24 Id. Section 2.2.2 at Pp. 8-10.
25 Id. Section 2.5 at P. 10.
26 Id. Section 2.4.1 at P. 11.
27 Id. Section 3.0 – 3.4 at P. 12 - 15. This plan includes the creation of a Monitoring and Adaptive Management Committee consisting of five voting members, one each from the following entities: Alaska Department of Fish and Game, Alaska Department of Natural Resources, NMFS, FWS and NVE. Id. Section 3.1 at P. 12.

g. Two limited reopeners, i.e., the study and potential construction of a fixed wheel gate to replace the existing overflow spillway and provisions to review fish passage alternatives to allow adult salmon to pass into the lake from the River and juvenile salmon to pass from the lake downstream into the River ("Limited Reopeners")[28].

2. MOA Comments

MOA raised the following issues in response to the Proposed Final Program[29]:

a. Although the prior Mayor supported the Proposed Final Program, the new Administration believed that Anchorage Assembly approval was necessary, and the prior Mayor failed to obtain it[30];

b. Requests full water restoration to the Eklutna River for the full 12 miles from the Eklutna River Dam downstream and permit fish passage to and from Eklutna Lake;

c. Removal of the limited reopeners; and

---

[28] The Fixed Wheel Gate Limited Reopener does not trigger the process terms of the 1991 Agreement; the Fish Passage Limited Reopener does not alter any other components of the Final Program. Proposed Final Program, Section 4.0, Pgs. 17, 20.

[29] Letter from Mayor Susanne LaFrance to Governor Dunleavy, July 19, 2024, and accompanying AR No. 2024-218(S).

[30] Mayor LaFrance was sworn into office on July 1, 2024. David Bronson previously served as Mayor of Anchorage from July 1, 2021 – June 30, 2024. The Proposed Final Program was drafted during and completed while Mayor Bronson served as Mayor of Anchorage. Former Mayor Bronson submitted a letter of support to the Governor's office on April 26, 2024.

d. Requested a two-year extension for the purpose of studying pumped storage hydropower as a potential alternative.

3. FWS Comments

In general, FWS agreed with the Proposed Final Program, but it believed full restoration of water flow to the Eklutna River and fish passage to and from Eklutna Lake was an "important component of a long-term mitigation strategy and that the Proposed Final Program was a starting point to reconnecting the River with their phased approach." They also commented that "[n]either an engineering solution nor funding support have yet been identified that can accomplish all criteria, but we look forward to exploring opportunities to accomplish river connectivity and return an anadromous sockeye salmon run to the Eklutna River". [31]

FWS requested one modification to the Proposed Final Program. FWS requested that if the Fixed Wheel Gate is determined to not be feasible, that the $10 million in funding committed for that purpose be allocated for other protection, mitigation, and enhancement measures "to improve habitat by other means." [32]

4. NMFS Comments

NMFS raised similar issues raised by FWS but did not object to the Proposed Final Program. It concluded the "Program provides a framework to initiate the protection, mitigation and enhancement of fish and wildlife resources and will support the next

---

31 Sara Boario, Regional Director, FWS, letter to Governor Dunleavy, June 24, 2024.

32 Id.

iteration of a mitigation plan."[33] NMFS had one request for a modification of the Proposed Final Plan. NMFS requested that if the Fixed Wheel Gate was determined to not be feasible or did not proceed, that either the $10 million committed for that purpose be allocated for other protection, mitigation, and enhancement measures in coordination with the Monitoring and Adaptive Management Committee, or that the NVE pump station alternative be studied.[34]

5. NVE Comments

NVE maintains the primary purpose of the Agreement was to "restore and maintain sockeye salmon that depend on free passage into and out of Eklutna Lake, their preferred spawning habitat."[35] NVE further states the Program is deficient in the following ways:

a. Failure to restore water to all 12 miles of the Eklutna River from the dam downstream at sufficient volumes to support salmon habitat;
b. Failure to permit passage of sockeye salmon to and from Eklutna Lake;
c. Low water flows only minimally enhance chinook and coho salmon habitat;
d. Jeopardizes Anchorage drinking water; and
e. Burdens ratepayers and taxpayers with excessive costs.[36]

---

33 Jonathan M. Kurland, Regional Administrator, National Marine Fisheries Service, letter to Governor Dunleavy June 21, 2024. Mr. Kurland's letter acknowledges that the mitigation process is ongoing and repeats every 35 years beginning 25 years after implementation of the Final Fish and Wildlife Program has been implemented.

35 Aaron Leggett, Chair/President, NVE, letter to Governor Dunleavy, June 21, 2024.

36 Id.

6. Operators' Reply to Comments

The Operators replied to the comments from the other Parties and NVE and continued to maintain the Proposed Final Program was consistent with the Agreement. The Operators identified the federal Parties generally approved the Proposed Final Program with some reservations and they identified some key disagreement with MOA and NVE, including:

a. Flow regimes will enhance spawning habitat for chinook, coho, chum and pink salmon that currently exist in the Eklutna River;
b. Included a limited reopener in the Proposed Final Program for the Monitoring and Adaptive Management Committee to address fish passage to and from the Eklutna Lake in the future;
c. Operators worked with AWWU to negotiate agreements that protected the supply of drinking water to Anchorage;
d. NVE's proposed Pumped Station alternative posed higher costs and increased risks to the Project;
e. Removal of the Eklutna Dam in 10 years was not feasible due to foreseeable energy needs, inhibition of renewable energy goals, excessive replacement and removal costs, and damage to infrastructure and property downstream; and

f. The two-year delay requested by MOA for further study will thwart implementation of the Final Approved Program in the timeline required by the Agreement.[37]

7. Joint MOA/NVE Resolution for Pumped Storage Hydropower

Well after the comment period had expired and even after the deadline for Owners' reply to the comments, MOA and NVE provided the Governor and the other Parties a joint resolution recommending a new alternative, pumped storage hydropower, they believed "could result in full restoration of waterflow to the River, protection of Anchorage's drinking water source, and increased power generation, potentially with lower costs to municipal taxpayers and ratepayers".[38] MOA and NVE claim that pumped storage hydropower is used worldwide and it has the "potential to maintain and improve existing power production, meet municipal water supply needs and provide full river hydrological function and connection into and out of Eklutna Lake for fish passage". They requested the Governor require, as part of the Final Approved Program, Owners to use two years of the three year pre-implementation period in the Agreement to explore alternative infrastructure options, including pumped storage hydropower, so water could be restored to the entire Eklutna River and permit fish passage to and from the Eklutna Lake.[39] This joint resolution was virtually identical to MOA's prior request to delay the Governor's decision on a final

---

37 Operators Response to Comments, July 24, 2024.
38 Anchorage Assembly and NVE Joint Resolution, No. 2024-001.
39 Id.

program, with the exception of it now identified a proposed alternative to pursue, i.e., pumped storage hydropower. The Operators did not have an opportunity to respond to this joint resolution, but it was addressed in the meeting of the Parties with the Governor's office on September 9, 2024.

IV. DISCUSSION

The Proposed Final Program and the comment period that followed ends a long public process that started with the Agreement in 1991. The most recent process started in March 2019 and included:

- Years of studies, consultations, and alternative analysis;
- Several public meetings;
- Extensive public comments;
- A draft fish and wildlife program;
- Numerous parties' comments, meetings, and discussions; and
- A Proposed Final Program.[40]

Almost all the Parties have described the process of reaching the Proposed Final Program as a negotiation.[41] As with any negotiation, participants do not always come away with

---

[40] Operators Response to Comments on Proposed final Fish & Wildlife Program, July 2024 at P. 1.

[41] Transcript of Proceedings before the Governor's Office, September 9, 2024 at Pp. 26 (Operators); P. 73 (FWS); and P. 83 (NMFS). NVE although not a Party to the Agreement also commented that the process included negotiations. Id. at P. 85. MOA did not describe the process as a negotiation, but is now represented by a different administration than the one in place when the Proposed Final Program was drafted. However, see Former Mayor Bronson's letter of support to the Governor's office on April

what they want, and the end result is a resolution that neither side may be completely happy with but nevertheless agree to the terms to move the matter forward. This is certainly the case with the Proposed Final Program put forth by the Operators. The Parties have disagreements as to what should be included and how far the Final Program should go. The Parties, at the time they entered the Agreement, clearly understood that not everyone would get what it desired. The Agreement includes provisions on how to resolve those differences.

A. Governor as Final Decision Maker

1. Review Standard

The Agreement sets forth the role of the Governor in establishing a Final Program. The Governor is required to "review the Proposed Final Program, comments, testimony, summary and analysis materials, and any alternative recommendations for the protection, mitigation, and enhancement of fish and wildlife resources".[42] He is then tasked with "attempting to reconcile any differences between the Parties, giving due weight to the recommendations, expertise, and statutory responsibilities of FWS, NMFS, the State Resource Management Agencies and the Purchasers".[43] Finally, the Agreement provides:

> In order to ensure that Eklutna . . . [is] best adapted for power generation and other beneficial public uses, the Governor shall give equal consideration to the purposes of efficient and economical power production, energy conservation, the protection, mitigation of damage to, and enhancement of fish and wildlife (including related spawning grounds and habitat), the protection of recreation opportunities, municipal water

---

26, 2024, wherein he states MOA (Anchorage Hydropower) was involved in the process every step of the way.

42 Agreement at Section 5, P. 4.

43 Id.

supplies, the preservation of other aspects of environmental quality, other beneficial public uses, and requirements of State law ("Eight Factors").[44]

The Governor is then tasked with establishing the Final Program that adequately and equitably protects, mitigates damage to, and enhances fish and wildlife resources affected by the Project.

2. Operators' Proposed Final Program and Analysis of Eight Factors

We must first evaluate the Proposed Final Program in light of the Eight Factors outlined in the Agreement.

a. Efficient and Economic Power Production and Energy Conservation - Factors One and Two

The Operators assert the Project "produces nearly six percent of the Owners' combined generation portfolio, which also amounts to roughly 25% of Chugach's renewable energy and 44% for Matanuska."[45] This power is also alleged to be the lowest cost resource for power in the Alaska Railbelt.[46] The Project also assists with power reliability for the region.[47] None of the Parties challenge these assertions. Obviously, the downside to restoring water flow to the River from a power production standpoint is the loss of the water for that production. This comes at a cost, both financial and in terms of

---

44 Id.

45 Operators' Brief to Governor, September 4, 2024 at P. 4.

46 Id. citing SID at 2.2.2

47 Operators' Brief, September 4, 2024, P.p. 4-5. Operators also cite an example of how the Project assists other power production in the region. When a natural gas company experienced delivery problem, Operators were able to maximize their usage of the Project to maintain system reliability. Id. (Citing Tony Zellers, et al, letter to MOA, February 12, 2024).

power availability, which cannot be overlooked. Maximizing the Project's power output results in energy conservation by reducing natural gas usage, avoidance of diesel usage for power generation and thus lower emissions, and thus reduced costs if these other power production methods were employed.

The Operators chosen method for restoring instream water flow to the River was also based on using cost effective means to achieve the goal and consideration of the costs to the rate payer. They also rejected alternatives that shut the Project down for lengthy periods of time which would have impacted the Project's value for capacity reserves and grid reliability.[48] These facts are likewise not challenged by any Party.

b. Protection, Mitigation of Damage to, and Enhancement of Fish and Wildlife (including related spawning grounds and habitat) – Factor Three

The Proposed Final Program provides several steps for restoring water flow to the River and thus enhancing, protecting, and mitigating damage to fish and wildlife. The Program restores water flow to the River at rates between 27cfs and 40cfs throughout the year.[49] It also requires periodic channel maintenance flows up to 220cfs.[50] It rewaters 11 of the 12 miles of River at the rates noted above thus restoring water flow to the River that has not existed for years. The plan also creates a Monitoring and Adaptive Management Committee of experts to review, evaluate and modify flow regimes within a water budget to increase and enhance fish habitat. Likewise, the increased flow and enhancement of fish habitat will have a corresponding effect on other wildlife, including

---

48 Id.

49 Proposed Final Fish and Wildlife Program, Section 2.1.2.

50 Id. at Section 2.2.

bear and moose populations. Operators' modeling projects increases in chinook spawning and rearing habitat by 209 and 53 percent respectively with increases for coho by 65 and 67 percent, respectively.[51] Limited Reopeners are also included, i.e., potential installation of a fixed wheel gate and fish passage in the future.

The federal Parties, NVE, and MOA correctly point out that the Proposed Final Program fails to include rewatering of the entire River and allow for fish passage to and from Eklutna Lake. NVE and MOA believe that this failure alone makes the Proposed Final Program deficient. They also challenge whether the flows proposed will result in any substantial benefit to salmon habitat. The federal Parties, although proponents of full water flow and fish passage, realize that this process is long and with technological advancements in the future, the goals can be achieved. For that reason, they did not reject the Proposed Final Program. The Agreement provides the Governor must give due weight to the recommendations, expertise, and statutory responsibilities of the Parties, including FWS and NMFS.[52] Due weight is given to the FWS and NMFS' expertise and the fact that they have not objected to proceeding with the Proposed Final Program is a very strong indicator that it meets Factor Three.

---

51 SID at Section 4.10.1.

52 Agreement at Section 5, P. 4. The Agreement also permits the Governor to give due weight to the Purchasers, which includes MOA. However, MOA gave up their right to vote on operations at the Project and conceded they lacked the expertise to participate in the Project's operations, which included establishing the Proposed Final Program per the Agreement. See RCA Order U-18-102(44)/U-19-020(39)/U-19-021(39) and Surrender of Eklutna Operation Committee (EOC) Voting Rights dated as of October 27, 2020, and filed with the RCA in docket number U-18-102(44).

As stated earlier herein, fish passage is not a requirement in the Agreement, nor is restoration of complete waterflow to the River and fish passage. However, from a review of the record, it appears all parties recognize the importance of eventual complete waterflow restoration and fish passage. The difference between the Parties is focused on the methods and timeline to achieve those goals. The Proposed Final Program includes a Limited Reopener to achieve full water restoration and fish passage, understanding that as technology advances, those goals may be cost effective or technically feasible to achieve in the future.[53]

c. The Protection of Recreation Opportunities – Factor Four

Several positive impacts on recreational activities are included within the Proposed Final Program:

- Commitment of $234,000 as a match to Chugach State Park or its designee for lakeside trail repairs;
- Potential fishing in the River;
- Kayaking on the Eklutna Lake
- Hunting opportunities;
- Camping;
- Wildlife viewing; and
- Protection of the tailrace fishery.[54]

---

[53] See Section IV.A.3. herein for further discussion on restoration of complete waterflow and fish passage.

[54] Operators' Brief, September 4, 2024, P.p. 8-9.

The other Parties did not address this issue in their briefs.[55] There are clear benefits and protections from the Proposed Final Program as outlined above.

d. Municipal Water Supplies – Factor Five

The Parties once again disagree on the impacts the Proposed Final Program will have on municipal water supply. Operators acknowledge they will use AWWU infrastructure to restore water flow to the River. They assert it will not negatively affect the water supply and, in some ways, enhance the water supply infrastructure. MOA and NVE on the other hand believe it will negatively affect municipal water supply. However, neither MOA nor NVE have been able to adequately detail these alleged negative effects. Once again, the Agreement permits the Governor to rely on the expertise of the Operators and give due weight to their findings.[56]

Operators maintain the Project's infrastructure and Anchorage's municipal water supply have been "inextricably linked as a matter of physical infrastructure, operations, contract, water rights, and authorizing law since the 1980s when AWWU connected its intake pipe to the Project's intake structure".[57] Operators assert they worked closely with AWWU leadership and engineers to develop legal terms and agreements by which AWWU will be comfortable with the use of AWWU infrastructure to release water into

---

55 MOA makes a passing reference that the "proposed program fails to adequately advance recreational and other beneficial public uses such as fishing or taking in the beauty of a real mountain river with real water in it". MOA Brief at P. 11.

56 See also, Footnote 51.[57] Operators' Brief, September 4, 2024, P. 9.

57 Operators' Brief, September 4, 2024, P. 9.

the River.[58] AWWU and Operators have agreed on key terms for an agreement to govern the construction and use of the Eklutna River Release Facility and an agreement for the long term sharing of Eklutna Lake water rights. AWWU and Operators also negotiated three agreements to detail and govern the arrangement if the Governor approves the Proposed Final Program. Finally, Operators agreed to commit to not take any action in connection with the Fish and Wildlife Program that would compromise Anchorage's water supply, and they agreed to accept liability if they did so. Additionally, other benefits flowed to AWWU, including design approval rights, the construction of eight new bridges over Eklutna River for AWWU to maintain access to its infrastructure, new communications systems, flow meters and a new isolation valve structure for safer maintenance of their facilities, as well as other benefits. AWWU receives its water under a contract with the Eklutna Owners; the proposed term sheet according to Operators would reduce the current water supply costs by half under the new contract to replace contract expiring at end of 2025. For all these reasons, the Proposed Final Program does meet the requirements of the Agreement concerning municipal water supply.

The central issue here is not whether the water supply is protected and/or enhanced, as the evidence clearly demonstrates it is, but rather, whether the Operators and AWWU's agreements must be approved by MOA and to date that approval has not been achieved. In Resolution 2024-182(S-1), the Assembly stated "The Municipality of Anchorage does not intend to issue authorizations or provide funds or any other form of

---

58 Id.

support of the Proposed Final Program or any alternative that doesn't work toward the restoration of the full length of the River…"[59]. The Operators believe they have legal avenues to pursue the agreements even if MOA withholds approval, but litigation does not move the Final Program forward, creates delay in restoring water flows to the River, and impedes implementation of the Final Program.

e. The Preservation of Other Aspects of Environmental Quality – Factor Six

The redirection of lake water to the River instead of the Project's powerhouse reduces the generation of carbon free power that will most likely be replaced by natural gas generation. However, all alternatives considered reduce the power generation from the Project. The Proposed Final Program has the smallest impact in this regard of all the alternatives considered.

f. Other Beneficial Public Uses – Factor Seven

The Operators cite restoration of salmon habitat in the River as another beneficial public use and that flows will not impact infrastructure downriver, including bridges over the River. Enhanced salmon habitat is important to the public and to NVE and its people. Protecting existing infrastructure used by the public is also a beneficial public use.

g. Requirements of State Law – Factor Eight

Numerous areas of State law are impacted by this Proposed Final Program, including permitting, safety, fish and game, natural resources to list a few. The Operators

---

[59] MOA Resolution 2024-182(S-1), June 25, 2024

acknowledge the need to comply with all State laws that apply to the Proposed Final Program and their need to obtain an amendment to their certificate of authority from DNR to permit the conveyance and release of water into the River. Additionally, as operators of an electric utility, Operators also have an obligation to comply with all State laws related to utility operations.

h. MOA and NVE Proposed Alternatives

Neither MOA nor NVE have provided any analysis with respect to how their proposed alternatives consider the Eight Factors. Rather, they seem to rely on the belief that their proposed alternatives, such as dam removal or pumped storage hydro, will result in full water restoration to the River and allow for fish passage thus promoting the protection, mitigation of damage to, and enhancement of fish and wildlife (including related spawning grounds and habitat). While that is one factor that must be considered, the Governor is required to give equal consideration to all Eight Factors. They have not provided any evidence or analysis of how these proposed alternatives will impact the other seven factors. For example, there is no evidence of how these alternatives will promote the purposes of efficient and economical power production and energy conservation or impact municipal water supplies.

3. Differences Between the Parties

In addition to giving equal consideration to the Eight Factors, the Governor must also attempt to reconcile differences among the Parties. Although the Parties have generally agreed that the Proposed Final Program was arrived at through rigorous studies, public review, comment, and negotiation, two glaring differences were identified, 1)

water flow for the entire Eklutna River from the dam downstream; and 2) fish passage to and from Eklutna Lake.[60]

The Operators believe that current technology and cost are major prohibitions to obtaining full water flow throughout the River and fish passage to and from the lake at the present time. They posit that the agreement provides a mechanism to continually review these goals and as technology evolves and costs decline, the goals may be achievable, and have provided for this to be regularly evaluated by the Monitoring and Adaptive Management Committee.

FWS and NMFS believe that complete water flow and fish passage were intended as part of the Agreement, but they also indicate that the process must start somewhere and

---

[60] MOA and NVE allege the process to arrive at the Operators' Final Proposed Program was flawed. MOA asserts it was denied a viable way to participate due to the fact it lost its vote as an Owner of the Project via an RCA order. However, MOA's assertion in this regard is misguided for three reasons. First, MOA voluntarily gave up its right to vote on matters affecting the operation of the Project and the 1991 Agreement. Secondly, Mayor Bronson formally acknowledged the MOA's complete participation in "every step in the process that led to the Proposed Final Program" and that MOA supported the agreement with the Proposed Final Program. See Mayor Bronson letter to Governor Dunleavy, April 26, 2024. Thirdly, the Operators assert that they and MOA conducted themselves as equals throughout the process and made all decision on the Proposed Final Program through unanimous consent. The record contains no evidence to the contrary. NVE asserts that the Operators failed to pursue alternatives that would have provided for rewatering the entire river and allowed fish passage. Operators counter that they did look at several other alternatives, including NVE's pump station alternative and dam removal, and for various reasons, including economics and other risks, it chose to proceed as outlined in the Proposed Final Program. See NVE comments, June 21, 2024 and Operators' Reply to Comments, July 2024 at Pp. 22-23.

there is time to achieve both and still comply with the Agreement's requirements.[61] They are each committed to pursuit of any alternatives that will achieve those goals.

MOA and NVE however, believe that both goals should be pursued now and absent complete River waterflow and fish passage, the Program should not be adopted. First, the Agreement does not require complete waterflow and fish passage. Had the Parties intended to make those requirements of the Program, they could have and should have so stated in the Agreement itself.[62] Rather, the Agreement outlines requirements to protect, mitigates damage to, and enhances fish and wildlife resources affected by the Project. At the time the Agreement was signed, the River did not enjoy complete waterflow nor were fish able to pass from River to lake and lake to River. As NVE acknowledges, these goals were not achievable until the lower diversion dam was removed in 2018.[63] Courts cannot add words to the contract that would impermissibly re-write that contract, nor can the Governor in this situation.[64] Simply put, the Agreement is not ambiguous. Rather, complete waterflow and fish passage can be adopted in a final

---

61 ". . . the Program provides a framework to initiate the protection, mitigation and enhancement of fish and wildlife resources, and will support the next iteration of a mitigation plan". NMFS Comments to Proposed Final Fish and Wildlife Program, June 21, 2024 at P. 2. "Although the proposed Program does not immediately meet the FWS's goals of ecological connectivity . . . the Program, with commitment of all stakeholders, could be an interim step to reconnecting the river, consistent with our request for a phased approach". FWS comments on the Proposed Final Program, June 24, 2024 at P. 4.

62 *McConnell v. Pickering Lumber Corp.*, 217 F.2d 44, 47 (9th Cir. 1954) ("Appellants would have the court under the guise of construction add words to the contract which are not to be found in it. We do not understand such to be the function of the court.").

63 NVE Brief to Governor Dunleavy, September 4, 2024 at P. 7.

64 *JAE Properties, Inc. v. AMTAX Holdings 2001-XX, LLC*, __ F. Supp. Ed __, 2024 WL 538570 (USDC S. D. Cal. 2024).

program if supported by an analysis of the factors in the Agreement, but the Agreement did not mandate it.

NVE and MOA also seem to place all their emphasis on Factor Three, i.e., protection, mitigation of damage to, and enhancement of fish and wildlife (including related spawning grounds and habitat) without providing for equal consideration of the other seven factors. The Agreement clearly and unequivocally requires the Governor to give "equal consideration" to all Eight Factors.[65] Although Factor Three is an extremely important element of this process, it cannot be viewed alone or to the detriment of the other factors. Each factor has an impact on the final program.

However, with that said, it does not mean that the Governor cannot alter or improve the Proposed Final Program. The Proposed Final Program meets the requirements of the Agreement, giving equal consideration to the Eight Factors, and provides for the protection, mitigation of damage to, and enhancement of fish and wildlife habitat. It can, however, be improved in certain ways to try to reconcile the differences between the Parties per the requirements in the Agreement.

4. Governor's Amendments to Final Proposed Program

The Proposed Final Program is established with the following amendments. Discussion on the amendments will follow this section.

Section 3.1 Committee

This section is amended as follows:

---

65 Agreement at Section 5, P. 4.

The Committee will consist of one voting representative from each of the following:

Alaska Department of Fish and Game – member appointed by the Commissioner;

Alaska Department of Natural Resources – member appointed by the Commissioner;

NMFS – member appointed by its Regional Director;

FWS – member appointed by its Regional Director;

NVE - member appointed by its Chair/President; and

Governor of Alaska – appoints one member.

The Committee will make decisions by consensus and four members shall constitute a quorum.

Section 4.1 Fixed Wheel Gate

If it is determined that the construction of the fixed wheel gate is not structurally or economically feasible, the Owners shall make available any remaining funds not expended of the $10,000,000.00 (up to $10,000,000.00 in April 2024 U. S. dollars)[66] for other protection, mitigation, and enhancement measures for fish and wildlife including impacted habitat loss and other effects

[66] The current estimate for that fixed wheel gate is $4 million. Operators committed up to $10 million in 2024 dollars. See Transcript of Proceedings, September 9, 2024 at P. 109.

related the Project in accordance with the terms and process previously outlined in Section 3.3.6.[67]

Section 4.0 Limited Reopeners

New Section 4.3 is added.

Section 4.3 Pumped Storage Hydropower

Pumped Storage Hydropower is added as a Limited Reopener.

The Parties are directed to study this upon terms and conditions they mutually agree to. The terms and conditions will include level of engineering, level of cost analysis, what Party or Parties will fund the study and in what amounts and any other matters the Parties find necessary to implement this Limited Reopener. The study should be consistent with studies performed for other alternatives reviewed by Operators. The Parties, assuming they agree on the above requirements, are directed to undertake the study immediately, but this study will not delay the implementation of the Governor's Approved Final Program or the review and study of the fixed wheel alternative. The results of the study will be reported to the Monitoring and Adaptive Management Committee ("Committee").

The Committee will analyze the study findings and perform the Eight Factor analysis required by the Agreement. The Committee will then provide the study findings and Eight Factor analysis to the Owners for the Owners review. If

---

67 See FWS comments to the Proposed Final Program, June 24, 2024 at Pp. 4-5.

the Owners approve the study findings and Eight Factors analysis, they will provide a statement of support to the Committee and the Committee and Owners will coordinate and cooperate to obtain the Governor's approval. Governor approval of the decision to pursue Pumped Storage Hydropower is required. If the Governor approves the proposal, then the 35-year timeframe requirement to repeat the consultation process required by the Agreement will restart from the date the Governor's approval. The construction of Pumped Storage Hydropower must minimize impacts to Project operations. The Project Owners will oversee all construction activities and will support the development and operation of Pumped Storage Hydropower facilities and infrastructure. This is a limited reopener and will not reopen any other components of the Fish and Wildlife Program.

Discussion of Amendments

Amendment to 3.1

Since the Proposed Final Program provides for ongoing review through the Monitoring and Adaptive Management Committee, and it is the Governor's role under the Agreement to establish a Final Program, adding a Governor appointed seat to the Monitoring and Adaptive Management Committee allows the Governor, and future Governors, to continue to fulfill his or her role under the Agreement to establish the Final Program as the work of the committee is ongoing. The definition of a quorum is added to assist in governance and ensure the recommendations made by the committee have robust involvement from the entities represented.

Amendment to 4.1

As one of the purposes of the Agreement and Final Program is to protect, mitigate damage to, and enhance fish and wildlife habitat, ensuring the funds already set aside for the fixed wheel gate alternative are available to be used for other protection, mitigation, and enhancement measures is consistent with the intent of the Agreement in the event the fixed wheel gate is found to be infeasible. This amendment is responsive to the modification of the Proposed Final Plan requested by NMFS and FWS.

Amendment to 4.0, addition of Section 4.3

MOA and NVE have suggested that Pumped Storage Hydropower ("PSH") is a viable alternative to the Proposed Final Program. They passed a joint resolution on September 5, 2024, advocating for PSH. They claim it is a "proven energy storage solution used worldwide that provides carbon free power production, storage and grid stabilization and that it has the potential to maintain or improve power production, meet municipal water needs and provide full River hydrological function and connection into and out of Eklutna Lake for fish passage.[68] They suggested that the Governor require the Owners use the first two years of the three year implementation period to explore this option.[69]

Neither MOA nor NVE have studied this potential alternative. The Operators have reviewed it but admittedly did not get to any final conclusions on its viability, nor did they engineer or model it to see if it was economically or engineeringly feasible at this location. At the meeting with the Governor's office, MOA, NVE and Operators each

---

68 MOA/NVE Joint Resolution, September 5, 2024

69 Id.

agreed that this was a potential option that could be explored.[70] However, Operators and the federal Parties do not want to delay implementation of the Final Approved Program to explore this option.

Implementation of the Final Approved Program should not be delayed or extended for an option of unknown cost and feasibility. However, if PSH is as promising as MOA and NVE indicate, there are numerous potential benefits and improvements to the Eight Factors which must be considered when evaluating this Program. As such, conducting this study, under terms agreeable to the Parties, will provide more information relevant to those factors and the potential benefit or harm to the protection, mitigation of damage to, and enhancement of fish and wildlife resources.

All other components and requirements of the Final Proposed Program are adopted herein unless otherwise amended hereby. The Owners are directed to begin implementation of the Final Approved Program as approved herein as soon as possible.

V. CONCLUSION

The Final Approved Program established today is the culmination of many years of difficult work, analysis, evaluation, discussion, and negotiation by the Parties. Each party did not get all they wanted in this Final Approved Program. However, this is a long-standing problem with no readily available easy solutions and implementation of this

---

[70] Transcript of Proceedings, September 9, 2024 at Pp. 105-122. The federal parties did not take a position other than to state they are in favor of exploring options that restores full waterflow to the river and allows for fish passage. Id. at Pp. 112-113.

Final Approved Program will put the River on track towards potential full water flow and fish passage.

Final Technical Memorandum

To:	Project Owners	Project:	Eklutna Hydroelectric Project
From:	Chuck Sauvageau	cc:	Samantha Owen
Date:	November 14, 2022	Job No.:	22-028
Subject:	Eklutna Lake Water Quality and Trophic Status Summary		

1.0 Introduction and Purpose

As summarized in the Initial Information Package (IIP), there is limited historic water quality data for Eklutna Lake. In addition, the United States Army Corps of Engineers (USACE) reported in 2011 that "…physical limnology studies of Eklutna Lake suggest that the turbidity in Eklutna Lake during much of the year is not conducive to significant primary production. Low numbers and small size of the native land locked sockeye salmon (kokanee) found in the lake supports these biological assumptions." (USACE, 2011). Therefore, one of the goals of the overall Water Quality Study was to gain a better understanding of seasonal water quality parameters in the lake as well as assess the lake's trophic status based on methods described by Carlson (1977).

The results from these water quality assessments will serve as a component to aid in the decision making process for the potential of instream flow release locations into the Eklutna River and well as development of potential fish passage facilities into Eklutna Lake. A detailed summary of study and data collection objectives include the following:

- Collect continuous water temperature data in Eklutna Lake as well as *in situ* profiles of temperature, pH and dissolved oxygen (DO).
- Collect total phosphorus, chlorophyll *a*, and Secchi depth data in Eklutna Lake to determine the trophic status index (TSI) value.

2.0 Eklutna Lake Study Areas

Eklutna Lake sampling occurred at locations where water may be released downstream into the Eklutna River. Water quality study site locations in Eklutna Lake are depicted in Figure 2-2; these locations are:

- Thermistor String 1 – located in Eklutna Lake near the Project intake structure (temperature, DO, pH, total phosphorus, chlorophyll *a* Secchi depth)
- Thermistor String 2 – located in the "pond" near the Project dam in front of the spillway (temperature, DO, pH, total phosphorus, chlorophyll *a*, Secchi depth)

EXHIBIT

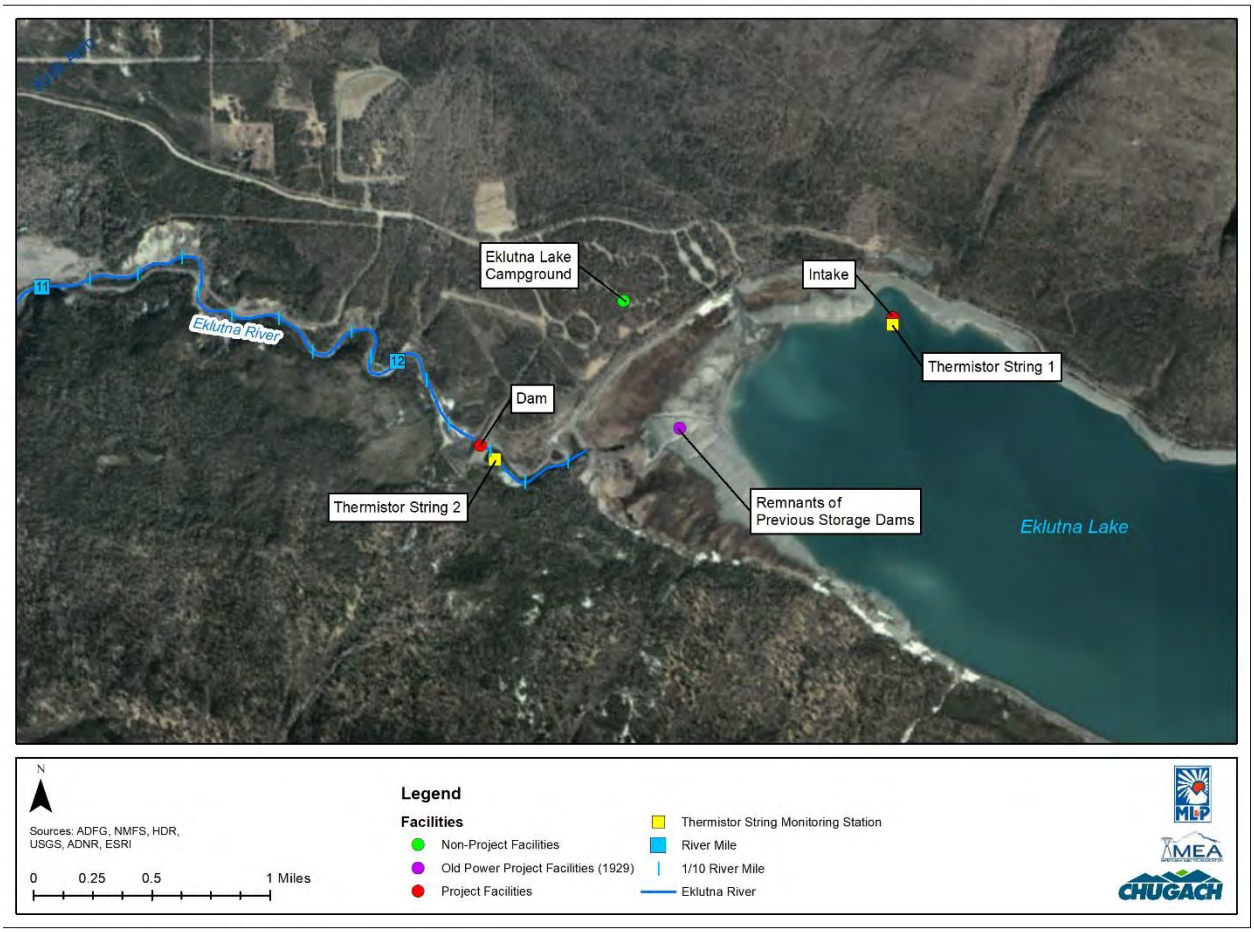

Figure 2-2. Water quality study site locations in Eklutna Lake

3.0 Methods

3.1 Water Temperature

Calibrated thermographs were utilized to continuously record water temperatures in the "pond" (Thermistor String 2) from May of 2021 through October of 2022. The Eklutna Lake thermistor string could not be installed in May due to unsafe lake conditions, and Eklutna Lake data could not be downloaded in September or October of 2022 due to high lake levels; therefore, at the Eklutna Lake intake site (Thermistor Sting 1) continuous temperature data are available from June of 2021 through August of 2022. Field procedures, as well as pre-deployment instrument calibration, followed techniques detailed by Ward (2011). A thermistor string was deployed using a buoy and anchor system at each of the two lake sites (Figure 3-1). Continuous temperature sampling occurred at two distinct depths in the water column. For the thermistor string near the Project intake , temperature sampling occurred at 0.5 meters below the water surface and at approximately El. 793.6 feet (the approximate elevation of the intake). For the thermistor string in the pond near the existing dam in front of the spillway, temperature sampling occurred at 0.5 meters below the water surface and at approximately El. 852 feet (the invert elevation of the drainage outlet gate). In addition to the continuous temperature monitoring efforts, *in situ* measurements of water temperature were taken every 6-8 weeks during the ice free season (May-October) with a calibrated water quality sonde. These *in situ* data were collected to validate logger data during

EXHIBIT
MAC-8
Page 2 of 16

each field maintenance and data download effort as well as providing a temperature profile throughout the entire depth of the water column.

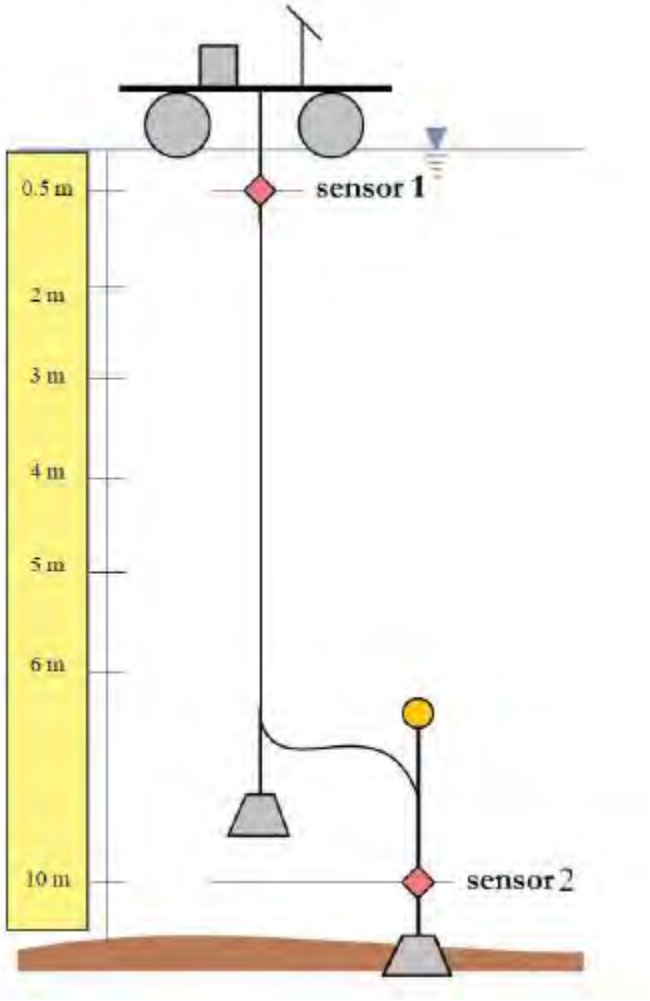

Figure 3-1. Thermistor string schematic for water temperature monitoring in Eklutna Lake.

3.2 Eklutna Lake DO and pH

Monthly DO and pH data were collected as *in situ* profile readings at the two lake stations during the ice-free period from May 20 to September 29 2021, in the pond and from June 23 to September 29, 2021 in Eklutna Lake. DO and pH profile data were collected at 3-foot depth intervals for the entire water column utilizing a water quality sonde calibrated to manufacturer recommendations.

3.3 Eklutna Lake Trophic Status

The mid-summer lake profiling on July 14, 2021, also included the determination of Secchi depth, as well as the collection of total phosphorus and chlorophyll *a* samples. The assessment of these three lake parameters were utilized to provide an index of lake productivity based on Carslon (1977). Water samples for phosphorus and chlorophyll *a* were collected near the surface of the lake utilizing a Van Dorn sampler at the two lake monitoring sites. The Van Dorn sampler was flushed with on-site lake water prior to collection at each site. Collected water samples for total phosphorus were transferred to pre-labeled

EXHIBIT
MAC-8
Page 3 of 16

laboratory-supplied bottles while chlorophyll *a* water samples were filtered through 0.45 µm filters and wrapped in aluminum foil. Both the phosphorus and chlorophyll *a* samples were placed immediately on ice then delivered to analytical laboratories on the same day that the samples were collected. Total phosphorus samples were processed and analyzed by SGS Laboratories in Anchorage, AK. Chlorophyll *a* concentrations were quantified by Professor Erin Larson, PhD at Alaska Pacific University.

4.0 Results

4.1 Eklutna Lake Water Temperatures

Figures 4-1 and 4-2 show the daily maximum water temperatures recorded at Eklutna Lake and the pond, respectively. Overall, both monitoring stations meet the Alaska Department of Environmental Conservation (ADEC) criteria for water use category (C) *Growth and Propagation of Fish, Shellfish, Other Aquatic Life, and Wildlife,* meaning that water temperatures did not exceed 20°C at any time. However, ADEC also delineates a 15°C maximum temperature criteria for rearing areas (ADEC, 2020). Based on this rearing criteria, the Eklutna Lake and pond sites exceeded the 15°C standard intermittently during 2021 and 2022. At the Eklutna Lake site, only surface water temperatures exceed 15°C from mid-July to mid-August 2021, while in 2022 the 15°C threshold is intermittently exceeded at both depth strata from mid-July to mid-August. At the pond site, water temperatures at depth never exceed 15°C, while surface water temperatures exceeded 15°C at times from early July to mid-August of 2021. In 2022, surface water temperatures exceed the 15°C rearing criteria for four days in early and late July.

Figures 4-3 and 4-4 show water temperature profile data collected every 4-6 weeks at Eklutna Lake and the pond, respectively. These data confirm periods of minor stratification (~1°C) in the summer months as well as the turnover or breakup of temperature gradient in mid to late September. In addition, when Eklutna Lake and the pond were connected during the September 2021 and September 2022 sampling efforts, each basin retained its unique temperature profile.

4.2 Eklutna Lake Dissolved Oxygen (DO) and pH

4.2.1 Dissolved Oxygen (DO)

Figures 4-5 and 4-6 show DO profile data collected monthly at Eklutna Lake and the pond, respectively. Eklutna Lake has a relatively uniform DO profile throughout the water column and easily meets ADEC criteria of 7 mg/l (ADEC, 2020). In the pond, DO dropped below the 7 mg/l criteria at a depth of 9 feet and 6 feet in late May and late June of 2021, respectively. Freshwater macrophytes were not observed in the pond, so it is likely that these depleted DO concentrations were a result of leaf litter decomposition near the bottom of the pond. Finally, DO profiles between Eklutna Lake and the pond are nearly identical when both basins were connected in September of 2021.

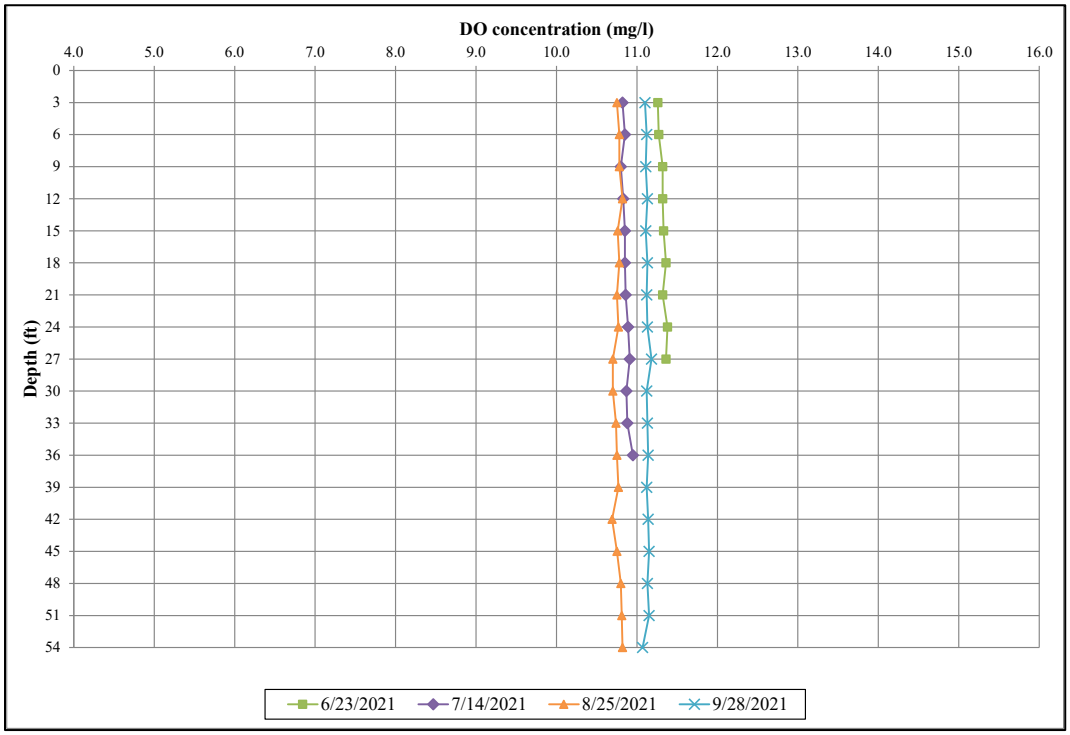

Figure 4-5. Eklutna Lake dissolved oxygen concentration profiles.

