Dispatch Savings Estimates

In Order U-18-102(14)/U-19-020(8)/U-19-021(8) *Order Requiring Filings of Fourth Disclosures*, dated July 3, 2019; (Order U-18-102(14)); Order U-18-102(28)/U-19_020(22)/U-19-021(22), *Order Requiring Filing* dated September 19, 2019 (Order U-18-102(28)); and Order 32, the Commission required ML&P to use Aurora production cost modeling software to make a series of model runs that characterize optimal dispatch for a number of utility ownership configurations and scenarios.[73] In performing their analysis, we ordered ML&P to rely on actual load data for the historical period July 2018 through June 2019. We required ML&P to provide input and output files, documentation, and solution files for hourly production cost simulations using the Software.

ML&P complied with Order 32 (Order 32 Results) and produced five requested Aurora model runs simulating optimal economic dispatch for Chugach as a stand-alone utility, ML&P as a stand-alone utility and Chugach and ML&P as a combined utility under various assumptions.

---

[72]Progress towards and status updates regarding formation of a joint power pool development effort were tracked in dockets I-15-001 and I-16-002. Docket I-15-001 is entitled "In the Matter of the Evaluation of the Operation and Regulation of the Alaska Railbelt Electric Transmission System," and Docket I-16-002 is entitled "In the Matter of the Evaluation of the Reliability and Security Standards and Practices of Alaska Electric Utilities."

[73]Aurora is production costs simulation software used in the power industry to simulate optimal dispatch of generation resources to meet load based on units' economic costs of dispatch and transmission constraints.

Order 32 Scenarios

Scenario	Description
Scenario 1A	ML&P Stand-alone with economy energy sales
Scenario 1B	Chugach Stand-alone
Scenario 1C	ML&P and Chugach Combined, no economy energy sales
Scenario 1D	ML&P and Chugach Combined, with economy energy sales
Scenario 1E	ML&P Stand-alone, no economy energy sales

Under each scenario, the Aurora results report the amount of energy and production cost for each thermal unit at every hour of the historical period. Aurora's economic dispatch algorithm minimizes the production cost of dispatch. Scenario incorporate each generation unit's physical capacity, heat rates curves, start-up time, start-up cost and the system's transmission constraints. The cost to deploy each thermal unit includes all relevant fixed and variable costs, including cost of fuel, used by and reflected in the algorithm's total cost-minimizing solutions. ML&P supplied all of these parameters.

Comparative assessment of the sum of operational costs in Scenarios 1A and 1B with operational costs in 1D provides a basis for reasonably quantifying dispatch savings that could have been realized in the historical period. The choice of a historical period was made to help ML&P develop, and to enable our interpretation of, the model runs.[74] This comes at a cost: the future will not necessarily replicate the past. No one can reasonably project hourly electric load for the next 15 years. In the face of intractable uncertainties, the production costs from these scenarios, nevertheless provide reasonable insight into the joint dispatch savings that will result from the transaction (see Schedule F.1).[75]

We cannot simply measure dispatch savings as the difference between the sum of costs in Scenarios 1A and 1B, and the costs of 1D. Despite our best efforts in designing

[74]The historical period provides necessary model input for hourly load, generation costs, fuel costs and transmission constraint data. These would otherwise need to be assumed, with attendant complications.

[75]Dispatch savings might also be approximated by comparing the sum of production costs from Scenarios 1B and 1E with 1D. Doing so might arguably overstate joint dispatch benefits, however, as some of the savings are may be currently captured in customary economy energy transactions between the Chugach and ML&P.

Scenario D, the overall mount of energy generated differs from the sum of Scenarios 1A and 1B. To correct for this mis-match additional calculations were required. Discrepancies between the model-projected economy energy sales and historical economy energy sales were adjusted to best approximate the efficiency gains from the joint dispatch of generation units to meet Chugach and ML&P's load requirements. In addition, Chugach's economy energy purchase costs – a real cost for them not reflected in any operational data of Scenarios 1A and 1B, needed to be incorporated. The following paragraphs outline our approach.

The sum of costs of the two utilities operating as stand-alone entities [F1.8] are determined by several components drawn from both the Order 32 compliance filings and relevant historical COPA filings. We explain the derivation of that total cost, below.

- Aurora run 1B calculates Chugach's optimal dispatch of its own generation units to meet its own load.[76] The resultant production cost is reported at [F1.2]. This dispatch cost does not include the cost of power purchased from ML&P during the historical period. We approximate the production cost of Chugach's power purchases from Aurora run 1A.

- Aurora run 1A calculates ML&P's optimal dispatch of its own generation units to meet its own load and, in addition, to make economy energy sales to Chugach and other third parties [F1.1].[77] Accordingly, 1A includes the cost of making the energy that Chugach relies on in 1B to meet its native load. However, the production cost to generate economy energy sales to Chugach also includes and is mixed in with the production cost to generate economy energy sales for third parties. We therefore approximate the production cost for ML&P to provide economy energy sales to Chugach and third parties through the following steps:
    - First, the additional production cost that ML&P incurred to make all economy energy sales [F1.3] is estimated as the total production cost in Aurora run 1A minus the total production cost in Aurora run 1E.
    - Second, the production cost incurred to generate ML&P economy energy sales to Chugach is prorated using the percentage [F1.4] of ML&P Chugach ESS volume as part of the total ML&P economy energy sales volume, derived from historical ML&P COPA filings for July 2018 through June 2019.

[76] *Municipal Light & Power's Filing in Compliance with Order U-18-102(32)/U-19-020(27)/U-19-021(27)*, filed October 29, 2019, at ML&P005601, Resource Hour.

[77] *Municipal Light & Power's Filing in Compliance with Order U-18-102(32)/U-19-020(27)/U-19-021(27),* filed October 29, 2019, at MLP005436 Resource Hour.

- Last, third-party economy energy sales production cost [F1.5] is estimated as total economy energy sales production cost [F1.3] minus Chugach economy energy sales related production cost.

- Finally, we note that production cost of Chugach's economy energy sales purchases from ML&P do not reflect Chugach's full cost of economy energy sales purchases. In particular, they do not include the margin that Chugach pays to ML&P (which is not part of Aurora's calculated production cost), the cost of transporting gas from Chugach's suppliers to ML&P's generating plant, nor the O&M allowance that is in ML&P's economy energy tariff. These costs are real, and part of the cost of operating both utilities separately. We estimate them using the Chugach economy energy sales volume multiplied by historical average total price paid to ML&P [F1.6].

Total production cost of Chugach and ML&P operating as a combined utility [F1.9] is the total production cost results from run 1D, adjusted by the production cost incurred to generate economy energy sales[78]. The additional generation volume to serve economy energy sales is the run 1D generation volume ([FD1.22] [FD1-1]) minus the generation volume without economy energy sales [F1.15]. Beluga 5 and Beluga 6 are assumed to be dispatched for the sole purpose of generating economy energy sales. Production cost related to the remainder economy energy sales volume is assumed to be generated at average production cost. Total production cost related to economy energy sales is estimated in [F1.11].

The dispatch savings from the transaction [F1.12] is approximated as the difference in total production cost to meet Chugach and ML&P's joint load requirement as a combined utility versus the total production cost for each operating as a stand-alone utility [F1.8].

Calculation of rebate of ratepayer contributed capital in the BRU

As described in the body of this order, we find that North District ratepayers should receive a rebate associated with the net plant balances of capital contributed by its ratepayers in the BRU. Carrying costs, at a 5 percent interest rate that matches the discount rate supported by the parties in this proceeding, are included. We allocate those

[78]Since Scenario 1D reflects Chugach and ML&P operate as a combined utility, all economy energy sales should be third-party economy energy sales.

carrying costs on a levelized basis. The BRU ratepayer-contributed capital credit is calculated at Schedule B, and is derived using Excel's PMT function.

Allocating Combined-Utility Costs to the North and South Districts

For the period prior to the filing of Chugach's next general rate case, 2021 through 2023, both North and South District ratepayer base rates will be unchanged. Therefore, no allocation of combined base rate costs is required. The combined COPA revenue requirement is allocated on a per-kWh basis. In other words, it is allocated to North and South Districts based on each District's proportionate share of total native load in each year. North District COPA rates are then adjusted by the annual $12 million RRR credit. The BRU rebate credit/surcharge, applied to North/South Districts respectively, completes the allocation.

For the period beginning in 2024 the combined base rate costs are allocated, like the COPA, on the basis of load ratio share. Load ratio share is each year derived from the forecasted native load for each set of ratepayers. Similarly, the combined COPA revenue requirement is allocated on the basis of load ratio share. The BRU rebate credit/surcharge, applied to North/South Districts, respectively, completes the allocation.

Schedule A.1 - BRU Gas Production and Cost (PRA Forecast)

[A1.6] *Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/U-19-020(30)/U-19-021(30)*, filed November 1, 2019, at CHU-020789, sheet "GData" row 219 + row 220 + row 221 + row 232 / [A1.9].
[A1.7] *Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/U-19-020(30)/U-19-021(30)*, filed November 1, 2019, at CHU-020789 sheet "GData", row 187-188 FOR 1996-2015; ML&P quarterly Tariff Advisories (TA360-121, filed May 18, 2017; TA361-121, filed August 23, 2017; TA362-121, filed November 22, 2017; TA364-121,filed March 2, 2018; TA367-121, filed May 16, 2018; TA368-121, filed, August 15, 2018; TA369-
[A1.9] H-111, Ryder Scott Study Hearing
[A1.10] Order U-16-012 (14), *Order Affirming Bench Ruling Granting Joint Request, Affirming Bench Ruling Granting Petition for Confidential Treatment, Affirming Bench Ruling Accepting Stipulation, Affirming Bench Ruling Granting*
[A1.14] TA370-121, filed February 15, 2019 at Exhibit 56.
[A1.19] Commission adjudicated BRU new plant interest rate, as discussed in the body of the order.
[A1.20] Order U-19-003(8), *Order Accepting Stipulation, Granting Petition, and Closing Docket*,dated October 11, 2019, at Schedule A on page 3.
[A1.26] TA373-121, filed August 16, 2019, at Attachment 15, ML&P 2018 actuals.
[A1.ARO1] H-111, Beluga River Unit Asset Retirement Obligation Calculation for ML&P's 70% Share of 2016 Purchase of CPAI 1/3 Interest. The surcharge is calculated based on ML&P's share of the 2037/2038 value of ARO.

[A1.35] TA481-8, filed January 17, 2020 at Fourth Amendment for 2021-2028; flat at Hilcorp 2028 price level for 2028-2034.
[A1.39] Order U-16-012 (14), *Order Affirming Bench Ruling Granting Joint Request, Affirming Bench Ruling Granting Petition for Confidential Treatment, Affirming Bench Ruling Accepting Stipulation, Affirming Bench Ruling Granting*
[A1.48] Calculated from the acquisition cost of $44.4 million, U-16-062, less cumulated depreciation and amortization. Historical depreciation and amortization costs are used for 2016-2018,TA441-8, TA459-8, TA473-8, Exhibit 12. Future depreciation and amortization costs are projected according to the formulas.
[A1.52] Calculated annual interest expenses, according to a mortgage style repayment formula, with $44.4 million for the Chugach acquisition cost in 2016, 2.58 percent in annual interest rate, and repayment period of 16 years. See *Chugach's Compliance Filing to U-16-062(7) / U-16-074(7) – Beluga River Unit Gas Transfer Price*, filed September 29, 2017.
[A1.56] TA473-8, filed June 28, 2019, at Exhibit 12 page 2, Chugach 2018 Actuals.
[A1.ARO2] TA474-8, filed on August 28, 2019, at Exhibit 2, Beluga River Unit Asset Retirement Obligation. The ARO depreciation expense is calculated based on Chugach's share of the 2037/2038 value of ARO.

[A1.58] Calculated as the historical annual average A&G costs for 2016-2018, *See* TA441-8, filed June 30, 2017; TA459-8, filed June26, 2018; and TA473-8, filed June28, 2019, at Exhibit 12.
[A1.ARO5] The total of ML&P's ARO revenue and Chugach's ARO expense in their standalone cases.

[A1.66] TA481-8, filed January 20, 2020, at Hilcorp Agreement - Fourth Amendment for 2021-2028; flat at Hilcorp 2028 price level for 2028-2034.

[A2.2] H-111, at Page 6, Table 3A, converted to Mcf; Annual production in percentage of [A2.1]
[A2.4] *Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/U-19-020(30)/U-19-021(30)*, filed November 1, 2019, at CHU-020789, sheet "GData" row 166.
[A2.6] *Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/U-19-020(30)/U-19-021(30),* filed November 1, 2019, at CHU-020789, sheet "GData" row 219 + row 220 + row 221++ row 232 / [A2.9].
[A2.7] *Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(35)/U-19-020(30)/U-19-021(30)*, filed November 1, 2019, at CHU-020789, sheet "Gdata", row 187-188 FOR 1996-2015;ML&P quarterly Tariff Advisories (TA360-121, filed May 18, 2017; TA361-121, filed August 23, 2017; TA362-121, filed November 22, 2017; TA364-121,filed March 2, 2018; TA367-121, filed May 16, 2018; TA368-121, filed, August 15, 2018;
[A2.9] H-111
[A2.10] Order U-16-012 (14), *Order Affirming Bench Ruling Granting Joint Request, Affirming Bench Ruling Granting Petition for Confidential Treatment, Affirming Bench Ruling Accepting Stipulation, Affirming Bench Ruling Granting*
[A2.14] TA370-121 filed February 15, 2019, at Exhibit 56.
[A2.19] Commission adjudicated BRU new plant interest rate as discussed in this order.
[A2.20] Order U-19-003(8), *Order Accepting Stipulation, Granting Petition, and Closing Docket*, dated October 11, 2019, Schedule A on page 3.
[A2.26] TA373-121, filed August 16, 2019, at Attachment 15, ML&P 2018 actuals.
[A2.ARO1] H-111, Beluga River Unit Asset Retirement Obligation Calculation for ML&P's 70% Share of 2016 Purchase of CPAI 1/3 Interest. The surcharge is calculated based on ML&P's share of the 2037/2038 value of ARO.

[A2.35] TA481-8, filed January 21, 2020. Fourth Amendment to Hilcorp Agreement, for 2021-2028; flat at Hilcorp 2028 price level for 2028-2034.
[A2.39] Order U-16-012 (14), *Order Affirming Bench Ruling Granting Joint Request, Affirming Bench Ruling Granting Petition for Confidential Treatment, Affirming Bench Ruling Accepting Stipulation, Affirming Bench Ruling Granting*
[A2.48] Calculated from the acquisition cost of $44.4 million less cumulated depreciation and amortization. Historical depreciation and amortization costs are used for 2016-2018, in TA441-8, filed June 30, 2017; TA459-8, filed June 26, 2018; TA473-8, filed June 28, 2019, at Exhibit 12. Future depreciation and amortization costs are projected according to the formulas. See Order U-16-062, Order Accepting Stipulation, dated September 17, 2017.
[A2.52] Calculated annual interest expenses, according to a mortgage style repayment formula, with $44.4 million for the Chugach acquisition cost in 2016, 2.58 percent in annual interest rate, and repayment period of 16 years. *See* Chugach's Compliance Filing to U-16-062(7) / U-16-074(7) – Beluga River Unit Gas Transfer Price, filed September 29, 2017.
[A2.56] TA473-8, filed June 28, 2019, at Exhibit 12 page 2, Chugach 2018 Actuals.
[A2.ARO2] TA474-8, filed on August 28, 2019, at Exhibit 2, Beluga River Unit Asset Retirement Obligation. The ARO depreciation expense is calculated based on Chugach's share of the 2037/2038 value of ARO.
[A2.58] Calculated as the historical annual average A&G costs for 2016-2018. *See* TA441-8, filed June 30, 2017; TA459-8, filed June 26, 2018; TA473-8, filed June 28, 2019, at Exhibit 12.
[A2.ARO5] The total of ML&P's ARO revenue and Chugach's ARO
[A2.66] TA481-8, filed January 21, 2020. Fourth Amendment to Hilcorp Agreement, for 2021-2028; flat at Hilcorp 2028 price level for 2028-2034.

Schedule B - Amortization of ML&P Legacy Ratepayer Contributed Capital

Ref.	Item	Input
B1	ML&P Prepayment ($)	$136,002,239
B2	Term of Rebate (year)	10
B3	Interest Rate (%)	5.00%

Item Ref.	Year	Annual Payment ($)
Formula		B4
		Levelized Installment
	2021	$17,612,912
	2022	$17,612,912
	2023	$17,612,912

Schedule D - Chugach Cost of Power Adjustment

Documentation of Sources:

All the inputs that are projected flat are from Chugach's COPA filings July 2018 - June 2019. TA465-8, filed December 20, 2018; TA470-8, filed March 22, 2019; TA473-8, filed June 28, 2019; TA476-8, September 27, 2019, at Attachment 2.
[D5] TA481-8, filed January 21, 2020, at Hilcorp Agreement - Fourth Amendment for 2021-2028.
[D21] TA481-8, filed January 21, 2020, at Hilcorp Agreement - Fourth Amendment for 2021-2028; flat at Hilcorp 2028 price level for 2028-2034.
[D45] TA461-8, filed September 27, 2018, at Fuel_PP_Exh_01 A, cell B77 time 4 for 2018 total credit; TA451-8, filed February 14, 2018. Furie exchange agreement indicates the Furie credit will expire in March 2023.

Documentation of Sources:

[F1.4] Average of historical ML&P to Chugach economy energy sales volumes as a percentage of total ML&P economy energy sales volume for the period of July 2018 through June 2019. Sourced from ML&P's Cost of Power Adjustment quarterly filings: TA369-121, filed November 26, 2018; TA370-121, filed February 15, 2019; TA372-121, filed May 22, 2019; and TA373-121, filed August 16, 2019, at Attachment No. 3.

[F1.6] Average of historical ML&P to Chugach economy energy sales margins for the period of July 2018 through June 2019. Sourced from ML&P's Cost of Power Adjustment quarterlyfilings: TA369-121, filed November 26, 2018; TA370-121, filed February 15, 2019; TA372-121, filed May 22, 2019; and TA373-121, filed August 16, 2019, at Attachment No. 3.

[F1.11] Beluga 5 and 6 are assumed to be run for the sole purpose of generating economy energy sales. The remainder of the economy energy sales volume is assumed to be generated at average cost.

[FA1-1] *Municipal Light & Power's Filing in Compliance with Order U-18-102(32)/U-19-020(27)/U-19-021(27),* filed October 29, 2019, at MLP005436 Resource Hour.

[FA1-2] Municipal Light & Power's Filing in Compliance with Order U-18-102(32)/U-19-020(27)/U-19-021(27), filed October 29, 2019, at MLP005436 Resource Hour.

[FB1-1] *Municipal Light & Power's Filing in Compliance with Order U-18-102(32)/U-19-020(27)/U-19-021(27),* filed October 29, 2019, at MLP005601 Resource Hour.

[FB1-3] *Municipal Light & Power's Filing in Compliance with Order U-18-102(32)/U-19-020(27)/U-19-021(27),* filed October 29, 2019, at MLP005601 Resource Hour.

[FD1-1] *Municipal Light & Power's Filing in Compliance with Order U-18-102(32)/U-19-020(27)/U-19-021(27),* filed October 29, 2019, at MLP005701 Resource Hour.

[FD1-2] *Municipal Light & Power's Filing in Compliance with Order U-18-102(32)/U-19-020(27)/U-19-021(27),* filed October 29, 2019, at MLP005701 Resource Hour.

Schedule G - Mill Rate for ML&P MUSA and PILT

Ref.	District No.	Average Historical Levy (per mill)	Historical Net ML&P Classified Plant in Service ($)	Proportion of Total Plant by District (%)	Illustrative Plant by District in 2020 ($)
		G-1	G-2	G-3	G-4
				[G1-G7] / [G8]	[G1-G7][G-3] x $[H16]_{2020}$
G1	District 1	$15.43	$225,410,112	30.2%	$222,537,600
G2	District 3	$15.43	$149,380,209	20.0%	$147,476,583
G3	District 5	$12.93	$16,001	0.0%	$15,797
G4	District 10	$15.23	$597,521	0.1%	$589,906
G5	District 16	$10.18	$365,981,513	49.0%	$361,317,630
G6	District 22	$14.07	$5,063,248	0.7%	$4,998,725
G7	District 51	$14.33	$452,442	0.1%	$446,676
G8	**Total**		**$746,901,046**		**$737,382,918**
G9	**District Weighted Average Mill Rate**		[G1-G7][G-1] x [G1-G7][G-4] / [G8][G-4]		**$12.85**

STATE OF ALASKA

RECEIVED
By the Regulatory Commission of Alaska on Oct 28, 2019

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners:		Robert M. Pickett, Chairman Stephen McAlpine Antony G. Scott Daniel A. Sullivan Janis W. Wilson
In the Matter of the Investigation Into the Beluga River Unit Management Practices of the MUNICIPALITY OF ANCHORAGE d/b/a MUNICIPAL LIGHT & POWER DEPARTMENT	)	U-18-102
In the Matter of the Petition Filed by CHUGACH ELECTRIC ASSOCIATION, INC. to Acquire Most of the Assets of the MUNICIPALITY OF ANCHORAGE d/b/a MUNICIPAL LIGHT & POWER DEPARTMENT, to Amend Its Certificate of Public Convenience and Necessity No. 8 to Add the Retail Electric Service Area Currently Served by the MUNICIPALITY OF ANCHORAGE d/b/a MUNICIPAL LIGHT & POWER DEPARTMENT Under Certificate of Public Convenience and Necessity No. 121, and for Related Regulatory Approvals	)	U-19-020
In the Matter of the Application Filed by the MUNICIPALITY OF ANCHORAGE d/b/a MUNICIPAL LIGHT & POWER DEPARTMENT to Amend Its Certificate of Public Convenience and Necessity No. 121, to Eliminate Its Retail Electric Service Area and Add the Eklutna Hydroelectric Project to Its Service Area, and to Lift the Dividend Restriction	)	U-19-021

STIPULATION RESOLVING ALL ISSUES

I. Introduction.

This stipulation ("Stipulation") is by and among the Municipality of Anchorage d/b/a Municipal Light and Power ("ML&P"), Chugach Electric Association, Inc. ("Chugach"),

Providence Health & Services ("PHS" or "Providence"), the Federal Executive Agencies ("FEA"), Matanuska Electric Association, Inc. ("MEA"), the Alaska Energy Authority ("AEA"), and ENSTAR Natural Gas Company, a Division of SEMCO Energy, Inc. ("ENSTAR") (collectively, the "Settling Parties"). This Stipulation is submitted for acceptance by the Regulatory Commission of Alaska ("Commission" or "RCA") pursuant to AS 42.05.191, 3 AAC 48.090(d)(2), and 3 AAC 48.166.

II. Background.

On November 5, 2018, on its own motion, the Commission opened Docket U-18-102 to investigate the disposition and pricing of ML&P's Beluga River Unit ("BRU") gas used to produce electric power for wholesale (economy energy) sales and to investigate the adequacy of the Asset Retirement Obligation ("ARO") surcharge to ML&P's BRU gas transfer price ("GTP"). The Commission issued questions relating to these matters, required ML&P to respond through prefiled testimony, established a timeline for decision, invited the Attorney General's Office, Regulatory Affairs and Public Advocacy Section ("RAPA") to participate, and set a deadline for other interested parties to intervene. On December 31, 2018, ML&P submitted the Prefiled Direct Testimony of Anna C. Henderson and the Prefiled Direct Testimony of Mark A. Johnston.

RAPA elected to participate in Docket U-18-102, and petitions to intervene were filed by PHS, ENSTAR, MEA, and Golden Valley Electric Association, Inc. ("GVEA"). The Commission granted the petitions to intervene and scheduled a prehearing conference.

On May 1, 2019, RAPA filed the Prefiled Testimony of Ralph C. Smith. Also on May 1, 2019, PHS filed the Direct Testimony of Mark E. Garrett, which was supplemented on

June 19, 2019. PHS filed a revised version of Mr. Garrett's supplemental testimony on August 2, 2019, and a further revised version on August 8, 2019.

On December 28, 2018, Chugach and the Municipality of Anchorage ("MOA") entered into an Asset Purchase and Sale Agreement ("APA"), Eklutna Power Purchase Agreement ("Eklutna PPA"), the BRU Fuel Agreement, and the Payment in Lieu of Taxes Agreement ("PILT Agreement") (collectively, the "Transaction Agreements") related to the MOA's proposed sale of the majority of ML&P's assets to Chugach ("Transaction").

Chugach and ML&P filed their applications and requests for various regulatory approvals related to the Transaction on April 1, 2019, and April 5, 2019, respectively. Chugach also filed prefiled direct testimony and supporting exhibits for the following witnesses: Lee D. Thibert, Arthur W. Miller, Sherri Highers, Brian Hickey, Dustin Highers, Todd McCarty, Thomas A. Lovas, and Kurt Strunk. The Transaction Agreements were included as exhibits to the testimony of Arthur W. Miller. On September 27, 2019, Chugach filed first amendments to the Eklutna PPA and the PILT Agreement. On September 30, 2019, Chugach filed a first amendment to the APA.

The Commission issued public notice of the applications and received public comments. The Commission opened Dockets U-19-020 and U-19-021 to consider Chugach's and ML&P's applications, scheduled a prehearing conference to discuss scheduling and consolidation, invited participation from RAPA, and set a deadline for other interested parties to file petitions to intervene by April 23, 2019. Petitions to intervene were filed by MEA, PHS, GVEA, FEA and Homer Electric Association, Inc.

On May 8, 2019, the Commission consolidated Docket U-18-102 with Dockets U-19-020/U-19-021. The Commission also granted the petitions to intervene and designated

Chugach as a party to Docket U-18-102. On August 19, 2019, the Commission granted a late-filed petition to intervene by the AEA. On June 7, 2019, Chugach submitted the Prefiled Direct Testimony of Mark B. Fouts and the Supplemental Prefiled Testimony of Arthur W. Miller relating to the BRU management issues raised in Docket U-18-102.

On July 12, 2019, the following parties submitted prefiled responsive testimony regarding the Transaction issues in Dockets U-19-020/U-19-021: FEA submitted the Prefiled Responsive Testimony of Michael P. Gorman; MEA submitted the Prefiled Response Testimony of Anthony M. Izzo; and PHS submitted the Direct Testimony of Richard Beam and the Direct Testimony of Mark E. Garrett.

On August 2, 2019, Chugach filed prefiled reply testimony and supporting exhibits for Arthur W. Miller, Sherri Highers, Brian Hickey, Dustin Highers, Thomas A. Lovas, and Kurt Strunk. A revised Exhibit TAL-04 to the reply testimony of Thomas A. Lovas was filed on August 23, 2019. A revised Exhibit TAL-03 to the reply testimony of Thomas A. Lovas was filed on August 30, 2019. On August 2, 2019, ML&P submitted prefiled reply testimony and supporting exhibits for the following witnesses: Rebecca A. Windt Pearson, Anna C. Henderson, and John J. Reed. An errata to Ms. Windt Pearson's reply testimony was filed on August 8, 2019. A revised Exhibit JJR-01 to the reply testimony of John J. Reed was filed on September 3, 2019. The testimonies filed on August 2, 2019, related to the Transaction issues in Dockets U-19-020/U-19-021.

A hearing primarily focused on the BRU management issues raised in Docket U-18-102 was commenced on August 12, 2019, and concluded on August 14, 2019. At the hearing, ML&P witness Anna C. Henderson adopted the Prefiled Direct Testimony of Mark A. Johnston, who was not available to testify. Witnesses Anna C. Henderson, Arthur W. Miller, Mark Fouts,

Mark J. Garrett and Ralph C. Smith were subject to cross-examination on their respective prefiled testimonies, followed by Commissioner questioning, re-cross examination, and re-direct examination.

A hearing in Dockets U-19-020 and U-19-021 commenced on August 27, 2019, and recessed for a two week break on September 13, 2019. During the hearing on August 27, 2019, the Commission granted GVEA's request to be excused from further participation in the hearing. Prior to the recess, witnesses Lee D. Thibert, Arthur W. Miller, Sherri Highers, Brian Hickey, Dustin Highers, Todd McCarty, Thomas A. Lovas, Kurt Strunk, Richard Beam, and Michael P. Gorman were subject to cross-examination on their respective prefiled testimonies, followed by Commissioner questioning, re-cross examination, and re-direct examination. ML&P's witness Rebecca A. Windt Pearson was subject to cross-examination and Commissioner questioning on her testimony. Re-cross and re-direct examination of Ms. Windt Pearson had not been completed when the hearing was recessed.

On October 1, 2019, the Commission recessed the hearing until further order to allow the parties to prepare and file a stipulation resolving all issues in these dockets.

The Settling Parties and their counsel have conferred regarding the disputed issues in these dockets, exchanged and reviewed additional information, and have reached an agreement that resolves all disputed issues in these dockets. This Stipulation memorializes that agreement.

III. Stipulation.

The Settling Parties agree as follows:

A. Requested Approvals. Chugach's and ML&P's requested approvals in Dockets U-19-020 and U-19-021 should be approved as filed and amended as of the filing date of this Stipulation, except as otherwise agreed to and set forth in this Stipulation.

B. Modification of Transaction. Capitalized terms not defined in this Stipulation shall have the meaning set forth in the APA, as amended.

1. Purchase Price Adjustment. Upfront Payment and the Purchase Price shall be reduced by the amount by which the net book value, at Closing, of the Purchased Assets is less than $715.4 million, but shall not be increased if the net book value exceeds $715.4 million. In addition to any downward adjustment based on the net book value of the Purchased Assets under the previous sentence, the Upfront Payment and Purchase Price shall be reduced by $10 million.

2. Immediate Rate Reductions for ML&P Legacy Service Area Customers.

a. By the time of Closing, ML&P shall create a new restricted rate reduction account ("RRR Account") and shall deposit $36 million of ML&P's unrestricted cash into the RRR Account. Once funded, use of the RRR Account funds shall be restricted to providing the rate reductions set forth in Section III.B.2.c.

b. The RRR Account shall be included as Transferred Cash, but will not change the Purchase Price.

c. Chugach shall prudently manage the RRR Account funds for the benefit of ML&P legacy service area to ensure the principal balance and any interest realized on the deposits are properly invested, accounted for, and ultimately credited back to customers in the ML&P legacy service area. Chugach shall use the RRR Account funds to provide rate reductions to customers in the ML&P legacy service area over a period of three years until the RRR Account funds are exhausted. Beginning with Chugach's first Fuel and Purchased Power Cost Adjustment ("FPPCA") filing for the ML&P legacy service area following Closing, Chugach shall include a credit (reduction) to the calculated FPPCA rates for ML&P legacy

service area customers ("RRR Account Credit"). The amount of the RRR Account Credit shall be calculated quarterly to facilitate disbursement of the RRR Account funds, through the ML&P legacy service area FPPCA rates, in approximately equal amounts every quarter for a three-year period, or until all of the RRR Account funds have been distributed through the FPPCA rate adjustment process.

3. APA Amendments. The APA, as previously amended, shall be further amended as shown on the form APA Amendment set forth in Exhibit 1 to reflect the certain provisions contained in this Section III.B.

C. Chugach Post-Closing Report Filings. Chugach shall submit to the Commission by April 1 every year from 2021 through 2028 a report setting forth the net savings achieved from the Transaction for the reporting period and the cumulative net savings achieved since Closing, as of December 31 of the preceding year. The report shall include: (1) a spreadsheet based on Chugach's "Master Cost Savings Model" identified in discovery as CHU-000001 identifying actual performance in comparison with projections; (2) a spreadsheet identifying each position attrited as a results of the Transaction and the amount of associated savings, as compared with the positions projected for attrition in Chugach's "Master Personnel Savings" model identified in discovery as CHU-000692; (3) a narrative description of Chugach's integration of the two utility systems and achievement of savings, including any areas in which achieved savings have been or are projected to be significantly more or less than originally projected prior to the Transaction; (4) information demonstrating Chugach's compliance with its obligations under Section III.G. of this Stipulation to amortize the Secondary Regulatory Asset over a three-year period; and (5) information demonstrating Chugach's compliance with its obligation under Section III.G. of this Stipulation to recover costs associated with the Eklutna

PPA through base rates from all Chugach customers (ML&P and Chugach legacy customers) rather than through Chugach's FPPCA.

Chugach shall also supply information in its quarterly FPPCA filing demonstrating Chugach's compliance with (1) its obligations under Section III.B.2.c. of this Stipulation regarding the RRR Account funds, and (2) its obligations under Section III.F. regarding Chugach's post-Closing use of BRU gas, including, but not limited to, any use by Chugach of BRU gas from one utility's legacy BRU interest to serve native load in the other legacy territory. These FPPCA filing obligations shall continue for the life of the RRR Account and the BRU, respectively.

D. Termination of Order U-16-094(9)/U-17-008(13) Remand Proceeding. The Settling Parties agree that the remand proceeding in Dockets U-16-094/U-17-008 (the "Remand Proceeding") may be terminated by the Commission without further action, which is an integral component of the Settling Parties' resolution of the issues in Dockets U-18-102, U-19-020, and U-19-021. Within five business days from the filing of this Stipulation, Providence and ML&P shall cause a stipulation (the "Remand Stipulation") to be filed in Dockets U-16-094/U-17-008. The Remand Stipulation shall: (1) request that the Commission vacate the briefing schedule currently stayed in that proceeding, (2) provide that further proceedings are not required, and that Commission acceptance of the Remand Stipulation shall terminate the Remand Proceeding without further action, except to the extent that the Commission issues a final order closing the Remand Proceeding docket; (3) recognize that termination of the Remand Proceeding shall have no effect on ML&P's currently approved base rates; and (4) include language comparable to General Condition A of this Stipulation below. The Remand Stipulation shall be substantially in the form of Exhibit 2 attached to this Stipulation, subject to ministerial changes agreed by

Providence and MOA (such as the potential addition of parties or alteration of form to a motion rather than a stipulation) that do not change the relief sought, or the terms and conditions provided for, in Exhibit 2. The Settling Parties agree not to challenge, appeal, or seek reconsideration of any order by the Commission terminating the Remand Proceeding consistent with this Stipulation. For clarity, nothing in this Stipulation shall affect Providence's pending appeal of Order U-16-094(10)/U-17-008(14) (the order denying refunds) in Alaska Superior Court Case No. 3AN-18-07459 Civil.

E. Post-Closing MOA Community Donation for the Alaska Center for Treatment. Within five years after Closing (the "Expenditure Deadline"), subject to Anchorage Municipal Assembly appropriation, MOA shall spend $15 million toward the planning, permitting, design, construction, and related demolition costs of the Alaska Center for Treatment (the "Required Use"), a planned substance use disorder center that will serve the communities of Southcentral Alaska by offering some combination of outpatient and inpatient treatment options, transitional housing services, and crisis stabilization. The Alaska Center for Treatment is anticipated to be constructed on Municipality of Anchorage land, owned by the Municipality, and operated by a third-party operator to be selected through an open procurement process in accordance with Title 7 of Anchorage Municipal Code. This community benefit project is expected to fill a critical void in services in Anchorage that impacts all residents of the Municipality of Anchorage.

If any of the following conditions is not met as of, or at any time after, the Expenditure Deadline, any amount that has not been spent by the Municipality of Anchorage for the Required Use shall be offset against the next payment(s) due from Chugach to the Municipality pursuant to the Eklutna PPA in accordance with the proposed Amendment No. 3 to the Eklutna PPA,

attached as Exhibit 3, so that any funds not expended for this community benefit project will instead be used for the benefit of ratepayers through reduced electricity rates: (1) the funds shall be and remain appropriated for the Required Use; (2) unexpended funds appropriated shall be and remain in a dedicated fund for the Required Use; (3) one or more contracts requiring the expenditure of the entire $15 million have been awarded by the Municipality of Anchorage pursuant to Title 7 of Anchorage Municipal Code; and (4) the Municipality of Anchorage is and remains a party to such contract or contracts.

Any Settling Party seeking to enforce this Section III.E of this Stipulation shall do so through a civil action in a court of competent jurisdiction and venue.

F. Chugach's Post-Closing Use of Owned BRU Gas.

1. Capitalized terms not defined in this Section of the Stipulation shall have the meaning set forth in the BRU Fuel Agreement, as amended.

2. For ratemaking purposes, Chugach shall separately account for the costs of producing gas from the legacy ML&P and legacy Chugach BRU interests and shall separately flow the costs and benefits of each BRU ownership interest through separate GTPs and fuel charges to the respective ratepayers in the ML&P legacy service area and Chugach legacy service area over the economic life of the BRU.

3. Chugach shall: (1) before entering into any economy energy sale using Chugach-owned BRU gas (as distinguished from gas purchased from another BRU producer), estimate and document the margin it will earn on that economy energy sale using the market value proxy specified in Section III.F.6 for determining the value of BRU gas used for the specific sale; and (2) maintain records of all such estimates and file them with the Commission with each quarterly FPPCA filing.

4. If Chugach elects to use gas sourced from either legacy utility's ownership interest in the BRU to generate electricity for economy energy sales, it shall only make such a sale consistent with Tariff Sheet No. 101 of Chugach's tariff, using the market value of the gas (as determined in advance pursuant to Section III.F.3) to determine the cost of "additional fuel" as that term is used in the tariff. Unless otherwise ordered by the Commission: (1) Each time Chugach elects to use gas sourced from either the legacy Chugach BRU Interest or the legacy ML&P BRU Interest to generate electricity for economy energy sales, it shall also offer those same BRU natural gas volumes to ENSTAR for purchase; and (2) if ENSTAR offers more for the natural gas volumes than the market value of the gas (as determined by Chugach in advance pursuant to Section III.F.3), Chugach shall sell those natural gas volumes to ENSTAR. If Chugach uses gas sourced from either the legacy Chugach BRU interest or the legacy ML&P BRU interest to generate electricity for economy energy sales, or if Chugach sells gas to ENSTAR pursuant to this Section, Chugach shall credit the customers in the legacy service area whose BRU interest supplied the gas for the proxy market value of such gas as determined in advance in Section III.F.3.

5. If Chugach elects to use BRU gas sourced from one legacy utility's ownership interest in the BRU (which legacy utility's territory is hereafter referred to as the "Supplying Territory") to generate electricity to serve native load in the other legacy service area (the "Served Territory"), Chugach shall credit the customers in the Supplying Territory for the market value proxy price of such gas as determined in Section III.F.3, and shall charge the same market value proxy price to the customers in the Served Territory. If Chugach elects to use BRU gas for the purpose described in this paragraph, it shall (1) restrict funds for the benefit of Supplying Territory ratepayers in an amount equal to any difference between the Supplying

Territory's BRU GTP and the market value proxy price of gas so used, (2) promptly make a filing proposing and seeking a Commission determination of whether the funds should be flowed back to Supplying Territory ratepayers through the FPPCA or by deposit in the DRLGS, and (3) contemporaneously with such filing, notify the Settling Parties of the filing.

When BRU gas is used for the purpose described in this paragraph, Chugach shall recognize the cost of the gas to the Supplying Territory as a BRU gas expense in the month the transaction occurred, valued on the basis of the GTP then in effect for the Supplying Territory multiplied by the volume of BRU gas purchased by the Served Territory. In addition, Chugach shall recognize the payment of such cost by the Served Territory ratepayers in the month the transaction occurred to ensure the Supplying Territory customers are not charged for the cost of producing gas purchased by the Served Territory.

6. Unless the Commission orders otherwise, the market value proxy for purposes of subparagraphs Section III.F.3-5 shall be the greater of:

(1) Chugach's opportunity cost of gas for meeting firm load requirements on its system, which generally would be Chugach's highest priced contracted gas; or

(2) 90 percent of the Cook Inlet Prevailing Value of Gas most recently published by the Alaska Department of Revenue pursuant to 15 AAC 55.173(b).

Chugach shall notify the Settling Parties in advance of any filing seeking Commission approval for a different market value proxy.

7. The BRU Fuel Agreement, as previously amended, shall be further amended as shown on the form BRU Fuel Agreement Amendment set forth in Exhibit 4 to reflect the certain provisions contained in this Section III.F.

G. Post-Closing Accounting and Ratemaking Treatments.

1. As part of the Transaction, Chugach has agreed to pay the MOA $75 million net present value over 35 years through the Eklutna PPA.[1] While Chugach maintains that the Eklutna PPA is priced based on Chugach's avoided cost of power, Chugach agrees that these payments constitute a premium above the net book value of ML&P's assets that should be recovered from all ratepayers of the combined utility. In that respect, Chugach agrees that costs associated with the Eklutna PPA will be recovered through base rates from all Chugach customers (ML&P and Chugach legacy customers) rather than through Chugach's FPPCA. In recognizing that payment of the premium embedded in the Eklutna PPA payments is necessary to achieve benefits for all Chugach customers (ML&P and Chugach legacy customers) and is projected to be offset by savings created by the Transaction, the premium paid through the Eklutna PPA will be allocated in base rates in a manner that is consistent with established regulatory principles and consistent with the Transaction savings base rate allocations so as to achieve the objective that all Chugach customers (ML&P and Chugach legacy customers alike) are fairly allocated the costs and achieved savings made possible by the Transaction.

2. As part of Chugach's petition for various regulatory approvals, Chugach has requested the Commission authorize the establishment of a regulatory asset to amortize approximately $127.6 million in premium, transaction, and transition costs over a 30-year period ("Primary Regulatory Asset"). Chugach has further requested that it be permitted to delay amortization of that regulatory asset for up to three years until it files its first combined general

[1] Based on a 5 percent discount rate. The $75 million is based on Chugach purchasing all ML&P generation from the Eklutna Hydroelectric Project. This payment amount (net present value) may be reduced to $48.2 million if MEA purchases a pro rata share of the output.

rate case. Under this Stipulation, Chugach shall (1) reduce the Primary Regulatory Asset by $26.6 million, (2) establish a separate smaller regulatory asset that would amortize $19 million over a three-year period beginning immediately following close of the Transaction ("Secondary Regulatory Asset"), and (3) annually expense the Eklutna PPA payments associated with that same three-year period, which are estimated to total approximately $7.6 million. In no event shall Chugach be obligated to expense in total more than $7.6 million in Eklutna PPA payments over that three-year period. Chugach's obligations to establish and amortize $19 million in the Secondary Regulatory Asset is contingent upon Chugach achieving a weighted average interest rate of no more than 4 percent on the financing necessary to close the Transaction, however the amount of the Secondary Regulatory Asset will be prorated down if the actual weighted average interest rate Chugach achieves on the financing is above 4.0 percent but below 5.0 percent. Chugach's obligation to annually expense the Eklutna PPA payments associated with that same three-year period is contingent upon Chugach achieving a weighted average interest rate of no more than 5 percent on the financing necessary to close the Transaction.

3. As an element of Chugach's first general rate case following Commission approval of the Transaction, Chugach shall evaluate and propose, based on the achieved savings resulting from the Transaction, an amortization period for the Primary Regulatory Asset with the underlying objectives to (1) recover the cost over a period of approximately 20 years consistent with the objective of delivering significant benefits of the Transaction to ratepayers over the entire period of amortization, and (2) not increase base rates as a result of the Transaction. Chugach shall provide and confer with the Settling Parties regarding its proposed amortization period prior to the general rate case being filed with the Commission.

H. Enforcement. Except as otherwise provided in Section III.E, each Settling Party shall have the right to seek enforcement by the Commission of all obligations imposed on Chugach and MOA under this Stipulation.

I. Settling Parties' Approvals. The Settling Parties recognize that approvals from the Anchorage Assembly are necessary in order to effectuate this settlement through amendments to the Transaction Agreements. The Settling Parties further recognize that such approval has not been received as of the time this Stipulation was filed with the Commission. The Settling Parties acknowledge that the validity and enforceability of the agreements contained in this Stipulation are conditioned upon receipt of all necessary approvals from the Anchorage Assembly and filing of proof of such approvals by November 1, 2019.

J. Subject to the preceding paragraph I, each Settling Party represents and warrants that it has the right, power, legal capacity, and authority to enter into, deliver, and perform its obligations under, this Stipulation. Without limiting the preceding sentence, each Settling Party represents and warrants that the execution, delivery, and performance of this Stipulation by the Settling Party has been duly authorized by all necessary action, and that the Settling Party has obtained all approvals and consents, including without limitation all internal corporate approvals, all governmental approvals, and all third-party consents, necessary for it to enter into, deliver, and perform its obligations under, this Stipulation.

IV. Evidentiary Support for this Stipulation

A. The filings in this proceeding provide evidentiary support for this Stipulation and include, but are not limited to:

1. The prefiled testimonies identified in Section II above and the exhibits thereto;

2. The transcripts of hearings, including the hearings conducted on August 12 to 14, 2019, and August 27 to September 13, 2019;

3. The exhibits identified as H-1 through H-113 introduced during the hearings;

4. The responses of Chugach and ML&P to Commission requests for information disclosures;

5. Any other reports, studies or information that the Commission required to be filed into the record; and

6. All additional testimonies, exhibits, studies, reports, or other information that is subsequently entered into the evidentiary record during the Commission's consideration of this Stipulation;

but not including any matter held inadmissible or stricken from the record.

B. For purposes of settlement only, the Settling Parties stipulate the Commission may admit and consider as evidence all prefiled testimonies, studies, exhibits, and disclosures filed in these dockets, or which may subsequently be filed in these dockets, which have not yet been admitted into the record, but not including any matter held inadmissible or stricken from the record.

C. For purposes of settlement only, each Settling Party agrees to waive cross-examination of other Settling Parties' witnesses who have not yet testified in the hearings in these dockets.

V. The Public Interest.

A. Under AS 42.05.191, "the commission may, without a hearing, issue an order approving any settlement supported by all the parties of record in a proceeding, including a

compromise settlement." Under 3 AAC 48.166, parties "may stipulate among themselves to the disposition of a proceeding or to the disposition of outstanding issues in a proceeding" and "the parties are bound by the terms of the stipulation if the commission accepts it." Under 3 AAC 48.090(d)(2), a "proceeding may be terminated by filing a stipulation agreed to by all parties of record provided the commission does not find that the public interest requires the proceeding to continue."

B. In light of these standards, the Settling Parties agree that the public interest does not require this proceeding to continue and that acceptance of this Stipulation is in the public interest. The Settling Parties further agree that acceptance or approval of this Stipulation, and approval of the Transaction and requested approvals, as modified by this Stipulation, are consistent with the public interest.

C. Acceptance of this Stipulation will conserve valuable resources of the Settling Parties, including the expenditure of time and resources that would otherwise be required to conduct an evidentiary hearing.

D. Acceptance of this Stipulation will conserve Commission resources by allowing it to avoid completing the hearing for U-19-020/U-19-021; adjudicating any disputed facts, policy, or law; stating and supporting its findings and conclusions in a formal order; and deciding a contested proceeding on remand of prudence and return on equity issues in Dockets U-16-094/U-17-008.

E. Acceptance of this Stipulation will allow the Settling Parties to avoid the uncertainty of litigation.

F. Acceptance of this Stipulation is consistent with the Commission's prior determinations that settlements should be encouraged, and litigation should be avoided when possible.[2]

VI. General Conditions.

A. The stipulated provisions set forth in Section III represent compromises among the Settling Parties regarding substantive disputes at issue in this proceeding for the sole purpose of resolving those issues. Except as otherwise expressly provided herein, this Stipulation is binding on the Settling Parties for the purposes of these dockets only; it shall have no precedential effect; and it shall not be cited, offered, or admitted in any other proceeding as substantive evidence, or to estop any Party hereto from asserting any legal or factual arguments in any subsequent proceeding.

B. The validity and enforceability of the agreements contained in this Stipulation are conditioned on the Commission's acceptance of this Stipulation in its entirety and without material changes. Section III.D of this Stipulation requires Providence and ML&P to file a stipulation in the remand proceeding in Dockets U-16-094/U-17-008 providing for termination of that proceeding. If the Commission, in its orders on this Stipulation and the Remand Stipulation, does not accept each Stipulation in its entirety or imposes material changes to either, any Settling Party may withdraw from this Stipulation by notice to the Settling Parties and Commission within 30 days of issuance of such order.

---

[2] *See* Order No. P-11-014(1) (ENSTAR Complaint v. KNPL) (Aug. 19, 2011) at 3; Order No. P-09-014(2) (KKPL Rate Case) (Feb. 5, 2010) at 4-5; Order No. U-06-134(15) (Chugach Rate Case) (Aug. 9, 2007) at 5; Order No. P-03-012(21) (KKPL Rate Case) (May 25, 2005) at 7; Order No. U-05-020(7) (Agrium Complaint v. CIGGS) (Jun. 24, 2005) at 3; Order No. P-91-002(26) (KPL Rate Case) (Jun. 3, 1994) at 2.

C. If any Settling Party withdraws from this Stipulation pursuant to paragraph VI.B. above, the Settling Parties reserve the right to present evidence and cross examine witnesses to support all of their positions at a public hearing as if this Stipulation had not been entered into. If this occurs, this Stipulation may not be entered into evidence, and no Settling Party may use this Stipulation or any part of it in this or any other proceeding as substantive evidence. If any Settling Party withdraws, matters admitted only for settlement purposes pursuant to Section IV shall not be considered to have been admitted, and each Settling Party shall have the right to object to or move to strike any such evidence. The Settling Parties agree to be bound by this paragraph VI.C. notwithstanding any failure of conditions precedent, termination of this Stipulation, or withdrawal herefrom by one or more Settling Parties.

D. The Settling Parties expressly waive their rights to challenge, appeal, or seek reconsideration of a Commission order accepting this Stipulation in its entirety with no material changes.

E. Nothing in this Stipulation is intended to, or shall, limit the Commission's powers as conferred by statute or bind the Commission in future proceedings to any position it accepts in this Stipulation.

F. Any notice or communication which may be or is required to be given pursuant to the terms of this Agreement shall be in writing, and any such notice or communication will be deemed to have been given if and when delivered by hand or by U.S. mail, postage prepaid:

If to the Municipality of Anchorage:

EXHIBIT 1

Form of Amendment No. 3 to the Asset Purchase and Sale Agreement

AMENDMENT NO. 3 TO ASSET PURCHASE AND SALE AGREEMENT

THIS AMENDMENT NO. 3 TO ASSET PURCHASE AND SALE AGREEMENT, dated as of the [●] day of [●], 2019 (this "**Amendment**"), between the Municipality of Anchorage, Alaska, a political subdivision organized under the laws of the State of Alaska ("**Seller**"), and Chugach Electric Association, Inc., a not-for-profit electric cooperative corporation organized under the laws of the State of Alaska ("**Buyer**").

RECITALS

WHEREAS, Buyer and Seller entered into that certain Asset Purchase and Sale Agreement, dated as of December 28, 2018 (the "**Original Agreement**"); capitalized terms used in this Amendment, if not otherwise defined herein, shall have the meanings set forth in the Original Agreement, as amended or modified pursuant to this Amendment or any Previous Amendment (as so amended or otherwise modified, the "**Asset Purchase Agreement**");

WHEREAS, pursuant to Section 10.10 of the Asset Purchase Agreement, Buyer and Seller may amend, modify or supplement the Original Agreement upon the execution and delivery of a written agreement executed by the Parties; and

WHEREAS, the Parties desire to make certain amendments to the Asset Purchase Agreement as provided in this Amendment.

NOW, THEREFORE, pursuant to Section 10.10 of the Asset Purchase Agreement and Section III.B.3 of the Stipulation (as defined in Article I of the Asset Purchase Agreement as amended pursuant to this Amendment), and in consideration for the premises and agreements in the Stipulation and as hereinafter set forth, the Parties, intending to be legally bound, agree as follows:

1. New Definitions. The following definitions are hereby added to Article I of the Asset Purchase Agreement:

> "**Rate Reduction Account**" means an account created and funded by Seller with a cash balance of $36,000,000 on the Closing Date.
>
> "**Stipulation**" means the Stipulation Resolving All Issues entered into by and among Seller, Buyer, Providence Health & Services, the Federal Executive Agencies, Matanuska Electric Association, Inc., Homer Electric Association, Inc., Alaska Energy Authority, and ENSTAR Natural Gas Company, a Division of SEMCO Energy, Inc. dated October [●], 2019, and accepted and approved by the RCA on [●].

2. Revised Definitions. The following definitions in Article I of the Asset Purchase Agreement are hereby amended and restated in their entirety as follows:

> "**BRU Fuel Agreement**" means the amended and restated BRU Fuel Agreement dated as of the date hereof between Seller and Buyer as the same may be amended on or before the Closing Date.

"**Transferred Cash**" means (A) cash in the Rate Reduction Account and (B) customer deposit cash or cash accounts, cash, cash equivalents, and securities (in each case to the extent constituting restricted assets and, in the case of cash contractually restricted in connection with Debt, to the extent not used by Seller to defease or repay the Closing Debt), including any such assets collected for payments in lieu of taxes, including pursuant to AMC 26.10.025 or held under or pursuant to ML&P's debt documents or representing the proceeds of bonds, deferred regulatory liability for gas sales funds, future gas purchases regulatory liabilities, underlift accounts and asset retirement obligation funds managed by ML&P or Seller, any decommissioning funds, utility underground requirements including those set forth in AS 42.05.381(h), (i), and (j) and AMC 21.07.050 and AMC Title 21 undergrounding funds, and any other cash collected from ratepayers for obligations assumed by Buyer including customer deposits. Exhibit J sets forth the Transferred Cash (other than the Rate Reduction Account) and separately identifies any cash contractually restricted in connection with Debt which will be used by Seller to defease or repay the Closing Debt, in each case as if the Closing had occurred as of December 31, 2017.

"**Upfront Payment**" means $757,800,000.

3. Amendment to Section 2.05(d). Section 2.05(d) of the Asset Purchase Agreement is hereby deleted in its entirety and replaced with the following:

(d) minus the absolute value of the Net Book Value Adjustment if the Net Book Value Adjustment is a negative number; *provided* that, if the Net Book Value Adjustment is a positive number, the Purchase Price shall not be adjusted to reflect the Net Book Value Adjustment or any portion thereof.

4. Addition of Section 6.32. The following is hereby added to the Asset Purchase Agreement as a new Section 6.32:

Section 6.32. **Use of Funds in Rate Reduction Account**. Buyer shall prudently manage funds in the Rate Reduction Account for the benefit of customers in the ML&P legacy service area to ensure the principal balance and any interest realized on the deposits are properly invested, accounted for, and ultimately credited back to customers in the ML&P legacy service area. The funds in the Rate Reduction Account shall be used by Buyer for the exclusive purpose of providing rate reductions to customers in the ML&P legacy service area in accordance with Section III.B.2.c of the Stipulation.

5. Effective Date of this Amendment. The effectiveness of this Amendment is expressly conditioned on the acceptance and approval of the Stipulation by the RCA. Except as expressly provided herein and the letter agreements dated March 8, 2019 and March 15, 2019, Amendment No. 1 to the Asset Purchase Agreement dated as of September 27, 2019, and Amendment No. 2 to the Asset Purchase Agreement dated as of [●], 2019 (the "**Previous Amendments**"), the Original Agreement and the Previous Amendments are not amended, supplemented, modified, revised or otherwise affected by this Amendment. This Amendment shall be deemed effective and in full force and effect as of the date first written above. On and after the date hereof, each reference in the Asset Purchase Agreement to "this Agreement",

"hereunder", "hereof", "herein" or words of like import referring to the Original Agreement or the Previous Amendments, shall mean and be a reference to the Asset Purchase Agreement and each reference to the Asset Purchase Agreement in any other agreements, documents or instruments executed and delivered pursuant to or in connection with the Asset Purchase Agreement shall be deemed to mean and be a reference to the Asset Purchase Agreement as amended by this Amendment and the Previous Amendments.

6. Binding Effect. This Amendment shall be binding upon and shall inure to the benefit of the Parties hereto and their respective successors and permitted assigns.

7. Governing Law. This Amendment shall be governed by and construed in accordance with the internal laws of the State of Alaska, without reference to conflicts of laws principles that would result in the application of the laws of any other jurisdiction.

8. Counterparts. This Amendment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Amendment delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Agreement.

[*Remainder of the page intentionally left blank*]

IN WITNESS WHEREOF, the parties hereto have caused this Amendment to be executed as of the date first written above by their respective officers and officials thereunto duly authorized.

Exhibit 2

Form of Stipulation for Docket U-17-008 Remand Proceeding

STATE OF ALASKA

REGULATORY COMMISSION OF ALASKA

Before Commissioners:	Robert M. Pickett, Chairman Stephen McAlpine Antony G. Scott Daniel A. Sullivan Janis W. Wilson

In the Matter of the Request Filed by the MUNICIPALITY OF ANCHORAGE d/b/a/ MUNICIPAL LIGHT & POWER DEPARTMENT for Approval to Establish Depreciation Rates	)	U-16-094
In the Matter of the Tariff Revision Designated as TA357-121 Filed by the MUNICIPALITY OF ANCHORAGE d/b/a/ MUNICIPAL LIGHT & POWER DEPARTMENT	)	U-17-008

STIPULATION FOR TERMINATION OF REMAND PROCEEDING

I. Introduction.

This Stipulation for Termination of Remand Proceeding ("Stipulation") is by and among the Municipality of Anchorage d/b/a Municipal Light and Power ("ML&P") and Providence Health & Services ("Providence") (collectively, the "Settling Parties"). This Stipulation is submitted for acceptance by the Regulatory Commission of Alaska ("Commission" or "RCA") pursuant to AS 42.05.191, 3 AAC 48.090(d)(2), and 3 AAC 48.166.

II. Background.

On March 23, 2018, the Commission issued Order No. U-16-094(9)/U-17-008(13), its final order resolving all issues raised in these proceedings ("Final Order"). In its Final Order, the Commission held, among other things, that Providence did not raise a serious doubt as to the prudence of ML&P's decision to build Plant 2A, and that ML&P should be allowed to earn a

return on equity of 10.70%. Providence appealed these rulings to the Superior Court. The Commission closed these dockets subject to reopening after conclusion of the appeal.

On May 20, 2019, the Superior Court issued an order in Providence's favor (the "Remand Order") and which reversed and remanded the Final Order. The Commission therefore reopened these dockets. On August 20, 2019, the Commission issued Order No. U-16-094(13)/ U-17-008(17) requiring that the parties brief the issues remanded by the Superior Court and setting a briefing schedule. The briefing schedule was stayed by Order No. U-16-094(14)/ U-17-008(18)/U-18-102(30)/U-19-020(24)/U-19-021(24), issued on October 3, 2019, in light of a tentative settlement in Consolidated Dockets U-18-102/U-19-020/U-19-021 (the "Transaction Dockets"). That settlement has since been finalized by a formal stipulation (the "Transaction Stipulation") in the Transaction Dockets, and requires ML&P and Providence to file this Stipulation to terminate the proceedings in these dockets.

III. Stipulation.

The Settling Parties agree as follows:

A. Vacating of Briefing Schedule. The Briefing Schedule established by Order Order No. U-16-094(13)/U-17-008(17) and subsequently stayed by Order No. U-16-094(14)/ U-17-008(18)/U-18-102(30)/U-19-020(24)/U-19-021(24) should be vacated.

B. Termination of This Proceeding. The Settling Parties stipulate and agree that this proceeding shall be terminated. Therefore, further proceedings are not required in this matter, and Commission acceptance of this Stipulation shall terminate this proceeding without further action, except to the extent that the Commission issues a final order closing these dockets. The Commission's acceptance of this Stipulation and the termination of this proceeding does not

constitute an adjudication or finding of fact with respect to any of the issues remanded to the Commission by the Superior Court in the Remand Order.

C. Base Rates. The termination of this proceeding shall have no effect on ML&P's currently approved base rates, which shall remain in effect until modified by the Commission in a subsequent proceeding.

D. Settling Parties' Approvals. Each Settling Party represents and warrants that it has the right, power, legal capacity, and authority to enter into, deliver, and perform its obligations under, this Stipulation. Without limiting the preceding sentence, each Settling Party represents and warrants that the execution, delivery, and performance of this Stipulation by the Settling Party has been duly authorized by all necessary action, and that the Settling Party has obtained all approvals and consents, including without limitation all internal corporate approvals, all governmental approvals, and all third-party consents, necessary for it to enter into, deliver, and perform its obligations under, this Stipulation.

IV. Evidentiary Support for this Stipulation.

The evidentiary support for this Stipulation includes all evidence that could be considered by the Commission in deciding the issues that are the subject of the Remand Order (including without limitation all prefiled testimony, all exhibits to prefiled testimony, all hearing testimony, and all hearing exhibits) and all evidence that is cited in the Transaction Stipulation as support for the Transaction Stipulation.

V. The Public Interest.

A. Under AS 42.05.191, "the commission may, without a hearing, issue an order approving any settlement supported by all the parties of record in a proceeding, including a compromise settlement." Under 3 AAC 48.166, parties "may stipulate among themselves to the

disposition of a proceeding or to the disposition of outstanding issues in a proceeding" and "the parties are bound by the terms of the stipulation if the commission accepts it." Under 3 AAC 48.090(d)(2), a "proceeding may be terminated by filing a stipulation agreed to by all parties of record provided the commission does not find that the public interest requires the proceeding to continue."

B. In light of these standards, the Settling Parties agree that the public interest does not require this proceeding to continue and that acceptance of this Stipulation is in the public interest. The Settling Parties further agree that acceptance or approval of this Stipulation, and approval of the Acquisition and requested approvals, as modified by this Stipulation, is consistent with the public interest.

C. Acceptance of this Stipulation will conserve valuable resources of the Settling Parties, including the expenditure of time and resources that would otherwise be required to brief and argue the issues that are the subject of the Remand Order, as well as the time and resources that would otherwise be required to brief and argue any appeal from a Commission decision on those issues.

D. Acceptance of this Stipulation will conserve Commission resources by allowing it to avoid adjudicating any disputed facts, policy, or law that are the subject of the Remand Order; stating and supporting its findings and conclusions in a formal order; and deciding the disputed prudence and return on equity issues in these dockets.

E. Acceptance of this Stipulation will allow the Settling Parties to avoid the uncertainty of litigation.

F. Acceptance of this Stipulation is consistent with the Commission's prior determinations that settlements should be encouraged, and litigation should be avoided when possible.[1]

VI. General Conditions.

A. The stipulated provisions set forth in Section III represent compromises among the Settling Parties regarding substantive disputes at issue in this proceeding for the sole purpose of resolving those issues. Except as otherwise expressly provided herein, this Stipulation is binding on the Settling Parties for the purposes of these dockets only; it shall have no precedential effect; and it shall not be cited, offered, or admitted in any other proceeding as substantive evidence, or to estop any Settling Party from asserting any legal or factual arguments in any subsequent proceeding.

B. This stipulation is filed in accordance with the requirements of the Transaction Stipulation. The validity and enforceability of the agreements contained in this Stipulation and the Transaction Stipulation are conditioned on the Commission's acceptance of each Stipulation in its entirety and without material change. If the Commission, in its orders on this Stipulation and the Transaction Stipulation, does not accept each Stipulation in its entirety or makes any material change, any Settling Party may withdraw from this Stipulation by notice to the Settling Parties and Commission within 30 days of issuance of such order.

C. If any Settling Party withdraws from this Stipulation pursuant to the preceding paragraph VI.B above, the Settling Parties may pursue all of their rights and remedies arising out

[1] *See* Order No. P-11-014(1) (ENSTAR Complaint v. KNPL) (Aug. 19, 2011) at 3; Order No. P-09-014(2) (KKPL Rate Case) (Feb. 5, 2010) at 4-5; Order No. U-06-134(15) (Chugach Rate Case) (Aug. 9, 2007) at 5; Order No. P-03-012(21) (KKPL Rate Case) (May 25, 2005) at 7; Order No. U-05-020(7) (Agrium Complaint v. CIGGS) (Jun. 24, 2005) at 3; Order No. P-91-002(26) (KPL Rate Case) (Jun. 3, 1994) at 2.

of or relating to the Remand Order as if this Stipulation had not been entered into. If this occurs, this Stipulation may not be entered into evidence, and no Settling Party may use this Stipulation or any part of it in this or any other proceeding as substantive evidence. The Settling Parties agree to be bound by this paragraph VI.C. notwithstanding any failure of conditions precedent or termination of this Stipulation or withdrawal herefrom by one or more Settling Parties.

D. For clarity, nothing in this Stipulation shall affect Providence's pending appeal of Order U-16-094(10)/U-17-008(14) (the order denying refunds) in Alaska Superior Court Case No. 3AN-18-07459 Civil.

E. Nothing in this Stipulation is intended to, or shall, limit the Commission's powers as conferred by statute or bind the Commission in future proceedings to any position it accepts in this Stipulation.

VII. Conclusion.

The Settling Parties request that the Commission accept this Stipulation in its entirety. As provided for in 3 AAC 48.166, the Parties request that the Commission issue its decision regarding this Stipulation within 30 days.

RESPECTULLY SUBMITTED this ____ day of _____, 2019.

Exhibit 3

Form of Amendment No. 3 to the Eklutna Power Purchase Agreement

AMENDMENT NO. 3 TO EKLUTNA POWER PURCHASE AGREEMENT

This AMENDMENT NO. 3 TO EKLUTNA POWER PURCHASE AGREEMENT, dated as of the [●] day of October, 2019 (this "**Eklutna PPA Amendment**"), is made and entered into by and between (i) **CHUGACH ELECTRIC ASSOCIATION, INC.**, an Alaska not-for-profit electric cooperative corporation ("**Purchaser**"), and (ii) the **MUNICIPALITY OF ANCHORAGE,** a political subdivision organized under the laws of the State of Alaska ("**Seller**"). Purchaser and Seller are hereinafter referred to individually as a "**Party**" and collectively as the "**Parties**".

RECITALS

WHEREAS, Purchaser and Seller entered into that certain Eklutna Power Purchase Agreement dated as of December 28, 2018 (the "**Eklutna PPA**");

WHEREAS, Section 15.7 of the Eklutna PPA provides that Purchaser and Seller may amend the Eklutna PPA upon the execution and delivery of a written agreement executed by each Party; and

NOW, THEREFORE, pursuant to Section 15.7 of the Eklutna PPA and Section III.E of the Stipulation (as defined in Exhibit A as amended pursuant to this Eklutna PPA Amendment), and in consideration for the premises and agreements in the Stipulation and as hereinafter set forth, the Parties, intending to be legally bound, agree as follows:

1. Revision to Section 8.2. Section 8.2 of the Eklutna PPA is hereby amended by the addition of a new subsection (C) reading in its entirety as follows:

> (C) If (i) Seller has not, on or before the fifth anniversary of the Closing (as defined in the Asset Purchase Agreement) (the "**Expenditure Deadline**"), received an appropriation of funds from the Assembly of Seller in the amount of $15 million for purposes of the planning, permitting, design, and construction (including any required demolition of existing structures) of the Alaska Center for Treatment, all as provided in Section III.E of the Stipulation (such purposes, the "**Required Use**"), or such appropriation ceases, at any time prior to the expenditure by Seller of the full amount of such $15 million for the Required Use, to remain in full force and effect, (ii) such funds have not, on or before the Expenditure Deadline, been deposited into a dedicated fund for use only for the Required Use, or any such funds (other than any of such funds that have been expended for the Required Use) cease, at any time prior to the expenditure by Seller of the full amount of such $15 million for the Required Use, to remain in such dedicated fund, (iii) one or more contracts requiring payment by Seller of the entire unexpended amount of such funds for the Required Use has not, on or before the Expenditure Deadline, been awarded by Seller pursuant to Title 7 of Anchorage Municipal Code, or (iv) Seller has not, on or before the Expenditure Deadline, become, or Seller ceases, at any time prior to the expenditure by Seller of the full amount of such $15 million for the Required Use, to remain, a party to such contract or contracts, then Purchaser shall offset against

any amounts due to Seller under this PPA any portion of such $15 million amount that has not been spent by Seller for the Required Use.

2. Amendment of Exhibit A. Exhibit A to the Eklutna PPA is hereby amended to add the following new defined terms:

"**Expenditure Deadline**" has the meaning set forth in Section 8.2(C).

"**Stipulation**" means the Stipulation Resolving All Issues entered into by and among Seller, Purchaser, Providence Health & Services, the Federal Executive Agencies, MEA, Homer Electric Association, Inc., Alaska Energy Authority, and ENSTAR Natural Gas Company, a Division of SEMCO Energy, Inc. dated October [●], 2019, and accepted and approved by the RCA on [●].

"**Required Use**" has the meaning set forth in Section 8.2(C).

3. Effective Date and Incorporation of Terms of Eklutna PPA. This Amendment shall be deemed effective as of the Effective Date as defined in Exhibit A to the Eklutna PPA and, without in any way limiting the effect of the amendment set forth in Section 1 of this Amendment, shall be subject to all the terms and conditions of the Eklutna PPA.

4. Counterparts. This Amendment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Amendment delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Amendment.

[*Remainder of the page intentionally left blank*]

IN WITNESS WHEREOF, the Parties have caused this Amendment to be executed as of the date first written above by their respective officers and officials thereunto duly authorized.

EXHIBIT 4

Form of Amended and Restated BRU Fuel Agreement

AMENDED AND RESTATED BRU FUEL AGREEMENT

This Amended and Restated BRU Fuel Agreement (this "**Agreement**"), dated as of [●], 2019, is made and entered into between Municipality of Anchorage, Alaska, a political subdivision organized under the laws of the State of Alaska ("**Municipality**"), and Chugach Electric Association, Inc., a not-for-profit electric cooperative corporation organized under the laws of the State of Alaska ("**Chugach**").

RECITALS

WHEREAS, Municipality and Chugach have entered into that certain Asset Purchase and Sale Agreement (as amended from time to time, the "**Asset Purchase Agreement**") dated as of December 28, 2018 pursuant to which Chugach will acquire substantially all of the assets of Municipality's electric utility referred to as Municipal Light and Power ("**ML&P**").

WHEREAS, as an integral part of the transactions contemplated by the Asset Purchase Agreement, Chugach and Municipality entered into the BRU Fuel Agreement (the "**Original BRU Agreement**") dated as of December 28, 2018 to provide for the pass-through of BRU costs of production to customers of Chugach after the Closing as stated herein.

WHEREAS, the Municipality and Chugach wish to amend and restate the Original BRU Agreement in its entirety as set forth herein.

NOW, THEREFORE, in consideration of the mutual covenants and agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree as follows:

ARTICLE I
DEFINITIONS

Capitalized terms used but not defined herein have the meanings assigned to them in the Asset Purchase Agreement. In addition, the following terms have the meanings specified or referred to in this ARTICLE I:

"**GTP**" means gas transfer price.

"**Legacy BRU Interest**" means the Legacy Chugach BRU Interest or the Legacy ML&P BRU Interest, as applicable.

"**Legacy Chugach BRU Interest**" means the interest in the BRU owned by Chugach immediately prior to Closing.

"Legacy Chugach Territory" means Chugach's retail service territory as in existence as of immediately prior to the Closing.

"**Legacy ML&P BRU Interest**" means the interest in the BRU owned by ML&P immediately prior to Closing.

"Legacy ML&P Territory" means ML&P's retail service territory as in existence as of immediately prior to the Closing.

"**Legacy Territory**" means the Legacy Chugach Territory or the Legacy ML&P Territory, as applicable.

"**Served Territory**" means (a) the Legacy Chugach Territory, to the extent that Chugach elects at any time after Closing to use gas sourced from the Legacy ML&P BRU Interest as fuel to generate electricity to serve native load in the Legacy Chugach Territory, and (b) the Legacy ML&P Territory, to the extent that Chugach elects at any time after Closing to use gas sourced from the Legacy Chugach BRU Interest as fuel to generate electricity to serve native load in the Legacy ML&P Territory.

"**Stipulation**" means the Stipulation Resolving All Issues entered into by and among ML&P, Chugach, Providence Health & Services, the Federal Executive Agencies, Matanuska Electric Association, Inc., Homer Electric Association, Inc., Alaska Energy Authority, and ENSTAR Natural Gas Company, a Division of SEMCO Energy, Inc., dated October [●], 2019, and accepted and approved by the Regulatory Commission of Alaska ("RCA") on [●].

"**Supplying Territory**" means (a) with respect to gas sourced from the Legacy ML&P BRU Interest, the Legacy ML&P Territory; and (b) with respect to gas sourced from the Legacy Chugach BRU Interest, the Legacy Chugach Territory.

"**Tariff**" has the meaning set forth in Section 2.03.

ARTICLE II
BRU MATTERS

Section 2.01 Legacy BRU Interest Accounting. For ratemaking purposes, Chugach shall separately account for the costs of producing gas from the Legacy ML&P BRU Interest and Legacy Chugach BRU Interest and shall separately flow the costs and benefits of each Legacy BRU Interest through separate GTPs and fuel charges to the respective ratepayers in the Legacy ML&P Territory and Legacy Chugach Territory, as applicable, over the economic life of the BRU.

Section 2.02 Documentation and Filing Requirements. Before entering into any economy energy sale of electricity generated using Chugach-owned BRU gas (as distinguished from gas purchased from another BRU producer), Chugach shall estimate and document the margin it will earn on that economy energy sale using the market value proxy specified in Section 2.05 to determine the value of BRU gas used as fuel for the specific sale. Chugach shall maintain records of all such estimates and file them with the RCA with each quarterly Fuel and Purchased Power Cost Adjustment filing.

Section 2.03 Limitations on Sales. If Chugach elects to use gas sourced from the Legacy ML&P BRU Interest or the Legacy Chugach BRU Interest to generate electricity for economy energy

sales, Chugach shall make such a sale only on a basis consistent with Tariff Sheet No. 101 of Chugach's current tariff (the "**Tariff**"), using the market value of the gas (as determined in advance pursuant to Section 2.02) to determine the cost of "additional fuel," as such term is used in the Tariff. Each time Chugach elects to use gas sourced from either the Legacy Chugach BRU Interest or the Legacy ML&P BRU Interest to generate electricity for economy energy sales, it shall also offer those same BRU natural gas volumes to ENSTAR for purchase. If ENSTAR offers more for the natural gas volumes than the market value of the gas (as determined by Chugach in advance pursuant to Section 2.02), Chugach shall sell those natural gas volumes to ENSTAR. If Chugach uses gas sourced from either the Legacy Chugach BRU Interest or the Legacy ML&P BRU Interest to generate electricity for economy energy sales, or if Chugach sells gas to ENSTAR pursuant to this Section 2.03, Chugach shall credit the amount of the proxy market value of such gas (as determined in advance pursuant to Section 2.02) to the customers in the Supplying Territory.

Section 2.04 Credits to Legacy Customers. If Chugach elects to use BRU gas sourced from the Legacy ML&P BRU Interest as fuel for the purpose of generating electricity to serve native load in the Legacy Chugach Territory, or to use BRU gas sourced from the Legacy Chugach BRU Interest as fuel for the purpose of generating electricity to serve native load in the Legacy ML&P Territory, Chugach shall credit the customers in the Supplying Territory in the amount of the market value proxy of such gas, as determined pursuant to Section 2.02, and shall charge the same market value proxy price to the customers in the Served Territory. If Chugach elects to use BRU gas for either such purpose, it shall (a) restrict funds for the benefit of ratepayers in the Supplying Territory in an amount equal to the product of (i) the positive difference, if any, obtained by subtracting the BRU GTP applicable to the Supplying Territory from the market value proxy price of gas so used and (ii) the volume of BRU gas so used; (b) promptly make a filing with the RCA proposing and seeking a determination by the RCA of whether such funds should be restored to ratepayers in the Supplying Territory through Chugach's quarterly Fuel and Purchased Power Cost Adjustment filing or instead by deposit in the Deferred Regulatory Liability for Gas Sales ("DRLGS") Account established pursuant to _____; and (c) contemporaneously with such filing, notify all parties to the Stipulation that such filing has been made. When BRU gas is used for the purpose described in this paragraph, Chugach shall recognize the cost of the gas to the Supplying Territory as a BRU gas expense in the month in which the transaction occurred, valued in an amount equal to the product of (i) the effective BRU GTP of the Supplying Territory and (ii) the volume of BRU gas purchased by the Served Territory. In addition, Chugach shall recognize the payment of such cost by the Served Territory ratepayers in the month in which such transaction occurred to ensure that the customers in the Supplying Territory are not charged for the cost of producing gas that is purchased by the Served Territory.

Section 2.05 Market Price. Unless the RCA approves another market value proxy, the market price for purposes of Sections 2.02, 2.03 and 2.04 shall be the greater of (i) Chugach's opportunity cost of gas for meeting firm load requirements on its system, which generally would be Chugach's highest priced contracted gas, or (ii) 90% of the Cook Inlet Prevailing Value of Gas most recently published by the Alaska Department of Revenue pursuant to 15 AAC 55.173(b). Chugach shall notify the parties to the Stipulation in advance of any filing seeking RCA approval for a different market value proxy.

ARTICLE III
MISCELLANEOUS

Section 3.01 Notices. All notices, requests, consents, claims, demands, waivers and other communications hereunder shall be in writing and shall be deemed to have been given (a) when delivered by hand (with written confirmation of receipt); (b) when received by the addressee if sent by a nationally recognized overnight courier (receipt requested); (c) on the date sent by e-mail of a PDF document (with confirmation of transmission) if sent during normal business hours of the recipient, and on the next Business Day if sent after normal business hours of the recipient or (d) on the third day after the date mailed, by certified or registered mail, return receipt requested, postage prepaid. Such communications must be sent to the respective parties at the following addresses (or at such other address for a party as shall be specified in a notice given in accordance with this Section 3.01):

If to Municipality:	Municipality of Anchorage 632 W. 6th Avenue, Suite 850 Anchorage, AK 99501 E-mail: william.falsey@anchorageak.gov Attention: William D. Falsey, Municipal Manager
with a copy to:	Municipality of Anchorage 632 W. 6th Avenue, Suite 850 Anchorage, AK 99501 E-mail: rebecca.windtpearson@anchorageak.gov Attention: Rebecca A. Windt Pearson, Municipal Attorney
and a copy to:	K&L Gates LLP 925 Fourth Avenue, Suite 2900 Seattle, WA 98104-1158 E-mail: eric.freedman@klgates.com Attention: Eric E. Freedman
If to Chugach:	Chugach Electric Association, Inc. 5601 Electron Drive Anchorage, AK 99518 E-mail: Lee_Thibert@chugachelectric.com Attention: Lee D. Thibert, Chief Executive Officer
with a copy to:	Chugach Electric Association, Inc. 5601 Electron Drive Anchorage, AK 99518 E-mail: Matthew_Clarkson@chugachelectric.com Attention: Matthew C. Clarkson, General Counsel
and a copy to:	Stinson LLP Suite 2600 50 South Sixth Street Minneapolis, MN 55402

E-mail: james.bertrand@stinson.com
Attention: James J. Bertrand

Section 3.02 Interpretation. For purposes of this Agreement, (a) the words "include," "includes" and "including" shall be deemed to be followed by the words "without limitation"; (b) the word "or" is not exclusive; and (c) the words "herein," "hereof," "hereby," "hereto" and "hereunder" refer to this Agreement as a whole. Unless the context otherwise requires, references herein: (x) to Articles, Sections and Exhibits means the Articles, Sections and Exhibits attached to this Agreement; (y) to an agreement, instrument or other document means such agreement, instrument or other document as amended, supplemented and modified from time to time to the extent permitted by the provisions thereof and (z) to a statute means such statute as amended from time to time and includes any successor legislation thereto and any regulations promulgated thereunder. This Agreement shall be construed without regard to any presumption or rule requiring construction or interpretation against the party drafting an instrument or causing any instrument to be drafted.

Section 3.03 Headings. The headings in this Agreement are for reference only and shall not affect the interpretation of this Agreement.

Section 3.04 Severability. If any term or provision of this Agreement is invalid, illegal or unenforceable in any jurisdiction, such invalidity, illegality or unenforceability shall not affect any other term or provision of this Agreement or invalidate or render unenforceable such term or provision in any other jurisdiction. Upon such determination that any term or other provision is invalid, illegal or unenforceable, the parties hereto shall negotiate in good faith to modify this Agreement so as to effect the original intent of the parties as closely as possible in a mutually acceptable manner in order that the transactions contemplated hereby be consummated as originally contemplated to the greatest extent possible.

Section 3.05 Entire Agreement. This Agreement constitutes the sole and entire agreement of the parties to this Agreement with respect to the subject matter contained herein, and supersedes all prior and contemporaneous understandings and agreements, both written and oral, with respect to such subject matter, including the Original BRU Agreement.

Section 3.06 Successors and Assigns. This Agreement shall be binding upon and shall inure to the benefit of the parties hereto and their respective successors and permitted assigns. Neither party may assign its rights or obligations hereunder without the prior written consent of the other party, which consent shall not be unreasonably withheld or delayed, except that Chugach may assign this Agreement to any Affiliate or any Person that acquires all or substantially all of its assets, whether by merger, asset purchase or otherwise. No assignment shall relieve the assigning party of any of its obligations hereunder.

Section 3.07 No Third-party Beneficiaries. This Agreement is for the sole benefit of the parties hereto and their respective successors and permitted assigns and nothing herein, express or implied, is intended to or shall confer upon any other Person or entity any legal or equitable right, benefit or remedy of any nature whatsoever under or by reason of this Agreement.

Section 3.08 Amendment and Modification; Waiver. This Agreement may only be amended, modified or supplemented by an agreement in writing signed by each party hereto. No waiver by any party of any of the provisions hereof shall be effective unless explicitly set forth in writing and signed by the party so waiving. No waiver by any party shall operate or be construed as a waiver in respect of any failure, breach or default not expressly identified by such written waiver, whether of a similar or different character, and whether occurring before or after that waiver. No failure to exercise, or delay in exercising, any right, remedy, power or privilege arising from this Agreement shall operate or be construed as a waiver thereof; nor shall any single or partial exercise of any right, remedy, power or privilege hereunder preclude any other or further exercise thereof or the exercise of any other right, remedy, power or privilege.

Section 3.09 Governing Law; Submission to Jurisdiction; Waiver of Jury Trial.

(a) This Agreement shall be governed by and construed in accordance with the internal laws of the State of Alaska, without regard to conflict of law principles that would result in the application of the laws of any other jurisdiction.

(b) ANY LEGAL SUIT, ACTION OR PROCEEDING ARISING OUT OF OR BASED UPON THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY MAY BE INSTITUTED IN THE SUPERIOR COURT OF THE STATE OF ALASKA IN IN THE THIRD JUDICIAL DISTRICT, LOCATED IN ANCHORAGE, ALASKA, AND EACH PARTY IRREVOCABLY SUBMITS TO THE EXCLUSIVE JURISDICTION OF SUCH COURT IN ANY SUCH SUIT, ACTION OR PROCEEDING. SERVICE OF PROCESS, SUMMONS, NOTICE OR OTHER DOCUMENT BY MAIL TO SUCH PARTY'S ADDRESS SET FORTH HEREIN SHALL BE EFFECTIVE SERVICE OF PROCESS FOR ANY SUIT, ACTION OR OTHER PROCEEDING BROUGHT IN SUCH COURT. THE PARTIES IRREVOCABLY AND UNCONDITIONALLY WAIVE ANY OBJECTION TO THE LAYING OF VENUE OF ANY SUIT, ACTION OR ANY PROCEEDING IN SUCH COURT AND IRREVOCABLY WAIVE AND AGREE NOT TO PLEAD OR CLAIM IN SUCH COURT THAT ANY SUCH SUIT, ACTION OR PROCEEDING BROUGHT IN SUCH COURT HAS BEEN BROUGHT IN AN INCONVENIENT FORUM.

(c) EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS AGREEMENT IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES AND, THEREFORE, EACH SUCH PARTY IRREVOCABLY AND UNCONDITIONALLY WAIVES ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LEGAL ACTION ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY. EACH PARTY TO THIS AGREEMENT CERTIFIES AND ACKNOWLEDGES THAT (A) NO REPRESENTATIVE OF ANY OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT SEEK TO ENFORCE THE FOREGOING WAIVER IN THE EVENT OF A LEGAL ACTION, (B) SUCH PARTY HAS CONSIDERED THE IMPLICATIONS OF THIS WAIVER, (C)

SUCH PARTY MAKES THIS WAIVER VOLUNTARILY, AND (D) SUCH PARTY HAS BEEN INDUCED TO ENTER INTO THIS AGREEMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION 3.09(c).

Section 3.10 Specific Enforcement. The parties agree that irreparable damage would occur if any provision of this Agreement were not performed in accordance with the terms hereof and that the parties shall be entitled to specific performance of the terms hereof, in addition to any other remedy to which they are entitled at law or in equity. The parties acknowledge and agree that (a) the parties shall be entitled to an injunction, specific performance or other equitable relief to prevent breaches of this Agreement and to enforce specifically the terms and provisions hereto, without proof of damages, this being in addition to any other remedy to which they are entitled under this Agreement and (b) the right to specific enforcement is an integral part of the transactions contemplated by this Agreement and without that right, neither Municipality nor Chugach would have entered into this Agreement. Each party agrees that it will not oppose the granting of specific performance and other equitable relief on the basis that the other parties have an adequate remedy at law or that an award of specific performance is not an appropriate remedy for any reason at law or equity. The parties acknowledge and agree that any party seeking an injunction to prevent breaches of this Agreement and to enforce specifically the terms and provisions of this Agreement in accordance with this Section 3.10 shall not be required to provide any bond or other security in connection with any such injunction.

Section 3.11 Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Agreement delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Agreement.

Section 3.12 Conditions. This Agreement and the Parties' obligations set forth herein are contingent upon the occurrence of the Closing (as defined in the Asset Purchase Agreement). In addition, this Agreement (1) does not take effect until the prior approval of the RCA and (2) is, at all times, subject to revision by the RCA.

[SIGNATURE PAGE FOLLOWS]

IN WITNESS WHEREOF, the parties hereto have caused this Amended and Restated BRU Fuel Agreement to be executed as of the date first written above by their respective officers and officials thereunto duly authorized.

STATE OF ALASKA

RECEIVED
By the Regulatory Commission of Alaska on Jan 15, 2020

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners:	Robert M. Pickett, Chairman Stephen McAlpine Antony G. Scott Daniel A. Sullivan Janis W. Wilson
In the Matter of the Investigation Into the Beluga River Unit Management Practices of the MUNICIPALITY OF ANCHORAGE d/b/a MUNICIPAL LIGHT & POWER DEPARTMENT	U-18-102
In the Matter of the Petition Filed by CHUGACH ELECTRIC ASSOCIATION, INC. to Acquire Most of the Assets of the MUNICIPALITY OF ANCHORAGE d/b/a MUNICIPAL LIGHT & POWER DEPARTMENT, to Amend Its Certificate of Public Convenience and Necessity No. 8 to Add the Retail Electric Service Area Currently Served by the MUNICIPALITY OF ANCHORAGE d/b/a MUNICIPAL LIGHT & POWER DEPARTMENT Under Certificate of Public Convenience and Necessity No. 121, and for Related Regulatory Approvals	U-19-020
In the Matter of the Application Filed by the MUNICIPALITY OF ANCHORAGE d/b/a MUNICIPAL LIGHT & POWER DEPARTMENT to Amend Its Certificate of Public Convenience and Necessity No. 121, to Eliminate Its Retail Electric Service Area and Add the Eklutna Hydroelectric Project to Its Service Area, and to Lift the Dividend Restriction	U-19-021

FIRST AMENDMENT TO STIPULATION RESOLVING ALL ISSUES

The Municipality of Anchorage d/b/a Municipal Light and Power ("ML&P"), Chugach Electric Association, Inc. ("Chugach"), Providence Health & Services ("Providence"), the Federal Executive Agencies ("FEA"), Matanuska Electric Association, Inc. ("MEA"), the Alaska

Energy Authority ("AEA"), ENSTAR Natural Gas Company, a Division of SEMCO Energy, Inc. ("ENSTAR"), and Homer Electric Association, Inc. and its wholly owned subsidiary Alaska Electric and Energy Cooperative, Inc. (together "HEA") (collectively, the "Settling Parties") submit this First Amendment to Stipulation Resolving All Issues.

I. Background.

On October 25, 2019, the Settling Parties entered into a stipulation (the "Transaction Stipulation") memorializing the Settling Parties' agreement resolving all issues in these dockets. Section III.D of the Transaction Stipulation required Providence and ML&P to cause an additional stipulation (the "Remand Stipulation"), in substantially the form of Exhibit 2 to the Transaction Stipulation, to be filed in Dockets U-16-094/U-17-008 (the "Remand Proceeding"), providing for termination of that proceeding.

In accordance with Section III.D of the Transaction Stipulation, the Remand Stipulation was filed in the Remand Proceeding on November 4, 2019. Providence and ML&P, the parties to the Remand Stipulation, have agreed to replace and supersede the Remand Stipulation with an Amended and Restated Stipulation for Termination of Remand Proceeding ("Amended Remand Stipulation") in substantially the form of Exhibit 5 hereto.[1] The Attorney General and FEA, which are also parties in the Remand Proceeding, have agreed to join in the Amended Remand Stipulation.

[1] The form of Amended and Restated Stipulation for Termination of Remand Proceeding is identified as Exhibit 5 so that the exhibits to Transaction Stipulation, as amended, are consecutively numbered.

II. Replacement of Remand Stipulation with Amended Remand Stipulation.

The Settling Parties agree that the Amended Remand Stipulation, when filed with the Commission in the Remand Proceeding, replaces and supersedes the Remand Stipulation required to be filed under Section III.D of the Transaction Stipulation.

III. Conclusion.

The Settling Parties respectfully request the Commission accept the Transaction Stipulation, along with the Amended Remand Stipulation, within the statutory timeline for issuance of a final decision in these Dockets.[2]

DATED this 15th day of January, 2020, at Anchorage, Alaska.

Exhibit 5

Form of Amended and Restated Stipulation for Docket U-17-008 Remand Proceeding

STATE OF ALASKA

REGULATORY COMMISSION OF ALASKA

Before Commissioners:		Robert M. Pickett, Chairman Stephen McAlpine Antony G. Scott Daniel A. Sullivan Janis W. Wilson
In the Matter of the Request Filed by the MUNICIPALITY OF ANCHORAGE d/b/a/ MUNICIPAL LIGHT & POWER DEPARTMENT for Approval to Establish Depreciation Rates	)	U-16-094
In the Matter of the Tariff Revision Designated as TA357-121 Filed by the MUNICIPALITY OF ANCHORAGE d/b/a/ MUNICIPAL LIGHT & POWER DEPARTMENT	)	U-17-008

AMENDED AND RESTATED STIPULATION FOR TERMINATION OF REMAND PROCEEDING

I. Introduction.

This Amended and Restated Stipulation for Termination of Remand Proceeding ("Stipulation") is by and among the Municipality of Anchorage d/b/a Municipal Light and Power ("ML&P"), Providence Health & Services ("Providence"), the Federal Executive Agencies ("FEA") and the Office of the Attorney General, Regulatory Affairs & Public Advocacy Section ("RAPA") (collectively, the "Settling Parties"). This Stipulation is submitted for acceptance by the Regulatory Commission of Alaska ("Commission" or "RCA") pursuant to AS 42.05.191, 3 AAC 48.090(d)(2), and 3 AAC 48.166.

II. Background.

On March 23, 2018, the Commission issued Order No. U-16-094(9)/U-17-008(13), its final order resolving all issues raised in these proceedings ("Final Order"). In its Final Order, the

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

Commission held, among other things, that Providence did not raise a serious doubt as to the prudence of ML&P's decision to build Plant 2A, and that ML&P should be allowed to earn a return on equity of 10.70%. Providence appealed these rulings to the Superior Court. The Commission closed these dockets subject to reopening after conclusion of the appeal.

On May 20, 2019, the Superior Court issued an order in Providence's favor (the "Remand Order") and which reversed and remanded the Final Order. The Commission therefore reopened these dockets. On August 20, 2019, the Commission issued Order No. U-16-094(13)/ U-17-008(17) requiring that the parties brief the issues remanded by the Superior Court and setting a briefing schedule. The briefing schedule was stayed by Order No. U-16-094(14)/ U-17-008(18)/U-18-102(30)/U-19-020(24)/U-19-021(24), issued on October 3, 2019, in light of a tentative settlement in Consolidated Dockets U-18-102/U-19-020/U-19-021 (the "Transaction Dockets"). That settlement has since been finalized by a formal stipulation (the "Transaction Stipulation") in the Transaction Dockets, and required ML&P and Providence to file the Stipulation for Termination of Remand Proceedings (filed November 4, 2019) to terminate the proceedings in these dockets. Upon approval of this Stipulation by all parties to the Transaction Stipulation, this Stipulation shall supersede the stipulation filed November 4, 2019 in its entirety.

III. Stipulation.

The Settling Parties agree as follows:

A. Vacating of Briefing Schedule. The Briefing Schedule established by Order No. U-16-094(13)/U-17-008(17) and subsequently stayed by Order No. U-16-094(14)/ U-17-008(18)/U-18-102(30)/U-19-020(24)/U-19-021(24) should be vacated.

A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

B. Base Rates and Return on Equity. For purposes of this Stipulation only, the Settling Parties stipulate and agree: (1) the record in these dockets contains the information and facts needed to resolve the issues remanded by the Superior Court in 3AN-18-06427 CI; and (2) the rates adjudicated by the Commission in Order U-16-094(10)/U-17-008(14) are just and reasonable and are supported by the record. The Settling Parties stipulate and agree to the permanent rates established by Order U-16-094(10)/U-17-008(14), which rates shall remain in effect until modified by the Commission in a subsequent proceeding.

C. Termination of Proceedings. No further proceedings are required in this matter. The Commission's acceptance of this Stipulation shall terminate these dockets without further action, except to the extent that the Commission issues a final order closing these dockets.

D. Settling Parties' Approvals. Each Settling Party represents and warrants that it has the right, power, legal capacity, and authority to enter into, deliver, and perform its obligations under, this Stipulation. Without limiting the preceding sentence, each Settling Party represents and warrants that the execution, delivery, and performance of this Stipulation by the Settling Party has been duly authorized by all necessary action, and that the Settling Party has obtained all approvals and consents, including without limitation all internal corporate approvals, all governmental approvals, and all third-party consents, necessary for it to enter into, deliver, and perform its obligations under, this Stipulation, except that this Stipulation requires the approvals called for in Section VI.B. below.

IV. Evidentiary Support for this Stipulation.

The evidentiary support for this Stipulation includes all evidence that could be considered by the Commission in deciding the issues that are the subject of the Remand Order (including

without limitation all prefiled testimony, all exhibits to prefiled testimony, all hearing testimony, and all hearing exhibits).

V. The Public Interest.

A. Under AS 42.05.191, "the commission may, without a hearing, issue an order approving any settlement supported by all the parties of record in a proceeding, including a compromise settlement." Under 3 AAC 48.166, parties "may stipulate among themselves to the disposition of a proceeding or to the disposition of outstanding issues in a proceeding" and "the parties are bound by the terms of the stipulation if the commission accepts it." Under 3 AAC 48.090(d)(2), a "proceeding may be terminated by filing a stipulation agreed to by all parties of record provided the commission does not find that the public interest requires the proceeding to continue."

B. In light of these standards, the Settling Parties agree that the public interest does not require this proceeding to continue and that acceptance of this Stipulation is in the public interest. The Settling Parties further agree that acceptance or approval of this Stipulation is consistent with the public interest.

C. Acceptance of this Stipulation will conserve valuable resources of the Settling Parties, including the expenditure of time and resources that would otherwise be required to brief and argue the issues that are the subject of the Remand Order, as well as the time and resources that would otherwise be required to brief and argue any appeal from a Commission decision on those issues.

D. Acceptance of this Stipulation will conserve Commission resources by allowing it to avoid adjudicating any disputed facts, policy, or law that are the subject of the Remand Order;

stating and supporting its findings and conclusions in a formal order; and deciding the disputed prudence and return on equity issues in these dockets.

E. Acceptance of this Stipulation will allow the Settling Parties to avoid the uncertainty of litigation.

F. Acceptance of this Stipulation is consistent with the Commission's prior determinations that settlements should be encouraged, and litigation should be avoided when possible.[1]

VI. General Conditions.

A. The stipulated provisions set forth in Section III represent compromises among the Settling Parties regarding substantive disputes at issue in this proceeding for the sole purpose of resolving those issues. Except as otherwise expressly provided herein, this Stipulation is binding on the Settling Parties for the purposes of these dockets only; it shall have no precedential effect; and it shall not be cited, offered, or admitted in any other proceeding as substantive evidence, or to estop any Settling Party from asserting any legal or factual arguments in any subsequent proceeding.

B. This Stipulation shall have no force or effect unless and until each party to the Transaction Dockets other than RAPA has agreed on the record in the Transaction Dockets that this Stipulation replaces and supersedes the Remand Stipulation required to be filed under the

Transaction Stipulation. Upon this Stipulation's entry into force, the validity and enforceability of the agreements contained in this Stipulation and the Transaction Stipulation are conditioned on the Commission's acceptance of each of those stipulations in its entirety and without material change. If the Commission, in its orders on this Stipulation and the Transaction Stipulation, does not accept both stipulations in their entirety or makes any material change, any Settling Party may withdraw from this Stipulation by notice to the Settling Parties and Commission within 30 days of issuance of such order.

C. If any Settling Party withdraws from this Stipulation pursuant to the preceding paragraph VI.B. above, the Settling Parties may pursue all of their rights and remedies arising out of or relating to the Remand Order as if this Stipulation had not been entered into. If this occurs, this Stipulation may not be entered into evidence, and no Settling Party may use this Stipulation or any part of it in this or any other proceeding as substantive evidence. The Settling Parties agree to be bound by this paragraph VI.C. notwithstanding any failure of conditions precedent or termination of this Stipulation or withdrawal herefrom by one or more Settling Parties.

D. For clarity, nothing in this Stipulation shall affect Providence's pending appeal of Order U-16-094(10)/U-17-008(14) (the order denying refunds) in Alaska Superior Court Case No. 3AN-18-07459 Civil.

E. Nothing in this Stipulation is intended to, or shall, limit the Commission's powers as conferred by statute or bind the Commission in future proceedings to any position it accepts in this Stipulation.

ASSET PURCHASE AND SALE AGREEMENT

This Asset Purchase and Sale Agreement (this "**Agreement**"), dated as of December 28, 2018, is made and entered into by and between the Municipality of Anchorage, Alaska, a political subdivision organized under the laws of the State of Alaska ("**Seller**"), and Chugach Electric Association, Inc., a not-for-profit electric cooperative corporation organized under the laws of the State of Alaska ("**Buyer**").

RECITALS

WHEREAS, Seller owns and operates Municipal Light and Power ("**ML&P**"), an electric utility serving customers within the Municipality of Anchorage, Alaska, and Seller wishes to exit the electric utility business and cease performing any business activities associated with ML&P's provision of electric services as currently conducted by Seller and as proposed to be conducted by Seller prior to the Closing (as defined below) (the "**Business**") (other than continued ownership of the Eklutna Generation Assets (as defined below) and supplying power pursuant to the Eklutna Power Purchase Agreement (as defined below));

WHEREAS, Seller wishes to sell and assign to Buyer, and Buyer wishes to purchase and assume from Seller, substantially all of the assets, and certain specified liabilities, of the Business, subject to the terms and conditions set forth herein;

WHEREAS, Seller and Buyer desire for Buyer to provide electric service to Seller's electric utility customers, commencing on the Closing Date (as defined below);

WHEREAS, as an integral part of the transactions contemplated hereby, Seller and Buyer have entered into the Eklutna Power Purchase Agreement, the PILT Agreement (as defined below), and BRU Fuel Agreement (as defined below) as of the date hereof;

NOW, THEREFORE, in consideration of the mutual covenants, representations, warranties, and agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree as follows:

ARTICLE I
Definitions

The following terms have the meanings specified or referred to in this ARTICLE I:

"**Accounting Principles**" means GAAP, applied in a manner consistent with the accounting practices, procedures, policies, principles and methodologies used and applied by Seller in preparation of the Audited Financial Statements.

"**Accounts Receivable**" has the meaning set forth in Section 2.02(f).

"**Accrued Leave**" means, with respect to any and all Transferred Employees, accrued leave (i.e., annual leave, cashable sick leave and the like, but excluding in all cases non-cashable sick leave and non-cashable annual leave (as such terms are used in Chapter 3.30 of Title 3 of the

Anchorage, Alaska, Code of Ordinances)) in accordance with ML&P's current policies and agreements.

"**Accrued Leave Liability**" means the liability for Accrued Leave as of the Closing Date calculated in accordance with GAAP.

"**Acquisition Proposal**" has the meaning set forth in Section 6.03(a).

"**Action**" means any claim, action, cause of action, demand, directive, lawsuit, appeal, arbitration, notice of violation, proceeding, litigation, citation, summons, subpoena or investigation of any nature, civil, criminal, administrative, regulatory, or otherwise, whether at law or in equity.

"**Additional Buyer Due Diligence**" means the due diligence described in Exhibit A.

"**Additional Seller Due Diligence**" means the due diligence described in Exhibit B.

"**Adjustment Amount**" has the meaning set forth in Section 2.08(c)(i).

"**AFEs**" has the meaning set forth in Section 4.23.

"**Affiliate**" of a Person means any other Person that directly or indirectly, through one or more intermediaries, controls, is controlled by, or is under common control with, such Person. The term "control" (including the terms "controlled by" and "under common control with") means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of voting securities, by contract, or otherwise.

"**Agreement**" has the meaning set forth in the preamble.

"**AMC**" means the Anchorage Municipal Code.

"**Ancillary Documents**" means the Bill of Sale, the Assignment and Assumption Agreement, Deeds, Assignment and Assumption of Leases, Real Property Interest Assignments, the PILT Agreement, the Eklutna Power Purchase Agreement, the BRU Fuel Agreement, the BRU Transfer Documents, and the other agreements, instruments and documents required to be delivered at the Closing.

"**ARRC**" means the Alaska Railroad Corporation.

"**ARRC Modifications**" has the meaning set forth in Section 6.26.

"**Assigned Contracts**" has the meaning set forth in Section 2.01(g).

"**Assignment and Assumption Agreement**" has the meaning set forth in Section 3.02(a)(ii).

"**Assignment and Assumption of Lease**" has the meaning set forth in Section 3.02(a)(iv).

"**Assumed Environmental Liabilities**" means Environmental Claims and Liabilities under Environmental Laws that, in each case, are directly related to the Purchased Assets (including violations of Environmental Laws and the presence or Release of Hazardous Materials at, in, on, or under, or migrating from or to, the Purchased Assets).

"**Assumed Liabilities**" has the meaning set forth in Section 2.03.

"**Audited Financial Statements**" has the meaning set forth in Section 4.04.

"**Available Proceeds**" means the sum of (i) the total aggregate amount of insurance coverage under all of Seller's policies of insurance that are applicable to the Purchased Assets that were damaged or destroyed by the relevant Casualty during the Interim Period, plus (ii) the amount (or value, if provided in the form of property or repair assistance) of assistance that Seller has been provided (or that has been committed to be provided to Seller) in any form (including cash grant, property, or repair assistance) by any Person (including the Federal Emergency Management Agency of the United States or any other Governmental Authority) that may be used by Seller to cure such Casualty in accordance with the provisions of Section 6.18, plus (iii) the amounts recovered or recoverable by Seller from Customers for storm restoration in accordance with Seller's Past Practice during similar Casualty events.

"**AWWU**" means Seller's Anchorage Water and Wastewater Utility.

"**Balance Sheet**" has the meaning set forth in Section 4.04.

"**Balance Sheet Date**" has the meaning set forth in Section 4.04.

"**Basket**" has the meaning set forth in Section 8.04(a).

"**Benefit Plan**" has the meaning set forth in Section 4.19(a).

"**Bill of Sale**" has the meaning set forth in Section 3.02(a)(i).

"**Bond Release Consideration**" has the meaning set forth in Section 3.02(c).

"**Books and Records**" has the meaning set forth in Section 2.01(q).

"**Bradley Lake Tax Exempt Debt**" means the AEA Power Revenue Bonds, First, Second and Sixth Series and any like bonds issued prior to Closing.

"**BRU**" means the Beluga River Unit, an oil and gas unit formed pursuant to the Unit Agreement for the Development and Operation of the Beluga River Unit, State of Alaska, Third Judicial District, dated April 26, 1962.

"**BRU Fuel Agreement**" means the BRU Fuel Agreement dated as of the date hereof between Seller and Buyer.

"**BRU Interest**" means any right, title, or interest of Seller in BRU and associated property, whenever such interest may have been acquired, including property of the type set forth in Section 1.1 of the BRU Purchase and Sale Agreement.

"**BRU Joint Operating Agreement**" means that certain Beluga River Unit Joint Operating Agreement dated April 1, 1962, providing for the joint exploration, development and operation of the BRU.

"**BRU Purchase and Sale Agreement**" means the Purchase and Sale Agreement dated effective as of 7:00 a.m., Alaska time, on January 1, 2016 between ConocoPhillips Alaska, Inc., a Delaware corporation, Buyer, and Seller.

"**BRU Transfer Documents**" means the assignment documents in the form of Exhibit C-1 and the deeds set forth in Exhibits C-2 and C-3.

"**Business**" has the meaning set forth in the recitals.

"**Business Day**" means any day except Saturday, Sunday, or any other day on which commercial banks located in Anchorage, Alaska are authorized or required by Law to be closed for business.

"**Buyer**" has the meaning set forth in the preamble.

"**Buyer Closing Certificate**" has the meaning set forth in Section 7.03(f).

"**Buyer Indemnitees**" has the meaning set forth in Section 8.02.

"**Buyer's Accountants**" means KPMG LLP.

"**Cap**" has the meaning set forth in Section 8.04(a).

"**Casualty**" means an event causing any portion of the Purchased Assets or Eklutna Generation Assets to be damaged or destroyed and requiring expenditures in excess of $5,000,000 for repair or replacement of such damaged or destroyed Purchased Assets or Eklutna Generation Assets; *provided, however*, that any intentional demolition or removal of any Purchased Assets or Eklutna Generation Assets in connection with repair or replacement of such Purchased Assets or Eklutna Generation Assets shall not be considered a Casualty.

"**Casualty Notice**" has the meaning set forth in Section 6.18(a).

"**CERCLA**" means the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended by the Superfund Amendments and Reauthorization Act of 1986, 42 U.S.C. §§ 9601 et seq.

"**Closing**" has the meaning set forth in Section 3.01.

"**Closing Date**" has the meaning set forth in Section 3.01.

"**Closing Debt**" means the amount of Debt outstanding at Closing, including the costs of defeasance and redemption.

"**Closing Prorations**" means the prorations set forth on Exhibit D.

"**Closing Statement**" has the meaning set forth in Section 2.08(a).

"**Code**" means the Internal Revenue Code of 1986.

"**Co-Location Agreement**" means the proposed Facilities Co-Location Agreement by and between ML&P and AWWU setting forth the terms and conditions for the design, construction, operation, and maintenance of the interface between AWWU and ML&P at the existing and new facilities comprised of Plant 2A and Plant 2, the existing AWWU Energy Recovery Station, the newly constructed AWWU ERS Heat Exchanger Addition, existing AWWU Water Reservoirs 1&2, AWWU's existing Well 9, the existing Centennial Vault, and AWWU's existing Ship Creek Water Treatment Facility.

"**Comparable Position**" means a position as determined by Buyer that reflects the general responsibilities and duties as held at ML&P, *provided* that individuals holding Designated Positions may not hold the same title or authority such as Chief Executive Officer or Chief Financial Officer. Professional positions such as accountant and engineer will be placed into their appropriate field of expertise.

"**Contracts**" means, with respect to Seller and ML&P, all contracts, leases, deeds, mortgages, licenses, instruments, notes, commitments, undertakings, indentures, joint ventures, and all other agreements, commitments, and legally binding arrangements, in each case in written form, including power supply agreements, service obligations, power purchase agreements, construction agreements, equipment and service purchase agreements, operations and maintenance agreements, power pooling agreements, fuel purchase agreements, interconnection agreements, transmission agreements, contractual services and long-term technical services agreements, and fuel storage agreements related to BRU (including the BRU Joint Operating Agreement).

"**Cure Amount**" means the amount of costs that will be required to be paid in order to cure in accordance with the provisions of Section 6.18 the damage to or destruction of the Purchased Assets and Eklutna Generation Assets resulting from a Casualty.

"**Customer**" means any electric service customer of Seller prior to the Closing Date within the Service Territory.

"**Customer Service Assets**" means the customer service facilities, equipment, and other tangible property and assets used in or for the Business or located on the Real Property,

including the facilities, equipment and other tangible property and assets that connect the Distribution Assets to each individual Customer's Delivery Point, Customer/premise/account data, historical consumption information, meters, remote metering equipment, and equipment needed to access the meters.

"**Debt**" means ML&P's Series 2014A electric revenue bonds, Series 2009A electric revenue bonds, Series 2009B electric revenue bonds, Series 2005A electric revenue bonds and the Wells Fargo Municipal Capital Strategies, LLC Direct Drawdown Commercial Paper Program, and any other debt of Seller secured by revenues of ML&P.

"**Debt Financing**" means the financing plan to be described in the application filed to obtain RCA Approval.

"**Deed**" has the meaning set forth in Section 3.02(a)(iii).

"**Delivery Point**" means the point on the Customer's premises where Seller's wires connect to Customer's electric meter.

"**Designated Excluded Assets**" means the assets set forth on Exhibit E.

"**Designated Positions**" means any Utility Division Manager II, Program & Policy Director and General Manager.

"**Direct Claim**" has the meaning set forth in Section 8.05(c).

"**Disclosure Schedules**" means the Disclosure Schedules delivered by Seller and Buyer concurrently with the execution and delivery of this Agreement.

"**Disputed Amounts**" has the meaning set forth in Section 2.08(b).

"**Distribution Assets**" means the electric distribution facilities, equipment, and other tangible property and assets used in or for the Business, including the facilities, equipment, and other tangible property and assets that connect the Transmission Assets to the Customer Service Assets, distribution substation equipment, feeder circuits and associated hardware (including switches and switch gear, regulators, capacitor banks, reclosers, and protective equipment), primary circuits, transformers, secondaries, and services, and associated physical assets (including poles, conductors, cables, insulators, metering, and outdoor lights).

"**Documentation Closing Date**" has the meaning set forth in Section 3.02(c).

"**Dollars or $**" means the lawful currency of the United States.

"**Effect**" has the meaning set forth in the definition of Material Adverse Effect.

"**Eklutna Generation Assets**" means all undivided interests, rights, title, and obligations of Seller in and to the Eklutna Hydroelectric Project (including real property, fixtures, equipment, personalty, contract and water rights, but not, except as otherwise provided in

Section 6.30, including the Eklutna Transmission Assets), including rights, interests, and obligations pursuant to the Alaska Power Administration Asset Sale and Administration Act, Public Law 104-58 (109 Stat. 557 (1995)) and arising from, but not limited to the following documents: (i) Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska, dated February 17, 1984, between the Alaska Power Administration, an entity of the United States Department of Energy, and Seller (and Supplemental Agreements No.1 and 2 thereto); (ii) Memorandum of Understanding (Transition Plan) dated July 25, 1989 among Seller, Buyer, and MEA; (iii) Eklutna Purchase Agreement dated August 2, 1989 among Buyer, Seller, MEA, and the Alaska Power Administration, a unit of the United States Department of Energy; (iv) Eklutna Purchasers Manner of Acting, Functional Responsibilities, and Staffing Agreement dated August 7, 1991 among Buyer, Seller, MEA, the United States Fish and Wildlife Service, the National Marine Fisheries Service, the Alaska Energy Authority and the State of Alaska; (v) Agreement regarding fish and wildlife affected by the Snettisham and Eklutna Projects, dated August 7, 1991, among Seller, Buyer, MEA, the United States Fish and Wildlife Service, the National Marine Fisheries Service, the Alaska Energy Authority and the State of Alaska; (vi) 1996 Eklutna Hydroelectric Project Transition Plan, dated May 28, 1996, among the Alaska Power Administration, Seller, Buyer, and MEA; (vii) Agreement for Extension of 1996 Eklutna Hydroelectric Project Transition Plan, dated October 2, 1997, among Seller, Buyer, and MEA; and (viii) Closing Agreement, dated October 2, 1997, among the Alaska Power Administration, Seller, Buyer, and MEA, including all instruments identified in Appendix A thereto.

"**Eklutna Power Purchase Agreement**" means the Eklutna Power Purchase Agreement dated as of the date hereof between Seller and Buyer.

"**Eklutna Transmission Assets**" means the Transmission Assets of the Eklutna Hydroelectric Project set forth on Exhibit F.

"**Encumbrance**" means any charge, claim, community property interest, pledge, condition, equitable interest, lien (statutory or other), option, security interest, mortgage, easement, encroachment, right of way, right of first refusal, or restriction of any kind, including any restriction on use, voting, transfer, receipt of income, or exercise of any other attribute of ownership.

"**Environmental Claim**" means any Action, Governmental Order, lien, fine, penalty, or, as to each, any settlement or judgment arising therefrom, by or from any Person alleging actual or potential liability of any kind or nature (including liability, responsibility, or Losses for the costs of enforcement proceedings, investigations, cleanup, corrective action, governmental response, removal, or remediation, natural resources damages, property damages, personal injuries, medical monitoring, penalties, contribution, indemnification and injunctive relief) arising under any Environmental Law, including those arising out of, based on, or resulting from: (a) the presence or Release of, or exposure to, any Hazardous Materials; or (b) any actual or alleged non-compliance with any Environmental Law or term or condition of any Environmental Permit.

"**Environmental Law**" means any applicable Law, and any applicable Governmental Order or binding agreement with any Governmental Authority: (a) relating to pollution (or the

cleanup thereof) or the protection of natural resources, endangered or threatened species, human health or safety in relation to exposures to Hazardous Materials in the environment, or the environment (including ambient air, soil, surface water or groundwater, or subsurface strata); or (b) concerning the presence of, exposure to, or the management, manufacture, use, containment, storage, recycling, reclamation, reuse, treatment, generation, discharge, transportation, processing, production, disposal or remediation of any Hazardous Materials. The term "Environmental Law" includes, where applicable, the following (including their implementing regulations and any state analogs and any applicable and binding remediation or other standard established by any Governmental Authority pursuant to the same): CERCLA; the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended by the Hazardous and Solid Waste Amendments of 1984, 42 U.S.C. §§ 6901 et seq.; the Federal Water Pollution Control Act of 1972, as amended by the Clean Water Act of 1977, 33 U.S.C. §§ 1251 et seq.; the Toxic Substances Control Act of 1976, as amended, 15 U.S.C. §§ 2601 et seq.; the Emergency Planning and Community Right-to-Know Act of 1986, 42 U.S.C. §§ 11001 et seq.; the Clean Air Act of 1966, as amended by the Clean Air Act Amendments of 1990, 42 U.S.C. §§ 7401 et seq.; and Title 46 of Alaska Statutes.

"**Environmental Notice**" means any directive, notice of violation or infraction, in each case written, or other written notice or communication respecting any actual or threatened Environmental Claim, including communications relating to actual or alleged non-compliance with any Environmental Law or with any term or condition of any Environmental Permit.

"**Environmental Permit**" means any Permit obtained or required to be obtained pursuant to Environmental Law.

"**E.O. 11246**" has the meaning set forth in Section 4.20(d).

"**ERISA**" means the Employee Retirement Income Security Act of 1974, and the regulations promulgated thereunder.

"**ERISA Affiliate**" means, with respect to the period of six (6) years prior to the date of this Agreement, all employers (whether or not incorporated) that would be treated together with Seller or any of its Affiliates as a "single employer" within the meaning of Section 414 of the Code or Section 4001 of ERISA.

"**Estimated Accrued Leave Liability**" means the Accrued Leave Liability, without giving effect to the transactions contemplated hereby, estimated in good faith by Seller and delivered to Buyer no later than three (3) Business Days prior to the Closing Date.

"**Estimated Net Book Value of Designated Excluded Assets**" means the Net Book Value of Designated Excluded Assets estimated in good faith by Seller and delivered to Buyer no later than three (3) Business Days prior to the Closing Date.

"**Estimated Purchase Price**" has the meaning set forth in Section 2.06.

"**Estimated Purchase Price Statement**" has the meaning set forth in Section 2.06.

"**Estimated Transferred Cash**" has the meaning set forth in Section 2.06.

"**Excluded Assets**" has the meaning set forth in Section 2.02.

"**Excluded Contracts**" has the meaning set forth in Section 2.02(a).

"**Excluded Liabilities**" has the meaning set forth in Section 2.04.

"**Financial Closing Date**" has the meaning set forth in Section 3.02(c).

"**FIRPTA Certificate**" has the meaning set forth in Section 7.02(l).

"**GAAP**" means United States generally accepted accounting principles as promulgated by the Governmental Accounting Standards Board (GASB) and as in effect from time to time.

"**Generation Assets**" means the generating plants and related facilities as more fully described on Exhibit G hereto.

"**Government Contracts**" has the meaning set forth in Section 4.07(a)(xii).

"**Governmental Authority**" means any federal, state, local or foreign government, or political subdivision thereof, or any agency or instrumentality of such government or political subdivision, or any self-regulated organization or other non-governmental regulatory authority or quasi-governmental authority (to the extent that the rules, regulations, or orders of such organization or authority have the force of Law), or any arbitrator, court, or tribunal of competent jurisdiction. References to "Governmental Authority" shall exclude Seller except where Seller is acting in a legislative or regulatory capacity as expressly authorized by applicable Law.

"**Governmental Order**" means any binding order, directive, writ, judgment, injunction, decree, stipulation, determination, or award entered by or with any Governmental Authority.

"**Hazardous Materials**" means: (a) any material, substance, chemical, waste, product, derivative, compound, mixture, solid, liquid, mineral, or gas, in each case, whether naturally occurring or manmade, that is hazardous, acutely hazardous, toxic, or words of similar import or regulatory effect under Environmental Laws; (b) any petroleum or petroleum-derived products, radon, radioactive materials or wastes, asbestos in any form or condition, lead or lead-containing materials, urea formaldehyde foam insulation and polychlorinated biphenyls; and (c) any other material, substance, or waste that is regulated, or to which liability or standards of conduct may be imposed, under any Environmental Law.

"**HSR Act**" means the Hart-Scott-Rodino Antitrust Improvements Act of 1976.

"**Hydrocarbons**" means merchantable oil, gas, casinghead gas, condensate, distillate, and other liquid and gaseous hydrocarbons of every kind or description produced from or attributable to the BRU Interest.

"**IBEW**" means the International Brotherhood of Electrical Workers, Local 1547.

"**IBEW Collective Bargaining Agreement**" means any collective bargaining agreement in effect, as of immediately prior to the Closing, between Seller and the IBEW with respect to any ML&P employees.

"**Indemnified Party**" has the meaning set forth in Section 8.05.

"**Indemnifying Party**" has the meaning set forth in Section 8.05.

"**Independent Accountant**" has the meaning set forth in Section 2.08(b).

"**Insurance Policies**" has the meaning set forth in Section 4.15.

"**Intellectual Property**" means any and all rights in any of the following in any jurisdiction throughout the world: (a) issued patents and patent applications (whether provisional or non-provisional), including divisionals, continuations, continuations-in-part, substitutions, reissues, reexaminations, extensions, or restorations of any of the foregoing, and other Governmental Authority-issued indicia of invention ownership (including certificates of invention, petty patents, and patent utility models) ("**Patents**"); (b) trademarks, service marks, brands, certification marks, logos, trade dress, trade names, and other similar indicia of source or origin, together with the goodwill connected with the use of and symbolized by, and all registrations, applications for registration, and renewals of, any of the foregoing ("**Trademarks**"); (c) copyrights and works of authorship, whether or not copyrightable, and all registrations, applications for registration, and renewals of any of the foregoing ("**Copyrights**"); (d) internet domain names and social media account or user names (including "handles"), whether or not Trademarks, all associated web addresses, URLs, websites and web pages, social media accounts and pages, and all content and data thereon or relating thereto, whether or not Copyrights; (e) mask works, and all registrations, applications for registration, and renewals thereof; (f) industrial designs, and all Patents, registrations, applications for registration, and renewals thereof; (g) trade secrets, know-how, inventions (whether or not patentable), discoveries, improvements, technology, business and technical information, databases, data compilations and collections, tools, methods, processes, techniques, and other confidential and proprietary information and all rights therein ("**Trade Secrets**"); (h) computer programs, operating systems, applications, firmware and other code, including all source code, object code, application programming interfaces, data files, databases, protocols, specifications, and other documentation thereof ("**Software**"); (i) rights of publicity; and (j) all other intellectual or industrial property and proprietary rights.

"**Intellectual Property Agreements**" means all licenses, sublicenses, consent to use agreements, settlements, coexistence agreements, covenants not to sue, waivers, releases, permissions and other Contracts, whether written or oral, relating to any Intellectual Property that is used or held for use in the conduct of the Business to which Seller is a party, beneficiary, or otherwise bound.

"**Intellectual Property Assets**" means all Intellectual Property that is owned by Seller and used or held for use in the conduct of the Business, together with all royalties, fees, income, payments, and other proceeds now or hereafter due or payable to Seller with respect to such Intellectual Property.

"**Intellectual Property Registrations**" means all Intellectual Property Assets that have been the subject of a registration, or application for registration, by or with any Governmental Authority or authorized private registrar in any jurisdiction, including issued Patents, registered Trademarks, domain names, and registered Copyrights, and pending applications for any of the foregoing.

"**Interim Period**" means the period from the date of this Agreement to the Closing.

"**Inventory**" has the meaning set forth in Section 2.01(f).

"**Knowledge of Seller**" or "**Seller's Knowledge**" or any other similar knowledge qualification, means the actual knowledge of any matter, fact, or thing that is, as of the date of this Agreement, known to either of Mark Johnston or William Falsey, after reasonable inquiry. For purposes of this definition, "reasonable inquiry" shall take into account the scope of the individual's duties and includes reasonable inquiry of the Representatives of Seller who are responsible for, or have direct involvement in, the subject matter of the representation and warranty or other matter involved and review of relevant records within the possession or control of Seller.

"**Law**" means any statute, law, ordinance, regulation, rule, code, order, constitution, treaty, common law, judgment, decree, Permit requirement, other binding requirement or rule of law of, or compulsory standard established by, any Governmental Authority.

"**Leased Real Property**" has the meaning set forth in Section 4.10(b).

"**Leases**" has the meaning set forth in Section 4.10(b).

"**Liabilities**" means liabilities, obligations, or commitments of any nature whatsoever, asserted or unasserted, known or unknown, absolute or contingent, accrued or unaccrued, matured or unmatured, or otherwise.

"**Losses**" means losses, damages, Liabilities, deficiencies, Actions, judgments, interest, awards, penalties, fines, costs or expenses of whatever kind, including reasonable attorneys' fees and the cost of enforcing any right to indemnification hereunder and the cost of pursuing any insurance providers. For all purposes in this Agreement the term "**Losses**" does not include any Non-reimbursable Damages.

"**Material Adverse Effect**" means any event, occurrence, fact, condition, change, or development (each, an "**Effect**") that is, or would reasonably be expected to become, individually or in the aggregate with other Effects, materially adverse to (a) the business, results of operations, condition (financial or otherwise), or assets of the Business, (b) the value of the

Purchased Assets and Eklutna Generation Assets, or (c) the ability of Seller to consummate the transactions contemplated hereby on a timely basis; *provided, however,* that none of the following shall be deemed in itself, or in any combination, to constitute, and none of the following shall be taken into account in determining whether there has been or will be, a Material Adverse Effect: (x) (i) general economic, regulatory, or political conditions in the State of Alaska, the United States, or globally; (ii) conditions generally affecting the industries or markets in which the Business operates, including any changes in local markets for electric power or electric transmission systems or operations thereof; (iii) any changes in financial, banking, credit, or securities markets in general; (iv) acts of war (whether or not declared), armed hostilities, or terrorism, or the escalation or worsening thereof; (v) acts of God (including earthquakes, floods, or similar natural disasters or catastrophes); (vi) any changes in applicable Laws (other than a change in Law enacted by the Assembly of Seller between the date of this Agreement and the Closing) or accounting rules, including GAAP; (vii) the taking of or omission to take any action, which action or omission is required or expressly permitted by this Agreement or consented to by Buyer, except pursuant to Section 6.06; (viii) the public announcement, pendency, or completion of the transactions contemplated by this Agreement; (ix) any change resulting or arising from the identity of, or any facts or circumstances relating to, Buyer or its Affiliates, including the impact of any of the foregoing on any relationships, contractual or otherwise, with customers, suppliers, distributors, collaboration partners, joint venture partners, employees, or regulators; (x) seasonal fluctuations in the Business; or (xi) any failure to meet any projections, forecasts, or estimates of revenue, earnings, cash flow, or cash position (it being understood that the facts or circumstances giving rise to such failure may be taken into account in determining whether a Material Adverse Effect has occurred); *provided further, however,* that any event, occurrence, fact, condition, or change referred to in clauses (i) through (vi) immediately above shall be taken into account in determining whether a Material Adverse Effect has occurred or would reasonably be expected to occur to the extent that such event, occurrence, fact, condition, or change has a disproportionate effect on the Business compared to other participants in the industries in which the Business operates; and (y) any adverse change in or effect on the Business that is cured by Seller before the earlier of (i) the Closing Date and (ii) the date on which this Agreement is terminated pursuant to ARTICLE IX hereof.

"**Material BRU Contract**" has the meaning set forth in Section 4.23(d).

"**Material Contracts**" has the meaning set forth in Section 4.07(a).

"**Material Customers**" has the meaning set forth in Section 4.14(a).

"**Material Suppliers**" has the meaning set forth in Section 4.14(b).

"**Maximum Uncovered Loss Amount**" means $10,000,000.

"**MEA**" means Matanuska Electric Association, Inc.

"**ML&P**" has the meaning set forth in the recitals.

"**ML&P Information**" means (i) (A) audited statements of net position, statements of revenues, expenses and changes in net position and statements of cash flows for the three most recently completed fiscal years ended at least ninety (90) days prior to the Closing Date prepared in accordance with GAAP and related trial balances, (B) unaudited interim statements of net position, statements of revenues, expenses and changes in net position and statements of cash flows of ML&P for a fiscal quarter ended not later than one hundred thirty-four (134) days prior to the Closing Date (but excluding any fourth quarter of any fiscal year) prepared in accordance with GAAP; and (ii) to the extent applicable, draft comfort letters (including "negative assurance comfort"), which ML&P's auditors are prepared to deliver solely upon completion of customary procedures, and other information of ML&P that is reasonably available or readily obtainable, including any information reasonably necessary for the preparation of the pro forma financial statements by Buyer, provided that (x) such other information is reasonably requested in writing by Buyer, and (y) ML&P's auditors have not withdrawn any audit opinion with respect to any financial statements contained therein.

"**Multiemployer Plan**" has the meaning set forth in Section 4.19(c).

"**Net Book Value of Designated Excluded Assets**" means the net book value of the Designated Excluded Assets as of the end of the calendar month immediately preceding the Closing Date.

"**Non-reimbursable Damages**" has the meaning set forth in Section 8.06.

"**Offering Documents**" has the meaning set forth in Section 6.13(b).

"**Ordinance**" has the meaning set forth in Section 6.21.

"**Other Real Property Interests**" has the meaning set forth in Section 4.10(c).

"**Owned Real Property**" has the meaning set forth in Section 4.10(a).

"**Parkland Substations**" means ML&P Substation No. 6 and ML&P Substation No. 8 at Goose Lake Park.

"**Parkland Use Permit**" means a revocable permit, license, right-of-way, or easement granted by Seller to Buyer under the provisions of AMC 25.30.020C, and on terms and conditions substantially similar to those contained in the form of Revocable Use Permit set forth in Exhibit H, to enable Buyer to use, maintain, and operate each Parkland Substation in the manner used, maintained, and operated by Seller immediately prior to the Closing, which revocable permit, license, right-of-way, or easement in each case does not require the payment of a fee from Buyer to Seller in excess of $1.00 per year.

"**Permits**" means all permits, licenses, franchises, approvals, authorizations, registrations, certificates, variances and similar rights obtained or required to be obtained from Governmental Authorities.

"**Permitted Encumbrances**" has the meaning set forth in Section 4.08.

"**Person**" means an individual, corporation, partnership, joint venture, limited liability company, Governmental Authority, unincorporated organization, trust, association, or other entity.

"**PILT Agreement**" means the Payment in Lieu of Taxes Agreement between Seller and Buyer dated the date hereof.

"**Plant 2**" means ML&P's George M. Sullivan Power Plant No. 2.

"**Plant 2A**" means ML&P's George M. Sullivan Power Plant No. 2A.

"**Plant 2A Mural**" means the large-scale illuminated mural painted on the exterior front façade of Plant 2A pursuant to the Art Production Contract entered into between Seller and Haddad Drugan LLC under the authority of AMC Chapter 7.40 and executed on behalf of Seller on October 8, 2015.

"**Post-Signing Due Diligence**" means the Additional Buyer Due Diligence and other due diligence related to integration planning, preparation for post-Closing operations, obtaining RCA Approval, events or circumstances arising after the date of this Agreement, inquiries with respect to Updated Financial Statements and matters disclosed therein, environmental and real estate due diligence related to the Storage Facility or any other Real Property acquired by ML&P prior to Closing, due diligence necessary to obtain title insurance and title opinions, due diligence to obtain appraisers' reports and bond additions under Buyer's indenture, investigations regarding the accuracy of representations and warranties of Seller hereunder and Seller's compliance with covenants set forth herein or any Ancillary Document executed prior to Closing, and actions necessary to complete Closing and take other actions required by this Agreement, and other matters consented to by Seller, such consent not to be unreasonably withheld, conditioned or delayed.

"**Pre-Closing Tax Period**" means any taxable period ending on or before the Closing Date and, with respect to any taxable period beginning before and ending after the Closing Date, the portion of such taxable period ending on and including the Closing Date.

"**Proposition 10**" has the meaning set forth in Section 6.21.

"**Prudent Utility Practices**" means any of the practices, methods and acts engaged in or accepted by a significant portion of the electrical utility industry in the United States at the time the decision was made or any of the practices, methods and acts that, in the exercise of reasonable judgment in light of the facts known or that should reasonably have been known at the time a decision is made, could have been expected to accomplish the desired result at the lowest reasonable cost consistent with applicable Law, regulation, permits, codes, standards, equipment manufacturer's recommendations, reliability, safety, environmental protection, economy, and expedition. Prudent Utility Practices is not intended to be limited to the optimum

practice, method or act to the exclusion of all others, but rather to be a spectrum of possible practices, methods or acts.

"**Purchase Price**" has the meaning set forth in Section 2.05.

"**Purchased Assets**" has the meaning set forth in Section 2.01.

"**Qualified Benefit Plan**" has the meaning set forth in Section 4.19(c).

"**RCA**" means the Regulatory Commission of Alaska.

"**RCA Approval**" has the meaning set forth in Section 6.06.

"**Real Property**" means, collectively, the Owned Real Property, the Leased Real Property, and the Other Real Property Interests.

"**Real Property Interest Assignment**" has the meaning set forth in Section 3.02(a)(v).

"**Recipients**" has the meaning set forth in Section 2.07.

"**Release**" means any actual or threatened release, spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, abandonment, disposing or allowing to escape or migrate into or through the environment (including ambient air (indoor or outdoor), soil gas, surface water, groundwater, land surface, or subsurface strata or within any building, structure, facility, or fixture).

"**Representative**" means, with respect to any Person, any and all officials, managers, directors, employees, consultants, financial advisors, counsel, accountants, and other agents of such Person.

"**Resolution Period**" has the meaning set forth in Section 2.08(b).

"**Restricted Comments**" has the meaning set forth in Section 6.09(b).

"**Retention Agreements**" means the retention agreements referenced in Section 4.06(o)(i) of the Disclosure Schedules.

"**Review Period**" has the meaning set forth in Section 2.08(b).

"**SEC**" means the United States Securities and Exchange Commission.

"**Section 503**" has the meaning set forth in Section 4.20(d).

"**Seller**" has the meaning set forth in the preamble.

"**Seller Closing Certificate**" has the meaning set forth in Section 7.02(i).

"**Seller Indemnitees**" has the meaning set forth in Section 8.03.

"**Seller's Accountants**" means BDO USA, LLP.

"**Seller's Past Practices**" means the recent historical operation, maintenance, and repair practices, methods, and actions performed prior to the date of this Agreement by, or on behalf of, Seller with respect to the Purchased Assets and Eklutna Generation Assets, in a manner complying with applicable Law.

"**Service Territory**" means the area approved and designated by the RCA as ML&P's service territory described in the map attached hereto as Exhibit 1.

"**Shared Facilities and Assets**" means the following items to the extent not used or held for use principally in connection with the Business: (i) the accounting records of Seller, (ii) insurance policies and rights thereto, (iii) assets, tangible or intangible, related to general and administrative services of Seller, including finance, information technology, accounting systems, and human resources, (iv) domain names, phone numbers, phone systems, shared networks, and computer systems, and (v) the network control system for LED street lights, including central management server hosting services and sustainment operations.

"**Single Employer Plan**" has the meaning set forth in Section 4.19(c).

"**Statement of Objections**" has the meaning set forth in Section 2.08(b).

"**Storage Facility**" means the ML&P Pole Yard located at Lots 1 & 2 Block 27A East Addition Subdivision (PID 003-073-07 & 003-073-09).

"**Tangible Personal Property**" has the meaning set forth in Section 2.01(i).

"**Tax Return**" means any return, declaration, report, claim for refund, information return, or statement or other document relating to Taxes, including any schedule or attachment thereto, and including any amendment thereof.

"**Taxes**" means all federal, state, local, foreign and other income, gross receipts, sales, use, production, ad valorem, transfer, documentary, franchise, registration, profits, license, lease, service, service use, withholding, payroll, employment, unemployment, estimated, excise, severance, environmental, stamp, occupation, premium, property (real or personal) (including payments in lieu of taxes), real property gains, windfall profits, customs, duties, or other taxes, fees, assessments, or charges in the nature of a Tax, together with any interest, additions, or penalties with respect thereto and any interest in respect of such additions or penalties.

"**Third Party Claim**" has the meaning set forth in Section 8.05(a).

"**Transferred Cash**" means customer deposit cash or cash accounts, cash, cash equivalents, and securities (in each case to the extent constituting restricted assets and, in the case of cash contractually restricted in connection with Debt, to the extent not used by Seller to defease or repay the Closing Debt), including any such assets collected for payments in lieu of

taxes, including pursuant to AMC 26.10.025 or held under or pursuant to ML&P's debt documents or representing the proceeds of bonds, deferred regulatory liability for gas sales funds, future gas purchases regulatory liabilities, underlift accounts and asset retirement obligation funds managed by ML&P or Seller, any decommissioning funds, utility underground requirements including those set forth in AS 42.05.381(h), (i), and (j) and AMC 21.07.050 and AMC Title 21 undergrounding funds, and any other cash collected from ratepayers for obligations assumed by Buyer including customer deposits. Exhibit J sets forth the Transferred Cash and separately identifies any cash contractually restricted in connection with Debt which will be used by Seller to defease or repay the Closing Debt, in each case as if the Closing had occurred as of December 31, 2017.

"**Transferred Employees**" means those employees hired by Buyer pursuant to Section 6.05.

"**Transition Agreement**" means the Transition Agreement by and between Buyer and the IBEW as executed on behalf of Buyer and the IBEW on August 17, 2018, and as amended, modified, supplemented, restated, or replaced.

"Transmission Assets" means the electric transmission tangible personal property, and real property, used in or for the Business of ML&P or located on the Real Property, including the facilities, equipment, and other tangible property and assets that connect the Distribution Assets to transmission interconnection points (and other property and assets associated with or ancillary thereto), transformers, breakers, capacitor banks, switches, arresters, instrument transformers, substation structures, substations, buswork, substation battery and chargers, relay protection panels, relay communications/carriers, remote telemetry and control equipment, metering, fault recorders, sequence of even recorders, annunciators, relay vaults, substation fencing, transmission lines, conductors, transmission line structures and poles, and control buildings.

"**Trust Agreements**" means the (i) Trust Agreement, dated as of November 1, 2005, between Seller and U.S. Bank National Association, (ii) Trust Agreement, dated as of December 3, 2009, between Seller and U.S. Bank National Association, and (iii) Trust Agreement, dated as of November 1, 2014, between Seller and U.S. Bank National Association.

"**Union**" has the meaning set forth in Section 4.20(b), and includes the IBEW.

"Updated Financial Statements" means financial statements delivered pursuant to Section 6.13 or Section 6.17.

"**Upfront Payment**" means $767,800,000.

"VEVRAA" has the meaning set forth in Section 4.20(d).

ARTICLE II
PURCHASE AND SALE

Section 2.01 Purchase and Sale of Assets. Subject to the terms and conditions set forth herein, at the Closing, Seller shall sell, assign, transfer, convey, and deliver to Buyer, and Buyer shall purchase from Seller, free and clear of any Encumbrances (including Encumbrances related to the Closing Debt and any other debt of Seller as provided in this Agreement) other than Permitted Encumbrances, all of Seller's right, title, and interest in, to, and under all of the assets, properties, and rights of every kind and nature, whether real, personal or mixed, tangible or intangible (including goodwill), wherever located and whether now existing or hereafter acquired (other than the Excluded Assets), which are used or held for use in connection with the Business (collectively, the "**Purchased Assets**"), including the following:

(a) all Transmission Assets (including the Eklutna Transmission Assets, except as otherwise provided in Section 6.30);

(b) all Distribution Assets;

(c) all Generation Assets other than the Eklutna Generation Assets;

(d) all Customer Services Assets;

(e) Transferred Cash;

(f) all inventory, finished goods, raw materials, work in progress, packaging, supplies, parts, stored gas, BRU fuel inventory, and other inventories ("**Inventory**");

(g) all Contracts relating to the Business or by which the Purchased Assets may be bound, including Intellectual Property Agreements, including those set forth on Section 2.01(g) of the Disclosure Schedules (the "**Assigned Contracts**");

(h) all Intellectual Property Assets;

(i) all furniture, fixtures, equipment, machinery, tools, vehicles, rolling stock, office equipment, supplies, computers, telephones, and other tangible personal property (the "**Tangible Personal Property**");

(j) all Owned Real Property (including the Storage Facility) and Leased Real Property and easements and Other Real Property Interests;

(k) the BRU Interest;

(l) all Permits, including Environmental Permits, that are held by Seller, transferable, and required for the conduct of the Business as currently conducted or for the ownership and use of the Purchased Assets, including those listed on Section 4.17(b) and Section 4.18(b) of the Disclosure Schedules;

(m) all rights to any Actions of any nature available to or being pursued by Seller (including any appeals by Seller of the denial by the State of Alaska Department of Revenue of gas production tax credits) to the extent related to the Purchased Assets or the Assumed Liabilities, whether arising by way of counterclaim or otherwise;

(n) all prepaid expenses, credits, advance payments, claims, security, refunds, rights of recovery, rights of set-off, rights of recoupment, deposits, charges, sums, and fees (including any such item relating to the payment of Taxes);

(o) all of Seller's rights under warranties, indemnities and all similar rights against third parties to the extent related to any Purchased Assets;

(p) all insurance benefits, including rights and proceeds, arising from or relating to the Purchased Assets or the Assumed Liabilities;

(q) originals, or where not available, copies, of all books and records, including books of account, ledgers and general, financial and accounting records, machinery and equipment maintenance files, purchasing records, manuals, equipment repair, maintenance or service records, operating, safety and maintenance manuals, inspection reports, environmental assessments, engineering design plans, documents, blueprints and as built plans, specifications, drawings, procedures and other similar items of Seller, customer lists, customer purchasing histories, price lists, distribution lists, supplier lists, production data, quality control records and procedures, customer complaints and inquiry files, research and development files, records, and data (including all correspondence with any Governmental Authority), sales material and records (including pricing history, total sales, terms and conditions of sale, sales and pricing policies and practices), strategic plans, internal financial statements, marketing and promotional surveys, material and research and files relating to the Intellectual Property Assets and the Intellectual Property Agreements, whether existing in hard copy or magnetic or electronic form ("**Books and Records**"); and

(r) all goodwill and the going concern value of the Business.

Section 2.02 Excluded Assets. Notwithstanding the foregoing, the Purchased Assets shall not include the following assets (collectively, the "**Excluded Assets**"):

(a) all Contracts, including Intellectual Property Agreements, that are not Assigned Contracts (the "**Excluded Contracts**");

(b) all Benefit Plans and assets attributable thereto;

(c) the assets, properties, and rights specifically set forth on Section 2.02(c) of the Disclosure Schedules;

(d) unrestricted cash and cash equivalents other than Transferred Cash;

(e) Shared Facilities and Assets;

(f) all accounts or notes receivable held by Seller, and any security, claim, remedy or other right related to any of the foregoing ("**Accounts Receivable**");

(g) the Eklutna Generation Assets;

(h) the Designated Excluded Assets;

(i) the Plant 2A Mural; and

(j) the rights which accrue or will accrue to Seller under this Agreement and the Ancillary Documents.

Section 2.03 Assumed Liabilities. Buyer shall execute and deliver in favor of Seller the Assignment and Assumption Agreement, pursuant to which Buyer shall, subject to the terms and conditions set forth herein, assume and agree to pay, perform, and discharge when due the following Liabilities of Seller, whether direct or indirect, known or unknown, absolute or contingent, accrued, fixed or otherwise, or whether due or to become due, solely to the extent such Liabilities accrue or arise from and after the Closing (except as otherwise specifically provided in this Agreement with respect to the Assumed Environmental Liabilities), other than Excluded Liabilities (as defined below), in accordance with the respective terms and subject to the respective conditions thereof (collectively, but excluding the Excluded Liabilities, the "**Assumed Liabilities**"):

(a) all Liabilities in respect of the Assigned Contracts and other Purchased Assets except to the extent that such Liabilities, but for a breach or default by Seller, would have been paid, performed, or otherwise discharged on or prior to the Closing Date or to the extent the same arise out of any failure to perform, improper performance, warranty or other breach, default, or violation by Seller on or prior to the Closing;

(b) agreements and obligations related to BRU as of the Closing;

(c) agreements and obligations related to the Eklutna Generation Assets as of the Closing;

(d) the Assumed Environmental Liabilities;

(e) all Liabilities under any Actions of any nature available to or being pursued by Seller (including the obligation to pursue any appeals of the denial by the State of Alaska Department of Revenue of gas production tax credits) to the extent related to the Purchased Assets or the Assumed Liabilities, whether arising by way of counterclaim or otherwise, that are included in the Purchased Assets;

(f) Accrued Leave as of the Closing Date; and

(g) all other Liabilities arising out of or relating to Buyer's ownership or operation of the Purchased Assets on or after the Closing Date.

Section 2.04 Excluded Liabilities. Notwithstanding the provisions of Section 2.03 or any other provision in this Agreement to the contrary, Buyer shall not assume and shall not be responsible to pay, perform, or discharge any Liabilities of Seller of any kind or nature whatsoever other than the Assumed Liabilities (the "**Excluded Liabilities**"). Seller shall pay and satisfy in due course all Excluded Liabilities that Seller is obligated to pay and satisfy. Without limiting the generality of the foregoing, the Excluded Liabilities shall include the following:

(a) all obligations related to accounts payable as of the Closing Date;

(b) any Liabilities of Seller arising or incurred in connection with the negotiation, preparation, investigation, and performance of this Agreement, the Ancillary Documents, and the transactions contemplated hereby and thereby, including fees and expenses of Seller's counsel, accountants, consultants, and advisers;

(c) any Liability for (i) Taxes of Seller or Taxes relating to the Business, the Purchased Assets, or the Assumed Liabilities for any Pre-Closing Tax Period, or (ii) other Taxes of Seller of any kind or description (including any Liability for Taxes of Seller that becomes a Liability of Buyer under any common law doctrine of de facto merger or transferee or successor liability or otherwise by operation of contract or Law);

(d) any Liabilities to the extent relating to or arising out of the Excluded Assets, including Environmental Claims and Liabilities under Environmental Laws to the extent related to the Excluded Assets;

(e) any Liabilities (whether arising before or after the Closing) in respect of any pending or threatened Action arising out of, relating to, or otherwise in respect of the ownership or operation of the Business or the Purchased Assets to the extent such Action relates to such ownership or operation on or prior to the Closing Date;

(f) any Liabilities of Seller, whether arising before or after the Closing, under or in connection with the issues raised, considered, decided, or appealed from (x) RCA Order No. U-16-094(9)/U-17-008(13) and Order No. U-16-094(10)/U-17-008(14), (y) Case No. 3AN-14-06125CI, and (z) Docket No. U-18-102(1), but in each such case only to the extent that (i) such Liabilities relate to ownership or operation of the Business or the Purchased Assets on or prior to the Closing Date and (ii) any related Loss is not recoverable in rates by Buyer;

(g) any Liability of Seller or similar claim against Seller for injury prior to the Closing to a Person or property, including workers' compensation claims;

(h) any Liabilities of Seller arising, whether before or after the Closing, under or in connection with any Benefit Plan providing benefits to any present or former employee of Seller in connection with employment with Seller other than Accrued Leave;

(i) any Liabilities relating to any payroll or other compensation obligations incurred and required to be paid prior to the Closing, the failure by Seller to hire any

individual, the employment or services (or termination by Seller of the employment or services) of any individual, including Retention Agreements, wages, COBRA coverage, compensation, bonuses, benefits, accrued vacation, severance, retention, termination payments, affirmative action, personal injury, discrimination, harassment, retaliation, wrongful discharge, unfair labor practices, or constructive termination by Seller of any individual, or any similar or related claim or cause of action attributable to any actions or inactions by Seller, in each case prior to the Closing Date, with respect to the Transferred Employees, independent contractors, applicants, and any other individuals who are determined by a court or by a Governmental Authority to have been applicants or employees of Seller;

(j) any Liabilities related to the Business which constitute intercompany payables or intergovernmental charges owing to Seller;

(k) any Liabilities of the Business relating to or arising from unfulfilled commitments, quotations, purchase orders, customer orders, or work orders that (i) do not constitute part of the Purchased Assets or (ii) are not validly and effectively assigned to Buyer pursuant to this Agreement;

(l) any Liabilities to indemnify, reimburse, or advance amounts to any present or former official, manager, employee, or agent of Seller for or in connection with any event or circumstance occurring while such individual was an official, manager, employee, or agent of Seller;

(m) any Liabilities under the Excluded Contracts or any other Contracts, including Intellectual Property Agreements, (i) that are not validly and effectively assigned to Buyer pursuant to this Agreement or (ii) to the extent such Liabilities arise out of or relate to a breach by Seller of such Contracts prior to the Closing;

(n) any Liabilities associated with debt, revenue bonds, commercial paper, loans, or credit facilities of Seller or the Business;

(o) any Liabilities, other than Assumed Environmental Liabilities, arising out of, in respect of, or in connection with the failure by Seller to comply with any Law or Governmental Order;

(p) fines or penalties owing to any Governmental Authority for events to the extent occurring or arising prior to the Closing Date;

(q) any Liability of Seller arising from the violation, breach, or default by Seller, prior to the Closing, of any Assumed Liability or Intellectual Property Assets included in the Purchased Assets;

(r) any Liability arising under any collective bargaining agreement of Seller, including any and all obligations incurred under the IBEW Collective Bargaining

Agreement prior to the Closing Date, including pension/retirement obligations under the Alaska Electrical Pension Fund regarding accruals earned prior to Closing;

(s) any Liability of Seller or ML&P for payments in lieu of taxes, including pursuant to AMC 26.10.025;

(t) any other Liability of Seller accruing or arising and required to be performed prior to the Closing;

(u) any Environmental Claims and Liabilities under Environmental Laws, and Losses arising from environmental conditions at the Purchased Assets, as of the Closing Date other than the Assumed Environmental Liabilities; and

(v) any other Liabilities not expressly assumed by Buyer pursuant to Section 2.03 and any Liabilities expressly allocated to or retained by Seller in this Agreement.

Section 2.05 Purchase Price. The aggregate purchase price for the Purchased Assets to be paid on the Closing Date will be the assumption of the Assumed Liabilities plus an amount (as adjusted in accordance with this Agreement, the "**Purchase Price**") equal to the following:

(a) the Upfront Payment,

(b) minus the Accrued Leave Liability;

(c) minus the Net Book Value of Designated Excluded Assets.

Section 2.06 Estimated Purchase Price Statement. At least ten (10) Business Days before the Closing, Seller shall prepare and deliver to Buyer a statement, prepared in accordance with the Accounting Principles (the "**Estimated Purchase Price Statement**"), setting forth Seller's good faith estimates of the Estimated Accrued Leave Liability, the Estimated Net Book Value of Designated Excluded Assets and the calculation of the Estimated Purchase Price, as determined in accordance with Section 2.05 (the "**Estimated Purchase Price**"). Such statement shall also include an estimate of the Transferred Cash (the "**Estimated Transferred Cash**").

Section 2.07 Payment of Estimated Purchase Price. At the Closing, Buyer will deliver, or cause to be delivered, to the intended final recipients (the names, wiring information and other relevant payment information of which recipients as may be reasonably requested by Buyer shall have been furnished by Seller in writing no later than three (3) Business Days prior to the Closing (such recipients, the "**Recipients**")), an amount equal to the Estimated Purchase Price for payment, on behalf of the Business, to the appropriate Recipient. Seller shall cause the Recipients to include amounts and Persons necessary to irrevocably defease or repay all Closing Debt in accordance with Section 3.02(c). With the exception of any portion of the Transferred Cash that Seller delivers to Buyer on the Closing Date, the Purchase Price shall be paid net of Estimated Transferred Cash in lieu of any obligation of Seller to deliver Transferred Cash on the Closing Date.

Section 2.08 Purchase Price Adjustment. Following the Closing, the Purchase Price will be adjusted as set forth below:

(a) **Closing Statement Preparation.** Within sixty (60) days after the Closing Date, Buyer shall prepare and deliver to Seller a statement (the "**Closing Statement**") setting forth a calculation of (i) the Accrued Leave Liability, (ii) the Transferred Cash, (iii) the Net Book Value of Designated Excluded Assets and (iv) the Closing Prorations, and (v) a recalculation of the Purchase Price, if any, based on each of the foregoing. The Closing Statement will be calculated (x) pursuant to the definitions within this Agreement, (y) in accordance with the Accounting Principles where applicable, and (z) without giving effect to the transactions contemplated hereby. Seller shall cooperate with Buyer in promptly responding to Buyer's reasonable requests while Buyer is preparing the Closing Statement.

(b) **Examination and Review.**

(i) Examination. After receipt of the Closing Statement, Seller shall have forty-five (45) days (the "**Review Period**") to review the Closing Statement. During the Review Period, Seller and its attorneys and accountants shall have access to the books and records of the Business, the personnel of, and work papers prepared by, Buyer or Buyer's Accountants to the extent that they relate to the Closing Statement and to such historical financial information (to the extent in Buyer's possession) relating to the Closing Statement as Seller may reasonably request for the purpose of reviewing the Closing Statement and to prepare a Statement of Objections (as defined below), *provided*, that such access shall be in a manner that does not interfere with the normal business operations of Buyer or the Business.

(ii) Objection. On or prior to the last day of the Review Period, Seller may object to the Closing Statement by delivering to Buyer a written statement setting forth Seller's objections in reasonable detail, indicating each disputed item, its amount and the basis for Seller's disagreement therewith (the "**Statement of Objections**"). If Seller fails to deliver the Statement of Objections before the expiration of the Review Period, the Closing Statement and the calculations contained therein shall be deemed to have been accepted by and to be final and binding on Seller and Buyer. If Seller delivers the Statement of Objections before the expiration of the Review Period, Buyer and Seller shall negotiate in good faith to resolve such objections within thirty (30) days after the delivery of the Statement of Objections (the "**Resolution Period**"), and, if the same are so resolved within the Resolution Period, the Closing Statement and the calculations contained therein, in each case with such changes as may have been previously agreed in writing by Buyer and Seller, shall be final and binding on Seller and Buyer and shall not be subject to further review.

(iii) Resolution of Disputes. If Seller and Buyer fail to reach an agreement with respect to any or all of the matters set forth in the Statement of

Objections before expiration of the Resolution Period, then any amounts remaining in dispute ("**Disputed Amounts**") shall be submitted for resolution to an impartial regionally recognized financial consulting firm or a firm of independent certified public accountants other than Seller's Accountants, the Business's accountants or Buyer's Accountants mutually agreeable to Buyer and Seller (the "**Independent Accountant**") who, acting as an expert and not an arbitrator, and without considering extrinsic evidence, shall resolve the Disputed Amounts only to the extent they relate to accounting matters and make any adjustments to the Closing Statement. The Independent Accountant shall be jointly instructed by the parties to make a determination as soon as practicable within thirty (30) days (or such other time as the parties hereto shall agree in writing) after engagement of the Independent Accountant, and its resolution of the Disputed Amounts and, other than with respect to conclusions of Law and interpretation of this Agreement and consideration of extrinsic evidence, its adjustments to the Closing Statement shall be conclusive (other than with respect to conclusions of Law and interpretation of this Agreement and consideration of extrinsic evidence) absent manifest error. The Independent Accountant shall decide only the specific items under dispute by the parties and the Independent Accountant's decision for each Disputed Amount must be within the range of values assigned to each such item in the Closing Statement and the Statement of Objections, respectively. The fees and expenses of the Independent Accountant shall initially be split 50/50 between Buyer and Seller, and after the final resolution of any dispute, shall be borne by Buyer, on the one hand, and Seller, on the other hand, based on the percentage which the portion of the contested amount not awarded to each party bears to the amount actually contested by such party (and the appropriate party shall reimburse the other party accordingly). For example, if closing accounts receivable is the only disputed item, and Seller claims that closing accounts receivable is $1,000, and Buyer contests only $500 of the amount claimed by Seller, and if the Independent Accountants ultimately resolve the dispute by awarding Seller $300 of the $500 contested, then the costs and expenses of Independent Accountants will be allocated 60% (i.e., 300 ÷ 500) to Buyer and 40% (i.e., 200 ÷ 500) to Seller. Any dispute that cannot be resolved by the Independent Accountant pursuant to the provisions hereof shall be resolved by courts of law set forth in Section 10.11.

(c) **Adjustment Payments**. The Closing Prorations and the Purchase Price shall be recalculated using such finally determined amounts in lieu of the estimates of such amounts used in the calculation of the Purchase Price payable at Closing.

(i) With respect to Accrued Leave Liability, Net Book Value of Designated Excluded Assets and Closing Prorations, the Purchase Price shall be increased (in the case of an aggregate positive amount) or decreased (in the case of an aggregate negative amount) on a dollar-for-dollar basis by the aggregate amount, if any, determined by (A) subtracting the Estimated Accrued Leave Liability from the Accrued Leave Liability, (B) subtracting the Estimated Net

Book Value of Designated Excluded Assets from the Net Book Value of Designated Excluded Assets and (C) adding the Closing Prorations if the aggregate amount of the prorations is for the benefit of Seller and subtracting the amount of Closing Prorations if the aggregate amount of the prorations is for the benefit of Buyer, and adding together the amounts calculated in each of the foregoing (A), (B) and (C) to reach a final net amount owing under this Section 2.08 (such net amount, the "**Adjustment Amount**").

(ii) No later than within two (2) Business Days after the determination of the Adjustment Amount, (A) if the Adjustment Amount results in an increase to the Purchase Price, Buyer shall pay to Seller an amount equal to the Adjustment Amount (without interest) and (B) if the Adjustment Amount results in a decrease to the Purchase Price, Seller shall disburse to Buyer an amount equal to the Adjustment Amount (without interest). In addition, if Estimated Transferred Cash minus Transferred Cash is a negative number, Seller shall pay Buyer the difference on such date, and if a positive number, Buyer shall pay Seller such difference on such date.

Section 2.09 Treatment of Adjustment Payments. Any payments made pursuant to Section 2.08 shall be made by wire transfer of immediately available funds to such account or accounts as is directed in writing by Buyer or Seller, as the case may be, and shall be treated as an adjustment to the Purchase Price by the parties for Tax purposes, unless otherwise required by Law.

Section 2.10 Allocation of Purchase Price. Seller and Buyer agree to file their respective IRS Forms 8594 for the Purchase Price and all Tax Returns in accordance with allocation principles to be agreed upon by Seller and Buyer prior to the Closing. Seller and Buyer shall cooperate to the extent necessary following the Closing to determine a final allocation using such agreed allocation principles and Seller and Buyer shall use such final allocation for Form 8594.

Section 2.11 Withholding Tax. Buyer shall be entitled to deduct and withhold from the Purchase Price all Taxes that Buyer may be required to deduct and withhold under any provision of Tax Law. All such withheld amounts shall be treated as delivered to Seller hereunder.

Section 2.12 Third Party Consents. To the extent that Seller's rights under any Contract or Permit constituting a Purchased Asset, or any other Purchased Asset, may not be assigned to Buyer without the consent of another Person which has not been obtained, this Agreement shall not constitute an agreement to assign the same if an attempted assignment would constitute a breach thereof or be unlawful, and except as otherwise provided in Section 6.20 or elsewhere in this Agreement, Seller, at its expense, shall use its commercially reasonable efforts to obtain any such required consent(s) as promptly as possible. If any such consent shall not be obtained or if any attempted assignment would be ineffective or would impair Buyer's rights under the Purchased Asset in question so that Buyer would not in effect acquire the benefit of all such rights, Seller, to the maximum extent reasonably permitted by Law and the Purchased Asset, shall act after the Closing as Buyer's agent in order to obtain for it the benefits thereunder and shall cooperate reasonably, to the maximum extent reasonably permitted by Law and the Purchased Asset, with Buyer in any other reasonable arrangement designed to provide such benefits to Buyer. Notwithstanding any provision in this Section 2.12 to the contrary, Buyer shall

not be deemed to have waived its rights under Section 7.02(d) hereof unless and until Buyer either provides written waivers thereof or elects to proceed to consummate the transactions contemplated by this Agreement at Closing.

ARTICLE III
CLOSING

Section 3.01 Closing. Subject to the terms and conditions of this Agreement, the consummation of the transactions contemplated by this Agreement (the "**Closing**") shall take place at the headquarters of Buyer located at 5601 Electron Drive, Anchorage, AK 99518, at 10:00 a.m., local time, within one hundred and twenty (120) days after RCA Approval is received, provided that the Closing shall take place no sooner than the fifth (5^{th}) Business Day after all of the conditions to Closing set forth in ARTICLE VII are either satisfied or waived (other than conditions which, by their nature, are to be satisfied on the Closing Date), or at such other time, date, or place as Seller and Buyer may mutually agree upon in writing. The date on which the Closing is to occur is herein referred to as the "**Closing Date**".

Section 3.02 Closing Deliverables.

(a) At the Closing, Seller shall deliver to Buyer the following:

(i) a bill of sale in the form of Exhibit K hereto (the "**Bill of Sale**") and duly executed by Seller, transferring the Tangible Personal Property included in the Purchased Assets to Buyer;

(ii) an assignment and assumption agreement in the form of Exhibit L hereto (the "**Assignment and Assumption Agreement**") and duly executed by Seller, effecting the assignment to and assumption by Buyer of the Purchased Assets and the Assumed Liabilities;

(iii) with respect to ML&P Plant 2/ML&P Plant 2A, a special warranty deed in the form of Exhibit M hereto (with an accompanying agreement to be entered into by Buyer and Seller effective as of the Closing to set forth the terms upon which Seller may access the Plant 2A Mural following the Closing on mutually acceptable terms and conditions), and with respect to each other parcel of Owned Real Property, a quitclaim deed in form of Exhibit N hereto (each, a "**Deed**") and duly executed and acknowledged by Seller;

(iv) with respect to each Lease, an Assignment and Assumption of Lease in form and substance reasonably satisfactory to Buyer (each, an "**Assignment and Assumption of Lease**") and duly executed and acknowledged by Seller;

(v) with respect to the Other Real Property Interests (other than any easements appurtenant to any Owned Real Property), one or more assignments in

form and substance reasonably satisfactory to Buyer (each, a "**Real Property Interest Assignment**") and duly executed and acknowledged by Seller;

(vi) the BRU Transfer Documents duly executed by Seller;

(vii) the Seller Closing Certificate;

(viii) the FIRPTA Certificate;

(ix) the certificates of the Clerk of Seller required by Section 7.02(j) and Section 7.02(k);

(x) such other customary instruments of assignment, transfer, assumption, conveyance, filings or documents (including transfer of vehicle titles), in form and substance reasonably satisfactory to Buyer and Seller, as may be required to give effect to this Agreement; and

(xi) such other agreements, consents, documents, instruments and writings as are required to be delivered by Seller at or prior to the Closing pursuant to this Agreement or the Ancillary Documents.

(b) At the Closing, Buyer shall deliver to Seller the following:

(i) the Purchase Price paid in the manner set forth in Section 2.07;

(ii) the Assignment and Assumption Agreement duly executed by Buyer;

(iii) with respect to each Lease, an Assignment and Assumption of Lease duly executed by Buyer;

(iv) the BRU Transfer Documents duly executed by Buyer;

(v) the Buyer Closing Certificate;

(vi) the certificates of the Secretary or Assistant Secretary of Buyer required by Section 7.03(g) and Section 7.03(h); and

(vii) such other agreements, documents, instruments and writings as are required to be delivered by Buyer at or prior to the Closing pursuant to this Agreement of the Ancillary Documents.

(c) The parties hereto anticipate that all of the conditions set forth in ARTICLE VII other than the funding described in this Section 3.02(c) shall be satisfied on a date that is mutually agreed by the parties hereto (the "**Documentation Closing Date**"). On the Documentation Closing Date, the parties hereto shall have delivered all documentation required by ARTICLE VII to be delivered at or prior to the Closing, to be

held in escrow until the delivery of the Upfront Payment to Seller on a date that is no sooner than twenty (20) days following the Documentation Closing Date (such date, the "**Financial Closing Date**"). On the Financial Closing Date, a portion of the Upfront Payment together with any other funds of Seller to the extent necessary shall be deposited into the applicable bond fund under the Trust Agreements and other documents related to the Closing Debt in accordance with the provisions related to the disposition of the system and defeasance/redemption provisions of the Trust Agreements and other documents pursuant to which such Closing Debt was issued in an amount that shall be sufficient to pay and redeem the Closing Debt ("**Bond Release Consideration**"). The sufficiency of such deposit of monies and the amount of the Bond Release Consideration shall be verified by an independent certified public accountant, acting as an expert and not an arbitrator, that is acceptable to Buyer and Seller. Seller shall cause irrevocable instructions to be given on or prior to the Financial Closing Date to the trustees under and in accordance with the Trust Agreements, and there shall be delivered to Buyer and Seller on or prior to the Closing Date opinions of bond counsel to Seller, in a form satisfactory to Buyer and Seller, to the effect that the pledge of the pledged revenues, and all covenants, agreements and obligations of Seller to the holders of the Closing Debt, and all liens, benefits or security under the Closing Debt, have thereupon ceased, terminated and become void, discharged and satisfied upon deposit of the Bond Release Consideration at the Financial Closing Date as aforesaid and that the actions contemplated by this Agreement will not have an adverse effect on the tax-exempt status of the Closing Debt. Any Bond Release Consideration and interest earned thereon not used to repay or defease Closing Debt shall be paid over to Seller. For the avoidance of doubt, except as set forth in this Section 3.02(c), the Financial Closing Date shall be the Closing Date under this Agreement.

ARTICLE IV
REPRESENTATIONS AND WARRANTIES OF SELLER

Except as set forth in the correspondingly numbered Section of the Disclosure Schedules, Seller represents and warrants to Buyer that the statements contained in this ARTICLE IV are true and correct as of the date hereof. Without limiting any other provision of this Agreement, for purposes only of this ARTICLE IV, the definition of Purchased Assets shall include the Eklutna Generation Assets and the definition of Business shall be understood to mean the operation of the Eklutna Generation Assets.

Section 4.01 Organization and Qualification of Seller. Seller is a political subdivision duly organized, validly existing under the Laws of the State of Alaska and has all requisite power and authority to own, operate or lease the properties and assets now owned, operated or leased by it and to carry on the Business as currently conducted.

Section 4.02 Authority of Seller. Seller has all requisite municipal power and authority to enter into this Agreement and the Ancillary Documents to which Seller is a party, to carry out its obligations hereunder and thereunder, and to consummate the transactions contemplated hereby and thereby. The execution and delivery by Seller of this Agreement and any Ancillary Document to which Seller is a party, the performance by Seller of its obligations hereunder and thereunder and the

consummation by Seller of the transactions contemplated hereby and thereby have been duly authorized by all requisite corporate action on the part of Seller. This Agreement has been duly executed and delivered by Seller, and (assuming due authorization, execution and delivery by Buyer) this Agreement constitutes a legal, valid and binding obligation of Seller enforceable against Seller in accordance with its terms, subject to bankruptcy, insolvency, fraudulent transfer, reorganization, moratorium and other similar laws of general applicability relating to or affecting creditors' rights and to general equity principles, whether considered in a proceeding at law or in equity. When each Ancillary Document to which Seller is or will be a party has been duly executed and delivered by Seller (assuming due authorization, execution and delivery by each other party thereto), such Ancillary Document will constitute a legal and binding obligation of Seller enforceable against it in accordance with its terms.

Section 4.03 No Conflicts; Consents.

(a) The execution, delivery and performance by Seller of this Agreement and the Ancillary Documents to which it is a party, and the consummation of the transactions contemplated hereby and thereby, do not and will not: (a) conflict with or result in a violation or breach of, or default under, any provision of the Charter of Seller; (b) conflict with or result in a violation or breach of any provision of any Law or Governmental Order applicable to Seller, the Business, or the Purchased Assets; (c) except as set forth in Section 4.03(a) of the Disclosure Schedules, require the consent, notice or other action by any Person under, conflict with, result in a material violation or material breach of, constitute a material default or an event that, with or without notice or lapse of time or both, would constitute a material default under, result in the acceleration of or create in any party the right to accelerate, terminate, modify or cancel any Contract or Permit to which Seller is a party or by which Seller or the Business is bound or to which any of the Purchased Assets are subject (including any Assigned Contract); or (d) result in the creation or imposition of any Encumbrance other than Permitted Encumbrances on the Purchased Assets. Except for the RCA Approval and the other Governmental Authority approvals set forth in Section 4.03(a) of the Disclosure Schedules, no material consent, approval, Permit, Governmental Order, declaration or filing with, or notice to, any Governmental Authority is required by or with respect to Seller in connection with the execution and delivery of this Agreement or any of the Ancillary Documents and the consummation of the transactions contemplated hereby and thereby.

(b) No filing is required under the HSR Act because Seller is a U.S. governmental authority referred to in 15 U.S.C. § 18a(c)(4).

Section 4.04 Financial Statements. Complete copies of the audited financial statements consisting of the statements of net position of the Business as at December 31, 2017 and December 31, 2016 and the statements of revenues, expenses and changes in net position and statements of cash flows in each of the years ending December 31, 2017 and December 31, 2016 (the "**Audited Financial Statements**") have been delivered to Buyer. The Audited Financial Statements have been prepared in accordance with GAAP applied on a consistent basis throughout the period involved. The Audited Financial Statements are based on the books and records of the Business, and fairly present the financial condition of the Business as of the respective dates they were prepared and the results of the operations of the Business for the periods indicated. The statement of net position of the Business as of

December 31, 2017 is referred to herein as the "**Balance Sheet**" and the date thereof as the "**Balance Sheet Date** Seller maintains a standard system of accounting for the Business established and administered in accordance with GAAP. Each statement of net position of the Business included in the Updated Financial Statements delivered to Buyer will fairly present in all material respects, the financial position of the Business as of its date and each of the statements of revenues, expenses and changes in net position and statements of cash flows will fairly present in all material respects, the information set forth therein for the Business, and in each case, will be prepared in accordance with GAAP consistently applied during the periods involved, except, in the case of unaudited financial statements, the absence of notes (that, if presented, would not differ materially from those presented in the most recent audited financial statements delivered as Updated Financial Statements).

Section 4.05 Undisclosed Liabilities. Seller has no Liabilities with respect to the Business, except (a) those which are adequately reflected or reserved against in the Balance Sheet (including notes thereto) as of the Balance Sheet Date, and (b) those which have been incurred in the ordinary course of business consistent with past practice since the Balance Sheet Date and which are not, individually or in the aggregate, material in amount.

Section 4.06 Absence of Certain Changes, Events and Conditions. Between the Balance Sheet Date and the date of this Agreement, and other than in the ordinary course of business consistent with past practice, there has not been any:

(a) event, occurrence or development that has had, or would reasonably be expected to have, individually or in the aggregate, a Material Adverse Effect;

(b) declaration or payment of any dividends or distributions on or in respect of any of ML&P's equity or redemption, purchase or acquisition of ML&P's equity with respect to the Business;

(c) material change in any method of accounting or accounting practice for the Business, except as required by GAAP or as disclosed in the notes to the Audited Financial Statements;

(d) material change in cash management practices and policies, practices and procedures with respect to collection of Accounts Receivable, establishment of reserves for uncollectible Accounts Receivable, accrual of Accounts Receivable, inventory control, prepayment of expenses, payment of trade accounts payable, accrual of other expenses, deferral of revenue and acceptance of customer deposits;

(e) entry into any Contract that would constitute a Material Contract;

(f) incurrence, assumption or guarantee of any indebtedness for borrowed money in connection with the Business except unsecured current obligations and Liabilities incurred in the ordinary course of business consistent with past practice and Prudent Utility Practices;

(g) transfer, assignment, sale or other disposition of any of the Purchased Assets shown or reflected in the Balance Sheet, except for the sale of Inventory and surplus equipment in the ordinary course of business;

(h) cancellation of any debts or claims or amendment, termination or waiver of any rights constituting Purchased Assets;

(i) transfer or assignment of or grant of any license or sublicense under or with respect to any material Intellectual Property Assets or Intellectual Property Agreements (except non-exclusive licenses or sublicenses granted in the ordinary course of business consistent with past practice and Prudent Utility Practices);

(j) abandonment or lapse of or failure to maintain in full force and effect any material Intellectual Property Registration, or failure to take or maintain reasonable measures to protect the confidentiality or value of any material Trade Secrets included in the Intellectual Property Assets;

(k) material damage, destruction or loss, or any material interruption in use, of any Purchased Assets, whether or not covered by insurance;

(l) acceleration, termination, material modification to or cancellation of any Assigned Contract or Permit;

(m) material capital expenditures which would constitute an Assumed Liability;

(n) imposition of any Encumbrance upon any of the Purchased Assets;

(o) (i) grant of any bonuses, whether monetary or otherwise, or increase in any wages, salary, severance, pension or other compensation or benefits in respect of any non-represented current or former employees, officials, managers, independent contractors or consultants of the Business for which the aggregate costs and expenses to the Business exceed $2,000,000, other than as provided for in the Retention Agreements or any other written agreements or required by applicable Law, or (ii) action to accelerate the vesting or payment of any compensation or benefit for any current or former employee, official, manager, consultant or independent contractor of the Business;

(p) hiring or promoting any person as or to (as the case may be) an official or manager or hiring or promoting any employee below official or manager except to fill a vacancy in the ordinary course of business;

(q) adoption, material modification or termination of any: (i) employment, severance, retention or other agreement with any current or former employee, official, manager, independent contractor or consultant of the Business, (ii) Benefit Plan, or (iii) collective bargaining, letters of agreement, or other agreement with a Union, in each case whether written or oral;

(r) any loan to (or forgiveness of any loan to), or entry into any other transaction with, any current or former officials, managers or employees of the Business;

(s) adoption of any plan of merger, consolidation, reorganization, liquidation or dissolution or filing of a petition in bankruptcy under any provisions of federal or state bankruptcy Law or consent to the filing of any bankruptcy petition against it under any similar Law;

(t) purchase, lease or other acquisition of the right to own, use or lease any property or assets in connection with the Business for an amount in excess of $1,500,000, individually (in the case of a lease, per annum) or $20,000,000 in the aggregate (in the case of a lease, for the entire term of the lease, not including any option term), except for purchases of Inventory or supplies in the ordinary course of business consistent with past practice and Prudent Utility Practices;

(u) any transfer of assets historically used by ML&P to Seller or a division or business unit of Seller which have an aggregate net book value in excess of $1,000,000; and

(v) any Contract to do any of the foregoing, or any action or omission that would result in any of the foregoing.

Section 4.07 Material Contracts.

(a) Section 4.07(a) of the Disclosure Schedules lists each of the following Contracts (but excluding any Leases) (x) by which any of the Purchased Assets are bound or affected or (y) to which Seller is a party and by which it is bound in connection with the Business or the Purchased Assets (such Contracts, together with all Contracts concerning the occupancy, management or operation of any Real Property (including brokerage contracts) listed or otherwise disclosed in Section 4.10(b) of the Disclosure Schedules and all Intellectual Property Agreements set forth in Section 4.11(b) of the Disclosure Schedules, being "**Material Contracts**"):

(i) all Contracts, not otherwise provided for in this Section 4.07(a), that involve aggregate consideration in excess of $2,000,000 and that, in each case, cannot be cancelled without penalty and without more than ninety (90) days' prior notice;

(ii) all Contracts that require Seller to purchase or sell a stated portion of the requirements or outputs of the Business or that contain "take or pay" provisions and that require payments in excess of $2,000,000 for each individual Contract;

(iii) all Contracts for the purchase, exchange, or sale of electricity, energy, capacity, or other energy-related products or ancillary services and requiring payments in excess of $2,000,000 for each individual Contract;

(iv) all Contracts for the purchase, exchange, sale, or storage of natural gas, fuel oil, diesel, or any other fuel and requiring payments in excess of $2,000,000 for each individual Contract;

(v) all Contracts for the transmission of electricity that require payments in excess of $2,000,000 for each individual Contract;

(vi) all interconnection Contracts;

(vii) all Contracts that provide for the indemnification of any Person or the assumption of any Tax, environmental, or other Liability of any Person;

(viii) all Contracts that relate to the acquisition or disposition of any business, a material amount of stock or assets of any other Person or any real property (whether by merger, sale of stock, sale of assets or otherwise), other than Contracts entered into in the ordinary course of business relating to assets with a net book value of less than $2,000,000 individually or $5,000,000 in the aggregate;

(ix) all broker, distributor, dealer, manufacturer's representative, franchise, agency, sales promotion, market research, marketing consulting, and advertising Contracts that provide for annual compensation by Seller in an amount in excess of $2,000,000 and that are not cancelable by Seller without more than ninety (90) days' prior notice;

(x) all agreements and Contracts with employees, independent contractors, or consultants (or similar arrangements) other than written or oral offers or Contracts terminable without material penalty or without more than ninety (90) days' prior notice;

(xi) except for Contracts relating to trade receivables, all Contracts relating to indebtedness (including guarantees);

(xii) all Contracts with any Governmental Authority ("**Government Contracts**");

(xiii) all Contracts that limit or purport to limit the ability of Seller to compete in any line of business or with any Person or in any geographic area or during any period of time;

(xiv) all joint venture, partnership, or similar Contracts;

(xv) all Contracts for the sale of any of the Purchased Assets or for the grant to any Person of any option, right of first refusal or preferential or similar right to purchase or otherwise acquire an interest in any of the Purchased Assets, other than Contracts entered into in the ordinary course of business relating to

assets with a net book value of less than $2,000,000 individually or $5,000,000 in the aggregate;

(xvi) all powers of attorney with respect to the Business or any Purchased Asset;

(xvii) all collective bargaining agreements or Contracts with any Union;

(xviii) all Contracts related to the BRU Interests;

(xix) all Contracts related to Eklutna Generation Assets and Eklutna Transmission Assets;

(xx) any construction contract, equipment purchase contract, operations and maintenance agreement, management or administrative services contract, and technical or contractual service agreement entered into in the past five (5) years which has required or will require expenditures in excess of $2,000,000, including all such agreements related to ML&P Plant 2A; and

(xxi) Contracts related to the purchase or sale of air pollution emission allowances or credits.

(b) Each Material Contract is valid and binding on Seller in accordance with its terms and is in full force and effect. None of Seller or, to Seller's Knowledge, any other party thereto is in breach of or default under (or is alleged to be in breach of or default under), or has provided or received any notice of any intention to terminate, any Material Contract. No event or circumstance has occurred that, with notice or lapse of time or both, would constitute an event of default under any Material Contract or result in a termination thereof or would cause or permit the acceleration or other changes of any right or obligation or the loss of any benefit thereunder. Complete and correct copies of each Material Contract (including all modifications, amendments and supplements thereto and waivers thereunder) have been made available to Buyer. There are no material disputes pending or threatened under any Contract included in the Purchased Assets.

Section 4.08 Title to Purchased Assets. Except as provided in Section 4.08 of the Disclosure Schedules, Seller has good and valid title to, or a valid leasehold interest in, all of the Purchased Assets (the foregoing representation and any other representation in this Agreement shall not be modified or negated by the execution or recording of any quit claim deed). All such Purchased Assets (including leasehold interests) are free and clear of Encumbrances except for the following (collectively referred to as "**Permitted Encumbrances**"):

(a) those items set forth in Section 4.08 of the Disclosure Schedules;

(b) mechanics', carriers', workmen's, repairmen's or other like liens arising or incurred in the ordinary course of business consistent with past practice or amounts that

are not delinquent and that are not, individually or in the aggregate, material to the Business or the Purchased Assets;

(c) easements, rights of way, servitudes, permits, licenses, covenants, restrictions, zoning ordinances and other similar Encumbrances affecting Real Property that individually or in the aggregate, do not prohibit or materially interfere with the current operation of any Real Property;

(d) other than with respect to Owned Real Property, liens arising under original purchase price conditional sales contracts and equipment leases with third parties entered into in the ordinary course of business consistent with past practice which are not, individually or in the aggregate, material to the Business or the Purchased Assets;

(e) Encumbrances for Taxes or assessments that are not delinquent;

(f) Encumbrances that have been placed by any developer, landlord, or other third party on any Leased Real Property or Other Real Property Interest that individually or in the aggregate, do not prohibit or materially interfere with the current operation of the Real Property;

(g) all matters that an accurate survey of the Real Property would disclose that individually or in the aggregate, do not prohibit or materially interfere with the current operation of the Real Property;

(h) deed restrictions limiting the use of the Real Property to non-residential uses;

(i) except with respect to the BRU Interest, any conveyance, transfer, or lease of any oil, gas, or mineral rights and profits, rights, and appurtenances relating thereto; or

(j) in the case of any buildings or other improvements owned by Seller on any Leased Real Property, the terms and conditions of the applicable Lease.

Section 4.09 Condition and Sufficiency of Assets. The buildings, plants, structures, furniture, fixtures, machinery, equipment, vehicles and other items of Tangible Personal Property included in the Purchased Assets are structurally sound, are in good operating condition and repair, and are adequate for the uses to which they are being put. The Purchased Assets are sufficient for the continued conduct of the Business immediately after the Closing in substantially the same manner as conducted prior to the Closing and constitute all of the rights, property and assets necessary to conduct the Business as currently conducted. None of the Excluded Assets are material to the Business. The Purchased Assets have been operated and maintained in accordance with Prudent Utility Practices. Except as set forth in Section 4.09 of the Disclosure Schedules, all of the Generation Assets, Transmission Assets and Distribution Assets owned, in whole or in part, leased or operated by ML&P have been operated in all material respects in the ordinary course of business consistent with past practice, and there are no pending material claims for defective work, equipment or materials relating to the Purchased Assets.

Section 4.10 Real Property.

(a) Section 4.10(a) of the Disclosure Schedules sets forth each parcel of real property owned by Seller and used in or necessary for the conduct of the Business as currently conducted (together with all buildings, fixtures, structures and improvements situated thereon and all easements, rights-of-way and other rights and privileges appurtenant thereto, collectively, the "**Owned Real Property**"), including with respect to each property, the address location and use. Seller has delivered to Buyer copies of the deeds and other instruments (as recorded) by which Seller acquired such parcel of Owned Real Property, and copies of all title insurance policies, opinions, abstracts and surveys in the possession of Seller with respect to such parcel. With respect to each parcel of Owned Real Property:

(i) Seller has good and valid fee simple title, free and clear of all Encumbrances, except (A) Permitted Encumbrances and (B) those Encumbrances set forth on Section 4.10(a)(i) of the Disclosure Schedules;

(ii) except as set forth in Section 4.10(a)(ii) of the Disclosure Schedules or in any Permitted Encumbrance, Seller has not leased or otherwise granted to any Person the right to use or occupy such Owned Real Property or any portion thereof; and

(iii) to Seller's Knowledge, there are no unrecorded outstanding options, rights of first offer or rights of first refusal to purchase such Owned Real Property or any portion thereof or interest therein.

(b) Section 4.10(b) of the Disclosure Schedules sets forth each parcel of real property leased by Seller and used in or necessary for the conduct of the Business as currently conducted (together with all rights, title and interest of Seller in and to leasehold improvements relating thereto, including security deposits, reserves or prepaid rents paid in connection therewith, collectively, the "**Leased Real Property**"), and a true and complete list of all leases, subleases, licenses, concessions and other agreements (whether written or oral), including all amendments, extensions renewals, guaranties and other agreements with respect thereto, pursuant to which Seller holds any Leased Real Property (collectively, the "**Leases**"). Seller has delivered to Buyer a true and complete copy of each Lease. With respect to each Lease:

(i) except as set forth in Section 4.10(b) of the Disclosure Schedules, such Lease is valid, binding, enforceable, and in full force and effect, subject to bankruptcy, insolvency, fraudulent transfer, reorganization, moratorium and other similar laws of general applicability relating to or affecting creditors' rights and to general equity principles, whether considered in a proceeding at law or in equity, and Seller enjoys peaceful and undisturbed possession of the Leased Real Property, subject to Permitted Encumbrances;

(ii) To Seller's Knowledge, Seller is not in breach or default under such Lease, and no event has occurred or circumstance exists which, with the delivery of notice, passage of time or both, would constitute such a breach or default, and Seller has paid all rent due and payable under such Lease;

(iii) Seller has not received nor given any currently-effective notice of any default or event that with notice or lapse of time, or both, would constitute a default by Seller under any of the Leases and, to the Knowledge of Seller, no other party is in default thereof, and no party to any Lease has exercised any termination rights with respect thereto;

(iv) Except as set forth in Section 4.10(b)(iv) of the Disclosure Schedules, Seller has not subleased, assigned or otherwise granted to any Person the right to use or occupy such Leased Real Property or any portion thereof; and

(v) Seller has not pledged, mortgaged or otherwise granted an Encumbrance on its leasehold interest in any Leased Real Property.

(c) Seller holds sufficient title in all easements, licenses, franchises and other interests in real property other than the Owned Real Property and Leased Real Property that are used in or necessary for the conduct of the Business as currently conducted (together with all of Seller's equipment and fixtures situated thereon and all other rights and privileges appurtenances thereto, collectively, the "**Other Real Property Interests**"). Section 4.10(c) of the Disclosure Schedules contains a list of all material Other Real Property Interests. With respect to all Other Real Property Interests:

(i) Except as provided in Section 4.10(c) of the Disclosure Schedules, the Other Real Property Interests are valid, binding, enforceable, and in full force and effect, subject to bankruptcy, insolvency, fraudulent transfer, reorganization, moratorium and other similar laws of general applicability relating to or affecting creditors' rights and to general equity principles, whether considered in a proceeding at law or in equity, and Seller enjoys peaceful and undisturbed possession of the rights or occupancy conferred by the Other Real Property Interests, subject to Permitted Encumbrances;

(ii) To Seller's Knowledge, Seller is not in breach or default under any agreement evidencing or granting the Other Real Property Interests, and no event has occurred or circumstance exists which, with the delivery of notice, passage of time or both, would constitute such a breach or default, and Seller has paid all consideration due and payable with respect to the Other Real Property Interests;

(iii) Seller has not received nor given any currently-effective notice of any default or event that with notice or lapse of time, or both, would constitute a default by Seller with respect to any of the Other Real Property Interests and, to the Knowledge of Seller, no other party is in default thereof; and

(iv) Seller has not subleased, sublicensed, assigned or otherwise granted to any Person the right to use or occupy any of the Other Real Property Interests or any portion thereof.

(d) Seller has not received any written notice of (i) violations of building codes or zoning ordinances or other governmental or regulatory Laws affecting the Real Property, (ii) existing, pending or threatened condemnation proceedings affecting the Real Property, or (iii) existing, pending or threatened zoning, building code or other moratorium proceedings, or similar matters which would reasonably be expected to adversely affect the ability to operate the Real Property as currently operated and in accordance with Prudent Utility Practices. Neither the whole nor any material portion of any Real Property has been damaged or destroyed by fire or other casualty.

(e) The Real Property is sufficient for the continued conduct of the Business immediately after the Closing in substantially the same manner as conducted prior to the Closing and constitutes all of the real property necessary to conduct the Business as currently conducted.

Section 4.11 Intellectual Property.

(a) Section 4.11(a) of the Disclosure Schedules contains a correct, current and complete list of: (i) all Intellectual Property Registrations, specifying as to each, as applicable: the title, mark, or design; the jurisdiction by or in which it has been issued, registered or filed; the patent, registration or application serial number; the issue, registration or filing date; and the current status; (ii) all unregistered Trademarks included in the Intellectual Property Assets; (iii) all proprietary Software included in the Intellectual Property Assets; and (iv) all other material Intellectual Property Assets that are used or held for use in the conduct of the Business. All required filings and fees related to the Intellectual Property Registrations have been timely filed with and paid to the relevant Governmental Authorities and authorized registrars, and all Intellectual Property Registrations are otherwise in good standing. Seller has provided Buyer with true and complete copies of file histories, documents, certificates, office actions, correspondence and other materials related to all Intellectual Property Registrations.

(b) Section 4.11(b) of the Disclosure Schedules contains a correct, current and complete list of all Intellectual Property Agreements, specifying for each the date, title and parties thereto. Seller has provided Buyer with true and complete copies (or in the case of any oral agreements, a complete and correct written description) of all such Intellectual Property Agreements, including all modifications, amendments and supplements thereto and waivers thereunder. Each Intellectual Property Agreement is valid and binding on Seller in accordance with its terms and is in full force and effect. Neither Seller nor any other party thereto is, or is alleged to be, in breach of or default under, or has provided or received any notice of breach of, default under, or intention to terminate (including by non-renewal), any Intellectual Property Agreement.

(c) Except as set forth in Section 4.11(c) of the Disclosure Schedules, Seller is the sole and exclusive legal and beneficial, and with respect to the Intellectual Property Registrations, record, owner of all right, title, and interest in and to the Intellectual Property Assets, and has the valid and enforceable right to use all other Intellectual Property used or held for use in or necessary for the conduct of the Business, in each case free and clear of Encumbrances other than Permitted Encumbrances.

(d) Neither the execution, delivery or performance of this Agreement, nor the consummation of the transactions contemplated hereunder, will result in the loss or impairment of or payment of any additional amounts with respect to, nor require the consent of any other Person in respect of, Buyer's right to own or use any Intellectual Property Assets or any Intellectual Property subject to any Intellectual Property Agreement.

(e) All of the Intellectual Property Registrations are valid and enforceable, and all Intellectual Property Registrations are subsisting and in full force and effect. Seller has taken reasonable and necessary steps to maintain and enforce the Intellectual Property Assets and to preserve the confidentiality of all Trade Secrets included in the Intellectual Property Assets.

(f) The conduct of the Business, including the use of the Intellectual Property Assets and the Intellectual Property licensed under the Intellectual Property Agreements in connection therewith, and the products, processes, and services of the Business have not infringed, misappropriated, or otherwise violated the Intellectual Property or other rights of any Person. To Seller's Knowledge, no Person has infringed, misappropriated, or otherwise violated any Intellectual Property Assets or the Intellectual Property licensed under the Intellectual Property Agreements.

(g) There are no Actions (including any opposition, cancellation, revocation, review, or other proceeding) settled, pending, or, to the Knowledge of Seller, threatened (including in the form of offers to obtain a license): (i) alleging any infringement, misappropriation, or other violation of the Intellectual Property of any Person by Seller in the conduct of the Business; (ii) challenging the validity, enforceability, registrability, patentability, or ownership of any Intellectual Property Assets; or (iii) by Seller or any other Person alleging any infringement, misappropriation, or violation by any Person of any Intellectual Property Assets. Seller is not subject to any outstanding or prospective Governmental Order (including any motion or petition therefor) that does or would reasonably be expected to restrict or impair the use of any Intellectual Property Assets.

(h) This Section 4.11 constitutes the sole and exclusive representation and warranty of Seller with respect to any Intellectual Property matters.

Section 4.12 Inventory. All Inventory, whether or not reflected in the Balance Sheet, consists of a quality and quantity usable and salable in the ordinary course of business consistent with past practice, except for obsolete, damaged, or defective items that have been written off or written down to fair market value or for which adequate reserves have been established. Section 4.12 of the Disclosure

Schedules sets forth all Inventory that is obsolete, damaged, or defective that has not or will not be repaired which has an aggregate net book value in excess of $1,000,000. All Inventory is owned by Seller free and clear of all Encumbrances, and no Inventory is held on a consignment basis. The quantities of each item of Inventory (whether raw materials, work-in-process or finished goods) are not excessive, but are reasonable in the present circumstances of Seller.

Section 4.13 Transferred Cash. Exhibit J sets forth a description and the amount of all Transferred Cash as if the Closing had occurred as of December 31, 2017.

Section 4.14 Customers and Suppliers.

(a) Section 4.14(a) of the Disclosure Schedules sets forth with respect to the Business (i) each customer who has paid aggregate consideration to Seller for electricity or other electric utility services rendered in an amount greater than or equal to $1,000,000 for each of the two most recent fiscal years (collectively, the "**Material Customers**"); and (ii) the amount of consideration paid by each Material Customer during such periods. Except as set forth in Section 4.14(a) of the Disclosure Schedules, Seller has not received any written notice, and has no reason to believe, that any of the Material Customers has ceased, or intends to cease after the Closing, to use electricity or other electric utility services of the Business or to otherwise terminate or materially reduce its relationship with the Business.

(b) Section 4.14(b) of the Disclosure Schedules sets forth with respect to the Business (i) each supplier to whom Seller has paid consideration for goods or services rendered in an amount greater than or equal to $2,000,000 for each of the two most recent fiscal years (collectively, the "**Material Suppliers**"); and (ii) the amount of purchases from each Material Supplier during such periods. Except as set forth in Section 4.14(b) of the Disclosure Schedules, Seller has not received any written notice, and has no reason to believe, that any of the Material Suppliers has ceased, or intends to cease, to supply goods or services to the Business or to otherwise terminate or materially reduce its relationship with the Business.

Section 4.15 Insurance. Section 4.15 of the Disclosure Schedules sets forth (a) a true and complete list of all current policies or binders of fire, liability, product liability, umbrella liability, real and personal property, workers' compensation, vehicular, fiduciary liability and other casualty, property and other insurance maintained by Seller relating to the Business, the Purchased Assets or the Assumed Liabilities (collectively, the "**Insurance Policies**"); and (b) with respect to the Business, the Purchased Assets or the Assumed Liabilities, a list of all pending claims and the claims history for Seller since January 1, 2016. Except as set forth on Section 4.15 of the Disclosure Schedules, there are no claims related to the Business, the Purchased Assets or the Assumed Liabilities pending under any such Insurance Policies as to which coverage has been questioned, denied or disputed or in respect of which there is an outstanding reservation of rights. Seller has not received any written notice of cancellation of, premium increase with respect to, or alteration of coverage under, any of such Insurance Policies. All premiums due on such Insurance Policies have either been paid or, if not yet due, accrued. All such Insurance Policies (a) are in full force and effect and enforceable in accordance with their terms; (b) are provided by carriers who are financially solvent; and (c) have not been subject

to any lapse in coverage. Seller is not in default under, or has otherwise failed to comply with, in any material respect, any provision contained in any such Insurance Policy. The Insurance Policies are of the type and in the amounts customarily carried by Persons conducting a business similar to the Business and are sufficient for compliance with all applicable Laws and Contracts to which Seller is a party or by which it is bound. True and complete copies of the Insurance Policies have been made available to Buyer.

Section 4.16 Legal Proceedings; Governmental Orders.

(a) Except as set forth in Section 4.16(a) of the Disclosure Schedules, there are no Actions pending or, to Seller's Knowledge, threatened against or by Seller (a) relating to or affecting the Business, the Purchased Assets, or the Assumed Liabilities; or (b) that challenge or seek to prevent, enjoin, or otherwise delay the transactions contemplated by this Agreement. To Seller's Knowledge, no event has occurred or circumstances exist that may give rise to, or serve as a basis for, any such Action.

(b) Except as set forth in Section 4.16(b) of the Disclosure Schedules, there are no outstanding Governmental Orders and no unsatisfied judgments, penalties or awards against, relating to or affecting the Business. Seller is in compliance with the terms of each Governmental Order set forth in Section 4.16(b) of the Disclosure Schedules. No event has occurred or circumstances exist that may constitute or result in (with or without notice or lapse of time) a violation of any such Governmental Order.

(c) Except as set forth in Section 4.16(c) of the Disclosure Schedules, as of the date hereof, ML&P (i) is not a Person whose rates or services are regulated by a Governmental Entity, (ii) is not a party to any rate proceeding before a Governmental Authority with respect to rates charged by ML&P, (iii) does not have rates in any amounts that have been or are being collected subject to refund, pending final resolution of any rate proceeding pending before a Governmental Authority or on appeal to a court, or (iv) is not a party to any contract with any Governmental Authority imposing conditions on rates or services in effect as of the date hereof or which, to the Knowledge of Seller, are as of the date hereof scheduled to go into effect at a later time.

Section 4.17 Compliance With Laws; Permits.

(a) Except as set forth in Section 4.17(a) of the Disclosure Schedules, Seller has at all times complied, and is now complying, in each case in all material respects, with all Laws applicable to the conduct of the Business and the ownership and use of the Purchased Assets.

(b) All Permits required for Seller to conduct the Business as currently conducted or for the ownership and use of the Purchased Assets have been obtained by Seller and are valid and in full force and effect. All fees and charges with respect to such Permits as of the date hereof have been paid in full. Section 4.17(b) of the Disclosure Schedules lists all material current Permits issued to Seller which are related to the conduct of the Business as currently conducted or the ownership and use of the Purchased

Assets, including the names of the Permits and their respective dates of issuance and expiration. No event has occurred that, with or without notice or lapse of time or both, would reasonably be expected to result in the revocation, suspension, lapse or limitation of any Permit set forth in Section 4.17(b) of the Disclosure Schedules.

(c) All filings required to be made by ML&P since January 1, 2015, with the RCA have been made, including all forms, statements, reports, agreements and all documents, exhibits, amendments and supplements appertaining thereto, including all rates, tariffs and related documents, and all such filings complied in material respects, as of their respective dates, with all applicable requirements of applicable statutes and the rules and regulations promulgated thereunder.

Section 4.18 Environmental Matters.

(a) To the Knowledge of Seller, the Purchased Assets and the operations of Seller with respect to the Business and the Purchased Assets are currently and have, during the period of five (5) years prior to the Closing Date, at all times been in compliance with all Environmental Laws. Seller has not received from any Person, with respect to the Business or the Purchased Assets, any: (i) Environmental Notice or Environmental Claim; or (ii) written request for information pursuant to Environmental Law, which, in each case, either remains pending or unresolved, or is the source of ongoing obligations or requirements as of the Closing Date.

(b) Seller has obtained and, to Seller's Knowledge, is in compliance with all Environmental Permits (each of which is disclosed in Section 4.18(b) of the Disclosure Schedules) necessary for the conduct of the Business as currently conducted or for the ownership, lease, operation, or use of the Purchased Assets, and all such Environmental Permits are in full force and effect. With respect to any such Environmental Permits, to Seller's Knowledge, there is no condition, event, or circumstance that is reasonably likely to prevent or impede the transfer of the same to Buyer as of the Closing Date, and Seller has not received any Environmental Notice or other communication regarding, and to Seller's Knowledge there is no, actual or potential material adverse change in the status or terms and conditions of the same.

(c) Except as set forth in Section 4.18(c) of the Disclosure Schedules, Seller has not within the last six (6) years received any written notice from any Governmental Authority that the Business or any of the Purchased Assets or real property currently or formerly owned, leased, or operated by Seller in connection with the Business is not or has not been in compliance with, any Environmental Law or any Environmental Permit;

(d) Except as set forth in Section 4.18(d) of the Disclosure Schedules, there are no Environmental Claims pending or, to Seller's Knowledge, threatened against Seller with respect to the Business or any of the Purchased Assets or real property currently or formerly owned, leased or operated by Seller in connection with the Business. Except as set forth in Section 4.18(d) of the Disclosure Schedules, to Seller's Knowledge, there are no facts or circumstances regarding the Business or any of the

Purchased Assets or real property currently or formerly owned, leased, or operated by Seller in connection with the Business that are reasonably likely to result in any Environmental Claim against Seller or Buyer.

(e) To Seller's Knowledge, none of the Business or the Purchased Assets or any real property currently or formerly owned, leased or operated by Seller in connection with the Business is listed on, or has been proposed for listing on, the National Priorities List (or CERCLIS) under CERCLA, or any similar state list.

(f) Except as set forth in Section 4.18(f) of the Disclosure Schedules, to Seller's Knowledge, there has been no Release of Hazardous Materials in contravention of Environmental Law, or which would reasonably be expected to give rise to any Environmental Claim, with respect to the Business or the Purchased Assets or any real property currently or formerly owned, leased or operated by Seller in connection with the Business, and Seller has not received any Environmental Notice that, nor, to Seller's Knowledge, are any of the Business or the Purchased Assets or real property currently or formerly owned, leased or operated by Seller in connection with the Business (including soils, soil gas, groundwater, surface water, buildings and other structure located thereon) contaminated with any Hazardous Material in such a manner as would reasonably be expected to result in an Environmental Claim against Seller or Buyer.

(g) Section 4.18(g) of the Disclosure Schedules contains a complete and accurate list of (x) all active or abandoned aboveground or underground storage tanks owned or operated by Seller in connection with the Business or the Purchased Assets, or to Seller's Knowledge, otherwise located on the Owned Real Property and Leased Real Property; and (y) all, to Seller's Knowledge, polychlorinated-biphenyl-containing equipment, located at, on, or under the Owned Real Property and Leased Real Property.

(h) Section 4.18(h) of the Disclosure Schedules contains a complete and accurate list of all off-site Hazardous Materials treatment, storage, or disposal facilities or locations used by Seller and any predecessors, or otherwise used to treat, store or dispose of waste generated by Seller and any predecessors, in connection with the Business or the Purchased Assets as to which Seller may retain liability, and Seller has not received any Environmental Notice with respect to such off-site Hazardous Materials treatment, storage, or disposal facilities or locations used by Seller.

(i) Seller has not retained or assumed, by contract or, to Seller's Knowledge, by operation of Law, any Liabilities of third parties under Environmental Law.

(j) Except as otherwise provided in Section 6.29(a), Seller has provided or otherwise made available to Buyer in the manner set forth in Section 4.18(j) of the Disclosure Schedules: (i) any and all material environmental reports, studies, audits, records, sampling data, site assessments, risk assessments, economic models and other similar documents with respect to the Business or the Purchased Assets or any real property currently or formerly owned, leased or operated by Seller in connection with the Business which are in the possession or control of Seller related to compliance with

Environmental Laws, Environmental Claims or an Environmental Notice or the Release of Hazardous Materials, provided that, where multiple drafts of such documents were generated, Buyer has made available and listed only the most recent version of such document; and (ii) any and all material documents concerning planned or anticipated capital expenditures required to reduce, offset, limit or otherwise control pollution or emissions, manage waste or otherwise ensure compliance with current or future Environmental Laws (including costs of remediation, pollution control equipment and operational changes).

(k) During the period of six (6) years prior to the Closing Date, there have been no claims by Seller against comprehensive general liability or excess insurance carriers for any Loss resulting from, relating to or arising from Environmental Claims with respect to the Business or any of the Purchased Assets or real property currently or formerly owned, leased or operated by Seller in connection with the Business.

(l) To Seller's Knowledge, there is not any condition, event or circumstance concerning the Release or regulation of Hazardous Materials that would reasonably be expected to, after the Closing Date, prevent, impede or materially increase the costs to own and operate the Business or the Purchased Assets as currently carried out.

(m) This Section 4.18 constitutes the sole and exclusive representation and warranty of Seller with respect to environmental matters, including all matters arising under Environmental Laws.

Section 4.19 Employee Benefit Matters.

(a) Section 4.19(a) of the Disclosure Schedules contains a true and complete list of each material pension, benefit, retirement, compensation, employment, consulting, profit-sharing, deferred compensation, incentive, bonus, performance award, change in control, retention, severance, vacation, paid time off (PTO), medical, vision, dental, disability, welfare, Code Section 125 cafeteria, fringe-benefit and other similar agreement, plan, policy, program or arrangement (and any amendments thereto), in each case whether or not reduced to writing and whether funded or unfunded, including each "employee benefit plan" within the meaning of Section 3(3) of ERISA, whether or not tax-qualified and whether or not subject to ERISA, which is or has been maintained, sponsored, contributed to, or required to be contributed to by Seller for the benefit of any current or former employee, officer, director, retiree, independent contractor or consultant of the Business or any spouse or dependent of such individual, or under which Seller has or may have any Liability, or with respect to which Buyer would reasonably be expected to have any Liability (as listed on Section 4.19(a) of the Disclosure Schedules, each, a "**Benefit Plan**"). Seller has no ERISA Affiliates. Section 4.19(a) of the Disclosure Schedules denotes which Benefit Plans are governmental plans as defined in Section 3(32) of ERISA.

(b) With respect to each Benefit Plan that is a retirement plan, Seller has made available to Buyer accurate, current and complete copies of the plan document together with all amendments.

(c) Each Benefit Plan that is intended to be qualified within the meaning of Section 401(a) of the Code (a "**Qualified Benefit Plan**") is so qualified and received a favorable and current determination letter from the Internal Revenue Service with respect to the most recent five year filing cycle, or with respect to a prototype or volume submitter plan, can rely on an opinion letter from the Internal Revenue Service to the prototype plan or volume submitter plan sponsor, to the effect that such Qualified Benefit Plan is so qualified and that the plan and the trust related thereto are exempt from federal income taxes under Sections 401(a) and 501(a), respectively, of the Code, and nothing has occurred that would reasonably be expected to adversely affect the qualified status of any Qualified Benefit Plan.

No pension plan (other than a multiemployer plan within the meaning of Section 3(37) of ERISA (a "**Multiemployer Plan**")) which is subject to minimum funding requirements, including any multiple employer plan, (each a "**Single Employer Plan**") in which employees of the Business participate or have participated has an "accumulated funding deficiency," whether or not waived, or is subject to a lien for unpaid contributions under Section 303(k) of ERISA or Section 430(k) of the Code. No Single Employer Plan covering employees of the Business which is a defined benefit plan has an "adjusted funding target attainment percentage," as defined in Section 436 of the Code, less than 80%.

(d) Seller has not (i) incurred or reasonably expects to incur, either directly or indirectly, any material Liability under Title IV of ERISA or related provisions of the Code or applicable local Law relating to employee benefit plans; (ii) failed to timely pay premiums to the Pension Benefit Guaranty Corporation; or (iii) engaged in any transaction which would give rise to liability under Section 4069 or Section 4212(c) of ERISA.

(e) With respect to each Benefit Plan (i) that is a Multiemployer Plan, (A) all contributions required to be paid by Seller have been timely paid to the applicable Multiemployer Plan, (B) Seller has not incurred any withdrawal liability under Title IV of ERISA that remains unsatisfied, and (C) no Multiemployer Plan is in critical, endangered or seriously endangered status or has suffered a mass withdrawal; (ii) no Action has been initiated by the Pension Benefit Guaranty Corporation to terminate any Multiemployer Plan or to appoint a trustee for any Multiemployer Plan; and (iii) no such plan maintained or contributed to within the last six (6) years is a Single Employer Plan subject to Title IV of ERISA.

(f) This Section 4.19 and Section 4.20 (to the extent related to pensions and employee benefits) constitute the sole and exclusive representation and warranty of Seller regarding pension and employee benefit or liabilities or obligations, or compliance with Laws relating thereto.

Section 4.20 Employment Matters.

(a) Section 4.20(a) of the Disclosure Schedules contains a list of all persons who are employees, independent contractors or consultants of the Business as of the date hereof, including any employee who is on a leave of absence, or short-term or long-term disability of any nature, paid or unpaid, authorized or unauthorized, and sets forth for each such individual the following: (i) name; (ii) title or position (including whether full-time or part-time); (iii) hire date; (iv) current annual hourly rate or salary; and (v) commission, bonus or other incentive-based compensation paid in 2017. As of the date hereof, all compensation, including wages, commissions, bonuses, fees and other compensation, payable to all employees, independent contractors or consultants of the Business for services performed on or prior to the date hereof have been paid in full and, except as set forth in Section 4.20(a) of the Disclosure Schedules, there are no outstanding agreements, understandings or commitments of Seller to pay any compensation, commissions, bonuses, or fees after the Closing Date.

(b) Except as set forth in Section 4.20(b) of the Disclosure Schedules, Seller is not, and has not been for the past five (5) years, a party to, bound by, or negotiating any collective bargaining agreement or other Contract with a union, works council or labor organization (collectively, "**Union**"), and there is not, and has not been for the past five (5) years, any Union representing or purporting to represent any employee of Seller, and no Union or group of employees is seeking or has sought to organize employees for the purpose of collective bargaining. Except as set forth in Section 4.20(b) of the Disclosure Schedules, there has never been, nor has there been any threat of, any strike, slowdown, work stoppage, lockout, concerted refusal to work overtime or other similar labor disruption or dispute affecting Seller or any employees of the Business. Except for any Union set forth in Section 4.20(b) of the Disclosure Schedules, Seller has no duty to bargain with any Union. With respect to any Union or collective bargaining agreement identified in Section 4.20(b) of the Disclosure Schedules or otherwise, in no event shall Buyer be required to assume an existing collective bargaining agreement other than as set forth in Section 6.05. Seller shall not represent to any Union that Buyer intends to assume any such agreement or maintain the terms of any such agreement other than as set forth in Section 6.05. Section 4.20(b) of the Disclosure Schedules sets forth each pending union arbitration or grievance.

(c) Seller is and has been in compliance in all material respects with the terms of the collective bargaining agreements and other Contracts listed on Section 4.20(b) of the Disclosure Schedules and all applicable Laws pertaining to employment and employment practices to the extent they relate to employees, volunteers, interns, consultants and independent contractors of the Business, including all Laws relating to labor relations, equal employment opportunities, fair employment practices, employment discrimination, harassment, retaliation, reasonable accommodation, disability rights or benefits, immigration, wages, hours, overtime compensation, child labor, hiring, promotion and termination of employees, working conditions, meal and break periods, privacy, health and safety, workers' compensation, leaves of absence, paid sick leave and

unemployment insurance. All individuals characterized and treated by Seller as consultants or independent contractors of the Business are properly treated as independent contractors under all applicable Laws. All employees of the Business classified as exempt under the Fair Labor Standards Act and state and local wage and hour laws are properly classified in all material respects. Seller is in material compliance with and has materially complied with all immigration laws, including Form I-9 requirements and any applicable mandatory E-Verify obligations. Except as set forth in Section 4.20(c) of the Disclosure Schedules, there are no Actions against Seller pending, or to the Seller's Knowledge, threatened to be brought or filed, by or with any Governmental Authority or arbitrator in connection with the employment of any current or former applicant, employee, consultant, volunteer, intern or independent contractor of the Business, including any charge, investigation or claim relating to unfair labor practices, equal employment opportunities, fair employment practices, employment discrimination, harassment, retaliation, reasonable accommodation, disability rights or benefits, immigration, wages, hours, overtime compensation, employee classification, child labor, hiring, promotion and termination of employees, working conditions, meal and break periods, privacy, health and safety, workers' compensation, leaves of absence, paid sick leave, unemployment insurance or any other employment related matter arising under applicable Laws.

(d) With respect to each Government Contract and to the extent required by Law, Seller is and has been in material compliance with Executive Order No. 11246 of 1965 ("**E.O. 11246**"), Section 503 of the Rehabilitation Act of 1973 ("**Section 503**") and the Vietnam Era Veterans' Readjustment Assistance Act of 1974 ("**VEVRAA**"), including all implementing regulations. Seller maintains and materially complies with affirmative action plans in compliance with E.O. 11246, Section 503 and VEVRAA, including all implementing regulations. To Seller's Knowledge, Seller is not, and has not been for the past five (5) years, the subject of any audit, investigation or enforcement action by any Governmental Authority in connection with any Government Contract or related compliance with E.O. 11246, Section 503 or VEVRAA. To the extent required by Law, Seller is and has also been in material compliance with the McNamara-O'Hara Service Contract Act of 1965, the Davis Bacon Act of 1931 and the Contract Work Hours and Safety Standards Act (CWHSSA). Seller has not been debarred, suspended or otherwise made ineligible from doing business with the United States government or any government contractor.

(e) This Section 4.20 and Section 4.06, Section 4.17 and Section 4.19 (in each case, to the extent related to labor and employment matters) constitute the sole and exclusive representation and warranty of the Company regarding labor or employment matters.

Section 4.21 Taxes. Except as set forth in Section 4.21 of the Disclosure Schedules:

(a) All Tax Returns with respect to the Business required to be filed by Seller for any Pre-Closing Tax Period have been, or will be, timely filed. Such Tax Returns are,

or will be, true, complete and correct in all material respects. All Taxes due and owing by Seller (whether or not shown on any Tax Return) have been, or will be, timely paid.

(b) Seller has withheld and paid each Tax required to have been withheld and paid in connection with amounts paid or owing to any employee, independent contractor, creditor, customer, or other party, and materially complied with all information reporting and backup withholding provisions of applicable Law.

(c) No extensions or waivers of statutes of limitations have been given or requested with respect to any Taxes of Seller.

(d) All deficiencies asserted, or assessments made, against Seller as a result of any examinations by any taxing authority have been fully paid.

(e) Seller is not a party to any Action by any taxing authority. There are no pending or threatened Actions by any taxing authority.

(f) There are no Encumbrances for Taxes upon any of the Purchased Assets nor, to Seller's Knowledge, is any taxing authority in the process of imposing any Encumbrances for Taxes on any of the Purchased Assets (other than for current Taxes not yet due and payable).

(g) Seller is not a "foreign person" as that term is used in Treasury Regulations Section 1.1445-2.

(h) This Section 4.21 (and so much of Section 4.19 and Section 4.23 as relates to Taxes) constitutes the sole and exclusive representation and warranty of Seller regarding Tax matters.

Section 4.22 Service Territory. The Delivery Point for each Person purchasing electricity from Seller is located within the Service Territory.

Section 4.23 BRU Interest.

(a) There is neither (i) to Seller's Knowledge, written demand; nor (ii) lawsuit, or any compliance order, notice of probable violation or similar governmental action, pending or, to Seller's Knowledge, threatened before any court or governmental agency that (x) would result in a material impairment or loss of title to any part of the BRU Interest, (y) seeks the imposition of (or could reasonably be expected to generate) an amount greater than or equal to $500,000 in damages with respect to the BRU Interest, or (z) would materially hinder or impede the operation of the BRU Interest;

(b) All Tax Returns required to be filed by Seller with respect to the BRU Interest have been timely filed and are true, correct and complete in all material respects, and all Taxes with respect to the BRU Interest, whether or not shown due on such Tax Returns, have been timely paid.

(c) To Seller's Knowledge, (a) Seller's ownership and the operation of the BRU Interest is in compliance in all material respects with all Laws, and (b) all Permits, licenses, approvals, consents, certificates, and other authorizations material to the operation of the BRU Interest have been obtained and maintained in effect.

(d) Section 4.23 of the Disclosure Schedules includes all Material BRU Contracts that are of one or more of the following types, to the extent the same would be binding on the BRU Interest after Closing: (i) a contract for the sale, purchase, exchange, or other disposition of Hydrocarbons that is not cancellable without penalty on sixty (60) days or less prior written notice; (ii) a contract to sell, lease, farmout, exchange, or otherwise dispose of all or any part of the BRU Interest (but excluding conventional rights of reassignment upon intent to abandon or release a lease); (iii) a joint operating agreement, unitization agreement, unit operating agreement, or similar agreement; (iv) an area of mutual interest agreement; (v) a contract for the gathering, treatment, storage, processing, or transportation (excluding transportation via common carrier pipelines that can be terminated without penalty on ninety (90) days or fewer notice) of Hydrocarbons; or (vi) any other contract or agreement, excluding leases and joint operating agreements, that would reasonably be expected to result in aggregate payments by Seller of more than $100,000 or aggregate revenues to Seller of more than $300,000 during the current or any subsequent calendar year (each, a "**Material BRU Contract**"); *provided, however*, that, with respect to subsection (vi) only, this Section 4.23(d) shall be deemed to be qualified to Seller's Knowledge. To Seller's Knowledge each Material BRU Contract is in full force and effect and neither Seller, nor, to Seller's Knowledge, any other Person, is in default under any such Material BRU Contract, or, with the passage of time, the giving of notice, or both, would be in breach or default under any such Material BRU Contract. Prior to the date hereof, Seller has made available to Buyer complete and correct copies of each Material BRU Contract and any amendments or modifications thereof.

(e) There are no outstanding authorizations for expenditure ("**AFEs**") which are binding on the BRU Interest and which Seller reasonably anticipates will individually require expenditures by Seller or its successor in interest from and after the Closing in excess of $2,000,000 other than as listed in Section 4.23(e) of the Disclosure Schedules.

(f) Seller has not received any written notice, remaining unresolved, from any Governmental Authority that any well included in the BRU Interest is in material noncompliance with applicable Laws. To Seller's Knowledge, all plugged and abandoned wells included in the BRU Interest have been plugged and abandoned in all material respects in accordance with applicable Law.

(g) Seller has not received any notice of violation, remaining uncured, from any Governmental Authority alleging any portion of the BRU Interest is in material noncompliance with any Environmental Law, nor to Seller's Knowledge is there any basis for such notice.

(h) Except as set forth in Section 4.23(h) of the Disclosure Schedules, Seller has not received any request by any Governmental Authority for additional or

supplemental decommissioning or plugging and abandonment security to be furnished by Seller, including any supplemental bonding request, with respect to the BRU Interest.

(i) Seller is not obligated by virtue of any take-or-pay payment, advance payment, imbalance, or other similar payment to deliver a material quantity of Hydrocarbons produced from the BRU Interest at some future time without receiving payment therefor. For purposes of this Section 4.23, "a material quantity" means more than 25,000 MCF or its BTU equivalent.

(j) Seller has not created any Title Defect (as defined in the BRU Purchase and Sale Agreement) on the BRU Interest acquired pursuant to the BRU Purchase and Sale Agreement since such BRU Interest was acquired.

Section 4.24 Brokers. No broker, finder or investment banker is entitled to any brokerage, finder's or other fee or commission in connection with the transactions contemplated by this Agreement or any Ancillary Document based upon arrangements made by or on behalf of Seller.

ARTICLE V
REPRESENTATIONS AND WARRANTIES OF BUYER

Except as set forth in the correspondingly numbered Section of the Disclosure Schedules, Buyer represents and warrants to Seller that the statements contained in this ARTICLE V are true and correct as of the date hereof.

Section 5.01 Organization of Buyer. Buyer is an electric not-for-profit cooperative corporation duly organized, validly existing and in good standing under the Laws of the State of Alaska and has all requisite corporate power and authority to own, operate or lease its properties and assets and to conduct its business as currently conducted.

Section 5.02 Authority of Buyer. Buyer has all requisite corporate power and authority to enter into this Agreement and the Ancillary Documents to which Buyer is a party, to carry out its obligations hereunder and thereunder and to consummate the transactions contemplated hereby and thereby. The execution and delivery by Buyer of this Agreement and any Ancillary Document to which Buyer is a party, the performance by Buyer of its obligations hereunder and thereunder and the consummation by Buyer of the transactions contemplated hereby and thereby have been duly authorized by all requisite corporate action on the part of Buyer. This Agreement has been duly executed and delivered by Buyer, and (assuming due authorization, execution and delivery by Seller) this Agreement constitutes a legal, valid and binding obligation of Buyer enforceable against Buyer in accordance with its terms. When each Ancillary Document to which Buyer is or will be a party has been duly executed and delivered by Buyer (assuming due authorization, execution and delivery by each other party thereto), such Ancillary Document will constitute a legal and binding obligation of Buyer enforceable against it in accordance with its terms, subject to bankruptcy, insolvency, fraudulent transfer, reorganization, moratorium and other similar laws of general applicability relating to or affecting creditors' rights and to general equity principles, whether considered in a proceeding at law or in equity.

Section 5.03 No Conflicts; Consents.

(a) The execution, delivery and performance by Buyer of this Agreement and the Ancillary Documents to which it is a party, and the consummation of the transactions contemplated hereby and thereby, do not and will not: (a) conflict with or result in a violation or breach of, or default under, any provision of the certificate of incorporation, bylaws or other organizational documents of Buyer; (b) assuming RCA Approval is received, conflict with or result in a violation or breach of any provision of any Law or Governmental Order applicable to Buyer; or (c) except as set forth in Section 5.03 of the Disclosure Schedules, require the consent, notice or other action by any Person under any Contract to which Buyer is a party. Except for RCA Approval, no consent, approval, Permit, Governmental Order, declaration or filing with, or notice to, any Governmental Authority is required by or with respect to Buyer in connection with the execution and delivery of this Agreement and the Ancillary Documents and the consummation of the transactions contemplated hereby and thereby, except for and such consents, approvals, Permits, Governmental Orders, declarations, filings or notices which, in the aggregate, would not have a Material Adverse Effect.

(b) In reliance on Seller's representation and warranty in Section 4.03(b), no filing under the HSR Act is required.

Section 5.04 Brokers. No broker, finder or investment banker is entitled to any brokerage, finder's or other fee or commission in connection with the transactions contemplated by this Agreement or any Ancillary Document based upon arrangements made by or on behalf of Buyer.

Section 5.05 Legal Proceedings. Except as set forth in Section 5.05 of the Disclosure Schedules, there are no Actions pending or, to Buyer's knowledge, threatened against or by Buyer that challenge or seek to prevent, enjoin or otherwise delay the transactions contemplated by this Agreement. No event has occurred or circumstances exist that may give rise or serve as a basis for any such Action.

Section 5.06 Transition Agreement.

(a) In the event that the Transition Agreement has, prior to the Closing, been ratified by the requisite vote of the members of the IBEW and become effective, then as of the Closing, (i) the Transition Agreement will be valid and binding on Buyer and the IBEW in accordance with the Transition Agreement's terms and in full force and effect; (ii) neither Buyer nor, to Buyer's knowledge, any other party to the Transition Agreement will be in breach of or default under (or be alleged to be in breach of or default under), or will have provided or received any notice of any intention to terminate, the Transition Agreement; (iii) no event or circumstance will have occurred that, with notice or lapse of time or both, would constitute an event of default under the Transition Agreement or result in a termination thereof or would cause or permit the acceleration or other changes of any right or obligation or the loss of any benefit thereunder; and (iv) there will be no material disputes pending or threatened under the Transition Agreement. In the event that the Transition Agreement has, at any time prior to the Closing, been ratified by the

requisite vote of the members of the IBEW and become valid and binding, Buyer will provide to Seller a complete and correct copy of the Transition Agreement (including all modifications, amendments, and supplements thereto and waivers thereunder).

(b) In the event that the Transition Agreement is valid and binding and in full force and effect as of the Closing, Buyer will be in compliance with each and all of the requirements of the Ordinance and Proposition 10 with respect to employees of Seller and Buyer and the IBEW Collective Bargaining Agreement.

ARTICLE VI
COVENANTS

Section 6.01 Conduct of Business Prior to the Closing.

(a) From the date hereof until the Closing, except as required by Law, as otherwise provided in this Agreement, or as consented to in writing by Buyer (which consent shall not be unreasonably withheld, conditioned, or delayed), Seller shall (x) use its commercially reasonable efforts to conduct the Business in all material respects in the ordinary course of business consistent with past practice and Prudent Utility Practices; and (y) use its commercially reasonable efforts to maintain and preserve intact its current Business organization, operations, and franchise and to preserve the rights, franchises, goodwill, and relationships of its employees, customers, lenders, suppliers, regulators, and others having relationships with the Business. Without limiting the foregoing, from the date hereof until the Closing Date, Seller shall use its commercially reasonable efforts to (i) preserve and maintain all Permits required for the conduct of the Business as currently conducted or the ownership and use of the Purchased Assets and the Eklutna Generation Assets; (ii) pay the debts, Taxes, and other obligations of the Business when due; (iii) continue to collect Accounts Receivable in a manner consistent with past practice, without discounting such Accounts Receivable; (iv) maintain the properties and assets included in the Purchased Assets and the Eklutna Generation Assets in the same condition as they were on the date of this Agreement, subject to reasonable wear and tear; (v) continue in full force and effect without modification all Insurance Policies, except as required by applicable Law; (vi) defend and protect the properties and assets included in the Purchased Assets and the Eklutna Generation Assets from infringement or usurpation; (vii) perform in all material respects all of its obligations under all Assigned Contracts; (viii) maintain the Books and Records in accordance with past practice; (ix) comply in all material respects with all Laws applicable to the conduct of the Business or the ownership and use of the Purchased Assets and the Eklutna Generation Assets; and (x) not take or permit any action that would reasonably be expected to cause any of the changes, events, or conditions described in Section 4.06 to occur. Without limiting the generality of the foregoing, from the date of this Agreement until the Closing, and except as set forth in Section 6.01 of the Disclosure Schedules, Seller will not do any of the following with respect to the Business:

(A) merge or consolidate the Business with any other Person, or restructure, reorganize or completely or partially liquidate the Business;

(B) other than capital expenditures covered by clause (F) below, acquire assets (whether by merger, tender offer, consolidation, purchase of property, or otherwise) outside of the ordinary course of business from any other Person with a value or purchase price in the aggregate in excess of $1,000,000 in any transaction or series of related transactions;

(C) create or incur any material lien on any of the Purchased Assets including any material Intellectual Property Assets or Eklutna Generation Assets, other than Permitted Liens;

(D) make any loans, advances, or capital contributions to, guarantees of, or investments in any Person (other than advances made in the ordinary course of business consistent with past practice to employees of the Business for reimbursement of routine travel or business expenses in accordance with the terms of the applicable policy in effect on the date of this Agreement);

(E) incur any indebtedness, or issue or sell any debt securities or warrants or other rights to acquire any debt security of the Business except for commercial paper the proceeds of which are used to finance Purchased Assets or the Eklutna Generation Assets or refinance commercial paper outstanding on the date hereof;

(F) make or authorize any capital expenditures or series of related capital expenditures that are not in the ordinary course of business consistent with past practice and Prudent Utility Practices;

(G) except in the ordinary course of business consistent with past practice and Prudent Utility Practices; and except as required by Law (including the legal obligation under the National Labor Relations Act or state or local law to bargain in good faith to reach a labor contract with a labor organization that has been certified as the bargaining agent for the designated employee group), (1) enter into any Contract that would have been a Material Contract or Material BRU Contract had it been entered into prior to the date of this Agreement or (2) amend or modify in a material manner or terminate any Material Contract or Material BRU Contract, or cancel, modify in a material manner, or waive any material debts, rights, or claims thereunder;

(H) make any changes with respect to accounting policies or procedures, except as required by changes in applicable GAAP;

(I) (1) except with respect to matters related to the appeal of the Alaska Department of Revenue production tax credits, waive, release, settle, or compromise any pending Action against the Business other than settlements or compromises of any such legal action (a) in which the amount paid by or on behalf of the Business does not exceed $500,000 in any individual Action or $1,000,000 in the aggregate and (b) that would not impose any material restrictions on the Business or (2) commence, join in, or appeal any such legal action, other than in the ordinary course of business;

(J) (1) make or change any material Tax election, (2) change Seller's method of accounting for Tax purposes, (3) file any material amended Tax Return, (4) settle, concede, compromise or abandon any material Tax claim or assessment, (5) surrender any right to a refund of material Taxes or (6) consent to any extension or waiver of the limitation period applicable to any claim or assessment with respect to material Taxes;

(K) fail to use commercially reasonable efforts to maintain in full force and effect the Insurance Policies covering the Business and its properties, assets, and businesses in a form and amount consistent with past practice and Prudent Utility Practices;

(L) transfer, sell, lease, license, mortgage, pledge, surrender, encumber, divest, cancel, abandon, or allow to lapse or expire or otherwise dispose of any material assets (including any material Intellectual Property Assets), licenses, operations, product lines, businesses or interests of the Business except (1) in the ordinary course of business consistent with past practice and Prudent Utility Practices, (2) for sales of obsolete assets, or (3) for transactions involving a de minimis amount of assets in the aggregate;

(M) except as required pursuant to existing written Benefit Plans in effect prior to the date of this Agreement or as otherwise required by applicable Law and except as contemplated by this Agreement, (1) pay, grant or provide any severance or termination payments or benefits to any non-union official, manager, contractor, or employee of the Business; (2) increase the compensation, bonus or pension, welfare, severance, or other benefits of, pay any bonus, incentive, or retention payments to, or make any equity awards to any non-union official, manager, contractor, or employee of the Business, except for increases in base salary in the ordinary course of business consistent with past practice for employees who are not officials or managers; (3) establish, adopt, amend, or terminate any Benefit Plan; (4) take any action to accelerate the vesting or payment, or fund or in any other way secure the payment, of compensation or benefits under any Benefit Plan; (E) change in any material respect any

actuarial or other assumptions used to calculate funding obligations with respect to any Benefit Plan or to change the manner in which contributions to such plans are made or the basis on which such contributions are determined, except as may be required by GAAP; (5) forgive any loans to officials, managers or employees of the Business; or (6) hire or terminate without cause any official, manager, or any employee with total cash compensation and benefits in excess of $100,000, other than any such hire that is a replacement hire to fill a vacant position in existence as of the date of this Agreement;

(N) take any action or omit to take any action that would reasonably be expected to result in any of the conditions to the Closing set forth in Section 7.03 not being satisfied;

(O) communicate with officials, managers, employees, or consultants of the Business regarding the compensation, benefits, or other treatment they will receive in connection with the Closing or after the Closing, other than communications that are not inconsistent with (1) the terms of this Agreement or (2) previous public announcements or communications;

(P) enter into, terminate, or materially modify or amend any (1) agreement or practice relating to fuel procurement that is not in the ordinary course of business consistent with past practice, (2) agreement or course of dealing with or among any of the other owners of (a) Purchased Assets that are owned in part by ML&P or (b) the Eklutna Generation Assets, (3) power sale contract that has a term of longer than two (2) years or (4) coal, natural gas, fuel oil, diesel or other fuel purchase contract that has a term of longer than two (2) years; or

(Q) agree, authorize, or commit to do any of the foregoing actions or enter into any Contracts with respect to any of the foregoing actions.

Notwithstanding the foregoing, Seller will be entitled, during the period prior to the Closing, to negotiate with its real property lessors and easement grantors, including ARRC, with respect to ML&P's rights and obligations as lessee or easement holder with respect to such properties, but will promptly advise Buyer of the nature of such negotiations.

(b) To the extent permitted by applicable Law, Seller shall cause ML&P to, on a reasonable basis, (i) discuss with Buyer any changes in ML&P's regulated rates or charges, standards of service, or regulatory accounting from those in effect on the date of this Agreement and (ii) discuss with Buyer, and use commercially reasonable efforts to incorporate the views of Buyer, prior to making any filing (or any amendment thereto), or effecting any agreement, commitment, arrangement or consent, whether written or oral,

formal or informal, with respect thereto (other than to implement rate changes in accordance with existing formula rates) that changes ML&P's rates in a material manner that may, individually or in the aggregate, impact ML&P's revenue for a period of longer than one year. Notwithstanding the foregoing, ML&P shall not be required to have discussions or consult with Buyer prior to entering into arrangements with customers or other Persons in the ordinary course of business consistent with past practice, and in no event shall ML&P be obligated to have discussions or consult with Buyer with respect to any of the foregoing if, in the opinion of ML&P's outside counsel, to do so would be inconsistent with applicable Law.

(c) Nothing contained in this Agreement is intended to give Buyer the right to control or direct Seller's operations of the Business prior to the Closing. Prior to the Closing, each of Buyer and Seller will exercise, consistent with the terms and conditions of this Agreement and applicable Law, complete control and supervision over its respective operations.

(d) Notwithstanding anything to the contrary in this Section 6.01, ML&P may take reasonable actions in compliance with applicable Law with respect to any operational emergencies (including any restoration measures in response to any hurricane, tornado, ice storm, tsunami, flood, earthquake, or other natural disaster or weather-related event, circumstance, or development), equipment failures, outages, or an immediate and material threat to the health or safety of natural Persons.

Section 6.02 Access to Information.

(a) From the date hereof until the Closing, Seller shall, for the purpose of enabling Buyer to conduct the Post-Signing Due Diligence, (a) afford Buyer and its Representatives reasonable access to and the reasonable right to inspect, upon reasonable notice and during Seller's normal business hours, all of the Real Property, properties, assets, premises, Books and Records, Contracts and other documents and data related to the Business, subject where applicable to the terms of the Site Access and Indemnification Agreement dated as of June 7, 2018 between Seller and Buyer as the same may be amended or supplemented from time to time; (b) furnish Buyer and its Representatives with such financial, operating and other data and information related to the Business as Buyer or any of its Representatives may reasonably request; and (c) instruct the Representatives of Seller to cooperate with Buyer in its investigation of the Business. Without limiting the foregoing, Seller shall, subject to receipt of all required approvals of Governmental Authorities, permit Buyer and its Representatives to conduct Post-Signing Due Diligence with respect to the environmental condition of the Real Property, including the collecting and analysis of samples of indoor or outdoor air, surface water, groundwater, or surface or subsurface land on, at, in, under or from the Real Property. Any investigation pursuant to this Section 6.02(a) shall be conducted in such manner as not to interfere unreasonably with the conduct of the Business or any other businesses of Seller. No investigation by Buyer or other information received by Buyer shall operate as a waiver or otherwise affect any representation, warranty, or agreement given or made by Seller in this Agreement.

(b) From the date hereof until the Closing, Buyer shall, for the purpose of enabling Seller to conduct the Additional Seller Due Diligence, (a) furnish Seller and its Representatives with such financial, operating and other data and information related to the assets and business of Buyer as Seller or any of its Representatives may reasonably request for purposes of reviewing and evaluating Buyer's financial condition, the financial risks of the transactions contemplated by this Agreement, and the proposed Debt Financing; and (b) instruct the Representatives of Buyer to cooperate with Seller in its due diligence investigation with respect to Buyer. Any investigation pursuant to this Section 6.02(b) shall be conducted in such manner as not to interfere unreasonably with the conduct of any businesses of Buyer. Except as provided in Section 6.22 and Section 8.07(b), no investigation by Seller or other information received by Seller shall operate as a waiver or otherwise affect any representation, warranty, or agreement given or made by Buyer in this Agreement.

(c) At the earliest practicable time, Seller shall use commercially reasonable efforts to provide Buyer with the information noted on Exhibit A and reasonable follow-up requests with respect thereto.

(d) Prior to receipt of RCA Approval, the parties shall take initial steps to assess necessary integration planning, including those set forth on Section 6.02(d) of the Disclosure Schedules. Following receipt of RCA Approval, the parties shall work together to coordinate and finalize integration planning so as to enable Buyer to operate the Purchased Assets on the Closing Date, including taking the actions set forth on Section 6.02(d)(ii) of the Disclosure Schedules. In connection with such integration planning, Seller and Buyer shall, to the extent appropriate, develop a plan for the transition of customers of the Business to Buyer in accordance with a plan intended to mitigate to the extent reasonably possible any impact or cost to Seller's customers and comply with all RCA requirements, including coordination of timing of initial notification of customers, inclusion of materials in Seller's pre-Closing invoices relating to customer cut-over process, customer data conversion process, and sharing of meter and other technical information.

Section 6.03 No Solicitation of Other Bids.

(a) Seller shall not authorize or permit any of its Representatives to, directly or indirectly, (i) encourage, solicit, initiate, facilitate, or continue inquiries regarding an Acquisition Proposal; (ii) enter into discussions or negotiations with, or provide any information to, any Person concerning a possible Acquisition Proposal; or (iii) enter into any agreements or other instruments (whether or not binding) regarding an Acquisition Proposal. Seller shall immediately cease and cause to be terminated, and shall cause all of its Representatives to immediately cease and cause to be terminated, all existing discussions or negotiations with any Persons conducted heretofore with respect to, or that could lead to, an Acquisition Proposal. For purposes hereof, "**Acquisition Proposal**" means any inquiry, proposal, or offer from any Person (other than Buyer and other than MEA pursuant to any rights of MEA under Section 1 of the Agreement for Extension of 1996 Eklutna Hydroelectric Project Transition Plan, dated October 2, 1997, among

Seller, Buyer and MEA as provided for in the Eklutna Power Purchase Agreement) relating to the direct or indirect disposition, whether by sale, merger or otherwise, of all or any portion of the Business or the Purchased Assets.

(b) In addition to the other obligations under this Section 6.03, Seller shall promptly (and in any event within three (3) Business Days after receipt thereof by Seller or its Representatives) advise Buyer orally and in writing of any Acquisition Proposal, any request for information with respect to any Acquisition Proposal, or any inquiry with respect to or which would reasonably be expected to result in an Acquisition Proposal, the material terms and conditions of such request, Acquisition Proposal or inquiry, and the identity of the Person making the same.

(c) Seller agrees that the rights and remedies for noncompliance with this Section 6.03 shall include having such provision specifically enforced by any court having equity jurisdiction, it being acknowledged and agreed that any such breach or threatened breach shall cause irreparable injury to Buyer and that money damages would not provide an adequate remedy to Buyer.

Section 6.04 Notice of Certain Events.

(a) From the date hereof until the Closing, each party shall promptly notify the other party in writing of:

(i) any fact, circumstance, event, or action the existence, occurrence, or taking of which (A) has had, or would reasonably be expected to have, individually or in the aggregate, a Material Adverse Effect, (B) has resulted in, or would reasonably be expected to result in, any representation or warranty made by such party hereunder not being true and correct in any material respect or (C) has resulted in, or would reasonably be expected to result in, the failure of any of the conditions set forth in Section 7.02 or Section 7.03 to be satisfied;

(ii) any notice or other communication from any Person alleging that the consent of such Person is or may be required in connection with the transactions contemplated by this Agreement;

(iii) any notice or other communication from any Governmental Authority in connection with the transactions contemplated by this Agreement; and

(iv) any Actions commenced or, to Seller's Knowledge or Buyer's knowledge, threatened against, relating to, or involving or otherwise affecting the Business, the Purchased Assets, or the Assumed Liabilities that, if pending on the date of this Agreement, would have been required to have been disclosed pursuant to Section 4.16 or Section 5.05 or that relate to the consummation of the transactions contemplated by this Agreement.

(b) A party's receipt of information pursuant to this Section 6.04 shall not operate as a waiver or otherwise affect any representation, warranty, or agreement given or made by such party in this Agreement (including Section 8.02, Section 8.03, Section 9.01(b), or Section 9.01(c)) and shall not be deemed to amend or supplement the Disclosure Schedules.

Section 6.05 Employees and Employee Benefits.

(a) Should the Transition Agreement fail for any reason to be valid and binding and in full force and effect as of the Closing, Buyer will ensure that Buyer and Seller are nonetheless in compliance with each and all of the requirements of the Ordinance and Proposition 10 with respect to employees of Buyer or Seller, including by offering, prior to the Closing, employment to all of Seller's employees and by accepting and assuming, effective as of the Closing, all rights and obligations of Seller under the IBEW Collective Bargaining Agreement. Unless Buyer has obtained the written consent of the IBEW to release Seller from any obligation to require Buyer to assume the IBEW Collective Bargaining Agreement, Seller shall be entitled to represent to the IBEW that Buyer will, effective as of the Closing, accept and assume or otherwise maintain the terms of the IBEW Collective Bargaining Agreement.

(b) Prior to the Closing Date, Buyer shall provide employment welcome letters describing the wage rate, leave accrual rate/balance (including Accrued Leave transferred), retirement contribution, job assignment and supervisor for each ML&P bargaining unit member covered by the IBEW Collective Bargaining Agreement, with such terms becoming effective for those bargaining unit members that have elected to remain employed as of 12:01 AM on the Closing Date. If the Transition Agreement is not in full force and effect at the time that Buyer provides such employment welcome letters, the terms of such employment welcome letters shall replicate the terms of the IBEW Collective Bargaining Agreement. If the Transition Agreement is in full force and effect at the time that Buyer provides such employment welcome letters, the terms of such employment welcome letters shall, except to the extent that the Transition Agreement varies the terms of the IBEW Collective Bargaining Agreement, replicate the terms of the IBEW Collective Bargaining Agreement. Seller shall terminate the employment of all current non-temporary full-time employees of the Business effective as of 12:01 AM on the Closing Date.

(c) Except with respect to Accrued Leave, Seller shall be solely responsible, and Buyer shall have no obligations whatsoever for, any compensation or other amounts payable to any current or former employee, official, manager, independent contractor or consultant of the Business, including hourly pay, commission, bonus, salary, accrued vacation, fringe, pension or profit sharing benefits or severance pay for any period relating to the service with Seller at any time prior to the Closing Date and Seller shall pay all such amounts to all entitled persons not later than three (3) days following the Closing Date. Buyer will credit all Accrued Leave to Transferred Employees promptly upon the commencement of their employment with Buyer.

(d) Seller shall remain solely responsible for the satisfaction of all claims for medical, dental, life insurance, health, accident, or disability benefits brought by or in respect of current or former employees, independent contractors, or consultants of the Business or the spouses, dependents or beneficiaries thereof, which claims relate to events occurring prior to the Closing Date. Seller also shall remain solely responsible for all workers' compensation claims of any current or former employees, officials, managers, independent contractors or consultants of the Business which relate to events occurring prior to the Closing Date. Seller shall pay, or cause to be paid, all such amounts to the appropriate persons as required by applicable Law.

(e) For those non-temporary full-time employees not covered by the Transition Agreement, Buyer will offer full-time employment in Comparable Positions and set forth in a written notice to Seller delivered not later than thirty (30) days prior to Closing.

(f) For each individual non-temporary full-time employee not covered by the Transition Agreement, Buyer will maintain a salary (excluding overtime or retention benefits under the Retention Agreements) and retirement contribution combined total value that is at least equal to the amount incurred by ML&P at the time of Closing; all other compensation and benefits will be consistent with Buyer policies in place at the time of Closing.

(g) With respect to any employee benefit plan maintained by Buyer in which any former ML&P employees not covered by the Transition Agreement will participate effective as of the Closing Date, Buyer will recognize all service of such employees with ML&P as if such service were with Buyer, for purposes of determining vacation entitlements or eligibility and vesting in any benefit plan in which such employees may be eligible to participate after the Closing.

(h) Buyer shall use commercially reasonable efforts to cause its third-party insurance providers or third party administrators to (i) waive any pre-existing conditions, actively at work requirements and waiting periods, to the extent such pre-existing condition, actively at work requirements and waiting periods did not apply to or had been satisfied by, Seller's employees who become employed by Buyer under a comparable plan covering such employees prior to the Closing, and (ii) cause such plans to honor any expenses incurred by the employees and their beneficiaries under similar plans of Seller during the calendar year in which the Closing occurs for purposes of satisfying applicable deductible, co-insurance and maximum out-of-pocket expenses.

(i) The provisions of this Section 6.05 are for the sole benefit of the parties to this Agreement and nothing herein, expressed or implied, is intended or shall be construed to confer upon or give to any person (including, for the avoidance of doubt, any employee), other than the parties and their respective permitted successors and assigns, any legal or equitable or other rights or remedies under or by reason of any provision of this Agreement. Nothing contained herein, express or implied: (i) shall be construed to establish, amend, or modify any benefit plan, program, agreement or

arrangement; (ii) shall alter or limit the ability of Seller or to amend, modify or terminate any benefit plan, program, agreement or arrangement; or (iii) is intended to confer upon any current or former employee any right to employment or continued employment for any period of time by reason of this Agreement, or any right to a particular term or condition of employment.

Section 6.06 Governmental Approvals and Consents.

(a) Each party hereto shall, as promptly as reasonably practicable after the date of this Agreement, (i) make, or cause to be made, all filings and submissions (including those required by the RCA) required under any Law applicable to such party; and (ii) use commercially reasonable efforts to obtain, or cause to be obtained, all consents, authorizations, orders, and approvals from all Governmental Authorities that may be or become necessary for its execution and delivery of this Agreement and the performance of its obligations pursuant to this Agreement and the Ancillary Documents. Each party shall cooperate fully in all reasonable respects with the other party in promptly seeking to obtain all such consents, authorizations, orders, and approvals. The parties hereto shall not willfully take any action that would reasonably be expected to have the effect of delaying, impairing, or impeding the receipt of any required consents, authorizations, orders, and approvals.

(b) Seller and Buyer shall use commercially reasonable efforts to give all notices to, and obtain all consents from, all third parties that are described in Section 4.03 and Section 5.03 of the Disclosure Schedules.

(c) Without limiting the generality of the parties' undertakings pursuant to subsections (a) and (b) above, each of the parties hereto shall use all commercially reasonable efforts to:

(i) respond to any inquiries by any Governmental Authority regarding antitrust or other matters with respect to the transactions contemplated by this Agreement or any Ancillary Document;

(ii) avoid the imposition of any order or the taking of any action that would reasonably be expected to restrain, alter, or enjoin the transactions contemplated by this Agreement or any Ancillary Document; and

(iii) in the event any Governmental Order adversely affecting the ability of the parties to consummate the transactions contemplated by this Agreement or any Ancillary Document has been issued, to have such Governmental Order vacated or lifted.

(d) All analyses, appearances, meetings, discussions, presentations, memoranda, briefs, filings, arguments, and proposals made by or on behalf of either party before any Governmental Authority or the staff or regulators of any Governmental Authority, in connection with the transactions contemplated hereunder (but, for the

avoidance of doubt, not including any interactions between Seller or Buyer with Governmental Authorities in the ordinary course of business, any disclosure which is not permitted by Law, or any disclosure containing competitively or commercially sensitive information) shall be disclosed to the other party hereunder in advance of any filing, submission, or attendance, it being the intent that the parties will consult and cooperate reasonably with each other, and consider in good faith the views of each other, in connection with any such analyses, appearances, meetings, discussions, presentations, memoranda, briefs, filings, arguments, and proposals. Each party shall give notice to the other party reasonably in advance of any meeting, discussion, appearance, or contact with any Governmental Authority or the staff or regulators of any Governmental Authority, with such notice being sufficient to provide the other party with the opportunity to attend and participate in such meeting, discussion, appearance, or contact.

(e) Notwithstanding the foregoing, nothing in this Section 6.06 shall require, or be construed to require, (i) Buyer to agree to (A) sell, hold, divest, discontinue, or limit, before or after the Closing Date, any assets, businesses, or interests of Buyer or (B) any conditions relating to, or changes or restrictions in, the operations of any such assets, businesses, or interests which, in either case, would reasonably be expected to result in a Material Adverse Effect or materially and adversely impact the economic or business benefits to Buyer of the transactions contemplated by this Agreement and the Ancillary Documents; or (ii) either party to agree to any material modification or waiver of the terms and conditions of this Agreement.

(f) In addition to and without limiting the foregoing, Buyer and Seller will use commercially reasonable efforts to cooperate (including, in the case of Buyer, with respect to describing Buyer's financing information) and advocate to obtain an order from the RCA approving, as part of the transactions to be consummated hereby, the amendment of the certificate of public convenience and necessity of each of Buyer and Seller to reflect the transactions to be consummated hereby, which order includes approval of (A) recovery by Buyer in future rates of: (i) the Upfront Payment, all of any acquisition adjustment contained therein and the financing costs related to the Upfront Payment; (ii) payments under the PILT Agreement; (iii) payments made under the Eklutna Power Purchase Agreement, (iv) the pass-through of BRU costs of production as contemplated in the BRU Fuel Agreement (other than as contemplated in Section 2.01(ii) of the BRU Fuel Agreement) (payments under the PILT Agreement, the Eklutna Power Purchase Agreement and the cost of production pass-through referenced in the BRU Fuel Agreement (other than in Section 2.01(ii) of the BRU Fuel Agreement) to be recovered as Buyer operating expenses (with no margin added to the payment amount)), and (v) the integration costs after Closing, and (B) the Eklutna Power Purchase Agreement itself; and which order from the RCA shall not contain any condition or conditions materially adverse to either Buyer or Seller, as determined by each of Buyer or Seller with respect to itself in good faith and in the exercise of its commercially reasonable business judgment ("**RCA Approval**"). In addition, Buyer and Seller will use commercially reasonable efforts to cooperate and advocate to obtain an order from the RCA approving, as part of the transactions to be consummated hereby, (X) recovery by Buyer in future rates of the

costs associated with consummating the transactions and (Y) Buyer's use of BRU gas as contemplated in Section 2.01(ii) of the BRU Fuel Agreement, and crediting of the proceeds of such use to ML&P's Deferred Regulatory Liability from Gas Sales account for the benefit of retail customers of Buyer within the ML&P legacy service area. Buyer and Seller shall jointly submit a petition for RCA Approval within seventy-five (75) days after the date hereof.

(g) In addition to providing the cooperation provided for in Section 6.06(f), Buyer will, not later than the initial submission to obtain RCA Approval, and periodically thereafter, share with Seller and ML&P such financing information as is reasonably requested by Seller of the financing for Buyer's acquisition of the Purchased Assets, it being understood that Seller and its Representatives will look to Buyer's publically available SEC reports and ratings to primarily assess 'Buyer's financial condition and ability to finance the acquisition. Notwithstanding the foregoing, Buyer shall not be required to provide to Seller any fee letters or engagement letters relating to the Debt Financing.

Section 6.07 Books and Records.

(a) In order to facilitate the resolution of any claims made against or incurred by Seller prior to the Closing, or for any other reasonable purpose, for a period of four (4) years after the Closing, Buyer shall:

(i) retain the Books and Records (including personnel files) relating to periods prior to the Closing in a manner reasonably consistent with the prior practices of Seller; and

(ii) upon reasonable notice, afford Seller's Representatives reasonable access (including the right to make, at Seller's expense, photocopies), during normal business hours, to such Books and Records.

(b) In order to facilitate the resolution of any claims made by or against or incurred by Buyer after the Closing, or for any other reasonable purpose, for a period of four (4) years following the Closing, Seller shall:

(i) retain the books and records (including personnel files) of Seller which relate to the Business and its operations for periods prior to the Closing; and

(ii) upon reasonable notice, afford the Buyer's Representatives reasonable access (including the right to make, at Buyer's expense, photocopies), during normal business hours, to such books and records.

(c) Neither Buyer nor Seller shall be obligated to provide the other party with access to any books or records (including personnel files) pursuant to this Section 6.07 where such access would violate any Law.

Section 6.08 Closing Conditions. From the date hereof until the Closing, each party hereto shall use commercially reasonable efforts to take such actions as are reasonably necessary to expeditiously satisfy the closing conditions set forth in ARTICLE VII hereof.

Section 6.09 Public Announcements.

(a) Neither party may issue any formal written press release or engage in any organized press conference regarding this Agreement unless such press release is issued jointly by the parties or such press conference is conducted jointly by the parties or, before (i) release by a party of any such press release, such party furnishes the other party with a copy of such press release and obtains the approval of the other party for issuance of such press release, or (ii) engaging in any such organized press conference, such party obtains the approval of the other party for such press conference. Such approval shall not, in either such case, be unreasonably withheld, conditioned, or delayed. Notwithstanding the foregoing, neither party will be prohibited from issuing any such press release or engaging in such press conference, without obtaining approval from the other party, if issuing such press release or engaging in such press conference is required in order to comply with applicable Law or legal proceedings. The restrictions imposed by this Section 6.09(a) on issuing press releases or engaging in press conferences shall (x) in the case of Seller, apply only to the Mayor's office and the leadership of ML&P and shall not in any event apply to the Assembly of Seller, any member of the Assembly of Seller, or any other individual who has been elected to office in Seller and (y) not apply to either party in the event that the other party is in breach of any of its obligations under this Agreement. Seller shall use its reasonable efforts to persuade any Person not subject to the provisions of this Section 6.09(a) pursuant to the previous sentence to comply with the obligations in this Agreement and in any event shall not encourage or assist any such Person to take actions contrary to the intent of this Section 6.09(a).

(b) Neither Seller nor Buyer shall at any time make, with respect to the transactions to be consummated by this Agreement, publish, or communicate to any Person in any public forum any defamatory or maliciously false remarks, comments, or statements concerning the other party or any of its employees, officers, officials, or directors ("**Restricted Comments**"). The restrictions imposed by this Section 6.09(b) on Restricted Comments shall, in the case of Seller, apply only to the Mayor's office and the leadership of ML&P and shall not in any event apply to the Assembly of Seller, any member of the Assembly of Seller, or any other individual who has been elected to office in Seller. Seller shall use its reasonable efforts to persuade any Person not subject to the provisions of this Section 6.09(b) pursuant to the previous sentence to comply with the obligations in this Agreement and in any event shall not encourage or assist any such Person to take actions contrary to the intent of this Section 6.09(b).

Section 6.10 Bulk Sales Laws. The parties hereby waive compliance with the provisions of any bulk sales, bulk transfer, or similar Laws of any jurisdiction that may otherwise be applicable with respect to the sale of any or all of the Purchased Assets to Buyer; it being understood that any Liabilities arising out of the failure of Seller to comply with the requirements and provisions of any

bulk sales, bulk transfer, or similar Laws of any jurisdiction that would not otherwise constitute Assumed Liabilities shall be treated as Excluded Liabilities.

Section 6.11 Receivables. From and after the Closing, if Buyer receives or collects any funds relating to any Accounts Receivable, Buyer shall promptly remit such funds to Seller.

Section 6.12 Transfer Taxes. All transfer, documentary, sales, use, stamp, registration, value added and other such Taxes and fees (including any penalties and interest) incurred in connection with this Agreement and the Ancillary Documents (including any real property transfer Tax and any other similar Tax) shall be borne and paid in equal shares (50% each) by Seller and Buyer without regard to which party files and pay such Taxes and fees or is required by any Governmental Authority to file and pay such Taxes and fees; *provided* that Buyer shall pay all such Taxes and fees if such Tax or fee is assessed solely because of Buyer's status as a non-Governmental Authority.

Section 6.13 Financing Assistance.

(a) Buyer shall use its commercially reasonable efforts to take, or cause to be taken, all actions and do, or cause to be done, all things necessary, advisable, or proper to obtain the Debt Financing on or prior to the Closing Date. Buyer shall give Seller prompt written notice if and when Buyer becomes aware that any portion of the Debt Financing may not be available for the purposes of consummating the transactions contemplated by this Agreement. Buyer shall keep Seller informed on a reasonably current basis with reasonably detailed information about the status of Buyer's efforts to obtain the Debt Financing. Buyer shall not take any action that would reasonably be expected to materially delay or prevent the consummation of the transactions contemplated hereby, including the Debt Financing.

(b) Seller shall use its commercially reasonable efforts to cause its officials, employees, attorneys, accountants, and other Representatives to provide all customary cooperation that is reasonably requested by Buyer and reasonably necessary to arrange for and obtain the Debt Financing, to the extent that the participation by members of management of Seller is reasonably necessary in connection therewith. Seller shall provide such commercially reasonable assistance as is customarily provided for in financings of the type contemplated by the Debt Financing, including using commercially reasonable efforts, at Buyer's cost and expense, in (i) (A) designating one or more members of senior management of Seller to participate in, at reasonable times and upon reasonable notice, a reasonable number of investor presentations and rating agency materials and presentations and (B) assisting with the preparation of customary offering documents and materials of Buyer, including private placement or offering memoranda, bank information memoranda, bank syndication material and packages, and similar documents and materials, in connection with the Debt Financing (all such documents and materials, collectively, the "**Offering Documents**"), (ii) furnishing to Buyer all ML&P Information (including execution of customary authorization and management representation letters) as may be reasonably requested by Buyer to assist in the preparation of the Offering Documents, (iii) providing information that is reasonably available or readily obtainable regarding Seller to assist Buyer in preparing Buyer's pro

forma financial statements to the extent specified by SEC Regulation S-X, and designating, upon request, whether any such information is suitable to be made available to lenders and other investors who do not wish to receive material non-public information, (iv) designating one or more members of senior management of Seller to participate, at reasonable times and upon reasonable notice, in due diligence sessions, drafting sessions, management presentations, rating agency presentations (subject to customary confidentiality provisions), lender meetings (including one-on-one meetings), and one or more road shows, (v) requesting ML&P's independent auditors to cooperate reasonably with Buyer's independent auditors, participate in customary accounting due diligence sessions, and provide customary accountant's comfort letters and consents that are used in any offering document for the Debt Financing, and (vi) assisting in the preparation of, and executing and delivering at the Closing, definitive documents related to the Debt Financing and other customary certificates and documents as may be reasonably requested by Buyer.

(c) Notwithstanding anything to the contrary contained in this Section 6.13, nothing in this Section 6.13 shall require any such cooperation to the extent that it would (i) require Seller to pay any commitment or other fees, reimburse any expenses or otherwise incur any liabilities or give any indemnities, (ii) unreasonably interfere with the Business, (iii) require Seller to enter into or approve any agreement or other documentation or agree to any change or modification of any existing agreement or other documentation, (iv) require Seller to prepare pro forma financial statements or pro forma adjustments reflecting the Debt Financing or the transactions contemplated by this Agreement (*provided* that Seller shall otherwise cooperate with the preparation of such pro forma financial statements and pro forma adjustments prepared by Buyer), (v) require Seller to approve or authorize the Debt Financing, or (vi) require Seller to cause the delivery of (A) legal opinions or reliance letters or any certificate as to solvency or any other certificate necessary for the Debt Financing, other than accountants' customary comfort letters as contemplated by clause (v) of Section 6.13(b), (B) any audited financial information or any financial information prepared in accordance with Regulation S-K or Regulation S-X under the Securities Act of 1933, or any financial information, in each case, in a form not customarily prepared by Seller with respect to any period (*provided*, that for the avoidance of doubt, the foregoing clause (B) shall not be relied upon to prevent Seller from delivering its year-end audited financial statements or quarterly unaudited financial statements to the extent otherwise required by this Agreement or assisting Buyer reasonably in preparing necessary information) or (C) any financial information with respect to a month or fiscal period that has not yet ended or that has ended less than 90 days, or less than 210 days in the case of an annual period, prior to the date of such request.

(d) Buyer shall (i) promptly reimburse Seller for all reasonable out-of-pocket costs or expenses (including reasonable and documented costs and expenses of counsel and accountants) incurred by Seller or any of its Representatives in connection with any cooperation provided for in this Section 6.13, and (ii) indemnify and hold harmless Seller and each and all of its Representatives from and against any Losses incurred as a result

of, or in connection with, any cooperation provided for in this Section 6.13 or the Debt Financing and any information used in connection therewith, unless Seller acted in bad faith or with gross negligence and other than in the case of fraud.

Section 6.14 Shared Intellectual Property and Jointly Used Assets.

(a) If Buyer determines that it requires the use of any Intellectual Property that is deemed important by Seller to its other business units, Seller will, subject to obtaining any required licensor consent, license use of the property to Buyer upon terms satisfactory to the parties; *provided* that Buyer shall be responsible for obtaining any required licensor consent.

(b) With respect to assets used jointly by ML&P and Seller (e.g., communication equipment or facilities and joint easements and the network control system for LED street lights referred to in clause (v) of the definition of Shared Facilities and Assets), Seller will, subject to obtaining any required third party consents, use commercially reasonable efforts to cause arrangements to be entered into that provide Buyer with the right to use such assets upon terms satisfactory to the parties. Seller and Buyer shall use commercially reasonable efforts to cooperate to develop a protocol for mutual use of the network control system for LED street lights.

Section 6.15 Capital Credit Allocations and Retirements. As a cooperative member, Seller will receive annual capital credit allocations in accordance with Buyer's bylaws. Buyer will exercise its commercially reasonable efforts to pursue alternative capital credit retirement methods, to include hybrid last in, first out (LIFO), first in, first out (FIFO) methods to recognize new members.

Section 6.16 Utility Rates; Balancing Accounts.

(a) Buyer will take such actions, including the use of Cost of Power and Non-Cost of Power ratemaking allocation methods that are consistent with those used by Seller prior to the Closing, as are reasonably necessary and appropriate to ensure that the Non-Cost of Power Adjustment rates for any Persons that are ratepayers of ML&P or Seller as of the Closing Date will not increase as a result of the transactions contemplated by this Agreement.

(b) Prior to the Closing, Seller and Buyer shall use commercially reasonable efforts to work together to develop balancing accounts or other procedures for customer bills for the month of the Closing so that customers will not be double billed for any charges (including customer fees or demand charges).

Section 6.17 Financial Information.

(a) Seller shall use commercially reasonable efforts to deliver to Buyer audited financial statements not later than July 1 following the end of each fiscal year during the Interim Period and unaudited quarterly financial statements (including financial statements for the comparative period for the prior year) not later than sixty (60)

days following the end of each fiscal quarter during the Interim Period that meet the requirements of GAAP. Seller shall provide Buyer with monthly financial statements when available. Seller shall provide Buyer with financial statements for the quarter ended March 31, 2018 by not later than January 31, 2019, financial statements for the quarter ended June 30, 2018 by not later than March 31, 2019, and financial statements for the quarter ended September 30, 2018 by not later than May 31, 2019. All such financial statements shall be materially consistent with the Audited Financial Statements.

(b) Seller shall, and shall use commercially reasonable efforts to cause its independent auditors to, assist Buyer in preparing all necessary financial statements and financial information with respect to ML&P that meet the requirements of Item 9.01 of Form 8-K promulgated by the SEC that permits Buyer to timely file a Form 8-K pursuant to Item 2.01 of Form 8-K following the Closing. Such efforts shall include delivering the financial statements referred to in Section 6.17(a) sufficiently in advance of Closing so that Buyer can timely file the referenced Form 8-K with the SEC. Seller shall execute all release letters and other documents that are reasonably necessary to permit its independent auditors to assist Buyer and issue audit opinions on ML&P financial statements and consent to the filing of ML&P financial statements with the SEC and be incorporated by reference into any Buyer filing. Any re-audit of ML&P financial statements in accordance with accounting principles issued by the Financial Accounting Standards Board shall be at the cost and expense of Buyer.

(c) Buyer shall use commercially reasonable efforts to cause its independent auditors to deliver any consent required by Buyer that is required by Law or the rules and regulations of the SEC.

Section 6.18 Casualty During the Interim Period.

(a) If a Casualty occurs during the Interim Period, Seller shall give notice to Buyer of such occurrence within sixty (60) days after such occurrence has ended, and shall include in such notice a detailed estimate of the Cure Amount and an estimate of the insurance proceeds that can reasonably be expected to be recovered with respect to such Casualty (described in clause (i) of the definition of Available Proceeds) (the "**Casualty Notice**"). Seller shall cooperate reasonably with Buyer in providing information to and responding to any questions that Buyer has regarding the Casualty and the Cure Amount, including providing Buyer and its Representatives (i) access, in accordance with the provisions of Section 6.02(a), to the property subject to the Casualty and (ii) all correspondence and reports regarding the amount of the casualty loss and available insurance.

(b) If a Casualty occurs during the Interim Period:

(i) If Seller estimates in the Casualty Notice that the Cure Amount will not exceed the sum of the Maximum Uncovered Loss Amount plus the insurance proceeds with respect to such Casualty (described in clause (i) of the definition of Available Proceeds) that have been collected or are collectible by

Seller, then Seller shall have the right to elect, by giving notice to Buyer within thirty (30) days after Seller has given the Casualty Notice to Buyer, to either:

(1) extend the Closing Date to permit Seller to: (A) repair or replace the Purchased Assets and the Eklutna Generation Assets that were damaged or destroyed as a result of the Casualty; and (B) attempt to obtain the proceeds with respect to such Casualty described in clause (ii) of the definition of Available Proceeds; or

(2) proceed to the Closing under this Agreement, *provided* that all other conditions to the Closing have been satisfied or waived in accordance with the terms of this Agreement.

(ii) If Seller estimates in the Casualty Notice that that the Cure Amount will exceed the sum of the Maximum Uncovered Loss Amount plus the insurance proceeds with respect to such Casualty (described in clause (i) of the definition of Available Proceeds) that have been collected or are collectible by Seller, then Buyer will have the right to elect, by giving notice to Seller within thirty (30) days after Seller has given Buyer the Casualty Notice, to either:

(1) terminate this Agreement, in which case this Agreement will be deemed to have terminated five (5) days after such notice of termination is given; or

(2) extend the Closing Date to permit Seller to: (A) repair or replace the Purchased Assets and the Eklutna Generation Assets that were damaged or destroyed as a result of the Casualty; and (B) exercise good faith reasonable efforts during the period prior to the Closing Date to collect Available Proceeds with respect to such Casualty, in accordance with Seller's Past Practice during similar Casualty events.

(iii) If Seller makes an election under Section 6.18(b)(i)(1): (A) Seller shall have the right, in its reasonable discretion, to determine the period of such extension of the Closing Date (such period not to exceed one year); (B) Seller shall repair or replace the Purchased Assets that were damaged or destroyed as a result of the Casualty so that ML&P and the Business will operate in accordance with Seller's Past Practice; and (C) Seller shall exercise commercially reasonable efforts during the period prior to the Closing Date to collect Available Proceeds, in accordance with Seller's Past Practice during similar Casualty events.

(iv) If Seller makes an election under Section 6.18(b)(i)(2): (A) Seller shall repair or replace the Purchased Assets and the Eklutna Generation Assets that were damaged or destroyed as a result of the Casualty so that ML&P and the Business will operate in accordance with Seller's Past Practice; (B) the Closing shall occur on the Closing Date, *provided* that all of the other conditions to the Closing have been satisfied or waived in accordance with the terms of this

Agreement; and (C) Seller shall exercise commercially reasonable efforts during the period prior to the Closing Date to collect Available Proceeds, in accordance with Seller's Past Practice during similar Casualty events.

(v) If Buyer makes an election under Section 6.18(b)(ii)(2): (A) Seller shall have the right, in its reasonable discretion, to determine the period of such extension of the Closing Date (such period not to exceed one year); (B) Seller shall repair or replace the Purchased Assets and the Eklutna Generation Assets that were damaged or destroyed as a result of the Casualty so that ML&P and the Business will operate in accordance with Seller's Past Practice; (C) Seller shall exercise commercially reasonable efforts during the period prior to the Closing Date to collect Available Proceeds, in accordance with Seller's Past Practice during similar Casualty events; (D) Buyer shall at the Closing pay, reimburse Seller for, and hold Seller harmless from and against the reasonable costs of any such repairs or replacements made by Seller in accordance with Prudent Utility Practices that exceed the sum of (1) the Available Proceeds that have been collected by Seller and (2) the Maximum Uncovered Loss Amount, and (E) Seller shall pay to Buyer any shortfall in Available Proceeds set forth in the Casualty Notice.

(c) Closing Before Completion of Repairs.

(i) If the Closing occurs under the terms of Section 6.18(b)(i) before all of the repairs or replacements have been made to the damaged or destroyed Purchased Assets or the Eklutna Generation Assets, then (i) at the Closing, Seller will stop conducting such repairs and replacements and will assign to Buyer all Contracts with respect to such repairs or replacements that have not been completed, or as to which payment in full has not been made by Seller, and Buyer shall assume all of such Contracts as Assumed Liabilities (subject to Buyer's prior approval of such Contracts, which approval shall not be unreasonably withheld, conditioned, or delayed); (ii) at the Closing, to the extent permitted by applicable Law, Seller shall pay to Buyer any Available Proceeds that have been collected by Seller and that have not been expended by Seller in connection with such repairs and replacements; (iii) after the Closing, to the extent permitted by applicable Law, Seller shall be entitled to pursue and retain any Available Proceeds for any repairs or replacements expenses incurred by Seller or Buyer in connection with such Casualty; (iv) Buyer shall complete any remaining repairs; and (v) Seller shall reimburse Buyer for all reasonable costs associated with such repairs in accordance with Prudent Utility Practices to the extent such costs exceed any Available Proceeds paid to Buyer under clause (ii) above.

(ii) If the Closing occurs under the terms of Section 6.18(b)(ii)(2) before all of the repairs or replacements have been made to the damaged or destroyed Purchased Assets or the Eklutna Generation Assets, then (i) at the Closing, Seller will stop conducting such repairs and replacements and will assign to Buyer all Contracts with respect to such repairs or replacements that have not

been completed, or as to which payment in full has not been made by Seller, and Buyer shall assume all of such Contracts as Assumed Liabilities (subject to Buyer's prior approval of such Contracts, which approval shall not be unreasonably withheld, conditioned, or delayed); (ii) at the Closing, to the extent permitted by applicable Law, Seller shall pay to Buyer any Available Proceeds that have been collected by Seller and that have not been expended by Seller in connection with such repairs and replacements; (iii) after the Closing, to the extent permitted by applicable Law, Buyer shall be entitled to retain, and Seller and Buyer shall jointly pursue for Buyer's benefit, any Available Proceeds for any repairs or replacements expenses incurred by Buyer in connection with such Casualty; and (iv) Buyer shall be solely responsible for the completion of any remaining repairs or replacements and any and all costs associated with such repairs and replacements.

(d) Right to Inspect. Buyer and Buyer's Representatives shall, upon reasonable notice and at reasonable times, be entitled, in accordance with the provisions of Section 6.02(a), to inspect and observe any repairs and replacements performed or provided by Seller under this Section 6.18.

(e) Dispute as to Estimate of Cure Amount. If Buyer disputes the estimated Cure Amount set forth in any Casualty Notice, Buyer shall provide Seller with notice of such dispute within thirty (30) days after such Casualty Notice has been given to Buyer and shall include in such notice a detailed breakdown of Buyer's estimate of the Cure Amount with respect to such Casualty. During the fifteen (15)-day period after Buyer gives Seller such dispute notice, Seller and Buyer shall use reasonable efforts to resolve such dispute. If Seller and Buyer have not resolved such dispute during such fifteen (15)-day period, then Seller and Buyer shall submit the disputed items related to the estimate of the Cure Amount to a utility consultant reasonably acceptable to Seller and Buyer that has expertise in evaluating casualty losses, which consultant shall act as an expert and not as an arbitrator. The utility consultant shall issue its final decision on the disputed items in writing to Seller and Buyer within thirty (30) days after such disputed items have been submitted to the consultant, and such final decision shall, absent manifest error, be binding on both parties as to the estimate of the Cure Amount with respect to the Casualty. Buyer and Seller shall each pay 50% of such consultant's engagement fees and expenses. Any dispute under this Section 6.18(e) shall toll the applicable time limits set forth in this Section 6.18 until the resolution of such dispute under this Section 6.18(e).

Section 6.19 Eminent Domain. If, before the Closing, all or any portion of the Purchased Assets or the Eklutna Generation Assets material to the operation of ML&P and the Business is taken by eminent domain or is the subject of a pending taking that has not yet been consummated, Seller shall give notice to Buyer promptly of such taking or pending taking. Seller shall use such commercially reasonable efforts to replace any Purchased Assets or the Eklutna Generation Assets subject to the eminent domain action as Seller shall deem reasonably necessary for the continued operation of ML&P and the Business in accordance with Seller's Past Practices. If such portion of the Purchased Assets and the Eklutna Generation Assets has a net book value of $10,000,000 or greater, and such proceeding or

replacement is not substantially completed by the Closing, Buyer may elect, by giving notice thereof to Seller, to: (a) terminate this Agreement; (b) proceed to Closing and receive any condemnation award for the taking; or (c) extend the Closing Date by not more than twelve (12) months in order to permit Seller to replace any Purchased Assets or Eklutna Generation Assets subject to the eminent domain action as Seller shall deem reasonably necessary for the continued operation of ML&P in accordance with Seller's Past Practices.

Section 6.20 Leased Property. For the leased equipment or real property set forth in Section 6.20 of the Disclosure Schedules, Buyer shall make any payments required to terminate, assign, or sublease any such equipment or real property lease and shall be responsible, at its sole cost and expense, for obtaining any required lessor consents to such termination, assignment, or sublease.

Section 6.21 Confirmation of Compliance with Requirements of Ordinance and Proposition 10.

(a) Buyer covenants and agrees that it will comply in full with all applicable requirements of Ordinance No. 2018-1(S) of the Anchorage Assembly (the "**Ordinance**") and all applicable requirements of the ballot proposition presented to voters of Seller in connection with the Ordinance ("**Proposition 10**"). Without limiting the foregoing or any other provision of this Agreement, in furtherance of the requirements of the Ordinance and Proposition 10, Buyer covenants and agrees that, for a period of ten (10) years after the Closing Date, Buyer will provide to Seller, not later than thirty (30) days following each anniversary of the Closing Date, a written confirmation from a duly authorized officer of Buyer in the form attached hereto as Exhibit O.

(b) Buyer covenants and agrees that the rights and remedies of Seller for any noncompliance by Buyer with the requirements of the Ordinance and Proposition 10 and with the requirements of this Section 6.21 shall include having such provision specifically enforced by any court having equity jurisdiction, it being acknowledged and agreed that any such breach or threatened breach shall cause irreparable injury to Seller and that money damages would not provide an adequate remedy to Seller.

Section 6.22 Schedule Updates. On or prior to the Closing Date, Seller shall promptly deliver to Buyer supplemental information concerning events or circumstances occurring subsequent to the date hereof that would, in Seller's reasonable judgment, cause the closing condition in Section 7.02(a) not to be met. No such supplemental information shall be deemed to avoid or cure any misrepresentation or breach of warranty or constitute an amendment of any representation, warranty, or statement in this Agreement or the applicable Disclosure Schedule; *provided* that if such supplemental information relates to an event or circumstance occurring subsequent to the date hereof that would permit Buyer to terminate this Agreement as a result of the information so disclosed and Buyer does not exercise such termination right prior to the Closing, then such supplemental information shall constitute an amendment of the representation, warranty, or statement to which it relates for purposes of ARTICLE VIII. In addition to the foregoing, Seller shall have the right to update any Disclosure Schedule (a) to disclose any event, condition, fact, or circumstance occurring after the date of this Agreement that is not material that occurred in the ordinary course and did not involve or result from a violation of Law, torts, breach of Contract, or failure to perform or comply with any covenant or

agreement of Seller contained in this Agreement, and (b) otherwise, with the approval of Buyer, which approval shall not be unreasonably withheld, conditioned, or delayed, to reflect matters that, individually and in the aggregate, are not material, and such updated Disclosure Schedule shall in each case constitute an amendment of the representation, warranty, or statement to which it relates for purposes of ARTICLE VIII.

Section 6.23 Eklutna Public Water Supply. Seller shall not amend, extend, supplement or otherwise modify the Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska executed on February 17, 1984 between the Alaska Power Administration and Seller, as such agreement has been amended and supplemented to date.

Section 6.24 Delivery of Books and Records. Not later than 30 days following the Closing, Seller will transfer all Books and Records stored at Designated Excluded Assets to other locations, as designated by Buyer, that are included in the Purchased Assets.

Section 6.25 Parkland Substations. Seller shall use commercially reasonable efforts to obtain voter approval in accordance with AMC 25.30.020D for the grant to Buyer, without the payment of any additional consideration over and above the Purchase Price, of perpetual easements permitting the exercise of any rights and actions that are required for Buyer to operate the Parkland Substations. Without limiting the foregoing, if such voter approval is not obtained prior to the Closing, Seller shall at the Closing grant to Buyer a Parkland Use Permit for each Parkland Substation and shall thereafter while Buyer has a continuing need for such Parkland Use Permit, unless and until such voter approval is obtained, use commercially reasonable efforts to renew such Parkland Use Permit, in each case prior to the expiration thereof. If Seller at any time terminates or fails to renew any such Parkland Use Permit for any reason other than breach by Buyer of any of its obligations under such Parkland Use Permit, Buyer in its sole discretion shall have the option to relocate the Parkland Substation that is the subject of such Parkland Use Permit, and if Buyer exercises such option, Seller shall have the obligation to reimburse and indemnify Buyer in accordance with the provisions of this Agreement for the reasonable out-of-pocket costs reasonably incurred by Buyer for such relocation (including all such costs incurred in removing and rebuilding the applicable Parkland Substation, restoring the affected parkland property, and interconnecting the applicable Parkland Substation to Buyer's system upon completion of the move).

Section 6.26 Grants of Easements by Seller to Buyer.

(a) If Buyer reasonably requires the grant of any easement or right-of-way across land of Seller, other than municipal land formally dedicated to permanent or long-term park or recreational purposes, for the exercise of any rights and actions that are required for Buyer to use, maintain, and operate any Purchased Assets after the Closing in the manner used, maintained, and operated by Seller immediately prior to the Closing, Seller shall, subject to and in accordance with any requirements of applicable Law (including the AMC), and without the payment of any additional consideration over and above the Purchase Price, grant to Buyer such easement or right-of-way on Seller's customary terms and conditions.

(b) If Buyer reasonably requires the grant of any easement or right-of-way across municipal land formally dedicated to permanent or long-term park or recreational purposes for the exercise of any rights and actions that are required for Buyer to use, maintain, and operate any Purchased Assets after the Closing in the manner used, maintained, and operated by Seller immediately prior to the Closing, Seller shall use commercially reasonable efforts to obtain voter approval in accordance with AMC 25.30.020D for the grant to Buyer, without the payment of any additional consideration over and above the Purchase Price, of such easement or right-of-way. Without limiting the foregoing, unless and until such voter approval is obtained, Seller shall grant to Buyer in place of such irrevocable perpetual easement or right-of-way, without the payment of any additional consideration over and above the Purchase Price, a revocable permit, license, right-of-way, or easement under AMC 25.30.020C, on Seller's customary terms and conditions, to enable Buyer to operate the Purchased Assets in the manner operated by Seller immediately prior to the Closing, and shall thereafter while Buyer has a continuing need for such permit, license, right-of-way, or easement, unless and until such voter approval is obtained, use commercially reasonable efforts to renew such revocable permit, license, right-of-way, or easement, in each case prior to the expiration thereof.

Section 6.27 ARRC Modifications.

(a) Seller shall use commercially reasonable efforts to enter into the following arrangements with ARRC prior to the Closing (including any required consents of ARRC to assignment of such arrangements to Buyer in connection with the transactions contemplated by this Agreement) (the "**ARRC Modifications**"), in each case on terms that, taken as a whole, are no less favorable to the lessee or permit holder (as the case may be) than the terms of the lease between ARRC and Seller for the parcel on which Substation 13 is located (ARRC Contract No. 6108) and otherwise are acceptable to Seller in the exercise of its reasonable discretion:

(i) as a replacement for ARRC Contract No. 4565 and related supplements, a lease having a term not less than five (5) years, with an option on the part of Seller to extend such term for at least one additional term of not less than three (3)-to-five (5) years, for the parcel on First Avenue on which ML&P Plant 1 and the associated switchyard are located;

(ii) an extension of the Permit to cross ARRC track to access ML&P Plant 1 (ARRC Contract No. 7021, effective July 1, 1995) between ARRC and Seller for a term of not less than five (5) years, with an option on the part of Seller to extend such term for at least one additional term of not less than three (3)-to-five (5) years;

(iii) as a replacement for ARRC Contract No. 7634, a lease having a term of not less than five (5)-to-six (6) years for the leased parcel on Second Avenue on which ML&P Substation 9A is located, to permit relocation of Substation 9A (to Substation 3 at 2nd Avenue and Barrow); and

(iv) an extension of the Blanket Permit (ARRC Contract No. 5980 and related supplements) between ARRC and Seller for a term of not less than five (5) years, with an option on the part of Seller to extend such term for at least one additional term of not less than three (3)-to-five (5) years.

(b) If any ARRC Modification shall not be obtained or if any ARRC Modification would be ineffective or would impair Buyer's rights under the Purchased Asset in question so that Buyer would not in effect acquire the benefit of all such rights, Seller, to the maximum extent reasonably permitted by applicable Law and the Purchased Asset, shall act after the Closing as Buyer's agent in order to obtain for it the benefits thereunder and shall cooperate reasonably, to the maximum extent reasonably permitted by applicable Law and the Purchased Asset, with Buyer in any other reasonable arrangement designed to provide such benefits to Buyer. Notwithstanding any provision in this Section 6.27 to the contrary, Buyer shall not be deemed to have waived its rights under Section 7.02(s) hereof unless and until Buyer either provides written waivers thereof or elects to proceed to consummate the transactions contemplated by this Agreement at Closing.

Section 6.28 Compliance with ML&P Overhead Distribution Line Undergrounding Program. Buyer shall, with respect to undergrounding by Buyer of overhead distribution lines in the Service Territory between the Closing Date and December 31, 2024, comply, as and to the extent required by AMC 21.07.050, with the provisions of the five-year undergrounding program adopted by ML&P pursuant to AMC 21.07.050F for undergrounding of overhead distribution lines as in effect on the Closing Date.

Section 6.29 Delivery of Real Property and Environmental Documents; Cooperation with Respect to Real Property Transfers.

(a) Seller shall, not later than 30 days after RCA Approval, provide Buyer with copies of all easements granted to Seller prior to 2002 and copies of all documents described in Section 4.18(j) that were not provided or otherwise made available to Buyer in accordance with the provisions of Section 4.18(j) prior to the date of this Agreement.

(b) Seller and Buyer shall cooperate reasonably to prepare legal descriptions and other documentation required for the transfer from Seller to Buyer of all Owned Real Property and Other Real Property Interests included in the Purchased Assets.

Section 6.30 Determination of Status of Eklutna Transmission Assets as Purchased Assets or Excluded Assets. Seller and Buyer agree that if MEA has not, on or before March 1, 2019, consented, in accordance with the provisions of Section 1 of the Agreement for Extension of 1996 Eklutna Hydroelectric Project Transition Plan dated October 2, 1997 by and among Seller, Buyer, and MEA, to the sale by Seller to Buyer under this Agreement of all undivided interests, rights, and title of Seller in and to the Eklutna Transmission Assets, (i) the Eklutna Transmission Assets will be deemed to be Excluded Assets rather than Purchased Assets for purposes of this Agreement, (ii) each reference in this Agreement to the Eklutna Generation Assets will be deemed to include the Eklutna Transmission Assets, (iii) the "Facility" under the Eklutna Power Purchase Agreement will be deemed to include the

Eklutna Transmission Assets and the "Seller's Interest" under the Eklutna Power Purchase Agreement will be deemed to include all undivided interests, rights, title, and obligations of Seller in and to the Eklutna Transmission Assets, including for purposes of the Purchase Option under Section 14.3 of the Eklutna Power Purchase Agreement, and (iv) Seller will execute such reasonable additional documents, instruments and assurances and take such additional actions as are reasonably necessary and appropriate in order to confirm Buyer's rights to use Seller's rights and interests in and to the Eklutna Transmission Assets in connection with the Eklutna Power Purchase Agreement, including execution and delivery of one or more transmission service agreements for such purposes.

Section 6.31 Further Assurances. Following the Closing, each of the parties hereto shall execute and deliver such additional documents (including a mutually acceptable transition services agreement, if Buyer wishes Seller to provide transition services to Buyer after the Closing), instruments, conveyances and assurances and take such further actions as may be reasonably required to carry out the provisions hereof and give effect to the transactions contemplated by this Agreement and the Ancillary Documents.

ARTICLE VII
CONDITIONS TO CLOSING

Section 7.01 Conditions to Obligations of All Parties. The obligations of each party to consummate the transactions contemplated by this Agreement shall be subject to the fulfillment, at or prior to the Closing, of each of the following conditions:

(a) The RCA Approval shall have been received.

(b) No Governmental Authority shall have enacted, issued, promulgated, enforced, or entered any Governmental Order that is in effect and has the effect of making the transactions contemplated by this Agreement illegal, otherwise restraining or prohibiting consummation of such transactions, or causing any of the transactions contemplated hereunder to be rescinded following completion thereof.

(c) Seller shall have received all consents, authorizations, orders, and approvals from the Governmental Authorities referred to in Section 4.03 and Buyer shall have received all consents, authorizations, orders and approvals from the Governmental Authorities referred to in Section 5.03, in each case, in form and substance reasonably satisfactory to Buyer and Seller, and no such consent, authorization, order and approval shall have been revoked.

Section 7.02 Conditions to Obligations of Buyer. The obligations of Buyer to consummate the transactions contemplated by this Agreement shall be subject to the fulfillment or Buyer's waiver, at or prior to the Closing, of each of the following conditions:

(a) Other than the representations and warranties of Seller contained in Section 4.01, Section 4.02, Section 4.04, and Section 4.24, the representations and warranties of Seller contained in this Agreement, the Ancillary Documents and any certificate or other writing delivered pursuant hereto shall be true and correct in all

respects (in the case of any representation or warranty qualified by materiality or Material Adverse Effect) or in all material respects (in the case of any representation or warranty not qualified by materiality or Material Adverse Effect) on and as of the date hereof and on and as of the Closing Date with the same effect as though made at and as of such date (except those representations and warranties that address matters only as of a specified date, the accuracy of which shall be determined as of that specified date in all respects). The representations and warranties of Seller contained in Section 4.01, Section 4.02, Section 4.04, and Section 4.24 shall be true and correct in all respects on and as of the date hereof and on and as of the Closing Date with the same effect as though made at and as of such date (except those representations and warranties that address matters only as of a specified date, the accuracy of which shall be determined as of that specified date in all respects).

(b) Seller shall have duly performed and complied in all material respects with all agreements, covenants and conditions required by this Agreement and each of the Ancillary Documents to be performed or complied with by it prior to or on the Closing Date; *provided,* that, with respect to agreements, covenants and conditions that are qualified by materiality, Seller shall have performed such agreements, covenants and conditions, as so qualified, in all respects.

(c) No Action shall have been commenced against Buyer or Seller, which would prevent the Closing. No injunction or restraining order shall have been issued by any Governmental Authority, and be in effect, which restrains or prohibits any transaction contemplated hereby.

(d) All approvals, consents and waivers that are listed on Section 4.03 of the Disclosure Schedules shall have been received, and executed counterparts thereof shall have been delivered to Buyer at or prior to the Closing.

(e) From the date of this Agreement, there shall not have occurred any Material Adverse Effect, nor shall any event or events have occurred that, individually or in the aggregate, with or without the lapse of time, would reasonably be expected to result in a Material Adverse Effect.

(f) Seller shall have delivered to Buyer duly executed counterparts to the Ancillary Documents and such other documents and deliveries set forth in Section 3.02(a).

(g) Buyer shall have received all Permits that are necessary for it to conduct the Business as conducted by Seller as of the Closing Date.

(h) All Encumbrances relating to the Purchased Assets and those listed on Section 4.10(a)(i) of the Disclosure Schedules shall have been released in full, other than Permitted Encumbrances, and Seller shall have delivered to Buyer written evidence, in form satisfactory to Buyer in its sole discretion, of the release of such Encumbrances.

(i) Buyer shall have received a certificate, dated the Closing Date and signed by a duly authorized officer of Seller, that each of the conditions set forth in Section 7.02(a) and Section 7.02(b) have been satisfied (the "**Seller Closing Certificate**").

(j) Buyer shall have received a certificate of the Clerk of Seller certifying that attached thereto are true and complete copies of all resolutions adopted by the assembly of Seller authorizing the execution, delivery and performance of this Agreement and the Ancillary Documents and the consummation of the transactions contemplated hereby and thereby, and that all such resolutions are in full force and effect and are all the resolutions adopted in connection with the transactions contemplated hereby and thereby.

(k) Buyer shall have received a certificate of the Clerk of Seller certifying the names and signatures of the officers of Seller authorized to sign this Agreement, the Ancillary Documents and the other documents to be delivered hereunder and thereunder.

(l) Buyer shall have received a certificate pursuant to Treasury Regulations Section 1.1445-2(b) (the "**FIRPTA Certificate**") that Seller is not a foreign person within the meaning of Section 1445 of the Code duly executed by Seller.

(m) Buyer shall have completed the Additional Buyer Due Diligence and the results of such due diligence shall be satisfactory to Buyer in its sole discretion.

(n) Seller shall have delivered an opinion of counsel, from counsel satisfactory to Buyer, in form and substance satisfactory to Buyer, that execution and delivery of the transactions to be consummated hereby will not cause outstanding Bradley Lake Tax Exempt Debt to lose its tax exempt status.

(o) Seller shall have delivered (i) the financial statements referred to in Section 6.17 and (ii) all Updated Financial Statements required by this Agreement, including ML&P's 2018 audited financial statements. Buyer shall have such other financial statements and information it needs that meets the requirements of Item 9.01 of Form 8-K promulgated by the SEC that permits Buyer to file a Form 8-K pursuant to Item 2.01 of Form 8-K following the Closing in a timely manner.

(p) Buyer shall have received the opinion of bond counsel referenced in Section 3.02(c), in the form attached hereto as Exhibit P, and the independent certified public accountant's report referenced in Section 3.02(c).

(q) The IBEW Collective Bargaining Agreement shall be in full force and effect and shall not have expired.

(r) Provided that the Transition Agreement is in full force and effect, Buyer shall have received a certificate of a duly authorized official of Seller certifying that Seller has satisfied each and all of the requirements of AO No. 2018-1(S) that are applicable to Seller.

(s) Seller shall have entered into the ARRC Modifications.

(t) Seller shall have entered into the Co-Location Agreement on terms reasonably acceptable to Buyer, and AWWU shall have consented to the assignment of the Co-Location Agreement by Seller to Buyer effective upon the Closing.

(u) Seller shall have delivered to Buyer such other documents or instruments as Buyer reasonably requests and are reasonably necessary to consummate the transactions contemplated by this Agreement.

Section 7.03 Conditions to Obligations of Seller. The obligations of Seller to consummate the transactions contemplated by this Agreement shall be subject to the fulfillment or Seller's waiver, at or prior to the Closing, of each of the following conditions:

(a) Other than the representations and warranties of Buyer contained in Section 5.01, Section 5.02, and Section 5.04, the representations and warranties of Buyer contained in this Agreement, the Ancillary Documents and any certificate or other writing delivered pursuant hereto shall be true and correct in all respects (in the case of any representation or warranty qualified by materiality or Material Adverse Effect) or in all material respects (in the case of any representation or warranty not qualified by materiality or Material Adverse Effect) on and as of the date hereof and on and as of the Closing Date with the same effect as though made at and as of such date (except those representations and warranties that address matters only as of a specified date, the accuracy of which shall be determined as of that specified date in all respects). The representations and warranties of Buyer contained in Section 5.01, Section 5.02, and Section 5.04 shall be true and correct in all respects on and as of the date hereof and on and as of the Closing Date with the same effect as though made at and as of such date (except those representations and warranties that address matters only as of a specified date, the accuracy of which shall be determined as of that specified date in all respects).

(b) Buyer shall have duly performed and complied in all material respects with all agreements, covenants, and conditions required by this Agreement and each of the Ancillary Documents to be performed or complied with by it prior to or on the Closing Date; *provided,* that, with respect to agreements, covenants and conditions that are qualified by materiality, Buyer shall have performed such agreements, covenants, and conditions, as so qualified, in all respects.

(c) No injunction or restraining order shall have been issued by any Governmental Authority, and be in effect, which restrains or prohibits any material transaction contemplated hereby.

(d) All approvals, consents, and waivers that are listed on Section 5.03 of the Disclosure Schedules shall have been received, and executed counterparts thereof shall have been delivered to Seller at or prior to the Closing.

(e) Buyer shall have delivered to Seller duly executed counterparts to the Ancillary Documents and such other documents and deliveries set forth in Section 3.02(b).

(f) Seller shall have received a certificate, dated the Closing Date and signed by a duly authorized officer of Buyer, that each of the conditions set forth in Section 7.03(a) and Section 7.03(b) have been satisfied (the "**Buyer Closing Certificate**").

(g) Seller shall have received a certificate of the Secretary or an Assistant Secretary (or equivalent officer) of Buyer certifying that attached thereto are true and complete copies of all resolutions adopted by the board of directors of Buyer authorizing the execution, delivery and performance of this Agreement and the Ancillary Documents and the consummation of the transactions contemplated hereby and thereby, and that all such resolutions are in full force and effect and are all the resolutions adopted in connection with the transactions contemplated hereby and thereby.

(h) Seller shall have received a certificate of the Secretary or an Assistant Secretary (or equivalent officer) of Buyer certifying the names and signatures of the officers of Buyer authorized to sign this Agreement, the Ancillary Documents and the other documents to be delivered hereunder and thereunder.

(i) Seller shall have completed the Additional Seller Due Diligence and the results of such due diligence shall be satisfactory to Seller in its sole discretion.

(j) Seller shall have received the opinion(s) of bond counsel and the independent certified public accountant's report referred to in Section 3.02(c) in the form attached hereto as Exhibit Q.

(k) Seller shall have received a certificate of the Secretary or an Assistant Secretary (or equivalent officer) of Buyer certifying that Buyer has satisfied each and all of the requirements of AO No. 2018-1(S) that are applicable to Buyer.

(l) If the Transition Agreement is in full force and effect, Seller shall have received a copy of the Transition Agreement as duly executed by Buyer and the IBEW.

(m) Buyer shall have delivered to Seller such other documents or instruments as Seller reasonably requests and are reasonably necessary to consummate the transactions contemplated by this Agreement.

ARTICLE VIII
INDEMNIFICATION

Section 8.01 Survival. Subject to the limitations and other provisions of this Agreement, the representations and warranties contained herein shall survive the Closing and shall remain in full force and effect until the date that is three (3) years from the Closing Date; *provided,* that the representations and warranties in (i) Section 4.01, Section 4.02, Section 4.08, Section 4.24, Section 5.01, Section 5.02,

and Section 5.04 shall survive indefinitely or if shorter for the maximum period allowed by Law, (ii) Section 4.18 shall survive for a period of five (5) years after the Closing or if shorter for the maximum period allowed by Law, and (iii) Section 4.19 and Section 4.21 shall survive for the full period of all applicable statutes of limitations including those statutes of limitations related to the underlying subject matter of the applicable representation or warranty (giving effect to any waiver, mitigation or extension thereof) plus sixty (60) days. All covenants and agreements of the parties contained herein shall survive the Closing indefinitely or for the period explicitly specified therein. To the extent any survival time period set forth herein exceeds the applicable statute of limitations or similar statute or judicial doctrine, each party hereto hereby waives the specific applicability of any such statute of limitations, similar statute, or judicial doctrine. Notwithstanding the foregoing, any claims asserted in good faith with reasonable specificity (to the extent known at such time) and in writing by notice from the non-breaching party to the breaching party prior to the expiration date of the applicable survival period shall not thereafter be barred by the expiration of the relevant representation or warranty and such claims shall survive until finally resolved.

Section 8.02 Indemnification By Seller. Subject to the other terms and conditions of this ARTICLE VIII, and subject to appropriation of the requisite funds by the Assembly of Seller, Seller shall, to the furthest extent permitted by applicable Law, indemnify and defend Buyer and each and all of its Representatives (collectively, the "**Buyer Indemnitees**") against, and shall hold each of them harmless from and against, and shall pay and reimburse each of them for, any and all Losses incurred or sustained by, or imposed upon, the Buyer Indemnitees based upon, arising out of, with respect to or by reason of:

(a) any inaccuracy in or breach of any of the representations or warranties of Seller contained in this Agreement, the Ancillary Documents, or in any certificate or instrument delivered by or on behalf of Seller pursuant to this Agreement, as of the date such representation or warranty was made or as if such representation or warranty was made on and as of the Closing Date (except for representations and warranties that expressly relate to a specified date, the inaccuracy in or breach of which will be determined with reference to such specified date);

(b) any breach or non-fulfillment of any covenant, agreement, or obligation to be performed by Seller pursuant to this Agreement, or any certificate or instrument delivered by or on behalf of Seller pursuant to this Agreement;

(c) any Excluded Asset or any Excluded Liability;

(d) the Assumed Environmental Liabilities, to the extent, if any, that Losses incurred by Buyer in connection with the same prior to the tenth (10th) anniversary of the Closing Date exceed the amount of $25,000,000 in the aggregate, but not in any event including any Environmental Claims, Liabilities, or Losses arising directly out of any asset retirement obligations or arising solely by reason of Buyer's ownership and operation of the Purchased Assets following the Closing Date.

Nothing in this Section 8.02 shall preclude Buyer from commencing litigation to enforce the provisions of this Section 8.02 and enforcing any related judgement if the requirements for commencement of litigation in this ARTICLE VIII have otherwise been satisfied.

Section 8.03 Indemnification By Buyer. Subject to the other terms and conditions of this ARTICLE VIII, Buyer shall, to the furthest extent permitted by applicable Law, indemnify and defend Seller and each and all of its Representatives (collectively, the "**Seller Indemnitees**") against, and shall hold each of them harmless from and against, and shall pay and reimburse each of them for, any and all Losses incurred or sustained by, or imposed upon, the Seller Indemnitees based upon, arising out of, with respect to or by reason of:

(a) any inaccuracy in or breach of any of the representations or warranties of Buyer contained in this Agreement or in any certificate or instrument delivered by or on behalf of Buyer pursuant to this Agreement, as of the date such representation or warranty was made or as if such representation or warranty was made on and as of the Closing Date (except for representations and warranties that expressly relate to a specified date, the inaccuracy in or breach of which will be determined with reference to such specified date);

(b) any breach or non-fulfillment of any covenant, agreement, or obligation to be performed by Buyer pursuant to this Agreement or any certificate or instrument delivered by or on behalf of Buyer pursuant to this Agreement;

(c) any Assumed Liability except to the extent that Seller is obligated to indemnify Buyer pursuant to Section 8.02(d) above; or

(d) Buyer's ownership and operation of the Purchased Assets following the Closing, except to the extent of any Losses (i) arising from or constituting an Excluded Liability or (ii) arising out of Seller's operation of the Purchased Assets prior to the Closing Date, except to the extent of any Losses constituting an Assumed Environmental Liability under Section 2.03(d) of this Agreement.

Section 8.04 Certain Limitations. The indemnification provided for in Section 8.02 and Section 8.03 shall be subject to the following limitations:

(a) Seller shall not be liable to the Buyer Indemnitees for indemnification under Section 8.02(a) until the aggregate amount of all Losses in respect of indemnification under Section 8.02(a) exceeds $2,000,000 (the "**Basket**"), in which event Seller shall be required to pay or be liable for all such Losses in excess of the first $1,000,000 of such Losses. The aggregate amount of all Losses for which Seller shall be liable pursuant to Section 8.02(a) shall not exceed $30,000,000 (the "**Cap**").

(b) Buyer shall not be liable to the Seller Indemnitees for indemnification under Section 8.03(a) until the aggregate amount of all Losses in respect of indemnification under Section 8.03(a) exceeds the Basket, in which event Buyer shall be required to pay or be liable for all such Losses in excess of the first $1,000,000 of such

Losses. The aggregate amount of all Losses for which Buyer shall be liable pursuant to Section 8.03(a) shall not exceed the Cap.

(c) Notwithstanding the foregoing, the limitations set forth in Section 8.04(a) and Section 8.04(b) shall not apply to Losses based upon, arising out of, with respect to or by reason of (x) fraud, criminal activity, or willful misconduct of any party hereto or (y) any inaccuracy in or breach of any representation or warranty in Section 4.01, Section 4.02, Section 4.08, Section 4.18, Section 4.19, Section 4.21, Section 4.24, Section 5.01, Section 5.02, or Section 5.04; *provided, however*, that the aggregate amount of all Losses for which either party shall be liable based upon, arising out of, with respect to or by reason of any inaccuracy in or breach of any of the representations or warranties referenced in this clause (y), other than the representations and warranties in Section 4.18, and other than as set forth in clause (x) of this Section 8.04(c), shall not exceed the Upfront Payment; and *provided, further*, that the aggregate amount of all Losses for which Seller shall be liable based upon, arising out of, with respect to or by reason of any inaccuracy in or breach of Section 4.18 shall not, other than as set forth in clause (x) of this Section 8.04(c), exceed the amount of $10,000,000.

(d) For purposes of this ARTICLE VIII, the amount of any Losses caused by, resulting from, or arising out of any inaccuracy in or breach of any representation or warranty shall be determined without regard to any materiality, Material Adverse Effect or other similar qualification contained in or otherwise applicable to such representation or warranty.

Section 8.05 Indemnification Procedures. The party making a claim under this ARTICLE VIII is referred to as the "**Indemnified Party**," and the party against whom such claims are asserted under this ARTICLE VIII is referred to as the "**Indemnifying Party**".

(a) Third Party Claims. If any Indemnified Party receives notice of the assertion or commencement of any Action made or brought by any Person who is not a party to this Agreement or a Representative of the foregoing (a "**Third Party Claim**") against such Indemnified Party with respect to which the Indemnifying Party is obligated to provide indemnification under this Agreement, the Indemnified Party shall give the Indemnifying Party written notice thereof as promptly as reasonably practicable, but in any event not later than thirty (30) calendar days after receipt of such notice of such Third Party Claim. The failure to give such prompt written notice shall not, however, relieve the Indemnifying Party of its indemnification obligations except and only to the extent that such failure causes the Indemnifying Party to forfeit rights or defenses. Such notice by the Indemnified Party shall describe the Third Party Claim in reasonable detail, shall include copies of all material written evidence thereof and shall indicate the estimated amount, if reasonably practicable, of the Loss that has been or may be sustained by the Indemnified Party. The Indemnifying Party shall have the right to participate in, or by giving written notice to the Indemnified Party, to assume the defense of any Third Party Claim at the Indemnifying Party's expense and by the Indemnifying Party's own counsel, and the Indemnified Party shall cooperate in good faith in such defense; *provided,* that the Indemnifying Party may not elect to assume the defense of such Third Party Claim

unless it agrees in writing that it will be liable for any Losses resulting from the Third Party Claim pursuant to the indemnification provisions of this ARTICLE VIII; *provided, further*, that if the Indemnifying Party is Seller, such Indemnifying Party shall not have the right to defend or direct the defense of any such Third Party Claim that (x) is asserted directly by or on behalf of a Person that is a supplier or customer of the Business, or (y) seeks an injunction or other equitable relief against the Indemnified Party. In the event that the Indemnifying Party assumes the defense of any Third Party Claim, subject to Section 8.05(b), the Indemnifying Party shall have the right to take such action as it deems necessary to avoid, dispute, defend, appeal or make counterclaims pertaining to any such Third Party Claim in the name and on behalf of the Indemnified Party. If the Indemnifying Party assumes the defense of such Third Party Claim, the Indemnified Party shall have the right to participate in the defense of any such Third Party Claim with counsel selected by it subject to the Indemnifying Party's right to control the defense thereof. The fees and disbursements of such counsel shall be at the expense of the Indemnified Party, *provided,* that if in the reasonable opinion of counsel to the Indemnified Party, (A) there are legal defenses available to an Indemnified Party that are different from or additional to those available to the Indemnifying Party; or (B) there exists a conflict of interest between the Indemnifying Party and the Indemnified Party that cannot be waived, the Indemnifying Party shall be liable for the reasonable fees and expenses of counsel to the Indemnified Party in each jurisdiction for which the Indemnified Party reasonably determines that such counsel is required. If the Indemnifying Party elects not to compromise or defend such Third Party Claim, fails to promptly notify the Indemnified Party in writing of the Indemnifying Party's election to defend as provided in this Agreement, or fails to diligently prosecute the defense of such Third Party Claim, the Indemnified Party may, subject to Section 8.05(b), pay, compromise, and defend against such Third Party Claim and seek indemnification for any and all Losses based upon, arising from, or relating to such Third Party Claim. Seller and Buyer shall cooperate with each other in all reasonable respects in connection with the defense of any Third Party Claim, including making available records relating to such Third Party Claim and furnishing, without expense (other than reimbursement of actual out-of-pocket expenses) to the defending party, management employees of the non-defending party as may be reasonably necessary for the preparation of the defense of such Third Party Claim.

(b) Settlement of Third Party Claims. Notwithstanding any other provision of this Agreement, the Indemnifying Party shall not enter into settlement of any Third Party Claim without the prior written consent of the Indemnified Party, except as provided in this Section 8.05(b). If a firm offer is made to settle a Third Party Claim without leading to liability or the creation of a financial or other obligation on the part of the Indemnified Party and provides, in customary form, for the unconditional release of each Indemnified Party from all liabilities and obligations in connection with such Third Party Claim, and the Indemnifying Party desires to accept and agree to such offer, the Indemnifying Party shall give written notice to that effect to the Indemnified Party. If the Indemnified Party fails to consent to such firm offer within fifteen (15) days after its receipt of such notice, the Indemnified Party may continue to contest or defend such Third Party Claim and in

such event, the maximum liability of the Indemnifying Party as to such Third Party Claim shall not exceed the amount of such settlement offer. If the Indemnified Party fails to consent to such firm offer and also fails to assume defense of such Third Party Claim, the Indemnifying Party may settle the Third Party Claim upon the terms set forth in such firm offer to settle such Third Party Claim. If the Indemnified Party has assumed the defense pursuant to Section 8.05(a)), it shall not agree to any settlement without the written consent of the Indemnifying Party (which consent shall not be unreasonably withheld or delayed).

(c) Direct Claims. Any Action by an Indemnified Party on account of a Loss that does not result from a Third Party Claim (a "**Direct Claim**") shall be asserted by the Indemnified Party giving the Indemnifying Party written notice thereof as promptly as reasonably practicable, but in any event not later than thirty (30) days after the Indemnified Party becomes aware of such Direct Claim. The failure to give such prompt written notice shall not, however, relieve the Indemnifying Party of its indemnification obligations except and only to the extent that such failure causes the Indemnifying Party to forfeit rights or defenses. Such notice by the Indemnified Party shall describe the Direct Claim in reasonable detail, shall include copies of all material written evidence thereof, and shall indicate the estimated amount, if reasonably practicable, of the Loss that has been or may be sustained by the Indemnified Party. The Indemnifying Party shall have thirty (30) days after its receipt of such notice to respond in writing to such Direct Claim. The Indemnified Party shall allow the Indemnifying Party and its professional advisors to investigate the matter or circumstance alleged to give rise to the Direct Claim, and whether and to what extent any amount is payable in respect of the Direct Claim and the Indemnified Party shall assist the Indemnifying Party's investigation by giving such information and assistance (including access, upon reasonable advance notice and upon reasonable terms and conditions, to the Indemnified Party's premises and personnel and the right to examine and copy any accounts, documents or records) as the Indemnifying Party or any of its professional advisors may reasonably request. If the Indemnifying Party does not so respond within such thirty (30)-day period, the Indemnifying Party shall be deemed to have rejected such claim, in which case the Indemnified Party shall be free to pursue such remedies as may be available to the Indemnified Party on the terms and subject to the provisions of this Agreement.

Section 8.06 Limitation of Liability. NOTWITHSTANDING ANYTHING IN THIS AGREEMENT TO THE CONTRARY, NEITHER PARTY SHALL BE LIABLE TO THE OTHER PARTY FOR ANY CONSEQUENTIAL, SPECIAL, INDIRECT (INCLUDING INDIRECT DAMAGES IN THE NATURE OF LOST PROFITS OR BUSINESS, DIMINUTION IN VALUE, AND LOSS OF USE), SPECULATIVE, EXEMPLARY, OR PUNITIVE DAMAGES FOR ANY REASON WITH RESPECT TO ANY MATTER ARISING OUT OF OR RELATING TO THIS AGREEMENT, WHETHER BASED ON STATUTE, CONTRACT, TORT, OR OTHERWISE AND WHETHER OR NOT ARISING FROM THE OTHER PARTY'S SOLE, JOINT, OR CONCURRENT NEGLIGENCE, STRICT LIABILITY OR OTHER FAULT ("**Non-reimbursable Damages**"); *PROVIDED, HOWEVER*, THAT IN NO EVENT SHALL THE FOREGOING LIMITATIONS ON

LIABILITY OR DAMAGES LIMIT THE LIABILITY OF ANY PARTY TO ANY OTHER PARTY FOR THIRD PARTY CLAIMS.

Section 8.07 No Other Representations; Reliance; Effect of Investigation.

(a) Each of Seller and Buyer acknowledges that (i) the other party has not made any representations, warranties, covenants, or agreements, express or implied, with respect to any of the matters that are the subject of this Agreement or any of the other Ancillary Documents, except as expressly made in this Agreement, the Ancillary Documents, or any certificate or instrument delivered by such party pursuant to this Agreement or any Ancillary Document, and (ii) in consummating the transactions described herein, neither party is relying on or has relied on any representation, warranty, covenant, or agreement whatsoever regarding the subject matter of this Agreement or any Ancillary Document, whether express or implied, other than as expressly made in this Agreement, the Ancillary Documents, or any certificate or instrument delivered by such party pursuant to this Agreement or any Ancillary Document.

(b) The representations and warranties of the Indemnifying Party, and the Indemnified Party's right to indemnification with respect thereto, shall not be affected or deemed waived by reason of any investigation made by or on behalf of the Indemnified Party (including by any of its Representatives) or by reason of the fact that the Indemnified Party or any of its Representatives knew or should have known that any such representation or warranty is, was, or might be inaccurate or by reason of the Indemnified Party's waiver of any condition set forth in Section 7.02 or Section 7.03, as the case may be.