EXHIBIT
MAC-8
Page 7 of 16

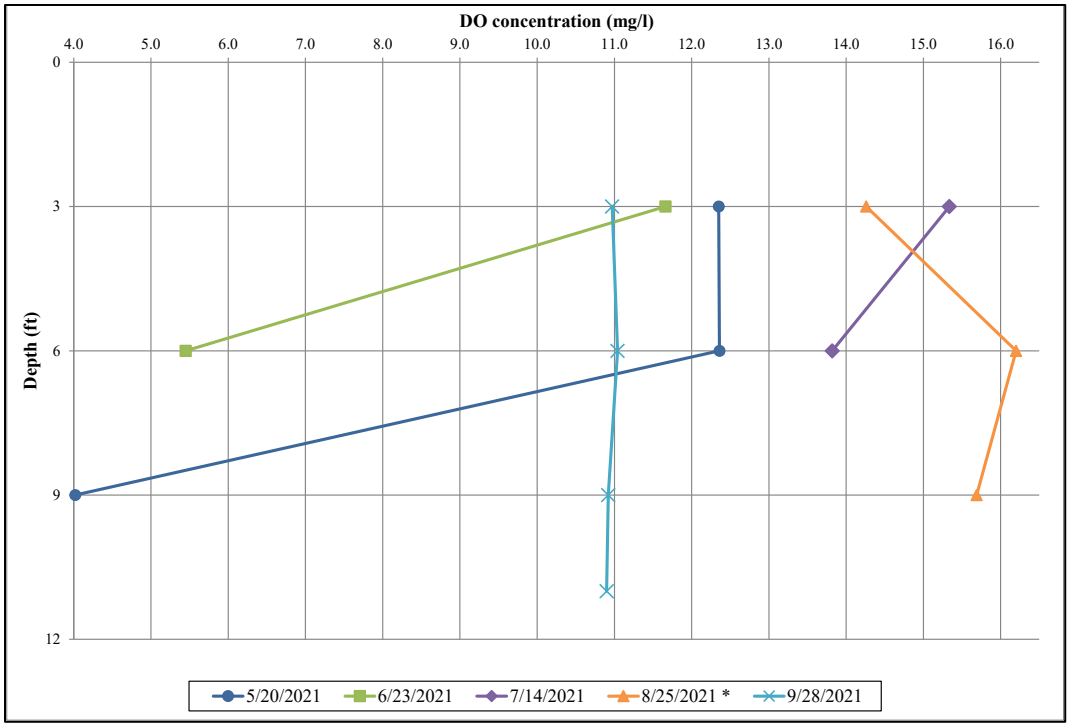

Figure 4-6. Eklutna Pond dissolved oxygen concentration profiles.

4.2.2 pH

Figures 4-7 and 4-8 summarize pH profile data collected monthly at Eklutna Lake and the Eklutna Lake pond, respectively. Values for pH in Eklutna Lake vary seasonally and throughout the water column, but the relatively narrow data range of 7.9-8.3 meet ADEC criteria of 6.5 – 8.5 (ADEC, 2020). Conversely, the pond exceeds the pH 8.5 criteria during the summer profiles collected in mid-July and late August of 2021. Similar to the water temperature results, pH data for Eklutna Lake and the pond remain unique despite being hydrologically connected during the September 2021 sampling effort.

4.3 Eklutna Lake Nutrients and Trophic Status

Table 4-1 summarizes the results from samples taken for TSI assessment in Eklutna Lake and the pond in 2021 and 2022. Results from 2021 revealed that Secchi depth and total phosphorus (TP) concentrations were not suitable factors to assess the trophic status of Eklutna Lake or the pond. Glacial runoff from the primary inflow tributaries create a turbid lake that greatly diminishes water clarity and confounds the Secchi depth results in relationship to the other parameters. TP concentrations below the detection limit of 0.04 mg/l (parts per million) does not provide the resolution needed to utilize TP as an index for trophic assessment. TP concentrations in µg/l or parts per trillion would be required to use as an index factor. However, discussions with SGS laboratories confirmed that mg/l or parts per million was the lowest analytical level that could be quantified. Therefore, in 2022, only chlorophyll *a* samples were collected to calculate the trophic index of Eklutna Lake based on the formula summarized Equation 4-1 (Carlson and Simpson, 1996). Based on 2021 results, Eklutna Lake and the pond would have a TSI of 18.5 and 23.2 while the 2022 results show both waterbodies with a TSI Index near 10.0 (10.6 for Eklutna Lake and 9.8 for the pond). Overall, these results would classify Eklutna Lake and the pond as oligotrophic (TSI <30; chlorophyll *a* <0.95 ug/l) or a lake with low primary productivity most likely due to nutrient deficiency. However, the low levels of algal biomass may also be attributed to the glacial turbidity of the lake that limits light penetration.

Table 4-1. Eklutna Lake and Eklutna Pond trophic factors, July 14, 2021, and July 7, 2022.

Sample Source	Chlorophyll *a* (ug/l)	Total Phosphorus (mg/l)	Secchi Depth (m)	TSI Value
Eklutna Lake (2021)	0.29	<0.04	0.85	18.5
Eklutna Pond (2021)	0.47	<0.04	2.04	23.2
Eklutna Lake (2022)	0.13	*not collected*	*not collected*	10.6
Eklutna Pond (2022)	0.12	*not collected*	*not collected*	9.8

Equation 4-1. Trophic State Index calculation utilizing chlorophyll *a* results

$$TSI = 9.81 * \ln(CHL\ a) + 30.6$$

5.0 Conclusions and Discussion

In both Eklutna Lake and the pond, surface water temperatures met the 20°C criteria established by ADEC, but had intermittent periods exceeding ADEC's 15°C rearing criteria in July and August. The water temperature profile data revealed a very mild thermocline of approximately 1°C in the summer with turnover or an isothermal profile occurring in mid to late September. The Eklutna Lake temperature profile data reflect peak surface water temperatures (~14°C) and a similar timeframe for turnover observed in limnology studies conducted in the 1980's (APA, 1984; R&M, 1985). However, the temperature profile data from the 1980s were collected at a deeper location (~200 feet) than the intake station (~57 feet). Temperature data from the deeper monitoring station showed a more substantial thermocline from mid-July to mid-August with surface temperatures ranging from 13°C to 14°C and bottom temperatures from 5.2°C to 5.4°C.

Eklutna Lake near the intake met ADEC criteria for DO (>7 mg/l) and pH (6.5-8.5) at all sampling dates in 2021. However, the pond had DO concentrations <7 mg/l at depth near the outlet gate on May 20 and June 23, 2021. Values for pH in the pond also slightly exceeded the upper end of ADEC criteria (8.5)

EXHIBIT
MAC-8
Page 10 of 16

with readings of 8.60 to 8.64 on July 14, 2021 and 8.58 on August 25, 2021 at a depth of 6 feet. In general, water quality conditions within Eklutna Lake are suitable for the ADEC water use category (C) *Growth and Propagation of Fish, Shellfish, Other Aquatic Life, and Wildlife.* However, there are depth strata and times of the year in which optimal temperature, DO, and pH conditions are not met, most notably in the pond.

As summarized in Section 4.3, the low TSI values from 2021 and 2022 correspond to an oligotrophic classification indicating low primary productivity based on algal biomass. With low primary productivity (phytoplankton), there is likely to be limited secondary production (zooplankton) as well. In addition, nutrient sampling of total phosphorus was below detections limits and reveals that nutrients may be limited within the watershed. Historical nutrient sampling by the USGS from 1972-1973 also indicated low phosphorus concentrations within water conveyed from Eklutna Lake to the Project's tailrace (<0.01 mg/l to 0.01 mg/l) (USGS, 1973). These results, coupled with low levels of nitrogen (0.4-0.18 mg/l) detected in 1972-1973 show that low nutrient concentrations have remained a stable condition within Eklutna Lake over time.

The limited limnological investigations addressed in this study indicate an overall lake productivity that is lower than what would likely be required to maintain complex, abundant planktonic communities and populations (the primary food source for juvenile Sockeye/kokanee populations in nursery lakes). And while these data serve to compliment the results from the fisheries studies conducted in Eklutna Lake and its tributaries in 2021 and 2022, it's important to note that they do not establish a carrying capacity or population potential of anadromous fish for Eklutna Lake. However, these data do confirm USACE conclusions from 2011 that Eklutna Lake is a waterbody with low productivity. Finally, it should be noted that the low TSI values and oligotrophic classification for Eklutna Lake does confirm why the waterbody serves as an excellent drinking water resource.

Technical Memo Comment-Response Table

Comment #	Agency/Interested Party	Draft Eklutna Lake Water Quality and Trophic Status Summary Technical Memo Section (Page) *"Text"*	Comment	Response
Section 4.0 Results				
1	USFWS	Section 4 and Figures 4-3 and 4-4 (Pages 4-5). *"In addition, when Eklutna Lake and the pond were connected during the September 2021 and September 2022 sampling efforts, each basin retained its unique temperature profile."*	Pages 4 to 5: Section 4 and Figures 4-3 and 4-4, describe how water temperatures in the basins of the pond and lake remained unique even when they were connected in September of 2021 and 2022. There were questions during the TWG meeting about how much of the pond and lake are shallow. This is important because shallower areas allow more sunlight which can result in more phytoplankton and zooplankton. The TWG also questioned if a future scenario of more static lake levels may result in greater areas of vegetated shoreline. Please discuss how lake and pond depths may be impacting fish habitat and lake productivity.	The general bathymetry of Eklutna Lake indicates limited shallow areas as it is steep banked along near shore areas with a deep, off-shore basin up to a depth of 208 ft. Based on the depth of the thermistor string deployment and profile data, it is evident that the pond would be considered a shallow area (~6 ft -18 ft deep). However, the pond represents such a small area in comparison to Eklutna Lake that even if the shallow pond were more productive (which the 2021 and 2022 data *have not* validated), it's effect on the overall productivity of Eklutna would be limited. Finally, the impacts of the high turbity from Eklutna Glacier runoff similarly affects the photic zone of the shallow and deep areas of the lake by limiting light penetration.
2	USFWS	Section 4.3 Eklutna Lake Nutrients and Trophic Status (Page 10). *"Glacial runoff from the primary inflow tributaries create a turbid lake that greatly diminishes water clarity and confounds the Secchi depth results in relationship to the other parameters."*	Page 10: Section 4.3, stated, the glacier runoff from the primary tributaries is causing turbidity in the lake that limits sunlight penetration and primary productivity. The rate of glacier-melt and subsequent turbidity levels in the lake will likely change as the glacier recedes (Sass et al. 2017), and levels of suspended glacial sediment and primary productivity in the lake may also change. Furthermore, Alaska has several examples of productive glacier-fed lakes, including Kenai Lake and Skilak Lake, and sockeye salmon (Oncorhynchus nerka) are known to rear in oligotrophic lakes. We request comparisons of similar glacier fed lakes in Alaska. Sass, L., M. Loso, J. Geck, E. Thoms, and D. McGrath. 2017. Geometry, mass balance and thinning at Eklutna Glacier, Alaska: An altitude-mass-balance feedback with implications for water resources. Journal of Glaciology, 63(238), 343-354. 12 pp. doi:10.1017/jog.2016.146	Sass et al. (2017) primarily conclude that the diminishing Eklutna Glacier (i.e. glacial loss) is providing "...7 $\pm$ 1% of the average inflow to Eklutna Reservoir..." and that the percent of inflows from glacial loss will likely increase over time. There is no timeframe provided for the end of glacial-melt within the watershed, nor are there any conclusions regarding impacts to turbidity in the receiving waterbody, (Eklutna Reservor). A search for data summarizing liminological parameters that assess productivity in Kenai Lake, Skilak Lake, or other productive glacial fed lakes will be conducted and compared to the Eklutna Reservoir in the Year 2 Study Report.

Comment #	Agency/Interested Party	Draft Eklutna Lake Water Quality and Trophic Status Summary Technical Memo Section (Page) *"Text"*	Comment	Response
General Comments				
3	USFWS	General	During the TWG meeting there were discussions surrounding the Eklutna Lake system going decades without marine derived nutrients and if this could have contributed to the lack of nutrients in the lake. We recommend further analysis of how the lack of marine derived nutrients may be impacting productivity in the lake system.	We agree that Eklutna Lake has lacked marine derived nutirents since the 1929 diversion dam was constructed. Also, the literature is pretty clear on the impacts of marine derived nutrients in sockeye nursery lakes. As described by Stockner and MacIssac (1996) "...declining adult escapements have also resulted in a significant loss of nitrogen (N) and phosphorus (P) nutrients supplied by decomposing adult carcasses and the lakes have become less productive (oligotrophication) for rearing sockeye fry." However, we are not aware of a peer reviewed technique that can model, predict, or quantify how marine dervied nutrients would impact lake productivity. The Stockner and MacIssac (1996) study was based on 20+ years of studying Canada's Lake Enrichment Program, not a predictive model. The addition of liquid fertilizers did increase phytoplankton concentrations (primary production), but this did not always result in zooplankton increases (secondary production) of the primary species consumed by sockeye fry (*Dapnia spp.*). Daphnid zooplanton "...occupy a keystone position in the pelagic food-web and are thought to be one of the principal reasons why interior lakes produce larger smolts than coastal systems [in British Columbia]..." . Finally, it should be noted that "glacially turbid lakes with cold, poorly stratified epilimnia and strong light extinction from high concentrations of suspended glacial silt were rejected for nutrient enrichment." Stockner, J.G. and E.A. MacIsaac. 1996 British Columbia Lake Enrichment Programme: Two Decades of Habitat Enhancement for Sockeye Salmon, Regulated Rivers: Research and Management. Vol 12, 547-561.
4	USFWS	General	It appears productivity in Eklutna Lake has been impaired because of alterations to natural processes. The dam structure is preventing flushing flows from moving sediment through the system, and is preventing marine derived nutrients from getting into the system. The large variances in lake levels are inhibiting shallow habitat vegetated shorelines from producing nutrients. We would like to see more analysis on the impacts that the dam and fluctuating lake levels have had on the Eklutna Lake habitat and nutrients. The lake system could be compared to other functioning systems in Alaska such as Kenai Lake and Skilak Lake.	See answer above related to marine derived nutrients and productivity. Water level fluctuations are not likely to have much effect on pelagic productivity since the same photic zone would be present offshore as it is inshore, and plankton are not place-bound to the near shore environment. Furthermore, without lake level data for Kenai and Skilak Lake, a comparison to these waterbodies would be speculative.

Technical Memo Comment-Response Table

Comments on Preliminary Engineering for Fish Passage Presentation				
5	USFWS	General	During the potential engineering solutions portion of TWG meeting, we learned that natural river system fish passage measures were determined to be not feasible and were not considered further. However, we are interested in exploring what some natural channel options could look like, and what the costs and benefits of those options would be.	The owners have communicated that dam removal is not a PME measure being explored. However, multiple fish ladder alternatives are being investigated for upstream passage into Eklutna lake. The current gravity flow fish ladder alternative is shown as a weir and orifice style ladder, however other ladder types may be investigated as this alternative is advanced into more detailed design.
6	USFWS	Upstream Fish Passage Scenarios	For upstream fish passage some scenarios could include dam removal, a constructed natural bypass channel, and a hybrid scenario with a bypass channel supported by trap and haul during low lake levels. With these options elevated lake levels may no longer be possible, however pumped energy storage to uphill reservoirs could provide a means for storing water for Eklutna when energy is more abundant (Williams et al. 2020). Williams, K., C. Smith, and B. Higman. 2020. Pumped energy storage for Alaska: A path to lower energy costs for Alaska's future. Alaska Institute for Climate and Energy. 21 pp.	The intent of the engineering alternatives analysis is to mitigate impacts of the existing project, rather than development of a new project. While the implementation of a pumped storage scheme in the railbelt may be attractive at a point in the future to firm excess renewables, it is not something being looked into at this time as part of the Eklutna Project.
7	USFWS	Downstream Fish Passage Scenarioes	Downstream fish passage scenarios could include dam removal both with and without lake fluctuations, resulting in a more run of the river scenario for power generation. We are interested in other options to facilitate outmigration such as a multi-level intake structure with a conduit around the dam (Hansen et al. 2017), and use of induced turbulence or injection of dissolved oxygen to attract outmigrants to safe passage routes (Perry et al. 2005; Biomark 2022). Hansen, A., T. Kock, and G. Hansen. 2017. Synthesis of downstream fish passage information at projects owned by the U. S. Army Corps of Engineers in the Willamette River Basin, Oregon: U.S. Geological Survey Open File Report 2017-1101. 118 pp. https://doi.org/10.3133/ofr20171101. Perry, R., M. Farley, G. Hansen, J. Morse, and D. Rondorf. 2005. Turbulence investigation and reproduction for assisting downstream migrating juvenile salmonids, part ii of ii; effects of induced turbulence on behavior of juvenile salmon. 2001-2005 Final Report, Project No. 200101000. BPA Report DOE/BP-00007427-1. 61 pp.	Multiple downstream passage alternatives are being investigated, including a natural outflow at the dam. Secondary attraction measures (beyond attraction flow) such as induced turbulence or D.O. injection may be analyzed as part of the detailed design.
8	USFWS	Additional Discussions Request	We request focused meetings to discuss dam engineering options. We would like to see more options based on fish passage and biological factors such as seasonal migration, timing, and other fish and aquatic habitat needs.	We will be meeting with stakelholders to review the engineering alternatives in early 2023.

Technical Memo Comment-Response Table

Comment #	Agency/Interested Party	Draft Eklutna Lake Water Quality and Trophic Status Summary Technical Memo Section (Page) *"Text"*	Comment	Response
9	USFWS	Data Request	During the TWG meeting graphs were provided illustrating the 10-year average water surface elevation overlain with water surface elevation per measure proposed. We would like to provide more in-depth analysis based on the biological needs of fish; to do this we request the last few years of actual head/pond fluctuation be provided on a daily scale instead of the 10-year average.	Daily water surface elevation data for Eklutna Lake over the prior 3 years is located at the following link: https://nwis.waterdata.usgs.gov/usa/nwis/uv/?cb_00065=on&cb_72192=on&format=gif_default&site_no=15278000&legacy=1&period=1095&begin_date=2022-12-08&end_date=2022-12-15
10	NVE	General	Trap and haul should not be necessary even at low lake levels with appropriate new “plumbing” engineering at the Eklutna Lake outlet. The lake should be kept high enough to cover the profuse potential sockeye spawning habitat around the lake now in the varial zone.	Fish passage alternatives that do not involve trap and haul and keep the lake level high are being investigated and will be presented as part of the phase 1 engineering analysis.
11	NVE	General	Our analysis recommends a deeper channel through the natural moraine dam, likely with a new hoist gate dam there, which should allow seasonally adequate and continuous flow release, and fish passage like a fish ladder (or “… constructed natural bypass channel” (as per USFWS comments)) without needing trap and haul even at lower lake levels. Dam removal, as per FWS could be nice for the salmon, but probably not so advantageous for power operations. Trap and haul capacity might be retained as an emergency option for abnormally low water years. We are counting on your team to design such options for us.	A deeper channel option as well as a new hoist gate located at the dam are PME measures being investigated, to be presented as part of the phase 1 engineering results.

STATE OF ALASKA

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners: John M. Espindola, Chair
Robert M. Pickett
John C. Springsteen

In the Matter of the Petition Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee	U-24-024

MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S OPPOSITION TO THE OFFICE OF THE ATTORNEY GENERAL'S MOTION TO DISMISS AS MOOT

The Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP") opposes the Office of the Attorney General, Regulatory Affairs & Public Advocacy Section's ("RAPA's") Motion to Dismiss as Moot ("Motion"). RAPA argues that AHP's Request for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee ("Request for Acknowledgment") is now moot because the MOA only wanted voting rights restored for the limited purpose of participating in the 1991 Fish and Wildlife Agreement process up until the October 2, 2024 Governor's establishment of a Final Fish and Wildlife Program ("Final Program").[1] RAPA also argues that the Commission should dismiss AHP's Request for Acknowledgment as premature because the "surrender language" of Order U-18-102/U-19-020/U-19-021(39) ("Order 39")[2] requires a "minimum" surrender term of at least 35 years.

[1] Motion at 5.

RAPA's motion should be denied because RAPA is wrong that the MOA only wanted its voting rights restored because the MOA "wanted a vote on the Fish and Wildlife Program" prior to the Governor's issuance of a Final Program.[3] As stated by AHP in its filings in this docket, the MOA wants its voting rights on the Eklutna Operating Committee ("EOC") reinstated—period. Thus, AHP's Request for Acknowledgment is not moot because if AHP prevails it will be entitled to *exactly* the relief it requested: the Commission will acknowledge AHP's acquisition of the required expertise such that AHP will have voting rights on the EOC. Further, as explained in AHP's briefing on the language of Order 39, there is no "minimum" surrender term required to lapse before AHP may file a request for acknowledgment of acquisition of the expertise required to participate as a voting member of the EOC. AHP's Request for Acknowledgement is not premature.

DISCUSSION

I. RAPA's Motion misconstrues the reasons that the MOA filed its Request for Acknowledgment.

RAPA argues that the MOA filed its Request for Acknowledgment solely because the MOA "wanted a vote on the [Final] Fish and Wildlife Program," prior to its issuance by the Governor, which occurred on October 2, 2024.[4] RAPA concludes that the issuance of a Final Program negated the sole reason the MOA wanted to reinstate its voting rights and that AHP's Request for Acknowledgment is now moot.[5]

RAPA is incorrect. AHP did not file its Request for Acknowledgment for the limited purpose of participation in the Fish and Wildlife process leading up to the Governor's issuance of a Final Program. First, AHP's July 18, 2024, Request for Acknowledgment put no such temporal or topical limitations on the requested participation on the EOC.[6] Second, AHP's proposed timeline in its August 15, 2024, Request for Expedited Consideration contradicts RAPA's assertions that the Request for Acknowledgment was filed only for purposes of participation in the Fish and Wildlife process prior to the Governor's October 2, 2024 decision regarding a final program:

> AHP moves for expedited consideration of this matter so that AHP can begin to meaningfully participate on the EOC—in particular, with any planning and budgeting decisions that will commence *as a result of the Governor's establishment of a final Fish and Wildlife Program ("Final Program")*, pursuant to the August 8, 1991, "Fish and Wildlife Agreement Snettisham and Eklutna Projects" ("1991 Fish and Wildlife Agreement"), by October 2, 2024.[7]

In moving for expedited consideration, AHP expressly contemplated that it would participate on the EOC *after* the issuance of the Final Program.

Third, AHP argued that expedition was required because operation, maintenance, and budgeting decisions to implement the Final Program would begin shortly after the Governor's

[6] AHP's Request for Acknowledgment at 9 (stating "AHP requests that the Commission provide a written acknowledgment notifying AHP that AHP has acquired the expertise required to participate as a voting member of the EOC," and that [w]ith this acknowledgment, the October 27, 2020 Surrender of EOC voting rights by MOA, d/b/a ML&P, will automatically terminate, reinstating AHP as a voting member of the EOC").

[7] AHP Motion for Expedited Consideration at 3 (citing Corsentino Aff. ¶ 3; Exhibit 1, 1991 Fish and Wildlife Agreement (Section 7)) (emphasis added).

October 2, 2024, establishment of a Final Program,[8] and AHP will be responsible for a portion of the costs of such decisions.[9] While Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc. ("MEA") disagreed with AHP on the exact timing of decision-making to implement the Final Program, they did not disagree that the EOC would be making such decisions in the future as a result of the Governor's action.[10]

In its reply regarding its motion for expedited consideration, AHP again expressed its broad interest in participation on the EOC:

> [e]xpedited consideration is necessary to provide AHP with meaningful participation on the EOC generally. Participation this fall will provide AHP's representative, Mr. Corsentino, the ability to become familiarized with the 2025 budget and operational issues, including general operating and capital expenditure decisions. If Chugach and MEA are ultimately correct that no major decisions about the Final Program will occur in the fall of 2024, that does not necessarily negate the value of providing AHP meaningful participation in the management of a utility that it is 53.33% owner of sooner rather than later. The sooner Mr. Corsentino begins serving as a voting member on the EOC, the more time he will have to become well-versed in operational and budgeting issues generally. If no decisions on the Final Program occur this fall, this "ramp up" period will allow Mr. Corsentino to have a solid understanding of operations and budgeting before decisions on implementation of the Final Program occur. This will increase efficiency of the EOC when implementation does begin.[11]

Fourth, AHP's opening and reply briefs regarding the interpretation of Order 39 also address the MOA's reasons for filing a Request for Acknowledgment.[12] In its opening brief, AHP stated that a 35-plus year minimum term would be an "unreasonable and arbitrary restriction on the MOA's ability to participate in management of its ownership hydropower asset for decades, *despite continued MOA responsibility for costs and other liabilities*."[13] In its reply brief, AHP noted that:

> [t]he MOA continues to be responsible for 19.05% of Eklutna Project operations, maintenance, capital, and environmental compliance costs. The MOA has a duty under its Charter to manage its certificated utility in a manner that is "in accordance with the general standards common to utilities providing the same utility service,"[14] and has a duty to the citizens of Anchorage to responsibly manage its property assets.[15]

Finally, pages 2-5 of the Pre-filed Reply Testimony of Mark Corsentino, P.E., also addressed the MOA's interest in having the surrender of voting rights lifted, stating, in part, that like "any owner of any property, the MOA has a legitimate interest in exercising all of the rights of ownership."[16]

In summary, the MOA has *never* stated that it filed its Request for Acknowledgment with the intention of only exercising its voting rights for the limited purpose of

participating in the Fish and Wildlife process prior to Final Program issuance. The Alaska Supreme Court has held that "a case is moot if the party bringing the action would not be entitled to any relief even if it prevails."[17] If AHP's Request for Acknowledgment is granted, AHP will receive not just "any relief," but *exactly* the relief that it requested: an acknowledgment that it has acquired expertise required to participate—fully—as a voting member of the EOC.

II. RAPA relies on its incorrect analysis of the Order 39 surrender language to argue that AHP's Request for Acknowledgment is prematurely filed.

RAPA moves for the Commission to take "action" on the issue of the surrender term raised by ALJ Walker in the August 30, 2024 Prehearing Conference. RAPA argues that the Commission should, now that briefing on Order 39 is complete, dismiss the matter as prematurely filed because the Commission cannot reinstate voting rights until the terms of the power purchase agreements between Chugach and the MOA and MEA and the MOA have expired.

In response, in the interest of administrative economy, AHP will not repeat its arguments on the interpretation of the Order 39 surrender language here, but instead incorporates by reference its September 18, 2024 and October 29, 2024 briefs on the topic of interpretation of the surrender language. For the Commission's convenience, copies of those briefs are attached as Exhibit 1 and Exhibit 2. As AHP argued in its briefs, the "surrender" language of Order 39 does not require a decades-long minimum surrender term as RAPA proposes. Any such term would in fact be arbitrary and capricious. If the Commission panel in Docket U-18-102/U-19-020/U-19-021 ("Acquisition Docket") had intended to require a 35-plus year forfeiture of all of

the MOA's rights to participate in the management and operation of its certificated hydropower utility, it would have done so in unambiguous and unequivocal language, following additional process that would have been required as the issue of surrender was not addressed in the Acquisition Docket hearing.

CONCLUSION

For the reasons stated about and in the attached September 18, 2024 and October 29, 2024 briefs, the AG's Motion should be denied.

RESPECTFULLY SUBMITTED this 30th day of October, 2024, at Anchorage, Alaska.

EXHIBIT 1

MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S BRIEF REGARDING INTERPRETATION OF ORDER 39

STATE OF ALASKA

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners: Robert A. Doyle, Chair
John M. Espindola
Robert M. Pickett
John C. Springsteen

In the Matter of the Petition Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee	U-24-024

MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S BRIEF REGARDING INTERPRETATION OF ORDER 39

The Municipality of Anchorage ("MOA"), d/b/a Anchorage Hydropower ("AHP"), submits this brief regarding interpretation of language in Order U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39")[1] pertaining to the terms of the MOA's surrender of voting rights on the Eklutna Operating Committee ("EOC"). The EOC was formed to make all management decisions related to operation, maintenance, and budgeting for the Eklutna Hydroelectric Project ("Eklutna Project"), owned by the MOA (53.33% interest), Chugach Electric Association, Inc. ("Chugach") (30% interest), and Matanuska Electric Association ("MEA") (16.67% interest).[2]

As part of the approval of the MOA's sale of most of its electric utility assets to Chugach in dockets U-18-102/U-19-020/U-19-021 ("Acquisition dockets"), the Regulatory Commission of Alaska ("Commission") granted the MOA a new certificate of public convenience

[1] May 28, 2020.

[2] Order 39 at 61.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

and necessity ("CPCN") to authorize the MOA's provision of wholesale public electric utility service through its part ownership of the Eklutna Project's generation facility, subject to certain conditions. One condition the Commission placed on the new CPCN for the MOA was the surrender of the MOA's voting rights on the EOC, due to the Commission's concerns that after the merger and loss of its utility employees, the MOA would no longer be "managerially and technically fit" to hold a CPCN without such surrender.[3] With the surrender, the Eklutna Project would be "jointly manage[d] and operate[d]" by Chugach and MEA, "including negotiating compliance with the Fish and Wildlife Agreement."[4] The Commission stated that the surrender "must have a term at least equal to the term of the [Eklutna Power Purchase Agreement ("Eklutna PPA") with Chugach] and the [Matanuska Electric Association Power Purchase Agreement ("MEA PPA")], as those agreements may be extended, and cannot be lifted until such time as MHP[5] has shown to [the Commission's] satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC."[6]

In the pre-hearing conference on August 30, 2024, Administrative Law Judge ("ALJ") Walker requested briefing from the parties on the question of whether this language in Order 39 regarding the MOA's surrender of its voting rights on the EOC mandates that a "minimum term" of the surrender, equal to the (at least 35-year) terms of the PPAs, must elapse

[3] Order 39 at 67.

[4] *Id*.

[5] In Order 39, the Commission referred to the post-transaction electric utility owned by the MOA as Municipal Hydro Power ("MHP") and not AHP.

before the MOA is able to request acknowledgment that it has acquired the expertise required to fully participate as a voting member of the EOC.[7] It does not.

As documented in the Acquisition dockets and the MEA PPA approval docket (TA379-121), as well as in subsequent filings in this docket, the Commission, the owners of the Eklutna Project, and the Office of the Attorney General, Regulatory Affairs & Public Advocacy Section ("RAPA") all had a public, contemporaneous and continuing understanding that while Order 39 required the term of the surrender to be equal to the terms of the Eklutna and MEA PPAs, that term was subject to termination, and the surrender was subject to being "lifted" at any time after the MOA made a showing to the Commission's satisfaction that MHP had acquired the expertise required to fully participate as a voting member of the EOC. As discussed further below, to interpret the language otherwise would be contrary to the language of the PPAs, Order 39, and subsequent Commission approvals. It also would be anf unreasonable and arbitrary restriction on the MOA's ability to participate in management of its ownership hydropower asset for *decades*, despite continued MOA responsibility for costs and other liabilities.

I. PROCEDURAL HISTORY

A. In Order 39, the Commission's approval of the acquisition of MOA's electric utility assets by Chugach included conditional approvals of (1) a new CPCN for the MOA for the Eklutna Project and (2) approval of the power purchase agreements between the MOA and Chugach and the MOA and MEA.

In Order 39, the Commission approved, subject to conditions, the sale of most of the electric utility assets of the MOA, d/b/a Municipal Light and Power ("ML&P"), to Chugach (the "Transaction" or "Acquisition"). As part of that approval, the Commission accepted, in part,

[7] Order No. U-24-024(4) at 3 (September 12, 2024).

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS

a stipulation filed by less than all of the parties of record (subject to conditions).[8] It conditionally approved the Eklutna PPA and the MEA PPA. The Commission granted, subject to conditions, regulatory approvals filed by Chugach in Docket U-19-020, and denied the application to amend CPCN No. 8 filed by Chugach and CPCN No. 121 filed by ML&P.[9] The Commission instead transferred CPCN No. 121 to Chugach, subject to closure of the transaction and other conditions.[10]

As a result of the transfer of the MOA's CPCN No. 121 to Chugach, the Commission granted a new certificate to the MOA, "[s]ubject to transaction closure and other conditions."[11] One such condition was surrender of the MOA's EOC voting rights.[12] The new certificate would "authorize[] the provision of wholesale public electric utility service through part ownership of the Eklutna Hydroelectric Project ("Eklutna Project") generation facility" to Chugach and MEA.[13] The Commission described the Eklutna Project as follows:

> "The Eklutna Project was built and operated by the federal government pursuant to the Eklutna Power Act of 1950. In 1995, Congress authorized sale of the Eklutna Project to ML&P, Chugach, and MEA under the terms of the 1989 Eklutna Purchase Agreement. Under this agreement, the three utilities received an undivided interest in all of the Eklutna Project, water rights, generation plant and the transmission assets interconnecting the Eklutna Project with ML&P, Chugach, and MEA.171 ML&P obtained a 53.33% ownership interest, Chugach obtained a 30% ownership interest, and MEA obtained a 16.67% interest in the Eklutna Project. Eklutna Project energy, capacity, and costs are to be allocated based on these ownership interests."[14]

ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

The Eklutna Project was managed, for over 60 years, as follows:

> "The three utilities created the Eklutna Operating Committee (EOC) to make all management decisions related to operation, maintenance, and budgeting for the Eklutna Project. ML&P, Chugach, and MEA each have a representative on the EOC. Decisions by the EOC are made based upon a double majority consisting of affirmative votes by at least two of the three utilities whose ownership shares total at least 51% of the Eklutna Project ownership. Effectively, management of the Eklutna Project is limited to actions approved by ML&P and at least one of Chugach or MEA."[15]

In Order 39, the Commission examined whether the services to be authorized (sale by the MOA of power to Chugach and MEA pursuant to the PPAs), were "required for the convenience and necessity of the public."[16] Further, the Commission examined whether the MOA was "fit, willing, and able to provide the utility services applied for."[17]

The Commission found that MHP was financially fit "to own an interest in the Eklutna Project, subject to the condition that MHP maintain a $3,000,000 reserve fund to support the Eklutna Project capital expenditures it is obligated to make under the MEA PPA."[18] The Commission then discussed ML&P's proposal that after the acquisition, MHP would be managed by the Municipal Manager, a position that was at that time held by William D. Falsey, an attorney and the municipal manager for approximately three years at the time of Order 39's issuance.[19] It also discussed testimony from Chugach witness Dustin Highers, stating that based on his

experience as EOC chair, "that to be an owner representative on the EOC, it was essential that the representative have knowledge of prudent utility practice and the Railbelt electric generation and transmission system."[20] The Commission reviewed Mr. Falsey's resume, and determined that nothing in his resume indicated that he had knowledge of the Railbelt generation and transmission system, or prudent utility practice, which the Commission noted "is the management standard specified for the MHP EOC representative in both the Eklutna PPA and the MEA PPA."[21]

While ML&P proposed it likely would utilize consultant services to provide industry-specific expertise and staffing "to help us make informed decisions as a continuing member of the [EOC]," the Commission determined it could not "unconditionally" find that MHP was managerially or technically fit to maintain majority ownership of the Eklutna Project.[22] The Commission instead conditioned issuance of a CPCN to MHP on the MOA's surrendering its vote on the EOC, before the effective date of either the Eklutna PPA or the MEA PPA.[23] As a result of that surrender, Chugach and MEA would jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement.[24] The Commission stated that the surrender "must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member

of the EOC."[25] The surrender requirement was also a condition for the approval of the PPAs, as in approving the Eklutna and MEA PPA's, the Commission noted that "we can approve neither of these Eklutna Project agreements unless we can first find that MHP is fit, willing, and able to serve as an owner of the Eklutna Project. Therefore, a condition to our approval of these Eklutna Project agreements is that MHP obtain a certificate under the conditions established above."[26]

The Commission approved the Eklutna PPA in Order 39, determining it was not a wholesale power contract "subject to the requirements and protections of AS 42.05.431(b)," but required the MOA to separately file for approval of the MEA PPA because it was a wholesale power contract.[27] The Acquisition transaction closed on October 30, 2020.[28] On October 30, 2020, the MOA filed notice of its surrender of EOC voting rights with the Commission.[29] The MOA also submitted Tariff Advice Letter 379-121 on September 30, 2020, requesting approval of the MEA PPA and Amendment No. 1 to the MEA PPA. On November 20, 2020, the Commission

approved the MEA PPA and Amendment No. 1 to the MEA PPA.[30] On April 9, 2021, the Commission issued CPCN No. 780 for the MOA, d/b/a AHP.[31]

B. AHP filed a request for acknowledgment of AHP's acquisition of expertise required to participate as a voting member of the EOC, and the Commission requested briefing regarding the "minimum term" of the EOC voting rights surrender.

On July 18, 2024, AHP filed a Notice and Request for Acknowledgment of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee ("Request for Acknowledgment"). The Commission opened this docket, and during the August 30, 2024, prehearing conference in this matter regarding the Request for Acknowledgment, as well as in a subsequent order, ALJ Walker referred to the language in Order 39 regarding the terms of the MOA's surrender of its vote on the Eklutna Operating Committee, emphasizing the bolded language below:

> "Under these circumstances, we cannot unconditionally find that MHP is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions. **This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended**, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC."[32]

[30] TA379-121, Letter Order L2000410, dated November 20, 2020.

[31] April 9, 2021, Letter to Anna C. Henderson, MOA d/b/a Anchorage Hydropower, with attached certificate.

[32] *Id.* at 67 (emphasis added); *see also* Order No. U-24-024(4).

ALJ Walker "announced [the Commission's] desire for briefing on the minimum term of the Eklutna Operating Committee voting rights surrender required by Order U-18-102(44)."[33] In other words, ALJ Walker asked whether the language in Order 39 provided that the surrender of the MOA's voting rights could only be lifted based on a showing that (1) the MOA acquired the expertise required to participate as a EOC voting member (2) that was made *after* the "minimum term" of the surrender, a term that would be "at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended."[34] Under this understanding, the MOA would *never* have voting rights on the EOC until the terms of both PPAs had elapsed, and both contracts ended—which could be thirty years, or more, from today.

As explained below, the correct reading of the language in question is the understanding that has been held by the Commission, the Eklutna Project owners, and RAPA: that while the surrender may have a minimum term, this surrender may be lifted (and the minimum term terminated) at the time that the MOA "complies with the RCA requirements pertaining to qualifications for [MOA's] representation on the EOC."[35]

II. DISCUSSION

A. If the Commission intended in Order 39 that the MOA would never have voting rights reinstituted during the term of the PPAs, it would have explicitly disapproved the terms in the Eklutna and MEA PPAs regarding MOA representation on the EOC, as it removed other inapplicable or disapproved terms from the PPAs and other Acquisition-related agreements.

If the Commission intended to prohibit the MOA from reinstituting EOC voting rights for the duration of the PPAs, it would have explicitly disapproved the terms in both PPAs regarding MOA representation on the EOC. Instead, Order 39 itself, as well as the subsequent approval of the MEA PPA in a separate proceeding, explicitly referenced to, and ultimately approved, the terms in both the Eklutna and MEA PPAs regarding the requirements for an MOA representative on the EOC. These relevant terms are as follows (bold emphasis added):

Eklutna PPA, Section 4.2(B) (Operation of the Facility):

> "(B) **During the Term**, Seller shall, in consultation with Purchaser, select the person to serve as Seller's representative to the Operating Committee (the "Seller's Representative"). The Seller's Representative shall make all decisions on the Operating Committee consistent with Prudent Utility Practice and the rights and obligations of the Parties under this PPA. Seller's Representative shall also be Seller's representative for any consultation, study, and implementation processes required under the Fish and Wildlife Agreement relating to the Facility. The Seller's Representative shall make all decisions with respect to any processes required under the Fish and Wildlife Agreement with due regard for the rights and obligations of the Parties under this PPA.[36]"

MEA PPA Section 4.2 (Operation of the Facility):

> "(A) **During the Term** Seller shall, at its cost and expense, manage, control, operate, and maintain the MEA Portion in accordance with the Operations Agreement and in a manner consistent with Prudent Utility Practice. Without limiting the foregoing, during the Term, as between Seller and Purchaser. Seller shall be responsible for all capital costs, all operations and maintenance expenses, and all costs and expenses for environmental compliance and compliance with Applicable Laws relating to the MEA Portion.
>
> (B) **During the Term**. Seller shall, after giving Purchaser a reasonable opportunity to consult with Seller. but without in any way limiting Seller's discretion as a result of any such consultation, select the person to serve as Seller's representative to the Operating Committee (the "Seller's Representative"). The Seller's Representative shall make all decisions on the Operating Committee consistent with Prudent Utility Practice and the rights and obligations of the Parties

[36] Eklutna PPA.

> under this PPA and the rights and obligations of the parties under the Chugach Power Purchase Agreement. The Seller's Representative shall also be Seller's representative for any consultation, study. and implementation processes required under the Fish and Wildlife Agreement relating to the Facility. The Seller's Representative shall make all decisions with respect to any processes required under the Fish and Wildlife Agreement with due regard for the rights and obligations of the Parties under this PPA."[37]

In Order 39, the Commission "approv[ed] the Eklutna PPA as amended by Amendment No. 2, Amendment No. 3, and the Original Stipulation."[38] It did *not* approve Amendment 1 (stating that the Eklutna PPA was a wholesale power agreement subject to AS 42.05.431(b)).[39] Thus, Section 4.2(B) of the Eklutna PPA was approved. Similarly, in Letter Order #L2000410,[40] the Commission approved, in its entirety, the MEA PPA (with Amendment 1). Thus, Sections 4.2(A) and (B) of the MEA PPA were approved by the Commission.

If the Commission intended to prohibit a voting MOA representative on the EOC for the entire duration of both the Eklutna and MEA PPAs, the above contract terms would have been rendered superfluous and potentially misleading, and the Commission would have either explicitly disapproved these terms, or conditioned approval on the removal of those terms. Elsewhere in the Acquisition docket, the Commission clearly excluded or disapproved terms in other agreements where applicable. For instance, the Commission explicitly disapproved Amendment 1 to the Eklutna PPA (stating that the Eklutna PPA was a wholesale power agreement

[37] MEA PPA.

under AS 42.05.431(b)).[41] Similarly, the Commission approved the Payment in Lieu of Taxes Agreement ("PILT") between the MOA and Chugach, as revised, subject to explicit conditions including, "that Sections 2.02 and 2.12 are not part of the approved agreement."[42] The Commission also rejected most of the Amended and Restated BRU Fuel Agreement between the MOA and Chugach, but explicitly provided for adherence to certain provisions of the agreement, such as the valuation of natural gas for economy energy sales or natural gas sales to other parties (Section 2.05).[43] In contrast, the Commission stated that the Eklutna PPA was approved subject to "the condition that it is not a power purchase agreement under AS 42.05.431(b) and the other conditions set out in the body of this order," but did not disapprove Section 4.2 (MOA EOC representative) from the approval.[44]

Nor could it be said that the failure to disapprove these terms was merely a Commission oversight in Order 39, as the Commission explicitly discussed and cited to the Section 4.2 terms as an integral part of its decision to require the surrender of voting rights. The Commission explicitly referenced the MOA EOC Committee Member requirements in the PPAs in its discussion as a reason requiring surrender, stating that the "standard specified for the MHP EOC representative in both the Eklutna PPA and the MEA PPA" was "prudent utility practice."[45] If the Commission intended to *never* allow AHP to serve on the EOC for the duration of the PPAs,

there would be no reason to include the term regarding the AHP EOC voting member requirements in the finalized Eklutna and MEA PPAs, especially after such an explicit discussion of the PPA requirements for the MOA representative.

It is a principle of both contract law and statutory interpretation that contracts and statutes should not be interpreted in a manner that renders language superfluous.[46] To the extent there is any ambiguity in the language of a past Commission Order, the Commission should apply the same rules of interpretation here. Interpreting Order 39 as prohibiting reinstatement of the MOA's voting rights on the EOC for the duration of the Eklutna and MEA PPAs would render sections 4.2 of both PPAs superfluous in a manner contrary such principles of interpretation. A better reading in compliance with principles of interpretation would be that Sections 4.2 were not disapproved because it was understood that voting rights could be reinstated during the terms of the PPAs.

The general meaning of the term "lifted" as used in the legal context also affirms the understanding that the term, as used in Order 39 (the surrender "cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC"), was intended to indicate that the otherwise

[46] *See, e.g., Titus v. Dep't of Corr.*, 496 P.3d 412, 416 (Alaska 2021) (stating "[w]e generally give effect to all of a statute's "provisions, so that no part will be inoperative or superfluous, void or insignificant"); *Maine Cmty. Health Options v. United States,* 590 U.S. 296, 314, 140 S. Ct. 1308, 1323, 206 L. Ed. 2d 764 (2020) (stating that "[t]he Court likewise hesitates to adopt an interpretation of a congressional enactment which renders superfluous another portion of that same law"); *Jarvis v. Ensminger*, 134 P.3d 353, 360 (Alaska 2006) (stating that "in reaching a reasonable interpretation of a contract, we attempt to give effect to all of its terms," and that appellant's interpretation in that matter would render a timing provision of the contract "superfluous") (internal quotations and citations omitted).