Section 8.08 Exclusive Remedies. Subject to Section 10.13, the parties acknowledge and agree that their sole and exclusive remedy with respect to any and all claims (other than claims arising from fraud, criminal activity, or willful misconduct on the part of a party hereto in connection with the transactions contemplated by this Agreement) for any breach of any representation, warranty, covenant, agreement or obligation set forth herein or otherwise relating to the subject matter of this Agreement, shall be pursuant to the indemnification provisions set forth in this ARTICLE VIII. In furtherance of the foregoing, each party hereby waives, to the fullest extent permitted under Law, any and all rights, claims, and causes of action for any breach of any representation, warranty, covenant, agreement or obligation set forth herein or otherwise relating to the subject matter of this Agreement it may have against the other parties hereto and their respective Representatives arising under or based upon any Law, except pursuant to the indemnification provisions set forth in this ARTICLE VIII. Nothing in this Section 8.08 shall limit any Person's right to seek and obtain any equitable relief to which any Person shall be entitled or to seek any remedy on account of any party's fraud, criminal activity, or intentional misconduct.

Section 8.09 Set-off.

(a) In the event that (i) Buyer has notified Seller under Section 8.05 that Buyer is entitled to indemnification from Seller with respect to any Third Party Claim or Direct Claim, (ii) Seller has notified Buyer that (A) Seller has determined that it will

assume the defense of such Third Party Claim or (B) Seller acknowledges that Buyer is entitled to indemnification from Seller for such Direct Claim, and (iii) either (A) Seller has not, within sixty (60) days after delivery of any such notice to Buyer, requested an appropriation of funds from the Assembly of Seller for purposes of paying any amount required to be paid or reimbursed in connection with such Third Party Claim or Direct Claim, or (B) Seller has requested an appropriation of funds from the Assembly of Seller for such purposes but has not received an appropriation of such funds, Buyer will be entitled to withhold all or part of any amount due to Seller under the PILT Agreement or the Eklutna Power Purchase Agreement for purposes of paying or reimbursing any Losses that have been determined, in accordance with the provisions of ARTICLE VIII, to be due and owing from Seller to any Buyer Indemnitee under ARTICLE VIII in connection with such Third Party Claim or Direct Claim. In the event that (i) Buyer has notified Seller under Section 8.05 that Buyer is entitled to indemnification from Seller with respect to any Third Party Claim or Direct Claim, (ii) Seller fails to assume the defense of such Third Party Claim or provide indemnification for such Direct Claim, (iii) Buyer, in accordance with the provisions of ARTICLE VIII, pursues its available legal remedies against Seller for such failure and obtains a final judgment requiring Seller to indemnify Buyer in accordance with ARTICLE VIII for Buyer's Losses in connection with such Third Party Claim or Direct Claim, and (iv) either (A) Seller has not, within sixty (60) days after issuance of such judgment, requested an appropriation of funds from the Assembly of Seller for purposes of paying such Losses, or (B) Seller has requested an appropriation of funds from the Assembly of Seller for such purposes but has not received an appropriation of such funds, Buyer will be entitled to withhold all or part of any amount due to Seller under the PILT Agreement or the Eklutna Power Purchase Agreement for purposes of paying or reimbursing such Losses.

(b) Set-off shall not be Buyer's exclusive remedy with respect to any indemnification claim.

ARTICLE IX
TERMINATION

Section 9.01 Termination. This Agreement may be terminated at any time prior to the Closing:

(a) by the mutual written consent of Seller and Buyer;

(b) by Buyer by written notice to Seller if:

(i) Buyer is not then in material breach of any provision of this Agreement and there has been a breach, inaccuracy in, or failure to perform any representation, warranty, covenant, or agreement made by Seller pursuant to this Agreement that would give rise to the failure of any of the conditions specified in ARTICLE VII and such breach, inaccuracy, or failure has not been cured by

Seller within thirty (30) days after Seller's receipt of written notice of such breach from Buyer; or

(ii) any of the conditions set forth in Section 7.01 or Section 7.02 shall not have been, or if it becomes apparent that any of such conditions will not be, fulfilled by March 31, 2020, unless such failure shall be due to the failure of Buyer to perform or comply with any of the covenants, agreements, or conditions hereof to be performed or complied with by it prior to the Closing; or

(iii) Buyer makes an election under Section 6.18(b)(ii)(1) or Section 6.19.

(c) by Seller by written notice to Buyer if:

(i) Seller is not then in material breach of any provision of this Agreement and there has been a breach, inaccuracy in, or failure to perform any representation, warranty, covenant, or agreement made by Buyer pursuant to this Agreement that would give rise to the failure of any of the conditions specified in ARTICLE VII and such breach, inaccuracy, or failure has not been cured by Buyer within thirty (30) days after Buyer's receipt of written notice of such breach from Seller; or

(ii) any of the conditions set forth in Section 7.01 or Section 7.03 shall not have been, or if it becomes apparent that any of such conditions will not be, fulfilled by March 31, 2020, unless such failure shall be due to the failure of Seller to perform or comply with any of the covenants, agreements, or conditions hereof to be performed or complied with by it prior to the Closing; or

(d) by Buyer or Seller in the event that (i) there shall be any Law that makes consummation of the transactions contemplated by this Agreement illegal or otherwise prohibited or (ii) any Governmental Authority shall have issued a Governmental Order restraining or enjoining the transactions contemplated by this Agreement, and such Governmental Order shall have become final and non-appealable.

Section 9.02 Effect of Termination. In the event of the termination of this Agreement in accordance with this Article, all obligations under this Agreement shall terminate and shall be of no further force or effect and there shall be no liability on the part of Seller or Buyer to each other for or as a result of such termination; *provided*, *however*, that (i) the rights and obligations of the parties set forth in Section 6.09, ARTICLE VIII, and ARTICLE X, inclusive, shall survive such termination, and (ii) notwithstanding anything to the contrary contained herein, no termination of this Agreement shall release, or be construed as releasing, any party from any liability to any other party which may have arisen under this Agreement prior to termination, including as a result of any willful breach by any party of any representation, warranty, or covenant contained herein.

ARTICLE X
MISCELLANEOUS

Section 10.01 Expenses. Except as otherwise expressly provided herein, all costs and expenses, including fees and disbursements of counsel, financial advisors and accountants, incurred in connection with this Agreement and the transactions contemplated hereby shall be paid by the party incurring such costs and expenses, whether or not the Closing shall have occurred.

Section 10.02 Notices. All notices, requests, consents, claims, demands, waivers and other communications hereunder shall be in writing and shall be deemed to have been given (a) when delivered by hand (with written confirmation of receipt); (b) when received by the addressee if sent by a nationally recognized overnight courier (receipt requested); (c) on the date sent by e-mail of a PDF document (with confirmation of transmission) if sent during normal business hours of the recipient, and on the next Business Day if sent after normal business hours of the recipient or (d) on the third day after the date mailed, by certified or registered mail, return receipt requested, postage prepaid. Such communications must be sent to the respective parties at the following addresses (or at such other address for a party as shall be specified in a notice given in accordance with this Section 10.02):

If to Seller:	Municipality of Anchorage 632 W. 6th Avenue, Suite 850 Anchorage, AK 99501 E-mail: william.falsey@anchorageak.gov Attention: William D. Falsey, Municipal Manager
with a copy to:	Municipality of Anchorage 632 W. 6th Avenue, Suite 850 Anchorage, AK 99501 E-mail: rebecca.windtpearson@anchorageak.gov Attention: Rebecca A. Windt Pearson, Municipal Attorney
and a copy to:	K&L Gates LLP 925 Fourth Avenue, Suite 2900 Seattle, WA 98104-1158 E-mail: eric.freedman@klgates.com Attention: Eric E. Freedman
If to Buyer:	Chugach Electric Association, Inc. 5601 Electron Drive Anchorage, AK 99518 E-mail: Lee_Thibert@chugachelectric.com Attention: Lee D. Thibert, Chief Executive Officer

with a copy to:	Chugach Electric Association, Inc. 5601 Electron Drive Anchorage, AK 99518 E-mail: Matthew_Clarkson@chugachelectric.com Attention: Matthew C. Clarkson, General Counsel
and a copy to:	Stinson Leonard Street LLP Suite 2600 50 South Sixth Street Minneapolis, MN 55402 E-mail: james.bertrand@stinson.com Attention: James J. Bertrand

Section 10.03 Interpretation. For purposes of this Agreement:

(a) the words "include," "includes" and "including" shall be deemed to be followed by the words "without limitation;"

(b) references to "or" will be deemed to be disjunctive but not necessarily exclusive (*i.e.*, unless the context dictates otherwise, "or" will be interpreted to mean "and/or" rather than "either/or");

(c) the words "herein," "hereof," "hereby," "hereto" and "hereunder" refer to this Agreement as a whole;

(d) unless the context otherwise requires, references herein: (i) to Articles, Sections, Disclosure Schedules and Exhibits mean the Articles and Sections of, and Disclosure Schedules and Exhibits attached to, this Agreement; (ii) to an agreement, instrument or other document mean such agreement, instrument or other document as novated, amended, modified, revised, supplemented, replaced or restated from time to time in accordance with the relevant provisions thereof, (iii) to a statute mean such statute as amended from time to time and includes any successor legislation thereto and any regulations promulgated thereunder; and (iv) to any other Law will be deemed to include all prior and subsequent enactments, amendments, and modifications pertaining thereto.

(e) the Disclosure Schedules and Exhibits referred to herein shall be construed with, and as an integral part of, this Agreement to the same extent as if they were set forth verbatim herein;

(f) words singular and plural will be deemed to include the other, and pronouns having masculine or feminine gender will be deemed to include the other;

(g) unless expressly stated otherwise, (i) reference to any Person includes such Person's successors and assigns but, in the case of a party to this Agreement, only if such successors and assigns are permitted by this Agreement, (ii) reference to a Person in a particular capacity excludes such Person in any other capacity or individuality, and (iii)

reference to a Governmental Authority include any Person succeeding to its functions and capacities;

(h) unless otherwise provided, a reference to a specific time for the performance of an obligation is a reference to that time in the place where that obligation is to be performed;

(i) any term defined or provision incorporated in this Agreement by reference to another document, instrument or agreement will continue to have the meaning or effect ascribed thereto whether or not such other document, instrument or agreement is in effect;

(j) unless otherwise expressly provided for as set forth herein, the term "day" will mean a calendar day, and whenever an event is to be performed or payment, act, matter or thing hereunder would occur on a day that is not a Business Day, then such event will be performed and such payment, act, matter or thing will, unless otherwise expressly provided for herein, occur on the next succeeding Business Day;

(k) relative to the determination of any period of time, "from" means "from and including," "to" means "to but excluding," and "through" means "through and including;"

(l) any words or phrases (including electrical, natural gas, and utility industry terms) not otherwise defined herein will have their common meanings; and

(m) this Agreement shall be construed without regard to any presumption or rule requiring construction or interpretation against the party drafting an instrument or causing any instrument to be drafted.

Section 10.04 Headings. The headings in this Agreement are for reference only and shall not affect the interpretation of this Agreement.

Section 10.05 Severability. If any term or provision of this Agreement is invalid, illegal or unenforceable in any jurisdiction, such invalidity, illegality or unenforceability shall not affect any other term or provision of this Agreement or invalidate or render unenforceable such term or provision in any other jurisdiction. Upon such determination that any term or other provision is invalid, illegal or unenforceable, the parties hereto shall negotiate in good faith to modify this Agreement so as to effect the original intent of the parties as closely as possible in a mutually acceptable manner in order that the transactions contemplated hereby be consummated as originally contemplated to the greatest extent possible.

Section 10.06 Disclosure Generally. For the avoidance of doubt, any disclosure or exception set forth by a party in one section of the Disclosure Schedules shall be effective as a disclosure or exception with respect to other sections of the Disclosure Schedules (and to the representations, warranties, and covenants to which such section pertains), to the extent that the relevance of such disclosure or exception to such other sections is reasonably apparent on its face. The inclusion of any

information in the Disclosure Schedules shall not be deemed to be an admission or acknowledgment by Seller, in and of itself, that such information is material to or outside the ordinary course of the business of Seller or ML&P. All references to this Agreement herein or in the Disclosure Schedules shall be deemed to refer to this entire Agreement, including the Disclosure Schedules.

Section 10.07 Entire Agreement. This Agreement and the Ancillary Documents constitute the sole and entire agreement of the parties to this Agreement with respect to the subject matter contained herein and therein, and supersede all prior and contemporaneous understandings and agreements, both written and oral, with respect to such subject matter. In the event of any inconsistency between the statements in the body of this Agreement and those in the Ancillary Documents, the Exhibits and Disclosure Schedules (other than an exception expressly set forth as such in the Disclosure Schedules), the statements in the body of this Agreement will control.

Section 10.08 Successors and Assigns. This Agreement shall be binding upon and shall inure to the benefit of the parties hereto and their respective successors and permitted assigns. Neither party may assign its rights or obligations hereunder without the prior written consent of the other party, which consent shall not be unreasonably withheld, conditioned or delayed. No assignment shall relieve the assigning party of any of its obligations hereunder.

Section 10.09 No Third-Party Beneficiaries. Except as provided in ARTICLE VIII, this Agreement is for the sole benefit of the parties hereto and their respective successors and permitted assigns and nothing herein, express or implied, is intended to or shall confer upon any other Person or entity any legal or equitable right, benefit or remedy of any nature whatsoever under or by reason of this Agreement.

Section 10.10 Amendment and Modification; Waiver. This Agreement may be amended, modified, or supplemented only by an agreement in writing signed by each party hereto. No waiver by any party of any of the provisions hereof shall be effective unless explicitly set forth in writing and signed by the party so waiving. No waiver by any party shall operate or be construed as a waiver in respect of any failure, breach or default not expressly identified by such written waiver, whether of a similar or different character, and whether occurring before or after that waiver. No failure to exercise, or delay in exercising, any right, remedy, power or privilege arising from this Agreement shall operate or be construed as a waiver thereof; nor shall any single or partial exercise of any right, remedy, power or privilege hereunder preclude any other or further exercise thereof or the exercise of any other right, remedy, power or privilege.

Section 10.11 Governing Law; Submission to Jurisdiction; Waiver of Jury Trial.

(a) This Agreement shall be governed by and construed in accordance with the internal laws of the State of Alaska, without reference to conflicts of laws principles that would result in the application of the laws of any other jurisdiction.

(b) ANY LEGAL SUIT, ACTION OR PROCEEDING ARISING OUT OF OR BASED UPON THIS AGREEMENT, THE ANCILLARY DOCUMENTS OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY MAY BE INSTITUTED IN THE SUPERIOR COURT OF THE STATE OF ALASKA IN THE

THIRD JUDICIAL DISTRICT, LOCATED IN ANCHORAGE, ALASKA, AND EACH PARTY IRREVOCABLY SUBMITS TO THE EXCLUSIVE JURISDICTION OF SUCH COURT IN ANY SUCH SUIT, ACTION OR PROCEEDING. SERVICE OF PROCESS, SUMMONS, NOTICE OR OTHER DOCUMENT BY MAIL TO SUCH PARTY'S ADDRESS SET FORTH HEREIN SHALL BE EFFECTIVE SERVICE OF PROCESS FOR ANY SUIT, ACTION OR OTHER PROCEEDING BROUGHT IN SUCH COURT. THE PARTIES IRREVOCABLY AND UNCONDITIONALLY WAIVE ANY OBJECTION TO THE LAYING OF VENUE OF ANY SUIT, ACTION OR ANY PROCEEDING IN SUCH COURT AND IRREVOCABLY WAIVE AND AGREE NOT TO PLEAD OR CLAIM IN SUCH COURT THAT ANY SUCH SUIT, ACTION OR PROCEEDING BROUGHT IN SUCH COURT HAS BEEN BROUGHT IN AN INCONVENIENT FORUM.

(c) EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS AGREEMENT OR THE ANCILLARY DOCUMENTS IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES AND, THEREFORE, EACH SUCH PARTY IRREVOCABLY AND UNCONDITIONALLY WAIVES ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LEGAL ACTION ARISING OUT OF OR RELATING TO THIS AGREEMENT, THE ANCILLARY DOCUMENTS OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY. EACH PARTY TO THIS AGREEMENT CERTIFIES AND ACKNOWLEDGES THAT (A) NO REPRESENTATIVE OF ANY OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT SEEK TO ENFORCE THE FOREGOING WAIVER IN THE EVENT OF A LEGAL ACTION, (B) SUCH PARTY HAS CONSIDERED THE IMPLICATIONS OF THIS WAIVER, (C) SUCH PARTY MAKES THIS WAIVER VOLUNTARILY, AND (D) SUCH PARTY HAS BEEN INDUCED TO ENTER INTO THIS AGREEMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS Section 10.11(c).

Section 10.12 Changes in Law. If and to the extent that any Laws (other than Laws of Seller) that govern any aspect of this Agreement shall change, so as to make any aspect of the transaction described in this Agreement onerous, the parties shall negotiate such changes to this Agreement as may be reasonably necessary for this Agreement to accommodate any such legal or regulatory changes, without materially changing the overall benefits or consideration expected hereunder by either party.

Section 10.13 Specific Performance. The parties agree that irreparable damage would occur if any provision of this Agreement were not performed in accordance with the terms hereof and that the parties shall be entitled to specific performance of the terms hereof, in addition to any other remedy to which they are entitled at law or in equity.

Section 10.14 Waiver of Sovereign Immunity. Seller agrees that it is subject to civil and commercial suit for any breach of contract obligations under this Agreement and any of the Ancillary Documents. To the extent that Seller may be entitled to claim sovereign, governmental, or municipal

immunity from any liability in such a civil or commercial suit by Buyer, Seller hereby agrees not to claim, and hereby waives, such sovereign, governmental, or municipal immunity.

Section 10.15 Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Agreement delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Agreement.

FORM OF ASSIGNMENT, ASSIGNMENT OF LEASES, CONVEYANCE AND BILL OF SALE (BRU INTEREST)

Return this instrument to:

Chugach Electric Association, Inc.
5601 Electron Dr.
Anchorage, Alaska 99518

STATE OF ALASKA §
§
THIRD JUDICIAL DISTRICT §

ASSIGNMENT, ASSIGNMENT OF LEASES, CONVEYANCE AND BILL OF SALE

THIS ASSIGNMENT, ASSIGNMENT OF LEASES, CONVEYANCE AND BILL OF SALE (the "Assignment") is from the Municipality of Anchorage, a political subdivision organized under the laws of the State of Alaska, 632 West 6th Avenue, Suite 730, Anchorage, Alaska 99501 (herein "Assignor"), to Chugach Electric Association, Inc., a non-profit electric cooperative corporation organized under the laws of the State of Alaska, 5601 Electron Drive, Anchorage, Alaska 99518 (herein "Assignee").

This Assignment is made subject to, and Assignor and Assignee shall continue to be entitled to all of their respective benefits and burdens by all of their respective obligations under, the Asset Purchase and Sale Agreement dated as of December __, 2018, by and between Assignor and Assignee, as may be amended, supplemented, restated, or otherwise modified from time to time (the "Purchase Agreement"). Each capitalized term used in this Assignment that is not otherwise defined herein shall have the meaning for such capitalized term as defined in the Purchase Agreement, which terms are incorporated herein by such reference.

For TEN AND NO/100 DOLLARS ($10.00) and other good and valuable consideration, the receipt and sufficiency of which are acknowledged by Assignee, Assignor hereby grants, bargains, sells, conveys, assigns, transfers, sets over, and delivers unto Assignee all of Assignor's right, title and interest in and to the following described properties, rights, and interests (the "Properties"):

(a) The oil, gas and mineral leases, operating rights, working interests, net revenue interests, and any contractual rights to production relating thereto described on Exhibit "A" hereto (and any ratifications and amendments thereto, whether or not the same are described on Exhibit "A") insofar as such leases (and such ratifications and amendments) cover the lands, depths and rights described on such Exhibit "A" (the "Leases"); and

(b) Without limitation of the foregoing, all other right, title and interest (of whatever kind or character, whether legal or equitable, and whether vested or contingent, and including, without limitation, interests in oil, gas and/or mineral leases, overriding royalties, production payments, net profits interests, fee mineral interests, fee royalty interests and other interests) of Assignor in and to the lands described on Exhibit "A" hereto or described in any lease or other instrument described on such Exhibit "A" even though Assignor's interest may be incorrectly described in, or omitted from, Exhibit "A"; and

(c) All rights, titles and interests of Assignor in and to, or otherwise derived from, all presently existing and valid oil, gas and/or mineral unitization, pooling, and/or communitization agreements, declarations and/or orders (including, without limitation, all units formed under orders, rules, regulations, or other official acts of any federal, state, or other authority having jurisdiction, and voluntary unitization agreements, designations and/or declarations) relating to the properties described in subparagraphs (a) and (b) above; and

(d) The oil, gas and condensate wells (whether producing, not producing, shut-in or abandoned) described on Exhibit "B" hereto and all other water source wells, water injection wells and other injection or disposal wells and systems located on, attributed to or used in connection with the Leases or the properties described in subparagraphs (a), (b) and (c) above; and

(e) all oil, gas and other hydrocarbons produced or processed in association therewith (collectively, "Hydrocarbons") from or attributable to the Properties from and after the Effective Time and all Hydrocarbons produced prior to the Effective Time that are in storage prior to the Effective Time and that are upstream of the sales metering point as of the date hereof; and

(f) To the extent assignable or transferable, all presently existing and valid production sales contracts, operating agreements, and other agreements and contracts which relate to any of the properties described in subparagraphs (a) through (e) above; and

(g) All materials, supplies, machinery, equipment, facilities, inventories, improvements and other personal property and fixtures (including, but not by way of limitation, all wells, well pads, wellhead equipment, pumping units, flow lines, pipelines, tanks, buildings, saltwater disposal facilities, injection facilities, compression facilities, gathering systems, and other equipment) used in connection with the exploration, development, operations or maintenance of the properties described in subparagraphs (a), (b), (c) and (d) above, and in and to water rights, all permits and licenses (including, without limitation, all environmental and other governmental permits, licenses and authorizations), and all rights of way, easements, and other rights of surface use used in connection with the exploration, development, operation or maintenance of the properties described in subparagraphs (a) through (e) above; and

(h) To the extent transferable, all easements, rights-of-way, licenses, permits,

servitudes, surface leases, surface use agreements, and similar rights and obligations and interest interests to the extent applicable to, or used or held for use primarily in, the ownership and/or operation of the properties described in subparagraphs (a) through (e) above; and

(i) All gas production or pipeline imbalances relating to the Properties; and

(j) Copies of all of the files, records and data relating to the rights, interests and properties described in subparagraphs (a) through (i) above including, without limitation, title records (including abstracts of title and title curative documents, lease files and division or files); surveys, maps and drawings (including those relating to lands and wells); contracts and contract files; production marketing records; correspondence files; geological, geophysical and seismic records, data and information; well files and production records (including electric logs, core data, pressure data, decline curves, graphical production curves), production and severance tax records and ad valorem tax records; production accounting records; environmental records; and regulatory and regulatory compliance records).

TO HAVE AND TO HOLD the Properties unto Assignee, its successors and assigns forever, subject, however, to all of the terms of this Assignment and the Purchase Agreement.

THIS ASSIGNMENT IS MADE WITHOUT REPRESENTATION OR WARRANTY OF TITLE OF ANY KIND, except that Assignor warrants and agrees that the Properties are free and clear of all liens, encumbrances, burden, claims, and defects of title arising by, through, or under Assignor, but not otherwise, and expressly excluding from such special limited warranty all Permitted Encumbrances. Assignor will forever warrant and defend Assignor's right, title and interest to the Properties to the extent of this special limited warranty and shall upon demand remove or cure any all liens, encumbrances, burden, claims, and defects of title arising by, through, or under Assignor.

Except for the special limited warranty of title set forth above and the provisions of the Purchase Agreement, the Properties are being conveyed by Assignor to Assignee without recourse, covenant or warranty of any kind, express, implied or statutory. ASSIGNOR EXPRESSLY DISCLAIMS AND NEGATES ANY IMPLIED OR EXPRESS WARRANTY OF TITLE (OTHER THAN SUCH SPECIAL WARRANTY), MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR CONFORMITY TO MODELS OR SAMPLES OF MATERIALS.

Assignor and Assignee will, without further consideration, do, execute, acknowledge and deliver all further acts, conveyances and instruments as may be reasonably necessary or appropriate to carry out the intent of this Assignment and to convey the BRU Interests to Assignee pursuant to and in accordance with the Purchase Agreement. Separate assignments of the Properties may be executed on officially approved forms by Assignor to Assignee, in sufficient counterparts to satisfy all applicable statutory and regulatory requirements. Those assignments shall be deemed to contain all of the exceptions, reservations, warranties, rights to enforce covenants and warranties (if any) against Assignor's predecessors in title, rights, titles, power and privileges as set forth herein as fully

as though they were set forth in each such assignment. The Properties conveyed by such separate assignment are the same, and not in addition to, the Properties conveyed herein.

The provisions of this Assignment shall be covenants running with the land, and this Assignment shall extend to and be binding upon and inure to the benefit of Assignor and Assignee, and their respective successors and assigns.

This Assignment may be executed in multiple counterparts, each of which shall for all purposes constitute one and the same instrument.

Where separate assignments of Properties and related documentation on official forms have been or will be executed for filing with and approved by Governmental Authorities in accordance with requirements of governmental rules or regulations to transfer the Properties to Assignee, any such separate assignments and official documentation (a) shall evidence this Assignment and assignment of the applicable Properties herein made and shall not constitute any additional Assignment or assignment of the Properties; (b) are not intended to modify, and shall not modify, any of the terms, covenants and conditions or limitations on warranties set forth in this Assignment and are not intended to create and shall not create any representation or warranty of or by Assignor to Assignee, and (c) shall be deemed to contain all of the terms and provisions of this Assignment, as fully and to all intents and purposes as thought the same were set forth at length in such separate assignments.

THIS ASSIGNMENT SHALL BE GOVERNED, CONSTRUED AND ENFORCED IN ACCORDANCE WITH THE LAWS OF THE STATE OF ALASKA, EXCLUDING ANY CONFLICTS OF LAW RULE OR PRINCIPLE THAT MIGHT APPLY THE LAW OF ANOTHER JURISDICTION.

IN WITNESS WHEREOF this Assignment has been executed on _____ __, 20__, and shall be effective as to runs of oil and deliveries of gas as of 7:00 a.m. local time at the locations of the Properties, respectively, on _____ __, 20__ (the "Effective Time").

(Add recording district and judicial district, state of Alaska)

EXHIBIT D

CLOSING PRORATIONS

General Rules

The following costs and expenses shall not be allocated: Costs and expenses incurred (i) to cure a material breach of Seller's representations and warranties in Article IV of the Asset Purchase Agreement, (ii) to perform the Excluded Liabilities; (iii) related to an Excluded Asset; (iv) to indemnify Buyer under Article VIII of the Asset Purchase Agreement; (v) to fulfill obligations Seller may have in connection with a Casualty or eminent domain proceedings contemplated by Sections 6.18 and 6.19 of the Asset Purchase Agreement.

Customer Service Billing Prorations

Payment to Seller for Unbilled Usage. Unbilled Usage is the portion of Buyer's first customer billing that reflects customers' electricity usage occurring after Seller's last meter reading for billing purposes and through the Closing Date ("Unbilled Usage"). After its last regular monthly billing to customers prior to the Closing Date, Seller shall not make any additional billings for customers' electricity.

Buyer's first monthly billing to customers shall include the Unbilled Usage and Buyer shall pay to Seller amounts associated with Unbilled Usage not later than 60 days after receipt of payment from the customer. Seller shall read all customer meters on the Closing Date and, as necessary, calculate estimated usage levels from such readings through the remaining period to Closing, and such Unbilled Usage information shall be provided to Buyer within 15 days after Closing. Buyer is not responsible or liable for remittance to Seller of any amounts of Unbilled Usage not paid by the customer.

Customer and demand charge revenue from Buyer's first customer billing shall be prorated based on the number of days of electric service provided by Buyer and Seller as identified in Buyer's first customer billing following Closing based on the actual rates charged by Seller. As reasonably possible, customers' electric account meters shall be read by Buyer in accordance with Seller's normal meter reading cycle following the Closing Date for the purpose of creating Buyer's first customer billing. The day and time of each meter reading shall be recorded and used to prorate the customer electricity usage.

Prorated amounts due to Seller for energy charges, cost of power adjustment (COPA) charges, and the regulatory cost charges shall be calculated on the basis of Unbilled Usage at the actual rates charged by the Seller.

Municipality of Anchorage 2% Undergrounding Surcharge: No prorations required; all amounts collected but not expended by Seller prior to Close shall be conveyed to Buyer.

Municipal Utility Services Assessment (MUSA) / Payment in Lieu of Taxes (PILT): Within a calendar-year, Seller is responsible for MUSA payments prior to Closing and Buyer is

responsible for PILT payments post-Closing. Prorations shall be made based on the actual liability amount for the calendar-year, with Buyer and Seller payment responsibility based on the number of days pre and post-Closing.

Accounts Receivable. Buyer shall not be responsible for collection efforts of any accounts receivable not included or identified on the Seller's last regular monthly billing to customers prior to the Closing Date. Collection of amounts due associated with inactive accounts are the responsibility of the Seller. Buyer shall not be responsible for payment to Seller any current or past due amounts not paid by the customer associated with customer usage prior to the Closing Date. Buyer will undertake reasonable efforts consistent with prudent utility collection efforts to collect payments from customers for any amounts due identified on the Seller's last regular monthly billing to customers prior to the Closing Date and Buyer's monthly billings to customers after Closing, consistent with terms and conditions within Buyer's operating tariff.

Customer Deposits: Customer deposits held by Seller shall be conveyed to Buyer at Closing. Seller shall identify date of deposit and deposit amount held by each customer.

Other Prorations

Seller and Buyer shall work together to develop mutually satisfactory prorations, so that Seller receives the benefit of all revenues and is responsible for all costs incurred (including taxes) prior to the Closing, and Buyer receives the benefit of all revenues and is responsible for all costs incurred (including taxes) after the Closing related to ML&P's operations, including but not limited to prorations associated with the following:

- Cost of power adjustment and Beluga River Unit gas transfer pricing, including attendant balancing accounts;
- Gas purchases, transportation and storage;
- Purchased power;
- Eklutna;
- Southcentral Power Project;
- Beluga River Unit;
- Pole attachment.

EXHIBIT E

DESIGNATED EXCLUDED ASSETS

The Designated Excluded Assets will include the Storage Facility, if Buyer so elects by written notice to Seller not less than 30 days prior to the Closing Date.

The Designated Excluded Assets will include the following three properties, if Buyer so elects by written notice to Seller not more than 90 days after the date of this Agreement.

Address	Use	Parcel ID #
1301 South Bragaw St.	Vacant (No longer substation #17)	005-071-01

Northern Lights & Eureka St.	Vacant (No longer Substation #19)	009-035-45 009-035-46

EXHIBIT F

EKLUTNA TRANSMISSION ASSETS

All undivided interests, rights, title, and obligations of Seller in and to the transmission assets included in the Eklutna Hydroelectric Project, including transmission rights, interests, and obligations acquired by Seller pursuant to the Alaska Power Administration Asset Sale and Administration Act, Public Law 104-58 (109 Stat. 557 (1995)) and arising from, but not limited to the following documents: (i) Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska, dated February 17, 1984, between the Alaska Power Administration, an entity of the United States Department of Energy, and Seller (and Supplemental Agreements No.1 and 2 thereto); (ii) Memorandum of Understanding (Transition Plan) dated July 25, 1989 among Seller, Buyer, and MEA; (iii) Eklutna Purchase Agreement dated August 2, 1989 among Buyer, Seller, MEA, and the Alaska Power Administration, a unit of the United States Department of Energy; (iv) Eklutna Purchasers Manner of Acting, Functional Responsibilities, and Staffing Agreement dated August 7, 1991 among Buyer, Seller, MEA, the United States Fish and Wildlife Service, the National Marine Fisheries Service, the Alaska Energy Authority and the State of Alaska; (v) Agreement regarding fish and wildlife affected by the Snettisham and Eklutna Projects, dated August 7, 1991, among Seller, Buyer, MEA, the United States Fish and Wildlife Service, the National Marine Fisheries Service, the Alaska Energy Authority and the State of Alaska; (vi) 1996 Eklutna Hydroelectric Project Transition Plan, dated May 28, 1996, among the Alaska Power Administration, Seller, Buyer, and MEA; (vii) Agreement for Extension of 1996 Eklutna Hydroelectric Project Transition Plan, dated October 2, 1997, among Seller, Buyer, and MEA; and (viii) Closing Agreement, dated October 2, 1997, among the Alaska Power Administration, Seller, Buyer, and MEA, including all instruments identified in Appendix A thereto.

Without limiting the foregoing, the Eklutna Transmission Assets include all undivided interests, rights, title, and obligations of Seller in and to the assets listed in the attached Appendix I, *Eklutna Project Fixed Asset Listing December 27, 2018.*

EXHIBIT H

FORM OF REVOCABLE USE PERMIT

REVOCABLE USE PERMIT

THIS AGREEMENT is made this _____ day of _____, _____ by and between the Municipality of Anchorage (MOA), hereinafter called PERMITTER, which hereby grants this Revocable Use Permit ("Permit") to Chugach Electric Association, Inc., hereinafter called PERMITTEE, for use of the permit area ("Premises") described below for the purpose of operating an electrical substation facility, depicted in its present state on Exhibit A. (collectively, "Facilities") and for no other purpose, subject to the following terms and conditions.

1. PREMISES. A [_____] foot by [_____] foot site located within the following described property within [_____]:

[INSERT DESCRIPTION HERE.]

and more specifically described as that area:

[INSERT DESCRIPTION HERE.]

As further depicted in the attached Exhibit B.

2. TERM. The Term of this Permit shall be for one year, commencing on _____, _____ and ending _____, _____ unless earlier terminated pursuant to the terms of this Permit. Upon mutual consent of both parties, this Permit may be extended annually from time to time. Permitter and Permittee shall each have the absolute right to terminate this Permit at any time, without cause, upon 30 days written notice of termination to Permittee.

3. FEE. The annual fee shall be One Dollar ($1.00) and such fee shall not be prorated or subject to other adjustments. The annual fee payment shall be due and payable within 30 days of the date of this Permit. Permittee shall make all payments to Permitter at the following address:

Municipality of Anchorage
Real Estate Service Department
4700 Elmore Street
PO Box 196650
Anchorage, Alaska 99519-6650

4. PERMITTED USE. Permittee shall use the Premises for construction, maintenance, operation, modification, replacement, repair, and upgrade of the Facilities and for no other

purpose without prior written consent of Permitter. Permittee is required to secure any and all permits to be in compliance with Anchorage Municipal Code, and is responsible for all costs and expenses related to construction, operation, and removal.

5. INSTALLATIONS. Permittee agrees that prior to beginning any construction or modification of any of the Facilities after the date hereof, Permittee will submit to Permitter plans, drawings, and specifications prepared by and bearing the stamp of a registered professional engineer licensed in the State of Alaska describing the design and construction of the proposed Facilities. Before Permittee will be allowed to construct any Facilities on the Premises, Permitter must approve in writing the proposed design of the Facilities, the proposed location of the Facilities, and the plans, drawings, and specifications of the proposed Facilities submitted by Permittee (the "Plans"), which approval shall not be unreasonably withheld, conditioned, or delayed, provided such Plans comport with the terms of this Permit. Permitter may also request, and Permittee agrees to provide, any additional information reasonably requested by Permitter to evaluate the proposed Facilities in connection with this approval process. The plans, drawings, and specifications submitted by Permittee, once approved by Permitter, shall be attached to this Permit as Exhibit B.

Permittee shall notify Permitter prior any construction on the Premises, and Permittee shall, within thirty (30) days after completion of any improvements placed upon or in the Premises herein, deliver an as-built drawing showing the location and construction specifications of said improvements.

6. UTILITIES. Permittee agrees to contract directly with the appropriate utility provider to install and maintain power and communications services for its Facilities separate and apart from Permitter's services, unless other arrangements are made with the Permittee.

Permittee is subject to all previous easements and utility permits, and any damage to any other utilities resulting from Permittee's use of this Permit will be at Permittee's expense.

7. INDEMNIFICATION. Permittee shall hold harmless, indemnify and defend Permitter from any claims, loss, damage, judgment or expense for (a) loss or damage to personal property and death or injury to persons to the extent arising out of Permittee's activities or operations on or about the Premises or any nearby Premises, (b) performance of any labor or services or the furnishing of any materials with respect to the Premises or any part thereof by or at the Permittee's request, (c) any contest of any lien permitted below, and (d) loss or damage arising directly or indirectly out of the siting, construction, or operation of any of the Facilities, including actions or omissions by employees, agents, invitees, or contractors of Permittee, except that (i) this indemnity shall not apply to any claims, liabilities, damages, judgments, orders, lawsuits, arbitrations, investigations, regulatory action, attorneys' fees, and any other costs or expenses to the extent arising entirely from the negligence of Permitter, its employees or agents; and (ii) this indemnity shall not apply to the extent Permitter is required to indemnify Permittee pursuant to the terms of the Asset Purchase Agreement dated December [•], 2018 ("APA") between Permitter and Permittee.

8. LIENS. Permittee shall not suffer any liens or encumbrances to be levied upon the Premises or any other land owned or controlled by Permitter. Permittee will hold harmless Permitter from any such actions and be responsible for payment of any related costs that Permitter may incur.

9. ENVIRONMENTAL. Permittee must, at its own expense, comply with all laws, ordinances, regulations and administrative agency or court orders relating to health, safety, noise, environmental protection, waste disposal, hazardous or toxic materials, and water and air quality. In the event any discharge, leakage, spillage, emission or pollution of any type occurs upon or from the Premises during the Term or any holdover thereafter, Permittee shall immediately notify Permitter and shall, at Permittee's own expense, clean and restore the Premises to the satisfaction of Permitter and any governmental body or court having jurisdiction of the matter.

A. Environmental Indemnity. Permittee agrees to indemnify, hold harmless and defend Permitter against all liability, cost and expense (including, without limitation, any fines, penalties, diminution in value of the Premises, assessment and clean-up costs, judgments, litigation costs and attorneys' fees) incurred by or levied against Permitter as a result of Permittee's breach of this paragraph or as a result of any discharge, leakage, spillage, emission or pollution on or discharged from the Premises, without regard to whether such liability, cost or expense arises during or after the Term; provided, however, that Permittee shall not be required to indemnify Permitter under this paragraph if the parties agree or a court of competent jurisdiction determines that such liability, cost or expense is caused directly and solely by the negligence of Permitter or a third party actor who is not an agent, employee, successor, or independent contractor associated with Permittee. The foregoing indemnity shall survive the expiration or earlier termination of this Permit.

B. Toxic or Hazardous Substances. For purposes of this Permit, shall be interpreted broadly to include, but not be limited to, any material or substance that is defined or classified under federal, state or local laws as:

1. A "hazardous substance" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. § 9601(14) or Section 311 of the Federal Water Pollution Control Act, 33 U.S.C. § 1321, each as now or hereafter amended;
2. A "hazardous waste" pursuant to Section 1004 or Section 3001 of the resource Conservation and Recovery Act, 42 U.S.C. § 6903, 42 U.S.C. § 6921, as now or hereafter amended;
3. A toxic pollutant under Section 307(1)(a) of the Federal Water Pollution Control Act, 33 U.S.C. §1317(1)(a);
4. A "hazardous air pollutant" under Section 112 of the Clean Air Act, 42 U.S.C. § 7412, as now or hereafter amended;

5. A "hazardous material" under the Hazardous Material Transportation Act, 49 U.S.C. §1802(2), as now or hereafter under the aforementioned laws; or

6. Presenting a risk to human health or the environment under other applicable federal, state or local laws, ordinance, or regulations, as now or as may be passed or promulgated in the future. "Toxic or Hazardous Substances" shall also mean any substance that after release into the environment and upon exposure, ingestion, inhalation or assimilation, either directly from the environment or indirectly by ingestion, inhalation or assimilation, either directly from the environment or indirectly by ingestion through food chains, will or may reasonably be anticipated to cause death, disease, behavior abnormalities, cancer or genetic abnormalities. "Toxic or Hazardous Substances" specifically includes, but is not limited to, asbestos, polychlorinated biphenyls (PCBs), petroleum based products and derivatives, flammable explosives, radioactive materials and urea formaldehyde.

D. Environmental Testing. Permittee agrees that it shall be solely responsible for all costs and expenses associated with the performance of environmental testing of the Premises, which may be required at Permitter's sole discretion, upon any breach and corresponding revocation of this Permit, or upon voluntary termination of this Permit by Permittee upon decommissioning of the Facilities. Such environmental testing, conducted by a recognized engineering or environmental consulting firm acceptable to Permitter, shall be the basis for determining the extent of any environmental impairment caused by the Permittee's use and occupancy of the Premises.

10. ACCESS. Permitter hereby grants Permittee and Permittee's agents rights to access to the Facilities as determined necessary by Permittee, provided that such access be from the roadway adjacent to the Premises and through the gated location existing on the Premises as of the date of this Permit, all as depicted in the attached Exhibit C. Permittee accepts full responsibility for any and all damages incurred or restoration needed to the park property as a result of their access.

11. CARE AND MAINTENANCE. Permittee acknowledges that the Premises are in good order and repair unless indicated herein. Permittee shall use due diligence and maintain the Facilities in such a manner so as to avoid creating any untidy or unsafe conditions in or about the Premises, and shall immediately remedy, at its sole cost and expense, any untidy or unsafe condition that it creates or causes, or which otherwise arises in connection with its Facilities. Permittee agrees to be responsible for snow removal and road maintenance as necessary to access the Facility for those areas beyond the limits of normal operations and snow removal by Permitter.

12. ALTERATIONS. The general physical contour of the Premises shall not be altered without prior written approval from Permitter. No excavation work (other than that undertaken in outage or emergency situations) shall be performed upon the Premises without prior written approval from Permitter. In the event of outage or emergency, Permittee may undertake excavation work to the extent required to address the outage or emergency immediately upon providing written notice to Permitter. Permittee's use of the Premises shall not interfere with the use or operation of any facility, pipeline, dock, or related facilities which may be located upon, over or under the Premises. Other than the pre-existing Facilities, no structure, improvement or other facility including, but not limited to, temporary structure and fences, may be constructed or placed in the Premises without prior written approval of Permitter. Any construction or placement shall comply with local building and land use regulations. Permittee shall ensure that the installation, maintenance, and operation of the Facilities are performed in accordance with prudent utility practice and shall exercise due diligence to minimize alterations associated with such Facilities.

13. COMPLIANCE WITH LAWS. Permittee shall, at its own expense, and with all due diligence, comply with all of the provisions of local, state, and federal law which are now in effect or may later be adopted by any governmental authority applicable to the Premises and Permittee's use thereof.

14. ASSIGNMENT. Permittee shall not assign or transfer any of the rights authorized by this Agreement except to Permittee's parent company, wholly owned subsidiary or affiliate. Permittee shall notify Permitter and receive approval for any other assignments, which approval shall not be unreasonably withheld.

15. INSURANCE. Permittee shall deliver to Permitter certificates of liability insurance on or before the effective date of this Permit or at another date as agreed to in writing by the Permitter. Insurance shall cover the entire Term. Permittee shall deliver to Permitter photocopies of the policy or policies of insurance, certificates of insurance, or copies of endorsements upon request by Permitter. The policy or policies purchased pursuant to this paragraph shall name Permitter and Permittee as co-insureds with respect to the Premises and the use or business operated by Permittee on the Premises.

A. The Permittee shall maintain in good standing the insurance described in subsection B of this section. Before rendering any activities under the Permit, the Permittee shall furnish the Permitter with proof of insurance in accordance with subsection B in a form acceptable to the MOA Risk Manager.

B. The Permittee shall provide the following insurance:
   1. Workers' compensation and employer's liability coverage in the amount of $1,000,000 as required by Alaska law. In addition, the Permittee is also responsible for complying with the laws of the state where Permittee maintains its principal place of business.
   2. Commercial general liability, including:

$2,000,000 General Aggregate
$2,000,000 Products/Completed Operations
$1,000,000 Personal & Advertising Injury
$1,000,000 Each Occurrence
$5,000 Medical Payments

3. Commercial automobile liability per occurrence in the amount of $1,000,000, single limit to include: owned, hired, and non-owned.

C. Policies written on a "claims made basis" must have a two (2) year tail of coverage from the completion of the contract requirements.

D. Each policy of insurance required by this section shall provide for no less than thirty (30) days advance notice to Permitter.

E. Permitter must be listed as an additional insured on all polices except Worker's Compensation Polices. The actual policy endorsement shall accompany each Certificate of Insurance.

F. All policies except Worker's Compensation shall contain a waiver of subrogation against Permitter. This policy endorsement should accompany each Certificate of Insurance.

G. Any self-insured retentions must be declared to and approved by Permitter.

16. DEFAULT AND RIGHT TO CURE. (a) Failure to perform any term or condition under this Permit within forty-five (45) days after receipt of written notice from Permitter specifying the failure will be deemed a default by Permittee and a breach of this Permit. No default or breach will be deemed to exist, however, if Permittee has commenced to cure such failure within the forty-five (45) day period and continues to prosecute such cure efforts to completion with reasonable diligence. Delay in curing a default will be excused if due to causes beyond the reasonable control of Permittee.

(b) If Permittee defaults and breaches this Permit, Permitter shall have the right, in its sole discretion, to terminate all Permittee's rights under this Permit, without further notice. In addition, the Permittee shall, at its own expense, remove the Facilities and any other Permittee property and/or equipment from Permitter's premises within thirty (30) days of such termination. If Permittee fails to do so, Permitter may do so and all costs of removal and storage of same shall be at Permittee's sole expense. Upon termination of Permittee's rights under this Permit, Permittee shall nevertheless be obligated to immediately pay all unpaid fees, costs, and other amounts due under this Permit. For each fee payment that is not made before written notice of non-payment is issued by Permitter, Permittee shall be obligated to pay a late fee of $250.00. All amounts owed by Permittee under this Permit which are not paid when due shall bear interest at a rate ten percent (10.0%) per annum. The remedies provided by this section are in addition to all remedies available to Permitter by law or in equity. All Permitter's remedies are cumulative.

17. NOTICES. All notices, requests, demands and communications hereunder will be given by first class certified or registered mail, return receipt request, or by a recognized overnight courier, postage prepaid, to be effective when properly sent and received. Notices will be addressed to the parties as follows:

Permitter: Real Estate Services
4700 Elmore Road
PO Box 196650
Anchorage, Alaska 99519

Permittee: Chugach Electric Association, Inc.
Attention: Chief Executive Officer
5601 Electron Drive
Anchorage, AK 99518

Either party hereto may change the place for the giving of notice to it by written notice to the other as provided herein.

18. QUIET ENJOYMENT. Permittee's construction, installation, maintenance, and operations of the Facilities shall be accomplished with minimum interference and interruption of the use, operation, and maintenance of Permitter's site and/or facilities, and shall at all times in no way endanger the general public or Permitter's personnel. Permitter reserves the right to use, occupy and enjoy its property outside of the Facilities for lawful purposes in such a manner and at such times as it deems necessary to conduct its business so long as it does not interfere with Permittee's use. To the extent Permitter needs access to the portion of the Premises where the Facilities are located, Permitter will coordinate such access with Permittee.

19. REVOCATION. The Permitter reserves the right to revoke this Permit and all authority issued herein with thirty (30) days prior written notice. Any such revocation is subject to the rights and obligations of the parties pursuant to the APA.

20. REMOVAL/RESTORATION: All portions of the Facilities will be and remain Permittee's personal property and, at Permittee's option, may be removed by Permittee at any time during the term of this Permit. Within thirty (30) days of the date of termination of this Permit, or thirty (30) days following the non-renewal of this Permit at term, Permittee will remove all portions of the Facilities and any other Permittee improvements on the Premises, including any subsurface support or foundation improvements, restore the Premises to grade reasonably comparable to the surrounding property, and revegetate the Premises.

21. ENTIRE AGREEMENT. This Permit is the entire agreement between the parties relating strictly to Permittee's use of the Premises, and supersedes any and all prior agreements and understandings relating to the subject matter hereof. This Permit expressly does not supersede any and all prior agreements and understandings of the parties contained in the APA.

22. AMENDMENT. This Permit shall only be amended modified or changed by a writing executed by authorized representatives of the parties, with the same formality as this was executed. For the purposes of any amendment modification or change to the terms and conditions of this Permit, the only authorized representatives of the parties are:

Permittee: [_____]
Permitter: Municipal Manager

Any attempt to amend, modify, or change this Permit by either an unauthorized representative or unauthorized means shall be void.

23. EXHIBITS. The following Exhibits attached to this Permit are incorporated into and made a part of it by this reference:

EXHIBIT A	The Facilities
EXHIBIT B	Survey of Premises
EXHIBIT C	Access to the Premises

IN WITNESS WHEREOF, Permittee and Permitter have caused this Permit to be executed as of the day and year first above written.

FORM OF BILL OF SALE

BILL OF SALE

This Bill of Sale (this "Bill of Sale"), dated as of [•], 20__, is made and entered into by and between the Municipality of Anchorage, Alaska, a political subdivision organized under the laws of the State of Alaska ("Seller"), and Chugach Electric Association, Inc., a non-profit electric cooperative corporation organized under the laws of the State of Alaska ("Buyer").

WHEREAS, Seller and Buyer have entered into that certain Asset Purchase and Sale Agreement, dated as of December [•], 2018 (as may be amended, restated, or modified from time to time, the "Purchase Agreement"), and the execution and delivery of this Bill of Sale is required as a condition to the consummation of the transactions contemplated thereby. Unless otherwise indicated, capitalized terms used but not otherwise defined herein have the meanings ascribed to such terms in the Purchase Agreement.

NOW, THEREFORE, in consideration of the sale of the Purchased Assets and in accordance with and subject to the terms and conditions of the Purchase Agreement, and for other good and valuable considerations, the receipt and sufficiency of which is hereby acknowledged, Buyer and Seller agree as follows:

1. Seller does hereby sell, assign, convey, transfer, and deliver to Buyer all of Seller's right, title, and interest in, to, and under the Purchased Assets, free and clear of all Encumbrances other than Permitted Encumbrances, and Buyer does hereby accept all the right, title, interest in, to, and under the Purchased Assets.

2. Seller and Buyer for themselves, and their successors and assigns, hereby covenant and agree that, at any time and from time to time upon the written request of the other party, they will do, execute, acknowledge, and deliver or cause to be done, executed, acknowledged, and delivered, all such further acts, deeds, assignments, transfers, conveyances, powers of attorney and assurances as may be reasonably required in order to effectuate the provisions and purposes of this Bill of Sale, all at the sole cost and expense of the requesting party.

3. This Bill of Sale is being delivered pursuant to the Purchase Agreement and will be construed consistently therewith. This Bill of Sale is not intended to, and does not, in any manner enhance, diminish, or otherwise modify the rights and obligations of the parties under the Purchase Agreement. To the extent that any provision of this Bill of Sale conflicts or is inconsistent with the terms of the Purchase Agreement, the terms of the Purchase Agreement will govern, supersede, and prevail. This Bill of Sale and all of the provisions hereof will be binding upon and inure to the benefit of Seller and Buyer and their respective successors and permitted assigns.

4. This Bill of Sale shall be governed by, and construed in accordance with, and any claims brought in connection herewith shall be adjudicated under, the internal laws of the State of Alaska.

5. This Bill of Sale may be executed in counterparts (including by means of facsimile or other electronic signature), each of which shall be deemed to be an original and all of which together will be deemed to be one and the same agreement. Delivery of an executed counterpart by facsimile or other electronic signature shall be effective as delivery of a manually executed counterpart.

FORM OF ASSIGNMENT AND ASSUMPTION AGREEMENT

ASSIGNMENT AND ASSUMPTION AGREEMENT

This Assignment and Assumption Agreement ("Assumption Agreement"), dated as of [•], 20__, is made and entered into by and between the Municipality of Anchorage, Alaska, a political subdivision organized under the laws of the State of Alaska ("Seller"), and Chugach Electric Association, Inc., a non-profit electric cooperative corporation organized under the laws of the State of Alaska ("Buyer").

WHEREAS, Seller and Buyer have entered into that certain Asset Purchase and Sale Agreement, dated as of December [•], 2018 (as may be amended, restated, or modified from time to time, the "Purchase Agreement"), and the execution and delivery of this Assumption Agreement is required as a condition to the consummation of the transactions contemplated thereby. Unless otherwise indicated, capitalized terms used but not otherwise defined herein have the meanings ascribed to such terms in the Purchase Agreement.

NOW, THEREFORE, pursuant and subject to the terms of the Purchase Agreement and in consideration of the mutual covenants set forth below and in the Purchase Agreement, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Seller and Buyer agree as follows:

1. Seller hereby assigns, transfers, and delivers to Buyer all of Seller's right, title, and interest in, to, and under the Purchased Assets, free and clear of all Encumbrances other than Permitted Encumbrances, and Buyer hereby accepts all the right, title, interest in, to, and under the Purchased Assets and assumes the Assumed Liabilities.

2. Seller and Buyer for themselves, and their successors and assigns, hereby covenant and agree that, at any time and from time to time upon the written request of the other party, they will do, execute, acknowledge, and deliver or cause to be done, executed, acknowledged, and delivered, all such further acts, deeds, assignments, transfers, conveyances, powers of attorney and assurances as may be reasonably required in order to effectuate the provisions and purposes of this Assumption Agreement, all at the sole cost and expense of the requesting party.

3. This Assumption Agreement is being delivered pursuant to the Purchase Agreement and will be construed consistently therewith. This Assumption Agreement is not intended to, and does not, in any manner enhance, diminish, or otherwise modify the rights and obligations of the parties under the Purchase Agreement. To the extent that any provision of this Assumption Agreement conflicts or is inconsistent with the terms of the Purchase Agreement, the terms of the Purchase Agreement will govern, supersede, and prevail.

4. This Assumption Agreement and all of the provisions hereof will be binding upon and inure to the benefit of Seller and Buyer and their respective successors and permitted assigns.

5. This Assumption Agreement shall be governed by, and construed in accordance with, and any claims brought in connection herewith shall be adjudicated under, the internal laws of the State of Alaska.

6. This Agreement may be executed in counterparts (including by means of facsimile or other electronic signature), each of which shall be deemed to be an original and all of which together will be deemed to be one and the same agreement. Delivery of an executed counterpart by facsimile or other electronic signature shall be effective as delivery of a manually executed counterpart.

SPECIAL WARRANTY DEED

THIS SPECIAL WARRANTY DEED (this "**Deed**"), effective this _____ day of _____, 2019, *given by* MUNICIPALITY OF ANCHORAGE, an Alaska municipal corporation, whose mailing address is Post Office Box 196650, Anchorage, Alaska 99519-6650 ("**Grantor**") to CHUGACH ELECTRIC ASSOCIATION, INC., an Alaska electric cooperative, whose mailing address is Post Office Box 196300, Anchorage, Alaska 99519-6300 ("**Grantee**").

WITNESSETH:

THAT FOR AND IN CONSIDERATION OF Ten Dollars ($10.00) and other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, Grantor takes the following actions:

1. Conveyance. Grantor hereby GRANTS, BARGAINS, SELLS, CONVEYS, ASSIGNS, TRANSFERS, and SPECIALLY WARRANTS (as set forth in Paragraph 2 below and not otherwise) to Grantee (A) all of Grantor's right, title, and interest in and to the real property described in Exhibit A attached hereto, situated in the Anchorage Recording District, Third Judicial District, State of Alaska, TOGETHER WITH (B) all of Grantor's right, title and interest in and to all buildings, improvements and fixtures situated on such real property, and all easements, rights of way, water rights, licenses, privileges, hereditaments and appurtenances, if any inuring to the benefit of such real property (the "**Real Property**"), TO HAVE AND TO HOLD FOREVER, UNDER AND SUBJECT TO the Permitted Encumbrances (as defined in that certain Asset Purchase and Sale Agreement, dated as of December 28, 2018, by and between Grantor and Grantee). The foregoing conveyance includes a conveyance of any right, title, or interest in the Real Property purported to be conveyed by Grantor hereunder but acquired by Grantor subsequent to the date hereof.

2. Special Warranty. This conveyance is made, executed, and delivered without warranty of title, either express, implied or statutory, except that Grantor specially warrants the title to the Real Property and will forever defend the Real Property against every person lawfully claiming the same or any part thereof by, through, or under Grantor but not otherwise.

3. Reservations. Notwithstanding anything in this Deed to the contrary, [for a period of thirty (30) years from the date of this Deed,] the conveyance herein is expressly made subject to the following terms and conditions relating to the mural existing on the [____] face of the building located on the Real Property as of the date hereof (the "**Mural**"):

   a. Without the prior written consent of the Grantor in its sole and absolute discretion, Grantee shall not, and shall not knowingly permit any third party to, (i) alter, damage, disguise, remove, demolish, deconstruct, deface, paint, repaint or otherwise modify the Mural or the exterior wall of the building on which it is located, (ii) make any other alterations to the building that could impair the lateral or subjacent support for the exterior wall of the building on which the Mural is located or (iii) construct, erect or install any building, improvement, tower, fixture, fence or other structure on the Real Property, or plant any trees or shrubs on the Real Property, that could reasonably be expected to (x) impair the visibility of the Mural from the public streets and sidewalks adjacent to the Real Property or (y) prohibit or interfere with Grantor's exercise of its rights under this Section 3. Grantee shall take all measures reasonably necessary to protect the Mural from damage or destruction, ordinary wear and tear excepted.

   b. Grantor and its employees, contractors, agents, successors and assigns (the "**Grantor Parties**") shall have the irrevocable right and privilege to, and Grantor reserves unto itself an easement to, enter onto the Real Property, together with such vehicles, tools, materials and equipment as may be necessary or desirable in the reasonable opinion of Grantor, for the purpose of accessing, inspecting, maintaining, repairing and removing the Mural. In connection therewith, the Grantor Parties will have the rights (i) from time to time to use such portion of the ground and/or building as may be reasonably necessary for the above-described purposes, including, without limitation, the right to install scaffolding on and about the wall of the building on which the Mural is located and (ii) of ingress, egress and regress to and from the Mural over and across such portions of the Real Property as may be reasonably necessary for the above-described purposes. In the event that any Grantor Party causes damage to the Real Property in the exercise of Grantor's rights under this Section 3, Grantor shall, at the election of Grantor, either repair the Real Property to substantially the condition as it existed prior to the occurrence of such damage or pay to Grantee the cost to

repair any such damage, in each case, except to the extent such damage is or would be covered by any policy of insurance then held by Grantee. The breach or non-use of the rights reserved to Grantor herein shall not entitle Grantee or any other person to rescind or otherwise terminate the rights and obligations set forth in this Section 3.

c. Each party shall have the right to prosecute any proceedings in equity against the other party, or any other person, materially violating or attempting to materially violate or default in the performance of any of the provisions contained in this Section 3.

d. Grantee expressly acknowledges and agrees that (i) notwithstanding any rule of law or equity, the Mural shall at all times remain the property of Grantor, even though the Mural may be, and remain, attached, annexed or affixed to the Real Property and (ii) the artist which installed the Mural, being Haddad Drugan LLC, shall retain its copyright in the Mural notwithstanding the conveyance of the Real Property to Grantee pursuant to this Deed.

EXECUTED on the date first set forth above.

FORM OF OPINION OF BOND COUNSEL

[LETTERHEAD OF K&L GATES LLP]

_____ __, 2019

Municipality of Anchorage
Anchorage, Alaska

U.S. Bank National Association
Seattle, Washington

Chugach Electric Association, Inc.
Anchorage, Alaska

Re: Municipality of Anchorage, Alaska, Defeasance of Senior Lien Electric Revenue Refunding Bonds, Series 2005A, Senior Lien Electric Revenue Bonds, 2009 Series A (Tax-Exempt), Senior Lien Electric Revenue Bonds, 2009 Series B (Taxable Build America Bonds – Direct Payment), Senior Lien Electric Revenue Refunding Bonds, 2014 Series A and Subordinate Lien Electric Revenue Note (issued pursuant to a Loan Agreement, as amended, between the Municipality and Wells Fargo Municipal Capital Strategies, LLC)

Ladies and Gentlemen:

We are bond counsel to the Municipality of Anchorage, Alaska (the "Municipality") in connection with the defeasance of its outstanding Senior Lien Electric Revenue Refunding Bonds, Series 2005A, Senior Lien Electric Revenue Bonds, 2009 Series A (Tax-Exempt), Senior Lien Electric Revenue Bonds, 2009 Series B (Taxable Build America Bonds – Direct Payment), Senior Lien Electric Revenue Refunding Bonds, 2014 Series A and Subordinate Lien Electric Revenue Note (issued pursuant to a Loan Agreement, as amended, between the Municipality and Wells Fargo Municipal Capital Strategies, LLC) (the "Defeased Obligations"). Such defeasance is authorized pursuant to [to be listed, each document that originally authorized the Defeased Obligations (collectively, the "Authorizing Documents")] _____. Capitalized terms used in this opinion which are not otherwise defined shall have the meanings given to such terms in the Authorizing Documents.

Funds from the sale of the assets of Anchorage Municipal Light and Power, pursuant to the Asset Purchase Agreement, dated _____, between _____ will be used by [U.S.

Bank National Association, Seattle, Washington] as the Escrow Agent (the "Escrow Agent"), to acquire certain noncallable U. S. Government Obligations and held as cash (the "Escrow Deposit"), described in the Escrow Deposit Agreement, dated as of _____ __, 2019 (the "Escrow Agreement") between the Municipality and the Escrow Agent. The Escrow Deposit is sufficient to pay to the date of maturity or redemption thereof all remaining outstanding principal and interest on the Defeased Obligations, and the Escrow Agreement directs the Escrow Agent to use the Escrow Deposit to make such payments. The sufficiency of such escrow maintained pursuant to the Escrow Agreement has been verified by _____. For purposes of the opinions rendered herein, we have relied, without independent investigation, on the verification set forth therein.

Based upon the foregoing, we are of the opinion that:

1. The Escrow Agreement between the Municipality and the Escrow Agent constitutes a legal, valid and binding obligation of the Municipality enforceable in accordance with its terms except to the extent that the enforceability thereof may be limited by any applicable bankruptcy, insolvency, reorganization, moratorium or similar laws affecting the rights and remedies of creditors and by the availability of equitable remedies.

2. The Defeased Obligations have been defeased and discharged in accordance with the Authorizing Documents and the ordinances authorizing their issuance, are deemed paid and no longer outstanding and have no further claim of any kind or under any circumstances to be paid from any funds or money of the Municipality or from the Gross Revenues. The liens created by the Authorizing Documents have been fully extinguished.

Very truly yours,

K&L GATES LLP

PREAMBLE

These disclosure schedules (the "**Disclosure Schedules**") have been prepared and are being delivered in connection with the execution and delivery of that certain Asset Purchase Agreement dated as of December 28, 2018 between the Municipality of Anchorage, as Seller, and Chugach Electric Association, Inc., as Buyer (the "**Agreement**"). Capitalized terms used but not otherwise defined in the Disclosure Schedules shall have the respective meanings ascribed to such terms in the Agreement.

The Disclosure Schedules are arranged in sections and subsections corresponding to the numbered and lettered sections and subsections contained in the Agreement.

The headings contained in the Disclosure Schedules are for reference purposes only and shall not affect in any way the meaning or interpretation of the Disclosure Schedules. The attachments referenced in the Disclosure Schedules form an integral part of the Disclosure Schedules and are incorporated by reference for all purposes as if set forth fully herein.

If a matter is said to be set out, disclosed, listed, described, or reflected in a particular section of these Disclosure Schedules, it is deemed to have been sufficiently disclosed to the parties if such matter is reasonably described in that particular section of these Disclosure Schedules or there is, in that particular section, a specific cross-reference to another section of these Disclosure Schedules. Any disclosure or exception set forth by a party in one section of the Disclosure Schedules shall be effective as a disclosure or exception with respect to other sections of the Disclosure Schedules (and to the representations, warranties, and covenants to which such section pertains), to the extent that the relevance to such disclosure or exception other sections is reasonably apparent on its face.

Section 2.01(g)

Assigned Contracts

1. See Section 4.23(d) of the Disclosure Schedules.

2. Municipality of Anchorage Professional Services Contract with IEC Corporation for Generation Repowering Engineering Services on an "As-Needed" Basis to ML&P, between the Municipality of Anchorage (d/b/a Municipal Light & Power) and IEC Corporation, Inc., dated March 25, 2011, as amended by that certain Amendment No.1 dated December 2, 2011, as further amended by that certain Amendment No. 2 dated November 19, 2012, as further amended by that certain Amendment No. 3 dated October 3, 2013, as further amended by that certain Amendment No. 4 dated December 1, 2015, as further amended by that certain Amendment No. 5 dated May 16, 2016, as further amended by that certain Amendment No. 6 dated November 9, 2016, as further amended by that certain Amendment No. 7 dated May 10, 2017, as further amended by that certain Amendment No. 8 dated January 8, 2018, as further amended by that certain Amendment No. 9 dated July 26, 2018.

3. Engineering, Procurement and Construction Contract, dated as of December 10, 2013, between Seller as Owner and Quanta Power Generation, Inc. as Contractor, as amended by those certain Change Orders.

4. Contract for Furnishing Combustion Turbine Generator Equipment, Services, and Technical Services with GE Packaged Power, Inc., between Seller and GE Packaged Power, Inc., fully executed as of October 5, 2012, including any amendments thereto.

5. Contract for Providing Parts, Equipment, Technical and Other Support Services with GE Packaged Power, LLC,. with a start date of July 1, 2018, including any amendments thereto.

Section 2.02(c)

Excluded Assets

1. Fire station on Government Hill (921 Hollywood Drive), provided that Buyer is granted continued use of the antenna structure pursuant to a space and power colocation agreement mutually acceptable to the parties.

2. The portion of the property on which Plant 2/2A is situated that is managed by Anchorage Water & Wastewater Utility ("**AWWU**") pursuant to an agreement that is currently being negotiated between Seller and AWWU.

3. As set forth in the definition of Shared Facilities and Assets, the General Electric software license agreement for network control system for LED street lights, including central management server hosting services and sustainment operations (subject to the provisions of Section 6.14(a) of the Agreement). Seller is currently working with General Electric to finalize the software license agreement.

4. Substation #1 located at 880 Fairbanks Street.

5. Substation #4 located at 6th Avenue & H Street.

6. Substation #5 located at 840 Ivy Street.

Section 2.10

Allocation Principles

To be agreed prior to Closing.

    d. 9050 Starview Drive (074-061-02) - Patent filed April 26, 1975.

14. Vendor Contract - Contract to Provide OEM Parts and Services for Bently Nevada Vibration Equipment on an "As-Required" basis, dated October 7, 2016, as amended, between Seller and Bently Nevada, LLC (consent).

15. Gas Sale and Purchase Agreement, dated as of July 29, 2013, between ConocoPhillips Company, ConocoPhillips Alaska, Inc., and ConocoPhillips Alaska Natural Gas

Corporation, as Seller, and Municipality of Anchorage d/b/a Municipal Light & Power, as Buyer (consent).

16. Vendor Contract - Service Contract, dated as of February 9, 2016, between Seller and Evoqua Water Technologies, Inc. (consent).

17. Service Contract (Contract Number 4400000361), fully executed as of September 6, 2017, between Seller and Siemens Energy Inc. (consent).

18. Service Contract (Contract Number 4400000682), fully executed as of October 4, 2018, between Seller and Siemens Energy Inc. (consent).

19. Amended and Restated Power Pooling and Joint Dispatch Agreement between Chugach Electric Association, Inc., Municipal Light & Power, and Matanuska Electric Association, Inc., dated January 20, 2017 (consent of Operating Committee).

20. South Central Alaska Power Project Participation Agreement, dated August 28, 2008, between Chugach Electric Association, Inc. and Municipal Light & Power (consent of Participants).

21. Precedent Agreement between Cook Inlet Natural Gas Storage Alaska, LLC and the Municipality of Anchorage (d/b/a Municipal Light & Power), dated August 3, 2010 (consent, or transfer meets elements of permitted transfer).

22. Natural Gas Sale and Purchase Agreement between Furie Operating Alaska, LLC and the Municipality of Anchorage (d/b/a Municipal Light and Power), dated January 3, 2018 (consent or transfer meets elements of permitted transfer).

23. Short-Term Natural Gas Sale and Purchase Agreement between Municipal Light and Power and Helena Energy, LLC, dated March 30, 2018 (consent).

24. Employee Matters Agreement, dated February 4, 2016, between ConocoPhillips Alaska, Inc. and Municipality of Anchorage (d/b/a Municipal Light & Power) and Chugach Electric Association, Inc. (consent).

25. Agreement Regarding the Succession of the Beluga River Unit Operator, dated as of February 4, 2016, between Municipality of Anchorage (d/b/a Municipal Light & Power), Chugach Electric Association, Inc., and Hilcorp Alaska, LLC (consent).

26. Purchase and Sale Agreement, dated April 9, 1996, between Shell Western E&P Inc. and Shell Onshore Ventures Inc. and Municipality of Anchorage (d/b/a Municipal Light & Power) (consent).

27. Battle Creek Water Allocation Purchase Agreement, dated December 31, 2017, between Alaska Electric and Energy Cooperative, Inc. (AEEC) and Municipality of Anchorage (d/b/a Municipal Light & Power) (consent).

28. Encroachment Permit R161155, made February 22, 2016, by and between Municipal Light & Power, as Permittee, and Municipality of Anchorage, as Permitter.

29. Lease Agreement between Alaska Pacific University (f/k/a Alaska Methodist University) and City of Anchorage, Alaska, effective as of July 24, 1972, for the premises located on the parcel of real property known as Tax #005-101-04 (Substation #15).

Section 4.06

Absence of Certain Changes, Events and Conditions

(o)(i)

1. Retention Agreement, effective as of March 7, 2018, between Seller and Beverly A. Jones
2. Retention Agreement, effective as of March 7, 2018, between Seller and Julie A. Harris.
3. Retention Agreement, effective as of March 7, 2018, between Seller and Mark A. Johnston.
4. Retention Agreement, effective as of March 7, 2018, between Seller and Mollie C. Morrison.
5. Retention Agreement, effective as of March 7, 2018, between Seller and Timothy R. Prior.
6. Retention Agreement, effective as of March 7, 2018, between Seller and Gary A. Agron.
7. Retention Agreement, effective as of March 7, 2018, between Seller and Anna C. Henderson.
8. Retention Agreement, effective as of March 7, 2018, between Seller and Patsy D. Gunn (items 1-8 above are collectively referred to herein as the "**Retention Agreements**").

(q)(i)
Seller intends to make certain changes to its cafeteria benefits plan (applicable to executive and non-represented employees), effective as of January 1, 2019.

(q)(iii)
1. IBEW Administrative Agreement, by and between Municipality of Anchorage and International Brotherhood of Electrical Workers Local 1547, dated April 3, 2018.
2. IBEW AA# 2018-01-Revised Administrative Agreement, by and between Municipality of Anchorage and International Brotherhood of Electrical Workers Local 1547, dated February 9, 2018.
3. IBEW Administrative Agreement #18-03, by and between Municipality of Anchorage and International Brotherhood of Electrical Workers Local 1547, dated May 31, 2018.
4. IBEW Administrative Agreement #18-04, by and between Municipality of Anchorage and International Brotherhood of Electrical Workers Local 1547, dated June 28, 2018.

Section 4.07

Material Contracts

(a)

(iii) Seller makes purchases and sales under economy energy tariff arrangements.

(iv)

1. Gas Sale and Purchase Agreement, between Seller and Hilcorp Alaska, LLC as successor-in-interest to ConocoPhillips Alaska Natural Gas Corporation, ConocoPhillips Alaska, Inc., ConocoPhillips Company by Letter Agreement, dated September 15, 2016.

2. Interruptible Storage Service Agreement, dated as of March 1, 2017, between Seller and Cook Inlet Natural Gas Storage Alaska, LLC.

3. FSS Service Agreement, entered into as of August 3, 2011, between Cook Inlet Natural Gas Storage Alaska, LLC, and Seller.

(v) Bradley Lake Hydroelectric Project Agreement for the Wheeling of Electric Power and for Related Services, entered into as of December 8, 1987, by and among Buyer, Homer Electric Association Inc. ("**HEA**"), GVEA, MEA, Seller, SES, and AEG&T.

(vi)

1. Eklutna Generating Station Interconnection Agreement, dated as of December 29, 2014, between Seller, Buyer, and MEA.

2. Agreement for Maintenance and Operation of the Eklutna Generation Station Switchyard, dated as of December 29, 2014, between Seller, Buyer, and MEA.

3. Bradley Lake Hydroelectric Project Master Maintenance and Operating Agreement, dated as of May 24, 1994, among the Alaska Energy Authority and the Bradley Project Management Committee.

4. Operation and Maintenance Agreement for Bradley Lake Project, dated February 11, 1994, as amended by that certain Amendment Number One, dated as of August 24, 1996, as further amended by that certain Amendment Number Two, dated as of [June 22, 1999], between HEA and the Alaska Energy Authority.

(vii)

1. Vendor Contract - Contract to Provide OEM Parts and Services for Bently Nevada Vibration Equipment on an "As-Required" basis, dated October 7, 2016, as amended, between Seller and Bently Nevada, LLC.

2. Gas Sale and Purchase Agreement, dated as of July 29, 2013, between ConocoPhillips Company, ConocoPhillips Alaska, Inc., and ConocoPhillips Alaska Natural Gas Corporation, as Seller, and Municipality of Anchorage d/b/a Municipal Light & Power, as Buyer.

3. Vendor Contract - Service Contract, dated as of February 9, 2016, between Seller and Evoqua Water Technologies, Inc.

4. Service Contract (Contract Number 4400000361), fully executed as of September 6, 2017, between Seller and Siemens Energy Inc.

5. Service Contract (Contract Number 4400000682), fully executed as of October 4, 2018, between Seller and Siemens Energy Inc.

6. Vendor Contract (Contract Number 4400000179) - Kingsbury, Inc. Terms and Conditions of Sale (January 2014), begin date of January 1, 2016, between Seller and Kingsbury Incorporated, as amended.

7. Negotiated Terms between Control Components, Inc. and the City of Anchorage (Contract Number 4400000185), dated as of August 10, 2017, as amended.

8. Professional Services Contract (Contract Number 4400000188), dated as of May 23, 2016, between Seller and Resource Data, Inc., as amended.

9. Service Contract (Contract Number 4400000191), fully executed as of September 27, 2016, as amended, between Seller and Cummins Inc.

10. Vendor Contract - Terms and Conditions of Sale (Contract Number 4400000177), begin date of August 30, 2016, as amended, between Seller and Voith Hydro, Inc.

11. Vendor Contract - Service Contract (Contract Number 4400000197), begin date of December 1, 2016, as amended, between Seller and GE Inspection Technologies LP.

12. Professional Services Contract with IEC Corporation, Inc. for Generation Repowering Engineering Services (Contract Number 4400000007), dated as of March 25, 2011, as amended, between Seller and IEC Corporation, Inc.

13. DOT&PF Memorandum of Agreement.

14. Contract for Furnishing Combustion Turbine Generator Equipment, Services, and Technical Services with GE Packaged Power, Inc., between Seller and GE Packaged Power, Inc., fully executed as of October 5, 2012, including any amendments thereto.

15. Contract for Providing Parts, Equipment, Technical and Other Support Services with GE Packaged Power, LLC, with a start date of July 1, 2018, including any amendments thereto.

(x)

1. The Retention Agreements.

2. Contract for Providing Parts, Equipment, Technical and Other Support Services with GE Packaged Power, LLC, with a start date of July 1, 2018, including any amendments thereto.

3. Contract for Furnishing Combustion Turbine Generator Equipment, Services, and Technical Services with GE Packaged Power, Inc., between Seller and GE Packaged Power, Inc., fully executed as of October 5, 2012, including any amendments thereto. (Plant 2A turbine maintenance).

(xi)

1. Bradley Lake Hydroelectric Project Power Sales Agreement, dated as of December 8, 1987, among the Alaska Power Authority, Buyer, GVEA, Seller, the City of Seward d/b/a Seward Electric System ("**SES**"), the Alaska Electric Generation & Transmission Cooperative, Inc. ("**AEG&T**"), HEA, and MEA.

(xii)

1. Utility Service Contract for Elmendorf Air Force Base, Contract No. F65501-68-C-0090, as modified from time to time, between Seller and the United States of America.

2. Solicitation, Offer and Award, issued as of April 16, 2009, as modified from time to time, between Seller and the United States of America, for the supply of electric power for the U.S. Army installation at Fort Richardson.

3. Seller has standard customer relationships with local, state, federal and foreign Governmental Authorities.

4. Agreement, entered into on August 7, 1991, between Seller, Buyer, MEA, U.S. Fish and Wildlife Service, National Marine Fisheries Service, Alaska Energy Authority, and the State of Alaska, relative to the Eklutna and Snettisham Hydroelectric Projects.

5. Second Amended and Restated Operation & Maintenance Agreement for Bradley Lake Hydroelectric Project, effective as of July 1,2008, between Homer Electric Association, Inc. and the Alaska Energy Authority.

(xiii) Certificate of public convenience and necessity.

(xiv)

2. Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska, fully executed as of February 17, 1984, between the Alaska Power Administration, an entity of the United States Department of Energy, and Seller.

3. Agreement, entered into on August 7, 1991, between Seller, Buyer, MEA, U.S. Fish and Wildlife Service, National Marine Fisheries Service, Alaska Energy Authority, and the State of Alaska, relative to the Eklutna and Snettisham Hydroelectric Projects.

4. Bradley Lake Hydroelectric Project Master Maintenance and Operating Agreement, dated as of May 24, 1994, among the Alaska Energy Authority and the Bradley Project Management Committee.

5. Operation and Maintenance Agreement for Bradley Lake Project, dated February 11, 1994, as amended by that certain Amendment Number One, dated as of August 24, 1996, as further amended by that certain Amendment Number Two, dated as of [June 22, 1999], between HEA and the Alaska Energy Authority.

6. Second Amended and Restated Operation & Maintenance Agreement for Bradley Lake Hydroelectric Project, effective as of July 1,2008, between Homer Electric Association, Inc. and the Alaska Energy Authority.

7. 1996 Eklutna Hydroelectric Project Transition Plan, dated as of May 28, 1996, by and among the United States of America d/b/a Alaska Power Administration, a unit of the Department of Energy, Seller, Buyer, and MEA, as extended by that certain Agreement for Extension, fully executed on October 2, 1997, by and among Seller, Buyer, and MEA.

8. Bradley Lake Hydroelectric Project Power Sales Agreement, dated as of December 8, 1987, among the Alaska Power Authority, Buyer, GVEA, Seller, SES, AEG&T, HEA, and MEA.

9. Joint Operating Agreement, entered into as of April 1, 1962, between Standard Oil Company of California, Richfield Oil Corporation, and Shell Oil Company.

10. Bradley Lake Hydroelectric Project Agreement for the Wheeling of Electric Power and for Related Services, entered into as of December 8, 1987, by and among Buyer, HEA, GVEA, MEA, Seller, SES, and AEG&T.

11. Operation and Maintenance Agreement for South Central Alaska Power Project, dated as of August 28, 2008, between Buyer and Seller.

12. Participation Agreement (South Central Alaska Power Project), dated as of August 28, 2008, between Buyer and Seller.

13. Purchase and Sale Agreement (Beluga River Unit), effective as of January 1, 2016, among ConocoPhillips Alaska, Inc., Seller, and Buyer.

14. Purchase and Sale Agreement of Beluga River Field between Shell Western E&P Inc. and Shell Onshore Ventures Inc. and Municipality of Anchorage (d/b/a Municipal Light & Power), dated April 9, 1996.

15. Letter Agreement regarding Joint Filing on Efforts Towards Power Pooling and Joint Dispatch Among Seller, Buyer, and MEA in Response to Order No. 3 in 1-15-001, dated as of December 29, 2016.

16. Amended and Restated Power Pooling and Joint Dispatch Agreement, fully executed as of January 27, 2017, by and among Buyer, Seller, and MEA.

(xv)

1. Participation Agreement (South Central Alaska Power Project), dated as of August 28, 2008, between Buyer and Seller.

2. 1996 Eklutna Hydroelectric Project Transition Plan, dated as of May 28, 1996, by and among the United States of America d/b/a Alaska Power Administration, a unit of the Department of Energy, Seller, Buyer, and MEA, as extended by that certain Agreement for Extension, fully executed on October 2, 1997, by and among Seller, Buyer, and MEA.

3. Purchase and Sale Agreement (Beluga River Unit), effective as of January 1, 2016, among ConocoPhillips Alaska, Inc., Seller, and Buyer.

4. Purchase and Sale Agreement of Beluga River Field between Shell Western E&P Inc. and Shell Onshore Ventures Inc. and Municipality of Anchorage (d/b/a Municipal Light & Power), dated April 9, 1996.

(xvii) Agreement Covering Terms and Conditions of Employment between Seller and International Brotherhood of Electrical Workers Local Union 1547, effective February 28, 2017 - December 31, 2019.

(xviii)

1. Purchase and Sale Agreement (Beluga River Unit), effective as of January 1, 2016, among ConocoPhillips Alaska, Inc., Seller, and Buyer.

2. Joint Operating Agreement, entered into as of April 1, 1962, between Standard Oil Company of California, Richfield Oil Corporation, and Shell Oil Company.

3. Letter Agreement, dated as of September 15, 2016 regarding Assignment of 7/29/2013 ConocoPhillips (COP)-Municipal Light and Power (ML&P) Gas Sale Agreement (GSA).

4. Purchase and Sale Agreement of Beluga River Field between Shell Western E&P Inc. and Shell Onshore Ventures Inc. and Municipality of Anchorage (d/b/a Municipal Light & Power), dated April 9, 1996.

(xix)

1. Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska, fully executed as of February 17, 1984, between the Alaska Power Administration, an entity of the United States Department of Energy, and Seller.

2. Agreement, entered into on August 7, 1991, between Seller, Buyer, MEA, U.S. Fish and Wildlife Service, National Marine Fisheries Service, Alaska Energy Authority, and the State of Alaska, relative to the Eklutna and Snettisham Hydroelectric Projects.

3. 1996 Eklutna Hydroelectric Project Transition Plan, dated as of May 28, 1996, by and among the United States of America d/b/a Alaska Power Administration, a unit of the Department of Energy, Seller, Buyer, and MEA, as extended by that certain Agreement for Extension, fully executed on October 2, 1997, by and among Seller, Buyer, and MEA.

4. Eklutna Generating Station Interconnection Agreement, dated as of December 29, 2014, between Seller, Buyer, and MEA.

5. Agreement for Maintenance and Operation of the Eklutna Generation Station Switchyard, dated as of December 29, 2014, between Seller, Buyer, and MEA.

(xx)

1. Contract for Providing Parts, Equipment, Technical and Other Support Services with GE Packaged Power, LLC, with a start date of July 1, 2018, including any amendments thereto.

2. Contract for Furnishing Combustion Turbine Generator Equipment, Services, and Technical Services with GE Packaged Power, Inc., between Seller and GE Packaged Power, Inc., fully executed as of October 5, 2012, including any amendments thereto. (Plant 2A turbine maintenance).

3. Agreement for Maintenance and Operation of the Eklutna Generation Station Switchyard, dated as of December 29, 2014, between Seller, Buyer, and MEA.

4. Seller has the following day labor contracts and Title 21 contracts:

Engineering/Operations Vendor Contracts

Vendor	Project	Contract #	Date Signed	Effective Date	Length of Contract	Option Years
Northern Powerline Constructors	4kV to 12kV Conversion Overhead to Underground	C-20180003407	6/28/2018	7/9/2018	7/23/18 - 10/31/18	NA
	Bootlegger's Cove Title 21 Undergrounding	C-20180001722	5/1/2018	5/1/2018	5/16/18 - 9/13/18	NA

Actions

(a)

1. HEA litigation related to Bradley Lake wheeling: *Homer Electric Association, Inc. vs Regulatory Commission of Alaska, et al.*, Case Nos.: S-15944/S-S15973 (consolidated) (the "**Homer Litigation**")
2. Providence Health Systems' appeals of RCA decisions in Docket Nos. U-16-094 and U-17-008, Orders 9, 10, to the Alaska Superior Court for the Third Judicial District (Case Nos. 3AN-18-06427CI and 3AN-18-07459CI) ("**Providence Appeal**").
3. RCA Orders and related proceedings in RCA Docket No.: I-18-004 (*In the Matter of the Inquiry into the Term Sheets Regarding the Potential Sale of the Municipality of Anchorage d/b/a Municipal Light & Power Department by Chugach Electric Association, Inc.).*
4. RCA Orders and related proceedings in RCA Docket No.: U-18-102 (*In the Matter of the Investigation Into the Beluga River Unit Management Practices of the Municipality of Anchorage d/b/a/ Municipal Light and Power Department).*
5. RCA Orders and related proceedings in Docket Nos.: I-15-001 (*In the Matter of the Evaluation of the Operation and Regulation of the Alaska Railbelt Electric Transmission Systems)* and I-16-002 (*In the Matter of the Evaluation of the Reliability and Security Standards and Practices of Alaska Electric Utilities).*
6. See Section 4.20(c) of the Disclosure Schedules.

(b)

1. MEA has indicated that it may pursue legal action if it is dissatisfied with the treatment of the Eklutna transmission assets in connection with the transactions contemplated by the Agreement.

Section 4.16(b)

Governmental Orders

1. Department of Revenue Denials of Natural Gas Production Tax Credit Claims

Tax Year 2015: The Department of Revenue ("**DOR**") denied Seller transferable credit claims in the amount of $2,346,995. This denial is under appeal before the State of Alaska Office of Administrative Hearings in a proceeding designated as OAH No. 17-0379-Tax. Note that there does not appear to be a statutory provision that allows interest to accrue on delayed credits.

Tax Year 2014: The DOR denied Seller transferable credit claims in the amount of $4,418,714. This denial is under appeal before the State of Alaska Office of Administrative Hearings in a proceeding designated as OAH No. 17-0379-Tax. Note that there does not appear to be a statutory provision that allows interest to accrue on delayed credits.

Tax Year 2013: On September 18, 2018, DOR on audit denied credit claims in the principal amount of $5,236,655. DOR had previously issued these credits, which were monetized through the State's purchase of the credits. Payment for the credits were placed in the restricted Deferred Regulatory Liability from Gas Sales account. With interest of $1,797,467, the denial results in a tax liability totaling $7,034,122. That liability accrues interest until paid. Seller intends to pay this amount and accrued interest under protest and request a DOR informal conference decision. A DOR informal conference decision is a prerequisite to a subsequent appeal to the State of Alaska Office of Administrative Hearings. If Seller prevails on appeal, Seller will be entitled to a refund of the amount paid plus accrued interest.

Tax Year 2012: On September 18, 2018, DOR on audit denied credit claims in the principal amount of $1,632,293. DOR had previously issued these credits, which were monetized through the State's purchase of the credits. Payment for the credits were placed in the restricted Deferred Regulatory Liability from Gas Sales account. With interest of $417,931, the denial results in a tax liability totaling $2,050,224. That liability accrues interest until paid. Seller intends to pay this amount and accrued interest under protest and request a DOR informal conference decision. A DOR informal conference decision is a prerequisite to a subsequent appeal to the State of Alaska Office of Administrative Hearings. If Seller prevails on appeal, Seller will be entitled to a refund of the amount paid plus accrued interest.

Tax Year 2011: On December 20, 2018, DOR on audit denied credit claims in the principal amount of $5,515,853. DOR had previously issued these credits, which were monetized through the State's purchase of these credits.

Payment for the credits were placed in the restricted Deferred Regulatory Liability from Gas Sales account. With interest of $2,163,776, the denial resulted in a tax liability totaling $7,679,629. On May 16, 2018, Seller paid that amount plus accrued interest under protest in the amount of 7,905,785 and requested a DOR informal conference decision. A DOR informal conference decision is a prerequisite to a subsequent appeal to the State of Alaska Office of Administrative Hearings. If Seller prevails on appeal, Seller will be entitled to a refund of the amount paid plus accrued interest.

2. RCA Order and related proceedings in RCA Docket No. U-06-89, Order No. 2 (*In the Matter of the Motion by Municipality of Anchorage d/b/a Municipal Light & Power Department for Use of 2005 Beluga River Unit Underlift Settlement Proceeds*)

Section 4.16(c)

Regulation of ML&P

For the purposes of Section 4.16(c)(i), Seller discloses that Seller is subject to the regulatory jurisdiction of the Regulatory Commission of Alaska.

(ii) RCA Order U-18-102

(iii)

1. Providence Health Systems' appeal of RCA decisions in Docket U-17-008, Orders 9 and 10.

2. HEA litigation related to Bradley Lake wheeling: *Homer Electric Association, Inc. vs Regulatory Commission of Alaska, et al.*, case number S15973. See item #1 under Section 4.16(a) of the Disclosure Schedules.

(iv)

1. Utility Service Contract for Elmendorf Air Force Base, Contract No. F65501-68-C-0090, as modified from time to time, between Seller and the United States of America.

2. Solicitation, Offer and Award, issued as of April 16, 2009, as modified from time to time, between Seller and the United States of America, for the supply of electric power for the U.S. Army installation at Fort Richardson.

Section 4.17

Compliance with Laws; Permits

(a)

None.

(b)

1. Department of Environmental Conservation Air Quality Operating Permit, Permit No. AQ0202TVP03, issued on June 3, 2014 and expiring on June 3, 2019.

2. Department of Environmental Conservation Air Quality Operating Permit, Permit No. AQ0203TVP03, issued on October 12, 2015 and expiring on October 12, 2020.

3. Industrial Wastewater Discharge Permit #2 to G.M. Sullivan Plant 2/2A, effective on October 1, 2016 and expiring on September 30, 2021.

Section 4.18

Environmental Matters

(a)

1. Seller has operated in compliance with the Hank Nikkels Plant One Air Quality Operating Permit (Permit No. AQ0202TVP03) with one exception. On July 24, 2018, the plant experienced a deviation from Conditions 14 and 29.1 (b) due to RATA failure. ML&P notified ADEC and completed corrective action on September 10, 2018. ML&P has received no requests for further action from ADEC.

2. Seller has operated in compliance with the G. M. Sullivan Plant Two Air Quality Operating Permit (Permit No. AQ0203TVP03) with one exception. On October 9, 2018, Seller discovered that third quarter cylinder gas audits for Turbine 9 and 10 CEMS were not performed in deviation from the conditions set forth in Conditions 22.1 (c) and 37.4. Seller completed the audits and informed ADEC. Seller has received no requests for further action from ADEC.

3. Seller has operated in compliance with the G.M. Sullivan Plant Two Industrial Wastewater Discharge Permit (Permit No. #2) issued by AWWU with one exception. On August 15, 2018, pH was outside of allowable range for 2 hours. Seller notified AWWU and has received no requests for further action. Seller has operated in continuous compliance with the permit since then.

4. On November 28, 2017, ADEC requested evaluation of the Transformer Shop Building for vapor intrusion. Seller submitted a work plan to ADEC on October 16, 2018 and will conduct testing in 2018.

5. ADEC requested an action plan to address secondary containment upgrades at Plant 2 tank farm. Seller has begun diesel fuel removal. Once the diesel fuel is removed and the tanks and piping are properly cleaned, closed and capped, the State of Alaska spill prevention and response regulations will not be applicable. Seller is working with third parties to sell the diesel fuel remaining in the tanks at the Plant 2. Seller currently anticipates that all remaining diesel fuel will be sold and the tanks and piping will be cleaned, closed, and capped prior to the Closing Date; however due to the limited market for the Non-Ultra-Low Sulfur fuel in the tanks, this cannot be guaranteed. Seller is keeping ADEC informed of the progress in selling the fuel and has not received any additional requests for action.

(b)

1. Hank Nikkels Plant One Air Quality Operating Permit No. AQ0202TVP03. Deviations from permit conditions were described in Schedule 4.18(a).

2. G. M. Sullivan Plant Two Air Quality Operating Permit No. AQ0203TVP03. Deviations from permit conditions were described in Schedule 4.18(a).

3. G.M. Sullivan Plant Two Industrial Wastewater Discharge Permit #2 issued by Anchorage Water & Wastewater Utility. Deviations from permit conditions were described in Schedule 4.18(a).

4. Hank Nikkels Plant One - EPA Hazardous Waste ID # AKR000003301 (VSQG).

5. Operations Building - EPA Hazardous Waste ID # AKD0392269618 (VSQG).

6. G.M. Sullivan Plant Two EPA Hazardous Waste ID # AKD983066218 (VSQG).

7. Risk Based Disposal Plan for Hank Nikkels Plant One approved by ADEC on April 16, 2010 and by EPA on April 11, 2008.

8. EPA Chemical Accident Prevention Provisions Risk Management Plan, George M. Sullivan Plant 2/2A, EPA Facility ID 1000 0023 1466, June 2016.

9. Oil Discharge Prevention and Contingency Plan Approval, George M. Sullivan Plant 2/2A, Plan Number 15-CP-2098, Approved by ADEC on November 20, 2015.

(c)

On December 19, 2013, Seller received a Notice of Intent to File an Administrative Complaint for Violation of the Toxic Substances Control Act ("**TSCA**") and Opportunity to Confer Prior to Filing from the United States Environmental Protection Agency, Region 10. The alleged violation of TSCA arose from a failure to dispose of PCB contaminated waste (bushings and capacitors) within one year. Seller entered into a Consent Agreement and Final Order with US EPA dated January 15, 2014 resolving the alleged violations.

(d)

None.

(e)

The following Seller properties are listed on the Alaska Department of Environmental Conservation (ADEC) Contaminated Sites Database:

Open Contaminated Sites:

1. Hank Nikkels Plant One, 821 East First Avenue, Anchorage

2. Operations and Dispatch Center, 1201 and 1121 East First avenue, Anchorage

3. Transformer Shop, 1130 E. 1st Avenue (Former 1201 E. 3d Avenue)

Cleanup Complete-Institutional Controls Sites:

1. 1120 East First Avenue, Anchorage, Former Container Storage Area

2. 1120 East First Avenue, Anchorage, Former UST site

3. ML&P Plant 2, Spill #1 from Transformer #5, Former Address 8670 Glenn Hwy, Anchorage

4. ML&P Plant 2, Spill #2; 1985 Diesel spill from tanker truck overturn, Former Address 8670 Glenn Hwy, Anchorage

Cleanup Complete Sites:

1. 1121 East First Avenue, Former USTs, Vehicle Maintenance Facility

2. 1040 East First Avenue, Anchorage, AK

3. ML&P Plant 2, Unit 7 UST removal

4. ML&P Plant 2, Unit 8 UST removal

5. ML&P Plant 2, Unit 5 UST removal

6. 1200 East First Avenue, Anchorage, Former UST site

7. Former Paint & Sign Shop, 940 East First Avenue, Anchorage

(f)

The following Seller properties are listed on the Alaska Department of Environmental Conservation (ADEC) Contaminated Sites Database. Seller's disclosure is limited to the portions of the properties and specific site conditions for which these sites are listed on ADEC's Contaminated Sites Database.

Active Contaminated Sites:

1. Hank Nikkels Plant One, 821 East First Avenue, Anchorage

2. Operations and Dispatch Center, 1201 and 1121 East First avenue, Anchorage

3. Transformer Shop, 1130 E. 1st Avenue (Former 1201 E. 3d Avenue)

Cleanup Complete-Institutional Controls Sites:

1. 1120 East First Avenue, Anchorage, Former Container Storage Area

2. 1120 East First Avenue, Anchorage, Former UST site

3. ML&P Plant 2, Spill #1 from Transformer #5, Former Address 8670 Glenn Hwy, Anchorage

4. ML&P Plant 2, Spill #2; 1985 Diesel spill from tanker truck overturn, Former Address 8670 Glenn Hwy, Anchorage

Cleanup Complete Sites:

1. 1121 East First Avenue, Former USTs, Vehicle Maintenance Facility
2. 1040 East First Avenue, Anchorage, AK
3. ML&P Plant 2, Unit 7 UST removal
4. ML&P Plant 2, Unit 8 UST removal
5. ML&P Plant 2, Unit 5 UST removal
6. 1200 East First Avenue, Anchorage, Former UST site
7. Former Paint & Sign Shop, 940 East First Avenue, Anchorage

Exterior paint from Tank 1 at Plant 2 contains PCBs in concentrations greater than 50 ppm. The exterior paint is not sealed and is flaking off.

Additionally, as described in the September 2018 SLR Due Diligence Report, the age of certain of Purchased Assets make it possible that older buildings may include asbestos containing materials and lead paint but Seller has not received any Environmental Notice relating to, and to the Knowledge of Seller there exists no such asbestos containing materials except as identified in documents within data room folders 27.2, 27.25.2, 27.117.2, 27.117.3, 27.119.1, 27.119.7, 27.119.9, 27.205, 27.402, and 27.403.

(g)

(x) There are three emergency spill/ overflow underground storage tanks at Plant 2 that are exempt from 18 AAC 78:

1. Turbine 5 Overflow UST, 500 gal
2. Turbine 7 Overflow UST, 500 gal
3. Turbine 8 Overflow UST, 500 gal

(y) Lists of PCB containing equipment are provided in Schedule 4.18(g) Exhibits 1 and 2.

Additionally, exterior paint from Tank 1 at Plant 2 contains PCBs in concentrations greater than 50 ppm. The exterior paint is not sealed and is flaking off.

(h)

Seller ships waste to the following locations and vendors:

1. Anchorage Regional Landfill

2. Chemical Waste Management of the Northwest, Arlington, Oregon- PCBs > 50 ppm

3. Columbia Ridge Landfill, Arlington, Oregon – PCBs <50 ppm

4. NRC Alaska Processing Facility, Anchorage, Alaska

Seller is a party to a contract with NRC Alaska for Hazardous Materials Spill Response and Cleanup. Under this contract, NRC either treats oil contaminated soils, snow and water at its facilities in Anchorage or transports those materials to approved landfills in the lower-48 state for disposal. As described in the contract between NRC Alaska and Seller, NRC Alaska ships hazardous and toxic waste to facilities owned and operated by SteriCycle, Waste Management, Inc., Clean Harbors, and US Ecology Idaho.

Seller is covered under Contract No. 4400000146, between the Municipality of Anchorage and Environmental Compliance Consultants, Inc. ("**ECC**"). ECC provides pumping, hauling, testing, and disposal of used oil and petroleum sludge for all Municipal Departments and Utilities. All of Seller's used oil and petroleum sludge is disposed of under the contract with ECC.

Seller has received no notices related to these facilities.

(j)

All documents described in Section 4.18(j) of the Asset Purchase Agreement were provided in the data room in Sections L-1 through L-11, L26, E1, G7, G8, and K1 and in Annex A.

(l)

See Schedule 4.18(f).

Section 4.20(b)

Employment Matters - Union

1. Agreement Covering Terms and Conditions of Employment between Seller and International Brotherhood of Electrical Workers Local Union 1547 (the "**Union**"), effective February 28, 2017 - December 31, 2019.

2. Administrative Agreement, fully executed as of July 17, 2017, by and between Seller and the Union, regarding Working Out of Class for Foreman Position.

3. Administrative Agreement executed February 9, 2018, by and between Seller and the Union, regarding No Lay-Off Due to Sale.

4. Administrative Agreement executed April 3, 2018, by and between Seller and the Union, regarding resolution of Grievance 17-03 (Engineer-In-Training).

5. Administrative Agreement executed May 31, 2018, by and between Seller and the Union, regarding resolution of Grievance 17-09 (Call-Out Pay).

6. Administrative Agreement executed June 28, 2018, by and between Seller and the Union, regarding Temporary NECA Employee Pay.

7. National Electrical Contractors Association Outside Construction Agreement (Power), effective October 1, 2017.

8. National Electrical Contractors Association Stand-Alone Outside Telecommunications Construction Agreement, effective October 1, 2017.

Section 4.20(c)

Employment Matters - Actions

1. [redacted] *vs. Municipality of Anchorage* (AERC complaint): Employee alleges race-based discrimination in inclusion in a commendation/recognition of a work group. Seller denies discriminating in making this choice. AERC investigation remains pending (awaiting a finding of discrimination or no-discrimination).

2. [redacted] *vs. Municipality of Anchorage* (AERC complaint): Past temporary employee alleges race-based discrimination in allowing his temporary contract to expire in accordance with its terms. Seller denies discrimination in allowing contract to expire. AERC investigation remains pending (awaiting a finding of discrimination or no-discrimination).

3. [redacted] *vs. Municipality of Anchorage* (AERC complaint): Past employee alleges sex and race-based discrimination leading to constructive discharge claim. Seller denies discrimination and constructive discharge (employee resigned). AERC investigation remains pending (awaiting a finding of discrimination or no-discrimination).

4. [redacted] *vs. Municipality of Anchorage* (ASCHR complaint): Employee alleges age and disability-based discrimination in downgrade of her position. Seller denies discrimination in downgrading position; downgrade occurred based on unit-wide restructuring recommended by outside consultant. ASCHR compliant remains pending.

5. IBEW Grievance 2018-03 (Disciplinary matter): Employee received disciplinary action from direct supervisor for engaging in a verbal altercation in the workplace. IBEW argues that discipline was inappropriate in this instance. Grievance currently for arbitration in February of 2019.

6. IBEW Grievance 2018-04 (Work jurisdiction matter): IBEW and Seller management disagree regarding what position classification should shut off electricity to electrical meters based upon past practice at the utility. IBEW argues that meter readers should have this responsibility, while Seller management believes that customer service representatives should have this responsibility as this task can now be completed remotely via computer. The grievance is awaiting the scheduling of arbitration.

7. Pending IBEW Grievance 18-05 (Dispute regarding job bidding process): IBEW and Seller management disagree regarding the process for determining the successful applicant for a particular position. Step 1 grievance with an extension to allow the parties to reach resolution of the issue.

8. Pending IBEW Grievance 17-08 (Errors in pay resulting from SAP software program implementation): Implementation of SAP software program at the Municipality in September of 2017 resulted in multiple errors in pay. IBEW seeks redress for employees who have been either over or underpaid at any time since paychecks issued October 6, 2017. IBEW and Seller are engaged in active settlement negotiations.

9. Seller is in discussions with IBEW regarding acting pay for superintendent. A grievance has not yet been filed.

10. Pending claim before the Alaska Workers Compensation Board: [redacted] *vs. Municipality of Anchorage*, AWCB No. 201706081.

11. Various safety matters have been addressed and abated, including:

    a. AKOSH No. 316901347 (additional details available in Notice of Correction signed by safety officer December 2, 2015)

    b. AKOSH No. 316901719 (additional details available in Notice of Correction signed by safety officer November 30, 2015)

    c. AKOSH No. 1055976 (additional details available in Notice of Correction signed by safety officer August 27, 2015)

    d. AKOSH No. 1105437 (additional details available in Informal Settlement Agreement & Disposition of Citations dated June 20, 2016)

    e. All matters listed in the OSHA Form 300A forms provided in the data room.

12. Any pending unemployment insurance matters are being handled by the state agency.

13. Workers' compensation loss run report as of November 29, 2018:

Date of Loss	A/P	Loss Description/Damage	Total Paid	Outstanding Reserves	Total Incurred	Total Recoveries
12/07/2017	Y	Right Eye/Cornea - struck by drill bit when other employee hammered it through a pole.	8,098.66	13,886.34	21,985.00	0.00
02/08/2018	N	Right Shoulder - repetitive stress from lifting and loading wood into chipper.	3,264.51	181,797.17	185,061.68	0.00
03/25/2018	Y	Left Leg/Knee - Stepped off gas compressor skid and twisted left leg with sharp pain in leg and knee.	10,507.10	101,125.90	111,633.00	0.00
07/06/2018	N	Right Forearm - unloading 4" rigid 90 from back of pick up with camper.	32,861.14	74,274.86	107,136.00	0.00
07/23/2018	N	Getting into scissor lift/R knee strain	774.29	15,785.71	16,560.00	0.00

10/31/2018	N	Plugged in Heater/pop in Back	4,169.09	17,398.91	21,568.00	0.00

Section 4.20(d)

With respect to annual reports under Section 503 and VEVRAA, while Seller has the underlying data, Seller has not generated reports for internal review. These reports are expected to be generated in February or March of 2019.

Section 4.21

Taxes

(a) On December 20, 2017, the Alaska Department of Revenue ("**DOR**") on audit denied Seller transferable tax credit claims for tax year 2011 in the principal amount of $5,515,853. DOR had previously issued these credits, which were monetized through the State's purchase of these credits. With interest of $2,163,776, the denial resulted in a tax liability totaling $7,679,629. On May 16, 2018, Seller paid that amount plus accrued interest under protest in the amount of 7,905,785 and requested a DOR informal conference decision. A DOR informal conference decision is a prerequisite to a subsequent appeal to the State of Alaska Office of Administrative Hearings. If Seller prevails on appeal, Seller will be entitled to a refund of the amount paid plus accrued interest.

On September 18, 2018, DOR on audit denied Seller transferable tax credit claims for tax year 2012 in the principal amount of $5,236,655. DOR had previously issued these credits, which were monetized through the State's purchase of the credits. With interest of $1,797,467, the denial resulted in a tax liability totaling $7,034,122, which has been paid under protest by Seller. On or prior to November 16, 2018, Seller requested a DOR informal conference decision. A DOR informal conference decision is a prerequisite to a subsequent appeal to the State of Alaska Office of Administrative Hearings. If Seller prevails on appeal, Seller will be entitled to a refund of the amount paid plus accrued interest.

On September 18, 2018, DOR on audit denied Seller transferable tax credit claims for tax year 2013 in the principal amount of $1,632,293. DOR had previously issued these credits, which were monetized through the State's purchase of the credits. With interest of $417,931, the denial resulted in a tax liability totaling $2,050,224, which has been paid under protest by Seller. On or prior to November 16, 2018, Seller requested a DOR informal conference decision. A DOR informal conference decision is a prerequisite to a subsequent appeal to the State of Alaska Office of Administrative Hearings. If Seller prevails on appeal, Seller will be entitled to a refund of the amount paid plus accrued interest.

(e) See Section 4.21(a) of the Disclosure Schedules above.

The DOR denied Seller transferable tax credit claims for tax year 2014 in the amount of $4,418,714. This denial is under appeal before the State of Alaska Office of Administrative Hearings in a proceeding designated as OAH No. 17-0379-Tax.

The DOR denied Seller transferable tax credit claims for tax year 2015 in the amount of $2,346,995. This denial is under appeal before the State of Alaska Office of Administrative Hearings in a proceeding designated as OAH No. 17-0379-Tax.

Section 4.23

BRU Interest

(b) Seller has filed all returns timely but certain tax credit disputes remain unresolved as set forth on Section 4.21 of the Disclosure Schedules.

(d)(i)

1. Gas Sale and Purchase Agreement, between Seller and Hilcorp Alaska, LLC as successor-in-interest to ConocoPhillips Alaska Natural Gas Corporation, ConocoPhillips Alaska, Inc., ConocoPhillips Company by Letter Agreement, dated September 15, 2016.

2. Gas Emergency Agreement Letter, dated August 25, 2009, between ENSTAR Natural Gas Company, Buyer, Seller, and GVEA.

(d)(ii)

None.

(d)(iii)

1. Joint Operating Agreement, entered into as of April 1, 1962, between Standard Oil Company of California, Richfield Oil Corporation, and Shell Oil Company.

(d)(iv)

None.

(d)(v)

1. Gas Emergency Agreement Letter, dated August 25, 2009, between ENSTAR Natural Gas Company, Buyer, Seller, and GVEA.

2. Settlement Agreement, entered into and effective as of December 1, 2016, being all parties to RCA Docket P-16-004, which are Kenai Beluga Pipeline, LLC; AIX Energy LLC; Agrium U.S. Inc.; Tesoro Alaska Company LLC; Buyer; ENSTAR Natural Gas Company; MEA; HEA; Seller, and State of Alaska Office of the Attorney General, Regulatory Affairs & Public Advocacy Section.

3. Interruptible Storage Service Agreement, dated as of March 1, 2017, between Seller and Cook Inlet Natural Gas Storage Alaska, LLC.

4. FSS Service Agreement, entered into as of August 3, 2011, between Cook Inlet Natural Gas Storage Alaska, LLC, and Seller.

(d)(vi)

None.

(h)

Requirement of Alaska Department of Natural Resources to create the Asset Retirement Obligation Fund as a condition to its approval to transfer the state oil and gas leases in the BRU.

SECTION 5.03
No Conflicts; Consents

None.

SECTION 5.05
Legal Proceedings

MEA has indicated that it may pursue legal action if it is dissatisfied with the treatment of the Eklutna transmission assets in connection with the transactions contemplated by the Agreement.

Section 6.01

Conduct of Business Prior to the Closing

1. Seller intends to enter into leases or permits with ARRC, where rental payments may exceed $1 million dollars in the aggregate.

2. Seller intends to enter into a Facilities Co-Location Agreement and a Plant 2/2A Site Agreement with AWWU.

3. Seller plans to continue with the Homer Litigation and may seek to settle such litigation.

4. Seller plans to continue with the Providence Appeal and, depending on the outcome, may seek to appeal or settle.

5. Seller expects to make progress towards and complete retirement of Substations No. 1 and No. 5 in 2019 and expects to retire Substation No. 4 at the completion of the retirement of the 4kV system.

6. Seller is in the process of subdividing the property on which Plant 2/2A is situated. Only that portion of the property necessary for the provision of electric service and managed by Seller will be conveyed in connection with the contemplated transaction. Such subdivision must be completed prior to Closing in a manner reasonably acceptable to Buyer.

7. Seller is working with third parties to sell the diesel fuel remaining in the tanks at Plant 2. Seller currently anticipates that all remaining diesel fuel will be sold by the Closing date and that the tanks and piping will be cleaned, closed, and capped in the second half of 2019.

8. Seller intends to expand and rebuild Substation No. 8 in 2019 to ensure system reliability and anticipates that it will cost between approximately $6 million and $8 million dollars.

9. Seller and the other Eklutna Partners intend to rebuild Eklutna Unit 2 in 2019 and anticipates that its share of the cost will be approximately $1 million to $2 million dollars.

10. As referenced in the five-year capital improvement plan, pursuant to the 2019 BRU Drilling Program, Seller will potentially drill two or more wells. Seller's share of the cost, which has already been set aside, is anticipated to be approximately $6 to $8 million dollars and will be paid in 2019.

11. Seller intends to order a vacuum truck, which will cost in excess of $1 million dollars (Seller does not anticipate that the cost will exceed $1.5 million dollars). Payment will be due on delivery, which may occur in 2019.

12. Seller is in the process of a five-year program for meter replacement. Seller has replaced approximately 30% of the meter base and plans to replace approximately 20% of the

meter base in 2019. As reflected in the capital expenditures budget, the replacement is expected to cost between $1 and $1.8 million dollars.

13. Seller is considering a possible reorganization of the Systems department with respect to certain management positions. The number of employees (23) is expected to remain the same, but the number of managers may be reduced.

14. Seller is considering creating a general foreman position to replace the two non-represented manager positions that are currently unfilled in the Operations Line department.

Section 6.02(d)

Actions Following RCA Approval

6.02(d)(i) – Actions Before RCA Approval

Buyer and Seller acknowledge and agree that the actions contemplated by this section shall not result in Buyer taking control of ML&P prior to Closing, and Buyer and Seller shall remain separate entities operating in the ordinary course of business until the Closing occurs. If any Representative of either party has concerns that any of the integration planning activities referenced in this section could be used to coordinate commercial activities prior to the Closing, such Representative should consult with legal counsel for such party.

General Integration Planning

1. Buyer and Seller shall conduct joint detailed planning in preparation for Chugach's operation of all aspects of ML&P's business the day immediately following the Closing Date ("Day 1"). Such planning activities will include and require:

    a. Necessary Seller and/or ML&P staff to participate on Buyer's integration project committees:

        i. Steering Committee, "Steerco";

        ii. Integration Management Office, "IMO"; and

        iii. Functional Teams, "FT" (which include teams for each of the following functional areas: Information Technology ("IT"), Accounting, Purchasing, Member Services, Human Resources, Regulatory Affairs, Dispatch, Distribution Engineering, Transmission & Distribution Operations, and Generation and Fuel).

    b. Necessary Seller and/or ML&P staff to actively participate in developing and implementing an integration Work Plan with Buyer:

        i. Participation in a full-day kick-off meeting of Buyer, Seller, and ML&P Steerco, IMO and FT's;

        ii. Participation in a 30 to 60-day Work Plan development period of Buyer, Seller, and ML&P Steerco, IMO and FTs following the kick-off meeting; and

        iii. Participation in the implementation of the Work Plan through the Closing Date.

c. Necessary Seller and/or ML&P Steerco members shall attend Steerco meetings, be actively engaged, and be willing to commit up to 5 hours of their time per work week to this effort.

d. Necessary Seller and/or ML&P IMO members shall attend IMO meetings, be actively engaged, and be willing to commit up to 20 hours of their time per work week to this effort.

e. Necessary Seller and/or ML&P FT members shall attend FT meetings, be actively engaged, and be willing to commit up to 30 hours of their time per work week to this effort. Seller and/or ML&P FT members shall be authorized and required to provide necessary integration planning data to Buyer at Buyer's request.

f. Necessary Seller and/or ML&P staff shall participate in integration planning and execution related to any currently existing Seller and ML&P shared services.

g. Necessary Seller and/or ML&P staff shall participate in a series of Buyer sponsored assessment interviews with non-represented personnel.

h. Necessary Seller and/or ML&P staff shall participate in integration planning and execution related to remodeling and restructuring of ML&P's facilities, telephony, and IT infrastructure as determined by Buyer to be necessary for successful Day 1 operations by Buyer.

i. Necessary Seller and/or ML&P staff participation in communication efforts throughout the planning and execution phase, to ensure consistency in messaging to Buyer's and ML&P's employees and customers/members.

2. Seller shall provide Buyer with data structures and metadata characteristics for employee and customer master data at the time of the execution of the Asset Purchase Agreement in order to facilitate kickoff and joint planning preparation. This includes:

   a. Data fields by name

   b. Minimum and maximum characters for each field;

   c. Disallowed characters for each field (i.e., special characters such as @, -, $, etc.); and

   d. Brief descriptions of the use(s) of each field, including any interfaces, forms, or extensions that use the field

Other Integration Planning

3. Buyer shall conduct Information Services ("IS")/ Telecom Network Assessment for a period of sixty (60) days within one (1) month after the execution of the Asset Purchase Agreement to verify asset information that has been provided to Buyer and gather additional information that may be required.

    a. Seller shall provide Buyer access to Post Road facility for a third party to perform an IS/Telecom Assessment to facilitate design of networking and IS infrastructure, which is required to support operations on the Closing Date.

    b. Buyer shall compensate Seller on a reimbursable basis, for reasonable costs incurred by ML&P employees to support this effort.

    c. To minimize potential impacts to ML&P operations, the Assessment shall be non-intrusive and target "spare" cable capacity not be in service. Should there be exceptions where this is not feasible, the consultant will advise and coordinate with ML&P staff.

    d. IS/Telecom Network Assessment will include but is not limited to:

        i. Facility/Equipment level information;

        ii. Network cable plant inventory and routing;

        iii. Fiber optic cable plant inventory and routing;

        iv. Hardware inventories for IT server and business networking equipment;

        v. Development of Network Diagrams;

        vi. Standby Power Systems supporting SCADA and IT Operations;

        vii. Facility Electrical Power Distribution Drawings;

        viii. Hardware inventories for SCADA;

        ix. SCADA Network and Communication Diagrams;

        x. PBX/IVR Configuration Drawings;

        xi. PBX/Dial Plan;

        xii. PBX/IVR Call Flows;

        xiii. Login credentials and other assistance for logical network mapping; and

        xiv. Time with ML&P Staff to substantiate findings.

4. Parties shall enable IS/Telecom Infrastructure Integration to occur on June 1, 2019, for a period of one hundred and twenty (120) days.

    a. Seller shall provide Buyer access to Post Road facility for placement and testing of network equipment in preparation for operations on the Closing Date.

    b. Parties shall work cooperatively to achieve:

        i. Equipment installation and power up;

        ii. Equipment interconnection to spare communication cabling; and

        iii. Interconnection of parties' Campus via ML&P Fiber Optic Cabling.

5. Seller shall allow parties to enter into any necessary lease agreement to store equipment on ML&P property in advance of RCA Approval at no cost to Buyer.

6.02(d)(ii) – Actions After RCA Approval

1. The actions set forth under Schedule 6.02(d)(i) "General Integration Planning" shall continue.

2. Seller shall allow parties to enter into any necessary lease agreement to store equipment on ML&P property in advance of Closing at no cost to Buyer.

3. Seller shall provide on ML&P and Seller letterhead, a memorandum announcing the acquisition and granting permission for CEA to discuss account details with ML&P vendors.

4. Seller shall migrate ML&P email accounts to ML&P standalone exchange servers (decoupled from Seller).

5. Seller shall supply a listing of all email notifications and prepare redirection of emails to a designated CEA account.

6. Seller shall notify all customers and vendors of the acquisition 45 days ahead of Closing.

7. Seller shall add an auto-reply or email header notifying customers and vendors of the acquisition 45 days prior to the Closing.

8. Seller shall supply email and contact archives (external contact list and personal external contacts).

9. Seller shall handoff an independent ML&P domain upon Closing; not part of Seller's forest (decoupled from Seller).

10. Seller shall supply all network and domain passwords.

11. Seller shall supply all encryption certificates.

12. Seller shall supply Active Directory restore credentials.

13. Seller shall ensure that the Active Directory is in a state of being integrated with reasonable effort.

14. Seller shall ensure that the Active Directory passes industry standard "domain health checks."

15. Seller shall transfer relevant DHCP services to reside in ML&P domains.

16. Seller shall transfer relevant DNS services to reside in ML&P domains.

17. Parties shall enable IS/Telecom Infrastructure Integration to occur on June 1, 2019, for a period of one hundred and twenty (120) days.

    a. Seller shall provide Buyer access to Post Road facility for placement and testing of network equipment in preparation for operations on the Closing Date.

    b. Parties shall work cooperatively to achieve:

        i. Equipment installation and power up;

        ii. Equipment interconnection to spare communication cabling; and

        iii. Interconnection of parties' Campus via ML&P Fiber Optic Cabling.

To the extent not covered by the requirements of Schedule 6.02(d)(i) or (ii) above, timelines for the timing and method of data provision from Seller to Buyer on or prior to the Closing Date will be agreed during joint planning. Buyer may request that Seller and/or ML&P cooperate in efforts to obtain releases from vendors or customers if necessary so that certain data may be shared with Buyer in advance of the Closing Date.

Section 6.20

Leased Property

1. Department of the Air Force Easement for Electric Power Line and Substation Located on Elmendorf Air Force Base (AFB), Alaska, Easement No. DACA85-2-03-98, effective as of January 12, 2005, between Seller and Secretary of the Air Force of the United States of America.
2. Department of the Air Force Easement for Electric Power and Telephone Lines Located on Elmendorf Air Force Base (AFB), Alaska, Easement No. DACA85-2-03-142, effective as of March 4, 2004, between Seller and Secretary of the Air Force of the United States of America.
3. Department of the Air Force Easement for Electrical Substations to Municipality of Anchorage, Municipal Light & Power for Property Located on Elmendorf Air Force Base, Alaska, Easement No. DACA85-2-05-91, effective as of April 10, 2009, between Seller and Secretary of the Air Force of the United States of America.
4. Department of the Army Easement for Right of Way for Electric Power Transmission or Communication Facilities on Fort Richardson Military Reservation, Alaska, No. DACA85-2-84-18, effective as of March 22, 1984 between Seller and Alaska District Corps of Engineers Real Estate Division.
5. Department of the Air Force Easement for Electric Power Located on Elmendorf Air Force Base (AFB), Anchorage, Alaska, No. DACA85-2-98-39, effective as of July 7, 1998 between Seller and Department of the Air Force.
6. Department of the Air Force Easement for Electric Power Line and Pad-Mounted 300kV Transformer Located on Elmendorf Air Force Base (AFB), Alaska, Easement No. DACA85-2-03-139, effective as of March 4, 2004 between Seller and Secretary of the Air Force of the United States of America.
7. Department of the Air Force Easement for Electrical Power Line AA-92713 to Municipality of Anchorage, Municipal Light & Power for Property Located on Elmendorf Air Force Base, Alaska (Easement No. DACA85-8-11-0100).
8. Consent to assignment of agreements entered into as a result of the ARRC Modifications.
9. Ground Lease (Contract No. 20133) between Alaska Railroad Corporation and Municipality of Anchorage, effective as of January 29, 2016, for the premises located on the parcel of real property known as Tax #002-031-15.
10. Lease Agreement between Alaska Pacific University (f/k/a Alaska Methodist University) and City of Anchorage, Alaska, effective as of July 24, 1972, for the premises located on the parcel of real property known as Tax #005-101-04 (Substation #15).

March 8, 2019

Municipality of Anchorage
Attn: William D. Falsey, Municipal Manager
632 W. 6th Avenue, Suite 850
Anchorage, AK 99501

Dear Bill:

Reference is made to the Asset Purchase and Sale Agreement (the "***Asset Purchase Agreement***") dated as of December 28, 2018 by and between the Municipality of Anchorage, Alaska ("***Seller***") and Chugach Electric Association, Inc. ("***Buyer***"). Capitalized terms used but not defined herein have the meanings set forth in the Asset Purchase Agreement.

Seller and Buyer hereby agree that the last sentence of Section 6.06(f) is deleted in its entirety and is replaced with the following sentence: "Buyer and Seller shall jointly submit a petition for RCA Approval on or before April 1, 2019."

Except as expressly provided herein, this letter agreement will not alter, modify, amend or in any way affect the terms, conditions, obligations, covenants or agreements contained in the Asset Purchase Agreement. Except as set forth herein, the Asset Purchase Agreement remains unmodified and in full force and effect.

This letter agreement may be amended, modified, or supplemented only by an agreement in writing signed by each party hereto. This letter agreement shall be governed by and construed in accordance with the internal laws of the State of Alaska, without reference to conflicts of laws principles that would result in the application of the laws of any other jurisdiction. This letter agreement may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this letter agreement delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this letter agreement.

Sincerely,

CHUGACH ELECTRIC ASSOCIATION, INC.

AMENDMENT NO. 1 TO ASSET PURCHASE AND SALE AGREEMENT

THIS AMENDMENT NO. 1 TO ASSET PURCHASE AND SALE AGREEMENT, dated as of the 27th day of September, 2019 (this "**Amendment**"), between the Municipality of Anchorage, Alaska, a political subdivision organized under the laws of the State of Alaska ("**Seller**"), and Chugach Electric Association, Inc., a not-for-profit electric cooperative corporation organized under the laws of the State of Alaska ("**Buyer**").

RECITALS

WHEREAS, Buyer and Seller entered into that certain Asset Purchase and Sale Agreement, dated as of December 28, 2018 (the "**Original Agreement**"); capitalized terms used in this Amendment, if not otherwise defined herein, shall have the meanings set forth in the Original Agreement, as amended or modified pursuant to this Amendment (as so amended or otherwise modified, the "**Asset Purchase Agreement**");

WHEREAS, pursuant to Section 10.10 of the Original Agreement, Buyer and Seller may amend, modify or supplement the Original Agreement upon the execution and delivery of a written agreement executed by the Parties; and

WHEREAS, the Parties desire to make certain amendments to the Original Agreement as provided in this Amendment.

NOW, THEREFORE, pursuant to Section 10.10 of the Original Agreement and in consideration for the premises and agreements hereinafter set forth, the Parties, intending to be legally bound, agree as follows:

1. New Definitions. The following definitions are added to Article I of the Original Agreement:

"**Eklutna Water Agreement**" has the meaning set forth in Section 6.23.

"**Estimated Net Book Value**" means the Net Book Value as estimated in good faith by Seller no later than ten (10) Business Days prior to the Closing Date.

"**Estimated Net Book Value Adjustment**" means the amount (whether a positive or negative number) obtained by subtracting the amount of $715,400,000 from the Estimated Net Book Value.

"**Net Book Value**" means the net book value, as of the Closing Date, of the following items appearing in the electric and gas balance sheets of ML&P, not including any asset accounts included in Transferred Cash or any Excluded Assets, but including retirement work in progress: (i) non-contributed plant in service; (ii) inventory, materials, and supplies; (iii) unamortized deferred charges and regulatory assets; and (iv) construction work in progress.

"**Net Book Value Adjustment**" means the amount (whether a positive or negative number) obtained by subtracting the amount of $715,400,000 from the Net Book Value.

2. Revised Definitions. The following definitions in Article I of the Original Agreement are amended and restated in their entirety as follows:

"**PILT Agreement**" means the Payment in Lieu of Taxes Agreement between Seller and Buyer as amended on or before the Closing Date.

3. Amendment to Sections 2.05 through 2.08. Sections 2.05, 2.06, 2.07 and 2.08 of the Original Agreement are hereby deleted in their entirety and replaced with the following:

"Section 2.05. Purchase Price. The aggregate purchase price for the Purchased Assets to be paid on the Closing Date will be the assumption of the Assumed Liabilities plus an amount (as adjusted in accordance with this Agreement, the "**Purchase Price**") equal to the following:

(a) the Upfront Payment,

(b) minus the Accrued Leave Liability;

(c) minus the Net Book Value of Designated Excluded Assets;

(d) plus the Net Book Value Adjustment (if the Net Book Value Adjustment is a positive number) or minus the absolute value of the Net Book Value Adjustment (if the Net Book Value Adjustment is a negative number).

Section 2.06. Estimated Purchase Price Statement. At least ten (10) Business Days before the Closing, Seller shall prepare and deliver to Buyer a statement, prepared in accordance with the Accounting Principles (the "**Estimated Purchase Price Statement**"), setting forth Seller's good faith estimates of the Estimated Accrued Leave Liability, the Estimated Net Book Value of Designated Excluded Assets, the Estimated Net Book Value Adjustment and the calculation of the Estimated Purchase Price, as determined in accordance with Section 2.05 (the "**Estimated Purchase Price**"). Such statement shall also include an estimate of the Transferred Cash (the **"Estimated Transferred Cash**").

Section 2.07. Payment of Estimated Purchase Price. At the Closing, Buyer will deliver, or cause to be delivered, to the intended final recipients (the names, wiring information and other relevant payment information of which recipients as may be reasonably requested by Buyer shall have been furnished by Seller in writing no later than three (3) Business Days prior to the Closing (such recipients, the "**Recipients**")), an amount equal to the Estimated Purchase Price for payment, on behalf of the Business, to the appropriate Recipient. Seller shall cause the Recipients to include amounts and Persons necessary to irrevocably defease or repay all Closing Debt in accordance with Section 3.02(c). With the exception of any portion of the Transferred Cash that Seller delivers to Buyer on the Closing Date, the Purchase Price shall be paid net of Estimated Transferred Cash in lieu of any obligation of Seller to deliver Transferred Cash on the Closing Date.

Section 2.08. Purchase Price Adjustment. Following the Closing, the Purchase Price will be adjusted as set forth below:

(a) **Closing Statement Preparation**. Within sixty (60) days after the Closing Date, Buyer shall prepare and deliver to Seller a statement (the "**Closing Statement**") setting forth a calculation of (i) the Accrued Leave Liability, (ii) the Transferred Cash, (iii) the Net Book Value of Designated Excluded Assets, (iv) the Net Book Value Adjustment and (v) the Closing Prorations, and (v) a recalculation of the Purchase Price, if any, based on each of the foregoing. The Closing Statement will be calculated (x) pursuant to the definitions within this Agreement, (y) in accordance with the Accounting Principles where applicable, and (z) without giving effect to the transactions contemplated hereby. Seller shall cooperate with Buyer in promptly responding to Buyer's reasonable requests while Buyer is preparing the Closing Statement.

(b) **Examination and Review**.

(i) Examination. After receipt of the Closing Statement, Seller shall have forty-five (45) days (the "**Review Period**") to review the Closing Statement. During the Review Period, Seller and its attorneys and accountants shall have access to the books and records of the Business, the personnel of, and work papers prepared by, Buyer or Buyer's Accountants to the extent that they relate to the Closing Statement and to such historical financial information (to the extent in Buyer's possession) relating to the Closing Statement as Seller may reasonably request for the purpose of reviewing the Closing Statement and to prepare a Statement of Objections (as defined below), *provided*, that such access shall be in a manner that does not interfere with the normal business operations of Buyer or the Business.

(ii) Objection. On or prior to the last day of the Review Period, Seller may object to the Closing Statement by delivering to Buyer a written statement setting forth Seller's objections in reasonable detail, indicating each disputed item, its amount and the basis for Seller's disagreement therewith (the "**Statement of Objections**"). If Seller fails to deliver the Statement of Objections before the expiration of the Review Period, the Closing Statement and the calculations contained therein shall be deemed to have been accepted by and to be final and binding on Seller and Buyer. If Seller delivers the Statement of Objections before the expiration of the Review Period, Buyer and Seller shall negotiate in good faith to resolve such objections within thirty (30) days after the delivery of the Statement of Objections (the "**Resolution Period**"), and, if the same are so resolved within the Resolution Period, the Closing Statement and the calculations contained therein, in each case with

such changes as may have been previously agreed in writing by Buyer and Seller, shall be final and binding on Seller and Buyer and shall not be subject to further review.

(iii) Resolution of Disputes. If Seller and Buyer fail to reach an agreement with respect to any or all of the matters set forth in the Statement of Objections before expiration of the Resolution Period, then any amounts remaining in dispute ("**Disputed Amounts**") shall be submitted for resolution to an impartial regionally recognized financial consulting firm or a firm of independent certified public accountants other than Seller's Accountants, the Business's accountants or Buyer's Accountants mutually agreeable to Buyer and Seller (the "**Independent Accountant**") who, acting as an expert and not an arbitrator, and without considering extrinsic evidence, shall resolve the Disputed Amounts only to the extent they relate to accounting matters and make any adjustments to the Closing Statement. The Independent Accountant shall be jointly instructed by the parties to make a determination as soon as practicable within thirty (30) days (or such other time as the parties hereto shall agree in writing) after engagement of the Independent Accountant, and its resolution of the Disputed Amounts and, other than with respect to conclusions of Law and interpretation of this Agreement and consideration of extrinsic evidence, its adjustments to the Closing Statement shall be conclusive (other than with respect to conclusions of Law and interpretation of this Agreement and consideration of extrinsic evidence) absent manifest error. The Independent Accountant shall decide only the specific items under dispute by the parties and the Independent Accountant's decision for each Disputed Amount must be within the range of values assigned to each such item in the Closing Statement and the Statement of Objections, respectively. The fees and expenses of the Independent Accountant shall initially be split 50/50 between Buyer and Seller, and after the final resolution of any dispute, shall be borne by Buyer, on the one hand, and Seller, on the other hand, based on the percentage which the portion of the contested amount not awarded to each party bears to the amount actually contested by such party (and the appropriate party shall reimburse the other party accordingly). For example, if Accrued Leave Liability is the only disputed item, and Seller claims that Accrued Leave Liability is $1,000, and Buyer contests only $500 of the amount claimed by Seller, and if the Independent Accountants ultimately resolve the dispute by awarding Seller $300 of the $500 contested, then the costs and expenses of Independent Accountants will be allocated 60% (i.e., 300 ÷ 500) to Buyer and 40% (i.e., 200 ÷ 500) to Seller. Any dispute that cannot be resolved

by the Independent Accountant pursuant to the provisions hereof shall be resolved by courts of law set forth in Section 10.11.

(c) **Adjustment Payments**. The Closing Prorations and the Purchase Price shall be recalculated using such finally determined amounts in lieu of the estimates of such amounts used in the calculation of the Purchase Price payable at Closing.

(i) With respect to Accrued Leave Liability, Net Book Value of Designated Excluded Assets, and Closing Prorations, the Purchase Price shall be increased (in the case of an aggregate positive amount) or decreased (in the case of an aggregate negative amount) on a dollar-for-dollar basis by the aggregate amount, if any, determined by (A) subtracting the Estimated Accrued Leave Liability from the Accrued Leave Liability, (B) subtracting the Estimated Net Book Value of Designated Excluded Assets from the Net Book Value of Designated Excluded Assets, and (C) adding the Closing Prorations if the aggregate amount of the prorations is for the benefit of Seller and subtracting the amount of Closing Prorations if the aggregate amount of the prorations is for the benefit of Buyer, and adding together the amounts calculated in each of the foregoing (A), (B), and (C) to reach a final net amount (such net amount, the "**Adjustment Amount**"). With respect to the Net Book Value Adjustment, the Purchase Price shall be increased on a dollar-for-dollar basis by the difference between the Estimated Net Book Value Adjustment and the Net Book Value Adjustment if the Net Book Value is higher than the Estimated Net Book Value, and shall be decreased on a dollar-for-dollar basis by the difference between the Estimated Net Book Value Adjustment and the Net Book Value Adjustment if the Net Book Value is lower than the Estimated Net Book Value.

(ii) No later than within two (2) Business Days after the determination of the Adjustment Amount and the Net Book Value Adjustment, (A) if the net effect of the Adjustment Amount and the Net Book Value Adjustment, collectively, results in an increase to the Purchase Price, Buyer shall pay to Seller an amount equal to the amount of such increase (without interest) and (B) if the net effect of the Adjustment Amount and the Net Book Value Adjustment, collectively, results in a decrease to the Purchase Price, Seller shall disburse to Buyer an amount equal to the amount of such decrease (without interest). In addition, if Estimated Transferred Cash minus Transferred Cash is a negative number, Seller shall pay Buyer the difference on such date, and if a positive number, Buyer shall pay Seller such difference on such date."

4. Amendment of Section 6.23. Section 6.23 of the Original Agreement is hereby deleted in its entirety and replaced by the following:

> **"Section 6.23. Eklutna Public Water Supply.** Seller shall not amend, extend, supplement or otherwise modify the Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska executed on February 17, 1984 between the Alaska Power Administration and Seller, as such agreement has been amended and supplemented to date. Seller and Buyer hereby acknowledge and agree that Seller has prior rights to not less than 41 million gallons of water per day from Eklutna Lake for public water supply pursuant to the Act of October 30, 1984, 98 Stat. 2823; Alaska Statutes 46.15.150(a); and Certificate of Appropriation ADL 44944. Seller and Buyer agree that during the term of the Eklutna Power Purchase Agreement, the supply of water available for production of Power (as defined in the Eklutna Power Purchase Agreement) by the Chugach Portion (as defined in the Eklutna Power Purchase Agreement) shall be net of all water taken by AWWU for public water supply purposes under any applicable water rights granted by the State of Alaska. Seller and Buyer further agree that, during the term of the Eklutna Power Purchase Agreement, Buyer shall be entitled to receive any consideration that Seller is entitled to receive from AWWU for the energy generation lost with respect to the Chugach Portion as a result of AWWU taking such water for such purposes, and that such consideration may, at the election of AWWU, take the form of monetary payments or delivery of replacement energy at the Eklutna PPA delivery point or the Plant 2A switchyard, for the full amount of such lost electric power generation. If replacement energy is provided through generation within the certificated service area of Buyer, such interconnection shall be made in accordance with Buyer's interconnection guidelines for non-utility generators. If such consideration takes the form of monetary payments, such payments shall be made at Seller's applicable tariffed rates, as adopted by Buyer as part of obtaining RCA Approval. Such tariff rates shall include (a) the base rate set forth in Seller's Rate Schedule 25, Replacement Energy Service - AWWU (without inclusion of any cost of power adjustment), and (b) the ML&P legacy service area cost of power adjustment (currently set forth in Seller's Rate Schedule 01, Fuel and Purchased Power Cost Adjustment). Together, those rates reflect and shall reflect the rate methodology described in RCA Order No. U-90-090(7) and Seller's most recent RCA-approved cost of service study in Docket U-17-008, as it may be revised from time to time upon approval by the RCA. Buyer agrees not to propose a change in that methodology until after December 31, 2025. If any such payments are made by AWWU to Seller, Seller will promptly after receipt of each such payment deliver to Buyer such portion of such payment that is attributable to the Chugach Portion. If any such payments are made by AWWU to Buyer, Buyer will promptly after receipt of each such payment deliver to Seller any portion of such payment that is attributable to the MEA Proportionate Interest (as defined in the Eklutna Power Purchase Agreement). AWWU may supply replacement energy from any part of the Eklutna Water Project (including the Energy Recovery Station near Plant 2A).

5. Effective Date of this Amendment. Except as expressly provided herein and the letter agreements dated March 8, 2019 and March 15, 2019 (the "**Letter Agreements**"), the Original Agreement is not amended, supplemented, modified, revised or otherwise affected by this

Amendment. This Amendment shall be deemed effective and in full force and effect as of the date first written above. On and after the date hereof, each reference in the Original Agreement to "this Agreement", "hereunder", "hereof", "herein" or words of like import referring to the Original Agreement, shall mean and be a reference to the Asset Purchase Agreement and each reference to the Asset Purchase Agreement in any other agreements, documents or instruments executed and delivered pursuant to or in connection with the Asset Purchase Agreement shall be deemed to mean and be a reference to the Asset Purchase Agreement as amended by this Amendment and the Letter Agreements.

6. Binding Effect. This Amendment shall be binding upon and shall inure to the benefit of the Parties hereto and their respective successors and permitted assigns.

7. Governing Law. This Amendment shall be governed by and construed in accordance with the internal laws of the State of Alaska, without reference to conflicts of laws principles that would result in the application of the laws of any other jurisdiction.

8. Counterparts. This Amendment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Amendment delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Agreement.

Exhibit 1

AMENDMENT NO. 2 TO
ASSET PURCHASE AND SALE AGREEMENT

AMENDMENT NO. 2 TO ASSET PURCHASE AND SALE AGREEMENT

THIS AMENDMENT NO. 2 TO ASSET PURCHASE AND SALE AGREEMENT, dated as of the 28th day of October, 2019 (this "**Amendment**"), between the Municipality of Anchorage, Alaska, a political subdivision organized under the laws of the State of Alaska ("**Seller**"), and Chugach Electric Association, Inc., a not-for-profit electric cooperative corporation organized under the laws of the State of Alaska ("**Buyer**").

RECITALS

WHEREAS, Buyer and Seller entered into that certain Asset Purchase and Sale Agreement, dated as of December 28, 2018 (the "**Original Agreement**"); capitalized terms used in this Amendment, if not otherwise defined herein, shall have the meanings set forth in the Original Agreement, as amended or modified pursuant to this Amendment or any Previous Amendment (as so amended or otherwise modified, the "**Asset Purchase Agreement**");

WHEREAS, pursuant to Section 10.10 of the Original Agreement, Buyer and Seller may amend, modify or supplement the Original Agreement upon the execution and delivery of a written agreement executed by the Parties; and

WHEREAS, the Parties desire to make certain amendments to the Original Agreement as provided in this Amendment.

NOW, THEREFORE, pursuant to Section 10.10 of the Original Agreement and in consideration for the premises and agreements hereinafter set forth, the Parties, intending to be legally bound, agree as follows:

1. Amendment to Section 6.30. Section 6.30 of the Original Agreement is hereby deleted in its entirety and is replaced with the following:

> **Section 6.30 Eklutna Transmission Assets are Purchased Assets.** Seller and Buyer agree that MEA has consented, in accordance with the provisions of Section 1 of the Agreement for Extension of 1996 Eklutna Hydroelectric Project Transition Plan dated October 2, 1997 by and among Seller, Buyer, and MEA, to the sale by Seller to Buyer under this Agreement of all undivided interests, rights, and title of Seller in and to the Eklutna Transmission Assets. Accordingly, the Eklutna Transmission Assets are Purchased Assets for purposes of this Agreement. Accordingly, (i) each reference in this Agreement to the Eklutna Generation Assets will be deemed to exclude the Eklutna Transmission Assets, and (ii) the "Facility" under the Eklutna Power Purchase Agreement will be deemed to exclude the Eklutna Transmission Assets and the "Seller's Interest" under the Eklutna Power Purchase Agreement will be deemed to exclude all undivided interests, rights, title, and obligations of Seller in and to the Eklutna Transmission Assets, including for purposes of the Purchase Option under Section 14.3 of the Eklutna Power Purchase Agreement.

2. Amendment to Section 9.01(b)(ii). Section 9.01(b)(ii) of the Original Agreement is hereby deleted in its entirety and is replaced with the following:

> (ii) any of the conditions set forth in Section 7.01 or Section 7.02 shall not have been, or if it becomes apparent that any of such conditions will not be, fulfilled by September 30, 2020, unless such failure shall be due to the failure of Buyer to perform or comply with any of the covenants, agreements, or conditions hereof to be performed or complied with by it prior to the Closing; or

3. Amendment to Section 9.01(c)(ii). Section 9.01(c)(ii) of the Original Agreement is hereby deleted in its entirety and is replaced with the following:

> (ii) any of the conditions set forth in Section 7.01 or Section 7.03 shall not have been, or if it becomes apparent that any of such conditions will not be, fulfilled by September 30, 2020, unless such failure shall be due to the failure of Seller to perform or comply with any of the covenants, agreements, or conditions hereof to be performed or complied with by it prior to the Closing; or

4. Effective Date of this Amendment. Except as expressly provided herein and the letter agreements dated March 8, 2019 and March 15, 2019 and Amendment No. 1 to the Asset Purchase Agreement dated as of September 27, 2019 (the "**Previous Amendments**"), the Original Agreement and the Previous Amendments are not amended, supplemented, modified, revised or otherwise affected by this Amendment. This Amendment shall be deemed effective and in full force and effect as of the date first written above. On and after the date hereof, each reference in the Asset Purchase Agreement to "this Agreement", "hereunder", "hereof", "herein" or words of like import referring to the Original Agreement or the Previous Amendments, shall mean and be a reference to the Asset Purchase Agreement and each reference to the Asset Purchase Agreement in any other agreements, documents or instruments executed and delivered pursuant to or in connection with the Asset Purchase Agreement shall be deemed to mean and be a reference to the Asset Purchase Agreement as amended by this Amendment and the Previous Amendments.

5. Binding Effect. This Amendment shall be binding upon and shall inure to the benefit of the Parties hereto and their respective successors and permitted assigns.

6. Governing Law. This Amendment shall be governed by and construed in accordance with the internal laws of the State of Alaska, without reference to conflicts of laws principles that would result in the application of the laws of any other jurisdiction.

7. Counterparts. This Amendment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Amendment delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Agreement.

EXHIBIT 1

Form of Amendment No. 3 to the Asset Purchase and Sale Agreement

AMENDMENT NO. 3 TO ASSET PURCHASE AND SALE AGREEMENT

THIS AMENDMENT NO. 3 TO ASSET PURCHASE AND SALE AGREEMENT, dated as of the [●] day of [●], 2019 (this "**Amendment**"), between the Municipality of Anchorage, Alaska, a political subdivision organized under the laws of the State of Alaska ("**Seller**"), and Chugach Electric Association, Inc., a not-for-profit electric cooperative corporation organized under the laws of the State of Alaska ("**Buyer**").

RECITALS

WHEREAS, Buyer and Seller entered into that certain Asset Purchase and Sale Agreement, dated as of December 28, 2018 (the "**Original Agreement**"); capitalized terms used in this Amendment, if not otherwise defined herein, shall have the meanings set forth in the Original Agreement, as amended or modified pursuant to this Amendment or any Previous Amendment (as so amended or otherwise modified, the "**Asset Purchase Agreement**");

WHEREAS, pursuant to Section 10.10 of the Asset Purchase Agreement, Buyer and Seller may amend, modify or supplement the Original Agreement upon the execution and delivery of a written agreement executed by the Parties; and

WHEREAS, the Parties desire to make certain amendments to the Asset Purchase Agreement as provided in this Amendment.

NOW, THEREFORE, pursuant to Section 10.10 of the Asset Purchase Agreement and Section III.B.3 of the Stipulation (as defined in Article I of the Asset Purchase Agreement as amended pursuant to this Amendment), and in consideration for the premises and agreements in the Stipulation and as hereinafter set forth, the Parties, intending to be legally bound, agree as follows:

1. New Definitions. The following definitions are hereby added to Article I of the Asset Purchase Agreement:

> "**Rate Reduction Account**" means an account created and funded by Seller with a cash balance of $36,000,000 on the Closing Date.
>
> "**Stipulation**" means the Stipulation Resolving All Issues entered into by and among Seller, Buyer, Providence Health & Services, the Federal Executive Agencies, Matanuska Electric Association, Inc., Homer Electric Association, Inc., Alaska Energy Authority, and ENSTAR Natural Gas Company, a Division of SEMCO Energy, Inc. dated October [●], 2019, and accepted and approved by the RCA on [●].

2. Revised Definitions. The following definitions in Article I of the Asset Purchase Agreement are hereby amended and restated in their entirety as follows:

> "**BRU Fuel Agreement**" means the amended and restated BRU Fuel Agreement dated as of the date hereof between Seller and Buyer as the same may be amended on or before the Closing Date.

"**Transferred Cash**" means (A) cash in the Rate Reduction Account and (B) customer deposit cash or cash accounts, cash, cash equivalents, and securities (in each case to the extent constituting restricted assets and, in the case of cash contractually restricted in connection with Debt, to the extent not used by Seller to defease or repay the Closing Debt), including any such assets collected for payments in lieu of taxes, including pursuant to AMC 26.10.025 or held under or pursuant to ML&P's debt documents or representing the proceeds of bonds, deferred regulatory liability for gas sales funds, future gas purchases regulatory liabilities, underlift accounts and asset retirement obligation funds managed by ML&P or Seller, any decommissioning funds, utility underground requirements including those set forth in AS 42.05.381(h), (i), and (j) and AMC 21.07.050 and AMC Title 21 undergrounding funds, and any other cash collected from ratepayers for obligations assumed by Buyer including customer deposits. Exhibit J sets forth the Transferred Cash (other than the Rate Reduction Account) and separately identifies any cash contractually restricted in connection with Debt which will be used by Seller to defease or repay the Closing Debt, in each case as if the Closing had occurred as of December 31, 2017.

"**Upfront Payment**" means $757,800,000.

3. Amendment to Section 2.05(d). Section 2.05(d) of the Asset Purchase Agreement is hereby deleted in its entirety and replaced with the following:

(d) minus the absolute value of the Net Book Value Adjustment if the Net Book Value Adjustment is a negative number; *provided* that, if the Net Book Value Adjustment is a positive number, the Purchase Price shall not be adjusted to reflect the Net Book Value Adjustment or any portion thereof.

4. Addition of Section 6.32. The following is hereby added to the Asset Purchase Agreement as a new Section 6.32:

Section 6.32. **Use of Funds in Rate Reduction Account**. Buyer shall prudently manage funds in the Rate Reduction Account for the benefit of customers in the ML&P legacy service area to ensure the principal balance and any interest realized on the deposits are properly invested, accounted for, and ultimately credited back to customers in the ML&P legacy service area. The funds in the Rate Reduction Account shall be used by Buyer for the exclusive purpose of providing rate reductions to customers in the ML&P legacy service area in accordance with Section III.B.2.c of the Stipulation.

5. Effective Date of this Amendment. The effectiveness of this Amendment is expressly conditioned on the acceptance and approval of the Stipulation by the RCA. Except as expressly provided herein and the letter agreements dated March 8, 2019 and March 15, 2019, Amendment No. 1 to the Asset Purchase Agreement dated as of September 27, 2019, and Amendment No. 2 to the Asset Purchase Agreement dated as of [●], 2019 (the "**Previous Amendments**"), the Original Agreement and the Previous Amendments are not amended, supplemented, modified, revised or otherwise affected by this Amendment. This Amendment shall be deemed effective and in full force and effect as of the date first written above. On and after the date hereof, each reference in the Asset Purchase Agreement to "this Agreement",

"hereunder", "hereof", "herein" or words of like import referring to the Original Agreement or the Previous Amendments, shall mean and be a reference to the Asset Purchase Agreement and each reference to the Asset Purchase Agreement in any other agreements, documents or instruments executed and delivered pursuant to or in connection with the Asset Purchase Agreement shall be deemed to mean and be a reference to the Asset Purchase Agreement as amended by this Amendment and the Previous Amendments.

6. Binding Effect. This Amendment shall be binding upon and shall inure to the benefit of the Parties hereto and their respective successors and permitted assigns.

7. Governing Law. This Amendment shall be governed by and construed in accordance with the internal laws of the State of Alaska, without reference to conflicts of laws principles that would result in the application of the laws of any other jurisdiction.

8. Counterparts. This Amendment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Amendment delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Agreement.

[*Remainder of the page intentionally left blank*]

IN WITNESS WHEREOF, the parties hereto have caused this Amendment to be executed as of the date first written above by their respective officers and officials thereunto duly authorized.

EKLUTNA
POWER PURCHASE AGREEMENT
BETWEEN
CHUGACH ELECTRIC ASSOCIATION, INC.
AND
MUNICIPALITY OF ANCHORAGE

This Eklutna Power Purchase Agreement (this "**PPA**"), dated as of December 28, 2018 (the "**Effective Date**"), is made and entered into by and between (i) **CHUGACH ELECTRIC ASSOCIATION, INC.**, an Alaska not-for-profit electric cooperative corporation ("**Purchaser**"), and (ii) the **MUNICIPALITY OF ANCHORAGE,** a political subdivision organized under the laws of the State of Alaska ("**Seller**"). Purchaser and Seller are hereinafter referred to individually as a "**Party**" and collectively as the "**Parties**".

WHEREAS, as of the Effective Date, Purchaser is the owner of a 30% undivided interest in the Facility (as defined herein) (the "**Purchaser's Interest**") and Seller is the owner of a 53.33% undivided interest in the Facility (the "**Seller's Interest**"); and

WHEREAS, the Facility is subject to the terms of the Transition Plan (as defined herein), which provides for the sale of interests in the Facility by the Owners (as defined herein); and

WHEREAS, Seller desires to sell and deliver and Purchaser desires to accept and receive and pay for certain Power (as defined herein) delivered from the Facility to the Delivery Point on the terms and conditions, including the prices, set forth in this PPA; and

WHEREAS, in connection with the sale of such Power, Seller desires to grant to Purchaser an option to purchase all or a portion of the Seller's Interest, subject to the terms of the Transition Plan; and

WHEREAS, in order to determine the size of the interest in the Facility that will be subject to the terms of this PPA, the Parties intend to comply with the terms of the Transition Plan by following the procedure set forth herein.

NOW THEREFORE, in consideration of the mutual covenants herein contained, the sufficiency and adequacy of which are hereby acknowledged, the Parties agree to the following:

ARTICLE 1
RULES OF INTERPRETATION

Section 1.1 Interpretation.

(A) Capitalized terms listed in this PPA shall have the meanings set forth in Exhibit A or as otherwise defined in this PPA, whether in the singular or the plural or in the present or past tense. Words not otherwise defined in this PPA shall (i) have meanings as

commonly used in the English language, (ii) be given their generally accepted meaning consistent with Prudent Utility Practice, and (iii) be given their well-known and generally accepted technical or trade meanings.

(B) For purposes of this PPA, (1) the words "include," "includes" and "including" shall be deemed to be followed by the words "without limitation"; (2) the word "or" is not exclusive; (3) the masculine shall include the feminine and neuter; and (4) the words "herein," "hereof," "hereby," "hereto" and "hereunder" refer to this PPA as a whole. Unless the context otherwise requires, references herein: (x) to Articles, Sections, and Exhibits means the Articles, Sections and Exhibits contained in and attached to this PPA; (y) to an agreement, instrument or other document means such agreement, instrument or other document as amended, supplemented and modified from time to time to the extent permitted by the provisions thereof and (z) to a statute means such statute as amended from time to time and includes any successor legislation thereto and any regulations promulgated thereunder. This PPA shall be construed without regard to any presumption or rule requiring construction or interpretation against the party drafting an instrument or causing any instrument to be drafted.

Section 1.2 Consents and Approvals; Commercially Reasonable Standard. Unless expressly provided otherwise in this PPA, (a) when this PPA requires the consent, approval, or similar action by a Party, such consent or approval shall not be unreasonably withheld, conditioned or delayed, and (b) wherever this PPA gives a Party a right to determine, require, specify or take similar action with respect to a matter, such determination, requirement, specification or similar action shall be Commercially Reasonable.

Section 1.3 Waiver. The failure of either Party to enforce or insist upon compliance with or strict performance of any of the terms or conditions of this PPA, or to take advantage of any of its rights hereunder, shall not constitute a waiver or relinquishment of any such terms, conditions, or rights, but the same shall be and remain at all times in full force and effect.

ARTICLE 2
DETERMINATION OF CHUGACH PORTION

Section 2.1 Offer to MEA. MEA is the owner of a 16.67% undivided interest in the Facility. Seller has offered to MEA the option either to (A) purchase from Seller at fair market value a portion of the Seller's Interest, on a pro rata basis with Purchaser, equal to a 35.71% share of the Seller's Interest and a 19.04% interest in the Facility (the "**MEA Proportionate Interest**"), or (B) enter into a power purchase agreement with Seller with respect to the MEA Proportionate Interest on terms and conditions comparable to those set forth herein, in each case on the terms set forth in Exhibit C (such alternative offers, collectively, the "**MEA Offer**").

Section 2.2 Determination of Chugach Portion.

(A) If, prior to the fulfillment or waiver of all PPA Contingencies, MEA accepts the MEA Offer and consummates a purchase of the MEA Proportionate Interest (or enters into a binding power purchase agreement for the purchase of all of the Power attributable to the MEA Proportionate Interest), the "**Chugach Portion**" shall equal 64.29% of the Seller's

Interest. Such percentage interest, when combined with Purchaser's existing ownership of 30% of the Facility, will give Purchaser rights to 64.29% of the Facility.

(B) If, prior to the fulfillment or waiver of all other PPA Contingencies, MEA conclusively rejects (or is deemed to have conclusively rejected) the MEA Offer, the "**Chugach Portion**" shall, for the duration of the Term, be a percentage interest equal to the Seller's Interest.

(C) If, on the day that all other PPA Contingencies have been fulfilled or waived, MEA has either accepted or has not conclusively rejected the MEA Offer but has not yet either (i) consummated a purchase of the MEA Proportionate Interest or (ii) entered into a binding power purchase agreement without contingencies for all of the Power attributable to the MEA Proportionate Interest, the "**Chugach Portion**" shall be deemed to be a percentage interest equal to the Seller's Interest; *provided, however,* that if MEA consummates a purchase of the MEA Proportionate Interest or a lesser portion of the Seller's Interest (or enters into a binding power purchase agreement without contingencies for all of the Power attributable to the MEA Proportionate Interest or a lesser portion of the Seller's Interest) at the Closing under the Asset Purchase Agreement, the Chugach Portion shall, effective as of the effectiveness of such acquisition or such power purchase agreement, be reduced by that portion of the Seller's Interest acquired by MEA (or by the Power attributable to that portion of the Seller's Interest with respect to which MEA enters into a binding power purchase agreement).

ARTICLE 3
TERM AND TERMINATION

Section 3.1 PPA Contingencies. This PPA and the Parties' obligations set forth herein are contingent upon the occurrence or waiver of each of the following events (the "**PPA Contingencies**"):

(A) The Parties shall have determined the Chugach Portion in accordance with ARTICLE 2 and shall have memorialized the determination in a writing agreed to by the Parties;

(B) The Closing (as defined in the Asset Purchase Agreement) shall have occurred;

(C) RCA PPA Approval shall have been obtained;

(D) Seller shall have received an original, fully executed copy of the Officers' Certificate of Excludable Property, and evidence of delivery and recording of the Trustee's release of its lien in such Excludable Property, pursuant to Section 15.14(B); and

(E) The representations and warranties of Purchaser in Section 15.14(B) shall have been true and correct as of the Effective Date and the Commencement Date.

Section 3.2 Commencement Date. The commencement date under this PPA (the "**Commencement Date**") shall be the date that is the later of (a) the Effective Date and (b) the date on which each of the PPA Contingencies has occurred or has been waived by the Parties.

Section 3.3 Term.

(A) The term of this PPA shall commence on the Commencement Date, and shall continue in full force and effect until 11:59 p.m. (Facility local time) on the Scheduled Termination Date, subject to early termination or extension as provided in this PPA or otherwise agreed to by the Parties (the "**Term**").

(B) The effectiveness of this Agreement is expressly contingent upon the occurrence of the Closing provided for under the Asset Purchase Agreement. In the event that the Asset Purchase Agreement is terminated before the Commencement Date, this PPA shall automatically terminate, and become null and void, at the same time as the termination of the Asset Purchase Agreement.

ARTICLE 4
FACILITY DESCRIPTION AND OPERATION

Section 4.1 Description. The Facility is described in Exhibit B. A scaled map that identifies the Site, the location of the Facility, the Delivery Point and other important facilities, is included in Exhibit B.

Section 4.2 Operation of the Facility.

(A) In accordance with the Operations Agreement (as may be amended by the Operations Agreement Amendment), during the Term Purchaser shall manage, control, operate and maintain the Chugach Portion in a manner consistent with Prudent Utility Practice.

(B) During the Term, Seller shall, in consultation with Purchaser, select the person to serve as Seller's representative to the Operating Committee (the "**Seller's Representative**"). The Seller's Representative shall make all decisions on the Operating Committee consistent with Prudent Utility Practice and the rights and obligations of the Parties under this PPA. Seller's Representative shall also be Seller's representative for any consultation, study, and implementation processes required under the Fish and Wildlife Agreement relating to the Facility. The Seller's Representative shall make all decisions with respect to any processes required under the Fish and Wildlife Agreement with due regard for the rights and obligations of the Parties under this PPA.

(C) The Parties acknowledge and agree that Seller has prior rights to not less than 41 million gallons of water per day from Eklutna Lake for public water supply pursuant to the Act of October 30, 1984, 98 Stat. 2823; Alaska Statutes 46.15.150(a); and Certificate of Appropriation ADL 44944. The Parties agree that during the Term, the supply of water available for production of Power by the Seller's Interest shall be net of all water taken by Anchorage Water and Wastewater Utility for public water supply purposes.

Section 4.3 Books and Records. Seller and Purchaser shall each keep complete and accurate books and records and all other data required by each of them for the purposes of metering, billing, payment, and administration of this PPA, including such Operating Records and other records as may be required by Applicable Law, Governmental Authorities, NERC, or any ERO or ISO. Each Party shall maintain such books and records in accordance with relevant accounting standards, as applicable, and shall provide the other Party Commercially Reasonable access to such books and records. All books and records pertaining to the operation of the Facility shall be maintained on the premises of the Facility or such other location as is mutually agreed to by the Parties. Either Party may audit and examine any such books and records from time to time upon request and during normal business hours. Each Party shall maintain any books and records that it is required to keep under this Section 4.3 for a period of at least six (6) years after the preparation of such books or records.

ARTICLE 5
DELIVERY

Section 5.1 Electric Delivery Arrangements.

(A) During the Term, Purchaser shall be responsible for maintaining and paying the costs associated with the interconnection of the Facility to Purchaser's transmission system at the Delivery Point.

(B) Purchaser shall be responsible for all electric losses, transmission and ancillary service arrangements, and costs and expenses required for delivery of the Power from the Facility to the Delivery Point and for transportation and delivery of the Power from and after the Delivery Point.

Section 5.2 Electric Metering. The Facility Metering used to measure Energy delivered to the Delivery Point under this PPA shall be owned, installed, and maintained by Purchaser at the Delivery Point, or as close thereto as is reasonably possible.

Section 5.3 Scheduling. Purchaser shall nominate and schedule for delivery to Purchaser (in accordance with Prudent Utility Practice) all Energy attributable to the Chugach Portion.

ARTICLE 6
SALE AND PURCHASE

Section 6.1 General Obligation.

(A) Beginning on the Commencement Date and continuing thereafter throughout the Term, Seller shall generate from the Facility, deliver to the Delivery Point, and sell to Purchaser, and Purchaser shall receive and purchase at the Delivery Point, all Energy, Capacity, Renewable Attributes, and Ancillary Services (collectively, the "**Power**") that are

available from the Facility and attributable to the Chugach Portion, in accordance with Applicable Law.

(B) Seller shall not curtail or interrupt deliveries of Power from the Facility except as required by Applicable Law or Prudent Utility Practice.

(C) Title to the Power shall transfer from Seller to Purchaser at the Delivery Point free and clear of all liens, security interests, claims and encumbrances or any interest therein or thereto by any other Person.

Section 6.2 Additional Products; Ancillary Services.

(A) The Parties acknowledge that existing and future Applicable Laws create value in the ownership, use, or allocation of Renewable Attributes. To the full extent allowed by Applicable Law, Purchaser shall own and be entitled to claim all Renewable Attributes attributable to the Chugach Portion from the Commencement Date until the end of the Term, to the extent such Renewable Attributes may exist or be created during such period. For purposes of effectuating the foregoing, the following shall apply:

1. Seller hereby automatically and irrevocably assigns to Purchaser all rights, title and authority for Purchaser to register the Facility and own, hold, and manage the Renewable Attributes attributable to the Chugach Portion in Purchaser's own name and to Purchaser's account, including any rights associated with any renewable energy information or tracking system that exists or may be established (including but not limited to participants in any applicable REC Registration Program and the United States government) with regard to monitoring, registering, tracking, certifying, or trading Renewable Attributes. Seller hereby authorizes Purchaser to act as its agent for the purposes of registering the Facility for such purposes, and tracking and certifying Renewable Attributes, and Purchaser shall have full authority to hold, sell, or trade Renewable Attributes attributable to the Chugach Portion for its own account in connection with any renewable energy information or tracking systems. Upon the request of Purchaser, at Purchaser's cost and expense, (i) Seller shall deliver or cause to be delivered to Purchaser such attestations/certifications of Renewable Attributes attributable to the Chugach Portion, and (ii) Seller shall cooperate with Purchaser's registration and certification of Renewable Attributes attributable to the Chugach Portion.

2. Prior to the Commencement Date and as required thereafter for Purchaser to claim, own, or realize the available benefits of any Renewable Attributes attributable to the Chugach Portion, Seller shall, at Purchaser's cost and expense, make all applications or filings required by Applicable Law for Renewable Attribute accreditation and for the provision of such Renewable Attributes to Purchaser.

(B) On and after the Commencement Date until the end of the Term, Seller shall make available to Purchaser all Ancillary Services attributable to the Chugach Portion at no additional charge under this PPA. Any compensation that Seller receives under Applicable Law or otherwise for Ancillary Services attributable to the Chugach Portion during such period shall be provided to Purchaser at no additional cost to Purchaser under this PPA. Seller shall credit

Purchaser, as a reduction to Seller's monthly invoice or other mutually-agreed mechanism, for any compensation that Seller receives for Ancillary Services attributable to the Chugach Portion during such period.

1. Seller shall, at the request of Purchaser, use Commercially Reasonable Efforts to maximize the availability of such Ancillary Services during such period; *provided, however*, that Seller shall not be required to make any capital expenditures or incur any operating expenses in connection with such efforts.

2. In the event any Governmental Authority implements new or revised requirements for generators to create, modify, change, or supply Ancillary Services requiring Seller to install additional equipment after the Commencement Date to meet such requirements, Purchaser shall, in accordance with the provisions of Section 7.2, be responsible for payment of any costs and expenses of such additional equipment; provided that such costs and expenses shall be includable in the net book value of the Chugach Portion for purposes of determination of the Purchase Price pursuant to Section 14.3(B).

ARTICLE 7
PAYMENT FOR POWER

Section 7.1 Annual Payment.

(A) As consideration for Seller's sale of the Power attributable to the Chugach Portion, Purchaser shall pay Seller for such Power at the annual rate set forth in Exhibit D (the "**Annual Payments**"). Purchaser and Seller acknowledge and agree that the Annual Payments are structured to include all required compensation for any and all Power (including, for the avoidance of doubt, any and all Capacity, Ancillary Services, and Renewable Attributes) required to be delivered to Purchaser under this PPA during the Term and that Purchaser is not required to make any additional payments to Seller therefor.

(B) From and after the Commencement Date, Purchaser's obligation to make all Annual Payments hereunder throughout the Term, and the rights of the Seller in and to such Annual Payments, shall, except as expressly provided in Section 8.2 and Section 8.3, be absolute, unconditional, and irrevocable and shall not be affected by any circumstance of any nature or character whatsoever. Without limiting the foregoing, the following events shall not affect Purchaser's obligation to make all Annual Payments:

1. Any occurrence of Force Majeure;

2. Any Forced Outage or any other interruption or curtailment of the output of the Facility for any environmental, economic, or other reason other than by Seller in breach of this PPA;

3. Any casualty to or condemnation of the Facility or any of the property of either Party;

4. Any change in Applicable Law;

5. Any decision by the Owners to modify, reduce, or cease operations of the Facility; and

6. Any Event of Default with respect to Purchaser.

Section 7.2 Additional Consideration. As additional consideration for Seller's sale of the Power attributable to the Chugach Portion, Purchaser shall during the Term be responsible for payment of all capital expenditures and operating and maintenance expenses that are payable with respect to the Chugach Portion, including any expenditures or capital investment related to any environmental compliance or other compliance with requirements of Governmental Authorities applicable to the Chugach Portion. In the event that Seller pays any such expenditure or expense, Purchaser shall reimburse Seller for such expenditure or expense within thirty (30) days after Purchaser's receipt of an invoice or other Commercially Reasonable evidence of such expenditure or expense.

ARTICLE 8
BILLING AND PAYMENT

Section 8.1 Billing.

(A) The billing period shall be the calendar month. Purchaser shall pay in arrears one-twelfth of the Annual Payment due to Seller for the applicable Contract Year by ACH (automated clearinghouse) transfer (or any other mutually acceptable method) on or before the fifteenth (15^{th}) Day of the calendar month, or if such fifteenth (15^{th}) Day falls on a Day that is not a Business Day, the next Business Day.

(B) If a payment by either Party under this PPA is late, interest, calculated using the annual prime rate of interest as published on the date of the invoice in *The Wall Street Journal* (or, if unavailable, an equivalent publication on or about that date) plus two percent (2%) per year, shall accrue on the unpaid balance for the number of days payment was late and shall be added to the next billing statement.

(C) Seller and Purchaser shall net their obligations to each other under this PPA, and payment of the net amount will discharge all mutual undisputed obligations between the Parties.

Section 8.2 Set Off.

(A) In the event that (i) Purchaser has notified Seller under Section 8.05 of the Asset Purchase Agreement that Purchaser is entitled to indemnification from Seller with respect to any Third Party Claim (as defined in the Asset Purchase Agreement) or Direct Claim (as defined in the Asset Purchase Agreement), (ii) Seller has notified Purchaser that (A) Seller has determined that it will assume the defense of such Third Party Claim or (B) Seller acknowledges that Purchaser is entitled to indemnification from Seller for such Direct Claim, and (iii) either

(A) Seller has not, within sixty (60) days after delivery of any such notice to Purchaser, requested an appropriation of funds from the Assembly of Seller for purposes of paying any amount required to be paid or reimbursed in connection with such Third Party Claim or Direct Claim, or (B) Seller has requested an appropriation of funds from the Assembly of Seller for such purposes but has not received an appropriation of such funds, Purchaser will be entitled to withhold all or part of any amount due to Seller under this PPA for purposes of paying or reimbursing any Losses (as defined in the Asset Purchase Agreement) that have been determined, in accordance with the provisions of ARTICLE VIII of the Asset Purchase Agreement, to be due and owing from Seller to any Purchaser Indemnitee under ARTICLE VIII of the Asset Purchase Agreement in connection with such Third Party Claim or Direct Claim. In the event that (i) Purchaser has notified Seller under Section 8.05 of the Asset Purchase Agreement, that Purchaser is entitled to indemnification from Seller with respect to any Third Party Claim or Direct Claim, (ii) Seller fails to assume the defense of such Third Party Claim or provide indemnification for such Direct Claim, (iii) Purchaser, in accordance with the provisions of ARTICLE VIII of the Asset Purchase Agreement, pursues its available legal remedies against Seller for such failure and obtains a final judgment requiring Seller to indemnify Purchaser in accordance with ARTICLE VIII of the Asset Purchase Agreement for Purchaser's Losses in connection with such Third Party Claim or Direct Claim, and (iv) either (A) Seller has not, within sixty (60) days after issuance of such judgment, requested an appropriation of funds from the Assembly of Seller for purposes of paying such Losses, or (B) Seller has requested an appropriation of funds from the Assembly of Seller for such purposes but has not received an appropriation of such funds, Purchaser will be entitled to withhold all or part of any amount due to Seller under this PPA for purposes of paying or reimbursing such Losses.

(B) Set-off shall not be Purchaser's exclusive remedy with respect to any indemnification claim.

Section 8.3 Subordination. The Parties agree that Purchaser's payment obligations hereunder are payable on a parity with Purchaser's other operating expenditures, but subordinate to (i.e., neither on a parity with nor superior to) Purchaser's payment obligations under the Bradley Lake Agreement only if and to the extent, and for the period, that making such payments would prevent Purchaser from making timely payment of any amounts due from it under the Bradley Lake Agreement.

Section 8.4 Billing Disputes. Either Party may dispute invoiced amounts, but shall pay at least the undisputed portion on or before the date due. To resolve any billing dispute, the Parties shall use the procedures set forth in Article 10. When the billing dispute is resolved, the Party owing any amount shall pay such amount within five (5) Business Days after the date of such resolution, together with late payment interest as provided in Section 8.1(B).

ARTICLE 9
DEFAULT AND REMEDIES

Section 9.1 Events of Default. Any of the following events shall constitute an Event of Default with respect to the specified Party, which shall be the defaulting Party with respect to

such Event of Default, if such event has not been cured within the cure period specified for such event:

(A) Such Party's failure to pay any amount due to the other Party as required by this PPA, Actual Damages, any required indemnification, or any other required payment, and such amount remains unpaid for a period of ten (10) Business Days after the date such Party receives Notice from the non-defaulting Party that the amount is overdue.

(B) Such Party's application for, or consent (by admission of material allegations of a petition or otherwise) to, or failure to oppose the appointment of a receiver, trustee or liquidator for a Party or for all or substantially all of its assets, or its authorization of such application or consent, or the commencement or institution of any proceedings seeking such appointment against a Party which proceedings continue undismissed or unstayed for a period of sixty (60) Days from their inception.

(C) Such Party's authorization or filing of a voluntary petition in bankruptcy, or its application for, or consent (by admission of material allegations of a petition or otherwise) to, or failure to oppose an involuntary petition in bankruptcy, or the application of any bankruptcy, reorganization, readjustment of debt, insolvency, dissolution, liquidation or other similar law of any jurisdiction to a Party, or the commencement or institution of any such proceedings against a Party which proceedings remain undismissed or unstayed for sixty (60) Days from its inception or which result in adjudication of bankruptcy or insolvency within such time.

(D) Such Party's unauthorized assignment of this PPA, which unauthorized assignment shall be an Event of Default immediately upon its occurrence and without further notice from the non-defaulting Party.

(E) There is any lien or security interest in or on any assets of Purchaser that encumbers the Collateral as of the Commencement Date, and such lien or security interest continues to encumber the Collateral thirty (30) Days after Notice thereof shall have been given by Seller to Purchaser.

(F) The failure by either Party to perform or observe any other material obligation to the other Party under this PPA, which failure is not excused by Force Majeure and remains unremedied for thirty (30) Days after Notice thereof shall have been given by the non-defaulting Party; *provided, however*, that if the failure is not reasonably capable of being cured within the thirty (30) Day period, the defaulting Party will have such additional time (not exceeding an additional ninety (90) Days) as is reasonably necessary to cure the failure, so long as the Party promptly commences and diligently pursues the cure.

(G) An event of default has occurred with respect to such Party under the Asset Purchase Agreement or the PILT Agreement (as defined in the Asset Purchase Agreement), and such event of default has not been cured within any applicable cure, notice, or grace period.

Section 9.2 Remedies. Upon the occurrence of any Event of Default of this PPA, the non-defaulting Party may pursue all rights and remedies available to it at law and in equity and in accordance with the terms of this PPA. Except as explicitly provided to the contrary in this PPA, each right or remedy of the Parties provided for in this PPA shall be cumulative of and shall be in addition to every other right or remedy provided for in this PPA, and the exercise of one or more of the rights or remedies provided for herein shall not preclude the simultaneous or later exercise by such Party of any other rights or remedies provided for herein.

(A) Termination and Damages. For any uncured Event of Default, the non-defaulting Party may, at its option do any, some, or all of the following:

1. Net from any payments due from the non-defaulting Party any amount otherwise due from the defaulting Party under or in connection with this PPA, including any unpaid Actual Damages;

2. Seek Actual Damages in such amounts and on such basis for the default as authorized by this PPA;

3. Terminate this PPA immediately upon Notice, without penalty or further obligation to the defaulting Party. Upon the termination of this PPA under this Section 9.2, the non-defaulting Party shall be entitled to receive from the defaulting Party all of the Actual Damages in connection with the Event of Default resulting in such termination.

(B) Damages for Events of Default. The non-defaulting Party shall be entitled to receive from the defaulting Party all direct damages incurred by the non-defaulting Party that are proximately caused by Event of Default ("**Actual Damages**").

Section 9.3 Limitation on Damages. The Parties confirm that the express remedies and measures of damages provided in this PPA satisfy the essential purposes hereof. If no remedy or measure of damages is expressly herein provided, the obligor's liability shall be limited to Actual Damages only. Neither Party shall be liable to the other Party for consequential, incidental, punitive, exemplary, special, equitable or indirect damages, lost profits or other business interruption damages by statute, in tort or contract (except to the extent expressly provided herein); *provided, however*, that if either Party is held liable to a third party for such damages and the Party held liable for such damages is entitled to indemnification from the other Party hereto, the indemnifying Party shall be liable for, and obligated to reimburse the indemnified Party for, such damages. To the extent any damages required to be paid hereunder are liquidated, the Parties acknowledge that the damages are difficult or impossible to determine, that otherwise obtaining an adequate remedy is inconvenient, and that the liquidated damages constitute a reasonable approximation of the harm or loss.

ARTICLE 10
DISPUTE RESOLUTION

Section 10.1 Dispute Resolution. In the event of any dispute arising under this PPA (a "**Dispute**"), within ten (10) Business Days following Notice by either Party, (i) each Party shall

appoint a representative, and (ii) the representatives shall meet, negotiate and attempt in good faith to resolve the Dispute quickly, informally and inexpensively. In the event the representatives cannot resolve the Dispute within thirty (30) Days after the first meeting, either Party may request that consideration and resolution of the Dispute be transferred to a designated representative of each Party's senior management. Within ten (10) Days following such a request, each Party shall submit a written summary of the Dispute describing the issues and claims to a senior officer of each Party designated to address the Dispute. Within ten (10) Business Days after receipt of each Party's Dispute summaries, the senior management representatives for both Parties shall negotiate in good faith to resolve the Dispute. If such senior management representatives are unable to resolve the Dispute within thirty (30) Days thereafter, either Party may pursue any available legal remedies; *provided, however*, that if and to the extent that a Dispute involves the Justness or Reasonableness Conditions, and the Dispute is not resolved by negotiations of senior management representatives of the Parties, neither Party shall have any right to pursue any further legal remedies to resolve such Dispute and such Dispute shall be deemed to be resolved finally and conclusively by enforcement of the obligation of Purchaser under this PPA to pay the Annual Payments set forth in Exhibit D.

ARTICLE 11
FORCE MAJEURE

Section 11.1 Applicability of Force Majeure. Except as explicitly provided otherwise herein, a Party shall be relieved of its obligations to perform this PPA and shall not be considered to be in default with respect to any obligation under this PPA to the extent that such Party is prevented from fulfilling such obligation by Force Majeure, *provided, however*, that: (i) such Party gives prompt Notice describing the circumstances and impact of the Force Majeure; (ii) the relief from its obligations sought by such Party is of no greater scope and of no longer duration than is required by the Force Majeure; (iii) such Party proceeds with due diligence to overcome the Force Majeure and resume performance of its obligations under this PPA; and (iv) such Party provides prompt Notice of the conclusion of the Force Majeure.

Section 11.2 Limitations on Effect of Force Majeure.

(A) Force Majeure shall relieve a Party from performing only such obligations as are actually prevented by the Force Majeure.

(B) Except to the extent that Force Majeure prevents a Party from completing a transfer of money to the other Party, Force Majeure shall not excuse a Party from making any payment to the other on or before the date that such payment becomes due and payable.

(C) In no event will the existence of Force Majeure extend this PPA beyond its stated Term.

ARTICLE 12
INSURANCE

Section 12.1 General Insurance Requirements. On or prior to the Commencement Date and thereafter throughout the Term, Purchaser shall use Commercially Reasonable efforts to obtain and maintain at its own cost and expense insurance coverages for the Chugach Portion satisfying the requirements of this ARTICLE 12 and of Exhibit E. No later than the Commencement Date and on or before June 1 of each year during the Term, Purchaser shall provide Seller with a copy of insurance certificates reasonably acceptable to Seller evidencing that insurance coverages for the Facility are in compliance with such requirements. Such certificates shall (a) name Seller as an additional insured (except worker's compensation); (b) provide that Seller shall receive thirty (30) Days prior Notice of non-renewal, cancellation of, or significant modification to any of the corresponding policies (except that such Notice shall be ten (10) Days for non-payment of premiums); (c) provide a waiver of any rights of subrogation against Seller, its Affiliates and their officers, directors, agents, subcontractors, and employees; and (d) indicate that the policies have been endorsed in accordance with the requirements set forth herein. All policies shall be written with insurers with an AM Best rating of at least A-VII. All policies shall be written on an occurrence basis, except as provided in Section 12.2. All policies shall contain an endorsement that Purchaser's policy shall be primary in all instances regardless of like coverages, if any, carried by Seller. Purchaser's liability under this PPA is not limited to the amount of insurance coverage required herein.

Section 12.2 Term and Modification of Insurance.

(A) All insurance required under this PPA shall cover occurrences during the Term and for a period of two (2) years after the Term. In the event that any insurance as required herein is commercially available only on a "claims-made" basis, such insurance shall provide for a retroactive date not later than the date of this PPA and such insurance shall be maintained by Seller for a minimum of six (6) years after the Term.

(B) If any insurance required to be maintained by Purchaser hereunder ceases to be reasonably available and commercially feasible in the commercial insurance market, Purchaser shall provide Notice to Seller, accompanied by a certificate from an independent insurance advisor of recognized national standing, certifying that such insurance is not reasonably available and commercially feasible in the commercial insurance market for electric generating plants of similar type, geographic location and capacity. Upon receipt of such Notice, Purchaser shall use Commercially Reasonable attempts to obtain other insurance that would provide comparable protection against the risk to be insured.

Section 12.3 Application of Proceeds. Purchaser and Seller agree that, in the event of a catastrophic loss of all or a portion of the Facility, unless the Parties mutually agree otherwise, the Facility shall be repaired, replaced, or rebuilt, and any insurance proceeds received in connection with such loss shall be used only for such repair, replacement, or rebuilding. If the Parties have agreed that the Facility is to not be repaired, replaced, or rebuilt, any insurance proceeds received in connection with such loss shall be used first for purposes of the payment of remaining Annual Payments.

ARTICLE 13
INDEMNITY

Section 13.1 Indemnification. Each Party (the "**Indemnifying Party**") agrees (but in the case of Seller as the Indemnifying Party, only subject to appropriation of the requisite funds by the Assembly of Seller) to indemnify, defend, and hold harmless the other Party (the "**Indemnified Party**") from and against all third party claims, demands, losses, liabilities, penalties, and expenses (including attorneys' fees) for personal injury or death to persons and damage to the Indemnified Party's real property and tangible personal property or facilities or the property of any other Person to the extent arising out of, resulting from, or caused by any (i) Event of Default or other breach under this PPA, (ii) violation of Applicable Laws, (iii) negligent or tortious acts, errors, or omissions, or (iv) willful misconduct, in each case of the Indemnifying Party or any of its Affiliates, directors, officers, employees, or agents.

(A) The indemnification obligations of the Indemnifying Party shall apply notwithstanding any negligence of the Indemnified Party, but the Indemnifying Party's liability to indemnify the Indemnified Party shall be reduced in proportion to the percentage by which the Indemnified Party's negligent acts, errors, or omissions caused the damages.

(B) Neither Party shall be indemnified for its damages resulting from its sole negligence or willful misconduct. The indemnity provisions of this PPA shall not be construed to relieve any insurer of its obligation to pay claims consistent with the provisions of a valid insurance policy.

(C) Nothing in this Section 13.1 shall enlarge any liability of either Party to the other Party for any breach of this PPA or relieve either Party of any liability to the other Party for any breach of this PPA.

(D) A Party will not be liable more than once for the same losses, even if those losses may be recovered under multiple sections or subsections of this PPA or under both this PPA and the Asset Purchase Agreement. By way of example, if the Indemnified Party experiences losses for which the Indemnifying Party would be liable under the Asset Purchase Agreement, the Indemnifying Party's liability for those specific losses under this ARTICLE 13 will be reduced or eliminated to the extent of any indemnification, payment, or reimbursement in respect of the same losses under the Asset Purchase Agreement to avoid a double recovery by the Indemnified Party with respect to such losses. Accordingly, the amount owing to the Indemnified Party under this ARTICLE 13 shall be reduced by any amount paid to the Indemnified Party under the indemnification provisions of the Asset Purchase Agreement for the same breach, event, violation, circumstance, act, error, omission, or condition.

Section 13.2 Notice of Claim. Promptly after receipt by a Party of any claim or notice of the commencement of any action, administrative proceeding, legal proceeding, or investigation as to which the indemnity provided for in this ARTICLE 13 may apply, the Indemnified Party shall provide Notice thereof to the Indemnifying Party. The Indemnifying Party shall assume the defense thereof with counsel designated by such Party and satisfactory to the Indemnified Party, *provided, however*, that if the defendants in any such action include both

the Indemnified Party and the Indemnifying Party and the Indemnified Party shall have reasonably concluded that there may be legal defenses available to it which are different from or additional to, or inconsistent with, those available to the Indemnifying Party, the Indemnified Party shall have the right to select and be represented by separate counsel, at the Indemnifying Party's expense, unless a liability insurer has agreed to pay such costs.

Section 13.3 Settlement of Claim. If the Indemnifying Party fails to assume the defense of a claim meriting indemnification, the Indemnified Party may, at the expense of the Indemnifying Party, contest, settle, or pay such claim, *provided, however*, that settlement or full payment of any such claim may be made only following consent of the Indemnifying Party, which consent will not be unreasonably withheld, conditioned, or delayed, or, absent such consent, written opinion of the Indemnified Party's counsel that such claim is meritorious or warrants settlement.

Section 13.4 Amounts Owed. Except as otherwise provided in this ARTICLE 13, in the event that a Party is obligated to indemnify and hold the other Party and its successors and assigns harmless under this ARTICLE 13, the amount owing to the Indemnified Party will be the amount of the Indemnified Party's actual loss net of any insurance proceeds received by the Indemnified Party following a Commercially Reasonable effort by the Indemnified Party to obtain such insurance proceeds (which Commercially Reasonable effort will not in any event include any obligation to initiate litigation or any other dispute resolution proceeding against any insurer).

Section 13.5 Survival. The provisions of this ARTICLE 13 shall survive the expiration or earlier termination of this PPA.

ARTICLE 14
ASSIGNMENT AND OTHER TRANSFER RESTRICTIONS; LENDER PROVISIONS

Section 14.1 Transfer Without Consent is Null and Void. Except as provided in ARTICLE 2, any sale, transfer, or assignment of any interest in the Seller's Interest or in this PPA made without fulfilling the requirements of this ARTICLE 14 shall be null and void and a breach of this PPA.

(A) Except as permitted in this Section 14.1, neither Party shall assign this PPA, or any right, title or interest therein, without the prior written consent of the other Party, which consent shall not be unreasonably withheld, conditioned, or delayed; *provided, however*, that: (i) Notice of any proposed assignment requiring consent of the other Party shall be given to such other Party at least thirty (30) Days prior to the proposed effective date of such assignment; and (ii) with respect to any assignment hereunder, whether requiring consent or not, (a) except with respect to any assignment under Section 14.2, any assignee shall expressly assume the assignor's obligations under this PPA unless otherwise agreed by the other Party; (b) no assignment shall relieve the assignor of its obligations under this PPA in the event the assignee fails to perform, unless the other Party waives or releases in writing the assignor's continuing

obligations under this PPA; and (c) the assignment shall be subject to receipt of all such approvals as may be required by any applicable Governmental Authorities.

(B) Except as set forth in Section 15.14(B) with respect to the Collateral and Seller's consent rights with respect thereto, Purchaser shall have the right to assign all or a portion of its rights or obligations under this PPA without the prior written consent of Seller as follows:

1. to a Lender as collateral security for obligations under the Financing Documents entered into with such Lender, *provided* that: (i) Purchaser provides Seller with written Notice of such proposed collateral assignment not less than thirty (30) Days prior to such collateral assignment, and (ii) the applicable form of collateral assignment and related documentation is reasonably acceptable to Seller, as provided in Section 14.2;

2. to an Affiliate of Purchaser that is either (i) a Creditworthy Entity and Qualified Operator or (ii) a Creditworthy Entity that contracts with a Qualified Operator;

3. pursuant to Section 14.2, to a Creditworthy Entity and Qualified Operator or to a Creditworthy Entity that contracts with a Qualified Operator to operate the Facility after a Lender has exercised its foreclosure rights with respect to this PPA; and

4. to a Person succeeding to all or substantially all of the assets of Purchaser, *provided* that such Person's creditworthiness is equal to or better than that of Purchaser and such Person is a Qualified Operator or has contracted with a Qualified Operator to operate the Facility.

(C) Seller acknowledges that upon an event of default under any Financing Documents relating to this PPA, a Lender may (but shall not be obligated to) assume, or cause its designee to assume, all of the interests, rights, and obligations of Purchaser thereafter arising under this PPA, in which case such Lender or such designee shall assume and agree to be bound by all the terms and provisions of this PPA arising on or after the date of such assumption by such Lender or such designee; *provided* that, such designee shall be required to be a Qualified Operator; and *provided, further*, that, regardless of whether any such Lender or such designee assumes all of the interests, rights, and obligations of Purchaser thereafter arising under this PPA, Seller's interests, rights, and obligations under this PPA will remain in full force and effect.

Section 14.2 Lender Provisions.

(A) Except as set forth in Section 15.14(B) with respect to the Collateral and Seller's consent rights with respect thereto, Purchaser may, without approval of Seller, charge or otherwise encumber its interest under this PPA for security purposes in accordance with the provisions of Section 14.1 and this Section 14.2.

(B) Promptly after making any such encumbrance, Purchaser shall notify Seller in writing of the name, address, and telephone and facsimile numbers of each Lender to which Purchaser's interest under this PPA has been encumbered. Such Notice shall include the

names of the account managers or other representatives of the Lenders to whom all written and telephonic communications may be addressed.

(C) After giving Seller the initial Notice under Section 14.2(B), Purchaser shall promptly give Seller Notice of any change in the information provided in the initial Notice or any subsequent Notice.

(D) If Purchaser encumbers its interest under this PPA as permitted by this Section 14.2, the following provisions shall apply:

1. The Parties, except as provided by the terms of this PPA, shall not modify or cancel this PPA without the prior written consent of the Lender, such consent not to be unreasonably withheld, conditioned or delayed.

2. The Lender or its designees shall have the right, but not the obligation, to perform any act required to be performed by Purchaser under this PPA to prevent or cure an Event of Default with respect to Purchaser and such act performed by the Lender or its designees shall be as effective to prevent or cure an Event of Default as if done by Purchaser, *provided* that, if any such Lender or any such designee elects to perform any act required to be performed by Purchaser under this PPA to prevent or cure an Event of Default by Purchaser, Seller will not be deemed to have waived or relinquished any of its rights and remedies as provided in this PPA; and *provided, further*, that Purchaser hereby releases Seller, to the fullest extent permitted by Applicable Law, from any and all liability arising from Seller's performance under this PPA pursuant to instructions of the Lender following an event of default with respect to Purchaser under Lender's Financing Documents.

3. Seller shall, promptly following any request by Purchaser, execute statements certifying that this PPA is unmodified (or, if modified, stating the nature of the modification), in full force and effect and the absence or existence (and the nature thereof), to Seller's actual knowledge, of Events of Default hereunder by Purchaser and documents of consent to such assignment to the encumbrance and any assignment to such Lender, all in form and substance reasonably acceptable to Seller.

4. Promptly following the receipt of a written request from Purchaser or any Lender, Seller shall execute, or arrange for the delivery of, such reasonable certificates and other documents as may be reasonably necessary and appropriate in order for Purchaser to consummate any financing or refinancing of the Facility or any part thereof and enter into such reasonable agreements as may be reasonably requested by such Lender, which agreements will grant such rights to the Lender as are specifically provided for in such documents, including that (a) this PPA shall not be terminated (otherwise than pursuant to the terms of this PPA) without the consent of the Lender, which consent shall not be unreasonably withheld, conditioned, or delayed; (b) the Lender shall be given notice of, and the opportunity to cure any breach or default of this PPA by Purchaser in accordance with this PPA; (c) if the Lender forecloses, takes a deed in lieu of foreclosure, or otherwise exercises its remedies pursuant to any security documents, then (i) Seller shall, at the Lender's request, continue to perform all of its obligations hereunder, and the Lender or (without in any way limiting any obligation or liability of the Lender) its

nominee may perform in the place of Purchaser, and may assign this PPA to another Person that is a Creditworthy Entity and Qualified Operator in place of Purchaser, (ii) the Lender shall have no liability under this PPA except during the period of such Lender's ownership of the Purchaser's Interest or operation of the Facility, and (iii) Seller shall accept performance in accordance with this PPA by the Lender or its nominee; and (d) Seller shall make such representations and warranties to the Lender as Lender may reasonably request with regard to (1) Seller's authority to execute, deliver, and perform this PPA, (2) the binding nature on Seller of the document evidencing Seller's consent to assignment to the Lender and this PPA, and (3) the receipt of regulatory approvals by Seller with respect to its execution and performance under this PPA.

5. Purchaser shall reimburse Seller for the out-of-pocket costs and expenses (including the fees and expenses of counsel) incurred by Seller in connection with the preparation, negotiation, or execution of any statements, certificates, agreements, or other documents required under this Section 14.2.

Section 14.3 Purchase Option. Purchaser (or its designated Affiliate) shall have the option to purchase the Chugach Portion effective as of the expiration of the Term on the terms and conditions hereinafter set forth (the "**Purchase Option**"). On or before the thirtieth (30^{th}) anniversary of the Commencement Date, Seller will deliver to Purchaser Notice of the date, location, and time of a joint meeting between Seller and Purchaser to discuss Purchaser's plan regarding the potential exercise the Purchase Option. During the last five (5) Contract Years, Purchaser shall have the right at any time prior to the last day of the Term to deliver Notice to Seller that Purchaser is exercising the Purchase Option. If Seller fails to provide Notice of such joint meeting or fails to meet with Purchaser, Seller shall not be in breach of this Agreement, but if Purchaser then fails to deliver Notice of exercise of the Purchase Option prior to the last day of the Term, the Term shall be extended for a period of one year beyond such date (the "**Term Extension**"), during which (i) Purchaser may deliver its Notice of exercise of the Purchase Option at any time prior to the last day of the Term Extension, and (ii) Purchaser shall continue to make Annual Payments equal to (x) the amount for Contract Year 35 as set forth on Exhibit D hereto, plus (y) an amount equal to one percent (1%) of such amount, until the earlier of the expiration of the Term Extension or the closing of the purchase and sale agreement for the Purchase Option. If Purchaser exercises its Purchase Option, Seller and Purchaser shall enter into a purchase and sale agreement for the Chugach Portion in a form to be mutually agreed by the Parties prior to the Closing under the Asset Purchase Agreement.

(A) Determination of Chugach Portion for Purposes of Purchase Option. If MEA has not accepted the MEA Offer and consummated a purchase of the MEA Proportionate Interest prior to the Commencement Date, the Chugach Portion shall be deemed to be a percentage interest equal to the Seller's Interest for purposes of the Purchase Option; *provided, however*, that if MEA, in connection with the exercise of the Purchase Option by Purchaser, exercises any rights that MEA may have under the Transition Plan to consummate a purchase of the MEA Proportionate Interest effective as of the expiration of the Term, the Chugach Portion shall, for purposes of the Purchase Option, be reduced by the MEA Proportionate Interest.

(B) Purchase Price. Upon any exercise of the Purchase Option, the purchase price for the Chugach Portion shall be the Purchase Price; *provided* that Purchaser may offset any Purchase Price Adjustment against the Purchase Price. The Parties agree that, for the purposes of calculating the Purchase Price, the following expenditures shall be capitalized or, if necessary, deferred and amortized, for purposes of determining the "net book value" of the Chugach Portion for purposes of determining the Purchase Price:

1. all overhaul costs for the Facility, whether treated as expenses or otherwise for purposes other than determining the Purchase Price, that have been paid by Purchaser with respect to the Seller's Interest prior to any acquisition by MEA of all or any portion of the Seller's Interest; and

2. any other expenditures or regulatory assets related to compliance with Applicable Law made by Purchaser with respect to the Seller's Interest prior to any acquisition by MEA of all or any portion of the Seller's Interest; and

3. any other improvement, contribution, or expense (other than operating expenses) made or paid by or on behalf of Purchaser with respect to the Facility to the extent that such improvement, contribution or expense increases the value of the Facility above the value of the Facility immediately before such improvement, contribution or expense is made or paid and that, after amortization, has a positive value that extends beyond the Term.

If, for any reason, any generation unit overhaul costs or expenditures related to environmental compliance or other compliance with Applicable Law are not capitalized on Seller's financial statements, then such costs or expenditures shall be imputed as a capital investment in Seller's Interest and deferred and amortized for the purposes of establishing "net book value."

(C) Purchase Price Adjustment. If MEA acquires any portion of the Seller's Interest from Seller at or prior to the time set forth in Section 14.3(D) so that the portion of the Seller's Interest available to be purchased by Purchaser under the Purchase Option is less than the Chugach Portion as of the Effective Date, Seller will reimburse Purchaser, from the proceeds of such sale to MEA, for Purchaser's pro-rata portion of the sum of the following amounts (the "**Purchase Price Adjustment**"):

1. All capital improvements or other capital contributions made by Purchaser with respect to such portion of the Seller's Interest prior to MEA's acquisition of such portion of the Seller's Interest;

2. all overhaul costs for the Facility, whether treated as expenses or otherwise for purposes other than determining the Purchase Price or Purchase Price Adjustment, that have been paid by Purchaser with respect to such portion of the Seller's Interest prior to MEA's acquisition of such portion of the Seller's Interest;

3. any other expenditures or regulatory assets related to compliance with Applicable Law made by Purchaser with respect to such portion of the Seller's Interest prior to the date of such acquisition; and

4. any other improvement, contribution, or expense (other than operating expenses) made or paid by or on behalf of Purchaser with respect to the Facility to the extent that such improvement, contribution or expense increases the value of the Facility above the value of the Facility immediately before such improvement, contribution or expense is made or paid and that, after amortization, has a positive value that extends beyond the Term.

As used in this Section 14.3(C), "pro-rata" means in accordance with the ratio of (i) that portion of the Seller's Interest acquired by MEA to (ii) the entire Seller's Interest. It is the intent of the Parties that the Purchase Price Adjustment fully reimburse Purchaser for any improvements to, or increased value of, the Facility to the extent that such improvement is acquired by MEA rather than by Purchaser pursuant to the Purchase Option.

(D) Closing. The closing of the purchase pursuant to any exercise of the Purchase Option will occur on a date selected by Purchaser, which date will be not less than five (5) months and not more than nine (9) months after Purchaser has exercised the Purchase Option. Purchaser will select the closing date by giving a minimum of 30 days written notice to Seller.

ARTICLE 15
MISCELLANEOUS

Section 15.1 Forward Contract; Forward Agreement. The Parties acknowledge and intend that (a) this PPA, the transactions contemplated hereby, and any instruments that may be provided by either Party hereunder will each, and together, constitute one and the same "forward contract" and "forward agreement" within the meaning of the Bankruptcy Code; (b) Purchaser and Seller are "forward contract merchants," "swap participants," and "master netting agreement participants" within the meaning of the Bankruptcy Code; (c) all payments made or to be made by one Party to the other Party pursuant to this PPA constitute "settlement payments" within the meaning of the Bankruptcy Code; (d) this PPA constitutes a "master netting agreement" within the meaning of the Bankruptcy Code; (e) the Annual Payments (including each monthly payment thereof) and all other amounts due from Purchaser hereunder are (i) settlement payments (as defined in the Bankruptcy Code), (ii) transfers in connection with a forward contract, swap agreement and master netting agreement (as used in Sections 546(e), 546(g) and 546(j) of the Bankruptcy Code), and (iii) attributable solely to the expected costs of acquiring the Energy attributable to the Chugach Portion during the Term (based on the anticipated minimum amount of Energy that will be generated by the Facility and attributable to the Chugach Portion during the Term), as determined as of the date hereof; (f) the date of each monthly payment of the Annual Payments is a "maturity date" (as used in the definition of "forward contract" in Section 101 of the Bankruptcy Code) with respect to the Energy attributable to the Chugach Portion delivered to Purchaser during the period since the prior monthly payment; and (h) this PPA was entered into by Purchaser for the purpose of hedging against price fluctuations in the market for

electricity, by paying a fixed price for the Energy attributable to the Chugach Portion during the Term; (i) Purchaser intends to pass on the costs of its Energy purchases hereunder to its own customers, subject to Applicable Law; and (j) all remedies for a non-defaulting Party hereunder (including as set forth in Section 9.2) are "contractual rights" as used in Sections 362(b)(6), 362(b)(17), 362(b)(27), 556, 560 and 561 of the Bankruptcy Code. Each Party agrees that it will not make any assertion or claim, in any dispute or otherwise, or otherwise take any position to the effect that this PPA, the transactions contemplated hereby, and any instrument(s) that may be provided by either Party hereunder do not each, and together, constitute one and the same "forward contract," "commodity forward agreement," and "master netting agreement" within the meaning of the Bankruptcy Code, or that Purchaser and Seller are not "forward contract merchants," "swap participants," and "master netting agreement participants" within the meaning of the Bankruptcy Code.

Section 15.2 Notices. All notices, requests, consents, claims, demands, waivers and other communications hereunder (any of the foregoing, a "**Notice**") shall be in writing and shall be deemed to have been given (a) when delivered by hand (with written confirmation of receipt); (b) when received by the addressee if sent by a nationally recognized overnight courier (receipt requested); (c) on the date sent by e-mail of a PDF document (with confirmation of transmission) if sent during normal business hours of the recipient, and on the next Business Day if sent after normal business hours of the recipient or (d) on the third day after the date mailed, by certified or registered mail, return receipt requested, postage prepaid. Such communications must be sent to the respective Parties at the following addresses (or at such other address for a Party as shall be specified in a notice given in accordance with this Section 15.1):

If to Seller:	Municipality of Anchorage 632 W. 6th Avenue, Suite 850 Anchorage, AK 99501 E-mail: william.falsey@anchorageak.gov Attention: William D. Falsey, Municipal Manager
with a copy to:	Municipality of Anchorage 632 W. 6th Avenue, Suite 850 Anchorage, AK 99501 E-mail: rebecca.windtpearson@anchorageak.gov Attention: Rebecca A. Windt Pearson, Municipal Attorney
and a copy to:	K&L Gates LLP 925 Fourth Avenue, Suite 2900 Seattle, WA 98104-1158 E-mail: eric.freedman@klgates.com Attention: Eric E. Freedman

If to Purchaser:	Chugach Electric Association, Inc. 5601 Electron Drive Anchorage, AK 99518 E-mail: Lee_Thibert@chugachelectric.com Attention: Lee D. Thibert, Chief Executive Officer
with a copy to:	Chugach Electric Association, Inc. 5601 Electron Drive Anchorage, AK 99518 E-mail: Matthew_Clarkson@chugachelectric.com Attention: Matthew C. Clarkson, General Counsel
and a copy to:	Stinson Leonard Street LLP Suite 2600 50 South Sixth Street Minneapolis, MN 55402 E-mail: james.bertrand@stinson.com Attention: James J. Bertrand

Section 15.3 Compliance With Applicable Laws. Each Party shall at all times comply with all Applicable Laws; *provided, however* that any non-compliance with Applicable Law that, individually or in the aggregate, could not reasonably be expected to have a material adverse effect on the business or financial condition of the Party or its ability to fulfill its commitments hereunder shall not be deemed to be a breach of this PPA. Each Party shall promptly disclose to the other, any material violation of any Applicable Laws arising out of or in connection with the Facility and this PPA. This PPA will not take effect until the prior approval of the RCA as required by AS 42.05.431(b).

Section 15.4 Rates, Terms, and Conditions Binding. The Parties agree that the rates (including Annual Payments), terms, and conditions for products and services specified in this PPA shall remain in effect for the Term. In addition, to the fullest extent permitted by Applicable Law, each Party, for itself and its successors and assigns, hereby expressly and irrevocably (i) waives any rights that it may have, now or in the future, whether under AS 42.05.431(a), AS 42.05.431(b), or otherwise, to seek to obtain from the RCA by any means, directly or indirectly (through complaint, investigation, or otherwise), and (ii) covenants and agrees not at any time to seek so to obtain, an order from the RCA changing any section of this PPA specifying the rate, charge, or classification ("**Justness or Reasonableness Conditions**") agreed to by the Parties, it being the express intent of the Parties that, to the fullest extent permitted by Applicable Law, neither Party will unilaterally seek to obtain from the RCA any relief changing the Justness or Reasonableness Conditions of this PPA, notwithstanding any subsequent changes that may occur in Applicable Law or market conditions.

Section 15.5 Public Announcements. Neither Party shall at any time make, with respect to the transactions to be consummated by this PPA, publish, or communicate to any

Person in any public forum any defamatory, maliciously false, or disparaging remarks, comments, or statements concerning the other Party or any of its employees, officers, officials or directors.

Section 15.6 No Third-Party Beneficiaries. This PPA is for the sole benefit of the Parties and their respective successors and permitted assigns and nothing herein, express or implied, is intended to or shall confer upon any other Person or entity any legal or equitable right, benefit or remedy of any nature whatsoever under or by reason of this PPA.

Section 15.7 Amendment and Modification; Waiver. This PPA may only be amended, modified or supplemented by an agreement in writing signed by each Party. No waiver by any Party of any of the provisions hereof shall be effective unless explicitly set forth in writing and signed by the Party so waiving. No waiver by any Party shall operate or be construed as a waiver in respect of any failure, breach or default not expressly identified by such written waiver, whether of a similar or different character, and whether occurring before or after that waiver. No failure to exercise, or delay in exercising, any right, remedy, power or privilege arising from this PPA shall operate or be construed as a waiver thereof; nor shall any single or partial exercise of any right, remedy, power or privilege hereunder preclude any other or further exercise thereof or the exercise of any other right, remedy, power or privilege.

Section 15.8 Governing Law; Submission to Jurisdiction; Waiver of Jury Trial.

(A) This PPA shall be governed by and construed in accordance with the internal laws of the State of Alaska, without regard to conflict of law principles that would result in the application of the laws of any other jurisdiction.

(B) ANY LEGAL SUIT, ACTION OR PROCEEDING ARISING OUT OF OR BASED UPON THIS PPA OR THE TRANSACTIONS CONTEMPLATED HEREBY MAY BE INSTITUTED IN THE SUPERIOR COURT OF THE STATE OF ALASKA IN IN THE THIRD JUDICIAL DISTRICT, LOCATED IN ANCHORAGE, ALASKA, AND EACH PARTY IRREVOCABLY SUBMITS TO THE EXCLUSIVE JURISDICTION OF SUCH COURT IN ANY SUCH SUIT, ACTION OR PROCEEDING. SERVICE OF PROCESS, SUMMONS, NOTICE OR OTHER DOCUMENT BY MAIL TO SUCH PARTY'S ADDRESS SET FORTH HEREIN SHALL BE EFFECTIVE SERVICE OF PROCESS FOR ANY SUIT, ACTION OR OTHER PROCEEDING BROUGHT IN SUCH COURT. THE PARTIES IRREVOCABLY AND UNCONDITIONALLY WAIVE ANY OBJECTION TO THE LAYING OF VENUE OF ANY SUIT, ACTION OR ANY PROCEEDING IN SUCH COURT AND IRREVOCABLY WAIVE AND AGREE NOT TO PLEAD OR CLAIM IN ANY SUCH COURT THAT ANY SUCH SUIT, ACTION OR PROCEEDING BROUGHT IN SUCH COURT HAS BEEN BROUGHT IN AN INCONVENIENT FORUM.

(C) EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS PPA IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES AND, THEREFORE, EACH SUCH PARTY IRREVOCABLY AND UNCONDITIONALLY WAIVES ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LEGAL ACTION ARISING OUT OF OR

RELATING TO THIS PPA OR THE TRANSACTIONS CONTEMPLATED HEREBY. EACH PARTY TO THIS PPA CERTIFIES AND ACKNOWLEDGES THAT (A) NO REPRESENTATIVE OF ANY OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT SEEK TO ENFORCE THE FOREGOING WAIVER IN THE EVENT OF A LEGAL ACTION, (B) SUCH PARTY HAS CONSIDERED THE IMPLICATIONS OF THIS WAIVER, (C) SUCH PARTY MAKES THIS WAIVER VOLUNTARILY, AND (D) SUCH PARTY HAS BEEN INDUCED TO ENTER INTO THIS PPA BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION 15.8.

Section 15.9 Specific Enforcement. The Parties agree that irreparable damage would occur if any provision of this PPA were not performed in accordance with the terms hereof and that the Parties shall be entitled to specific performance of the terms hereof, in addition to any other remedy to which they are entitled at law or in equity. The Parties acknowledge and agree that (A) the Parties shall be entitled to an injunction, specific performance or other equitable relief to prevent breaches of this PPA and to enforce specifically the terms and provisions hereto, without proof of damages, this being in addition to any other remedy to which they are entitled under this PPA and (B) the right to specific enforcement is an integral part of the transactions contemplated by this PPA and without that right, neither Seller nor Purchaser would have entered into this PPA. Each Party agrees that it will not oppose the granting of specific performance and other equitable relief on the basis that the other Party has an adequate remedy at law or that an award of specific performance is not an appropriate remedy for any reason at law or equity. The Parties acknowledge and agree that any Party seeking an injunction to prevent breaches of this PPA and to enforce specifically the terms and provisions of this PPA in accordance with this Section 15.9 shall not be required to provide any bond or other security in connection with any such injunction.

Section 15.10 Waiver of Sovereign Immunity. Seller agrees that it is subject to civil and commercial suit for any breach of contract obligations under this PPA. To the extent that Seller may be entitled to claim sovereign, governmental, or municipal immunity from any liability in such a civil or commercial suit by Purchaser, Seller hereby agrees not to claim, and hereby waives, such sovereign, governmental, or municipal immunity.

Section 15.11 RCA PPA Approval. Seller and Purchaser will use Commercially Reasonable efforts to cooperate and each advocate to obtain an order from the Regulatory Commission of Alaska (the "**RCA**") approving the amendment of the certificate of public convenience and necessity of each of Purchaser and Seller to reflect the transactions to be consummated hereby, which order includes approval of (A) recovery by Purchaser in future rates of payments made under this PPA and (B) this PPA; and which order from the RCA shall not contain any condition or conditions materially adverse to either Purchaser or Seller, as determined by Purchaser or Seller with respect to itself in good faith and in the exercise of its Commercially Reasonable business judgment ("**RCA PPA Approval**"). In addition, Seller and Purchaser will use commercially reasonable efforts to cooperate and advocate to obtain an order from the RCA approving, as part of the transactions to be consummated hereby, recovery by Buyer in future rates of the costs associated with consummating the transactions to be consummated hereby.

Section 15.12 Relationship of the Parties. This PPA shall not be interpreted to create an association, joint venture, or partnership between the Parties or to impose any partnership obligation or liability upon either Party. Except as specifically provided for in this PPA to the contrary, neither Party shall have any right, power, or authority to enter into any agreement or undertaking for, or act on behalf of, or to act as an agent or representative of, the other Party.

Section 15.13 Successors and Assigns. Subject to the provisions of Section 14.1, Agreement shall be binding upon and shall inure to the benefit of the Parties and their respective successors and permitted assigns. No assignment shall relieve the assigning party of any of its obligations hereunder.

Section 15.14 Security Interest.

(A) The Parties agree, acknowledge and intend that the legal status of this PPA is and shall be as a power purchase agreement, a forward contract (as defined in the Bankruptcy Code), a commodity forward agreement (and thus a swap agreement as defined in the Bankruptcy Code), and a master netting agreement (as defined in the Bankruptcy Code), and not a secured purchase of the Chugach Portion or any other alternative form of transaction, and that Seller will at all times during the Term have and retain full undivided ownership of the Chugach Portion. Accordingly, each Party acknowledges and agrees that: (1) it shall not assert that the transactions contemplated under this PPA are a secured financing of any sort; and (2) it shall cooperate with the other Party in defending against any assertion by a third party that the transactions contemplated hereunder constitute a secured financing.

(B) Notwithstanding the foregoing, as security for the prompt payment and performance of all obligations of Purchaser under this PPA, including the payment of all Annual Payments to Seller, and solely as a precaution in the event that this PPA should be construed as a secured financing such that Purchaser shall be deemed to have acquired title to the Chugach Portion at any time (other than by exercise of the Purchase Option under Section 14.3), Purchaser hereby grants to Seller a senior, first priority purchase money lien on and security interest in and to, and right of set-off with respect to, all right, title, and interest of Purchaser in and to the Chugach Portion (including all right, title, and interest in and to any Power attributable to the Chugach Portion, except as and to the extent that such Power is delivered to Purchaser at the Delivery Point under and in accordance with the express provisions of this PPA) and all proceeds thereof (collectively, the "**Collateral**"). In addition, notwithstanding ARTICLE 14, Purchaser (i) represents and warrants to Seller as of each of the Effective Date and the Commencement Date that (a) Purchaser has provided Seller with a true and correct copy of the Trust Indenture, including all supplements and amendments thereto that were executed after January 20, 2011 and (b) there are no liens or security interests in or on the assets of Purchaser that encumber the Collateral as of the Effective Date, and that there will be no liens or security interests in or on the assets of Purchaser that will encumber the Collateral as of the Commencement Date; (ii) covenants and agrees that Purchaser shall provide to Seller, at or prior to the Closing under the Asset Purchase Agreement, (a) an original, fully executed copy of an Officers' Certificate of Excludable Property (as such terms are defined in the Trust Indenture), in form and substance reasonably satisfactory to Seller, identifying the Collateral as Excludable Property under the Trust Indenture and including a confirmation by the Trustee (as defined in the

Trust Indenture) that the Collateral is Excludable Property and is not subject to the lien of the Trust Indenture pursuant to a release under Section 6.10 of the Trust Indenture, in form and substance reasonably satisfactory to Seller, (b) evidence of Purchaser's delivery of such Officers' Certificate to the Trustee and the Trustee's execution of such release, and (c) evidence of the recording of such release in all recording offices in the State of Alaska in which the lien of the Trust Indenture has been recorded; and (iii) covenants and agrees that Purchaser shall not, without Seller's prior written consent, grant any security interest in the Collateral, including (a) in connection with this PPA, the Asset Purchase Agreement, and the transactions contemplated hereunder and thereunder, or (b) any grant of a lien to the Trustee pursuant to Granting Clause Third of the Trust Indenture or otherwise. In connection with the lien and security interest granted in this Section 15.14(B), Seller shall have the rights and remedies of a secured party or mortgagee under Applicable Law, including the UCC. Purchaser hereby authorizes Seller to file UCC financing statements and to record instruments with any appropriate Governmental Authority, and to make other similar filings and recordings with respect hereto as Seller shall elect in its sole discretion for the purposes of recording and perfecting its lien and security interest in the Collateral.

Section 15.15 Survival of Obligations. The applicable provisions of this PPA shall continue in effect after termination to the extent necessary to (A) provide for final billings, payments, and adjustments, (B) enforce or complete the duties, obligations, or responsibilities of the Parties, and (C) address any remedies or indemnification rights arising prior to termination. Cancellation, expiration, or earlier termination of this PPA shall not relieve the Parties of obligations, including warranties, remedies, or indemnities, that by their nature should survive such cancellation, expiration, or termination, which obligations shall survive for the period of the applicable statute(s) of limitation.

Section 15.16 Further Assurances. Upon the receipt of a written request from the other Party, each Party shall execute such reasonable additional documents, instruments and assurances and take such additional actions as are reasonably necessary and desirable to carry out the terms and intent hereof. Neither Party shall unreasonably withhold, condition, or delay its compliance with any reasonable request made pursuant to this Section 15.16.

Section 15.17 Severability. If any term or provision of this PPA is invalid, illegal or unenforceable in any jurisdiction, such invalidity, illegality or unenforceability shall not affect any other term or provision of this PPA or invalidate or render unenforceable such term or provision in any other jurisdiction. Upon such determination that any term or other provision is invalid, illegal or unenforceable, the Parties shall negotiate in good faith to modify this PPA so as to effect the original intent of the Parties as closely as possible in a mutually acceptable manner in order that the transactions contemplated hereby be consummated as originally contemplated to the greatest extent possible.

Section 15.18 Complete Agreement. This PPA constitutes the sole and entire agreement of the Parties with respect to the subject matter contained herein, and supersedes all prior and contemporaneous understandings and agreements, both written and oral, with respect to such subject matter. In the event of a conflict between the terms of this PPA and the Asset Purchase Agreement, the terms of the Asset Purchase Agreement shall control.

Section 15.19 Headings. The headings in this PPA are for reference only and shall not affect the interpretation of this PPA.

Section 15.20 Counterparts. This PPA may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this PPA delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this PPA.

Section 15.21 Exhibits. Exhibits may be changed to the extent allowed by specific provisions of this PPA or with the mutual consent of both Parties.

EXHIBIT A

DEFINITIONS

The following terms shall have the meanings set forth herein:

"**Actual Damages**" has the meaning set forth in Section 9.2(B).

"**Affiliate**" of a Person means any other Person that directly or indirectly, through one or more intermediaries, controls, is controlled by, or is under common control with, such Person. The term "control" (including the terms "controlled by" and "under common control with") means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of voting securities, by contract, or otherwise.

"**Ancillary Services**" all ancillary products associated, in accordance with Prudent Utility Practice, with the generation of Energy, including spinning reserves, non-spinning reserves, reactive power and voltage control.

"**Annual Payments**" has the meaning set forth in Section 7.1(A).

"**Applicable Law**" means any statute, law, ordinance, regulation, rule, code, order, constitution, treaty, common law, judgment, decree, Permit requirement, other binding requirement or rule of law of, or compulsory standard established by, any Governmental Authority.

"**Asset Purchase Agreement**" means that certain Asset Purchase and Sale Agreement dated as of December 28, 2018, 2018 pursuant to which Purchaser has acquired substantially all of the assets of Seller's electric utility referred to as Municipal Light and Power ("**ML&P**") other than the Seller's Interest.

"**Bankruptcy Code**" means 11 U.S.C. §§ 101 et seq. (Title 11, United States Code).

"**Bradley Lake Agreement**" means the Bradley Lake Hydroelectric Project Agreement for the Sale and Purchase of Electric Power dated as of December 8, 1987 by and among the Alaska Energy Authority as successor to The Alaska Power Authority, Purchaser, The Golden Valley Electric Association, Inc., Seller, The City of Seward d/b/a/Seward Electric System, The Alaska Electric Generation & Transmission Cooperative, Inc., The Homer Electric Association, Inc., and MEA.

"**Business Day**" means any Day that is not a Saturday, a Sunday, NERC recognized holiday, or any other Day on which commercial banks in Anchorage, Alaska are required to be closed for business.

"**Capacity**" means the total electrical generating capacity of the Facility, including any capacity products that are able to be accredited under Applicable Law.

"**Chugach Portion**" means that portion of the Seller's Interest as determined pursuant to Section 2.2 or Section 14.3(A).

"**Collateral**" shall have the meaning set forth in Section 15.14(B).

"**Commencement Date**" shall have the meaning set forth in Section 3.2.

"**Commercially Reasonable**" or "**Commercially Reasonable Efforts**" means, with respect to any action required to be made, attempted or taken by a Party under this PPA, the level of effort in light of the facts known to such Party at the time a decision is made that: (a) can reasonably be expected to accomplish the desired action at a reasonable cost; (b) is consistent with Prudent Utility Practice; and (c) takes into consideration the amount of advance notice required to take such action, the duration and type of action and the competitive environment in which such action occurs.

"**Contract Year**" has the following meaning: the first Contract Year means the period beginning on the Commencement Date and ending on the last calendar day of the month of the first anniversary of the Commencement Date. The second Contract Year and each subsequent Contract Year means the period beginning on the first day after the last day of the previous Contract Year and ending on the last day of the twelfth calendar month thereafter.

"**Credit Rating**" means (i) with respect to any entity other than a financial institution, the current (A) rating issued or maintained by S&P or Moody's with respect to such entity's long-term senior, unsecured, unsubordinated debt obligations (not supported by insurance provider or other third-party credit enhancements) or (B) corporate credit rating or long-term issuer rating issued or maintained with respect to such entity by S&P or Moody's, or (ii) if such entity is a financial institution, the ratings issued or maintained by S&P or Moody's with respect to such entity's long-term, unsecured, unsubordinated deposits.

"**Creditworthy Entity**" means a Person having at the applicable time a Credit Rating of (a) BBB or better from S&P, or (b) Baa2 or better from Moody's, or (c) if such Person has a Credit Rating at such time from both S&Ps and Moody's, BBB or better from S&P and Baa2 or better from Moody's.

"**Day**" means a calendar day.

"**Delivery Point**" means the low side of the step-up transformer(s) within the Facility switchyard.

"**Dispute**" shall have the meaning set forth in Section 10.1.

"**Effective Date**" shall have the meaning set forth in the preamble.

"**Eligible Energy Resource**" means any resource that qualifies as a renewable energy resource eligible to be certified to receive, claim, own or use renewable energy certificates pursuant to the protocols and procedures under any applicable REC Registration Program.

"**Energy**" means the net electric energy that is generated from the Facility (or capable of being generated by any water spilled from the Facility) that is delivered to the Delivery Point, as measured in accordance with Section 5.2. Energy shall be net of energy self-generated and concurrently consumed by the Facility, and net of all losses prior to the Delivery Point, including line, inverter, and transformer losses.

"**ERO**" means the Electric Reliability Organization certified by FERC pursuant to Section 215 of the Federal Power Act or any successor organization.

"**Event of Default**" shall have the meaning set forth in Section 9.1.

"**Extension Agreement**" means that certain Agreement for Extension of 1996 Eklutna Hydroelectric Project Transition Plan dated October 2, 1997 by and among the Owners.

"**Facility**" means the Eklutna Hydroelectric Project, as further described in Exhibit B, including all of the following: all equipment, buildings, generators, inverters, step-up transformers, output breakers, protective and associated equipment, improvements, and other tangible assets, contract rights, easements, rights of way, surface use agreements and other interests or rights in real estate reasonably necessary for construction, operation, maintenance, generation and delivery of the Energy, Ancillary Services, and Capacity subject to this PPA.

"**Facility Metering**" means revenue quality meters, metering equipment and data processing equipment used to measure, record or transmit data relating to the output from the Facility, including the metering current transformers and the metering voltage transformers.

"**Federal Power Act**" means the provisions of 16 U.S.C. 791(A) et seq. and amendments or supplements thereto.

"**FERC**" means the Federal Energy Regulatory Commission or any successor agency.

"**Financing Documents**" means the loan and credit agreements, notes, bonds, indentures, security agreements, lease financing agreements, mortgages, deeds of trust, interest rate exchanges, swap agreements, and other documents relating to a Party's financing transactions, including any credit enhancement, credit support, working capital financing, or refinancing documents, and any and all amendments, modifications, or supplements to the foregoing that may be entered into from time to time at the discretion of the Party.

"**Fish and Wildlife Agreement**" is the August 7, 1991 Agreement Between The Municipality of Anchorage, DBA Anchorage Municipal Light And Power, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., U. S. Fish and Wildlife Service, National Marine Fisheries Service, Alaska Energy Authority and The State of Alaska, Relative to the Eklutna and Snettisham Hydroelectric Projects .

"**Force Majeure**" means an event or circumstance that prevents a Party from performing its obligations under this PPA, which event or circumstance (i) was not reasonably anticipated as of the Date of this PPA, (ii) is not within the reasonable control of or the result of the fault or negligence of the Party claiming its occurrence, and (iii) which by exercise of due diligence and

foresight could not reasonably have been avoided, *provided, however*, that such an event or circumstance shall not include: (a) inability, or excess cost, to procure any equipment necessary to perform the obligations of this PPA; (b) delays or nonperformance by suppliers, vendors, or other third parties with which a Party has contracted, except to the extent that such delays or nonperformance were due to circumstances that would constitute "Force Majeure" as defined above; (c) mechanical or equipment breakdown or inability to operate unless caused by reason of Force Majeure; (d) changes in market conditions; (e) any labor strikes, slowdowns, work stoppages, or other labor disruptions limited only to a Party or a Party's Affiliates; (f) Seller's inability to obtain any credit or incentive in connection with the Facility, including any such inability that is attributable to any failure to meet placed-in-service or safe harbor provisions regardless of whether an event of Force Majeure may have caused or contributed to such failure, (g) the loss of Purchaser's markets or Purchaser's inability economically to use or resell any of the Power purchased hereunder, except to the extent that such loss of markets or inability to use or resell were due to circumstances that would constitute "Force Majeure" as defined above; (h) Purchaser's failure to contract for and reserve sufficient firm transmission capacity to deliver the Power to any transmission point(s) of receipt or any delivery point(s); (i) Seller's ability to sell Power to a market at a more advantageous price; or (j) Purchaser's ability to purchase Power in or from any market at a more advantageous price.

"**Forced Outage**" means any condition at the Facility that requires the immediate and unplanned removal of the Facility, or at least ten percent thereof, from service, another outage state, or a reserve shutdown state, resulting from immediate mechanical/electrical/hydraulic control system trips and operator-initiated trips in response to abnormal Facility conditions or alarms.

"**Governmental Authority**" means any federal, state, local or foreign government, or political subdivision thereof, or any agency or instrumentality of such government or political subdivision, or any self-regulated organization or other non-governmental regulatory authority or quasi-governmental authority (to the extent that the rules, regulations, or orders of such organization or authority have the force of Law), or any arbitrator, court, or tribunal of competent jurisdiction. References to "Governmental Authority" shall exclude Seller except Seller is acting in a legislative or regulatory capacity as expressly authorized by Applicable Law.

"**Indemnified Party**" shall have the meaning set forth in Section 13.1.

"**Indemnifying Party**" shall have the meaning set forth in Section 13.1.

"**ISO**" means an independent system operator or regional transmission organization that coordinates, controls and monitors the operation of a public electrical power system or any similar operator or organization created by Applicable Law after the date of this PPA.

"**Justness or Reasonableness Conditions**" shall have the meaning set forth in Section 15.4.

"**Lender**" means any commercial bank, investment bank or trustee under Financing Documents that makes a loan to or extends other credit in favor of Purchaser.

"**MEA**" means Matanuska Electric Association, Inc., a not-for-profit Alaska electric cooperative corporation.

"**MEA Offer**" shall have the meaning set forth in Section 2.1.

"**MEA Proportionate Interest**" shall have the meaning set forth in Section 2.1.

"**Moody's**" means Moody's Investors Services, Inc.

"**NERC**" means the North American Electric Reliability Council or any successor organization.

"**Notice**" shall have the meaning set forth in Section 15.1.

"**Operating Committee**" shall mean the "Eklutna Operating Committee" or "EOC" set forth in the Operations Agreement.

"**Operating Records**" means all agreements associated with the Facility, operating logs, blueprints for construction, operating manuals, all warranties on equipment, and all documents, whether in printed or electronic format, that Seller uses or maintains for the operation of the Facility.

"**Operations Agreement**" means the Eklutna Purchasers Manner of Acting, Functional Responsibilities, and Staffing, attached as Exhibit E to the Transition Plan, as the same has been amended from time to time by the Owners.

"**Operations Agreement Amendment**" shall have the meaning set forth in Section 3.1.

"**Owners**" means the owners of the Facility. As of the Effective Date, the Owners are Seller (with respect to the Seller's Interest), Purchaser (with respect to the Purchaser's Interest), and MEA (with respect to the remaining 5/30 (approximately 16.7%) undivided ownership interest in the Facility).

"**Party**" and "**Parties**" shall have the meanings set forth in the introductory paragraph.

"**Permit(s)**" means all applicable construction, land use, air quality, emissions control, environmental and other permits, licenses and approvals from any Governmental Authority required under Applicable Laws for construction, ownership, operation and maintenance of the Facility and the generation and delivery of any output from the Facility to Purchaser.

"**Person**" means an individual, corporation, partnership, joint venture, limited liability company, Governmental Authority, unincorporated organization, trust, association or other entity.

"**Power**" shall have the meaning set forth in Section 6.1(A).

"**PPA Contingencies**" shall have the meaning set forth in Section 3.1.

"**Prudent Utility Practice**" means any applicable practices, methods, and acts engaged in or approved by a significant portion of (a) as to Seller, the hydroelectric generating industry in the United States of America, or (b) as to Purchaser, the electric utility industry in the United States of America, during the relevant time period, or the practices, methods and acts which, in the exercise of reasonable judgment by a prudent hydroelectric generator operator (or prudent utility operator, if applicable to Purchaser) in light of the facts known or which should reasonably have been known at the time the decision was made, could have been expected to accomplish the desired result at the lowest reasonable cost consistent with good business practices, reliability, safety, expedition and the requirements of any governing authority having jurisdiction. Without limitation of the foregoing, "Prudent Utility Practice" shall include the applicable operating policies, standards, criteria, or guidelines of any applicable governing authority and any manufacturer of a component of the Project. "Prudent Utility Practice" is not intended to be limited to the optimum practice, method or act to the exclusion of all others, but rather to the acceptable practices, methods or acts generally accepted (a) as to Seller, by the hydroelectric energy electric generating industry in the United States of America or (b) as to Purchaser, by the electric utility industry in the United States of America.

"**Purchase Option**" shall have the meaning set forth in Section 14.3.

"**Purchase Price**" means the sum of the net book value (or its equivalent) of the Chugach Portion as of the last day of the Term, as reduced (although not below zero) by the aggregate amount of the net book value of any capital expenditures made by Purchaser with respect to the Chugach Portion during the Term. For purposes of the Chugach Portion, "net book value" means gross plant in service (including customer-contributed plant) at original cost, less accumulated depreciation and amortization.

"**Purchase Price Adjustment**" shall have the meaning set forth in Section 14.3(C).

"**Purchaser**" shall have the meaning set forth in the first paragraph of this PPA.

"**Purchaser's Interest**" shall have the meaning set forth in the second paragraph of this PPA.

"**Qualified Operator**" means an operator that operates one or more hydropower generating facilities of a type and size comparable to the Facility, is nationally recognized, and has not less than three years' experience in the operation of one or more hydropower generating facilities.

"**RCA**" shall have the meaning set forth in Section 15.10.

"**RCA PPA Approval**" shall have the meaning set forth in Section 15.10.

"**REC Registration Program**" means any state, regional or federal program established to register Eligible Energy Resources and create and certify renewable energy certificates arising from energy generated from such Resource, including any rights associated with any renewable energy information or tracking system that exists or may be established by Applicable Law with regard to monitoring, registering, tracking, certifying, or trading such credits.

"**Renewable Attributes**" means any and all renewable resource attributes (including renewable energy certificates or credits or similar rights arising out of any applicable REC Registration Program), green tags, emissions or carbon credits, reductions, offsets, and allowances, and any other environmentally related attributes that are, or in the future may be, recognized by any Governmental Authority, and that are attributable to the availability, production, purchase or sale of Energy from the Facility. For the avoidance of doubt, "Renewable Attributes" do not include any Tax Benefits.

"**S&P**" means the Standard & Poor's Rating Group, a division of The McGraw-Hill Companies.

"**Scheduled Termination Date**" means the last day of the calendar month thirty-five (35) years after the Commencement Date.

"**Seller**" shall have the meaning set forth in the first paragraph of this PPA.

"**Seller's Interest**" shall have the meaning set forth in the recitals to this PPA.

"**Seller's Representative**" shall have the meaning set forth in Section 4.2.

"**Site**" means the parcel of real property on which the Facility is constructed and located, including any easements, rights of way, surface use agreements and other interests or rights in real estate reasonably necessary for the operation and maintenance of the Facility. The Site is more specifically described in Exhibit B to this PPA.

"**Tax Benefits**" means any and all (i) tax credits based on ownership of, investment in or energy production from the Facility or any portion thereof, (ii) grants based on ownership of, investment in or energy production from the Facility or any portion thereof, including the grant described in Section 1603 of the American Recovery and Reinvestment Tax Act of 2009 and (iii) other tax benefits, including depreciation and other cost recovery deductions, arising in connection with ownership of, investment in, or operation of the Facility, or any portion thereof, in each case allocated, allowed, allowable, assigned, awarded, certified or otherwise transferred or granted to Seller or Purchaser by any Governmental Authority in any jurisdiction in connection with the Facility.

"**Term**" means the period of time during which this PPA shall remain in full force and effect as further defined in Section 3.3 and as may be extended pursuant to Section 14.3.

"**Term Extension**" shall have the meaning set forth in Section 14.3.

"**Transition Plan**" means the 1996 Eklutna Hydroelectric Project Transition Plan dated May 28, 1996 by and among the United States of America d/b/a Alaska Power Administration, a unit of the Department of Energy, and the Owners, as the same has been amended and extended by the Extension Agreement.

"**Trust Indenture**" means that certain Second Amended and Restated Indenture of Trust, dated as of January 20, 2011, between Purchaser and U.S. Bank National Association, as Trustee, as recorded in Recording Dist.: 301 - Anchorage, State of Alaska, on January 20, 2011, under

reference no. 2011-003688-0, in Recording Dist.: 302 - Kenai, State of Alaska, on January 20, 2011, under reference no. 2011-000608-0, in Recording Dist.: 314 - Seward, State of Alaska, on January 20, 2011, under reference no. 2011-000062-0, and in the Palmer, State of Alaska, Recording District on January 20, 2011, under reference no. 2011-001410-0, as the same has been or may be amended or supplemented from time to time.

"**UCC**" means the Uniform Commercial Code of the State of Alaska.

EXHIBIT B

FACILITY DESCRIPTION AND SITE MAPS

Eklutna Purchase Agreement
Exhibit A

August 2, 1989
Page 1 of 2

Lands, Easements and Rights-of-Way

Exhibit A consists of this narrative (pages 1 and 2 of 2) and the map prepared by BLM, signed and dated February 3, 1989.

This exhibit describes and displays present land status for the Eklutna Hydroelectric Project and describes in general terms the conveyances of land and land rights contemplated in the purchase agreement.

1. BLM - managed lands and military lands used for Eklutna Project for which BLM is to provide APAd rights-of-way sufficient for operation, maintenance, repair and replacement of Eklutna facilities, such rights-of-way to be assigned by APAd to the Purchasers.

   Legend Symbols and Description.

   Withdrawals. Refers to approximately 863 acres of public lands withdrawn for Eklutna at the "Intake Area," "Power Tunnel," "Eklutna Powerplant" and "Anchorage Substation." The total acreage is comprised of the following land:

   a. Approximately 320 acres withdrawn for the "Power Tunnel" under Public Land Order 1231 dated September 28, 1955.

   b. Approximately 230 acres utilized for the "Intake Area" and approximately 60 acres for a portion of "Eklutna Powerplant" as described by ANCSA 3(e) determination AA-51183 dated July 30, 1986.

   c. Approximately 243 acres utilized for "Eklutna Powerplant" as described by ANCSA 3(e) determination AA-42534 dated September 1, 1982.

   d. Approximately 10 acres withdrawn for "Anchorage Substation" under Secretarial Order dated April 4, 1952.

   State Land-R/W. Refers to rights-of-way across State-selected lands covering the transmission line east of "Eklutna Powerplant" to the Knik River.

   Military Land-R/W. Refers to rights-of-way across military lands used for Eklutna transmission lines.

Acquired-3(e). Refers to approximately 2.5 acres of acquired land used for "Reed Substation" as described by ANCSA 3(e) determination AA-45155 dated July 30, 1985.

2. ANCSA 17(b) Easements.

Map symbol: Native Land - 17(b) Easements.

Refers to rights-of-way that are reserved for portions of the 115kV transmission line, access roads and other Eklutna facilities located on Native corporation lands, and exist as easement reservations in the ANCSA conveyances to the Native corporations pursuant to Section 17(b) of ANCSA. These easements will not be altered by the sale of Eklutna and the Purchasers may use these easements for their intended purposes.

3. APAd Acquired Land and Easements.

Refers to land and easements acquired by the Bureau of Reclamation (predecessor of APAd) during construction of Eklutna and now controlled by APAd. APAd will assign the land and easements to the Purchasers.

Legend Symbols and Description:

Acquired. Refers to approximately 0.8 acres of land owned by APAd at Palmer Substation.

Acquired-Easements. Refers to approximately 33 easements across private lands acquired by the Bureau of Reclamation (predecessor of APAd) and now held by APAd.

4. Other Easements on Private Land.

Map [Symbol]: Note: Other Easements on Private Lands To Be Acquired - See Exhibit A Narrative

Refers to approximately two hundred and fifty (250) parcels of private land located along the 115kV transmission line, many of which require title curative action for purposes of perfecting assignable easement rights or rights-of-way for the Purchasers. APAd shall be responsible for acquiring assignable easement rights or rights-of-way across these lands, for subsequent assignment to Purchasers.

5. Reservoir.

Eklutna Lake as designated on the map is the reservoir described in the body of the Agreement.

TERMS OF MEA OFFER

The MEA Offer must provide that the effectiveness of any purchase by MEA of the MEA Proportionate Interest and the effectiveness of any binding power purchase agreement between Seller and MEA with respect to the MEA Proportionate Interest must be conditioned on the occurrence of the Closing under the Asset Purchase Agreement.

Any purchase option for the MEA Portion in a PPA must be on terms and conditions substantially the same as those set forth in Section 14.3.

EXHIBIT D

ANNUAL PAYMENTS

Annual Payments to the Municipality of Anchorage: 35-Year Term

	PPA Annual Payments (Nominal $)	
	Chugach Portion: 100%	*Chugach Portion: 64.29%*
Contract Year		
1	$3,908,021	$2,512,467
2	$3,947,101	$2,537,591
3	$3,986,572	$2,562,967
4	$4,026,438	$2,588,597
5	$4,066,702	$2,614,483
6	$4,107,369	$2,640,628
7	$4,148,443	$2,667,034
8	$4,189,927	$2,693,704
9	$4,231,827	$2,720,641
10	$4,274,145	$2,747,848
11	$4,316,886	$2,775,326
12	$4,360,055	$2,803,080
13	$4,403,656	$2,831,110
14	$4,447,692	$2,859,421
15	$4,492,169	$2,888,016
16	$4,537,091	$2,916,896
17	$4,582,462	$2,946,065
18	$4,628,287	$2,975,525
19	$4,674,569	$3,005,281
20	$4,721,315	$3,035,334
21	$4,768,528	$3,065,687
22	$4,816,214	$3,096,344
23	$4,864,376	$3,127,307
24	$4,913,019	$3,158,580
25	$4,962,150	$3,190,166
26	$5,011,771	$3,222,068
27	$5,061,889	$3,254,288
28	$5,112,508	$3,286,831
29	$5,163,633	$3,319,700
30	$5,215,269	$3,352,897
31	$5,267,422	$3,386,426
32	$5,320,096	$3,420,290
33	$5,373,297	$3,454,493
34	$5,427,030	$3,489,038
35	$5,481,300	$3,523,928

In the event that the Chugach Portion is neither 100% or 64.29%, the Annual Payment shall be pro-rated based on the percentage of the Chugach Portion.

Exhibit D-2

EXHIBIT E

INSURANCE COVERAGE

INSURANCE PROVISIONS SHOULD PROVIDE THAT CASUALTY COVERAGE SHOULD EQUAL OR EXCEED THE NET PRESENT VALUE OF THE AMOUNT OF REMAINING ANNUAL PAYMENTS USING A 5% DISCOUNT RATE; PROVIDED THAT IN NO EVENT SHALL PURCHASER BE REQUIRED TO PROVIDE CASUALTY INSURANCE IN EXCESS OF THE ACTUAL CASH VALUE OF THE CHUGACH PORTION.

OFFICERS' CERTIFICATE
RELATING TO EXCLUDABLE PROPERTY
(Eklutna PPA Collateral)

Chugach Electric Association, Inc.

This Officers' Certificate Relating to Excludable Property (this "Officers' Certificate") is provided pursuant to the Second Amended and Restated Indenture dated as of January 20, 2011, between Chugach Electric Association, Inc. (the "***Company***"), and U.S. Bank National Association, as trustee (the "***Trustee***"), as amended and supplemented (as so amended and supplemented, the "***Indenture***"). Capitalized terms not otherwise defined in this Officers' Certificate shall have the meanings assigned to them in the Indenture.

The Company has entered into that certain Eklutna Power Purchase Agreement dated as of December 28, 2018 (the "Power Purchase Agreement") between the Company and the Municipality of Anchorage, a political subdivision organized under the laws of the State of Alaska ("Seller"), pursuant to which the Company will purchase the Power (as defined in the Power Purchase Agreement) produced by that portion of the Eklutna Hydroelectric Project owned by Seller and designated in the Power Purchase Agreement as the "Chugach Portion".

Solely as a precaution in the event that the Power Purchase Agreement should be construed as a secured financing such that the Company shall be deemed to have acquired title to the Chugach Portion at any time (other than by exercise of an express purchase option granted under the terms of the Power Purchase Agreement), Purchaser has granted to Seller a protective security interest in and to the Collateral as defined in the Power Purchase Agreement.

Under the Power Purchase Agreement, the Company has an option to purchase the Chugach Portion at a future date. If the Company exercises its option, it will obtain a release from the Seller of any security interest in the Chugach Portion.

Pursuant to Section 1.6 of the Indenture, each of the undersigned officers of the Company hereby states that:

(a) He/she has read each of the conditions, covenants and relevant definitions contained in the Indenture, relating to the matters addressed in this Certificate;

(b) His/her opinions expressed below are based upon such review of the Indenture and on his/her knowledge of the Company acquired in his/her capacity noted below; and

(c) In his/her opinion, he/she has made such examination or investigation as is necessary to enable him/her to express an informed opinion with respect to the matters stated below.

In accordance with the definition of "Excludable Property" set forth in Section 1.1 of the Indenture, each of the undersigned, acting in his/her capacity as an Officer of the Company, hereby certifies that:

1. the property described in Exhibit A attached to this Officers' Certificate is not to become subject to the lien of the Indenture; and

2. should the Company not have the use of such property it would remain capable of complying with the requirements of Section 14.14 of the Indenture.

[REMAINDER OF PAGE INTENTIONALLY OMITTED]

The undersigned officers have executed the foregoing Officers' Certificate as of the date set forth below.

Dated: December 28, 2018.

Page 1 of 2

Lands, Easements and Rights-of-Way

Exhibit A consists of this narrative (pages 1 and 2 of 2) and the map prepared by BLM, signed and dated February 3, 1989.

This exhibit describes and displays present land status for the Eklutna Hydroelectric Project and describes in general terms the conveyances of land and land rights contemplated in the purchase agreement.

1. BLM - managed lands and military lands used for Eklutna Project for which BLM is to provide APAd rights-of-way sufficient for operation, maintenance, repair and replacement of Eklutna facilities, such rights-of-way to be assigned by APAd to the Purchasers.

Legend Symbols and Description.

Withdrawals. Refers to approximately 863 acres of public lands withdrawn for Eklutna at the "Intake Area," "Power Tunnel," "Eklutna Powerplant" and "Anchorage Substation." The total acreage is comprised of the following land:

a. Approximately 320 acres withdrawn for the "Power Tunnel" under Public Land Order 1231 dated September 28, 1955.

b. Approximately 230 acres utilized for the "Intake Area" and approximately 60 acres for a portion of "Eklutna Powerplant" as described by ANCSA 3(e) determination AA-51183 dated July 30, 1986.

c. Approximately 243 acres utilized for "Eklutna Powerplant" as described by ANCSA 3(e) determination AA-42534 dated September 1, 1982.

d. Approximately 10 acres withdrawn for "Anchorage Substation" under Secretarial Order dated April 4, 1952.

State Land-R/W. Refers to rights-of-way across State-selected lands covering the transmission line east of "Eklutna Powerplant" to the Knik River.

Military Land-R/W. Refers to rights-of-way across military lands used for Eklutna transmission lines.

Acquired-3(e). Refers to approximately 2.5 acres of acquired land used for "Reed Substation" as described by ANCSA 3(e) determination AA-45155 dated July 30, 1985.

2. ANCSA 17(b) Easements.

Map symbol: Native Land - 17(b) Easements.

Refers to rights-of-way that are reserved for portions of the 115kV transmission line, access roads and other Eklutna facilities located on Native corporation lands, and exist as easement reservations in the ANCSA conveyances to the Native corporations pursuant to Section 17(b) of ANCSA. These easements will not be altered by the sale of Eklutna and the Purchasers may use these easements for their intended purposes.

3. APAd Acquired Land and Easements.

Refers to land and easements acquired by the Bureau of Reclamation (predecessor of APAd) during construction of Eklutna and now controlled by APAd. APAd will assign the land and easements to the Purchasers.

Legend Symbols and Description:

Acquired. Refers to approximately 0.8 acres of land owned by APAd at Palmer Substation.

Acquired-Easements. Refers to approximately 33 easements across private lands acquired by the Bureau of Reclamation (predecessor of APAd) and now held by APAd.

4. Other Easements on Private Land.

Map [Symbol]: Note: Other Easements on Private Lands To Be Acquired - See Exhibit A Narrative

Refers to approximately two hundred and fifty (250) parcels of private land located along the 115kV transmission line, many of which require title curative action for purposes of perfecting assignable easement rights or rights-of-way for the Purchasers. APAd shall be responsible for acquiring assignable easement rights or rights-of-way across these lands, for subsequent assignment to Purchasers.

5. Reservoir.

Eklutna Lake as designated on the map is the reservoir described in the body of the Agreement.

PROTECTIVE PARTIAL RELEASE BY U.S. BANK NATIONAL ASSOCIATION AS TRUSTEE TO CHUGACH ELECTRIC ASSOCIATION, INC. FROM LIEN OF THE SECOND AMENDED AND RESTATED INDENTURE OF TRUST DATED AS OF JANUARY 20, 2011 AS AMENDED AND SUPPLEMENTED

KNOW ALL MEN BY THESE PRESENTS: That

WHEREAS, Chugach Electric Association, Inc., an Alaska electric cooperative (the "Company"), executed and delivered as of January 20, 2011, to U.S. Bank National Association, as Trustee, a certain Second Amended and Restated Indenture of Trust, as amended and supplemented (hereinafter called the "Indenture"); and

WHEREAS, the Company has entered into that certain Eklutna Power Purchase Agreement dated as of December ___, 2018 (the "Power Purchase Agreement") between the Company and the Municipality of Anchorage, a political subdivision organized under the laws of the State of Alaska ("Seller"), pursuant to which the Company will purchase the Power (as defined in the Power Purchase Agreement) produced by that portion of the Eklutna Hydroelectric Project owned by Seller and designated in the Power Purchase Agreement as the "Chugach Portion;" and

WHEREAS, solely as a precaution in the event that the Power Purchase Agreement should be construed as a secured financing such that the Company shall be deemed to have acquired title to the Chugach Portion at any time (other than by exercise of an express purchase option granted under the terms of the Power Purchase Agreement), Purchaser has granted to

Seller a protective security interest in and to the Collateral as defined in the Power Purchase Agreement; and

WHEREAS, it has been certified by the Company to the Trustee in accordance with the Indenture that the Collateral is not to become subject to the lien of the Indenture and that the Company will remain capable of complying with the requirements of Section 14.14 of the Indenture (the "Officers' Certificate Relating to Excludable Property (Eklutna PPA Collateral))", and the Trustee is in receipt of such certificate; and

WHEREAS, Section 6.10 of the Indenture provides that upon receipt of the Officers' Certificate Relating to Excludable Property (Eklutna PPA Collateral), the Trustee shall execute and deliver a release to be recorded, registered or filed evidencing that such Excludable Property is not subject to the lien of the Indenture.

NOW, THEREFORE, U.S. Bank National Association, in consideration of the premises, and pursuant to the authority vested in it as Trustee under the Indenture, does hereby release, remise and quitclaim unto the Company all the right, title and interest of such Trustee in and to the properties described in Attachment A attached hereto.

TO HAVE AND TO HOLD the property hereby released and remised to the Company, its successors and assigns (but only to the extent that such property is adjudged at any time in the future to be property of the Company, its successors and assigns), to its and their own proper use, benefit and behoof forever, free, clear and discharged of and from any and all liens and claims under and by virtue of the Indenture.

FURTHER PROVIDED, that the Company is authorized to file a financing statement amendment (including a copy of this partial release) on behalf of the Trustee in the appropriate offices of the State of Alaska that deletes the properties described in Attachment A attached hereto from the description of collateral subject to the security interest of the Indenture.

PROVIDED, HOWEVER, that nothing herein contained shall be construed to affect the residue of the security held by the Trustee, by virtue of the Indenture, or to release the payment of any part of the moneys, principal and interest, thereby secured and that may now remain unpaid.

The recitals herein contained are made on representation of the Company and the Trustee assumes no responsibility in respect thereof. This release is executed by the Trustee without any covenant or warranty of title, or any other covenant, warranty or representation, either expressed or implied, on its part, and shall be without recourse against the Trustee in any event whatsoever.

[Remainder of page intentionally left blank.]

IN WITNESS WHEREOF, U.S. Bank National Association has caused its corporate name to be hereunto affixed, and this instrument to be signed and sealed by one of its Vice Presidents on this 20th day of December, 2018.

OFFICERS' CERTIFICATE
RELATING TO EXCLUDABLE PROPERTY
(Eklutna PPA Collateral)

Chugach Electric Association, Inc.

This Officers' Certificate Relating to Excludable Property (this "Officers' Certificate") is provided pursuant to the Second Amended and Restated Indenture dated as of January 20, 2011, between Chugach Electric Association, Inc. (the "***Company***"), and U.S. Bank National Association, as trustee (the "***Trustee***"), as amended and supplemented (as so amended and supplemented, the "***Indenture***"). Capitalized terms not otherwise defined in this Officers' Certificate shall have the meanings assigned to them in the Indenture.

The Company has entered into that certain Eklutna Power Purchase Agreement dated as of December 28, 2018 (the "Power Purchase Agreement") between the Company and the Municipality of Anchorage, a political subdivision organized under the laws of the State of Alaska ("Seller"), pursuant to which the Company will purchase the Power (as defined in the Power Purchase Agreement) produced by that portion of the Eklutna Hydroelectric Project owned by Seller and designated in the Power Purchase Agreement as the "Chugach Portion".

Solely as a precaution in the event that the Power Purchase Agreement should be construed as a secured financing such that the Company shall be deemed to have acquired title to the Chugach Portion at any time (other than by exercise of an express purchase option granted under the terms of the Power Purchase Agreement), Purchaser has granted to Seller a protective security interest in and to the Collateral as defined in the Power Purchase Agreement.

Under the Power Purchase Agreement, the Company has an option to purchase the Chugach Portion at a future date. If the Company exercises its option, it will obtain a release from the Seller of any security interest in the Chugach Portion.

Pursuant to Section 1.6 of the Indenture, each of the undersigned officers of the Company hereby states that:

(a) He/she has read each of the conditions, covenants and relevant definitions contained in the Indenture, relating to the matters addressed in this Certificate;

(b) His/her opinions expressed below are based upon such review of the Indenture and on his/her knowledge of the Company acquired in his/her capacity noted below; and

(c) In his/her opinion, he/she has made such examination or investigation as is necessary to enable him/her to express an informed opinion with respect to the matters stated below.

In accordance with the definition of "Excludable Property" set forth in Section 1.1 of the Indenture, each of the undersigned, acting in his/her capacity as an Officer of the Company, hereby certifies that:

1. the property described in Exhibit A attached to this Officers' Certificate is not to become subject to the lien of the Indenture; and

2. should the Company not have the use of such property it would remain capable of complying with the requirements of Section 14.14 of the Indenture.

[REMAINDER OF PAGE INTENTIONALLY OMITTED]

The undersigned officers have executed the foregoing Officers' Certificate as of the date set forth below.

Dated: December 28, 2018.

PROTECTIVE PARTIAL RELEASE BY U.S. BANK NATIONAL ASSOCIATION AS TRUSTEE TO CHUGACH ELECTRIC ASSOCIATION, INC. FROM LIEN OF THE SECOND AMENDED AND RESTATED INDENTURE OF TRUST DATED AS OF JANUARY 20, 2011 AS AMENDED AND SUPPLEMENTED

KNOW ALL MEN BY THESE PRESENTS: That

WHEREAS, Chugach Electric Association, Inc., an Alaska electric cooperative (the "Company"), executed and delivered as of January 20, 2011, to U.S. Bank National Association, as Trustee, a certain Second Amended and Restated Indenture of Trust, as amended and supplemented (hereinafter called the "Indenture"); and

WHEREAS, the Company has entered into that certain Eklutna Power Purchase Agreement dated as of December ___, 2018 (the "Power Purchase Agreement") between the Company and the Municipality of Anchorage, a political subdivision organized under the laws of the State of Alaska ("Seller"), pursuant to which the Company will purchase the Power (as defined in the Power Purchase Agreement) produced by that portion of the Eklutna Hydroelectric Project owned by Seller and designated in the Power Purchase Agreement as the "Chugach Portion;" and

WHEREAS, solely as a precaution in the event that the Power Purchase Agreement should be construed as a secured financing such that the Company shall be deemed to have acquired title to the Chugach Portion at any time (other than by exercise of an express purchase option granted under the terms of the Power Purchase Agreement), Purchaser has granted to

Seller a protective security interest in and to the Collateral as defined in the Power Purchase Agreement; and

WHEREAS, it has been certified by the Company to the Trustee in accordance with the Indenture that the Collateral is not to become subject to the lien of the Indenture and that the Company will remain capable of complying with the requirements of Section 14.14 of the Indenture (the "Officers' Certificate Relating to Excludable Property (Eklutna PPA Collateral))", and the Trustee is in receipt of such certificate; and

WHEREAS, Section 6.10 of the Indenture provides that upon receipt of the Officers' Certificate Relating to Excludable Property (Eklutna PPA Collateral), the Trustee shall execute and deliver a release to be recorded, registered or filed evidencing that such Excludable Property is not subject to the lien of the Indenture.

NOW, THEREFORE, U.S. Bank National Association, in consideration of the premises, and pursuant to the authority vested in it as Trustee under the Indenture, does hereby release, remise and quitclaim unto the Company all the right, title and interest of such Trustee in and to the properties described in Attachment A attached hereto.

TO HAVE AND TO HOLD the property hereby released and remised to the Company, its successors and assigns (but only to the extent that such property is adjudged at any time in the future to be property of the Company, its successors and assigns), to its and their own proper use, benefit and behoof forever, free, clear and discharged of and from any and all liens and claims under and by virtue of the Indenture.

FURTHER PROVIDED, that the Company is authorized to file a financing statement amendment (including a copy of this partial release) on behalf of the Trustee in the appropriate offices of the State of Alaska that deletes the properties described in Attachment A attached hereto from the description of collateral subject to the security interest of the Indenture.

PROVIDED, HOWEVER, that nothing herein contained shall be construed to affect the residue of the security held by the Trustee, by virtue of the Indenture, or to release the payment of any part of the moneys, principal and interest, thereby secured and that may now remain unpaid.

The recitals herein contained are made on representation of the Company and the Trustee assumes no responsibility in respect thereof. This release is executed by the Trustee without any covenant or warranty of title, or any other covenant, warranty or representation, either expressed or implied, on its part, and shall be without recourse against the Trustee in any event whatsoever.

[INSERT SAME FACILITY DESCRIPTION THAT WILL BE EXHIBIT B TO THE POWER PURCHASE AGREEMENT]

Eklutna Purchase Agreement
Exhibit A

August 2, 1989
Page 1 of 2

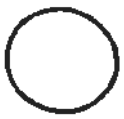
Lands, Easements and Rights-of-Way

Exhibit A consists of this narrative (pages 1 and 2 of 2) and the map prepared by BLM, signed and dated February 3, 1989.

This exhibit describes and displays present land status for the Eklutna Hydroelectric Project and describes in general terms the conveyances of land and land rights contemplated in the purchase agreement.

1. BLM - managed lands and military lands used for Eklutna Project for which BLM is to provide APAd rights-of-way sufficient for operation, maintenance, repair and replacement of Eklutna facilities, such rights-of-way to be assigned by APAd to the Purchasers.

Legend Symbols and Description.



Withdrawals. Refers to approximately 863 acres of public lands withdrawn for Eklutna at the "Intake Area," "Power Tunnel," "Eklutna Powerplant" and "Anchorage Substation." The total acreage is comprised of the following land:

a. Approximately 320 acres withdrawn for the "Power Tunnel" under Public Land Order 1231 dated September 28, 1955.

b. Approximately 230 acres utilized for the "Intake Area" and approximately 60 acres for a portion of "Eklutna Powerplant" as described by ANCSA 3(e) determination AA-51183 dated July 30, 1986.

c. Approximately 243 acres utilized for "Eklutna Powerplant" as described by ANCSA 3(e) determination AA-42534 dated September 1, 1982.

d. Approximately 10 acres withdrawn for "Anchorage Substation" under Secretarial Order dated April 4, 1952.

State Land-R/W. Refers to rights-of-way across State-selected lands covering the transmission line east of "Eklutna Powerplant" to the Knik River.

Military Land-R/W. Refers to rights-of-way across military lands used for Eklutna transmission lines.

Acquired-3(e). Refers to approximately 2.5 acres of acquired land used for "Reed Substation" as described by ANCSA 3(e) determination AA-45155 dated July 30, 1985.

2. ANCSA 17(b) Easements.

Map symbol: Native Land - 17(b) Easements.

Refers to rights-of-way that are reserved for portions of the 115kV transmission line, access roads and other Eklutna facilities located on Native corporation lands, and exist as easement reservations in the ANCSA conveyances to the Native corporations pursuant to Section 17(b) of ANCSA. These easements will not be altered by the sale of Eklutna and the Purchasers may use these easements for their intended purposes.

3. APAd Acquired Land and Easements.

Refers to land and easements acquired by the Bureau of Reclamation (predecessor of APAd) during construction of Eklutna and now controlled by APAd. APAd will assign the land and easements to the Purchasers.

Legend Symbols and Description:

Acquired. Refers to approximately 0.8 acres of land owned by APAd at Palmer Substation.

Acquired-Easements. Refers to approximately 33 easements across private lands acquired by the Bureau of Reclamation (predecessor of APAd) and now held by APAd.

4. Other Easements on Private Land.

Map [Symbol]: Note: Other Easements on Private Lands To Be Acquired - See Exhibit A Narrative

Refers to approximately two hundred and fifty (250) parcels of private land located along the 115kV transmission line, many of which require title curative action for purposes of perfecting assignable easement rights or rights-of-way for the Purchasers. APAd shall be responsible for acquiring assignable easement rights or rights-of-way across these lands, for subsequent assignment to Purchasers.

5. Reservoir.

Eklutna Lake as designated on the map is the reservoir described in the body of the Agreement.

AMENDMENT NO. 1 TO EKLUTNA POWER PURCHASE AGREEMENT

This AMENDMENT NO. 1 TO EKLUTNA POWER PURCHASE AGREEMENT, dated as of the 27th day of September, 2019 (this "**Eklutna PPA Amendment**"), is made and entered into by and between (i) **CHUGACH ELECTRIC ASSOCIATION, INC.**, an Alaska not-for-profit electric cooperative corporation ("**Purchaser**"), and (ii) the **MUNICIPALITY OF ANCHORAGE,** a political subdivision organized under the laws of the State of Alaska ("**Seller**"). Purchaser and Seller are hereinafter referred to individually as a "**Party**" and collectively as the "**Parties**".

RECITALS

WHEREAS, Purchaser and Seller entered into that certain Eklutna Power Purchase Agreement dated as of December 28, 2018 (the "**Eklutna PPA**");

WHEREAS, Section 15.7 of the Eklutna PPA provides that Purchaser and Seller may amend the Eklutna PPA upon the execution and delivery of a written agreement executed by each Party; and

NOW, THEREFORE, pursuant to Section 15.7 of the Eklutna PPA and in consideration for the premises and agreements hereinafter set forth, the Parties, intending to be legally bound, agree as follows:

1. Revision to Section 15.11. The following sentence is added at the end of Section 15.11 of the Eklutna PPA:

> It is the understanding of the Parties that this PPA, as a wholesale power agreement between public utilities governed by AS 42.05.431(b), will not take effect without the prior approval of the RCA, and will at all times after any such approval be subject to the RCA's continuing authority over wholesale power agreements.

2. Effective Date and Incorporation of Terms of Eklutna PPA. This Amendment shall be deemed effective as of the Effective Date as defined in Exhibit A to the Eklutna PPA and, without in any way limiting the effect of the amendment set forth in Section 1 of this Amendment, shall be subject to all the terms and conditions of the Eklutna PPA.

3. Counterparts. This Amendment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Amendment delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Amendment.

[Remainder of the page intentionally left blank]

IN WITNESS WHEREOF, the Parties have caused this Amendment to be executed as of the date first written above by their respective officers and officials thereunto duly authorized.

Exhibit 2

AMENDMENT NO. 2 TO
EKLUTNA POWER PURCHASE AGREEMENT

AMENDMENT NO. 2 TO EKLUTNA POWER PURCHASE AGREEMENT

This AMENDMENT NO. 2 TO EKLUTNA POWER PURCHASE AGREEMENT, dated as of the 28th day of October, 2019 (this "**Eklutna PPA Amendment**"), is made and entered into by and between (i) **CHUGACH ELECTRIC ASSOCIATION, INC.**, an Alaska not-for-profit electric cooperative corporation ("**Purchaser**"), and (ii) the **MUNICIPALITY OF ANCHORAGE,** a political subdivision organized under the laws of the State of Alaska ("**Seller**"). Purchaser and Seller are hereinafter referred to individually as a "**Party**" and collectively as the "**Parties**".

RECITALS

WHEREAS, Purchaser and Seller entered into that certain Eklutna Power Purchase Agreement dated as of December 28, 2018 (the "**Eklutna PPA**");

WHEREAS, Section 15.7 of the Eklutna PPA provides that Purchaser and Seller may amend the Eklutna PPA upon the execution and delivery of a written agreement executed by each Party; and

NOW, THEREFORE, pursuant to Section 15.7 of the Eklutna PPA and in consideration for the premises and agreements hereinafter set forth, the Parties, intending to be legally bound, agree as follows:

1. Revision to Section 10.1. Section 10.1 of the Eklutna PPA is deleted in its entirety and replaced with the following:

> **Section 10.1 Dispute Resolution**. In the event of any dispute arising under this PPA (a "**Dispute**"), within ten (10) Business Days following Notice by either Party, (i) each Party shall appoint a representative, and (ii) the representatives shall meet, negotiate and attempt in good faith to resolve the Dispute quickly, informally and inexpensively. In the event the representatives cannot resolve the Dispute within thirty (30) Days after the first meeting, either Party may request that consideration and resolution of the Dispute be transferred to a designated representative of each Party's senior management. Within ten (10) Days following such a request, each Party shall submit a written summary of the Dispute describing the issues and claims to a senior officer of each Party designated to address the Dispute. Within ten (10) Business Days after receipt of each Party's Dispute summaries, the senior management representatives for both Parties shall negotiate in good faith to resolve the Dispute. If such senior management representatives are unable to resolve the Dispute within thirty (30) Days thereafter, either Party may pursue any available legal remedies.

2. Effective Date and Incorporation of Terms of Eklutna PPA. This Amendment shall be deemed effective as of the Effective Date as defined in Exhibit A to the Eklutna PPA and, without in any way limiting the effect of the amendment set forth in Section 1 of this Amendment, shall be subject to all the terms and conditions of the Eklutna PPA.

3. Counterparts. This Amendment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Amendment delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Amendment.

[*Remainder of the page intentionally left blank*]

IN WITNESS WHEREOF, the Parties have caused this Amendment to be executed as of the date first written above by their respective officers and officials thereunto duly authorized.

Exhibit 3

Form of Amendment No. 3 to the Eklutna Power Purchase Agreement

AMENDMENT NO. 3 TO EKLUTNA POWER PURCHASE AGREEMENT

This AMENDMENT NO. 3 TO EKLUTNA POWER PURCHASE AGREEMENT, dated as of the [●] day of October, 2019 (this "**Eklutna PPA Amendment**"), is made and entered into by and between (i) **CHUGACH ELECTRIC ASSOCIATION, INC.**, an Alaska not-for-profit electric cooperative corporation ("**Purchaser**"), and (ii) the **MUNICIPALITY OF ANCHORAGE,** a political subdivision organized under the laws of the State of Alaska ("**Seller**"). Purchaser and Seller are hereinafter referred to individually as a "**Party**" and collectively as the "**Parties**".

RECITALS

WHEREAS, Purchaser and Seller entered into that certain Eklutna Power Purchase Agreement dated as of December 28, 2018 (the "**Eklutna PPA**");

WHEREAS, Section 15.7 of the Eklutna PPA provides that Purchaser and Seller may amend the Eklutna PPA upon the execution and delivery of a written agreement executed by each Party; and

NOW, THEREFORE, pursuant to Section 15.7 of the Eklutna PPA and Section III.E of the Stipulation (as defined in Exhibit A as amended pursuant to this Eklutna PPA Amendment), and in consideration for the premises and agreements in the Stipulation and as hereinafter set forth, the Parties, intending to be legally bound, agree as follows:

1. Revision to Section 8.2. Section 8.2 of the Eklutna PPA is hereby amended by the addition of a new subsection (C) reading in its entirety as follows:

> (C) If (i) Seller has not, on or before the fifth anniversary of the Closing (as defined in the Asset Purchase Agreement) (the "**Expenditure Deadline**"), received an appropriation of funds from the Assembly of Seller in the amount of $15 million for purposes of the planning, permitting, design, and construction (including any required demolition of existing structures) of the Alaska Center for Treatment, all as provided in Section III.E of the Stipulation (such purposes, the "**Required Use**"), or such appropriation ceases, at any time prior to the expenditure by Seller of the full amount of such $15 million for the Required Use, to remain in full force and effect, (ii) such funds have not, on or before the Expenditure Deadline, been deposited into a dedicated fund for use only for the Required Use, or any such funds (other than any of such funds that have been expended for the Required Use) cease, at any time prior to the expenditure by Seller of the full amount of such $15 million for the Required Use, to remain in such dedicated fund, (iii) one or more contracts requiring payment by Seller of the entire unexpended amount of such funds for the Required Use has not, on or before the Expenditure Deadline, been awarded by Seller pursuant to Title 7 of Anchorage Municipal Code, or (iv) Seller has not, on or before the Expenditure Deadline, become, or Seller ceases, at any time prior to the expenditure by Seller of the full amount of such $15 million for the Required Use, to remain, a party to such contract or contracts, then Purchaser shall offset against

any amounts due to Seller under this PPA any portion of such $15 million amount that has not been spent by Seller for the Required Use.

2. Amendment of Exhibit A. Exhibit A to the Eklutna PPA is hereby amended to add the following new defined terms:

"**Expenditure Deadline**" has the meaning set forth in Section 8.2(C).

"**Stipulation**" means the Stipulation Resolving All Issues entered into by and among Seller, Purchaser, Providence Health & Services, the Federal Executive Agencies, MEA, Homer Electric Association, Inc., Alaska Energy Authority, and ENSTAR Natural Gas Company, a Division of SEMCO Energy, Inc. dated October [●], 2019, and accepted and approved by the RCA on [●].

"**Required Use**" has the meaning set forth in Section 8.2(C).

3. Effective Date and Incorporation of Terms of Eklutna PPA. This Amendment shall be deemed effective as of the Effective Date as defined in Exhibit A to the Eklutna PPA and, without in any way limiting the effect of the amendment set forth in Section 1 of this Amendment, shall be subject to all the terms and conditions of the Eklutna PPA.

4. Counterparts. This Amendment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Amendment delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Amendment.

[*Remainder of the page intentionally left blank*]

IN WITNESS WHEREOF, the Parties have caused this Amendment to be executed as of the date first written above by their respective officers and officials thereunto duly authorized.

BRU FUEL AGREEMENT

This BRU Fuel Agreement (this "**Agreement**"), dated as of December 28, 2018, is made and entered into between Municipality of Anchorage, Alaska, a political subdivision organized under the laws of the State of Alaska ("**Municipality**"), and Chugach Electric Association, Inc., a not-for-profit electric cooperative corporation organized under the laws of the State of Alaska ("**Chugach**").

RECITALS

WHEREAS, Municipality and Chugach have entered into that certain Asset Purchase and Sale Agreement (the "**Asset Purchase Agreement**") dated as of December 28, 2018 pursuant to which Chugach has acquired substantially all of the assets of Municipality's electric utility referred to as Municipal Light and Power ("**ML&P**").

WHEREAS, as an integral part of the transactions contemplated by the Asset Purchase Agreement, Chugach and Municipality have agreed to enter into this Agreement to provide for the pass-through of BRU costs of production to customers of Chugach after the Closing as stated herein.

NOW, THEREFORE, in consideration of the mutual covenants and agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree as follows:

ARTICLE I
DEFINITIONS

Capitalized terms used but not defined herein have the meanings assigned to them in the Asset Purchase Agreement. In addition, the following terms have the meanings specified or referred to in this ARTICLE I:

"**Applicable Test Period**" means the annual period beginning on January 1 and ending on December 31 of each year.

"**Cost of Production**" means the allocable cost of production for the ML&P BRU Gas using all necessary capital costs and operating and maintenance expenses associated with the BRU Interest.

"**Excess BRU Gas**" means any ML&P BRU Gas not used by retail customers of Chugach in the Legacy Territory as and when such ML&P BRU Gas is produced.

"**Legacy Territory**" means ML&P's retail service territory as in existence as of immediately prior to the Closing

"**ML&P BRU Gas**" means any and all gas produced that is attributable to the BRU Interest acquired by Chugach pursuant to the Asset Purchase Agreement.

"**ML&P BRU Gas Transfer Price**" means the quotient obtained by dividing (i) the estimated revenue requirement to generate ML&P BRU Gas during the Applicable Test Period by (ii) the forecasted production for such ML&P BRU Gas during the Applicable Test Period.

ARTICLE II
USAGE OF ML&P BRU FUEL

Section 2.01 ML&P BRU Gas through December 31, 2033. From the Closing Date through and including December 31, 2033, Chugach will use (i) ML&P BRU Gas to serve retail customers of Chugach within the Legacy Territory at the ML&P BRU Gas Transfer Price and (ii) any Excess BRU Gas to serve other customers of Chugach at the ML&P BRU Gas Transfer Price, and will credit the proceeds of such use to ML&P's Deferred Regulatory Liability from Gas Sales account for the benefit of retail customers of Buyer within the ML&P legacy service area.

Section 2.02 ML&P BRU Gas after December 31, 2033. Chugach's obligations under Section 2.01 shall terminate on January 1, 2034. Beginning on January 1, 2034 and continuing thereafter, all Cost of Production will be recovered from all Chugach retail customers inside and outside of the Legacy Territory at the same rate.

ARTICLE III

MISCELLANEOUS

Section 3.01 Notices. All notices, requests, consents, claims, demands, waivers and other communications hereunder shall be in writing and shall be deemed to have been given (a) when delivered by hand (with written confirmation of receipt); (b) when received by the addressee if sent by a nationally recognized overnight courier (receipt requested); (c) on the date sent by e-mail of a PDF document (with confirmation of transmission) if sent during normal business hours of the recipient, and on the next Business Day if sent after normal business hours of the recipient or (d) on the third day after the date mailed, by certified or registered mail, return receipt requested, postage prepaid. Such communications must be sent to the respective parties at the following addresses (or at such other address for a party as shall be specified in a notice given in accordance with this Section 3.01):

If to Municipality:

Municipality of Anchorage
632 W. 6th Avenue, Suite 850
Anchorage, AK 99501
E-mail: william.falsey@anchorageak.gov

with a copy to:	Municipality of Anchorage 632 W. 6th Avenue, Suite 850 Anchorage, AK 99501 E-mail: rebecca.windtpearson@anchorageak.gov Attention: Rebecca A. Windt Pearson, Municipal Attorney
and a copy to:	K&L Gates LLP 925 Fourth Avenue, Suite 2900 Seattle, WA 98104-1158 E-mail: eric.freedman@klgates.com Attention: Eric E. Freedman
If to Chugach:	Chugach Electric Association, Inc. 5601 Electron Drive Anchorage, AK 99518 E-mail: Lee_Thibert@chugachelectric.com Attention: Lee D. Thibert, Chief Executive Officer
with a copy to:	Chugach Electric Association, Inc. 5601 Electron Drive Anchorage, AK 99518 E-mail: Matthew_Clarkson@chugachelectric.com Attention: Matthew C. Clarkson, General Counsel
and a copy to:	Stinson Leonard Street LLP Suite 2600 50 South Sixth Street Minneapolis, MN 55402 E-mail: james.bertrand@stinson.com Attention: James J. Bertrand

Section 3.02 Interpretation. For purposes of this Agreement, (a) the words "include," "includes" and "including" shall be deemed to be followed by the words "without limitation"; (b) the word "or" is not exclusive; and (c) the words "herein," "hereof," "hereby," "hereto" and "hereunder" refer to this Agreement as a whole. Unless the context otherwise requires, references herein: (x) to Articles, Sections and Exhibits means the Articles, Sections and Exhibits attached to this Agreement; (y) to an agreement, instrument or other document means such agreement, instrument or other document as amended, supplemented and modified from time to time to the extent permitted by the provisions thereof and (z) to a statute means such statute as amended from time to time and includes any successor legislation thereto and any regulations promulgated thereunder. This Agreement shall be

construed without regard to any presumption or rule requiring construction or interpretation against the party drafting an instrument or causing any instrument to be drafted.

Section 3.03 Headings. The headings in this Agreement are for reference only and shall not affect the interpretation of this Agreement.

Section 3.04 Severability. If any term or provision of this Agreement is invalid, illegal or unenforceable in any jurisdiction, such invalidity, illegality or unenforceability shall not affect any other term or provision of this Agreement or invalidate or render unenforceable such term or provision in any other jurisdiction. Upon such determination that any term or other provision is invalid, illegal or unenforceable, the parties hereto shall negotiate in good faith to modify this Agreement so as to effect the original intent of the parties as closely as possible in a mutually acceptable manner in order that the transactions contemplated hereby be consummated as originally contemplated to the greatest extent possible.

Section 3.05 Entire Agreement. This Agreement constitutes the sole and entire agreement of the parties to this Agreement with respect to the subject matter contained herein, and supersedes all prior and contemporaneous understandings and agreements, both written and oral, with respect to such subject matter. Notwithstanding the previous sentence, in the event of a conflict between the terms of this Agreement and the Asset Purchase Agreement, the terms of the Asset Purchase Agreement shall control.

Section 3.06 Successors and Assigns. This Agreement shall be binding upon and shall inure to the benefit of the parties hereto and their respective successors and permitted assigns. Neither party may assign its rights or obligations hereunder without the prior written consent of the other party, which consent shall not be unreasonably withheld or delayed, except that Chugach may assign this Agreement to any Affiliate or any Person that acquires all or substantially all of its assets, whether by merger, asset purchase or otherwise. No assignment shall relieve the assigning party of any of its obligations hereunder.

Section 3.07 No Third-party Beneficiaries. This Agreement is for the sole benefit of the parties hereto and their respective successors and permitted assigns and nothing herein, express or implied, is intended to or shall confer upon any other Person or entity any legal or equitable right, benefit or remedy of any nature whatsoever under or by reason of this Agreement.

Section 3.08 Amendment and Modification; Waiver. This Agreement may only be amended, modified or supplemented by an agreement in writing signed by each party hereto. No waiver by any party of any of the provisions hereof shall be effective unless explicitly set forth in writing and signed by the party so waiving. No waiver by any party shall operate or be construed as a waiver in respect of any failure, breach or default not expressly identified by such written waiver, whether of a similar or different character, and whether occurring before or after that waiver. No failure to exercise, or delay in exercising, any right, remedy, power or privilege arising from this Agreement shall operate or be construed as a waiver thereof; nor shall any single or partial exercise of any right, remedy, power or privilege hereunder preclude any other or further exercise thereof or the exercise of any other right, remedy, power or privilege.

Section 3.09 Governing Law; Submission to Jurisdiction; Waiver of Jury Trial.

(a) This Agreement shall be governed by and construed in accordance with the internal laws of the State of Alaska, without regard to conflict of law principles that would result in the application of the laws of any other jurisdiction.

(b) ANY LEGAL SUIT, ACTION OR PROCEEDING ARISING OUT OF OR BASED UPON THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY MAY BE INSTITUTED IN THE SUPERIOR COURT OF THE STATE OF ALASKA IN IN THE THIRD JUDICIAL DISTRICT, LOCATED IN ANCHORAGE, ALASKA, AND EACH PARTY IRREVOCABLY SUBMITS TO THE EXCLUSIVE JURISDICTION OF SUCH COURT IN ANY SUCH SUIT, ACTION OR PROCEEDING. SERVICE OF PROCESS, SUMMONS, NOTICE OR OTHER DOCUMENT BY MAIL TO SUCH PARTY'S ADDRESS SET FORTH HEREIN SHALL BE EFFECTIVE SERVICE OF PROCESS FOR ANY SUIT, ACTION OR OTHER PROCEEDING BROUGHT IN SUCH COURT. THE PARTIES IRREVOCABLY AND UNCONDITIONALLY WAIVE ANY OBJECTION TO THE LAYING OF VENUE OF ANY SUIT, ACTION OR ANY PROCEEDING IN SUCH COURT AND IRREVOCABLY WAIVE AND AGREE NOT TO PLEAD OR CLAIM IN SUCH COURT THAT ANY SUCH SUIT, ACTION OR PROCEEDING BROUGHT IN SUCH COURT HAS BEEN BROUGHT IN AN INCONVENIENT FORUM.

(c) EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS AGREEMENT IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES AND, THEREFORE, EACH SUCH PARTY IRREVOCABLY AND UNCONDITIONALLY WAIVES ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LEGAL ACTION ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY. EACH PARTY TO THIS AGREEMENT CERTIFIES AND ACKNOWLEDGES THAT (A) NO REPRESENTATIVE OF ANY OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT SEEK TO ENFORCE THE FOREGOING WAIVER IN THE EVENT OF A LEGAL ACTION, (B) SUCH PARTY HAS CONSIDERED THE IMPLICATIONS OF THIS WAIVER, (C) SUCH PARTY MAKES THIS WAIVER VOLUNTARILY, AND (D) SUCH PARTY HAS BEEN INDUCED TO ENTER INTO THIS AGREEMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION 3.09(c).

Section 3.10 Specific Enforcement. The parties agree that irreparable damage would occur if any provision of this Agreement were not performed in accordance with the terms hereof and that the parties shall be entitled to specific performance of the terms hereof, in addition to any other remedy to which they are entitled at law or in equity. The parties acknowledge and agree that (a) the parties shall be entitled to an injunction, specific performance or other equitable relief to prevent breaches of this Agreement and to enforce specifically the terms and provisions hereto, without proof of damages, this

being in addition to any other remedy to which they are entitled under this Agreement and (b) the right to specific enforcement is an integral part of the transactions contemplated by this Agreement and without that right, neither Municipality nor Chugach would have entered into this Agreement. Each party agrees that it will not oppose the granting of specific performance and other equitable relief on the basis that the other parties have an adequate remedy at law or that an award of specific performance is not an appropriate remedy for any reason at law or equity. The parties acknowledge and agree that any party seeking an injunction to prevent breaches of this Agreement and to enforce specifically the terms and provisions of this Agreement in accordance with this Section 3.10 shall not be required to provide any bond or other security in connection with any such injunction.

Section 3.11 Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Agreement delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Agreement.

Section 3.12 Conditions. This Agreement and the Parties' obligations set forth herein are contingent upon the occurrence of the Closing (as defined in the Asset Purchase Agreement). In addition, this Agreement (1) does not take effect until the prior approval of the RCA and (2) is, at all times, subject to revision by the RCA.

EXHIBIT 4

Form of Amended and Restated BRU Fuel Agreement

AMENDED AND RESTATED BRU FUEL AGREEMENT

This Amended and Restated BRU Fuel Agreement (this "**Agreement**"), dated as of [●], 2019, is made and entered into between Municipality of Anchorage, Alaska, a political subdivision organized under the laws of the State of Alaska ("**Municipality**"), and Chugach Electric Association, Inc., a not-for-profit electric cooperative corporation organized under the laws of the State of Alaska ("**Chugach**").

RECITALS

WHEREAS, Municipality and Chugach have entered into that certain Asset Purchase and Sale Agreement (as amended from time to time, the "**Asset Purchase Agreement**") dated as of December 28, 2018 pursuant to which Chugach will acquire substantially all of the assets of Municipality's electric utility referred to as Municipal Light and Power ("**ML&P**").

WHEREAS, as an integral part of the transactions contemplated by the Asset Purchase Agreement, Chugach and Municipality entered into the BRU Fuel Agreement (the "**Original BRU Agreement**") dated as of December 28, 2018 to provide for the pass-through of BRU costs of production to customers of Chugach after the Closing as stated herein.

WHEREAS, the Municipality and Chugach wish to amend and restate the Original BRU Agreement in its entirety as set forth herein.

NOW, THEREFORE, in consideration of the mutual covenants and agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree as follows:

ARTICLE I
DEFINITIONS

Capitalized terms used but not defined herein have the meanings assigned to them in the Asset Purchase Agreement. In addition, the following terms have the meanings specified or referred to in this ARTICLE I:

"**GTP**" means gas transfer price.

"**Legacy BRU Interest**" means the Legacy Chugach BRU Interest or the Legacy ML&P BRU Interest, as applicable.

"**Legacy Chugach BRU Interest**" means the interest in the BRU owned by Chugach immediately prior to Closing.

"Legacy Chugach Territory" means Chugach's retail service territory as in existence as of immediately prior to the Closing.

"**Legacy ML&P BRU Interest**" means the interest in the BRU owned by ML&P immediately prior to Closing.

"Legacy ML&P Territory" means ML&P's retail service territory as in existence as of immediately prior to the Closing.

"**Legacy Territory**" means the Legacy Chugach Territory or the Legacy ML&P Territory, as applicable.

"**Served Territory**" means (a) the Legacy Chugach Territory, to the extent that Chugach elects at any time after Closing to use gas sourced from the Legacy ML&P BRU Interest as fuel to generate electricity to serve native load in the Legacy Chugach Territory, and (b) the Legacy ML&P Territory, to the extent that Chugach elects at any time after Closing to use gas sourced from the Legacy Chugach BRU Interest as fuel to generate electricity to serve native load in the Legacy ML&P Territory.

"**Stipulation**" means the Stipulation Resolving All Issues entered into by and among ML&P, Chugach, Providence Health & Services, the Federal Executive Agencies, Matanuska Electric Association, Inc., Homer Electric Association, Inc., Alaska Energy Authority, and ENSTAR Natural Gas Company, a Division of SEMCO Energy, Inc., dated October [●], 2019, and accepted and approved by the Regulatory Commission of Alaska ("RCA") on [●].

"**Supplying Territory**" means (a) with respect to gas sourced from the Legacy ML&P BRU Interest, the Legacy ML&P Territory; and (b) with respect to gas sourced from the Legacy Chugach BRU Interest, the Legacy Chugach Territory.

"**Tariff**" has the meaning set forth in Section 2.03.

ARTICLE II
BRU MATTERS

Section 2.01 Legacy BRU Interest Accounting. For ratemaking purposes, Chugach shall separately account for the costs of producing gas from the Legacy ML&P BRU Interest and Legacy Chugach BRU Interest and shall separately flow the costs and benefits of each Legacy BRU Interest through separate GTPs and fuel charges to the respective ratepayers in the Legacy ML&P Territory and Legacy Chugach Territory, as applicable, over the economic life of the BRU.

Section 2.02 Documentation and Filing Requirements. Before entering into any economy energy sale of electricity generated using Chugach-owned BRU gas (as distinguished from gas purchased from another BRU producer), Chugach shall estimate and document the margin it will earn on that economy energy sale using the market value proxy specified in Section 2.05 to determine the value of BRU gas used as fuel for the specific sale. Chugach shall maintain records of all such estimates and file them with the RCA with each quarterly Fuel and Purchased Power Cost Adjustment filing.

Section 2.03 Limitations on Sales. If Chugach elects to use gas sourced from the Legacy ML&P BRU Interest or the Legacy Chugach BRU Interest to generate electricity for economy energy

sales, Chugach shall make such a sale only on a basis consistent with Tariff Sheet No. 101 of Chugach's current tariff (the "**Tariff**"), using the market value of the gas (as determined in advance pursuant to Section 2.02) to determine the cost of "additional fuel," as such term is used in the Tariff. Each time Chugach elects to use gas sourced from either the Legacy Chugach BRU Interest or the Legacy ML&P BRU Interest to generate electricity for economy energy sales, it shall also offer those same BRU natural gas volumes to ENSTAR for purchase. If ENSTAR offers more for the natural gas volumes than the market value of the gas (as determined by Chugach in advance pursuant to Section 2.02), Chugach shall sell those natural gas volumes to ENSTAR. If Chugach uses gas sourced from either the Legacy Chugach BRU Interest or the Legacy ML&P BRU Interest to generate electricity for economy energy sales, or if Chugach sells gas to ENSTAR pursuant to this Section 2.03, Chugach shall credit the amount of the proxy market value of such gas (as determined in advance pursuant to Section 2.02) to the customers in the Supplying Territory.

Section 2.04 Credits to Legacy Customers. If Chugach elects to use BRU gas sourced from the Legacy ML&P BRU Interest as fuel for the purpose of generating electricity to serve native load in the Legacy Chugach Territory, or to use BRU gas sourced from the Legacy Chugach BRU Interest as fuel for the purpose of generating electricity to serve native load in the Legacy ML&P Territory, Chugach shall credit the customers in the Supplying Territory in the amount of the market value proxy of such gas, as determined pursuant to Section 2.02, and shall charge the same market value proxy price to the customers in the Served Territory. If Chugach elects to use BRU gas for either such purpose, it shall (a) restrict funds for the benefit of ratepayers in the Supplying Territory in an amount equal to the product of (i) the positive difference, if any, obtained by subtracting the BRU GTP applicable to the Supplying Territory from the market value proxy price of gas so used and (ii) the volume of BRU gas so used; (b) promptly make a filing with the RCA proposing and seeking a determination by the RCA of whether such funds should be restored to ratepayers in the Supplying Territory through Chugach's quarterly Fuel and Purchased Power Cost Adjustment filing or instead by deposit in the Deferred Regulatory Liability for Gas Sales ("DRLGS") Account established pursuant to _____; and (c) contemporaneously with such filing, notify all parties to the Stipulation that such filing has been made. When BRU gas is used for the purpose described in this paragraph, Chugach shall recognize the cost of the gas to the Supplying Territory as a BRU gas expense in the month in which the transaction occurred, valued in an amount equal to the product of (i) the effective BRU GTP of the Supplying Territory and (ii) the volume of BRU gas purchased by the Served Territory. In addition, Chugach shall recognize the payment of such cost by the Served Territory ratepayers in the month in which such transaction occurred to ensure that the customers in the Supplying Territory are not charged for the cost of producing gas that is purchased by the Served Territory.

Section 2.05 Market Price. Unless the RCA approves another market value proxy, the market price for purposes of Sections 2.02, 2.03 and 2.04 shall be the greater of (i) Chugach's opportunity cost of gas for meeting firm load requirements on its system, which generally would be Chugach's highest priced contracted gas, or (ii) 90% of the Cook Inlet Prevailing Value of Gas most recently published by the Alaska Department of Revenue pursuant to 15 AAC 55.173(b). Chugach shall notify the parties to the Stipulation in advance of any filing seeking RCA approval for a different market value proxy.

Section 3.02 Interpretation. For purposes of this Agreement, (a) the words "include," "includes" and "including" shall be deemed to be followed by the words "without limitation"; (b) the word "or" is not exclusive; and (c) the words "herein," "hereof," "hereby," "hereto" and "hereunder" refer to this Agreement as a whole. Unless the context otherwise requires, references herein: (x) to Articles, Sections and Exhibits means the Articles, Sections and Exhibits attached to this Agreement; (y) to an agreement, instrument or other document means such agreement, instrument or other document as amended, supplemented and modified from time to time to the extent permitted by the provisions thereof and (z) to a statute means such statute as amended from time to time and includes any successor legislation thereto and any regulations promulgated thereunder. This Agreement shall be construed without regard to any presumption or rule requiring construction or interpretation against the party drafting an instrument or causing any instrument to be drafted.

Section 3.03 Headings. The headings in this Agreement are for reference only and shall not affect the interpretation of this Agreement.

Section 3.04 Severability. If any term or provision of this Agreement is invalid, illegal or unenforceable in any jurisdiction, such invalidity, illegality or unenforceability shall not affect any other term or provision of this Agreement or invalidate or render unenforceable such term or provision in any other jurisdiction. Upon such determination that any term or other provision is invalid, illegal or unenforceable, the parties hereto shall negotiate in good faith to modify this Agreement so as to effect the original intent of the parties as closely as possible in a mutually acceptable manner in order that the transactions contemplated hereby be consummated as originally contemplated to the greatest extent possible.

Section 3.05 Entire Agreement. This Agreement constitutes the sole and entire agreement of the parties to this Agreement with respect to the subject matter contained herein, and supersedes all prior and contemporaneous understandings and agreements, both written and oral, with respect to such subject matter, including the Original BRU Agreement.

Section 3.06 Successors and Assigns. This Agreement shall be binding upon and shall inure to the benefit of the parties hereto and their respective successors and permitted assigns. Neither party may assign its rights or obligations hereunder without the prior written consent of the other party, which consent shall not be unreasonably withheld or delayed, except that Chugach may assign this Agreement to any Affiliate or any Person that acquires all or substantially all of its assets, whether by merger, asset purchase or otherwise. No assignment shall relieve the assigning party of any of its obligations hereunder.

Section 3.07 No Third-party Beneficiaries. This Agreement is for the sole benefit of the parties hereto and their respective successors and permitted assigns and nothing herein, express or implied, is intended to or shall confer upon any other Person or entity any legal or equitable right, benefit or remedy of any nature whatsoever under or by reason of this Agreement.

Section 3.08 Amendment and Modification; Waiver. This Agreement may only be amended, modified or supplemented by an agreement in writing signed by each party hereto. No waiver by any party of any of the provisions hereof shall be effective unless explicitly set forth in writing and signed by the party so waiving. No waiver by any party shall operate or be construed as a waiver in respect of any failure, breach or default not expressly identified by such written waiver, whether of a similar or different character, and whether occurring before or after that waiver. No failure to exercise, or delay in exercising, any right, remedy, power or privilege arising from this Agreement shall operate or be construed as a waiver thereof; nor shall any single or partial exercise of any right, remedy, power or privilege hereunder preclude any other or further exercise thereof or the exercise of any other right, remedy, power or privilege.

Section 3.09 Governing Law; Submission to Jurisdiction; Waiver of Jury Trial.

(a) This Agreement shall be governed by and construed in accordance with the internal laws of the State of Alaska, without regard to conflict of law principles that would result in the application of the laws of any other jurisdiction.

(b) ANY LEGAL SUIT, ACTION OR PROCEEDING ARISING OUT OF OR BASED UPON THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY MAY BE INSTITUTED IN THE SUPERIOR COURT OF THE STATE OF ALASKA IN IN THE THIRD JUDICIAL DISTRICT, LOCATED IN ANCHORAGE, ALASKA, AND EACH PARTY IRREVOCABLY SUBMITS TO THE EXCLUSIVE JURISDICTION OF SUCH COURT IN ANY SUCH SUIT, ACTION OR PROCEEDING. SERVICE OF PROCESS, SUMMONS, NOTICE OR OTHER DOCUMENT BY MAIL TO SUCH PARTY'S ADDRESS SET FORTH HEREIN SHALL BE EFFECTIVE SERVICE OF PROCESS FOR ANY SUIT, ACTION OR OTHER PROCEEDING BROUGHT IN SUCH COURT. THE PARTIES IRREVOCABLY AND UNCONDITIONALLY WAIVE ANY OBJECTION TO THE LAYING OF VENUE OF ANY SUIT, ACTION OR ANY PROCEEDING IN SUCH COURT AND IRREVOCABLY WAIVE AND AGREE NOT TO PLEAD OR CLAIM IN SUCH COURT THAT ANY SUCH SUIT, ACTION OR PROCEEDING BROUGHT IN SUCH COURT HAS BEEN BROUGHT IN AN INCONVENIENT FORUM.

(c) EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS AGREEMENT IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES AND, THEREFORE, EACH SUCH PARTY IRREVOCABLY AND UNCONDITIONALLY WAIVES ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LEGAL ACTION ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY. EACH PARTY TO THIS AGREEMENT CERTIFIES AND ACKNOWLEDGES THAT (A) NO REPRESENTATIVE OF ANY OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT SEEK TO ENFORCE THE FOREGOING WAIVER IN THE EVENT OF A LEGAL ACTION, (B) SUCH PARTY HAS CONSIDERED THE IMPLICATIONS OF THIS WAIVER, (C)

SUCH PARTY MAKES THIS WAIVER VOLUNTARILY, AND (D) SUCH PARTY HAS BEEN INDUCED TO ENTER INTO THIS AGREEMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION 3.09(c).

Section 3.10 Specific Enforcement. The parties agree that irreparable damage would occur if any provision of this Agreement were not performed in accordance with the terms hereof and that the parties shall be entitled to specific performance of the terms hereof, in addition to any other remedy to which they are entitled at law or in equity. The parties acknowledge and agree that (a) the parties shall be entitled to an injunction, specific performance or other equitable relief to prevent breaches of this Agreement and to enforce specifically the terms and provisions hereto, without proof of damages, this being in addition to any other remedy to which they are entitled under this Agreement and (b) the right to specific enforcement is an integral part of the transactions contemplated by this Agreement and without that right, neither Municipality nor Chugach would have entered into this Agreement. Each party agrees that it will not oppose the granting of specific performance and other equitable relief on the basis that the other parties have an adequate remedy at law or that an award of specific performance is not an appropriate remedy for any reason at law or equity. The parties acknowledge and agree that any party seeking an injunction to prevent breaches of this Agreement and to enforce specifically the terms and provisions of this Agreement in accordance with this Section 3.10 shall not be required to provide any bond or other security in connection with any such injunction.

Section 3.11 Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Agreement delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Agreement.

Section 3.12 Conditions. This Agreement and the Parties' obligations set forth herein are contingent upon the occurrence of the Closing (as defined in the Asset Purchase Agreement). In addition, this Agreement (1) does not take effect until the prior approval of the RCA and (2) is, at all times, subject to revision by the RCA.

[SIGNATURE PAGE FOLLOWS]

IN WITNESS WHEREOF, the parties hereto have caused this Amended and Restated BRU Fuel Agreement to be executed as of the date first written above by their respective officers and officials thereunto duly authorized.

Execution Copy

PAYMENT IN LIEU OF TAXES AGREEMENT

This Payment in Lieu of Taxes Agreement (this "**Agreement**"), dated as of December 28, 2018, is made and entered into between Municipality of Anchorage, Alaska, a political subdivision organized under the laws of the State of Alaska ("**Municipality**") and Chugach Electric Association, Inc., a not-for-profit electric cooperative corporation organized under the laws of the State of Alaska ("**Chugach**").

RECITALS

WHEREAS, Municipality and Chugach have entered into that certain Asset Purchase and Sale Agreement (the "**Asset Purchase Agreement**") dated as of December 28, 2018 pursuant to which Chugach has acquired substantially all of the assets of Municipality's electric utility referred to as Municipal Light and Power ("**ML&P**"). Capitalized terms used but not defined herein have the meanings set forth in the Asset Purchase Agreement.

WHEREAS, as an integral part of the transactions contemplated by the Asset Purchase Agreement, Chugach and Municipality have entered into this Agreement.

WHEREAS, ML&P previously paid Municipality municipal utility service assessments pursuant to AMC 26.10.025 for police and fire protection and other governmental services provided by Municipality and following the closing of the Asset Purchase Agreement Chugach has agreed to make the PILT Payments (as defined below) for such governmental services as set forth herein and accordingly such payments are meant to be a tax obligation.

NOW, THEREFORE, in consideration of the mutual covenants and agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree as follows:

ARTICLE I
DEFINITIONS

The following terms have the meanings specified or referred to in this ARTICLE I:

"**Adjusted Net Book Value**" means, for any year, the product of (i) the net book value of ML&P plant in service located within each district in the Legacy Territory as of the Closing Date and (ii) the Overall Plant in Service Change.

"**Applicable Property**" means property subject to PILT Payments.

"**Asset Purchase Agreement**" has the meaning set forth in the recitals.

"**Calculation Spreadsheet**" has the meaning set forth in Section 2.05.

"**Chugach's Accountants**" means KPMG LLP or its successor.

"**Independent Accountant**" means an independent regionally recognized financial consulting firm or a firm of independent certified public accountants, other than Municipality's Accountants, ML&P's accountants or Chugach's Accountants, mutually agreeable to Chugach and Municipality.

"**Legacy Territory**" means ML&P's service area as in existence at the Closing Date.

"**Millage Rate**" means the rate, as in effect at January 1 of each year, that is determined pursuant to AS 29.45.240 for property in each district of the Legacy Territory.

"**ML&P**" has the meaning set forth in the recitals.

"**Municipality's Accountants**" means BDO USA, LLP or its successor.

"**Objection Notice**" has the meaning set forth in Section 2.05.

"**Overall Plant in Service Change**" means a fraction of which (a) the numerator is the net book value of all Chugach plant in service located in the Municipality of Anchorage as of January 1 of the current year, and (b) the denominator is the sum of (x) the net book value of ML&P plant in service located within the Municipality of Anchorage on the Closing Date plus (y) the net book value of Chugach plant in service located within the Municipality of Anchorage on the Closing Date.

"**Payment Term**" has the meaning set forth in Section 2.06.

"**PILT Payment**" has the meaning set forth in Section 2.01.

ARTICLE II
PILT PAYMENTS

Section 2.01 Payment in Lieu of Taxes. Chugach shall pay to Municipality an annual payment in lieu of taxes (the "**PILT Payment**") equal to the product, for each district in the Legacy Territory, of (i) the Adjusted Net Book Value for the current year, and (ii) the current Millage Rate for each such district. The PILT Payment shall be variable in amount and recalculated each year as set forth herein. Exhibit A sets forth an example of the calculation of PILT Payments for illustrative purposes only.

Section 2.02 Collection of PILT Payments. Chugach agrees that any amounts that Chugach collects from retail customers in connection with the PILT Payments will be collected solely from retail customers of Chugach in the Legacy Territory until December 31, 2033. Beginning on January 1, 2034, Chugach shall collect such amounts from retail customers of Chugach within the Municipality without restriction.

Section 2.03 Timing of PILT Payment. Chugach shall pay the PILT Payments on or before July 15 of such year.

Section 2.04 Commencement of PILT Payments. PILT Payments shall commence in the calendar year following ML&P's last municipal utility service assessment payment under AMC 26.10.025.

Section 2.05 Annual Determination of PILT Payments. Not later than April 15 of each calendar year of the Payment Term, Chugach shall deliver to Municipality Chugach's calculation of the PILT Payment to be made in such calendar year (the "**Calculation Spreadsheet**"). Following delivery of the Calculation Spreadsheet by Chugach, Municipality will be entitled to review the Calculation Spreadsheet and related supporting schedules, analyses, and work papers, and Chugach will cooperate reasonably with Municipality and its representatives in such examination, including by providing answers to questions asked by Municipality and its representatives and by making available to Municipality and its representatives any records under the reasonable control of Chugach or its representatives that are reasonably requested by Municipality in connection with its review of the Calculation Spreadsheet. If Municipality objects to all or part of the Calculation Spreadsheet as delivered by Chugach, Municipality must deliver written notice of any such objection to Chugach not more than 120 days after Chugach delivers such Calculation Spreadsheet to Municipality (an "**Objection Notice**"). Any Objection Notice will specify, in reasonable detail, the nature and amount, if discernable, of any and all items in dispute, the amounts of any proposed adjustments, and the basis for Municipality's proposed adjustments. If Municipality does not deliver an Objection Notice to Chugach within such 120-day period, Municipality will be deemed to have accepted the calculation of the PILT Payment contained in the Calculation Spreadsheet delivered by Chugach. If Municipality delivers an Objection Notice to Chugach within such 120-day period, Chugach and Municipality will use commercially reasonable efforts to resolve all objections. If Chugach and Municipality do not reach a final resolution of all objections within 30 days after delivery of an Objection Notice, Chugach and Municipality will submit all unresolved objections to an Independent Accountant for resolution in accordance with Section 2.08(b)(iii) of the Asset Purchase Agreement. In the event a dispute regarding the calculation of a PILT Payment remains unresolved as of July 15 of the applicable calendar year, Chugach shall only be required to make such payments as are set forth in the applicable Calculation Spreadsheet until such time as the dispute is resolved, provided that Municipality's acceptance of such payments from Chugach shall not operate or be construed as a waive in any respect of Municipality's right to object to all or part of the Calculation Spreadsheet or exercise any other right, remedy, power or privilege arising from this Agreement.

Section 2.06 Term of PILT Payments. PILT Payments shall be made for a term of 50 years including the first such payment (the "**Payment Term**").

Section 2.07 Sales of Property. In the event Chugach sells any Applicable Property, the transferee shall not be assessed a property tax on the same Applicable Property for the same year.

Section 2.08 No Other Taxes or Municipal Charges; Nondiscrimination.

(a) During the Payment Term, in the event that Municipality enacts, adopts, or applies a real or personal property tax on the Applicable Property, the amount of such tax paid by Chugach with respect to the Applicable Property shall be credited against amounts due to Municipality under this Agreement.

(b) In accordance with AMC 26.10.025B, the Millage Rates used to calculate the PILT Payments shall be the rates assessed owners of real and personal property in each district.

Section 2.09 Tax Obligation. Chugach and Municipality agree not to assert in any manner, including in a court, regulatory or bankruptcy proceeding, that the PILT Payments are not a tax obligation.

Section 2.10 Proofs of Claim. In the event that Chugach becomes a debtor in a bankruptcy proceeding, Chugach agrees and will be automatically, and without further documentation or agreement, be deemed to stipulate in such proceeding that:

(a) Municipality may file proof(s) of claim pursuant to 11 U.S.C. §501, §502(i),and / or §507(a)(8), as an allowed claim(s) by a governmental unit for all PILT Payments due and owing at the time of the bankruptcy filing;

(b) All of such PILT Payments shall constitute taxes as defined in 11 U.S.C. §507(a)(8)(A) and / or (C), and

(c) Municipality shall be treated in any plan of reorganization proposed by Chugach as, or on par with, the treatment of the tax claimants under 11 U.S.C. §502(i) or §507(a)(8), and shall be entitled to the identical priority treatment as other §507(a)(8) claimants in such plan of reorganization.

Section 2.11 Set Off. In the event that (i) Chugach has notified Municipality under Section 8.05 of the Asset Purchase Agreement that Chugach is entitled to indemnification from Municipality with respect to any Third Party Claim or Direct Claim, (ii) Municipality has notified Chugach that (A) Municipality has determined that it will assume the defense of such Third Party Claim or (B) Municipality acknowledges that Chugach is entitled to indemnification from Municipality for such Direct Claim, and (iii) either (A) Municipality has not, within sixty (60) days after delivery of any such notice to Chugach, requested an appropriation of funds from the Assembly of Municipality for purposes of paying any amount required to be paid or reimbursed in connection with such Third Party Claim or Direct Claim, or (B) Municipality has requested an appropriation of funds from the Assembly of Municipality for such purposes but has not received an appropriation of such funds, Chugach will be entitled to withhold all or part of any amount due to Municipality under this Agreement for purposes of paying or reimbursing any Losses that have been determined, in accordance with the provisions of ARTICLE VIII of the Asset Purchase Agreement, to be due and owing from Municipality to any Buyer Indemnitee under ARTICLE VIII of the Asset Purchase Agreement in connection with such Third Party Claim or Direct Claim. In the event that (i) Chugach has notified Municipality under Section 8.05 of the Asset Purchase Agreement that Chugach is entitled to indemnification from Municipality with respect to any Third Party Claim or Direct Claim, (ii) Municipality fails to assume the defense of such Third Party Claim or provide indemnification for such Direct Claim, (iii) Chugach, in accordance with the provisions of ARTICLE VIII of the Asset Purchase Agreement, pursues its available legal remedies against Municipality for such failure and obtains a final judgment requiring Municipality to indemnify Chugach in accordance with ARTICLE VIII of the Asset Purchase Agreement for Chugach's Losses in connection with such Third Party Claim or Direct Claim, and (iv) either (A) Municipality has not, within sixty (60) days after issuance of such judgment, requested an appropriation of funds from the Assembly of Municipality for purposes of paying such Losses, or (B) Municipality has requested an appropriation of funds from the Assembly of Municipality for such purposes but has

not received an appropriation of such funds, Chugach will be entitled to withhold all or part of any amount due to Municipality under this Agreement for purposes of paying or reimbursing such Losses.

Section 2.12 Remedies. All rights and remedies available to Municipality for the collection of taxes shall apply to the PILT Payments hereunder, including, but not limited to, the rights and remedies provided in AMC 12.15.060(C) and AMC 12.15.070, and all such rights and remedies are hereby reserved notwithstanding anything to the contrary herein.

ARTICLE III

MISCELLANEOUS

Section 3.01 Notices. All notices, requests, consents, claims, demands, waivers and other communications hereunder shall be in writing and shall be deemed to have been given (a) when delivered by hand (with written confirmation of receipt); (b) when received by the addressee if sent by a nationally recognized overnight courier (receipt requested); (c) on the date sent by e-mail of a PDF document (with confirmation of transmission) if sent during normal business hours of the recipient, and on the next Business Day if sent after normal business hours of the recipient or (d) on the third day after the date mailed, by certified or registered mail, return receipt requested, postage prepaid. Such communications must be sent to the respective parties at the following addresses (or at such other address for a party as shall be specified in a notice given in accordance with this Section 3.01):

Section 3.02 Interpretation. For purposes of this Agreement, (a) the words "include," "includes" and "including" shall be deemed to be followed by the words "without limitation"; (b) the word "or" is not exclusive; and (c) the words "herein," "hereof," "hereby," "hereto" and "hereunder" refer to this Agreement as a whole. Unless the context otherwise requires, references herein: (x) to Articles, Sections and Exhibits means the Articles, Sections and Exhibits attached to this Agreement; (y) to an agreement, instrument or other document means such agreement, instrument or other document as amended, supplemented and modified from time to time to the extent permitted by the provisions thereof and (z) to a statute means such statute as amended from time to time and includes any successor legislation thereto and any regulations promulgated thereunder. This Agreement shall be construed without regard to any presumption or rule requiring construction or interpretation against the party drafting an instrument or causing any instrument to be drafted.

Section 3.03 Headings. The headings in this Agreement are for reference only and shall not affect the interpretation of this Agreement.

Section 3.04 Severability. If any term or provision of this Agreement is invalid, illegal or unenforceable in any jurisdiction, such invalidity, illegality or unenforceability shall not affect any other term or provision of this Agreement or invalidate or render unenforceable such term or provision in any other jurisdiction. Upon such determination that any term or other provision is invalid, illegal or unenforceable, the parties hereto shall negotiate in good faith to modify this Agreement so as to effect the original intent of the parties as closely as possible in a mutually acceptable manner in order that the transactions contemplated hereby be consummated as originally contemplated to the greatest extent possible.

Section 3.05 Entire Agreement. This Agreement constitutes the sole and entire agreement of the parties to this Agreement with respect to the subject matter contained herein, and supersedes all prior and contemporaneous understandings and agreements, both written and oral, with respect to such subject matter. In the event of a conflict between the terms of this Agreement and the Asset Purchase Agreement, the terms of the Asset Purchase Agreement shall control.

Section 3.06 Successors and Assigns. This Agreement shall be binding upon and shall inure to the benefit of the parties hereto and their respective successors and permitted assigns. Neither party may assign its rights or obligations hereunder without the prior written consent of the other party, which consent shall not be unreasonably withheld or delayed, except that Chugach may assign this Agreement to any Affiliate or any Person that acquires all or substantially all of its assets, whether by merger, asset purchase or otherwise. No assignment shall relieve the assigning party of any of its obligations hereunder.

Section 3.07 No Third-party Beneficiaries. This Agreement is for the sole benefit of the parties hereto and their respective successors and permitted assigns and nothing herein, express or implied, is intended to or shall confer upon any other Person or entity any legal or equitable right, benefit or remedy of any nature whatsoever under or by reason of this Agreement.

Section 3.08 Amendment and Modification; Waiver. This Agreement may only be amended, modified or supplemented by an agreement in writing signed by each party hereto. No waiver by any party of any of the provisions hereof shall be effective unless explicitly set forth in writing and signed by the party so waiving. No waiver by any party shall operate or be construed as a waiver in respect of any failure, breach or default not expressly identified by such written waiver, whether of a similar or different character, and whether occurring before or after that waiver. No failure to exercise, or delay in exercising, any right, remedy, power or privilege arising from this Agreement shall operate or be construed as a waiver thereof; nor shall any single or partial exercise of any right, remedy, power or privilege hereunder preclude any other or further exercise thereof or the exercise of any other right, remedy, power or privilege.