"minimum term" of the surrender could be cut short by a showing that the MOA had acquired the relevant expertise. The word "lifted" is often applied to stays or injunctions, relief which is typically contingent on an additional (usually final) determination being made by a court in a matter. Sometimes however, a stay can be "lifted" before that "minimum term" expires, on application of a party and by order of the court.[47] Similarly, here, to give effect to the term "lifted" in its typical understanding in the legal or general context, the term would mean that it would otherwise terminate or cut short the "minimum term" of the surrender, not be one of *two* requirements in order for reinstatement of voting rights to occur.

B. Filings subsequent to Order 39 in the Acquisition docket and the MEA PPA approval docket show that the consistent and public understanding of the Commission, the Eklutna Project owners, and the public has been that the minimum term of the MOA surrender could be lifted by a showing that the MOA had acquired the expertise required to participate as a voting member of the EOC.

Since Order 39 was issued, subsequent filings in the Acquisition docket and the MEA PPA approval process manifest a consistent and public understanding by the Commission and the Eklutna Project Owners that the "term" of the MOA's surrender was subject to being lifted by a showing to the Commission that the MOA had acquired the relevant expertise to participate as a voting member of the EOC again.[48]

1. The Commission explicitly questioned the MOA regarding language in the PPA about the MOA's EOC representative in Section 4.2 of the

MEA PPA decided to approve the MEA PPA in its entirety with no modifications after the MOA explained that the language in Section 4.2 could become relevant if and when the MOA voting rights were reinstated during the term of the PPA.

Pursuant to the requirements of Order 39, on September 30, 2020, the MOA, d/b/a ML&P, filed TA379-121, seeking approval of the MEA PPA (with Amendment 1).[49] The version of the MEA PPA submitted for approval included Section 4.2 (Operation of the Facility), which was ultimately approved, contained the language regarding the MOA's EOC voting representative.[50] The question of whether that language referencing the EOC conflicted with the surrender requirements of Order 39 was *explicitly* addressed through a Staff question and response during the MEA PPA approval process. On October 22, 2020, staff Engineering Analyst James Layne emailed counsel for ML&P the following query:

> "I believe there is an inconsistency between the MEA Eklutna PPA and the final order (U-18- 102(44)/U-19-020(39)/U-19-021(39)) (U-18-102(44).
>
> At page 67 of U-18-102(44) the Commission required MOA/ML&P to surrender its vote on the EOC so Chugach and MEA could manage the Eklutna Hydro project.
>
> The MEA Eklutna PPA, at page 8 of Exhibit A, Section 4.2(B) appears to allow MOA/ML&P to keep its vote on the EOC.
>
> Does MOA/ML&P believe the language between the final order and the MEA Eklutna PPA as summarized above are in conflict? Please explain your response and provide a remedy if appropriate."[51]

MOA's counsel responded:

> "The MOA/ML&P do not believe that the MEA Eklutna PPA is inconsistent Order No. U-18- 102(44)/U-19-020(39)/U-19-021(39) ("Order 39"). The part of Order 39 that you cite states:

[49] Tariff Advice Filing 379-121.

> 'We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the [Chugach] Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions.' Order 39 at 67.
>
> To comply with the Order, ML&P will surrender its vote on the EOC prior to the closing of the ML&P sale to Chugach, which will be before the effective date of the Chugach Eklutna PPA and of the MEA Eklutna PPA. ML&P will promptly file a notice of that surrender with the RCA.
>
> **The surrender will have a term at least equal to the term of the two PPAs, subject to termination of the surrender upon MHP showing to the RCA's satisfaction "that MHP has acquired the expertise required to fully participate as a voting member of the EOC."** Order 39 at 67. If and when MHP has a proposed EOC representative that satisfies the qualifications, MHP will file that information and request that the RCA make the necessary finding for termination of the EOC vote surrender.
>
> Like Section 4.2(B) of the Chugach Eklutna PPA, Section 4.2(B) of the MEA Eklutna PPA requires MHP, in consultation with the Purchaser, to select MHP's representative on the EOC. As a result of Order 39, MHP won't have any voting representative on the EOC **until the surrender is terminated upon a positive finding by the RCA that MHP's proposed representative is qualified. Thus, Section 4.2(B) of neither PPAs need to be amended. In addition, Section 4.2(B) should remain as written as it will be relevant if and when MHP's voting rights surrender is terminated in the future upon the necessary finding of the RCA**."[52]

This response was placed in the publicly available file on the Commission website as a supplemental tariff filing.

2. Additional filings in TA379-12 and the Acquisition docket confirmed the universal understanding that a showing of acquisition of expertise could terminate the surrender of voting rights.

[52] *Id.* (emphasis added).

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS

ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

Additional filings in the TA379-12 docket confirm the understanding articulated by counsel for ML&P—that the term of the surrender was "subject to termination" upon a showing that the MOA had acquired the relevant expertise to regain voting rights—was also held, unquestioned, by Chugach and MEA. On October 30, 2020, the MOA filed a notice of ML&P's Surrender of Eklutna Operating Committee Voting Rights simultaneously in dockets U-18-102/U-19-020/U-19-021 and in docket TA379-121 (MEA PPA approval). The notice stated that it was filed in compliance with Order 39's requirements and included a copy of the Surrender.[53] The Surrender, signed by ML&P, Chugach, and MEA, stated:

> "In accordance with the requirements of order U-18-102(44), the Municipality of Anchorage, dba Municipal Light & Power(ML&P), hereby surrenders its voting rights as an EOC member and under the Fish and Wildlife Agreement effective as of the Closing of the Asset Purchase Agreement between ML&P and Chugach Electric Association (Chugach). **This surrender of voting rights shall remain in effect until ML&P's successor complies with the RCA requirements pertaining to qualifications for ML&P's representation on the EOC.**
>
> **Until ML&P's successor complies with the qualification terms of RCA order U-18-102(44),** all EOC decisions will be by unanimous vote of Chugach and Matanuska Electric Association, Inc. (MEA). Eklutna hydro operations, dispatch and maintenance will continue to follow past practices and policies unless changes are approved through the EOC process."[54]

Like the response to staff's question, the Surrender's language makes clear that the MOA's voting rights could be restored by compliance with *one* requirement—that AHP shows to the Commission's satisfaction that it complies with the qualification requirements of Order 39. This

[53] Exhibit 2, October 27, 2020, Surrender of Eklutna Operating Committee (EOC) Voting Rights.
[54] *Id.* (emphasis added).

LAW OFFICES OF

showing of meeting the qualification requirements would terminate and cut short any "minimum term" that otherwise applied to the surrender.

3. The Commission's approval of the MEA PPA with no modifications or discussion of the issue whether Section 4.2 should be removed shows that it also understood that the "minimum term" of the surrender was subject to being lifted if qualifications conditions were met.

The Commission's approval of the MEA PPA, with no modifications to exclude the language in Section 4.2, after the documented staff discussion with ML&P counsel and the filing of the MOA's surrender, shows that the Commission also understood that the surrender could be lifted before the expiration of the "minimum term" by a showing that the MOA had acquired the required expertise to be a voting member of the EOC. On November 20, 2020, the Commission issued Letter Order #L2000410, approving, in its entirety, the MEA PPA (with Amendment 1), with no attempt to exclude Section 4.2 or to refute the understanding articulated in the filings (including the Surrender document itself) that the "minimum term" of the surrender was subject to being "lifted" or "terminated" by a showing of meeting the expertise requirements. The filings and decision in the MEA PPA approval docket make unequivocally clear that the reinstatement of the MOA's voting member of the EOC could be lifted (before the expiration of the PPAs) if the MOA meets the Commission's requirements regarding the expertise required to fully participate as a voting member of the EOC.

It would be difficult to argue that the Commission committed an oversight by not disapproving Section 4.2 in the MEA PPA, after explicitly inquiring about the language of Section 4.2 considering Order 39, and receiving a response from ML&P, and later after reviewing the language of the Surrender document signed by all three Eklutna Project owners. It was clear and

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS

ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

explicit during the approval process of the MEA PPA that Section 4.2(B) properly remained in both the MEA PPA and the Eklutna PPA, because the surrender term could be terminated by a showing that AHP had acquired the expertise required to fully participate as a voting member of the EOC.

C. The Eklutna owners and the public have continued to understand that the MOA's surrender rights was subject to the MOA, d/b/a AHP, showing that it had acquired the expertise required to reinstate voting rights.

It is clear from the comments and filings in this matter that, until the pre-hearing conference of August 30, 2024, the (immediate) reinstatement upon proof of expertise was the universal, contemporaneous, continuous, and public understanding. One need look no further than the filings in this docket to see that the public understanding of the MOA, Chugach, MEA, and the RAPA has been that if the MOA could show to the Commission's satisfaction that it had acquired the necessary expertise, its surrender of EOC voting rights would be (immediately) terminated. AHP makes that understanding clear in its Request for Acknowledgment.[55] This understanding was also articulated in public Anchorage Assembly Meetings.[56] While Chugach and MEA raised several issues with AHP's Request for Acknowledgement in public comments, their comments manifest their understanding that AHP did not need to wait for the terms of the PPAs to expire in order to reinstate its voting rights.[57] RAPA's Response to AHP's Motion for Expedited

[55] Request for Acknowledgment at 2-3.

Consideration similarly manifests an understanding that "[t]he only issue in this docket is a straightforward one—whether AHP 'has shown to [the Commission's] satisfaction that [it] has acquired the expertise required to fully participate as a voting member of the EOC."[58] All of these positions were articulated in filings available to the public and through a public comment period.

D. An unbreakable minimum surrender term requirement the MOA's surrender of voting rights, which could not be lifted by later Commission approval of qualifications for participation on the EOC, would have been an unprecedented and superfluous method of addressing the Commission's substantive concerns, and an unreasonable restriction under AS 42.05.241.

If Order 39 had required the MOA to surrender voting rights on the EOC irrevocably for 35-plus years—in other words, surrender for decades the only way to have a say in the management of a utility for which it still maintains cost and other legal liability—such a decision would be (1) unnecessary to address the Commission's concerns in light of the requirement to show the Commission it had obtained the necessary expertise to reinstate voting rights and (2) an unreasonable use (and abuse) of the Commission's authority under AS 42.05.241 (conditions of certificate issuance).

The Commission's concerns articulated in Order 39 were substantive, but also discrete. The Commission was concerned that the post-transaction MOA utility would no longer have the in-house expertise required for a representative to participate as a voting member of the EOC, specifically that the proposed representative, the current municipal manager, did not have

Participate as a Voting Member of the Eklutna Operating Committee; Initial Comments of Chugach Electric Association, Inc. and Matanuska Electric Association, Inc.," dated August 26, 2024.

such expertise.[59] The Commission's requirement of a minimum term was reasonable in order to let the parties know how long the surrender would last if undisturbed by further action on the part of the MOA. The Commission's placement of a condition that the MOA make a showing it has acquired the expertise in order to lift the surrender was intended to ensure that the MOA was "managerially or technically fit" when it did resume a position on the EOC. To also require the surrender to last for at *least* 35 years (the terms of the PPAs) would be arbitrary and provides no additional protection that the MOA will be "managerially and technically fit." There is no reason the MOA must wait 35 years to present a suitable EOC representative to the Commission.

Such a condition would provide the Eklutna Project owners and the public no benefit. It limits the number of voices on the EOC, reducing potentially helpful input. It arbitrarily diminishes, for an extended period, the MOA's ability to manage its own property. It would be an excessive and arbitrary application of the Commission's authority to place conditions on certificates under AS 42.05.241. Indeed, it would be an unfair surprise for the MOA to have surrendered its vote voluntarily, and chosen not to appeal Order 39, based on the contemporaneous understanding of all involved that it would be able to recover its vote once it acquired the necessary expertise, only to be informed years later that the surrender was essentially irredeemable for a generation.

[59] Order 39 at 66 (noting that "ML&P proposes that MHP will have a seat on the EOC, even though it will have no employees" and that there was nothing in the current Municipal Manager's resume indicating "that he has any knowledge of the Railbelt generation and transmission system, or prudent utility practice which is the management specific standard specified for the MHP EOC representative in both the Eklutna PPA and the MEA PPA").

The present situation exhibits why a 35-year ban on MOA EOC participation would be unnecessary and unhelpful. With a 35-year ban, although the MOA *has* acquired the relevant expertise in the form of an AHP utility director, currently Mr. Mark Corsentino, P.E., it would need to wait—for no discernable reason—for another 35-plus years to be able to obtain approval to reinstate its voting rights. Such a requirement to wait is excessive, because, as here, the AHP Director, starting with the recently appointment Mr. Corsentino, will not simply be a municipal manager tasked with attending EOC meetings, but will be a utility professional well qualified to participate in such meetings.

If, in the future, the Commission does have concerns about an AHP utility director, or who the AHP EOC representative may be, the Commission, as well as Chugach and MEA, have tools to address these concerns if and when they arise. Remedies exist within the terms of both PPAs.[60] The Commission *always* has authority under AS 42.05.261, upon "complaint or upon its own motion," to amend a certificate after notice and opportunity for hearing, where good cause exists. Any future concerns can be addressed at that time through such avenues, as such concerns would be for any other utility.

III. CONCLUSION

For the reasons explained above, any "minimum term" on the MOA's surrender is subject to the MOA's showing to the Commission that it has acquired the required expertise to participate as a voting member of the EOC.

[60] *See, e.g.*, Article 10 of the Eklutna PPA; Article 12 of MEA PPA.

1996 EKLUTNA HYDROELECTRIC PROJECT

TRANSITION PLAN

by and among

THE UNITED STATES OF AMERICA d/b/a ALASKA POWER ADMINISTRATION, a unit of the DEPARTMENT OF ENERGY; THE MUNICIPALITY OF ANCHORAGE d/b/a MUNICIPAL LIGHT & POWER; CHUGACH ELECTRIC ASSOCIATION, INC.; and MATANUSKA ELECTRIC ASSOCIATION, INC.

1996 EKLUTNA HYDROELECTRIC PROJECT

TRANSITION PLAN

by and among

THE UNITED STATES OF AMERICA d/b/a ALASKA POWER ADMINISTRATION, a unit of the DEPARTMENT OF ENERGY; THE MUNICIPALITY OF ANCHORAGE d/b/a MUNICIPAL LIGHT & POWER; CHUGACH ELECTRIC ASSOCIATION, INC.; and MATANUSKA ELECTRIC ASSOCIATION, INC.

This plan comprises:

- Transition Plan, consisting of 13 Sections contained on 10 pages;
- Exhibit A, consisting of 33 pages;
- Exhibit B, consisting of 5 pages;
- Exhibit C, consisting of 12 pages;
- Exhibit D, consisting of 25 pages;
- Exhibit E, consisting of 9 pages; and

THIS PLAN ("PLAN") dated as of May 28, 1996, is adopted by and among, namely, The United States of America d/b/a Alaska Power Administration (APA) a unit of the Department of Energy (DOE); The Municipality of Anchorage (ML&P); the Chugach Electric Association, Inc.(CEA); and the Matanuska Electric Association, Inc. (MEA). Unless specifically referred to herein, the above are hereinafter designated the "Parties."

RECITALS:

WHEREAS, by the Alaska Power Administration Asset Sale and Termination Act, APA is authorized to sell to the undersigned Utilities (hereinafter the "Eklutna Purchasers"), physical assets, property interests, and all other interests the DOE may have in the Eklutna Hydroelectric Generation Plant, tunnels, transmission lines, rights-of-way, equipment, rolling stock, and other rights in contract (hereinafter the "Eklutna Project") as set forth in the Eklutna Purchase Agreement, dated August 2, 1989, attached hereto and incorporated below by reference as

Exhibit A (hereinafter referred to as the Purchase Agreement) together with all amendments thereto; and

WHEREAS, the Eklutna Purchasers are required prior to May 28, 1996, pursuant to the Purchase Agreement to jointly develop and adopt specific transition plans setting forth the arrangements and a timetable for completing the sale and transfer; and

WHEREAS, the Eklutna Purchasers have signed a Memorandum of Understanding dated July 25, 1989, attached hereto as Exhibit B, in which they mutually declare their respective proportionate shares of the Eklutna Project's capacity, energy, and undivided interest in Eklutna assets to be 16/30 to ML&P (53.33%); 9/30 to CEA (30%); and 5/30 to MEA (16.67%), and further declare that the Eklutna Project operating costs will be borne in these same proportions; and

WHEREAS, the Eklutna Purchasers, subject to the rights of the Parties to amend the terms of the Purchase Agreement subsequent to adoption of this Plan, desire to formalize transition plans and arrangements by the terms of this Plan; and

WHEREAS, the Parties intend that this Plan shall foster an efficient, orderly, and expeditious transfer of the Eklutna Project and its operation to the Eklutna Purchasers, and further intend that the transfer be accomplished with minimum costs and minimum adverse impacts to APA employees.

NOW THEREFORE, IN CONSIDERATION of the mutual covenants set forth herein, the Parties agree as follows:

SECTION 1. PARTIES

Parties to This Plan: The Parties to this Plan are the United States of America d/b/a Alaska Power Administration (APA) a unit of the Department of Energy (DOE), and the Eklutna Purchasers: The Municipality of Anchorage d/b/a Municipal Light & Power (ML&P), purchaser of 16/30ths of the Eklutna Project (53.33%); the Chugach Electric Association, Inc. (CEA), purchaser of 9/30ths of the Eklutna Project (30%); and the Matanuska Electric Association (MEA), purchaser of 5/30ths of the Eklutna Project (16.67%). The Eklutna Purchasers shall, after the Transaction Date, own an undivided interest in the Eklutna Project assets identified in Section 4 of the Purchase Agreement that are the subject of this Plan, and will exercise the rights and bear the responsibilities of such ownership in proportion to their respective shares.

SECTION 2. TERM OF PLAN

(a) **Effective Date.** This Plan shall become effective upon execution by all of the Parties ("Effective Date").

(b) Expiration Date. Unless earlier terminated pursuant to other provisions of this Plan, this Plan shall expire upon completion of the tasks herein defined or as otherwise mutually agreed upon by all of the Parties.

SECTION 3. SELECTION OF A TRANSACTION DATE

The date upon which ownership of the Eklutna Project transfers to the Eklutna Purchasers is the "Transaction Date" and shall be within 30 days of the completion of all items listed in Exhibit C and section 10 of this Plan to the satisfaction of all Parties or as late as November 28, 1997, or later if mutually agreed upon.

SECTION 4. SCHEDULE FOR PAYMENTS TO THE UNITED STATES TREASURY

(a) Section 5(a) of the Purchase Agreement specifies the selling price of the Eklutna Project as the discounted present value of the remaining payment stream (as described in the 1987 repayment study) plus $1,000,000.00. The present value using the 9% discount rate will be determined by APA using the methodology of Section 5 of the Purchase Agreement and the remaining payments described in Exhibit B of Amendment No. 3 to the Purchase Agreement dated June 22, 1995. The price estimated in the Purchase Agreement assumes adjustments for a Transaction Date that is other than the beginning of a federal fiscal year. If the established Transaction Date is a date other than the start of the federal fiscal year, the selling price will be established and payments scheduled in accordance with the Purchase Agreement.

The payment to the U.S. Treasury will be fully paid within five years of the Transaction Date. The portion paid to the U.S. Treasury following the Transaction Date will carry interest of 9% per annum.

(b) The Eklutna Purchasers intend to make payments to the U.S. Treasury or deposits in an escrow account with certified funds (by check or wire transfer) on the Transaction Date. If any Eklutna Purchaser should otherwise choose to make payments within the allowable five year window, such election must be announced prior to the Transaction Date. A schedule will then be developed and any and all interest charges associated with the established schedule will be borne by the Eklutna Purchaser (or Purchasers) that so elect to make payments.

An interest bearing escrow account may be established in which the Eklutna Purchasers may deposit payment amounts. Funds will be held in this escrow account to cover completion of outstanding land, property, or other issues identified on the Transaction Date. Funds will be released to the U.S. Treasury as mutually agreed to by the Parties. Interest on funds held in this escrow account shall be credited toward the 9% per annum interest to be paid by the

Eklutna Purchasers to the U.S. Treasury on the portion paid following the Transaction Date, from the Transaction Date until the date the payments are actually made to the U.S. Treasury.

SECTION 5. ARRANGEMENTS AND TIMETABLE FOR TRANSFER OF OPERATIONS, MAINTENANCE , POWER MARKETING, AND ADMINISTRATION OF THE EKLUTNA PROJECT

EVENT	TIMETABLE
APA and the Eklutna Purchasers set mutually agreeable functional transfer date of October 1, 1996 ("Transition Date").	Complete
Eklutna Purchasers provide APA with proposed organization and staffing requirements related to employees currently at the Eklutna Project.	May 28, 1996
Eklutna Purchasers representatives meet with the Eklutna Project personnel to discuss detailed transition staffing plans.	Jun 10, 1996
Eklutna Operating Committee (EOC), as established in this Plan, begins to meet, develops coordination procedures for functional control in consultation with APA, and conduct other business.	Jun 28, 1996
Parties determine the budgetary offsets to current Eklutna Project rates and propose new power rates for the transition period.	Jul 1, 1996
APA initiates personnel actions necessary to facilitate the functional transfer to the utilities.	Aug 15, 1996
Detailed plans, agreements, and SOP's in place and executed for October 1, 1996 change in functional control.	Aug 30, 1996
Eklutna personnel transition to their respective utility employer.	Oct 1, 1996
EOC manages the operation and adjusts procedures as required in consultation with APA.	Commences Oct 1, 1996
Office space and full access to all government records for an APA real estate person and rewind contracting officer's representative will be provided by Eklutna Purchasers.	Commences Oct 1, 1996

SECTION 6. ACTIVITIES AND SCHEDULES FOR COMPLETION OF SALE

EVENT	TIMETABLE
Formal environmental, engineering, and safety inspections continue until complete.	Aug 1, 1996
Parties agree on resolution of inspection issues.	Aug 30, 1996
Generator rewind, plant modifications, and inspection corrective actions continue until completed.	As Required
Title and land conveyance issues continue until complete.	Transaction Date
Conveyance documents in final draft.	Aug 30, 1996
Transaction Date and the Eklutna Project sale executed.	Nov 28, 1997 (unless earlier agreed upon)

SECTION 7. TRANSFER OF DATA AND OTHER RECORDS TO PURCHASERS

EVENT	TIMETABLE
APA Listing of Eklutna Project data and records to be transferred which will include their current location.	May 24, 1996
Site selection by Eklutna Purchasers for data and document relocation plan.	Aug 1, 1996
Data and documents transferred to Eklutna Purchasers after the Transaction Date as mutually agreed to by Parties.	To Be Determined

SECTION 8. INSPECTION RESULTS AND REQUIRED DOE WORK PLAN

Inspection results and a required DOE work plan are attached hereto as Exhibit C. The Parties agree that this list may not be all inclusive, and other work items may be added by any Eklutna Purchaser if, in their judgment, new information warrants. The Parties will mutually agree who has the responsibility to correct the added work items and set the schedule for their completion. All formal inspection results and action plans to deal with outstanding issues shall be finalized by August 1, 1996. Description of inspection lists in this Exhibit C:

(a) Listing of engineering inspection results as known when this Plan is executed, the timetable of work to be completed by APA, and the resolution of other inspection issues.

(b) Listing of environmental and safety inspection results and the APA responses are in draft form as of the Effective Date of this Plan, and shall be included in this Exhibit C upon receipt of same.

SECTION 9. EKLUTNA ASSETS

Attached as Exhibit D are the Physical assets list of APA and asset lists of each of the utilities for those assets located on APA property. APA intends to transfer, on the Transaction Date, full title to all such assets to Eklutna Purchasers. If the Eklutna Purchasers should choose to operate and/or maintain the Eklutna Project prior to the Transaction Date, they shall be authorized to use listed APA equipment, tools, and vehicles. All assets listed by each utility as their own are not intended to be, and shall not be, transferred to the other Eklutna Purchasers, but shall remain available for the benefit of the Eklutna Project.

APA is in the process of finalizing its survey results on all rights-of-way, easements, and structures intended to be transferred. All parcels, rights-of-way, and easements shall be fully described upon completion and compiled for inclusion in the transfer documents executed on the Transaction Date. Any discrepancies shall be dealt with pursuant to Section 10 below.

SECTION 10. TITLE CONDITION TO ALL EKLUTNA ASSETS AND PLANNED REMEDIES

All personal property transferred to Eklutna Purchasers by APA shall be free and clear of any rights of third parties on the Transaction Date. Pursuant to the Purchase Agreement, APA represents to the Eklutna Purchasers that it, or its designated successor or assigns, shall provide without cost to the Eklutna Purchasers real property interests described as follows:

(a) Titles to APA fee owned property, including Reed and Palmer substations free and clear of encumbrances or conditions of title which would restrict the Eklutna Purchasers' rights to continue to operate the Eklutna Project,

including the transmission lines and facilities located within described rights-of-way, easements, or permitted areas;

(b) The generation facility free of any encumbrances, covenants, and/or restrictions which would arise from its designation as historically significant and would prevent the Eklutna Purchasers from use, maintenance, repair, remodel, modification or upgrade of the buildings or equipment of the Eklutna Project assets;

(c) Fee title to the Anchorage Substation property and other Eklutna Project land rights free and clear of claims of Cook Inlet Region Inc.;

(d) Access rights-of-way or easements allowing access for line maintenance of the transmission lines presently being used as disclosed by the 1996 survey;

(e) Easement rights to cross military reserve and fee owned properties owned or controlled by the United States Army within Ft. Richardson, Alaska on the existing transmission line right-of-way;

(f) Easements, rights-of-way, or permits as required to provide for 115 KV transmission line facilities located in the CEA double circuit portion of the transmission line as set forth in contract No. 85-80AP10022.000;

(g) Easement rights for the existing transmission lines across private property, including those areas of easements presently authorized under 44LD513 and section 17(b) of ANCSA, free and clear of claims of Eklutna Inc. or other underlying landowners and free of encroachments disclosed by the APA 1996 survey;

(h) Transfer of all other agreements and rights and obligations with parties who are not purchasers under this agreement; and

(i) Easement and access rights for the Wasilla Radio Relay facility free and clear of third party claims.

(j) Rights-of-way across property owned by the United States and managed by the Bureau of Land Management.

(k) Questions as to any limitations that there may be on the use of or interference with all natural inflows to and waters of the Eklutna Reservoir will be resolved.

In the event any of these rights can not be transferred to the Eklutna Purchasers, or must be acquired by APA to be transferred to the Eklutna Purchasers, APA and its successor or assigns warrant that they will proceed to acquire such rights through the legal acquisition process, even if such process is not completed by the Transaction Date. APA and its successor or assigns warrant that they have the staff and resources necessary to acquire the interests outlined above and will use such staff and other resources to complete the acquisition in a timely manner. Resolution of any real property issues will be identified in the transaction documents.

SECTION 11. EKLUTNA PURCHASERS MANNER OF ACTING, FUNCTIONAL RESPONSIBILITY, AND STAFFING

Attached hereto as Exhibit E is the Eklutna Purchasers' plan for delineation of responsibilities and activities to effect the transition of the currently employed APA personnel at Eklutna and Eklutna Project operations.

SECTION 12. NO THIRD-PARTY BENEFICIARIES

The provisions of this Plan shall not create any rights in favor of any person, corporation, or association not a Party to this Plan, and the obligations herein assumed are solely for the use and benefit of the Parties to this Plan and their successors and assigns.

SECTION 13. MODIFICATIONS TO THIS PLAN

The provisions of this Plan have been negotiated by the Parties and represent their best effort to follow the intent of the APA Asset Sale and Termination Act pursuant to the Purchase Agreement. Should modifications to this Plan become necessary, the Parties agree to continue their best effort to work toward changes that are mutually agreeable to the Parties, and in timely enough fashion that this agreement and any such modifications are adopted by the Parties on or before the Transaction Date.

EKLUTNA PURCHASE AGREEMENT

1. Parties to the Agreement.

The parties to this Agreement are the Alaska Power Administration (APAd), a unit of the United States Department of Energy, and the Municipality of Anchorage d/b/a Municipal Light and Power (ML&P), the Chugach Electric Association, Inc. (Chugach) and Matanuska Electric Association, Inc. (MEA) (Purchasers).

2. Purpose.

This Agreement sets out arrangements, terms and conditions for sale of the Eklutna Hydroelectric Project (Eklutna) to Purchasers, such arrangements, terms and conditions to be implemented if the United States Congress authorizes such sale.

3. Definitions. As used in this Agreement:

"ADNR" means the Alaska Department of Natural Resources.

"ANCSA" means the Alaska Native Claims Settlement Act (PL-92-203).

"APAd" means the Alaska Power Administration, a unit of the United States Department of Energy (including any successor entity).

"Chugach" means the Chugach Electric Association, Inc.

"BLM" means the United States Bureau of Land Management.

"Eklutna" means the Eklutna Hydroelectric Project authorized, constructed and operated pursuant to the Eklutna Project Act of July 31, 1950 (64 Stat. 382, as amended), including any and all property and facilities acquired or used in connection with Eklutna.

"MEA" means the Matanuska Electric Association, Inc.

"ML&P" means the Municipality of Anchorage, d\b\a Municipal Light and Power.

"Purchasers" means ML&P, Chugach, and MEA.

"Actions" means actions, inaction, and omissions.

"Transaction Date" means the date on which ownership of Eklutna is to be transferred to the Purchasers as set forth in Sections 4 and 9.

4. Assets to be Sold and Transferred.

a. The Eklutna assets to be sold and transferred consist of the power production, transmission, associated real property and all other facilities and assets provided or otherwise acquired for Eklutna under the Eklutna Project Act of July 31, 1950 (64 Stat. 382, as amended) including but not limited to:

(1) Eklutna Dam; power intake structure; power tunnel and penstock; the Eklutna powerplant containing two complete turbine-generator sets with ratings of 15,000 kilowatts, each; auxiliary electrical and mechanical systems; a tailrace and tailrace embankment; switchyard, transformers, 115 kilovolt transmission lines connecting the powerplant with Palmer and Anchorage; Anchorage, Palmer and Reed Substations; access roads; maintenance facilities and vehicles; supervisory control and communications systems; various buildings including office, warehouse, and garage; personal property, including spare parts and equipment; and any improvements, replacements and renewals of such major items;

(2) Title in acquired land at Palmer Substation, and easements or rights-of-way for Eklutna facilities on privately owned land as described in Exhibit A; and for title to lands at Anchorage Substation if the Department of Interior determines that the lands are available under law for conveyance to the Purchasers;

(3) Granted rights-of-way for existing Eklutna facilities located on BLM managed lands and military lands as described in Exhibit A;

(4) Studies, records, drawings, operating data, technical information; water rights including the reservoir rights; licenses and any other permits; accurate location maps of Eklutna facilities tied to public land surveys; acceptable land descriptions of the areas of the easements, permits and licenses showing the location of the Eklutna facilities within the described areas; other tangible rights as required for operations and maintenance of Eklutna facilities; and warranties or other intangible rights associated with the assets to be transferred and sold.

b. Granted rights-of-way for existing Eklutna facilities located on BLM managed lands including lands selected by the State of Alaska and military lands shall:

(1) Be sufficient for operation, maintenance, repairs, renewals and replacements of Eklutna facilities located on such lands, including provisions for access.

(2) Be issued consistent with existing Federal statutes, at no cost to the Purchasers, and remain effective for a period equal to the life of Eklutna as extended by any improvements, repairs, renewals or replacements; provided further that if Eklutna is further sold or transferred to private ownership, BLM may assess such reasonable and customary fees for continued use of the rights-of-way on BLM managed lands and military lands as consistent with law or regulation.

c. The life of Eklutna shall continue as long as Eklutna is capable of generating and transmitting electricity. Temporary interruptions in service or generation of power shall not constitute a termination of the life of Eklutna. Disuse of one portion of the project system shall not cause the life to Eklutna as a whole to terminate.

d. APAd shall provide satisfactory assurance that ANCSA 17(b) easement rights crossing native lands are sufficient for continued operation, maintenance, repair and replacement of Eklutna facilities by the Purchasers.

e. The above description of assets is intended to be general and not precise or all inclusive. As part of the transition activities, the parties will jointly prepare a particularized listing of the assets to be sold and transferred.

f. APAd intends that the sale and transfer of Eklutna to the Purchasers not result in additional costs to the Purchasers for licenses, permits or other rights for Eklutna, which costs would not have been incurred under continued Federal ownership of Eklutna.

g. Nothing in this Agreement shall prevent Purchasers from seeking substantial change in Eklutna. Purchasers shall be responsible for any appropriate approvals by affected government and non-governmental entities required for such substantial change.

h. On the Transaction Date, the APAd shall convey or cause to be conveyed title to all Eklutna assets to the Purchasers by bill of sale or other instrument of conveyance, provided that Purchasers pay or make arrangement for payment under Section 5 of

this Agreement, and provided further that for any assets not available for transfer at the Transaction Date, APAd shall provide:

(1) Mutually satisfactory assurance that such remaining assets will be transferred to the Purchasers subsequently and in a timely fashion, and

(2) Clear authority to the Purchasers for the beneficial use, enjoyment and occupancy of such remaining assets pending their conveyance to the Purchasers.

(3) If APAd fails to perform any of the requirements stated in paragraphs 4(h), 4(h)(1) or 4(h)(2) above, the parties agree to discuss appropriate remedies. The parties may agree to mediation, arbitration or other means to resolve issues presented by a failure of APAd to perform such requirements. Purchasers shall also have an absolute right to terminate the Agreement in the event APAd fails to perform such requirements.

i. If after the Transaction Date some event occurs which prevents APAd from transferring title and beneficial use, enjoyment and occupancy of Eklutna to the Purchasers, the parties agree to discuss and implement appropriate remedies including resolution through negotiation, arbitration or litigation, as appropriate.

5. Price and Payment Terms.

a. If the Transaction Date is October 1, 1989, the selling price shall be $10,435,000.

If the Transaction Date is October 1, 1990, the selling price shall be $9,580,000.

If the Transaction Date is October 1, 1991, the selling price shall be $8,631,000.

If the Transaction Date is other than one of the three above dates, the selling price will be calculated by APAd as the discounted present value as of the Transaction Date of all remaining principal and interest payments after the Transaction Date according to the payment schedule shown on Exhibit B of this agreement plus $1,000,000 ($1 million). Exhibit B payments for the first year will be prorated to reflect the portion of the year remaining after the Transaction Date. Subsequent Exhibit B payments will be assumed at mid-year (April).

The price determination is to be included in the transition plan required under Section 9 below.

b. The Purchasers shall pay the full selling price to the United States Treasury within five years after the Transaction Date. Any portion of the selling price paid after the Transaction Date will carry interest charges payable to the United States Treasury as discussed below. If the full price is paid by the Transaction Date, there will be no interest charges.

The purpose for allowing up to five years for the payments is to provide some flexibility to the Purchasers in arranging for payment and start up costs so as to minimize adverse impacts on Purchasers' ratepayers. The purpose of the interest charge is to assure that the United States Treasury receives the full value of the selling price. The Purchasers shall not seek Federal financing for the purchase.

c. The discount rate to be used for determination of the selling price shall be nine percent (9%).

The interest rate to be charged for payments after the Transaction Date shall be nine percent (9%).

The sales price described above is full consideration for all Eklutna assets described in Section 4 (Assets to be Sold and Transferred).

d. APAd shall not change its rate criteria for the purpose of accelerating principal payments before the Transaction Date. The Purchasers shall not delay their take of allocated power for the purpose of shifting revenues beyond the Transaction Date.

6. Responsibilities.

a. As of the Transaction Date, the Purchasers shall assume all ownership responsibilities for Eklutna and ownership responsibilities of APAd and its successors for Eklutna shall cease, except as follows:

(1) APAd shall be solely responsible for all costs to close out APAd responsibilities including but not limited to Federal employee entitlements and benefits for APAd employees.

(2) The parties recognize that there may be unfinished work as of the Transaction Date which is the responsibility of APAd to complete. Such unfinished work could include incomplete transfer of some assets to be completed by APAd under Sections 4 and 10 or specific APAd responsibilities

arising out of the joint determination of maintenance activities to be completed by APAd under Sections 9 and 10. APAd shall be solely responsible for such unfinished work.

(3) APA shall be solely responsible for any claims or other legal proceedings arising from actions or alleged actions by APAd while APAd managed or operated Eklutna or from actions or alleged actions by APAd in carrying out remaining APAd responsibilities under this agreement after the Transaction Date."

7. Operation and Maintenance Expenses, Revenues.

Operation and maintenance expenses up to the Transaction Date, including all obligations incurred by APAd which require payments after the Transaction Date shall be the responsibility of APAd. Subsequent operation and maintenance expenses shall be the responsibility of the Purchasers. APAd fund balances from Congressional appropriations as of the Transaction Date shall remain with APAd.

All revenues for power sold up to the Transaction Date will be returned to the United States Treasury. The Purchasers shall be responsible for sales of power after the Transaction Date, including the collection and disposition of revenues therefrom.

8. Non-Power Users.

a. The parties do not intend to adversely affect non-power users' rights as a result of transfer of ownership and control of Eklutna from the Federal government to the Purchasers.

As of the Transaction Date, the Purchasers shall assume all APAd responsibilities and benefits with respect to the following agreements, including amendments and supplemental agreements made or entered into prior to the Transaction Date, provided that after the effective date of this Agreement, APAd shall consult with the Purchasers prior to making additional amendments and supplemental agreements:

(1) The agreement dated February 17, 1984, between APAd and the Municipality of Anchorage concerning the Eklutna Water Project; as amended by Supplemental Agreement No. 1 dated August 24, 1988;

(2) The agreement dated November 1, 1982, between APAd and Cook Inlet Aquaculture Association concerning the Eklutna hatchery.

b. The Purchasers shall consult with BLM and ADNR to ensure effective and proper management of lands required for Eklutna.

c. Except to the extent Purchasers determine public recreational uses shall be limited by safety and operational requirements, the Purchasers will continue to make Eklutna lands and water available to the public for recreation uses.

9. Transition Plans and Activities.

a. Within six months after the Congressional authorization is obtained, the Purchasers and APAd shall adopt specific transition plans setting forth the arrangements and a timetable for completing the sale and transfer. The parties intend that the transition plans shall foster an efficient, orderly and expeditious transfer of Eklutna and its operation to the Purchasers, minimize transition costs and minimize adverse impacts on employees. The transition plans and activities shall be developed jointly by the Purchasers and APAd and, among other items, shall include:

(1) The selection of a "Transaction Date" on which ownership of Eklutna would transfer to the Purchasers;

(2) A schedule for payments to the United States Treasury including provisions for reasonable grace periods;

(3) Arrangements and timetable for the transfer of operations, maintenance, power marketing and administration of Eklutna;

(4) A definition of activities and schedules for completing the sale and the assignment of responsibilities for such activities;

(5) A continuation of the consultations and access to records and data, and arrangements and timetable for transfer of data and other records to the Purchasers;

(6) Provisions for environmental, engineering and safety inspections by the Purchasers and APAd and a joint determination by the Purchasers and APAd of specific maintenance activities, including procurement, to be completed by the APAd;

(7) If necessary, provisions for completing any asset transfer actions that may not be completed as of the Transaction Date;

(8) A particularized listing of all the Eklutna assets to be sold and transferred, including photocopies of all

rights-of-way obtained from BLM, accurate location maps of the Eklutna facilities tied to public land surveys, and suitable legal descriptions of all real property interest. The parties to this Agreement recognize that the lands work will not be completed before the date of the transition plans.

(9) A description of the condition of title to the Eklutna assets as of the date of the transition plans, identifying with particularity third party interests and rights and other matters affecting title that may materially impair the ability of the Purchasers to have the full beneficial use, enjoyment, occupancy and operation of the Eklutna assets, and a description of APAd's intended course of action prior to the Transaction Date to remove, resolve or limit such matters.

(10) Transition staffing plans as necessary to assure continuity of operations and minimizing adverse impacts on APAd employees. In this regard, the parties agree that for two years after the Transaction Date APAd Eklutna personnel have first call on post-transfer Eklutna jobs for which they are qualified subject to the labor agreements of Purchasers. The staffing plans shall also consider transferring portions or all of the operations and maintenance functions to the Purchasers in advance of the Transaction Date, if that course of action is found to be feasible and helpful in minimizing adverse impacts to employees. In a manner consistent with their personnel policies and staffing requirements, the Purchasers will assist in locating suitable employment opportunities for displaced APAd employees for a period of two years after the Transaction Date; and

(11) Other matters as may be considered necessary by the parties.

10. Interim Activities.

The parties to this Agreement recognize that, in addition to the transition plans and activities described above, a number of actions need to be taken by the parties and other entities. The asset transfer and sale involves several entities including the Federal, State and local governments and two Alaska Native corporations. The parties intend to maintain full coordination with each of those entities and ensure that legislation authorizing the sale and transfer provides appropriate authority to implement the sale and transfer. The parties shall take all actions necessary to complete the sale and transfer including, but not limited to, the following listed actions:

a. APAd shall prepare Congressional legislation needed to implement this Agreement. The legislation, among other items, shall include provisions to accomplish the following:

(1) Authorize in accordance with this Agreement the sale and transfer of Eklutna to the Purchasers.

(2) Direct and authorize other Federal agencies, including the United States Department of the Interior, to assist and cooperate in sale implementation including transfer of Eklutna assets under their jurisdiction.

(3) Authorize and direct the Secretary of Interior to issue rights-of-way to Alaska Power Administration for subsequent assignment to Purchasers at no cost to remain effective for a period equal to the life of Eklutna as extended by improvements, repairs, renewals or replacements, sufficient for operation, maintenance, repair and replacement of Eklutna facilities located on lands managed by the BLM including land selected by the State of Alaska, and military lands, including access; provided that if Eklutna is further sold or transferred to private ownership, the BLM may assess such reasonable and customary fees for continued use of the rights-of-way on BLM managed lands and military lands as consistent with current law or regulation; provided further that at no additional cost fee title to lands at Anchorage Substation shall be transferred to Purchasers if the Department of Interior determines that the lands are available under law for conveyance to the Purchasers.

(4) Authorize the State of Alaska (State) to select and direct the Secretary of Interior to convey to the State certain Eklutna lands identified in Exhibit A, including the lake bed of Eklutna Lake if not navigable under the Submerged Lands Act and approximately 853 acres of improved lands housing the powerhouse, intake structure, dam facilities, and a portion of the power tunnel under the provision of Section 6 of the Alaska Statehood Act of July 7, 1958, Public Law 85-508, and the North Anchorage Land Agreement of January 31, 1983, such conveyances to be subject to the rights-of-way being provided to Purchasers under Section 10(a)(3) above.

(5) Exempt Eklutna and the Purchasers, including but not limited to subsequent facilities modifications, from jurisdiction of the Federal Energy Regulatory Commission under the Federal Power Act (16 U.S.C. 791), unless such modifications impact Federal lands other than those presently used for Eklutna.

(6) Authorize expenditure of such sums as are necessary to prepare Eklutna assets for sale and conveyance, such preparations to provide sufficient title to ensure the beneficial use, enjoyment and occupancy to the Purchasers of the assets to be sold.

b. APAd shall, in addition to the responsibilities set forth in Section 4:

(1) Prepare all Eklutna assets including but not limited to those assets described in Section 4 (Assets to be Sold and Transferred) for conveyance to the Purchasers including all actions necessary to establish sufficient title to ensure the beneficial use, enjoyment and occupancy to the Purchasers of such assets.

(2) Apply for and obtain BLM rights-of-way necessary for operation, maintenance, repair and replacement of Eklutna facilities located on Federal lands, managed by the BLM, such rights-of-way to be subsequently transferred to the Purchasers.

(3) Provide satisfactory assurance that the Purchasers have sufficient ANCSA 17(b) easement rights for continued operation, maintenance, repair and replacement of Eklutna facilities.

(4) Continue to maintain Eklutna in accordance with prudent utility practices, and Federal, and utility industry standards.

(5) Appoint one person and an alternate to represent APAd for all activities required of APAd after the execution of this Agreement and prior to the Transaction Date.

(6) Manage and operate Eklutna in accordance with prudent utility practices, and Federal and utility industry standards in such a manner as to not diminish the capability of Eklutna to produce energy and power at historic levels.

c. Purchasers shall:

(1) Establish organizational, functional and staffing arrangements for operations, maintenance and administration of Eklutna to be in effect on or before the Transaction Date including the following:

(A) Purchasers agree with each other and the APAd that each Purchaser shall appoint one person and

alternate to represent that Purchaser for all activities required of Purchasers after the execution of this Agreement and prior to the Transaction Date.

(B) By the Transaction Date, Purchasers shall agree in writing to have an effective organization which shall be responsible for the sale of power, operation and maintenance of Eklutna and, if necessary, Purchasers shall execute power sales agreements to purchase power from Eklutna.

(C) Purchasers shall provide in their organizational agreements that if one or more of the Purchasers are unable or unwilling to purchase its share of Eklutna, then the other Purchasers may purchase that share.