Section 3.09 Governing Law; Submission to Jurisdiction; Waiver of Jury Trial.

(a) This Agreement shall be governed by and construed in accordance with the internal laws of the State of Alaska without regard to conflict of law principles that would result in the application of the laws of any other jurisdiction.

(b) ANY LEGAL SUIT, ACTION OR PROCEEDING ARISING OUT OF OR BASED UPON THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY MAY BE INSTITUTED IN THE SUPERIOR COURT OF THE STATE OF ALASKA IN THE THIRD JUDICIAL DISTRICT, LOCATED IN ANCHORAGE, ALASKA, AND EACH PARTY IRREVOCABLY SUBMITS TO THE EXCLUSIVE JURISDICTION OF SUCH COURT IN ANY SUCH SUIT, ACTION OR PROCEEDING. SERVICE OF PROCESS, SUMMONS, NOTICE OR OTHER DOCUMENT BY MAIL TO SUCH PARTY'S ADDRESS SET FORTH HEREIN SHALL BE EFFECTIVE SERVICE OF PROCESS FOR ANY SUIT, ACTION OR OTHER PROCEEDING BROUGHT IN SUCH COURT. THE PARTIES IRREVOCABLY AND UNCONDITIONALLY WAIVE ANY OBJECTION TO THE LAYING OF VENUE OF ANY SUIT, ACTION OR ANY PROCEEDING IN SUCH COURT AND IRREVOCABLY WAIVE AND AGREE NOT TO PLEAD OR CLAIM IN SUCH COURT THAT ANY SUCH SUIT, ACTION OR PROCEEDING BROUGHT IN SUCH COURT HAS BEEN BROUGHT IN AN INCONVENIENT FORUM.

(c) EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS AGREEMENT IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES AND, THEREFORE, EACH SUCH PARTY IRREVOCABLY AND UNCONDITIONALLY WAIVES ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LEGAL ACTION ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY. EACH PARTY TO THIS AGREEMENT CERTIFIES AND ACKNOWLEDGES THAT (A) NO REPRESENTATIVE OF ANY OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT SEEK TO ENFORCE THE FOREGOING WAIVER IN THE EVENT OF A LEGAL ACTION, (B) SUCH PARTY HAS CONSIDERED THE IMPLICATIONS OF THIS WAIVER, (C) SUCH PARTY MAKES THIS WAIVER VOLUNTARILY, AND (D) SUCH PARTY HAS BEEN INDUCED TO ENTER INTO THIS AGREEMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS Section 3.09(c).

Section 3.10 Specific Enforcement. The parties agree that irreparable damage would occur if any provision of this Agreement (including timely payment of PILT Payments) were not performed in accordance with the terms hereof and that the parties shall be entitled to specific performance of the terms hereof, in addition to any other remedy to which they are entitled at law or in equity. The parties acknowledge and agree that (a) the parties shall be entitled to an injunction, specific performance or other equitable relief to prevent breaches of this Agreement (including timely payment of PILT Payments) and to enforce specifically the terms and provisions hereto, without proof of damages, this being in addition to any other remedy to which they are entitled under this Agreement and (b) the right to specific enforcement is an integral part of the transactions contemplated by this Agreement and without that right, neither Municipality nor Chugach would have entered into this Agreement. Each party agrees that it will not oppose the granting of specific performance and other equitable relief on the basis that the other parties have an adequate remedy at law or that an award of specific performance is not an appropriate remedy for any reason at law or equity. The parties acknowledge and agree that any party seeking an injunction to prevent breaches of this Agreement and to enforce specifically the terms and provisions of this Agreement in accordance with this Section 3.10 shall not be required to provide any bond or other security in connection with any such injunction.

Section 3.11 Waiver of Sovereign Immunity. Municipality agrees that it is subject to civil and commercial suit for any breach of contract obligations under this Agreement. To the extent that Municipality may be entitled to claim sovereign, governmental, or municipal immunity from any liability in such a civil or commercial suit by Chugach, Municipality hereby agrees not to claim, and hereby waives, such sovereign, governmental, or municipal immunity.

Section 3.12 Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Agreement delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Agreement.

Section 3.13 Conditions Precedent. This Agreement and the Parties' obligations set forth herein are contingent upon the occurrence or waiver of each of the following events:

(a) The Closing (as defined in the Asset Purchase Agreement) shall have occurred; and

(b) RCA approval of this Agreement.

AMENDMENT NO. 1 TO PAYMENT IN LIEU OF TAXES AGREEMENT

THIS AMENDMENT NO. 1 TO PAYMENT IN LIEU OF TAXES AGREEMENT, dated as of the 27th day of September, 2019 (this "**Amendment**"), between the Municipality of Anchorage, Alaska, a political subdivision organized under the laws of the State of Alaska ("**Municipality**"), and Chugach Electric Association, Inc., a not-for-profit electric cooperative corporation organized under the laws of the State of Alaska ("**Chugach**").

RECITALS

WHEREAS, Chugach and Municipality entered into that certain Payment in Lieu of Taxes Agreement, dated as of December 28, 2018 (the "**Original PILT Agreement**");

WHEREAS, capitalized terms used in this Amendment, if not otherwise defined herein, shall have the meanings set forth in the Original PILT Agreement, as amended or modified pursuant to this Amendment (as so amended or modified, the "**PILT Agreement**");

WHEREAS, pursuant to Section 3.08 of the Original PILT Agreement, Chugach and Municipality may amend, modify or supplement the Original PILT Agreement upon the execution and delivery of a written agreement executed by each party thereto; and

WHEREAS, the Chugach and Municipality desire to make certain amendments to the Original PILT Agreement as provided in this Amendment.

NOW, THEREFORE, pursuant to Section 3.08 of the Original PILT Agreement and in consideration for the premises and agreements hereinafter set forth, the parties hereto, intending to be legally bound, agree as follows:

1. New Definitions. The following definition is added to Article I of the Original PILT Agreement:

> "**Net ML&P Classified Plant in Service**" means the net book value of ML&P classified and unclassified plant in service within the Municipality of Anchorage as of the Closing Date, including contributed plant but not including intangible plant and construction work in progress.

2. Revised Definitions. The following definitions in Article I of the Original Agreement are replaced in their entirety as follows:

> "**Adjusted Net Book Value**" means, for any year, the product of (i) the Net ML&P Classified Plant in Service located within each district in the Legacy Territory as of the Closing Date and (ii) the Overall Plant in Service Change.
>
> "**Net Plant in Service**" means the net book value of plant in service, exclusive of contributed plant, intangible plant and construction work in progress.
>
> "**Overall Plant in Service Change**" means a fraction of which (i) the numerator is the Net Plant in Service of Chugach located within the Municipality of Anchorage as of

January 1 of the current year, and (ii) the denominator is the sum of (a) ML&P's Net Plant in Service in the Legacy Territory that is located within the Municipality of Anchorage on the Closing Date plus (b) Chugach's Net Plant in Service in the Chugach legacy territory that is located within the Municipality of Anchorage on the Closing Date.

3. Amendment to Exhibit A. Exhibit A of the Original PILT Agreement is hereby deleted in its entirety and replaced with Exhibit A, attached hereto.

4. Effective Date of this Amendment. Except as expressly provided herein, the Original PILT Agreement is not amended, supplemented, modified, revised or otherwise affected by this Amendment. This Amendment shall be deemed effective and in full force and effect as of the date first written above. On and after the date hereof, each reference in the Original PILT Agreement to "this Agreement", "hereunder", "hereof", "herein" or words of like import referring to the Original Agreement, shall mean and be a reference to the Payment In Lieu Of Taxes Agreement and each reference to the Payment In Lieu Of Taxes Agreement in any other agreements, documents or instruments executed and delivered pursuant to or in connection with the Payment In Lieu Of Taxes Agreement shall be deemed to mean and be a reference to the Payment In Lieu Of Taxes Agreement as amended by this Amendment.

5. Binding Effect. This Amendment shall be binding upon and shall inure to the benefit of the Parties hereto and their respective successors and permitted assigns.

6. Governing Law. This Amendment shall be governed by and construed in accordance with the internal laws of the State of Alaska, without reference to conflicts of laws principles that would result in the application of the laws of any other jurisdiction.

7. Counterparts. This Amendment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Amendment delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Agreement.

[*Remainder of the page intentionally left blank*]

IN WITNESS WHEREOF, the parties hereto have caused this Amendment to be executed as of the date first written above by their respective officers and officials thereunto duly authorized.

AMENDMENT NO. 2 TO PAYMENT IN LIEU OF TAXES AGREEMENT

THIS AMENDMENT NO. 2 TO PAYMENT IN LIEU OF TAXES AGREEMENT, dated as of the 28th day of October, 2019 (this "**Amendment**"), between the Municipality of Anchorage, Alaska, a political subdivision organized under the laws of the State of Alaska ("**Municipality**"), and Chugach Electric Association, Inc., a not-for-profit electric cooperative corporation organized under the laws of the State of Alaska ("**Chugach**").

RECITALS

WHEREAS, Chugach and Municipality entered into that certain Payment in Lieu of Taxes Agreement, dated as of December 28, 2018 (the "**Original PILT Agreement**");

WHEREAS, capitalized terms used in this Amendment, if not otherwise defined herein, shall have the meanings set forth in the Original PILT Agreement, as amended or modified to date or pursuant to this Amendment (as so amended or modified, the "**PILT Agreement**");

WHEREAS, pursuant to Section 3.08 of the Original PILT Agreement, Chugach and Municipality may amend, modify or supplement the Original PILT Agreement upon the execution and delivery of a written agreement executed by each party thereto; and

WHEREAS, the Chugach and Municipality desire to make certain amendments to the PILT Agreement as provided in this Amendment.

NOW, THEREFORE, pursuant to Section 3.08 of the Original PILT Agreement and in consideration for the premises and agreements hereinafter set forth, the parties hereto, intending to be legally bound, agree as follows:

1. Revisions. Section 2.09 and Section 2.10 of the PILT Agreement are hereby deleted in their entirety and replaced as follows:

Section 2.09 [Reserved.]

Section 2.10 [Reserved.]

2. Effective Date of this Amendment. Except as expressly provided herein, the PILT Agreement is not amended, supplemented, modified, revised or otherwise affected by this Amendment. This Amendment shall be deemed effective and in full force and effect as of the date first written above. On and after the date hereof, each reference in the PILT Agreement to "this Agreement", "hereunder", "hereof", "herein" or words of like import referring to the PILT Agreement, shall mean and be a reference to the PILT Agreement and each reference to the PILT Agreement in any other agreements, documents or instruments executed and delivered pursuant to or in connection with the PILT Agreement shall be deemed to mean and be a reference to the PILT Agreement as amended by this Amendment.

3. Binding Effect. This Amendment shall be binding upon and shall inure to the benefit of the Parties hereto and their respective successors and permitted assigns.

4. Governing Law. This Amendment shall be governed by and construed in accordance with the internal laws of the State of Alaska, without reference to conflicts of laws principles that would result in the application of the laws of any other jurisdiction.

5. Counterparts. This Amendment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Amendment delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Agreement.

[*Remainder of the page intentionally left blank*]

IN WITNESS WHEREOF, the parties hereto have caused this Amendment to be executed as of the date first written above by their respective officers and officials thereunto duly authorized.

Operations and Exchange Agreement

between

Matanuska Electric Association, Inc.

and

Chugach Electric Association, Inc.

September 9, 2019

Attachment 1
Page 1 of 30

Operations and Exchange Agreement

This Operations and Exchange Agreement ("Agreement") is between Matanuska Electric Association, Inc. ("MEA"), and Chugach Electric Association, Inc. ("Chugach"), effective as of Sept 9, 2019.

1. MEA is an electric cooperative organized pursuant to A.S. 10.25 that provides generation, transmission and distribution electric service for its retail members in south central Alaska.

2. Chugach is an electric cooperative organized pursuant to A.S. 10.25 that provides generation, transmission and distribution electric service for its retail and wholesale members in south central Alaska.

3. Chugach has entered into an Asset Purchase and Sale Agreement dated December 28, 2018 (the "Asset Purchase Agreement") with the Municipality of Anchorage (the "Municipality") under which Chugach will acquire (the "Acquisition") substantially all of the assets (the "ML&P Assets") of Municipal Light and Power, the Municipality's electric utility ("ML&P").

4. The Parties believe that, to the extent the Acquisition is completed, it will be in their mutual interest and the best interest of the electric customers within their service areas and the Railbelt generally if the Parties agree to transfer ownership, and maintain joint ownership and operation of certain assets owned (or to be owned) by the Parties and to enter into certain other agreements.

Therefore, in consideration of the terms, conditions, and covenants set forth below, the Parties agree as follows:

1. Definitions

For purposes of this Agreement, unless the context clearly indicates otherwise, the following terms shall have the following meanings (and derivatives of such terms shall have similar derivative meanings). Other terms are defined elsewhere in this Agreement.

"Acquisition" is defined in the Recitals above.

"AEA Agreement" is defined in Section 4.A.

"Agreement" means this Operations and Exchange Agreement.

"Alaska Intertie Agreement" means Second Amended and Restated Alaska Intertie Agreement Among Alaska Energy Authority: Municipality of Anchorage, Alaska d.b.a Municipal Light and Power; Chugach Electric Association, Inc.; Golden Valley Electric Association, Inc.; Alaska Electric Generation and Transmission Cooperative, dated March 11, 2014.

"APA" means the Alaska Power Authority.

"APA Joint Use Agreement" means the Joint Use Agreement dated January 10, 1984 between the APA and MEA.

"Asset Purchase Agreement" is defined in the Recitals above.

"Assets" means the Chugach-Acquired Assets and/or the MEA-Acquired Assets, as the context may require.

"Bradley Lake Agreements" means (1) the Bradley Lake Hydroelectric Project Agreement for the Sale and Purchase of Electric Power dated December 8, 1987 by and among the Alaska Power Authority, Chugach, the Golden Valley Electric Association, Inc., the Municipality, The City of Seward, Alaska d/b/a Seward Electric System, the Alaska Electric Generation & Transmission Cooperative, Inc., The Homer Electric Association, Inc., and MEA; (2) the Bradley Lake Hydroelectric Project Agreement for the Wheeling of Electric Power and for Related Services dated December 8, 1987, by and among Chugach, and the Homer Electric Association, Inc., the Golden Valley Electric Association, Inc., the Municipality, the City of Seward, Alaska d/b/a Seward Electric System, and the Alaska Electric Generation & Transmission Cooperative, Inc.; and (3) the Bradley Lake Hydroelectric Project Transmission Sharing Agreement dated December 8, 1987, by and among the Homer Electric Association, Inc., and Chugach, the Golden Valley Electric Association, Inc., and the Municipality.

"Chugach" means Chugach Electric Association, Inc., an Alaska electric cooperative.

"Chugach-Acquired Assets" means all of the real and personal property expressly designated herein to be owned by Chugach from and after the Closing.

"Closing" is defined in Section 3.A.

"Closing Date" is defined in Section 3.A.

"Commencement Date" means the date that is the latest of (a) the date that all of MEA's conditions for performance in Section 10 have been satisfied, fulfilled or waived by MEA, (b) the date that all of Chugach's conditions for performance in Section 11 have been satisfied, fulfilled or waived by Chugach, and (c) the date of the ML&P Asset Closing.

"Deductible" is defined in Section 13.A.

"Effective Date" means the last date this Agreement is executed by a Party.

"Eklutna Agreement" is defined in Section 4.B.

"Eklutna Project" means the Eklutna Hydroelectric Project owned as of the Effective Date by Chugach, MEA, and the Municipality.

"Eklutna Transition Plan" means the Eklutna Hydroelectric Project Agreement for the Extension of '1996 Eklutna Hydroelectric Project Transition Plan'

"Excluded Assets" is defined in Section 2.B.

"Hazardous Substance Laws" is defined in Section 2.D.

"Hazardous Substances" is defined in Section 2.D.

"Indemnified Person" means each person entitled to receive indemnity and defense in accordance with this Agreement.

"Indemnifying Party" means each Party having an obligation to indemnify and defend in accordance with this agreement.

"Joint Asset" means any asset to be jointly owned by Chugach and MEA (with each Party owning a 50% undivided interest) under Section 2.F.2 and 2.G.2.

"Loss" is defined in Section 13.A.

"MEA" means Matanuska Electric Association, Inc., an Alaska electric cooperative.

"MEA Inventory Letter" means the inventory letter of April 1, 1996 included in Exhibit D to the Eklutna Transition Plan.

"MEA-Acquired Assets" means all of the real and personal property expressly designated herein to be owned by MEA from and after the Closing.

"ML&P" is defined in the Recitals above.

"ML&P Asset Closing" is the date of the closing of the transactions contemplated by the Asset Purchase Agreement, including the acquisition of the ML&P Assets.

"ML&P Assets" is defined in the Recitals above.

"Municipality" is defined in the Recitals above.

"Order 4" is defined in Section 4.A.

"Party" means either Chugach or MEA, as the context requires, and "Parties" means both Chugach and MEA.

"Prohibited Encumbrance" means any voluntary or involuntary lien or encumbrance that may be cured by the payment of money.

"Property" means those Assets that constitute real property.

"RCA" means the Regulatory Commission of Alaska.

"RCA Approval" means the issuance of an order from the RCA approving the sale of the ML&P Assets by the Municipality to Chugach sufficient for Chugach to proceed to the ML&P

Asset Closing (including the approval of all items required to be approved by the RCA under the terms of the Asset Purchase Agreement); and which order from the RCA shall not contain any condition or conditions materially adverse to either Chugach or ML&P, as determined by each of Chugach or ML&P with respect to itself in good faith and in the exercise of its commercially reasonable business judgment.

"Taxes" is defined in Section 5.1.

2. Exchange of Assets

A. Sale and Purchase

On the terms and subject to the conditions of this Agreement, on the Closing Date, (a) Chugach shall sell, transfer, convey, assign, and deliver to MEA and MEA shall purchase, acquire, and accept from Chugach, all right, title, and interest in and to MEA-Acquired Assets, free and clear of all Prohibited Encumbrances, and (b) MEA shall sell, transfer, convey, assign, and deliver to Chugach and Chugach shall purchase, acquire, and accept from MEA, all right, title, and interest in and to the Chugach-Acquired Assets, free and clear of all Prohibited Encumbrances. In addition, each Party shall sell, transfer, convey, assign, and deliver to the other all right title and interest in and to the Joint Assets necessary to provide that each Party acquires and owns a fifty percent (50%) undivided interest in the Joint Assets free and clear of all Prohibited Encumbrances.

B. Excluded Assets

Except as otherwise agreed by the Parties in a separate writing, Chugach shall retain and not sell to MEA any assets that are not within the definition of MEA-Acquired Assets or Joint Assets and MEA shall retain and not sell to Chugach any assets that are not within the definition of Chugach-Acquired Assets or Joint Assets (all such retained assets described in this paragraph being referred to herein as "Excluded Assets").

C. No Assumption of Liabilities

Neither Party shall assume any liabilities, debts or obligations of the other of any nature or kind whatsoever, whether absolute, accrued, contingent, or otherwise, or whether due or to become due, except: (i) as of the Closing Date, Chugach shall assume those liabilities relating to the Chugach-Acquired Assets that arise on or after the Commencement Date and all existing and future environmental liabilities related to the Chugach-Acquired Assets, including remediation costs, together with any other liabilities, debts or obligations of Chugach as may otherwise be expressly provided herein; and (ii) as of the Commencement Date, MEA shall assume those liabilities relating to the MEA-Acquired Assets that arise on or after the Closing Date and all existing and future environmental liabilities related to the MEA-Acquired Assets, including remediation costs, together with any other liabilities, debts or obligations of MEA as may otherwise be expressly provided herein as of the Commencement Date, the Parties shall jointly assume those liabilities relating to the Joint Assets that arise on or after the Closing Date and all future environmental liabilities related to the Joint Assets, including remediation costs, together with any other liabilities, debts or obligations for the Joint Assets as may be expressly provided herein.

D. As Is, Where Is

Chugach is transferring the MEA-Acquired Assets "as is, where is," and with all faults, and without representations or warranty as to fitness for any particular purpose, merchantability, design, quality, or physical condition. MEA is transferring the Chugach-Acquired Assets "as is, where is," and with all faults, and without representations or warranty as to fitness for any particular purpose, merchantability, design, quality, or physical condition. Without limiting the preceding in this Section 2.D., the representations and warranties set forth in Section 5.H are made solely for the purpose of the Parties' respective decisions to proceed with the transactions contemplated herein and neither Party shall have any liability to the other whatsoever for any breach of any such representations and warranties. Each Party hereby further acknowledges that the other has not made, does not make and specifically disclaims any representations or warranties as to water, soil or geology of any Property. Without limiting the foregoing, neither Party makes and has not made any representation or warranty regarding the presence or absence of any hazardous substances (as hereinafter defined) on, under or about any Property or the compliance or non-compliance of any Property with the Comprehensive Environmental Response, Compensation and Liability Act, the Superfund Amendment And Reauthorization Act, the Resource Conservation Recovery Act, the Federal Water Pollution Control Act, the Federal Environmental Pesticides Act, the Clean Water Act, any so-called federal, state or local "superfund" or "superlien" statute, or any other statute, law, ordinance, code, rule, regulation, order or decree regulating, relating to or imposing liability (including strict liability) or standards of conduct concerning any hazardous substances (collectively, the "Hazardous Substance Laws"). For purposes of this Agreement, the term "Hazardous Substances" shall mean and include those elements or compounds which are contained on the list of Hazardous Substances adopted by the United States Environmental Protection Agency and the list of toxic pollutants designated by Congress or the Environmental Protection Agency or under any Hazardous Substance laws.

E. Assets Relating to Teeland Substation

1. MEA-Acquired Assets. The following assets located at or associated with the Teeland Substation shall be deemed to be MEA-Acquired Assets as of the Commencement Date and shall be conveyed by Chugach to MEA at the Closing: (a) all 115 kV equipment (including the 115/138 kV and 34.5/115/230kV transformers associated therewith) within the Teeland Substation property; (b) following expiration of the APA Joint Use Agreement, the Teeland 138kV breaker 5162 and switch 5161; (c) all controls related to the foregoing; and (d) any other assets listed or described as being conveyed to MEA in Exhibit A.

2. Chugach Excluded Assets. Chugach shall retain ownership to (and MEA will at any time quit claim any right to) the following Excluded Assets located at or associated with the Teeland Substation: (a) the 230 kV ring bus and its connection to the Alaska Energy Authority 138/230 kV transformer; (b) all land and buildings; (c) the communications tower; (d) all common ancillary systems, and fencing; (e) all controls related to items (a) through (d); and (f) any other assets listed or described in Exhibit A that are not described in Section 2.E.1 above.

F. Assets Relating to Eklutna Project Transmission

1. MEA-Acquired Assets. The following assets located at or associated with transmission from the Eklutna Project shall, subject to Chugach's acquisition at the ML&P Asset Closing, be deemed to be MEA-Acquired Assets as of the Commencement Date and shall be conveyed by Chugach to MEA at the Closing: (a) the 115 kV transmission lines and right-of-way from the Eklutna Project to and including the Palmer Substation, including any remaining transmission assets identified in the MEA Inventory Letter; and (b) except as described in Section 2.F.2, Chugach's share of any existing jointly-owned transmission or substation assets (including land) from the Eklutna Project to the proposed Fossil Creek Substation location.

2. Joint Assets. As of the ML&P Project Closing, each of Chugach and MEA shall be deemed to own a 50% undivided interest in the double circuit 115 kV transmission line from the Eklutna Project to the proposed Fossil Creek Substation location. The Parties will convey such interests in the foregoing property necessary to provide for such joint ownership

3. Chugach Excluded Assets. Chugach shall retain ownership of (and MEA will at any time quit claim any right to) all property located at or associated with the Eklutna Project or any transmission from the Eklutna Project except as expressly described in Section 2.F.1 or 2.F.2; provided that such ownership shall remain subject to the terms and provisions of the Transition Plan.

4. MEA Excluded Assets. MEA shall retain ownership of (and Chugach will at any time quit claim any right to) all property located at or associated with the Eklutna Project or any transmission from the Eklutna Project except as expressly described in Section 2.F.1 or 2.F.2; provided that such ownership shall remain subject to the terms and provisions of the Transition Plan. In addition, MEA shall retain its ownership (if any) in all of the tap lines, structures, and other assets to, from, and within its Parks, Reed, Pippel, Johnson, and Briggs substations, along with the Pippel Tap and the Briggs Tap.

G. Transmission Assets Related to ML&P Plant 2

1. Chugach-Acquired Assets. The following assets shall be deemed to be Chugach-Acquired Assets as of the Commencement Date and shall be conveyed by MEA to Chugach at the Closing: (a) the 115kV transmission line from the ML&P Plant 2 to and including the Alaska Power Authority Substation, including the land and right of way therefor; (b) any interest in the APA substation or any assets related thereto.

2. Joint Assets. As of the ML&P Project Closing, each of Chugach and MEA shall be deemed to own a 50% undivided interest in the 115 kV transmission circuit from the ML&P Plant 2 to the proposed Fossil Creek Substation location. The Parties will convey such interests in the foregoing property necessary to provide for such joint ownership

3. Chugach Excluded Assets. Chugach shall retain ownership of (and MEA will at any time quit claim any right to) the right of way for the 115 kV transmission circuit from

the ML&P Plant 2 to the proposed Fossil Creek Substation location and to its interest in the 230 kV transmission line from the ML&P Plant 2 to the proposed Fossil Creek Substation location.

3. Closing

A. Date, Time, and Place of Closing

The closing of the transactions contemplated by this Agreement (the "Closing") shall take place at a mutually agreeable date (the "Closing Date") and time no later than ninety (90) days after the ML&P Asset Closing, subject to all conditions to closing having been satisfied. The Closing shall take place at the offices of Chugach or another location mutually acceptable to the Parties.

B. Deliveries at Closing by Chugach

At the Closing, Chugach shall execute and deliver to MEA the following instruments and other documents, in such form as MEA may reasonably request:

1. Quit-claim deeds, bills of sale, endorsements, assignments, and other instruments of transfer and conveyance in connection with the conveyance of the MEA-Acquired Assets, with warranties of title only regarding the absence of Prohibited Encumbrances;

2. Quit-claim deeds, bills of sale, endorsements, assignments, and other instruments of transfer and conveyance necessary to vest title of a 50% undivided interest in the Joint Assets in each of Chugach and MEA, with warranties of title only regarding the absence of Prohibited Encumbrances;

3. A certificate by Chugach that each of the representations and warranties in Section 4 are true on and as of the Closing Date with the same force and effect as though made on and as of the Closing Date;

4. Such other documents and instruments as MEA may reasonably require to effectuate or evidence the transfer of all of the Assets and implement the other terms and conditions of this Agreement;

5. Any documents or instruments reasonably requested by a title insurance company performing the Closing; and

6. Any payment to be made by Chugach pursuant to Section 3.D.

C. Deliveries at Closing by MEA

At the Closing, MEA shall execute and deliver to Chugach the following instruments and other documents, in such form as Chugach may reasonably request:

1. Quit-claim deeds, bills of sale, endorsements, assignments, and other instruments of transfer and conveyance in connection with the conveyance of the Chugach-Acquired Assets, with warranties of title only regarding the absence of Prohibited Encumbrances;

2. Quit-claim deeds, bills of sale, endorsements, assignments, and other instruments of transfer and conveyance necessary to vest title of a 50% undivided interest in the Joint Assets in each of Chugach and MEA, with warranties of title only regarding the absence of Prohibited Encumbrances;

3. A certificate by MEA that each of the representations and warranties in Sections 6 are true on and as of the Closing Date with the same force and effect as though made on and as of the Closing Date;

4. Such other documents and instruments as MEA may reasonably require to effectuate or evidence the transfer of all of the Assets and implement the other terms and conditions of this Agreement;

5. Any documents or instruments reasonably requested by a title insurance company performing the Closing; and

6. Any payment to be made by MEA pursuant to Section 3.D.

D. Purchase Price

At Closing, (1) MEA will pay to Chugach the sum of the net book value of the MEA-Acquired assets and the net book value of any interest in Joint Assets being acquired and (2) Chugach will pay to MEA the sum of the net book value of the Chugach-Acquired Assets and the net book value of any interest in Joint Assets being acquired by Chugach. The net book asset values used in the calculations above shall be as of the date of the ML&P Closing.

E. Possession

Except as contemplated otherwise herein, MEA shall take possession of and assume control over the MEA-Acquired Assets and Chugach shall take possession of and assume control over the Chugach-Acquired Assets at 12:01 A.M. (local time) on the day following the Commencement Date.

F. Taxes and Fees; Closing Costs

Taxes and assessments will be prorated as of the Closing Date. Chugach and MEA shall share other customary closing costs equally. Each Party shall pay its own attorney fees.

4. Operational Matters

A. Teeland Substation

1. Chugach hereby grants a license to MEA effective as of the Commencement Date to transfer, access, maintain and replace the MEA-Acquired Assets located at the Teeland Substation.

2. Subject to demonstration that it will not cause interference with existing facilities, MEA shall have the right to expand the existing 115kV transfer bus at the Teeland Substation. Any activities relating to the expansion of the transfer bus shall be performed in a manner that does not conflict with Chugach's facilities or operations.

3. The Parties acknowledge that the term of the Joint Use and Interconnection Terms and Conditions (the "AEA Agreement"), per Order U-03-100(4) ("Order 4") of the RCA, "should be in effect until alternate transmission facilities are constructed, tested, and energized." To the extent that the AEA Agreement or Order 4 are abrogated, amended or revised prior to the time that alternate transmission facilities are constructed, tested, and energized, then MEA agrees, at Chugach's option, to enter into a transmission services agreement with Chugach on the same terms and conditions as contained in Order 4 and the AEA Agreement in effect as of the Effective Date. The transmission services agreement will recognize that the wheeling rate approved in that Order 4 may be adjusted or replaced from time to time through a tariff approved by the RCA and applied to all transactions on a nondiscriminatory basis.

4. Chugach leases the Teeland 138kV breaker 5162 and switch 5161 to AEA for a term commencing on the Effective Date and ending at the end of the term of the APA Joint Use Agreement. Following expiration of the APA Joint Use Agreement, Chugach shall convey these facilities to MEA for net book value at the time of Closing.

5. Subject to demonstration that it will not cause interference with existing facilities, MEA shall have the right to use the easternmost spare 138kV bay (or if land is available, to build a new bay) at Chugach's Point Mackenzie substation for the purposes of installing a 138kV breaker, 138 kV getaway structures, and other equipment necessary to connect to a MEA-owned transmission line.

6. At MEA's option, but at no cost to Chugach, MEA shall have the right to improve Chugach's existing 230 kV transmission line from the Point Mackenzie substation to the Teeland Substation (or any section thereof) to a double circuit line. Any modification to the Point McKenzie substation or to the 230 kV transmission line must be approved in writing by Chugach before MEA commences any related work. Such approval shall not unreasonably be withheld and shall be made in a timely manner. All related work and construction shall be conducted in a manner that conforms to standard utility practices and shall be coordinated through the Parties' dispatch centers. MEA shall own the new transmission line in the double circuit (including insulators and conductors), while Chugach shall maintain ownership of all structures and the existing 230 kV line or its replacement. Following completion and energizing of the double circuit, the Parties shall

have access to the resulting joint facilities as coordinated through their respective utility dispatch centers. All maintenance expenses related to the double circuit shall be shared on an equal basis with respect to the right of way, while each Party will maintain its own facilities at its sole expense.

7. The conveyance of Teeland assets as described in this Agreement provides both MEA and Chugach with direct transmission access to the 138 kV northern intertie. This configuration will allow MEA to wheel power through the Teeland Substation (115 kV and 34.5 kV) from its transmission system to serve its customers without incurring wheeling charges from Chugach. During times when either Chugach or MEA is not able to deliver power from its transmission system directly into the Teeland Substation and instead must rely on the other's transmission systems for meeting deliverability requirements, wheeling and ancillary services charges, per the terms of the applicable operating tariff, will be assessed.

B. Eklutna Project

1. All facilities related to the Eklutna Project that are jointly owned by the Parties shall continue to be subject to the terms and provisions of the Transition Plan. Each Party shall be solely responsible for all maintenance and other expenses related to its solely-owned transmission assets.

2. The Parties agree to cooperate in the joint development of the Fossil Creek Substation and the Eklutna Substation in a manner consistent with the terms and conditions of the Eklutna Generation Station Interconnection Agreement (the "Eklutna Agreement") dated December 29, 2014. The Parties hereby agree to extend the deadline for completion of tasks described in Sections 3 through 6 of the Eklutna Agreement to December 21, 2024. Except for the foregoing extension of the deadline and the transfer of three breakers at the Eklutna Project substations associated with the Eklutna transmission "local loop" to MEA (as contemplated by Section 2.F above), nothing in this agreement is intended to modify or amend any term or condition of the Eklutna Agreement.

3. The Parties shall execute any consents or other instruments necessary or reasonably desirable under the Transition Plan for Chugach's acquisition of ML&P's ownership interest in the Eklutna Project transmission assets.

4. The Parties shall execute any consents or other instruments necessary or reasonably desirable under the Transition Plan for Chugach's and MEA's acquisition of ML&P's ownership interest in the Eklutna Project generation assets at the time such conveyance occurs.

C. Delivery Point for Transfers of Energy

Effective as of the Commencement Date, the delivery point for transfers of energy between the Parties shall be at the 115 kV breakers nos. 21 and 22 at the ML&P Plant 2.

D. Bradley Lake

Chugach agrees that it will participate in a review of the voting requirements of the Bradley Lake Agreement. Notwithstanding the foregoing or anything else in this agreement to the contrary, nothing in this agreement shall modify or amend any of the terms and conditions of the Bradley Lake Agreements.

E. Southcentral Alaska Power Pool

MEA and Chugach agree to move forward with a minimum 2-party power pool structure. MEA and Chugach recognize that the actual implementation of a power pool may be postponed until after Chugach's acquisition of the ML&P Assets.

1. For all generation-related projects, joint planning and agreement on the projects shall be under the RRC guidelines currently under development.

2. Non-operating reserve capacity of the Parties shall be offered first to the other at a negotiated cost.

F. Management of Joint Assets

The Eklutna Transition Plan, as it may be amended, shall govern the management and operation of Joint Assets. Permission shall be granted by each Party to modify Joint Assets consistent with applicable standards and/or prudent utility practice in order that a Party may address service requirements for its native load.

5. Representations and Warranties of Chugach

Chugach represents and warrants to MEA as of the Effective Date as follows.

A. Corporate Existence

Chugach is an electric cooperative duly incorporated and validly existing under the laws of the State of Alaska, has the requisite power and authority to own its property and to carry on its business as now being conducted, and is in good standing under the laws of each of the jurisdictions in which it is conducting business.

B. Authorizations and Enforceability

Chugach has all requisite power and authority to execute, deliver, and perform this Agreement and to consummate the transactions contemplated hereby. This Agreement has been duly and validly authorized, executed, and delivered by Chugach and constitutes the valid and binding obligation of Chugach, fully enforceable in accordance with its terms. The execution and delivery of this Agreement and the consummation of the transactions contemplated by this Agreement have been duly and validly authorized and approved by Chugach's board of directors,

and no other corporate proceedings on the part of Chugach is necessary to authorize this Agreement or the consummation of the transactions contemplated by it.

C. No Default

To Chugach's knowledge, Chugach is not in default under or in violation of any provision of its articles of incorporation, bylaws or other governing document, which default or violation could otherwise be reasonably expected to have a material adverse effect on the Assets or the contemplated transactions. To Chugach's knowledge, Chugach is not in default under or in violation of any provision of any material restriction, encumbrance, indenture, contract, lease, loan agreement, note or other obligation or liability to which it is a party or by which it is bound and that could reasonably be expected to have a material adverse effect on the contemplated transactions, or MEA's unencumbered possession or use of the MEA-Acquired Assets or of MEA's interests in the Joint Assets. Neither the execution and delivery of this Agreement or any other agreement or instrument to be delivered to MEA in connection with this transaction, nor the consummation of the contemplated transactions by Chugach, will: (i) result in the acceleration of, or the creation in any party of the right to accelerate, terminate, modify or cancel, or cause a payment obligation to arise under, any indenture, contract, lease, sublease, loan agreement, note or other obligation or liability to which either Chugach is a party or to which either Chugach or the Assets is bound that could materially impair the contemplated transactions or MEA's unencumbered possession or use of the Assets; (ii) conflict with or result in a breach of or constitute a violation or default under, (A) any provision of Chugach's articles of incorporation, bylaws or other governing document, as amended to date, or (B) any restriction, encumbrance, license, permit, indenture, contract, lease, loan agreement, note or other obligation or liability to which Chugach is a party or by which Chugach or the Assets is bound, or (C) to Chugach's knowledge, any order, writ, injunction, decree, license or permit applicable to Chugach or any state or local law, statute, rule or regulation applicable to Chugach, provided that in the case of any of (A)-(C), such conflict, breach, violation or default could not otherwise be reasonably expected to have a material adverse effect on the contemplated transactions, or MEA's unencumbered possession or use of the MEA-Acquired Assets or of MEA's interests in the Joint Assets; or (iii) result in the creation of any Prohibited Encumbrance upon any of the Assets.

D. Approvals; Consents

No approval, consent, order or authorization of, exemption by, or registration, declaration or filing with, any state governmental authority is required by or with respect to Chugach in connection with the execution, delivery and performance of this Agreement by Chugach or any other agreement or instrument to be delivered to MEA in consummation by Chugach of the contemplated transactions, including but not limited to the transfer of the Assets.

E. Actions or Investigations

To Chugach's knowledge, there are no actions, suits or proceedings pending or threatened against Chugach or affecting the Assets, at law or in equity, or before any governmental agency that could be reasonably expected to have a material adverse effect on the Assets or MEA's unencumbered possession or use of the MEA-Acquired Assets or of MEA's interest in the Joint

Assets, or that relate to the contemplated transactions, nor is Chugach aware of any facts or third party claims that could result in any such action, suit or proceedings.

F. No Violation of Law

Chugach has not received written notice of any deficiency in or violation of any applicable law, rule, regulation, license, permit, or requirement of any governmental authority relating to the Assets, and, to Chugach's knowledge, Chugach is and has been in compliance therewith in all material respects. To Chugach's knowledge, Chugach has obtained and maintained in effect through the Effective Date all material governmental licenses, permits, authorizations, certifications and approvals necessary to own and operate the Assets as they have been conducted. Chugach has not received written notice of any threatened, pending or possible revocation, termination, suspension or limitation of any of Chugach's agreements, contracts, licenses or permits, nor, to the knowledge of Chugach, are there grounds for any of the foregoing. To the knowledge of Chugach, Chugach is in compliance in all material respects with the terms of all such licenses and permits and with all requirements, standards and procedures of the governmental agency or agencies that issued them. Chugach has no knowledge of any inquiries, notices, subpoenas or correspondence related to Chugach or the Assets from any government or third-party regarding audits or investigations during the three-year period preceding the Closing. To the knowledge of Chugach, the Assets and the services performed by Chugach, Chugach's employees and affiliated professionals in connection therewith have at all times been in compliance in all material respects with all applicable federal and state statutory and regulatory requirements and prudent utility practices.

G. Absence of Prohibited Encumbrances

As of the Closing Date, neither the MEA-Acquired Assets nor MEA's interest in the Joint Assets shall be encumbered by a Prohibited Encumbrance. Except as expressly set forth in the last sentence Chugach makes no representation or warranty regarding its right, title, or interest in, on or to any of the Assets.

H. Assets Condition

Chugach makes no representation or warranty (including any representation or warranty of suitability or merchantability) regarding the condition or adequacy of the Assets. MEA acknowledges and agrees that it will acquire its interests in the Assets from Chugach on an "AS-IS, WHERE-IS, WITH ALL FAULTS" basis.

I. Taxes

All governmental income, payroll, sales, use, property, franchise and other taxes (excluding any transfer, documentary stamp, or other taxes payable by a Party at Closing pursuant to this Agreement), including interest and penalties (collectively, "Taxes") due from Chugach for any period prior to the Closing Date with respect to the MEA-Acquired Assets or MEA's interest in the Joint Assets have been fully paid. No deficiency or adjustment in respect of any Tax that was assessed against Chugach that might result in a Prohibited Encumbrance on any of the Assets

remains unpaid and no claim, assessment or audit is pending or, to the knowledge of Chugach, threatened with respect to any Taxes whose assessment might result in a Prohibited Encumbrance on any of the Assets. Chugach has timely filed all returns relating to Taxes.

J. Brokers and Finders

Neither Chugach nor any person acting on behalf of Chugach has employed any broker, agent or finder, or incurred any liability for any brokerage fees, commission or finder's fees in connection with the transactions contemplated in this Agreement.

K. No Misrepresentations

Chugach has not made any material misstatement of fact in this Agreement in connection with the contemplated transactions or omitted any material fact necessary or desirable to make materially complete, accurate, and not misleading every representation, and warranty set forth in this Agreement or in any document to be delivered pursuant to this Agreement or in connection with the transactions contemplated by this Agreement.

6. Representations and Warranties of MEA

MEA represents and warrants to Chugach as of the Effective Date as follows:

A. Corporate Existence

MEA is an electric cooperative duly incorporated and validly existing under the laws of the State of Alaska, has the requisite power and authority to own its property and to carry on its business as now being conducted, and is in good standing under the laws of each of the jurisdictions in which it is conducting business.

B. Authorizations and Enforceability

MEA has all requisite power and authority to execute, delivet, and perform this Agreement and to consummate the transactions contemplated hereby. This Agreement has been duly and validly authorized, executed, and delivered by MEA and constitutes the valid and binding obligation of MEA, fully enforceable in accordance with its terms. The execution and delivery of this Agreement and the consummation of the transactions contemplated by this Agreement have been duly and validly authorized and approved by MEA's board of directors, and no other corporate proceedings on the part of MEA is necessary to authorize this Agreement or the consummation of the transactions contemplated by it.

C. No Default

To MEA's knowledge, MEA is not in default under or in violation of any provision of its articles of incorporation, bylaws or other governing document, which default or violation could otherwise be reasonably expected to have a material adverse effect on the Assets or the contemplated transactions. To MEA's knowledge, MEA is not in default under or in violation of

any provision of any material restriction, encumbrance, indenture, contract, lease, loan agreement, note or other obligation or liability to which it is a party or by which it is bound and that could reasonably be expected to have a material adverse effect on the contemplated transactions, or Chugach's unencumbered possession or use of the Chugach-Acquired Assets or of Chugach's interests in the Joint Assets. Neither the execution and delivery of this Agreement or any other agreement or instrument to be delivered to Chugach in connection with this transaction, nor the consummation of the contemplated transactions by MEA, will: (i) result in the acceleration of, or the creation in any party of the right to accelerate, terminate, modify or cancel, or cause a payment obligation to arise under, any indenture, contract, lease, sublease, loan agreement, note or other obligation or liability to which either MEA is a party or to which either MEA or the Assets is bound that could materially impair the contemplated transactions or Chugach's unencumbered possession or use of the Assets; (ii) conflict with or result in a breach of or constitute a violation or default under, (A) any provision of MEA's articles of incorporation, bylaws or other governing document, as amended to date, or (B) any restriction, encumbrance, license, permit, indenture, contract, lease, loan agreement, note or other obligation or liability to which MEA is a party or by which MEA or the Assets is bound, or (C) to MEA's knowledge, any order, writ, injunction, decree, license or permit applicable to MEA or any state or local law, statute, rule or regulation applicable to MEA, provided that in the case of any of (A)-(C), such conflict, breach, violation or default could not otherwise be reasonably expected to have a material adverse effect on the contemplated transactions, or Chugach's unencumbered possession or use of the Chugach-Acquired Assets or of Chugach's interests in the Joint Assets; or (iii) result in the creation of any Prohibited Encumbrance upon any of the Assets.

D. Approvals; Consents

No approval, consent, order or authorization of, exemption by, or registration, declaration or filing with, any state governmental authority is required by or with respect to MEA in connection with the execution, delivery and performance of this Agreement by MEA or any other agreement or instrument to be delivered to Chugach in consummation by MEA of the contemplated transactions, including but not limited to the transfer of the Assets.

E. Actions or Investigations

To MEA's knowledge, there are no actions, suits or proceedings pending or threatened against MEA or affecting the Assets, at law or in equity, or before any governmental agency that could be reasonably expected to have a material adverse effect on the Assets or Chugach's unencumbered possession or use of the Chugach-Acquired Assets or of Chugach's interest in the Joint Assets, or that relate to the contemplated transactions, nor is MEA aware of any facts or third party claims that could result in any such action, suit or proceedings.

F. No Violation of Law

MEA has not received written notice of any deficiency in or violation of any applicable law, rule, regulation, license, permit, or requirement of any governmental authority relating to the Assets, and, to MEA's knowledge, MEA is and has been in compliance therewith in all material respects. To MEA's knowledge, MEA has obtained and maintained in effect through the Effective

Date all material governmental licenses, permits, authorizations, certifications and approvals necessary to own and operate the Assets as they have been conducted. MEA has not received written notice of any threatened, pending or possible revocation, termination, suspension or limitation of any of MEA's agreements, contracts, licenses or permits, nor, to the knowledge of MEA, are there grounds for any of the foregoing. To the knowledge of MEA, MEA is in compliance in all material respects with the terms of all such licenses and permits and with all requirements, standards and procedures of the governmental agency or agencies that issued them. MEA has no knowledge of any inquiries, notices, subpoenas or correspondence related to MEA or the Assets from any government or third-party regarding audits or investigations during the three-year period preceding the Closing. To the knowledge of MEA, the Assets and the services performed by MEA, MEA's employees and affiliated professionals in connection therewith have at all times been in compliance in all material respects with all applicable federal and state statutory and regulatory requirements and prudent utility practices.

G. Absence of Prohibited Encumbrances

As of the Closing Date, neither the Chugach-Acquired Assets nor Chugach's interest in the Joint Assets shall be encumbered by a Prohibited Encumbrance. Except as expressly set forth in the last sentence MEA makes no representation or warranty regarding its right, title, or interest in, on or to any of the Assets.

H. Assets Condition

MEA makes no representation or warranty (including any representation or warranty of suitability or merchantability) regarding the condition or adequacy of the Assets. Chugach acknowledges and agrees that it will acquire its interests in the Assets from MEA on an "AS-IS, WHERE-IS, WITH ALL FAULTS" basis.

I. Taxes

All Taxes due from MEA for any period prior to the Closing Date with respect to the Chugach-Acquired Assets or Chugach's interest in the Joint Assets have been fully paid. No deficiency or adjustment in respect of any Tax that was assessed against MEA that might result in a Prohibited Encumbrance on any of the Assets remains unpaid and no claim, assessment or audit is pending or, to the knowledge of MEA, threatened with respect to any Taxes whose assessment might result in a Prohibited Encumbrance on any of the Assets. MEA has timely filed all returns relating to Taxes.

J. Brokers and Finders

Neither MEA nor any person acting on behalf of MEA has employed any broker, agent or finder, or incurred any liability for any brokerage fees, commission or finder's fees in connection with the transactions contemplated in this Agreement.

K. No Misrepresentations

MEA has not made any material misstatement of fact in this Agreement in connection with the contemplated transactions or omitted any material fact necessary or desirable to make materially complete, accurate, and not misleading every representation, and warranty set forth in this Agreement or in any document to be delivered pursuant to this Agreement or in connection with the transactions contemplated by this Agreement.

7. Performance of Obligations

Unless performance is otherwise excused by the provisions of this Agreement, each Party shall perform its obligations hereunder (including but not limited to those obligations set forth in Section4 and 15.A) from and after the Effective Date.

8. Asset Purchase Agreement Termination

If (a) Chugach and ML&P are unable to obtain RCA Approval, or (b) the Asset Purchase Agreement is terminated or expires before the occurrence of the ML&P Closing, or (c) either Chugach or the Municipality abandons its performance under the Asset Purchase Agreement, then Chugach may, without fault, terminate this Agreement immediately by delivery of notice to MEA of such rejection, termination, expiration, or abandonment.

9. Pre-Closing Covenants

The provisions of this Section 7 shall remain in force until the Closing Date.

A. Operation of Assets

Except as the other Party may otherwise consent to in writing, each Party shall, with respect the Assets then owned by it:

1. Operate the Assets in accordance with prudent utility practices; allow the other reasonable access to such Assets to periodically inspect the Assets, including plant records and, to the extent consistent with such operation; and use commercially reasonable efforts to (a) keep available the services of its present employees relating to the operation and maintenance of such Assets; (b) maintain all permits, licenses, registrations and other authorizations necessary to the conduct of its business with respect to Assets; and (c) not default in the performance of any obligation with respect to the Assets;

2. Promptly notify the other Party prior to entering into any lease, contract or agreement with respect to or affecting the Assets in any way, and promptly provide the other Party copies of such documents;

3. Maintain the Assets in substantially the same condition as they are as of the Effective Date (except for ordinary wear and tear that could not reasonably be expected to have a

material adverse effect on the use of the equipment and except for damage due to unavoidable casualty);

4. Give the other Party immediate written notice of any material damage to any of the Assets by fire, theft or other casualty or condemnation;

5. Maintain its books, records, and accounts associated with the Assets in the usual, regular, and ordinary manner, on a basis consistent with prior periods;

6. Materially comply with all laws, ordinances, and regulations applicable to it, and to the conduct of its business, including timely filing any reports or returns due any state, federal or municipal authority and paying any tax, in each case as otherwise directly related to the Assets; and

7. Not take any action that would cause a condition to Closing not to be satisfied.

B. Major Maintenance

Each Party will promptly notify the other of any plan to perform work on the Assets then owned by the Party in an amount in excess of $100,000. The notice will include a detailed plan, estimated budget and schedule for the work, any studies or analysis supporting the necessity for the work and a statement as to the effect that forgoing the work would impact either Party's obligation to maintain adequate reserves under any existing contract. The receiving Party will have the right to notify the other as to whether it agrees or disagrees with the work as proposed. If the receiving Party agrees with the plan, the notifying Party shall proceed accordingly and, in such case, the receiving Party acknowledges that such expenditures for the approved plan will be treated as an increase in the net book value of the Assets. If the receiving Party notifies the notifying Party that it disagrees with the plan, the notifying Party will forgo the repair and the receiving Party acknowledges it will still proceed with Closing with the Assets in "as is" condition.

C. Fulfillment of Conditions

The Parties shall make commercially reasonable efforts to fulfill all of the conditions set forth in Sections 10 and 0 that are required to be fulfilled by such Parties.

10. Conditions to MEA's Obligations

The obligation of MEA to close is subject to the substantial fulfillment, at or prior to the Closing Date, of each of the following conditions, any or all of which may be waived in writing by MEA, in its sole discretion.

A. Accuracy of Representations and Warranties

Each of the representations and warranties of Chugach contained in this Agreement are true on and as of the Closing Date with the same force and effect as though made on and as of the Closing Date, and Chugach shall provide at the Closing a certificate to that effect.

B. Performance of Covenants

Chugach has performed and complied in all material respects with the covenants, obligations, and agreements to be performed or complied with by it on or before the Closing Date pursuant to this Agreement.

C. Litigation

No claim, action, suit, proceeding, arbitration, investigation, or hearing or notice of hearing is pending, threatened against or affecting Chugach that might result, or has resulted, in an action to enjoin or to prevent or delay the consummation of the transactions contemplated by this Agreement.

D. Absence of Certain Changes

There has not been:

1. Any material adverse change in the Assets;

2. Any material damage, destruction or loss suffered by the Assets, whether or not covered by insurance; or

3. Any sale, lease, Prohibited Encumbrance or other voluntary or involuntary disposition by Chugach of any interest in the Assets.

E. Approvals

MEA shall have received all regulatory and other third-party approvals it reasonably deems necessary in connection with this Agreement.

11. Conditions to Chugach's Obligations

The obligations of Chugach to close are subject to the fulfillment, at or prior to the closing, of each of the following conditions, any or all of which may be waived in writing by Chugach, in its sole discretion.

A. Closing of ML&P Asset Purchase

Chugach shall have received RCA Approval and the closing of the acquisition of substantially all of the ML&P Assets by Chugach shall have occurred.

B. Accuracy of Representations and Warranties

Each of the representations and warranties of MEA contained in this Agreement are true on and as of the Closing Date with the same force and effect as though made on and as of the Closing Date, and MEA shall provide at the Closing a certificate to that effect.

C. Performance of Covenants

MEA has performed and complied in all material respects with thecovenants, obligations, and agreements to be performed or complied with by it on or before the Closing Date pursuant to this Agreement.

D. Litigation

No claim, action, suit, proceeding, arbitration, investigation, or hearing or notice of hearing is pending, threatened against or affecting MEA that might result, or has resulted, in an action to enjoin or to prevent or delay the consummation of the transactions contemplated by this Agreement.

E. Absence of Certain Changes

There has not been:

1. Any material adverse change in the Assets;

2. Any material damage, destruction or loss suffered by the Assets, whether or not covered by insurance; or

3. Any sale, lease, Prohibited Encumbrance or other voluntary or involuntary disposition by MEA of any interest in the Assets.

F. Consents

Chugach shall have received all consents necessary to consummate this Agreement, transfer the Assets and enter into the other agreements and transactions contemplated by this Agreement.

G. Approvals

Chugach shall have received all regulatory and other third-party approvals it reasonably deems necessary in connection with this Agreement.

12. Further Documents and Assurances

Each Party shall, from time to time after the Closing, make such further conveyances, transfers, assignments, and deliveries, and execute such further instruments and documents as the

other Party deems reasonably necessary in order to effectuate and confirm the transactions contemplated by this Agreement. The provisions of this Section shall come into force upon, and continue in force after, the Closing Date.

13. Indemnification

A. By Chugach

Chugach shall indemnify, defend and hold harmless MEA and any person claiming by or through it or its successors and assigns from, against, and with respect to any and all costs, losses, claims, liabilities, fines, penalties, damages, and expenses (including, but not limited to, court costs, reasonable fees, and disbursements of counsel with or without suit and on appeal), (collectively, a "Loss") incurred by any such Indemnified Person in connection with:

1. Any breach of (a) any of the representations and warranties made by Chugach pursuant to this Agreement or (b) any covenant or agreement made by Chugach in this Agreement;

2. Except to the extent caused by MEA, any liability arising out of its ownership or operation of any of the Assets prior to the Closing Date; and

3. Any liability arising out of the ownership or operation of the Chugach-Acquired Assets after the Closing Date; and

4. Any action, suit, proceeding, compromise, settlement, assessment, or judgment arising out of or incident to any of the matters indemnified against in this Section 13.A.

Notwithstanding the above, in no event shall Chugach have any obligation to pay any amount of indemnity pursuant to this Agreement unless and until the aggregate amount of Loss incurred by MEA exceeds twenty-five thousand dollars ($25,000) (the "Deductible"), at which point Chugach would be responsible for Loss in excess of the Deductible.

B. By MEA

MEA shall indemnify, defend and hold harmless Chugach and any person claiming by or through it or its successors and assigns from, against, and with respect to any and all Loss incurred by any such Indemnified Person in connection with:

1. Any breach of (a) any of the representations and warranties made by MEA pursuant to this Agreement or (b) any covenant or agreement made by MEA in this Agreement;

2. Except to the extent caused by Chugach, any liability arising out of its ownership or operation of any of the Assets prior to the Closing Date; and

3. Any liability arising out of the ownership or operation of the MEA-Acquired Assets after the Closing Date; and

4. Any action, suit, proceeding, compromise, settlement, assessment, or judgment arising out of or incident to any of the matters indemnified against in this Section 13.B.

Notwithstanding the above, in no event shall MEA have any obligation to pay any amount of indemnity pursuant to this Agreement unless and until the aggregate amount of Loss incurred by Chugach exceeds the Deductible, at which point MEA would be responsible for Loss in excess of the Deductible.

C. Defense against Third Party Claims

1. Notice of Claim. If any Indemnified Person receives notice of a claim or learns of a circumstance that may give rise to a claim by a third party that will result in a claim by the Indemnified Person for indemnification and defense under this Section, then the Indemnified Party shall promptly notify the Indemnifying Party. No delay on the part of the Indemnified Person in notifying any Indemnifying Party shall relieve the Indemnifying Party from any obligation to indemnify and defend unless (and then solely to the extent) the Indemnifying Party thereby is prejudiced.

2. Indemnifying Party Right to Defend. Any Indemnifying Party will have the right, at its expense, to defend the Indemnified Person against the third party claim with counsel of the Indemnifying Party's choice satisfactory to the Indemnified Person so long as (a) the Indemnifying Party notifies the Indemnified Person in writing within fifteen days after the Indemnified Person has given notice of the claim that the Indemnifying Party will indemnify the Indemnified Person from and against all costs, losses, claims, liabilities, fines, penalties, damages, and expenses the Indemnified Person may suffer resulting from, arising out of, relating to, in the nature of, or caused by the claim, (b) the Indemnifying Party provides the Indemnified Person with evidence reasonably acceptable to the Indemnified Person that the Indemnifying Party has and will have the financial resources to defend against the claim and fulfill its indemnification and defense obligations, (c) the claim involves only money damages and does not seek an injunction or other equitable relief, (d) settlement of, or an adverse judgment with respect to, the claim is not, in the good faith judgment of the Indemnified Person, likely to establish a precedential custom or practice materially adverse to the continuing business interests of the Indemnified Person, and (e) the Indemnifying Party conducts the defense of the claim actively and diligently. If the Indemnified Person is subjected both to liability that is subject to indemnity or defense by the Indemnifying Party and liability that is not subject to indemnity or defense by the Indemnifying Party, the Indemnified Person and the Indemnifying Party shall be entitled to conduct a joint defense of the claim, each represented by counsel of its own choice, with the Indemnified Person paying its own expense as to the liability that is not subject to indemnity or defense by the Indemnified Party. In circumstances in which each of the conditions set forth in clauses (a) through (e) are not satisfied, the Indemnified Person and the Indemnifying Party shall be entitled to conduct a joint defense of the claim, each represented by counsel of its own choice at the expense of the Indemnifying Party. If the Indemnified Person has defenses or counterclaims to defeat or lessen liability that is subject to indemnity or defense by the Indemnified Person that are different from or in addition to the defenses and counterclaims available to the Indemnifying Party, the Indemnified Person may at its

option be represented by counsel of its own choice on such defenses or counterclaims at the expense of the Indemnifying Party.

3. During Indemnifying Party's Defense. So long as the Indemnifying Party is conducting the defense of the third party claim in accordance with Section 13.C, (a) the Indemnified Person may retain separate co-counsel at its sole cost and expense and participate in the defense of the claim, (b) the Indemnified Person will not consent to the entry of any judgment or enter into any settlement with respect to the claim without the prior written consent of the Indemnifying Party, and (c) the Indemnifying Party will not consent to the entry of any judgment or enter into any settlement with respect to the claim without the prior written consent of the Indemnified Person. If the Indemnifying Party and the Indemnified Person are conducting a joint defense of the claim, neither will consent to the entry of any judgment or enter into any settlement with respect to the claim without the prior written consent of the other, which will not be unreasonably or untimely withheld.

4. Defense by Indemnified Person. If the Indemnifying Party declines or otherwise fails to participate in the defense of any third party claim (a) the Indemnified Person may defend against, and consent to the entry of any judgment or enter into any settlement with respect to, the claim in any manner it may deem appropriate (and the Indemnified Person need not consult with, or obtain any consent from, any Indemnifying Party in connection therewith), (b) the Indemnifying Party shall reimburse the Indemnified Person promptly and periodically for the costs of defending against the claim (including attorney's fees and expenses), and (c) the Indemnifying Party will remain responsible for any costs, losses, claims, liabilities, fines, penalties, damages, and expenses the Indemnified Person may suffer resulting from, arising out of, relating to, in the nature of, or caused by the claim to the fullest extent provided in this section.

14. Default, Remedies and Termination

A. Default

A Party shall be in default upon the occurrence of any of the following events.

1. The Party fails to materially meet, comply with, or perform any covenant, agreement or obligation required on the Party's part within the time limits and in the manner required in this Agreement, for any reason other than a default by the other Party.

2. The Party fails to deliver at the Closing any items required of the Party.

B. Notice of Default and Cure

In the event of a default by a Party, the other Party may give the defaulting Party notice of default. If the default is a type that can be cured, the defaulting Party shall have ten days to cure the default plus such additional time as may be necessary to cure the default, provided that the defaulting Party commences curing the default within the initial ten-day period, diligently prosecutes the cure, and completes the cure within thirty days after receiving the default notice.

C. Remedies for Default

If the default is not a type that can be cured, or the defaulting Party fails to commence curing the default within the initial ten day period, fails to diligently prosecute the cure, or fails to complete the cure within thirty days after receiving the default notice, then the defaulting Party shall be in default and the other Party may, at its option, terminate this Agreement by written notice delivered to the other Party at or prior to the Closing, seek to enforce specific performance of this Agreement, and/or pursue any other remedy available at law or in equity, all such remedies being cumulative; provided, however, in no event will either Party have any liability to any other Party for any special, punitive, consequential, exemplary, incidental or other indirect damages (excluding any indemnification obligations hereunder with respect to third party claims).

D. Ultimate Deadline

This Agreement may be terminated without fault by Chugach or MEA if all conditions to closing have not been satisfied or waived by December 31, 2023, except conditions that have not been satisfied due to the acts or omissions by that Party.

15. General

A. Cooperation

1. MEA agrees that it shall not object to RCA Approval or to Chugach's acquisition of the ML&P Assets as presently proposed in any regulatory proceeding or court action or in any manner or in any proceeding in which it becomes a party or otherwise involved. Any breach of this Section 15.A.1. shall be deemed to be a default that cannot be cured.

2. MEA agrees that it shall not object to Chugach continuing ML&P's duties as southern controller of the Intertie in any regulatory or court proceeding.

B. Capital Credits

Chugach hereby stipulates, acknowledges, and agrees that Chugach's acquisition of the ML&P Assets does not and will not modify the terms of the Confidential Settlement Agreement dated May 28, 2014 between MEA and Chugach.

C. Certificated Service Areas

The Parties each agree with the other that they shall not serve any customer in the other's certificated service area without an order from the RCA authorizing such service. Each Party represents to the other Party that it has no plans to work towards any acquisition of or merger with any part of the other Party's certificated service area.

D. Expenses

Except as otherwise provided in this Agreement, whether or not the transactions contemplated by this Agreement are consummated, each Party shall pay its own expenses and the fees and expenses of its counsel and accountants and other consultants.

E. Survival of Representations and Warranties

The representations, warranties, covenants, and agreements set forth in this Agreement shall not merge at closing, but shall survive the Closing.

F. Decision Making by Parties

Except where this Agreement expressly provides for a different standard, whenever this Agreement provides for a determination, decision, permission, consent or approval of a Party, the Party shall make such determination, decision, grant or withholding of permission, consent or approval in a commercially reasonable manner and without unreasonable delay. Any denial of an approval, permission, decision, determination or consent required to be made in a commercially reasonable manner shall include in reasonable detail the reason for denial or aspect of the request that was not acceptable.

G. Waivers

No action taken pursuant to this Agreement, including any investigation by or on behalf of either Party, shall be deemed to constitute a waiver by the Party taking such action of compliance with any representation, warranty, covenant, or agreement contained in this Agreement. The waiver by either Party of a breach of any provision of this Agreement shall not operate or be construed as a waiver of any subsequent breach.

H. Assignment

Neither this Agreement nor the rights or obligations of either Party under this Agreement may be assigned by either Party without the prior written consent of the other Party, which shall not be unreasonably withheld, and any assignment in violation hereof shall be null and void and of no force or effect.

I. Binding Effect; Benefits

This Agreement shall be binding upon and inure to the benefit of the Parties and, to the extent permitted under this Agreement, their respective heirs, executors, personal representatives, other legal representatives, successors, and assigns. Nothing in this Agreement, whether expressed or implied, is intended to confer any rights or remedies on any person other than MEA or Chugach, nor is anything in this Agreement intended to relieve or discharge the obligation or liability of any third party, nor shall any provision give any third party any right of subrogation or action against either Party, except to the extent that any such third party is entitled to indemnification pursuant to

Section 12. Nothing in this Agreement shall be intended or deemed to create a partnership, joint venture, association, or other similar relationship between the Parties.

J. Notices

All notices, requests, demands, and other communications that are required to be or may be given under this Agreement shall be in writing, and shall be deemed to have been duly given if and when delivered or mailed to either Party by commercial overnight courier, personal delivery, facsimile, or registered or certified mail, return receipt requested, addressed to such Party at such Party's address as provided below or such other address as either Party may designate by notice similarly sent. Notice by mail is deemed given and is effective 48 hours after the date such notice is deposited in the mail. Other notice shall be deemed given and shall be effective when received.

MEA: Attention, Chief Executive Officer
P.O. Box 2929
163 E. Industrial Way
Palmer, Alaska 99645

Chugach: Attention, Chief Executive Officer
5601 Electron Drive
Anchorage, Alaska 99518-1081

K. Further Assurances

Each Party shall, from time to time at or after the Closing, at the request of the other Party and without further consideration, execute and deliver such other instruments and take such other actions as may be required to confer to MEA and its assignees the benefits contemplated by this Agreement.

L. Counterparts and Facsimile Signatures

This Agreement may be executed in one or more counterparts, including by electronic or facsimile signature, each of which shall be deemed an original, but all of which shall constitute but one and the same agreement notwithstanding the fact that all Parties are not signatories to the original or the same counterpart.

M. Entire Agreement; Amendment

This Agreement (including the Exhibits and Schedules hereto) constitutes the entire agreement and supersedes all prior agreements, representations, warranties, covenants and understandings, oral and written, between the Parties with respect to the subject matter, including, but not limited to, that certain Memorandum of Understanding dated November 29, 2018, and may not be amended, modified, or terminated unless in a written instrument executed by all of the Parties.

N. Severability

The invalidity of all or any part of any section of this Agreement shall not render invalid the remainder of this Agreement or the remainder of such section. If any provision of this Agreement is so broad as to be unenforceable, such provision shall be interpreted to be only so broad as is enforceable.

O. Jurisdiction, Venue, and Governing Law

In the event of any action or proceeding arising out of this Agreement or the transactions contemplated by this Agreement, exclusive jurisdiction and venue shall lie in the Alaska Superior Court for the Third Judicial District, and Chugach and MEA hereby all consent and agree to jurisdiction and venue in such court. This Agreement shall be construed as to both validity and performance and enforced in accordance with and governed by the internal laws of the State of Alaska.

P. Interpretation

The provisions of this Agreement are the result of arm's length negotiations between the Parties and each Party has had the benefit of counsel, to the extent it deemed appropriate. Therefore, this Agreement shall not be construed either for or against a particular Party by reason of draftsmanship or otherwise. The section and other headings contained in this Agreement are for reference purposes only and shall not be deemed to be a part of this Agreement or to affect the meaning or interpretation of this Agreement.

Q. Attorney Fees

In the event of any action or proceeding arising out of or in connection with this Agreement, the prevailing Party shall be entitled to all costs, expenses, and reasonable attorney fees incurred with or without suit and on appeal.

R. Exhibits

The following exhibits and schedules are attached to this Agreement and are incorporated by reference and made a part of this Agreement:

EKLUTNA
POWER PURCHASE AGREEMENT
BETWEEN
MUNICIPALITY OF ANCHORAGE
AND
MATANUSKA ELECTRIC ASSOCIATION, INC.

This Eklutna Power Purchase Agreement (this "**PPA**"), dated as of September 16, 2019 (the "**Effective Date**"), is made and entered into by and between the **MUNICIPALITY OF ANCHORAGE,** a political subdivision organized under the laws of the State of Alaska ("**Seller**"), and **MATANUSKA ELECTRIC ASSOCIATION, INC.**, an Alaska not-for-profit electric cooperative corporation ("**Purchaser**"). Seller and Purchaser are hereinafter referred to individually as a "**Party**" and collectively as the "**Parties**".

WHEREAS, as of the Effective Date, Seller is the owner of a 53.33% undivided interest in the Facility (as defined herein) (the "**Seller's Interest**") and Purchaser is the owner of a 16.67% undivided interest in the Facility (the "**Purchaser's Interest**"), and if all of the PPA Contingencies (as hereinafter defined) have been fulfilled or waived, the "**MEA Portion**" shall, effective as of the Commencement Date (as hereinafter defined) and for the remainder of the Term (as hereinafter defined), equal a 35.71% share of the Seller's Interest and a 19.05% interest in the Facility. Such percentage interest, when combined with Purchaser's existing ownership of 16.67% of the Facility, will give Purchaser rights to 35.71% of the Facility; and

WHEREAS, the Facility is subject to the terms of the Transition Plan (as defined herein), which provides for the sale of interests in the Facility by the Owners (as defined herein), and it is the intent of the Parties that the Transition Plan will continue to govern the rights and obligations of the Owners in such capacity; and

WHEREAS, Seller desires to sell and deliver and Purchaser desires to accept and receive and pay for certain Power (as defined herein) delivered from the Facility to the Delivery Point on the terms and conditions, including the price, set forth in this PPA; and

WHEREAS, in connection with the sale of such Power, Seller desires to grant to Purchaser an option to purchase the MEA Portion (as defined herein), subject to the terms of the Transition Plan; and

WHEREAS, Seller intends to operate the MEA Portion during the Term in a manner consistent with Prudent Utility Practice, the Transition Plan, and the directives and decisions of the Operating Committee (as hereinafter defined), acting as a reasonable owner would, and bearing all the risks and responsibilities of such ownership in accordance with the provisions of this Agreement.

NOW THEREFORE, in consideration of the mutual covenants herein contained, the sufficiency and adequacy of which are hereby acknowledged, the Parties agree to the following:

ARTICLE 1
RULES OF INTERPRETATION

Section 1.1 Interpretation.

(A) Capitalized terms listed in this PPA shall have the meanings set forth in Exhibit A or as otherwise defined in this PPA, whether in the singular or the plural or in the present or past tense. Words not otherwise defined in this PPA shall (i) have meanings as commonly used in the English language, (ii) be given their generally accepted meaning consistent with Prudent Utility Practice, and (iii) be given their well-known and generally accepted technical or trade meanings.

(B) For purposes of this PPA, (1) the words "include," "includes" and "including" shall be deemed to be followed by the words "without limitation"; (2) the word "or" is not exclusive; (3) the masculine shall include the feminine and neuter; and (4) the words "herein," "hereof," "hereby," "hereto" and "hereunder" refer to this PPA as a whole. Unless the context otherwise requires, references herein: (x) to Articles, Sections, and Exhibits means the Articles, Sections and Exhibits contained in and attached to this PPA; (y) to an agreement, instrument or other document means such agreement, instrument, or other document as amended, supplemented and modified from time to time to the extent permitted by the provisions thereof and (z) to a statute means such statute as amended from time to time and includes any successor legislation thereto and any regulations promulgated thereunder. This PPA shall be construed without regard to any presumption or rule requiring construction or interpretation against the party drafting an instrument or causing any instrument to be drafted.

Section 1.2 Consents and Approvals; Commercially Reasonable Standard. Unless expressly provided otherwise in this PPA, (a) when this PPA requires the consent, approval, or similar action by a Party, such consent or approval shall not be unreasonably withheld, conditioned or delayed, and (b) wherever this PPA gives a Party a right to determine, require, specify or take similar action with respect to a matter, such determination, requirement, specification or similar action shall be Commercially Reasonable.

Section 1.3 Waiver. The failure of either Party to enforce or insist upon compliance with or strict performance of any of the terms or conditions of this PPA, or to take advantage of any of its rights hereunder, shall not constitute a waiver or relinquishment of any such terms, conditions, or rights, but the same shall be and remain at all times in full force and effect.

ARTICLE 2
CHUGACH ASSET PURCHASE AGREEMENT; CHUGACH POWER PURCHASE AGREEMENT

Section 2.1 Chugach Asset Purchase Agreement; Chugach Power Purchase Agreement. Purchaser acknowledges that Seller and Chugach have entered into an Asset Purchase and Sale Agreement dated as of December 28, 2018, pursuant to which Seller has agreed to sell to Chugach, and Chugach has agreed to purchase from Seller, substantially all of the assets of ML&P other than the Seller's Interest (the "**Chugach Asset Purchase**

Agreement"). The assets that Seller has agreed to sell to Chugach, and that Chugach has agreed to purchase from Seller, under the Chugach Asset Purchase Agreement include all of Seller's right, title, and interest in and to the Eklutna Transmission Assets. Purchaser further acknowledges that Seller and Chugach have entered into that certain Eklutna Power Purchase Agreement dated as of December 28, 2018, pursuant to which Seller has agreed to sell to Chugach, and Chugach has agreed to purchase from Seller, power produced by the Facility and attributable to the "Chugach Portion" (as hereinafter defined) (the "**Chugach Power Purchase Agreement**").

ARTICLE 3
TERM AND TERMINATION

Section 3.1 PPA Contingencies. This PPA and the Parties' obligations set forth herein are contingent upon the occurrence or waiver of each of the following events (the "**PPA Contingencies**"):

(A) RCA PPA Approval shall have been obtained;

(B) The Chugach Power Purchase Agreement shall have been approved by the RCA in accordance with the terms and conditions of the Chugach Power Purchase Agreement;

(C) The Closing under the Chugach Asset Purchase Agreement shall have occurred; and

(D) The representations and warranties of Purchaser in Section 18.14(B) shall have been true and correct as of the Effective Date and the Commencement Date, and Seller shall have received an original, fully executed copy of the CFC Subordination Agreement (including the acknowledgement and acceptance attached thereto, as executed by Purchaser) and evidence of recording of the CFC Subordination Agreement pursuant to Section 18.14(B).

Section 3.2 Commencement Date. The commencement date under this PPA (the "**Commencement Date**") shall be the date on which each of the PPA Contingencies has occurred or has been waived by the Parties.

Section 3.3 Term.

(A) The term of this PPA shall commence on the Commencement Date, and shall continue in full force and effect until 11:59 p.m. (Facility local time) on the Scheduled Termination Date, subject to early termination or extension as provided in this PPA or otherwise agreed to by the Parties (the "**Term**"). No interruption or curtailment of purchases or sales, whether due to Force Majeure or otherwise, will operate to extend the Term.

(B) The effectiveness of this PPA is expressly contingent upon the occurrence of the Closing under the Chugach Asset Purchase Agreement. In the event that the Chugach Asset Purchase Agreement is terminated before the Commencement Date, this PPA shall

automatically terminate, and become null and void, at the same time as the termination of the Chugach Asset Purchase Agreement.

ARTICLE 4
FACILITY DESCRIPTION AND OPERATION

Section 4.1 Description. The Facility is described in Exhibit B. A scaled map that identifies the Site, the location of the Facility, the Delivery Point and other important facilities, is included in Exhibit B.

Section 4.2 Operation of the Facility.

(A) During the Term Seller shall, at its cost and expense, manage, control, operate, and maintain the MEA Portion in accordance with the Operations Agreement and in a manner consistent with Prudent Utility Practice. Without limiting the foregoing, during the Term, as between Seller and Purchaser, Seller shall be responsible for all capital costs, all operations and maintenance expenses, and all costs and expenses for environmental compliance and compliance with Applicable Laws relating to the MEA Portion.

(B) During the Term, Seller shall, after giving Purchaser a reasonable opportunity to consult with Seller, but without in any way limiting Seller's discretion as a result of any such consultation, select the person to serve as Seller's representative to the Operating Committee (the "**Seller's Representative**"). The Seller's Representative shall make all decisions on the Operating Committee consistent with Prudent Utility Practice and the rights and obligations of the Parties under this PPA and the rights and obligations of the parties under the Chugach Power Purchase Agreement. The Seller's Representative shall also be Seller's representative for any consultation, study, and implementation processes required under the Fish and Wildlife Agreement relating to the Facility. The Seller's Representative shall make all decisions with respect to any processes required under the Fish and Wildlife Agreement with due regard for the rights and obligations of the Parties under this PPA.

(C) The Parties acknowledge and agree that Seller has prior rights to not less than 41 million gallons of water per day from Eklutna Lake for public water supply pursuant to the Act of October 30, 1984, 98 Stat. 2823; Alaska Statutes 46.15.150(a); and Certificate of Appropriation ADL 44944. The Parties agree that during the Term, the supply of water available for production of Power by the Seller's Interest shall be net of all water taken by Anchorage Water and Wastewater Utility for public water supply purposes consistent with the aforementioned water rights.

Section 4.3 Books and Records. Seller and Purchaser shall each keep complete and accurate books and records and all other data required by each of them for the purposes of metering, billing, payment, and administration of this PPA, including such Operating Records and other records as may be required by Applicable Law, Governmental Authorities, or any ERO or ISO. Each Party shall maintain such books and records in accordance with relevant accounting standards, as applicable, and shall provide the other Party Commercially Reasonable access to such books and records. All books and records pertaining to the operation of the Facility shall be

maintained on the premises of the Facility or such other location as is mutually agreed to by the Parties. Either Party may audit and examine any such books and records from time to time upon request and during normal business hours. Each Party shall maintain any books and records that it is required to keep under this Section 4.3 for a period of at least six (6) years after the preparation of such books or records.

ARTICLE 5
DELIVERY; SCHEDULING; FACILITY METERING

Section 5.1 Power Delivery Arrangements. Seller shall be responsible for all electric losses, transmission and ancillary service arrangements, and costs and expenses required for delivery of the Power from the Facility to the Delivery Point. Purchaser shall be responsible for all electric losses, transmission and ancillary service arrangements, and costs and expenses required for transportation and delivery of the Power from and after the Delivery Point.

Section 5.2 Scheduling. Purchaser shall at all times during the Term nominate and schedule for delivery to Purchaser, consistent with past practice at the Facility and in accordance with Prudent Utility Practice and the provisions of this PPA and the Transition Plan, the maximum quantity of Power that is available at such time for scheduling and delivery from the MEA Portion in accordance with the provisions of this PPA.

Section 5.3 Facility Metering. The Facility Metering used to measure Power delivered to the Delivery Point under this PPA shall be located at the Delivery Point, or as close thereto as is reasonably possible.

Section 5.4 Facility Metering Testing. Purchaser will provide to Seller copies of all Facility Metering calibration test results. If any test of the Facility Metering discloses an inaccuracy of more than one-half percent (0.5%) fast or one-half percent (0.5%) slow, any payments or adjustments made or calculated under this PPA that would have been affected by the inaccuracy will be recalculated to correct for the inaccuracy. For purposes of such correction, if the inaccuracy is traceable to a specific event or occurrence at a reasonably ascertainable time, then the adjustment will extend back to that time; otherwise, it will be assumed that the error has existed for a period equal to one-half of the time elapsed since the Facility Metering was installed or one-half of the time since the last Facility Metering test, whichever is later. Either Party may, at its option and expense, have check Facility Metering installed. If any such check Facility Metering is installed, it will be used, in accordance with practices and procedures established by the Parties, for billing adjustments of discovered Facility Metering inaccuracies. If at any time both the billing and check Facility Metering at any location should fail to register, Purchaser will determine the delivered Power from the best available data, unless Seller objects to such determination within sixty (60) days after receipt of such determination. Any such disagreement will be resolved pursuant to the dispute resolution provisions set forth in Section 12.1. If either Party determines, as a result of correction of measurements made by inaccurate Facility Metering, that any payments or adjustments made pursuant to this PPA are incorrect, the Parties will use the corrected measurements to recompute such payments or adjustments. Any amounts that are determined to be payable or subject to refund as a result of such recomputation

will be paid to the Party entitled to such amounts within twenty (20) days after the paying Party is notified of the recomputation, with interest at the Interest Rate from the original payment due date to the date of payment or refund of such adjustment.

ARTICLE 6
SALE AND PURCHASE OF POWER

Section 6.1 General Obligation.

(A) Beginning on the Commencement Date and continuing thereafter throughout the Term, Seller shall generate from the Facility and deliver and sell to Purchaser, and Purchaser shall schedule and receive and purchase at the Delivery Point, any and all Energy, Capacity, Environmental Attributes, and Ancillary Services (collectively, the "**Power**") that is available from the Facility and attributable to the MEA Portion.

(B) The Power sold under this PPA is unit contingent. The Facility will be considered to be available for purposes of producing Power for delivery to Purchaser only when and to the extent that the Facility is capable of producing such Power in accordance with the provisions of this PPA, the Transition Agreement, Applicable Law, and Prudent Utility Practice. Seller shall have no obligation to sell and deliver Power, and Purchaser shall have no right to schedule or receive Power, at any time when the Facility is unavailable to generate such Power, whether in whole or in part, as a result of any Force Majeure, Forced Outage, or Planned Outage: *provided, however*, that if the Facility is partially available, Purchaser shall schedule, and Seller shall deliver, such amount of Power as is available on a proportionate basis from the MEA Portion at such time.

(C) Title to and risk of loss of the Power shall transfer from Seller to Purchaser at the Delivery Point. Title to the Power shall transfer from Seller to Purchaser free and clear of all liens, security interests, claims and encumbrances or any interest therein or thereto by any other Person.

Section 6.2 Additional Products; Ancillary Services.

(A) The Parties acknowledge that existing and future Applicable Laws create value in the ownership, use, or allocation of Environmental Attributes. To the full extent allowed by Applicable Law, Purchaser shall own and be entitled to claim all Environmental Attributes attributable to the MEA Portion from the Commencement Date until the end of the Term, to the extent such Environmental Attributes may exist or be created during such period. For purposes of effectuating the foregoing, the following shall apply:

1. Seller hereby automatically and irrevocably assigns to Purchaser all rights, title and authority for Purchaser to register the Facility and own, hold, and manage the Environmental Attributes attributable to the MEA Portion in Purchaser's own name and to Purchaser's account, including any rights associated with any renewable energy information or tracking system that exists or may be established (including but not limited to participants in any applicable REC Registration Program and the United States government) with regard to

monitoring, registering, tracking, certifying, or trading Environmental Attributes. Seller hereby authorizes Purchaser to act as its agent for the purposes of registering the Facility for such purposes, and tracking and certifying Environmental Attributes, and Purchaser shall have full authority to hold, sell, or trade Environmental Attributes attributable to the MEA Portion for its own account in connection with any renewable energy information or tracking systems. Upon the request of Purchaser, at Purchaser's cost and expense, (i) Seller shall deliver or cause to be delivered to Purchaser such attestations/certifications of Environmental Attributes attributable to the MEA Portion, and (ii) Seller shall cooperate with Purchaser's registration and certification of Environmental Attributes attributable to the MEA Portion.

2. Prior to the Commencement Date and as required thereafter for Purchaser to claim, own, or realize the available benefits of any Environmental Attributes attributable to the MEA Portion, Seller shall, at Purchaser's reasonable cost and expense, make all applications or filings required by Applicable Law for Environmental Attribute accreditation and for the provision of such Environmental Attributes to Purchaser.

(B) On and after the Commencement Date until the end of the Term, Seller shall make available to Purchaser all Ancillary Services attributable to the MEA Portion at no additional charge under this PPA. Any compensation that Seller receives under Applicable Law or otherwise for Ancillary Services attributable to the MEA Portion during such period shall be provided to Purchaser at no additional cost to Purchaser under this PPA. Seller shall credit Purchaser, as a reduction to Seller's monthly invoice or other mutually-agreed mechanism, for any compensation that Seller receives for Ancillary Services attributable to the MEA Portion during such period.

1. Seller shall, at the request of Purchaser, use Commercially Reasonable Efforts to maximize the availability of such Ancillary Services during such period; *provided, however*, that Seller shall not be required to make any capital expenditures or incur any operating expenses in connection with such efforts.

2. In the event any Governmental Authority implements new or revised requirements for generators to create, modify, change, or supply Ancillary Services requiring Seller to install additional equipment after the Commencement Date to meet such requirements, Seller shall be responsible for payment of any costs and expenses of such additional equipment.

ARTICLE 7
PAYMENT FOR POWER

Section 7.1 Contract Price. In consideration for Seller's sale to Purchaser of the Power attributable to the MEA Portion and delivered to Purchaser under this PPA, Purchaser shall pay Seller for such Power an amount determined in accordance with the provisions of Exhibit C (the "**Contract Price**"). Purchaser and Seller acknowledge and agree that the Contract Price is structured to include all required compensation for any and all Power (including, for the avoidance of doubt, any and all Capacity, Ancillary Services, and Environmental Attributes)

delivered by Seller and received by Purchaser under this PPA during the Term and that Purchaser is not required to make any additional payments to Seller therefor.

ARTICLE 8
GOVERNMENTAL CHARGES

Section 8.1 Allocation of Governmental Charges.

(A) Seller will pay or cause to be paid all Governmental Charges that are imposed on or with respect to the generation of Power and the sale and delivery to Purchaser of Power before delivery of such Power to the Delivery Point.

(B) Purchaser will pay or cause to be paid all Governmental Charges that are imposed on or with respect to the purchase and receipt by Purchaser of Power at and from the Delivery Point.

(C) If a Party is required to remit or pay Governmental Charges that are the other Party's responsibility under this Section 8.1, such Party will promptly reimburse the other Party for such Governmental Charges. Both Parties will use reasonable efforts to administer this PPA and implement the provisions in accordance with their intent to minimize Governmental Charges, so long as no Party is materially adversely affected by such efforts. For greater certainty, each Party is responsible for any Governmental Charges levied on the basis of its own net income.

(D) Nothing in this Section 8.1 will obligate or cause a Party to pay or be liable to pay any Governmental Charge for which it is exempt under Applicable Law. If any sale of Power under this PPA is exempt from or not subject to any particular Governmental Charge, the Party subject to such exemption or exclusion shall timely provide the other Party with all reasonable documentation to evidence such exemption or exclusion.

(E) Either Party may deduct or withhold any Governmental Charges that such Party may be legally obligated to deduct or withhold from any amounts payable to the other Party under this PPA, and payment to such other Party as reduced by such deductions or withholdings will constitute full payment and settlement to such other Party under this PPA.

(F) Seller will provide Purchaser with any forms, documents, or certifications as may be required for Purchaser to satisfy any information reporting or withholding tax obligations with respect to any payments under this PPA.

ARTICLE 9
BILLING AND PAYMENT

Section 9.1 Billing and Payment.

(A) Each month following a full or partial month during the Term, Seller will render to Purchaser by email to the address provided in Section 18.2 an invoice setting forth the

total Contract Price and resulting total amount due for all Power delivered to Purchaser in accordance with the requirements of this PPA during such preceding month, any amounts payable to Seller under ARTICLE 10, and any credits to Purchaser under ARTICLE 10. Billing and payment will be based on the Contract Price and on delivered Power quantities. Payment of any such invoice will be made by Purchaser to Seller, via ACH or wire transfer of immediately available funds, on or before the later of (a) the 15th day of the month in which the invoice was rendered or (b) the 10th day following presentation of such invoice; *provided*, that if such due date is not a Business Day, payment will be due on the next Business Day following such date.

(B) If a payment by either Party under this PPA is late, interest shall accrue at the Interest Rate on the unpaid balance for the number of days payment was late and shall be added to the next billing statement.

(C) Seller and Purchaser shall net their obligations to each other under this PPA, and payment of the net amount will discharge all mutual undisputed obligations between the Parties.

Section 9.2 Subordination. The Parties agree that Purchaser's payment obligations hereunder are payable on a parity with Purchaser's other operating expenditures, but subordinate to (i.e., neither on a parity with nor superior to) Purchaser's payment obligations under the Bradley Lake Agreement only if and to the extent, and for the period, that making such payments would prevent Purchaser from making timely payment of any amounts due from it under the Bradley Lake Agreement.

Section 9.3 Billing Disputes. Either Party may dispute invoiced amounts, but shall pay at least the undisputed portion on or before the date due. To resolve any billing dispute, the Parties shall use the procedures set forth in ARTICLE 12. When the billing dispute is resolved, the Party owing any amount shall pay such amount within five (5) Business Days after the date of such resolution, together with late payment interest as provided in Section 9.1(B).

ARTICLE 10
LIABILITY FOR FAILURE TO DELIVER OR RECEIVE

Section 10.1 Failure to Deliver. Unless excused by Purchaser's failure to perform or Force Majeure, if Seller fails to deliver scheduled Power in accordance with the requirements of this PPA, Seller will pay to Purchaser the positive difference, if any, obtained by subtracting (a) the Contract Price for the scheduled Power not delivered by Seller from (b) the Replacement Price.

Section 10.2 Failure to Receive. Unless excused by Seller's failure to perform or Force Majeure, if Purchaser fails to receive (or to cause to be received) scheduled Power in accordance with the requirements of this PPA. Purchaser will pay to Seller the positive difference, if any, obtained by subtracting (a) the Sales Price from (b) the Contract Price for the scheduled Power not received by Purchaser.

Section 10.3 Payment for Nonperformance. Invoicing and payment of any amounts due under this ARTICLE 10 will be made in accordance with the provisions of ARTICLE 9.

Section 10.4 Acknowledgement of the Parties. The Parties hereby stipulate that the payment obligations set forth in this ARTICLE 10 are reasonable in light of the anticipated harm and the difficulty of estimation or calculation of actual damages, and each Party hereby waives the right to contest such payments as unfair, unreasonable, inadequate or void as a penalty. Without limiting to any extent the provisions of ARTICLE 11, the remedy set forth in this ARTICLE 10 will be the sole and exclusive remedy of Purchaser for the failure of Seller to deliver, or of Seller for the failure of Purchaser to receive, the required Power and all other damages and remedies are hereby waived.

ARTICLE 11
EVENTS OF DEFAULT AND REMEDIES

Section 11.1 Events of Default. Any of the following events shall constitute an Event of Default with respect to the specified Party, which shall be the defaulting Party with respect to such Event of Default, if such event has not been cured within the cure period specified for such event:

(A) Such Party's failure to pay any amount due to the other Party as required by this PPA, Actual Damages, any required indemnification, or any other required payment, and such amount remains unpaid for a period of ten (10) Business Days after the date such Party receives Notice from the non-defaulting Party that the amount is overdue.

(B) Such Party's application for, or consent (by admission of material allegations of a petition or otherwise) to, or failure to oppose the appointment of a receiver, trustee or liquidator for a Party or for all or substantially all of its assets, or its authorization of such application or consent, or the commencement or institution of any proceedings seeking such appointment against a Party which proceedings continue undismissed or unstayed for a period of sixty (60) days from their inception.

(C) (i) Such Party's authorization or filing of a voluntary petition in bankruptcy, or its application for, or consent (by admission of material allegations of a petition or otherwise) to, or failure to oppose an involuntary petition in bankruptcy or the application of any bankruptcy, reorganization, readjustment of debt, insolvency, dissolution, liquidation or other similar law of any jurisdiction to such Party, or (ii) the commencement or institution of any such proceedings against such Party which proceedings remain undismissed or unstayed for sixty (60) days from their inception or which result in adjudication of bankruptcy or insolvency within such time.

(D) Such Party's unauthorized assignment of this PPA, which unauthorized assignment shall be an Event of Default immediately upon its occurrence and without further notice from the non-defaulting Party.

(E) The failure by either Party to perform or observe any other material obligation to the other Party under this PPA (other than any events that are otherwise specifically covered in this Section 11.1 as a separate Event of Default, or Seller's obligation to deliver, and Purchaser's obligation to receive, for which a separate remedy is provided in ARTICLE 10), which failure is not excused by Force Majeure and remains unremedied for thirty (30) days after Notice thereof shall have been given by the non-defaulting Party; *provided, however*, that if the failure is not reasonably capable of being cured within the thirty (30) day period, the defaulting Party will have such additional time (not exceeding an additional ninety (90) days) as is reasonably necessary to cure the failure, so long as the Party promptly commences and diligently pursues the cure.

Section 11.2 Remedies. Upon the occurrence of any Event of Default of this PPA, the non-defaulting Party may pursue all rights and remedies available to it at law and in equity and in accordance with the terms of this PPA. Except as explicitly provided to the contrary in this PPA, each right or remedy of the Parties provided for in this PPA shall be cumulative of and shall be in addition to every other right or remedy provided for in this PPA, and the exercise of one or more of the rights or remedies provided for herein shall not preclude the simultaneous or later exercise by such Party of any other rights or remedies provided for herein.

(A) Termination and Damages. For any uncured Event of Default, the non-defaulting Party may, at its option do any, some, or all of the following:

1. Net from any payments due from the non-defaulting Party any amount otherwise due from the defaulting Party under or in connection with this PPA, including any unpaid Actual Damages;

2. Seek Actual Damages in such amounts and on such basis for the default as authorized by this PPA;

3. Terminate this PPA immediately upon Notice, without penalty or further obligation to the defaulting Party. Upon the termination of this PPA under this Section 11.2, the non-defaulting Party shall be entitled to receive from the defaulting Party all of the Actual Damages in connection with the Event of Default resulting in such termination.

(B) Damages for Events of Default. The non-defaulting Party shall be entitled to receive from the defaulting Party all direct damages incurred by the non-defaulting Party that are proximately caused by Event of Default ("**Actual Damages**").

(C) Seller Security Interest. In the event Purchaser shall be deemed to have acquired title to the MEA Portion at any time (other than by exercise of the Purchase Option under Section 17.3), Seller shall have all of the rights and remedies of a secured party with respect to the Seller Security Interest under Article 9 of the UCC and other Applicable Law, including the right to foreclose on the Seller Security Interest upon an Event of Default.

Section 11.3 Limitation on Damages. The Parties confirm that the express remedies and measures of damages provided in this PPA satisfy the essential purposes hereof. If no

remedy or measure of damages is expressly herein provided, the obligor's liability shall be limited to Actual Damages only. Neither Party shall be liable to the other Party for consequential, incidental, punitive, exemplary, special, equitable or indirect damages, lost profits or other business interruption damages by statute, in tort or contract (except to the extent expressly provided herein); *provided, however*, that if either Party is held liable to a third party for such damages and the Party held liable for such damages is entitled to indemnification from the other Party hereto, the indemnifying Party shall be liable for, and obligated to reimburse the indemnified Party for, such damages. To the extent any damages required to be paid hereunder are liquidated, the Parties acknowledge that the damages are difficult or impossible to determine, that otherwise obtaining an adequate remedy is inconvenient, and that the liquidated damages constitute a reasonable approximation of the harm or loss.

ARTICLE 12
DISPUTE RESOLUTION

Section 12.1 Dispute Resolution. In the event of any dispute arising under this PPA (a "**Dispute**"), within ten (10) Business Days following Notice by either Party, (i) each Party shall appoint a representative, and (ii) the representatives shall meet, negotiate and attempt in good faith to resolve the Dispute quickly, informally and inexpensively. In the event the representatives cannot resolve the Dispute within thirty (30) days after the first meeting, either Party may request that consideration and resolution of the Dispute be transferred to a designated representative of each Party's senior management. Within ten (10) days following such a request, each Party shall submit a written summary of the Dispute describing the issues and claims to a senior officer of each Party designated to address the Dispute. Within ten (10) Business Days after receipt of each Party's Dispute summaries, the senior management representatives for both Parties shall negotiate in good faith to resolve the Dispute. If such senior management representatives are unable to resolve the Dispute within thirty (30) days thereafter, either Party may pursue any available legal remedies; *provided, however*, that if and to the extent that a Dispute involves the Justness or Reasonableness Conditions, and the Dispute is not resolved by negotiations of senior management representatives of the Parties, neither Party shall have any right to pursue any further legal remedies to resolve such Dispute and such Dispute shall be deemed to be resolved finally and conclusively by enforcement of the obligation of Purchaser under this PPA to pay the Contract Price and resulting amount due in accordance with the requirements of this PPA.

ARTICLE 13
FORCE MAJEURE

Section 13.1 Applicability of Force Majeure. Except as explicitly provided otherwise herein, a Party shall be relieved of its obligations to perform this PPA and shall not be considered to be in default with respect to any obligation under this PPA to the extent that such Party is prevented from fulfilling such obligation by Force Majeure, *provided, however*, that: (i) such Party gives prompt Notice describing the circumstances and impact of the Force Majeure; (ii) the relief from its obligations sought by such Party is of no greater scope and of no longer duration than is required by the Force Majeure; (iii) such Party proceeds with due diligence to overcome

the Force Majeure and resume performance of its obligations under this PPA; and (iv) such Party provides prompt Notice of the conclusion of the Force Majeure.

Section 13.2 Limitations on Effect of Force Majeure.

(A) Force Majeure shall relieve a Party from performing only such obligations as are actually prevented by the Force Majeure.

(B) Except to the extent that Force Majeure prevents a Party from completing a transfer of money to the other Party, Force Majeure shall not excuse a Party from making any payment to the other on or before the date that such payment becomes due and payable.

(C) In no event will the existence of Force Majeure extend this PPA beyond its stated Term.

Section 13.3 Termination Relating to Force Majeure Events.

(A) If Seller is excused from its obligations under this PPA for ninety (90) consecutive days because of a Force Majeure event, Purchaser may, at any time prior to the termination of the Force Majeure event, terminate this PPA effective upon not less than three (3) days' notice to Seller; *provided*, that in the event that Seller holds Purchaser harmless from the effects of such non-performance, such ninety (90)-day period will be suspended for such period, not in any event to exceed one hundred and eighty (180) days' suspension, as Seller continues so to hold Purchaser harmless. For purposes of this Section 13.3(A), "hold harmless" means the implementation by Seller of alternative arrangements for the delivery to Buyer of Power, the delivery of which has been affected by the relevant Force Majeure event.

(B) In the event of termination pursuant to this Section 13.3, neither Party will have any liability whatsoever to the other Party under or in connection with this PPA; *provided*, that no such termination will relieve either Party of liability for any costs or other obligations incurred prior to the effectiveness of such termination.

ARTICLE 14
CHANGE IN LAWS

Section 14.1 Change in Laws.

(A) If a Party becomes aware that there has occurred or is reasonably likely to occur a Change in Laws that directly prohibits, prevents, or materially impedes a Party from performing its obligations under this PPA or materially impacts or alters the rights, benefits, or allocation of risks under this PPA, such Party shall notify the other Party of such Change in Laws. The Parties shall promptly following any such notice negotiate in good faith amendments to or a replacement of this PPA that will result in substantially the same allocation of rights, benefits, and risks as this PPA as of the Effective Date. If such good faith negotiations do not result in such an amendment to or replacement of this PPA within a period of ninety (90) days following the start of such negotiations (or any longer time period to which the Parties may

agree), either Party may, effective upon not less than sixty (60) days' prior written notice to the other Party, terminate this PPA at any time while such Change in Laws is continuing, without any penalty or liability of either Party to the other Party; *provided, however*, that in no event will any such termination excuse any obligation to make payments due or becoming due under this PPA for performance rendered prior to such termination. Unless and until any such termination of this PPA, each Party shall continue to perform its obligations under this PPA to the fullest extent not actually prohibited, prevented, or impeded by such Change in Laws.

(B) Consistent with Section 14.1(A), nothing in this PPA shall require either Party to perform any obligations that are prohibited or prevented by a Change in Laws. To the extent a Change in Laws occurs that directly prohibits, prevents, or materially impedes either Party from performing its obligations under this PPA and the Parties are unable to follow the procedures set forth in Section 14.1(A), such Change in Laws will be treated as an event of Force Majeure and the affected Party will be entitled to relief therefor in accordance with the provisions of ARTICLE 13 to the extent and for the period necessary to allow the Parties to complete the process set forth in Section 14.1(A).

(C) A Party that actively petitions for or otherwise requests a Change in Laws shall not be entitled to obtain relief from such Change in Laws under this Section 14.1 without the consent of the other Party.

(D) For purposes of this Section 14.1, "materially" means a level of significance that would, as of the Effective Date, have been reasonably likely to have affected any decision of a reasonable person in the applicable Party's position regarding whether or not to enter into this PPA or consummate the transaction(s) contemplated in this PPA on the terms and conditions thereof.

ARTICLE 15
INSURANCE

Section 15.1 General Insurance Requirements. On or prior to the Commencement Date and thereafter throughout the Term, Seller shall use Commercially Reasonable efforts to obtain and maintain at its own cost and expense insurance coverages for the MEA Portion satisfying the requirements of this ARTICLE 15. No later than the Commencement Date and on or before June 1 of each year during the Term, Seller shall provide Purchaser with a copy of insurance certificates reasonably acceptable to Purchaser evidencing that insurance coverages for the Facility are in compliance with such requirements. Such certificates shall (a) name Purchaser as an additional insured (except worker's compensation); (b) provide that Purchaser shall receive thirty (30) days' prior Notice of non-renewal, cancellation of, or significant modification to any of the corresponding policies (except that such Notice shall be ten (10) days for non-payment of premiums); (c) provide a waiver of any rights of subrogation against Purchaser, its Affiliates and their officers, directors, agents, subcontractors, and employees; and (d) indicate that the policies have been endorsed in accordance with the requirements set forth herein. All policies shall be written with insurers with an AM Best rating of at least A-VII. All policies shall be written on an occurrence basis, except as provided in Section 15.2. All policies shall contain an endorsement

that Seller's policy shall be primary in all instances regardless of like coverages, if any, carried by Seller. Neither Party's liability under this PPA shall be limited to the amount of insurance coverage required herein.

Section 15.2 Term and Modification of Insurance.

(A) All insurance required under this PPA shall cover occurrences during the Term and for a period of two (2) years after the Term. In the event that any insurance as required herein is commercially available only on a "claims-made" basis, such insurance shall provide for a retroactive date not later than the date of this PPA and such insurance shall be maintained by Seller for a minimum of six (6) years after the Term.

(B) If any insurance required to be maintained by Seller hereunder ceases to be reasonably available and commercially feasible in the commercial insurance market, Seller shall provide Notice to Purchaser, accompanied by a certificate from an independent insurance advisor of recognized national standing, certifying that such insurance is not reasonably available and commercially feasible in the commercial insurance market for electric generating plants of similar type, geographic location and capacity. Notwithstanding such Notice, Seller shall use Commercially Reasonable attempts to obtain other insurance that would provide comparable protection against the risk to be insured.

ARTICLE 16
INDEMNITY

Section 16.1 Indemnification. Each Party (the "**Indemnifying Party**") agrees (but in the case of Seller as the Indemnifying Party, only subject to appropriation of the requisite funds by the Assembly of Seller) to indemnify, defend, and hold harmless the other Party (the "**Indemnified Party**") from and against all third party claims, demands, losses, liabilities, penalties, and expenses (including attorneys' fees) for personal injury or death to persons and damage to the Indemnified Party's real property and tangible personal property or facilities or the property of any other Person to the extent arising out of, resulting from, or caused by any (i) Event of Default or other breach under this PPA, (ii) violation of Applicable Laws, (iii) negligent or tortious acts, errors, or omissions, or (iv) willful misconduct, in each case of the Indemnifying Party or any of its Affiliates, directors, officers, employees, or agents.

(A) The indemnification obligations of the Indemnifying Party shall apply notwithstanding any negligence of the Indemnified Party, but the Indemnifying Party's liability to indemnify the Indemnified Party shall be reduced in proportion to the percentage by which the Indemnified Party's negligent acts, errors, or omissions caused the damages.

(B) Neither Party shall be indemnified for its damages resulting from its sole negligence or willful misconduct. The indemnity provisions of this PPA shall not be construed to relieve any insurer of its obligation to pay claims consistent with the provisions of a valid insurance policy.

(C) Nothing in this Section 16.1 shall enlarge any liability of either Party to the other Party for any breach of this PPA or relieve either Party of any liability to the other Party for any breach of this PPA.

(D) A Party will not be liable more than once for the same losses, even if those losses may be recovered under multiple sections or subsections of this PPA.

Section 16.2 Notice of Claim. Promptly after receipt by a Party of any claim or notice of the commencement of any action, administrative proceeding, legal proceeding, or investigation as to which the indemnity provided for in this ARTICLE 16 may apply, the Indemnified Party shall provide Notice thereof to the Indemnifying Party. The Indemnifying Party shall assume the defense thereof with counsel designated by such Party and satisfactory to the Indemnified Party, *provided, however*, that if the defendants in any such action include both the Indemnified Party and the Indemnifying Party and the Indemnified Party shall have reasonably concluded that there may be legal defenses available to it which are different from or additional to, or inconsistent with, those available to the Indemnifying Party, the Indemnified Party shall have the right to select and be represented by separate counsel, at the Indemnifying Party's expense, unless a liability insurer has agreed to pay such costs.

Section 16.3 Settlement of Claim. If the Indemnifying Party fails to assume the defense of a claim meriting indemnification, the Indemnified Party may, at the expense of the Indemnifying Party, contest, settle, or pay such claim, *provided, however*, that settlement or full payment of any such claim may be made only following consent of the Indemnifying Party, which consent will not be unreasonably withheld, conditioned, or delayed, or, absent such consent, written opinion of the Indemnified Party's counsel that such claim is meritorious or warrants settlement.

Section 16.4 Amounts Owed. Except as otherwise provided in this ARTICLE 16, in the event that a Party is obligated to indemnify and hold the other Party and its successors and assigns harmless under this ARTICLE 16, the amount owing to the Indemnified Party will be the amount of the Indemnified Party's actual loss net of any insurance proceeds received by the Indemnified Party following a Commercially Reasonable effort by the Indemnified Party to obtain such insurance proceeds (which Commercially Reasonable effort will not in any event include any obligation to initiate litigation or any other dispute resolution proceeding against any insurer).

Section 16.5 Survival. The provisions of this ARTICLE 16 shall survive the expiration or earlier termination of this PPA.

ARTICLE 17
ASSIGNMENT AND OTHER TRANSFER RESTRICTIONS; LENDER PROVISIONS

Section 17.1 Transfer Without Consent Is Null and Void. Except as provided in ARTICLE 2, any sale, transfer, or assignment of any interest in the Seller's Interest or in this PPA made without fulfilling the requirements of this ARTICLE 17 shall be null and void and a breach of this PPA.

(A) Except as permitted in this Section 17.1, neither Party shall assign this PPA, or any right, title or interest therein, without the prior written consent of the other Party, which consent shall not be unreasonably withheld, conditioned, or delayed; *provided, however*, that: (i) Notice of any proposed assignment requiring consent of the other Party shall be given to such other Party at least thirty (30) days prior to the proposed effective date of such assignment; and (ii) with respect to any assignment hereunder, whether requiring consent or not, (a) except with respect to any assignment under Section 17.2, any assignee shall expressly assume the assignor's obligations under this PPA unless otherwise agreed by the other Party; (b) no assignment shall relieve the assignor of its obligations under this PPA in the event the assignee fails to perform, unless the other Party waives or releases in writing the assignor's continuing obligations under this PPA; and (c) the assignment shall be subject to receipt of all such approvals as may be required by any applicable Governmental Authorities.

(B) Except as set forth in Section 18.14(B) with respect to the Collateral and Seller's consent rights with respect thereto, Purchaser shall have the right to assign all or a portion of its rights or obligations under this PPA without the prior written consent of Seller as follows:

1. to a Lender as collateral security for obligations under the Financing Documents entered into with such Lender, *provided* that: (i) Purchaser provides Seller with written Notice of such proposed collateral assignment not less than thirty (30) days prior to such collateral assignment, and (ii) the applicable form of collateral assignment and related documentation is reasonably acceptable to Seller, as provided in Section 17.2;

2. to an Affiliate of Purchaser that is a Creditworthy Entity;

3. pursuant to Section 17.2, to a Creditworthy Entity after a Lender has exercised its foreclosure rights with respect to this PPA; and

4. to a Person succeeding to all or substantially all of the assets of Purchaser, *provided* that such Person's creditworthiness is equal to or better than that of Purchaser.

(C) Seller acknowledges that upon an event of default under any Financing Documents relating to this PPA, a Lender may (but shall not be obligated to) assume, or cause its designee to assume, all of the interests, rights, and obligations of Purchaser thereafter arising under this PPA, in which case such Lender or such designee shall assume and agree to be bound by all the terms and provisions of this PPA arising on or after the date of such assumption by such Lender or such designee; *provided* that, regardless of whether any such Lender or such designee assumes all of the interests, rights, and obligations of Purchaser thereafter arising under this PPA, Seller's interests, rights, and obligations under this PPA will remain in full force and effect.

Section 17.2 Lender Provisions.

(A) Except as set forth in Section 18.14(B) with respect to the Collateral and Seller's consent rights with respect thereto, Purchaser may, without approval of Seller, charge or otherwise encumber its interest under this PPA for security purposes in accordance with the provisions of Section 17.1 and this Section 17.2.

(B) Promptly after making any such encumbrance, Purchaser shall notify Seller in writing of the name, address, and telephone and facsimile numbers of each Lender to which Purchaser's interest under this PPA has been encumbered. Such Notice shall include the names of the account managers or other representatives of the Lenders to whom all written and telephonic communications may be addressed.

(C) After giving Seller the initial Notice under Section 17.2(B), Purchaser shall promptly give Seller Notice of any change in the information provided in the initial Notice or any subsequent Notice.

(D) If Purchaser encumbers its interest under this PPA as permitted by this Section 17.2, the following provisions shall apply:

1. The Parties, except as provided by the terms of this PPA, shall not modify or cancel this PPA without the prior written consent of the Lender, such consent not to be unreasonably withheld, conditioned or delayed.

2. The Lender or its designees shall have the right, but not the obligation, to perform any act required to be performed by Purchaser under this PPA to prevent or cure an Event of Default with respect to Purchaser and such act performed by the Lender or its designees shall be as effective to prevent or cure an Event of Default as if done by Purchaser, *provided* that, if any such Lender or any such designee elects to perform any act required to be performed by Purchaser under this PPA to prevent or cure an Event of Default by Purchaser, Seller will not be deemed to have waived or relinquished any of its rights and remedies as provided in this PPA; and *provided, further*, that Purchaser hereby releases Seller, to the fullest extent permitted by Applicable Law, from any and all liability arising from Seller's performance under this PPA pursuant to instructions of the Lender following an event of default with respect to Purchaser under Lender's Financing Documents.

3. Seller shall, promptly following any request by Purchaser, execute statements certifying that this PPA is unmodified (or, if modified, stating the nature of the modification), in full force and effect and the absence or existence (and the nature thereof), to Seller's actual knowledge, of Events of Default hereunder by Purchaser and documents of consent to such assignment to the encumbrance and any assignment to such Lender, all in form and substance reasonably acceptable to Seller.

4. Promptly following the receipt of a written request from Purchaser or any Lender, Seller shall execute, or arrange for the delivery of, such reasonable certificates and other documents as may be reasonably necessary and appropriate in order for Purchaser to

consummate any financing or refinancing of the Facility or any part thereof and enter into such reasonable agreements as may be reasonably requested by such Lender, which agreements will grant such rights to the Lender as are specifically provided for in such documents, including that (a) this PPA shall not be terminated (otherwise than pursuant to the terms of this PPA) without the consent of the Lender, which consent shall not be unreasonably withheld, conditioned, or delayed; (b) the Lender shall be given notice of, and the opportunity to cure any breach or default of this PPA by Purchaser in accordance with this PPA; (c) if the Lender forecloses, takes a deed in lieu of foreclosure, or otherwise exercises its remedies pursuant to any security documents, then (i) Seller shall, at the Lender's request, continue to perform all of its obligations hereunder, and the Lender or (without in any way limiting any obligation or liability of the Lender) its nominee may perform in the place of Purchaser, and may assign this PPA to another Person that is a Creditworthy Entity in place of Purchaser, (ii) the Lender shall have no liability under this PPA except during the period of such Lender's ownership of the Purchaser's Interest, and (iii) Seller shall accept performance in accordance with this PPA by the Lender or its nominee; and (d) Seller shall make such representations and warranties to the Lender as Lender may reasonably request with regard to (1) Seller's authority to execute, deliver, and perform this PPA, (2) the binding nature on Seller of the document evidencing Seller's consent to assignment to the Lender and this PPA, and (3) the receipt of regulatory approvals by Seller with respect to its execution and performance under this PPA.

5. Purchaser shall reimburse Seller for the out-of-pocket costs and expenses (including the fees and expenses of counsel) incurred by Seller in connection with the preparation, negotiation, or execution of any statements, certificates, agreements, or other documents required under this Section 17.2.

Section 17.3 Purchase Option. Purchaser (or its designated Affiliate) shall have the option to purchase the MEA Portion effective as of the expiration of the Term on the terms and conditions hereinafter set forth (the "**Purchase Option**"). On or before the thirtieth (30^{th}) anniversary of the Commencement Date, Seller will deliver to Purchaser Notice of the date, location, and time of a joint meeting between Seller and Purchaser to discuss Purchaser's plan regarding the potential exercise the Purchase Option. During the last five (5) Contract Years, Purchaser shall have the right at any time prior to the last day of the Term to deliver Notice to Seller that Purchaser is exercising the Purchase Option. If Seller fails to provide Notice of such joint meeting or fails to meet with Purchaser, Seller shall not be in breach of this PPA, but if Purchaser then fails to deliver Notice of exercise of the Purchase Option prior to the last day of the Term, the Term shall be extended for a period of one year beyond such date (the "**Term Extension**"), during which (i) Purchaser may deliver its Notice of exercise of the Purchase Option at any time prior to the last day of the Term Extension, and (ii) Purchaser shall continue to pay the Contract Price in the amount applicable to Contract Year 35 as calculated in accordance with Exhibit C hereto, plus an amount equal to one percent (1%) of such amount, until the earlier of the expiration of the Term Extension or the closing of the purchase and sale agreement for the Purchase Option. If Purchaser exercises its Purchase Option, Seller and Purchaser shall enter into a purchase and sale agreement for the MEA Portion in a form to be mutually agreed by the Parties prior to the Closing under the Chugach Asset Purchase Agreement.

(A) **Purchase Price**. Upon any exercise of the Purchase Option, the purchase price for the MEA Portion shall be the Purchase Price. If, for any reason, any generation unit overhaul costs or expenditures related to environmental compliance or other compliance with Applicable Law that have a positive value that extends beyond the Term are not capitalized on Seller's financial statements, then such costs or expenditures shall be imputed as a capital investment in Seller's Interest and deferred and amortized over a reasonable period of projected benefit for the purposes of establishing Net Book Value.

(B) **Closing**. The closing of the purchase pursuant to any exercise of the Purchase Option will occur on a date selected by Purchaser, which date will be not less than five (5) months and not more than nine (9) months after Purchaser has exercised the Purchase Option. Purchaser will select the closing date by giving a minimum of 30 days written notice to Seller.

(C) **Satisfaction of Requirements of Transition Plan**. Purchaser acknowledges and agrees that the rights granted to Purchaser in this PPA and the rights granted to Chugach in the Chugach Power Purchase Agreement are in compliance with each and all of the requirements of the Transition Plan, including the requirements of Section 1 of the Extension Agreement. Purchaser further acknowledges and agrees that the rights granted to Purchaser in this PPA, including the rights granted with respect to the Purchase Option, satisfy each and all of the obligations of Seller to Purchaser and of Chugach to Purchaser under the Transition Plan, including each and all of the obligations of Seller to Purchaser and of Chugach to Purchaser under Section 1 of the Extension Agreement, and that no further action and no further consents or approvals are required in order to satisfy any rights of Purchaser or obligations to Purchaser under Section 1 of the Extension Agreement. Purchaser agrees that it will not make any claim or assertion, and will not (either directly or indirectly) support any claim or assertion by any other Person, including in any proceeding before the RCA, that is contrary to or inconsistent with the acknowledgements and agreements of Purchaser in this Section 17.3(C).

ARTICLE 18
MISCELLANEOUS

Section 18.1 Forward Contract; Forward Agreement. The Parties acknowledge and intend that (a) this PPA, the transactions contemplated hereby, and any instruments that may be provided by either Party hereunder will each, and together, constitute one and the same "forward contract" and "forward agreement" within the meaning of the Bankruptcy Code; (b) Purchaser and Seller are "forward contract merchants," "swap participants," and "master netting agreement participants" within the meaning of the Bankruptcy Code; (c) all payments made or to be made by one Party to the other Party pursuant to this PPA constitute "settlement payments" within the meaning of the Bankruptcy Code; (d) this PPA constitutes a "master netting agreement" within the meaning of the Bankruptcy Code; (e) the Contract Price (including each monthly payment thereof) and all other amounts due from Purchaser hereunder are (i) settlement payments (as defined in the Bankruptcy Code), (ii) transfers in connection with a forward contract, swap agreement and master netting agreement (as used in Sections 546(e), 546(g) and 546(j) of the Bankruptcy Code), and (iii) attributable solely to the expected costs of acquiring the Power attributable to the MEA Portion during the Term (based on the anticipated minimum amount of

Power that will be generated by the Facility and attributable to the MEA Portion during the Term), as determined as of the date hereof; (f) the date of each monthly payment of the Contract Price is a "maturity date" (as used in the definition of "forward contract" in Section 101 of the Bankruptcy Code) with respect to the Power attributable to the MEA Portion delivered to Purchaser during the period since the prior monthly payment: (g) this PPA was entered into by Purchaser for the purpose of hedging against price fluctuations in the market for electricity, by paying a fixed price for the Power attributable to the MEA Portion during the Term; (h) Purchaser intends to pass on the costs of its Power purchases hereunder to its own customers, subject to Applicable Law; and (i) all remedies for a non-defaulting Party hereunder (including as set forth in Section 11.2) are "contractual rights" as used in Sections 362(b)(6), 362(b)(17), 362(b)(27), 556, 560 and 561 of the Bankruptcy Code. Each Party agrees that it will not make any assertion or claim, in any dispute or otherwise, or otherwise take any position to the effect that this PPA, the transactions contemplated hereby, and any instrument(s) that may be provided by either Party hereunder do not each, and together, constitute one and the same "forward contract," "commodity forward agreement," and "master netting agreement" within the meaning of the Bankruptcy Code, or that Purchaser and Seller are not "forward contract merchants," "swap participants," and "master netting agreement participants" within the meaning of the Bankruptcy Code.

Section 18.2 Notices. All notices, requests, consents, claims, demands, waivers and other communications hereunder (any of the foregoing, a "**Notice**") shall be in writing and shall be deemed to have been given (a) when delivered by hand (with written confirmation of receipt); (b) when received by the addressee if sent by a nationally recognized overnight courier (receipt requested); (c) on the date sent by e-mail of a PDF document (with confirmation of transmission) if sent during normal business hours of the recipient, and on the next Business Day if sent after normal business hours of the recipient or (d) on the third day after the date mailed, by certified or registered mail, return receipt requested, postage prepaid. Such communications must be sent to the respective Parties at the following addresses (or at such other address for a Party as shall be specified in a notice given in accordance with this Section 18.1):

If to Seller:	Municipality of Anchorage 632 W. 6th Avenue, Suite 850 Anchorage, AK 99501 E-mail: william.falsey@anchorageak.gov Attention: William D. Falsey, Municipal Manager
with a copy to:	Municipality of Anchorage 632 W. 6th Avenue, Suite 850 Anchorage, AK 99501 E-mail: rebecca.windtpearson@anchorageak.gov Attention: Rebecca A. Windt Pearson, Municipal Attorney
and a copy to:	K&L Gates LLP 925 Fourth Avenue, Suite 2900 Seattle, WA 98104-1158

E-mail: eric.freedman@klgates.com
Attention: Eric E. Freedman

If to Purchaser:

Palmer, AK 99645
E-mail: Matthew.Reisterer@mea.coop
Attention: Matt Reisterer, CFO

Section 18.3 Compliance With Applicable Laws. Each Party shall at all times comply with all Applicable Laws. Without limiting the foregoing, but subject to the provisions of Section 14.1, Seller shall during the Term comply with all applicable requirements of Applicable Law relating to the ownership and operation of the MEA Portion. Notwithstanding the foregoing or any other provision of this Agreement, any non-compliance with Applicable Law that, individually or in the aggregate, could not reasonably be expected to have a material adverse effect on the business or financial condition of the Party or its ability to fulfill its commitments hereunder shall not be deemed to be a breach of this PPA. Each Party shall promptly disclose to the other, any material violation of any Applicable Laws arising out of or in connection with the Facility and this PPA. This PPA will not take effect until the prior approval of the RCA as required by AS 42.05.431(b).

Section 18.4 Rates, Terms, and Conditions Binding. The Parties agree that the rates (including Contract Price), terms, and conditions for products and services specified in this PPA shall remain in effect for the Term. In addition, to the fullest extent permitted by Applicable Law, each Party, for itself and its successors and assigns, hereby expressly and irrevocably (i) waives any rights that it may have, now or in the future, whether under AS 42.05.431(a), AS 42.05.431(b), or otherwise, to seek to obtain from the RCA by any means, directly or indirectly (through complaint, investigation, or otherwise), and (ii) covenants and agrees not at any time to seek so to obtain, an order from the RCA changing any section of this PPA specifying the rate, charge, or classification ("**Justness or Reasonableness Conditions**") agreed to by the Parties, it being the express intent of the Parties that, to the fullest extent permitted by Applicable Law, neither Party will unilaterally seek to obtain from the RCA any relief changing the Justness or Reasonableness Conditions of this PPA, notwithstanding any subsequent changes that may occur in Applicable Law or market conditions.

Section 18.5 Public Announcements. Neither Party shall at any time make, with respect to the transactions to be consummated by this PPA, publish, or communicate to any Person in any public forum any defamatory, maliciously false, or disparaging remarks,

comments, or statements concerning the other Party or any of its employees, officers, officials or directors.

Section 18.6 No Third-Party Beneficiaries. This PPA is for the sole benefit of the Parties and their respective successors and permitted assigns and nothing herein, express or implied, is intended to or shall confer upon any other Person or entity any legal or equitable right, benefit or remedy of any nature whatsoever under or by reason of this PPA.

Section 18.7 Amendment and Modification; Waiver. This PPA may only be amended, modified or supplemented by an agreement in writing signed by each Party. No waiver by any Party of any of the provisions hereof shall be effective unless explicitly set forth in writing and signed by the Party so waiving. No waiver by any Party shall operate or be construed as a waiver in respect of any failure, breach or default not expressly identified by such written waiver, whether of a similar or different character, and whether occurring before or after that waiver. No failure to exercise, or delay in exercising, any right, remedy, power or privilege arising from this PPA shall operate or be construed as a waiver thereof; nor shall any single or partial exercise of any right, remedy, power or privilege hereunder preclude any other or further exercise thereof or the exercise of any other right, remedy, power or privilege.

Section 18.8 Governing Law; Submission to Jurisdiction; Waiver of Jury Trial.

(A) This PPA shall be governed by and construed in accordance with the internal laws of the State of Alaska, without regard to conflict of law principles that would result in the application of the laws of any other jurisdiction.

(B) ANY LEGAL SUIT, ACTION OR PROCEEDING ARISING OUT OF OR BASED UPON THIS PPA OR THE TRANSACTIONS CONTEMPLATED HEREBY MAY BE INSTITUTED IN THE SUPERIOR COURT OF THE STATE OF ALASKA IN IN THE THIRD JUDICIAL DISTRICT, LOCATED IN ANCHORAGE, ALASKA, AND EACH PARTY IRREVOCABLY SUBMITS TO THE EXCLUSIVE JURISDICTION OF SUCH COURT IN ANY SUCH SUIT, ACTION OR PROCEEDING. SERVICE OF PROCESS, SUMMONS, NOTICE OR OTHER DOCUMENT BY MAIL TO SUCH PARTY'S ADDRESS SET FORTH HEREIN SHALL BE EFFECTIVE SERVICE OF PROCESS FOR ANY SUIT, ACTION OR OTHER PROCEEDING BROUGHT IN SUCH COURT. THE PARTIES IRREVOCABLY AND UNCONDITIONALLY WAIVE ANY OBJECTION TO THE LAYING OF VENUE OF ANY SUIT, ACTION OR ANY PROCEEDING IN SUCH COURT AND IRREVOCABLY WAIVE AND AGREE NOT TO PLEAD OR CLAIM IN ANY SUCH COURT THAT ANY SUCH SUIT, ACTION OR PROCEEDING BROUGHT IN SUCH COURT HAS BEEN BROUGHT IN AN INCONVENIENT FORUM.

(C) EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS PPA IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES AND, THEREFORE, EACH SUCH PARTY IRREVOCABLY AND UNCONDITIONALLY WAIVES ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LEGAL ACTION ARISING OUT OF OR RELATING TO THIS PPA OR THE TRANSACTIONS CONTEMPLATED HEREBY. EACH PARTY TO THIS PPA

CERTIFIES AND ACKNOWLEDGES THAT (A) NO REPRESENTATIVE OF ANY OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT SEEK TO ENFORCE THE FOREGOING WAIVER IN THE EVENT OF A LEGAL ACTION, (B) SUCH PARTY HAS CONSIDERED THE IMPLICATIONS OF THIS WAIVER, (C) SUCH PARTY MAKES THIS WAIVER VOLUNTARILY, AND (D) SUCH PARTY HAS BEEN INDUCED TO ENTER INTO THIS PPA BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION 18.8.

Section 18.9 Specific Enforcement. The Parties agree that irreparable damage would occur if any provision of this PPA were not performed in accordance with the terms hereof and that the Parties shall be entitled to specific performance of the terms hereof, in addition to any other remedy to which they are entitled at law or in equity. The Parties acknowledge and agree that (A) the Parties shall be entitled to an injunction, specific performance or other equitable relief to prevent breaches of this PPA and to enforce specifically the terms and provisions hereto, without proof of damages, this being in addition to any other remedy to which they are entitled under this PPA and (B) the right to specific enforcement is an integral part of the transactions contemplated by this PPA and without that right, neither Seller nor Purchaser would have entered into this PPA. Each Party agrees that it will not oppose the granting of specific performance and other equitable relief on the basis that the other Party has an adequate remedy at law or that an award of specific performance is not an appropriate remedy for any reason at law or equity. The Parties acknowledge and agree that any Party seeking an injunction to prevent breaches of this PPA and to enforce specifically the terms and provisions of this PPA in accordance with this Section 18.9 shall not be required to provide any bond or other security in connection with any such injunction.

Section 18.10 Waiver of Sovereign Immunity. Seller agrees that it is subject to civil and commercial suit for any breach of contract obligations under this PPA. To the extent that Seller may be entitled to claim sovereign, governmental, or municipal immunity from any liability in such a civil or commercial suit by Purchaser, Seller hereby agrees not to claim, and hereby waives, such sovereign, governmental, or municipal immunity.

Section 18.11 RCA PPA Approval. Seller and Purchaser will use Commercially Reasonable efforts to cooperate and each advocate to obtain an order from the Regulatory Commission of Alaska (the "**RCA**") approving this PPA; and which order from the RCA shall not contain any condition or conditions materially adverse to either Purchaser or Seller, as determined by Purchaser or Seller with respect to itself in good faith and in the exercise of its Commercially Reasonable business judgment ("**RCA PPA Approval**"). It is the understanding of the Parties that this PPA, as a wholesale power agreement between public utilities governed by AS 42.05.431(b), will not take effect without the prior approval of the RCA, and will at all times after any such approval be subject to the RCA's continuing authority over wholesale power agreements.

Section 18.12 Relationship of the Parties. This PPA shall not be interpreted to create an association, joint venture, or partnership between the Parties or to impose any partnership obligation or liability upon either Party. Except as specifically provided for in this PPA to the contrary, neither Party shall have any right, power, or authority to enter into any agreement or undertaking for, or act on behalf of, or to act as an agent or representative of, the other Party.

Section 18.13 Successors and Assigns. Subject to the provisions of Section 17.1, Agreement shall be binding upon and shall inure to the benefit of the Parties and their respective successors and permitted assigns. No assignment shall relieve the assigning party of any of its obligations hereunder.

Section 18.14 Security Interest.

(A) The Parties agree, acknowledge and intend that the legal status of this PPA is and shall be as a power purchase agreement, a forward contract (as defined in the Bankruptcy Code), a commodity forward agreement (and thus a swap agreement as defined in the Bankruptcy Code), and a master netting agreement (as defined in the Bankruptcy Code), and not a secured purchase of the MEA Portion or any other alternative form of transaction, and that Seller will at all times during the Term have and retain full undivided ownership of the MEA Portion. Accordingly, each Party acknowledges and agrees that: (1) it shall not assert that the transactions contemplated under this PPA are a secured financing of any sort; and (2) it shall cooperate with the other Party in defending against any assertion by a third party that the transactions contemplated hereunder constitute a secured financing.

(B) Notwithstanding the foregoing, as security for the prompt payment and performance of all obligations of Purchaser under this PPA, including the payment of the Contract Price to Seller, and solely as a precaution in the event that this PPA should be construed as a secured financing such that Purchaser shall be deemed to have acquired title to the MEA Portion at any time (other than by exercise of the Purchase Option under Section 17.3), Purchaser hereby grants to Seller a senior, first priority purchase money lien on and security interest in and to, and right of set-off with respect to, all right, title, and interest of Purchaser in and to the MEA Portion (including all right, title, and interest in and to any Power attributable to the MEA Portion, except as and to the extent that such Power is delivered to Purchaser at the Delivery Point under and in accordance with the express provisions of this PPA) and all proceeds thereof (collectively, the "**Collateral**") (such senior, first priority purchase money lien on and security interest in and to the Collateral, the "**Seller Security Interest**"). In addition, notwithstanding ARTICLE 17, Purchaser (i) represents and warrants to Seller as of each of the Effective Date and the Commencement Date that (a) Purchaser has provided Seller with a true and correct copy of the Mortgage, including all supplements and amendments thereto and (b) there are no liens or security interests in or on the assets of Purchaser that encumber the Collateral as of the Effective Date, and that there will be no liens or security interests in or on the assets of Purchaser that will encumber the Collateral as of the Commencement Date; (ii) covenants and agrees that Purchaser shall provide to Seller, at or prior to the Closing under the Chugach Asset Purchase Agreement, (a) an original subordination agreement, executed by the Mortgagees and in the form set forth in Exhibit D, subordinating the priority of any lien that the Mortgagees may acquire in the Collateral, including as a result of any lien granted under the Mortgage in after-acquired property of Purchaser or any liens granted to the Mortgagees in any bankruptcy proceeding of Purchaser, to the priority of the Seller Security Interest (the "**CFC Subordination Agreement**"), and acknowledged by Purchaser through its execution of the acknowledgment and acceptance attached thereto; and (b) evidence of the recording of the CFC Subordination Agreement in all recording offices in the State of Alaska in which the lien of the Mortgage has been recorded; and (iii) covenants and agrees that Purchaser shall not, without

Seller's prior written consent, grant any security interest in the Collateral, including (a) in connection with this PPA and the transactions contemplated hereunder, or (b) any grant of a lien to the Mortgagees pursuant to Granting Clause 2.01 of the Mortgage or otherwise. In connection with the lien and security interest granted to Seller in this Section 18.14(B), Seller shall have the rights and remedies of a secured party or mortgagee under Applicable Law, including the UCC. Purchaser hereby authorizes Seller to file UCC financing statements and to record instruments with any appropriate Governmental Authority, and to make other similar filings and recordings with respect hereto as Seller shall elect in its sole discretion for the purposes of recording and perfecting its lien and security interest in the Collateral.

Section 18.15 Survival of Obligations. The applicable provisions of this PPA shall continue in effect after termination to the extent necessary to (A) provide for final billings, payments, and adjustments, (B) enforce or complete the duties, obligations, or responsibilities of the Parties, and (C) address any remedies or indemnification rights arising prior to termination. Cancellation, expiration, or earlier termination of this PPA shall not relieve the Parties of obligations, including warranties, remedies, or indemnities, that by their nature should survive such cancellation, expiration, or termination, which obligations shall survive for the period of the applicable statute(s) of limitation.

Section 18.16 Further Assurances. Upon the receipt of a written request from the other Party, each Party shall execute such reasonable additional documents, instruments and assurances and take such additional actions as are reasonably necessary and desirable to carry out the terms and intent hereof. Neither Party shall unreasonably withhold, condition, or delay its compliance with any reasonable request made pursuant to this Section 18.16.

Section 18.17 Severability. If any term or provision of this PPA is invalid, illegal or unenforceable in any jurisdiction, such invalidity, illegality or unenforceability shall not affect any other term or provision of this PPA or invalidate or render unenforceable such term or provision in any other jurisdiction. Upon such determination that any term or other provision is invalid, illegal or unenforceable, the Parties shall negotiate in good faith to modify this PPA so as to effect the original intent of the Parties as closely as possible in a mutually acceptable manner in order that the transactions contemplated hereby be consummated as originally contemplated to the greatest extent possible.

Section 18.18 Complete Agreement. This PPA constitutes the sole and entire agreement of the Parties with respect to the subject matter contained herein, and supersedes all prior and contemporaneous understandings and agreements, both written and oral, with respect to such subject matter.

Section 18.19 Headings. The headings in this PPA are for reference only and shall not affect the interpretation of this PPA.

Section 18.20 Counterparts. This PPA may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this PPA delivered by facsimile, e-mail or other means of electronic

transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this PPA.

Section 18.21 Exhibits. Exhibits may be changed to the extent allowed by specific provisions of this PPA or with the mutual consent of both Parties.

[Signature Page Follows]

IN WITNESS WHEREOF, the Parties have executed this PPA as of the Effective Date.

Title: Chief Executive Officer

EXHIBIT A

DEFINITIONS

The following terms shall have the meanings set forth herein:

"**Actual Damages**" has the meaning set forth in Section 11.2(B).

"**Affiliate**" of a Person means any other Person that directly or indirectly, through one or more intermediaries, controls, is controlled by, or is under common control with, such Person. The term "control" (including the terms "controlled by" and "under common control with") means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of voting securities, by contract, or otherwise.

"**Ancillary Services**" all ancillary products associated, in accordance with Prudent Utility Practice, with the generation of Energy, including spinning reserves, non-spinning reserves, reactive power and voltage control.

"**Applicable Law**" means any statute, law, ordinance, regulation, rule, code, order, constitution, treaty, common law, judgment, decree, Permit requirement, other binding requirement or rule of law of, or compulsory standard established by, any Governmental Authority.

"**Bankruptcy Code**" means 11 U.S.C. §§ 101 et seq. (Title 11, United States Code).

"**Bradley Lake Agreement**" means the Bradley Lake Hydroelectric Project Agreement for the Sale and Purchase of Electric Power dated as of December 8, 1987 by and among the Alaska Energy Authority as successor to The Alaska Power Authority, Chugach, The Golden Valley Electric Association, Inc., Seller, The City of Seward d/b/a/Seward Electric System, The Alaska Electric Generation & Transmission Cooperative, Inc., The Homer Electric Association, Inc., and Purchaser.

"**Business Day**" means any day that is not a Saturday, a Sunday, or any other day on which commercial banks in Anchorage, Alaska are required to be closed for business.

"**Capacity**" means the total electrical generating capacity of the Facility, including any capacity products that are able to be accredited under Applicable Law.

"**CFC Subordination Agreement**" shall have the meaning set forth in Section 18.14(B).

"**Change in Laws**" means any addition, amendment, decision, ruling, order, or binding interpretation to or regarding any Applicable Laws, by or of a Governmental Authority having jurisdiction or authority, that is enacted, issued, or becomes legally effective after the Effective Date.

"**Chugach**" means Chugach Electric Association, Inc., a not-for-profit Alaska electric cooperative corporation.

"**Chugach Asset Purchase Agreement**" has the meaning set forth in Section 2.1.

"**Chugach Portion**" means a portion of the Seller's Interest equal to a 64.29% share of the Seller's Interest; *provided, however*, that if this PPA is terminated for any reason at any time prior to the Scheduled Termination Date, the "Chugach Portion" shall, from the effectiveness of such termination until the Scheduled Termination Date (but only so long as the Chugach Power Purchase Agreement remains in full force and effect), be deemed to be a percentage interest equal to the Seller's Interest.

"**Chugach Power Purchase Agreement**" has the meaning set forth in Section 2.1.

"**Collateral**" shall have the meaning set forth in Section 18.14(B).

"**Commencement Date**" shall have the meaning set forth in Section 3.2.

"**Commercially Reasonable**" or "**Commercially Reasonable Efforts**" means, with respect to any action required to be made, attempted or taken by a Party under this PPA, the level of effort in light of the facts known to such Party at the time a decision is made that: (a) can reasonably be expected to accomplish the desired action at a reasonable cost; (b) is consistent with Prudent Utility Practice; and (c) takes into consideration the amount of advance notice required to take such action, the duration and type of action and the competitive environment in which such action occurs.

"**Contract Price**" has the meaning set forth in Section 7.1.

"**Contract Year**" has the following meaning: the first Contract Year means the period beginning on the Commencement Date and ending on the last day of the month of the first anniversary of the Commencement Date. The second Contract Year and each subsequent Contract Year means the period beginning on the first day after the last day of the previous Contract Year and ending on the last day of the twelfth calendar month thereafter.

"**Credit Rating**" means (i) with respect to any entity other than a financial institution, the current (A) rating issued or maintained by S&P or Moody's with respect to such entity's long-term senior, unsecured, unsubordinated debt obligations (not supported by insurance provider or other third-party credit enhancements) or (B) corporate credit rating or long-term issuer rating issued or maintained with respect to such entity by S&P or Moody's, or (ii) if such entity is a financial institution, the ratings issued or maintained by S&P or Moody's with respect to such entity's long-term, unsecured, unsubordinated deposits.

"**Creditworthy Entity**" means a Person having at the applicable time a Credit Rating of (a) BBB or better from S&P, or (b) Baa2 or better from Moody's, or (c) if such Person has a Credit Rating at such time from both S&Ps and Moody's, BBB or better from S&P and Baa2 or better from Moody's.

"**day**" means a calendar day.

"**Delivery Point**" means the low side of the step-up transformer(s) within the Facility switchyard.

"**Dispute**" shall have the meaning set forth in Section 12.1.

"**Effective Date**" shall have the meaning set forth in the preamble.

"**Eklutna Transmission Assets**" means the Transmission Assets of the Eklutna Hydroelectric Project set forth on Exhibit F to the Chugach Asset Purchase Agreement.

"**Eligible Energy Resource**" means any resource that qualifies as a renewable energy resource eligible to be certified to receive, claim, own or use renewable energy certificates pursuant to the protocols and procedures under any applicable REC Registration Program.

"**Energy**" means the net electric energy that is generated from the Facility that is delivered to the Delivery Point, as measured in accordance with Section 5.2. Energy shall be net of energy self-generated and concurrently consumed by the Facility, and net of all losses prior to the Delivery Point, including line, inverter, and transformer losses.

"**Environmental Attributes**" means any and all renewable resource attributes (including renewable energy certificates or credits or similar rights arising out of any applicable REC Registration Program), green tags, emissions or carbon credits, reductions, offsets, and allowances, and any other environmentally related attributes that are, or in the future may be, recognized by any Governmental Authority, and that are attributable to the availability, production, purchase or sale of Energy from the Facility. For the avoidance of doubt, "Environmental Attributes" do not include any Tax Benefits.

"**ERO**" means the Electric Reliability Organization certified by FERC pursuant to Section 215 of the Federal Power Act or any successor organization.

"**Event of Default**" shall have the meaning set forth in Section 11.1.

"**Extension Agreement**" means that certain Agreement for Extension of 1996 Eklutna Hydroelectric Project Transition Plan dated October 2, 1997 by and among the Owners.

"**Facility**" means the Eklutna Hydroelectric Project, as further described in Exhibit B, including all of the following: all equipment, buildings, generators, inverters, step-up transformers, output breakers, protective and associated equipment, improvements, and other tangible assets, contract rights, easements, rights of way, surface use agreements and other interests or rights in real estate reasonably necessary for construction, operation, maintenance, generation, and delivery of the Energy, Ancillary Services, and Capacity subject to this PPA; *provided, however*, that the Facility does not include any right, title, or interest of Seller in or to the Eklutna Transmission Assets.

"**Facility Metering**" means revenue quality meters, metering equipment and data processing equipment used to measure, record or transmit data relating to the output from the Facility, including the metering current transformers and the metering voltage transformers.

"**Federal Power Act**" means the provisions of 16 U.S.C. 791(A) et seq. and amendments or supplements thereto.

"**FERC**" means the Federal Energy Regulatory Commission or any successor agency.

"**Financing Documents**" means the loan and credit agreements, notes, bonds, indentures, security agreements, lease financing agreements, mortgages, deeds of trust, interest rate exchanges, swap agreements, and other documents relating to a Party's financing transactions, including any credit enhancement, credit support, working capital financing, or refinancing documents, and any and all amendments, modifications, or supplements to the foregoing that may be entered into from time to time at the discretion of the Party.

"**Fish and Wildlife Agreement**" means the August 7, 1991 Agreement between the Municipality of Anchorage, dba Anchorage Municipal Light and Power, Chugach, Purchaser, U. S. Fish and Wildlife Service, National Marine Fisheries Service, Alaska Energy Authority and the State of Alaska, Relative to the Eklutna and Snettisham Hydroelectric Projects.

"**Force Majeure**" means an event or circumstance that prevents a Party from performing its obligations under this PPA, which event or circumstance (i) was not reasonably anticipated as of the Effective Date, (ii) is not within the reasonable control of or the result of the fault or negligence of the Party claiming its occurrence, and (iii) which by exercise of due diligence and foresight could not reasonably have been avoided, *provided, however*, that such an event or circumstance shall not include: (a) delays or nonperformance by suppliers, vendors, or other third parties with which a Party has contracted, except to the extent that such delays or nonperformance were due to circumstances that would constitute "Force Majeure" as defined above; (b) mechanical or equipment breakdown or inability to operate unless caused by reason of Force Majeure; (c) changes in market conditions; (d) any labor strikes, slowdowns, work stoppages, or other labor disruptions limited only to a Party or a Party's Affiliates; (e) Seller's inability to obtain any credit or incentive in connection with the Facility, including any such inability that is attributable to any failure to meet placed-in-service or safe harbor provisions regardless of whether an event of Force Majeure may have caused or contributed to such failure, (f) the loss of Purchaser's markets or Purchaser's inability economically to use or resell any of the Power purchased hereunder, except to the extent that such loss of markets or inability to use or resell were due to circumstances that would constitute "Force Majeure" as defined above; (g) Purchaser's failure to contract for and reserve sufficient firm transmission capacity to deliver the Power to any transmission point(s) of receipt or any delivery point(s); (h) Seller's ability to sell Power to a market at a more advantageous price; or (i) Purchaser's ability to purchase Power in or from any market at a more advantageous price.

"**Forced Outage**" means any condition at the Facility that requires the immediate and unplanned removal of the Facility, or at least ten percent (10%) thereof, from service, another outage state, or a reserve shutdown state, resulting from immediate mechanical/electrical/hydraulic control system trips and operator-initiated trips in response to abnormal Facility conditions or alarms.

"**Governmental Authority**" means any federal, state, local or foreign government, or political subdivision thereof, or any agency or instrumentality of such government or political subdivision, or any self-regulated organization or other non-governmental regulatory authority or quasi-governmental authority (to the extent that the rules, regulations, or orders of such organization or authority have the force of Law), or any arbitrator, court, or tribunal of competent

jurisdiction. References to "Governmental Authority" shall exclude Seller except Seller is acting in a legislative or regulatory capacity as expressly authorized by Applicable Law.

"**Governmental Charges**" means any taxes, charges or costs that are assessed or levied by any Governmental Authority or other Person (other than charges imposed by any transmission provider), including local, state, or federal regulatory or taxing authorities that would affect the sale and purchase of Power contemplated by this PPA, either directly or indirectly.

"**Indemnified Party**" shall have the meaning set forth in Section 16.1.

"**Indemnifying Party**" shall have the meaning set forth in Section 16.1.

"**Interest Rate**" means, for any date, the lesser of (a) the per annum rate of interest equal to the prime lending rate as may from time to time be published in *The Wall Street Journal* under "Money Rates" on such day (or if not published on such day, on the most recent preceding day on which published), plus two percent (2%), and (b) the maximum rate permitted by Applicable Law.

"**ISO**" means an independent system operator or regional transmission organization that coordinates, controls and monitors the operation of a public electrical power system or any similar operator or organization created by Applicable Law after the date of this PPA.

"**Justness or Reasonableness Conditions**" shall have the meaning set forth in Section 18.4.

"**Lender**" means any commercial bank, investment bank or trustee under Financing Documents that makes a loan to or extends other credit in favor of Purchaser.

"**MEA Avoided Cost Rate**" means the rate (in $/MWh) as filed by Purchaser with the RCA in MEA Tariff Sheet No. 107, Line J or its successor.

"**MEA Portion**" shall have the meaning set forth in the recitals to this Agreement.

"**ML&P**" means Municipal Light and Power, an electric utility that, as of the Effective Date, is owned and operated by Seller and serves customers in the Municipality of Anchorage, Alaska.

"**Moody's**" means Moody's Investors Services, Inc.

"**Mortgage**" means the Amended and Restated Open End Mortgage and Security Agreement, dated as of June 11, 2012, by and among Purchaser, as Mortgagor, National Rural Utilities Cooperative Finance Corporation, as Mortgagee, and National Cooperative Services Corporation, as Mortgagee, as the same has been or may be amended or supplemented from time to time.

"**Mortgagees**" means, collectively, National Rural Utilities Cooperative Finance Corporation, as Mortgagee under the Mortgage, and National Cooperative Services Corporation, as Mortgagee under the Mortgage.

"**Net Book Value**" means, for purposes of determining the Purchase Price for the MEA Portion, gross plant in service (including customer-contributed plant) at original cost, less accumulated depreciation and amortization.

"**Notice**" shall have the meaning set forth in Section 18.1.

"**Operating Committee**" shall mean the "Eklutna Operating Committee" or "EOC" set forth in the Operations Agreement.

"**Operating Records**" means all agreements associated with the Facility, operating logs, blueprints for construction, operating manuals, all warranties on equipment, and all documents, whether in printed or electronic format, that Seller uses or maintains for the operation of the Facility.

"**Operations Agreement**" means the Eklutna Purchasers Manner of Acting, Functional Responsibilities, and Staffing, attached as Exhibit E to the Transition Plan, as the same has been or may be amended or supplemented from time to time.

"**Owners**" means the owners of the Facility. As of the Effective Date, the Owners are Seller (with respect to the Seller's Interest), Purchaser (with respect to the Purchaser's Interest), and Chugach (with respect to the remaining 9/30 (30.0%) undivided ownership interest in the Facility).

"**Party**" and "**Parties**" shall have the meanings set forth in the introductory paragraph.

"**Permit(s)**" means all applicable construction, land use, air quality, emissions control, environmental and other permits, licenses and approvals from any Governmental Authority required under Applicable Laws for construction, ownership, operation and maintenance of the Facility and the generation and delivery of any output from the Facility to Purchaser.

"**Person**" means an individual, corporation, partnership, joint venture, limited liability company, Governmental Authority, unincorporated organization, trust, association or other entity.

"**Planned Outage**" means any planned outage of the Facility or any portion thereof that is required for maintenance purposes.

"**Power**" shall have the meaning set forth in Section 6.1(A).

"**PPA Contingencies**" shall have the meaning set forth in Section 3.1.

"**Prudent Utility Practice**" means any applicable practices, methods, and acts engaged in or approved by a significant portion of (a) as to Seller, the hydroelectric generating industry in the United States of America, or (b) as to Purchaser, the electric utility industry in the United States of America, during the relevant time period, or the practices, methods and acts which, in the exercise of reasonable judgment by a prudent hydroelectric generator operator (or prudent utility operator, if applicable to Purchaser) in light of the facts known or which should reasonably have been known at the time the decision was made, could have been expected to

accomplish the desired result at the lowest reasonable cost consistent with good business practices, reliability, safety, expedition and the requirements of any governing authority having jurisdiction. Without limitation of the foregoing, "Prudent Utility Practice" shall include the applicable operating policies, standards, criteria, or guidelines of any applicable governing authority and any manufacturer of a component of the Project. "Prudent Utility Practice" is not intended to be limited to the optimum practice, method or act to the exclusion of all others, but rather to the acceptable practices, methods or acts generally accepted (a) as to Seller, by the hydroelectric energy electric generating industry in the United States of America or (b) as to Purchaser, by the electric utility industry in the United States of America.

"**Purchase Option**" shall have the meaning set forth in Section 17.3.

"**Purchase Price**" means the Net Book Value of the MEA Portion as of the last day of the Term.

"**Purchaser**" shall have the meaning set forth in the first paragraph of this PPA.

"**Purchaser's Interest**" shall have the meaning set forth in the recitals to this PPA.

"**RCA**" shall have the meaning set forth in Section 18.11.

"**RCA PPA Approval**" shall have the meaning set forth in Section 18.11.

"**REC Registration Program**" means any state, regional or federal program established to register Eligible Energy Resources and create and certify renewable energy certificates arising from energy generated from such Resource, including any rights associated with any renewable energy information or tracking system that exists or may be established by Applicable Law with regard to monitoring, registering, tracking, certifying, or trading such credits.

"**Replacement Price**" means the price at which Purchaser, acting in a commercially reasonable manner, purchases a replacement for any scheduled Power not delivered by Seller, plus (i) costs reasonably incurred by Purchaser in purchasing such substitute Power and (ii) additional transmission charges, if any, reasonably incurred by Purchaser to the Delivery Point, or, absent a purchase, the market price for such Power not delivered as determined by Purchaser in a commercially reasonable manner; *provided, however*, in no event will the Replacement Price include any penalties, ratcheted demand or similar charges, nor will Purchaser be required to utilize or change its utilization of its owned or controlled assets or market positions to minimize Seller's liability.

"**S&P**" means the Standard & Poor's Rating Group, a division of The McGraw-Hill Companies.

"**Sales Price**" means the price at which Seller, acting in a commercially reasonable manner, resells any scheduled Power not received by Purchaser, deducting from such proceeds any (i) costs reasonably incurred by Seller in reselling such Power and (ii) additional transmission charges, if any, reasonably incurred by Seller in delivering such Power to the third party purchasers, or, absent a sale (assuming that a sale could have been made by Seller with the

exercise of commercially reasonable efforts), the market price for such scheduled Power as determined by Seller in a commercially reasonable manner; *provided, however*, if Seller is unable after using commercially reasonable efforts to resell all or a portion of the Power not received by Purchaser, the Sales Price with respect to such Power will be deemed equal to zero; *provided, further*, in no event will the Sales Price include any penalties, ratcheted demand or similar charges, nor will Seller be required to utilize or change its utilization of its owned or controlled assets, including contractual assets, or market positions to minimize Purchaser's liability.

"**Scheduled Termination Date**" means the last day of the calendar month thirty-five (35) years after the Commencement Date.

"**Seller**" shall have the meaning set forth in the first paragraph of this PPA.

"**Seller Security Interest**" shall have the meaning set forth in Section 18.14(B).

"**Seller's Interest**" shall have the meaning set forth in the recitals to this PPA.

"**Seller's Representative**" shall have the meaning set forth in Section 4.2.

"**Site**" means the parcel of real property on which the Facility is constructed and located, including any easements, rights of way, surface use agreements and other interests or rights in real estate reasonably necessary for the operation and maintenance of the Facility. The Site is more specifically described in Exhibit B to this PPA.

"**Tax Benefits**" means any and all (i) tax credits based on ownership of, investment in or energy production from the Facility or any portion thereof, (ii) grants based on ownership of, investment in or energy production from the Facility or any portion thereof, including the grant described in Section 1603 of the American Recovery and Reinvestment Tax Act of 2009 and (iii) other tax benefits, including depreciation and other cost recovery deductions, arising in connection with ownership of, investment in, or operation of the Facility, or any portion thereof, in each case allocated, allowed, allowable, assigned, awarded, certified or otherwise transferred or granted to Seller or Purchaser by any Governmental Authority in any jurisdiction in connection with the Facility.

"**Term**" means the period of time during which this PPA shall remain in full force and effect as further defined in Section 3.3 and as may be extended pursuant to Section 17.3.

"**Term Extension**" shall have the meaning set forth in Section 17.3.

"**Transition Plan**" means the 1996 Eklutna Hydroelectric Project Transition Plan dated May 28, 1996 by and among the United States of America d/b/a Alaska Power Administration, a unit of the Department of Energy, and the Owners, as the same has been amended and extended by the Extension Agreement, including the exhibits to such agreement, and as the same may be amended or supplemented from time to time.

"**UCC**" means the Uniform Commercial Code of the State of Alaska.

EXHIBIT B

FACILITY DESCRIPTION AND SITE MAPS

Eklutna Purchase Agreement
Exhibit A

August 2, 1989
Page 1 of 2

Lands, Easements and Rights-of-Way

Exhibit A consists of this narrative (pages 1 and 2 of 2) and the map prepared by BLM, signed and dated February 3, 1989.

This exhibit describes and displays present land status for the Eklutna Hydroelectric Project and describes in general terms the conveyances of land and land rights contemplated in the purchase agreement.

1. BLM - managed lands and military lands used for Eklutna Project for which BLM is to provide APAd rights-of-way sufficient for operation, maintenance, repair and replacement of Eklutna facilities, such rights-of-way to be assigned by APAd to the Purchasers.

   Legend Symbols and Description.

   Withdrawals. Refers to approximately 863 acres of public lands withdrawn for Eklutna at the "Intake Area," "Power Tunnel," "Eklutna Powerplant" and "Anchorage Substation." The total acreage is comprised of the following land:

   a. Approximately 320 acres withdrawn for the "Power Tunnel" under Public Land Order 1231 dated September 28, 1955.