(2) Arrange for the payment of the amounts set out in Section 5 (Price and Payment Terms) to be paid to the United States Treasury.

d. The Purchasers and APAd shall conduct engineering, environmental and safety inspections at Eklutna and jointly determine a list of items or matters they consider necessary to be changed or modified prior to transfer. APAd shall make such changes and modifications prior to the Transaction Date, or provide appropriate assurances that those changes or modifications shall be made. The Purchasers and APAd shall also consensually and jointly determine the acceptability of Eklutna for transfer to the Purchasers. Failure to reach agreement on the joint determination of either the list of necessary changes or modifications or the acceptability of Eklutna for transfer shall constitute grounds for termination of the Agreement.

e. This Agreement may be terminated by Purchasers if, prior to the Transaction Date, the value of Eklutna or its capability to produce energy and power has been diminished by any cause after the execution of this Agreement. Any notice of termination shall be provided to APAd in writing.

f. The parties agree that the above-listed action in subsections (a) through (d) are crucial to the sale and transfer of Eklutna. The Purchasers may elect to terminate this Agreement if the authorizing legislation does not contain substantially the same provisions set forth in Section 10(a) or if APAd fails to complete its obligations under Sections 10(b) and 10(d). APAd may elect to terminate this Agreement if the Purchasers fail to complete their obligations under Sections 10(c) and 10(d).

11. Post-sale Operations, Maintenance and Power Marketing Arrangements.

The Purchasers shall establish appropriate organizational, staffing and administrative arrangements for Eklutna on or before the Transaction Date.

To assist in implementation of these post-sale arrangements, APAd shall make available for inspection and use by the Purchasers all Eklutna records and data and shall consult with the Purchasers on operation procedures, replacement schedules, staffing plans and training on a continuing basis starting on the effective date of this Agreement.

These provisions are intended to ensure that the Purchasers have full opportunity to become fully familiar with Eklutna and to help identify further specific actions that shall facilitate the transfer of operation of Eklutna to the Purchasers.

12. Effective Date.

This Agreement shall become effective as of the calendar date on which all parties have executed this Agreement.

13. Environmental Management.

The parties intend that the transfer of ownership be accomplished in a manner that assures continued compliance with environmental and public safety standards and laws including appropriate dam safety measures. The parties note that, under applicable Department of Energy instructions, APAd is required to prepare a management plan for Eklutna covering environmental and safety requirements.

APAd shall develop and implement such management plan prior to the date on which the transaction plans are adopted and in full consultation with the Purchasers. Failure by the Purchasers to agree to such a plan shall be grounds for termination of this Agreement by the Purchasers.

The Purchasers agree to continue the implementation of such management plan after the Transaction Date, including periodic updates of the plan as needed.

14. Term.

This Agreement shall remain in effect for such time as is necessary to complete the sale of Eklutna to the Purchasers and payments for such sale to the United States Treasury, provided that this Agreement shall terminate two years after the effective date if authorization by Congressional legislation has not been obtained within those two years, and provided further

that this Agreement shall terminate two years after the date of the Congressional authorization if transfer of Eklutna to the Purchasers has not occurred by that time. The above termination dates may be extended by mutual agreement of the parties.

The above termination provisions are intended to provide ample time to obtain Congressional authorization and complete the transaction. However, it is the intent of the parties to obtain such authorization as quickly as possible and complete the sale as quickly thereafter as is reasonably practicable.

This Agreement shall be terminated if, at any time prior to the Transaction Date, the Purchasers determine they are not able to meet the payment terms and so notify APAd in writing.

15. Dispute Resolution.

The parties shall attempt to settle any claim or controversy arising out of this Agreement in good faith. The parties may agree to submit any claim or controversy to a mutually-acceptable mediator, the cost of which shall be borne equally by APAd and Purchasers. The use of such a procedure shall not be construed to affect adversely the rights of either party under the doctrines of laches, waiver or estoppel. Nothing in this section shall prevent any party from resorting to judicial procedures. Any judicial action shall be filed in the Federal court at Anchorage, Alaska.

16. Notice.

All notices under this Agreement shall be in writing directed to the Purchasers through the General Managers of the Purchasers, and to the APAd through the Administrator of the APAd or its successor.

17. Amendment.

This Agreement may be modified only by mutual agreement in writing between the Purchasers and APAd. Any such modifications must be consistent with applicable State and Federal law.

18. Approvals.

Any final sale and transfer of Eklutna shall become effective only on the obtaining of all required regulatory and administrative approvals or on receiving satisfactory assurance that such approvals are forthcoming.

19. Assignment.

This Agreement shall inure to the benefit of, and be binding upon the respective successors and assigns of the parties to this Agreement, provided however, that neither this Agreement nor any interest therein shall be transferred or assigned by any party to any other party, except to the United States or an agency thereof, without the written consent of the others whose written consent shall not be unreasonably withheld.

However, any assignment by Purchasers must be made to a successor in interest to the Purchasers and such assignment shall provide that the power from Eklutna be used for the benefit of customers in the service area of the Purchasers. Any of the Purchasers may assign its interest to the Alaska Electric Generation & Transmission Cooperative, Inc. (AEG&T) subject to any existing agreements, including amendments, between Chugach, AEG&T and MEA.

20. Force Majeure.

Failure by either APAd or the Purchasers to perform any of the requirements of this Agreement brought about by causes beyond their control and without fault or negligence of the parties shall constitute an excusable delay. In any instance where excusable delay occurs, the time for completing the work shall be extended by negotiation of the parties.

21. Continuing Support and Assistance.

The parties agree to support and assist each other in the mutually satisfactory resolution of any unforeseen problems associated with the transfer. APAd and the Purchasers recognize that new issues involving the transfer process may arise prior to and after transfer, or that issues considered resolved may need further clarification, implementation or other resolution. APAd and the Purchasers agree that open lines of communication are desirable after the date of this Agreement and after transfer to facilitate the transfer process. To that end, APAd and the Purchasers each agree to exercise their good faith efforts in implementing the terms of this Agreement expeditiously. APAd further agrees to use its best efforts to make available an appropriate Federal entity to implement this section in the event that APAd as an identifiable Federal entity ceases to exist.

22. Relationship of Purchasers.

The covenants, obligations and liabilities of the Purchasers are intended to be several and not joint or collective, and nothing contained herein shall be construed to

create an association, joint venture, trust or partnership, or to impose a trust or partnership covenant, obligation or liability on or with regard to any of the Purchasers. Each Purchaser shall be individually responsible for its own covenants, obligations and liabilities as provided in this Agreement. No Purchaser shall, by virtue of this Agreement, be under the control of, or be deemed to control, the other Purchaser. No Purchaser shall be the agent of, or have a right or power to bind, the other Purchasers without its express written consent, except as may be expressly provided in this Agreement, or as may be otherwise provided by existing law. The provisions of this Section may be modified by the final approved agreements provided for under Section 10(c)(1).

23. Agreement for Benefit of Parties Only.

As provided in Section 8, above, the parties intend to protect fully the rights of non-power users of Eklutna land and water. The parties do not intend by this Agreement to create rights in, or to grant remedies to, any third party as a beneficiary of this Agreement, or as a beneficiary of any duty, covenant, obligation or undertaking established by, or performed pursuant to, this Agreement.

24. Miscellaneous Provisions.

a. The parties agree, upon request of the other parties, to make, execute and deliver any and all documents reasonably required to implement this Agreement.

b. Captions and headings appearing in this Agreement are included to facilitate reference to the Agreement, and they are not to be read as a part of this Agreement, nor shall they have bearing on its interpretation.

c. This Agreement may be executed simultaneously in two or more counterparts, each of which shall be deemed to be an original, but all of which together shall constitute one and the same instrument.

IN WITNESS WHEREFORE, the parties have caused this Agreement to be executed the day and year written hereafter.

DATED this 2nd day of August, 1989.

Eklutna Purchase Agreement
Exhibit A

August 2, 1989
Page 1 of 2

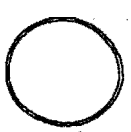
Lands, Easements and Rights-of-Way

Exhibit A consists of this narrative (pages 1 and 2 of 2) and the map prepared by BLM, signed and dated February 3, 1989.

This exhibit describes and displays present land status for the Eklutna Hydroelectric Project and describes in general terms the conveyances of land and land rights contemplated in the purchase agreement.

1. BLM - managed lands and military lands used for Eklutna Project for which BLM is to provide APAd rights-of-way sufficient for operation, maintenance, repair and replacement of Eklutna facilities, such rights-of-way to be assigned by APAd to the Purchasers.

Legend Symbols and Description.



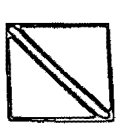
Withdrawals. Refers to approximately 863 acres of public lands withdrawn for Eklutna at the "Intake Area," "Power Tunnel," "Eklutna Powerplant" and "Anchorage Substation." The total acreage is comprised of the following land:

a. Approximately 320 acres withdrawn for the "Power Tunnel" under Public Land Order 1231 dated September 28, 1955.

b. Approximately 230 acres utilized for the "Intake Area" and approximately 60 acres for a portion of "Eklutna Powerplant" as described by ANCSA 3(e) determination AA-51183 dated July 30, 1986.

c. Approximately 243 acres utilized for "Eklutna Powerplant" as described by ANCSA 3(e) determination AA-42534 dated September 1, 1982.

d. Approximately 10 acres withdrawn for "Anchorage Substation" under Secretarial Order dated April 4, 1952.



State Land-R/W. Refers to rights-of-way across State-selected lands covering the transmission line east of "Eklutna Powerplant" to the Knik River.

Military Land-R/W. Refers to rights-of-way across military lands used for Eklutna transmission lines.

Acquired-3(e). Refers to approximately 2.5 acres of acquired land used for "Reed Substation" as described by ANCSA 3(e) determination AA-45155 dated July 30, 1985.

2. ANCSA 17(b) Easements.

Map symbol: Native Land - 17(b) Easements.

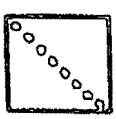
Refers to rights-of-way that are reserved for portions of the 115kV transmission line, access roads and other Eklutna facilities located on Native corporation lands, and exist as easement reservations in the ANCSA conveyances to the Native corporations pursuant to Section 17(b) of ANCSA. Those easements will not be altered by the sale of Eklutna and the Purchasers may use these easements for their intended purposes.

3. APAd Acquired Land and Easements.

Refers to land and easements acquired by the Bureau of Reclamation (predecessor of APAd) during construction of Eklutna and now controlled by APAd. APAd will assign the land and easements to the Purchasers.

Legend Symbols and Description:

Acquired. Refers to approximately 0.8 acres of land owned by APAd at Palmer Substation.



Acquired-Easements. Refers to approximately 33 easements across private lands acquired by the Bureau of Reclamation (predecessor of APAd) and now held by APAd.

4. Other Easements on Private Land.

Map [Symbol]: Note: Other Easements on Private Lands To Be Acquired - See Exhibit A Narrative

Refers to approximately two hundred and fifty (250) parcels of private land located along the 115kV transmission line, many of which require title curative action for purposes of perfecting assignable easement rights or rights-of-way for the Purchasers. APAd shall be responsible for acquiring assignable easement rights or rights-of-way across those lands, for subsequent assignment to Purchasers.

5. Reservoir.

Eklutna Lake as designated on the map is the reservoir described in the body of the Agreement.

Eklutna Purchase Agreement
August 2, 1989

Amendment No. 1

1. Purpose.

This Amendment No. 1 reflects new information with respect to lands, extends the term of the August 2, 1989, Eklutna Purchase Agreement ("Agreement"), and states the selling price if the Transaction Date is October 1, 1992, or October 1, 1993.

2. Amendment to Section 10. Interim Activities.

Section 10a.(4) of the Agreement is amended to read as follows:

"10.a.(4) Authorize the State of Alaska (State) to select and direct the Secretary of the Interior to convey to the State certain Eklutna lands identified in Exhibit A, including approximately 853 acres of improved lands housing the powerhouse, intake structure, dam facilities, and a portion of the power tunnel under the provision of Section 6(a) of the Alaska Statehood Act of July 7, 1958, Public Law 85-508, and the North Anchorage Land Agreement of January 31, 1983, such conveyances to be subject to the rights-of-way being provided to Purchasers under Section 10(a)(3) above."

3. Amendment to Section 5. Price and Payment Terms.

Section 5 (a) of the Agreement is amended to read as follows:

"a. If the Transaction Date is October 1, 1991, the selling price shall be $8,613,000.

If the Transaction Date is October 1, 1992, the selling price shall be $9,022,000.

If the Transaction Date is October 1, 1993, the selling price shall be $9,818,000.

If the Transaction Date is other than one of the three above dates, the selling price will be calculated by APA4 as the discounted present value as of the Transaction Date of all remaining principal and interest payments after the Transaction Date according to the payment schedule shown on Exhibit B of this agreement plus $1,000,000 ($1 million). Exhibit B payments for the first year will be prorated to reflect the portion of the year remaining after the Transaction Date. Subsequent Exhibit B payments will be assumed at mid-year (April).

The price determination is to be included in the transition plan required under Section 9 below."

4. New Exhibit B.

A new Exhibit B dated June 25, 1991, reflecting the above amendment to Section 5, Price and Payment Terms, is incorporated in the Agreement in place of the original Exhibit B.

5. Extended Term.

The first paragraph of Section 14 of the Agreement is amended to read as follows:

"This Agreement shall remain in effect for such time as is necessary to complete the sale of Eklutna to the Purchasers and payments for such sale to the United States Treasury, provided that this Agreement shall terminate four years after the effective date if authorization by Congressional legislation has not been obtained within these four years, and provided further that this Agreement shall terminate two years after the date of the Congressional authorization if transfer of Eklutna to the Purchasers has not occurred by that time. The above termination dates may be extended by mutual agreement of the parties."

6. Effective Date

This Amendment No. 1 to the Agreement shall become effective as of the calendar date on which all parties have executed this Amendment.

DATED this 30th day of July, 1991.

Eklutna Purchase Agreement
August 2, 1989

Amendment No. 2

1. Purpose.

This Amendment No. 2 extends the term of the August 2, 1989, Eklutna Purchase Agreement ("Agreement"), and states the selling price if the Transaction Date is October 1, 1993, October 1, 1994, or October 1, 1995.

2. Amendment to Section 5, Price and Payment Terms.

Section 5 (a) of the Agreement is amended to read as follows:

"a. If the Transaction Date is October 1, 1993, the selling price shall be $8,810,000.

If the Transaction Date is October 1, 1994, the selling price shall be $7,733,000.

If the Transaction Date is October 1, 1995, the selling price shall be $8,117,000.

If the Transaction Date is other than one of the three above dates, the selling price will be calculated by APAd as the discounted present value as of the Transaction Date of all remaining principal and interest payments after the Transaction Date according to the payment schedule shown on Exhibit B of this agreement plus $1,000,000 ($1 million). Exhibit B payments for the first year will be prorated to reflect the portion of the year remaining after the Transaction Date. Subsequent Exhibit B payments will be assumed at mid-year (April).

The price determination is to be included in the transition plan required under Section 9 below."

3. New Exhibit B.

A new Exhibit B dated March 8, 1993, reflecting the above amendment to Section 5, Price and Payment Terms, is incorporated in the Agreement in place of the Amendment No. 1 Exhibit B.

4. Extended Term.

The first paragraph of Section 14 of the Agreement is amended to read as follows:

"This Agreement shall remain in effect for such time as is necessary to complete the sale of Eklutna to the Purchasers and payments for such sale to the United States Treasury, provided that this Agreement shall terminate six years after the effective date if authorization by Congressional legislation has not been obtained within these six years, and provided further that this Agreement shall terminate two years after the date of the Congressional authorization if transfer of Eklutna to the Purchasers has not occurred by that time. The above termination dates may be extended by mutual agreement of the parties."

5. Effective Date.

This Amendment No. 2 to the Agreement shall become effective as of the calendar date on which all parties have executed this Amendment.

Eklutna Purchase Agreement
April 21, 1995

Amendment No. 3

1. Purpose.

This Amendment No. 3 extends the term of the August 2, 1989, Eklutna Purchase Agreement ("Agreement"), and states the selling price if the Transaction Date is October 1, 1995, October 1, 1996, or October 1, 1997.

2. Amendment to Section 5. Price and Payment Terms.

Section 5 (a) of the Agreement is amended to read as follows:

"a. If the Transaction Date is October 1, 1995, the selling price shall be $8,117,000.

If the Transaction Date is October 1, 1996, the selling price shall be $7,178,000.

If the Transaction Date is October 1, 1997, the selling price shall be $5,953,000.

If the Transaction Date is other than one of the three above dates, the selling price will be calculated by APAd as the discounted present value as of the Transaction Date of all remaining principal and interest payments after the Transaction Date according to the payment schedule shown on Exhibit B of this agreement plus $1,000,000 ($1 million). Exhibit B payments for the first year will be prorated to reflect the portion of the year remaining after the Transaction Date. Subsequent Exhibit B payments will be assumed at mid-year (April).

The price determination is to be included in the transition plan required under Section 9 below."

3. New Exhibit B.

A new Exhibit B dated February 23, 1995, reflecting the above amendment to Section 5, Price and Payment Terms, is incorporated in the Agreement in place of the Amendment No. 1 Exhibit B.

4. Extended Terms.

The first paragraph of Section 14 of the Agreement is amended to read as follows:

"This Agreement shall remain in effect for such time as is necessary to complete the sale of Eklutna to the Purchasers and payments for such sale to the United States Treasury, provided that this Agreement shall terminate eight years after the effective date if authorization by Congressional legislation has not been obtained within these eight years, and provided further that this Agreement shall terminate two years after the date of the Congressional authorization if transfer of Eklutna to the Purchasers has not occurred by that time. The above termination dates may be extended by mutual agreement of the parties."

5. Effective Date.

This Amendment No. 3 to the Agreement shall become effective as of the calendar date on which all parties have executed this Amendment.

DATED this 22 day of June, 1995.

MEMORANDUM OF UNDERSTANDING

THIS MEMORANDUM OF UNDERSTANDING is made this 29th day of July, 1989, by and among MATANUSKA ELECTRIC ASSOCIATION, INC. ("MEA"), CHUGACH ELECTRIC ASSOCIATION, INC. ("Chugach"), and the MUNICIPALITY OF ANCHORAGE d/b/a ANCHORAGE MUNICIPAL LIGHT & POWER ("ML&P"). MEA, Chugach and ML&P are hereinafter collectively called the "Purchasers."

1. Recital. The Purchasers are parties to that certain Eklutna Purchase Agreement ("Purchase Agreement") dated as of March 31, 1989, with the Alaska Power Administration ("APAD") which concerns the purchase by Purchasers of certain real and personal property referred to therein as "Eklutna." It is understood that the Purchase Agreement has not yet been executed by ML&P and is therefore not yet effective. The parties expect that the Purchase Agreement will be so executed and, upon that assumption, enter into this Memorandum of Understanding.

2. Cost, Power and Firm Interests of Purchasers. It is mutually understood by the Purchasers that the allocation of output power (capacity and energy) from Eklutna (as defined in Section 3 of the Purchase Agreement) under the Purchase Agreement will continue as under the present participation in the following proportions: 16/30 to ML&P, 9/30 to Chugach and 5/30 to MEA, and that these same proportionate shares will determine the Purchasers' respective proportionate shares of their undivided interest in the Eklutna assets identified in Section 4 of the

Purchase agreement, the Purchasers' respective shares of the purchase price identified in Section 5 of the Purchase Agreement, and the Purchasers' respective shares of Eklutna's operating costs.

3. Operation of Eklutna. It is further understood and agreed that the Purchasers and their successors and assigns shall operate Eklutna in accordance with prudent electric utility practices in order to produce power in the most efficient manner possible for the maximum beneficial use of customers in the service area of the Purchasers, subject to compliance with those water usage agreements that the Purchasers have agreed to assume pursuant to Section 8 of the Purchase Agreement.

ASSEMBLY MEMORANDUM

AM 614-87

No. _____

L ... T
R ... S & TARIFFS
AC ... TING
FIX ... ASSETS
GENERAL MGR.

Meeting Date:

From: Mayor Fink

Subject: Eklutna Purchase Agreement

In its AR87-41(S-1) as amended and dated March 3, 1987, the Anchorage Municipal Assembly resolved that (1) the best interest of the public may be served by federal transfer of the Eklutna Hydroelectric Facility to the Municipality or other local entities with all rights, title and interest of the United States, including reserved and acquired water rights; and (2) the administration may commence formal negotiations with the Department of Energy regarding divestiture of the project.

On May 20, 1987, the Alaska Power Association (APA) formally requested proposals from the Municipality of Anchorage, Chugach Electric Association (CEA), and the Matanuska Electric Association (MEA) for the purchase and transfer of the Eklutna Power Project. The Municipality of Anchorage d/b/a Municipal Light and Power (ML&P), CEA, and MEA (cumulatively the "Purchasers") have developed a joint proposal for purchase of the Eklutna Project. The joint proposal, presently under review by the Municipality of Anchorage, Chugach Electric Association and Matanuska Electric Association, is entitled "Eklutna Purchase Agreement" and sets out arrangements, terms, and conditions for sale of Eklutna to purchasers, such arrangements, terms, and conditions to be implemented if the United States Congress authorizes such sale. The following are essential terms of the proposed agreement:

a. The Eklutna assets to be sold and transferred generally consist of the power production, transmission, associated real property and all other facilities and assets, provided for Eklutna under the Eklutna Project Act of July 31, 1950; all rights-of-way and easements for existing Eklutna facilities located on BLM managed lands and military lands; and water rights, including the reservoir rights.

b. Within six (6) months of Congressional authorization, transition plans are to be adopted which will, among other things, identify the Transaction Date on which ownership of the Eklutna facilities will transfer to Purchasers; determine a schedule for payment of the purchase price to the United States Treasury; provide for the orderly transfer of the operations and related activities of Eklutna; provide for environmental, engineering and safety inspections by Purchasers; provide for completion of asset transfer; develop a particularized listing of assets to be sold or transferred; and address other matters as may be considered necessary by the parties.

c. Total or combined Purchase Price to the three purchasing utilities is dependent on the timing of the Transaction Date: $10,435,000 if on October 1, 1989; $9,580,000 if on October 1, 1990; $8,631,000 if on October 1, 1991. Any other Transaction Date shall result in a selling price calculated as the discounted present value of all remaining principal and interest payments plus $1 million. The full selling price is to be paid within five (5) years after the Transaction Date using an interest rate of 9 percent. The discount rate to be used in determining the selling price is also 9 percent. ML&P's share of the purchase price is 16/30 or initially $5,565,333.33, which moneys will be committed upon the effective date of the Agreement.

d. Effective date of the Purchase Agreement is the calendar date on which all parties have executed the Agreement. The Agreement requires authorization by Congressional legislation within two years of the effective date of the Agreement, and further requires transfer of Eklutna assets within two years of Congressional legislation authorizing the transfer.

e. The covenants, obligations and liabilities of the Purchasers are intended to be several and not joint or collective. ML&P, CEA, and MEA shall each acquire an undivided interest of 16/30, 9/30 and 5/30, respectively, in the Eklutna Power Project.

f. Purchasers of Eklutna are assuming all responsibilities associated with the Agreement dated February 17, 1984 between AFA and the Municipality of Anchorage concerning the Eklutna Water Project and the Supplemental Agreement No. 1 dated August 24, 1988. AWWU's entitlement to secure a long range source of water for Anchorage with the Eklutna Water Project is thereby preserved.

g. The Purchasers are executing a memorandum of understanding concerning the possible election by the Municipality to internally reassign its interest in the Eklutna Power Project. In the event of a sale or transfer of ML&P or for other reasons the Municipality may retain its interest in the Eklutna Power Project for the benefit of the Municipality and the Eklutna Water Project.

ASSEMBLY MEMORANDUM
Eklutna Purchase Agreement
Page 3

The subject Eklutna Purchase Agreement will result in lower costs to ML&P for Eklutna power than under existing federal ownership. The Agreement ensures that ML&P will retain its current share of Eklutna output for the life of the Project. Since Eklutna is and will continue to be ML&P's lowest cost energy source, retention of ML&P's share will continue to stabilize rates.

It is recommended that the Assembly authorize the Administration to enter into an agreement for the purchase of Eklutna under the basic terms and conditions outlined above.

EXHIBIT C

Engineering inspection results listing (to date) including APA's response to the Stone & Webster report in 12 pages to ML&P dated May 13, 1996.

Environmental and safety inspection results and APA's response will not be available from Stone & Webster until after the Effective Date of this Plan. These results are incorporated into Exhibit C by reference, and will be included by mutual consent of the Parties upon receipt from Stone & Webster.

TRANSFER OF THE
EKLUTNA HYDROELECTRIC PROJECT
PALMER, ALASKA
ANCHORAGE MUNICIPAL LIGHT AND POWER

Dear Moe:

The following items are suggested for inclusion in your list of major items to be discussed among APA and the Purchasing Utilities:

- Survey of Dam and comparison with 1987 Survey
- APA's current program for routine inspections of the dam
- Rehabilitation of Power Tunnel Adit
- APA's Environmental, Health and Safety Management Plan
- Environmental Issues
- Health and Safety Issues
- Environmental Permits and Plans
- List of Physically separated sites to be included in the transfer, together with information on land and land rights
- List of vehicles and off road equipment to be transferred
- Transmission Line Survey

Stone & Webster Engineering Corporation
P.O. Box 2325, Boston, Massachusetts 02107-2325
245 Summer Street, Boston, Massachusetts 02210
Tel: 617-600-6111 Fax: 617-600-6180

A more comprehensive list of Technical and Miscellaneous Items is attached.

The list of environmental issues, prepared by Jim Rogers, and the list of Health and Safety issues, prepared by Mike Daniels, Mike Schowen and Sterling Larson will follow.

Best Regards,

Fred R. Harty, Jr.
Task Coordinator

Attachment

FRH:bjt

TECHNICAL AND MISCELLANEOUS ITEMS NOTED FOR FURTHER CONSIDERATION
DURING THE TRANSFER INSPECTIONS FOR THE
EKLUTNA HYDROELECTRIC PROJECT

(see also the separate lists covering
- Environmental Items
- Safety and Health Items)

	APA POSITION	TRANSITION TEAM RESOLUTION
Remote Sites		
° Possibilities for relocating or discontinuing the use of the Reed substation should be considered due to the security problem.		
° Ownership of the old Eklutna powerhouse should be established with respect to the transfer process.		
° At the Palmer substation, the transformer should be checked for damage because of the deformed shell.	APA has advised that MEA performed a detailed inspection (letter of February 27, 1996)	
° Grounds maintenance should be performed at the Repeater Station. Also, the provisions for future snow removal and vehicle access to the MEA substation should be established with respect to the Repeater Station.	APA will remove brush, weeds and logs (letter of February 27, 1996) Future maintenance to be established	
Eklutna Dam and Spillway	APA will remove logs and debris (letter of February 27, 1996)	
° The area upstream from the spillway is heavily encumbered with floating logs and other debris. This material should be removed.		

EKLUTNA TRANSITION PLAN
EXHIBIT C, PAGE 3 OF 12

EXHIBIT 1
Page 80 of 163
Exhibit 1
Page 54 of 126

51396.ATT - 5/13/96

TECHNICAL AND MISCELLANEOUS ITEMS NOTED FOR FURTHER CONSIDERATION DURING THE TRANSFER INSPECTIONS FOR THE EKLUTNA HYDROELECTRIC PROJECT

(see also the reports that comprise
- Environmental Items
- Safety and Health Items)

	APA POSITION	TRANSITION TEAM RESOLUTION
° There is an area of subsidence at the downstream edge of the dam crest, about two thirds of the way between the right abutment and the spillway structure. The subsidence is on the order of 2 ft to 3 ft over an area that is large enough to make this a grade depression. We were unable to find a solution of the condition in previous reports. A survey of this area and institution of a monitoring program is suggested.	APA will perform the survey (letter of February 27, 1996)	
° A survey program is also suggested for the road that leads from the main road to the right abutment. This survey would determine if there is a spot in the road which is lower than the crest of the dam.	APA will perform the survey (letter of February 27, 1996)	
° A survey of the various dam monitoring instruments should also be made and compared with previous measurements. Other areas of interest for a survey are described in the detailed report.	APA will perform the survey (letter of February 27, 1996)	
° Some means should be provided for removal of water which accumulates in the spillway outlet gate access gallery. There was standing water in this gallery at the time of the inspection.		

EKLUTNA TRANSITION PLAN
EXHIBIT C, PAGE 4 OF 12

EXHIBIT 1
Page 81 of 163

Exhibit 1
Page 55 of 126

51396.AFT - 5/13/96

TECHNICAL AND MISCELLANEOUS ITEMS NOTED FOR FURTHER CONSIDERATION
DURING THE TRANSFER INSPECTIONS FOR THE
EKLUTNA HYDROELECTRIC PROJECT

(see also the separate lists covering:
- Environmental Items
- Safety and Health Items)

	APA POSITION	TRANSITION TEAM RESOLUTION
° An area of standing water was noted downstream from the toe of the dam toward the outlet of the spillway channel. This condition was noted in previous reports with the comment that it was not clear whether the wet spot was related to the reservoir or originated downstream. This area should continue to be observed in future inspections, particularly when the area between the two dams is dry.		
° Brush and small trees were noted on the downstream embankment and abutments of the dam. This vegetation should be removed.	APA will remove vegetation (letter of February 27, 1996)	
Intake Gate Area		
° The surface drainage should be improved around the intake gate silo.		
° It is suggested that this gate operating system be renovated and updated.		
° Cracks noted in the silo concrete at the level of the gate operating system should be monitored to determine if any changes are being experienced.		
° The steel items such as ladders, platforms, gate operator and gate operator supports should be cleaned and painted.		
° It is suggested that the provision of a permanent power supply be considered for this structure.		

EXHIBIT 1
Page 82 of 163
Exhibit 1
Page 56 of 126

TECHNICAL AND MISCELLANEOUS ITEMS NOTED FOR FURTHER CONSIDERATION DURING THE TRANSFER INSPECTIONS FOR THE EKLUTNA HYDROELECTRIC PROJECT

(see also the separate lists covering
- Environmental Items
- Safety and Health Items)

	APA POSITION	TRANSITION TEAM RESOLUTION
• The access road was washed out at the time of the site visit. It is suggested that improvements be made to permit uninterruptible vehicle access on this road, which serves the intake gate #5 and the Anchorage Water District diversion structure.	APA has restored the road to its original condition (letter of February 27, 1995) An upgrade has been requested for consideration by the Purchasing Utilities	
Gage House for Reservoir Water Level Monitoring • The ownership of this gage house should be verified with respect to the project transfer.		
• The identity of the floating cable, noted during the inspection, should be established and any necessary remedial action taken.	Repaired by USGS (letters of February 27, 1995 and March 13, 1995)	
Adit to the Power Tunnel • Remedial measures should be taken to restore access to the watertight bulkhead in the adit and to prevent unauthorized entry into this area.	APA will only patch the holes of the power tunnel access entrance (letter of February 27, 1995)	
Surge Tank • The area around the surge tank should be monitored for erosion of surface material. Corrective measures should be taken if necessary.		
• The inside of the surge tank should be inspected when the opportunity presents itself.		

TECHNICAL AND MISCELLANEOUS ITEMS NOTED FOR FURTHER CONSIDERATION
DURING THE TRANSFER INSPECTIONS FOR THE
EKLUTNA HYDROELECTRIC PROJECT

(see also the separate lists covering:
- Environmental Items
- Safety and Health Items)

	APA POSITION	TRANSITION TEAM RESOLUTION
◦ The free turning operation of the wheels on the wheeled gate should be verified to be sure that they will function under load during an emergency gate closure (previous closure operations are understood to have been with no flow).		
◦ The gate may need painting or other maintenance.	There is no record of when the gate was last painted (letter of March 13, 1995)	
◦ A broken grounding strap needs to be repaired.		
◦ Restrictions related to operation of high head load should be noted.		
Trash Removal ◦ Obstructions caused by the presence of debris collecting up on the embankment rockery should be addressed.		

TECHNICAL AND MISCELLANEOUS ITEMS NOTED FOR FURTHER CONSIDERATION
DURING THE TRANSFER INSPECTIONS FOR THE
EKLUTNA HYDROELECTRIC PROJECT

(see also the separate lists covering
- Environmental Items
- Safety and Health Items)

	APA POSITION	TRANSITION TEAM RESOLUTION
◦ Confirm or adjust the values of minimum tailwater level based on project datum: 20 ft elev - one unit 21 ft elev - two units (It has been reported that all project elevations following the 1964 earthquake are 2.6 ft. to 2.9 ft. lower than those shown on the drawings. If sea level forms the basis for tailwater level, the new tailwater, based on project datum, could be higher when affected by high tides)	Levels not confirmed per letter of March 13, 1996	
Powerhouse ◦ Acceptability of the sump oil separation method should be reviewed.		
◦ Redesign of the exhaust system should be considered to avoid the present situation in which the battery room exhaust is ducted through the main control panel. Also, the potential for inadvertent passage of oil room exhaust into the control room should be reviewed.	APA will replace the batteries with a different type (letter of February 27, 1996)	
◦ Rehabilitation of the butterfly valves should be considered to correct leaking which has been reported to be unfixable through normal seal adjustment.		
◦ Greaseless wicket gate bearings should be considered for installation on the turbines.		

TECHNICAL AND MISCELLANEOUS ITEMS NOTED FOR FURTHER CONSIDERATION
DURING THE TRANSFER INSPECTIONS FOR THE
EKLUTNA HYDROELECTRIC PROJECT

(not also the separate lists covering
- Environmental Items
- Safety and Health Items)

	APA POSITION	TRANSITION TEAM RESOLUTION
◦ A thin walled section of cooling water pipe, noted in the Bureau of Reclamation Inspection Report, should be replaced.	Two sections have been patched. APA will correct the last section this year (letter of February 27, 1996)	
◦ The cable trays presently have 1/4 inch asbestos fiberboard underneath the cables. Other arrangements should be established so that this asbestos material can be removed.		
◦ The immovability of the transformers on their rails should be verified to prevent damaging movement in the event of an earthquake.	APA will add restraints (letter of February 27, 1996)	
◦ Consideration should be given to more conventional distribution methods of supplying power to the Government Camp.		
EKLUTNA TO PALMER TRANSMISSION LINE ◦ On Structure 2/7, a broken bell should be replaced in the right insulator string	APA will be responding to these items during the normal maintenance program (letter of March 13, 1996)	
◦ On Structure 10/5, two broken bells in the center insulator string and one broken bell in each of the outside strings should be replaced	APA will be responding to these items during the normal maintenance program (letter of March 13, 1996)	
◦ Vibration on the center phase between structures 7/1-7/2 should be addressed	APA will be responding to these items during the normal maintenance program (letter of March 13, 1996)	

TECHNICAL AND MISCELLANEOUS ITEMS NOTED FOR FURTHER CONSIDERATION
DURING THE TRANSFER INSTRUCTIONS FOR THE
EKLUTNA HYDROELECTRIC PROJECT

(see also the separate lists covering:
- Environmental Items
- Safety and Health Items)

	APA POSITION	TRANSITION TEAM RESOLUTION
• Remedial measures or changes should be considered at three areas on the line that are subject to damage, as described in the detailed report (overbuilds near between 3/7 and 3/8, old Knik River bridge, and the Matanuska River crossing between 9/3 and 10/3)	APA has no plans for any major work in this area (letter of February 27, 1996)	
• The out of plumb condition of the insulator strings should be addressed at structures 1/7, 1/8, 9/1 and 9/2	APA has no plans for any major work in this area (letter of February 27, 1996)	
• Excess brush and trees should be removed from the rights of way as described in the detailed report	APA has no plans for any major work in this area (letter of February 27, 1996)	
• Structure 10/4 should be made plumb	APA has no plans for any major work in this area (letter of February 27, 1996)	
TRANSMISSION LINE FROM EKLUTNA TO ANCHORAGE • Deterioration of the cross arm at Structure 10/3 should be addressed	APA will be responding to these items under the normal maintenance program (letter of March 13, 1996)	
• Broken bells, as described in the detailed report, should be replaced	APA will be responding to these items under the normal maintenance program (letter of March 13, 1996)	
• Excess brush and trees should be monitored for timely removal as described in the detailed report	APA will be responding to these items under the normal maintenance program (letter of March 13, 1996)	
MISCELLANEOUS • Plan and profile of each transmission line	APA will provide the original drawings. You should be aware that APA presently has a surveying contract under way to make an as-built plan of the entire transmission line.	

TECHNICAL AND MISCELLANEOUS ITEMS NOTED FOR FURTHER CONSIDERATION
DURING THE TRANSFER NEGOTIATIONS FOR THE
EKLUTNA HYDROELECTRIC PROJECT

(see also the separate lists covering:
- Environmental Items
- Safety and Health Items)

	APA POSITION	TRANSITION TEAM RESOLUTION
• Land and Land rights data for: 1. The power plant and associated structures including the tailrace channel 2. The substations and switchyard 3. The transmission line rights-of-way and access to the rights-of-way 4. Other properties to be transferred	This will be compiled as part of transition activities (letter of March 13, 1996)	
◦ List of all outstanding contracts and commitments, including informal agreements: For example, it is understood that APA has an understanding that the Fish Hatchery may use some storage areas in the Eklutna warehouse. It is also understood that APA sometimes provides road maintenance and snow removal services in the park area. Such agreements and understandings should be listed.	This has been provided to The McCormick (and other purchasers) as part of transition activities (letter of March 13, 1996)	
◦ List of vehicles and other on road and off road equipment.	This will be compiled as part of transition activities (letter of March 13, 1996)	
◦ List of all major items of spare parts and spare equipment.	This will be compiled as part of transition activities (letter of March 13, 1996)	

TECHNICAL AND MISCELLANEOUS ITEMS NOTED FOR FURTHER CONSIDERATION
DURING THE TRANSFER NEGOTIATIONS FOR THE
EKLUTNA HYDRO-ELECTRIC PROJECT

(see also the separate list covering
- Environmental Items
- Safety and Health Items)

	APA POSITION	TRANSITION TEAM RESOLUTION
• List of physically separated sites that are to be included in the transfer, such as the power plant itself, the USGS station house, the separation station, storage yards, transmission line and substation.	APA is collecting this and will provide this as part of the transition process (letter of March 13, 1996)

EKLUTNA PROPERTY INVENTORY

TRANSFORMER ROOM

2-EA POWER TRANSFORMERS

- Tierney Electrical Manufacturing Co.
- Enclosure Type-1
- KVA - 300
- PH=3
- H2 - 60
- Pri. Volts - 7200
- Sec. Volts - 408/277
- Ser. # 188-6 (SS Buss #2)
- Ser. # 188-5 (SS Buss #1)

2-EA STATION SERVICE DISCONNECT

- Elseco Switchgear Electric Service Engineering Co.
- DS 115 & DS 215

2-EA SINGLE-PHASE TRANSFORMER (Lightening)

- 60 cy 50 KVA
- Volts 480 to 120/240
- Class A-A
- Type DB
- Ser. # 63033 (KCD)
- Ser. # 63034 (KCC)

4-EA AIR CURRENT BREAKER

- GE
- Type AM - 13.8-250-1
- KV - 13.8
- Amps - 2000
- Interrupting KVA - 22,000
- Ser. # 376A355-25-4 (112)
- Ser. # 376A355-25-1 (212)
- Ser. # 376A355-25-5 (118)
- Ser. # 376A355-25-3 (218)

GENERATOR ROOM

2-EA SUMP PUMP MOTOR

- GE
- Model 5K324XA11A
- H.P. 7.5
- Nema Class B
- Type K
- Code G
- Frame - 324PH
- 60 cy - 3 PH
- Volts - 220/440
- FL Speed @ 60 cy - 1160
- FL Amp @ 60 cy - 21.1/10.6
- SER. # RHJ6877121 (#1)
- SER.. # SSSFJ6793973

2-EA TRANSFORMER

- GE
- Dry Type
- Indoor
- 3-phase
- 60 Hz
- Class AA
- Model # 9T26G3106
- kVA - 200
- Hv - 6900
- LV - 260
- SER. # DX

2-EA REGULATOR

- GE
- 1C-7932
- CAT - 05502X0798701
- Elem - 228B9856
- ASM - 228B9864
- Outl. - 228B9852

2-EA GENERATOR

1-EA OVERHEAD CRANE

- Ederer
- 40-ton

CHUGACH ELECTRIC
ASSOCIATION, INC.

The following is an inventory of Chugach owned equipment at the Anchorage Substation:

- One (1) 115 kV circuit breaker, Westinghouse
  Breaker # 2409

- Four (4) 115 kV capacitor voltage transformers, French Electric
  Each transformer is mounted on a steel support structure
  CEA #'s: PT 125
  PT 126
  PT 127
  PT 128

- Two (2) 115 kV disconnect switches, Royal Powerdyne
  Mounted on wood pole structure
  - Switch #'s SS201 and SS301

- Three guyed poles terminating 115 kV line from University Substation

- Three guyed poles terminating 115 kV line from Elmendorf Power Plant

- Satellite receiver system, Truetime
  Mounted on wood pole adjacent control building

The following equipment is located inside the control building:

- One (1) RTU cabinet

- One (1) dip-link cabinet

- One (1) Relay panel containing relays, switches, meters, and satellite clock receiver
  Relay panel designation: "CEA 115 kV Line to University"

- One (1) AC distribution panel and meterbase with meter
  Panel designation: Panel DH0

5601 Minnesota Drive • P.O. Box 196300 • Anchorage, Alaska 99519-6300
Phone 907-563-7494 • FAX 907-562-0027

Chugach also owns the following equipment located at the Eklutna Generation Plant:

- One (1) Harris-Westronic D-20 SCADA Remote Terminal Unit (RTU) and a slip link option mounted on the adjacent wall. This equipment is located downstairs below the control room in approximately vicinity of the State of Alaska microwave equipment.

Sincerely,

Jim K. Topalski
Manager, Land Services

April 1, 1996

Mr. Jim Hall, Projects Manager
P.O. Box 2929
Palmer, AK 99645

Dear Jim:

The following is the result of our area inventory on March 28, 1996:

On this date Jim Hall, Matanuska Electric Association (MEA) and Michael V. Dillon, Alaska Power Administration (APA) toured the listed facilities. Ownership of various equipment at these facilities was established and mutually agreed upon. In some cases it is better to indicate by exception the equipment owned by one or the other organization.

PALMER SUBSTATION

All APA owned except:
Breaker B627 - MEA
Station Service Transformer 3237 - MEA

DOW TAP

Disconnect Switch #365 - APA
Disconnect Switch #371 - MEA

EKLUTNA POWER PLANT

All APA except:
RTU - MEA
4 ea 833 kVA Single Phase 6600-7200 Transformers- MEA
3 installed (Camp Line) - MEA
1 Spare - MEA

REED SUBSTATION

All MEA except:
High Side Dead End - APA
781 Disc SW - APA
760 GND SW - APA
115 kV Fuses - APA
Property and fence - APA

PIPPLE TAP

MEA - RTU house and all contents including the DC supply for the switch motor operators

Take Off Structure

APA - 561 Disc SW
560 GND SW
571 Disc SW
570 GND SW
Motor Operators for 561 and 571
Dead End Structures
Property and fence

BRIGGS TAP

All MEA except: 1271 Disc SW less motor operator- APA
1261 Disc SW manual Op only- APA
Property and fence - APA

CEA: Power Pot 115 kV 50 kVA

Sincerely,

Michael V. Dillon
General Foreman

cc: Nick French, APA
Tim McConnell, AML&P

ML&P Inventory of Property at Eklutna
April 24, 1996

ANCHORAGE SUBSTATION YARD:

- Two (2) pilot wire protection cabinets, Lloyd Controls
- One (1) three-phase 115 kV oil circuit breaker, type V, Allis Chalmers, Breaker #1162
- One (1)Switching structure and attached switches and insulators
- Switches
  One (1) ABS 1163
  One (1) ABS 1161
  One (1) GND Switch 1160
  One (1) By Pass Switch 1169
- Three (3) Potential transformers, three-phase, low side
- Six (6) line poles (dead end) and insulators

ANCHORAGE SUBSTATION CONTROL BUILDING:

- One (1) Center panel left side Quantum Watt Hour Meter #84878233, KVA & KVAR in-and-out
- Center panel right side ML&P:
  Three (3) Amp Meter
  Two (2) Volt Meter
  One (1) Synch Scope and Control Switches
- ML&P RTU relays for APA South line:
  Two (2) phase zone timers
  One (1) KD11 (phase-to-ground)

ANCHORAGE SUBSTATION CONTROL BUILDING (continued):

- Panel 6R: Relays for APA South line:
  Two (2) phase zone timers
  One (1) Inst. overcurrent relay
  One (1) pilot wire relay

- Panel 9R:
  Two (2) Timers
  One (1) Instantaneous fault Detection
  Three (3) Synch Check Relays
  One (1) Pilot Wire Relay
  One (1) KD 10 relay
  Two (2) Phase zone timers
  One (1) Instantaneous fault detector
  Three (3) Synch check relays

- Back Wall
  One (1) 19" Rack
  One (1) Granger Radio Equipment

- One (1) ML&P Padmounted Transformer #5217 7200V/120/240V

- One (1) ML&P Station Service Meter
  Miscellaneous Antennas on pole adjacent to control building

EKLUTNA PLANT:

- One (1) ML&P RTU

- Dunstan Controller and computer equipment for AGC/SCADA

As inventoried on April 24, 1996, by:

Timothy F. McConnell
Manager, Power Management, ML&P

Michael V. Dillon
Eklutna General Foreman, APA

EXHIBIT E

Eklutna Purchasers
Manner of Acting, Functional Responsibilities, and Staffing

EXHIBIT E

Eklutna Purchasers
Manner of Acting, Functional Responsibilities, and Staffing

PREAMBLE: The following is the general delineation of responsibilities for the Eklutna Project under ownership and operation of the Eklutna Purchasers and will provide for efficient management during normal and contingency operation. The Eklutna Purchasers expect these responsibilities will normally be carried out by the utility so assigned in this Exhibit E. Any Purchaser desiring to contract out or transfer between Eklutna Purchasers the performance of its responsibilities as designated in this Exhibit E shall first obtain approval for the change from APA and an operating committee (herein later defined as the Eklutna Operating Committee) which will be established prior to the Transition Date. The Parties intend to execute detailed transition agreements prior to the Transition Date.

(A) Manner of Acting.

(1) Transition Period. A transition period commencing on the Transition Date and concluding on the Transaction Date is anticipated to enable the Eklutna Purchasers to become familiar with the skills and work load necessary for prudent operation of the Eklutna Project. During that time, the current staff, now employed by APA, who may be offered employment by the Eklutna Purchasers and who may accept such offers will serve in the capacities described below, and the costs associated with their work on the Eklutna Project shall be paid by the Eklutna Purchasers in proportion to their respective Eklutna Project shares. Should those offered employment choose not to remain, their function(s) shall continue to be performed by the Purchasing Utility(s) responsible for those functions as that Utility

determines and with the approval of the Eklutna Operating Committee (EOC).

(2) Post Transaction Date Period. The Eklutna Purchasers agree that unless modified by the double majority voting provisions set forth in Section (A)(3) below, division of responsibilities set forth in this Exhibit E will form the basis for operations subsequent to the Transaction Date.

(3) Eklutna Operating Committee (EOC). The EOC consisting of one representative from each of CEA, MEA, and ML&P shall be formed for the management of the Eklutna Project. The EOC shall manage the Eklutna Project as authorized by APA and as agreed to by the Parties, commencing on the Transition Date. The EOC shall meet at least quarterly or more often at the request of any member with the first meeting to be held not later than June 30, 1996. The Chairman of the EOC shall be the ML&P representative until the end of the calendar year 1997. The Chairmanship thereafter shall rotate among the Eklutna Purchasers at the first meeting of each calendar year in the following order: CEA, MEA, and ML&P. Decisions of the EOC will be by double majority (a vote of two of the three Eklutna Purchasers whose shares total at least 51% of the Eklutna Project shares) unless otherwise agreed to by the Eklutna Purchasers in the Ownership and Operating Agreement to be executed by and among the Eklutna Purchasers not later than one year prior to the Transaction Date or at such time as otherwise agreed to by the Eklutna Purchasers. During the Transition Period, decisions by the EOC will be advisory in nature to APA unless specific authority is granted to the EOC by APA under mutually agreeable terms.

(4) Responsibilities of the EOC. Responsibilities of the EOC shall include:

(a) Prompt and Effective Oversight. The prompt and effective attention of the EOC shall be given to major maintenance and operating concerns or other conditions interfering with the safe and efficient operation of the Eklutna Project.

(b) The EOC shall ensure preparation of:

(i) An Eklutna Project Budget;

(ii) An Eklutna Project Status Report for distribution to each Eklutna Purchaser (and to APA prior to the Transaction Date) that will include monthly summaries, by each Eklutna Purchaser, of Eklutna Project energy, capacity, and wheeling schedules (to include losses and inadvertent power flows);

(iii) A monthly revenue report;

(iv) Reliability and scheduling occurrences causing significant power quality or scheduling deviations to the Eklutna Purchasers;

(v) Status report of EOC action items;

(vi) An annual energy allocation for each of the Eklutna Purchasers prior to each water year; and

(vii) Notification of any known limiting factors through the following quarter that would constrain any capacity or energy (including any transmission constraints).

(B) Functional Responsibilities. Duties and responsibilities may be revised and clarified under the terms of the Ownership and Operating Agreement to be executed prior to the Transaction Date or by action of the EOC. The functional responsibilities for the administration, operation, and maintenance of the Eklutna Project are as follows:

(1) Operation of the Eklutna Plant and Switchyard. MEA will operate the Eklutna Plant and Switchyard. CEA and ML&P will provide advice and assistance to MEA as requested by MEA or the EOC. The operator's duties, to the extent authorized by the Eklutna Project operating budget or as otherwise funded shall include:

(a) Providing on-site personnel as required to meet the needs of the Eklutna Project as determined by the EOC and the Eklutna Project operating budget;

(b) Bringing to the attention of the Eklutna Project Maintenance Superintendent or the EOC required Eklutna Project work essential to the safe and prudent operation of the Plant and Switchyard; and

(c) Coordinating the daily activities pursuant to these responsibilities with the ML&P Dispatch Center. The ML&P Dispatch Center shall have supervisory control over all switching functions and generator loading.

(2) Maintenance of the Eklutna Plant and Switchyard. ML&P will maintain the Plant and Switchyard. ML&P's general duties, to the extent authorized by the Eklutna Project operating budget or as otherwise funded shall include:

(a) Maintaining the Plant and Switchyard, including SCADA and communication equipment, to meet the needs of the Eklutna Purchasers as determined by the EOC and the Eklutna operating budget; and

(b) Providing a qualified and designated Eklutna Project Maintenance Superintendent who shall be responsible for:

(i) Developing a daily maintenance schedule for the Eklutna Plant in coordination with the operating utility's management, and as approved by the EOC;

(ii) Developing and implementing the preventive maintenance plans for the Eklutna Project as approved by APA and the EOC; and

(iii) Overseeing, on behalf of the EOC, all Eklutna Project maintenance in progress, with authority to suspend or modify such work as required to comply with the schedules and plans approved by APA and the EOC;

(iv) Bringing to the attention of the EOC required Eklutna Project work essential to the safe and prudent operation and maintenance of the Plant and Switchyard and performing or causing to be performed such required Eklutna Project work;

(v) Preparation of preliminary annual budget estimates for the Eklutna Project for submittal to MEA; and

(vi) Other Eklutna Project duties as assigned by ML&P pursuant to the above responsibilities, and with the concurrence of the EOC.

(3) Dispatch of the Eklutna Project. ML&P will dispatch the Eklutna Project. ML&P's general duties, to the extent authorized by the Eklutna Project operating budget or as otherwise funded shall include:

(a) Scheduling and dispatching plant capacity and energy to meet the needs of the Eklutna Purchasers in accordance with procedures established by the EOC, and under the ML&P automatic generation control (AGC) system. This will include the collection of SCADA data and other information sufficient to record all wheeling over Eklutna Project transmission lines; and

(b) Directing and controlling all switching, tagging and clearance activities for the Eklutna Project; and

(c) Honoring each Eklutna Purchaser's scheduling requests to the extent possible within the operating guidelines established by the EOC.

(4) Transmission Line and Substation Operation, Maintenance, and Repair.

(a) Facilities. As directed by the EOC and within the limitations of the Eklutna Project operating budget, CEA, ML&P, and MEA will be responsible for the operation, maintenance, and repair of the transmission segments and substations as follows:

(i) CEA—for the dual circuits on steel towers from Fossil Creek to the tap behind the Totem Theater in accordance with its May 1, 1980, agreement with APA;

(ii) ML&P—for the tap and lines from the above CEA maintained circuit to the Anchorage Substation, and the Anchorage Substation; and

(iii) MEA—for all remaining Eklutna Project transmission lines, the Palmer and Reed Substations, and the Wasilla radio relay site.

(iv) All costs for construction, operation, or maintenance of taps and facilities owned individually by ML&P, CEA, and MEA will be borne by that respective utility and not considered an Eklutna Project cost.

(b) Maintenance Activities. Transmission line and substation maintenance shall be performed in accordance with the plans approved by the EOC. As directed by the EOC and within the limitations of the Eklutna Project operating budget, the daily activities pursuant to these responsibilities shall be coordinated with the Eklutna Project Dispatcher in accordance with procedures approved by the EOC. General duties,

to the extent authorized by the Eklutna Project operating budget or as otherwise funded shall include:

(i) Maintaining Eklutna Project transmission lines and Eklutna Project substations so as to meet the needs of the Eklutna Purchasers; and

(ii) Bringing to the attention of the EOC required Eklutna Project work essential to the safe and prudent operation and maintenance of the Eklutna Project transmission lines and Eklutna Project substation equipment, and performing or causing to be performed such required Eklutna Project work to the extent existing obligations require or funds are made available for such work.

(5) Dam Maintenance and Inspections. As directed by the EOC and within the limitations of the Eklutna Project operating budget, CEA is responsible for advising the EOC on dam and waterway maintenance to include penstock, tailrace, and embankments, for ensuring required safety inspections are completed as may be prudent or required, and for bringing to the attention of the EOC such required Eklutna Project work on and along the waterways necessary to ensure safe and efficient operation of the Eklutna Project. The daily activities pursuant to these responsibilities shall be coordinated with the Eklutna Project Maintenance Superintendent and the Eklutna Project Dispatcher.

(6) Environmental Regulatory Compliance. CEA is responsible for advising the EOC on required procedures, inspections, and other actions required to ensure compliance with environmental mandates. General duties shall include periodic inspection of Eklutna Project related operations and review and coordination with APA of Eklutna Project environmental requirements.

(7) Fleet Maintenance. MEA has the responsibility for fleet maintenance, and shall take title to the titled vehicles subject to the rights of the other

Eklutna Purchasers on the Transaction Date. The daily activities pursuant to these responsibilities shall be coordinated with the Eklutna Project Maintenance Superintendent.

(8) Annual Budgeting, Billing, and Accounting. MEA will prepare the annual budget estimates; customary financial reports; billings for Eklutna Project Power, wheeling, and other benefits; other reports now being accomplished by the APA administrative staff at the Eklutna Plant; and other tasks as may be requested by the EOC. The Eklutna Project Maintenance Superintendent will provide preliminary Eklutna Project cost estimates for the annual budget to MEA to begin the annual budget process. MEA will also be responsible for billing the Eklutna Purchasers for all advanced costs and for payment of same, subject to cash management procedures established by the EOC. Each utility shall submit its requested reimbursement items to MEA for payment on a monthly basis. During the transition period, APA will calculate billing per the Power Sales Contract, and will submit a single combined monthly bill to the Eklutna Purchasers.

(9) Purchasing. Individual Eklutna Project invoices for tools, equipment, supplies, and contract services up to $2,000 may be approved by each utility pursuant to its responsibilities as described herein, but may not exceed a quarterly limit as prescribed by the EOC in its annual operating budget. All contracts or payment of invoices for more than $2,000 will normally require EOC approval, but this is not intended to constrain or delay necessary purchases to meet an emergency.

(10) Right-of-Way Authority. Right-of-way authority for third party requests will remain the responsibility of APA until such time as it is transferred to the Eklutna Purchasers.

(C) Staffing.

Beginning on the Transition Date, the Eklutna Purchasers anticipate the following APA employees shall, effective on the Transition Date, become employees of the utilities as follows.

Planned Eklutna Project Staff Assignments For The Transition Period:

Mike Dillon	Eklutna Project Maintenance Superintendent to ML&P
Amerilis Foster	Administrative Assistant to MEA
Bill Murphy	Maintenance Mechanic to MEA
Bob Plumley	Plant Mechanic to MEA
John Rivera	Plant Electrician to MEA

Terms and conditions of employment shall be developed as soon as practicable to enable a smooth transition to operation of the Eklutna Project by the Eklutna Purchasers.

EKLUTNA HYDROELECTRIC PROJECT

Agreement for Extension of

"1996 EKLUTNA HYDROELECTRIC PROJECT TRANSITION PLAN"

by and among

THE MUNICIPALITY OF ANCHORAGE d/b/a MUNICIPAL LIGHT & POWER;
CHUGACH ELECTRIC ASSOCIATION, INC.; and
MATANUSKA ELECTRIC ASSOCIATION, INC.

EKLUTNA HYDROELECTRIC PROJECT

Agreement for Extension of

"1996 EKLUTNA HYDROELECTRIC PROJECT TRANSITION PLAN"

by and among

THE MUNICIPALITY OF ANCHORAGE d/b/a MUNICIPAL LIGHT & POWER;
CHUGACH ELECTRIC ASSOCIATION, INC.; and
MATANUSKA ELECTRIC ASSOCIATION, INC.

The parties to this Agreement are the Eklutna Purchasers as defined in the 1996 Eklutna Hydroelectric Project Transition Plan (Transition Plan). The Eklutna Purchasers recognize that common interests exist regarding the ownership, operation, and maintenance of the Eklutna Project. The Eklutna Purchasers hereby extend the Transition Plan as modified by this Agreement.

The Eklutna Purchasers further recognize that obligations of the Eklutna Purchasers under the terms of the Alaska Power Administration Asset Sale and Termination Act, as well as obligations of the Alaska Power Administration and successor agencies, continue beyond the Transaction Date, and that the execution of this Agreement in no way relieves the Alaska Power Administration nor any Purchaser of such continuing obligations.

All capitalized terms not defined herein shall have the same meaning given them in the Transition Plan (including exhibits).

Therefore, the Parties agree to extend the Transition Plan as follows:

THIS Agreement for the Extension of the Transition Plan incorporates by reference the following documents and all of the rights, obligations, requirements, and provisions therein:

The 1996 Transition Plan, consisting of thirteen Sections contained on ten pages; incorporating therein, specifically:

Exhibit A, consisting of 33 pages;
Exhibit B, consisting of 5 pages;
Exhibit C, consisting of 12 pages;
Exhibit D, consisting of 25 pages; and,
Exhibit E, consisting of 9 pages.

THE Parties further agree to the following modifications with regard to the 1996 Transition Plan by this Agreement:

1. The Transition Plan will not expire upon completion of the tasks specified therein. However, the arrangements and timetable for transfer of operations, maintenance, and power marketing, as well as operation, maintenance, and administration of the Project will no longer require consultation with APA, nor will office space and access be provided for an APA real estate person after the Transaction Date. (Reference: Transition Plan Section 2 and Section 5)

2. The transfer of data and documents to the Eklutna Purchasers after the Transaction Date shall occur no later than January 1, 1998. (Reference: Transition Plan Section 7)

3. The effective date of this Agreement shall be the Transaction Date, but in any event no later than November 28, 1997.

4. The division of responsibilities among the Eklutna Purchasers after the Transaction Date will be as described in Exhibit E, Paragraph (A)(2).

5. The sixth sentence of Paragraph (A) (3) of Exhibit E is modified to delete reference to an "Ownership and Operating Agreement," and as so modified reads as follows: "Decisions of the EOC will be by double majority (a vote of two of the three Eklutna Purchasers whose shares total at least 51% of the Eklutna Project shares) unless otherwise agreed to by the Eklutna Purchasers."

THE parties further agree to the following in regard to the ownership, operation, and maintenance of the Eklutna Project:

1. An Eklutna Purchaser's interest in the Eklutna Project will not be modified or changed by any assignment or transfer, except upon consent of each Eklutna Purchaser. An Eklutna Purchaser's interest may be transferred or assigned among the Eklutna Purchasers in proportion to their respective Project interest or by such other allocation as to which each Eklutna Purchaser agrees. Transfer or assignment of an Eklutna Purchaser's interest to entities other than an Eklutna Purchaser will be subject to a first right of refusal by the remaining Eklutna Purchasers, with such right to be exercised within 180 days of receipt of written notification. If no remaining Eklutna Purchaser elects to acquire such interest, the transferring Eklutna Purchaser shall indemnify the remaining Eklutna Purchasers for all expenditures which would not otherwise be required, but for which the Eklutna Project becomes obligated in meeting licensing requirements and regulations which were exempted for the original Eklutna Purchasers under the Alaska Power Administration Asset Sale and Termination Act.

2. The terms and conditions of this Agreement will apply to any successor or assign of an Eklutna Purchaser, whether such succession or assignment results from security assignment, merger, acquisition, or any other disposition by the Eklutna Purchaser of its Eklutna Project share.

3. Exhibits A through D of the CONTRACT FOR ELECTRIC SERVICE TO THE CHUGACH ELECTRIC ASSOCIATION, INC.; MATANUSKA ELECTRIC ASSOCIATION, INC.; AND MUNICIPALITY OF ANCHORAGE, MUNICIPAL LIGHT & POWER, Contract No. DE-SC85-95AP10042 shall continue in effect until such time as revised or terminated by action of the EOC. Should any part of these Exhibits A through D conflict with the Transition Plan as modified by this Agreement, the Transition Plan shall prevail.

Dated at Anchorage, Alaska this 2nd day of October 1997.

Acting General Manager

APPROVED AS TO FORM:

MUNICIPALITY OF ANCHORAGE

Mary K. Hughes
Municipal Attorney

RECOMMENDED:

MUNICIPALITY OF ANCHORAGE

George J. Vakalis
Operations Manager

EXHIBIT A

OPERATING AGREEMENT

EXHIBIT A

OPERATING AGREEMENT

1. An operating committee consisting of one representative from each of APA, Chugach, MEA and ML&P shall be formed to decide or resolve operational matters not specified in the contract. The committee shall meet as necessary but not less than annually. The committee is not empowered to change any of the contract provisions. Committee decisions shall be by majority vote with each representative having equal weight.

2. Chugach's share of capacity and energy is 9/30, MEA's share of capacity and energy is 5/30, and ML&P's share of capacity and energy is 16/30.

3. Each Contracting Utilities shall have the right to schedule during any hour its share of the plant capacity to generate power using its own energy allocation as needed to meet its own system loads, provided its energy account is not less negative than 22500 times its share of capacity. (Example: Chugach -6750 MWh= -22500x9/30) A Contracting Utilities may utilize the capacity share of another Contracting Utilities with its own energy allocation if that other Contracting Utilities is not using the capacity and agrees to the use.

4. Spinning reserves from the plant shall be allocated to each Contracting Utilities on a pro rata basis on its share of project capacity net of any project generation scheduled by the Contracting Utilities. Any Contracting Utilities may schedule its full capacity share, if both units are then capable of operation at full output, by scheduling at least 5 MW of energy for that hour in which case both units will be operated by the dispatcher.

5. The net energy diverted by AWWU shall be deemed to have been energy delivered to and purchased by ML&P. The net energy diverted shall be calculated by subtracting the energy delivered to MEA by the Eklutna Water Treatment Plant energy recovery system from the amount of energy that could have been produced by the Eklutna Power Plant if the water delivered to the water treatment plant had instead been run through the power plant. AWWU shall either pay ML&P for the net energy diverted or replace it in kind as determined by separate agreements among APA, AWWU and ML&P.

6. At the beginning of each year, APA shall allocate all energy available for that year among the Contracting Utilities in proportion to their shares. All energy available shall be allocated unless there is a significant planned outage for that year. Whenever conditions significantly change the total energy available, APA shall allocate the change among the Contracting Utilities in proportion to their shares. For purposes of

allocating power and keeping track of energy account balances only, the year will start November 1 and end October 31.

7. APA shall maintain an energy account for each Contracting Utilities. Allocations of energy shall be credited to the accounts and energy deliveries shall be debited from the accounts at the end of each month.

8. Should a spill condition occur, APA shall calculate the amount of energy spilled and the energy accounts shall be reduced by an amount equal to the lessor of 1) the amount of energy spilled or 2) the amount in the energy accounts at the start of the spill as follows: The reduction shall be allocated among Contracting Utilities in proportion to the ratio that Contracting Utilities energy account at the start of the spill divided by the sum of all Contracting Utilities energy accounts at the start of the spill. (A negative energy account shall be treated as a zero value for the purpose of the ratio allocation. An energy account cannot become more negative as a result of the spill.) All energy generated during the period of the spill shall not be added to nor subtracted from the energy accounts. APA will take meter readings at the beginning and end of the spill period.

E X A M P L E S

	Share	Account before Spill	Share of Spill	Account after Spill
Chugach	30%	2,700	319	2,381
MEA	17%	4,500	531	3,969
ML&P	53%	18,200	2,150	16,050
Total	100%	25,400	3,000	22,400

	Share	Account before Spill	Share of Spill	Account after Spill
Chugach	30%	2,700	1,125	1,575
MEA	17%	4,500	1,875	2,625
ML&P	53%	-2,000	0	-2,000
Total	100%	5,200	3,000	2,200

	Share	Account before Spill	Share of Spill	Account after Spill
Chugach	30%	2,700	2,700	-
MEA	17%	1,500	1,500	-
ML&P	53%	500	500	-
Total	100%	4,700	4,700	-

9. Should Eklutna Lake elevation rise to the spill level, then the plant shall be run at the maximum output possible, to the extent system reliability and operating

conditions allow, until the lake elevation is reduced below the spill level. Each Contracting Utilities shall be entitled to its project share of the energy generated during this period. If a Contracting Utilities does not utilize its full project share, the remainder shall be apportioned among the other Contracting Utilities in proportion to their project shares. This extra energy shall not be subtracted from the energy account.

10. The Eklutna generator output voltages shall be controlled to maintain system voltage profiles as adopted by the operating committee but remaining within the reactive and real power limits for the units. Operation of the Eklutna generators at less than .90 power factor will be avoided unless unanimously agreed upon by the operating committee. If the production of reactive power reduces the real power output, the reduction shall be apportioned among the Contracting Utilities in proportion to that hour's generation schedule for each Contracting Utilities.

11. The energy produced and delivered to the Contracting Utilities shall be metered at the Eklutna power Plant (net outputs on the Anchorage line and Palmer line plus output on the Twin Peaks line minus any APA use outside this boundary) and the AWWU Eklutna energy recovery unit. Three percent (3%) of the net plant output shall be delivered to supply Contracting Utilities system losses and shall not be counted as energy delivered to the Contracting Utilities. The intent of the 3% is to compensate for the historical level of transmission losses incurred in transferring Eklutna power to Palmer, Eagle River and Anchorage.

12. APA shall contract with one of the Contracting Utilities to be the Eklutna Dispatcher. The Eklutna Dispatcher shall operate the power plant within that Contracting Utilities' "control area" which is defined as "a system capable of regulating its generation in order to maintain its interchange schedule with other systems and contribute its frequency bias obligation to the Interconnection". APA shall make best efforts to have the Eklutna Power Plant included in its dispatcher's automatic generation control (AGC) system. The Eklutna Dispatcher shall operate the plant in accordance with this Exhibit A and honor each Contracting Utilities' scheduling request to the extent possible within the operating guidelines prescribed by APA. At the end of each month, the Eklutna Dispatcher shall provide APA with an accounting of the energy scheduled by each Contracting Utilities.

13. APA shall provide its dispatcher with the most flexible operating guidelines possible within good engineering practices. These guidelines should at least include: minimum down time before restarting a unit; maximum number of unit starts per day; minimum unit output while operating; maximum unit output while operating; and, any unit operating ranges to be avoided.

14. "ML&P Net Delivered kWh" shall be the balance remaining after subtracting from the APA energy delivered to the purchasers; CEA, MEA, and APA quantities of energy

invoiced, as if it were taken at the Anchorage Substation. "ML&P Net Delivered kWh" is used in the wheeling calculations for ML&P and CEA in Exhibit B. (The assumption is that ML&P's energy from Eklutna is delivered to Anchorage Substation.) The preceding definition applies while ML&P is operating the Eklutna project within their control area. If the project is operated by Chugach within its control area, then "ML&P Net Delivered kWh" shall be the amount of energy scheduled to be delivered to ML&P as if it were taken at the Anchorage Substation.

15. IN WITNESS WHEREOF, the parties hereto have caused this contract to be executed the day and year first above written.

EXHIBIT B

ESTIMATE OF FIRM AND NON-FIRM ENERGY QUANTITIES AND COMPUTATIONS OF ANNUAL ENERGY AND WHEELING CHARGES

EXHIBIT B

Estimate of Firm and Non-Firm Energy ~~(APA PRS)~~

Year	Firm Energy (MWH)	Non-Firm Energy (MWH)
1994	153,000	11,000
1995	145,000	0
1996	153,000	11,000
1997	134,000	0
1998	153,000	11,000
1999	153,000	11,000
2000	153,000	11,000
2001	153,000	11,000
2002	153,000	11,000
2003	153,000	11,000
2004	153,000	11,000
2005	153,000	11,000

Computation of Annual Energy and Wheeling Payment

The total Annual Payment will be the sum of the Annual Energy Payment plus Annual Wheeling Payment. The Contracting Utilities will be billed for electric energy calculated annually each fiscal year beginning October 1, payable in twelve equal monthly payments. The amount of each annual energy installment shall be established in advance by the contracting officer in consultation with the Contracting Utilities and submitted to the Contracting Utilities in the form of Contract Exhibit B on or before October 1 of the year preceding the appropriate fiscal year.

1) Annual Energy Payment: multiply the FERC-approved rates for firm and non-firm energy times the projected energy sales shown in the APA Power Repayment Study (PRS); used to support the FERC-approved rates, except when provision in Article 16 of the contract determines the amount of energy to be billed; plus

2) Annual Wheeling Payment: Each year multiply the respective metered amounts of power and energy wheeled for each Contracting Utilities over APA transmission lines in the previous year (12 months) by the FERC-approved rate. Each Contracting Utilities will pay their respective wheeling charges for the previous year.

Wheeling Calculations:

The previous years wheeling will be calculated using the following formulas:

CEA: The energy wheeled for CEA shall be the sum of the net metered flow North on the APA North Line at ML&P Plant Two plus "ML&P Net Delivered" plus the metered flow out of the APA system into CEA University Substation (CB 2005).

EXAMPLE:		
	APA North Line net North	+2,000,000 kWh
	ML&P Net Delivered	+6,000,000 kWh
	University CB 2005 APA OUT	+1,000,000 kWh
	Total	9,000,000 kWh

MEA: The energy wheeled for MEA shall be the sum of the metered flow into the Dow and Palmer Substations minus the 115 kV Palmer Line NET quantity. The 115 kV Palmer NET quantity shall be metered flow OUT minus the metered flow IN values on the 362 meter. A negative energy value for wheeling shall be treated as zero energy flow.

EXAMPLE:		
	Dow Substation	+3,000,000 kWh
	Palmer Substation	+1,000,000 kWh
	115 kV Palmer Line NET	- 1,000,000 kWh
	Total	3,000,000 kWh

ML&P: The energy wheeled for ML&P shall be the sum of the total metered flow into the APA South Line at ML&P Plant Two (circuit breakers 115-18 and 115-19), at Anchorage Substation (ML&P CB 1162), and at CEA's University Substation (CB 2005 OUT (APA IN)) minus "ML&P Net Delivered."

EXAMPLE:		
	APA South Line Plant 2 IN	+ 23,000,000 kWh
	ML&P CB 1162 IN	+ 0 kWh
	CEA CB 2005 APA IN	+ 0 kWh
	ML&P Net Delivered	- 6,000,000 kWh
		17,000,000 kWh

NOTE: + is into APA
- is out of APA

ML&P Delivered Net will be calculated as follows:

Net Eklutna Energy Delivered shall be the sum of the net values of the Eklutna Powerplant delivery points known as the 115 kV Anchorage line (CB 462), the 115 kV Palmer line (CB 362), AWWU energy depleted, and the 12.47 kV Twin Peaks line. System losses are calculated to be 3% of the total Net Eklutna Energy Delivered. APA ENERGY DELIVERED TO THE

PURCHASERS shall equal the NET Eklutna Energy Delivered minus the 3% calculated system losses.

MEA monthly energy delivered shall be determined by a monthly scheduled amount as provided by MEA and it shall be shown as MEA DELIVERED.

CEA monthly energy delivered shall be determined by a monthly scheduled amount plus the AWWU recovery amount minus APA Use and shown as CEA DELIVERED. The scheduled delivered amount is the monthly scheduled interchange with ML&P (from Eklutna) minus MEA Delivered and the losses (both scheduled and month end true-up) supplied by the Eklutna Project.

ML&P energy delivered shall be the balance remaining after subtracting from the APA Energy Delivered to the Purchasers; CEA Delivered, MEA Delivered, and APA Use, as if it were taken at the Anchorage Substation, and shown as ML&P NET DELIVERED.

An example of the above is:

Net Eklutna Energy Delivered	+21,000,000 kWh (Metered)
3% Loss	- 630,000 kWh (21,000,000 x .03)
APA Energy Delivered to the Purchasers	+20,370,000 kWh
APA Use	- 1,000 kWh (Metered)
CEA Delivered	- 6,000,000 kWh (Scheduled)
MEA Delivered	- 2,000,000 kWh (Calculated)
ML&P Net Delivered	+12,369,000 kWh

IN WITNESS WHEREOF, the parties hereto have caused this contract to be executed the day and year first above written.

EXHIBIT C

POINTS OF DELIVERY

EXHIBIT C

Electric power and energy furnished and wheeled by APA to Chugach shall be delivered and measured at the following points:

A. At the one hundred fifteen (115) kilovolt line side span to terminal of APA CB 462 and disconnect 569 located in the Eklutna Powerplant switchyard. Power and energy will be delivered at the nominal voltage of one hundred fifteen (115) kilovolt at the point of delivery specified.

B. At the one hundred fifteen (115) kilovolt line side span to terminal of APA CB 362 and disconnect 569 located in the Eklutna Powerplant switchyard. Power and energy will be delivered at the nominal voltage of one hundred fifteen (115) kilovolt at the point of delivery specified.

C. At the one hundred fifteen (115) kilovolt slack span entering the Anchorage Substation attached to CEA circuit breaker 2400. Power and energy will be delivered at the nominal voltage of one hundred fifteen (115) kilovolt and will be measured at the one hundred fifteen (115) kilovolt at Chugach University Substation CB 2005 using CEA metering equipment.

Electric power and energy furnished and wheeled by APA to Matanuska shall be delivered and measured at the following points:

A. At the one hundred fifteen (115) kilovolt line side span to terminal of APA CB 462 and disconnect 569 located in the Eklutna Powerplant switchyard. Power and energy will be delivered at the nominal voltage of one hundred fifteen (115) kilovolt at the point of delivery specified.

B. At the one hundred fifteen (115) kilovolt line side span to terminal of APA CB 362 and disconnect 569 located in the Eklutna Powerplant switchyard. Power and energy will be delivered at the nominal voltage of one hundred fifteen (115) kilovolt at the point of delivery specified.

C. At the six thousand nine hundred (6,900) volt terminal of the MEA 6.9-12.47 KV power transformer for the 12.47 KV Twin Peaks line located at the Eklutna Powerplant. Power and energy will be delivered at the nominal voltage of six thousand nine hundred (6,900) volts and will be measured at six thousand nine hundred (6,900) volts at the point of delivery specified.

D. At the point near structure #7/6 where the MEA one hundred fifteen thousand (115) volt line taps the APA Eklutna-Palmer 115 KV line. Power and energy will be delivered at the nominal voltage of one hundred fifteen thousand (115) volts and will be measured at twelve thousand four hundred

seventy (12,470) volts at the Dow Substation low side of power transformer using MEA metering equipment.

E. At the low voltage twelve thousand four hundred seventy (12,470) volt terminal of the APA 115-12.47 KV power transformer in the Palmer Substation. Power and energy will be delivered at the nominal voltage of twelve thousand four hundred seventy (12,470) volts at the point of delivery using MEA metering equipment.

F. At the twelve thousand four hundred seventy (12,470) volt bus of the Municipality of Anchorage/Anchorage Water and Wastewater Utility's Eklutna Water Project. Power and energy will be delivered at the nominal voltage of twelve thousand four hundred seventy (12,470) volts at the point of delivery using MEA metering equipment.

Electric power and energy furnished and wheeled by APA to ML&P shall be delivered and measured at the following points:

A. At the one hundred fifteen (115) kilovolt line side span to terminal of APA CB 462 and disconnect 569 located in the Eklutna Powerplant switchyard. Power and energy will be delivered at the nominal voltage of one hundred fifteen (115) kilovolt at the point of delivery specified.

B. At the one hundred fifteen (115) kilovolt line side span to terminal of APA CB 362 and disconnect 569 located in the Eklutna Powerplant switchyard. Power and energy will be delivered at the nominal voltage of one hundred fifteen (115) kilovolt at the point of delivery specified.

C. At the one hundred fifteen thousand (115) volt bus in the Anchorage Substation attached to ML&P CB 1162 known as APA South Line. Power and energy will be delivered at the nominal voltage of one hundred fifteen thousand (115) volts and will be measured at one hundred fifteen thousand (115) volts at the point of delivery specified using ML&P metering equipment.

D. At the one hundred fifteen thousand (115) volt bus in the ML&P Plant Two Substation for CB 115-21 and 115-22 known as APA North Line. Power and energy will be delivered at the nominal voltage of one hundred fifteen thousand (115) volts and will be measured at one hundred fifteen thousand (115) volts at the point of delivery specified using ML&P metering equipment.

IN WITNESS WHEREOF, the parties hereto have caused this contract to be executed the day and year first above written.

EXHIBIT D

SCHEDULE OF RATES FOR FIRM ENERGY, NON-FIRM ENERGY, AND WHEELING

UNITED STATES
DEPARTMENT OF ENERGY
ALASKA POWER ADMINISTRATION

Eklutna Project, Alaska

SCHEDULE OF RATES FOR WHOLESALE FIRM POWER SERVICE

EFFECTIVE:

October 1, 1994 for a maximum of five years.

AVAILABLE:

In the area served by the Eklutna Project, Alaska.

CHARACTER AND CONDITIONS OF SERVICE:

Alternating current, sixty cycles, three-phase, delivered and metered at the low-voltage side of substation.

MONTHLY RATE:

Capacity charge: None.

Energy charge: All energy at 18.7 mills per kilowatthour.

MINIMUM ANNUAL CAPACITY CHARGE:

None.

BILLING DEMAND:

Not applicable.

ADJUSTMENTS:

For transformer losses: If delivery is made at the high-voltage side of the customer's substation but metered at the low-voltage side, the meter readings will be increased 2 percent to compensate for transformer losses.

For power factor: None. The customer will normally be required to maintain power factor at the point of delivery of between 90 percent lagging and 90 percent leading.

For auxiliary power service: Auxiliary power supplies may be used in conjunction with the service hereunder if the parties hereto, prior to the Contracting Utilities' utilization of any such auxiliary power supply, have entered into a written operating agreement defining the procedure by which the amount of power and energy will be determined.

UNITED STATES
DEPARTMENT OF ENERGY
ALASKA POWER ADMINISTRATION

Eklutna Project, Alaska

SCHEDULE OF RATES FOR WHOLESALE NON-FIRM POWER SERVICE

EFFECTIVE:

October 1, 1994 for a maximum of five years.

AVAILABLE:

In the area served by the Eklutna Project, Alaska.

APPLICABLE:

To firm power customers normally maintaining generating facilities or other sources of energy sufficient to supply their requirements.

CHARACTER AND CONDITIONS OF SERVICE:

Alternating current, sixty cycles, three-phase, delivered and metered at the low-voltage side of substation.

MONTHLY RATE:

Capacity charge: None.

Energy charge: All energy at 10.0 mills per kilowatthour.

MINIMUM CHARGE:

None.

BILLING DEMAND:

Not applicable.

ADJUSTMENTS:

For character and conditions of service: None.

For transformer losses: If delivery is made at the high-voltage side of the customer's substation but metered at the low-voltage side, the meter readings will be increased 2 percent to compensate for transformer losses.

Schedule A-W3

UNITED STATES
DEPARTMENT OF ENERGY
ALASKA POWER ADMINISTRATION

Eklutna Project, Alaska

SCHEDULE OF RATES FOR WHOLESALE WHEELING SERVICE

EFFECTIVE:

October 1, 1994 for a maximum of five years.

AVAILABLE:

In the area served by the Eklutna Project, Alaska.

APPLICABLE:

To all non-Federal power transmitted over Eklutna Project transmission facilities for the benefit of Project customers.

CHARACTER AND CONDITIONS OF SERVICE:

Alternating current, sixty cycles, three-phase, delivered and metered at the low-voltage side of substation.

MONTHLY RATE:

Capacity charge: None.

Energy charge: All energy wheeled for others at .3 mills per kilowatthour.

MINIMUM CHARGE:

None.

BILLING DEMAND:

Not applicable.

ADJUSTMENTS:

For character and conditions of service: None.

For transformer and transmission losses: As specified in wheeling contracts.

In Order No. U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39"), the Regulatory Commission of Alaska ("RCA") approved, subject to conditions, the sale to Chugach Electric Association, Inc. ("Chugach") of most of the electric utility assets of the Municipality of Anchorage d/b/a Municipal Light and Power ("ML&P") ("Transaction"). Order 39 also approved the MOA-Chugach Eklutna Power Purchase Agreement ("Chugach PPA"), subject to conditions, effective on the date of closing of the Transaction. In Order 39, the RCA granted to the MOA, effective upon the date of closing of the Transaction, a certificate of public convenience and necessity authorizing ownership and provision of generation electric utility service to the public for compensation from its share of Eklutna, subject to conditions, including that before the effective date of the Chugach PPA or the MOA-Matanuska Electric Association, Inc. ("MEA") Power Purchase Agreement ("MEA PPA"), the MOA has filed documentation that it has surrendered its voting rights on the Eklutna Operating Committee ("EOC").[1] In Order 39, the RCA required that the MOA's surrender of its EOC voting rights "cannot be lifted until such time as [the MOA] has shown to our satisfaction that [the MOA] has acquired the expertise required to fully participate as voting member of the EOC."[2]

Enclosed as Exhibit 1 is a Surrender of Eklutna Operating Committee Voting Rights document, signed by ML&P, Chugach, and MEA. The Surrender will remain in effect until the MOA shows to the RCA's satisfaction that the MOA has acquired the expertise required to participate as a voting member of the EOC (or upon expiration or termination of the terms of the Chugach PPA and the MEA PPA).

Exhibit 1

October 27, 2020

Surrender of Eklutna Operating Committee (EOC) Voting Rights

In accordance with the requirements of order U-18-102(44), the Municipality of Anchorage, dba Municipal Light & Power(ML&P), hereby surrenders its voting rights as an EOC member and under the Fish and Wildlife Agreement effective as of the Closing of the Asset Purchase Agreement between ML&P and Chugach Electric Association (Chugach). This surrender of voting rights shall remain in effect until ML&P's successor complies with the RCA requirements pertaining to qualifications for ML&P's representation on the EOC.

Until ML&P's successor complies with the qualification terms of RCA order U-18-102(44), all EOC decisions will be by unanimous vote of Chugach and Matanuska Electric Association, Inc. (MEA). Eklutna hydro operations, dispatch and maintenance will continue to follow past practices and policies unless changes are approved through the EOC process.

To: Layne, James O (RCA) <james.layne@alaska.gov>
Subject: Re: TA379-121 Question

Mr. Layne:

The MOA/ML&P do not believe that the MEA Eklutna PPA is inconsistent Order No. U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39"). The part of Order 39 that you cite states:

"We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the [Chugach] Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions." Order 39 at 67.

To comply with the Order, ML&P will surrender its vote on the EOC prior to the closing of the ML&P sale to Chugach, which will be before the effective date of the Chugach Eklutna PPA and of the MEA Eklutna PPA. ML&P will promptly file a notice of that surrender with the RCA. The surrender will have a term at least equal to the term of the two PPAs, subject to termination of the surrender upon MHP showing to the RCA's satisfaction "that MHP has acquired the expertise required to fully participate as a voting member of the EOC." Order 39 at 67. If and when MHP has a proposed EOC representative that satisfies the qualifications, MHP will file that information and request that the RCA make the necessary finding for termination of the EOC vote surrender.

Like Section 4.2(B) of the Chugach Eklutna PPA, Section 4.2(B) of the MEA Eklutna PPA requires MHP, in consultation with the Purchaser, to select MHP's representative on the EOC. As a result of Order 39, MHP won't have any voting representative on the EOC until the surrender is terminated upon a positive finding by the RCA that MHP's proposed representative is qualified. Thus, Section 4.2(B) of neither PPAs need to be amended. In addition, Section 4.2(B) should remain as written as it will be relevant if and when MHP's voting rights surrender is terminated in the future upon the necessary finding of the RCA.

Please contact me if you have any questions.

Subject: TA379-121 Question

Mr. Thompson,

I have a question regarding the Eklutna Power Purchase Agreement between MOA and MEA (MEA Eklutna PPA) filed in TA379-121 as Exhibit A. MEA has filed TA525-18 seeking to add the MEA Eklutna PPA to its tariff and seeks approval of a new COPA cost element and I have asked them the same question below in TA525-18 regarding the MEA Eklutna PPA. A joint response by MEA and MOA is welcomed, or each party can file its own response.

I believe there is an inconsistency between the MEA Eklutna PPA and the final order (U-18-102(44)/U-19-020(39)/U-19-021(39)) (U-18-102(44).

At page 67 of U-18-102(44) the Commission required MOA/ML&P to surrender its vote on the EOC so Chugach and MEA could manage the Eklutna Hydro project.

The MEA Eklutna PPA, at page 8 of Exhibit A, Section 4.2(B) appears to allow MOA/ML&P to keep its vote on the EOC.

Does MOA/ML&P believe the language between the final order and the MEA Eklutna PPA as summarized above are in conflict? Please explain your response and provide a remedy if appropriate.

Please respond by Monday, October 26, 2020 by 5:00pm.

Thank you for your attention to this request and contact me with any questions.

EXHIBIT 2

MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S REPLY BRIEF REGARDING INTERPRETATION OF ORDER 39

STATE OF ALASKA

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners:	John M. Espindola, Chair Robert M. Pickett John C. Springsteen
In the Matter of the Petition Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee	U-24-024

MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S REPLY BRIEF REGARDING INTERPRETATION OF ORDER 39

The Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP") submits this reply brief regarding interpretation of language in Order U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39")[1] pertaining to the terms of the MOA's surrender of voting rights on the Eklutna Operating Committee ("EOC"). In Docket U-18-102/U-19-020/U-19-021 ("Acquisition Docket"), the Commission required that the MOA surrender its voting rights on the EOC because the Commission found that the individual who the MOA proposed to manage the remaining municipal utility in the immediate wake of Chugach's acquisition of ML&P assets ("Acquisition" or "Transaction") then-Municipal Manager William D. Falsey (an attorney), did not have the relevant background experience to participate as a member of the EOC.[2] Specifically, the Commission found that Mr. Falsey did not have the required "knowledge of the Railbelt generation and transmission system, or prudent utility practice which is the management standard specified for the MHP EOC representative in both the Eklutna PPA [power purchase agreement

[1] May 28, 2020.

with Chugach Electric Association, Inc. ("Chugach"] and the MEA PPA [power purchase agreement with Matanuska Electric Association, Inc. ("MEA")]."[3] On July 18, 2024, AHP filed a Notice and Request for Acknowledgement ("Request for Acknowledgment") with the Commission stating it had acquired the expertise required to participate as a voting member of the EOC when Mark Corsentino, P.E., was unanimously approved by the Anchorage Assembly to be the Utility Director of AHP on July 2, 2024.[4]

The other parties in this matter now argue that in order to address its determination that the single proposed individual was not qualified to be the MOA's EOC representative, the Commission placed a requirement on the reinstatement of voting rights that AHP could not even *present* a new EOC representative for acknowledgment by the Commission acquisition of the relevant expertise until more than *three decades* had passed (or possibly never, if the power purchase agreements ("PPAs") with Chugach and MEA are extended for the life of the project). The Office of the Attorney General, Regulatory Affairs & Public Advocacy Section ("RAPA"), Chugach, and MEA, all now take this position—contrary to their prior articulations in this docket that showed they, like AHP, interpreted Order 39 as having no such requirement. For the reasons explained below, the reasoning articulated for this changed position should be rejected. As RAPA noted in the prehearing conference, similar to an amusement park ride where the only question is whether the potential rider is tall enough to be on the ride, here, the only issue is whether Mr.

[3] *Id*. In Order 39, the Commission referred to the post-transaction electric utility owned by the MOA as Municipal Hydro Power ("MHP") and not AHP.

[4] Request for Acknowledgment.

Corsentino is qualified to be AHP's EOC representative.[5] RAPA, Chugach, and MEA articulate no factual support or legal reason why AHP, despite being qualified now, must arbitrarily wait over three more decades in order to regain voting rights on the EOC. If the Commission panel in the Acquisition Docket had intended to require a 35-plus year forfeiture of all of the MOA's rights to participate in the management and operation of its certificated hydropower utility, it would have done so in unambiguous and unequivocal language, following additional process that would have been required as the issue of surrender was not addressed in the Acquisition Docket hearing.

DISCUSSION

I. The responsive briefing reflects changed positions from the other parties in this docket regarding interpretation of Order 39.