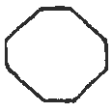
   b. Approximately 230 acres utilized for the "Intake Area" and approximately 60 acres for a portion of "Eklutna Powerplant" as described by ANCSA 3(e) determination AA-51183 dated July 30, 1986.

   c. Approximately 243 acres utilized for "Eklutna Powerplant" as described by ANCSA 3(e) determination AA-42534 dated September 1, 1982.

   d. Approximately 10 acres withdrawn for "Anchorage Substation" under Secretarial Order dated April 4, 1952.

   State Land-R/W. Refers to rights-of-way across State-selected lands covering the transmission line east of "Eklutna Powerplant" to the Knik River.

   Military Land-R/W. Refers to rights-of-way across military lands used for Eklutna transmission lines.



Acquired-3(e). Refers to approximately 2.5 acres of acquired land used for "Reed Substation" as described by ANCSA 3(e) determination AA-45155 dated July 30, 1985.

2. ANCSA 17(b) Easements.

Map symbol: Native Land - 17(b) Easements.

Refers to rights-of-way that are reserved for portions of the 115kV transmission line, access roads and other Eklutna facilities located on Native corporation lands, and exist as easement reservations in the ANCSA conveyances to the Native corporations pursuant to Section 17(b) of ANCSA. These easements will not be altered by the sale of Eklutna and the Purchasers may use these easements for their intended purposes.

3. APAd Acquired Land and Easements.

Refers to land and easements acquired by the Bureau of Reclamation (predecessor of APAd) during construction of Eklutna and now controlled by APAd. APAd will assign the land and easements to the Purchasers.

Legend Symbols and Description:

Acquired. Refers to approximately 0.8 acres of land owned by APAd at Palmer Substation.

Acquired-Easements. Refers to approximately 33 easements across private lands acquired by the Bureau of Reclamation (predecessor of APAd) and now held by APAd.

4. Other Easements on Private Land.

Map [Symbol]: Note: Other Easements on Private Lands To Be Acquired - See Exhibit A Narrative

Refers to approximately two hundred and fifty (250) parcels of private land located along the 115kV transmission line, many of which require title curative action for purposes of perfecting assignable easement rights or rights-of-way for the Purchasers. APAd shall be responsible for acquiring assignable easement rights or rights-of-way across these lands, for subsequent assignment to Purchasers.

5. Reservoir.

Eklutna Lake as designated on the map is the reservoir described in the body of the Agreement.

CONTRACT PRICE

The Contract Price during each year of the Term will be a fixed dollar amount for each MWh (or portion thereof) of Power delivered from the MEA Portion to the Delivery Point. The Contract Price during the first year of the Term will be an amount equal to 85% of the MEA Avoided Cost Rate effective on January 1 of the first year of the Term. The Contract Price will escalate at the rate of one percent (1%) on January 1 of each year of the Term thereafter; *provided, however*, that the Contract Price will reset on January 1 of every third year during the Term to 85% of the then effective MEA Avoided Cost Rate.

EXHIBIT D

FORM OF CFC SUBORDINATION AGREEMENT

SUBORDINATION AGREEMENT

This **SUBORDINATION AGREEMENT** (this "Agreement") dated as of _____, 2019, is by and between:

NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORPORATION, a cooperative association organized and existing under the laws of the District of Columbia ("CFC"), and **NATIONAL COOPERATIVE SERVICES CORPORATION**, a cooperative association organized and existing under the laws of the District of Columbia ("NCSC," and together with CFC, "Subordinated Creditor"); and

MUNICIPALITY OF ANCHORAGE, a political subdivision organized under the laws of the State of Alaska ("Senior Creditor," and together with Subordinated Creditor, the "Parties" and each a "Party").

W I T N E S E T H T H A T:

Pursuant to the Amended and Restated Open End Mortgage and Security Agreement, dated as of June 11, 2012, by and among **MATANUSKA ELECTRIC ASSOCIATION, INC.**, an Alaska not-for-profit electric cooperative corporation ("MEA"), as mortgagor, and CFC and NCSC, as mortgagees, as the same has been or may be amended or supplemented from time to time, including without limitation by that certain Modification dated June 20, 2013 and Second Modification dated October 2, 2014 (the "Mortgage"), MEA has granted a security interest to Subordinated Creditor in certain of MEA's real and personal property (including after-acquired property) as security for loans by CFC and NCSC, evidenced by certain promissory notes (referred to as "Notes" under the Mortgage, and hereunder as the "Notes") and loan agreements (referred to collectively as the "Loan Agreement" under the Mortgage, and hereunder as the "Loan Agreement").

Pursuant to the Eklutna Power Purchase Agreement, dated as of _____, 2019, between MEA and Senior Creditor, as the same has been or may be amended or supplemented from time to time (the "PPA"),[1] and solely as a precaution in the event that the PPA should be construed as a secured financing such that MEA shall be deemed to have acquired title to the MEA Portion at any time (other than by exercise of the Purchase Option under Section 17.3 of the PPA) (a "Title Transfer Ruling"), MEA has a granted a senior, first priority purchase money lien on and security interest to Senior Creditor in and to, and right of set-off with respect to, all right, title, and interest of MEA in and to the MEA Portion, including all right, title, and interest in and to any Power attributable to the MEA Portion, except as and to the extent that such Power is delivered to MEA at the Delivery Point under and in accordance with the express provisions of

[1] Pursuant to Section 1.5 below, capitalized terms used but not defined in the body of this Agreement are from the PPA, a copy of which is attached as Exhibit "A" hereto.

the PPA, and all proceeds thereof (collectively, the "Collateral, and such senior, first priority purchase money lien on and security interest in and to the Collateral, the "Seller Security Interest"), as security for the prompt payment and performance of all obligations of MEA under the PPA, including the payment of the Contract Price to Senior Creditor.

As a condition precedent to the effectiveness of the PPA (and referred to as a "PPA Contingency" under Section 3.1 thereof), and in order to induce Senior Creditor to enter into the PPA and for other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, Subordinated Creditor hereby agrees with Senior Creditor that, so long as any Senior Indebtedness (as hereinafter defined) is outstanding, each Party shall comply with such of the following provisions as are applicable to it.

1. Certain Definitions.

1.1 Insolvency Proceeding. The term "Insolvency Proceeding" shall mean any voluntary or involuntary dissolution, winding-up, total or partial liquidation, reorganization or bankruptcy, insolvency, receivership or other statutory or common law proceedings involving MEA or any assignment by MEA for the benefit of creditors (an "ABC") or any marshalling of the assets or liabilities of MEA.

1.2 Senior Indebtedness. The term "Senior Indebtedness" shall mean any and all indebtedness, obligations and liabilities, now existing or hereafter arising, direct or contingent, of MEA now or hereafter owing to Senior Creditor, outstanding from time to time, pursuant to, in connection with or related to the PPA, the Seller Security Interest, and any related security agreements, instruments and financing statements (collectively, the "Senior Agreements"), whether accrued and owing prior to, during or following any Insolvency Proceeding, together with interest thereon and all fees, expenses and other amounts (including costs of collection and reasonable attorneys' fees) at any time owing to Senior Creditor, and which the Parties agree shall expressly include without limitation the Net Present Value (as determined under Section 1.2(c) below) of any and all amounts due as the Contract Price during the entirety of the Term of the PPA through the Scheduled Termination Date that have not yet been paid at the time of determination. All Senior Indebtedness shall be entitled to the benefits of this Agreement without notice thereof being given to Subordinated Creditor.

For the purpose of calculating the outstanding balance of Senior Indebtedness:

(a) The above definition shall apply regardless of the terms of any Title Transfer Ruling, the extent to which the PPA or the Seller Security Interest is enforceable against MEA or the Collateral, or the extent to which such amounts are allowed as claims against MEA or its bankruptcy, receivership or ABC estate in any Insolvency Proceeding, and shall include any interest accruing on the Senior Indebtedness after the commencement of any Insolvency Proceeding and any other interest that would have accrued thereon but for the commencement of such Insolvency Proceeding.

(b) In the event that all or any part of payment of the Senior Indebtedness is rescinded or recovered directly or indirectly from Senior Creditor as a preference,

fraudulent transfer or otherwise (whether by demand, settlement, litigation or otherwise), such rescinded or recovered payments shall constitute Senior Indebtedness for all purposes hereunder and the obligations of Subordinated Creditor hereunder shall continue and remain in full force and effect or be reinstated, as the case may be, as to such rescinded or recovered amounts.

(c) For the purpose of determining the "Net Present Value" of the Contract Price during the entirety of the Term, as provided above:

(i) the PPA shall be presumed not to have been terminated prior to the Scheduled Termination Date, and the Term shall be calculated through the Scheduled Termination Date as if a Title Transfer Ruling had not occurred;

(ii) the calculation of the Contract Price (pursuant to Exhibit C of the PPA) for portions of the Term that have not yet occurred, as of the date of determination, shall be based on average daily deliveries of Power during the most recently completed twelve (12) calendar months prior to such determination date;

(iii) the annual escalation of the Contract Price (pursuant to such Exhibit C) shall be applied for portions of the Term that have not yet occurred based on the Contract Price then in effect on such determination date, but (notwithstanding the proviso in such Exhibit C) there shall be no resettings of the Contract Price for such future portions of the Term based on any projected changes in the MEA Avoided Cost Rate; and

(iv) the applicable discount rate for Contract Price payments during such future portions of the Term shall be determined based on the return on investments comparable to the MEA Portion as of the date the PPA was executed, it being acknowledged and agreed by the Parties that a risk-adjusted rate for damages claims from the breach of a long-term power purchase agreement is inappropriate for calculating the Senior Indebtedness hereunder and shall not adequately compensate Senior Creditor for the risk of loss of ownership of the MEA Portion through a Title Transfer Ruling.

1.3 Subordinated Indebtedness. The term "Subordinated Indebtedness" shall mean all existing and hereafter arising indebtedness, obligations and liabilities of MEA to Subordinated Creditor, whether direct or contingent, including all rights of subrogation, reimbursement, or contribution against MEA which might arise by reason of such Subordinated Creditor's execution or performance of this Agreement, and all claims, rights, causes of action, judgments and decrees in respect of the foregoing, including, without limitation:

(a) all indebtedness and obligations under the Notes and the Loan Agreement;

(b) all indebtedness and obligations under any financing provided to MEA by Subordinated Creditor (whether by CFC and/or NCSC, together or separately) in connection with or during any Insolvency Proceeding ("Bankruptcy Financing"); and

(c) the obligations of each party (other than Subordinated Creditor) to, under or in respect of the Mortgage (including without limitation any replacement liens, substitute collateral or other adequate protection granted to Subordinated Creditor for the Mortgage in any Insolvency Proceeding), any liens or security interests securing the Bankruptcy Financing and any other agreement or instrument securing or guaranteeing any of MEA's obligations to Subordinated Creditor (the "Subordinated Security Documents") under the Notes, the Loan Agreement and any Bankruptcy Financing (the Notes, the Loan Agreement, the Bankruptcy Financing and the Subordinated Security Documents and any other agreements evidencing or relating to Subordinated Indebtedness being hereinafter collectively referred to as the "Subordinated Agreements").

For the purposes hereof, the term "Subordinated Creditor" shall mean Subordinated Creditor as named in the preamble to this Agreement, its successors and assigns, and any and all assignees or holders of Subordinated Indebtedness.

1.4 Collateral. Collateral, as used herein, shall include any property subject to replacement liens, any substitute collateral and any other adequate protection granted with respect to the Collateral in any Insolvency Proceeding, and any proceeds thereof.

1.5 Other Capitalized Terms from the PPA. Except as otherwise specified herein, capitalized terms used in this Agreement but not defined in the body hereof are from the PPA, a copy of which is attached as Exhibit "A" hereto.

2. Terms of Subordination.

2.1 Payment and Liens Subordinated. (a) Anything in the Subordinated Agreements to the contrary notwithstanding, except for payments of the Subordinated Indebtedness expressly permitted by the terms hereof:

(i) The payment of the Subordinated Indebtedness from the Collateral or any proceeds thereof is and shall be expressly subordinate and junior in right of payment and exercise of remedies to the prior indefeasible payment in full in cash of the Senior Indebtedness;

(ii) The Subordinated Indebtedness is hereby subordinated as a claim against the Collateral, whether such claim be (A) in the event of any distribution of the assets of MEA in any Insolvency Proceeding or (B) other than in connection with an Insolvency Proceeding, to the prior indefeasible payment in full in cash of the Senior Indebtedness;

(iii) Except as expressly permitted by the terms hereof or unless Senior Creditor shall otherwise consent in writing, MEA shall not make, and no holder of Subordinated Indebtedness shall demand, accept or receive, any payment from the Collateral or any proceeds thereof until all the Senior Indebtedness has been indefeasibly paid in full in cash; and

(iv) In the event that, notwithstanding the foregoing, any payment or distribution of the Collateral or any proceeds thereof of any kind or character, whether in cash, property or securities, shall be received by a holder of Subordinated Indebtedness in violation of the foregoing provisions before all Senior Indebtedness is indefeasibly paid in full in cash, such holder shall hold

in trust and immediately pay over such payment or distribution to Senior Creditor or the holder of the Senior Indebtedness, for application to the payment of all Senior Indebtedness remaining unpaid until all Senior Indebtedness shall have been indefeasibly paid in full in cash, after giving effect to any concurrent payment or distribution to the holders of Senior Indebtedness.

(b) Except for payments expressly permitted by the terms hereof, Subordinated Creditor hereby subordinates and makes junior any liens and security interests in the Collateral that are or may be created by the Subordinated Agreements (including without limitation any liens in after-acquired property of MEA), any obligations of MEA under the Subordinated Agreements with respect to such liens and security interests, and all rights, remedies, terms and covenants related to such liens and security interests to (i) the Senior Indebtedness, (ii) the Seller Security Interest, (iii) all of the terms, covenants, conditions, rights and remedies contained in the Senior Agreements, and (iv) all rights of Senior Creditor under this Agreement.

(c) No amendments, modifications, supplements, extensions, renewals, restatements, replacements or refinancings of either the Senior Indebtedness or the Subordinated Indebtenedess, or of the Senior Agreements or the Subordinated Agreements, nor any action or inaction which Senior Creditor or Subordinated Creditor may take or fail to take in respect of the Collateral, shall affect the subordination set forth herein.

(d) In furtherance thereof, Subordinated Creditor hereby acknowledges and agrees that notwithstanding the relative times and method of attachment or perfection thereof (or any failure to perfect) or the order of filing of any financing statement, mortgage, deed of trust or other perfection document, or anything in the Subordinated Agreements to the contrary, Senior Creditor's interest in the Collateral to the extent of the Senior Indebtedness shall, in all respects, be a first priority and senior security interest and lien, superior to any security interests and liens granted or to be granted to Subordinated Creditor in the Collateral pursuant to the Subordinated Agreements or otherwise (including without limitation in any Insolvency Proceeding), it being the express intention of the parties that, notwithstanding anything in this Agreement to the contrary, all liens and security interests granted to Senior Creditor in the Collateral from time to time, whether previously or hereafter, shall be prior and superior to any liens or security interests granted to Subordinated Creditor in the Collateral. Furthermore, Subordinated Creditor shall not in any manner interfere with the security interests in and liens on the Collateral in favor of Senior Creditor, unless and until Senior Creditor advises Subordinated Creditor that MEA has satisfied in full in cash the Senior Indebtedness and that Senior Creditor has terminated its security interests in and liens on the Collateral.

(e) In foreclosing on Senior Creditor's security interests and liens in the Collateral, so long as Senior Creditor proceeds in a commercially reasonable manner, Senior Creditor may proceed to foreclose on Senior Creditor's security interests and liens in any manner which Senior Creditor, in its sole discretion, chooses, even though a higher price might have been realized if Senior Creditor had proceeded to foreclose on Senior Creditor's security interests and liens in another manner.

2.2 Attorneys-in-Fact; Permitted Subordinated Creditor Actions.

(a) Attorneys-in-Fact. Subordinated Creditor, for itself and its successors and assigns, hereby irrevocably authorizes and directs Senior Creditor and any trustee in bankruptcy, receiver, custodian or assignee for the benefit of creditors of MEA in any Insolvency Proceeding, on Subordinated Creditor's behalf to take such action as may be necessary or appropriate to effectuate the subordination provided for in this Agreement and irrevocably appoints, which appointment is coupled with an interest, upon any Event of Default under the Senior Agreements and during the continuance thereof or any failure to comply with the terms of this Agreement, Senior Creditor and any such trustee, receiver, custodian or assignee, its attorneys-in-fact for such purpose with full powers of substitution and revocation.

(b) Permitted Subordinated Creditor Actions. With respect to the Collateral, Subordinated Creditor may, so long as any such actions do not contravene the rights of Senior Creditor hereunder:

(i) If an Insolvency Proceeding has been commenced by or against MEA, file a claim or statement of interest with respect to the Subordinated Indebtedness and take any other actions necessary vis-à-vis unsecured creditors to preserve its claim rights and lien rights;

(ii) Take any action (not adverse to the priority status of the liens on the Collateral securing the Senior Indebtedness, or the rights of Senior Creditor to exercise any remedies under the Senior Agreements, this Agreement or at law) in order to create or perfect its lien in and to the Collateral;

(iii) File any necessary responsive or defensive pleadings in opposition to any motion, claim, adversary proceeding, or other pleading made by any Person objecting to or otherwise seeking the disallowance of the claims of Subordinated Creditor, including any claims secured by the Collateral, if any;

(iv) Vote on any plan of reorganization and make any filings and motions that are, in each case, in accordance with, the terms of this Agreement, with respect to the Subordinated Indebtedness and the Collateral;

(v) Join (but not exercise any control with respect to) any judicial foreclosure proceeding or other judicial lien enforcement proceeding with respect to the Collateral initiated by Senior Creditor to the extent that any such action could not reasonably be expected, in any material respect, to restrain, hinder, limit, delay for any material period or otherwise interfere with the exercise of remedies under the Senior Agreements, this Agreement or at law by Senior Creditor (it being understood that Subordinated Creditor shall not be entitled to receive any proceeds thereof until the Senior Indebtedness is paid in full in cash or unless otherwise expressly permitted herein); and/or

(vi) Bid for or purchase Collateral at any public, private, or judicial foreclosure upon such Collateral initiated by Senior Creditor, or any sale of Collateral during an Insolvency Proceeding.

2.3 Effect of Provisions. The provisions hereof as to subordination are solely for the purpose of defining the relative rights of the holders of Senior Indebtedness on the one hand, and the holders of the Subordinated Indebtedness on the other hand, and none of such provisions shall impair, as between MEA and the holders of its Subordinated Indebtedness, the obligations of MEA, which are unconditional and absolute, to pay to such holders all of the Subordinated Indebtedness in accordance with the terms thereof, nor, except as provided in Section 2.4 (Exercise of Remedies by Subordinated Creditor) below, shall any such provisions prevent the holders of Subordinated Indebtedness from exercising all remedies otherwise permitted by applicable law or under the terms of such Subordinated Indebtedness upon a default thereunder, subject to the rights, if any, of the holders of Senior Indebtedness under the provisions of this Agreement.

2.4 Exercise of Remedies by Subordinated Creditor.

2.4.1 Exclusive Enforcement Rights. Until the indefeasible payment in full, in cash, of the Senior Indebtedness has occurred, whether or not any Insolvency Proceeding has been commenced by or against MEA, Senior Creditor shall have the exclusive right to exercise any rights and remedies with respect to the Collateral without any consultation with or the consent of Subordinated Creditor; provided, that any liens securing the Subordinated Indebtedness may attach to the proceeds of such Collateral released or disposed of, subject to the relative priorities described in Section 2.1. In connection with any exercise of rights or remedies, Senior Creditor may enforce the provisions of the Senior Agreements and this Agreement and exercise any remedies thereunder, all in such order and in such manner as Senior Creditor may determine at its sole option. Such exercise and enforcement shall include the rights of an agent appointed by Senior Creditor to dispose of Collateral, to incur expenses in connection with such disposition, and to exercise all the rights and remedies of a secured creditor under applicable law.

2.4.2 Retention of Proceeds. Subordinated Creditor shall not be permitted to retain any proceeds of Collateral in connection with any exercise of rights and remedies in any circumstance unless and until the Senior Indebtedness has been indefeasibly paid in full in cash.

2.4.3 Non-Interference. Subject to Section 2.2(b), Subordinated Creditor hereby:

(a) agrees that Subordinated Creditor shall not, directly or indirectly, take any action that would restrain, hinder, limit, delay, or otherwise interfere with any exercise of rights and remedies by Senior Creditor with respect to the Collateral, or that is otherwise prohibited hereunder, including any disposition of the Collateral, whether by enforcement, foreclosure or otherwise, and that it shall not oppose any motion filed or supported by Senior Creditor in any Insolvency Proceeding for relief from stay or for adequate protection in respect of its interest in the Collateral;

(b) waives any and all rights it may have as a junior lien creditor or otherwise, directly or indirectly, to object to the manner in which Senior Creditor seeks to enforce the Seller Security Interest or any other liens or security interests of Senior Creditor in the Collateral, regardless of whether any action or failure to act by or on behalf of Senior Creditor is adverse to the interest of Subordinated Creditor; and

(c) acknowledges and agrees that no covenant, agreement or restriction contained in the Subordinated Agreements shall be deemed to restrict in any way the

rights and remedies of Senior Creditor with respect to the Collateral as set forth in this Agreement and the Senior Agreements.

2.4.4 Unsecured Creditor Remedies. In the event that Subordinated Creditor becomes an execution creditor with a lien or a judgment lien creditor in respect of the Collateral as a result of its enforcement of its rights as an unsecured creditor with respect to the Subordinated Indebtedness, such lien shall be subject to the same terms of this Agreement for all purposes as apply hereunder to the other liens securing the Subordinated Indebtedness.

2.5 Agreements Relating to Collateral. Unless and until such time as the Senior Indebtedness has been paid in full, in cash:

(a) Subordinated Creditor shall have no right to participate in the adjustment or settlement of any insurance losses or condemnation claims with respect to the Collateral; provided that (i) Subordinated Creditor may participate in any such losses or claims that exceed the amount of the outstanding balance of the Senior Indebtedness and after payment in full of such outstanding balance, and (ii) any such participation by Subordinated Creditor is subject to Section 2.1 hereof.

(b) Subordinated Creditor hereby agrees, upon the request and at the direction of Senior Creditor, to endorse in favor of Senior Creditor any and all checks payable to Subordinated Creditor which represent insurance and/or condemnation proceeds paid for claims relating to the Collateral in any manner.

(c) Subordinated Creditor agrees, upon request by Senior Creditor, to assign to Senior Creditor any and all insurance proceeds and condemnation awards payable to Subordinated Creditor for claims relating to the Collateral, to the full extent of the outstanding balance of the Senior Indebtedness.

(d) Subordinated Creditor hereby appoints Senior Creditor as Subordinated Creditor's attorney-in-fact to settle all insurance and/or condemnation claims relating to the Collateral and to receive all payments and endorse all checks with respect to such claims to the full extent of the Senior Indebtedness; provided that (i) Subordinated Creditor may participate in any such claims that exceed the amount of the outstanding balance of the Senior Indebtedness and after payment in full of such outstanding balance, and (ii) any such participation by Subordinated Creditor is subject to Section 2.1 hereof.

(e) Subordinated Creditor shall have no right to possession of any portion of the Collateral or to foreclose upon any portion of the Collateral, whether by judicial action or otherwise, unless and until all of the Senior Indebtedness shall have been paid in full, in cash, and except as otherwise provided in Section 2.2(b) (Permitted Subordinated Creditor Actions).

(f) Senior Creditor shall provide prompt notice to Subordinated Creditor that a Title Transfer Ruling has occurred.

3. **Marshaling.** Subordinated Creditor, for itself and its successors and assigns, hereby expressly waives any right that it otherwise might have to require Senior Creditor or the holders of Senior Indebtedness to marshal any of the property of MEA or any guarantor (if any) of the Senior Indebtedness, to resort to Collateral in any particular order or manner, whether provided for by common law or statute, or to enforce any guaranty or any lien given by MEA as a condition precedent or concurrent to the exercise of any of their remedies.

4. **Additional Rights of Senior Creditor.** If Subordinated Creditor, in violation of this Agreement, shall commence, prosecute or participate in any suit, action or proceeding against MEA with respect to the Collateral, MEA may interpose as a defense or plea the making of this Agreement and Senior Creditor may intervene and interpose such defense or plea in Senior Creditor's name or in the name of MEA. If Subordinated Creditor, in violation of this Agreement, shall attempt to enforce any security agreement, real estate mortgage, deed of trust, guaranty, lien instrument or other encumbrance with respect to the Collateral, Senior Creditor may by virtue of this Agreement restrain the enforcement thereof in Senior Creditor's name or in the name of MEA.

5. **Waivers.** Subordinated Creditor hereby expressly waives: (a) the right to receive notice of the demand by Senior Creditor against MEA for observance or performance of, or enforcement of, any terms or provisions of the Senior Agreements; (b) all other notices and demands otherwise required by law with respect to the Collateral or the Seller Security Interest which Subordinated Creditor may lawfully waive; (c) all rights (statutory or otherwise) that require Senior Creditor to make an election of remedies where Senior Creditor holds security interests and liens in Collateral that consists of different types of property of MEA or to take recourse first or solely against any particular Collateral securing the Senior Agreements; (d) all rights (statutory or otherwise) that restrict, affect or impair the rights or remedies of Senior Creditor to collect any deficiency after the application to the Senior Indebtedness of any proceeds arising from foreclosure on the Collateral; (e) any defense based on the adequacy of a remedy at law which might be asserted as a bar to the remedy of specific performance of this Agreement in any action brought therefor by any Party hereto, and (f) so long as this Agreement remains in effect, the benefit of all other principles or provisions of law, statutory or otherwise, which are or might be in conflict with the terms hereof.

6. **Indulgences Not Waivers.** Neither the failure nor any delay on the part of Senior Creditor or Subordinated Creditor to exercise any right, remedy, power or privilege hereunder shall operate as a waiver thereof or give rise to an estoppel, nor be construed as an agreement to modify the terms of this Agreement, nor shall any single or partial exercise of any right, remedy, power or privilege with respect to any occurrence be construed as a waiver of such right, remedy, power or privilege with respect to any other occurrence. No waiver by a Party hereunder shall be effective unless it is in writing and signed by the Party making such waiver, and then only to the extent specifically stated in such writing.

7. **Covenant Not to Challenge.** This Agreement has been negotiated by the parties with the expectation and in reliance upon the assumption that the instruments and documents evidencing the Senior Indebtedness and the Subordinated Indebtedness are valid and enforceable. In determining whether to enter into this Agreement, Subordinated Creditor, on the one hand, and Senior Creditor, on the other hand, have assumed such validity and enforceability, and have agreed

to the provisions contained herein, without relying upon any reservation of a right to challenge or call into question such validity or enforceability. As between Subordinated Creditor, on the one hand, and Senior Creditor, on the other hand, such Parties hereby covenant and agree, to the fullest extent permitted by law, that neither Senior Creditor nor Subordinated Creditor shall initiate in any proceeding a challenge to the validity or enforceability of the documents and instruments evidencing or securing the Senior Indebtedness or the Subordinated Indebtedness, as applicable.

8. Effect of Bankruptcy. This Agreement is intended to be enforceable as a subordination agreement under Bankruptcy Code section 510 notwithstanding the commencement of any bankruptcy or other Insolvency Proceeding by or against MEA and, to the full extent permitted by law, shall apply with full force and effect to any indebtedness arising pursuant to debtor-in-possession financing arrangements or pursuant to financing arrangements entered into in connection with the confirmation of a plan of reorganization under Chapter 11 of the Bankruptcy Code.

9. Notices. All notices, requests, consents, claims, demands, waivers and other communications hereunder (any of the foregoing, a "Notice") shall be in writing and shall be deemed to have been given (a) when delivered by hand (with written confirmation of receipt); (b) when received by the addressee if sent by a nationally recognized overnight courier (receipt requested); (c) on the date sent by facsimile (with confirmation of transmission) if sent during normal business hours of the recipient, and on the next Business Day if sent after normal business hours of the recipient or (d) on the third Business Day after the date mailed, by certified or registered mail, return receipt requested, postage prepaid. Such Notices must be sent to the respective parties at the following addresses (or at such other address for a Party as shall be specified in a Notice given in accordance with this Section 9).

If to Senior Creditor:	Municipality of Anchorage 632 W. 6th Avenue, Suite 850 Anchorage, AK 99501 Facsimile: (907) 343-7180 Attention: William D. Falsey, Municipal Manager
with a copy to:	Municipality of Anchorage 632 W. 6th Avenue, Suite 850 Anchorage, AK 99501 Facsimile: (907) 343-4550 Attention: Rebecca A. Windt Pearson, Municipal Attorney

or, as to each Party, at such other address as shall be designated by such Party in a Notice to the other Party complying as to delivery with the terms of this Section.

10. Successors; Continuing Effect, Etc. This Agreement is being entered into for the benefit of Senior Creditor, Subordinated Creditor and the holders of the Senior Indebtedness and the Subordinated Indebtedness, and their respective successors and assigns. This Agreement shall be a continuing agreement and shall be irrevocable and shall remain in full force and effect so long as there are both Senior Indebtedness and Subordinated Indebtedness outstanding, *provided, however,* that this Agreement shall terminate as to Subordinated Creditor at such time as Senior Creditor provides the notice set forth in the last sentence of Section 2.1(d) hereof.

11. Entire Agreement; Amendment. This Agreement constitutes the entire agreement of the parties with respect to the subject matter hereof, and no modification or waiver of any provision of this Agreement shall in any event be effective unless the same shall be in writing signed by Senior Creditor and Subordinated Creditor.

12. Governing Law. This Agreement shall be governed by and construed in accordance with the internal laws of the State of Alaska, without regard to conflict of law principles that would result in the application of the laws of any other jurisdiction.

13. Headings. The headings in this Agreement are for convenience of reference only and shall not alter or otherwise affect the meaning hereof.

14. CONSENT TO VENUE; WAIVER OF JURY TRIAL.

(a) VENUE AND SERVICE OF PROCESS. ANY LEGAL SUIT, ACTION OR PROCEEDING ARISING OUT OF OR BASED UPON THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY MAY BE INSTITUTED IN THE SUPERIOR COURT OF THE STATE OF ALASKA IN THE THIRD JUDICIAL DISTRICT, LOCATED IN ANCHORAGE, ALASKA, OR THE UNITED STATES DISTRICT COURT LOCATED IN

ANCHORAGE, ALASKA. SERVICE OF PROCESS, SUMMONS, NOTICE OR OTHER DOCUMENT BY MAIL TO SUCH PARTY'S ADDRESS SET FORTH HEREIN SHALL BE EFFECTIVE SERVICE OF PROCESS FOR ANY SUIT, ACTION OR OTHER PROCEEDING BROUGHT IN SUCH COURT. THE PARTIES IRREVOCABLY AND UNCONDITIONALLY WAIVE ANY OBJECTION TO THE LAYING OF VENUE OF ANY SUIT, ACTION OR ANY PROCEEDING IN SUCH COURT AND IRREVOCABLY WAIVE AND AGREE NOT TO PLEAD OR CLAIM IN ANY SUCH COURT THAT ANY SUCH SUIT, ACTION OR PROCEEDING BROUGHT IN SUCH COURT HAS BEEN BROUGHT IN AN INCONVENIENT FORUM.

(b) **WAIVER OF JURY TRIAL.** EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS AGREEMENT IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES AND, THEREFORE, EACH SUCH PARTY IRREVOCABLY AND UNCONDITIONALLY WAIVES ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LEGAL ACTION ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY. EACH PARTY TO THIS AGREEMENT CERTIFIES AND ACKNOWLEDGES THAT (A) NO REPRESENTATIVE OF ANY OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT SEEK TO ENFORCE THE FOREGOING WAIVER IN THE EVENT OF A LEGAL ACTION, (B) SUCH PARTY HAS CONSIDERED THE IMPLICATIONS OF THIS WAIVER, (C) SUCH PARTY MAKES THIS WAIVER VOLUNTARILY, AND (D) SUCH PARTY HAS BEEN INDUCED TO ENTER INTO THIS AGREEMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION 14.

15. Specific Enforcement. The Parties agree that irreparable damage would occur if any provision of this Agreement were not performed in accordance with the terms hereof and that the Parties shall be entitled to specific performance of the terms hereof, in addition to any other remedy to which they are entitled at law or in equity. The Parties acknowledge and agree that (A) the Parties shall be entitled to an injunction, specific performance or other equitable relief to prevent breaches of this Agreement and to enforce specifically the terms and provisions hereto, without proof of damages, this being in addition to any other remedy to which they are entitled under this Agreement and (B) the right to specific enforcement is an integral part of the transactions contemplated by this Agreement and without that right, neither Party would have entered into this Agreement. Each Party agrees that it shall not oppose the granting of specific performance and other equitable relief on the basis that the other Party has an adequate remedy at law or that an award of specific performance is not an appropriate remedy for any reason at law or equity. The Parties acknowledge and agree that any Party seeking an injunction to prevent breaches of this Agreement and to enforce specifically the terms and provisions of this Agreement in accordance with this Section 15 shall not be required to provide any bond or other security in connection with any such injunction.

16. No Third Party Beneficiaries. This Agreement is solely for the benefit of Senior Creditor, Subordinated Creditor, and their respective successors and assigns, and neither MEA nor any other Person is intended to be a third party beneficiary hereunder or to have any right, benefit, priority or interest under, or because of the existence of, or to have any right to enforce, this

Agreement. Senior Creditor and Subordinated Creditor shall have the right to modify or terminate this Agreement at any time without notice to or approval of MEA or any other Person.

17. Inconsistent or Conflicting Provisions. In the event a provision of the documents evidencing or governing the Senior Indebtedness or the Subordinated Indebtedness is inconsistent or conflicts with the provisions of this Agreement, the provisions of this Agreement shall govern and prevail.

18. Counterparts. This Agreement may be executed and delivered in counterparts, including counterpart signatures delivered by telefacsimile or other electronic method of transmission (to be followed in due course by delivery of original signature counterparts, but the failure to deliver an original executed counterpart shall not affect the validity, enforceability, and binding effect of this Agreement), and shall be effective when each Party has delivered its counterpart signature, and all counterparts taken together shall be deemed a single original agreement.

19. Recording. This Agreement may be recorded by Senior Creditor in all recording offices in the State of Alaska in which the lien of the Mortgage has been recorded.

20. Several Liability. Each of CFC and NCSC shall be severally liable for all obligations of Subordinated Creditor hereunder, to the extent of its interest in the Subordinated Indebtedness, and shall comply with all obligations of Subordinated Creditor hereunder with respect to such interest.

The next page is a signature page

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed under seal as of the day and year first above written.

Explanatory Statement

The Proposed Final Fish and Wildlife Program (Proposed Final Program) for the Eklutna Hydroelectric Project (Project) that has been presented to Governor for approval represents the product of over five years of participation and effort to meet the requirements of the 1991 Fish and Wildlife Agreement (1991 Agreement) by the Project Owners, federal and state agencies, native tribal members, environmental advocates, and many members of the public.

The U.S. federal government constructed, owned, and operated the Project from 1955 until it sold the Project to Chugach Electric Association, Inc. (CEA), Matanuska Electric Association, Inc. (MEA), and the Municipality of Anchorage (MOA), collectively the "Project Owners", in October 1997. The sale was subject to an agreement that the Project Owners entered into in 1991 with the National Marine Fisheries Service (NMFS), U.S. Fish and Wildlife Service (USFWS), the Alaska Energy Authority (AEA), and the State of Alaska (collectively with the Project Owners, the "Parties") regarding protection, mitigation of damages to, and enhancement of fish and wildlife affected by the Project (1991 Agreement).

As a substitute for federal licensing, the 1991 Agreement sets out a specific set of requirements to be followed by the Project Owners every 35 years to develop and submit to the Governor a Proposed Final Program to address impacts of the Project on fish and wildlife resources through protection, mitigation, and enhancement (PME) measures.

The Project Owners submit this Proposed Final Program in compliance with all requirements of the 1991 Agreement. While the Proposed Final Program does not include everything that all process participants wanted, the Project Owners and other Parties to the 1991 Agreement believe that this represents a balanced approach that meets the process requirements and approval criteria set forth in 1991 Agreement. As regulated electric utilities with responsibilities to their member-ratepayers, the Project Owners also believe that the Proposed Final Program preserves the Project's operational values as a low cost resource for power in Southcentral Alaska that produces firm energy and capacity, increases grid reliability, provides approximately 44% of MEA's renewable generation portfolio and approximately 25% of CEA's renewable generation portfolio, and offsets approximately 72,500 metric tons of CO_2 equivalent each year.

Process

The 1991 Agreement is primarily a process document designed to lead the Project Owners through a study and consultation process to create a set of PME measures related to the

environment affected by the Project and generate the necessary information to support an informed decision by the Governor. The 1991 Agreement prescribes specific procedural, schedule, consultation, study, and public involvement requirements during the development of the Proposed Final Program.

While the process required in the 1991 Agreement is based on the federal licensing process established by the Federal Power Act and implementing regulations, it was adapted, has different decision-making criteria, and leads to a result made in Alaska for Alaskans. The decision by the Governor is neither a federal action that triggers the requirements of the National Environmental Policy Act (NEPA) nor an action under the Federal Power Act with its prescriptive authorities for federal fisheries agencies and licensing regulations for applicants for a federal license. Rather, the 1991 Agreement contains explicit directions in lieu of any federal process that the Project Owners have followed or exceeded.

The Project Owners were required to initiate the consultation and study process outlined in the 1991 Agreement by 2022. In order to provide ample time for meaningful consultation and a comprehensive study program, the Project Owners started three years early in 2019. In addition, the 1991 Agreement required the Project Owners to consult with only specific agencies; however, the Project Owners felt it was important to invite all interested stakeholders to participate in the 1991 Agreement process.

To begin, the Project Owners compiled and summarized all relevant existing information in the Initial Information Package (IIP), identified information gaps, and developed study plans in consultation with resource agencies, the Native Village of Eklutna (NVE), and other interested entities. The Project Owners then implemented a 2-year study program in consultation with Technical Work Groups to assist in study design, execution and reporting, completed 16 environmental and engineering studies, sought Traditional Ecological Knowledge (TEK) relevant to the Eklutna River, and developed study reports. Through this process, the Project Owners identified and discussed the need for and the means to establish instream flows in the Eklutna River as the centerpiece of their fish and wildlife program. The Project Owners then conducted a comprehensive alternatives analysis, not required by the 1991 Agreement, in which they investigated, developed, and examined all known proposals for the protection, mitigation, and enhancement of fish and wildlife affected by the Project, and presented to, engaged with, and sought input from the consulted entities.

Based on the study results, consultations, and alternatives analysis, the Project Owners then developed a Draft Fish and Wildlife Program (Draft Program) publicly released in October 2023. In the Draft Program, the Project Owners proposed to utilize the existing Anchorage Water and Wastewater Utility (AWWU) water supply infrastructure to provide a robust year-round base instream flow regime to 11 out of 12 miles of the Eklutna River and benefit all four

species of salmon that are currently observed spawning in the lower river, while implementing measures to protect the public water supply and minimizing impacts to ratepayers, taxpayers, carbon emissions, and recreation. The proposed flows were determined based on modeling results and were designed to optimize habitat gains while minimizing the costs of replacement energy. The Draft Program also proposed periodic peak flows to maintain downstream fish habitat, construction of eight new bridges for the AWWU water supply access road, a funding commitment for monitoring studies, and an adaptive management framework. Due to the significant costs, impacts, and uncertainty regarding the viability of introducing anadromous species above the Project dam, no fish passage related facilities or changes in operations were proposed at that time.

The Parties to the 1991 Agreement and NVE had 30 days to review the Draft Program and provide comments to the Project Owners. The Project Owners then met with each of the Parties and NVE in December 2023 to attempt to resolve any differences giving due weight to their recommendations, expertise, and statutory responsibilities. In January 2024, the Project Owners held a series of six public meetings in Palmer, Anchorage, and Eagle River. The public meetings were held in an open house style, and members of the public had an opportunity to submit comments to the Project Owners.

Since then, the Project Owners continued to meet and negotiate with the Parties and NVE and have made substantial improvements to the program based on their input. These changes include adding new measures to protect existing recreational use and facilities, revising the framework for the Monitoring and Adaptive Management Committee, increasing the funding commitment for habitat monitoring efforts, combining the base flow and peak flow water budgets, increasing water banking capabilities, increasing the flexibility for requesting modifications to the flow regime, adding procedures for allocating additional inflows in the future, adding a funding commitment for physical habitat enhancement, and adding two limited reopeners for a fixed wheel gate and fish passage measures during the 35 year period should certain criteria be met. These changes are reflected in the Proposed Final Program now being submitted for the Governor's approval.

Proposed Final Program

The Proposed Final Program consists of the following inter-related measures deemed necessary to protect, mitigate, and enhance fish and wildlife resources affected by the Project and reflects negotiations of the Parties to the 1991 Agreement:

- Section 2.1 – Year-Round Instream Flows in the Eklutna River
    - 2.1.1 – Construction of an Eklutna River Release Facility near the AWWU Portal Valve to allow such flows
    - 2.1.2 – Establishment of a Default Flow Regime for Year-Round Instream Flows

- Section 2.2 – Periodic Channel Maintenance Flows in the Eklutna River
    - 2.2.1 – Automation of the Existing Outlet Gate at the Dam to allow such flows
    - 2.2.2 – Establishment of a Default Flow Regime for Periodic Channel Maintenance Flows
- Section 2.3 – Commitment for Monitor Future Flow Releases
- Section 2.4 – Construction of Eight New AWWU Bridges across the Eklutna River
- Section 2.5 – Recreation Enhancements
    - 2.5.1 – Funding Commitment for Lakeside Trail Repairs
    - 2.5.2 – Commitment to Avoid Peak Fishing Times when Scheduling Annual Project Maintenance to Avoid Impacts to the Eklutna Tailrace Fishery
    - 2.5.3 – Request for Free, Non-permitted Public Access to the Eklutna River
- Section 3.1 – Establishment of a Monitoring and Adaptive Management Committee
- Section 3.2 – Funding Commitment for Monitoring Efforts
- Section 3.3 – Adaptive Management Plan
    - 3.3.1 – Establishment of a Water Budget
    - 3.3.2 – Procedures for Banking Water in the Reservoir
    - 3.3.3 – Procedures for Allocating Any Additional Future Inflows
    - 3.3.4 – Commitment to Prepare an Annual Water Accounting Report
    - 3.3.5 – Procedures for Requesting Modifications to the Flow Regime
    - 3.3.6 – Funding Commitment for Physical Habitat Enhancement
- Section 4.1 – Limited Reopener for Potential Replacement of the Existing Overflow Spillway with a Fixed Wheel Gate
- Section 4.2 – Limited Reopener for Potential Fish Passage Facilities

Criteria

In order to ensure that the Project is "best adapted for power generation and other beneficial public uses," Section 5 of the 1991 Agreement requires the Governor to give *equal* consideration to the following criteria when reviewing the Proposed Final Program for his public interest determination:

1. Efficient and economical power production,
2. Energy conservation,
3. The protection, mitigation of damages to, and enhancement of fish and wildlife (including related spawning grounds and habitat),
4. The protection of recreational opportunities,
5. Municipal water supplies,
6. The preservation of other aspects of environmental quality,
7. Other beneficial public uses, and
8. Requirements of State law.

The Project Owners believe the Proposed Final Program fully meets the process requirements and these criteria outlined in the 1991 Agreement. The Proposed Final Program strikes a new balance among fish and wildlife habitat, public water supply, renewable energy production, and recreation.

- The central PME measure (providing instream flows in Eklutna River) will provide significant improvement in fish and wildlife habitat affected by the Project without losing fundamental benefits of the Project's efficient and economical power production of dispatchable renewable energy and capacity;
- Adaptive management provisions acknowledge and address uncertainties in how the river will react to the new instream flow regime, with funding for physical habitat enhancement;
- A Monitoring and Adaptive Management Committee comprised of the federal and state agencies and NVE is established to direct the habitat related efforts going forward, with funding for monitoring efforts;
- A protocol is established for sharing in any increased inflows to Eklutna Lake between fish habitat and energy generation;
- Municipal water supply (AWWU water source and infrastructure) as well as other downstream infrastructure remain protected; and
- Recreational opportunities at Eklutna Lake, in the Eklutna River, and in the Project tailrace are preserved and enhanced.

Additionally, while at this time the Project Owners do not believe that a fixed wheel gate is necessary or fish passage into/out of Eklutna Lake is warranted due to high cost, low productivity to support new fish populations, fish passage technological uncertainties, and major impacts to project operations, the Project Owners acknowledge that the situation could change before the next study and consultation process begins in 2057. Accordingly, the Project Owners have provided written criteria, conditions, and triggers upon which they will install a fixed wheel gate and cooperate with the Committee to install fish passage facilities ten years after instream flows are established. These limited reopeners specifically address the requests of agencies and NVE for greater flows and fish passage without compromising the criteria of efficient and economical power production and municipal water supply.

Costs

As set forth in Section 4.5.1 of the Supporting Information Document (SID), the Project Owners estimate that the capital costs of building the infrastructure in the Proposed Final Program (e.g., Eklutna River Release Facility, AWWU bridges, and other financial commitments) will total $16.5 million (or $20.5 million if they also install the fixed wheel gate). The Project Owners estimate that the O&M costs will total $316,000 per year, while annual energy replacement costs will amount to $1.3 million per year. The total annualized cost is estimated at $3.7 million (or $4.0 million if they also install the fixed wheel gate).

The costs for implementing the Proposed Final Program will be distributed among the Project Owners based on their ownership percentages and long-term power purchase agreements that modify allocations of costs related to the 1991 Agreement. The resulting allocations are as follows:

- CEA is responsible for 64.29% of all costs, including Capital Costs, O&M Costs, and Replacement Energy Costs.
- MEA is responsible for 16.67% of the Capital Costs and O&M Costs, and 35.71% of Replacement Energy Costs.
- MOA is responsible for 19.04% of the Capital Costs and O&M Costs but does not incur any Replacement Energy Costs.

Given these allocations, CEA will bear approximately 66.7% of the total annualized cost, MEA – 24.5%, and the MOA – 8.8% of the total costs.

Considerations Related to Other Requests

The Project Owners understand that the Proposed Final Program does not contain some measures requested by participants in the consultation process. When evaluating the Proposed Final Program, the Project Owners believe the following considerations are important:

- The environment today is much different from pre-Project conditions; therefore, use of existing conditions as baseline is the only logical and legally defensible way to approach analysis of river habitat conditions, reservoir productivity conditions, and alternative PME measures. The Eklutna River was subject to hydropower development beginning in the 1920s long before the Project was built. Downstream railroad and highway bridges were built creating important public infrastructure that adversely affected the fish habitat in the river. In the 1980s, the Municipality of Anchorage developed important infrastructure that depends on the Project to provide 90% of the Municipality's water supply needs but limits the consideration of certain alternative PME measures. The area around Eklutna Lake has become a popular area within Chugach State Park providing a variety of recreational opportunities, and the recreational fishery in the tailrace is popular as well. The Project Owners accepted all these conditions and sought to optimize what could be done given such constraints, rather than ignoring them or assuming that someone else will bear such costs of remediation.
- The alternative analysis conducted by the Project Owners followed a U.S. Army Corps of Engineers (USACE) methodology that looked at a wide range of comprehensive PME measures on an apples-to-apples comparison based on habitat gains, total cost

(CAPEX, O&M, replacement power), and cost per habitat unit gained. This approach was important to the Project Owners because they must consider all costs and risks of their actions as prudent utility operators with public service obligations to their member-ratepayers and the communities they serve. (See SID – Section 4.5.1.)

- Full "restoration" of the Eklutna River is not required by the 1991 Agreement; rather the goal of the 1991 Agreement is to "protect, mitigate and enhance" fish and wildlife habitat affected by the Project within the construct of eight specific criteria as detailed above.
- Similarly, dam removal is not contemplated by or required under the 1991 Agreement. After the Draft Program was released, NVE first presented dam removal as its preferred alternative. While the Project Owners did not have the modeling capability to evaluate potential effects on fish habitat from dam removal, they commissioned an experienced engineering team to prepare a technical memorandum addressing project removal elements, risks, and costs (See SID – Attachment F). That team identified significant risks to downstream infrastructure (AWWU pipeline, railroad, and highway bridges) due to inundation during high river flows in an unregulated river, identified potential mitigation measures, and estimated the total known costs of dam removal, Project replacement, and mitigation measures to exceed $500 million in 2034 dollars.
- The Project Owners are dealing with the current energy supply situation in Southcentral Alaska, which is very dynamic and challenging given the declining natural gas fuel supplies and other considerable unknowns such as how renewable generation resources and the necessary new transmission lines for such resources can be contracted, permitted, financed, constructed, interconnected, and integrated with the existing Railbelt electric system. Based on the engineering analysis and the current energy situation, as prudent utility operators the Project Owners cannot agree to remove the Project in ten years and take on such considerable costs and liabilities.

Summary

The Project Owners respectfully request approval of the Proposed Final Program no later than October 2024 so that they can start to implement its numerous protection, mitigation, and enhancement measures including substantial year-round instream flows in the Eklutna River. The Project Owners look forward to working with the Governor and the other Parties through the final steps of the 1991 Agreement process and stand ready to support these efforts.

ANCHORAGE, ALASKA
AR No. 2017–324(S)

A RESOLUTION OF THE ANCHORAGE MUNICIPAL ASSEMBLY IN SUPPORT OF EFFORTS TO RESTORE THE EKLUTNA RIVER.

WHEREAS, the Native Village of Eklutna is the largest Denai'na settlement in the Municipality of Anchorage; and

WHEREAS, the Eklutna River historically was a major subsistence resource for the Eklutna People; and

WHEREAS, the Eklutna River has been in a badly degraded condition since 1929 due to hydropower dams and water diversions; and

WHEREAS, the Eklutna River still supports five species of salmon, including Cook Inlet king salmon and sockeye salmon, though in **[~~greatly~~]** diminished numbers from historical levels; and

WHEREAS, Eklutna Incorporated, the village corporation for Eklutna, is the largest landowner in the Municipality of Anchorage and owns most of the land along the Eklutna River and around Eklutna Lake; and

WHEREAS, Eklutna Inc., and the Eklutna people have made substantial contributions to the development of the Municipality of Anchorage through school sites, highways, **parks,** railroads, **housing,** powerlines and rights-of-way; and

WHEREAS, The Conservation Fund and Eklutna Inc., are collaborating on a $7.5 million project to dismantle the Lower Eklutna River dam; and

WHEREAS, Little to no water flows out of Eklutna Lake into the Eklutna River because of water diversions for the Eklutna Power Project **and the supply of approximately 86 percent of the drinking water for Anchorage and Eagle River**; and

WHEREAS, Municipal Light and Power (ML&P)**, Chugach Electric Association, and Matanuska Electric Association (collectively the "Eklutna Power Purchasers") jointly own and operate the Eklutna Power Project [~~owns a 52% share of the Eklutna Power Project~~]**; and

WHEREAS, The Eklutna Power Project often provides the least expensive renewable power on the Railbelt; and

WHEREAS, **The Eklutna Power Purchasers are contractually obligated to study and develop a proposed Fish and Wildlife program to address [~~ML&P is legally obligated to mitigate for~~]** the impacts of the Eklutna Power Project to fish and wildlife, **pursuant to the 1991 Fish & Wildlife agreement**; and

WHEREAS, Mayor Ethan Berkowitz and members of the Anchorage Assembly have frequently expressed their support for wild salmon and Anchorage's desire to be a "Salmon City;" now, therefore

THE ANCHORAGE ASSEMBLY RESOLVES:

Section 1. The Assembly recognizes the contribution of the Eklutna people and Eklutna Inc. to the development of the Municipality of Anchorage and supports the efforts to restore the hydrology and fisheries of the Eklutna River **subject to all provisions of the Fish & Wildlife agreement of August 7, 1991**.

Section 2. The Assembly urges **the Eklutna Power Purchasers to initiate a consultation process, as defined in the 1991 agreement, [~~Municipal Light and Power~~]** to begin necessary studies **early** to **examine [~~define~~]** the impacts to fish and wildlife of Eklutna Lake and Eklutna River hydropower operations **[~~and to begin collaborative efforts to restore water flows to the Eklutna River~~].**

Section 3. This resolution shall be effective upon passage and approval.

PASSED AND APPROVED by the Anchorage Assembly this 24th day of October, 2017.

ANCHORAGE, ALASKA
AR No. 2024-103

A RESOLUTION OF THE ANCHORAGE ASSEMBLY APPROVING THE USE OF SUBPOENAS TO COMPEL TESTIMONY AND DOCUMENT PRODUCTION RELATED TO THE 1991 FISH AND WILDLIFE AGREEMENT (EKLUTNA HYDROPOWER PROJECT) OR WATER RIGHTS TO EKLUTNA LAKE, PURSUANT TO ANCHORAGE MUNICIPAL CODE SECTION 2.30.085.

WHEREAS, Anchorage Municipal Code section 2.30.085, *Subpoena powers,* authorizes the Assembly Chair with the approval of a majority of the Assembly, to compel by subpoena the "testimony of a person whom the assembly reasonably believes may be able to give information relating to a public matter being considered by the assembly" and to "produce documents, papers or objects which the assembly reasonably believes may relate to a public matter being considered by the assembly"; and

WHEREAS, in 1984 the Alaska Power Administration and the Municipality Anchorage negotiated and executed an Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska (1984 Agreement) to secure water rights for the diversion of water from Eklutna Lake while protecting water volume needed for the Eklutna Hydropower Project; and

WHEREAS, in 1991, the Federal Government sold the Eklutna Dam Hydroelectric facility to the Chugach Electric Association, Matanuska Electric Association, and the Municipality of Anchorage (doing business as Anchorage Municipal Light and Power (ML&P)); and

WHEREAS, the terms of the 1991 Fish and Wildlife Agreement require a robust public process, in place of the process required for a Federal Energy Regulatory Commission license, whereby the owners are to study and propose a plan for mitigating the impact of the Eklutna Dam on local fish and wildlife; and

WHEREAS, in 1993, the Alaska Power Administration and the Municipality of Anchorage executed a supplemental agreement to their earlier 1984 Agreement (1993 Supplement) which currently governs Anchorage Water & Wastewater Utility's (AWWU) rights and access to drinking water from Eklutna Lake and is set to expire in 2025; and

WHEREAS, in May of 2020, the Regulatory Commission of Alaska (RCA) approved the sale of the ML&P from the Municipality of Anchorage to Chugach Electric Association (CEA), with the requirement that the Municipality surrender its vote as a member of the Eklutna Operating Committee, until it could demonstrate to the RCA that it has sufficient expertise within Municipal Hydro Power to participate again as a voting member; and

WHEREAS, the Assembly Leadership recently learned that in October 2023, AWWU and the Eklutna Owner's Group, executed an agreement which the Administration described to the Assembly as a "binding term sheet," the terms of which would govern AWWU's rights and access to drinking water from Eklutna Lake in the event the Governor endorses the currently proposed Fish and Wildlife Plan; and

WHEREAS, the Municipal Attorney and representatives of AWWU produced the binding term sheet in executive session and it was examined by the Assembly Members on February 2, 2024; and

WHEREA, on February 23, 2024, the Assembly met again and recessed to an executive session to discuss the legal implications of the binding term sheet and the Proposed Fish and Wildlife Program; and

WHEREAS, having taken up these matters in executive session, the Assembly finds that it is necessary in furtherance of the Assembly's legislative powers under the Charter and the Assembly's role to provide legislative oversight of municipal agencies and utilities, to compel production of the binding term sheet so that the Assembly may share the agreement with its counsel for legal review prior to a determination by the Assembly regarding whether it is appropriate and in the public interest to make the agreement a disclosable public record; and

WHEREAS, the Chair of the Assembly now requests authorization of the Assembly, per AMC section 2.30.085, to issue subpoenas for the production of agreements and other records specified herein, and Assembly's retention thereof;

NOW, THEREFORE BE IT RESOLVED THAT THE ANCHORAGE ASSEMBLY:

Section 1. Does hereby, pursuant to AMC section 2.30.085, authorize the Chair of the Assembly, on behalf and in the name of the Assembly, to compel by subpoena the attendance of persons to provide testimony or produce documents at a time and place specified by the Chair, as described below:

A. The agreement described as a "binding term sheet" executed between the Eklutna Owners and the Anchorage Water and Wastewater Utility, which had been previously provided for review only in executive session; and

B. Any existing agreement among the Eklutna Owners or between the Eklutna Owners and any third party, upon which a claim of privilege or confidentiality is based.

Section 2. This resolution shall be effective immediately upon passage and approval by the Assembly.

PASSED AND APPROVED by the Anchorage Assembly this 27th day of March, 2024.

Christopher Constant
Chair

ATTEST:

Municipal Clerk

MUNICIPALITY OF ANCHORAGE
MAYOR DAVE BRONSON

OFFICE OF THE MAYOR

RECEIVED
OFFICE OF
APR 02 2024
MUNICIPAL CLERK

Date: April 2, 2024

To: Anchorage Assembly

From: Mayor Dave Bronson

Subject: Veto of Resolution No. AR 2024-103

Today, in accord with Section 2.30.100 of the Anchorage Municipal Code (AMC) and Section 5.02 of the Municipal Charter, I am issuing a veto for AR 2024-103, which was approved during the Assembly's special meeting on March 27, 2024.

Why are assembly members spending taxpayer dollars for their attorneys to subpoena documents they already have access to? These documents have been made available to them, are available to them, and this open invitation continues. These threatening subpoenas are nothing more than scare tactics to bully municipal employees into potentially breaching municipal contracts. As one of the Assembly's own members put it, these extreme tactics are mere "chest puffing."

The Assembly and their own lawyers have said the real reason for the subpoena is to make the term sheet public. However, the term sheet they seek to make public is subject to a prior contract - a Common Interest Agreement signed by the Municipality of Anchorage in 2017. Because the Assembly is part of the Municipality of Anchorage, we have no objection to Assembly members making their own copies of the confidential term sheet and of the confidential Common Interest Agreement. Indeed, disclosure has already been made, and is available to members of the Assembly and their paid outside counsel – if the confidentiality is properly maintained, and the Common Interest Agreement is not breached. I simply do not see why the Anchorage Assembly believes they are not bound by the 2017 Common Interest Agreement and, consequently, I do not agree that the Assembly has a unilateral right to publicly release documents subject to a Common Interest Agreement. If the Anchorage Assembly makes this document public as they want to, the Municipality will surely be sued for breach of contract.

The Municipality agreed in 2017 that no party would have the authority to waive any privilege or defense on behalf of any other party without the consent from the other parties. Chugach and MEA have not waived their rights under the Common Interest Agreement.

A subpoena is unnecessary when we have already made these documents available to Assembly Members and their counsel. AR 2024-103 is an attempt to interfere and potentially

breach the contractual obligations agreed to by the Municipality in 2017 during the Berkowitz administration.

For the above reasons, I hereby veto AR 2024-103.

MUNICIPALITY OF ANCHORAGE

ASSEMBLY MEMORANDUM

No. AM 350-2024

Meeting Date: A p r i l 9 , 2024

From: **Assembly Chair Constant and Vice Chair Zaletel**

Subject: **Response to Mayoral vetoes of AR 2024-103 and AO 2024-28, As Amended.**

We request the Assembly override the Mayoral vetoes of AR 2024-103, dated April 2, 2024 and AO 2024-28, As Amended, dated April 3, 2024. Both vetoes are either woefully uniformed, or deliberately misleading. For the sake of clarity this memo addresses each veto in turn:

AR 2024-103

In the veto message of AR 2024-103, Mayor Dave Bronson states that "[b]ecause the Assembly is part of the Municipality of Anchorage, we have no objection to Assembly members making their own copies of the confidential term sheet and of the confidential Common Interest Agreement."[1] This statement is remarkable, not only for its sound logic, but particularly because it is the first time **any** member of the Administration has expressed this view to members of the Assembly, and it came in the form of a Mayoral veto.

On January 23, 2024, the Assembly learned of the existence of a "binding term sheet" between the Eklutna Owners and AWWU. It is notable that neither the Administration, nor the Department of Law saw fit to inform the Assembly of the existence of this document, but rather the Assembly Leadership was forced to send the Municipal Attorney a request asking to inspect it. The following day, the Municipal Attorney confirmed the existence of a document titled as a binding term sheet, but refused to allow us to see it, asserting that its terms and conditions were "confidential." This assertion of confidentiality notably lacked reference or citation to any legal authority, merely that, whatever its basis for a claim of confidentiality, the Municipal Attorney did not consider the Assembly to have the appropriate standing to see this document upon request.

Further, when Assembly Leadership agreed to take up this agreement in executive session on February 2, 2024, the Administration only provided a copy of the binding term sheet after receiving the consent of the other Eklutna Owners. When the Assembly requested to see correspondence between the Municipal Attorney and the Eklutna Owners, this was also refused as being "confidential." And finally, on April 4th when the Chair recently attempted to review the term sheet with the Assembly's attorneys, as the Mayor's veto clearly stated he would be able to, he was denied the opportunity to either retain a copy or even review and discuss it

[1] Veto of AR 2024-103.

without a municipal attorney present until the Eklutna Owners approved the language of a confidentiality agreement she intended to have both the Chair and the Attorneys sign. In this extraordinary change in Municipal policy, the Municipal Attorney didn't bother to apprise the Assembly Chair of her unilateral decision to restrict his ability to confer with counsel. Until the language of the confidentiality agreement was approved, the Chair and the Assembly's attorneys would only be allowed to view the document with a member of the Department of Law physically present in the room.

Despite the repeated affirmations of the Municipal Attorney that their office works for the Municipality of Anchorage and that its job is to advise both branches of the Municipal Government, the Assembly has been consistently treated as a third party, if not a party opponent, to the Eklutna Owners, and has been denied meaningful access to these documents.

AO 2024-28, As Amended.

The Mayor's veto quite condescendingly states that "[h]istory is instructive here"[2]. Ironically, we cannot agree more.

As the legislative branch of the Municipal Government, it is inherently the Assembly's role to articulate and codify the policy of the Municipal Government.[3]

The Administration's assertion that "[t]he executive branch held the power to make policy and executive agreements when the original agreements were signed in 1984 and 1991"[4] strikes us as statement that could be best described as grossly inaccurate.

The Mayor describes previous mayors as having "signed documents on behalf of the Municipality relating to Eklutna Lake. Those actions were valid and binding upon the Municipality as a whole."[5] However, the historical record of the Eklutna Project reflects substantial involvement by the Assembly and the public in those agreements.

In 1987, Mayor Tony Knowles presented the prospect of purchasing the Eklutna Hydropower Project and requested both public hearings and the Assembly's endorsement to even begin the negotiations for its purchase.[6] In 1989, Mayor Tom Fink presented the purchase agreement to the Assembly and requested authority from them to sign on behalf of the Municipality,[7] and again in 1991, requesting the Assembly's approval of the final amendment to the agreement.[8] The actions of these previous mayors were "valid and binding" not because there were the inherent prerogative of the executive, but rather, because they were done openly, with the

advice, consultation, and **consent** of the Assembly.

History is instructive indeed.

By way of comparison, should we examine the actions of this administration? Not just with regard to Eklutna Lake, but his management of public utilities and public finances as a whole?

It is this Mayor who disregarded the requirements of code and unilaterally discontinued the fluoridation of the Municipality's water supply in violation of AMC 26.40.050.[9]

It is this Mayor who ignored the Assembly's authority to over contracts under AMC and illegally executed a multi-million dollar contract on a tent purportedly intended to shelter human beings but lacking any approved and verifiable engineering data pertaining to its capacity to hold snow load or withstand wind as required by Title 23 of the Municipal Code.[10]

It is this Mayor who ignored the State Legislative Program, duly enacted by the Assembly under AMC 2.10.075 and its published advocacy pamphlet, and instead printed a separate program and advocated his own personal policies to the State Legislature, undermining his own government, betraying the people of Anchorage, and violating subsection 2.10.075B.[11]

This Mayor clandestinely negotiated and is presently attempting to bind the Municipality to a series of agreements implicating tens of millions of taxpayers' and ratepayers' funds and access to drinking water for decades in direct contradiction of policies duly established and codified by the Assembly. Moreover, the Mayor's actions were done without clearly informing the public of the substance and effect of the unauthorized agreements he is attempting to make.

Nevertheless, with this historical context, this Mayor still has the temerity to assert that it is the action of the Assembly which "raises the question of a charter violation."[12]

History is instructive here, but not nearly so instructive as the law. We strongly encourage the Administration to apprise itself of both before implying that we have strayed from our sworn duties under the Charter. That the code had previously

delegated certain policy-making powers to the executive branch, does not, should not, and cannot be presumed to create an insurmountable impediment to returning such power to the policy-making branch: the legislative. This is particularly important now, when that power has been so grossly abused by an Administration so seemingly incapable of performing the most basic of functions of government without violating the law.

Regardless of the characterizations implied by the Mayor's vetoes, the actions of this body do not constitute an expansion of the Assembly's power or an impermissible intrusion into the authority of the executive. Rather, these are the measured and reasonable actions of a body attempting to secure information to which it is already entitled, to exercise legislative powers it has not had to exercise in the past, and to implement policies inherently within its authority.

We request your support for overriding the veto of both the ordinance and resolution.

RE: Municipality of Anchorage Party Comments Including Public Comments Received by the Anchorage Assembly on the Eklutna Hydroelectric Project, Proposed Fish and Wildlife Program

Dear Governor Dunleavy:

The Anchorage Assembly submits the attached resolution AR No. 2024-182(S-1) which contains the Municipality of Anchorage's comments as a party to the 1991 Fish and Wildlife Agreement for the Eklutna Project ("1991 Agreement"), including public comments received by the Municipality of Anchorage Assembly on the Proposed Final Fish and Wildlife Program ("Proposed Final Program"). As the elected representatives of Anchorage residents, the Assembly submits these comments to you on behalf of Anchorage residents and as a concerned stakeholder and party to the 1991 Agreement. The Assembly will submit separate comments and its reply to these and any other public comments in its capacity as the Eklutna Hydroelectric Project's majority interest Project Owner before July 24, 2024.[1]

All comments transmitted herein were received by the Assembly on or before June 24, 2024. The Assembly held a public hearing on June 11, 2024, which provided the opportunity for the public to testify and comment on the Proposed Final Program. On June 25, 2024, the Assembly met and unanimously adopted the attached resolution, which compiles and summarizes the public comments received in person and by email through June 24, 2024. A full record comments is available online.[2] A copy of the resolution will also be provided to the other Project Owners.

The public comments are wide-ranging and critical of the Proposed Final Program's chosen Portal Valve Alternative. For example, commenters expressed concern with the

[1] Pursuant to Anchorage Municipal Code 3.20.070, the Assembly has exclusive authority to make and approve decisions for the Municipality of Anchorage concerning the 1991 Agreement and the Proposed Program. *See* AO No. 2024-28 § 2 (Feb. 2, 2024) (as amended).

[2] The full record of public testimony can be accessed online, including the video-recorded in person testimony and an Information Memorandum of testimony received by email.
See https://meetings.muni.org/AgendaOnline/Meetings/ViewMeeting?id=5409&doctype=1.

Proposed Final Program's process, technical analysis, potential adverse effects on drinking water, the significant use of public funds without Assembly approval, and the Proposed Final Program's compliance with the 1991 Agreement. Commenters rejected the Proposed Final Programs' Portal Valve Alternative, which leaves one mile of the Eklutna River without water, as insufficient to achieve the 1991 Agreement's goals to "protect, mitigate damages to, and enhance fish and wildlife."

The comments reflect the public's concern with both the Proposed Final Program and the evaluation process. The public sentiment aligns with the Assembly's position as a party and stakeholder on the Proposed Final Program and we encourage you to seriously consider these comments when you evaluate the Program.

Sincerely,

Assembly Chair Christopher Constant

ANCHORAGE, ALASKA
AR No. 2024-182(S-1)

A RESOLUTION OF THE MUNICIPALITY OF ANCHORAGE SUBMITTING PUBLIC COMMENT ON THE PROPOSED FINAL FISH AND WILDLIFE PROGRAM FOR THE EKLUTNA HYDROELECTRIC PROJECT AS TRANSMITTED TO THE GOVERNOR.

WHEREAS, the Municipality of Anchorage, Chugach Electric Association (CEA), and Matanuska Electric Association (MEA) (collectively "the Hydroelectric Project Owners") jointly own the Eklutna Hydroelectric Project and are parties to the 1991 Fish and Wildlife Agreement (the "1991 Agreement") with the State of Alaska, the U.S. Fish and Wildlife Service and the National Marine Fisheries Service, an agreement that notably excludes a key stakeholder, the Native Village of Eklutna, the federally recognized tribe whose ancestral homelands encompass this project; to fund studies to examine and quantify the impacts of the Eklutna Power Project on fish and wildlife; examine and develop proposals for the protection, mitigation, and enhancement of fish and wildlife affected by such hydroelectric development; and prepare a Proposed Final Fish and Wildlife Program for approval by the Governor; and

WHEREAS, once approved by the Governor, the Fish and Wildlife Program proposes to contractually bind operations of the Eklutna Hydroelectric Project and Anchorage Water and Wastewater Utility ("AWWU") for the next 35 years; and

WHEREAS, in their Proposed Final Fish and Wildlife Program to mitigate their impacts to fish and wildlife pursuant to the 1991 Agreement, the Hydroelectric Project Owners propose to utilize AWWU infrastructure to deliver water into the Eklutna River via a Portal Valve (the "Portal Valve Alternative") one mile downstream of Eklutna Lake; and

WHEREAS, the policy of the Municipality of Anchorage has been to support restoration of the Eklutna River since the Anchorage Assembly adopted AR 2017-324(S), "A Resolution in Support of Efforts to Restore the Eklutna River," and AR 2022–262, As Amended, "A Resolution of the Anchorage Municipal Assembly in Support of Efforts to Restore the Eklutna River"; and

WHEREAS, further, through the passage of AO 2023-131, As Amended, the Assembly, through the creation of a specific law, reinforced and declared that it is the official policy of the Municipality of Anchorage, inclusive of the Anchorage Hydropower Utility Department, to restore the continuous water flow of the Eklutna River and the fish populations of the River and Eklutna Lake, to the greatest extent possible, subject to all provisions of the 1991 Agreement; and

WHEREAS, any changes to the Eklutna Hydroelectric Project will impact not only hydroelectric power and drinking water, but also fish and wildlife; and

WHEREAS, Eklutna Lake is the primary source of Municipality's drinking water for which AWWU currently pays approximately $1.2 Million annually to the Eklutna Hydroelectric Project to ensure access to the Municipality's drinking water and any binding agreement relating to the purchase price of water and volumes available to AWWU may impact property rights of AWWU and the regulated price of water to its customers; and

WHEREAS, under the Anchorage Municipal Charter § 10.01, the Assembly is the sole municipal body with authority to approve acquisition,conveyance, lease, or transfer of property and other rights; without Assembly approval, the inclusion of predetermined water rights into the Proposed Final Fish and Wildlife Program violates separation of powers and is litigable; and

WHEREAS, the Anchorage Assembly was recently briefed about the changing regulatory environment for drinking water, and while the effects of the regulatory changes are currently unknown, concern has been raised about the availability of drinking water from ground wells under the new regulations; and

WHEREAS, the Anchorage Assembly hired an expert engineer, Don Spiegel, who originally designed the Eklutna AWWU system, to evaluate the Portal Valve alternative as it relates to AWWU's operation of the Eklutna Water Treatment Facility and the effectiveness of the Portal Valve Alternative in delivering water to the river to support the restoration of fish species; and

WHEREAS, the initial conclusions of Mr. Spiegel, which were submitted to the Assembly through AIM 2024-11 on January 23, 2024, raise significant doubts as to whether the Portal Valve Alternative will meet the stated mitigation objectives; raise numerous concerns about potential harms to AWWU infrastructure and the Portal Valve limiting AWWU expansion in the future; and identifies that planned and unplanned maintenance shutdowns could result in AWWU and the Municipality being culpable and liable for the death of any aquatic species; and

WHEREAS, the Assembly submitted public comment to the Hydroelectric Project Owners via resolution AR 2024-40, As Amended, dated February 2, 2024; and

WHEREAS, following the public comment period is an opportunity for the Hydroelectric Project Owners to review the comments and resolve any disagreements prior to submitting a final proposal to the Governor; and

WHEREAS, the Native Village of Eklutna has put forward an alternative for removal of the dam at Eklutna Lake once replacement renewable power is secured, which is supported by the Municipal policy stated in AO 2023-131, As Amended, and codified at AMC 26.30.025A., but was never fully and equitably analyzed by the Hydroelectric Project Owners; and

WHEREAS, in addition to the stated policy and support for dam removal, the Anchorage Assembly has evaluated the Portal Valve Alternative and has concerns about that alternative; and

WHEREAS, the Native Village of Eklutna put forward an additional alternative solution transporting water for release at the existing dam spillway that would achieve much more than the proposed Portal Valve Alternative would do, rewatering all 12 miles of the river below the damn but not be connected to AWWU's infrastructure and address the concerns about sufficient flow into the river during low water availability or shut down and maintenance events; and

WHEREAS, on February 12, 2024, the Hydroelectric Project Owners responded to the Assembly's submission of public comments rejecting it's two primary stated requests – to delay and to fully evaluate any impacts through the RCA on AWWU rates**; and**

WHEREAS, on April 25, 2024 the Hydroelectric Project Owners transmitted their Proposed Final Fish and Wildlife Program to the Governor, which kicked off a process that first allows for stakeholder comments and then a response to those comments by the Hydroelectric Project Owners before the Governor takes any action; and

WHEREAS, on June 11, 2024, the Anchorage Assembly held a public hearing to receive public testimony on the Proposed Final Fish and Wildlife Program, providing the public its first opportunity to directly weigh in through testimony that was recorded since the Proposed Final Fish and Wildlife Program was made available by the Hydroelectric Project Owners; and

WHEREAS, in light of the public testimony received and in the interest of protecting the future of the Municipal water supply as well as the interests of its residents and municipal taxpayers, the Municipality of Anchorage submits the following comments on the Proposed Final Fish and Wildlife Program regarding the Portal Valve Alternative as transmitted to the Governor;

NOW, THEREFORE, THE ANCHORAGE ASSEMBLY RESOLVES and submits the following as its comments on the Proposed Final Fish and Wildlife Program:

Section 1. The following stakeholder comments are process and technical concerns particular to the Portal Valve Alternative put forward to the Governor as the Proposed Final Fish and Wildlife Program by the Hydroelectric Project Owners for public comment:

A. **Non-Compliant Process**. The August 7, 1991 Fish and Wildlife Agreement (1991 Agreement) sets forth a process for addressing the Eklutna Hydroelectric Project's impacts on fish and wildlife similar to that for Federal Energy Regulatory Commission ("FERC") licensed projects. The process set forth in the 1991 Agreement was intended to be at least as robust as a normal FERC license process, which is subject to all the provisions of National Environmental Policy Act

("NEPA") and all the authorities typically granted to the federal agencies. The process engaged by the Hydroelectric Project Owners falls short of the FERC standard of analysis. No NEPA **equivalent** analysis was done, the federal agencies were denied the authorities they normally would have, such as to prescribe fish passage, and the public wasn't presented any alternatives to choose from. Moreover, the process engaged in does not appear comparable to the NEPA requirements to consult with Native Tribes impacted by the project (18. C.F.R. 5.7), nor have a dispute resolution process allowing agencies to mandate conditions (18 C.F.R. 5.8 and 5.15).

Previous comment letters from these state and federal resource agencies raise questions around the process engaged by the Hydroelectric Project Owners, the data inputs used in modeling to develop the Proposed Final Fish and Wildlife Program, and the viability of the Portal Valve Alternative to achieve the stated goals of the 1991 Agreement. These questions are unresolved.

Similarly, the process under the 1991 Agreement diverges substantially from the type of alternatives analysis the Municipality uses on its own capital projects. Often the Municipality's own large capital projects, such as the Port of Alaska Modernization Program ("PAMP") or projects co-funded through the Anchorage Metropolitan Area Transportation Solutions ("AMATS") design alternatives, are evaluated by experts and relevant stakeholders and the Assembly is briefed and able to weigh in on the proposed alternatives, particularly where Municipal resources are required to fund the projects. Based on the information the Assembly has been provided to date, only one alternative was seriously evaluated by the Hydroelectric Project Owners and put forward for consideration even though a Municipal contribution is expected through a property tax assessment.

B. **Potential Impacts to Anchorage Drinking Water.** Throughout this process, there has been very little discussion about any implications on AWWU and the Municipality's access to drinking water now and into the foreseeable future (the next 35 years). The week of January 22, 2024, well after the Proposed Final Fish and Wildlife Program was released and after years of discussion and presentation by the Eklutna Hydroelectric Project owners, we learned that the Hydroelectric Project Owners and AWWU, all public utilities regulated by the Regulatory Commission of Alaska (RCA), had signed a binding agreement in early October 2023, prior to submitting the Proposed Final Fish and Wildlife Program for public comment. We learned this agreement is based on the Portal Valve Alternative and no other alternative; an alternative that may have significant impacts to the project outcome as well as to regulated rates authorized by the RCA. After the signed agreement was made public with transmittal of the program to the Governor, it was clear that AWWU was prohibited from raising any concerns publicly about the Portal Valve option pursuant to the terms of the agreement. This was and continues to be a

significant hinderance on the Anchorage Assembly, and the public, to provide complete comments on the Portal Valve Alternative as related to AWWU operations, potential impacts to Municipal growth and strategic investments for AWWU and the Municipality. Significant legal questions also remain whether a binding agreement can be signed relating to future Municipal utility assets, revenues, and expenditures without Assembly approval.

Before learning of that agreement, the Anchorage Assembly hired an expert to analyze the effectiveness of the Portal Valve option in relation to AWWU's operation at Eklutna. That analysis by engineer Don Spiegel, who designed the Eklutna AWWU system, concluded that the Portal Valve "cannot provide adequate Eklutna River restoration flows, nor can it provide year-round water without interruption. Thus, it is the Author's opinion that the Portal Valve as currently configured is fatally flawed and other Eklutna River restoration alternatives should be studied further."

Furthermore, AWWU continues to brief the Assembly on new developments concerning drinking water regulation through federal and local entities. The impacts of the new drinking water regulations are yet to be determined, but AWWU leadership has expressed concerns about potential impacts to the Municipality from limitations of retaining full ground well capacity. Until the new regulatory landscape is better understood, particularly any reductions in access to drinking water from sources other than Eklutna, any future limitations on drinking water capacity at Eklutna should be held in abeyance.

C. **Misrepresentation of data, Incomplete Analysis and Insufficient Mitigation.** The Proposed Final Fish and Wildlife Program does not meet the requirements of the 1991 Agreement regarding "the protection, mitigation of damages to, and enhancement of fish and wildlife affected by hydroelectric development of the Eklutna Hydroelectric Project." There are a number of variables related to lake level that can render the Portal Valve Alternative inoperable. Additionally, regular and unexpected maintenance at the AWWU water facility will also stop the flow of water into the Portal Valve. Discontinuous water flows will result in fish kills in Eklutna River. The state and federal signatories to the 1991 Agreement have raised questions about the analysis and process used to develop the Proposed Final Fish and Wildlife Program. The Hydroelectric Project Owners failed to adequately and equitably consider all reasonable alternatives, including the dam removal and siphon alternatives proposed by the Native Village of Eklutna. The Hydroelectric Project Owners failed to present the public with a full range of alternatives as would typically occur in similar situations.

D. **Poor Coordination and Questionable Use of Public Funds.** The Hydroelectric Project Owners and AWWU are regulated utilities and

need to demonstrate benefit to their rate payers. Additionally, the Assembly, as the steward of taxpayer funds, must demonstrate benefit to the residents of the Municipality through the expenditure of public funds. Treating the Portal Valve Alternative as a singular stand-alone project is short sighted and does not maximize various opportunities to meet the goals and objectives of 1991 Agreement across various entities nor does it meet the requirements of these entities to benefit the public. The Portal Valve Alternative brought forward by the Hydroelectric Project Owners is self-serving and fails to protect the broader public interests of the Municipality of Anchorage. Given the $57 million price tag of the Portal Valve Alternative, its potential impacts to AWWU operations, and the financial implications to ratepayers and taxpayers for the next 35 years, we find this is a poor use of public funds and lacked public coordination.

E. Concerns from the Public. The public testimony received in person and via email to the Anchorage Assembly concerning the Proposed Final Fish and Wildlife Program overwhelmingly raised concerns with the proposal. Those concerns are summarized below.[1] The public, including utility ratepayers and taxpayers, are stakeholders in this process and to date have not had a meaningful opportunity to weigh in.

1. **Commitment to full river restoration.** Several members of the public provided testimony supporting full river restoration.

"Please help and restore the Eklutna River to its original habitat."

"The portal valve option for the Eklutna Dam is not acceptable. An acceptable option must RESTORE, not replace, what was viable in the past for the fish in the river. Theories of alternative water flow rates are not acceptable. Any section of dry river is not acceptable. Not allowing fish to pass into the lake is not acceptable."

"It fails because it leaves a mile of river completely dry and does not provide adequate flows to restore fish and natural processes below the dam. It also does not provide for any fish passage above the dam[n] into Eklutna Lake and the upper tributaries." "I'm writing in support of the Native Village of Eklutna's vision for restoring the full length of the Eklutna River. 80% of Alaskans who commented want the Eklutna River restored."

"The Proposed Final Program does not meet the intent of the 1991 purchase agreement. It leaves a mile of the river dry, with inadequate flows down the remaining river. It also does not provide fish passage to Eklutna Lake and its upstream tributaries. It falls far short of

[1] The full public record accessible through the Assembly's Public Portal via Assembly Information Memorandum (AIM) submitted for testimony received for the June 11, 2025 meeting and the Assembly's agenda page where video recordings of past meetings may be viewed.

mitigating the harm done by the dam to fish and wildlife. Significantly, the Final Program goes against what 80% of Alaskans who commented want for their river. During the comment period this winter, 4 out of 5 Alaskans asked the utilities to provide fish passage between the river and the lake, which also requires flows throughout the entire river. 53.7% of Alaskans who commented specifically want the dam removed."

"Championing Eklutna River restoration calls for visionary leadership. Native Movement acknowledges the Assembly's commitment to restoring the Eklutna River. Eklutna River restoration is a visionary step that simply is the right thing to do. The Draft Fish and Wildlife Program submitted to the Governor continues business as usual and ignores the pleas of the Native Village of Eklutna and a majority of the public. The Anchorage Assembly's vision for preserving the natural ecosystem of the Eklutna watershed and Indigenous heritage is a pivotal step toward righting the wrongs of the past.|Endorsing responsible stewardship of the Eklutna watershed necessitates rejecting the Draft Fish and Wildlife Program. … The proposal does not meet the requirements of the 1991 Agreement and fails to ensure sufficient water flow for river restoration. Acknowledging the inadequacies of the Draft Fish and Wildlife Program is paramount. Under the utilities' Draft Fish and Wildlife Program, there will be no connection to Eklutna Lake or upper tributaries leaving the most significant portion of the river dry. Without provisions for fish passage, the program will fail to restore the ecosystem as intended by the 1991 Agreement. The resolution's critique underscores the necessity of a more comprehensive and ecologically sound solution."

"The current plan submitted to the Governor does not go far enough to return salmon to the Eklutna River and has ignored the Native Village of Eklutna, who has asked for an alternative path forward that connects the river to the lake and returns historic water flows to the river so fish can spawn. |I ask the assembly to submit comments in support of the Native Village of Eklutna and the return of the river to its natural state."

2. **Compliance with the 1991 Agreement.** Public comment received specifically called out concerns that the Portal Valve option in the Proposed Final Fish and Wildlife Program does not meet the intent of the 1991 Agreement.

"We appreciate the Assembly's support of the removal of the Eklutna Lake Dam because it is the only alternative to meet the purpose of the Purchase Agreement. The Purchase Agreement requires that the utilities work with key federal agencies to develop a Fish and Wildlife Plan with the purpose of developing and implementing measures to ""protect, mitigate damages to, and enhance fish and wildlife (including related spawning grounds and habitat)."" The inadequacy of the AWWU Portal Valve Alternative to achieve the intent of the

Purchase Agreement should make it a nonresponsive option for the Fish and Wildlife Plan."

"The [1991] Agreement was meant to provide a deregulatory alternative that was better suited to Alaska than a 'one size fits all' FERC process. It's fair to say the power companies took advantage of this loose framework and applied a literal legal interpretation that benefited only them. The power companies claim they were inclusive, but their linclusivity (sic) was highly performative. Other than the initial flushing flow, I am not aware of any case where they altered their practice or plans based on input from anybody else, including NVE, the public, the feds. The power companies claim they only have to mitigate, for their impacts, not restore the Eklutna River. 'Restoration' is the highest and preferred form of mitigation, according to the EPA and US Army Corps of Engineers. … I think it likely that the 40 cfs of instream flow will be insufficient to attract salmon, at which point they will say 'We told you so.' 40 cfs is a trickle compared to normal historic flows of 1,000 cfs. We were promised increased operating efficiencies when CEA acquired ML&P. Those promised efficiencies should have been sufficient to offset any loss of power production from Eklutna. To understand why the power companies have gone to the mat over Eklutna, follow the money."

"Their contractor was paid to support only one proposal that didn't affect their operations, one iota. The Proposed Final Program does not meet the intent or requirements of the 1991 Agreement. It leaves a mile of the river completely dry and does not provide adequate flows to restore fish and natural processes below the dam. It also provides no fish passage above the dam into Eklutna Lake and the resource-rich upper tributaries. |I was aghast at some of the tactics the contractor used to manipulate input. At one point, they told the group that the AWWU portal option was off the table, only to find out they were secretly meeting on an agreement with the water utility to solidify the portal option."

3. **Concerns about the fish and wildlife analysis.** Several public comments raised concerns about the disconnection between the Hydroelectric Owners analysis and other state and federal agencies written feedback.

"The owners propose flows that all resource agencies (AK Dept of Fish and Game, U.S. Fish and Wildlife Service, and National Marine Fisheries Service) found inadequate to support salmon." "As a fisheries biologist for the USFWS for 8 years, I studied sockeye salmon in waterways on Joint Base Elmendorf Richardson, nearby Eklutna River. Sockeye strays naturally colonized a man-made lake, Sixmile Lake; genetics show these colonizers are related to sockeye from the Big Lake area. The Owners and occasionally ADFG have questioned if sockeye would come back if the Eklutna River was reconnected to Eklutna Lake, using this perceived uncertainty as a

reason for selecting the AWWU portal alternative. There is strong evidence from a proximate system that sockeye will naturally repopulate, the timing of return and carrying capacity of the lake can be debated but the notion that they will not come back is not scientifically supported."

According to one of the coauthors of the research, the Owners misrepresented and downplayed their findings by equating the potential sockeye salmon run that may have spawned in the lake (up to 15,000) with all the salmon historically present in the entire system, including those harvested annually at the mouth of the river and in Knik Arm by the Dena'ina, and by failing to mention documented concerns from the 1992 divestiture summary report on the sale of the Eklutna hydroelectric project that the "complete loss" of Eklutna Lake's sockeye salmon run "undoubtedly occurred with construction of the 1929 dam."

4. **Cost.** "The [Hydroelectric Utility Owners] propose to tap into Anchorage's drinking water supply pipeline and spend $57 million in taxpayer and ratepayer money to put a trickle of water into the river that won't meaningfully restore anything. The Assembly has said that it will not provide funding or authorizations for this program and should make that clear to the owners and the Governor."

5. **Respecting Recognized Government to Government Relationships.** Several comments received stated concerns about the lack of official role the Native Village of Eklutna had in the process and acknowledging the cultural significance of the Eklutna River.

"I remember hearing stories from Grandpa Leo about how big the kings were. You'd have to carry them on your back. Another one kind of made me laugh, was that the bears would be picky with their food, as you could walk on the backs of the salmon in the Eklutna River. There's a reason our people, the Dena'ina Athabascans, settled in Eklutna and the surrounding areas. The land sustains life and with the blessings of the Lord, our families are fed. … The Eklutna dam was not something the tribe of Eklutna wanted. We are the landowners. How is that right? The outcome of the dam, resulted in the river turning into a creek, the flourishing salmon turning into none, our people without our food source and NOW, our people are in the fight of our lives to get back what was stolen from us. … As a Dena'ina Athabascan woman, who HURTS from what was stolen from us as a tribe, I SINCERELY, thank you for helping to fight for myself, for my 5 children, for my tribe of Native Village of Eklutna and the communities of Alaska to make this wrong a right. Chin'an."

"This is truly a generational opportunity to restore once-abundant salmon runs, which will benefit the Anchorage community and bring a

modicum of justice to the Native Village of Eklutna, which settled near the Eklutna River and was never consulted or asked about the idea of dewatering the river and decimating its salmon runs."

"As we live on colonized lands, restoring the full length of the Eklutna River is one of many steps towards healing from the legacy of settler colonialism and building a world in which all of us have everything we need."

"This [the Proposed Final Fish and Wildlife Program] does not address the ecological and cultural needs of the region and community; we must put forth an option that fully restores the river so that fish can once again thrive in the area.||I believe that fully restoring the Eklutna River is best for our community. It will provide renewed cultural connection for the Native Village of Eklutna and Indigenous Alaskans who want to see their river full of fish again. It will allow for more recreational opportunities for our growing communities who are still seeking outdoor opportunities and more places to fish- something that makes Alaska, and Southcentral in particular, so unique. I applaud the Assembly's resolution to support the Native Village of Eklutna's proposal, returning autonomy and ownership to people whose land was stolen from them. They are the original stewards of this resource and we owe it to them to let their vision lead what restoration looks like at Eklutna."

"Most importantly, restoration of the Eklutna River would be a long overdue opportunity to address the injustice against the Native Village of Eklutna, upon whose land the dam was constructed without their consent or involvement. Thank you, assembly members, for your support of Eklutna River restoration."

"Advocating for Indigenous alternatives upholds Indigenous rights and recognizes their environmental stewardship. The Native Village of Eklutna and other commenters have proposed meaningful and carefully-considered alternatives that represent a compromise between the utilities' concerns and stronger alternatives proposed in previous engagements. Their alternatives, such as the Eklutna River Release Facility and dam removal, offer more effective means of restoring the river while respecting Indigenous sovereignty and environmental sustainability. But even those thoughtful alternatives have been overlooked repeatedly. It is not hard to imagine based upon the history of the Eklutna people that for many generations, their ancestors embraced the river's abundance while a major city would engulf them and their lands taken from them. It is clear the Eklutna River once thrived with the presence of salmon, despite the hydro project owners' denial of this profound legacy. The utilities may be attempting to obscure the truth, but they cannot extinguish the collective memory that has been noted in studies and in public comments."

"They would hold meetings with the Native Village of Eklutna to tell people they had met with the tribe, but they never listened to a word they said. It was horribly disrespectful and disingenuous."

6. **The NVE Alternative.** The Native Village of Eklutna's alternative received public comment as well.

"The current mitigation plan for the Eklutna Hydroelectric Project that was submitted to the Governor is insufficient. It does not truly address and mitigate the harm the hydroelectric dam causes to fish and wildlife. It would not allow for sufficient, year-round water flow to restore fish passage above the dam, leaving a mile of the riverbed dry. ||The Municipality has an amazing opportunity to restore all 5 species of salmon through the Ekltuna River and up to Eklutna Lake by removing the hydroelectric dam AFTER other renewable energy projects are constructed. This would create access to salmon that would benefit the plants and animals along the river, as well as families like my own in the Anchorage area who could have easier to access to sustainable, nearby salmon runs."

"[T]he Native Village of Eklutna and its partners have provided alternatives that meet the intent and requirements of the 1991 Agreement, which was to right the historical wrong of destroying the Eklutna watershed and restore the Eklutna River from its headwaters to Cook Inlet. These alternatives include an alternative Eklutna River Release Facility using a siphon pump that would take water directly from the lake and put it right into the river, avoiding any use of AWWU infrastructure, and dam removal once replacement renewable energy is secured, which we believe is feasible within the next decade."

"I appreciate the Assemlby's commitment to a full river restoration. However the proposed plan leaves a mile of river completely dry and doesn't provide adequate flow to restore fish and natural processes. There is also no fish passage to above the dam. There are alternatives that do these things until the dam can be removed, that seem feasible. I would like to support the Native Village of Eklutna's alternatives that protect Anchorage's drinking water and restore the Eklutna river."

For all the above reasons, the Municipality of Anchorage cannot endorse and thus opposes the Proposed Final Fish and Wildlife Program.

Section 2. The Municipality of Anchorage does not intend to issue authorizations or provide funds or any other form of support of the Proposed Final Fish and Wildlife Program or any alternative that doesn't work toward the restoration of the full length of the Eklutna River and comply with policy of the Municipality, as recently enacted by AO 2023-131, As Amended, and codified at AMC 26.30.025A., as well as AR 2022-262, As Amended, and AR 2017-324(S).

Section 3. The Regulatory Commission of Alaska (RCA), under its statutory powers to initiate investigation into practices and facilities of a public utility, should review the Proposed Final Fish and Wildlife Program and examine any impacts on any of the regulated utilities, including but not limited Chugach Electric, Matanuska Electric, Anchorage Hydropower and AWWU, particularly about impacts to rate payers and their access to uninterrupted service, **before** any option for a Final Fish and Wildlife Program is approved by the Governor.

Section 4. The Anchorage Assembly requests the Hydroelectric Project Owners to seek a two-year extension of the 1991 Agreement from the signatories, of which the Municipality is one through the Anchorage Hydropower Utility, to perform additional analysis, consultation, and coordination with affected parties, including the Anchorage Assembly and the Native Village of Eklutna, and utilize a public process to ensure adequate opportunity for ratepayers, taxpayers and residents to weigh in. The issues at play are too significant to our community to rush to judgment or exclude key stakeholders. The residents of the Municipality deserve a measured and comprehensive approach guided by respectful coordination to reach a solution that enjoys broad consensus among the affected parties.

Section 5: The Municipality of Anchorage's intent and purpose is to authorize litigation to protect the Municipality's interests and established policy to the fullest extent allowed under law to ensure the concerns raised in this Resolution are addressed.

Section 6. This resolution shall be effective immediately upon passage and approval by the Assembly.

PASSED AND APPROVED by the Anchorage Assembly this 25th day of June, 2024.

Chair

Additional Meetings with Native Village of Eklutna (NVE) Tribal Council and Administration

Item No.	Stakeholders	Date	Meeting Type	Description
1	NVE, CEA, MEA, MOA	9/30/2020	In-person Meeting	Share the History of the Eklutna People and Surrounding Area
2	NVE, CEA, MEA, MOA	6/3/2023	Video Conference	Project Update
3	NVE, CEA, MEA, AWWU	9/14/2023	Site Visit	Study Flow Releases
4	NVE, CEA, MEA, MOA	10/19/2022	In-person Meeting	Share the History of the Eklutna People and Surrounding Area, Project Update, and Opportunities to Collaborate
5	NVE, CEA	6/29/2023	In-person Meeting	Meeting with Board of Directors
6	NVE, MEA	8/7/2023	In-person Meeting	Meeting and Site Visit with Board of Directors
7	NVE, CEA, MEA	4/17/2024	In-person Meeting	Meeting with both Boards to hear NVE's proposal: dam removal and pump station

Technical Working Group (TWG) Meetings

Item No.	Stakeholders	Date	Meeting Type	Description
1	Aquatics TWG	7/15/2020	Video Conference	Site Recon Prep, and Additional Data Collection Updates
2	Aquatics TWG	7/23/2020	Video Conference	Site Recon Debrief, Additional Data Collection Updates, and Kick-off Study Planning

3	Aquatics TWG	9/3/2020	Video Conference	Proposed Study Program Framework, Study Plan Outline, and Study Planning Schedule
4	Aquatics TWG	11/30/2020	Video Conference	Review and Discuss Draft Year 1 Study Plans
5	Aquatics TWG	12/21/2020	Video Conference	Review and Address Comments on Draft Instream Flow and Geomorphology Study Plans
6	Aquatics TWG	1/26/2021	Video Conference	Present Hydro Operations Model, and Review Revised Study Plans
7	Aquatics TWG	4/21/2021	Video Conference	Update on Proposed Final Study Plans, Permits / Authorizations, Consents / Waivers, Engineering for Study Flow Releases, and Other Stakeholder Engagement
8	Aquatics TWG	6/9/2021 – 6/10/2021	Site Visit	Establish Transect Locations for the Instream Flow and Geomorphology Studies
9	Aquatics TWG	8/23/2021	Video Conference	Update on Concurrence Letters, Permits and Authorizations, MOAs and Consents, Gate Replacement, and Other Field Work
10	Recreation TWG	11/8/2021	Video Conference	Review Results from Lakeside Trail Erosion Study, Recreation Study Goals, Methods, and Planning Schedule
11	Cultural TWG	11/8/2021	Video Conference	Discuss Confidentiality, Area of Potential Effect, Cultural Study Goals,

				Methods, and Planning Schedule
12	Terrestrial TWG	11/9/2021	Video Conference	Discuss Terrestrial Study Goals, Methods, and Planning Schedule
13	Aquatics TWG	11/9/2021	Video Conference	Discuss Results from Year 1 Aquatics Studies, and Proposed Year 2 Aquatics Studies
14	Terrestrial TWG	3/21/2022	Video Conference	Discuss Comments on Draft Terrestrial Study Plans, Review Field Work Schedule, and Permitting Needs
15	Recreation TWG	3/21/2022	Video Conference	Discuss Comments on Draft Recreation Study Plan, Review Field Work Schedule, and Permitting Needs
16	Cultural TWG	3/22/2022	Video Conference	Discuss Comments on Draft Cultural Study Plan, TEK Assessment Update, Review Permitting Needs
17	Aquatics TWG	3/24/2022	Video Conference	Discuss Comments on Draft Year 2 Study Plans (Water Resources and Engineering Studies), Review Field Work Schedule, and Permitting Needs
18	Aquatics TWG	3/25/2022	Video Conference	Discuss Comments on Draft Year 2 Study Plans (Geomorphology, Fish, and Instream Flow Studies), Review Field Work Schedule, and Permitting Needs
19	Cultural TWG	4/8/2022	Video Conference	Discuss Area of Potential Effect, Confidentiality Protocol,

				and TEK Assessment Update
20	Aquatics TWG	4/18/2022	Video Conference	Established Habitat Suitability Curves for the Instream Flow Study
21	Aquatics TWG	9/28/2022	In-person w/ Video Conference Option	Discuss Preliminary Instream Flow Modeling Results and Potential Engineering Solutions for Providing Year-Round Flows
22	Aquatics TWG	10/17/2022	In-person w/ Video Conference Option	Discuss Preliminary Geomorphology Modeling Results and Potential Engineering Solutions for Providing Peak Flows
23	Aquatics TWG	11/9/2022	In-person w/ Video Conference Option	Discuss Preliminary Lake Study Results and Potential Engineering Solutions for Providing Fish Passage
24	Aquatics TWG	2/13/2023	Video Conference	Review 2D Modeling
25	Aquatics TWG	3/28/2023	In-person w/ Video Conference Option	Review Draft Year 2 Study Reports, Present Winter Flow Analysis, Review Conceptual Designs and Cost Estimates
26	Terrestrial TWG	3/29/2023	In-person w/ Video Conference Option	Review Draft Terrestrial Study Reports
27	Recreation TWG	3/29/2023	In-person w/ Video Conference Option	Review Draft Recreation Study Report
28	Cultural TWG	3/30/2023	In-person w/ Video Conference Option	Review Draft Cultural Study Report

Meetings to Discuss Potential Funding Opportunities

Item No.	Stakeholders	Date	Meeting Type	Description
1	Hosted by USFWS, NVE, ADFG, CEA, MOA	3/1/2023	In-person w/ Video Conference Option	Discuss Perceived Gaps in the Current Analysis and Upcoming Funding Opportunities
2	Hosted by USFWS, NVE, ADFG, CEA, MOA, MEA, NMFS, TU	3/24/2023	Video Conference	Discuss Upcoming Funding Opportunities, Who May Qualify, Restrictions, Due Dates, Objectives, and Next Steps

Meetings to Discuss Additional Infrastructure Options

Item No.	Stakeholders	Date	Meeting Type	Description
1	USFWS, NVE	3/17/2023	Video Conference	Discuss Details for Additional Infrastructure Options: 1) Nature-like Fishway, and 2) Replacement Dam
2	USFWS, NVE	3/31/2023	Video Conference	Review the Modified Layouts for Additional Infrastructure Options
3	Eklutna, Inc.	4/17/2023	Video Conference	Discuss Details for Replacement Dam, Including Excavation Cost Assumptions
4	Eklutna, Inc.	8/11/2023	Video Conference	Discuss Replacement Dam Concept
5	Eklutna, Inc.	9/6/2023	Video Conference	Discuss Replacement Dam Construction and Excavation Projections

Alternatives Analysis Meetings

Item No.	Stakeholders	Date	Meeting Type	Description
1	CEA, MEA, MOA, AEA, ADFG, ADNR, State Parks, OHA, NMFS, USFWS, NVE, TU	4/6/2023	In-person w/ Video Conference Option	Present Potential Instream Flow Regimes, Introduce CE/ICA Model, Review Comprehensive Alternatives Request Form
2	CEA, MEA, MOA, AEA, ADFG, State Parks, USFWS, NVE, Eklutna Inc., TU, TCF	5/17/2023	In-person w/ Video Conference Option	Review Conceptual Design and Cost Estimate for the Replacement Dam, Review Comprehensive Alternatives and Modeling Results
3	CEA, MEA, MOA, AEA, ADFG, ADNR, State Parks, NMFS, NVE, Eklutna Inc., AWWU, TU, TCF	6/14/2023	In-person w/ Video Conference Option	Discuss Feasibility of Downstream Fish Passage, Lake/Tributary Habitat, Review the Revised Comprehensive Alternatives and Modeling Results
4	CEA, MEA, MOA, AEA, ADFG, ADNR, State Parks, OHA, NMFS, USFWS, NVE, Eklutna Inc., AWWU, TCF	7/12/2023	In-person w/ Video Conference Option	Review Preferred Alternatives and Modeling Results, Discuss Impacts to Wetlands, Wildlife, and Recreation
5	CEA, MEA, MOA, AEA, ADFG, ADNR, OHA, NMFS, USFWS, NVE, Eklutna Inc., AWWU, TU, TCF	8/9/2023	In-person w/ Video Conference Option	Discuss Cultural Resources, Feasibility of the Hybrid Flow Release Alternative, Potential Monitoring Studies and Adaptive Management

Attempt to Resolve Differences

Item No.	Stakeholders	Date	Meeting Type	Description
1	USFWS	12/12/2023	In-person	Review comments on the Draft Program
2	ADNR	12/12/2023	In-person	Review comments on the Draft Program
3	ADFG	12/13/2023	In-person	Review comments on the Draft Program
4	NVE	12/13/2023	In-person	Review comments on the Draft Program
5	NMFS	12/13/2023	In-person	Review comments on the Draft Program
6	NMFS, USFWS, ADFG, ADNR, ADEC	1/12/2024	Virtual	Present the proposed revisions to the Draft Program
7	NMFS, USFWS, ADFG, ADNR, ADEC, AEA	2/29/2024	Virtual	Discuss specific proposed revisions in more detail
8	NMFS, USFWS, ADFG, ADNR, ADEC, AEA	3/15/2024	Virtual	Overview of the draft Proposed Final Program
9	NVE	3/19/2024	In-person	Present the proposed revisions to the Draft Program
10	NMFS, USFWS, ADFG, ADNR, ADEC, AEA	3/26/2024	In-person	Page turn the draft Proposed Final Program
11	NMFS, USFWS, ADNR, AEA	3/27/2024	Virtual	Discuss the Implementation Agreement
12	NMFS, USFWS, ADFG, ADNR, ADEC, AEA	4/8/2024	In-person	Page turn the revised Proposed Final Program

1.0 Introduction

The Eklutna Hydroelectric Project (Project) is located in Southcentral Alaska, approximately 30 miles northeast of downtown Anchorage near the Native Village of Eklutna (NVE). The federal government completed construction of the Project in 1955. Decades later, Chugach Electric Association (CEA), Matanuska Electric Association (MEA), and the Municipality of Anchorage (MOA) (collectively the "Project Owners") agreed to purchase the Project and entered into a Purchase Agreement with the federal government in 1989. Shortly thereafter, concerns were raised about the Project's potential impacts on fish and wildlife. This led to the execution of a binding agreement in 1991 (referred to as the "1991 Agreement") amongst the Project Owners, National Marine Fisheries Service (NMFS), U.S. Fish and Wildlife Service (USFWS), and the State of Alaska (collectively the "Parties") that requires the Project Owners to (1) study the Project's impacts to fish and wildlife, (2) develop proposals for the protection, mitigation, and enhancement of fish and wildlife affected by the development of the Project, (3) consider the impact of fish and wildlife measures on electric rate payers, municipal water utilities, recreational users and adjacent land use, and (4) identify available means to mitigate these impacts. The Project Owners must repeat this process every 35 years and it replaces regulation by the Federal Energy Regulatory Commission (FERC). The sale of the Project was authorized by U.S. Congress in 1995, and the Project was sold to the Project Owners in October 1997.

Beginning in 2020, the Project Owners consulted with the TWGs regarding the development of a comprehensive, 2-year study program implemented in 2021 and 2022. This document presents an overview of early study efforts, study planning and implementation, and a summary of the study results. When available, the Project Owners incorporated the results of other studies conducted in the Eklutna watershed by other entities.

1.1.1 Early Study Efforts

In May 2020 the Project Owners acquired LiDAR, aerial imagery, and spherical video of the entire Eklutna River as well as the northeastern shoreline of Eklutna Lake along the lakeside trail. The spherical video is available at https://archive.biglook360.com/eklutna/.

In July 2020, the Project Owners conducted a site reconnaissance with ADFG staff to support study planning efforts. The Aquatics TWG met on July 23, 2020, to review the observations made during the site reconnaissance and to kick-off the study planning process. This meeting included initial discussions regarding the planned Instream Flow Study (see Section 1.1.2), potential study methods, and associated challenges with providing study flow releases.

In August 2020, the Project Owners conducted an initial condition assessment of the drainage outlet gate at the base of the spillway to determine if it could be used to provide study flow releases into the Eklutna River for the planned Instream Flow Study. In the same month, the Project Owners also established several monitoring transects and installed scour monitors in the Eklutna River in advance of any potential unplanned spill events to allow for subsequent data collection that could benefit the study program. There were no spill events in 2020; however, the established transects and scour monitors were later utilized during the Geomorphology and Sediment Transport Study (see Section 1.1.2) to assess erosion and sediment transport through the Eklutna River downstream from Eklutna Lake and to help calibrate the sediment transport model.

The final Eklutna River LiDAR and aerial imagery report, spillway and drainage outlet inspection report, geomorphology monitoring plan and transect locations are all available here on the Project website.

1.1.2 Year 1 Study Planning

Based on this early work, the Project Owners developed a Proposed Study Program Framework and presented it to Aquatics TWG on September 3, 2020. This meeting included discussion regarding how study efforts would occur over a two-year period, the goals and objectives, general study area, proposed methods for each study, the study plan outline, and the study planning schedule.

Draft Study Plans were distributed to the Aquatics TWG on October 26, 2020, for review and comment. The deadline for written comments was November 25, 2020. The Project Owners received comments from NVE, ADFG, USFWS, NMFS, TU, APU staff, and a member of the WNRC. Two meetings were held with the Aquatics TWG on November 30, 2020, and December 21, 2020, to review and address the Aquatics TWG's comments on the Draft Study Plans.

The Project Owners revised the Draft Study Plans based on the comments received, and the Revised Draft Study Plans were distributed to the Aquatics TWG on January 18, 2021, for review and comment. The deadline for written comments on the Revised Draft Study Plans was January 29, 2021.

Since several of the Aquatics TWG's comments on the Draft Study Plans were questions related to the operational capabilities of the Project, the Project Owners decided to start developing the proposed hydro operations model early and presented the preliminary modeling results to the Aquatics TWG at a meeting on January 26, 2021, to help inform the Aquatics TWG's comments on the Revised Draft Study Plans. The Project Owners also

addressed additional clarifying questions from the Aquatics TWG at the January 2021 meeting in advance of the comment deadline.

The Project Owners received comments from ADFG, NMFS, TU, and APU staff and revised the study plans again based on comments received. As required by the 1991 Agreement, the Proposed Final Study Plans were distributed to the Parties on February 24, 2021, for review and concurrence on the scope of work.

A meeting amongst the State agencies involved in the Project was held on February 25, 2021, to determine how the State of Alaska, as a party to the 1991 Agreement, would concur on the scope of work in the study plans. The State agencies determined that it would be most appropriate for the Commissioners of each State agency (ADFG, ADEC, ADNR, and ADOT&PF) to sign a letter stating that they concur on the scope of work in the study plans, and then the Project Owners would send those concurrence letters to AEA, the Governor's representative, with the Proposed Final Study Plans for review and feedback.

The Project Owners received concurrence letters from all of the state and federal agencies, including the NMFS, USFWS, ADFG, ADEC, ADNR, and ADOT&PF. The State agency concurrence letters and the Proposed Final Study Plans were sent to AEA as the Governor's representative for review and feedback. The Project Owners did not receive any additional feedback from AEA. Each version of the Year 1 Study Plans, all comments received, and each of the concurrence letters are available here on the Project website.

Studies initiated in 2021 included the following:

- **Instream Flow Study** – informed how much habitat would be created by a range of potential flows for various species (Chinook, coho, sockeye) and life stages (spawning and rearing).
- **Geomorphology and Sediment Transport Study** – informed what peak flows might be needed in conjunction with year-round instream flows.
- **Fish Species Composition and Distribution Study** – identified what fish species were present in the Eklutna River, what habitat they were utilizing, and when.
- **Water Quality Study** – monitored various water quality parameters (temperature, dissolved oxygen, pH, turbidity, nutrients, etc.) in both the Eklutna River and Eklutna Lake.
- **Macroinvertebrate Study** – assessed the baseline community of aquatic organisms at three locations in the Eklutna River.

- **Stream Gaging** – collected continuous flow data at various points in the Eklutna River and select tributaries to Eklutna Lake.
- **Lake Aquatic Habitat and Fish Utilization Study** – examined the presence and health of fish in Eklutna Lake, as well as the availability of potential spawning habitat around the lake shoreline and in its tributaries.
- **Lakeside Trail Erosion Study** – identified areas along the Eklutna Lakeside Trail that were experiencing shoreline erosion and the potential causes.
- **Hydro Operations Model Development** – allows the assessment of different potential operational scenarios for the hydroelectric project.
- **Existing Infrastructure Assessment** – evaluated the condition and hydraulic capacity of downstream infrastructure, including the AWWU infrastructure, railroad bridge, and highway bridges.

One of the major components of the year 1 study program was the need to conduct study flow releases for both the Instream Flow Study and the Geomorphology and Sediment Transport Study. With the current infrastructure, the drainage outlet gate at the base of spillway in the dam is the only mechanism for providing controlled flow releases from the lake into the river. However, this gate had not been used regularly, and upon inspection, it was determined that the gate needed to be replaced. The Project Owners were able to design, procure, permit, and install the new drainage outlet gate during the summer of 2021 before the planned study flow releases in the fall of 2021, which ranged from 150 cfs to 25 cfs over 3 weeks.

It should be noted that in 2018, a different dam (non-operational since 1955) was removed from the lower stretch of the Eklutna River by Eklutna, Inc. After the removal of this lower dam, a significant portion of the sediment wedge that had accumulated behind the lower dam for decades was left in the river. During year 1 study planning, some TWG members requested a flushing flow as part of the study program to flush the remaining sediment from behind the lower dam site. It was determined that this flushing flow was not necessary for study purposes. However, the Project Owners did commit to evaluating the need for conducting a higher calibration flow as part of the second study year.

In June 2021, before the study flow releases, the Project Owners organized a site visit with the Aquatics TWG (Figure 1-1) to identify and establish transect locations. A total of 30 transects were established throughout the river for the Instream Flow Study in relatively stable areas of the river that were not likely to change significantly as a result of the study flow releases. Additional transects were established throughout the river for the Geomorphology and

Sediment Transport Study in relatively dynamic areas of the river that were more likely to change significantly as a result of the study flow releases.

Figure 1-1. Site Visit with the Aquatics TWG in June 2021.

In preparation for study flow releases, the Project Owners requested consent and waiver of liability from the principal landowners downstream of the dam for any damage that may result from the potential movement of Eklutna Inc.'s sediment wedge during the planned study flow releases. The principal downstream landowners include Eklutna, Inc., ADOT&PF, ARRC, and the MOA/AWWU. Among them, only the MOA/AWWU consented and waived such potential liability.

1.1.3 Year 1 Study Reporting

The Project Owners held a series of TWG meetings in November 2021 to discuss the preliminary results of the year 1 studies. Draft year 1 study reports were distributed to the TWGs and other interested parties (including AWWU) in February 2022 for review and comment. The Project Owners received comments on the draft study reports from ADFG, NMFS, and AWWU. The study reports were then revised and finalized based on comments received. The year 1 study reports and all comments received are available here on the Project website.

1.1.4 Year 2 Study Planning

Based on observations made after the study flow releases and the preliminary results from the first year of studies, the Project Owners revised the Study Program Framework for year 2 and presented it to the TWGs during the November 2021 TWG meetings. As stated above, these meetings included discussions regarding preliminary results from year 1 (if applicable), what studies were being proposed for year 2 (Table 1-1), and the goals, general study area, and proposed methods for each study.

Table 1-1. Year 2 Study Program.

Studies Continued from Year 1 (2021)	Studies Initiated in Year 2 (2022)
Instream Flow Study	Engineering Feasibility and Cost Assessment
Geomorphology and Sediment Transport Study	Hydropower Valuation Study
Fish Species Composition and Distribution Study	Wetland and Wildlife Habitat Study
Lake Aquatic Habitat and Fish Utilization Study	Terrestrial Wildlife Study
Water Quality Study	Recreation Study
Stream Gaging	Cultural Resources Study
	LiDAR and Ortho Imagery Acquisition

Following their commitment in 2021, the Project Owners evaluated the need for a higher calibration flow in 2022. However, based on the data collected in 2021, it was determined that reasonably reliable models could be developed using the collected data, and that a higher calibration flow in 2022 was not necessary for study purposes.

The Draft Year 2 Study Plans were distributed to the Parties and TWGs on February 11, 2022, for review and comment. The deadline for written comments on the Draft Year 2 Study Plans was March 11, 2022. The Project Owners received comments from NVE, USFWS, NMFS, ADFG, ADEC, OHA, TU, and TCF.

A series of TWG meetings were held in March 2022 to address substantive comments on the Draft Year 2 Study Plans that required further discussion. The Project Owners then revised the study plans based on comments received and distributed the Proposed Final Year 2 Study Plans to the Parties on April 1, 2022, for review and concurrence.

The Project Owners received concurrence letters from each of the state agencies. The NMFS and USFWS also provided concurrence letters but only concurred with 10 of the 12 study plans. The federal agencies did not concur with the Geomorphology and Sediment Transport Study Plan or the Instream Flow Study Plan due to their uncertainty about the Project Owners

ability to model higher flows without a significantly higher calibration flow.[1] The Project Owners documented this area of non-agreement and distributed the Proposed Final Year 2 Study Plans and State concurrence letters to AEA as the Governor's representative for review and feedback. The Project Owners did not receive any additional feedback from AEA. Each version of the Year 2 Study Plans, all comments received, and each of the concurrence letters are available here on the Project website.

It should be noted that although it was not included in the Year 2 Study Plans, the Project Owners also conducted a winter flow analysis to determine the range of flows that would be needed to promote favorable ice conditions. These study results were presented to the Aquatics TWG in March 2023.

1.1.5 Year 2 Interim Reporting

The Project Owners held a series of meetings with the Aquatics TWG in September, October, and November 2022 to present the preliminary year 2 study results and potential engineering solutions (PME measures) for providing year-round instream flows, periodic peak flows, and fish passage both into and out of the lake. During those meetings, the Aquatics TWG determined which potential engineering solutions should be advanced to phase 1 engineering, which involved the development of 5% conceptual designs and Class 5 Opinion of Probable Construction Costs (OPCC) for each PME measure. The preliminary study results, potential PME measures, and all comments received are available here on the Project website.

The proposed PME measures and those that were advanced to phase 1 engineering are shown below in Table 1-2.

Table 1-2. Proposed PME Measures.

Proposed PME Measures	Phase 1 Engineering
Year-round flow releases from the existing dam (RM 12)	Yes
Year-round flow releases from the existing dam (RM 12) and excavate the lake outlet	Yes
Year-round flow releases from a new siphon (RM 12)	Yes
Year-round flow releases from a new bypass tunnel (RM 11.5)	Yes
Year-round flow releases from the existing AWWU portal valve (RM 11)	Yes
Year-round flow releases from the existing AWWU pipeline (RM 5.5)	Yes
Reroute Lach Q'atnu Creek back into the Eklutna River	Yes

[1] The Project Owners acknowledge the uncertainty associated with any modeling effort. And after reviewing the modeling results, both federal agencies have confirmed the validity of both models.

Proposed PME Measures	Phase 1 Engineering
Groundwater pumping downstream of the existing dam	No
Channel maintenance flows with existing overflow spillway	Yes
Channel maintenance flows with a new radial gate	Yes
Channel maintenance flows with a new fixed wheel gate	Yes
Upstream fish passage with a fish ladder (gravity flow)	Yes
Upstream fish passage with a fish ladder (variable exits)	Yes
Upstream fish passage with a fish ladder (pump station and slide)	Yes
Upstream fish passage with trap and haul	Yes
Downstream fish passage with a spill event	Yes
Downstream fish passage with a floating surface collector	Yes
Downstream fish passage with a rotary screw and guide nets	No
Downstream fish passage through the existing intake	No
Trapping facility with hatchery spawning, rearing, and release	No
Physical habitat enhancement	Yes
New AWWU bridges	Yes
Lakeside trail improvements	Yes

The Project Owners held another Aquatics TWG meeting in February 2023 to present the preliminary 2D modeling results for the river. It was during this meeting that USFWS proposed a nature-like fishway that would go around the existing dam and NVE proposed dam replacement as potential PME measures. The Project Owners held two meetings with USFWS and NVE in March 2023 to discuss both options further. The Project Owners also had several subsequent meetings with Eklutna, Inc. to discuss details of the potential replacement dam. Ultimately, the stand-alone nature-like fishway was not advanced, but the potential replacement dam was advanced through phase 1 engineering as quickly as possible.

1.1.6 Year 2 Study Reporting

Draft year 2 study reports and phase 1 engineering deliverables were distributed to the TWGs and other interested parties in March 2023 for review and comment. The Project Owners also held a series of TWG meetings in March 2023 to review and discuss the study results. The Project Owners received comments on the draft study reports from ADFG, ADNR, and USFWS. The study reports were then revised and finalized based on comments received. The year 2 study reports and all comments received are available here on the Project website.

2.0 Summary of Study Results

This section provides a summary of each study conducted during the 2-year study program. The full study reports are available here on the Project website.

2.1 Instream Flow Study

The goal of the Instream Flow Study was to provide quantitative indices of current and future reach-specific habitat-flow relationships and to use those relationships as a tool to estimate potential fish habitat under various operational flow-release scenarios. Specific objectives included:

1. Mapping current aquatic habitat in the main channel, and where present, side-channels of the Eklutna River affected by Project operations. *Developed by NVE.*

2. Collecting data and information that can be used to characterize, quantify, and model Eklutna River fish habitat.

3. Developing a one-dimensional (1D) HEC-RAS model in coordination with the Geomorphology and Sediment Transport Study (see Section 2.2) for the length of the river that can be used to:

    a. Estimate water surface elevations and average water velocity along modeled transects under alternative operational scenarios; and

    b. Estimate sediment routing and transport capacities under varying flow conditions.

4. Developing Habitat Suitability Criteria (HSC) for target/selected species and life stages of fish for biologically relevant time periods selected in consultation with the Aquatics TWG.

5. In Year 1, developing fish habitat-flow relationships using one-dimensional (1D) Physical Habitat Simulation (PHABSIM) models in Year 1 to produce a time series of data for a variety of biological metrics under existing and potential future conditions resulting from alternative operational scenarios. In Year 2, developing two-dimensional (2D) HEC-RAS and habitat models for four reaches with complex off-channel and side channel juvenile rearing habitats.

6. Evaluating existing conditions and potential future conditions based on alternative operational scenarios using a hydrologic database that includes wet, average, and dry years.

2.1.1 Fish Habitat Modeling

The study area included a 10-mile section of the Eklutna River extending downstream from the existing Eklutna Dam to below the railroad bridge near tidal influence. A meso-habitat map developed by NVE was used to define the fish habitat reaches and select potential study sites for the 1D PHABSIM modeling effort. In June 2021, the Project Owners organized a site visit with the Aquatics TWG to identify and establish transect locations at each study site. A total of 30 transects were established throughout the river in relatively stable areas of the river that were not likely to change significantly as a result of the study flow releases.

Field data (water depth, velocity, and substrate) were collected during the 2021 study flow releases as described below.

- Monday, September 13 – Initiated flow releases at **150 cfs** (allowed the channel to stabilize for one week before collecting any field data)
- Monday, September 20 – Initiated field surveys for high-flow release
- Thursday, September 23 – Completed high-flow field surveys
- Friday, September 24 – Down-ramped to **75 cfs**
- Saturday, September 25 – Initiated field surveys for mid-flow release
- Tuesday, September 28 – Completed mid-flow field surveys
- Wednesday, September 29 – Down-ramped to **25 cfs**
- Thursday, September 30 – Initiated field surveys for low-flow release
- Saturday, October 2 – Completed low-flow field surveys
- Wednesday, October 6 – Down-ramped to 0 cfs

Due to feasibility and safety concerns, four sections of the river were unable to be studied as part of the 1D modeling effort. However, the Project Owners were still able to study these sections of the river by using LiDAR data to develop 2D models for those specific sections.

Habitat Suitability Criteria (HSC) curves were developed for three target species (Chinook, coho, and sockeye) and two target life stages (spawning and rearing[2]) in coordination with the Aquatics TWG. The HSC curves were used with both the 1D and 2D models to produce habitat-flow relationship curves for each species and life stage at each 1D transect and 2D reach. Example habitat-flow relationship curves are shown below in Figure 2-1. These curves were derived from 1D PHABSIM modeling and show the relationships of habitat area to flow (left figure) and the same data normalized as a percentage of habitat maximum to flow (right figure).

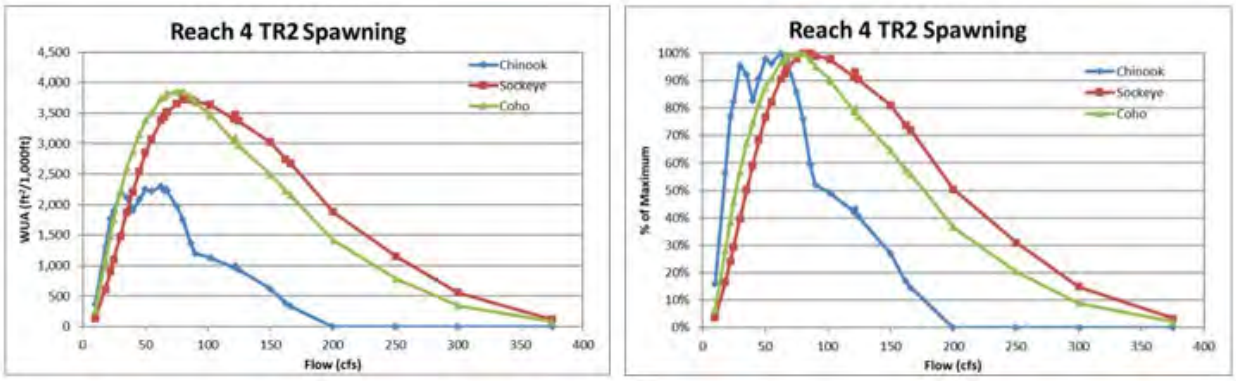

Figure 2-1. Example habitat-flow relationships for Chinook (blue), coho (green), and sockeye (red) spawning habitat at Transect 2 in Reach 4.

The habitat-flow relationship curves determined the maximum available habitat for each species at each life stage. The periodicity data collected during the Eklutna River Fish Species Composition and Distribution Study (see Section 2.3) was used to prioritize different species and life stages at different times of year. The habitat-flow relationship curves and periodicity data were then used together to develop potential flow release scenarios.

Four example flow levels were developed for demonstration purposes only. The example flow levels correspond to flows that would provide 90%, 70%, 50% and 30% of the maximum available habitat considering all three species and both life stages. Spawning habitat was prioritized for July-October, and rearing habitat was prioritized for November-June. The species that required the highest flow to achieve a given percent of maximum available habitat served as the determinant for that flow level. The example flow levels were then applied to three potential flow release locations, 1) the existing Eklutna Dam at RM 12, 2) the AWWU portal valve at RM 11, and 3) the AWWU pipeline at RM 5.5. The habitat-flow relationships were then used to determine how much habitat (in acres) would be created for each of the example

[2] No HSC curve was developed for sockeye rearing habitat because sockeye generally rear in lakes, not rivers.

flow levels at each potential flow release location for each species at each life stage (except for sockeye rearing habitat) and compared to existing conditions as shown in Table 2-1.

Table 2-1. Example time series analysis.

Potential Flow Release Locations	Example Flow Levels (% of Max Available Habitat)	Time-Averaged Habitat Expressed as Weighted Usable Area (acres)				
		Chinook		Coho		Sockeye
		Spawning	Rearing	Spawning	Rearing	Spawning
RM 12 (Existing Dam)	90%	1.5	30.6	3.1	41.3	2.5
	70%	1.4	22.6	3.1	30.4	2.7
	50%	1.2	17.6	2.8	22.8	2.4
	30%	1.0	16.2	2.6	20.8	2.2
RM 11 (AWWU Poral Valve)	90%	1.2	28.1	2.4	37.5	2.1
	70%	1.1	20.4	2.5	27.2	2.3
	50%	1.0	16.3	2.4	21.0	2.1
	30%	0.9	15.2	2.2	19.4	1.9
RM 5.5 (AWWU Pipeline)	90%	0.5	22.9	1.4	29.0	1.3
	70%	0.6	16.0	1.6	20.6	1.5
	50%	0.6	13.3	1.6	16.9	1.5
	30%	0.6	12.9	1.5	16.3	1.5
Existing Conditions		0.5	11.9	1.2	14.8	1.0

2.1.2 Channel Connectivity Analysis

The 2D models were used to assess the connectivity of side-channel and off-channel habitats under various flow conditions. An example of the channel connectivity analysis is provided in Figure 2 2 for Reach 3 under four flow conditions (375, 250, 150, and 50 cfs). The figure illustrates how increased flows create increased channel connectivity with side and flood-plain channels.

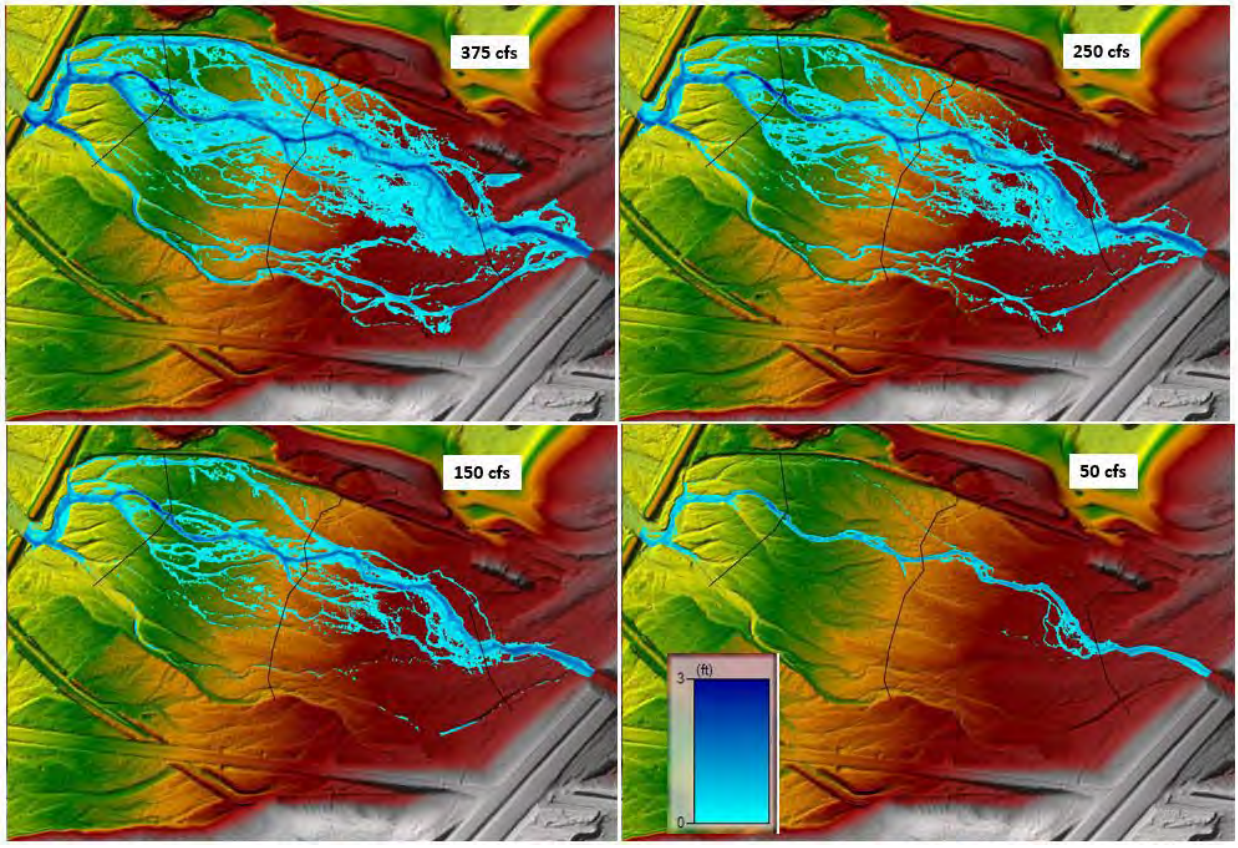

Figure 2-2. Example channel connectivity analysis for the Eklutna River between the railroad bridge and the New Glenn Highway bridges.

2.1.3 Passage Barrier Analysis

During field surveys, five potential passage barriers were identified within the canyon reach of the Eklutna River (Figure 2-3). Physical and hydraulic data were collected at each site in July 2022, and then a 1D hydraulic model was developed for each site. Depth and velocity criteria for Chinook, coho, and sockeye were applied to the hydraulic model outputs to define the minimum flows required for adult fish passage.

Figure 2-3. Potential passage barrier locations.

The analysis indicated that water depth (not velocity) is the major barrier issue at all five sites. The corresponding minimum flows to meet the fish passage requirements were determined at each site. Site B has the highest minimum flow requirement of 50 cfs. However, Site B is located within the sediment wedge (the remaining accumulated sediment behind the lower dam site) and is therefore very dynamic and likely to change. Sites A, D, and E have the next highest minimum flow requirement of 40 cfs.

2.2 Geomorphology and Sediment Transport Study

The goal of the Geomorphology and Sediment Transport Study was to gain an understanding of how sediment supply, transport, and deposition within the Eklutna River downstream of Eklutna Dam are influenced by current Project operations and potential flow regimes. The study methods included five components:

1. A review of existing information on river substrate, sediment transport, and flow conditions;

2. A field data collection program that included 19 monitoring transects along the river from the Eklutna Dam to the railroad bridge to measure substrate characteristics and scour/deposition that occurred as a result of the study flow releases;

3. An estimate of sediment input rates to evaluate future sediment sources downstream from Eklutna Dam;

4. Mapping of channel position changes through time from historic aerial photographs (1949 to 2020) to assess channel migration; and

5. Development of a 1D HEC-RAS sediment transport model in coordination with the Instream Flow Study (see Section 2.1) to calculate sediment transport rates in the Eklutna River under potential future flow regimes and assess the magnitude and effectiveness of different high flow regimes to flush accumulated fine-grained sediment from the river without moving the limited supply of spawning-sized gravel/cobble material out of the channel. The model was calibrated using the field data collected before and after the test flow releases.

2.2.1 Sediment Transport Modeling

Ten geomorphic reaches were delineated in the river based on key characteristics such as flow/tributary input, confinement, and sediment sources to help understand geomorphic processes in different parts of the river. Geomorphic reaches are summarized in Table 2-2.

Table 2-2. Geomorphic reaches.

Geomorphic Reach	River Mile Range	Confinement	Average Gradient	Comments
1	0-1.6	Unconfined	0.6%	Tidal influence within this reach.
2	1.6-2.3	Unconfined	1.2%	Railroad bridge confines flow at downstream end of this reach. Includes flooded forest; past gravel removal in this reach. Existing good spawning area near New Glenn Highway Bridge.
3	2.3-2.85	Confined	1.1%	Downstream from Thunderbird Creek.
4	2.85-3.95	Confined	1.7%	Between Thunderbird Creek and old lower dam site. Has aggraded since removal of old RM 4 dam in 2018.
5	3.95-4.45	Confined	2.0%	Old lower reservoir deposits, also known as the sediment wedge. Fine-grained silt and clay.
6	4.45-5.05	Confined	1.5%	Canyon upstream from the sediment wedge. Gravel accumulations.

Geomorphic Reach	River Mile Range	Confinement	Average Gradient	Comments
7	5.05-5.4	Moderately confined	1.8%	Wider bedrock canyon downstream from lower AWWU access road.
8	5.4-7	Unconfined	1.7%	Wide valley; contains major sediment sources. Fine-grained sediment in streambed prior to 2021 study flow release.
9	7-11.38	Unconfined	1.3%	Wide valley; upstream of major sediment sources (includes smaller sediment sources). Fine-grained sediment in streambed prior to 2021 study flow release.
10	11.38-12.3	Moderately confined by erodible valley walls	0.8%	Upstream of sediment sources; upstream of upper AWWU bridge. Gravel/cobble streambed.

In June 2021, the Project Owners organized a site visit with the Aquatics TWG to identify and establish transect locations. A total of 19 monitoring transects were established throughout the river for the Geomorphology and Sediment Transport Study. Field data was collected before and after the 2021 study flow releases (see Section 2.1.1) in order to measure changes to the river system at the monitoring transects, including changes in substrate characteristics, channel dimension, and sediment transport. Documented changes include:

- Scour of accumulated fine-grained sediment and encroaching alluvial fan deposits to re-establish a stream channel (Figure 2-4);
- Changes in substrate from material too fine for anadromous fish spawning or rearing to substrate sizes suitable for anadromous fish use;
- Transport of up to 30,000 cubic yards of fine-grained material from behind the old lower dam site (RM 4) with up to 30 feet of downcutting;
- Erosion and deposition of up to 4 feet of sediment at other monitoring transects indicating bedload sediment was mobilized; and
- Transport of substrate particles up to 128 mm in diameter.

Figure 2-4. Geomorphic Monitoring Transect B before (top) and after (bottom) study flow release showing erosion of toe of alluvial fan deposits, re-establishment of river channel, and removal of accumulated fine sediment.

A sediment transport model was developed for the Eklutna River from the existing Eklutna Dam to downstream of the railroad bridge. The chosen sediment transport function (Meyer-Peter Muller) has been widely-used to compute sediment transport in gravel-bed rivers for decades and used to extrapolate to higher flow conditions. The model incorporated measured channel dimensions, substrate size, and sediment inputs. The monitoring data from before and after the 2021 study flow release was used to help calibrate the sediment transport model. This was done by first running the model to predict changes at the monitoring transects, and then comparing the modeled changes to the actual changes observed.

- Upstream of the accumulated sediment behind the old lower dam site (also known as the sediment wedge), the modeled and measured channel changes were closely comparable.
- Within the sediment wedge, the model predicted up to 20 feet of channel erosion through the sediments.
- Just downstream of the old lower dam site, the model results were not as closely aligned with measured erosion/deposition depths, but the model did correctly predict erosion and deposition trends. Some of the model difficulty in these downstream areas was likely due to field evidence that suggests at least one wave of eroded reservoir deposits moved downstream as a debris torrent (likely following some of the larger mass wasting events observed on the time lapse cameras) rather than as river-borne sediment transport. The sediment transport model assesses movement by flowing water and does not model debris torrent transport with highly viscous flow. Sediment transport scenarios under potential future flow regimes will not be subject to debris torrents and should provide more reliable results.

The calibrated sediment transport model can be used to assess how potential future flow regimes would impact river substrate over a long-term period and to determine the appropriate peak flows (magnitude, duration, and frequency) that should accompany a selected base flow regime.

2.2.2 Channel Migration

Channel migration downstream from the canyon reach (Geomorphic Reaches 1 and 2) was evaluated using historical aerial photographs from 1949 through 2020 (Figure 2-5).

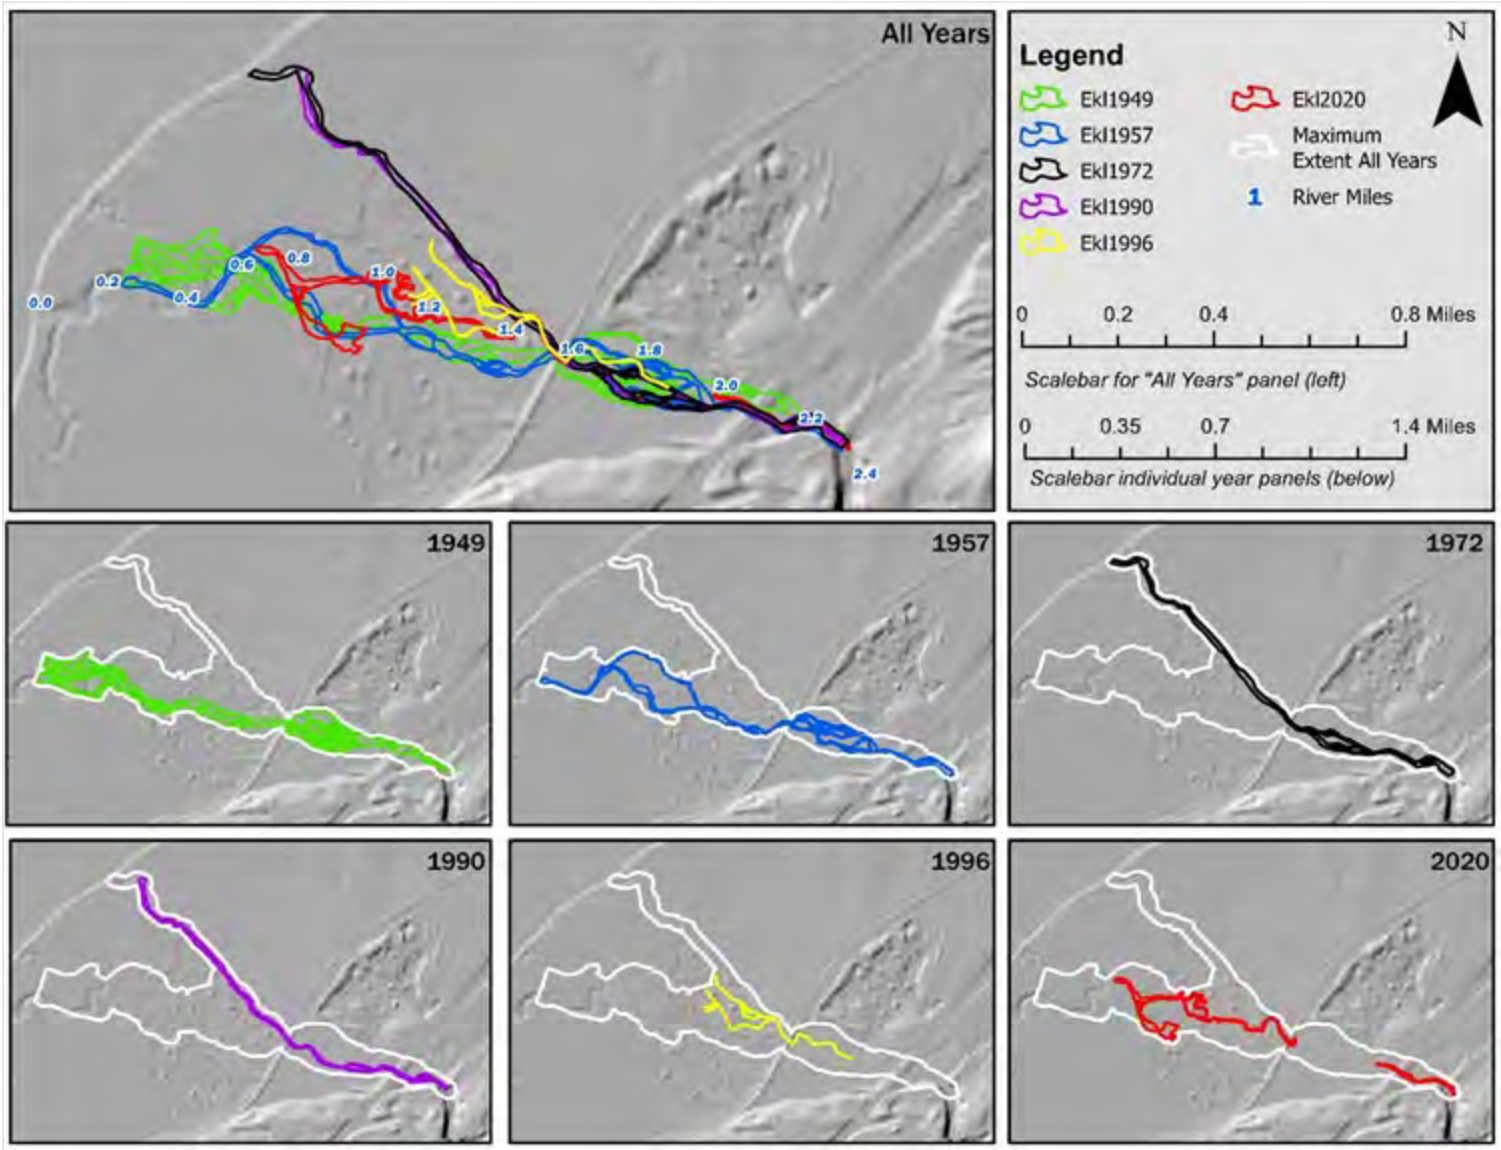

Figure 2-5. Eklutna River Channel Migration Downstream of the Canyon Reach.

In the 1949 photos, prior to construction of the existing hydroelectric project in 1955, the channel carried fine sediment and had a wide, braided character with little vegetation on mid-channel bars downstream from RM 2. These characteristics were also evident in the 1957 photos.

In the 1972 photos, after construction of the existing dam in 1965, the river was less braided between RM 1.6 (the railroad bridge) and RM 2 and was channelized downstream from RM 1.6 into a location north of the former riverbed to allow for gravel mining south of and in the former riverbed between RM 1.2-1.5. Channelization continued through the 1980s.

In the 1990 photos, the river was just starting to break through into the gravel pit (former riverbed) area and flood the former pits, but it appeared the main outlet continued through the channelized area.

In the 1996 photos, the main channel was flowing into the gravel pits and out to Knik Arm through the pits. Since 1996, the river has continued to flow into the old gravel pit ponds and has abandoned the channelized flow area. The gravel bars in the former braided section in Geomorphic Reach 2 (between RM 1.6-2) have become vegetated; the channel in this area was not visible on the aerial photograph after about 1996. Little migration was observed upstream from RM 1.5 after 1996, but some migration still occurs in the tidally-influenced reach downstream from RM 1.5 due to sediment deposition in this low-gradient area.

It is hypothesized that channel migration in the reaches of the Eklutna River that were assessed for this study is triggered by high sediment loading in association with high flows rather than just being a response to high flows.

2.3 Eklutna River Fish Study

The goal of the Eklutna River Fish Study was to characterize the current fish species composition, abundance, distribution, habitat use, and run timing in the Eklutna River. Specific objectives included:

1. Describe the seasonal composition, distribution, and habitat use for juvenile salmonids and resident fishes in the Eklutna River; and

2. Describe the periodicity, abundance, and distribution of adult salmonid spawners in accessible reaches of the Eklutna River and Thunderbird Creek.

2.3.1 Juvenile Salmon and Resident Fish

The area studied included all portions of the wetted mainstem and off-channel habitats (including beaver ponds) that were accessible to fish, beginning at the upper extent of tidewater influence and terminating at the Eklutna Dam. Fish were surveyed using minnow traps, electrofishing, and visual observations, and various habitat and water quality characteristics were measured and quantified. The composition and relative abundance of juvenile salmon and resident fish species was found to vary longitudinally.

- In the lowermost study reach (Reach 1) and the beaver pond complex (just above tidewater), all five species of anadromous Pacific salmon were documented, as well as Dolly Varden, stickleback, Alaska blackfish, and Eulachon. In 2021, juvenile coho and stickleback accounted for over 75% of the total fish sampled in Reach 1. In 2022, juvenile Chinook and coho salmon accounted for 80% of the total fish sampled in the beaver ponds.

- Between the beaver pond complex and the confluence with Thunderbird Creek, three species of anadromous Pacific salmon (Chinook, coho, and chum) were documented, as well as Dolly Varden and sculpins. The relative abundance of Chinook and coho decreased from more than 50% near the beaver pond complex to less than 25% at the Thunderbird Creek confluence while the relative abundance of Dolly Varden increased proportionally.

- Above the confluence with Thunderbird Creek, only resident fishes were documented, including Dolly Varden and sculpin.

Juvenile Chinook and coho displayed extended riverine rearing periods and were documented in the Eklutna River throughout the May-October sampling period. When given an option, juvenile Chinook and coho in the Eklutna River appear to exhibit a preference for low velocity (<1.0 ft/sec), shallow water depth (<3.0 ft) areas. This preference for shallow water habitat was evident during summer sampling when river temperatures ranged from 7.2-11.4°C. During fall sampling when water temperatures were much colder (1.7-4.9°C), the Catch per Unit Effort for juvenile Chinook and coho was highest in pools, along undercut banks, and within structures like beaver dams. The presence of these habitat types during winter months may play an important role in the seasonal distribution of target species.

Representative photographs of juvenile anadromous Pacific salmon and select resident fishes are presented in Figure 2-6.

Figure 2-6. Representative photographs of juvenile salmon and resident fish in the Eklutna River, 2021-2022.

2.3.2 Adult Salmon

The distribution of spawning adult salmon was surveyed visually during pedestrian surveys from the upper extent of tidewater to the downstream extent of the AWWU access road. Observed spawning activities included the presence of adult salmon, active digging or guarding of redds, constructed or partially constructed redds, and presence of post-spawned carcasses. The distribution of completed redds, which is also an indication of the upper extent of Eklutna River use by spawning anadromous salmonids in 2022, is presented in Figure 2-7.

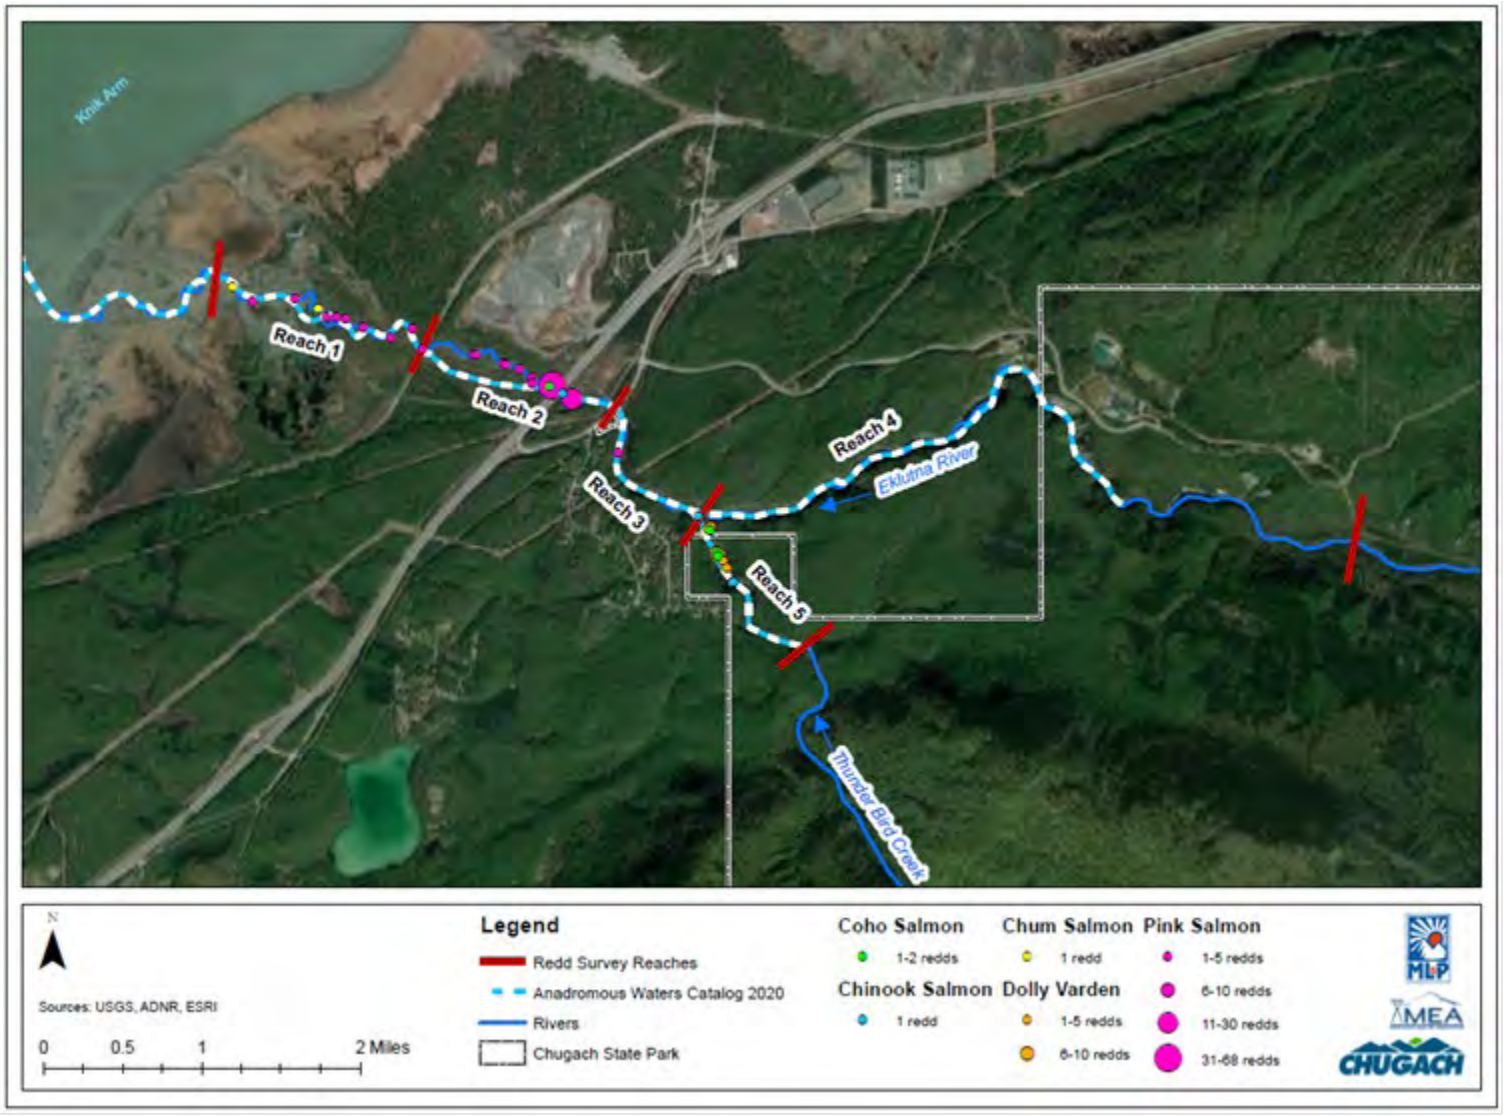

Figure 2-7. Distribution of observed redds by species in Spawning Survey Reaches 1-5 in 2022. Relative size of markers indicates relative abundance of redds at that GPS location.

Spawning activity for all species was limited to the area from tidewater to immediately above the Thunderbird Creek confluence. This limitation is likely due to current low flow conditions that prevent access to potential spawning areas upstream.

The Project Owners' spawning survey data was combined with NVE's spawning survey data to determine the periodicity of target salmon species (Chinook, coho, and sockeye) by life stage in the Eklutna River for 2021 and 2022 (Figure 2-8).