In the prehearing conference on August 30, 2024, Administrative Law Judge ("ALJ") Walker stated that AHP had not addressed in its initial filings "any evidence or discussion of why the Commission should set aside the minimum term of voting rights surrender required in Order 44."[6] Order U-24-024(4) articulated the Commission's "desire for briefing on the minimum term of the Eklutna Operating Committee voting rights surrender required" by Order 39.[7] As explained below and in AHP's September 18, 2024, opening brief, the language of Order 39 is clear that (1) there must be a "term" for the surrender of voting rights that must be of at least the length of the PPAs with Chugach and MEA (including any extensions); and (2) this finite term can also be curtailed if AHP makes a showing of acquisition of the required expertise to regain EOC

[5] See, e.g., August 30, 2024, Hearing Tr. at 9.

[6] August 30, 2024, Hearing Tr. at 6, lines 21-25.

voting rights. In other words, if before the expiration of the term, AHP showed to the Commission's satisfaction that AHP had acquired the expertise required, then the surrender would be "lifted."

In their responsive briefs on the issue, RAPA, Chugach, and MEA all admitted that prior to the prehearing conference on August 30, 2024, each had shared AHP's interpretation of the Order 39 language. Specifically, Chugach and MEA both, "admit[ted] that until ALJ Walker raised this issue in this proceeding, they had not examined this issue closely and were theoretically comfortable with an interpretation of the Surrender that if and when the MOA could demonstrate technical and managerial fitness," then at that time the MOA "would be entitled to regain its voting rights on the EOC and with respect to the Fish and Wildlife Agreement before the end of the PPA terms."[8] Further, Chugach and MEA's August 26, 2024, comments on AHP's Request for Acknowledgment unequivocally manifest an understanding by Chugach and MEA at the time that AHP voting rights could be immediately restored upon a showing that it had acquired the necessary expertise, with no mention of a "minimum term."[9] RAPA's response to AHP's Motion to Expedite this proceeding also reflected an understanding that "RAPA agrees with AHP" that "[t]he only issue in this docket is a straightforward one—whether AHP 'has shown to [the Commission's]

[8] Chugach and MEA's Joint Br. re Surrender Term at 11 (October 8, 2024). Chugach and MEA also stated that such reinstatement should, "potentially [be] with certain conditions imposed on the MOA." *Id.*

[9] Chugach and MEA Joint Initial Comments at 1. Chugach and MEA stated "we do not oppose AHP's nomination of Mr. Corsentino to become a voting member of the EOC. We will defer to the Commission's investigation of Mr. Corsentino's qualifications and whether AHP has gained sufficient expertise necessary for it to regain voting rights on the EOC pursuant to the criteria outlined in Order 39, but we reserve the right to take a position later in this proceeding."

satisfaction that [it] has acquired the expertise required to fully participate as a voting member of the EOC."[10]

However, in its responsive briefing, RAPA conducted a 13-page (and as discussed below, incorrect) grammatical and syntax[11] analysis to determine that the rules of grammar and syntax demand nothing less than that AHP be deprived of voting rights regarding operation and management of its 53.33% ownership interest in the Eklutna Hydropower Project ("Eklutna Project") by the EOC, with no discussion of how such a requirement would be reasonable.[12] RAPA does not address any of AHP's arguments raised in its opening brief on this topic. Similarly, upon further reflection, Chugach and MEA conclude in their responsive brief that "the language in question is ambiguous and upon a plain reading, can be interpreted in at least two ways," either "as ALJ Walker has indicated," or the interpretation "that the MOA is arguing for . . . that the Surrender term has to match the minimum PPA term length per the first part of the clause," and that "the second part creates a pathway to shorten that term by AHP showing that it has acquired the expertise required to fully participate."[13] Chugach and MEA argue that in the face of ambiguous language, the context of the decision to require the surrender should be considered, as well as the public interest, and that these factors weigh in favor of a mandatory term equal to the length of the PPAs, with the surrender continuing indefinitely after the conclusion of such 35-year

[10] RAPA's Response to AHP's Motion for Expedited Consideration at 1-2, August 26, 2024.

[11] Syntax is the study of sentence structure.

or more term, at which point the surrender may be terminated by a showing of acquisition of expertise by AHP.

As explained below, RAPA's grammatical arguments are based on incorrect application of principles of grammar and logic, and the language regarding surrender of EOC voting rights in Order 39 is not ambiguous. This is evidenced by the fact that prior to the prehearing conference, the four parties to this matter, representing three different types of interests (PPA customers, PPA seller, and RAPA, who "speak[s] for the public interest"[14]) all agreed upon the interpretation that there was no "minimum" period of time AHP had to wait before reinstatement of its voting rights. However, even if the Commission were to determine that the surrender language of Order 39 was ambiguous, the principles of interpretation as described by AHP in its opening brief, as well as described by Chugach and MEA in their responsive brief, support an interpretation of the surrender language as providing for termination of the surrender at any time by a showing that AHP has acquired the expertise required. Additionally, to the extent the Commission were to resolve the ambiguity to require a mandatory 35-plus-year surrender term, the Commission could always still choose to modify that certificate condition either *sua sponte* or at the request of AHP, and should do so here.

[14] "About the Regulatory Affairs & Public Advocacy Section," *available at* https://law.alaska.gov/department/civil/RAPA.html.

II. RAPA's reliance on an incorrect grammar and syntax analysis is misplaced.

A. RAPA makes an unsupported and illogical conclusion based on its flawed grammar and analysis.

RAPA's attempt to discern the correct interpretation of the surrender language by parsing the grammar and syntax misses the mark. RAPA's entire analysis relies on its faulty understanding of which clause is the relevant "subordinate clause." More importantly, RAPA fails to connect its sentence diagramming exercise to any legal precedent or principles of legal interpretation, including the principles and precedent AHP discussed in its opening brief.

RAPA relies on the website "Grammarly.com" for its legal interpretation analysis of the surrender term language, which relies on the classification of "independent" and "subordinate" (dependent) clauses.[15] RAPA focuses on the below sentence from Order 39:

> This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as [AHP] has shown to our satisfaction that [AHP] has acquired the expertise required to fully participate as a voting member of the EOC.[16]

RAPA argues that Order 39 consists of (1) an independent clause (everything before the word "and") and (2) a subordinate clause (the word "and" and everything following it). RAPA correctly notes that from a sentence structure perspective, a subordinate clause[17] cannot stand on its own as

[15] RAPA's Br. on Interpretation of Order 39 at 4.

[16] Order 39 at 67.

[17] Subordinate clauses are also referred to as dependent clauses.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

an independent sentence.[18] However, as discussed below, RAPA incorrectly describes the "subordinate clause" at issue. RAPA then compounds this mistake by committing a syllogistic fallacy in concluding that because a subordinate clause cannot stand alone as a sentence or "exist without the independent clause," it "cannot overrule the requirements of the independent clause."[19] Counsel for AHP was unable to find discussion in grammar authorities referencing clauses "overruling" each other. RAPA continues its errors in logic by taking a *giant* leap to conclude that therefore, (1) the surrender of voting rights was for a term at least equal to the duration of the PPA, and (2) because the subordinate clause cannot "overrule" the independent clause, then "AHP cannot seek to have the surrender lifted until the PPAs have expired."[20] RAPA cites to nothing to support this final (il)logical leap, besides the definition of "subordinate" in Black's Law Dictionary, which does not address the use of the term "subordinate" in the grammatical context.[21]

Below, the "independent clause identified by RAPA is denoted in bold text, and the "subordinate clause" identified by RAPA is italicized:

> **This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended**, *and cannot be lifted until such time as [AHP] has shown to our satisfaction that [AHP] has acquired the expertise required to fully participate as a voting member of the EOC*.[22]

---

[18] RAPA's Br. on Interpretation of Order 39 at 3. RAPA incorrectly extrapolates this statement, without reference, to state that a subordinate clause "is also subordinate to the independent clause's stated requirements."

[19] *Id.* at 5.

[20] *Id*.

[21] *Id*.

[22] Order 39 at 67 (bold and italics added).

ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

RAPA incorrectly characterizes the phrase beginning with the word "and" as the subordinate clause. It is not.

The sentence in question is a complex sentence, with an underlying subject-verb-verb structure.[23] The subject is "this surrender." If the sentence were to be diagrammed, the line for the first verb would have "must have" written on it, and the line for the second verb would have "cannot be lifted" written on it.[24] A subject-verb-verb structure does not in itself create two "clauses" in a sentence—it can still be a simple sentence.[25] However, the sentence in question includes at least two subordinate clauses. The first is the phrase "as those agreements may be extended," which modifies the noun "term," and is not relevant to this grammar/syntax analysis.[26] The second subordinate clause is:

> "until such time as AHP has shown to our satisfaction that AHP has acquired the expertise required to fully participate as a voting member of the EOC."

[23] *See, e.g.,* https://www.cambridge.org/us/files/5716/1800/4404/Skills_for_Effective_Writing_Level_2_Sample_Content.pdf (last accessed October 29, 2024). Cambridge University Press is the publishing division of the University of Cambridge in Cambridge. *See also* https://www.grammarly.com/blog/sentences/simple-sentence/.

[24] The verbs "must have" and "cannot be lifted" both have an auxiliary or modal verb ("must" and "cannot") that are diagrammed as part of the verb. Modal verbs are a type of auxiliary verb ("helping verbs") that express modalities such as likelihoods, permission, or ability. https://www.merriam-webster.com/dictionary/helping%20verb (last accessed October 29, 2024).

[25] Even a "simple sentence" can include a subject-verb-verb structure. https://www.cambridge.org/us/files/5716/1800/4404/Skills_for_Effective_Writing_Level_2_Sample_Content.pdf (last accessed October 29, 2024).

This subordinate clause modifies the verb "cannot be lifted."[27]

RAPA incorrectly identifies the word "and" as a "subordinating conjunction,"[28] but it is a "coordinating conjunction," used here to link the two verbs in the sentence.[29] "Coordinating conjunctions" are used to "join like elements" and to "join clauses of equal stature."[30] Therefore, RAPA identifies the wrong language as the subordinate clause. The language RAPA identifies as a subordinate clause is:

> "and cannot be lifted until such time as AHP has shown to our satisfaction that AHP has acquired the expertise required to fully participate as a voting member of the EOC."[31]

Instead, the relevant subordinate clause actually begins with the subordinating conjunction "until," and is the language "until such time as AHP has shown to our satisfaction that AHP has acquired the expertise required to fully participate as a voting member of the EOC." This clause modifies the verb "cannot be lifted." Thus, to the extent that RAPA's argument that a subordinate clause cannot "overrule" the (correct) independent clause ("This surrender must have a term . . . and cannot be lifted") would apply, then under RAPA's reasoning, the clause "until AHP has shown to our satisfaction" is legally superfluous, because the verb "cannot be lifted" embodies a

requirement that cannot be overruled by the subordinate clause. This would result in a legal interpretation from RAPA that the surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, and that the surrender cannot be lifted—ever. Clearly this is not what the Acquisition Docket panel intended.

B. A plain reading of the language in question results in an understanding that AHP need not wait decades for the surrender "term" to be completed in order to have its EOC voting rights restored.

To the extent grammar and syntax analysis provides helpful interpretative guidance as to the plain meaning of the language, it supports AHP's interpretation. Looking at the subject and the first verb of the sentence, and any related subordinate clauses: the surrender (1) must have a term. A term is a "limited or definite extent of time."[32] This term, we learn through a subordinate clause modifying the noun, must be at least equal to the PPA and MEA terms, as extended. It arguably could be longer. On to the next verb (same subject), this surrender, which will last for a "definite extent of time" (2) "cannot be lifted." However, the subordinate clause "until AHP has acquired the expertise required . . ." modifies the verb "cannot be lifted." The word "until" means "up to (the time that)"[33] or "not before a particular time or event."[34] Thus the surrender cannot be lifted before AHP shows that it has acquired the requisite expertise. But it can be lifted after that showing. So, the sentence states that (1) the surrender must have a term (of at least the length of

the PPAs) and (2) the surrender cannot be lifted until a requisite showing of expertise.[35] What this sentence *does not* say is that the surrender cannot be lifted during the term. Nor does this sentence say that the surrender cannot be lifted until (1) the expiration of the term of the surrender *and* (2) AHP has made a showing of the requisite expertise.

This comports with a plain reading of the surrender language that the surrender should have a term that is at least as long as the PPAs, but that this term could be lifted by a showing of requisite expertise.[36] Use of the word "term" indicates a finite period, that could be even *longer* than the term of the PPAs. If this were the case, under RAPA's reading, would RAPA argue that even after the PPAs elapsed, AHP would still need to wait for the term of its surrender to make its showing of expertise? A better reading is the reading that all the parties originally held: absent a showing that AHP has acquired the expertise required, the surrender must have a term that is at least as long as the PPAs.

As discussed in AHP's opening brief, the meaning of the term "lifted" is key in interpreting the sentence.[37] The term "lift" is defined in Black's Law Dictionary as "[t]o stop or put an end to; to revoke or rescind."[38] The term "revoke" is defined as "to annul or make void by taking back or recalling; to cancel, rescind, repeal, or reverse."[39] "Rescind" means to "abrogate

[35] Another way of putting it would be that the surrender *can* be lifted with a requisite showing of expertise.

[36] *See, e.g.,* AS 01.10.040(a) ("[w]ords and phrases shall be construed according to the rules of grammar *and according to their common and approved usage*") (emphasis added).

or cancel (a contract) unilaterally or by agreement," or "[t]o make void; to repeal or annul."[40] All of these definitions denote cutting something short, which would not be necessary language to use if the surrender term needed to be over before a showing of acquisition of expertise were allowed.

This interpretation is consistent with the way in which the Commission has typically used the term "lift" in prior orders referencing termination of conditions that had terms that had not yet expired. For instance, in Docket U-97-120, the Commission issued a stay that was to "remain in effect until the Federal Communications Commission (FCC) issues a final decision."[41] The Commission later lifted the stay despite the FCC not having issued a ruling,[42] after a determination that the stay should be "lifted" before the termination event (FCC ruling) in order to "balance the needs of all entities affected" and upon consideration of a new factor.[43] In that matter, unlike here, there had not even been a statement in the initial order outlining the conditions upon which the stay could be lifted before the end of the term of the stay, yet the Commission found it had authority to lift (e.g., end before the termination date) the stay nevertheless.

If the Commission panel in the Acquisition Docket had taken the unusual step of requiring a surrender of management of a certificated utility for a period that at a *minimum* would last decades, and could last the life of the utility, it would have done so clearly. If the panel *had*

intended to require *both* the expiration of the surrender term *and* a showing of acquisition of expertise, it would have included the term requirement *after* the word "until" in the relevant subordinate clause. For instance, the language of Order 39 would have said:

> ". . . and [the surrender] cannot be lifted until (1) the expiration of the surrender term and (2) AHP has shown to our satisfaction . . . ."

A plain language reading of the sentence in question, including consideration of grammar and syntax, results in AHP's interpretation of the surrender language, not RAPA's. If the Acquisition Docket panel had intended to create a requirement that would impact the ability of the Anchorage municipality to manage its majority ownership interest and property right in the Eklutna Project for over 35 years, it would have been crystal clear and express in doing so. As described below in Section III(B), due process would have demanded nothing less.

C. RAPA's remaining arguments are merely attempts to refute strawman arguments that AHP has not made.

RAPA's remaining arguments fail because they are all premised on its incorrect grammar and syntax argument, they attack strawman arguments that AHP did not make, and are irrelevant regardless. For instance, RAPA argues that AHP has not shown that the Chugach and MEA PPA language "override the requirements of Order 39."[44] But AHP never argued that the PPAs *did* override the language of Order 39. AHP argued that the fact that the Commission did not disapprove or otherwise order the removal of the language in the PPAs regarding AHP's role on the EOC and obligations under the two agreements related to that role shows that the Commission did not intend for Order 39 to prohibit the MOA from reinstituting EOC voting rights

until *after* the term of the PPAs. If the Commission intended the surrender to irrevocably last for the duration of the PPAs, the Commission would have conditioned its approval of the PPAs on the removal of that language or included an explicit disapproval of the language as it did for disapproved contractual provisions elsewhere in Order 39.[45] RAPA makes no attempt to square its analysis that the language of Section 4.2(B) of the PPAs would be void with the failure of the Commission to explicitly disapprove the language, even after it make a detailed inquiry about the language in the MEA PPA approval docket.[46]

RAPA also places reliance on the fact that the PPAs do not reference a requirement to have knowledge of the Railbelt electric generation and transmission system, but that AHP admits that requirement is a condition for reinstatement of voting rights. AHP does not disagree, but that fact is irrelevant to an analysis of the language of Order 39. The requirement of knowledge of Railbelt electric generation is not an explicit contractual PPA requirement, it is an explicit requirement from the Commission in order to lift the condition on AHP's certificate.

Finally, RAPA argues that while the MEA PPA approval record includes correspondence from AHP stating clearly that there was not a conflict between Order 39 and the MEA PPA language addressing AHP's voting rights, because AHP's voting rights could be restored, that this correspondence is contradicted by correspondence from MEA in a parallel docket regarding MEA PPA approval. The correspondence from MEA does *not* admit a conflict existed between the MEA PPA and Order 39 as RAPA asserts. The Commission staff asked if

there was a conflict between the surrender language of Order 39 and the language in the MEA PPA that appeared to allow AHP to keep its vote on the EOC.[47] And MEA's response language merely repeats the Commission staff language, putting the word "conflict" in quotations or referring to it as a "perceived conflict."[48] MEA stated that the PPAs were entered into before Order 39 which required surrender, and that "[t]his appears to be the reason for the 'conflict' you reference."[49] MEA never stated that it understood that voting rights could not be restored for the duration of the PPAs. Instead, it noted that the same language existed in the Eklutna PPA already approved, and that if the Commission wanted to "resolve this perceived conflict, the remedy should be similar and consistent with how the RCA remedied the same conflict in the [Chugach PPA], which could include approving the MEA PPA subject to the same conditions the RCA previously imposed in [Order 39]."[50] Nothing in this language indicates that MEA "disagreed with MOA/ML&P about a potential conflict" as asserted by RAPA.[51]

Looking to Order 39, the Eklutna PPA was approved subject to various conditions, including that certain language (Amendment 1) was explicitly not approved. One of the conditions of approval of the Eklutna PPA was that "[t]his approval is subject to the condition that MHP complies with the certificate conditions set out above," including the surrender language.[52] MEA

simply stated that, "MEA is agreeable to having the same vote surrender language in [Order 39] at page 67 apply to the [MEA PPA]."[53] Of course, because the surrender requirement was a certificate condition, it would apply whether or not the MEA PPA approval required it. Further, AHP could not practically have a voting member for purposes of the MEA PPA, but not the Eklutna PPA. Thus, the MEA response does not conflict with the MOA response that Section 4.2(B) of the PPAs "will be relevant if and when MHP's voting rights surrender is terminated in the future upon the necessary finding of the RCA."[54] Instead, the MEA response is completely silent on how any such surrender could be reinstated.[55] It seems MEA merely believed Commission Staff was asking MEA if the EOC voting right surrender would also apply to the MEA PPA, and MEA found such a condition reasonable (and likely obvious, as it couldn't be a one-sided surrender applicable just to Chugach). MEA did *not* state that it believed the surrender would irrevocably last the duration of the MEA PPA, rendering the language about AHP's EOC representative in the MEA PPA invalid.[56] Indeed, if MEA understood that to be the case, it would have likely suggested that the Commission could merely disapprove that provision. And MEA

[56] Further, while RAPA cites to the severability provision in the MEA PPA to determine the case was closed, and AHP cannot regain voting rights during the terms of the PPAs under its interpretation of Order 39, it makes an incomplete reference, ignoring the language that even if it were determined that a term of the PPA is invalid, illegal or unenforceable (and thus severable), "the Parties shall negotiate in good faith to modify this PPA so as to effect the original intent of the Parties as closely as possible in a mutually acceptable manner in order that the transactions contemplated hereby be consummated as originally contemplated to the greatest extent possible." Order 39 at Appendix H at Section 18.17.

itself filed comments in the present docket consistent with the understanding that voting rights could be restored before the PPA expired,[57] and admits in its brief it had not previously held the position that voting rights could not be restored during the PPA terms.[58]

RAPA concludes its argument with the determination that any conflict between the PPAs and Order 39 is resolved because the language in Order 39 controls. However, this logic brings RAPA full circle to the starting line with no conclusion, since the question the Commission has asked parties to brief is essentially, "what is the interpretation of the language of Order 39?"

RAPA's convoluted grammar-based interpretation fails. RAPA makes no attempt to refute or even address AHP's arguments in its opening brief, or examine whether RAPA's conclusion makes any logical sense in the context of Order 39, or public policy. RAPA's reliance on its grammar argument also fails to attempt to answer the question of what possible policy goal is implemented by RAPA's interpretation that a majority municipal government owner of a hydropower plant can be deprived of any say in the operational or managerial control of that plant for *at least decades,* with no articulated reason for such a lengthy mandatory deprivation.

[57] Chugach and MEA Joint Initial Comments at 1.

[58] Chugach and MEA's Joint Br. re Surrender Term at 11. To the extent RAPA argues the responses to Commission Staff about the MEA PPA conflict, and that therefore there is no "meeting of the minds" regarding that crucial term of the contract, such a serious allegation would raise the troubling question of whether the MEA PPA would be a valid contract. *Lewis v. Lewis,* 285 P.3d 273, 275 (Alaska 2012) (holding that if there is no "meeting of the minds," there is no contract).

III. To the extent that the Commission determines that the surrender language is ambiguous, AHP agrees with Chugach and MEA that the "[c]ontext leading to Order 39 [s]urrender matters," as well as the context of the Commission's own subsequent implementation of Order 39.

To that the extent that the Commission finds ambiguity in the surrender language, AHP agrees with Chugach and MEA that the language of Order 39 should be interpreted in the context of the record leading up to the issuance of the order and surrounding the Surrender. Additionally, the context of the issuance of AHP's certificate and the Commission's approval of the MEA PPA and the subsequent understanding of the parties to the PPAs and the Eklutna Transition Agreement must be considered.

Chugach and MEA argue that the surrender language is ambiguous, and that in choosing an interpretation, the "Commission's reading of a term length requirement" should be "supported by the facts and [have] a reasonable basis in law."[59] As explained below, here, the imposition of a decades-long, unbreakable minimum term requirement for surrender is not supported by the facts and evidence in the acquisition docket, and does not has a reasonable basis in law. Conversely, the interpretation that the minimum term of the surrender can be lifted by a showing from AHP of acquisition of the expertise required to fully participate as a voting member of the EOC is supported by the Acquisition Docket record and subsequent Commission approvals, as well as by the understanding of all parties until the August 30, 2024, prehearing conference. This interpretation further has a reasonable basis in the law.

[59] Chugach and MEA's Joint Brief re Surrender Term at 16 (citing *Alaska Exchange Carriers Ass'n v. Regulatory Comm'n of Alaska*, 262 P.3d 204, 208-09 (Alaska 2011)).

A. Alaska and federal precedent and rules of interpretation support interpreting an ambiguous order in a manner that is harmonious with the record and subsequent actions of the decisional body and parties.

1. Decisional language should be read in the context of the facts surrounding the decision.

Chugach and MEA suggest that to the extent the language is ambiguous, the Commission should interpret Order 39 in a manner that is supported by the facts of the case and that has a reasonable basis in law. This approach is supported by Alaska and federal case law on how one court should interpret another court's decisions. While here, the Commission is interpreting its own order, that order is a complicated and lengthy one (the decision *without* its appendixes is 152 pages) that was issued over four years ago. Three out of the four Commissioners on the panel for the decision have since left the Commission. Thus, to the extent the Commission determines the surrender language in Order 39 is ambiguous, the panel in the present matter is arguably similar to a court reviewing another court's decision.

The Alaska Supreme Court has held that, "[j]udgments are to be given that interpretation which will render them reasonable, effective, conclusive and in harmony with the facts and law of the case."[60] The Alaska Supreme Court has also considered post-trial evidence in interpreting judgments pursuant to this standard.[61] Similarly, the Ninth Circuit has found that,

[60] *Pennington v. Employer's Liab. Assur. Corp*., 520 P.2d 96, 97 (Alaska 1974); *Luckart v. State*, 270 P.3d 816, 820 (Alaska Ct. App. 2012).

[61] *Matanuska Elec. Ass'n, Inc. v. Weissler,* 723 P.2d 600, 609–10 (Alaska 1986) (in affirming a Superior Court judgment, the Alaska Supreme Court considered an affidavit submitted with post-trial briefing in the Superior Court which provided additional information clarifying that an oral assignment of interest in the cause of action had occurred between plaintiffs before the dismissal of one of the plaintiffs).

"[w]hen interpreting an ambiguous prior judgment, the reviewing court should 'construe a judgment so as to give effect to the intention of the issuing court.'"[62] "Where the judgment is ambiguous or fails to express the rulings with clarity, the entire record before the issuing court and the findings of fact may be referenced in determining what was decided."[63]

2. Principles of contract interpretation and statutory interpretation support this precedent.

This precedent parallels principles of statutory interpretation and interpretation of contracts. For contracts, the goal of interpretation "is to give effect to the parties' reasonable expectations . . . [which] must be gleaned not only from the contract language, but also from extrinsic evidence, including evidence of the parties' conduct, goals sought to be accomplished, and surrounding circumstances when the contract was negotiated."[64] Interpretation of contracts is typically considered a matter of law, but it "becomes a task for the trier of fact when the parties present extrinsic evidence to clarify a contract's meaning, when this evidence points towards conflicting interpretations of the contract, and when the contract itself is reasonably susceptible of either meaning."[65] Similarly, for statutory construction:

> [t]he goal of statutory construction is to give effect to the legislature's intent, with due regard for the meaning the statutory

> language conveys to others. We give unambiguous statutory language its ordinary and common meaning, but the 'plain meaning rule' is not an exclusionary rule; we will look to legislative history as a guide to construing a statute's words. We must, whenever possible, interpret each part or section of a statute with every other part or section, so as to create a harmonious whole. We also must presume that the legislature intended every word, sentence, or provision of a statute to have some purpose, force, and effect, and that no words or provisions are superfluous.[66]

Applying these various and similar principles of construction to the surrender language results in only one interpretation that "is supported by the facts and has a reasonable basis in law."[67] Contrary to Chugach and MEA's assertions, to the extent there is any ambiguity in Order 39's surrender language, the record of the Acquisition Docket, subsequent decisions from the Commission, understanding of the parties, and due process all support the interpretation that the term of the surrender may be "lifted" by a showing of acquisition of expertise by AHP.

B. An interpretation that the surrender can be "lifted" at any time on a showing of acquisition of expertise is the only interpretation that renders the Order 39 language "reasonable, effective, conclusive and in harmony with the facts and law of the case."[68]

1. The Acquisition Docket and Order 39 discussion supports this interpretation.

The record of the acquisition docket and the language surrounding the "surrender" language of Order 39 support the interpretation that the term of the surrender can be lifted by a

showing of acquisition of expertise by AHP. First, in the hearing itself, there was *no* discussion of whether the MOA should surrender its voting rights temporarily, let alone completely relinquish them for decades. Discussion of the EOC and voting rights and the Fish and Wildlife Agreement was limited. On August 29, 2019, ALJ Walker noted that Chugach witness Dustin Highers had indicated in his prefiled direct testimony that he had served twice on the EOC. ALJ Walker then initiated the following brief exchange:

> ALJ WALKER: "[b]ased on that experience, would you say that knowledge of prudent utility practice and the railbelt electric generation and transmission system elements are essential to being a functional member of the Eklutna Operating Committee?
>
> MR. HIGHERS: Sounds reasonable.
>
> ALJ WALKER: And would knowledge of the Eklutna Hydroelectric Project transition plan and the related agreements also be essential to participating on the Eklutna Operating Committee?
>
> MR. HIGHERS: Not necessarily. The Eklutna Operating Committee, the way we've functioned, is as an operations and maintenance type of committee. Not necessarily dealing with higher-level functions like the original purchase, you know, agreements and the transition agreements and so on. It's a tool that the utilities use to -- to memorialize decisions and move forward on major projects. But it's not necessary in order to be that person that's sitting on that committee in order to make those higher level decisions[.][69]

The exchange continues with Mr. Highers responding to whether he knew anybody at the MOA who would "have the knowledge base to serve on the [EOC]" and Mr. Highers responded that the two persons he knew of would both be moving over to Chugach.[70] ALJ

Walker continued to ask Mr. Highers about the costs for compliance with the 1991 Fish and Wildlife Agreement, and Mr. Highers responded that he had not done any estimation of the costs.[71]

Later, ALJ Walker questioned then-municipal attorney Rebecca Windt Pearson about whether the municipality would be retaining employees from ML&P after the Transaction:

> MS. WINDT PEARSON:· The plan is not to. And I know that we have discussed what we would need to do to have the necessary advice, expertise, and personnel in order to continue to participate in the Eklutna Operating Committee. I think that we envision the stub utility being the department that reports up to the municipal manager. And that, more likely than not, we would utilize consultant services to provide that industry-specific expertise and staffing to help us make informed decisions as a continuing member of the Eklutna Operating Committee. Because we would not be retaining any employees of Municipal Light & Power.
>
> ALJ WALKER:· Have you investigated to see if any such expertise exists in the consulting community?
>
> MS. WINDT PEARSON:· We have not done so yet.[72]

This is the extent of the discussion in the record. No other party raised any issues or questions on the topic. The discussion focused on MOA retaining an employee who could serve on the EOC in the immediate aftermath of the Acquisition.

Order 39 referenced these hearing exchanges in its analysis, and noted that:

> ML&P proposes that MHP will have a seat on the EOC, even though it will have no employees. ML&P states that MHP will be managed by the Municipal Manager, a position currently filled by William D. Falsey. Falsey has a law degree from Yale Law School and a Bachelor of Science degree in physics from Stanford University. Falsey has worked as the MOA's manager since 2017 and worked in legal positions from 2003 through 2017.[73]

Order 39 continued that "Chugach witness Dustin Highers testified based on his experience as chair of the EOC that to be an owner representative on the EOC, it was essential that the representative have knowledge of prudent utility practice and the Railbelt electric generation and transmission system."[74] The order noted that the specific individuals identified by Mr. Highers as being so qualified would be moving to Chugach with the Acquisition, and that ML&P "proposes that MHP will have a seat on the EOC, even though it will have no employees," and that "ML&P states that MHP will be managed by the Municipal Manager, currently filled by William D. Falsey."[75] The Commission then determined that "[t]here is nothing in Falsey's resume indicating that he has any knowledge of the Railbelt generation and transmission system, or prudent utility practice which is the management standard specified for the MHP EOC representative in both the Eklutna PPA and the MEA PPA."[76] Order 39 continued to note that while the MOA stated it would hire consultants on an as-needed basis to help make informed decisions as a voting member of the EOC, that it admitted it had not confirmed if such expertise existed in the consulting community.[77]

This analysis of the immediate "circumstances" of the post-acquisition landscape is then referenced in the imposition surrender requirement condition on the MOA's Certificate of Public Convenience and Necessity ("CPCN"):

> Under *these circumstances*, we cannot unconditionally find that MHP is managerially or technically fit to maintain majority

> ownership of the Eklutna Project. We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions. This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.[78]

The "circumstances" are simply that the Commission found Mr. Falsey an unsuitable candidate for an EOC representative once ML&P employees transitioned to Chugach. In making this determination, the Commission explicitly focused on and referenced the PPAs, stating there was no evidence that Mr. Falsey had the requisite knowledge of "prudent utility practice which is the management standard specified for the MHP EOC representative in both the Eklutna PPA and the MEA PPA."[79] Thus, the Acquisition Docket and the language of Order 39 stressed that the qualifications requirement was important because of the requirements of Section 4.2(B) of the PPAs. This contextual language supports the interpretation that the Commission (1) found it important to keep the surrender in place for the duration of the PPAs if no qualified EOC representative was proposed, thus proposing that the surrender term must last for at least the length

[78] *Id.* at 67 (emphasis added).

[79] *Id.* at 66.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION

of the PPAs, and (2) that the surrender could only be lifted once the MOA had acquired the expertise required by the PPAs. This language, focused on the PPA requirements, supports the interpretation that the surrender "term" could be lifted by a showing of acquisition of requisite expertise as required by the PPAs, that that the MOA can only make the showing it has the requisite expertise, including knowledge of "prudent utility practice *which is the management standard specified for the MHP EOC representative in both the Eklutna PPA and the MEA* PPA" *after* the PPAs have expired.[80]

The record and language or Order 39 provide *no* evidence that the Commission was concerned about the MOA's long-term ability to manage a certificated utility such that it would impose a near-permanent prohibition on MOA participation on the EOC. The entire focus of the Commission's analysis was on whether MOA's proposed *immediate* candidate for the EOC had the requisite background and qualifications. To read the surrender as having a mandatory 35-plus year term despite AHP now having a Utility Director with the requisite expertise to serve on the EOC makes no sense in the context of the acquisition docket record and Order 39 discussion. Nothing in the record or Order 39 provides evidence or analysis that acquisition of the requisite expertise could not happen before the close of the PPAs. And if the primary reason for the requirement was the management standard articulated in the PPAs, it makes no sense to provide that the MOA could only make a showing that it met the PPA standard *after* the PPA contracts expired. In fact, if the PPAs are extended for the life of the Eklutna Project, there might *never* be an AHP EOC voting member. Further, the Commission explicitly discussed the PPA management

standard in its analysis, and did not indicate that Section 4.2(b) of the relevant PPAs regarding the MOA's EOC voting member were disapproved or would be rendered void by Order 39.

2. The record for the issuance of a certificate to AHP and approval of the MEA PPA also support this interpretation.

As discussed in AHP's opening brief, the related proceedings following the Acquisition Docket provide further support for the interpretation that the surrender could be lifted by a showing that AHP had acquired the expertise required to participate as a voting member of the EOC.[81] The Commission's (1) approval of the MEA PPA, with no modifications to exclude the language in Section 4.2(B), after the documented staff discussion with MOA counsel on the topic and (2) issuance of a CPCN to AHP and acceptance of the MOA's surrender of voting rights, with language that made clear the surrender could be lifted at any time by a showing of acquisition of the requisite expertise, show that in the aftermath of Order 39, the Commission also understood that the surrender could be lifted before the expiration of the surrender "term."

The filings and decision in the MEA PPA approval docket make it unequivocally clear that the reinstatement of the MOA's voting member of the EOC could occur (before the expiration of the PPAs) if the MOA meets the Commission's requirements regarding the expertise required to fully participate as a voting member of the EOC. On November 20, 2020, the Commission issued Letter Order #L2000410, approving, in its entirety, the MEA PPA (with Amendment 1), with no attempt to exclude Section 4.2(b) (discussing the MOA EOC representative) or to refute the understanding articulated in the docket filings that the "minimum term" of the surrender was subject to being "lifted" or "terminated" by a showing of the MOA

[81] AHP Br. Regarding Interpretation of Order 39 at 14-20.

meeting the expertise requirements. It would be difficult to argue that the Commission merely committed an oversight by not disapproving Section 4.2(B) in the MEA PPA, after Commission Staff explicitly inquired in the docket whether the language of Section 4.2(B) conflicted with Order 39, and received a response from MOA which was made part of the public docket for the MEA PPA approval. MOA counsel responded:

> Like Section 4.2(B) of the Chugach Eklutna PPA, Section 4.2(B) of the MEA Eklutna PPA requires MHP, in consultation with the Purchaser, to select MHP's representative on the EOC. As a result of Order 39, MHP won't have any voting representative on the EOC *until the surrender is terminated upon a positive finding by the RCA that MHP's proposed representative is qualified. Thus, Section 4.2(B) of neither PPAs need to be amended. In addition, Section 4.2(B) should remain as written as it will be relevant if and when MHP's voting rights surrender is terminated in the future upon the necessary finding of the RCA.*"[82]

MOA counsel made it unequivocally clear that the language of Section 4.2(B) of the MEA PPA should remain because it would be relevant "if and when" voting rights were restored. If the Commission had a different understanding, this would have been its opportunity to clarify and disabuse the parties and public of this understanding. Instead, it approved the MEA PPA in its entirety as filed.

Similarly, it would be difficult to argue the Commission *repeated* this oversight when it later reviewed the language of the October 27, 2020, Surrender document (signed by all three Eklutna Project owners) and issued AHP a CPCN. The surrender stated:

> In accordance with the requirements of order U-18-102(44), the Municipality of Anchorage, dba Municipal Light & Power(ML&P), hereby surrenders its voting rights as an EOC member and under the Fish and Wildlife Agreement effective as of

[82] *Id.* (emphasis added).

> the Closing of the Asset Purchase Agreement between ML&P and Chugach Electric Association (Chugach). *This surrender of voting rights shall remain in effect until ML&P's successor complies with the RCA requirements pertaining to qualifications for ML&P's representation on the EOC.*
>
> Until ML&P's successor complies with the qualification terms of RCA order U-18-102(44), all EOC decisions will be by unanimous vote of Chugach and Matanuska Electric Association, Inc. (MEA). Eklutna hydro operations, dispatch and maintenance will continue to follow past practices and policies unless changes are approved through the EOC process.[83]

The surrender language states reinstatement can occur when the "requirements pertaining to qualifications," are met, not also when the PPAs expire. Again, the Commission issued CPCN 780 without any statement that the surrender language was incorrect or needed to be modified.

It was clear and explicit during the approval process of the MEA PPA and the certificate issuance that Section 4.2(B) properly remained in both the MEA PPA and the Eklutna PPA because the surrender term could be terminated by a showing that AHP had acquired the expertise required to fully participate as a voting member of the EOC.

B. Thus, the reading of the surrender requirement which gives effect to all provisions of the PPA contracts and Order 39 is the reading that the surrender term could be "lifted" by a showing of requisite expertise.

Interpreting the surrender requirement as having a term which can be cut short and lifted if AHP acquires the relevant expertise is the interpretation that renders Order 39 (as well as the subsequent, related decisions), "reasonable, effective, conclusive and in harmony with the facts

[83] *Id.* (emphasis added).

and law of the case."[84] In order to require an inviolable 35-plus year term to be required, the Commission would have needed to make findings articulating *why* such a requirement was legally necessary and supported by the evidence in the Acquisition Docket. It did not. No evidence in the record or discussion from the Commission supports this interpretation. Further, the interpretation that the surrender has no "mandatory" minimum term that cannot change with changed circumstances comports with Commission practice and precedent. It is not unusual for the Commission to put conditions on a certificate which may be "lifted" by future showings or events.[85]

Indeed, to the extent that Order 39 language regarding the surrender were "ambiguous" in the manner suggested by the parties, it raises troubling statutory and due process concerns. A final order of the Commission "denying a right or privilege" "may not be entered without giving the interested party reasonable notice and an opportunity to be heard."[86] Similarly

[84] *Pennington*, 520 P.2d at 97.

[85] In Docket U-96-040, the Commission approved ATU-LD's application for a CPCN, with conditions. Order No. U-96-040(3) at 23-27 (Nov. 15, 1996). The Commission vacated one of the conditions after finding "competition in the local exchange market of ATU has reached a sufficient level to relax the prohibition." Order No. U-96-040(5) at 4-5 (Apr. 15, 1998). The Commission reminded ATU-LD that "any further relaxation of the conditions on its certificate imposed in Order U-96-40(3) may be accomplished only through Commission Order." *Id.* at 5.ATU-LD later filed a petition to have most of the remained conditions vacated but withdrew the petition before the Commission ruled on it. The Commission noted that only one of the remaining conditions was "subject to vacation based on a finding of sufficient competition," and ATU-LD had the burden "to show that sufficient competition exists to support vacating [that condition]." Order No. U-98-082(1) at 14 (Oct. 20, 1998). The Commission also "determined that good cause exists to conduct an evidentiary hearing to allow all parties to present evidence on the issue of whether the Commission should vacate the conditions imposed on ATU-LD's certificate by Order U-96-40(3)." *Id*. at 14-15.

due process requirements of the state and federal constitutions require notice and an opportunity to be heard before deprivation of a property right.[87] Here, the other parties suggest that the Commission *ambiguously* placed a condition on the MOA's ability to manage its property interest in the Eklutna Project, for decades at a minimum, and the life of the project potentially, through a proceeding where there was no argument, briefing, testimony, or other discussion on the topic of surrender of voting rights during the proceeding. There was no notice or right to be heard on the issue of surrender before the decision in Order 39. If the Commission had intended to put such a permanent and inviolable condition on AHP's certificate, it would have needed to have done so *unambiguously*. Principles of due process thus also weigh in favor of a reading that puts no such permanent and unbreakable restrictions on the MOA's property interest.[88]

Chugach and MEA also focus on the principle of statutory and contract interpretation that statutes and contracts should not be interpreted in a manner that renders language superfluous in order to argue that an interpretation that the term of surrender could be lifted renders the alleged "minimum term" language superfluous.[89] First, it does not. The

[87] *Heitz v. State, Dep't of Health & Soc. Servs.*, 215 P.3d 302, 305 (Alaska 2009) (stating "'[d]ue process of law requires that before valuable property rights can be taken directly or infringed upon by governmental action, there must be notice and an opportunity to be heard"); *City of Homer v. State, Dep't of Nat. Res.*, 566 P.2d 1314, 1319 (Alaska 1977) (applying a due process analysis regarding a city's right to a city's property interests).

[88] The interpretation that there is a decades-long mandatory forfeiture, contrary to the clear understanding of MOA and the other parties as articulated in post-Transaction proceedings, also may raise issues regarding the effectiveness of the Surrender. Such an interpretation in light of the proceedings subsequent to Order 39 would also raise questions of estoppel. *Jamison v. Consolidated Utilities, Inc*., 576 P.2d 97, 101-102 (1978) (describing the elements of equitable estoppel and quasi-estoppel).

[89] Chugach and MEA Joint Br. re Surrender Term at 22.

LAW OFFICES OF

Commission tied the period of the surrender to the PPAs because of its focus on the PPA language regarding the MOA's EOC representative and the MOA's obligations under the PPAs regarding that language. Its language ensures that as long as the PPAs are in force, the MOA will either have surrendered its voting rights or made a showing of acquisition of expertise. The term language allows the parties to know how long the surrender would last if undisturbed by further action on the part of the MOA. To the extent the Chugach and MEA PPAs were the primary focus of the Commission's concern in Order 39 about the MOA's voting member, an inviolable surrender for the duration of the PPAs would actually render an *additional* requirement to make a showing of an acquisition of expertise to lift the surrender *after* the PPAs expired moot and pointless.

Second, Chugach and MEA ignore the fact that the interpretation they propose the Commission now adopt would render Section 4.2(B) of the PPAs superfluous, contrary to the principles of contract interpretation. Chugach and MEA also ignore that a key motivation for the qualification requirements for reinstatement was the Commission's concern that the MOA EOC representative meet the PPA requirements.

Finally, while the principles regarding statutory and contract interpretation might be a helpful one to examine in reviewing agency or court decision language, it is not a controlling principle in this context. Order 39 is a 152-page decision. Most court decisions and agency decisions will have language that might be considered superfluous upon examination four years after their issuance. The surrender term should, as Chugach and MEA suggested, be read in the way that is supported by the facts of the record and has a reasonable basis in the law. There are no facts or principles of law to support a three-plus decade surrender that cannot be terminated by a showing of requisite expertise. Nothing in the record references or supports a need to wait that

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS

long, and as explained below, the *post hoc* reasons Chugach and MEA propose are not supported by the record or reasonable. There is no reason for the Commission to have placed such a restriction simply because it found that the municipal manager at the time of the sale was not qualified enough to sit on the EOC, and because the MOA had not at that time hired any other permanent employee who did meet the qualifications to do so at that time. The MOA is as well positioned today as it will be 35 years from now to acquire the requisite expertise to regain voting rights on the EOC, and as stated in its request for acknowledgment, it has done so now.

C. The record of the Acquisition Docket and context leading to Order 39 provides *no* support for Chugach and MEA's *post hoc* arguments that the Commission intended to require that surrender of EOC voting rights could only be lifted at the conclusion of the PPAs.

1. Continued MOA participation on the EOC, with continued majority voting rights and resulting "veto power" was *exactly* what the parties bargained for in the Chugach and MEA PPAs.

Continued MOA participation on the EOC, pursuant to the terms of the Transition Agreement,[90] was explicitly contemplated in Section 4.2(B) of each of the PPAs. Chugach and MEA argue that the factual circumstances of the Acquisition and docket support an understanding that the surrender could not be lifted until the termination of the PPAs because otherwise, if AHP's voting rights are restored, the MOA will have veto power over decisions of Chugach and MEA with respect to the operation of the Eklutna project, "despite the facts that (1) only Chugach and MEA rely on the ongoing operation of the Project as part of their ratepayer obligations, (2) the MOA is only responsible for 19% of Project costs, and (3) both MEA and Chugach have purchase

(907) 277-1604

options at the end of the PPA terms."[91] These are all concerns that are exclusive to Chugach and MEA, not the public interest. To the extent that Chugach and MEA might have had these concerns about AHP having veto power over decisions of Chugach and MEA with respect to the operation of the Eklutna project, these concerns would have all existed at the time the agreements were negotiated and before presentation to the Commission in the acquisition docket. The PPAs represent the bargained-for agreement between the MOA and Chugach and MEA, respectively. Neither Chugach nor MEA indicate that they believe they bargained for the MOA to give up its voting rights. Nothing in the record shows Chugach and MEA argued for such a requirement in the Acquisition Docket. If such a relinquishment term had been a requirement for the PPAs, the MOA likely would have required additional consideration for the concession of a decades-long relinquishment of its voting rights on the EOC for the duration of the PPAs.

Instead, the respective Sections 4.2(B) of both PPAs are unambiguous, and evince the clear understanding of all the parties to the agreements. Both agreements explicitly reference the MOA's EOC representative, and contain explicit terms and requirements regarding the MOA's EOC representative, such as the requirement that the MOA representative "shall make all decisions on the Operating Committee consistent with Prudent Utility Practice and the rights and obligations of the Parties" under the PPAs.[92] As previously briefed by AHP,[93] the Commission explicitly referenced this language in Order 39 and subsequent proceedings, but did not disapprove or require the removal of the language in Section 4.2 of the PPAs regarding the AHP representative. This is

[91] Chugach and MEA Joint Br. re Surrender Term at 19-20.

consistent with the understanding that if AHP acquires the expertise to again fully participate on the EOC, these terms will apply to implement the parties' bargained-for agreements. To the extent that Chugach and MEA ask the Commission to now reinterpret the surrender language to provide Chugach and MEA with a more advantageous agreement than which they bargained for, this request should be rejected. To the extent that part of the interpretation of Order 39 involves interpretation of the PPA contracts, this interpretation should "give effect to the parties' reasonable expectations."[94]

Chugach and MEA's other arguments that "[a] strict PPA-term Surrender term limit reading by the Commission is clearly supported" by other aspects from the Acquisition Docket similarly fail upon an examination of the record and the subsequent decisions of the Commission related to the Acquisition.

2. The fact that AHP sells power only to Chugach and MEA provides no support for a "strict PPA-term Surrender term limit reading" of the surrender language.

Chugach and MEA argue that a "strict PPA-term Surrender term limit" is supported by the fact that AHP's CPCN authorizes it only to sell wholesale power "from the Eklutna Hydroproject Switchyard" to Chugach and MEA pursuant to the two PPAs.[95] It is unclear why Chugach and MEA believe that the fact that the CPCN (currently) "serves one purpose: to enable MOA to meet its obligations under the Eklutna PPAs for at least the next 35 years" requires

[94] *Zamarello*, 321 P.3d at 393.

relinquishment of any say in operations of its property interest. The acquisition record is similarly silent on the issue. This argument fails.

3. Whether the Eklutna PPA is "more akin to a deferred payment mechanism [for the acquisition] than a power purchase agreement" has no bearing on the importance of AHP's voting seat on the EOC.

Chugach and MEA argue that because the terms that Chugach bargained for and agreed to in its PPA provide for Chugach to be responsible for "payment of all capital expenditures and operating and maintenance expenses that are payable with respect to the Chugach Portion," of AHP power, and because Chugach's payments to AHP are not correlated with the amount of generation, that the MOA has therefore "ceded its liabilities and all of its costs associated with approximately 64% of its ownership share to Chugach."[96] Chugach and MEA argue that because of its increased responsibility for the "Chugach portion" during the PPA, the MOA's voting seat could be "determined to be less important under a deferred payment mechanism contract, rather than under a long-term PPA with typical performance obligations on the seller rather than on the offtaker."[97]

Even if this statement were true, it ignores the MOA's continued ownership responsibilities under the MEA PPA. Additionally, the MOA asks, "important to *whom*?" Perhaps Chugach and MEA believe it is less important, but the MOA does not. At a minimum, the MOA continues to be responsible for 19.05% of Eklutna Project operations, maintenance, capital, and environmental compliance costs. The MOA has a duty under its Charter to manage its certificated

utility in a manner that is "in accordance with the general standards common to utilities providing the same utility service,"[98] and has a duty to the citizens of Anchorage to responsibly manage its property assets.[99] Chugach and MEA's subjective opinion on the "importance" of the MOA's voting rights on the EOC fails to support how a mandatory 35-plus year surrender of voting rights in order to obtain a CPCN has any "reasonable basis in the law" or is supported by the facts of the record. Nor is it supported by the language of Order 39. In issuing a CPCN, the Commission is concerned with the relevant standards for a CPCN, not what might be subjectively important to certain contract parties. It considers whether the "public convenience and necessity require or will require the service."[100] Conditions put on certificates therefore must be linked to public convenience and necessity, rather than micromanagement of how the Commission might prefer to arrange contractual agreements or see a utility managed. The Commission has consistently held that its role is not to second guess utility management decisions or make strategic decisions for utilities.[101]

Chugach and MEA cite to the MOA's continued prudent operation obligations under the MEA PPA that will last the "duration of the MEA PPA" as another reason the MOA should not be allowed to reinstitute its voting rights. But this continued responsibility supports the opposite conclusion, that the Commission should allow the MOA to meet its contractual obligations by participating in the prudent operation of the Eklutna Project once it had acquired the relevant expertise during the duration of the MEA PPA.

4. There is no evidence in the record that the Commission considered the purchase option in the PPAs in establishing the surrender term.

Chugach and MEA argue that the fact that the PPAs contain purchase options for the subject portions of MOA's ownership shares for "then-book value" means that MOA will in that event have no interest or stake in the Eklutna project beyond the PPA terms. Thus, they argue,

---

Chugach's plan to replace Beluga Unit 8, which is a management decision, but to ascertain whether Chugach's plan is the outcome of rigorous and disciplined economic analysis and logical construct, i.e., Chugach has not made this plan on a whim, as a means of penalizing wholesale customers with additional depreciation charges before the termination of the wholesale contract but has made **a decision that has its foundation in disciplined analysis and is supported by the actions of its Board of Directors**"); Order No. U-96-037(46) at 12-13 (March 15, 2002) (discussing how certain debt management decisions "**are best left to the expertise of the utility as long as the practices followed by the utility are within the range of reasonable management practices**"); Order No. U-85-013(11) at 12-13 (June 26, 1986) (stating that "[w] hat is clear . . . is that the alleged economies advanced by Chugach were precisely the sort anticipated by HEA management as the near term cost of pursuing an individual power production policy, that over the longer run, would be calculated to result in lower costs and other benefits for HEA ratepayers," and that "this is a **prime area of cooperative utility management discretion and the Commission has been presented with no cause to question the soundness of management's decision**"); Order No. U-81-052(28)/U-81-053(8)/U-83-010(1) at 21 (Feb. 18, 1983) (holding that "[i] n an effort to carry out this responsibility [of ensuring ratepayers are provided satisfactory service at the least possible cost, consistent with prudent and efficient management practices] judiciously and **without interposing Commission preference in place of management discretion**, the Commission expressly adopts, as modified infra, the three part standard developed by the Maine Public Service Commission in *Pollis v. New England Telephone Company* to determine whether utility management practices and services are unreasonable or inadequate") (bold emphasis added).

a surrender lasting as long as the PPAs, that cannot be lifted, makes sense. First, Chugach and MEA (one or both) *might* not ultimately purchase the MOA's interest, in which case, the MOA will continue to have an ownership interest. Second, the MOA has an interest in participating on the EOC to ensure that prudent utility practices are continued for the duration of the PPA terms.

5. There is no evidence in the record to support Chugach and MEA's assertion that the existence of MOA's "veto" power associated with its voting rights supports a decades-long surrender.

Finally, Chugach and MEA cite again to the "veto" power that the MOA has as majority owner on the EOC. First, Chugach argues that in practice, this "veto" power was rarely exercised, as "disagreements resulting in formal votes were not common given that all parties were incented to run the project as cost effectively as possible."[102] This statement does not appear to weigh in favor of *preventing* the MOA's participation for the next three decades, as the MOA will continue to be required to make EOC voting decisions consistent with prudent utility practice—including under its own municipal charter,[103] under the enforceable terms of the PPAs regarding prudent utility practice,[104] and under its certificate. Second, Chugach and MEA argue that because only they rely on the ongoing operation of the Eklutna Project as part of their ratepayer obligations, and the MOA is only responsible for 19% of the costs, that the MOA should not have voting rights. This argument ignores that (1) the MOA continues to have a majority 53.3% ownership interest, (2) the MOA continues to be responsible for a larger percentage of costs than MEA (16.67%), and

(3) Chugach and MEA previously *agreed* to the terms of the PPAs with continued MOA voting rights, for the 35-plus year term of the PPAs. Chugach and MEA now argue that protecting themselves from their own bargained-for agreement is a "public interest" consideration under the grant of a CPCN and that the Commission should reinterpret its surrender language to prevent AHP from reinstatement of voting rights. This argument fails, as does the argument that AHP is somehow not incentivized to conduct prudent utility practice or to comply with the PPAs.

More importantly, Chugach and MEA point to *nothing* in the record that shows the Commission previously considered any of these arguments and as a result determined the surrender should last a minimum of 35 years with no ability to lift it. Chugach and MEA argue that the record shows "[t]he underlying material facts behind the surrender remain unchanged."[105] They argue that Mark Corsentino worked at Anchorage Water and Wastewater Utility ("AWWU") in his current role at the time of the acquisition as well, and attempt to argue that "[t]he only thing that has changed is that the Fish and Wildlife implementation process progressed and the Anchorage Assembly did not like Chugach and MEA's Proposed Program."[106] They note that "going forward, implementation [of the Fish and Wildlife Program] will only be a small part of the many responsibilities of the EOC."[107]

To the extent that Chugach and MEA assert that the Commission needs to make factual determinations about issues such as the relevance of Mr. Corsentino's presence at the municipality at the time of the acquisition, or what types of decisions the EOC makes or will make

in the future, such determinations cannot be made on briefing limited to the question of a legal interpretation, and would need to be made in the context of the evidentiary hearing.[108] Further, these assertions are completely irrelevant to the question of what the language of the surrender means.

6. The Commission should decline to accept Chugach and MEA's invitation to expand the scope of this briefing and this docket.

Chugach and MEA next use their brief on interpretation of the language of Order 39 to argue that if the Commission does determine that AHP does not need to wait several more decades to reinstate voting rights, then the Commission should expand the scope of this docket and expand the requirements that AHP must meet beyond the condition placed on AHP's certificate through Order 39. Chugach and MEA make various factual arguments in support of this invitation for the Commission to expand the scope of this docket. Chugach and MEA cite to their prefiled responsive testimony in support of these arguments,[109] and ask the Commission to engage in detailed decision-making about how AHP can vote if its voting rights are restored. They also ask the Commission to modify the Transition Agreement and determine what decisions the EOC can and cannot make.[110] The Commission should reject this invitation to expand the scope of this docket in order to renegotiate the PPAs at this late date. The Commission has already held that nothing raised at hearing impacts the legal issues in this briefing, noting that "given the lack

[108] Further, whether or not Mr. Corsentino was employed at AWWU at the time was irrelevant. He was not, at the time, put forward as a possible EOC voting representative.

of responsive testimony relevant to the issues raised in the motion to dismiss it appears unlikely that reply testimony will be relevant to those issues."[111]

IV. Certificates can always be modified for good cause shown, and the Commission should do so here.

Even if the Commission were to determine that Order 39 mandated a minimum surrender term of at least 35 years that could not be lifted, CPCNs are not ossified documents set in stone. CPCNs and their conditions may be modified, "[u]pon complaint or upon its own motion," after notice and opportunity to be heard "and for good cause shown."[112] Good cause includes "the requirements of public convenience and necessity."[113] Good cause exists here because to the extent the language of Order 39 indicated a decades-long surrender of voting rights, it was ambiguous. Further, AHP has a right to participate in management of its own property, and there is no reason why it must wait three more decades to do so when it is able to present a suitable EOC representative to the Commission now. Here, the Commission could choose to construe AHP's Request for Acknowledgment as a request to modify its certificate to conform with AHP's understanding of the surrender requirement, and respectively modify procedures accordingly in this matter to ensure fairness to all parties, or AHP could simply file a new application to modify its certificate.

[111] Order No. U-24-024(6), October 25, 2024.

CONCLUSION

For the reasons explained above, and in AHP's September 18, 2024, brief, any "minimum term" on the MOA's surrender is subject to the MOA's showing to the Commission that it has acquired the required expertise to participate as a voting member of the EOC.

IN THE SUPERIOR COURT OF THE STATE OF ALASKA
THIRD JUDICIAL DISTRICT AT ANCHORAGE

ANCHORAGE MUNICIPAL ASSEMBLY, Appellant, v. REGULATORY COMMISSION OF ALASKA; MUNICIPALITY OF ANCHORAGE, d/b/a MUNICIPAL LIGHT AND POWER; ENSTAR NATURAL GAS CO.; PROVIDENCE HEALTH & SERVICES; GOLDEN VALLEY ELECTRIC ASSOCIATION, INC.; STATE OF ALASKA; ALASKA ENERGY AUTHORITY; HOMER ELECTRIC ASSOCIATION, INC.; ALASKA ELECTRIC AND ENERGY COOP., INC.; MATANUSKA ELECTRIC ASSOCIATION, INC.; CHUGACH ELECTRIC ASSOCIATION, INC.; JL PROPERTIES; ALASKA NATIVE HEALTH CONSORTIUM, Appellees.	CASE NO. 3AN-24-06001 CI

JOINDER IN CORRECTED MOTION TO DISMISS OR, IN THE ALTERNATIVE, TO STAY APPEAL

Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association ("MEA") hereby join in the Regulatory Commission of Alaska's ("RCA") Corrected Motion to Dismiss, or in the Alternative, to Stay Appeal ("RCA Motion to Dismiss").[1] The RCA argues that the Anchorage Municipal Assembly ("Assembly") cannot seek to reinstate the Municipality of Anchorage's ("Municipality") voting rights for the operation of the Eklutna Hydroelectric Project by re-opening a docket four years after the RCA conditioned approval of a major asset purchase

[1] Corrected Motion to Dismiss or, in the Alternative, to Stay Appeal at 1-2, 4, Oct. 28, 2024 ("RCA Motion to Dismiss").

on surrender of those rights. Chugach and MEA join in the RCA's arguments that the Assembly has failed to exhaust administrative remedies, cannot bring a moot claim, and lacks standing to challenge the RCA's decision. Further, even if the Court elected to hear this dispute, Chugach and MEA agree with the RCA that the Court should refrain from doing so until the resolution of RCA Docket U-24-024, addressing the expertise and voting capacity of the Municipality.[2]

I. Additional Argument for Dismissal

In addition to the arguments advanced by the RCA, Chugach and MEA also move to dismiss the Assembly's appeal on the basis that the RCA did not have the authority to re-open RCA Docket U-18-102. Without a timely motion for reconsideration or justified exception to the general rule, the RCA was required to deny the Assembly's motion to reopen the docket as a matter of law.

A motion for reconsideration is the RCA's only statutory path to re-evaluating a final order.[3] As stated in the RCA Motion to Dismiss, the RCA "construed the Assembly's motion as a request for reconsideration" because it "does not have a procedure to reopen dockets."[4] The RCA was forced to deny the motion for reconsideration because the Assembly missed the 15-day statutory deadline by several years.[5]

Granting the RCA Motion to Dismiss is critical to maintaining the authority and legitimacy of the RCA's final orders because regulated entities and private parties rely on their requirements and finality. The RCA's decision approving Chugach's purchase of the Municipality's assets ("Order 39") was conditioned on the Municipality surrendering its voting rights for the Eklutna Hydroelectric Project.[6] The parties to the RCA proceeding relied on Order 39 in the following pertinent actions (among others):

---

[2] *Id*.

[3] 3 AAC 48.105; s*ee also*, 3 AAC 48.090 (discussing re-opening dockets if a final order is reconsidered by the RCA or subject to judicial review by a court).

[4] RCA Motion to Dismiss at 5.

[5] *Id*.

[6] RCA Order U-19-020 (39) at 147 (May 28, 2020).

(1) On October 27, 2020, the Municipality, Chugach, and MEA executed a Surrender of Eklutna Operating Committee (EOC) Voting Rights ("Surrender"), which the Municipality filed with the RCA on October 30, 2020 (see **Attachment A**);

(2) On October 30, 2020, Chugach and the Municipality closed the transaction in which Chugach issued bonds in the amount of $800 million to acquire most of the assets of Municipal Light & Power ("ML&P") from the Municipality (see **Attachment B)**;

(3) From October 30, 2020, through June 30, 2024, Chugach, MEA, and the Municipality cooperated fully on a consensus basis required under the Surrender in conducting the study process, consultation, engineering, and negotiations to execute on the requirements to implement the 1991 Agreement[7] (incurring costs of nearly $8 million), which resulted in the Final Fish and Wildlife Program approved by the Governor on October 2, 2024 (attached to RCA Motion to Dismiss); and

(4) from October 30, 2020, to date, the Municipality has sold power from the Eklutna Hydroelectric Project to Chugach and MEA under separate power purchase agreements approved by the RCA in Order 39, pursuant to which Chugach and MEA have paid more than $12 million under such contracts and, at least with respect to Chugach, under out-of-market payment and cost responsibility provisions unrelated to the power delivered as part of the economic bargain of the ML&P transaction.

As the RCA explained, Chugach expended considerable resources financing and incorporating the ML&P assets into Chugach's operations all premised on the assumed finality of the RCA's decision and its associated conditions for approval. Similarly, Chugach and MEA implemented the process required under the 1991 Agreement in reliance on the Surrender and the decision-making process it required. Chugach and MEA have paid the Municipality considerable sums for Eklutna Hydroelectric Project power and Chugach and MEA have paid the costs of that power, in reliance on the finality of Order 39.

---

[7] Agreement Between the Municipality of Anchorage d/b/a Anchorage Municipal Light and Power, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., U.S. Fish and Wildlife Service, National Marine Fisheries Service, Alaska Energy Authority, and the State of Alaska Relative to the Eklutna and Snettisham Hydroelectric Projects (Aug. 7, 1991) ("1991 Agreement").

Finally, it is worth noting that other non-parties have reliance interests in the finality of the RCA's orders. From Chugach's bondholders who helped finance the ML&P transaction to the state and federal agencies with whom Chugach, MEA, and Municipality negotiated the Final Fish and Wildlife Program, to the Governor (and his staff) who approved that program earlier this month, countless other entities, not regulated by the RCA and not parties in the long-since closed docket, have also relied on the finality of RCA Order 39.

Consequently, reopening the docket four years after the closing of the ML&P transaction in order to change the conditions the RCA imposed in Order 39 in order to approve the ML&P transaction would undermine the authority, legitimacy and reliability of the RCA's order and the statutory appeal period.

II. Conclusion

For the reasons stated above, Chugach and MEA join the RCA in respectfully requesting that this Court to dismiss the Assembly's appeal. If the Court denies the RCA Motion to Dismiss, Chugach and MEA alternatively request that the appeal be stayed pending resolution of the related matter at RCA Docket U-24-024.

In Order No. U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39"), the Regulatory Commission of Alaska ("RCA") approved, subject to conditions, the sale to Chugach Electric Association, Inc. ("Chugach") of most of the electric utility assets of the Municipality of Anchorage d/b/a Municipal Light and Power ("ML&P") ("Transaction"). Order 39 also approved the MOA-Chugach Eklutna Power Purchase Agreement ("Chugach PPA"), subject to conditions, effective on the date of closing of the Transaction. In Order 39, the RCA granted to the MOA, effective upon the date of closing of the Transaction, a certificate of public convenience and necessity authorizing ownership and provision of generation electric utility service to the public for compensation from its share of Eklutna, subject to conditions, including that before the effective date of the Chugach PPA or the MOA-Matanuska Electric Association, Inc. ("MEA") Power Purchase Agreement ("MEA PPA"), the MOA has filed documentation that it has surrendered its voting rights on the Eklutna Operating Committee ("EOC").[1] In Order 39, the RCA required that the MOA's surrender of its EOC voting rights "cannot be lifted until such time as [the MOA] has shown to our satisfaction that [the MOA] has acquired the expertise required to fully participate as voting member of the EOC."[2]

Enclosed as Exhibit 1 is a Surrender of Eklutna Operating Committee Voting Rights document, signed by ML&P, Chugach, and MEA. The Surrender will remain in effect until the MOA shows to the RCA's satisfaction that the MOA has acquired the expertise required to participate as a voting member of the EOC (or upon expiration or termination of the terms of the Chugach PPA and the MEA PPA).

Exhibit 1

October 27, 2020

Surrender of Eklutna Operating Committee (EOC) Voting Rights

In accordance with the requirements of order U-18-102(44), the Municipality of Anchorage, dba Municipal Light & Power(ML&P), hereby surrenders its voting rights as an EOC member and under the Fish and Wildlife Agreement effective as of the Closing of the Asset Purchase Agreement between ML&P and Chugach Electric Association (Chugach). This surrender of voting rights shall remain in effect until ML&P's successor complies with the RCA requirements pertaining to qualifications for ML&P's representation on the EOC.

Until ML&P's successor complies with the qualification terms of RCA order U-18-102(44), all EOC decisions will be by unanimous vote of Chugach and Matanuska Electric Association, Inc. (MEA). Eklutna hydro operations, dispatch and maintenance will continue to follow past practices and policies unless changes are approved through the EOC process.

Subject: ***Notice of Transaction Closing - Chugach Electric Association, Inc.'s Acquisition of the Municipality of Anchorage d/b/a Municipal Light & Power; Compliance with Order No. U-18-102(44)/U-19-020(39)/U-19-021(39)***

Dear Commissioners:

The Regulatory Commission of Alaska (Commission) issued Order No. U-18-102(44)/U-19-020(39)/U-19-021(39) (Order 39) on May 28, 2020, conditionally approving Chugach Electric Association, Inc.'s (Chugach) acquisition of the Municipality of Anchorage (MOA) d/b/a Municipal Light & Power (ML&P). Ordering paragraph 26 requires that Chugach file notice of the closing date within ten days following close of the acquisition.

I am pleased to announce that on October 30, 2020, Chugach closed on the acquisition of ML&P. Effective at approximately 7:00 a.m. on October 30, 2020, Chugach began providing electric service to all customers previously served by ML&P under Certificate of Public Convenience and Necessity (CPCN) No. 121, and former ML&P employees became employees of Chugach. In addition, Chugach was successful on its financing of the acquisition, which was completed with the issuance of bonds totaling $800 million at a weighted average interest rate of 2.73 percent.

Chugach will submit its tariff adoption notice for CPCN No. 121 to the Commission on November 2, 2020 and will file ML&P's tariff sheets in Chugach's name by November 4, 2020. Chugach will be submitting its cost of power adjustment factors and the Beluga River Unit gas transfer price filings by November 17, 2020 for rates effective January 1, 2021 for all members served under CPCN Nos. 8 and 121.[1]

The closing of the acquisition is the culmination of extensive work efforts among many parties, including the Regulatory Commission of Alaska. We express our sincere appreciation for the hard work and dedication that went into this achievement that we believe will provide benefits to our members for years to come.

[1] The Cost of Power Adjustment filing will also include the Restricted Rate Reduction account and Beluga River Unit Contributed Capital rebates to North District members, and the Beluga River Unit Contributed Capital surcharge to South District members.

Sincerely,

CHUGACH ELECTRIC ASSOCIATION, INC.

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA
THIRD JUDICIAL DISTRICT AT ANCHORAGE

ANCHORAGE MUNICIPAL ASSEMBLY, Appellant, v. REGULATORY COMMISSION OF ALASKA; MUNICIPALITY OF ANCHORAGE, d/b/a MUNICIPAL LIGHT AND POWER; ENSTAR NATURAL GAS CO.: PROVIDENCE HEALTHY & SERVICES; GOLDEN VALLEY ELECTRIC ASSOCIATION, INC.: STATE OF ALASKA; ALASKA ENERGY AUTHORITY; HOMER ELECTRIC ASSOCIATION, INC.; ALASKA ELECTRIC AND ENERGY COOP., INC.; MATANUSKA ELECTRIC ASSOCIATION, INC.; CHUGACH ELECTRIC ASSOCIATION, INC.; JL PROPERTIES; ALASKA NATIVE HEALTH CONSORTIUM, Appellees.	)	Case No. 3AN-24-06001 CI

CORRECTED MOTION TO DISMISS OR, IN THE ALTERNATIVE, TO STAY APPEAL

Under Appellate Rule 203,[1] the Regulatory Commission of Alaska (RCA) moves to dismiss the Anchorage Municipal Assembly's appeal. The Assembly's appeal should be dismissed for three reasons. First, the appeal attempts to challenge RCA orders in dockets that were closed four years ago—the Assembly failed to exhaust administrative remedies in those dockets in 2020 and cannot now timely appeal those orders. Second, the core issues raised by the Assembly, both in its petition to the RCA and on appeal,

[1] Alaska R. App. P. 203 ("The appellate court may at any time entertain a motion to dismiss the appeal . . . .").

DEPARTMENT OF LAW
OFFICE OF THE ATTORNEY GENERAL
Anchorage Branch

have been mooted or resolved by Alaska Governor Mike Dunleavy's approval of the Final Fish and Wildlife Program on October 2, 2024. Third, because the Assembly lacked a direct interest in the underlying RCA proceedings, was not factually aggrieved by them, and failed to participate when the dockets were open, the Assembly lacks standing to challenge and appeal the RCA's decisions in the underlying dockets.[2]

Alternatively, the RCA requests that this appeal be stayed pending the resolution of a related RCA matter, RCA Docket U-24-024, *In the Matter of the Petition filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgement of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee.* In that matter, the Municipality of Anchorage is seeking acknowledgement by the RCA that it has acquired the expertise required for it to participate as a voting member on the Eklutna Operating Committee (EOC). That matter directly relates to the issues raised by the Assembly in this appeal. Here, the Assembly asserts that the "RCA erred when it denied the Assembly's request to modify RCA Order 39 to allow the Municipality to vote as a member of the [EOC]," and otherwise seeks to deem unlawful the RCA's May 2020 Order 39.[3] The RCA's decision in the Municipality's pending petition may fundamentally change or resolve some or all of the issues on appeal. If this appeal is not wholly dismissed, the Court should stay the appellate proceedings until RCA docket U-24-024 is resolved and all administrative and appellate remedies from that docket are exhausted.

I. Relevant Background[4]

In 1997, the Eklutna Hydroelectric Project was sold by the federal government to three utilities: Matanuska Electric Company, Inc. (MEA), Chugach Electric Company, Inc (Chugach), and the Municipality of Anchorage d/b/a Municipal Light and Power (ML&P). The utilities agreed to operate the project through the Eklutna Operating Committee (EOC). As part of the sale, the utilities were required to submit a proposed Fish and Wildlife Plan to the governor for final approval by October 2, 2024.

Beginning in 2019, ML&P sought approval from the RCA to sell to Chugach most of the ML&P's assets. As part of the transaction, the Municipality would retain a 53.33% ownership interest in the Eklutna Hydroelectric Project. RCA opened Dockets U-19-020, U-19-021, and U-18-102 to consider approval of the sales agreement. On May 28, 2020, the RCA issued a conditional approval of the sale (Order 39). One of the conditions of the sale was that the Municipality would surrender its voting rights on the EOC for a specified term, The Municipality's voting rights would not be restored until it could demonstrate to the satisfaction of the RCA that it had acquired the requisite expertise to participate as a voting member of the EOC. On October 30, 2020, the MOA filed a notice of surrender of its voting rights on the EOC in conformance with the RCA's condition. On the same date, Chugach filed notice that the sales transaction had closed. On December 23, 2020, the RCA closed it dockets on the matter.

[4] Factual and procedural background for this appeal can be found in RCA's April 19, 2024 Order U-10-102(52)/U-19-020(47)/U-19-021(47). Attachment A to Notice of Appeal, Apr. 24, 2024. Relevant portions will be summarized here to assist the Court in reviewing this motion.

DEPARTMENT OF LAW
OFFICE OF THE ATTORNEY GENERAL
Anchorage Branch
1031 W. 4th Avenue, Suite 200
Anchorage, AK 99501
Phone: (907) 269-5100 Fax: (907) 276-3697

More than three years later, on April 15, 2024, the Assembly filed motions requesting that the RCA allow it to intervene, reopen the dockets related to the sale, and modify its May 2020 Order 39 conditionally approving the sale. In its motions, the Assembly asserted that it disagreed with a proposed Fish and Wildlife plan prepared by the EOC. The Assembly sought to regain its vote on the EOC in order to delay or prevent the transmittal of the EOC's proposed Fish and Wildlife Plan to the governor. The Assembly asserted that it should be allowed to approve the final Fish and Wildlife Program before the plan was transmitted to the governor.

On April 19, 2024, the RCA denied the Assembly's motion to reopen the dockets and modify Order 39. The RCA found that the motion was a request for reconsideration of Order 39. Under RCA regulation 3 AAC 48.105, a petition for reconsideration is due within fifteen days of the date of the order, making the Assembly's motion over three years late. The RCA denied the motion as untimely. The RCA also denied the motion to intervene as the dockets had been closed for over three years and therefore the request was moot.

The Assembly filed the current appeal on April 24, 2024.

On October 2, 2024, the governor approved the final Fish and Wildlife Program. The program incorporated requests from the Municipality, including a request to evaluate a pumped storage hydro alternative.

II. Arguments for Dismissal of Appeal

A. The appeal should be dismissed because the Assembly failed to exhaust administrative remedies and cannot now appeal a 2020 order.

DEPARTMENT OF LAW
OFFICE OF THE ATTORNEY GENERAL
Anchorage Branch
1031 W. 4th Avenue, Suite 200
Anchorage, AK 99501
Phone: (907) 269-5100 Fax: (907) 276-3697

The Assembly's appeal relates back to the RCA's order from May 28, 2020 in dockets U-19-020, U-19-021, and U-18-102 (Order 39). In its Statement of Points on Appeal, the Assembly asserts that the RCA lacked jurisdiction to issue Order 39, that Order 39 violates the law, that the RCA should have modified Order 39, and that the RCA should have allowed the Assembly to intervene to pursue its challenge to Order 39.[5] The time for the Assembly to challenge Order 39 has long passed.

To the extent the Assembly now attempts to appeal the RCA's substantive rulings in Order 39, that appeal is clearly untimely. The Assembly filed its motion with the RCA to reopen dockets and to modify Order 39 on April 15, 2024—more than three years after Order 39 was issued (May 28, 2020) and the dockets were closed (December 23, 2020). The RCA does not have a procedure to reopen dockets. In fact, the RCA is required to abide by strict statutory deadlines for issuing a final order and closing a docket.[6] The Assembly's attempt to reopen a docket from 2020 runs contrary to these statutory deadlines. Due to its inability to reopen a docket that had been closed for many years, the RCA construed the Assembly's motion as a request for reconsideration of the RCA's 2020 decision approving the sale of ML&P assets to Chugach. Under RCA regulations at 3 AAC 48.105, a petition for reconsideration must filed within fifteen days of the date the order is issued. The Assembly's petition was filed several *years* beyond that deadline. Now, the Assembly asserts on appeal that Order should be modified "to allow the Municipality to vote on the EOC," that "Order 39 violates state

---

5 Statement of Points on Appeal 1-3, Apr. 24, 2024.

6 AS 42.05.175.

and federal law," and that the "RCA lacked jurisdiction to enter Order 39."[7] Under Alaska Rule of Appellate Procedure 602(a)(2), an appeal may be filed from an administrative agency within thirty days from the date the decision is mailed or distributed. The Assembly's attempts to challenge Order 39 either through an RCA motion or the present appeal are untimely and should therefore be dismissed.

To the extent the Assembly attempts to appeal the RCA's procedural rulings in refusing reopen the dockets or allow intervention so that Order 39 can be modified, the Assembly failed to exhaust administrative remedies that would have been available to it had it attempted to participate in 2020. The exhaustion doctrine forecloses judicial relief "until the available administrative remedies have been exhausted."[8] In evaluating exhaustion, courts consider whether it is required, whether the complainant exhausted remedies, and whether a failure to do so is excused.[9]

The Assembly needed to exhaust administrative remedies by timely attempting to participate in the dockets in 2020, but it failed to do so. The Alaska Supreme Court has held that exhaustion of administrative remedies at the RCA is required before a party can challenge an RCA ruling because exhaustion allows the RCA to "make a factual record, apply its expertise, and to correct its own errors so as to moot judicial

DEPARTMENT OF LAW

9 *Id.*

controversies."[10] These factors weigh heavily in favor of a similar exhaustion requirement here. As the RCA explained, the Assembly could have attempted to modify Order 39 before the dockets and underlying transaction closed by moving to intervene and filing a petition for reconsideration.[11] If the Assembly had pursued that remedy at that time, the RCA "could have either found an alternative solution to the lack of managerial and technical fitness of [the Municipality] or . . . could have rejected the [ML&P–Chugach purchase agreement] entirely." That is, if the Assembly had pursued administrative remedies when they were available the RCA could have made a record, applied its expertise, and mooted this controversy.

The Assembly's failure to exhaust administrative remedies should not be excused. The time for the Assembly to attempt to intervene and participate in this matter happened years ago. In *City of Valdez v. Regulatory Commission of Alaska*, the RCA approved the transfer of the Trans-Alaska Pipeline certificate of public convenience and necessity from BP to Harvest, and after the underlying sale had already closed, the City of Valdez appealed the RCA's final order.[12] The Alaska Supreme Court held Valdez failed to exhaust administrative remedies to challenge the order.[13] Valdez never petitioned to intervene, never filed a protest, and failed to otherwise "engage meaningfully in the administrative process"—giving the RCA no "opportunity to

address Valdez's objections by developing a factual record, applying its expertise, or correcting any errors it may have made."[14] The Assembly's failure to act here before the closure of the ML&P–Chugach transaction is directly parallel. The Assembly failed to take any action for over three years and not until after the EOC released its draft plan for the Fish and Wildlife Program and neared transmittal to the governor. The Assembly may argue that it waited to file its motions with the RCA until the Assembly had passed ordinances purporting to prohibit the EOC from submitting the Fish and Wildlife Program to the governor without assembly approval.[15] But new ordinances do no excuse the Assembly's failure to participate before the RCA, move to intervene, seek to participate when the dockets were open—or seek timely reconsideration—to set aside Order 39 or modify it to preserve the Municipality's vote. The Assembly should not be permitted to now reopen issues that have been resolved for years. As noted in the RCA's order denying the Assembly's motions, "The relief the Anchorage Assembly seeks in these dockets will affect the substantive rights of others"—the transaction under which Chugach acquired the majority of ML&P assets has been closed for years and "Chugach has expended considerable resources incorporating those assets into Chugach's operations, that transaction can no longer be undone."[16]

DEPARTMENT OF LAW
OFFICE OF THE ATTORNEY GENERAL
Anchorage Branch
1031 W. 4th Avenue, Suite 200
Anchorage, AK 99501
Phone: (907) 269-5100 Fax: (907) 276-3697

14 *Id.* at 1084-85.

15 *See* RCA Order U-10-102(52)/U-19-020(47)/U-19-021(47) at 4 (Apr. 19, 2024), Attachment A to Notice of Appeal, Apr. 24, 2024.

16 *See* RCA Order U-10-102(52)/U-19-020(47)/U-19-021(47) at 3 (Apr. 19, 2024), Attachment A to Notice of Appeal, Apr. 24, 2024.

For these reasons, the Assembly's appeal should be dismissed as untimely and for failing to exhaust administrative remedies.

B. The appeal should be dismissed as moot.

The Assembly has been clear that the original underlying motions before the RCA, and this appeal of those motions, are directed towards restoring the Municipality's voting rights on the EOC—specifically as they relate to the development of the Fish and Wildlife program—and giving the Assembly the opportunity to approve or reject the proposed Fish and Wildlife Program before it was transmitted to the governor. But Fish and Wildlife Program was sent to the governor and, on October 2, 2024, the governor approved it.[17] The Assembly's attempt to reopen the RCA docket, modify Order 39, and appeal to the superior court in order to prevent the transmittal of the Fish and Wildlife Program to the governor is now moot.

The governor's approval of the final Fish and Wildlife Program renders the Assembly's appeal moot because it ends the controversy that led to the actions before the RCA and this appeal. "A claim is moot if it is no longer a present, live controversy, and the party bringing the action would not be entitled to relief, even if it prevails."[18] The Assembly has been clear that the reason for its actions before the RCA have been

DEPARTMENT OF LAW
OFFICE OF THE ATTORNEY GENERAL

1031 W. 4th Avenue, Suite 200
Anchorage, AK 99501
Phone: (907) 269-5100 Fax: (907) 276-3697

[17] Because it is a matter of "public record," this Court can take judicial notice of the Governor's decision on the Fish and Wildlife Program. *See Pedersen v. Blythe*, 292 P.3d 182, 185 (Alaska 2012) (explaining that "matters of public record (including other court proceedings)" fall within the scope of "strict judicial notice"); *see also* Exhibit A, Governor Mike Dunleavy, In the matter of the Eklutna River Fish & Wildlife Program (Oct. 2, 2024).

[18] *City of Valdez*, 548 P.3d at 1080 (quoting *Fairbanks Fire Fighters Ass'n, Loc. 1324 v. City of Fairbanks*, 48 P.3d 1165, 1167 (Alaska 2002)).

directed at reinstating the Municipality's voting rights so that it could vote on the Fish and Wildlife Program before it goes to the governor. But the governor has received the plan, reviewed it, and with modifications, approved it. The final decision on the Fish and Wildlife Program indicates that the governor considered comments from interests outside of the EOC, including a joint resolution from the Municipality of Anchorage and the Native Village of Eklutna dated September 5, 2024. The governor accepted the request from this joint resolution to evaluate a pumped storage hydro alternative.

The result that the Assembly was seeking in these matters is now foreclosed. The RCA can neither go back in time, give the Municipality a vote on the EOC and the Assembly a veto on the Fish and Wildlife Program, and prevent the governor's decision, nor can the RCA stop the EOC's implementation of the governor-approved plan.[19] The Assembly might cite the mootness holding in *City of Valdez*, where the Alaska Supreme Court held that Valdez's challenge to RCA rulings related to the then-closed Trans–Alaska Pipeline System transfer were not moot because they included disputes over access to confidential documents that may be "relevant to Valdez's interests in future proceedings before the RCA."[20] But there are no present controversies here that could give the Assembly similar prospective relief. If the Assembly wishes to challenge or modify Order 39 to *preserve* the Municipality's voting rights on the EOC, it had to do

DEPARTMENT OF LAW
OFFICE OF THE ATTORNEY GENERAL
Anchorage Branch
1031 W. 4th Avenue, Suite 200
Anchorage, AK 99501
Phone: (907) 269-5100 Fax: (907) 276-3697

[19] The governor's letter relating to the Final Fish and Wildlife Program notes that it "does not provide any party the authority to unilaterally suspend or delay implementation of the Final Program and therefore necessary the necessary work to design, permit, and construct" the infrastructure contemplated by the plan and to "evaluate" a gate system "is required to begin immediately." Exhibit A at 3.

[20] *Id.* at 1080.

that in 2020, but it failed to act—those issues are not timely and were not exhausted before the RCA when they were. If the Assembly wishes to *restore* the Municipality's voting rights by demonstrating its managerial and technical fitness, it must do that before the RCA in the separate pending matter, not by reopening the dockets here. And if the Assembly wishes to enforce ordinances that purport to *prohibit submission* of the Fish and Wildlife Program to the governor without Assembly approval, that issue is now plainly moot.

The Assembly failed to take any action for over three years and not until after the EOC released its draft plan for the Fish and Wildlife Program in April 2024. The governor's review of the plan has been moving forward since then. The issue is now resolved and this appeal should be dismissed as moot.

C. The Assembly lacks standing to challenge Order 39.

To have standing to appeal an RCA decision, a party "must (1) be directly interested in the proceeding, (2) be factually aggrieved by the decision, and (3) have participated in the proceeding."[21] The Assembly had no direct interest in the RCA's dockets below that were not already represented by the Municipality, it was not factually aggrieved by decisions that limited the Municipality's authority (not the Assembly's), and it wholly failed to participate in the dockets when they were open. The Assembly lacks standing to challenge or otherwise press for modifications of the RCA's Order 39.

[21] *City of Valdez*, 548 P.3d at 1076.

DEPARTMENT OF LAW
OFFICE OF THE ATTORNEY GENERAL
Anchorage Branch
1031 W. 4th Avenue, Suite 200
Anchorage, AK 99501
Phone: (907) 269-5100 Fax: (907) 276-3697

The Assembly had no direct interest in the RCA proceeds leading to Order 39. A "direct interest" requires a showing of a "'material' interest that is 'discrete' to some party or class of parties."[22] Regardless of how material the Assembly's interest may be in the RCA's Order 39, it is by no means *discrete*. The Assembly seeks to modify Order 39 "to allow the Municipality to vote."[23] That is the Municipality's interest, not the Assembly's. And that interest was represented by the Municipality in the underlying transaction and RCA dockets—where the Municipality "filed notice of surrender of its voting rights on the EOC" and then closed its transaction with Chugach.[24] The Assembly does not have the discrete interest needed to show standing; nor can it pursue changes to Order 39 on the Municipality's behalf.[25] The sole interest that the Assembly has articulated that is arguably its own is its asserted goal of fulfilling "its role as the Municipality's policy-making body responsible for reviewing and approving the proposed Fish and Wildlife Program."[26] But as explained above, any appeal on that basis is mooted by the governor's recent decision.

DEPARTMENT OF LAW
OFFICE OF THE ATTORNEY GENERAL
Anchorage Branch
1031 W. 4th Avenue, Suite 200
Anchorage, AK 99501
Phone: (907) 269-5100 Fax: (907) 276-3697

---

22 *Id.* at 1077.

23 Statement of Points on Appeal ¶ 4; *see also id.* at ¶¶ 6, 10-11.

24 *See* RCA Order U-10-102(52)/U-19-020(47)/U-19-021(47) at 2 (Apr. 19, 2024), Attachment A to Notice of Appeal, Apr. 24, 2024.

25 *Cf. Keller v. French*, 205 P.3d 299, 303 (Alaska 2009) (holding legislators lacked citizen-taxpayer standing to sue over investigation of governor's dismissal of commissioner when parties that were allegedly mistreated and the governor could have brought claims and did not); *Tuluksak Native Community v. Dep't of Health & Soc. Servs.*, 530 P.3d 359, 380 (Alaska 2023) (holding tribe lacked standing to raise violations of child's due process rights).

26 Statement of Points on Appeal ¶ 5.

For the same reason the Assembly has no direct interest, it is likewise not factually aggrieved by the RCA's decision. Factual aggrievement requires a "personal stake in the proceedings and an interest that was adversely affected."[27] Again, it is the Municipality's voting rights—not the Assembly's—that were removed in Order 39. The Assembly asserts that "Municipality ratepayers and taxpayers will be obligated to fund a plan and project into which their elected government has no input or ability to influence," and blames RCA Order 39 disallowing the *Municipality's* vote on the EOC.[28] The Municipality's voting rights are not the Assembly's personal stake and interest. To the extent that the Assembly argues that it had a personal stake and was aggrieved by the RCA's procedural rulings on its motions to reopen the docket and intervene, that is inapposite. The Assembly cannot acquire standing simply to challenge bare procedural rulings without a sufficient stake in the underlying merits.[29]

Finally, the Assembly did not participate in the proceedings leading to Order 39. The Assembly waited more than three years after Order 39 before it sought to intervene, reopen the dockets, and modify the proceedings. That untimely participation is not enough to provide the Assembly with standing.

28 Statement of Points on Appeal at ¶ 6.

29 *City of Valdez*, 548 P.3d at 1076 ("Standing 'is a rule of judicial self-restraint based on the principle that courts should not resolve abstract questions or issue advisory opinions.'" (quoting *Trs. for Alaska v. State, Dep't of Nat. Res.*, 736 P.2d 324, 327 (Alaska 1987))).

III. Argument for Stay of Appeal

There is currently a pending matter before the Regulatory Commission of Alaska, RCA docket number U-24-024, that relates to substantially similar issues, including whether the Municipality's voting rights on the EOC should be restored and issues related to the governor's recent decision related to the Fish and Wildlife program.

In that RCA matter, the Municipality is seeking acknowledgement by the RCA that it has acquired the expertise required for it to participate as a voting member of the Eklutna Operating Committee (EOC), which was a condition of the RCA's Order 39 for restoration of voting rights. As that matter directly relates to the issues pending in this appeal, and the RCA's final decision may fundamentally change or resolve some or all issues on appeal, the RCA asks that if this Court declines to dismiss the Assembly's appeal that it stay the appeal until such time as the RCA issues a final decision in U-24-024 and all administrative remedies and appellate avenues are exhausted.

IV. Conclusion

For the reasons stated above, the RCA asks this Court to dismiss the Assembly's appeal. If the Court denies the motion to dismiss, the RCA alternatively requests that the appeal be stayed pending the resolution of the related matter at RCA Docket U-24-024.

STATE OF ALASKA

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners: John M. Espindola, Chairman
Robert M. Pickett
John C. Springsteen

In the Matter of the Petition Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee	U-24-024

OFFICE OF THE ATTORNEY GENERAL'S REPLY TO AHP'S OPPOSITION TO MOTION TO DISMISS

The Office of the Attorney General, Regulatory Affairs & Public Advocacy Section's (RAPA) motion to dismiss asserted two points: (1) the Municipality's request to have Mr. Corsentino recognized as the Municipality of Anchorage d/b/a Anchorage Hydropower's (AHP) voting representative on the Eklutna Operating Committee (EOC) was moot because the Governor approved the final Fish and Wildlife Program; and (2) the matter should be dismissed unless APH establishes that the Commission should set aside the minimum term of voting rights surrender in Order 39.[1]

//

[1] AG's Motion to Dismiss as Moot, October 15, 2024, at 5-8; *See also* Docket U-24-024, August 30, 2024, Prehearing Conference, Tr. 6:14-7:07; Order U-18-102(44)/U-19-020(39)/U-19-021(39) at 67 (Order 39).

(907) 334-2394, (907) 269-5100, (907) 276-3697 Fax

A. Dismissal for Mootness

The point of RAPA's motion to dismiss for mootness is: why now?

AHP argues that it has expressed broad interest in participation on the EOC, including that as an owner of AHP, the municipality has a "legitimate interest in exercising all rights of ownership."[2] But the reasons provided by AHP have existed in the years between the Municipality's surrender of voting rights and the current time period. The Municipality was content for over four years without a voting member on the EOC. The only difference appears to be the Assembly's recent dissatisfaction with the Fish and Wildlife Program, a program that has now been approved by the Governor.

B. Dismissal unless APH establishes that the Commission should set aside the minimum term of voting rights surrender in Order 39

The crux of AHP's case, both in briefing and in its opposition, is that even if Order 39 required a minimum term of surrender, that surrender can be "lifted" if AHP shows it has gained expertise.[3] This argument centers upon the language of Order 39 that has been the subject of extensive argument in this docket.

---

[2] AHP Opposition to Motion to Dismiss at 5.

[3] "As explained below, the correct reading of the language in question is…that while the surrender may have a minimum term, this surrender may be lifted (and the minimum term terminated) at the time that the MOA 'complies with the RCA requirements pertaining to qualifications for [MOA's] representation on the EOC.'" AHP's Brief Regarding Interpretation of Order 39, at 9; *Id.*; AHP's Reply Brief Regarding Interpretation of Order 39; AHP's Opposition to the Office of the Attorney General's Motion to Dismiss as Moot.

The problem is that setting aside the minimum surrender today is different than the "lifting" AHP believes was always available to it. The former would presumably require a finding that there is new evidentiary or legal support for changing what was a valid restriction at the time, while the latter would presumably require a finding that there was never a valid restriction. Judge Walker recognized this when he stated:

> What I do not find in either the notice and request for acknowledgement or in the motion for expedited consideration or the attachments to these filings is any evidence or discussion of why the Commission should set aside the minimum term of voting rights surrender required in [Order 39].[4]

AHP has not raised any reason to set aside the minimum term. Instead, it relies on its interpretation of Order 39 as always allowing it to gain expertise and end the surrender. In essence, AHP has rejected the premise of the Commission's question rather than answer it. To the extent AHP disagrees with the minimum term requirement, it should have timely challenged that after Order 39 was issued. Because AHP has not shown why the Commission should set aside the minimum term of voting rights surrender, the Commission should grant RAPA's motion to dismiss.

C. Conclusion

Based on the above arguments, AHP's Request for Acknowledgement should be dismissed as moot and/or dismissed because AHP has not justified a sufficient basis to set aside the minimum voting surrender term contained in Order 39.

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

THIRD JUDICIAL DISTRICT AT ANCHORAGE

ANCHORAGE MUNICIPAL ASSEMBLY, Appellant v. REGULATORY COMMISSION OF ALASKA, et al., Appellees.	)	Case No. 3AN-24-06001CI

MOTION TO STRIKE CEA & MEA'S JOINDER

Pursuant to Alaska Rule of Appellate Procedure 503, the Anchorage Municipal Assembly (the "Assembly") respectfully moves to strike the untimely Joinder filed on November 4, 2024 by Appellees Chugach Electric Association ("CEA") and Matanuska Electric Association ("MEA"). This Court should strike the Joinder because it raises "additional argument[s]" that were not raised until seven days after the October 28 motion to dismiss deadline (which had already been extended by one week).[1]

On November 1, counsel for all parties attended a scheduling hearing in which counsel for the Assembly proposed a November 26 deadline to file the

[1] *See* Order Granting Unopposed Motion for One-Week Extension of Dispositive Motions Deadline (Oct. 22, 2024).

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

Assembly's opposition to the RCA's "Motion to Dismiss, or In the Alternative, to Stay Appeal." At no point either before or during that hearing did counsel for CEA and MEA indicate that they intended to raise "additional argument[s]" in a subsequent filing.[2] Counsel for the Assembly have already begun drafting the Assembly's opposition to the RCA's motion. CEA and MEA should not be permitted to raise new factual issues and pile on "additional argument[s]" now.

Importantly—as the Assembly has consistently explained—time is of the essence in this appeal. At the original September 6 scheduling hearing, the Assembly requested a motion deadline to ensure an orderly and efficient appeal, specifically to avoid having to respond to out-of-the-blue motions.[3] But that is exactly what CEA and MEA have done with their untimely Joinder. The Assembly is not interested in delaying consideration of the RCA's motion to dismiss or an extension to file the Assembly's opposition. On the contrary, the Assembly believes this Court should rule on the RCA's motion as soon as practicable after the Assembly's opposition is filed and the motion becomes ripe on November 26. Then,

---

[2] *See* CEA & MEA Joinder in Corrected Motion to Dismiss or, in the Alternative, to Stay Appeal (Nov. 4, 2024) at 2.

[3] *See* Log Notes from September 6, 2024 Scheduling Conference. The Assembly pointed out that a motion deadline was necessary because the Assembly needed to know how many parties would be raising arguments for dismissal. There are at least seven other appellees in this appeal. How many of those appellees will also file untimely motions raising "additional argument[s]" if this Court allows CEA and MEA to do so? This Court should hold CEA and MEA (and every other appellee) to their non-objection to the motion deadline.

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

the parties can proceed to brief the merits of this appeal. CEA and MEA's "additional argument[s]" should not be permitted now, after the motion deadline has passed and the opposition due date has been set.

This Court should strike the untimely Joinder. The Assembly requests a ruling on this motion as soon as practical after the expiration of the seven-day period in which adverse parties may respond.[4]

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

THIRD JUDICIAL DISTRICT AT ANCHORAGE

ANCHORAGE MUNICIPAL ASSEMBLY, Appellant, v. REGULATORY COMMISSION OF ALASKA, et al., Appellees.	)	Case No. 3AN-24-06001CI

(PROPOSED) ORDER GRANTING MOTION TO STRIKE

Appellant Anchorage Municipal Assembly's motion to strike the untimely Joinder filed on November 4, 2024 by Appellees Chugach Electric Association ("CEA") and Matanuska Electric Association ("MEA") is hereby GRANTED.

On September 6, 2024, this Court set a deadline of October 21, 2024 for any party to file a motion to dismiss this appeal. This Court extended that deadline by seven days to October 28, 2024 upon motion by the Regulatory Commission of Alaska ("RCA"), and without opposition.[1] The RCA filed a Motion to Dismiss on October 28, 2024. This Court then held a scheduling conference on November 1,

[1] *See* Order Granting Unopposed Motion for One-Week Extension of Dispositive Motions Deadline (Oct. 22, 2024).

LANDYE BENNETT BLUMSTEIN LLP

2024, during which an opposition deadline was set, and no party requested additional time to raise additional arguments for dismissal.

On November 4, 2024, seven days after the extended motion deadline, and after the opposition deadline was set, CEA and MEA filed a Joinder to the RCA's Motion to Dismiss, raising additional arguments supporting dismissal. Because CEA and MEA's Joinder raises additional arguments that were not timely raised, the Assembly's motion to strike is GRANTED.

IT IS SO ORDERED.

DATED this _____ day of _____, 2024, at Anchorage, Alaska.

STATE OF ALASKA

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners: John M. Espindola, Chairman
Robert A. Doyle
Robert M. Pickett
John C. Springsteen

In the Matter of the Petition Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee	U-24-024

MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S MOTION FOR EXPEDITED CONSIDERATION OF ITS MOTION FOR ORAL ARGUMENT

The Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP") hereby moves the Regulatory Commission of Alaska ("Commission") for expedited consideration of its Motion for Oral Argument filed today, November 5, 2024.

In its Motion for Oral Argument, AHP requested the opportunity to present oral argument regarding whether Order U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39")[1] imposed a 35-plus year "minimum" term for the MOA's surrender of its voting rights on the Eklutna Operating Committee ("EOC"). That issue was the subject of briefing that is now complete. AHP also requested that oral argument be held regarding Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc.'s ("MEA's") Motion to Compel Discovery Responses, which will be ripe for decision by the close of November 6. AHP has requested that the Commission also allow oral argument on that motion as well, in particular to

[1] (May 28, 2020).

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

the extent oral argument will establish the scope of the hearing, thus assisting parties in hearing preparation. AHP stated in its motion that argument on the motion to compel could occur directly after argument on the briefing on surrender language, for purposes of administrative economy. AHP stated that while it would make itself available for any date for oral argument, it proposed Tuesday, November 12 at 10 am for the oral arguments.

AHP respectfully requests expedited consideration of its motion so that any argument may occur before the November 18, 2024 hearing in this matter. Oral argument on the issue of interpretation of the Order 39 surrender language will provide the Commission an opportunity for inquiry and will enable the development of a sound record. Oral argument on the Motion to Compel will assist in establishing the scope of the hearing.

AHP proposes that the Opposition to its Motion be filed by COB Wednesday, November 6, 2024, and any reply be filed December 7, 2024, so that a decision on its motion may be issued on December 8, 2024. Counsel for AHP emailed counsel for Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc. ("MEA"), as well as the Attorney General, Regulatory Affairs & Public Advocacy Section ("RAPA") today regarding its Motions for Oral Argument and Expedited Consideration. None of the parties replied to AHP by the time of this filing.

AFFIDAVIT OF ASHLEY C. BROWN

STATE OF ALASKA)
) SS:
)

Ashley C. Brown, being first duly sworn, deposes and states:

1. I have personal knowledge of the facts set forth in this affidavit.
2. I am counsel for the Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP").
3. The hearing in this matter is scheduled to commence November 18, 2024.
4. At the request of Administrative Law Judge Walker, parties in this matter have briefed the issue of interpretation of whether the surrender language in Order U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39")[1] imposed a 35-plus year "minimum" term for the MOA's surrender of its voting rights on the Eklutna Operating Committee ("EOC").

5. The issue is a discrete novel issue that could significantly negatively impact AHP's rights in the Eklutna Hydroelectric Project for decades.

6. Briefing on the Order 39 surrender language is complete, as AHP filed its reply brief on October 29, 2024. Oral argument on the issue of interpretation of the Order 39 surrender language will provide the Commission an opportunity for inquiry and will enable the development of a sound record.

7. On October 28, 2024, Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc. ("MEA") moved to compel discovery responses from AHP.

8. Briefing on that motion will be complete by the close of October 6, 2024.

9. Oral argument on the Motion to Compel will assist in establishing the scope of the hearing, thus assisting parties in hearing preparation.

10. Due to the commencement of the hearing on November 18, 2024, AHP will make itself available for any date for oral arguments. AHP proposes Friday, Tuesday, November 12 as a possible date for the oral arguments.

11. AHP proposes that the Opposition to its Motion for Oral Argument be filed by COB Wednesday, November 6, 2024, and any reply be filed December 7, 2024, so that a decision on its motion may be issued on December 8, 2024.

12. On Tuesday, November 5, 2024, via email, Dean Thompson, counsel for AHP, contacted counsel for Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc. ("MEA"), as well as the Attorney General, Regulatory Affairs & Public Advocacy Section regarding its Motions for Oral Argument and

In the Matter of the Petition Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee	)	U-24-024

MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S MOTION FOR ORAL ARGUMENT

The Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP") hereby moves the Regulatory Commission of Alaska ("Commission") for the opportunity to present oral argument regarding whether Order U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39")[1] imposed a 35-plus year "minimum" term for the MOA's surrender of its voting rights on the Eklutna Operating Committee ("EOC"). That issue was the subject of briefing that is now complete and is a discrete novel issue that could significantly negatively impact AHP's rights in the Eklutna Hydroelectric Project for decades. At the request of Administrative Law Judge Walker, the parties have fully briefed the issue of interpretation of the Order 39 surrender language and provided conflicting conclusions. AHP filed its reply brief on October 29, 2024, and this briefing is now ripe. Oral argument would provide an opportunity for Commissioner inquiry and ensure the development of a sound record for the Commission's decision.

[1] (May 28, 2020).

Additionally, Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc. ("MEA") have moved to compel discovery responses from AHP. That motion will be fully briefed and ripe by the close of November 6. AHP requests that the Commission also allow oral argument on that motion as well, in particular to the extent oral argument will establish the scope of the hearing, thus assisting parties in hearing preparation. AHP believes argument on the motion to compel could occur directly after argument on the briefing on surrender language, for purposes of administrative economy.

While AHP will make itself available for any date for oral argument, it proposes Tuesday, November 12 at 10 am for the oral arguments.

RESPECTFULLY SUBMITTED this 5th day of November, 2024, at Anchorage, Alaska.

OFFICE OF THE ATTORNEY GENERAL'S RESPONSE TO AHP'S MOTIONS FOR ORAL ARGUMENT AND EXPEDITED CONSIDERATION

The Office of the Attorney General, Regulatory Affairs and Public Advocacy Section (RAPA) hereby responds to the Municipality of Anchorage d/b/a Anchorage Hydropower's (AHP) Motions for Oral Argument and Expedited Consideration.

Regarding the Motion for Oral Argument, RAPA does not see any reason to have oral argument. The issues have been fully briefed. It is not clear to RAPA what value oral argument would add. However, if the Regulatory Commission of Alaska (the Commission) determines it would like to have oral argument, RAPA's counsel of record in this docket is not available November 12 due to the National Association of State Utility Consumer Advocates (NASUCA) Annual Meeting from November 10th-13th. RAPA's counsel of record's availability on November 14 is dependent on travel back to Alaska following the NASUCA Annual Meeting. RAPA's counsel of record is available

November 15. As a result, if the Commission grants AHP's Motion for Oral Argument, RAPA requests that the argument be scheduled for November 15.

RAPA does not oppose AHP's Motion for Expedited Consideration.

CHUCACH ELECTRIC ASSOCIATION, INC. AND MATANUSKA ELECTRIC ASSOCIATION, INC.'S REPLY TO AHP'S OPPOSITION TO MOTION TO COMPEL DISCOVERY RESPONSES

Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc. ("MEA") pursuant to 3 AAC 48.091(l), hereby replies to Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower's ("AHP's") Opposition to Motion to Compel Discovery Responses, filed on November 4, 2024 ("AHP's Opposition").

I. APPLICABLE STANDARDS

Section 3 AAC 48.141 provides:

> A party may obtain discovery from another party regarding any matter, not privileged, that is relevant to the subject matter of the proceeding, if the matter is admissible in evidence under 3 AAC 48.154 or appears reasonably calculated to lead to the discovery of admissible evidence. Upon motion by a party the presiding officer may limit discovery otherwise obtainable if the moving party establishes that the burden and expense of the requested discovery outweighs its likely benefit.

Section 3 AAC 48.154(a) provides: "All relevant evidence, which in the opinion of the presiding officer, is the best evidence reasonably obtainable, with due regard to its necessity, availability, and trustworthiness, is admissible . . . . When objection is made to the admissibility of evidence, the evidence may be received subject to later ruling by the commission."

WILSON SONSINI GOODRICH & ROSATI, P.C.

II. ARGUMENT

AHP seeks protection from the Regulatory Commission of Alaska ("Commission") against discovery of the best evidence most relevant to the central question in this proceeding: whether Mr. Corsentino is sufficiently experienced and qualified with regard to the Eklutna Hydroelectric Project (the "Eklutna Project"), prudent utility practices, and knowledge of the Railbelt generation and transmission system for the MOA to regain its voting rights on the Eklutna Operating Committee ("EOC"), rights that it voluntarily surrendered in October 2020, per Order 39.[1] On October 28, 2024, Chugach and MEA moved the Commission for an order compelling AHP to provide responses to its discovery requests in CEA&MEA-AHP-1-1 through CEA&MEA-AHP-1-9 related to Mr. Corsentino's alternative proposal to rework the 70-year-old Eklutna Project into a bidirectional pumped storage hydro ("PSH") project that would interconnect Eklutna Lake with the Knik Arm.[2]

Incredibly, AHP maintains Mr. Corsentino's proposal was a mere conceptual thought piece of no consequence or relevance to his qualifications to vote on the EOC on behalf of AHP, writing that: "Mr. Corsentino did not advocate for or propose a specific PSH project, nor take a position on whether PSH is feasible or prudent."[3] Yet, in the first major public action Mr. Corsentino took as Utility Director of AHP, he advocated for a PSH proposal as an alternative to the Proposed Final Fish and Wildlife Program ("Proposed Final Program") for the Eklutna Project that was, at the time, before the Governor's Chief

of Staff and designated lead attorney for review and approval.[4] He also was present and did not contest when an AHP attorney told the Governor's office that the PSH project alternative was a "better proposal" than the Proposed Final Program[5], that "beats [the Proposed Final Program] on every metric."[6] As a result of this meeting and AHP's direct advocacy of this proposal, the PSH alternative proposal ended up in the Governor's Final Fish and Wildlife Program ("Final Program"),[7] and will be a proposal that the Eklutna Owners need to deal with for months or perhaps years to come as an alternative to the Final Program. How Mr. Corsentino created his PSH alternative, what analyses he completed, with whom he consulted, and the manner in which he approached his responsibilities to AHP, the MOA, and the other co-owners of the Eklutna Project in putting forth this alternative are directly relevant to this proceeding and is the best evidence of how he will make decisions and vote on the EOC.

AHP should not get to ignore or hide – from Chugach, MEA, or the Commission – Mr. Corsentino's very public proposal to fundamentally alter the Eklutna Project. The Commission should not agree with AHP's requests to limit the scope of the proceeding to Mr. Corsentino's (i) minimal testimony in this proceeding, (ii) resume, and (iii) career experience with water utilities, particularly when more directly relevant evidence already exists with respect to the Eklutna Project. Chugach and MEA urge the Commission to compel the discovery on the single public and impactful act Mr. Corsentino has taken specifically with regard to the Eklutna Project – an act that seeks to potentially change the

Eklutna Project fundamentally and will increase uncertainty and costs that must be borne by the other owners.

A. Scope of Discovery and this Proceeding

AHP has repeatedly claimed that the scope of this proceeding should be limited to only whether Mr. Corsentino has knowledge of prudent utility practice and the Railbelt generation and transmission system.[8] While Chugach and MEA strongly maintain that the discovery requests regarding the PSH proposal are indeed directly relevant to Mr. Corsentino's knowledge of prudent utility practice, as argued in their Motion to Compel, Chugach and MEA also reject AHP's underlying premise. There is nothing in Order 39 that requires this limited, narrow scope. While, in Order 39, the Commission referred to two important and necessary characteristics relevant to such an examination: knowledge of prudent utility practice and the Railbelt generation and transmission system[9], the Commission did not write Order 39's surrender requirement in such a way that would require it to be bound to examining those characteristics exclusively.

Rather, the Commission is entitled to examine whatever factors it wishes with respect to AHP voting participation that it deems relevant to demonstrate that the AHP has "acquired the expertise required to fully participate as a voting member" to the Commission's satisfaction. There are numerous factors relevant to this proceeding and the examination of whether the AHP – through Mr. Corsentino's appointment – has acquired the expertise to fully participate as a voting member of the EOC. These factors include those relevant to Mr. Corsentino's qualifications – including his knowledge of the Eklutna Project, prudent utility practice, and the Railbelt generation and transmission system, his prior actions with respect to the project, and his actions with respect to implementing the

[9] *Id.* at 66 ("Chugach witness Dustin Highers testified based on his experience as chair of the EOC that to be an owner representative on the EOC, it was essential that the representative have knowledge of prudent utility practice and the Railbelt electric generation and transmission system.")

WILSON SONSINI GOODRICH & ROSATI, P.C.
701 Fifth Avenue, Suite 5100
Seattle, WA 98104-7036
PHONE 206.883.2500

1991 Agreement. These factors may also include factors beyond his direct resume and prior actions – including what AHP regaining MOA's voting rights on the EOC would mean for the Eklutna Project in light of the significant differences between AHP and ML&P, Chugach's acquisition of ML&P, and the four years of collaborative implementation of the 1991 Agreement that have occurred since Order 39.

At the outset of this proceeding, Mr. Waller framed the scope of this proceeding with an amusement park ride analogy – posing one question: is Mr. Corsentino tall enough to ride the ride or not. As this proceeding has developed, it has been made clear that this analogy is too simple, because if we are to accurately apply the analogy to the facts at hand, the ride has changed. Before Order 39 and the Chugach acquisition of ML&P, the EOC voting rights reflected an ownership and cost-structure where each owner of the Project was responsible for the costs associated with its share of the Eklutna Project. At the time, therefore, ML&P was responsible for over half of the costs of the entire Eklutna Project, and had a veto voting right power on the EOC. Now, however, while the ownership shares are the same, Chugach has assumed a significant amount of cost responsibility for the Eklutna Project from the MOA, and AHP is only responsible for 19% of the Eklutna Project's costs. Yet, if AHP regains MOA's voting rights in a manner unchanged from prior to the ML&P acquisition, MOA would regain an effective veto right over the other two owners.

Therefore, the scope of this proceeding is not simply about whether Mr. Corsentino is tall enough to ride the EOC ride or whether he is as tall as Mr. Ori or Mr. Zellers.[10] Rather, it is really about which owner controls the ride. The MOA is fully aware that under the voting rights in the Transition Plan, should the Commission return the surrendered EOC voting rights to the MOA, Mr. Corsentino will be driving the EOC ride, controlling where it goes, the speed, the brakes, the budget, and all similar decisions subject to the dictates of

[10] AHP Opposition at 8-11.

the Municipal administration and the Anchorage Assembly, who, despite being a regularly changing political body, has since assumed direct policy-decision-making control over certain AHP decisions[11], including those related to the 1991 Agreement. Even if the MEA and Chugach representatives are the only ones who actually understand the Eklutna Project, its facilities, operations and maintenance, prudent utility practice, and the Railbelt generation and transmission system, the MOA representative will be able to block their actions by forcing a vote and then voting against their actions, creating deadlock about decisions that should be solely focused on prudent utility practice and the operations and maintenance of a 70-year-old-hydro project.[12] The MOA says that any disputes could be addressed through enforcement of PPA provisions regarding prudent utility practice or through the Commission's authorities[13]; we surmise that the Commission's inclination to avoid such regular disputes, lengthy litigation that would potentially be harmful to multiple RCA-regulated utilities, and desire to avoid the need for regular Commission intervention was a driving force behind the Commission's surrender requirement in the first place. We doubt that the Commission wants to deal with such disputes going forward.

Chugach and MEA believe that Mr. Corsentino's actions related to the Eklutna Project, especially one that ended up in the Governor's Final Program, are the best possible evidence of whether he is actually qualified for the job of sitting on the EOC and making decisions – and potentially overriding decisions of Chugach and MEA – related to its operations, maintenance, and future as a generation resource. Despite Mr. Corsentino's well-demonstrated experience operating a water utility, Chugach and MEA have yet to see evidence in his prefiled direct testimony and reply testimony demonstrating what Chugach and MEA understand to be relevant prudent utility experience related to hydroelectric

PHONE 206.883.2500

projects, their operations and maintenance, or adequate knowledge of the Railbelt generation and transmission system. In the face of such a minimal showing, Chugach and MEA are seeking discovery of how he would actually act as a representative on the EOC based on his recent actions regarding the Eklutna Project.

The PSH alternative proposal that Mr. Corsentino made before the Anchorage Assembly and that he proposed before the Governor's office reflects his recent and considered thoughts about the Eklutna Project and its future. Presumably, Mr. Corsentino did enough engineering and cost analysis on the PSH alternative to not waste the valuable resources of the Eklutna Owners, the Governor and the State of Alaska, and the state and federal agencies party to the 1991 Agreement who have just completed a five-year process of studies, consultations and negotiations that included a four-month process of investigating and vetting all known alternatives to create instream flows. Chugach and MEA would like to see such analyses as a demonstration of qualifications of Mr. Corsentino and the team supporting him. We therefore strongly disagree that the PSH proposal that he and the MOA advanced as an alternative to program the Eklutna Owners developed and negotiated over five years — and which ended up in the Governor's Final Program — is irrelevant to whether he is qualified to sit on the EOC and operate a majority share voting right over the Eklutna Project's operations, maintenance, and budgets.

Perhaps the MOA's responses to discovery will reveal evidence of thoughtful consideration that will in turn lead Chugach and MEA to support his nomination. To date, Chugach and MEA have not taken any position about his qualifications for voting on the EOC. Stonewalling and denying discovery on the most relevant evidence of his qualifications as irrelevant only serves to undermine our confidence in the MOA's motivation to regain and act prudently with respect to its voting rights, particularly when paired with the recent change in Administration, the Assembly's actions to seek to undermine the Proposed Final Program, and the related timing and urgency of the MOA's

WILSON SONSINI GOODRICH & ROSATI, P.C.
701 Fifth Avenue, Suite 5100
Seattle, WA 98104-7036
PHONE 206.883.2500

request to regain voting rights in this proceeding despite the fact that it had shown no objection to its surrender or taken action to reclaim its voting rights until earlier this year.

Chugach and MEA are not seeking this discovery to prove that the Final Program is better than the PSH alternative. We doubt that the PSH alternative will be better than the components in the Final Program, but we are willing to and have committed to participating in the PSH alternative study process outlined in the Governor's Final Program. Rather, Chugach and MEA simply want an EOC that operates and maintains the Eklutna Project with prudent utility practices and Railbelt generation and transmission reliability as its lodestars rather than ever-changing municipal policies and priorities.

B. Not Just Differing Management Approaches

AHP argues in its AHP Opposition that the difference between the Proposed Final Program and Mr. Corsentino's PSH alternative is merely a difference in management decisions beyond the Commission's purview.[14] Chugach and MEA disagree.

The AHP alternative reflects more than a minor management disagreement. The AHP alternative reflects a deliberate and calculated effort to undermine and undo the results of a five-year collaborative process executed in fulsome compliance with the 1991 Agreement. As overviewed in detail in Chugach and MEA's Motion to Compel in this proceeding, the MOA – as represented by the Mayor and Municipal Manager and related staff – worked collaboratively with Chugach and MEA on behalf of AHP since the time that AHP surrendered its voting rights in 2020 until the Project Owners submitted the Proposed Final Program to the Governor in April 2024. While the Anchorage Assembly and the MOA administration clearly held different views on the Proposed Final Program at the time of such submission, Chugach and MEA continued to work with, and take cues from, the Municipal Administration's ongoing support for and participation in the Proposed Final Program development up until the day it was submitted. Such support is

[14] AHP Opposition at 9-10 and n. 32.

WILSON SONSINI GOODRICH & ROSATI, P.C.

clearly documented. The MOA signed multiple 1991 Agreement implementation documents, including a binding term sheet with AWWU regarding the future use of AWWU infrastructure for the Proposed Final Program, and Mayor Bronson sent a letter to the Governor supporting the Proposed Final Program. [15] At no time during this ongoing collaboration and unanimous decision-making process, did the MOA raise any pump storage hydro alternative for consideration. After the Proposed Final Program was submitted to the Governor, there was a comment period, and at no time during the comment period, was a pumped storage hydro alternative proposed by the MOA.

It was only after a political change occurred at MOA, with Mayor LaFrance being sworn in on July 1, 2024, and Mark Corsentino being appointed by the Anchorage Assembly to be Utility Director of AHP on July 2, 2024, that the MOA Administration took a different stance, now much more in line with the Anchorage Assembly's stance. First, the Mayor submitted a letter to the Governor overviewing concerns with, and proposing changes to, the Proposed Final Program.[16] Second, in the eleventh hour, Mr. Corsentino and AHP put together a completely new pumped storage hydro alternative proposal for consideration by the Governor who was already well under way reviewing the Proposed Final Program. With the support of the Anchorage Assembly, Mr. Corsentino then presented this proposal to Governor's staff in September of 2024. This was just one month before the Governor needed to make a final decision on the Proposed Final Program. In a September 9, 2024, meeting with the Governor's office, AHP at times presented this proposal with an enthusiasm suggestive of robust consideration and deliberation, including through broad AHP statements to the Governor's staff such as "the Governor doesn't need

[15] Letter from Dave Bronson, Mayor, Municipality of Anchorage to Mike Dunleavy, Governor of Alaska (Apr. 26, 2024), available at https://eklutnahydro.com/wp-content/uploads/2024/05/2024-04-26-Comments-on-Proposed-Final_Mayor.pdf.

[16] *See* Assembly Memorandum No. AM 557-2024(A).

PHONE 206.883.2500

to settle for that disappointing proposal because pump storage hydro beats it on every metric."[17]

Chugach and MEA are not actually certain that the PSH alternative idea was Mr. Corsentino's idea. Mr. Corsentino participated in the Eklutna Project Owners group for over a year during the time period the Eklutna Owners were brainstorming and investigating potential options to put water in the Eklutna River. During that time, again, he never advanced a PSH option as a viable solution. Discovery would therefore reveal who created and advanced the idea and whether Mr. Corsentino – in proposing this idea to the Governor's office – was acting as a prudent utility executive or as a political actor attempting to delay implementation of the Final Program at the behest of the Assembly and/or Municipal leadership.

III. CONCLUSION

The discovery sought in in CEA&MEA-AHP-1-1 through CEA&MEA-AHP-1-9 is reasonably calculated to lead to the discovery of admissible evidence and is relevant to the scope of this proceeding. AHP should be compelled by Order of the Commission to provide the information requested in such discovery requests.

RESPECTFULLY SUBMITTED this 6th day of November, 2024.

MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S ERRATA TO MOTION FOR EXPEDITED CONSIDERATION OF ITS MOTION FOR ORAL ARGUMENT

The Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP") hereby files this errata to its Motion for Expedited Consideration of its Motion for Oral Argument filed November 5, 2024.

The following language on Page 2 of the Motion for Expedited Consideration is corrected as indicated below in strikethrough (deletions) and bold, underline (insertions):

> AHP proposes that the Opposition to its Motion be filed by COB Wednesday, November 6, 2024, and any reply be filed ~~December~~ **November** 7, 2024, so that a decision on its motion may be issued on ~~December~~ **November** 8, 2024.

These corrections also apply to the dates set forth in the Affidavit of Ashley C. Brown, which was filed with the Motion for Expedited Consideration.

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners:	John M. Espindola, Chairman Robert A. Doyle Robert M. Pickett John C. Springsteen
In the Matter of the Petition Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee	U-24-024

MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S MOTION FOR ORAL ARGUMENT

The Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP") hereby moves the Regulatory Commission of Alaska ("Commission") for the opportunity to present oral argument regarding whether Order U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39")[1] imposed a 35-plus year "minimum" term for the MOA's surrender of its voting rights on the Eklutna Operating Committee ("EOC"). That issue was the subject of briefing that is now complete and is a discrete novel issue that could significantly negatively impact AHP's rights in the Eklutna Hydroelectric Project for decades. At the request of Administrative Law Judge Walker, the parties have fully briefed the issue of interpretation of the Order 39 surrender language and provided conflicting conclusions. AHP filed its reply brief on October 29, 2024, and this briefing is now ripe. Oral argument would provide an opportunity for Commissioner inquiry and ensure the development of a sound record for the Commission's decision.

[1] (May 28, 2020).

A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

Additionally, Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc. ("MEA") have moved to compel discovery responses from AHP. That motion will be fully briefed and ripe by the close of November 6. AHP requests that the Commission also allow oral argument on that motion as well, in particular to the extent oral argument will establish the scope of the hearing, thus assisting parties in hearing preparation. AHP believes argument on the motion to compel could occur directly after argument on the briefing on surrender language, for purposes of administrative economy.

While AHP will make itself available for any date for oral argument, it proposes Tuesday, November 12 at 10 am for the oral arguments.

RESPECTFULLY SUBMITTED this 5th day of November, 2024, at Anchorage, Alaska.

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners:	John M. Espindola, Chairman Robert A. Doyle Robert M. Pickett John C. Springsteen
In the Matter of the Petition Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee	U-24-024

MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S MOTION FOR EXPEDITED CONSIDERATION OF ITS MOTION FOR ORAL ARGUMENT

The Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP") hereby moves the Regulatory Commission of Alaska ("Commission") for expedited consideration of its Motion for Oral Argument filed today, November 5, 2024.

In its Motion for Oral Argument, AHP requested the opportunity to present oral argument regarding whether Order U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39")[1] imposed a 35-plus year "minimum" term for the MOA's surrender of its voting rights on the Eklutna Operating Committee ("EOC"). That issue was the subject of briefing that is now complete. AHP also requested that oral argument be held regarding Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc.'s ("MEA's") Motion to Compel Discovery Responses, which will be ripe for decision by the close of November 6. AHP has requested that the Commission also allow oral argument on that motion as well, in particular to

the extent oral argument will establish the scope of the hearing, thus assisting parties in hearing preparation. AHP stated in its motion that argument on the motion to compel could occur directly after argument on the briefing on surrender language, for purposes of administrative economy. AHP stated that while it would make itself available for any date for oral argument, it proposed Tuesday, November 12 at 10 am for the oral arguments.

AHP respectfully requests expedited consideration of its motion so that any argument may occur before the November 18, 2024 hearing in this matter. Oral argument on the issue of interpretation of the Order 39 surrender language will provide the Commission an opportunity for inquiry and will enable the development of a sound record. Oral argument on the Motion to Compel will assist in establishing the scope of the hearing.

AHP proposes that the Opposition to its Motion be filed by COB Wednesday, November 6, 2024, and any reply be filed December 7, 2024, so that a decision on its motion may be issued on December 8, 2024. Counsel for AHP emailed counsel for Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc. ("MEA"), as well as the Attorney General, Regulatory Affairs & Public Advocacy Section ("RAPA") today regarding its Motions for Oral Argument and Expedited Consideration. None of the parties replied to AHP by the time of this filing.

AFFIDAVIT OF ASHLEY C. BROWN

STATE OF ALASKA)
) SS:
)

Ashley C. Brown, being first duly sworn, deposes and states:

1. I have personal knowledge of the facts set forth in this affidavit.
2. I am counsel for the Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP").
3. The hearing in this matter is scheduled to commence November 18, 2024.
4. At the request of Administrative Law Judge Walker, parties in this matter have briefed the issue of interpretation of whether the surrender language in Order U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39")[1] imposed a 35-plus year "minimum" term for the MOA's surrender of its voting rights on the Eklutna Operating Committee ("EOC").

5. The issue is a discrete novel issue that could significantly negatively impact AHP's rights in the Eklutna Hydroelectric Project for decades.

6. Briefing on the Order 39 surrender language is complete, as AHP filed its reply brief on October 29, 2024. Oral argument on the issue of interpretation of the Order 39 surrender language will provide the Commission an opportunity for inquiry and will enable the development of a sound record.

7. On October 28, 2024, Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc. ("MEA") moved to compel discovery responses from AHP.

8. Briefing on that motion will be complete by the close of October 6, 2024.

9. Oral argument on the Motion to Compel will assist in establishing the scope of the hearing, thus assisting parties in hearing preparation.

10. Due to the commencement of the hearing on November 18, 2024, AHP will make itself available for any date for oral arguments. AHP proposes Friday, Tuesday, November 12 as a possible date for the oral arguments.

11. AHP proposes that the Opposition to its Motion for Oral Argument be filed by COB Wednesday, November 6, 2024, and any reply be filed December 7, 2024, so that a decision on its motion may be issued on December 8, 2024.

12. On Tuesday, November 5, 2024, via email, Dean Thompson, counsel for AHP, contacted counsel for Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc. ("MEA"), as well as the Attorney General, Regulatory Affairs & Public Advocacy Section regarding its Motions for Oral Argument and

Date:	Wednesday, November 6, 2024 1:49:24 PM

BY ORDER OF ADMINISTRATIVE LAW JUDGE JAMES L. WALKER

Order U-24-024(7)

ORDER DENYING MOTION FOR ORAL ARGUMENT AND MOTION FOR EXPEDITED CONSIDERATION OF MOTION FOR ORAL ARGUMENT

At the prehearing conference in this docket on August 30, 2024, I requested briefing on whether the Notice and Request for Acknowledgment filed by the Municipality of Anchorage d/b/a Anchorage Hydropower (AHP) should be dismissed as being premature under the minimum term of Eklutna Operating Committee (EOC) voting rights surrender specified in Order U-18-102(44)/U-19-020(39)/U-19-021(39) (Order U-18-102(44). AHP filed a 25-page direct brief and exhibits on this issue September 18, 2024. The Office of the Attorney General, Regulatory Affairs and Public Advocacy Section (RAPA) filed a 13-page responsive brief on this issue October 8, 2024. Chugach Electric Association, Inc. (Chugach) and Matanuska Electric Association, Inc. (MEA) jointly filed a 26-page responsive brief on this issue October 8, 2024. On October 15, 2024, RAPA filed a 9-page motion to dismiss the Notice and Request for Acknowledgment on the grounds that it was now moot and that it was premature under the minimum term of EOC voting rights surrender specified in Order U-18-102(44). On October 24, 2024, Chugach and MEA joined in RAPA's motion to dismiss. On October 29, 2024, AHP filed a 46-page reply brief on the minimum term of EOC voting rights surrender issue. On October 30, 2024, AHP filed a 9-page plus exhibits opposition to RAPA's motion to dismiss. On November 4, 2024, RAPA filed a 5-page reply to AHP's opposition to the motion to dismiss.

On October 28, 2024, Chugach and MEA jointly filed a motion to compel production of information by AHP to nine discovery requests. AHP had objected to each of these requests on the ground that the request was for irrelevant information under its interpretation of the scope of this docket. AHP also objected to one of these requests on the ground that it was overbroad. In their joint motion to compel, Chugach and MEA explained why they believe each of the nine disputed discovery requests are for information relevant to the ultimate resolution of this docket or will lead to the discovery of relevant information. On November 4, 2024, AHP filed its 25-page opposition to the motion to compel. Under 3 AAC 48.091(*l*), any reply to AHP's opposition to the motion to compel is due by the close of business today, November 6, 2024.

On November 5, 2024, AHP filed a motion for oral argument on the pending RAPA motion to dismiss and on the pending Chugach/MEA motion to compel. In this motion, AHP stated that

it could be available for oral argument at any time the Commission set but did state that it was proposing oral argument for Tuesday, November 12, 2024, at 10:00a.m. Also on November 5, 2024, AHP filed a motion for expedited consideration of its motion for oral argument. In the motion for expedited consideration, AHP asked the Commission to require the other parties to respond to the motion for oral argument by the close of business today, November 6, 2024, and for any reply to such responses to be filed by the close of business tomorrow, November 7, 2024.

The only statement by AHP supporting the motion for oral argument is that: "Oral argument would provide an opportunity for Commissioner inquiry and ensure the development of a sound record for the Commission's decision." Oral argument is not sworn testimony and cannot be used to expand the factual record on which the Commission bases its decisions under AS 42.05.191. Therefore, oral argument cannot ensure the development of a sound record. The Commission Panel has been polled and no member desired to conduct inquiry of party counsel on the briefing filed or otherwise saw the need for oral argument on the motion to dismiss or the motion to compel. AHP cites to no authority requiring oral argument on these pending motions.

A public hearing is scheduled in this docket for November 18 through November 22, 2024. Under the procedural schedule adopted by Order U-24-024(4), discovery on AHP's reply testimony does not close until November 8, 2024, and party sequential witness lists, statements of issues, and errata are due on November 12, 2024. November 11, 2024, is a State holiday. The Commission also has a public hearing scheduled for November 13, 2024. Counsel for RAPA has informed us that they see no benefit in oral argument on the two pending motions and will not be available for oral argument November 10-14, 2024. Given the lack of apparent benefit to be obtained from oral argument on the pending motion to dismiss and the pending motion to compel, the extensive briefing done on these motions, and the time constraints that the parties and the Commission are currently working under, I deny the motion for oral argument and the motion for expedited consideration of the motion for oral argument.

I electronically notified the following:

IN THE SUPERIOR COURT OF THE STATE OF ALASKA
THIRD JUDICIAL DISTRICT AT ANCHORAGE

ANCHORAGE MUNICIPAL ASSEMBLY, Appellant, v. REGULATORY COMMISSION OF ALASKA; MUNICIPALITY OF ANCHORAGE, d/b/a MUNICIPAL LIGHT AND POWER; ENSTAR NATURAL GAS CO.; PROVIDENCE HEALTH & SERVICES; GOLDEN VALLEY ELECTRIC ASSOCIATION, INC.; STATE OF ALASKA; ALASKA ENERGY AUTHORITY; HOMER ELECTRIC ASSOCIATION, INC.; ALASKA ELECTRIC AND ENERGY COOP., INC.; MATANUSKA ELECTRIC ASSOCIATION, INC.; CHUGACH ELECTRIC ASSOCIATION, INC.; JL PROPERTIES; ALASKA NATIVE HEALTH CONSORTIUM, Appellees.	CASE NO. 3AN-24-06001 CI

RESPONSE TO MOTION TO STRIKE

Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association ("MEA") hereby respond to the Anchorage Municipal Assembly's ("Assembly's") Motion to Strike and respectfully ask the Court to consider their timely Joinder in Motion to Dismiss ("Joinder").[1]

The Assembly errs in trying to apply the Court's deadline for motions to dismiss to Chugach and MEA's Joinder.[2] Alaska Rule of Appellate Procedure 203 vests the supervision and

[1] Motion to Strike, Nov. 5, 2024 ("Motion to Strike"); Joinder in Corrected Motion to Dismiss or, in the Alternative, to Stay Appeal, Oct. 4, 2024 ("Joinder").

[2] Motion to Strike at 1.

WILSON SONSINI GOODRICH & ROSATI, P.C.
701 Fifth Avenue, Suite 5100
Seattle, WA 98104-7036
PHONE 206.883.2500

control of this appeal in this Court "except as otherwise provided in this rules." The Alaska Rules of Appellate Procedure do not establish any statutory timing deadline of a joinder motion; indeed, the rules are silent on joinder in dispositive motions in appellate matters. Alaska Rule of Appellate Procedure 503(d), however, gives adverse parties seven days after service of a motion to respond.[3] This suggests that an unrelated party should be entitled to seven days to review and respond because, like an adverse party, they would otherwise have no way of knowing the contents of a motion to which they want to respond.

Chugach and MEA may not be adverse to the Regulatory Commission of Alaska ("RCA") in this proceeding, but, like an adverse party, they had no way of knowing the contents of the RCA's motion to dismiss until it was filed on October 28, 2024.[4] The RCA did not share its motion to dismiss with Chugach and MEA in advance and did not invite Chugach and MEA to join. Counsel for the RCA can confirm these facts. Therefore, Chugach and MEA, like any other responding parties, should be entitled to a reasonable amount of time to review and respond to the RCA's Motion to Dismiss with information and arguments they deem pertinent. Due process dictates that all parties to an appellate proceeding should have the opportunity to review, consider, and respond to dispositive motions – especially when the motion deals with the central substantive issues on appeal and will impact the parties' interests. Since Chugach and MEA filed their Joinder within this seven-day window, the Joinder was timely and should be considered by the Court.

Requiring parties to file a joinder at the same time as the original motion would eliminate the ability of unrelated parties to join in a motion, so it is not a surprise that no such timing requirement exists. Unrelated parties do not always have access to motions ahead of time, and therefore could not "join" in a motion until they see it filed publicly. Such a requirement would effectively eliminate joinder and instead force unrelated parties to file overlapping motions, ultimately increasing the burden on courts to review motions that could have been consolidated or joined.

---

[3] Alaska R. App. P. 503(d).

[4] Motion to Dismiss or, in the Alternative, to Stay Appeal, Oct. 28, 2024, at 14 ("Motion to Dismiss").

Finally, the Assembly has not been prejudiced or disadvantaged by the filing of Joinder seven days after the Motion to Dismiss was filed. During the scheduling conference last Friday, November 1, 2024, the Assembly sought an extension of its deadline to respond to the RCA's Motion to Dismiss from November 4, 2024, until November 26, 2024. Neither the RCA nor Chugach and MEA objected to the requested later deadline and the Court agreed. Chugach and MEA filed their joinder the very next business day. The Court's extended deadline gives the Assembly 22 days in which to respond to Chugach and MEA's Joinder as part of its response to the RCA's Motion to Dismiss. Further, the facts stated in the Joinder are all matters of public record, the documents attached to the Joinder are in the agency record on appeal that has been transferred to the Court, and the single legal argument advanced in the Joinder is straightforward and not complicated. The Assembly should have no problem in responding within the Court's rescheduled November 26, 2024, deadline.

Since there is no formal timing requirement for a joinder, Chugach and MEA comfortably met the only statutory time requirement applicable to responding parties, and the Assembly has adequate time to respond, Chugach and MEA respectfully ask the Court to accept and consider their timely Joinder.

BEFORE THE REGULATORY COMMISSION OF ALASKA

Before Commissioners: John M. Espindola, Chairman
Robert M. Pickett
John C. Springsteen

In the Matter of the Petition Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgement of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee	U-24-024

CHUGACH ELECTRIC ASSOCIATION, INC. AND MATANUSKA ELECTRIC ASSOCIATION, INC.'S JOINT STATEMENT OF ISSUES

Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc. ("MEA"), hereby submit the following joint statement of issues for hearing pursuant to Paragraph J of Order No. 4 in this docket:

1. In Order 39, did the