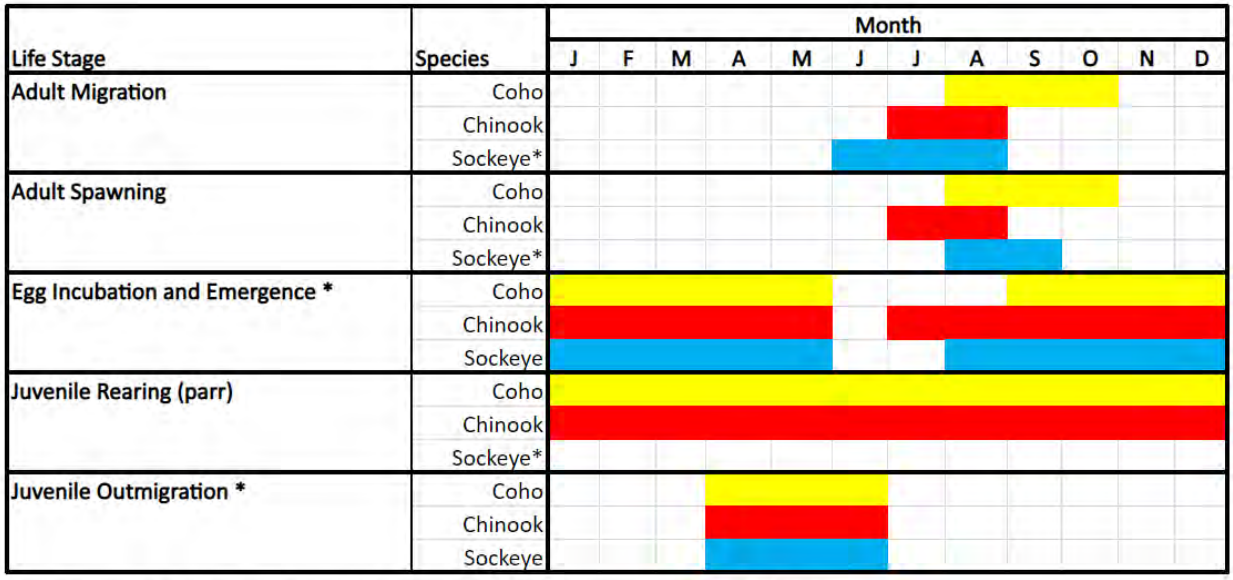

Figure 2-8. Periodicity of target salmon species (Chinook, coho, and sockeye) by life stage in the Eklutna River for 2021 and 2022.

Pinks were the most observed salmon species with up to 120 individuals documented per survey day. Their activity was concentrated in the lowest reaches of the river. Chinook and coho were both scarce with 0-10 individuals observed per survey day over the monitoring period and fewer than 20 total in 2021 and 2022.

Analysis of carcass heads returned to ADFG in 2021 identified that the origin of the Chinook carcasses was likely the hatchery fish that are stocked in the Eklutna Tailrace by ADFG.

2.4 Eklutna Lake Aquatic Habitat and Fish Utilization Study

The goal of the Eklutna Lake Aquatic Habitat and Fish Utilization Study was to characterize the existing aquatic habitat in Eklutna Lake and its tributaries and to begin to understand the current use of that habitat by resident fish and the potential future use of that habitat by ocean-run salmon. A secondary goal was to determine whether the kokanee in Eklutna Lake

are infected with Infectious Hematopoietic Necrosis (IHN), which is a known pathogen in Alaskan kokanee populations and may factor in management decisions about Eklutna Lake. Specific objectives included:

- Assessments of spawning and rearing fish habitat for resident and ocean-run salmonids in the lake, tributaries, and seasonal pond
- Surveys of seasonal habitat use by these fishes for rearing and spawning.
- Collecting samples for IHN analysis and processing by the ADFG Fish Pathology Lab in Anchorage, Alaska.

The Lake Fish Study was conducted on shorelines of Eklutna Lake, the large Eklutna Creek complex that is fed in part by the Eklutna Glacier, and various small, high-gradient tributaries along the northeast and southwest shorelines.

2.4.1 Eklutna Lake Shoreline Habitat and Fish Use

Much of the Eklutna Lake shoreline is steep, bouldery, or characterized by fine silt and grasses. The remaining shorelines that could be accessed during the study (above the waterline) contained ~1.5 acres (68,512 sq ft.) of suitable habitat for lakeshore-spawning ocean-run fishes such as sockeye. These habitats are characterized by small substrate, upwelling groundwater, low embeddedness of fine sediment, and moderate slope. Lake elevation associated with operation of the Eklutna hydro project affects the proportion of this habitat that is inundated at different times during the year.

In lake September and October of 2021 and 2022, kokanee (land-locked sockeye) were observed spawning along the Eklutna shoreline in many of the areas identified as preferred spawning habitat for ocean-run sockeye. Pathological analysis revealed that 75% of the kokanee were infected with IHN.

While spawning habitat selection and spawning timing was typical for kokanee in the region, the observed spawning kokanee were not typical. Kokanee spawners collected from Eklutna Lake were smaller than those reported in many other lake systems, reaching only 4.5-6.5 inches relative to the median size reported for other systems (10-12 inches). The kokanee in Eklutna Lake also differ from other kokanee in their low fecundity (20-30 eggs) and lack of sexual dimorphism and development of spawning color that is typical of the species (Figure 2-9). This is likely an indication of poor nutrient conditions and limited food sources in the environment, which is corroborated by data from the Water Quality Study (see Section 0) and may indicate that Eklutna Lake, in its existing condition, may not provide productive rearing habitat for large populations of ocean-run sockeye.

Figure 2-9. Kokanee carcasses collected on October 1, 2021, on Eklutna Lake shorelines near 61.39104°N, -149.05747°W. Mature eggs were removed from several carcasses (lower left). Eroded anal and caudal fins were indicative of spawning activity.

2.4.2 Eklutna Lake Tributary Habitat and Fish Use

Most tributaries to Eklutna Lake are too steep to provide significant spawning or rearing habitat for ocean-run salmon or other large-bodied fishes (Figure 2-10, LEFT), though some of the lower reaches are used by small-bodied Dolly Varden for rearing.

The only lake tributary with accessible low-gradient habitat suitable for the migration and spawning of ocean-run salmon is the East and West Forks of Eklutna Creek where an estimated 0.765 – 3.61 acres of spawning habitat was documented based on water depth and substrate size (Figure 2-10, RIGHT). A small tributary to the West Fork adds between 0.02 – 0.24 acres of available spawning habitat.

Figure 2-10. (LEFT) Inaccessible entrance to a tributary on the northwest shoreline of Eklutna Lake. (RIGHT) Mainstem of the East Fork of Eklutna Creek.

2.5 Macroinvertebrates

The goal of this study was to characterize the benthic macroinvertebrate (BMI) community within the wetted channel of the Eklutna River. Standard community data metrics were calculated to represent the existing condition.

Four macroinvertebrate study sites were established in the Eklutna River: 1) at the Old Glenn Highway bridge, 2) just above the Thunderbird Creek confluence, 3) at the lower dam site, and 4) at the downstream extent of the AWWU access road. A composite of 8-10 benthic sampling points covering an area of 8-10 ft^2 were collected from representative habitats at each of the four study sites using a kick net sampler (500 µm mesh). Composited samples were sorted to remove a 500-organism subsample from each preserved sample. As part of the taxonomic protocol, all individuals were identified and counted to accurately quantify density. A summary of macroinvertebrate community metrics at all four sampling sites is provided in Table 2-3.

Table 2-3. Benthic macroinvertebrate community metrics for the Eklutna River.

Metric	BMI Site 1	BMI Site 2	BMI Site 3	BMI Site 4
Gross community parameters				
Total taxa richness	28	15	15	30
Total abundance (per square meter)	599	116	461	712
EPT taxa richness	13	7	5	11
% Top 3 taxa	79.8	51.4	94.9	67.1
Warm and cold water adapted biota				

Metric	BMI Site 1	BMI Site 2	BMI Site 3	BMI Site 4
Warm water biota taxa richness	2	0	1	4
% Warm water biota	0.9	0.0	0.2	1.6
Cold water biota taxa richness	8	4	4	8
% Cold water biota	76.9	49.5	95.6	76.3
Non-insects and insect orders				
% Non-insect invertebrates	1.3	9.3	0.7	6.4
% Ephemeroptera (mayflies)	74.2	12.2	8.0	38.9
% Plecoptera (stoneflies)	3.4	20.6	1.9	10.6
% Trichoptera (caddisflies)	2.0	3.7	0.5	12.5
% Diptera (true flies)	19.1	54.2	89.0	31.5
Non-insect groups				
% Oligochaeta (segmented worms)	0.4	9.3	0.2	3.3
% Crustacea	0.5	0.0	0.2	0.3
% Acari (mites)	0.2	0.0	0.2	1.2
Insect families				
% Heptageniidae (mayfly)	4.5	1.9	0.0	1.2
% Baetidae (mayfly)	69.2	10.3	8.0	37.0
% Chloroperlidae (mayfly)	0.4	1.9	0.2	0.0
% Nemouridae (stonefly)	3.1	5.6	1.6	9.7
% Perlodidae (stonefly)	0.0	13.1	0.0	0.9
% Chironomidae (midges)	6.8	1.9	0.0	0.3
% Empididae (dance fly)	0.9	0.0	0.5	1.9
% Simuliidae (black fly)	4.0	34.6	86.4	22.0
Feeding groups				
% Predator	2.7	15.0	1.2	11.6
% Parasite	0.2	0.0	0.2	1.2
% Collector-gatherer	84.0	33.6	10.5	47.8
% Collector-filterer	4.0	34.6	86.4	22.0
% Collector (total)	87.9	68.2	97.0	69.7
% Shredder	3.6	9.3	1.6	9.9
% Scraper	5.4	1.9	0.0	7.4

Most taxa present are common, western North America benthic macroinvertebrates. The dominant coldwater taxa at the four study sites are Baetis bicaudatus complex, Drunella doddsii, Epeorus grandis group, Rhyacophila alberta group, Rhyacophila Vofixa group,

Helodon/Prosimulium, and Diamesa. Tolerant or warm water taxa are rare, representing no more than 1.6% of the collected specimens.

The functional feeding groups in the Eklutna River are dominated by collectors, with a range of 68% to 97% of all taxa representing that general feeding strategy. The overall taxa abundance (116-712 organisms/m^2) is low compared to the >1,000 organisms/m^2 typically found in montane streams of the Pacific northwest. Finally, the sampling locations most proximal to the sediment wedge (Sites 2 and 3) correlated to lower metric scores.

2.6 Water Quality

The goal of the Water Quality Study was to gain a better understanding of seasonal water quality parameters within Eklutna Lake and the Eklutna River in comparison to criteria established by Alaska Department of Environmental Conservation (ADEC) for Water Use Category C: Growth and Propagation of Fish, Shellfish Other Aquatic Life, and Wildlife (Table 2-4).

Table 2-4. ADEC Criteria for Water Use Category C.

Parameter	Criteria
Temperature	May not exceed 20°C at any time. The following maximum temperatures may not be exceeded, where applicable: - Migration routes 15°C - Spawning areas 13°C - Rearing areas 15°C - Egg & fry incubation 13°C
Dissolved Oxygen	Greater than 7 mg/L
pH	6.5 to 8.5
Turbidity	May not exceed 25 nephelometric turbidity units (NTU) above natural conditions. For all lake waters, may not exceed 5 NTU above natural conditions.

Specific objectives included:

1. Collecting continuous water temperature data in Eklutna River and Eklutna Lake;
2. Collecting continuous pH and dissolved oxygen (DO) data in the Eklutna River and in situ profiles of these two water quality parameters in Eklutna Lake;

3. Collecting total suspended solids (TSS) and turbidity samples in Eklutna River at base flows and during 2021 study flow release;

4. Collecting total phosphorus, chlorophyll *a*, and Secchi depth data in Eklutna Lake to determine its trophic status.

Four water quality sites (WQS) were established in the Eklutna River: 1) just above the Thunderbird Creek confluence, 2) at the downstream extent of the AWWU access road, 3) below the AWWU portal valve near RM 10, and 4) above the AWWU portal valve near RM 11.5.

Two monitoring stations were established in Eklutna Lake: 1) in the lake by the existing Project intake, and 2) in the pond by the existing Eklutna Dam.

2.6.1 Water Temperature

Calibrated thermographs were utilized to continuously record water temperatures in both the Eklutna River (at WQS 1 and 2) and Eklutna Lake from May 2021 through October 2022. Monthly in situ profiles were also collected in Eklutna Lake utilizing a calibrated water quality sonde during the ice-free period.

Eklutna River water temperatures at WQS 1 (just above the Thunderbird Creek confluence) were consistently higher than WQS 2 (at the downstream extent of the AWWU access road). under base flows in the non-winter season (April 1 – October 31). However, during the study flow releases from September 15 – October 6, 2021, river temperatures increased > 4°C, becoming nearly isothermal at the two monitoring stations. The winter monitoring period revealed that surface water at WQS 2 doesn't approach freezing (winter low temperature > 2.4°C) while WQS 1 had 39 days of 0°C or freezing conditions from November 1 – March 31, 2021. These data show that groundwater temperatures have the greatest influence at WQS 2 and ambient conditions affect WQS 1.

In both Eklutna Lake (Figure 2-11) and the pond, thermograph data show that stratification occurs in the summer, with surface water temperatures higher than temperatures at depth by as much as 3-4°C. As expected, the winter temperature data reveal that surface temperatures are colder than at depth from early December to mid-April in Eklutna Lake, while the pond generally exhibits this pattern from mid-October to mid-April.

Overall, the two-year monitoring period shows that Eklutna Lake and both sites on the Eklutna River met the 20°C ADEC temperature criteria for water use category C. However, water near the surface of Eklutna Lake does slightly exceed the more restrictive rearing/migration route criteria of < 15°C and the spawning/incubation criteria of < 13°C from late June – August.

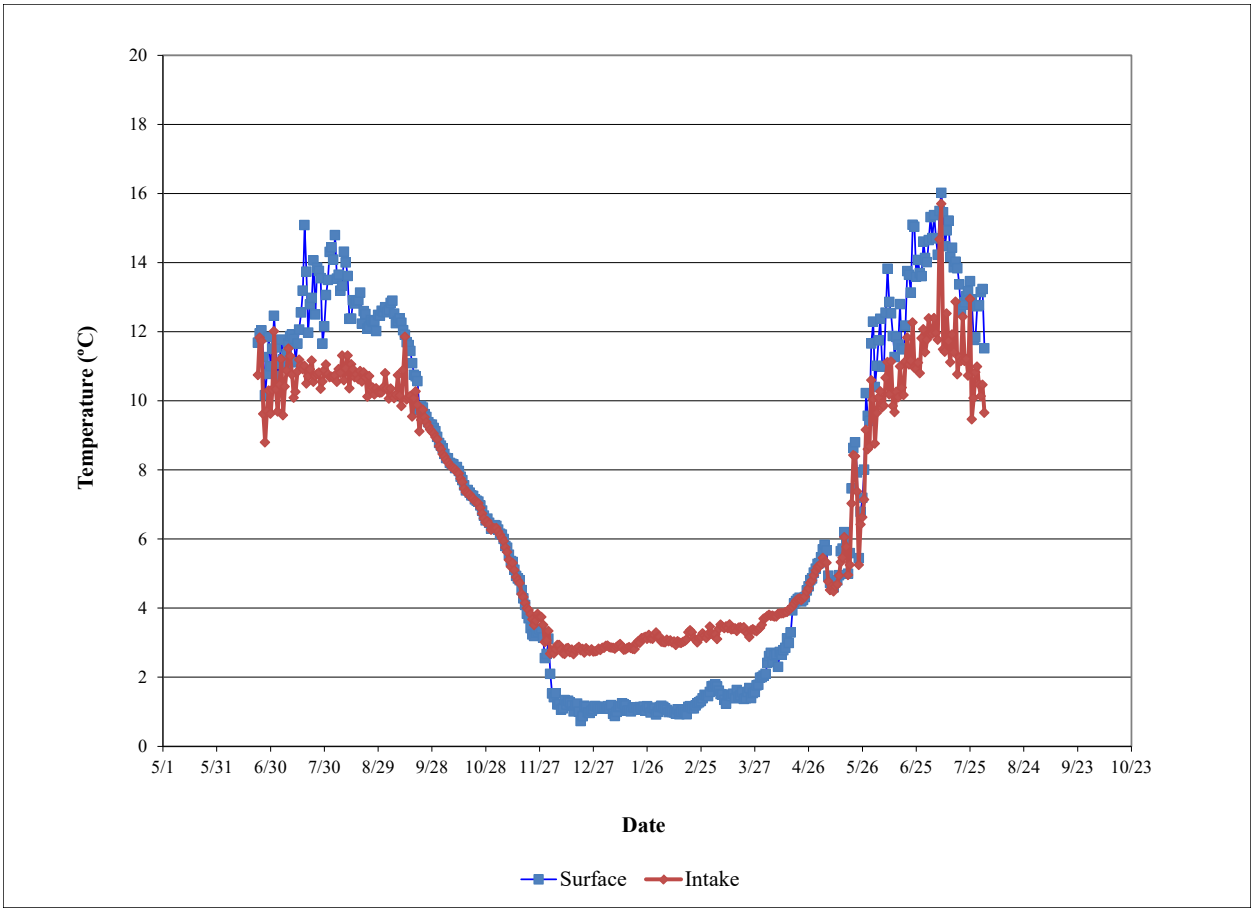

Figure 2-11. Eklutna Lake mean daily water temperature from 2021-2022.

2.6.2 Dissolved Oxygen and pH

Calibrated dissolved oxygen (DO) loggers and pH data loggers were deployed at WQS 1 and WQS 2 in the Eklutna River during the ice-free season from June 22 – September 29, 2021, and collected data every 30 minutes. The summer sampling period was prioritized to represent the time frame when DO concentrations are typically at their lowest, in response to water temperatures being at their warmest.

DO and pH profile data were collected in Eklutna Lake and the pondat 3-foot depth intervals for the entire water column utilizing a water quality sonde calibrated to manufacturer recommendations.

- In Eklutna Lake, data were collected from June 23 – September 29, 2021.
- In the pond, data were collected from May 20 – September 29, 2021.

DO concentrations in the Eklutna River and Eklutna Lake met the 7mg/l or greater criteria established by ADEC. Only the pond dropped below 7mg/l near the bottom from late May through late June in 2021.

Data for pH meet the ADEC criteria of 6.5-8.5 at all study sites with the exception of WQS 1, just above the Thunderbird Creek confluence. At WQS 1, pH consistently hovered around 8.5 and intermittently exceeded the ADEC criteria of 8.5 for fish and other aquatic organisms. However, during the 2021 study flow releases, pH at WQS 1 had a detectable and precipitous decrease of ~0.3 pH units that was maintained through the end of the study flow period.

2.6.3 Total Suspended Solids and Turbidity

Continuous turbidity monitoring was conducted on the final eleven days of the 2021 study flow releases utilizing calibrated water quality sondes deployed at all four WQS starting during the 75 cfs study flow release. Continuous turbidity data collection ended approximately 24 hours after study flow releases ended. Turbidity and TSS samples were also collected as grab samples by lowering a 500 ml Nalgene bottle at mid-depth in the thalweg of the channel during the 75 cfs study flow release (September 27) and 24 hours after flow releases ended while the river was returning to base flow conditions (October 6). Collected samples were immediately stored on ice and transported to SGS Laboratories in Anchorage, AK for analysis.

As expected, the 75cfs to 25cfs study flow releases from September 24, 2021 – October 6, 2021, show that both turbidity and TSS increased moving downstream, with substantial increases at WQS 2, below a distinctly large alluvial fan, and at WQS 1, below the lower dam site and sediment wedge. The two upper valley sites (WQS 3 and WQS 4) remained relatively stable with in situ data showing turbidity levels changing from 1.7-2.1 NTU as study flows receded (Table 2-5). However, at WQS 1 and WQS 2, in situ data showed decreases of 41 NTU below the large alluvial fan (WQS 2) and 108 NTU below the lower dam site and sediment wedge (WQS 2). Therefore, any up ramping of flow releases has the potential to violate ADEC criteria to "…not exceed 25 NTU above natural conditions" for an indeterminate amount of time.

Despite the lack of TSS criteria described by ADEC, the major composition of these "suspended solids" is sediment (i.e., sand and silt) from alluvial fans and the deposits left behind after the diversion dam removal. ADEC does state that sediment loads in the 0.1-0.4 mm size class cannot "…cause adverse effects on aquatic animal or plant life, their reproduction or habitat…" (ADEC 2022). Therefore, any movement or flushing of these sediments downstream from flow releases has the potential to foul or clog the interstitial spaces of gravel beds critical for salmonid reproduction.

Table 2-5. Eklutna River turbidity and TSS during study flow releases.

Sample Source	Turbidity (NTU)		TSS (mg/L)	
	9/27/21	10/6/21	9/27/21	10/6/21
WQS 1 (below lower dam site/sediment wedge)	140	32.0	146	33.3
WQS 2 (below the large alluvial fan)	55.0	14.0	88.1	16.3
WQS 3 (upper valley below minor alluvial fans)	5.10	3.00	7.35	2.23
WQS 4 (upper valley with stable stream banks)	4.40	2.70	3.77	2.18

2.6.4 Eklutna Lake Trophic Status

The mid-summer lake profiling on July 14, 2021, and July 7, 2022, also included the determination of Secchi depth and collection of total phosphorus and chlorophyll *a* samples. The assessment of these three lake parameters were utilized to provide an index of lake productivity or trophic status index (TSI). Water samples for phosphorus and chlorophyll *a* were collected near the surface of the lake and just above the lake bottom utilizing a Van Dorn sampler at the lake and pond monitoring sites. Collected water samples for total phosphorus were transferred to pre-labeled laboratory-supplied bottles while chlorophyll *a* water samples were filtered through 0.45 µm filters and wrapped in aluminum foil. Both the phosphorus and chlorophyll *a* samples were placed immediately on ice, then delivered to analytical laboratories on the same day that the samples were collected. Total phosphorus samples were processed and analyzed by SGS Laboratories in Anchorage, AK and chlorophyll *a* concentrations were quantified at APU.

All 2021-2022 TSI values based on chlorophyll *a* correspond to an oligotrophic classification (TSI <30), representing a lake with low primary productivity. In addition to the U.S. Army Corps of Engineers (USACE) assumption of elevated turbidity decreasing light penetration (USACE 2011), low nutrient concentrations (i.e. total phosphorus) are also a factor limiting primary productivity within Eklutna Lake. The low algal biomass within Eklutna Lake likely corresponds to low zooplankton densities and appears to be a limiting factor (i.e., food resource) for fish production, especially for resident species such as kokanee. The data described above (i.e., low nutrient and chlorophyll *a* concentrations) confirm why Eklutna Lake serves as an excellent source of drinking water.

2.7 Stream Gaging

The goals of the Stream Gaging Study were to gain a better understanding of the current flow regime in the Eklutna River and to support other aquatic studies being conducted in parallel with this assessment.

- The primary objective of this study was to generate a flow record in the Eklutna River, Thunderbird Creek, Lach Q'atnu Creek (Tributary 1), and the unnamed tributary (Tributary 2) to the pond upstream of the existing Eklutna Dam throughout the duration of the 2021 and 2022 study program.

- A secondary objective was to collect instantaneous flow measurements under stable low-flow conditions, as well as during one of the study flow releases (25 cfs), to assess accretion along the longitudinal profile of the Eklutna River.

Following United States Geological Survey (USGS) guidelines, the stream gages in the Eklutna River (above and below Thunderbird Creek) and in Lach Q'atnu Creek consisted of a staff gage and a continuous stage data logger. The data logger accurately records pressure, which is related to the water surface elevation at the staff gage. Data loggers recorded the following parameters at 15-minute intervals: date and time, temperature (°C), and pressure/water level (feet).

Following gage installation in May 2021, crews maintained and calibrated the stream gaging stations every 4-6 weeks during the study period. During each calibration and maintenance effort, discharge data were collected to develop and maintain a stage-discharge rating relationship at the Eklutna River and Lach Q'atnu Creek stream gages. Discharge measurements continued for the duration of the 2021-2022 study program. During the low-flow winter period, surface waters at the gaging stations were intermittently frozen and did not always provide an accurate continuous stage record. During this November-April timeframe, stage recorders remained in place with visual site inspections conducted on a bi-monthly basis to document site conditions and confirm the expected low-flow discharge condition.

Two years of gaging data below the Thunderbird Creek confluence reflect the 2002-2007 record from the USGS. Daily flow statistics from USGS gage 15280200 show that peak mean daily flows typically occur in mid-June and that winter flows range from 12-25 cfs. Also, the peak mean daily flow of 270 cfs in 2022, is similar to the peak daily flow volume of 255 cfs calculated by the USGS in 2006.

In 2021, mean daily flows above Thunderbird Creek were extremely stable throughout the spring-summer monitoring period, ranging from 6-7 cfs, until the onset of the study flow

releases on September 13, 2021. Over the winter of 2021-2022, mean daily discharges stabilized after one short duration runoff event, and remained in the 2-3 cfs range. In 2022, the trend of slowly increasing flow volumes begins in mid-February and peaks at 26 cfs on April 26, 2022. The wetter than normal precipitation totals in the summer and fall of 2022 resulted in a much more dynamic hydrograph with mean daily flow volumes fluctuating substantially in comparison to the stable runoff condition detected in 2021. Finally, the range of Eklutna River discharges upstream of Thunderbird Creek has not changed much over time. Flows not augmented by study flow releases ranged from 2-26 cfs for the 2021-2022 study period, while the 35 instantaneous discharge measurements from 1954-2006 at USGS gaging station 15280100 ranged from 4-24 cfs.

Thunderbird Creek flows were calculated by subtracting flows measured at the stream gage above Thunderbird Creek from the flows recorded at the stream gage below Thunderbird Creek. Figure 2-12 shows the daily mean discharge estimates for Thunderbird Creek in comparison to the two Eklutna River gaging stations. The grey shaded areas represent the 2021 study flow releases and the 2022 O&M flow release.

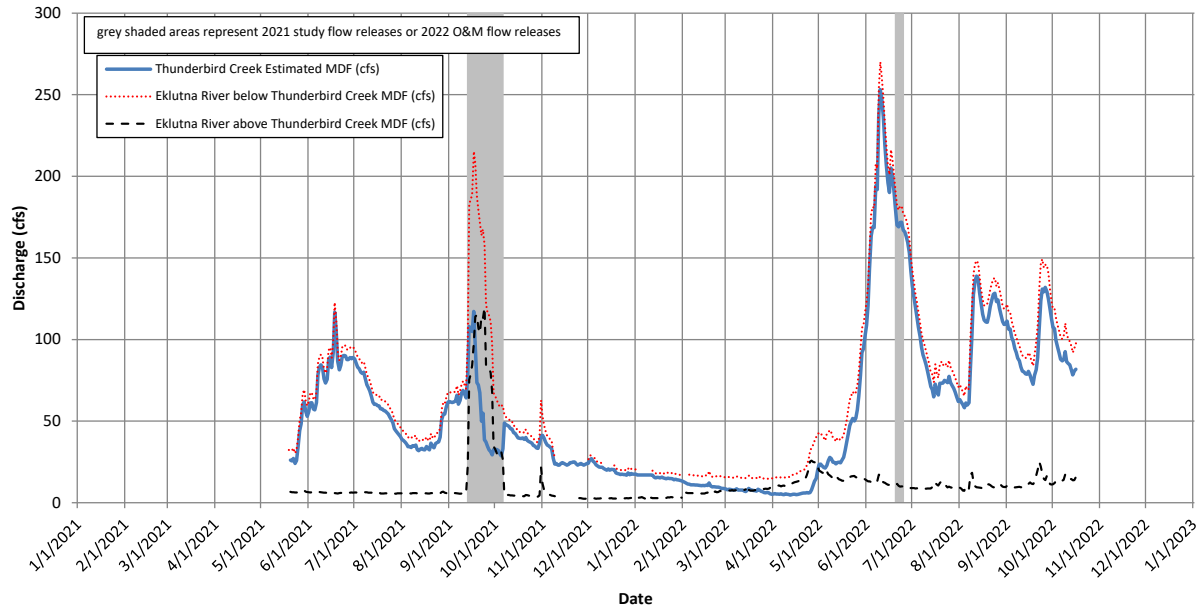

Figure 2-12. Thunderbird Creek estimated daily mean discharge vs Eklutna River stream gaging records, 2021-2022.

Overall, it is evident that Thunderbird Creek is the primary contributor of surface water discharge to the lower Eklutna River. Estimated mean daily flows for Thunderbird Creek are similar to those summarized by NVE in 2003 with peak mean daily flows occurring in the third week of June. Although the magnitude of peak Thunderbird Creek flows in 2022 are substantially greater than data from 2021 and NVE (2003), the time series hydrograph pattern

is similar. In 2022, winter flow data (January 1-April 15) from Thunderbird Creek slowly and consistently decreases, ranging from 18 cfs to 5 cfs and again, closely matches flow volumes and patterns from NVE (2003).

Flows in Lach Q'atnu Creek peaked at 12 cfs and 35 cfs in 2021 and 2022 respectively (Figure 2-13). Over the winter of 2021-2022, discharges from mid-November to late April were stable, but extremely low, ranging from nearly 0 cfs to 0.8 cfs with an average mean daily flow of 0.2 cfs. Although peak discharges were nearly 3 times greater in 2022, the Lach Q'atnu Creek watershed appears to be a snowpack driven system. Despite wetter than normal precipitation in the summer and fall of 2022, Lach Q'atnu Creek flows tailed off rapidly through July with daily mean discharges from August 1 to mid-October averaging 2.3 cfs and 3.7 cfs in 2021 and 2022, respectively.

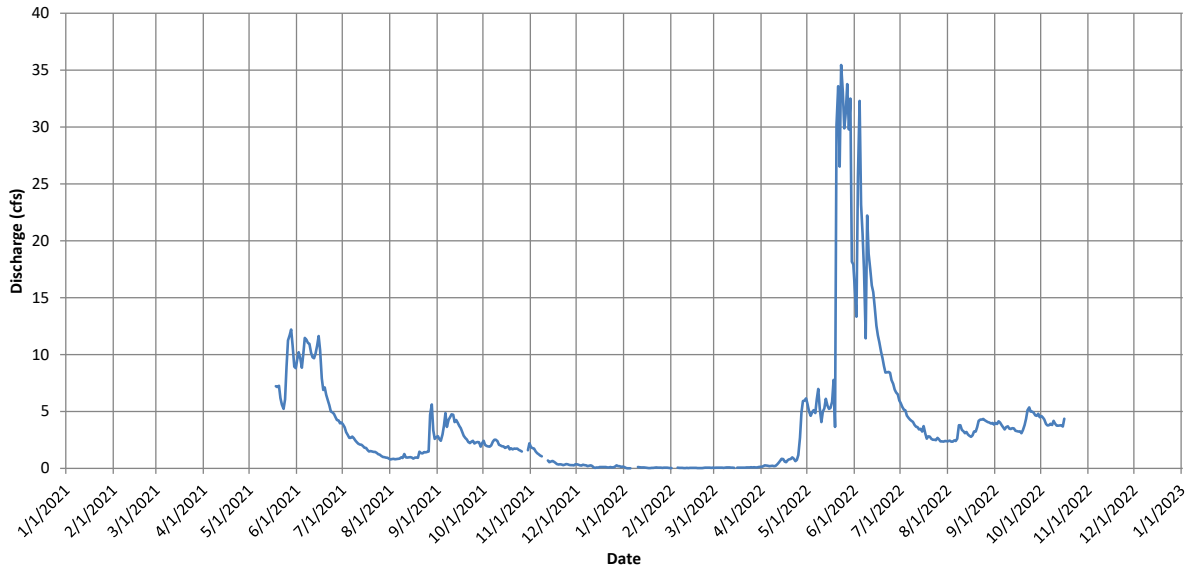

Figure 2-13. Lach Q'atnu Creek daily mean discharge, calendar years 2021-2022.

Monthly spot discharge measurements were taken at the unnamed tributary to the pond (Tributary 2) in 2021 and 2022. The five measurements taking in 2021 indicated relatively low flow volumes (<0.9 cfs). In 2022, the average of the five instantaneous measurements were noticeably higher (<2.7 cfs) in response to deeper snowpack and wetter than normal precipitation totals in the summer and fall of 2022.

Table 2-6. Unnamed pond tributary (Tributary 2) discharge measurements.

Meas. No.	Date	Measured Discharge (cfs)
1	5/19/2021	0.9
2	6/23/2021	0.5
3	7/14/2021	0.5
4	8/25/2021	0.5
5	9/28/2021	0.3
6	5/15/2022	1.1
7	6/28/2022	2.7
8	8/3/2022	0.6
9	9/13/2022	1.4
10	10/16/2022	0.8

For the accretion portion of the study, discharge measurements were collected at five locations in the Eklutna River: 1) below the railroad bridge, 2) at the Old Glenn Highway bridge, 3) just above the Thunderbird Creek confluence, 4) at the downstream extent of the AWWU access road, and 5) below the AWWU portal valve. under a stable base flow or zero-flow release condition on June 22, 2021. Discharge measurements were conducted on June 22, 2021 before the study flow releases and then again on September 30, 2021 during the 25 cfs study flow release (Table 2-7).

Table 2-7. Eklutna River accretion summary.

Location	Measured Discharge (cfs)	
	6/22/2021 (0 cfs release)	9/30//2021 (25 cfs release)
Railroad Bridge (RM 1.3)	88.2	63.0
Old Glenn Highway Bridge (RM 2.3)	93.6	66.2
Above Thunderbird Creek (RM 3.0)	6.1	23.8
Downstream Extent of the AWWU Access Road (RM 5.5)	3.2	22.1
Below the AWWU Portal Valve (RM 10.3)	0.2	19.4

The accretion study shows that measurable stream flows do not occur under existing conditions for approximately two miles downstream of the Eklutna Dam. Both sets of accretion measurements indicate minimal flow accumulations (~4-6 cfs) from RM 10.3

(downstream of the AWWU portal valve) to RM 3.0 (just above the Thunderbird Creek confluence). Downstream of the Thunderbird Creek confluence there is a slight, but consistently measured flow loss averaging about 4 cfs from the Old Glenn Highway bridge downstream to the railroad bridge. The flow loss within this 1-mile section of the Eklutna River represents a decrease of less than 5.8% of the total flow volume.

2.8 Wetlands and Wildlife Habitat

The overall goal of this study was to retroactively assess changes in wetlands and wildlife habitats in the Eklutna River drainage that may have been caused by the development of the Eklutna Hydroelectric Project. The study goal was achieved by comparing present-day mapping of wetlands and wildlife habitats, based primarily on natural color satellite imagery from 2022, to historical mapping derived from black and white aerial photographs taken in 1950. The specific study objectives were to:

1. Prepare a current wetland and wildlife habitat map for the study area using the most recent high-resolution satellite imagery and LiDAR data (May 2022), previous wetland and land cover mapping that includes the Project area, and field ground-reference data collected in August 2022.

2. Include vegetation, macrotopography, and disturbance attributes in all map polygons, including uplands, to facilitate the development of wildlife habitat and wetland functional type maps using an Integrated Terrain Unit methodology.

3. Prepare a wetland functional assessment applied to wetland functional types developed in the classification to support the retrospective image analysis by identifying the highest value wetlands in the study area.

4. Compare the extent and ecological function of current wetlands and wildlife habitats to historic conditions by preparing a historical wetland and wildlife habitat map based on a set of black and white aerial photographs of the area taken in 1950.

A total of 23 National Wetland Inventory (NWI) types were identified in the study area: 12 water, 9 wetland, and 2 upland types. Vegetated wetland types comprise 40% of the study area in which estuarine salt marsh and seasonally flooded riparian shrub were the dominant types. Despite a long history of disturbance in the area, current wetlands in the Eklutna River floodplain are relatively intact and representative of similar riverine wetland systems in Southcentral Alaska.

The attribution of map polygons with wetland and vegetation classes and the other landscape feature variables supported the identification and classification of 23 wildlife habitat types in

the study area. Wildlife scientists were consulted to determine that suitable habitats for the bird and mammal species known or expected to occur in the study area were represented in the mapping. The resulting habitat types were then used to directly support the Terrestrial Wildlife Surveys (see Section 2.9). Overall, the Eklutna River drainage study area is comprised of approximately 37% upland habitats, 36% estuarine wetlands, 18% lacustrine waters, and 9% lotic waters in combination with associated riparian freshwater wetlands.

NWI wetland attributes were included in the multivariate wetland function classification process in which a subset of wildlife habitat types (17 wetland functional classes, including waters, unvegetated and exposed littoral zones, and vegetated wetlands) were used in the wetland functional assessment process. In general, wetlands ranged from moderate to high overall function. The highest-ranking wetland functional type was Freshwater Sedge Marsh, which has the vegetation structure and landscape feature characteristics to perform all the evaluated functions at a high level. Freshwater Sedge Marsh is primarily a new wetland type in the study area that has established in the margins surrounding freshwater ponds in the abandoned gravel extraction area in the lower river near the estuary.

In the historical mapping, a total of 14 wetland and wildlife habitat types were identified in the 1950 aerial photography. These types were identified using the same classification system developed for the mapping of current conditions. Comparison of acreages between the current and historical conditions allowed for the detection of habitat change associated with specific human activities that occurred in the study area over time, including impacts resulting from the construction and operation of the Eklutna Hydroelectric Project. The primary impacts of the Eklutna Hydroelectric Project (river dewatering) include the loss of significant areas of seasonally flooded riparian shrub communities occupying the historical Eklutna River floodplain; these areas are gradually converting to upland forest habitats (see Figure 2-14 and Figure 2-15). Additional impacts of the Project include expansion of the littoral zone at the outlet of Eklutna Lake due to increased fluctuations in the lake level throughout the year; this lake littoral zone was far smaller in extent in 1950 than in 2022.

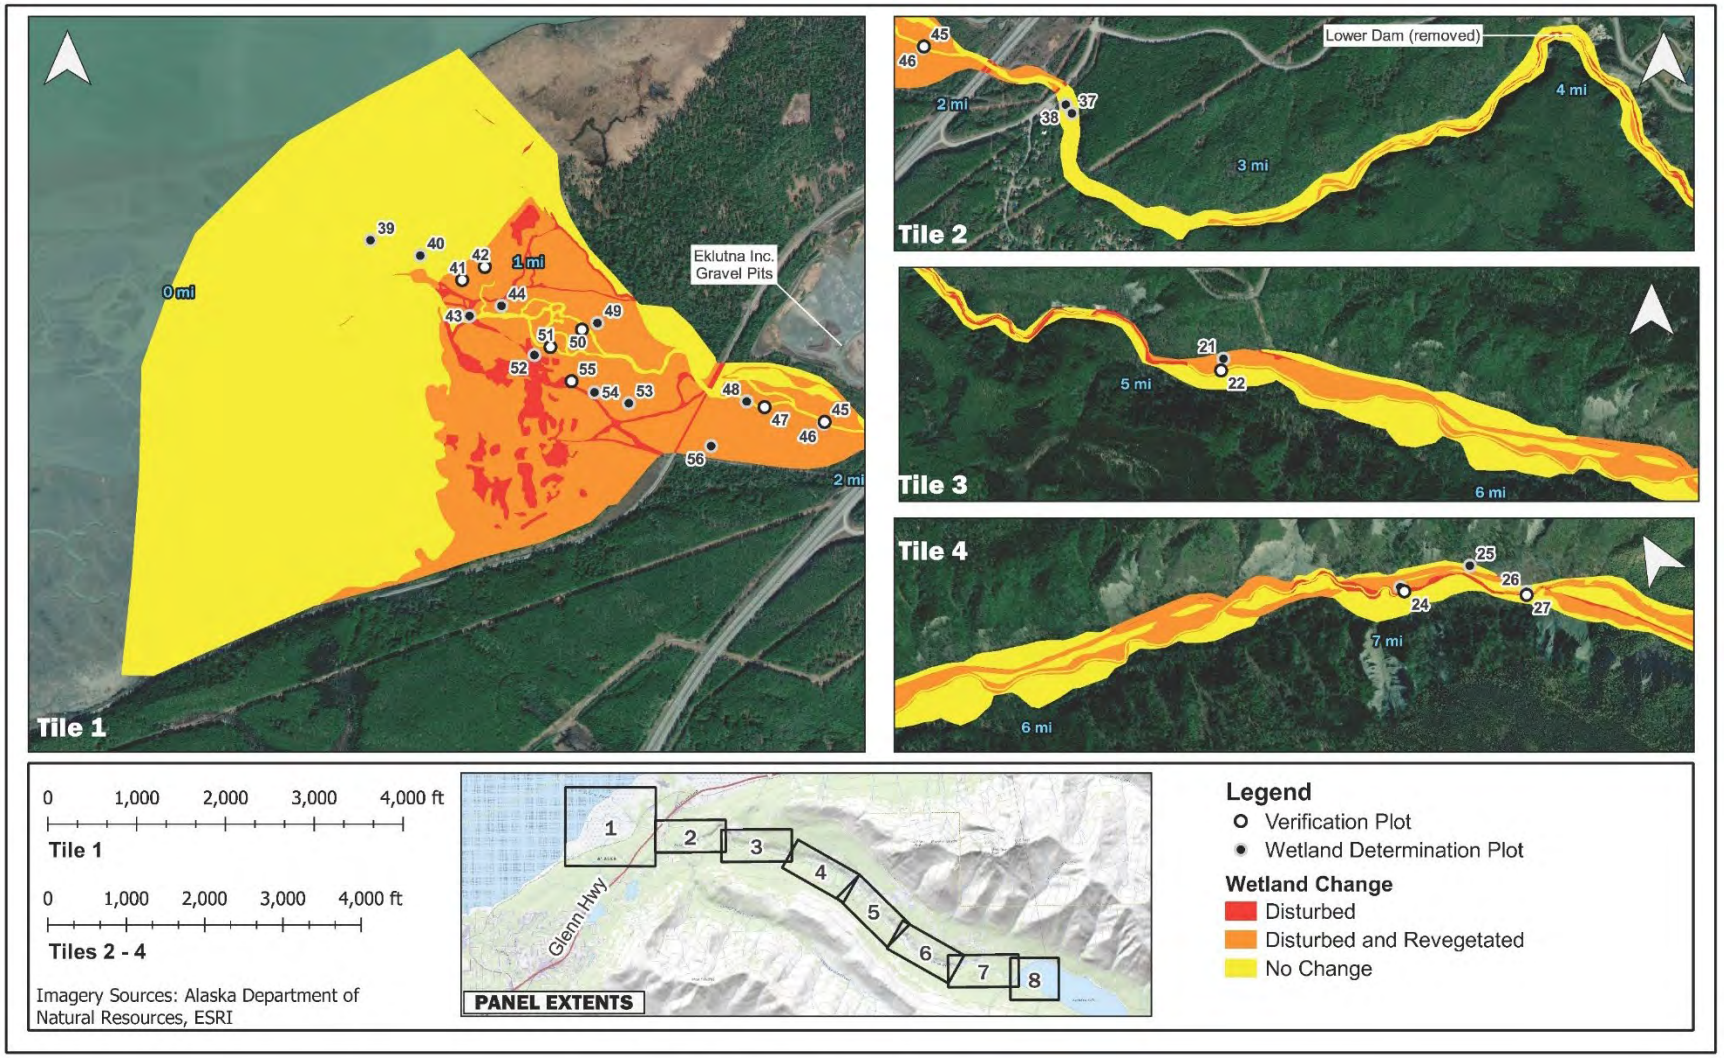

Figure 2-14. Wildlife habitat and wetland functional class changes from historical to current conditions.

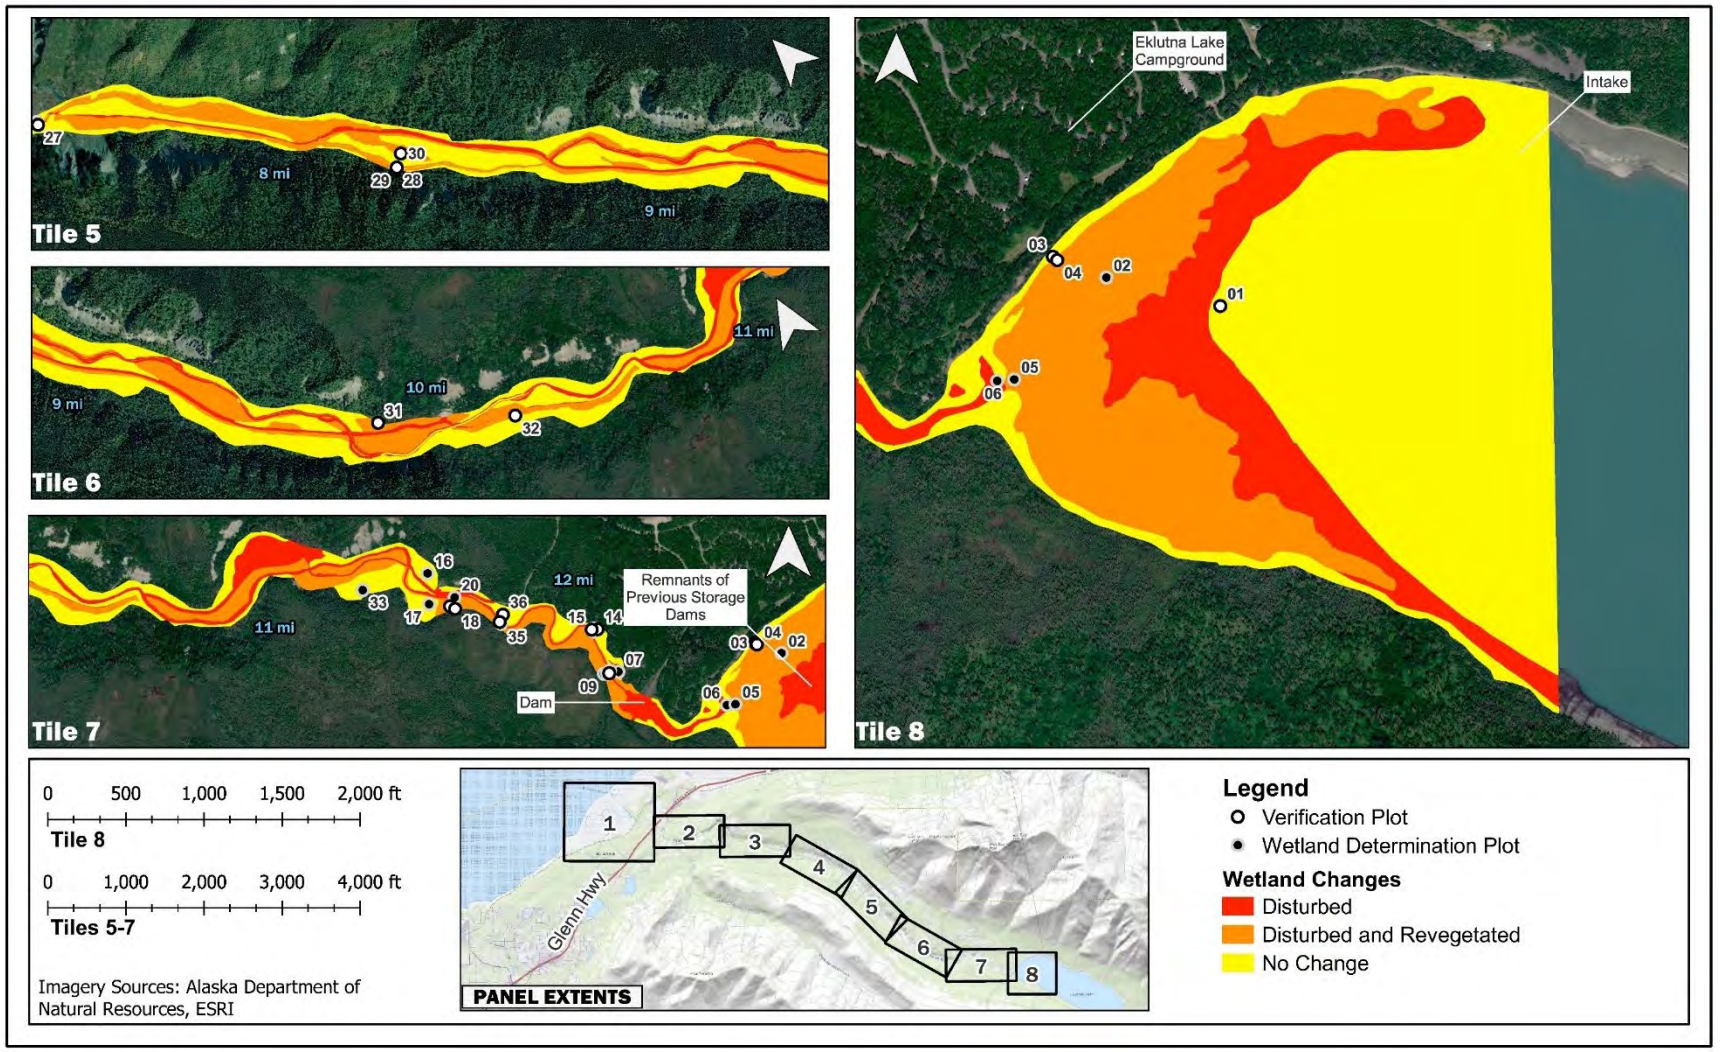

Figure 2-15. Wildlife habitat and wetland functional class changes from historical to current conditions, continued.

2.9 Terrestrial Wildlife Study

The goal of the Terrestrial Wildlife Study was to assess the seasonal presence, abundance, and habitat use for key terrestrial wildlife species in the Eklutna River drainage. Specific objectives included:

1. Raptor Nesting Survey – An aerial raptor survey was conducted in spring 2022 to locate nests of bald eagles and other large raptors.

2. Migratory Waterfowl and Shorebird Surveys – Aerial and ground-based surveys were conducted in spring and fall 2022 to determine the numbers, seasonal occurrence, and habitat use of waterfowl and shorebird species in the study area, focusing on the estuary and adjacent mudflats.

3. Beaver Pond Mapping and Beaver Survey – An aerial and ground-based survey of beaver colonies was conducted, and beaver ponds and dams were mapped to assess current use of the Eklutna River drainage by beavers.

4. Moose Browse Survey – A survey of winter moose browse was conducted to assess the current level of moose browsing pressure relative to habitat carrying capacity to support the local moose population.

5. Camera Traps and Opportunistic Observations – Wildlife camera traps were deployed and additional wildlife observations were recorded opportunistically by other researchers on the Project to provide information on the wildlife species present and their relative abundance in the Eklutna River drainage, focusing on large mammals and furbearers.

6. Wildlife Habitat Evaluation – The value of wildlife habitats in the study area to terrestrial mammals and birds known or expected occur in the study area was assessed using a categorical ranking process. Based on changes in habitats over time (see Section 2.8), assessments of how the Eklutna Hydroelectric Project could have impacted wildlife populations in the past were made.

2.9.1 Raptor Nesting Survey

The raptor nesting survey was conducted on May 9, 2022, following established protocols for the inventory and monitoring of eagle nests using a helicopter survey platform. The survey area included the hillsides and bluffs overlooking the river valley below Eklutna Dam to search for cliff-nesting raptors and a forested area along the coast near NVE where bald eagles were known to nest.

A total of 6 raptor nests were observed in the survey area. Four bald eagle nests were located in large poplar trees along the coast. These nests appeared to represent 2 bald eagle breeding territories. One nest was occupied, and one nest showed inconclusive signs of occupancy. In addition, a common raven or northern goshawk nest was recorded farther upstream in a poplar tree and an active common raven nest was recorded on a gravel-covered cliff-ledge. Overall, the area appears to be lightly used by nesting raptors and the often-eroding cliffs in the survey area are generally of low quality to support larger cliff-nesting raptor species, such as peregrine falcons and golden eagles.

2.9.2 Migratory Waterfowl and Shorebird Surveys

Two migratory waterfowl and shorebird surveys were conducted during the spring and two surveys during the fall of 2022. The survey dates were set to align with the peak numbers of waterfowl and shorebirds migrating through the Cook Inlet area, based on survey data from other Cook Inlet studies.

Waterfowl and shorebird numbers in the study area were moderate and low, respectively, during the field surveys, with waterfowl (ducks, geese, and swans) often accounting for over half the total number of birds present. Eleven species of waterfowl were recorded throughout the study period, with counts ranging from 37–143 individuals per survey. Shorebirds were noticeably absent during the spring surveys, but 13 individuals of 3 species (semipalmated plover, least sandpiper, and spotted sandpiper) were detected on the early fall survey, all on the mudflats at the mouth of the Eklutna River. Outside of the coastal areas, waterfowl and shorebirds were found in very low numbers in all other portions of the Eklutna River drainage including the littoral zone at the mouth of Eklutna Lake.

2.9.3 Beaver Pond Mapping and Beaver Survey

The beaver colony survey was conducted on October 10, 2022, using a helicopter with a single observer seated opposite the pilot. A single ground-based survey was also conducted on September 22, 2022, in an attempt to estimate family sizes of beaver colonies in the area.

Only one active beaver colony with a food cache and one inactive colony were observed below the railroad bridge. Above the canyon reach, a failed beaver dam was found at RM 5.7 and an active colony complex at RM 7.0. The middle river colony complex consisted of one failed dam, six active dams, and a single lodge. The dams in this area spanned all or most of the wetted river channel at the time of the survey (see Figure 2-16 and Figure 2-17). The beaver lodge in the upper river area and a recently removed dam in the same area showed no signs of recent activity.

Figure 2-16. Active Dam-07 (LEFT) and Active Dam-08 (RIGHT) in the middle river colony.

Figure 2-17. Active Dam-09 (LEFT) and Active Dam-10 (RIGHT) in the middle river colony.

During the ground-based survey, no beavers were observed at the middle river colony. The two dams farthest downriver were estimated at approximately six feet tall and looked like

potential barriers to adult fish passage, though juveniles may be able to pass through. No signs of rehabilitation of the dam or lodge were evident at the former upper river colony.

2.9.4 Moose Browse Survey

The moose browse survey was conducted during late winter, April 12-15, 2022, so that the data would represent maximum seasonal browse removal. The mean browse removal rates were estimated at the individual plant level by sampling 30 plots within the study area. Brackish and tidal habitats at the coast and the area above the existing Eklutna Dam were excluded as these areas were not expected to receive much moose browse.

During the field survey, researchers sampled 2,281 twigs from 241 plants within 30 plots. Feltleaf willow was the most common forage species sampled, followed by Alaska birch and balsam poplar. Browsing pressure was highest for feltleaf willow (40.8% removal) followed by Barclay's willow (30.0% removal), and diamond-leaf willow (25.0% removal). Broomed architecture was observed on 35.7% of sampled plants. Mean proportional offtake per plant was 22%, which is consistent with a stable or increasing moose population and should exhibit moose twinning rates of ~20–50%.

2.9.5 Camera Traps and Opportunistic Observations

Twelve camera-traps were deployed, set to record either time-lapse (seven cameras) or motion-sensor (five cameras) photographs throughout the Eklutna River drainage. Time-lapse cameras were placed on beaver ponds (n = 2) or coastal wetlands (n = 5), while motion-sensor cameras were placed on trails and river crossing areas that were expected to channel mammal movements. In addition to camera-traps, opportunistic observations and other signs of terrestrial wildlife were recorded by other project personnel working in the area.

The seven motion-sensor cameras recorded 10,263 useable photographs while the five time-lapse cameras recorded 383,363 useable photographs (Figure 2-18). Moose were the most frequently photographed terrestrial mammal species (352 groups), followed by black bears (32 groups), brown bears (14 groups), coyotes (13 groups), unknown canid (3 groups), red fox and snowshoe hare (2 groups each), and wolf and lynx (1 group each).

Figure 2-18. Camera trap photos, moose (LEFT) and black bear (RIGHT).

2.9.6 Wildlife Habitat Evaluation

Twenty-three wildlife habitats were defined and mapped in the study area (see Section 2.8). Wildlife habitat evaluations were then conducted by creating a matrix of wildlife species and the 23 mapped habitats and assigning a categorical habitat-value ranking (high, moderate, low, or negligible value) to each mapped wildlife habitat type for each bird, mammal, and amphibian species known or expected to occur regularly in the study area.

Across all species of birds, mammals, and amphibians known or expected to occur in the study area, each of the 23 mapped habitat types was considered to be of high or moderate value for at least 8 or more of the 145 species assessed. In this habitat evaluation, the most species-rich habitats were Mixed Deciduous-Spruce Forest and Spruce Forest, with those 2 forested habitat types considered to be of high or moderate value for 76 and 64 wildlife species, respectively. This result is driven primarily by the large number of landbird species that are expected to make use of the more complex vegetation structure in these habitat types. Other species-rich habitats were Black Cottonwood Forest, Freshwater Pond, and Freshwater Pond (Beaver Modified). A set of 6 shrub, lacustrine, and marsh habitat types (Seasonally Flooded Low and Tall Alder-Willow Shrub Scrub, Brackish Pond, Upland Low and Tall Alder-Willow Shrub Scrub, Freshwater Lake, Brackish Sedge Marsh, and Freshwater Sedge Marsh) closely followed, and were considered to be of high or moderate value for 47–44 wildlife species. After that, species richness dropped off noticeably, with a set of 8 riverine, forest, mudflat, lacustrine, and shrub habitats considered to be of high or moderate value for 31–20 wildlife species. Types with the lowest levels of species richness were a set of 4 barren, seeps and springs, cliffs and banks, and intermittent stream habitats, which were considered to be of high or moderate value for 17–8 wildlife species.

The mapping of historical (1950) wildlife habitats (see Section 2.8) indicates that prior to the construction of the Eklutna Hydroelectric Project in 1955, riparian shrub habitats were markedly more extensive in the Eklutna River drainage. After 63 years, without the annual or bi-annual high flow events with extensive overbank flooding, these riparian shrub habitats have transitioned to more well-drained spruce and deciduous forest habitats. Wildlife species that rely heavily on riparian shrub habitats are expected to have declined in abundance in the study area, and species that rely heavily on mixed forest habitats are expected to have increased in abundance. In addition, fluctuations in the level of Eklutna Lake throughout the year have exposed a substantial littoral zone at the mouth of the lake, which was far smaller in extent in 1950. The few wildlife species that make use of this lake littoral zone habitat may have increased in abundance since 1955.

2.10 Recreation Study

The goal of the Recreation Study was to itemize and quantify the current level of recreation in the Project area, including quantifying the use types, locations, and frequency of recreational activities. Analysis of compiled existing data provided by ADFG, Chugach State Park, and MOA was supplemented by primary data collected through an online survey, online interactive comment map (Figure 2-19), intercept surveys conducted at high-visitation areas, traffic counts on roadways near parking areas, and a paper survey distributed to members of NVE.

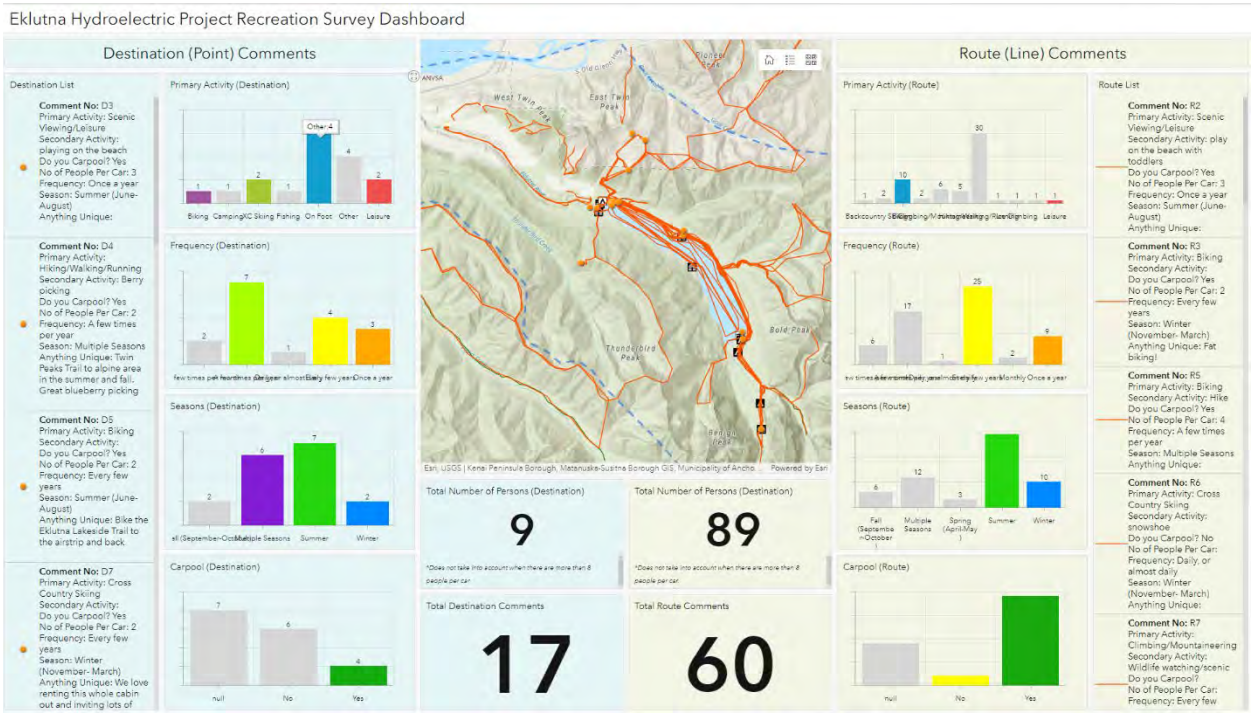

Figure 2-19. Display of Online Interactive Comment Map Dashboard.

2.10.1 Chugach State Park

All lands in the upper watershed of the Eklutna River are located within Chugach State Park. The Eklutna Valley is a heavily used area of Chugach State Park, specifically Thunderbird Falls Trail and the Eklutna Lake Recreation Area, known for its scenic qualities and diverse year-round recreational opportunities. Visitors most frequently enjoy hiking, biking, camping, and scenic viewing, but also participate in horseback riding, climbing, berry picking, hunting, fishing, boating, riding all-terrain vehicles (ATVs), cross-country skiing, dog mushing, and snow machining in the winter.

Eklutna Lakeside Trail was the most frequently reported destination per primary data collection efforts, followed by Twin Peaks Trail, public use cabins, and campgrounds. 2019 MOA trail counts at Eklutna Lakeside Trail reported average annual daily traffic of 200 pedestrians per day, with 407 per day in the summer and 22 in the winter. 2020 MOA trail counts at Thunderbird Falls Trail reported an average annual daily traffic of 370 pedestrians per day, with 888 per day in the summer and 115 in the winter. Public use cabins and campgrounds in the area are popular destinations which see regular use annually. For Fiscal Year (FY) 2022, Chugach State Park collected $273,497 in revenue from recreational use fees (campground and cabin reservations) and parking lot fee stations in the Project Area.

Chugach State Park has fee stations at parking lots and campgrounds in the Eklutna Lake Recreation Area and Thunderbird Falls. Traffic counts collected during the study period were compared to fee station transaction data for the same days as counts were collected and concluded approximately 25% of all vehicles entering these areas pay a fee at an applicable fee station (50% rate of fee station use for the Eklutna Campground). Rates of fee station use were applied to the full year of fee station data provided by Chugach State Park and a conservative, generalized carpool rate of 50% of vehicles entering the Project Area for recreation contain two people was applied to the total vehicle count to determine a minimum number of total recreators. A minimum of 145,881 recreators partook in activities within Chugach State Park fee areas in the Project Area in FY 2022 and drove a personal or rental vehicle to get there.

Guiding, touring, and equipment rental businesses operate in the Eklutna Valley. Most notably, Lifetime Adventures operates a rental facility offering bike and kayak rentals near the Lakeside Trailhead and Day Use Area. Premier Alaska Tour brings approximately 500 visitors to this destination annually during the summer who reliably use Lifetime Adventures services. Other businesses operating in the area provide guided hiking and hunting, outdoor education services, and photography tours.

2.10.2 Eklutna Tailrace

The Eklutna Tailrace is stocked annually with Chinook and coho smolts by ADFG which has facilitated a very popular and sustainable salmon fishery since 2003. Developed facilities including parking, Americans with Disabilities Act (ADA) accessible trails, fishing pads, a bridge providing access to both sides of the tailrace, vault latrines and refuse receptacles. Fishing was the most reported primary activity at the Tailrace, followed by scenic viewing and hiking or walking. Fishing activities are seasonally dependent and therefore summer was reported as the most visited time of the year, but activities were reported year-round. ADFG estimated 13,485 angler days at the Tailrace in 2018. Traffic count data collected and analyzed estimates a total of 23,823 vehicles visited the Tailrace from June 8 through August 23, 2022. Applying the same conservative assumptions for projecting total number of recreators based on carpooling vehicles noted above, a minimum of 31,447 recreators partook in activities at the Tailrace between June 8 and August 23, 2022.

2.10.3 Lower Eklutna River

Activities, whether recreational or subsistence, in the Lower Eklutna River area (considered areas downstream of the Old Glenn Highway bridge), are conducted by members of NVE or Eklutna, Inc. or are otherwise permitted by those entities. One NVE member survey response was received and included both recreational and subsistence activities that they or members of their household participate in within the Lower Eklutna River area.

2.11 Lakeside Trail Erosion Study

The goal of the Lakeside Trail Erosion Study was to determine the effects of Project operations on the Lakeside Trail and identify potential mitigation measures to minimize erosion impacts to this popular recreational trail. The objectives of the study were to document locations where erosion affecting trails or recreation facilities is influenced by lake level fluctuations and determine the causes of erosion at these locations.

The trail includes a former roadbed constructed by the U.S. Army in 1962 that followed the lake shoreline. At very high lake levels, erosion of the trail occurs in locations where the trail is directly adjacent to the lakeshore. Erosion along approximately 3.1 miles of the trail has resulted in narrowing of the original roadbed so that in some places it is too narrow for ATV use; in these areas the main trail has been re-routed up and away from the shoreline and the original shoreline trail is restricted to non-motorized traffic.

A total of 59 eroding areas were delineated along the Eklutna Lakeside Trail, including areas showing past and/or more recent erosion. The inventory followed the pathway closest to the lake. Shoreline erosion was noted along 0.6 miles of the main trail and 2.4 miles of the non-

motorized trail. Nine sites were identified as high priority sites for erosion control, maintenance, or warning signs due to concerns for the safety of trail users.

Five primary types of erosion processes were noted during the field inventory: undercut banks caused by wave erosion, slumping and earthflows caused by saturated soils and/or drainage issues; trampling by recreationalists accessing the lake; raveling of unconsolidated and/or unvegetated cutslopes and banks; and streambank erosion at major stream crossings.

All lakeshore erosion sites had wave action at high lake levels as one of the factors contributing to erosion. Seepage and runoff were the second most common factor, present at 28% of the sites (by length), and blocked culverts were listed at 9% of the sites. Reservoir fluctuation was listed at 28% of the sites. Pedestrian use (19% of the sites) and raveling of steep cutslopes (8%) were the remaining factors affecting erosion.

2.12 Cultural Resources Study

The goal of the Cultural Resources Study was to determine if historic or archaeological resources are present within the study area and evaluate their eligibility for the National Register of Historic Places (National Register). The study area, or Area of Potential Effects (APE), encompassed all locations of possible Project impacts, with a conservative buffer to fully include all potential historic or archaeological resources that could be directly, indirectly, or cumulatively affected.

Prior to the beginning of field surveys, high resolution LiDAR, satellite imagery, and USGS topographic maps were used to make an initial assessment of the archaeological potential of various portions of the study area. The outlet of Eklutna Lake, the river and lakeshore terraces, tributary creek areas, and peninsulas along the lake were marked as locations with higher potential for past use. In addition, the southeastern end of the lake was judged to have higher potential for cultural resources due to a known historic occupation by a well-known Eklutna elder and military training during the 1960s.

The fieldwork was conducted in June and July of 2022. Cultural sites were mapped and documented with photographs and field descriptions. Investigations around Eklutna Lake encompassed lands within the APE along the northeastern and southwestern shoreline, including adjoining uplands within the Eklutna Lake Campground and at the West Fork of Eklutna Creek at the head of the lake. The survey covered approximately 16 linear miles of the lake margin. For the purposes of survey and reporting, the Eklutna River corridor divided into four segments: 1) the lake outlet to the AWWU portal valve, 2) the AWWU portal valve to the downstream extent of the AWWU access road, 3) the downstream extent of the AWWU

access road to the Thunderbird Creek trailhead, and 4) the Thunderbird Creek trailhead to Knik Arm.

Properties within the APE that could be eligible for the National Register are limited to the Eklutna Dam and Spillway and Eklutna River Railroad Bridge. The Eklutna Dam and Spillway are significant as contributing properties to the Eklutna Hydroelectric Project. The Eklutna River Railroad Bridge is significant for its continued association with the operation of the Alaska Railroad between Anchorage and interior Alaska. Other sites that were discovered and documented, but not considered significant enough to possibly be eligible for the National Register, included the remnants of an earlier storage dam at the lake outlet, a cluster of log piers on the beach along the Eklutna Lakeside Trail, and a can scatter on the eastern bank of the Eklutna River, downstream from the Alaska Railroad bridge.

During the study period, a log section from the historic Eklutna Alex cabin was discovered on the shoreline of Eklutna Lake near the Eklutna Lake Campground. There were two hand-hewn, 8" diameter beams measuring 96" and 115" long, toenailed with four iron spikes and an old Alaska State Parks "no campfire" sign (see Figure 2-20). The Project Owners immediately notified NVE, Chugach State Park, and the State Historic Preservation Officer (SHPO). NVE recovered the logs and has plans to display them in the future.

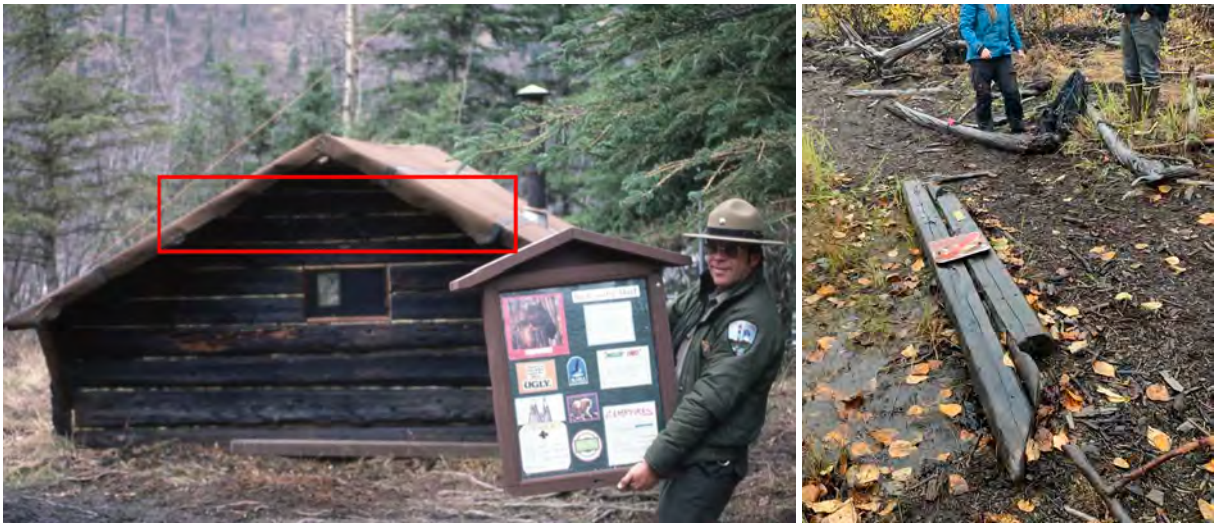

Figure 2-20. (LEFT) Historic Eklutna Alex Cabin in 1987. (RIGHT) Cabin logs discovered on the lake shoreline in 2022.

2.13 Existing Infrastructure Assessment

Prior to proposing modifications to existing Project infrastructure or determining a flow regime into the Eklutna River, an infrastructure assessment study was performed. The investigation assessed how the ability to release any potential future flows may be impacted by hydraulic

and/or operational restrictions of Eklutna Lake, or if flows may affect downstream infrastructure below Eklutna Dam. A series of site visits were performed in August 2020 and September 2021 to investigate hydraulic and/or operational restrictions of Eklutna Lake, including the existing storage dam, existing pond, and the outlet works through Eklutna Dam. Additionally, downstream infrastructure was assessed to determine if any deleterious effects may be caused by releasing flows into the Eklutna River, including AWWU's access road and bridges, AWWU's pipeline, the highway bridges, and the railroad bridge. The results of the investigation are summarized in the following subsections.

2.13.1 Eklutna Lake

As currently operated, Eklutna Lake is disconnected from Eklutna Dam for an average of 9 months each year. The lake is drawn down an average of 36-feet each year with the water being utilized for power generation and potable water supply purposes. As such, any gravity-flow release through the dam is currently only possible between September and December (3 months) per year without a substantial change to the reservoir operations.

2.13.2 Historical Storage Dam

The remnants of the historical storage dam create a topographic barrier between Eklutna Dam and Eklutna Lake. The barrier has a crest elevation of El. 860.0 feet (local datum), forming an isolated pond upstream of Eklutna Dam for most of the year. Minor groundwater seepage flows through the foundation of the historical storage dam into Eklutna Lake during the 9 months of the year that the lake is below El. 860.0 feet.

2.13.3 Existing Pond

The pond formed upstream of Eklutna Dam was determined to have a maximum storage capacity of approximately 17 acre-feet at El. 860.0 feet. This pond was investigated to determine if it had sufficient storage to make continuous flow releases into the Eklutna River for any proposed future instream flow requirements. The investigation revealed that if released through the existing gate at the base of the spillway in Eklutna Dam, the pond would be substantially drained within 8 hours and is of insufficient size to make any significant continuous releases downstream of the dam.

2.13.4 Drainage Outlet Gate

The drainage outlet gate at the base of the spillway in Eklutna Dam was inspected and determined to be occluded with rocks, boulders, and debris, and experiencing moderate corrosion. The gate was replaced with a new stainless steel slide gate has a hydraulic capacity of 190 cfs and was used to conduct the 2021 study flow releases. The new gate is also

capable of making potential future flow releases into Eklutna River when the lake is connected to the dam. Due to lack of power at the dam site the gate is manually operated, which requires periodic operator adjustments to maintain a set flow rate as the water surface elevation of the lake fluctuates.

2.13.5 AWWU Access Road and Bridges

The AWWU Access Road spans 6.5 miles along the Eklutna River and consists of two small bridges and eight natural bottom ford river crossings. Both bridges are in good condition and have a hydraulic capacity of ~1,000-1,200 cfs. The eight river crossings are armored but will need to be investigated further as part of evaluating potential future flow regimes to determine what modifications would be required to make them safely passable by vehicles if any potential future instream flows are implemented.

2.13.6 AWWU Pipeline

The AWWU pipeline runs underground along the Eklutna River for 6.1 miles from the tunnel diversion to the Eklutna Water Treatment Facility. Along the route of the pipeline, it crosses the Eklutna River in eight locations. Each location evaluated has sufficient depth of cover and armament to protect the pipeline from becoming exposed under potential future flows. The exception is river crossing H (Sta 4306+00), which was completely inundated by a beaver dam pond and was unable to be investigated as part of this study.

The hydraulic capacity of the pipeline was additionally investigated to determine any hydraulic limitations that may exist in the event that the diversion tunnel or portal valve shaft were considered for modification to release flows into the Eklutna River. The investigation revealed that there is sufficient driving head to deliver up to 100 million gallons per day (154.7 cfs) to the Eklutna Water Treatment Facility at the minimum water surface elevation in Eklutna Lake. Any additional flows discharged into the Eklutna River through the diversion tunnel must closely consider this hydraulic limitation of the pipeline to avoid any impacts for water delivery.

2.13.7 Old Glenn Highway Bridge

The Old Glenn Highway bridge has a hydraulic capacity far exceeding the 500-year flood flow, estimated to be 1,800 cfs. However, an intermediate pier exists that has an increased risk of scour when flows exceed the 50-year flood, estimated to be 850 cfs. The hydraulic analysis of the channel beneath the Old Glenn Highway Bridge should be revisited as part of the evaluation of any potential flow regimes to determine if the increased river flows may cause an increased risk of scour of the intermediate bridge pier.

2.13.8 New Glenn Highway Bridges

The New Glenn Highway bridges have a hydraulic capacity well in excess of the 100-year flood event (> 4,700 cfs) and contain no structural elements within the influence of the river. The bridge abutments and scour protection elements were found to be in good condition and no impacts are expected from any potential future instream flow regime.

2.13.9 Railroad Bridge

The Eklutna River Railroad Bridge has an estimated hydraulic capacity far exceeding Eklutna River flood events (> 8,000 cfs). The bridge was determined to be in reasonable condition for its age, with no evidence of scour beneath the abutments or bank erosion occurring. Based on the estimated hydraulic capacity and current condition of the railroad bridge, there are not anticipated to be any modifications required to accommodate potential future instream flows in the river.

2.14 Engineering Feasibility and Cost Assessment

The engineering feasibility and cost assessment study consisted of analyzing a total of 19 measures proposed by the Project Owners and various stakeholder groups. These alternatives are divided into six site improvement categories and represent potential modifications to existing infrastructure or construction of new facilities to protect, mitigate damages to, and enhance fish and wildlife impacted by the development of the Project. A summary of the measures is provided in Table 2-8 and a summary of the Class 5 Opinion of Probable Construction Costs (OPCC) is provided in Table 2-9. The conceptual design drawings associated with each measure are available for review on the Project website.

Table 2-8. PME Measure Descriptions.

	Measures	Work Features
Instream Flow Measures		
A	Dam Release Modifications	Add electric motor operator and controls to existing sluice gate and complete powerhouse upgrades to allow powerhouse to be offline through winter months.
B	Siphon Bypass Pipeline	Add a pipeline that will siphon water out of the Eklutna Lake to Eklutna River and complete powerhouse upgrades to allow powerhouse to be offline through winter months.
C	AWWU Portal Valve Release	Tap into existing 54" bypass pipeline at the AWWU portal valve location to divert flow to Eklutna River.

	Measures	Work Features
D	AWWU Pipeline Release	Tap into existing 54" bypass line at specified location along AWWU Pipeline at River Mile 5.5 to divert flow to Eklutna River.
E	Bypass Tunnel Release	Add a tee to the existing 108" APA tunnel and drive a 7,500 foot long 72" diameter tunnel to divert flow to the Eklutna River.
F	Channel Excavation	Excavate a channel from Eklutna Lake past the previous storage dam to make the Eklutna Dam Pond a live storage pool all year.
G	Lach Q'atnu Creek Re-Route	Divert current path of Lach Q'atnu Creek to new channel to allow creek to flow directly to Eklutna River downstream of Eklutna Dam.
Peak Flow Measures		
H	Spillway Modifications - New Tainter Gate	Add new Tainter gate and hoist to the existing Eklutna Dam spillway crest.
I	Spillway Modifications - New Wheel Gate	Add new fixed wheel gate and hoist in place of the existing Eklutna Dam spillway.
Fish Passage Measures		
J	Gravity Flow Fish Ladder	Add gravity fish ladder passage through dam.
K	Variable Exit Fish Ladder	Add variable exit fish ladder passage through dam.
L	Pumped Supply and Slide Fish Ladder	Add new concrete fishway through dam with pumped water supply.
M	Trap and Haul Facility	Add trap and haul fish transfer facilities at new downstream bypass valve.
N	Floating Surface Collector	Add floating surface fish collector in Eklutna Lake.
O	Fish Exclusion Barrier	Add fish exclusion netting at existing intake structure.
P	Replacement Dam	Excavate deep channel, remove existing dam, and replace with larger embankment dam including fish passage.
Infrastructure Improvements		
Q	Lakeside Trail Improvements	Improve the lakeside trail and repair erosional features on the northeast shoreline of Eklutna Lake.
R	AWWU Maintenance Road Crossings	Add 8 new road bridges over Eklutna River on AWWU access road.
Habitat Improvements		
S	Physical Habitat Manipulation	Implement new physical habitat modifications within the Eklutna River to improve fish and wildlife habitat.

Table 2-9. Class 5 OPCC – Cost Summary.

Measures		Total Median Cost	Class 5 Cost Estimate (-50% to +100%)		
A	Dam Release Modifications	$6,680,000	$3,340,000	to	$13,360,000
B	Siphon Bypass Pipeline	$22,371,500	$11,186,000	to	$44,743,000
C	AWWU Portal Valve Release	$5,546,500	$2,773,000	to	$11,093,000
D	AWWU Pipeline Release	$2,248,300	$1,124,000	to	$4,497,000
E	Bypass Tunnel Release	$76,747,200	$38,374,000	to	$153,494,000
F	Channel Excavation	$569,000	$285,000	to	$1,138,000
G	Lach Q'atnu Creek Re-Route	$1,523,000	$762,000	to	$3,046,000
H	Spillway Modifications - New Tainter Gate	$5,574,300	$2,787,000	to	$11,149,000
I	Spillway Modfications - New Wheel Gate	$6,573,500	$3,287,000	to	$13,147,000
J	Gravity Flow Fish Ladder	$16,670,300	$8,335,000	to	$33,341,000
K	Variable Exit Fish Ladder	$17,569,600	$8,785,000	to	$35,139,000
L	Pumped Supply and Slide Fish Ladder	$15,240,200	$7,620,000	to	$30,480,000
M	Trap and Haul Facility	$8,336,200	$4,168,000	to	$16,672,000
N	Floating Surface Collector	$57,557,000	$28,779,000	to	$115,114,000
O	Fish Exclusion Barrier	$3,125,600	$1,563,000	to	$6,251,000
P	Replacement Dam	$113,344,500	$56,672,000	to	$226,689,000
Q	Lakeside Trail Improvements	$1,720,700	$860,000	to	$3,441,000
R	AWWU Maintenance Road Crossings	$2,941,500	$1,471,000	to	$5,883,000
S	Physical Habitat Manipulation	$1,469,200	$735,000	to	$2,938,000

2.15 Hydro Operations Model

The hydro operations model was developed in 2021 to assess impacts to flows, energy generation, and carbon offsets as a result of potential operational changes of the system. This modeling effort used available water surface elevation data from the existing USGS Gage No. 15278000 located in Eklutna Lake near the Project intake, historical flow data for the Eklutna

Power Plant, and historical flow data for the Eklutna Water Treatment Plant from AWWU to develop an operations model of the reservoir. Historic spill events were also taken into account. The average water surface elevation of Eklutna Lake is presented in Figure 2-21.

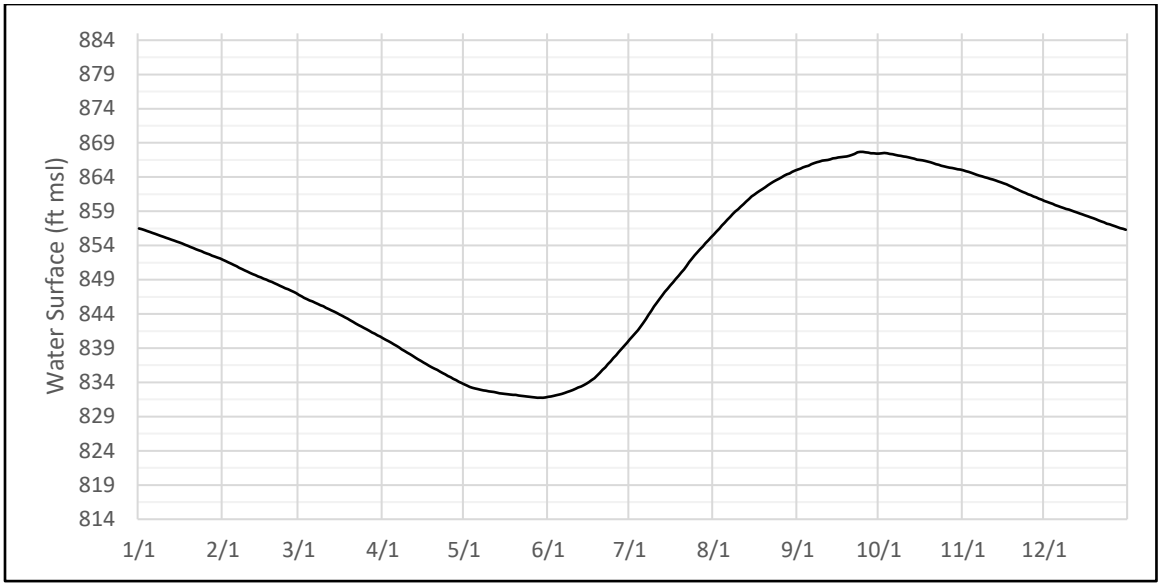

Figure 2-21. Average Water Surface Elevation of Eklutna Lake; 2010 – 2021.

A hydraulic model was developed of the intake and power conduit to determine friction losses as a function of flow rate through the conveyance. Minor losses were included at the trashrack, each pipeline bend, each reduction in conveyance diameter, at the turbine bifurcation, valve, and turbine draft tube. Major friction losses were determined throughout the power tunnel and penstock. The hydraulic grade line represented on the tunnel elevations throughout the power conduit is presented in Figure 2-22.

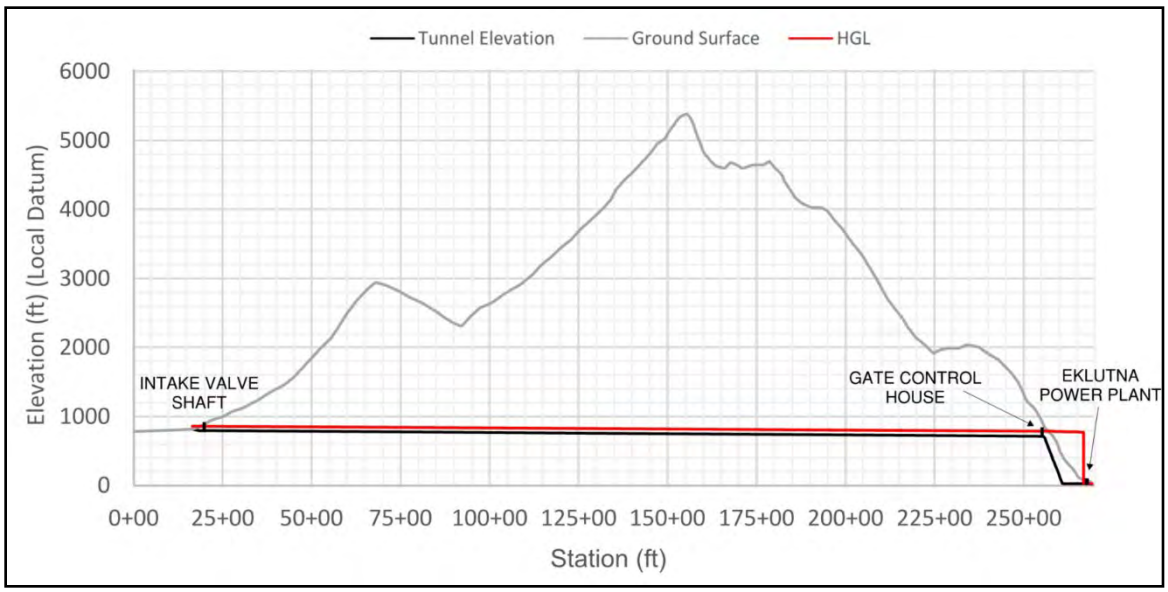

Figure 2-22. Eklutna Power Conduit Hydraulic Grade Line (HGL).

To calculate energy produced through each unit over the operating history analyzed in this study, the turbine efficiency as a function of the net head and flow rate was obtained from published efficiency data obtained through model testing of a homologous unit. Flow data on an hourly timestep from January 2011 to December 2020 were used. Daily generation values were calculated over ten years of operation (2011 – 2021) to validate accuracy with known generation values from the facility. The output of the operations model compared with actual generation values is summarized in Table 2-10.

Table 2-10. Annual Energy Comparison Summary – Actual vs Calculation; 2011 – 2021.

Year	Actual Energy Production (GWh)	Calculated Energy Production (GWh)	% Error
2011	128.1	128.0	-0.1%
2012	145.2	143.8	-1.0%
2013	172.1	169.1	-1.7%
2014	157.3	158.3	0.6%
2015	136.1	138.0	1.4%
2016	169.5	166.5	-1.8%
2017	119.9	118.4	-1.3%
2018	168.8	169.5	0.4%
2019	191.6	192.1	0.3%
2020	179.1	180.9	1.0%
Average	**156.8**	**156.5**	**-0.2%**

The model was able to accurately predict the hydroelectric generation potential as a function of 10-year average Eklutna Lake water surface elevations and hourly power plant flows to within 0.2% of actual values. The model was then utilized to simulate proposed changes to reservoir or power plant operations in order to determine expected changes in energy production and revenue through the power plant as part of the Hydro Valuation Study (see Section 2.16).

2.16 Hydro Valuation Study

The Hydro Valuation Study was conducted as part of the alternatives analysis process to quantify the annual changes in energy revenue associated with proposed operational changes of the reservoir. Variations from baseline energy production as a result of modifying the powerhouse flow regime or reservoir water surface elevations were output from the hydro operations model. To determine the value of energy losses from the Eklutna Hydroelectric Project, the study investigated the value of the replacement energy within the MEA and Chugach Electric's systems. In the case of both utilities, any energy lost from the facility would be replaced by one of the multiple natural gas generation facilities located in the local system.

The value of energy produced from a natural gas generation facility is directly tied to the price of natural gas. In June 2023 the local provider of natural gas, Enstar Natural Gas Company LLC, presented to the Regulatory Commission of Alaska (RCA) a range of gas prices expected in 2026. The price of gas ranged from a low of $12.20 per thousand cubic feet (MCF) to $13.90/MCF with a median expected value of $13.05/MCF. Using the median expected gas price, the Project Owners performed a production cost model run of energy generation on the Railbelt system utilizing GenTrader®, an energy portfolio modeling software, to determine a forecasted price of energy from natural gas generation sources of $84.65/MWh.

Subject:	Supporting Data for Cost Effectiveness Model		

Revision Log

Revision No.	Date	Revision Description
0	08/30/2023	Draft

1.0 Introduction

A cost effectiveness model was utilized to compare various alternative protection, mitigation, and enhancement measures proposed by stakeholders as part of the Eklutna Fish & Wildlife Program. To capture the financial considerations of each proposed alternative, the capital costs, operations and maintenance (O&M) costs, and replacement energy costs must be annualized over the 35-year period of the agreement. This memorandum defines the methodology and components of the financial analysis that went into determining the annualized costs and ultimately the estimated ratepayer and taxpayer impacts for each proposed alternative.

2.0 Annualized Costs

To determine the annualized cost of each comprehensive alternative proposed as part of the alternatives analysis process, the components of capital costs, O&M costs, and replacement energy costs were evaluated. The details of this evaluation are presented in the following subsections.

2.1 Capital Expenditures

The estimated capital expenditures for each proposed alternative were based on the class 5 opinion of probable construction costs (OPCC) developed for each measure as part of the Phase 1 engineering design (McMillen, Eklutna Fish & Wildlife Project. Engineering Feasibility Study - Class 5 Opinion of Probable Construction Costs 2023). The estimated costs for each measure are defined in Table 2-1.

Table 2-1. Class 5 OPCC - Cost Summary.

PME Measure		Total Median Cost	Expected Estimate Cost Range Class 5 (-50% to +100%)		
A	Dam Release Modifications	$6,680,000	$3,340,000	to	$13,360,000
B	Siphon Bypass Pipeline	$22,371,500	$11,186,000	to	$44,743,000
C	AWWU Portal Release Facility	$5,546,500	$2,773,000	to	$11,093,000
D	AWWU Pipeline Release Facility	$2,248,300	$1,124,000	to	$4,497,000
E	Bypass Tunnel Release	$76,747,200	$38,374,000	to	$153,494,000
F	Channel Excavation	$569,000	$285,000	to	$1,138,000
G	Lach Q'atnu Creek Re-Route	$1,523,000	$762,000	to	$3,046,000
H	Spillway Modifications - Tainter Gate	$5,574,300	$2,787,000	to	$11,149,000
I	Spillway Modifications - Fixed Wheel Gate	$6,573,500	$3,287,000	to	$13,147,000
J	Gravity Flow Fish Ladder	$16,670,300	$8,335,000	to	$33,341,000
K	Variable Exit Fish Ladder	$17,569,600	$8,785,000	to	$35,139,000
L	Pumped Supply and Slide Fish Ladder	$15,240,200	$7,620,000	to	$30,480,000
M	Trap and Haul Facility	$8,336,200	$4,168,000	to	$16,672,000
N	Floating Surface Collector	$57,557,000	$28,779,000	to	$115,114,000
O	Fish Exclusion Barrier	$3,125,600	$1,563,000	to	$6,251,000
P	Replacement Dam	$113,344,500	$56,672,000	to	$226,689,000
Q	Lakeside Trail Improvements	$373,600	$187,000	to	$747,000
R	AWWU Maintenance Road Crossings	$2,941,500	$1,471,000	to	$5,883,000
S	Physical Habitat Manipulation	$1,469,200	$735,000	to	$2,938,000

A comprehensive alternative proposed by a stakeholder, owner, or interested party combines the individual costs of each measure for a combined estimated capital cost. It shall be noted that at the level of design presented in phase 1 engineering these costs carry an accuracy range of -50% to +100%, which will be further refined as part of further phases of engineering design. A summation of capital costs for an example comprehensive alternative proposed as part of the Fish & Wildlife Program is presented in Table 2-2.

Table 2-2. Example Comprehensive Alternative Cost Summary.

PME Measure	Capital Cost
AWWU Portal Release Facility:	$5,547,000
AWWU Maintenance Road Crossings:	$2,942,000
Lakeside Trail Improvements:	$374,000
Comprehensive Capital Cost:	$8,863,000

To annualize the cost of the capital expenditures over 35 years, a discount rate is applied to take into account the time value of capital costs spread over the 35-year program. The discount rate utilized by the Hydro Project owners for assessing future cash flows is equal to 5%. In addition to the discount rate applied for assessing future cash flow, the Regulatory Commission of Alaska (RCA) sets a Times Interest Earned Ratio (TIER) which must be applied on assessing future interest payments as part of the equation for setting utility rates. The TIER is only applied to assess capital cost cashflow for Chugach Electric Association (CEA) and Matanuska Electric Association (MEA) and is currently set at 1.75x and 1.60x, respectively.

To assess the responsibility of these costs per Project Owner, the annualized capital costs must vary based on the TIER and ownership of the project by entity. The breakdown of project ownership for capital costs associated with the Project is presented in Table 2-3 based on the comprehensive alternative discussed within this section. The 35-year annualized cost variation based on the required TIER is presented in Table 2-4. The annualized cost for the purposes of ratepayer impacts based on project ownership by utility is presented in Table 2-5.

Table 2-3. Project Ownership - Capital Expenditures.

Entity	Ownership
Chugach Electric Association	64.29%
Matanuska Electric Association	16.67%
Municipality of Anchorage	19.04%

Table 2-4. 35-Year Annualized Capital Costs with Varied TIER.

Description	35-Year Annualized Cost
Capital Cost	$8,863,000
35-Yr Annualized Cost; 1.75x TIER	$819,000
35-Yr Annualized Cost; 1.60x TIER	$760,000
35-Yr Annualized Cost; No TIER	$541,000

Table 2-5. 35-Year Annualized Capital Costs by Owner.

Entity	35-Year Annualized Cost
Chugach Electric Association	$527,000
Matanuska Electric Association	$127,000
Municipality of Anchorage	$103,000

2.2 Operations and Maintenance Annualized Costs

The estimated O&M costs for each proposed alternative were based on estimates developed for each measure as part of the Phase 1 engineering design (McMillen, Eklutna Fish & Wildlife Project. Engineering Feasibility Study - Class 5 Opinion of Probable Construction Costs 2023). The estimated O&M costs for each measure are defined in Table 2-6.

Table 2-6. O&M Cost Summary.

PME Measure		O&M Cost
A	Dam Release Modifications	$565,500
B	Siphon Bypass Pipeline	$664,300
C	AWWU Portal Release Facility	$196,300
D	AWWU Pipeline Release Facility	$196,300
E	Bypass Tunnel Release	$210,600
F	Channel Excavation	$0
G	Lach Q'atnu Creek Re-Route	$19,500
H	Spillway Modifications - Tainter Gate	$32,500
I	Spillway Modifications - Fixed Wheel Gate	$32,500

PME Measure		O&M Cost
J	Gravity Flow Fish Ladder	$604,500
K	Variable Exit Fish Ladder	$657,800
L	Pumped Supply and Slide Fish Ladder	$813,800
M	Trap and Haul Facility	$200,200
N	Floating Surface Collector	$1,773,200
O	Fish Exclusion Barrier	$37,700
P	Replacement Dam	$299,000
Q	Lakeside Trail Improvements	$0
R	AWWU Maintenance Road Crossings	$0
S	Physical Habitat Manipulation	$0

A comprehensive alternative proposed by a stakeholder, owner, or interested party combines the individual costs of each measure for a combined estimated O&M cost. A summation of O&M costs for an example comprehensive alternative proposed as part of the Fish & Wildlife Program is presented in Table 2-7.

Table 2-7. Example Comprehensive Alternative Cost Summary.

PME Measure	Capital Cost ($)
AWWU Portal Release Facility:	$196,300
AWWU Maintenance Road Crossings:	$0
Lakeside Trail Improvements:	$0
Comprehensive O&M Cost:	$163,800

To annualize the cost of the O&M expenditures over 35 years, an annual increase is applied to consider the increasing price of labor and materials over time. The escalation is based on historical trends for the utilities and is equal to an annual increase of 3% per year.

To assess the responsibility of these costs per Project Owner, the annualized O&M costs vary based on the ownership of the project by entity and is equal to the ownership breakdown of the capital costs of the project, as presented in Table 2-8. The 35-year annualized cost including annual escalation is equal to $345,000/yr based on the comprehensive alternative proposed as part of the Fish & Wildlife Program. The annualized cost for the purposes of ratepayer impacts based on project ownership by utility is presented in Table 2-9.

Table 2-8. Project Ownership – O&M Expenditures.

Entity	Ownership
Chugach Electric Association	64.29%
Matanuska Electric Association	16.67%
Municipality of Anchorage	19.04%

Table 2-9. 35-Year Annualized O&M Costs by Owner.

Entity	35-Year Annualized Cost
Chugach Electric Association	$221,800
Matanuska Electric Association	$57,500
Municipality of Anchorage	$65,688

2.3 Replacement Energy Annualized Costs

The estimated replacement energy costs for each comprehensive alternative are based on the hydropower operations model developed as part of the Year 1 study results (McMillen 2023). For the comprehensive alternative proposed as part of the Fish & Wildlife Program the replacement energy is based on reduced flow to the Eklutna Power Plant as a result of flow releases into the Eklutna River. The proposed release regime is presented in Table 2-10.

Table 2-10. Eklutna River Flow Release by Month.

Month	Flow Rate (cfs)
Jan	27
Feb	27
Mar	27
Apr	27
May	34
Jun	40
Jul	40
Aug	40
Sep	40
Oct	40
Nov	35
Dec	27

Modifying reservoir and powerhouse operations to release the proposed flow regime into Eklutna River results in an average annual decrease of generation of 15,725 MWh/yr. To determine the value of energy losses from the Eklutna Power Plant the value of the replacement energy within MEA and CEA's system was studied. In the case of both utilities, any energy lost from the facility would be replaced by one of the multiple natural gas generation facilities located in the local system.

The value of energy produced from a natural gas generation facility is directly tied to the price of natural gas. In June 2023 the local provider of natural gas, Enstar Natural Gas Company LLC, presented to the RCA a range of gas prices expected in 2026. The price of gas ranged from a low of $12.20 per thousand cubic feet (MCF) to $13.90/MCF with a median expected value of $13.05/MCF. Using the median expected gas price, the Project Owners performed a production cost model run of energy generation on the Railbelt system utilizing GenTrader®, an energy portfolio modeling software, to determine a forecasted price of energy from natural gas generation sources of $84.65/MWh. Based on the median price of replacement energy, an initial cost of replacement energy during Year 1 was determined to be $1,330,000.

To annualize the cost of the replacement energy over 35 years, an annual increase is applied to consider the increasing price of gas over time. The escalation is based on historical trends for the utilities and is equal to an annual increase of 1% per year. Considering the annual increase in energy costs, the 35-year average annualized cost of replacement energy is equal to $1,593,000/Yr.

To assess the responsibility of these costs per Project Owner, the annualized replacement energy costs vary based on the ownership of the project by entity as presented in Table 2-11. The annualized cost for the purposes of ratepayer impacts based on project ownership by utility is presented in Table 2-12.

Table 2-11. Project Ownership – Replacement Energy Costs.

Entity	Ownership
Chugach Electric Association	64.29%
Matanuska Electric Association	35.71%
Municipality of Anchorage	0%

Table 2-12. 35-Year Annualized Replacement Energy Costs by Owner

Entity	35-Year Annualized Cost
Chugach Electric Association	$1,024,000
Matanuska Electric Association	$569,000
Municipality of Anchorage	$0

2.4 Comprehensive Cost Summary

After determining the individual annualized costs of each sub-component by utility ownership structure, the overall annualized cost per comprehensive alternative is combined to assess impacts to each Project Owner. The combined annual costs by utility are presented in Table 2-13.

Table 2-13. 35-Year Annualized Cost Summary.

Entity	35-Year Annualized Cost
Chugach Electric Association	$1,772,800
Matanuska Electric Association	$753,500
Municipality of Anchorage	$168,700

3.0 Ratepayer & Taxpayer Impacts

Each of the utilities is a member-owned not-for-profit cooperative of which rate schedules are set by the RCA based on annual expenses for O&M, capital expenditures, labor, and debt service if applicable. The Municipality of Anchorage must fund expenses through the collection of property taxes on an annual basis. The annualized costs associated with ownership of this project will have direct impacts to member utility rates and property taxes for households residing in the Anchorage area. The energy rate increases based on annual expenditures are 0.3% and 1.12% per $1,000,000 spent for CEA and MEA, respectively. On a property tax basis, the Municipality of Anchorage must increase property taxes by 0.03 mils per $1,000,000 spent, with 0.03 mils being defined as a $3 increase in property tax per year per $100,000 in property value. A summary of the ratepayer and taxpayer impacts based on the example comprehensive alternative is presented in Table 3-1.

Table 3-1. Summary of Ratepayer and Taxpayer Impacts.

Entity	Ratepayer / Taxpayer Impacts
Chugach Electric Association	+0.53%
Matanuska Electric Association	+0.84%
Municipality of Anchorage	0.0051 mils $0.51/$100k

LONG-TERM WATER TRANSPORTATION AGREEMENT

This LONG-TERM WATER TRANSPORTATION AGREEMENT (this "Agreement"), dated as of [_____] (the "Effective Date"), is entered into by and between Anchorage Water and Wastewater Utility ("AWWU"), and Chugach Electric Association, Inc. ("Chugach"), Matanuska Electric Association, Inc. ("MEA"), and the Municipality of Anchorage ("MOA") (each of Chugach, MEA, and MOA is an "Owner" and collectively they are referred to as the "Owners"). The Owners and AWWU are sometimes referred to herein as a "Party" or collectively as the "Parties".

R E C I T A L S

WHEREAS, the Owners own and operate the Eklutna Hydroelectric Project, commissioned in 1954, which includes an earthen dam at the outlet of Eklutna Lake and which, under normal operating conditions, diverts all inflows of water into the Eklutna Lake for hydroelectric production rather than into the Eklutna River;

WHEREAS, AWWU owns and operates certain existing water transportation facilities integrated with the Eklutna Hydroelectric Project as further described and depicted in Exhibit B (the "AWWU Facilities") located near the outlet of Eklutna Lake and adjacent to the Eklutna River, which AWWU uses to provide public water supply for its customers;

WHEREAS, the Owners are parties to the 1991 Agreement (as defined below), pursuant to which they are required to develop and implement a Fish and Wildlife program every thirty-five years to protect, mitigate damages to, and enhance fish and wildlife impacted by the development of the Eklutna Hydroelectric Project (the "Fish and Wildlife Program");

WHEREAS, as a result of the process set forth in the 1991 Agreement, the Owners have developed a draft Fish and Wildlife Program in which the Owners propose to: (1) develop an Eklutna River release facility consisting in part of AWWU Facilities and facilities constructed pursuant to the Interconnection Agreement, all as further described in Exhibit A and as will be depicted as-built in the Operating Procedures (the "Facility"); (2) to transport water from Eklutna Lake through the Facility and release it into the Eklutna River; and (3) to maintain and operate the Facility;

WHEREAS, in connection with the execution of this Agreement and in order to enable future implementation of the Fish and Wildlife Program (if approved by the Governor of Alaska) and address compensation for AWWU's use of Owners' Water Rights, the Parties also entered into a Water Facilities Interconnection Agreement (the "Interconnection Agreement") pursuant to which the Parties will construct the Facility, and a new Public Water Supply Agreement (the "Water Supply Agreement");

WHEREAS, after the Facility achieves Final Acceptance pursuant to the terms of the Interconnection Agreement and all other conditions precedent set forth herein are achieved, (1) the Owners' desire to engage AWWU to provide, and AWWU desires to provide, the Water Transportation Services; and (2) the Owners and AWWU each desire to operate and maintain portions of the Facility pursuant to the terms and conditions set forth in this Agreement;

NOW, THEREFORE, in consideration of the premises of this Agreement, the Interconnection Agreement, and the Water Supply Agreement, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Owners and AWWU, intending to be legally bound, hereby agree as follows:

ARTICLE 1.
DEFINITIONS; INTERPRETATION; EXHIBITS

1.1 Defined Terms. Capitalized terms used in this Agreement without other definition shall have the meanings set forth in Schedule 1.1, unless the context requires otherwise.

1.2 Interpretation. As used in this Agreement, the terms "herein," "herewith" and "hereof" are references to this Agreement, taken as a whole; the terms "includes" or "including" shall mean "including, without limitation"; and references to a "Section," "Article", "Exhibit" or "Schedule" shall mean a Section, Article, Exhibit or Schedule of this Agreement, as the case may be, unless in any such case the context requires otherwise. All references to a given Exhibit, Schedule, agreement, instrument or other document shall be a reference to that agreement, instrument or other document as modified, amended, supplemented and restated through the date as of which such reference is made. A reference to a Person includes its permitted successors and permitted assigns. The singular shall include the plural and the masculine shall include the feminine and neuter, and vice versa.

ARTICLE 2.
TERM

2.1 Term.

(a) The term of this Agreement shall commence on the Effective Date and continue until the conclusion of the Delivery Term or unless earlier terminated pursuant to the terms of this Agreement (the "Term").

(b) AWWU's obligation to provide the Water Transportation Services and the Parties' obligations to commence the Operational Work hereunder shall be effective on the date upon which the Facility achieves Final Acceptance under terms of the Interconnection Agreement (the "Delivery Term Effective Date") and shall continue in full force and effect for 35 years thereafter, subject to any early termination provisions set forth herein (the "Initial Delivery Term"). At the conclusion of the Initial Delivery Term, the Agreement shall automatically renew each year, unless a Party notifies the other Party at least 60 days prior to the expiration of the Initial Delivery Term or each extended year thereafter that it does not wish to renew the Agreement. The Initial Delivery Term as so extended is the "Delivery Term".

ARTICLE 3.
WATER TRANSPORTATION AND SCHEDULING

3.1 Water Transportation Services. During the Delivery Term, AWWU shall, pursuant to the schedules set forth in Section 3.2 and the Operating Procedures developed pursuant to Section 5.1, transport Owners' Water, comingled with and undifferentiated from AWWU's Water, through AWWU Facilities from the Injection Point to the Delivery Point, in any amount requested

by the Owners (the "Water Transportation Services"), provided, that, such requested amount shall under no circumstances: (a) inhibit the ability of AWWU to deliver a daily flow rate of at least 41 MGD to the downstream Eklutna Water Treatment Facility at a pressure sufficient to allow normal operation of the EWTF as currently configured; (b) exceed the hydraulic capacity or design criteria of the AWWU Facilities; or (c) exceed any then-active Curtailment Limit (clauses (a)-(c), the "Water Release Limits").

3.2 Scheduling.

(a) During the first week of each month of each year of the Delivery Term, and in accordance with the Operating Procedures, the Owners shall provide AWWU with a written anticipated daily Owners' Water release schedule for the following month (e.g., on the first Business Day of January, the Owners shall provide the anticipated schedule for each day of February) based on Eklutna Lake levels and Fish and Wildlife Program obligations, all subject to the Water Release Limits (the "Monthly Water Release Schedule").

(b) No later than the last Business Day of each week of the Delivery Term, the Owners may submit in writing in accordance with the Operating Procedures, updated daily Owners' Water release amounts for the following week, provided that under no circumstance shall such updates exceed the Water Release Limits.

3.3 Metering.

(a) At all times during the Delivery Term, AWWU shall maintain an Injection Point Flow Meter to measure real-time water flowing into AWWU's Facilities from Eklutna Lake.

(b) At all times during the Delivery Term, the Owners shall maintain the Delivery Point Meter to measure real-time water quantities flowing into the River Release Structure at the Delivery Point, which shall be used to calculate the amount of Owners' Water received by the Owners as part of the Water Transportation Services.

(c) Each Party shall take reasonable measures to ensure that the other Party has access to real-time water flow quantity information from both the Injection Point Flow Meter and the Delivery Point Meter, as applicable, pursuant to procedures set forth in the Operating Procedures.

(d) For each month of the Delivery Term, the Owners shall prepare a written report for AWWU detailing the actual water flow amounts through the Injection Point Flow Meter and the Delivery Point Meter, and the amount of Owners' Water delivered to the Delivery Point, all as compared with the Monthly Water Release Schedule (as updated by Section 3.2(b) and pursuant to the procedures detailed in the Operating Procedures).

ARTICLE 4.
OPERATION AND MAINTENANCE

4.1 AWWU Facilities and AWWU's Portion. Throughout the Delivery Term, the AWWU Facilities and AWWU's Portion shall be exclusively operated, managed, and maintained by AWWU or any AWWU designee in accordance with all Governmental Approvals, applicable

Law, Prudent Industry Standards, all subject to the Owners' maintenance access rights to the Owners' Isolation Valve as set forth in Section 4.3.

4.2 Owners' Portion. Throughout the Delivery Term, the Owners' Portion shall be exclusively operated, managed, and maintained by the Owners or any designee of the Owners in accordance with all Governmental Approvals, applicable Law, and Prudent Industry Standards.

4.3 Owners' Isolation Valve. Throughout the Delivery Term, the Owners shall be responsible for all operation and maintenance of the Owners' Isolation Valve contained within AWWU's Portion. As part of the Access License granted by AWWU to the Owners pursuant to Section 9.1, AWWU shall ensure that at all times the Owners have access to the Owners' Isolation Valve as necessary to enable the Owners to maintain and operate the Owners' Isolation Valve in accordance with the Operating Procedures, provided, that, AWWU may from time to time assume operational responsibility for the Owners' Isolation Valve temporarily only to the extent necessary to address urgent security or safety issues and to avoid putting AWWU's public water supply at risk of interruption or contamination.

4.4 Approvals. Throughout the Delivery Term, AWWU shall be responsible for obtaining and maintaining all Approvals necessary for the provision of Water Transportation Services and all Operational Work set forth herein, except for those Approvals set forth on Exhibit C hereto, for which the Owners will be responsible for obtaining and maintaining (the "Owners' Approvals"). Each Party shall provide the other Party with such reasonable assistance as such first Party may request in obtaining applicable Approvals.

4.5 Duty to Cooperate. Each Party shall, throughout the Delivery Term, cooperate with the other Party as necessary to facilitate the provision of the Water Transportation Services, the Operational Work and all other responsibilities and obligations under this Agreement in a timely manner.

4.6 Skill and Expertise. Each Party shall, throughout the Delivery Term, use commercially reasonable efforts to ensure that all employees and contractors engaged in connection with the provision of the Water Transportation Services, the Operational Work or any other maintenance of, operation of, service of, and any future modification to (to include design, construction, commissioning, and installation) the Facility shall have the appropriate and necessary experience, skill and expertise to carry out the tasks efficiently, professionally, and in accordance with Prudent Industry Standards and applicable Law.

4.7 Successor Operator. If, during the Term, the Owners wish to no longer be responsible for any of the operation and maintenance responsibilities set forth in Sections 4.2 and 4.3, for any reason, prior to turning over such operation and maintenance to a third-party entity, AWWU must consent to such third-party entity, such consent not to be unreasonably withheld, conditioned, or delayed. For the sake of clarity, this Section 4.7 does not impact the Owners' right to freely use Subcontractors to conduct any of its responsibilities under Sections 4.2 and 4.3; this Section 4.7 only applies in situations where the Owners plan to no longer be ultimately liable for such obligations hereunder.

ARTICLE 5.
OPERATING PROCEDURES

5.1 Operating Procedures.

(a) At least 60 days prior to the commencement of the Delivery Term, AWWU and the Owners shall develop written detailed operating procedures governing the Water Transportation Services pursuant to the terms in this Agreement (the "Operating Procedures"). Such Operating Procedures shall comply with all applicable Approvals, Prudent Industry Standards and applicable Law and shall, at a minimum, set forth (i) the agreed methods for day-to-day communication and reporting requirements of each Party; (ii) key personnel lists for AWWU and for the Owners necessary for the facilitation of the Operational Work and the provision of the Water Transportation Services; (iii) processes for planning and communication between the Parties to coordinate regarding scheduling pursuant to Section 3.2 and Excused Events pursuant to Article 8; (iv) reporting and determining Curtailment Durations and Curtailment Limits for Excused Events pursuant to Article 8; (v) sharing of information from the Delivery Point Meter and the Injection Point Flow Meter pursuant to Section 3.3; (vi) ongoing reporting requirements of the Owners of metered water flow quantities measured at the Delivery Point and the Injection Point pursuant to Section 3.3; (vii) the process for obtaining and maintaining necessary Approvals throughout the Delivery Term; (viii) reference to necessary Facility equipment specifications and operation and maintenance manuals; (ix) inclusion of the final as-built drawings for the Facility developed pursuant to the Interconnection Agreement; (x) a clear process for ensuring that at all times during the Delivery Term, the Water Release Limits are met; (xi) each Party's legal notice address information for the delivery of notices required under this Agreement; and (xii) any other procedures related to the provision of the Water Transportation Services and Operational Work that the Parties deem necessary. Such Operating Procedures shall include any and all detailed definitions, drawings, and descriptions of the AWWU Facilities and the Facility as necessary to facilitate the coordination and responsibilities of the Parties as set forth herein. In the event of any disagreement in the development of the Operating Procedures, the Parties shall work in good faith to promptly resolve differences. AWWU's actual costs of developing such Operating Procedures shall be reimbursed by the Owners pursuant to Section 6.3.

(b) Throughout the Delivery Term, the Operating Procedures shall be updated from time to time by AWWU as needed upon written notice to the Owners, or upon written request by the Owners, to reflect ministerial changes to ensure continued accuracy and relevancy (e.g. personnel, contact/notice information, and Facility equipment upgrades), provided, that, such changes made pursuant to this Section 5.1(b) shall under no circumstances materially modify the obligations and responsibilities of the Parties as set forth herein.

ARTICLE 6.
COSTS; TAXES; REIMBURSEMENT

6.1 Costs and Compensation. Unless specifically stated otherwise, all costs borne initially by each Party in connection with the exercising of its rights and the performance of its obligations under this Agreement shall be the responsibility of such Party initially incurring such costs. In partial consideration of the costs to AWWU incurred in provision of the Water Transportation Services provided under this Agreement for the benefit of the Owners, the Parties

entered into the Water Supply Agreement for the same duration as this Agreement, pursuant to which AWWU shall have access to the use of certain of the Owners' facilities without additional compensation for its provision of public water supply.

6.2 Taxes. The Owners shall be responsible for and shall reimburse AWWU for any sales, use, gross receipts, occupation, and other taxes (excluding income, and franchise tax) imposed upon AWWU from time to time payable related to AWWU's provision of services set forth herein.

6.3 Reimbursement. For those AWWU costs that the Owners are specifically required to reimburse hereunder, AWWU shall submit to each of the Owners a detailed accounting of such cost for which AWWU is seeking reimbursement, together with such supporting documentation as the Owners shall reasonably require, including a reference to the applicable section of this Agreement demonstrating the Owners' responsibility for such costs. Within sixty (60) Days after receiving a properly completed application for reimbursement and all required supporting documentation, each of the Owners shall individually: (i) pay AWWU their respective Cost Responsibility Proportion of the amounts set forth in AWWU's application for payment; or (ii) notify AWWU in writing that such Owner believes in good faith that a requested payment amount is not due and owing and shall request the commencement of negotiations pursuant to Section 12.5. In addition to the requirement that each Owner pay its Cost Responsibility Proportion as required in this Section, the Owners shall each be jointly and severally liable for all reimbursement obligations owed to AWWU under this Article 6.

ARTICLE 7.
TITLE

7.1 Title; Custody; Risk of Loss

(a) Legal title to and ownership of all Owners' Water shall remain with the Owners at all times during the provision of Water Transportation Services.

(b) For Owners' Water flowing through AWWU's Facilities as part of the Water Transportation Services: control, custody and risk of loss of such Owners' Water shall transfer from the Owners to AWWU at the Injection Point, where such Owners' Water shall comingle with AWWU's Water until reaching the Delivery Point, at which point the custody, control and risk of loss for an amount of water equal to the original amount of Owners' Water released into the AWWU Facilities at the Injection Point shall pass back to the Owners.

ARTICLE 8.
EMERGENCY CURTAILMENT; FORCE MAJEURE

8.1 Outages

(a) Planned Outages. AWWU shall be excused from the performance of the Water Transportation Services in the event of Planned Outages noticed by and compliant with this Section 8.1(a). AWWU and the Owners shall develop a schedule and protocol, pursuant to the procedures set forth in the Operating Procedures, for Planned Outages of the Facility or the AWWU Facilities in order to allow for routine maintenance and inspection activities. Such

schedule for each Planned Outage shall specify the associated Curtailment Limits and Curtailment Duration. Such schedule and protocol shall take into account routine hydropower operations to ensure that Planned Outages only be scheduled at times when there is sufficient water available in Eklutna Lake to allow water releases through the maintenance gate of the diversion dam in the amounts necessary for the Owners to meet their obligations under the Fish and Wildlife Program. In addressing Planned Outages on AWWU Facilities and the AWWU Portion, AWWU shall use commercially reasonable efforts to minimize the length of the Curtailment Duration and the level of Curtailment Limits. For the sake of clarity, planned outages to AWWU Facilities or other AWWU property downriver of the Isolation Valve Structure do not meet the definition of Planned Outage and are addressed in Section 8.1(c)(i) below.

(b) Forced Outages. AWWU shall be excused from the performance of the Water Transportation Services in the event of Forced Outages noticed by and compliant with this Section 8.1(b). AWWU shall (i) use commercially reasonable efforts to notify the Owners of any Forced Outage, and (ii) provide an initial written or email estimate of the expected Curtailment Duration and Curtailment Limit within two (2) hours thereafter. In managing Forced Outages, AWWU shall use commercially reasonable efforts to minimize the duration of resulting Curtailment Duration and the level of Curtailment Limits. For the sake of clarity, forced outages to AWWU Facilities or other AWWU property downriver of the Isolation Valve Structure do not meet the definition of Forced Outage and are addressed in Section 8.1(c)(ii) below. During a Forced Outage, the Owners shall be responsible for complying with their Fish and Wildlife Program obligations through other means (such as releasing water into the river through the maintenance gate of the diversion dam).

(c) Outages to Downstream AWWU Infrastructure.

(i) In the event of any planned outage in the AWWU Facilities or in other AWWU property downstream of the Isolation Valve Structure that, without the closing of the Owners' Isolation Valve, would have an effect on the flow of water through the AWWU Facilities from the Injection Point to the River Release Structure, AWWU must notify the Owners at least thirty (30) days in advance of such planned outage to allow the Owners to adjust the Owners' Isolation Valve in such a way that allows for continued Water Transportation Services during such outage.

(ii) In the event of any forced, unexpected outage in the AWWU Facilities or at the Eklutna Water Treatment Facility downstream of the Isolation Valve Structure that, without the closing of the Owners' Isolation Valve, would have an effect on the flow of water through the AWWU Facilities from the Injection Point to the River Release Structure, AWWU shall notify the Owners as soon as possible to allow for the Owners to adjust the Owners' Isolation Valve to allow for the greatest possible continued flows of water into the Eklutna River through the River Release Structure during the duration of such forced outage.

8.2 Force Majeure. Each Party shall be excused from performance and shall not be considered to be in default with respect to any obligation hereunder, except for the Owners' obligation to reimburse AWWU for costs pursuant to Section 6.3, if and to the extent that such Party's failure of, or delay in, performance is due to a Force Majeure Event; provided, that:

(a) such Party gives the other Party prompt written notice describing the particulars of the Force Majeure Event as soon as is reasonably practicable after becoming aware of the occurrence of the Force Majeure Event;

(b) the suspension of performance is of no greater scope and of no longer duration than is reasonably required by the Force Majeure Event;

(c) no obligations of affected Party that arose before the occurrence of the Force Majeure Event causing the suspension of performance shall be excused as a result of such Force Majeure Event, unless and only to the extent that the performance of such obligations is impaired by the Force Majeure Event;

(d) the Party uses diligent commercially reasonable efforts to overcome or mitigate the effects of the Force Majeure Event; and

(e) when the Party is able to resume performance of its obligations under this Agreement, such Party shall give the other Party written notice to that effect and shall promptly resume performance hereunder.

ARTICLE 9.
ACCESS; ROADS AND BRIDGES

9.1 Site Access. Throughout the Delivery Term, AWWU shall, with respect to the land and access roads within its control, provide the Owners with a non-exclusive license to access the Site (through use of AWWU's access road), AWWU's Portion, and the AWWU Facilities as necessary to enable the Owners to operate and maintain the Owners' Isolation Valve and the Owners' Portion, and as otherwise reasonably necessary to facilitate the Owners' rights and obligations hereunder (the "Access License"), provided, that, AWWU may from time to time limit access to the Site or the AWWU Facilities temporarily only to the extent necessary to address reasonable security or safety issues and to avoid putting AWWU's public water supply at risk of interruption or contamination. To the extent that any additional access permissions from third-party landowners adjacent to the Site may be required for the Owners to exercise their rights or perform their obligations hereunder, obtaining such Approvals shall be the responsibility of the Owners, subject to AWWU's duty to assist and cooperate under Section 4.5, and provided that such assistance and cooperation with respect to such third-party approvals may require that AWWU be the first and primary point of contact with such third party in situations where AWWU has an existing easement or applicable existing relationship with such third party. AWWU shall be reimbursed for any and all of its reasonable and documented costs or expenses of providing such assistance and cooperation with respect to such third-party approvals. To the extent that AWWU adds access or other security or safety limitations to the Site, to AWWU's Portion or to the AWWU Facilities, the Owners and AWWU shall cooperate in ensuring continuous access for the Owners and their contractors to enable operation and maintenance of the Owners' Isolation Valve and the Owners' Portion, subject to the new limitations.

9.2 AWWU Access Road. AWWU shall be responsible, at its own expense, for brushing, clearing, plowing, and maintaining its access road and all bridges thereon to the AWWU Facilities, both upstream and downstream of the Facility. The Owners may use such access road

as part of its Access License granted pursuant to Section 9.1, and may, at their discretion, brush, clear, and plow the access road as needed to facilitate the Owners' access to the Facility, provided that under no circumstances shall the Owners be required to conduct such brushing, clearing or plowing.

9.3 Access Bridges. Pursuant to the Interconnection Agreement, the Owners agreed to install Access Bridges to improve Facility access and account for the additional traffic on the AWWU access road connected with the activities described in the Interconnection Agreement and this Agreement. As set forth in the Interconnection Agreement, upon completion of Access Bridge construction, the full responsibility for (and associated costs of) such bridge maintenance passes to AWWU, provided, that the Owners shall be responsible for any maintenance associated with damage caused by the Owners' gross negligence or intentional misconduct.

ARTICLE 10.
LIMITATIONS ON LIABILITY

10.1 Aggregate Limitation of Liability. Notwithstanding any other provision of this Agreement, the total aggregate liability of the Owners and the total aggregate liability of AWWU arising out of or relating to this Agreement, from any and all causes, whether based on contract, tort (including negligence), strict liability or any other cause of action, shall in no event exceed ten million dollars ($10,000,000.00) for AWWU, and ten million dollars ($10,000,000.00) for the Owners collectively, provided that such limit shall not apply in the case of such Party's (i) gross negligence or willful misconduct, (ii) third-party indemnity obligation, or (iii) breach of any representation or warranty.

10.2 CUMULATIVE REMEDIES. IF NO REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY PROVIDED, OR IF A REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY NON-EXCLUSIVE, THE NON-DEFAULTING PARTY SHALL HAVE THE RIGHT TO EXERCISE ALL RIGHTS AND REMEDIES AVAILABLE TO IT AT LAW OR IN EQUITY; PROVIDED, HOWEVER, THAT THE LIABILITY OF THE DEFAULTING PARTY SHALL BE LIMITED TO DIRECT, ACTUAL DAMAGES ONLY AND ALL OTHER DAMAGES AND REMEDIES ARE WAIVED.

10.3 WAIVER OF CERTAIN DAMAGES. EXCEPT WITH RESPECT TO INDEMNIFICATION OF THIRD-PARTY CLAIMS PURSUANT TO ARTICLE 11, OR AS OTHERWISE EXPRESSLY PROVIDED FOR HEREIN, IN NO EVENT SHALL EITHER PARTY BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY, INDIRECT, BUSINESS INTERRUPTION OR SIMILAR DAMAGES, WHETHER BY STATUTE, IN TORT, BY CONTRACT OR OTHERWISE.

ARTICLE 11.
INDEMNIFICATION

11.1 Indemnity. To the fullest extent permitted by Law, each Party shall indemnify, hold harmless and defend the other Party and its directors, officers, shareholders, partners, agents and employees, and the Affiliates of the same (collectively, the "Indemnified Parties"), from and against any and all claims, loss, damage, expense and liability, including court costs and reasonable

attorneys' fees (collectively, "Liabilities") incurred by the Indemnified Parties in connection with or arising from: (i) the Water Transportation Services and (ii) any claim for physical damage to or physical destruction of any part of the Facility, the AWWU Facilities, or death of or bodily injury to any person, to the extent such Liabilities were caused by the negligence of the Indemnifying Party or its agents or employees or others under such Indemnifying Party's control, except any Liabilities incurred due to the negligence or willful misconduct of an Indemnified Party. For the purpose of the definition of "Indemnified Parties" AWWU shall not be considered to be an "Affiliate" of the MOA.

11.2 Additional Owners Indemnity. To the fullest extent permitted by Law, the Owners shall indemnify, hold harmless, and defend AWWU and its Indemnified Parties from any Liabilities incurred by AWWU and its Indemnified Parties arising from damage to AWWU's water line and other infrastructure, including but not limited to its infrastructure downstream of the Facility (*i.e.* conditions caused by scouring or erosion of the river bed or banks that damage AWWU's water line and/or facilities) as a direct result of the instream water flows conveyed into the Eklutna River as part of the Water Transportation Services. The Owners shall further indemnify, defend and hold AWWU harmless from any Liabilities directly related to fish and wildlife mitigation measures and arising out of normal operation of the AWWU Facilities, the Facility, or any other facilities of AWWU, in a manner consistent with this Agreement, the Interconnection Agreement, the Water Supply Agreement, Prudent Industry Standards, the most current edition of the AWWU Design and Construction Practices Manual, the Municipality of Anchorage Standard Specifications and Anchorage Municipal Code, unless such Liabilities arose out of the negligence, violation of Law, or intentional misconduct by AWWU.

11.3 Defense of Claims. A Party with an indemnification obligation pursuant to this ARTICLE 11 (an "Indemnifying Party") shall have the right to defend the Indemnified Parties pursuant to this ARTICLE 11 by counsel of the Indemnifying Party's selection (including insurance counsel) reasonably satisfactory to the Indemnified Party, unless in the opinion of counsel for the Indemnifying Party a conflict of interest between the Parties may exist with respect to such claim. If the Indemnifying Party does not assume the defense of the Indemnified Party, or if a conflict precludes counsel for the Indemnifying Party from providing the defense, then the Indemnifying Party shall reimburse the Indemnified Party on a monthly basis for the Indemnified Party's defense through separate counsel of the Indemnified Party's choice. Even if the Indemnifying Party assumes the defense of the Indemnified Party with acceptable counsel, the Indemnified Party, at its sole option, may participate in the defense, at its own expense, with counsel of its own choice without relieving the Indemnifying Party of any of its obligations hereunder. The Parties shall give each other prompt written notice of any asserted claims or actions indemnified against hereunder and shall cooperate with each other in the defense of any such claims or actions. Without the prior written consent of the Indemnified Party, which consent shall not be unreasonably withheld, conditioned or delayed, no Indemnifying Party shall settle any such claims or actions in a manner that would require any action or forbearance from action by any Indemnified Party.

ARTICLE 12.
DEFAULT AND REMEDIES; TERMINATION; DISPUTE RESOLUTION

12.1 Event of Default. The following shall constitute events of default on the part of either party (each, an "Event of Default") under this Agreement:

(a) If a Party makes a general assignment for the benefit of its creditors, or if a receiver is appointed on account of the insolvency of such Party, or if such Party files a petition seeking to take advantage of any other Law relating to bankruptcy, insolvency, reorganization, winding up or composition of or readjustment of debts and, in the case of any such proceeding instituted against such Party (but not by such Party) such proceeding is not dismissed within sixty (60) days of such filing;

(b) If a Party fails to comply with any material terms of this Agreement not otherwise set forth as an Event of Default in this Section 12.1(b) and fails to cure or remedy such failure within thirty (30) days after notice and a written demand is made by the non-defaulting Party to the defaulting Party to cure the same or, if such failure cannot be cured within thirty (30) days, the defaulting Party fails to commence to cure such failure within thirty (30) days after such notice and written demand and thereafter diligently pursue such cure to completion, which shall in no event be later than ninety (90) days after such notice;

(c) If a Party defaults under the Water Supply Agreement or the Interconnection Agreement;

(d) If a Party fails to make any payment due hereunder within sixty (60) days after written notice from the non-defaulting Party; or

(e) If any representation or warranty of a Party in this Agreement proves to have been false or misleading in any material respect when made, and such Party has not, within thirty (30) days after written notification thereof from the non-defaulting Party, either fully remedied, or commenced and diligently pursued the remedy, of all adverse impacts on the non-defaulting Party resulting therefrom, all to the reasonable satisfaction of the non-defaulting Party.

12.2 Remedies Upon Event of Default. Upon the occurrence and continuation of an Event of Default, the non-defaulting Party shall have the right to terminate this Agreement and the Water Supply Agreement upon ten (10) days written notice and pursue any other remedy available to such non-defaulting party at law or in equity arising out of such Event of Default, including a claim for monetary damage or specific performance.

12.3 Automatic Cross-Agreement Termination. If this Agreement is terminated for any reason during the Delivery Term, the Interconnection Agreement and the Water Supply Agreement shall automatically terminate effective as of the same date of this Agreement's termination.

12.4 Termination for Failure of Conditions Precedent. If, prior to the Delivery Term, the Owners, in their reasonable discretion, decide to not construct the Facility due to the failure to achieve the Construction Start CPs as defined in the Interconnection Agreement, the Owners may terminate this Agreement without liability.

12.5 Dispute Resolution. In the event of any dispute arising under this Agreement (a "Dispute"), within ten (10) Business Days following notice by either Party, (i) each Party shall appoint a representative, and (ii) the representatives shall meet, negotiate and attempt in good faith to resolve the Dispute quickly, informally and inexpensively. In the event the representatives cannot resolve the Dispute within thirty (30) Days after the first meeting, either Party may request that consideration and resolution of the Dispute be transferred to a designated representative of each Party's senior management. Within ten (10) Days following such a request, each Party shall submit a written summary of the Dispute describing the issues and claims to a senior officer of each Party designated to address the Dispute. Within ten (10) Business Days after receipt of each Party's Dispute summaries, the senior management representatives for both Parties shall negotiate in good faith to resolve the Dispute. If such senior management representatives are unable to resolve the Dispute within thirty (30) Days thereafter, either Party may pursue any available legal remedies.

ARTICLE 13.
REPRESENTATIONS

13.1 General Representations and Warranties. Each Owner and AWWU hereby represents and warrants as of the Effective Date and the Delivery Term Effective Date that:

(a) It is duly organized, validly existing and in good standing under the Laws of the state of its formation and is duly qualified to do business in the jurisdiction where the Site is located.

(b) It has all necessary power and authority to execute, deliver and perform its obligations under this Agreement; its execution, delivery and performance of this Agreement have been duly authorized by all necessary corporate, municipal, or other action on its part; and this Agreement has been duly and validly executed and delivered by it and constitutes its legal, valid and binding obligation enforceable against it in accordance with its terms, except as the enforceability thereof may be limited by bankruptcy, insolvency, reorganization or moratorium or other similar Laws relating to the enforcement of creditors' rights generally and by general equitable principles.

(c) It is not in violation of any applicable Law, or any judgment entered by any federal, state, local or other Governmental Authority, which violations, individually or in the aggregate, would adversely affect its performance of any obligations under this Agreement. There are no legal or arbitration proceedings or any proceeding by or before any Governmental Authority, now pending or (to its best knowledge) threatened against it which, if adversely determined, could have a material adverse effect upon its financial condition, operations, prospects or business, as a whole, or its ability to perform under this Agreement.

(d) No authorization, approval, exemption, or consent of or by any Person is required by it in connection with the execution, delivery, and performance of this Agreement. In addition, each Party represents and warrants to the other Party that the Governmental Approvals required to be obtained by such Party either have been obtained by such Party and are in full force and effect on the date hereof or will be obtained by such Party and will be in full force and effect on or prior to the date on which they are required, under applicable Law, to be in full force and

effect, so as to permit AWWU to perform the Water Transportation Services and the parties to otherwise complete their obligations hereunder.

(e) The execution and delivery of this Agreement, the consummation of the transactions herein contemplated and compliance with the terms and provisions hereof by it will not conflict with or result in a material breach of, or require any consent under, any of its constitutive documents, or any applicable Law, or any agreement or instrument to which it is a party or by which it is bound or to which it is subject, or constitute a material default under any such agreement or instrument.

ARTICLE 14.
NOTICES

14.1 Writing. Except as set forth in Section 14.2, any notice, statement, demand, claim, offer or other written instrument required or permitted to be given pursuant to this Agreement shall be in writing signed by the Party giving such notice and shall be sent by email, facsimile, hand messenger delivery, overnight courier service, or certified mail (receipt requested) to the other Party as follows: (i) prior to the finalization of the Operating Procedures, such notices shall be sent to the addresses set forth in Exhibit E; and (ii) after the finalization of the Operating Procedures, such notices shall be sent to the legal notice addresses listed in such Operating Procedures. Each Party shall have the right to change the address information to which notice shall be sent or delivered or to specify additional addresses to which copies of notices may be sent, in either case by similar notice sent or delivered in like manner to the other Party, which, after the development of the Operating Procedures, shall be reflected in such Operating Procedures. All notices shall be effective upon receipt.

14.2 Technical Communications. Any technical or other communications pertaining to the Facility, the Water Transportation Services, and the Operational Work shall follow the procedures set forth in the Operating Procedures, to be updated from time to time pursuant to Section 5.1(b).

ARTICLE 15.

CONFIDENTIALITY; PUBLIC STATEMENTS

15.1 Confidentiality. The Parties agree that the Parties' proposals, communications, negotiations and information exchanged prior to the Effective Date concerning this Agreement and the development thereof, and technical and other information regarding or relating to the Facility, the AWWU Facilities, the Access Bridges, and the provision of the Water Transportation Services exchanged between the Parties that is marked, or otherwise clearly communicated to the receiving Party as "Confidential" constitutes "Confidential Information" of the disclosing Party. The Owners and AWWU each agree to hold such Confidential Information wholly confidential. Such Confidential Information may only be used by the Parties for the purposes related to the approval, or administration or enforcement of this Agreement.

15.2 Disclosure. Each Party agrees not to disclose Confidential Information of the other Party to any other Person (other than its Affiliates, counsel, consultants, lenders, partners, members, employees, officers and director, and then only to Persons subject to similar

confidentiality restrictions as those set forth herein), without the prior written consent of the other Party, provided, that, either Party may disclose Confidential Information, if such disclosure is required by Law, including without limitation, pursuant to an order of a court or regulatory agency or in order to enforce this Agreement or to seek approval of this Agreement. In the event a Party is required by Law or a Governmental Authority to disclose Confidential Information, such Party, prior to such disclosure, shall provide reasonable advance notice to the other Party of the time and scope of the intended disclosure in order to permit such disclosing Party the opportunity to obtain a protective order or otherwise seek to prevent or limit the scope or otherwise impose conditions upon such disclosure.

15.3 Injunctive Relief. Each Party agrees that violation of the terms of Sections 15.1 and 15.2 constitutes irreparable harm to the other, and that the harmed Party may seek any and all remedies available to it at law or in equity, including but not limited to injunctive relief.

15.4 Release of Agreement. The Parties agree that this Agreement, upon execution, shall not be considered Confidential Information. Except as required by Law, releasing the Agreement to the public shall be the sole responsibility of the Owners, to be released in the manner at a time decided in their sole discretion.

ARTICLE 16.
MISCELLANEOUS

16.1 Reasonability. The Parties shall act in a reasonable manner and in accordance with principles of good faith and fair dealing in the performance of this Agreement. Unless expressly provided otherwise in this Agreement and whether or not stated: (a) where this Agreement requires the consent, approval, or similar action by a Party, such consent or approval shall not be unreasonably withheld, conditioned, or delayed; and (b) wherever this Agreement gives a Party a right to determine, require, request, specify, or take similar action with respect to a matter, such determination, requirement, request, specification, or similar action must be reasonable.

16.2 Entire Agreement. This Agreement, together with all Schedule and Exhibits hereto, embodies the entire agreement and understanding of the Parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements and understandings of the Parties, verbal or written, relating to the subject matter hereof.

16.3 Waiver. Any waiver of the provisions of this Agreement must be in writing and shall not be implied by any usage of trade, course of dealing or course of performance. No exercise of any right or remedy by AWWU or the Owners constitutes a waiver of any other right or remedy contained or provided by Law. Any delay or failure of a Party to exercise, or any partial exercise of, its rights and remedies under this Agreement shall not operate to limit or otherwise affect such rights or remedies. Any waiver of performance hereunder shall be limited to the specific performance waived and shall not, unless otherwise expressly stated in writing, constitute a continuous waiver or a waiver of future performance.

16.4 Assignment. Neither Party shall assign this Agreement or any of its rights hereunder without the prior written consent of the other Party, which consent shall not be unreasonably withheld, conditioned or delayed. Notwithstanding the foregoing, either Party,

without relieving itself from liability hereunder, and without the need for consent from the other Party provided that any such assignee shall agree to be bound by all terms and conditions hereof, may transfer, pledge or assign this Agreement: (a) to any person or entity succeeding to all or substantially all of the assets of the assigning Party; or (b) to a successor entity in a merger or acquisition transaction. Any assignment made in contravention of this Section 16.4 shall be void and unenforceable.

16.5 Governing Law; Submission to Jurisdiction; Venue; No Jury Trial.

(a) Governing Law. THIS AGREEMENT SHALL BE GOVERNED BY, AND INTERPRETED AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF ALASKA, EXCLUDING ANY CHOICE OF LAW RULES.

(b) Submission to Jurisdiction, Venue. The Parties agree that any suit, action or other legal proceeding by or against any Party (or its Affiliates or designees) with respect to or arising out of this Agreement shall be brought exclusively in the courts of the State of Alaska, in the Municipality of Anchorage, as the Party instituting such suit, action or other legal proceeding may elect, provided that claims related to federal water rights, federal legislation enabling the Facility or AWWU Facilities, or the 1991 Agreement may be brought in the United States District Court for the District of Alaska. By execution and delivery of this Agreement, each Party (for itself, its Affiliates and its designees) irrevocably and unconditionally consents and submits to the exclusive jurisdiction of such courts and the appellate courts therefrom, and waives any right it may have to assert the doctrine of forum non conveniens or similar doctrine or to object to venue with respect to any proceeding. The Parties irrevocably consent to the service of process in any such action or proceeding by the mailing of copies thereof by registered or certified mail, first class postage prepaid to the addresses set forth in Section 14.1.

(c) No Jury Trial. EACH OF THE PARTIES HEREBY WAIVES ANY AND ALL RIGHTS TO DEMAND A TRIAL BY JURY IN ANY ACTION, SUIT, OR PROCEEDING ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY.

(d) Duty to Proceed. Pending final resolution of any Dispute, the Owners and AWWU shall continue to fulfill their respective obligations hereunder that are not the subject of the Dispute.

16.6 Construction. This Agreement is to be construed so as to effectuate the normal and reasonable expectations of a sophisticated buyer and seller of the equipment and services covered by this Agreement and shall not be construed either for or against either Party. No provision of this Agreement shall be construed or interpreted for or against either Party because such Party drafted or caused its legal representative to draft the provision.

16.7 Headings. The titles or headings of the various sections, articles and paragraphs hereof are intended solely for convenience and ease of reference and are not intended, and are not to be deemed for any purpose, to modify or explain or place any interpretation or construction upon any of the provisions of this Agreement.

16.8 Status of the Parties. AWWU and its Subcontractors shall be independent contractors to the Owners with respect to the Water Transportation Services and neither the AWWU nor its Subcontractors, nor the employees or agents of either, shall be deemed to be the employees, representatives or agents of the Owners in connection with any matter relating to this Agreement. No provision of this Agreement shall be construed or represented as creating a partnership, trust, joint venture, fiduciary or any similar relationship between the Parties.

16.9 Status of Individual Owners. Each of the Owners shall be jointly and severally liable for the obligations of the Owners under this Agreement. The delineation of specific responsibilities set forth hereunder as among the Owners shall be at the sole discretion of the Owners, not AWWU. If at any time, the Owners agree that one or two of the Owners need no longer be party to this Agreement, such unnecessary Owner(s) may be removed as parties to this Agreement upon written notice to AWWU, if agreed, and shall retain no liability upon removal, with the remaining Owner(s) automatically assuming the full obligations of the Owners hereunder. If an Event of Default exists hereunder at any time with respect to an Owner, it shall be considered an Event of Default with respect to the Owners together as one Party hereunder, provided, that if another Owner agrees to assume such defaulting Owner's obligations under this Agreement by removing such Owner as a party pursuant to the preceding sentence of this Section 16.9 prior to the expiration of any applicable cure period, this shall not be considered an Event of Default hereunder.

16.10 Insurance. Throughout the Delivery Term, the Owners shall maintain the required insurance policies as set forth on Exhibit D-1 and AWWU shall maintain the required insurance policy as set forth on Exhibit D-2.

16.11 No Third-Party Beneficiaries. This Agreement is made and entered into for the sole protection and legal benefit of the Owners and AWWU, and their permitted successors and assigns, and no other person shall be a direct or indirect legal beneficiary of, or have any direct or indirect cause of action or claim in connection with, this Agreement.

16.12 Further Assurances. Each Party agrees to execute and deliver all further instruments and documents, and take all further action, as may be reasonably necessary to complete performance by the Parties hereunder and to effectuate the purposes and intent of this Agreement.

16.13 Amendments. No change, amendment or modification of this Agreement shall be valid or binding upon the Parties unless such change, amendment or modification shall be in writing and duly executed by the Parties.

16.14 Severability. If any provision of this Agreement is determined to be illegal or unenforceable, such determination will not affect any other provision of this Agreement and all other provisions will remain in full force and effect.

16.15 Conflicting Provisions. In the event of any conflict between this document and any Schedule or Exhibit attached hereto, the terms and provisions of this document, as amended from time to time, shall control. In the event of any conflict among the Exhibits, the Exhibit of the latest date mutually agreed to by the Parties shall control.

16.16 Survival. The provisions of ARTICLE 1, ARTICLE 7, ARTICLE 10, ARTICLE 11, ARTICLE 12, ARTICLE 13, ARTICLE 14, and ARTICLE 16 shall survive termination of this Agreement for any reason.

16.17 Counterparts. This Agreement may be executed in any number of separate counterparts and delivered by electronic means, each of which when so executed shall be deemed an original, and all of said counterparts taken together shall be deemed to constitute but one and the same instrument.

[***Remainder of page intentionally left blank***]

IN WITNESS WHEREOF, the Parties have caused this Long-Term Water Transportation Agreement to be executed by their duly authorized representatives as of the Effective Date.

Schedule 1.1

Definitions

"1991 Agreement" means that certain Agreement between the Municipality of Anchorage, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., the United States Fish and Wildlife Service, the National Marine Fisheries Service, the State of Alaska, and the Alaska Energy Authority Relative to the Eklutna and Snettisham Hydroelectric Projects, dated August 7, 1991.

"Access Bridges" means those bridges installed by the Owners on the Eklutna River pursuant to the terms of the Interconnection Agreement.

"Affiliate" means, with respect to any Person, any other Person controlling, controlled by or under common control with such first Person. For purposes of this definition and the Agreement, the term "control" (and correlative terms) means (1) the ownership of 50% or more of the equity interest in a Person, or (2) the power, whether by contract, equity ownership or otherwise, to direct or cause the direction of the policies or management of a Person.

"Access License" has the meaning set forth in Section 9.1.

"Agreement" has the meaning set forth in the Preamble, and shall include all Exhibits and Schedules hereto.

"Approvals" means Governmental Approvals and third-party approvals.

"AWWU" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of AWWU.

"AWWU Design and Construction Practices Manual" means the edition dated _____, 20__, as updated and amended from time to time.[2]

"Event of Default" has the meaning set forth in Section 12.1.

"AWWU's Isolation Valve" has the meaning set forth in Exhibit A-1.

"AWWU Facilities" has the meaning set forth in the Recitals.

"AWWU's Portion" has the meaning set forth in Exhibit A-1.

"AWWU's Water Permit" means that permit belonging to AWWU (LAS 2569) to use Owners' Water Rights for up to 41 MGD for public water supply pursuant to the Act of October

[2] **Note to Accompany Final Draft**: To be populated after Governor approval and prior to execution to reflect the most up to date version.

30, 1984, 98 Stat. 2823, as may be replaced as described in Section 3.1 of the Water Supply Agreement.

"AWWU's Water" means any and all water belonging to AWWU pursuant to AWWU's Water Permit.

"Business Day" means any day other than a Saturday, Sunday or legal holiday in the state of Alaska.

"Chugach" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of Chugach.

"Confidential Information" has the meaning set forth in Section 15.1.

"Cost Responsibility Proportion" shall mean, with respect to each Owner, the percentage of the total applicable Eklutna Hydroelectric Project costs that such Owner is obligated to pay as agreed to by the Owners, which as of the Effective Date shall be, with respect to MOA, 19.05%, with respect to Chugach, 64.28%, and with respect to MEA, 16.67%, and which may be changed hereunder upon agreement between the Owners at any time.

"Curtailment Duration" means, with respect to a curtailment in Water Transportation Services during an Excused Event, the duration of such curtailment.

"Curtailment Limit" means, with respect to each day of the Delivery Term where there exists an Excused Event, the amount of Owners' Water in MGD that can be transported to the Delivery Point on such day. For the avoidance of doubt, this amount can equal zero (0) MGD.

"Day" or "day" means a calendar day, unless expressly specified otherwise.

"Delivery Point" has the meaning set forth in Exhibit A-1 and is depicted on the schematic included as part of Exhibit B.

"Delivery Point Meter" has the meaning set forth in Exhibit A-1.

"Delivery Term" has the meaning set forth in Section 2.1.

"Delivery Term Effective Date" has the meaning set forth in Section 2.1.

"Dispute" has the meaning set forth in Section 12.5.

"Effective Date" has the meaning set forth in the Preamble.

"Eklutna Hydroelectric Project" means the Eklutna Hydroelectric Project initially authorized, constructed and operated pursuant to the Eklutna Project Act of July 31, 1950 (64 Stat. 382, as amended), including any and all property and facilities acquired or used in connection therewith, all of which was then sold to the Owners by the United States of America on October 2, 1997.

"Eklutna Water Treatment Facility" means the water treatment plant owned by AWWU located alongside the Eklutna River.

"Event of Default" has the meaning set forth in Section 12.1.

"Excused Event" means a Planned Outage, a Forced Outage, or an Force Majeure Event causing a reduction or suspension of the Water Transportation Services.

"Facility" has the meaning set forth in the Recitals.

"Final Acceptance" has the meaning set forth in the Interconnection Agreement.

"Fish and Wildlife Program" has the meaning set forth in the Recitals.

"Force Majeure Event" means the occurrence of any act or event beyond the reasonable control of the Party affected that prevents the affected Party from performing its obligations under this Agreement, in full or part, if such act or event is beyond the reasonable control of, and not the result of the fault or negligence of, the affected Party and such Party has been unable to overcome such act or event with the exercise of due diligence (including the expenditure of reasonable sums), including the following: drought, flood, earthquake, storm, fire, lightning, epidemic, war, riot, civil disturbance, sabotage, terrorism or threat of terrorism, strike or labor difficulty, accident or curtailment of supply or equipment, total casualty to equipment, or restraint, order or decree by a Governmental Authority. Notwithstanding the foregoing, Force Majeure Events shall expressly not include mechanical or equipment failures (except to the extent any such failure is itself caused by a Force Majeure Event), diminution in water quality in Eklutna Lake, Planned Outages, or Forced Outages (unless such Forced Outage is caused by a Force Majeure Event).

"Forced Outage" means; (i) any unplanned necessary reduction or suspension of Water Transportation Services available from the Facility; or (2) any other unavailability of the AWWU Facilities of Facility in whole or in part, each in response to an equipment malfunction or other emergency condition determined by AWWU in its reasonable discretion to be a threat to any AWWU Facilities. For the sake of clarity, forced outages in AWWU infrastructure downstream of the Isolation Valve Structure are not considered a Forced Outage.

"Governmental Approvals" means all authorizations, consents, licenses, leases, rulings, certifications, registrations, exemptions, permits, certificates, and approvals from any Governmental Authority.

"Governmental Authority" means any federal, state or local government, any political subdivision thereof, or any governmental, quasi-governmental, judicial, public or statutory instrumentality, administrative agency, authority, body or other entity having jurisdiction over the performance of the Water Transportation Services, the Operational Work, the Facility or its operations, or the health, safety or environmental conditions of the Site or otherwise over the Parties' rights and obligations under this Agreement.

"Indemnified Parties" has the meaning set forth in Section 11.1.

"Indemnifying Party" has the meaning set forth in Section 11.3.

"Initial Delivery Term" has the meaning set forth in Section 2.1.

"Injection Point" means the point where AWWU Facilities meet facilities owned by the Owners near the outlet of the Eklutna Lake, where AWWU receives all of AWWU's Water from Eklutna Lake, as depicted in the schematic included as part of Exhibit B.

"Interconnection Agreement" has the meaning set forth in the Recitals.

"Injection Point Flow Meter" means a meter measuring the flow of water passing into AWWU Facilities at the Injection Point.

"Isolation Valve Structure" has the meaning set forth in Exhibit A-1.

"Isolation Valves" has the meaning set forth in Exhibit A-1.

"Law" means any constitution, charter, act, statute, law, ordinance, code, rule, regulation, order, specified standards or objective criteria contained in any applicable permit or approval (which standards or criteria must be met in order for the Water Transportation Services or Operational Work to be performed lawfully) or other legislative or administrative action of any Governmental Authority or a final decree, judgment or order of a court or tribunal.

"Liabilities" has the meaning set forth in Section 11.1.

"MEA" has the meaning set forth in the Preamble, and shall include all successor sand assigns of MEA.

"MGD" means millions of gallons per day.

"MOA" has the meaning set forth in the Preamble, and shall include all successor sand assigns of MOA.

"Monthly Water Release Schedule" has the meaning set forth in Section 3.2.

"Operating Procedures" has the meaning set forth in Section 5.1.

"Operational Work" means all phases of AWWU and the Owners' performance of their obligations under this Agreement to operate and maintain the Facility and the AWWU Facilities.

"Owners" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of the Owners.

"Owner" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of such Owner.

"Owners' Isolation Valve" has the meaning set forth in Exhibit A-1.

"Owners' Approvals" has the meaning set forth in Section 4.4.

"Owners' Portion" has the meaning set forth in Exhibit A-1.

"Owners' Water Rights" means that certain senior priority water rights held by the Owners for the water in Eklutna Lake for use in generating power for the Eklutna Hydroelectric Project as described in water rights certificate ADL 44944.

"Owners' Water" means any and all water belonging to the Owners pursuant to the Owners' Water Right.

"Party" and "Parties" has the meaning set forth in the Preamble.

"Person" means any individual, partnership, corporation, limited liability company, association, business, trust, government or political subdivision thereof, Governmental Authority or other entity.

"Planned Outage" means the removal of Facility equipment from service availability for inspection and/or overhaul or repair in such a way that requires a reduction or halt in flow of Owners' Water through the AWWU Facilities to the Delivery Point. For the sake of clarity, planned outages in AWWU infrastructure downstream of the Isolation Valve Structure are not considered a Planned Outage. To qualify as a Planned Outage, the maintenance (a) must actually be conducted during the Planned Outage, and in AWWU's reasonable discretion must be of the type that is necessary to reliably maintain the Facility or the AWWU Facilities, and (b) cannot be reasonably conducted during normal Facility or AWWU Facilities' operations.

"Prudent Industry Standards" means those standards of care and diligence normally practiced by water transportation infrastructure operation and maintenance firms in performing services of a similar nature in a similar jurisdiction in which the Water Transportation Services and Operational Work will be performed. Prudent Industry Standards are not intended to be limited to optimum practice or methods, but rather to be a spectrum of reasonable and prudent practices and methods that must take the conditions specific to any water transportation facility under consideration.

"River Release Structure" has the meaning set forth in Exhibit A-1.

"Site" means the location of the Facility as further described and depicted in Exhibit B.

"Subcontractor" means any Person with whom the Owners, or any Owner, enters into an arrangement for the performance of any portion of the Water Transportation Services or Operational Work, including Persons at any tier with whom any Subcontractor has further subcontracted any portion of the Water Transportation Services or Operational Work, and the legal or personal representatives, successors, and assigns of such Person.

"Term" has the meaning set forth in Section 2.1(a).

"Water Release Limits" has the meaning set forth in Section 3.1.

"Water Supply Agreement" has the meaning set forth in the Recitals.

"Water Transportation Services" has the meaning set forth in Section 3.1.

Exhibit A

Eklutna River Release Facility Description and Definitions[3]

The **"*Eklutna River Release Facility*"** shall consist of an Isolation Valve Structure and the River Release Structure.

The "***Isolation Valve Structure***" shall include:

- a new tee to be built in the AWWU pipeline downstream of the AWWU tunnel/pipeline transition and upstream of the AWWU portal valve (the "***Delivery Point***")
- A 54-inch gate valve on the main segment of AWWU pipeline intended to provide dual means of isolation for AWWU's pipeline segment ("***AWWU's Isolation Valve***")
- A 42-inch gate valve on the branch segment of AWWU pipeline intended to provide isolation to the river release structure ("***Owners' Isolation Valve***", together with AWWU's Isolation Valve, the "***Isolation Valves***").
- Related controls and communication technology to be installed by the Owners in the main line of the AWWU Facilities.

The "***River Release Structure***" shall include:

- [A new pipeline from the Isolation Valve Structure to the Eklutna River]
- Control valves
- A new meter installed at the Delivery Point ("***Delivery Point Meter***")
- Monitoring and control equipment to be installed by Owners [*describe where]*.

"***AWWU's Portion***" of the Facility shall consist of the Isolation Valve Structure [and _____]

The "***Owners' Portion***" of the Facility shall consist of the River Release Structure [and _____]

[3] **Note to Accompany Final Draft**: This Exhibit will be revised and finalized by Owners to reflect the proposal approved by the Governor and prior to signing.

Exhibit B[4]

Description and Schematic of Site, AWWU Facilities, and Injection Point and Delivery Point

[4] **Note to Accompany Final Draft**: This Exhibit will be populated after Governor approval and prior to signing.

Exhibit C

Owners' Approvals[5]

[5] **Note to Accompany Final Draft**: This Exhibit will be populated after Governor approval and prior to signing.

Exhibit D-1[6]

Owners' Insurance Requirements

[6] **Note to Accompany Final Draft**: This Exhibit will be populated by the Parties after Governor approval and prior to signing.

Exhibit D-2[7]

AWWU's Insurance Requirements

[7] **Note to Accompany Final Draft**: This Exhibit will be populated by the Parties after Governor approval and prior to signing.

PUBLIC WATER SUPPLY AGREEMENT

This PUBLIC WATER SUPPLY AGREEMENT (this "Agreement"), dated as of [_____] (the "Effective Date"), is entered into by and between Anchorage Water and Wastewater Utility ("AWWU"), and Chugach Electric Association, Inc. ("Chugach"), Matanuska Electric Association, Inc. ("MEA"), and the Municipality of Anchorage ("MOA") (each of Chugach, MEA, and MOA is an "Owner" and collectively they are referred to as the "Owners"). The Owners and AWWU are sometimes referred to herein as a "Party" or collectively as the "Parties".

R E C I T A L S

WHEREAS, the federal Alaska Power Administration ("APA") originally developed, owned and operated the Eklutna Hydroelectric Project, which began operations in 1954 for the production of electric power that APA sold to electric utilities serving the Anchorage and Matanuska Valley areas;

WHEREAS, as then-owner of the Eklutna Hydroelectric Project assets, the APA possessed senior water rights (both federal reserved water rights and water rights granted under State of Alaska law), with a priority date of 1954, to all the water that may be feasibly appropriated from Eklutna Lake for use in generating electric power for the Eklutna Hydroelectric Project as reflected in water rights certificate ADL 44944 ("Project Water Rights");

WHEREAS, in the 1980s, AWWU:

(i) determined that Eklutna Lake was a necessary source of water for the City of Anchorage;

(ii) entered into that certain "Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska" with APA, dated February 17, 1984, as amended (the "1984 Agreement"), which among other things provides terms and conditions relating to (i) AWWU facility interconnection to Eklutna Hydroelectric Project; and (ii) the compensation by AWWU to the Owners for AWWU's diversion of water for public water supply that reduces the Project Water Rights otherwise available for use to generate energy at the Eklutna Hydroelectric Project;

(iii) obtained: (1) "preferred use status" from the Alaska Department of Natural Resources ("DNR") through an application that demonstrated the need for AWWU to take prior-appropriated water for public water supply purposes and which is conditioned upon the validity and existence of the 1984 Agreement (the "Preferred Use Status") pursuant to Alaska Statute 46.15.150(b); (2) a permit (LAS 2569) to use Project Water Rights for up to 41 million gallons per day for public water supply pursuant to the Act of October 30, 1984, 98 Stat. 2823, (the "AWWU Water Permit"); and

(iv) constructed and began operations of the water project diverting water from the Eklutna Hydroelectric Project intake tunnel to AWWU's water system (the "AWWU Water Project");

WHEREAS, the 1984 Agreement remains in effect "until the year 2025" and the AWWU Water Permit expires on December 31, 2025;

WHEREAS, in October 1997, the Owners purchased from APA the Eklutna Hydroelectric Project and all related project assets, including Project Water Rights and became parties to the 1984 Agreement through assignment (the "Owners' Facilities");

WHEREAS, pursuant to the 1991 Agreement (as defined below), the Owners have studied and developed a Fish and Wildlife program to protect, mitigate damages to, and enhance fish and wildlife impacted by the development of the Eklutna Hydroelectric Project centered on establishing instream flows in the Eklutna River as part of the implementation of the Fish and Wildlife Program (the "Fish and Wildlife Program");

WHEREAS, in order to establish such instream flows, the Owners and AWWU have negotiated two agreements: (1) a Water Facilities Interconnection Agreement (the "Interconnection Agreement"), which shall govern the construction and interconnection of the Parties' respective facilities for conveyance of water from the Eklutna Lake to the Eklutna River using AWWU facilities; and (2) a Long-Term Water Transportation Services Agreement (the "Transportation Agreement"), which shall govern the provision of conveyance services for transporting water from the Eklutna Lake to the Eklutna River;

WHEREAS, in coordination and joint consideration with the Interconnection Agreement and the Transportation Agreement, the Parties desire to enter into this Agreement in order to replace the 1984 Agreement and set forth new terms and conditions relating to (i) the compensation from AWWU to the Owners for AWWU's use of the Project Water Rights in accordance with Alaska Statute 46.15.150 and; (ii) the extension of other future rights to AWWU; and

NOW, THEREFORE, in consideration of the premises of this Agreement, the Transportation Agreement, and the Interconnection Agreement, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Owners and AWWU, intending to be legally bound, hereby agree as follows:

ARTICLE I
DEFINITIONS; INTERPRETATION

Section 1.1 Defined Terms. Capitalized terms used in this Agreement without other definition shall have the meanings set forth in Schedule 1.1, unless the context requires otherwise.

Section 1.2 Interpretation. As used in this Agreement, the terms "herein," "herewith" and "hereof" are references to this Agreement, taken as a whole; the terms "includes" or "including" shall mean "including, without limitation"; and references to a "Section," "Article", "Exhibit" or "Schedule" shall mean a Section, Article, Exhibit or Schedule of this Agreement, as the case may be, unless in any such case the context requires otherwise. All references to a given Exhibit, Schedule, agreement, instrument or other document shall be a reference to that agreement, instrument or other document as modified, amended, supplemented and restated through the date as of which such reference is made. A reference to a Person includes its permitted successors and permitted assigns. The singular shall include the plural and the masculine shall include the feminine and neuter, and vice versa.

ARTICLE II
EFFECTIVE DATE; TERM

Section 2.1 Effective Date. This Agreement shall become binding on the Parties on the Effective Date, subject to Section 2.2.

Section 2.2 Conditions Precedent. The rights and obligations of the Parties as set forth in Articles III – VI in this Agreement shall not be effective until the achievement of the following conditions precedent (the "Conditions Precedent"), a written notice of which shall be sent to AWWU by Owners:

(a) The Owners receive final approval from the Governor of Alaska, with such approval for a Fish and Wildlife Program that requires the use of the AWWU Facilities for instream flows as contemplated in this Agreement, provided that such approval includes no unexpected conditions materially adverse to the Owners or to AWWU, as determined in good faith by the Parties and in the exercise of commercially reasonable business judgment, and neither the approval from the Governor of Alaska nor the Fish and Wildlife Program is subject to any pending judicial review or appeal;

(b) Owners and AWWU obtain and provide evidence of lawful water rights from DNR for the use and transport of water as contemplated under the Agreement, including but not limited to a renewal, extension, or replacement of the AWWU Water Permit, Preferred Use Status, and all other approval(s) authorizing continued use of the Owners' Water Rights by AWWU;

(c) Chugach obtains final Regulatory Commission of Alaska ("RCA") approval of its applicable tariff rates necessary to implement the compensation outlined in Section 3.2 below pursuant to, and in a manner consistent with, Section 6.23 of the MOA-Chugach APSA as such terms are defined therein; and

(d) The Interconnection Agreement and the Transportation Agreement are in full force and effect and are valid, binding and enforceable against AWWU and the Owners in accordance with their terms.

Section 2.3 Failure to Achieve Conditions Precedent. In the event that this Agreement does not become fully effective (i) due to the failure to achieve the Conditions Precedent as set forth in Section 2.2 by [June 1, 2025], or (ii) because the Governor of Alaska approves a Fish and Wildlife Program that does not require the use of the AWWU Facilities for instream flows as contemplated in this Agreement, then: (A) this Agreement will be terminated upon thirty (30) days' written notice by either Party (B) the automatic cross-agreement termination provisions of Section 10.3 shall apply; and (C) the Parties shall meet promptly to negotiate in good faith an alternate agreement to replace the 1984 Agreement that expires in 2025 with terms and conditions that include but are not limited to adequate compensation, risk mitigation, potential transfer or purchase of water rights, and other terms and conditions then deemed appropriate by the Parties without prejudice due to the prior existence, or the subsequent termination, of this Agreement.

Section 2.4 Term. Unless agreed to otherwise by the Parties, this Agreement will continue in full force and effect starting on the Effective Date and terminating on October 30, 2060, subject to any early termination provision set forth herein (the "Term").

Section 2.5 Effect on 1984 Agreement. The Parties intend that, upon thirty (30) days' written notice by the Owners of the achievement of the Conditions Precedent as set forth in Section 2.2, this Agreement shall become fully effective and replace the 1984 Agreement in its entirety, and the 1984 Agreement will be terminated.

ARTICLE III
WATER USE AND COMPENSATION

Section 3.1 Water Use. The Owners shall make available and allow AWWU to continue to interconnect the AWWU Water Project to the Eklutna Hydroelectric Project, use the project's intake, tunnel, and other Owners' Facilities necessary to divert and use a portion of Project Water Rights up to 41 million gallons per day for public water supply purposes in a manner consistent with AWWU's Preferred Use Status, the AWWU Water Permit, and Alaska Statute 46.15.150(b). The Parties understand that after the Effective Date, AWWU may initiate a process to replace all or part of the AWWU Water Permit with a certificated water right under Alaska Statute 46.15. The Owners consent to such conversion provided that AWWU's certificated water right does not exceed 41 million gallons per day for public water supply purposes, such certification is subject to all requirements of Alaska Statute 46.15.150 and any and all regulations implementing AWWU's Preferred Use Status, and AWWU remains committed to compensate Owners for such water as set forth in Section 3.2 below.

Section 3.2 Compensation.

(a) Compensation. Subject to the limitation in subsection (b) below, AWWU and the MOA shall compensate the Owners for all reductions in electrical energy generation at the Eklutna Hydroelectric Project, costs, and losses that result from water diversions for the AWWU Water Project as set forth in Exhibit A (collectively, the "Replacement Energy"). The compensation paid by AWWU for the Replacement Energy shall be both in kind through electrical energy recovered by AWWU at the Eklutna Water Treatment Facility ("EWTF") in excess of AWWU's own needs at the EWTF ("Recovered Electrical Energy"), and in cash payments (the cash portion shall be referred to as the "Replacement Energy Payment(s)"). The Recovered Electrical Energy shall act as an offset to the Replacement Energy Payment obligations. All costs associated with such deliveries of Recovered Electrical Energy, including metering, will be borne by AWWU.

(b) Compensation Limitations and Procedures. The compensation owed to the Owners by AWWU, calculated and accounted for as set forth in Exhibit A and Section 3.2(a), shall be subject to the following limitations: (a) in no event shall the Replacement Energy Payment owed and payable to Chugach by AWWU exceed six hundred thousand dollars ($600,000) per year in value in aggregate, as such amount will be adjusted annually for inflation reflected in the Bureau of Labor Statistics' Consumer Price Index; (b) in no event shall any such compensation be required in the event that the Owners permanently cease operations of the Eklutna Hydroelectric Project; and (c) in no event shall any such compensation be required in the event of a transfer of a priority water right from the Owners to AWWU as contemplated in Article VI. For the purposes of clarity, the words "total compensation owed and payable to Chugach by AWWU," in the preceding sentence applies to the Replacement Energy Payment and specifically includes the independent in-kind compensation through the Recovered Electrical Energy. The Recovered Electrical Energy shall not include any power generated by AWWU at any location other than the EWTF, which

power generated at other locations may be sold by AWWU as co-generated power. Notwithstanding the foregoing limitation on compensation to be paid by AWWU, nothing in this Agreement is intended to change the MOA's obligations set forth in any of: (i) the MOA-Chugach Eklutna PPA; (ii) Section 6.23 of the MOA-Chugach APSA; and (iii) the MOA-MEA Eklutna PPA. In any month of the Term, to the extent that AWWU does not fully compensate Chugach for the total amount of Replacement Energy in such month due to application of the AWWU compensation cap set forth above, such matters will be resolved among the Owners and the MOA will make Chugach whole as outlined in Exhibit A.

(c) Costs. Other than the compensation for water diversions set forth in Sections 3.2(a) and (b) above, all costs borne initially by each Party in connection with the exercising of its respective rights and the performance of its respective obligations under this Agreement shall be the responsibility of such Party initially incurring such costs. In partial consideration of the costs to Owners incurred in maintaining its facilities necessary for AWWU to continue to interconnect to Eklutna Hydroelectric Project, and to divert and use a portion of Project Water Rights under this Agreement for the benefit of the AWWU, the Parties entered into the Transportation Agreement for the same duration as this Agreement, pursuant to which AWWU will provide conveyance services for transporting water from the Eklutna Lake to the Eklutna River at no cost to Owners.

ARTICLE IV
OWNERS' RESPONSIBILITIES

Section 4.1 Reservoir Operations. Subject to the terms herein, Owners shall retain full authority and responsibility to operate the Eklutna Hydroelectric Project and manage and allocate water in Eklutna Lake in accordance with ADL 44944 and the requirements of the Eklutna Hydroelectric Project.

Section 4.2 Assurance of Water Project Allocation, Quality, and Access. Subject to the terms herein, Owners will operate the Eklutna Lake reservoir in such a manner that the projected allocations of water to the AWWU Water Project are available to MOA upon request at a flow rate of at least 41 MGD to the EWTF at a pressure sufficient to allow normal operation of the EWTF as currently configured. The Owners will take no action regarding Eklutna Lake that has the effect of reducing the quality or increasing the turbidity of the lake water from those conditions which exist as of the Effective Date; nor will the Owners take or authorize any other action with regard to Eklutna Lake that may have the effect of reducing its present suitability for use as a source of public water supply. This Section 4.2 is not intended to preclude or inhibit maintenance and repair activities determined to be necessary by the Owners, nor does it apply to the management of the lake surface and surrounding areas for public recreation, which is outside the scope of this Agreement. For the avoidance of doubt, the Owners shall ensure continued use and access to AWWU of the Owners' Facilities that are necessary to supply water to the AWWU Facilities to the extent that Owners' Facilities continue in commercial operation.

ARTICLE V
AWWU RESPONSIBILITIES

Section 5.1 Compensation. AWWU shall compensate the Owners as set forth in Section 3.2(a) subject to the limitation in Section 3.2(b). To the extent that the total compensation

owed to the Owners by AWWU under Section 3.2 is not satisfied by the netting against the MOA's ownership share of the water used in the Eklutna Hydroelectric Project, AWWU will pay the Owners directly within thirty (30) days of receipt of invoice.

Section 5.2 Maintenance, Repair, and Material Modifications to AWWU Water Project.

(a) AWWU Water Project. To the extent AWWU must perform maintenance, repairs, or make any material modification to the AWWU Water Project that adversely affects the Eklutna Hydroelectric Project, prior to the commencement of such action, AWWU shall furnish to the Owners copies of all plans, specifications, and schedules regarding such work. AWWU shall coordinate with the Owners all such activities in order to avoid or minimize disruption of the Owner's activities at the Eklutna Hydroelectric Project, to the maximum extent possible. AWWU will take commercially reasonable steps to minimize any of its actions set forth in this subsection that may adversely affect energy generation from the Eklutna Hydroelectric Project. AWWU shall reimburse the Owners, by payment of lost revenues to the Owners or by Replacement Energy, as may be mutually agreed by the Parties, for any such losses incurred by the Owners that are attributable to such maintenance or material modifications of the AWWU Water Project that impacts the Eklutna Hydroelectric Project, such as maintenance or material modifications to the project's intake tunnel connected to Eklutna Lake.

(b) AWWU Water Project Interconnection. Notwithstanding Section 5.2(a), AWWU shall obtain specific plan approval from the Owners before initiating any material modification on any existing facilities for the delivery of water from the Eklutna Hydroelectric Project to the AWWU Water Project, including any facilities that are interconnected to the present Owners' water intake tunnel. AWWU will take commercially reasonable steps to minimize any of its actions set forth in this subsection that may adversely affect energy generation from the Eklutna Hydroelectric Project.

ARTICLE VI
RIGHTS UPON CEASING OPERATIONS OR TERMINATION

Section 6.1 Right of First Offer. If the Owners elect to permanently cease operations of the Eklutna Hydroelectric Project, the Owners shall provide written notice to AWWU of such intention. For a period of six (6) months after such notice, neither Owners nor their successors and assigns, nor their respective Affiliates, shall enter into an obligation or agreement to sell or transfer the Eklutna Hydroelectric Project, unless the (i) Owners first offer, in writing, to sell to AWWU that portion of Owners' Facilities that are necessary to supply water from Eklutna Lake to the AWWU Facilities; and (ii) AWWU declines to purchase such portion of Owners' Facilities within thirty days after notification of the offer to sell. If, within thirty days after notification of the offer to sell, AWWU indicates a good faith intention to purchase such portion subject to a need for ongoing review, then this shall trigger an additional 90-day period during which the Parties shall meet and negotiate in good faith terms and conditions then deemed appropriate and the Owners shall in good faith provide necessary documentation to facilitate such review. If at the end of such 90-day period, AWWU has not yet purchased such portion, then the Owners shall be permitted to pursue other options for the transfer of the Eklutna Hydroelectric Project.

Section 6.2 Option to Acquire Owners' Water Rights and Termination. Upon the earlier of October 31, 2055, or the MOA's sale of its interests in the Eklutna Hydroelectric Project, AWWU may exercise an option to acquire sole ownership of a portion of the Owners' first-priority water rights that is then operative and reflected in the AWWU Water Permit and any subsequent certificate, which shall in no event exceed 41 million gallons per day, by quitclaim deed or other then-acceptable means of transfer, in exchange for relinquishing its AWWU Water Permit and Preferred Use Status (and associated legal rights) as no longer being legally functional or operative; provided, however, that AWWU shall (a) issue a written notice to the Owners of its intention to exercise such option no later than October 30, 2050; (b) prepare all legal documents necessary to transfer such water rights from the Owners to AWWU (subject to Owners' review and approval prior to execution); and (c) obtain all required Governmental Approvals to effectuate such acquisition at AWWU's sole cost and expense (the "AWWU Option"). Upon closing of the AWWU Option, this Agreement and the Parties' obligations hereunder shall terminate except for the right of first offer in Section 6.1 above, which shall survive and continue while Owners continue operations of the Eklutna Hydroelectric Project.

ARTICLE VII
TITLE; LOSS OR DAMAGE; FORCE MAJEURE

Section 7.1 Title.

(a) Legal title to and ownership of the Owners' Facilities, including Owners' Water Rights, shall remain with Owners throughout the Term of this Agreement, free and clear of any and all liens, claims, security interests or other encumbrances imposed by AWWU.

(b) Legal title to and ownership of the AWWU Facilities, including the AWWU Water Permit, and any resulting certificate of appropriation, shall remain with AWWU throughout the Term of this Agreement.

Section 7.2 Force Majeure. Each Party shall be excused from performance and shall not be considered to be in default with respect to any obligation hereunder, if and to the extent that such Party's failure of, or delay in, performance is due to a Force Majeure Event; provided, that:

(a) such Party gives the other Party prompt written notice describing the particulars of the Force Majeure Event as soon as is reasonably practicable after becoming aware of the occurrence of the Force Majeure Event;

(b) the suspension of performance is of no greater scope and of no longer duration than is reasonably required by the Force Majeure Event;

(c) no obligations of the affected Party that arose before the occurrence of the Force Majeure Event causing the suspension of performance shall be excused as a result of such Force Majeure Event, unless and only to the extent that the performance of such obligations is impaired by the Force Majeure Event;

(d) the Party uses diligent commercially reasonable efforts to overcome or mitigate the effects of the Force Majeure Event; and

(e) when the Party is able to resume performance of its obligations under this Agreement, such Party shall give the other Party written notice to that effect and shall promptly resume performance hereunder.

ARTICLE VIII
LIMITATIONS ON LIABILITY

Section 8.1 Aggregate Limitation of Liability. Notwithstanding any other provision of this Agreement, the total aggregate liability of the Owners and the total aggregate liability of AWWU arising out of or relating to this Agreement, from any and all causes, whether based on contract, tort (including negligence), strict liability or any other cause of action, shall in no event exceed ten million dollars ($10,000,000) for AWWU, or ten million dollar ($10,000,000) for the Owners collectively, provided that such limits shall not apply in the case of such Party's (i) gross negligence or willful misconduct, (ii) third-party indemnity obligation, or (iii) breach of any representation or warranty.

Section 8.2 CUMULATIVE REMEDIES. IF NO REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY PROVIDED, OR IF A REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY NON-EXCLUSIVE, THE NON-DEFAULTING PARTY SHALL HAVE THE RIGHT TO EXERCISE ALL RIGHTS AND REMEDIES AVAILABLE TO IT AT LAW OR IN EQUITY; PROVIDED, HOWEVER, THAT THE LIABILITY OF THE DEFAULTING PARTY SHALL BE LIMITED TO DIRECT, ACTUAL DAMAGES ONLY AND ALL OTHER DAMAGES AND REMEDIES ARE WAIVED.

Section 8.3 WAIVER OF CERTAIN DAMAGES. EXCEPT WITH RESPECT TO INDEMNIFICATION OF THIRD PARTY CLAIMS PURSUANT TO ARTICLE XI, OR AS OTHERWISE EXPRESSLY PROVIDED FOR HEREIN, IN NO EVENT SHALL EITHER PARTY BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY, INDIRECT, BUSINESS INTERRUPTION OR SIMILAR DAMAGES, WHETHER BY STATUTE, IN TORT, BY CONTRACT OR OTHERWISE.

ARTICLE IX
INDEMNIFICATION

Section 9.1 Indemnity. To the fullest extent permitted by Law, each Party shall indemnify, hold harmless and defend the other Party and its directors, officers, shareholders, partners, agents and employees, and the Affiliates of the same (collectively, the "Indemnified Parties"), from and against any and all loss, damage, expense and liability, including court costs and reasonable attorneys' fees (collectively, "Liabilities") arising incurred by the Indemnified Parties in connection with or arising from any claim for physical damage to or physical destruction to any property of any third party, or death of or bodily injury to any person, to the extent caused by the negligence of the Indemnifying Party or its agents or employees or others under such Indemnifying Party's control, except any Liabilities incurred due to the negligence or willful misconduct of an Indemnified Party. For the purpose of the definition of "Indemnified Parties" AWWU shall not be considered to be an "Affiliate" of the MOA.

Section 9.2 Defense of Claims. A Party with an indemnification obligation pursuant to this Article IX (an "Indemnifying Party") shall have the right to defend the Indemnified Parties pursuant to this Article IX by counsel of the Indemnifying Party's selection (including insurance counsel) reasonably satisfactory to the Indemnified Party, unless in the opinion of counsel for the Indemnifying Party a conflict of interest between the Parties may exist with respect to such claim. If the Indemnifying Party does not assume the defense of the Indemnified Party, or if a conflict precludes counsel for the Indemnifying Party from providing the defense, then the Indemnifying Party shall reimburse the Indemnified Party on a monthly basis for the Indemnified Party's defense through separate counsel of the Indemnified Party's choice. Even if the Indemnifying Party assumes the defense of the Indemnified Party with acceptable counsel, the Indemnified Party, at its sole option, may participate in the defense, at its own expense, with counsel of its own choice without relieving the Indemnifying Party of any of its obligations hereunder. The Parties shall give each other prompt written notice of any asserted claims or actions indemnified against hereunder and shall cooperate with each other in the defense of any such claims or actions. Without the prior written consent of the Indemnified Party, which consent shall not be unreasonably withheld, conditioned or delayed, no Indemnifying Party shall settle any such claims or actions in a manner that would require any action or forbearance from action by any Indemnified Party.

ARTICLE X
DEFAULT AND REMEDIES; TERMINATION; DISPUTE RESOLUTION

Section 10.1 Event of Default. The following shall constitute events of default on the part of either party (each, an "Event of Default") under this Agreement:

(a) If a Party makes a general assignment for the benefit of its creditors, or if a receiver is appointed on account of the insolvency of such Party, or if such Party files a petition seeking to take advantage of any other Law relating to bankruptcy, insolvency, reorganization, winding up or composition of or readjustment of debts and, in the case of any such proceeding instituted against such Party (but not by such Party), such proceeding is not dismissed within sixty (60) days of such filing;

(b) If a Party fails to comply with any material terms of this Agreement not otherwise set forth as an Event of Default in this Section 10.1(b) and fails to cure or remedy such failure within thirty (30) days after notice and a written demand is made by the non-defaulting Party to the defaulting Party to cure the same or, if such failure cannot be cured within thirty (30) days, the defaulting Party fails to commence to cure such failure within thirty (30) days after such notice and written demand and thereafter diligently pursue such cure to completion, which shall in no event be later than ninety (90) days after such notice;

(c) If a Party defaults under the Interconnection Agreement or the Transportation Agreement;

(d) If a Party fails to make any payment due hereunder within sixty (60) days after receipt of written notice from the non-defaulting Party; or

(e) If any representation or warranty of a Party in this Agreement proves to have been false or misleading in any material respect when made, and such Party has not, within thirty (30) days after written notification thereof from the non-defaulting Party, either fully remedied, or commenced and diligently pursued the remedy, of all adverse impacts on the non-defaulting Party resulting therefrom, all to the reasonable satisfaction of the non-defaulting Party.

Section 10.2 Remedies Upon Event of Default. Upon the occurrence and continuation of an Event of Default, the non-defaulting Party shall have the right to terminate this Agreement and the Interconnection Agreement and the Transportation Agreement; upon ten (10) days written notice and pursue any other remedy available to such non-defaulting party at law or in equity arising out of such Event of Default, including a claim for monetary damage or specific performance.

Section 10.3 Automatic Cross-Agreement Termination. If this Agreement is terminated for any reason during the Term, the Interconnection Agreement and the Transportation Agreement shall automatically terminate, effective as of the same date as this Agreement's termination date.

Section 10.4 Dispute Resolution. In the event of any dispute arising under this Agreement (a "Dispute"), within ten (10) Business Days following notice by either Party, (i) each Party shall appoint a representative, and (ii) the representatives shall meet, negotiate and attempt in good faith to resolve the Dispute quickly, informally and inexpensively. In the event the representatives cannot resolve the Dispute within thirty (30) Days after the first meeting, either Party may request that consideration and resolution of the Dispute be transferred to a designated representative of each Party's senior management. Within ten (10) Days following such a request, each Party shall submit a written summary of the Dispute describing the issues and claims to a senior officer of each Party designated to address the Dispute. Within ten (10) Business Days after receipt of each Party's Dispute summaries, the senior management representatives for both Parties shall negotiate in good faith to resolve the Dispute. If such senior management representatives are unable to resolve the Dispute within thirty (30) Days thereafter, either Party may pursue any available legal remedies.

ARTICLE XI
REPRESENTATIONS

Section 11.1 General Representations and Warranties. Each Owner and AWWU hereby represents and warrants that:

(a) It is duly organized, validly existing and in good standing under the Laws of the state of its formation and is duly qualified to do business in the State of Alaska.

(b) It has all necessary power and authority to execute, deliver and perform its obligations under this Agreement; its execution, delivery and performance of this Agreement have been duly authorized by all necessary corporate, municipal, or other action on its part; and this Agreement has been duly and validly executed and delivered by it and constitutes its legal, valid and binding obligation enforceable against it in accordance with its terms, except as the enforceability thereof may be limited by bankruptcy, insolvency, reorganization or moratorium or

other similar Laws relating to the enforcement of creditors' rights generally and by general equitable principles.

(c) It is not in violation of any applicable Law, or any judgment entered by any federal, state, local or other Governmental Authority, which violations, individually or in the aggregate, would adversely affect its performance of any obligations under this Agreement. There are no legal or arbitration proceedings or any proceeding by or before any Governmental Authority, now pending or (to its best knowledge) threatened against it which, if adversely determined, could have a material adverse effect upon its financial condition, operations, prospects or business as a whole, or upon its ability to perform under this Agreement.

(d) No authorization, approval, exemption, or consent of or by any Person is required by it in connection with the execution, delivery, and performance of this Agreement. In addition, each Party represents and warrants to the other Party that the Governmental Approvals required to be obtained by such Party either have been obtained by such Party and are in full force and effect on the date hereof, or will be obtained by such Party and will be in full force and effect on or prior to the date on which they are required, under applicable Law, to be in full force and effect.

(e) The execution and delivery of this Agreement, the consummation of the transactions herein contemplated and compliance with the terms and provisions hereof by it will not conflict with or result in a material breach of, or require any consent under, any of its constitutive documents or any applicable Law, or under any agreement or instrument to which it is a party or by which it is bound or to which it is subject, or will constitute a material default under any such agreement or instrument.

ARTICLE XII
NOTICES

Section 12.1 Writing. Any notice, statement, demand, claim, offer or other written instrument required or permitted to be given pursuant to this Agreement shall be in writing and signed by the Party giving such notice, and shall be sent by email, facsimile, hand messenger delivery, overnight courier service, or certified mail (receipt requested) to the other Party, and shall be sent to the addresses set forth in Exhibit B. Each Party shall have the right to change the address information to which notice shall be sent or delivered or to specify additional addresses to which copies of notices may be sent. All notices shall be effective upon receipt.

ARTICLE XIII
CONFIDENTIALITY

Section 13.1 Confidentiality. The Parties agree that the Parties' proposals, communications, negotiations and information exchanged prior to the Effective Date concerning this Agreement and the development thereof, and technical and other information regarding or relating to the subject of this Agreement exchanged between the Parties that is marked, or otherwise clearly communicated to the receiving Party as "Confidential," constitutes "Confidential Information" of the disclosing Party. The Owners and AWWU each agree to hold such Confidential Information wholly confidential. Such Confidential Information may only be used

by the Parties for the purposes related to the approval, administration or enforcement of this Agreement.

Section 13.2 Disclosure. Each Party agrees not to disclose Confidential Information of the other Party to any other Person (other than its Affiliates, counsel, consultants, lenders, partners, members, employees, officers and directors, and then only to Persons subject to similar confidentiality restrictions as those set forth herein), without the prior written consent of the other Party, provided, that either Party may disclose Confidential Information if such disclosure is required by Law, including without limitation, pursuant to an order of a court or regulatory agency to enforce this Agreement or to seek approval of this Agreement. In the event a Party is required by Law or a Governmental Authority to disclose Confidential Information, such Party, prior to such disclosure, shall provide reasonable advance notice to the other Party of the time and scope of the intended disclosure in order to permit such other Party the opportunity to obtain a protective order, or to otherwise seek to prevent or limit the scope or otherwise impose conditions upon such disclosure.

Section 13.3 Injunctive Relief. Each Party agrees that a violation of the terms of Sections 13.1 and 13.2 constitutes irreparable harm to the other Party, and that the harmed Party may seek any and all remedies available to it at law or in equity, including but not limited to injunctive relief.

Section 13.4 Release of Agreement. The Parties agree that this Agreement, upon execution, shall not be considered Confidential Information. Except as required by Law, releasing the Agreement to the public shall be the sole responsibility of the Owners, to be released in the manner at a time decided in their sole discretion.

ARTICLE XIV
MISCELLANEOUS

Section 14.1 Reasonability. The Parties shall act in a reasonable manner and in accordance with principles of good faith and fair dealing in the performance of this Agreement. Unless expressly provided otherwise in this Agreement and whether or not stated: (a) where this Agreement requires the consent, approval, or similar action by a Party, such consent or approval shall not be unreasonably withheld, conditioned, or delayed; and (b) wherever this Agreement gives a Party a right to determine, require, request, specify, or take similar action with respect to a matter, such determination, requirement, request, specification, or similar action must be reasonable.

Section 14.2 Entire Agreement. This Agreement, together with all Schedules and Exhibits hereto, embodies the entire agreement and understanding of the Parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements and understandings of the Parties, verbal or written, relating to the subject matter hereof.

Section 14.3 Waiver. Any waiver of the provisions of this Agreement must be in writing and shall not be implied by any usage of trade, course of dealing or course of performance. No exercise of any right or remedy by AWWU or the Owners constitutes a waiver of any other right or remedy contained in or provided by Law. Any delay or failure of a Party to exercise, or any partial exercise of, its rights and remedies under this Agreement shall not operate to limit or

otherwise affect such rights or remedies. Any waiver of performance hereunder shall be limited to the specific performance waived and shall not, unless otherwise expressly stated in writing, constitute a continuous waiver or a waiver of future performance.

Section 14.4 Assignment. Neither Party shall assign this Agreement or any of its rights hereunder without the prior written consent of the other Party, which consent shall not be unreasonably withheld, conditioned or delayed. Notwithstanding the foregoing, either Party, without relieving itself from liability hereunder, and without the need for consent from the other Party provided that any such assignee shall agree to be bound by all terms and conditions hereof, may transfer, pledge or assign this Agreement: (a) to any person or entity succeeding to all or substantially all of the assets of the assigning Party; or (b) to a successor entity in a merger or acquisition transaction. Any assignment made in contravention of this Section 14.4 shall be void and unenforceable.

Section 14.5 Governing Law; Submission to Jurisdiction; Venue; No Jury Trial.

(a) Governing Law. THIS AGREEMENT SHALL BE GOVERNED BY, AND INTERPRETED AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF ALASKA, EXCLUDING ANY CHOICE OF LAW RULES.

(b) Submission to Jurisdiction, Venue. The Parties agree that any suit, action or other legal proceeding by or against any Party (or its Affiliates or designees) with respect to or arising out of this Agreement shall be brought exclusively in the courts of the State of Alaska, in the Municipality of Anchorage, as the Party instituting such suit, action or other legal proceeding may elect, provided that claims related to federal water rights, federal legislation enabling the Eklutna Hydroelectric Project or AWWU Facilities, or the 1991 Agreement may be brought in the United States District Court for the District of Alaska. By execution and delivery of this Agreement, each Party (for itself, its affiliates and its designees) irrevocably and unconditionally consents and submits to the exclusive jurisdiction of such courts and the appellate courts therefrom, and waives any right it may have to assert the doctrine of forum non conveniens or similar doctrine or to object to venue with respect to any proceeding. The Parties irrevocably consent to the service of process in any such action or proceeding by the mailing of copies thereof by registered or certified mail, first class postage prepaid to the addresses set forth in Exhibit B.

(c) No Jury Trial. EACH OF THE PARTIES HEREBY WAIVES ANY AND ALL RIGHTS TO DEMAND A TRIAL BY JURY IN ANY ACTION, SUIT, OR PROCEEDING ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY.

(d) Duty to Proceed. Pending final resolution of any Dispute, the Owners and AWWU shall continue to fulfill their respective obligations hereunder that are not the subject of the Dispute.

Section 14.6 Headings. The titles or headings of the various sections, articles and paragraphs hereof are intended solely for convenience and ease of reference and are not intended, and are not to be deemed for any purpose, to modify or explain or place any interpretation or construction upon any of the provisions of this Agreement.

Section 14.7 Status of the Parties. No provision of this Agreement shall be construed or represented as creating a partnership, trust, joint venture, fiduciary or any similar relationship between the Parties.

Section 14.8 Status of Individual Owners. Each of the Owners shall be jointly and severally liable for the obligations of the Owners under this Agreement. The delineation of specific responsibilities set forth hereunder as among the Owners shall be at the sole discretion of the Owners, not AWWU. If at any time, the Owners agree that one or two of the Owners need no longer be party to this Agreement, such unnecessary Owner(s) may be removed as parties to this Agreement upon written notice to AWWU, if agreed, and shall retain no liability upon removal, with the remaining Owner(s) automatically assuming the full obligations of the Owners hereunder. If an Event of Default exists hereunder at any time with respect to an Owner, it shall be considered an Event of Default with respect to the Owners together as one Party hereunder, provided, that if another Owner agrees to assume such defaulting Owner's obligations under this Agreement by removing such Owner as a party pursuant to the preceding sentence of this Section 14.8 prior to the expiration of any applicable cure period, this shall not be considered an Event of Default hereunder.

Section 14.9 Insurance. Throughout the Term, the Owners shall maintain the required insurance policies as set forth on Exhibit D-1 and AWWU shall maintain the required insurance policy as set forth on Exhibit D-2.

Section 14.10 No Third Party Beneficiaries. This Agreement is made and entered into for the sole protection and legal benefit of the Owners and AWWU, and their permitted successors and assigns, and no other person shall be a direct or indirect legal beneficiary of, or have any direct or indirect cause of action or claim in connection with, this Agreement.

Section 14.11 Further Assurances. Each Party agrees to execute and deliver all further instruments and documents, and take all further action, as may be reasonably necessary to complete performance by the Parties hereunder and to effectuate the purposes and intent of this Agreement, including (1) support of amendment of water rights necessary to implement this Agreement; and (2) AWWU's support of Chugach's tariff revisions necessary to implement the compensation and gain RCA approval as outlined in Section 2.2.

Section 14.12 Amendments. No change, amendment or modification of this Agreement shall be valid or binding upon the Parties unless such change, amendment or modification shall be in writing and duly executed by the Parties.

Section 14.13 Severability. If any provision of this Agreement is determined to be illegal or unenforceable, such determination will not affect any other provision of this Agreement and all other provisions will remain in full force and effect.

Section 14.14 Conflicting Provisions. In the event of any conflict between this document and any Schedule or Exhibit attached hereto, the terms and provisions of this document, as amended from time to time, shall control. In the event of any conflict among the Exhibits, the Exhibit of the latest date mutually agreed to by the Parties shall control.

Section 14.15 Survival. The provisions of Article I, Article VII, Article VIII, Article IX, Article X, Article XI, Article XII, Article XIV, and Article XIV shall survive termination of this Agreement for any reason.

Section 14.16 Counterparts. This Agreement may be executed in any number of separate counterparts and delivered by electronic means, each of which when so executed shall be deemed an original, and all of said counterparts taken together shall be deemed to constitute but one and the same instrument.

[*Remainder of page intentionally left blank*]

IN WITNESS WHEREOF, the Parties have caused this Public Water Supply Agreement to be executed by their duly authorized representatives as of the Effective Date.

Schedule 1.1
Definitions

"1984 Agreement" has the meaning set forth in the Recitals.

"1991 Agreement" means that certain Agreement between the Municipality of Anchorage, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., the United States Fish and Wildlife Service, the National Marine Fisheries Service, the State of Alaska, and the Alaska Energy Authority Relative to the Eklutna and Snettisham Hydroelectric Projects, dated August 7, 1991.

"Affiliate" means, with respect to any Person, any other Person controlling, controlled by or under common control with such first Person. For purposes of this definition and the Agreement, the term "control" (and correlative terms) means (1) the ownership of 50% or more of the equity interest in a Person, or (2) the power, whether by contract, equity ownership or otherwise, to direct or cause the direction of the policies or management of a Person.

"Agreement" has the meaning set forth in the introductory paragraph, and shall include all Exhibits and Schedules hereto.

"APA" has the meaning set forth in the Recitals.

"AWWU" has the meaning set forth in the introductory paragraph, and shall include all successors and permitted assigns of AWWU.

"AWWU Facilities" means the existing water transportation facilities owned and operated by AWWU, including the AWWU Eklutna Lake raw water diversion bypass tunnel interconnected with the intake tunnel of the Eklutna Hydroelectric Project and pipeline.

"AWWU Option" has the meaning set forth in Section 6.2.

"AWWU Water Permit" has the meaning set forth in the Recitals and as may be replaced as described in Section 3.1.

"AWWU Water Project" has the meaning set forth in the Recitals.

"Business Day" means any day other than a Saturday, Sunday or legal holiday in the state of Alaska.

"Chugach" has the meaning set forth in the introductory paragraph, and shall include all successors and permitted assigns of Chugach.

"Conditions Precedent" has the meaning set forth in Section 2.2.

"Confidential Information" has the meaning set forth in Section 13.1.

"Day" or "day" means a calendar day, unless expressly specified otherwise.

"Dispute" has the meaning set forth in Section 10.4.

"DNR" has the meaning set forth in the Recitals.

"Effective Date" has the meaning set forth in the introductory paragraph.

"Eklutna Hydroelectric Project" means the Eklutna Hydroelectric Project initially authorized, constructed and operated pursuant to the Eklutna Project Act of July 31, 1950 (64 Stat. 382, as amended), including any and all property and facilities acquired or used in connection therewith, all of which was then sold to the Owners by the United States of America on October 2, 1997.

"Equivalent Energy Production" has the meaning set forth in Exhibit A – Compensation.

"EWTF" has the meaning set forth in Section 3.2(a).

"Fish and Wildlife Program" has the meaning set forth in the Recitals.

"Force Majeure Event" means the occurrence of any act or event beyond the reasonable control of the Party affected that prevents the affected Party from performing its obligations under this Agreement, in full or part, if such act or event is beyond the reasonable control of, and not the result of the fault or negligence of, the affected Party and such Party has been unable to overcome such act or event with the exercise of due diligence (including the expenditure of reasonable sums), including the following: drought, flood, earthquake, storm, fire, lightning, epidemic, war, riot, civil disturbance, sabotage, terrorism or threat of terrorism, strike or labor difficulty, accident or curtailment of supply or equipment, total casualty to equipment, or restraint, order or decree by a Governmental Authority. Notwithstanding the foregoing, Force Majeure Events shall expressly not include mechanical or equipment failures (except to the extent any such failure is itself caused by a Force Majeure Event) nor diminution in water quality in Eklutna Lake.

"Governmental Approvals" means all authorizations, consents, licenses, leases, rulings, certifications, registrations, exemptions, permits, certificates, and approvals from any Governmental Authority.

"Governmental Authority" means any federal, state or local government, any political subdivision thereof, or any governmental, quasi-governmental, judicial, public or statutory instrumentality, administrative agency, authority, body or other entity having jurisdiction over the Eklutna Hydroelectric Project or AWWU Water Project or their operations, or the health, safety or environmental conditions or otherwise over the Parties.

"Indemnified Parties" has the meaning set forth in Section 9.1.

"Indemnifying Party" has the meaning set forth in Section 9.2.

"Interconnection Agreement" has the meaning set forth in the Recitals.

"Law" means any constitution, charter, act, statute, law, ordinance, code, rule, regulation, order, specified standards or objective criteria contained in any applicable permit or approval or other legislative or administrative action of any Governmental Authority or a final decree, judgment or order of a court or tribunal.

"Liabilities" has the meaning set forth in Section 9.1.

"MEA" has the meaning set forth in the introductory paragraph, and shall include all successor sand assigns of MEA.

"MOA" has the meaning set forth in the introductory paragraph, and shall include all successor sand assigns of MOA.

"MOA-Chugach APSA" means that certain Asset Purchase and Sale Agreement by and between the MOA and Chugach, as amended on December 28, 2018.

"MOA-Chugach Eklutna PPA" means that certain Power Purchase Agreement by and between the MOA and Chugach, dated December 28, 2018, as amended.

"MOA-MEA Eklutna PPA" means that certain Power Purchase Agreement by and between the MOA and MEA, dated September 16, 2019, as amended.

"Owners" has the meaning set forth in the introductory paragraph, and shall include all successors and permitted assigns of the Owners.

"Owners' Facilities" has the meaning set forth in the Recitals.

"Owners' Water Rights" has the meaning set forth in the Recitals.

"Party" and "Parties" has the meaning set forth in the Recitals.

"Person" means any individual, partnership, corporation, limited liability company, association, business, trust, government or political subdivision thereof, Governmental Authority or other entity.

"Preferred Use Status" has the meaning set forth in the Recitals.

"Project Water Rights" has the meaning set forth in the Recitals.

"RCA" has the meaning set forth in Section 2.2(c).

"Recovered Electrical Energy" has the meaning set forth in Section 3.2(a).

"Replacement Energy" has the meaning set forth in Section 3.2(a).

"Replacement Energy Amount" has the meaning set forth in Exhibit A.

"Replacement Energy Payments" has the meaning set forth in Section 3.2(a).

"Term" has the meaning set forth in Section 2.4.

"Transportation Agreement" has the meaning set forth in the Recitals.

EXHIBIT A

Water Scheduling and Compensation

Scheduling & Reporting:

1. Prior to April 1 of each year, AWWU will furnish to the Owners its estimate of:

    a) Anticipated annual diversions of water for public water supply in the AWWU Water Project for the next five water years (June 1 – May 31), by year, for that same period; and

    b) Anticipated monthly diversions of water for public water supply in the AWWU Water Project for the next water year.

2. Within ten (10) days of the beginning of each month, AWWU will furnish to the Owners, on a monthly basis, the daily actual meter readings showing (a) water used by the AWWU Water Project in the preceding month, and (b) electric energy generated by the AWWU Water Project and delivered to the Owners.

Compensation:

As set forth in Section 3.2(a) and (b) of the Agreement and as was previously agreed to by the Parties in the 1984 Agreement, AWWU's use of the Project Water Rights shall remain a burden solely on the MOA's proportionate ownership share of the Project, and for the avoidance of doubt, shall not be allocated to Chugach's or MEA's proportionate ownership shares. Allocation of cost responsibility to the MOA shall be accounted for in the Eklutna Hydroelectric Project's water balancing account maintained among the Owners rather than through billing or other payment compensation owed by AWWU, except as set forth in Section 3.2 and in this Exhibit A. If the MOA's allocation of the Eklutna Hydroelectric Project's water in any given month is insufficient to cover AWWU's use of the Eklutna Hydroelectric Project's water in that month, AWWU will remain entitled to take its water needs within the parameters set forth in the Agreement and AWWU's Water Permit, and the Owners will make necessary adjustments to the MOA's water position within the Eklutna Hydroelectric Project's water balancing account accordingly.

AWWU will compensate the Owners for Replacement Energy (the reduction in electric energy generation attributable to AWWU's use of the Eklutna Hydroelectric Project's water) through Recovered Electrical Energy and Replacement Energy Payments. In other words, AWWU will pay Owners for MWhs not produced, rather than for the quantity of water used by AWWU.

AWWU will not, however, be required to compensate the Owners for water used by AWWU for public water supply in the AWWU Water Project during unplanned reservoir spill events at the Eklutna Hydroelectric Project (i.e., water spills over Eklutna Hydroelectric

Project's dam or through the spillway other than such releases by Owners as part of their implementation of the Fish and Wildlife Program) as measured on a day for day basis. In other words, during days of unplanned reservoir spill events, AWWU will not be required to compensate the Owners for water and equivalent energy generation.

Each month during the term of the Agreement, Chugach (as the Owners' representative designated by the Owners) shall compute the compensation owed by AWWU to Owners pursuant to Section 3.2 of the Agreement and as provided below. Chugach shall provide an invoice to AWWU showing billing determinants, charges, rebates (if any), total amount due, as well as detail regarding the Replacement Energy Payment calculation and Recovered Electrical Energy accounting. As set forth in Section 5.1 of the Agreement, Chugach shall collect such payments from AWWU, allocate values among the Owners as applicable (e.g., pass through its share of the compensation to the MOA), and maintain records as appropriate.

Monthly Compensation Calculation

1. Following receipt of the meter readings from AWWU, the total number of gallons of water used by AWWU during that month, less water used during days in which the unplanned reservoir spill events described above, shall be converted to acre-feet.

2. The energy equivalent for AWWU's water shall then be calculated by multiplying the acre-feet of water used by AWWU by the Eklutna Hydroelectric Project's average energy production per unit of water (kWh/acre-foot) for the month; the result of this calculation is the Equivalent Energy Production (kWh) attributable to AWWU's water usage. Equivalent Energy Production for a given month will be the Replacement Energy for that month.

3. The Replacement Energy in that month shall then be reduced by metered Recovered Electrical Energy at EWTF delivered to MEA and as reported by MEA meter readings to determine the amount of net Replacement Energy (kWh) for which AWWU owes compensation to Chugach for that billing period (the "Replacement Energy Amount").

4. The billing charges for Replacement Energy Amount shall then be calculated as the product of the Replacement Energy (kWh) (after deduction of the Recovered Electrical Energy) and the monthly energy rate set forth in Chugach's Tariff -- "Replacement Energy Service -AWWU" (as may be amended); such charges for Replacement Energy may be adjusted on a kilowatt-hour basis to recover the cost of power as described in Chugach's Tariff -- Fuel and Purchased Cost of Power Adjustment (comprised of fuel, purchased power, and renewable energy adjustment factors) and the Beluga River Unit Contributed Capital Surcharge and Rebate (when applicable).

5. Compensation for Replacement Energy owed by AWWU to Chugach will be capped at $600,000 per water year in value in aggregate as set forth in Section 3.2(b) of the Agreement, as such amount will be adjusted annually for inflation rate using a 15 year rolling average reflected in the Bureau of Labor Statistics' Urban Alaska Consumer Price Index (CPI-U) (as currently reported by State of Alaska Department of Labor and Workforce Development at https://live.laborstats.alaska.gov/cpi/table) ("AWWU Compensation Cap"). In any month of the Term, to the extent that AWWU does not fully compensate Chugach for the total Replacement Energy Amount owed due to application of the AWWU Compensation Cap, the MOA will make Chugach whole through the calculation of a monetary sum equal to the Replacement Energy Amount multiplied by rates set forth in the Chugach tariff for the Replacement Energy Service -- AWWU that shall paid by the MOA to Chugach (i) as an offset against the MOA's ownership share of AWWU payments owed by Chugach pursuant to Section 6.23 of the MOA-Chugach APSA, (ii) cash payments from the MOA to Chugach, or (iii) if necessary, as an offset against other payment obligations owed by Chugach to the MOA pursuant to the MOA-Chugach Eklutna PPA.

Owners' Allocations

1. The Owners hold the following proportionate ownership shares of the Project: MOA – 53.33%; Chugach – 30.00%; MEA – 16.67%.

2. Pursuant to reallocations, terms and conditions set forth in the (i) the MOA-Chugach Eklutna PPA, (ii) Section 6.23 of the MOA-Chugach APSA, and (iii) the MOA-MEA Eklutna PPA, the Project's water (and resulting power output) is allocated to the Owners in the following proportionate shares: MOA – 0%; Chugach – 64.29%; MEA – 35.71%.

3. The cost responsibility for implementation of the Fish and Wildlife Program is borne by the Owners as follows: MOA – 19.04%; Chugach – 64.29%; MEA – 16.67%.

4. MEA shall compensate the MOA for Recovered Electrical Energy at the EWTF received by MEA through the Eklutna Hydroelectric Project's water balancing account.

WATER FACILITIES INTERCONNECTION AGREEMENT

This WATER FACILITIES INTERCONNECTION AGREEMENT (this "Agreement"), dated as of [_____] (the "Effective Date"), is entered into by and between Anchorage Water and Wastewater Utility ("AWWU"), and Chugach Electric Association, Inc. ("Chugach"), Matanuska Electric Association, Inc. ("MEA"), and the Municipality of Anchorage ("MOA") (each of Chugach, MEA, and MOA is an "Owner" and collectively they are referred to as the "Owners"). The Owners and AWWU are sometimes referred to herein as a "Party" or collectively as the "Parties".

R E C I T A L S

WHEREAS, the Owners own and operate the Eklutna Hydroelectric Project, commissioned in 1954, which includes an earthen dam at the outlet of Eklutna Lake and which, under normal operating conditions, diverts the inflows of all water into the Eklutna Lake for hydroelectric production rather than into the Eklutna River;

WHEREAS, AWWU owns and operates certain existing water diversion and transportation facilities integrated with the Eklutna Hydroelectric Project as further detailed in Exhibit B (the "AWWU Facilities") located near the outlet of Eklutna Lake and adjacent to the Eklutna River, and AWWU uses such AWWU Facilities to provide public water supply for its customers;

WHEREAS, the Owners are parties to the 1991 Agreement (as defined below), pursuant to which they are required to develop and implement a Fish and Wildlife program every thirty-five years to protect, mitigate damages to, and enhance fish and wildlife impacted by the development of the Eklutna Hydroelectric Project (the "Fish and Wildlife Program");

WHEREAS, as a result of the process set forth in the 1991 Agreement, the Owners have developed a draft Fish and Wildlife Program in which the Owners have proposed to: (1) develop an Eklutna River release facility consisting in part of AWWU Facilities and facilities constructed pursuant to this Agreement, all as further described and depicted in Exhibit A-1, Exhibit A-2, and Exhibit A-3 (the "Facility"); (2) to transport water from Eklutna Lake through the Facility and release it into the Eklutna River; and (3) to operate and maintain the Facility;

WHEREAS, in connection with their proposal to develop the Facility, the Owners have also agreed to install bridges at eight locations across the Eklutna River to improve and preserve access to AWWU Facilities, as further described in Exhibit K (the "Access Bridges");

WHEREAS, in connection with the execution of this Agreement and in order to enable future implementation of the Fish and Wildlife Program (if approved), and to address compensation for AWWU's present and future use of a portion of Owners' water rights, the Parties are also entering into a Long-Term Water Transportation Agreement (the "Transportation Agreement") and a new Public Water Supply Agreement (the "Water Supply Agreement");

WHEREAS, Owners desire to construct the Facility in coordination with AWWU and AWWU is willing to allow for the interconnection and use of AWWU Facilities as part of the

Facility and to otherwise cooperate with Owners all pursuant to the terms and conditions set forth in this Agreement;

NOW, THEREFORE, in consideration of the premises of this Agreement, the Transportation Agreement, and the Water Supply Agreement, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Owners and AWWU, intending to be legally bound, hereby agree as follows:

ARTICLE 1.
DEFINITIONS; INTERPRETATION; EXHIBITS

1.1 Defined Terms. Capitalized terms used in this Agreement without other definition shall have the meanings set forth in Schedule 1.1, unless the context requires otherwise.

1.2 Interpretation. As used in this Agreement, the terms "herein," "herewith" and "hereof" are references to this Agreement, taken as a whole; the terms "includes" or "including" shall mean "including, without limitation"; and references to a "Section," "Article", "Exhibit" or "Schedule" shall mean a Section, Article, Exhibit or Schedule of this Agreement, as the case may be, unless in any such case the context requires otherwise. All references to a given Exhibit, Schedule, agreement, instrument or other document shall be a reference to that agreement, instrument or other document as modified, amended, supplemented and restated through the date as of which such reference is made. A reference to a Person includes its permitted successors and permitted assigns. The singular shall include the plural and the masculine shall include the feminine and neuter, and vice versa.

ARTICLE 2.
OWNERS RESPONSIBILITIES

2.1 General Responsibilities of Owners. Subject to Sections 4.1, 4.3 and 4.4, the Owners shall be responsible for designing, engineering, obtaining all Approvals for (except with respect to AWWU Approvals), constructing and performing related activities for the successful completion of (i) the Facility and interconnection of the Facility to the AWWU Facilities pursuant to the Facility Criteria; and (ii) the Access Bridges, the costs of which shall be paid for by the Owners.

2.2 Standard of Work; Skill and Expertise. Throughout the performance of all aspects of the Work, the Owners shall comply with, and shall ensure that each Subcontractor complies with, all applicable Laws and Prudent Industry Standards (the "Standard of Work"). The Owners shall, throughout the performance of the Work, use commercially reasonable efforts to ensure that all employees and contractors engaged in connection with the maintenance of, operation of, service of, and any future modification to (to include design, construction, commissioning, and installation) the Facility shall have the appropriate and necessary experience, skill and expertise to carry out the tasks efficiently, professionally, and in accordance with the Standard of Work.

2.3 Scope of Work. Without limiting the generality of Sections 2.1 and 2.2, the Owners shall perform all of the specific tasks in accordance with the Scope of Work and the Project Schedule, subject to any Change Orders pursuant to ARTICLE 7, in order to achieve Commercial Operation and Final Acceptance of the Facility in accordance with ARTICLE 4, and to commence

the Parties' obligations under the Transportation Agreement, whereupon the Work under this Agreement shall be concluded and the obligations under the Transportation Agreement shall begin.

2.4 Project Manager. The Owners shall identify to AWWU and at all times during the term of this Agreement maintain a Project Manager. The Project Manager shall act as AWWU's primary point of contact with the Owners with respect to the Work, and shall be available to meet with AWWU as reasonably requested by AWWU to discuss the Work or any issue related thereto. The Project Manager shall have full authority to act for the Owners under this Agreement; provided, that the Project Manager shall under no circumstances have the authority to amend (except for the issuance of Change Orders), terminate, or assign this Agreement. The Owners may change the Project Manager at any time upon written notice to AWWU. As of the Effective Date, the Project Manager is listed in Exhibit E.

2.5 Status of Individual Owners. Each of the Owners shall be jointly and severally liable for the obligations of the Owners under this Agreement. The delineation of specific responsibilities set forth hereunder as among the Owners shall be at the sole discretion of the Owners, not AWWU. If, at any time, the Owners agree that one or two of the Owners need no longer be party to this Agreement, such unnecessary Owner(s) may be removed as parties to this Agreement upon written notice to AWWU and, if agreed, shall retain no liability upon removal, with the remaining Owner(s) automatically assuming the full obligations of the Owners hereunder. If an Event of Default exists hereunder at any time with respect to an Owner, it shall be considered an Event of Default with respect to the Owners together as one Party hereunder, provided, that if another Owner agrees to assume such defaulting Owner's obligations under this Agreement by removing such Owner as a party pursuant to the preceding sentence of this Section 2.5 prior to the expiration of any applicable cure period, this shall not be considered an Event of Default hereunder.

ARTICLE 3.
AWWU RESPONSIBILITIES

3.1 Access to Site. As of the Effective Date, AWWU shall, with respect to the land and AWWU Facilities within its control, provide the Owners with a non-exclusive license to access the Site and the AWWU Facilities necessary to enable the Owners to perform their obligations under this Agreement in accordance with the Project Schedule, provided, that AWWU may from time to time limit access to the Site or the AWWU Facilities under AWWU control temporarily only to the extent necessary to address reasonable security or safety issues, and to avoid putting AWWU's public water supply at risk of interruption or contamination. To the extent that any additional access permissions from third-party landowners adjacent to the Site may be required for Owners to access the Site and conduct the Work pursuant to the site license granted under this Section 3.1, obtaining such Approvals shall be the responsibility of the Owners, provided that (i) AWWU shall be responsible for any such permissions associated with the construction and maintenance of the Access Bridges; (ii) if the Parties agree that in certain other circumstances AWWU responsibility is more appropriate, AWWU shall bear such responsibility; and (iii) AWWU shall assist the Owners with obtaining such Approvals as is reasonably requested by the Owners, including by being the first and primary point of contact with such third party in situations where AWWU has an existing easement or applicable existing relationship with such third party. To the extent that AWWU adds access or other security limitations to the Site, to the Owners'

Portion, or to the AWWU Facilities, the Owners and AWWU shall cooperate to ensure continuous access for the Owners and their contractors, to enable them to perform the Owners' obligations under this Agreement.

3.2 Required Approvals. After the Owners' achievement of the Construction Start CPs, AWWU shall be responsible for obtaining and maintaining those Governmental Approvals and third-party approvals necessary for the completion of the Work as set forth on Exhibit F hereto (the "AWWU Approvals"), any costs of which shall be initially paid for by AWWU and reimbursed by Owners pursuant to Section 5.3. The Owners shall provide AWWU with such reasonable assistance as AWWU may request in obtaining such AWWU Approvals.

3.3 AWWU Representative. AWWU shall designate in writing and maintain at all times during the term of this Agreement an AWWU Representative to represent AWWU and to receive communications from the Owners with regard to the Work and the development of the Facility and the Access Bridges. The AWWU Representative shall act as the Owner's primary point of contact with the AWWU with respect to the Work, and shall be available to meet with the Owners and Project Manager, as reasonably requested, to discuss the Work or any issue related thereto. The AWWU Representative shall have full authority to act for AWWU under this Agreement; provided, that AWWU's Representative shall under no circumstances have the authority to amend (except for the signing of Change Orders), terminate or assign this Agreement. AWWU may change the AWWU Representative at any time upon written notice to the Owners. As of the Effective Date, the AWWU Representative shall be [_____][2].

3.4 Duty to Cooperate. AWWU shall, throughout the performance of the Work, cooperate with the Owners and perform its responsibilities, obligations and services under this Agreement in a timely manner, to facilitate the Owners timely and efficient performance of the Work and the Owners' obligations under this Agreement. AWWU shall provide timely reviews and approvals, including completing the design approval set forth in Section 4.3, such approvals not to be unreasonably withheld or delayed.

3.5 Site and AWWU Facilities Information. Except as set forth on Schedule 3.5, AWWU hereby represents and warrants that the conditions of the Site and of the AWWU Facilities are suitable for the Work and the completion of the Facility. AWWU hereby acknowledges that the Owners shall be entitled to rely on Schedule 3.5 and Exhibit B in preparing their assessment of the Work necessary to complete the Facility, as well as their work preparing the Project Schedule; and that if any information contained in Schedule 3.5 or Exhibit B is later found to be inaccurate, the Owners shall be entitled to a Change Order at their discretion pursuant to Section 7.3.

ARTICLE 4.
CONDITIONS PRECEDENT; PROJECT SCHEDULE, DESIGN APPROVAL

4.1 Construction Start Conditions Precedent.

[2] **Note to Accompany Final Draft**: To be populated after Governor approval and prior to execution.

(a) The obligations of the Owners to design, engineer, permit and construct the Facility as set forth in this Agreement, and the right of the Owners to conduct Work at the Site, and to physically interconnect the Facility with the AWWU Facilities as set forth in this Agreement, shall not be effective until the achievement of the following conditions precedent (the "Construction Start CPs"):

(i) The Owners receive final approval from the Governor of Alaska, with such approval not subject to any pending judicial review or appeal, for a Fish and Wildlife Program that requires the use of the AWWU Facilities as contemplated in this Agreement, provided that such approval includes no unexpected conditions materially adverse to the Owners or to AWWU, as determined in good faith by the Parties and in the exercise of commercially reasonable business judgment;

(ii) The Owners are issued lawful documentation from the Alaska Department of Natural Resources authorizing the use and transport of water as contemplated under the Transportation Agreement, including but not limited to an amendment of the Owners' Water Rights or other approval(s) authorizing a change of use to allow the Owners to use a portion of the Owners' Water Right to establish and continue instream flows in the Eklutna River;

(iii) The Owners and AWWU, with regard to AWWU Approvals, have obtained all Approvals necessary to conduct the Work; and

(iv) The Transportation Agreement and the Water Supply Agreement are in full force and effect and are valid, binding and enforceable against AWWU and the Owners in accordance with their terms.

(b) Notwithstanding Section 4.1(a), nothing in this Agreement shall be construed to prevent the Owners from conducting design and permitting work in preparation for Facility construction prior to the achievement of the Construction Start CPs. Such pre-construction Work shall be done at the sole discretion and financial risk of the Owners, and shall be treated as Work for which all of AWWU's duties and responsibilities hereunder shall apply unless otherwise stated.

4.2 Project Schedule. The Owners shall perform all Work in accordance with the Scope of Work and the Project Schedule. The Owners shall use commercially reasonably efforts to meet all milestones set forth in the Project Schedule, provided that all such milestones may be extended at the discretion of the Owners as may be reasonably necessary to accommodate delays in the achievement of the Construction Start CPs or the receipt of necessary Approvals that are outside the control of the Owners.

4.3 Submission for Design Approval. As of the Effective Date, the proposed design for the Facility is set forth in Exhibit A-3. The Owners may modify such design at their discretion until the achievement of the Construction Start CPs, at which point prior to the commencement of any construction activities at the Site, the Owners shall provide to AWWU final design drawings and proposals (and any applicable calculations, models, and reports developed in support thereof) for the Facility for AWWU's review and approval, such approval to not be unreasonably withheld or delayed. AWWU shall indicate to the Owners within thirty 30 Days after receipt of such design

drawings, proposals, calculations, models, and reports whether it approves or denies the design. If AWWU denies the design, the parties shall work in good faith to resolve the applicable issues and develop an updated design for AWWU approval.

4.4 Failure to Obtain Approvals. If, at any point during the Owners performance of the Work, the Owners or AWWU are unable to obtain any Approval necessary to construct or operate the Facility as intended herein and in the Fish and Wildlife Program, despite taking all reasonable commercial efforts to obtain such Approvals, then either Party may terminate this Agreement upon forty-five (45) Days prior written notice; and the Owners shall restore the site pursuant to Section 11.7.

4.5 Installation; Testing Procedures.

(a) Conduct of Tests. As soon as possible after installation of all Equipment necessary, as determined by the Owners in their sole discretion, to render the Facility mechanically and structurally complete, the Owners shall begin to conduct, or cause to be conducted, the Commissioning Procedures, in accordance with this Section 4.5 and the Commissioning Procedures Guidelines. Owners may perform and re-perform any number of Commissioning Procedures in accordance with the Commissioning Procedures Guidelines, and the Owners, at their discretion, may prematurely terminate any Commissioning Procedures so long as the remaining Commissioning Procedures are completed prior to Commercial Operation.

(b) AWWU Personnel. The Owners shall provide AWWU at least two (2) Business Days' prior notice of the intended commencement of the Commissioning Procedures. AWWU shall have at least one representative at the Site throughout the performance of the Commissioning Procedures, in order to monitor the taking of measurements to determine the performance and safety of the Facility, all in accordance with the Commissioning Procedures Guidelines.

4.6 Commercial Operation. When the Owners consider that the criteria for Commercial Operation have been met, including successful completion of the Commissioning Procedures in accordance with Section 4.5, the Owners shall so notify AWWU in writing, and shall provide AWWU with a completed Commercial Operation certificate issued by an independent licensed professional engineer, in the form set forth in Exhibit H (the "Commercial Operation Certificate").

4.7 Final Acceptance. The criteria for achieving Final Acceptance shall be that: (a) Commercial Operation has occurred; (b) AWWU has received from the Owners copies of all as-built drawings for the Work and the Facility; (c) AWWU has received from Owners all Equipment Documentation related to the AWWU Portion; (d) Owners have removed from the Site and properly disposed of all wastes created at or brought onto the Site by the Owners; and (e) an Owners' training program for AWWU's operation and maintenance personnel has been completed in accordance with the Scope of Work. When the Owners consider that the criteria for Final Acceptance have been met, the Owners shall so notify AWWU in writing. Within five (5) Days thereafter, AWWU shall either: (i) notify the Owners in writing that it agrees that Final Acceptance has been achieved, or (ii) advise the Owners of the items in Section 4.7(a) through (e) (collectively, "Final Acceptance Items") that AWWU believes have not yet been satisfied. Upon receipt of any

notice from AWWU of an alleged failure to satisfy a Final Acceptance Item, the Owners shall either: (A) satisfy such Final Acceptance Item(s); or (B) advise AWWU in writing that the Owners believes in good faith that all Final Acceptance Item(s) have been satisfied and shall request the commencement of negotiations pursuant to Section 11.5(a).

4.8 Post-Completion Facility O&M. Upon Final Acceptance and the applicable title transfers set forth in ARTICLE 6, AWWU shall be responsible for operating and maintaining the AWWU Facilities and the AWWU Portion; and the Owners shall be responsible for operating and maintaining the Owners' Portion. Each of AWWU and the Owners shall also have further specific ongoing operations and maintenance obligations for portions of the Facility during the "Delivery Term" of the Transportation Agreement, as further detailed in the Transportation Agreement.

4.9 Post-Completion Access Bridge Maintenance. Upon completion of any Access Bridge by the Owners, and possession and applicable title having passed to AWWU pursuant to Section 6.1(d), full responsibility for (and associated costs of) such Access Bridge maintenance shall belong to AWWU, except that the Owners shall use commercially reasonable efforts to obtain a one-year materials and workmanship warranty from the contractor(s) engaged by the Owners to construct the Access Bridges and then shall pass such warranty on to AWWU.

4.10 Skill and Expertise. Each Party shall use commercially reasonable efforts to ensure that all employees and contractors engaged in connection with the maintenance of, operation of, service of, and any future modification to (to include design, construction, commissioning, and installation) the Facility shall have the appropriate and necessary experience, skill and expertise to carry out the tasks efficiently, professionally, and in accordance with Prudent Industry Standards and applicable Laws.

ARTICLE 5.
COSTS; TAXES; REIMBURSEMENT

5.1 Costs. All costs to complete the Facility and perform the Work hereunder shall be the responsibility of Owners. The Owners shall reimburse AWWU pursuant to Section 5.3 for AWWU's reasonable actual costs related to or arising out of the development and construction of the Facility and related to all of AWWU's responsibilities set forth in ARTICLE 3, including but not limited to documented direct and indirect costs, overhead, general and administrative costs, staff time, and all other costs related to or arising out of the planning, engineering and project management associated with the Facility; provided that AWWU shall use commercially reasonable efforts to minimize such costs.

5.2 Taxes. The Owners shall be responsible for and shall pay any sales, use, gross receipts, occupation, and other taxes (excluding income and franchise tax imposed upon AWWU) that from time to time may become payable as a consequence of this Agreement.

5.3 Payments. For any costs described in Section 5.1 initially borne by AWWU, AWWU shall submit to each of the Owners a detailed accounting of such cost for which AWWU is seeking reimbursement, together with such supporting documentation as the Owners shall reasonably require. Within sixty (60) Days after receiving a properly completed application for reimbursement and all required supporting documentation, each of the Owners shall individually:

(i) pay AWWU their respective Cost Responsibility Proportion of the amounts set forth in AWWU's application for payment; or (ii) notify AWWU in writing that such Owner believes in good faith that a requested payment amount is not due and owing and shall request the commencement of negotiations pursuant to Section 11.5(a). In addition to the requirement that each Owner pay its Cost Responsibility Proportion as required in this Section, the Owners shall each be jointly and severally liable for all reimbursement obligations owed to AWWU under this Article 5.

ARTICLE 6.
TITLE; LOSS OR DAMAGE; FORCE MAJEURE

6.1 Title.

(a) Legal title to and ownership of the AWWU Portion shall pass to AWWU upon achievement of Final Acceptance free and clear of any and all liens, claims, security interests or other encumbrances. Title to drawings, specifications and like materials provided by Owners with respect to the AWWU Portion shall also pass to AWWU upon achievement of Final Acceptance. Owners shall deliver to AWWU such assignments, bills of sale or other documents as reasonably requested by AWWU to evidence such transfers of title and ownership.

(b) Legal title to and ownership of the Owners' Portion shall remain with Owners after Final Acceptance and throughout the term of the Transportation Agreement, free and clear of any and all liens, claims, security interests or other encumbrances imposed by AWWU.

(c) Legal title to and ownership of the AWWU Facilities shall remain with AWWU before, during, and after the construction of the Facility.

(d) Legal title to and ownership of any Access Bridge shall pass to AWWU upon completion of such Access Bridge. Owners shall deliver to AWWU such assignments, bills of sale or other documents as reasonably requested by AWWU to evidence such transfers of title and ownership, and if the Parties determine that an additional agreement between the Parties is necessary to detail specific Access Bridge construction and ownership transfer terms and conditions, the Parties shall negotiate such documentation in good faith and in accordance with the terms of this Agreement.

(e) Legal title to and ownership of all Owners' Water shall remain with the Owners at all times during construction of the Facility, including during the performance of the Commissioning Procedures.

6.2 Risk of Loss.

(a) Equipment. Notwithstanding anything herein to the contrary, the Owners shall have the full responsibility for care, custody and control of material and Equipment incorporated into the Work (including all Equipment and materials used in connection therewith), and shall bear the risk of loss thereof, until an applicable transfer of title to the Equipment for the AWWU Portion occurs, at which time risk of loss shall pass to AWWU.

(b) Water. For any quantity of Owners' Water flowing through AWWU's Facilities as part of the Commissioning Procedures or otherwise during the construction of the Facility: control, custody and risk of loss of such Owners' Water shall transfer from the Owners to AWWU at the Injection Point, where such Owners' Water shall comingle with AWWU's Water until reaching the Delivery Point, at which point the custody, control and risk of loss of a quantity of water equal to the original quantity of Owners' Water released into the AWWU Facilities at the Injection Point shall pass back to the Owners.

6.3 Force Majeure. Each Party shall be excused from performance and shall not be considered to be in default with respect to any obligation hereunder, except for the Owners' obligation to reimburse AWWU for costs pursuant to ARTICLE 5, if and to the extent that such Party's failure of, or delay in, performance is due to a Force Majeure Event; provided, that:

(a) such Party gives the other Party prompt written notice describing the particulars of the Force Majeure Event as soon as is reasonably practicable after becoming aware of the occurrence of the Force Majeure Event;

(b) the suspension of performance is of no greater scope and of no longer duration than are reasonably required by the Force Majeure Event;

(c) no obligations of an affected Party that arose before the occurrence of the Force Majeure Event causing the suspension of performance shall be excused as a result of such Force Majeure Event, unless and only to the extent that the performance of such obligations is impaired by the Force Majeure Event;

(d) the Party uses diligent commercially reasonable efforts to overcome or mitigate the effects of the Force Majeure Event; and

(e) when the Party is able to resume performance of its obligations under this Agreement, such Party shall give the other Party written notice to that effect, and shall promptly resume performance hereunder.

ARTICLE 7.
CHANGES

7.1 Change Orders. The Owners may propose Change Orders to AWWU if those Change Orders: (i) improve the Facility; (ii) are required by a Governmental Authority as a condition precedent to issuance of any Governmental Approval; or (iii) are otherwise advisable for the Work. This shall not affect the obligation of the Owners to perform the Work and to install the Facility in accordance with the terms of this Agreement, except as otherwise set forth in the Change Order or in Sections 7.2 or 7.3.

7.2 Changes to Project Schedule. In the event that any Change Order affects the amount of time needed to complete any portion of the Work, there shall be an equitable adjustment of the time of performance and the Project Schedule, as agreed to by the Parties.

7.3 Unanticipated Conditions. If any unusual or unanticipated conditions exist or arise at the Site such as Hazardous Materials, structural or geotechnical deficiencies, environmental

conditions, pollution or archeological findings not known to the Owners as of the Effective Date (collectively, "Unanticipated Conditions"), which conditions would involve the Owners incurring any expenses or delays to correct such conditions, the Owners shall submit a request for approval of the corrective work and expense pursuant to a Change Order, the approval of which by AWWU shall not be unreasonably withheld, conditioned or delayed, and such corrective work shall be deemed incorporated into the Scope of Work; provided, however, if any Unanticipated Conditions exist or arise that are contrary to those set forth on Schedule 3.5 or Exhibit B, then the Change Order submitted by the Owners in connection with such Unanticipated Conditions shall be deemed to be automatically approved by AWWU. All change orders under this Agreement shall be fulfilled at the sole expense of the Owners.

ARTICLE 8.
WARRANTIES

8.1 Warranties.

(a) Except as expressly set forth in Section 8.1(b), Owners do not make (and hereby expressly disclaim) any other warranties of any kind whatsoever.

(b) The Owners hereby warrant that as of the Commercial Operation Date: (i) the Facility will meet the requirements set forth in the Facility Criteria; (ii) the Facility will be free from defects in workmanship under normal operating conditions, provided that such warranty shall not apply to existing AWWU Facilities incorporated within the Facility; (iii) all Work will have been performed in accordance with Prudent Industry Standards and all requirements of this Agreement; and (iv) the Work, including but not limited to each item of Equipment incorporated therein, will be new and shall conform in all material respects with the plans and specifications prepared in accordance with this Agreement and all descriptions set forth herein.

(c) In conjunction with achievement of the Commercial Operation Date, the Owners hereby agree to assign to AWWU, and AWWU agrees to assume, all Subcontractor, supplier and manufacturer warranties set forth on Exhibit G relating to the AWWU Portion, and thereafter AWWU shall pursue all warranty claims thereunder directly with such Subcontractors, suppliers and manufacturers.

8.2 Warranty Period. Owners shall remedy any breach of the warranties set forth in Sections 8.1(b) discovered within 12 months of the Commercial Operation Date (the "Warranty Period").

8.3 Remedies. If the warranty set forth in Section 8.1 is breached or a defect or deficiency is discovered by Owners or AWWU during the Warranty Period, Owners shall repair, replace, and/or correct the applicable Work on a reasonably expedited basis while minimizing any impact of the failure on Facility availability and functionality or AWWU Facilities availability and functionality. AWWU shall permit the Owners access to the AWWU Facilities and the AWWU Portion necessary or useful to perform Owners' warranty obligations under this Agreement. All costs of Owners' performance of their warranty obligations shall be borne by Owners, including any removal, replacement and reinstallation of Equipment and materials necessary to gain access to defective Work.

8.4 Warranty Exclusions. The warranty obligations set forth in this ARTICLE 8 do not extend to Work that is damaged by or other potential warranty claims arising from: (a) the negligent acts or omissions of AWWU or its contractors, agents, employees, representatives or any other Person acting on behalf of AWWU; (b) Force Majeure Events; (c) any Equipment included in the AWWU Portion that is not maintained and operated by AWWU in accordance with all Equipment Documentation; (d) normal wear and tear; (e) any alteration, repair or replacement made without the prior written approval of the Owners or contrary to instructions from the Owners; or (f) conditions that existed prior to the completion of the Work, including any defects or deficiencies in any equipment included in AWWU Facilities not directly caused by the Owners as part of the Work (collectively, "Non-Owner Work"). In the event that the warranty service requested is related to Non-Owner Work or is covered by any warranty set forth on Exhibit G, the Owners shall have no further obligation.

8.5 NO IMPLIED WARRANTIES. EXCEPT AS EXPRESSLY PROVIDED IN THIS AGREEMENT, THE OWNERS MAKE NO WARRANTIES OR GUARANTEES, EXPRESS OR IMPLIED, AND AWWU DISCLAIMS ANY WARRANTY OR GUARANTEE IMPLIED BY LAW, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT AND IMPLIED WARRANTIES OF CUSTOM OR USAGE.

ARTICLE 9.
LIMITATIONS ON LIABILITY

9.1 Aggregate Limitation of Liability. Notwithstanding any other provision of this Agreement, the total aggregate liability of the Owners and the total aggregate liability of AWWU arising out of or relating to this Agreement, from any and all causes, whether based on contract, tort (including negligence), strict liability or any other cause of action, shall in no event exceed ten million dollars ($10,000,000) for AWWU, and ten million dollars ($10,000,000) for the Owners collectively, provided that such limit shall not apply in the case of such Party's (i) gross negligence or willful misconduct, (ii) third-party indemnity obligation, or (iii) breach of any representation or warranty.

9.2 CUMULATIVE REMEDIES. IF NO REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY PROVIDED, OR IF A REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY NON-EXCLUSIVE, THE NON-DEFAULTING PARTY SHALL HAVE THE RIGHT TO EXERCISE ALL RIGHTS AND REMEDIES AVAILABLE TO IT AT LAW OR IN EQUITY; PROVIDED, HOWEVER, THAT THE LIABILITY OF THE DEFAULTING PARTY SHALL BE LIMITED TO DIRECT, ACTUAL DAMAGES ONLY AND ALL OTHER DAMAGES AND REMEDIES ARE WAIVED.

9.3 WAIVER OF CERTAIN DAMAGES. EXCEPT WITH RESPECT TO INDEMNIFICATION OF THIRD PARTY CLAIMS PURSUANT TO ARTICLE 10, OR AS OTHERWISE EXPRESSLY PROVIDED FOR HEREIN, IN NO EVENT SHALL EITHER PARTY BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY, INDIRECT, BUSINESS INTERRUPTION OR SIMILAR DAMAGES, WHETHER BY STATUTE, IN TORT, BY CONTRACT OR OTHERWISE.

ARTICLE 10.
INDEMNIFICATION

10.1 Indemnity. To the fullest extent permitted by Law, each Party shall indemnify, hold harmless and defend the other Party and its directors, officers, shareholders, partners, agents and employees, and the Affiliates of the same (collectively, the "Indemnified Parties"), from and against any and all claims, loss, damage, expense and liability, including court costs and reasonable attorneys' fees (collectively, "Liabilities") incurred by the Indemnified Parties in connection with or arising from (i) the Work; and (ii) any claim for physical damage to or physical destruction of any part of the Facility, the AWWU Facilities, or death of or bodily injury to any person, to the extent any such Liability was caused by the negligence of the Indemnifying Party or its agents or employees or others under such Indemnifying Party's control, except any Liabilities incurred due to the negligence or willful misconduct of an Indemnified Party. For the purpose of the definition of "Indemnified Parties" AWWU shall not be considered to be an "Affiliate" of the MOA.

10.2 Environmental Indemnity. Notwithstanding any other provision hereof, each Party shall indemnify, defend and hold harmless the other Party and its Indemnified Parties from and against all Liabilities arising out of or relating to the existence at, on, above, below or near the Site of any Hazardous Material to the extent such Hazardous Material is deposited, spilled, released or otherwise caused by the Indemnifying Party or its Subcontractors or agents in connection with the Work.

10.3 Defense of Claims. A Party with an indemnification obligation pursuant to this ARTICLE 10 (an "Indemnifying Party") shall have the right to defend the Indemnified Parties pursuant to this ARTICLE 10 by counsel of the Indemnifying Party's selection (including insurance counsel) reasonably satisfactory to the Indemnified Party, unless in the opinion of counsel for the Indemnifying Party a conflict of interest between the Parties may exist with respect to such claim. If the Indemnifying Party does not assume the defense of the Indemnified Party, or if a conflict precludes counsel for the Indemnifying Party from providing the defense, then the Indemnifying Party shall reimburse the Indemnified Party on a monthly basis for the Indemnified Party's defense through separate counsel of the Indemnified Party's choice. Even if the Indemnifying Party assumes the defense of the Indemnified Party with acceptable counsel, the Indemnified Party, at its sole option, may participate in the defense, at its own expense, with counsel of its own choice without relieving the Indemnifying Party of any of its obligations hereunder. The Parties shall give each other prompt written notice of any asserted claims or actions indemnified against hereunder and shall cooperate with each other in the defense of any such claims or actions. Without the prior written consent of the Indemnified Party, which consent shall not be unreasonably withheld, conditioned or delayed, no Indemnifying Party shall settle any such claims or actions in a manner that would require any action or forbearance from action by any Indemnified Party.

ARTICLE 11.
DEFAULT AND REMEDIES; TERMINATION; DISPUTE RESOLUTION

11.1 Event of Default. The following shall constitute events of default on the part of either party (each, an "Event of Default") under this Agreement:

(a) If a Party makes a general assignment for the benefit of its creditors, or if a receiver is appointed on account of the insolvency of such Party, or if such Party files a petition seeking to take advantage of any other Law relating to bankruptcy, insolvency, reorganization, winding up or composition of or readjustment of debts and, in the case of any such proceeding instituted against such Party (but not by such Party) such proceeding is not dismissed within sixty (60) days of such filing;

(b) If a Party fails to comply with any material terms of this Agreement not otherwise set forth as an Event of Default in this Section 12.1(b) and fails to cure or remedy such failure within thirty (30) days after notice and a written demand is made by the non-defaulting Party to the defaulting Party to cure the same or, if such failure cannot be cured within thirty (30) days, the defaulting Party fails to commence to cure such failure within thirty (30) days after such notice and written demand and thereafter diligently pursue such cure to completion, which shall in no event be later than ninety (90) days after such notice;

(c) If a Party fails to make any payment due hereunder within sixty (60) days after written notice from the non-defaulting Party;

(d) If a Party defaults under the Water Supply Agreement or the Transportation Agreement; or

(e) If any representation or warranty of a Party in this Agreement proves to have been false or misleading in any material respect when made, and such Party has not, within thirty (30) days after written notification thereof from the non-defaulting Party, either fully remedied, or commenced and diligently pursued the remedy, of all adverse impacts on the non-defaulting Party resulting therefrom, all to the reasonable satisfaction of the non-defaulting Party.

11.2 Remedies Upon Event of Default. Upon the occurrence and continuation of an Event of Default, the non-defaulting Party shall have the right to terminate this Agreement and the Water Supply Agreement upon ten (10) days' prior written notice, and pursue any other remedy available to such non-defaulting party at law or in equity arising out of such Event of Default, including a claim for monetary damage or specific performance.

11.3 Site Restoration Upon Termination. If either Party terminates this Agreement for any reason during construction, the Owners shall promptly withdraw from the Site and shall remove all Equipment, returning the Site to its previous condition, all at Owners' cost, provided that if the Owners terminate for an AWWU Event of Default under this Agreement or the Water Supply Agreement or Transportation Agreement, AWWU shall reimburse the Owners for the costs of such removal.

11.4 Automatic Cross-Agreement Termination. If this Agreement is terminated for any reason, the Water Supply Agreement and the Transportation Agreement shall automatically terminate effective as of the same date as this Agreement's termination.

11.5 Dispute Resolution. In the event of any dispute arising under this Agreement (a "Dispute"), within ten (10) Business Days following notice by either Party, (i) each Party shall appoint a representative, and (ii) the representatives shall meet, negotiate and attempt in good faith to resolve the Dispute quickly, informally and inexpensively. In the event the representatives

cannot resolve the Dispute within thirty (30) Days after the first meeting, either Party may request that consideration and resolution of the Dispute be transferred to a designated representative of each Party's senior management. Within ten (10) Days following such a request, each Party shall submit a written summary of the Dispute describing the issues and claims to a senior officer of each Party designated to address the Dispute. Within ten (10) Business Days after receipt of each Party's Dispute summaries, the senior management representatives for both Parties shall negotiate in good faith to resolve the Dispute. If such senior management representatives are unable to resolve the Dispute within thirty (30) Days thereafter, either Party may pursue any available legal remedies.

ARTICLE 12.
REPRESENTATIONS

12.1 General Representations and Warranties. Each Owner and AWWU hereby represents and warrants that:

(a) It is duly organized, validly existing and in good standing under the Laws of the state of its formation and is duly qualified to do business in the jurisdiction where the Site is located.

(b) It has all necessary power and authority to execute, deliver and perform its obligations under this Agreement; its execution, delivery and performance of this Agreement have been duly authorized by all necessary corporate, municipal, or other action on its part; and this Agreement has been duly and validly executed and delivered by it and constitutes its legal, valid and binding obligation enforceable against it in accordance with its terms, except as the enforceability thereof may be limited by bankruptcy, insolvency, reorganization or moratorium or other similar Laws relating to the enforcement of creditors' rights generally and by general equitable principles.

(c) It is not in violation of any applicable Law, or any judgment entered by any federal, state, local or other Governmental Authority, which violations, individually or in the aggregate, would adversely affect its performance of any obligations under this Agreement. There are no legal or arbitration proceedings or any proceeding by or before any Governmental Authority, now pending or (to its best knowledge) threatened against it which, if adversely determined, could have a material adverse effect upon its financial condition, operations, prospects or business, as a whole, or its ability to perform under this Agreement.

(d) No authorization, approval, exemption, or consent of or by any Person is required by it in connection with the execution, delivery, and performance of this Agreement. In addition, each Party represents and warrants to the other Party that the Governmental Approvals required to be obtained by such Party either have been obtained by such Party and are in full force and effect on the date hereof or will be obtained by such Party and will be in full force and effect on or prior to the date on which they are required, under applicable Law, to be in full force and effect, so as to permit the Owners to commence and prosecute the Work to completion in accordance with the Project Schedule.

(e) The execution and delivery of this Agreement, and the consummation of the transactions herein contemplated and compliance with the terms and provisions hereof by it, will not conflict with or result in a material breach of, or require any consent under, any of its constitutive documents, or any applicable Law, or any agreement or instrument to which it is a party or by which it is bound or to which it is subject, or constitute a material default under any such agreement or instrument.

ARTICLE 13.
NOTICES

13.1 Writing. Except as set forth in Section 13.2, any notice, statement, demand, claim, offer or other written instrument required or permitted to be given pursuant to this Agreement shall be in writing signed by the Party giving such notice and shall be sent by email, facsimile, hand messenger delivery, overnight courier service, or certified mail (receipt requested) to the other Party at the address set forth in Exhibit L. Each Party shall have the right to change the address information to which notice shall be sent or delivered or to specify additional addresses to which copies of notices may be sent, in either case by similar notice sent or delivered in like manner to the other Party. All notices shall be effective upon receipt.

13.2 Technical Communications. Any technical or other communications pertaining to the Work shall be between the Project Manager and the AWWU Representative or other representatives appointed by the Project Manager or the AWWU Representative. Each Party shall notify the other in writing of the name of such representatives. The Project Manager or other designated representatives shall be reasonably satisfactory to AWWU, have knowledge of the Work, and be available at all reasonable times for consultation.

ARTICLE 14.

CONFIDENTIALITY; PUBLIC STATEMENTS

14.1 Confidentiality. The Parties agree that the Parties' proposals, communications, negotiations, and information exchanged prior to the Effective Date concerning this Agreement and the development thereof, and technical and other information regarding or relating to the Facility, the Access Bridges or the Work exchanged between the Parties that is or otherwise clearly communicated to the receiving Party as "Confidential" constitute "Confidential Information" of the disclosing Party. The Owners and AWWU each agree to hold such Confidential Information wholly confidential. Such Confidential Information may only be used by the Parties for the purposes related to the approval, or administration or enforcement of this Agreement.

14.2 Disclosure. Each Party agrees not to disclose Confidential Information of the other Party to any other Person (other than its Affiliates, counsel, consultants, lenders, partners, members, employees, officers and director, and then only to Persons subject to similar confidentiality restrictions as those set forth herein), without the prior written consent of the other Party, provided, that, either Party may disclose Confidential Information, if such disclosure is required by Law, including without limitation, pursuant to an order of a court or regulatory agency or in order to enforce this Agreement or to seek approval of this Agreement. In the event a Party is required by Law or a Governmental Authority to disclose Confidential Information, such Party,

prior to such disclosure, shall provide reasonable advance notice to the other Party of the time and scope of the intended disclosure, in order to permit such non-disclosing Party the opportunity to obtain a protective order or to otherwise seek to prevent or limit the scope or otherwise impose conditions upon such disclosure.

14.3 Injunctive Relief. Each Party agrees that violation of the terms of Sections 14.1 and 14.2 constitutes irreparable harm to the other, and that the harmed Party may seek any and all remedies available to it at law or in equity, including but not limited to injunctive relief.

14.4 Release of Agreement. The Parties agree that this Agreement, upon execution, shall not be considered Confidential Information. Except as required by Law, releasing the Agreement to the public shall be the sole responsibility of the Owners, to be released in the manner at a time decided in their sole discretion.

14.5 AWWU Public Statements.

(a) Until that date upon which the Fish and Wildlife Program is approved by the Governor of Alaska, and absent any pending judicial review or appeal, any public statements made by AWWU about the Fish and Wildlife Program or the development of the Facility must be approved by the Owners, such approval not to be unreasonably withheld or delayed. Notwithstanding the foregoing, AWWU may respond to any inquiries from any Governmental Authority in a manner consistent with this Agreement.

(b) AWWU shall make best efforts to ensure that all of the employees, agents, contractors and consultants of AWWU do not engage in any public activities while acting as employees, agents, contractors or consultants of AWWU, to include the public expression of statements that are reasonably likely to have an adverse effect on the public's perception of the Fish and Wildlife Program and the development of the Facility, it being understood by both AWWU and the Owners that such negative public statements may undermine the ability of the Owners to satisfy their obligations under the 1991 Agreement; provided, however, that the Parties acknowledge that AWWU cannot restrict the rights of such people to express their personal opinions as private citizens.

ARTICLE 15.
MISCELLANEOUS

15.1 Reasonability. The Parties shall act in a reasonable manner and in accordance with principles of good faith and fair dealing in the performance of this Agreement. Unless expressly provided otherwise in this Agreement and whether or not stated: (a) where this Agreement requires the consent, approval, or similar action by a Party, such consent or approval shall not be unreasonably withheld, conditioned, or delayed; and (b) wherever this Agreement gives a Party a right to determine, require, request, specify, or take similar action with respect to a matter, such determination, requirement, request, specification, or similar action must be reasonable.

15.2 Entire Agreement. This Agreement, together with all Schedule and Exhibits hereto, embodies the entire agreement and understanding of the Parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements and understandings of the Parties, verbal or written, relating to the subject matter hereof.

15.3 Waiver. Any waiver of the provisions of this Agreement must be in writing and shall not be implied by any usage of trade, course of dealing or course of performance. No exercise of any right or remedy by AWWU or the Owners constitutes a waiver of any other right or remedy contained or provided by Law. Any delay or failure of a Party to exercise, or any partial exercise of, its rights and remedies under this Agreement shall not operate to limit or otherwise affect such rights or remedies. Any waiver of performance hereunder shall be limited to the specific performance waived and shall not, unless otherwise expressly stated in writing, constitute a continuous waiver or a waiver of future performance.

15.4 Assignment. Neither Party shall assign this Agreement or any of its rights hereunder without the prior written consent of the other Party, which consent shall not be unreasonably withheld, conditioned or delayed. Notwithstanding the foregoing, either Party, without relieving itself from liability hereunder, and without the need for consent from the other Party, provided that any such assignee shall agree to be bound by all terms and conditions hereof, may transfer, pledge or assign this Agreement: (a) to any person or entity succeeding to all or substantially all of the assets of the assigning Party; or (b) to a successor entity in a merger or acquisition transaction. Any assignment made in contravention of this Section 15.4 shall be void and unenforceable.

15.5 Governing Law; Submission to Jurisdiction; Venue; No Jury Trial.

(a) Governing Law. THIS AGREEMENT SHALL BE GOVERNED BY, AND INTERPRETED AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF ALASKA, EXCLUDING ANY CHOICE OF LAW RULES.

(b) Submission to Jurisdiction, Venue. The Parties agree that any suit, action or other legal proceeding by or against any Party (or its Affiliates or designees) with respect to or arising out of this Agreement shall be brought exclusively in the courts of the State of Alaska, in the Municipality of Anchorage, as the Party instituting such suit, action or other legal proceeding may elect, provided that claims related to federal water rights, federal legislation enabling the Facility or AWWU Facilities, or the 1991 Agreement may be brought in the United States District Court for the District of Alaska. By execution and delivery of this Agreement, each Party (for itself, its Affiliates and its designees) irrevocably and unconditionally consents and submits to the exclusive jurisdiction of such courts and the appellate courts therefrom, and waives any right it may have to assert the doctrine of forum non conveniens or similar doctrine or to object to venue with respect to any proceeding. The Parties irrevocably consent to the service of process in any such action or proceeding by the mailing of copies thereof by registered or certified mail, first class postage prepaid to the addresses set forth in Section 13.1.

(c) No Jury Trial. EACH OF THE PARTIES HEREBY WAIVES ANY AND ALL RIGHTS TO DEMAND A TRIAL BY JURY IN ANY ACTION, SUIT, OR PROCEEDING ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY.

(d) Duty to Proceed. Pending final resolution of any Dispute, the Owners and AWWU shall continue to fulfill their respective obligations hereunder that are not the subject of the Dispute.

15.6 Construction. This Agreement is to be construed so as to effectuate the normal and reasonable expectations of a sophisticated buyer and seller of the equipment and services covered by this Agreement and shall not be construed either for or against either Party. No provision of this Agreement shall be construed or interpreted for or against either Party because such Party drafted or caused its legal representative to draft the provision.

15.7 Headings. The titles or headings of the various sections, articles and paragraphs hereof are intended solely for convenience and ease of reference and are not intended, and are not to be deemed for any purpose, to modify or explain or place any interpretation or construction upon any of the provisions of this Agreement.

15.8 Status of the Parties. The Owners and its Subcontractors shall be independent contractors in relation to AWWU with respect to the Work; and neither the Owners nor their Subcontractors, nor the employees or agents of either, shall be deemed to be the employees, representatives or agents of AWWU in connection with any matter relating to this Agreement. No provision of this Agreement shall be construed or represented as creating a partnership, trust, joint venture, fiduciary or any similar relationship between the Parties.

15.9 Insurance. The Owners shall maintain the required insurance policies as set forth on Exhibit J-1 and AWWU shall maintain the required insurance policy as set forth on Exhibit J-2.

15.10 No Third Party Beneficiaries. This Agreement is made and entered into for the sole protection and legal benefit of the Owners and AWWU, and their permitted successors and assigns, and no other person shall be a direct or indirect legal beneficiary of, or have any direct or indirect cause of action or claim in connection with, this Agreement.

15.11 Further Assurances. Each Party agrees to execute and deliver all further instruments and documents, and take all further action, as may be reasonably necessary to complete performance by the Parties hereunder and to effectuate the purposes and intent of this Agreement.

15.12 Amendments. Except for any Change Order issued pursuant to ARTICLE 7, a removal of an Owner pursuant to Section 2.5, or a redesignation of the Project Manager, the AWWU Representative or notice information under Section 13.1, no change, amendment or modification of this Agreement shall be valid or binding upon the Parties unless such change, amendment or modification shall be in writing and duly executed by the Parties.

15.13 Severability. If any provision of this Agreement is determined to be illegal or unenforceable, such determination will not affect any other provision of this Agreement and all other provisions will remain in full force and effect.

15.14 Conflicting Provisions. In the event of any conflict between this document and any Schedule or Exhibit attached hereto, the terms and provisions of this document, as amended from time to time, shall control. In the event of any conflict among the Exhibits, the Exhibit of the latest date mutually agreed to by the Parties shall control.

15.15 Survival. The provisions of ARTICLE 1, ARTICLE 6, ARTICLE 8, ARTICLE 9, ARTICLE 10, ARTICLE 11, ARTICLE 12, ARTICLE 13, and ARTICLE 15 shall survive termination of this Agreement for any reason.

15.16 Counterparts. This Agreement may be executed in any number of separate counterparts and delivered by electronic means, each of which when so executed shall be deemed an original, and all of said counterparts taken together shall be deemed to constitute but one and the same instrument.

[***Remainder of page intentionally left blank***]

IN WITNESS WHEREOF, the Parties have caused this Water Facilities Interconnection Agreement to be executed by their duly authorized representatives as of the Effective Date.

Schedule 1.1

Definitions

"1991 Agreement" means that certain Agreement between the Municipality of Anchorage, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., the United States Fish and Wildlife Service, the National Marine Fisheries Service, the State of Alaska, and the Alaska Energy Authority Relative to the Eklutna and Snettisham Hydroelectric Projects, dated August 7, 1991, as amended.

"Access Bridges" has the meaning set forth in the Recitals.

"Affiliate" means, with respect to any Person, any other Person controlling, controlled by or under common control with such first Person. For purposes of this definition and the Agreement, the term "control" (and correlative terms) means (1) the ownership of 50% or more of the equity interest in a Person, or (2) the power, whether by contract, equity ownership or otherwise, to direct or cause the direction of the policies or management of a Person.

"Agreement" has the meaning set forth in the Preamble, and shall include all Exhibits and Schedules hereto.

"Approvals" means Governmental Approvals and third-party approvals.

"AWWU" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of AWWU.

"AWWU Approvals" has the meaning set forth in Section 3.2.

"AWWU Isolation Valve" has the meaning set forth in Exhibit A-1.

"AWWU Facilities" has the meaning set forth in the Recitals.

"AWWU Representative" means the person designated by AWWU in accordance with Section 3.3 to act as the Owners' primary point of contact with AWWU.

"AWWU's Portion" has the meaning set forth in Exhibit A-1.

"AWWU's Water Permit" means that permit belonging to AWWU (LAS 2569) to use Owners' Water Rights for up to 41 million gallons per day for public water supply pursuant to the Act of October 30, 1984, 98 Stat. 2823, as may be replaced as described in Section 3.1 of the Water Supply Agreement.

"AWWU's Water" means any and all water belonging to AWWU pursuant to AWWU's Water Permit.

"Business Day" means any day other than a Saturday, Sunday or legal holiday in the state of Alaska.

"Change Order" means a written order signed by Project Manager and AWWU authorizing a change in the Work or an adjustment in the Project Schedule for performance or delivery of the Work.

"Chugach" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of Chugach.

"Commercial Operation" means that: (a) Owners have completed the Commissioning Procedures and the Facility has met the Facility Criteria; and (b) Owners have provided the Commercial Operation Certificate to AWWU.

"Commercial Operation Certificate" has the meaning set forth in Section 4.6.

"Commercial Operation Date" means the date upon which Commercial Operation is achieved.

"Commissioning Procedures" means a test of function of the Facility in accordance with the Commissioning Procedures Guidelines and Section 4.5.

"Commissioning Procedures Guidelines" means the guidelines for the Commissioning Procedures set forth on Exhibit E.

"Confidential Information" has the meaning set forth in Section 14.1.

"Construction Start CPs" has the meaning set forth in Section 4.1.

"Cost Responsibility Proportion" shall mean, with respect to each Owner, the percentage of the total applicable Eklutna Hydroelectric Project costs that such Owner is obligated to pay as agreed to by the Owners, which as of the Effective Date shall be, with respect to MOA, 19.05%, with respect to Chugach, 64.28%, and with respect to MEA, 16.67%, and which may be changed hereunder upon agreement between the Owners at any time.

"Day" or "day" means a calendar day, unless expressly specified otherwise.

"Delivery Point" has the meaning set forth in Exhibit A-1 and is depicted on the schematic included as part of Exhibit B.

"Delivery Point Meter" has the meaning set forth in Exhibit A-1.

"Dispute" has the meaning set forth in Section 11.5.

"Effective Date" has the meaning set forth in the Preamble.

"Eklutna Hydroelectric Project" means the Eklutna Hydroelectric Project initially authorized, constructed and operated pursuant to the Eklutna Project Act of July 31, 1950 (64 Stat. 382, as amended), including any and all property and facilities acquired or used in connection therewith, all of which was then sold to the Owners by the United States of America on October 2, 1997.

"Equipment" means all of the equipment, materials, apparatus, structures, supplies and other goods required by the terms of this Agreement to complete the Work and to be incorporated into the Facility. Equipment shall not include any materials, apparatus or tools owned by the Owners or any Subcontractor that are used to complete the Work but are not contemplated under this Agreement to become part of the Work or the Facility.

"Equipment Documentation" means copies or originals of all recommended operating specifications, warranties, manuals, test reports, vendor information and all other similar information obtained or prepared, and to be delivered, by the Owners in accordance with the terms of this Agreement.

"Event of Default" has the meaning set forth in Section 11.1.

"Facility" has the meaning set forth in the Recitals.

"Facility Criteria" means the criteria set forth in Exhibit I.

"Final Acceptance" means the final acceptance of the Work by AWWU, as demonstrated by the process set forth in Section 4.5.

"Final Acceptance Items" has the meaning set forth in Section 4.5.

"Fish and Wildlife Program" has the meaning set forth in the Recitals.

"Force Majeure Event" means the occurrence of any act or event beyond the reasonable control of the Party affected that prevents the affected Party from performing its obligations under this Agreement, in full or part, if such act or event is beyond the reasonable control of, and not the result of the fault or negligence of, the affected Party and such Party has been unable to overcome such act or event with the exercise of due diligence (including the expenditure of reasonable sums), including the following: drought, flood, earthquake, storm, fire, lightning, epidemic, war, riot, civil disturbance, sabotage, terrorism or threat of terrorism, strike or labor difficulty, accident or curtailment of supply or equipment, total casualty to equipment, or restraint, order or decree by a Governmental Authority. Notwithstanding the foregoing, Force Majeure Events shall expressly not include mechanical or equipment failures (except to the extent any such failure is itself caused by a Force Majeure Event), nor any diminution in water quality in Eklutna Lake.

"Governmental Approvals" means all authorizations, consents, licenses, leases, rulings, certifications, registrations, exemptions, permits, certificates, and approvals from any Governmental Authority.

"Governmental Authority" means any federal, state or local government, any political subdivision thereof, or any governmental, quasi-governmental, judicial, public or statutory instrumentality, administrative agency, authority, body or other entity having jurisdiction over the performance of the Work, the Facility or its operations, or the health, safety or environmental conditions of the Site or otherwise over the Parties.

"Hazardous Material" means any waste, chemical or other substance or material that is defined as "hazardous" or "toxic" or by any other similar term under any applicable Law relating to environmental, health or safety matters.

"Indemnified Parties" has the meaning set forth in Section 10.1.

"Indemnifying Party" has the meaning set forth in Section 10.3.

"Injection Point" means the point where AWWU Facilities meet facilities owned by the Owners near the outlet of the Eklutna Lake, where AWWU receives all of AWWU's Water from Eklutna Lake, as depicted in the schematic included as part of Exhibit B.

"Isolation Valve Structure" has the meaning set forth in Exhibit A-1.

"Isolation Valves" has the meaning set forth in Exhibit A-1.

"Law" means any constitution, charter, act, statute, law, ordinance, code, rule, regulation, order, specified standards or objective criteria contained in any applicable permit or approval (which standards or

criteria must be met in order for the Work to be performed lawfully) or other legislative or administrative action of any Governmental Authority or a final decree, judgment or order of a court or tribunal.

"Liabilities" has the meaning set forth in Section 10.1.

"MEA" has the meaning set forth in the Preamble, and shall include all successor sand assigns of MEA.

"MOA" has the meaning set forth in the Preamble, and shall include all successor sand assigns of MOA.

"Non-Owner Work" has the meaning set forth in Section 8.4.

"Owners" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of the Owners.

"Owner" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of an Owner.

"Owners' Isolation Valve" has the meaning set forth in Exhibit A-1.

"Owners' Portion" has the meaning set forth in Exhibit A-1.

"Owners' Water" means any and all water belonging to the Owners pursuant to the Owners' Water Rights.

"Owners' Water Rights" means that certain senior priority water right held by the Owners for the water in Eklutna Lake for use in generating power for the Eklutna Hydroelectric Project as described in water rights certificate ADL 44944.

"Party" and "Parties" has the meaning set forth in the Preamble.

"Person" means any individual, partnership, corporation, limited liability company, association, business, trust, government or political subdivision thereof, Governmental Authority or other entity.

"Project Manager" means the Project Manager designated by the Owners in accordance with Section 2.5.

"Project Schedule" means the Project Schedule attached hereto as Exhibit D.

"Prudent Industry Standards" means those standards of care and diligence normally practiced by water transportation infrastructure engineering, construction and installation firms in performing services of a similar nature in a similar jurisdiction in which the Work will be performed. Prudent Industry Standards are not intended to be limited to optimum practice or methods, but rather to be a spectrum of reasonable and prudent practices and methods that must take the conditions specific to any given water transportation facility under consideration.

"River Release Structure" has the meaning set forth in Exhibit A-1.

"Scope of Work" means the Scope of Work attached hereto as Exhibit C.

"Site" means the location of the Facility as further described in Exhibit B.

"Standard of Work" has the meaning set forth in Section 2.2.

"Subcontractor" means any Person with whom the Owners, or any individual Owner, enters into an arrangement for the performance of any portion of the Work, including Persons at any tier with whom any Subcontractor has further subcontracted any portion of the Work, and the legal or personal representatives, successors, and assigns of such Person.

"Transportation Agreement" has the meaning set forth in the Recitals.

"Unanticipated Conditions" has the meaning set forth in Section 7.3.

"Warranty Period" has the meaning set forth in Section 8.2.

"Water Supply Agreement" has the meaning set forth in the Recitals.

"Work" means all phases of Owners' performance of their construction-related obligations under this Agreement, including engineering, design, procurement, construction, erection, installation, training, testing with respect to the Facility, and the installation of the Access Bridges. For the sake of clarity, any operation and maintenance of the Facility occurring after Final Acceptance does not constitute Work hereunder, unless such operation or maintenance is being conducted pursuant to the warranty provisions set forth in ARTICLE 8.

Schedule 3.5[3]

Site and AWWU Facilities Conditions

[3] **Note to Accompany Final Draft**: This Exhibit will be populated by AWWU after Governor approval and prior to signing.

Exhibit A-1[4]

Eklutna River Release Facility Description and Definitions

The **"*Eklutna River Release Facility"*** shall consist of an Isolation Valve Structure and the River Release Structure.

The "***Isolation Valve Structure***" shall include:

- a new tee to be built in the AWWU pipeline downstream of the AWWU tunnel/pipeline transition and upstream of the AWWU portal valve (the "***Delivery Point***")
- A 54-inch gate valve on the main segment of AWWU pipeline intended to provide dual means of isolation for AWWU's pipeline segment ("***AWWU Isolation Valve***")
- A 42-inch gate valve on the branch segment of AWWU pipeline intended to provide isolation to the river release structure ("***Owners' Isolation Valve***", together with the AWWU Isolation Valve, the "***Isolation Valves***").
- Related controls and communication technology to be installed by the Owners in the main line of the AWWU Facilities.

The "***River Release Structure***" shall include:

- [A new pipeline from the Isolation Valve Structure to the Eklutna River]
- Control valves
- A new meter installed at the Delivery Point ("***Delivery Point Meter***")
- Monitoring and control equipment to be installed by Owners [*describe where]*.

"***AWWU's Portion***" of the Facility shall consist of the Isolation Valve Structure [and _____]

The "***Owners' Portion***" of the Facility shall consist of the River Release Structure [and _____]

---

[4] **Note to Accompany Final Draft**: This Exhibit will be revised and finalized by Owners to reflect the proposal approved by the Governor and prior to signing.

Exhibit A-2[5]

Description of Facility Controls, Metering, and Communication Facilities

[5] **Note to Accompany Final Draft**: This Exhibit will be populated after Governor approval and prior to signing.

Exhibit A-3[6]

Design (as of Effective Date)

[6] **Note to Accompany Final Draft**: This Exhibit will be populated by Owners after Governor approval and prior to signing.

Exhibit B[7]

Description and Schematic of Site, AWWU Facilities, and Injection Point and Delivery Point

[7] **Note to Accompany Final Draft**: This Exhibit will be populated by Owners after Governor approval and prior to signing.

Exhibit C

Scope of Work[8]

(a) Supply and Procurement. Owners shall at their own expense procure or supply and pay for all of the Equipment, and arrange and pay for the delivery of all of the Equipment to the Site.

(b) Engineering and Design. Owners shall at their own expense design and provide engineering services with respect to the Facility in a manner that shall be:

(i) Consistent with the actual conditions existing at the Site;

(ii) Consistent with the requirements set forth in this Scope of Work;

(iii) Sufficient, complete, and adequate in all respects necessary to enable the Facility to satisfy (A) the Facility Criteria and (B) all required Governmental Approvals;

(iv) In conformance with applicable Laws, including national, state, and local engineering, construction, safety, and electrical codes and standards, as specified in the Scope of Work, or if none are specified for the particular matter, with Prudent Industry Standards; and

(v) In form and content acceptable to all Governmental Authorities.

(c) Construction and Installation. Owners shall provide, install, complete and pay for all labor, Equipment, tools, supplies, construction equipment and machinery, utilities and consumables, transportation and other facilities and services (including any temporary materials, equipment, supplies and facilities) necessary for the proper execution and completion of the Work. All construction and installation performed by the Owners under this Agreement shall be in accordance with the given manufacturer's written instructions and Prudent Industry Standards, in each case unless otherwise agreed by AWWU in advance in writing.

(d) Utilities. The Owners shall provide all of the transmission, power, and communication facilities necessary for construction.

(e) Equipment Documentation and Equipment Training. The Owners shall provide AWWU with all Equipment Documentation for the AWWU Portion, and shall provide AWWU's personnel with up to five (5) days of on-site training in the use and operation of the AWWU Portion, as further detailed in the Transportation Agreement.

---

[8] **Note to Accompany Final Draft**: This Exhibit is subject to further revisions and will be finalized after Governor approval and prior to signing.

(f) Approvals. Except for applicable AWWU Approvals, the Owners shall obtain and maintain all Approvals (including all fees and permits) required to perform the Work, including (without limitation) approvals and agreements required to interconnect the Facility with the AWWU Facilities. The Owners shall pay for all such Approvals, and shall reimburse AWWU for costs associated with obtaining and maintaining all AWWU Approvals. Owners shall promptly provide AWWU with copies of all such Approvals upon the Owners' obtaining such Approvals. In order to assist the Owners in obtaining such Approvals, AWWU shall provide the Owners with such reasonable assistance as the Owners may request.

(g) Security. The Owners shall be responsible for the security of the Work and shall construct security facilities (e.g. fencing surrounding the Facility at the Site) to ensure the security of the Work. The Owners shall coordinate with AWWU for the ingress and egress of the Owners' personnel to and from the Site to minimize disruption of AWWU operations.

(h) Conduct at Site. AWWU shall have access to the Site at all times, and the Owners shall, and shall require their Subcontractors to, use commercially reasonable efforts to avoid inhibiting the operations of AWWU at the Site, and the operation of the AWWU Facilities. The Owners shall comply with work rules and work hours reasonably established by AWWU with regard to Work involving the AWWU Facilities.

Responses to Comments from the Parties and NVE on the Draft Program

No.	Entity	Page	Section, Table, or Figure	Comment	Response
1.0 Introduction					
1	ADNR	Page 11	Section 1.1.1.9 Water Rights	I suggest a couple changes to the second paragraph on page 11. Though AWWU's permit term expires, they will apply for a certificate of appropriation by submitting a statement of beneficial use. Alaska uses a two step program for high volume water rights where applicants are issued an initial permit for a limited term, then they submit a statement of beneficial use claiming their actual water use. After that they are issued a "certificate of appropriation." I suggest we replace "license" with "permit" and add to the sentence after "LAS 2569 expires…" to make it clear that AWWU will have a water right.	The following changes (underlined text) were made to the Supporting Information Document: *"Further, MOA and APA worked with Congress to amend the Eklutna Project Act to reflect the additional public water usage of the Eklutna Lake which was otherwise reserved for the purposes of the Project. MOA also obtained a 40-year <u>permit to appropriate water</u> from the State of Alaska to utilize water from Eklutna Lake, referred to as "LAS 2569." LAS 2569 expires on December 31, 2025 <u>and will be replaced with a certificate of appropriation</u> . In addition, the original 1950 federal legislation authorizing construction of the project was amended to "grant the appropriation of water for the purposes of public water supply in accordance with the same compensation agreement."*
2	Eklutna, Inc.	Page 14	Energy Generation and Cost of Power	The stated need for the continuing existence of the Eklutna Project is the economic value of damming the River. The Program states the Eklutna Project is the lowest-cost energy source in the MEA and Chugach systems. The Program indicates the electricity is generaged at $85/MWh. Recently, it was reported that the Houston Solar project power was purchased at $65/MWh. We understand solar is an intermittent energy generation souce, and a firm power source such as natural gas or hydroelectric is preferred, but it would be helful for the Program to provide additional analysis on claims such as this.	Eklutna is the lowest-cost energy source, generating electricity at $13/MWh. $85/MWh is the replacement energy cost (see Section 4.10.1 Supporting Information Document).
3	USFWS	Page 15	Section 1.2 1991 Fish and Wildlife Agreement	The 1991 Fish and Wildlife Agreement (1991 Agreement) was developed in response to resource agency concerns over the loss of a sockeye salmon (*Oncorhynchus nerka*) run that once spawned in Eklutna Lake(AEA 1992). According to the Environmental Assessment (EA; AEA 1992), the loss caused by the 1929 development project and the desires of the fish and wildlife agencies to provide appropriate consideration to fish and wildlife resources led to agencies' initial recommendation that the Project be placed under Federal jurisdiction. The 1991 Agreement process was intended to be as protective as the Federal Power Act (FPA) such that it would obviate the need for the Federal Energy Regulatory Commission (FERC) licensing process . The 1995 Alaska Power Administration Sale Act addressed the sale of the only two assets administered by the Alaska Power Administration (APA), the Eklutna and Snettisham Projects, and directed the Secretary of Energy to terminate the APA. Mitigation commitments were required for the divestiture; specifically. The Fish and Wildlife Agreement ensured protection and enhancement of fish and wildlife and protection of cultural resources that may be identified in the future, making it legally enforceable.	Thank you for your comment.

No.	Entity	Page	Section, Table, or Figure	Comment	Response
4	USFWS	Page 15	Section 1.2 1991 Fish and Wildlife Agreement	According to the 1991 Agreement and subsequent EA, the Project Owners are required to develop future environmental studies to quantify impacts and develop proposals for the protection, mitigation, and enhancement of fish and wildlife affected by such hydroelectric development. The overarching goal of the 1991 Agreement is for the Eklutna Owners to work in consultation with resource agencies to quantify the impacts of the Eklutna Hydropower Project on fish and wildlife resources and to develop and implement a Fish and Wildlife Program with measures to protect, mitigate damages to, and enhance (PME) fish and wildlife (including related spawning grounds and habitat) affected by the Eklutna Project6 (AEA 1992). The 1991 Agreement was intended to provide a means to identify and address fish and wildlife issues post-sale.	Section 4.0 of the Supporting Information Document details the steps the Project Owners have taken to comply with the 1991 Agreement, including the environmental studies that have been conducted; development of protection, mitigation, and ehancement measures; and consultation with resource agencies and NVE.
5	USFWS	Page 15	Section 1.2 1991 Fish and Wildlife Agreement	While the 1991 Agreement was intended to be as protective as the Federal licensing process and therefore obviate the need for licensing by FERC; however, there are some significant disparities between what has occurred and would have occurred under FERC licensing. Under the FERC process, section 18 of the FPA would have provided the Service and National Marine Fisheries Service (NMFS) with authority to issue fishway prescriptions. Section 10(j) of the FPA would have required license conditions for protection, mitigation of damages to, and enhancement of fish and wildlife resources and related habitat based on recommendations from Federal and State fish and wildlife agencies, pursuant to the Fish and Wildlife Coordination Act. Section 10(j) recommendations typically address water quantity, water quality, instream flows, ramping rates, and habitat management, and may also include recommendations for the development and improvement of fish and wildlife in the project area. Under the FPA, FERC would then have considered any rejected Section 10(j) conditions as Section 10(a) recommendations. During analysis under the National Environmental Policy Act, FERC would have analyzed direct, indirect, and cumulative impacts of the project, including impacts from the 1929 dam and the connected actions of Eklutna dam construction and redesign. Furthermore, the Federal licensing process would have allowed for official government to government consultation between Federally Recognized Tribes and FERC. Instead, the concerns of Native Village of Eklutna regarding the loss of culturally important resources are given equal consideration as other beneficial uses such as impacts to recreation.	The 1991 Agreement is the guiding document that the Project Owners have followed in development of a Fish and Wildlife Program. The Project Owners are contractually and legally bound by the terms of the 1991 Agreement. Regarding NVE, the Project Owners committed to a review and participation framework that ensures information NVE and its members share regarding the Eklutna River and development of the Fish and Wildlife Program is appropriately considered and addressed. The Project Owners have valued the unique perspective of NVE regarding the EKlutna River. Section 4.0 of the Supporting Information Document details the Project Owners compliance with the 1991 Agreement and Appendix A of the Supporting Information Document includes a record of meetings with the NVE Tribal Council, including meetings with the Boards of Directors for both CEA and MEA and the Anchorage Assembly.
6	USFWS Enclosure	Page 15	Section 1.2 1991 Fish and Wildlife Agreement	As drafted, we believe the Program does not entirely meet the intent of the 1991 Agreement, which was established in part due to of concerns for the sockeye salmon (*Oncorhynchus nerka*) run, and which was expected to be as protective as the Federal licensing process. Instead, the U.S. Fish and Wildlife Service (Service) recommends a phased approach which sets interim terms or benchmarks to spur incremental progress towards a long-term and mutually agreeable solution that ultimately provides fish passage at the dam and instream flows capable of supporting fish and wildlife into the future.	The Project Owners believe the Proposed Final Fish and Wildlife Program does meet the intent of the 1991 agreement. In the Proposed Final Program, the Project Owners have included limited reopeners for a fixed wheel gate and fish passage in recognizition that fish passage to Eklutna Lake may become feasible in the future and fish passage is important to NVE, the federal and state agencies, and others who have commented on the Draft Program (see Section 4.0 of the Proposed Final Fish and Wildlife Program regarding the limited reopeners).

No.	Entity	Page	Section, Table, or Figure	Comment	Response
7	USFWS Enclosure	Page 15	Section 1.2 1991 Fish and Wildlife Agreement	Overall, to meet the intent of the 1991 Agreement, we believe the Final Fish and Wildlife Program should include the following: 1. Provide water to the full length of the river on a year-round basis. 2. Provide a long-term solution to get marine derived nutrients from the river to the lake. We have expressed openness to a phased approach in returning sockeye salmon to the lake. The Final Program should provide a commitment to design a phased approach within 5 years of the Final Program. 3. Include methods to facilitate larger channel maintenance flows from the lake, such as a new gate at the dam. 4. Include a higher instream flow regime to increase downstream salmon rearing habitat; the channel maintenance flow regime should be increased commensurate with the increased instream flow regime. 5. Include a summary section in the Program or Draft Summary of Study Results that provides quantification of acres impacted, where possible. 6. Include physical habitat manipulation in both the Program and the Adaptive Management Plan. 7. Provide more flexibility in the Adaptive Management Plan so that PMEs can be implemented as effectively as possible.	1. See response to comment # 103 2. See response to comment # 107 3. See response to comment # 75 4. See response to comment # 102 5. See response to comment # - see response to Summary of Study Results comments 6. See response to comment # 121 7. See response to comment # 99
8	NVE	Page 15	Section 1.2 1991 Fish and Wildlife Agreement	The purpose of the 1991 Eklutna Fish and Wildlife Agreement ("Agreement") and the resultant Fish and Wildlife Program is to develop and implement measures to "protect, mitigate damages to, and enhance fish and wildlife (including related spawning grounds and habitat)" from the harms of the Project. Salmon spawning grounds and habitat harmed by the project include the lower Eklutna river below the dam, Eklutna Lake, and the upper tributaries to Eklutna Lake. The Divestiture Summary Report for the Sale of Eklutna and Snettisham Hydroelectric Projects ("Divestiture Report"), to which the Agreement is an appendix, notes that mitigating harms to sockeye salmon and their spawning habitat was particularly important in creating the Agreement. The Divestiture Report explained that "[d]uring reviews of the legislative proposal, loss of a sockeye salmon run that once spawned in Eklutna Lake was identified[...] This specific problem and the desires of the fish and wildlife agencies to provide appropriate consideration to fish and wildlife resources over the long run led to the August 7, 1991 Agreement." The Divestiture Report notes that the Agreement's fish and wildlife measures were intended to "work at least as well as Federal regulation for the intended purpose of mitigation and enhancement of affected fish and wildlife resources," and were to be "quite similar to that under the [Federal Energy Regulatory Commission ("FERC")] licensing" process for hydroelectric projects.	The Project Owners have engaged in a 5-year process of studies and evaluation of alternatives in consultation with the Parties to the 1991 Agreement, NVE, Eklutna Inc., and other stakeholders. That effort included the evaluation of potential measures to improve habitat conditions for sockeye. The results of that evaluation are included in the Alternatives Analysis as well as the later Dam Removal technical memorandum (Appendix F, Supporting Information Document).

No.	Entity	Page	Section, Table, or Figure	Comment	Response
9	NVE	Page 15	Section 1.2 1991 Fish and Wildlife Agreement	The Agreement carefully divides which considerations should be made by which Parties at which stage of the mitigation process. During the Study Plan stage, the Project Owners are "to examine, and quantify, if possible, the impacts to fish and wildlife from the Eklutna […] project" and "shall consider the impacts of fish and wildlife measures on electric rate payers, municipal water utilities, recreational users and adjacent land use, as well as available means to mitigate these impacts." The Agreement then requires the Project Owners to recommend measures "for the protection, mitigation of damages to, and enhancement of fish and wildlife (including related spawning grounds and habitat)." While it can be reasonably interpreted that the Program would include the analysis from the study plan of the impacts of fish and wildlife measures on other considerations, such as electric ratepayers, the Agreement does not state, as it does clearly in other sections, that other considerations, such as electric rate payers, power production or energy conservation, are to be considered when evaluating and recommending measures that are necessary to mitigate the Project's impacts on fish and wildlife. The Agreement is clear that the Program's only consideration is meeting the purpose of the Agreement, which is "the protection, mitigation of damages to, and enhancement of fish and wildlife (including related spawning grounds and habitat)."	We disagree. Our efforts have focused on generating relevant information to allow an informed decision by the Governor in determining an appropriate set of PME measures that would meet all of the eight criteria included in the 1991 Agreement. An appropriate approach to assisting the Governor was to conduct the alternatives analysis which allows the Governor to see the differences in impacts to fish habitat, water supply and hydropower generation, along with related costs for a variety of potential PME packages.
10	NVE	Page 15	Section 1.2 1991 Fish and Wildlife Agreement	It is then the Governor of Alaska's responsibility, not the Project Owners', to evaluate whether the proposed Program of fish and wildlife measures is appropriate after considering the several criteria listed in the Agreement in making his final Program determination. The Project Owners overreach their authority under the Agreement by claiming that they are charged not just with undertaking the study process, but also with undertaking the policy analysis to give equal consideration to the eight purposes the Governor must balance in his final decision when promulgating a Program. They are neither qualified nor authorized to make policy determinations and have plain conflicts of interest. This calls into question the integrity of the entire Draft Program and its ability to meet the Agreement's purpose.	The Project Owners agree that it is the Governor's responsibility to review the Proposed Final Program while giving equal consideration to the criteria listed in the Agreement as stated in the Supporting Information Document. The Project Owners have not made policy determinations but have fully met the procedural and schedule requirements of the 1991 Agreement to date as described in Section 4.0 of the Supporting Information Document.

No.	Entity	Page	Section, Table, or Figure	Comment	Response
11	NVE	Page 15	Section 1.2 1991 Fish and Wildlife Agreement	The Draft Program fails to meet the fundamental purpose of the Agreement and steps far beyond fish and wildlife considerations laid out in the Agreement. The AWWU Portal plan proposed in the Draft Program by the Project Owners leaves Eklutna Lake and upper tributary streams completely disconnected from the lower Eklutna River, maintaining over a mile of dry streambed. Furthermore, the flows the Project Owners propose to release from the AWWU Portal are the minimum flows considered by any of the parties during the Agreement study process, with small high-flow events in only three out of every ten years. This proposal provides no solution for the complete blockage of salmon reaching the extensive lake spawning habitat required by sockeye salmon (which was the key driver for the Agreement in the first place), and 15 miles of upper tributaries spawning habitat above the lake that is highly amenable to Chinook and coho salmon completely stranded Without a connection to Eklutna Lake and upper tributaries, restoring those key spawning and rearing grounds and habitat is impossible. The Project Owners admit in the Draft Program that "no change in sockeye rearing habitat is anticipated." The proposed nominal flow releases from the AWWU Portal will only minimally enhance Chinook and coho salmon and their habitat in the lower Eklutna River.	The Project Owners believe the Proposed Final Fish and Wildlife Program does meet the intent of the 1991 agreement. The Proposed Final Fish and Wildlife Program includes a limited reopener for fish passage.
12	NVE	Page 15	Section 1.2 1991 Fish and Wildlife Agreement	Instead of focusing on the most beneficial program for fish and wildlife, the Draft Program is primarily concerned with implementation costs, along with impacts on power generation, ratepayers, and drinking water. The Program states that the AWWU Portal is the "most costeffective" alternative in its rationale for choosing that option. Cost-effectiveness is not a primary consideration in the Agreement, nor one of the eight factors the Governor must consider in his decision. The Draft Program's incorporation of aspects far beyond fish and wildlife takes the task of balancing considerations away from the Governor and places them in the hands of the Project Owners. This is a significant conflict of interest that was intended to be avoided by the clear language of the Agreement. The Draft Program should have been concerned only with protecting, mitigating, and enhancing fish and wildlife habitat, and its failure to do so resulted in a thoroughly flawed Draft Program.	We disagree. See response to Comment # 9.

No.	Entity	Page	Section, Table, or Figure	Comment	Response
13	NVE	Page 15	Section 1.2 1991 Fish and Wildlife Agreement	The consultation process agreed to in the Agreement was intended to be "quite similar to that under [FERC] licensing of hydroelectric projects with the Governor of Alaska assigned a role similar to FERC's in decisions on fish and wildlife measures." The Agreement process was intended to work "at least as well" for fish and wildlife as a FERC relicensing process. Yet, the consultation process has not been implemented in a manner that matches the procedural protections afforded to fish and wildlife in a FERC relicensing process. The deficiencies in the process are manifested in a Draft Program that will not provide adequate or equitable protection, mitigation, and enhancement of fish and wildlife in the Eklutna watershed that have been adversely impacted by the Project. These include not only the impacts of project construction, but the totality of impacts of project construction, operation, and maintenance on fish and wildlife and their habitat, including the temporal loss of services and functions of a free-flowing anadromous river. Alaska's Congresswoman Mary Peltola unambiguously states that "[t]he intent of Congress was clear: [the Project Owners] must mitigate for drying up the Eklutna River for the past 70 years."	The 1991 Agreement did not require the Owners to conduct their efforts in a manner identical to a FERC relicensing process. If that was the intent of the 1991 Agreement that could have been explicitly stated. Rather, the 1991 Agreement included a specific set of requirements including procedural, schedule, consultation, study and engagement with both the Parties to the Agreement and the public. The Owners efforts to comply with those requirements are documented in Section 4.0 of the Supporting Information Document and on the project website (eklutnahydro.com).
14	NVE	Page 15	Section 1.2 1991 Fish and Wildlife Agreement	One of the primary deficiencies in the consultation process has been the Project Owners' conflation of improvements to the baseline condition with adequate protection, mitigation, and enhancement of fish and wildlife impacted by the Project. This misunderstanding of the level of protection the Project Owners are required to deliver under the Agreement, and that would similarly be required in a FERC proceeding, has contributed to an inadequate scope of study and alternatives analysis. Rather than develop and evaluate alternatives according to their comparative effectiveness in mitigating the impacts caused by the Project's dewatering of the Eklutna River and the resulting destruction of fish and wildlife habitat from the 1950s to present, the Project Owners evaluated alternatives according to their "ecological lift in terms of gains in salmon spawning and rearing habitat" compared to their cost. However, "ecological lift" is not the same as providing adequate and equitable protection, mitigation, and enhancement of fish and wildlife. In short, the Project Owners have developed a Draft Program that would be marginally better for fish and wildlife, but not one that would actually mitigate the project's impacts on fish and wildlife.	The process required by the 1991 Agreement is not identical to a FERC proceeding, however if it were, FERC also requires that the analysis of impacts and potential PME measures be compared to the existing environment as the baseline condition.

No.	Entity	Page	Section, Table, or Figure	Comment	Response
15	NVE	Page 15	Section 1.2 1991 Fish and Wildlife Agreement	Again, in a FERC proceeding the Project Owners would not have been allowed to unilaterally limit the analysis of alternative measures, like dam removal, to mitigate the Project's impacts on fish and wildlife resources, over the objections of NMFS and USFWS. For example, under FPA section 18, NMFS and USFWS have authority to prescribe fishways that must be included, without modification, in any license issued by FERC. Under FPA section 10(j), a FERC license must include conditions to "adequately and equitably protect, mitigate damages to, and enhance, fish and wildlife (including related spawning grounds and habitat) affected by the development, operation, and management of the project" based on recommendations from NMFS, USFWS, and other state and fish and wildlife agencies. NMFS would consider the fishery management plan for Pacific salmon as a comprehensive plan for considering mitigation and enhancement for salmon in this process.	The 1991 Agreement is the guiding document that the Project Owners have followed in development of a Fish and Wildlife Program. The Project Owners are contractually and legally bound by the terms of the 1991 Agreement.
16	NVE	Page 16	Section 1.2.1 Procedural Requirements	The Draft Program states that "Pursuant to the 1991 Agreement and APA Asset Sale Act, the Governor's decision regarding the provisions of the Final Fish and Wildlife Program is reviewable and enforceable by the Parties in the U.S. District Court for the District of Alaska." We dispute this as a statement of the Project Owners' opinion, which has been misleadingly presented as a formal conclusion without any legal basis. Neither the APA Asset Sale Act nor the Agreement limit judicial review to the Parties, and any such limitation would appear to violate principles of due process given, separate and apart from the enforceability of the Agreement as a contract between the Parties, the Governor's final decision on the Fish and Wildlife Program would affect rights and interests far beyond those of the individual Parties.	The United States District Court for the District of Alaska has exclusive jurisdiction to review decisions made under the 1991 Agreement and to enforce its provisions. Federal law controls the interpretation of a contract entered pursuant to federal law when the United States is a party. Under federal common law, only a party to a contract or an intended third-party beneficiary may sue to enforce the terms of a contract or obtain an appropriate remedy for breach. Simply because the 1991 Agreement incidentally benefits various third parties does not mean that those third parties are intended third-party beneficiaries with rights to enforce the Agreement's provisions.

No.	Entity	Page	Section, Table, or Figure	Comment	Response
17	NVE	Page 16	Section 1.2.1 Procedural Requirements	NVE has serious concerns about the Project Owners' proposed dispute resolution procedures. The Agreement requires that "[i]f USFWS, NMFS, or the State Resource Management Agencies' comments or recommendations different from those of the [Project Owners], the [Project Owners] will attempt to resolve such differences, giving due weight to the recommendations, expertise, and statutory responsibilities of USFWS, NMFS, and the State Resource Management Agencies." We recently received notice from the Project Owners that they are proposing a 1.5-hour dispute resolution meeting on December 15th to meet this requirement. We have raised several dispute issues regarding the adequacy of the Project Owner's consultation process and the Draft Program in these comments. The Draft Program does not meet the express goals of the Agreement; more specifically, it will not mitigate the Project's impacts on fish and wildlife because it will not reconnect the lake and upper tributaries to the lower river, which is necessary to restore sockeye, Chinook, and coho salmon to the Eklutna. We expect the federal resource management agencies will also raise disputed issues regarding the AWWU Portal recommendation in the Draft Program. Furthermore, we have proposed an alternative – removing the dam within ten years – that should have been analyzed previously and must be analyzed now as part of the dispute resolution process. We struggle to see how such substantial divergence can be resolved in a single 1.5-hour meeting. We request the Project Owners provide meaningful, not pro forma, procedures to resolve the significant disputed issues. For example, we request the Owners anticipate the need to schedule additional meetings and that they also provide for an independent dispute resolution specialist to facilitate the dispute resolution process.	The Project Owners continued to meet with the agencies and NVE through April 2024 in an attempt to resolve differences.
18	NVE	Page 23	Section 1.3.4 Study Program	Yet, contrary to this well-established traditional ecological knowledge, the Draft Program dismisses the possibility of a substantial sockeye run to the lake and downplays the quality and quantity of salmon habitat in the upper tributaries. The Draft Program concludes that there was never a large run of sockeye to the lake, pointing to limiting factors such as the lake's turbidity, nutrient levels, and size of kokanee, and discounts the critical importance of the upper tributaries for Chinook and coho spawning habitat. This conclusion ignores the traditional ecological knowledge of NVE that the Project Owners are well aware of and which was shared throughout the Study Plan process. Instead, the Draft Program relies solely on Western scientific analysis based on current degraded conditions to justify the hypothesis of a small historic sockeye run, and does not duly weigh traditional knowledge of historic salmon populations in Eklutna lake and the tributaries above.	The Project Owners considered both traditional ecological knowledge (TEK) and scientific analysis during development of the Fish and Wildlife Program. TEK is acknowledged in both the Initial Information Package (available on the project website: eklutnahydro.com) and Section 4.11.9 of the Supporting Information Document.

No.	Entity	Page	Section, Table, or Figure	Comment	Response
2.0 Alternatives Analysis					
19	NVE		New Proposed Alternative	To meaningfully meet the purpose of the Agreement, NVE proposes an alternative solution – removing the Eklutna Lake dam within ten years when sufficient renewable power generation is available to offset the lost power generation from dam removal. In 2011, the U.S. Army Corps of Engineers ("USACE") proclaimed that "[t]rue restoration of the Eklutna River ecosystem would require removal of both dams […]." The Eklutna Lake dam does not impound Eklutna Lake but merely increases lake storage capacity for hydropower generation. Doing so severs the connection between the lower Eklutna River, Eklutna Lake, and upper tributaries, blocking all outflow of water, drying up the Eklutna River, and decimating the salmon runs. Now that the lower Eklutna dam is gone, it is time to plan for a future with a free-flowing Eklutna River and salmon runs truly restored. NVE's alternative of dam removal within ten years will provide fish passage upstream and downstream to and from the lake and upper tributaries and return the river's natural flow regime that salmon co-evolved to depend upon, restoring the entire river and lake ecosystem. This proposal aligns closely with National Marine Fisheries Service ("NMFS"), US Fish and Wildlife Service ("USFWS"), and other Technical Working Group ("TWG") member's study period preferred alternatives with fish passage to and from the lake and flows that closely mimic the river's historic natural flow regime. The Conservation Fund has pledged to pay all the costs of removing the Eklutna Lake dam.	In response to NVE's proposed alternative of removing the Eklutna Dam, the Project Owners conducted a high-level analysis of the technical risks and cost implications associated with dam removal, including effects that an unregulated river hydrograph may have on infrastructure on or adjacent to the Eklutna River downstream of the existing dam. The use of other comparable renewable energy sources to determine how to offset the lost generation from the Eklutna Power Plant was also analyzed. This analysis is documented in a Technical Memorandum that is available in Appendix F of the Supporting Technical Document.
20	NVE		New Proposed Alternative	The benefits of removing the Eklutna Lake dam include: 1. Collectively addressing a century of cultural and environmental neglect; 2. Restoring the Eklutna River to flow naturally out of Eklutna Lake; 3. Re-connecting the river to the lake, allowing for the recovery of sockeye, Chinook, and coho salmon, opening up 65% of their available habitat in Eklutna Lake and its upstream tributaries; 4. Sparing CEA and MEA ratepayers and MOA taxpayers from rate and property tax hikes to pay $57 million to implement the utilities' proposed plan; 5. Avoiding lost generation capacity at the Eklutna hydroelectric facility for the immediate future; 6. Securing the AWWU drinking water system; and, 7. Protecting popular lakeside trails from erosion caused by fluctuating lake levels.	The high-level analysis of the technical risks and cost implications associated with dam removal conducted by the Project Owners (Appendix F, Supporting Information Document) show that not all the noted benefits of dam removal are accurate. Even if The Conservation Fund pays for the cost of dam removal, costs associated with power plant decommissioning, a new hydroelectric project, re-routing the AWWU pipeline, and highway and railroad bridge replacements would far exceed the cost of the Proposed Final Fish and Wildlife Program, resulting in increased costs to ratepayers and taxpayers. Dam removal would not secure the AWWU drinking water system but could pose risks to the system such as exposure and instability of the buried pipeline, inundation of the access and maintenance road along the river channel under annual peak flow scenarios, and potential for insufficient storage within Eklutna Lake to provide the historical water withdrawls year-round. Trail erosion may still occur due to wave action at high lake elevations which results in an undercut bank.

21	NVE		New Proposed Alternative	To meet the purpose and requirements of the Agreement, we firmly believe that the Parties, the public, and the Governor must have the full range of options identified and analyzed for consideration. As we have previously requested, removing the Eklutna Lake dam within ten years when sufficient renewable power generation is available as an alternative that must be fully analyzed because it appears to be the only alternative that would effectively mitigate the Project's harms to fish and wildlife. In preparing these comments, we have confirmed The Conservation Fund's commitment to fully fund the removal of the Eklutna Lake dam. We ask that any analysis of this alternative reflect that the actual capital expenditure (CAPEX) cost to remove the dam is $0. The next schedule requirement per the Agreement is for the Governor to decide on the Final Program by Oct. 2, 2024, leaving plenty of time to fully analyze this alternative. Without analyzing this reasonable alternative, the Program would fail to meet the intent and requirements stated in the Agreement and the Divestiture Report and the Governor cannot make a fully informed decision.	In response to NVE's proposed alternative of removing the Eklutna Dam, the Project Owners conducted a high-level analysis of the technical risks and cost implications associated with dam removal, including effects that an unregulated river hydrograph may have on infrastructure on or adjacent to the Eklutna River downstream of the existing dam. The use of other comparable renewable energy sources to determine how to offset the lost generation from the Eklutna Power Plant was also analyzed. This analysis is documented in a Technical Memorandum that is available in Appendix F of the Supporting Information Document.
22	NVE		New Proposed Alternative	The Eklutna Project is the limiting factor preventing the restoration of the Eklutna River that flows from its headwaters to its confluence with the Knik Arm. Plainly, the Project Owners' Draft Program to maintain a dead-end river is inadequate to mitigate the Project's harms to fish and wildlife. Adequate and equitable fish and wildlife protection, mitigation, and enhancement, as required by the Agreement, requires the lake and upper tributary streams to be connected to the lower river and adequate flows for salmon to thrive. As such, we request that the Project Owners consider our proposed dam alternative to comply with the Agreement's purposes and provide a myriad of public interest benefits, including the long-term benefit of affordable energy from truly renewable sources.	In response to NVE's request, the Project Owners have considered the proposed dam removal alternative. Their analysis of this alternative is documented in a Technical Memorandum that is available in Appendix F of the Supporting Information Document.
23	Eklutna, Inc.	Page 35	2.4 Comprehensive Alternatives	Eklutna, Inc. is situated within the service areas of Matanuska Electric Association, Inc. (MEA) and Chugach Electric Association, Inc. (CEA). Eklutna, Inc is currently exploring alternative energy projects with both utilities that would augment energy generation from alternative/renewable energy sources. We believe it is worth exploring an option where the Eklutna Dam is removed once adequate renewable energy sources are commissioned to replace the production from the Eklutna Project. The country is seeing repeated success stories of salmon recovery after dam removal. The Eklutna people have given their lands and resources to Anchorage public water usage and electricity generation - the Eklutna Generation Station and the Eklutna Dam. We understand 90% of Anchorage's water and 90% of MEA's energy generation is attributable to these projects on or affecting Eklutna lands.	In their December 4, 2023, comment letter on the Draft Fish and Wildlife Program, NVE proposed a new alternative that involves removal of the Eklutna Dam. In response, the Project Owners conducted a high-level analysis of the technical risks and cost implications associated with dam removal, including effects that an unregulated river hydrograph may have on infrastructure on or adjacent to the Eklutna River downstream of the existing dam. The use of other comparable renewable energy sources to determine how to offset the lost generation from the Eklutna Power Plant was also analyzed. This analysis is documented in a Technical Memorandum that is available in Appendix F of the Supporting Information Document.

24	NVE	Page 35	2.4 Comprehensive Alternatives	The Project Owners are not providing decision-makers and the public with the full range of alternative solutions and mitigation measures to meet the Agreement requirements. NVE has requested the Project Owners analyze alternatives that would restore connectivity of Eklutna Lake and upper tributaries to the lower river, including a formal request for analyzing removal of the Eklutna Lake dam on October 5, 2023, echoing The Conservation Fund's repeated and specific requests for evaluation of removal of the dam throughout the study plan and alternatives analysis process. The Project Owners rebuffed these requests based on a cost-benefit analysis and subsequent balancing test they are not qualified to undertake nor authorized to administer.	As an alternatives analysis is not required under the 1991 Agreement, the Project Owners were not required to bring a handful of alternative proposals to the public for public selection. Rather, Section 4 of the 1991 Agreement specifically requires the Project Owners to propose a Draft Fish and Wildlife Program to the parties of the 1991 Agreement (as done on October 27, 2023), work to resolve differences, hold public meetings, and consider comments and suggestions before preparing a Proposed Final Fish and Wildlife Program. The Project Owners believe they have gone well beyond the requirements of the 1991 Agreement in terms of engaging interested stakeholders, soliciting input, and presenting consistently analyzed alternatives information.
25	NVE	Page 35	2.4 Comprehensive Alternatives	Another significant deficiency in the consultation process has been the Project Owners' unilateral rejection of reasonable alternatives without rigorous study or analysis. This is a departure from a FERC relicensing proceeding where FERC, not the applicant, is required under the Federal Power Act ("FPA") and the National Environmental Policy Act ("NEPA") to undertake a full study of alternatives as the basis for determining that a project, as licensed, will be best adapted to a comprehensive plan of development. Here, by contrast, the Draft Program does not demonstrate the Project Owners adequately considered a reasonable range of alternatives proposed for analysis by the Parties, NVE, and other stakeholders. Rather than provide enough detail about each alternative for the Governor to "evaluate their comparative merits," the Project Owners peremptorily eliminated certain alternatives from detailed study based on their biased cost-benefit assessment.	The Project Owners worked with the Parties to the 1991 Agreement, NVE, Eklutna Inc., and other stakeholders to identify a full range of alternatives. The Project Owners solicited alternatives from the Parties to the 1991 Agreement, NVE, Eklutna Inc., and other stakeholders, gave equal consideration to each alternative provided, and discussed each alternative with the Parties, NVE, Eklutna Inc., and other stakeholdersin a series of Alternatives Analysis meetings (Section 4.5, Supporting Information Document). The 1991 Agreement required the Project Owners to submit a Proposed Final Fish and Wildlife Program to the Governor, not alternatives.
26	NVE	Page 35	2.4 Comprehensive Alternatives	The Project Owners' exclusion of a dam removal alternative is an egregious error in the environmental analysis. Dam removal is a reasonable alternative because it would provide the most protection, mitigation, and enhancement of fish and wildlife at a cost far lower than other alternatives considered. Other dams, like those on the Elwha River in Washington and the Klamath River in California, have been removed or are planned for removal as the most effective means for achieving restoration of salmon runs that have been decimated by 20th century dam construction and operation. Moreover, dam removal to restore fish passage and recover salmon is a NMFS priority action. Yet because the Draft Program does not consider dam removal, the Governor cannot make an informed decision as to how dam removal compares to the Project Owners' preferred alternative.	In response to NVE's proposed alternative of removing the Eklutna Dam, the Project Owners conducted a high-level analysis of the technical risks and cost implications associated with dam removal, including effects that an unregulated river hydrograph may have on infrastructure on or adjacent to the Eklutna River downstream of the existing dam. The use of other comparable renewable energy sources to determine how to offset the lost generation from the Eklutna Power Plant was also analyzed. This analysis is documented in a Technical Memorandum that is available in Appendix F of the Supporting Information Document.

27	USFWS Enclosure	Page 37	Table 2-1	The Draft Program presents in Table 2-1 (p. 37) the preferred infrastructure modifications of stakeholders, with a footnote explaining the Service's alternatives C and D are in descending order of preference if public and financial support for alternative A and B are not obtained. In a letter dated July 3, 2023, we presented our preferred alternative, including our preferred engineering measures: *"Our preferred alternative includes Measure P, the replacement dam as described in the enclosure because it greatly increases the amount of available fish habitat while providing for year-round power generation. Although this alternative seems to find a balance with a wide range of stakeholder values and considerations, we understand that the capital expenditure estimates for construction are appreciable. Therefore, we support a Fish and Wildlife Program that includes time and opportunities for gathering public and financial support with the option to use components of Measures K, A, or C as described in the enclosure as part of a phased implementation approach or as a tiered contingency plan should public and financial support for Measure P fall short. If it is not possible for a Fish and Wildlife Program to include opportunities for gathering public and financial support for Measure P as described above, then our preferred engineering measure would be Measure K, the existing dam with fish passage as described in the enclosure."* It was not our intent to suggest that engineering measures that do not provide fish passage would be acceptable on their own as part of the Fish and Wildlife Program. Our long-term goal has been ecological connectivity to the lake, and for the Fish and Wildlife Program to reflect that same goal.	Thank you for the clarification.
28	ADFG	Page 39	Table 2-2. Stakeholders' Preferred Instream Flow Regimes.	Footnote contains an incomplete sentence.	This will be fixed in future versions.
29	ADFG	Page 40	Table 2-4. Cost Summary for Stakeholders' Preferred Alternatives.	The difference in capital cost between ADF&G Alternative B and the proposed alternative is $19 million, but in Table 2.7 it appears that the incremental cost per acre of habitat gained is the same. Please clarify this discrepancy. We assume that the increased capital cost and other costs associated with ADF&G Alternative B is the additional cost of the installation of a fixed wheel gate at the dam. There is no cost analysis for the proposed fixed wheel gate in the draft plan. Please provide that analysis.	The $19 million difference is in present worth, not capital costs (see Table 4-7; Supporting Information Document). Regarding the incremental cost table in the Draft Fish and Wildlife Program - there were some errors in the data in the NVE row and the ADFG rows. This table has been corrected (Table 4-10, Supporting Information Document). The cost estimate for the fixed wheel gate is provided in Appendix C of the Supporting Information Document and phase 1 engineering deliverables are available on the project website at: eklutnahydro.com.

30	ADFG	Page 41	Table 2-5. Ratepayer/Taxpayer Impacts for Stakeholders' Preferred Alternatives.	ADF&G is aware of the current situation regarding supply and demand of energy for the railbelt and the desire to maintain renewable energy sources to the maximum extent as well as the additional cost to ratepayers and property owners in Municipality of Anchorage (MOA) and ratepayers in the Mat-Su. As exhibited in Table 2-5, Page 41, implementation of ADF&G Alternative B would result in only a modest increase to ratepayers as compared to other alternatives considered while maximizing increases in habitat. In the 1991 Agreement, the purpose of this plan is to develop and propose to the governor a program to protect, mitigate damages to, and enhance fish and wildlife impacted by the project. ADF&G strongly encourages the Project Owners to consider adoption of ADF&G Alternative B, and specifically the construction of a fixed wheel gate at the project dam, to allow for flexibility of instream flows into the future.	The difference in increase to ratepayers from the Project Owners' Preferred Alternative to ADFG Alternative B is +0.53% to +0.76% for Chugach ratepayers, +0.84% to +1.13% for MEA ratepayers, and $0.51/100k to $0.81/100k property tax increase for MOA taxpayers (Table 4-8 of Supporting Information Document). The Project Owners have reconsidered construction of a fixed wheel gate to allow for flexiblity of instream flows in the future. The fixed wheel gate is included in the Proposed Final Fish and Wildlife Program as a limited reopener if certain criteria are met as outline in Section 4.1 of the Proposed Final Fish and Wildlife Program.
31	Eklutna, Inc.	Page 41	Table 2-5. Ratepayer/Taxpayer Impacts for Stakeholders' Preferred Alternatives.	Finally, we would like to see more details of ratepayer increases. The Program discusses the differences in perceived ratepayer increase. The public generally does not understand how rates increase and how the direct costs of a dam replacment, Portal release or dam removal actually materialize. Discussing how the rates will increase for water and electricity is essential to informing the public of a potential impact on their finances. A cursory estimate is inadequate for a public-facing document.	Details are included in Appendix C of the Supporting Information Document.
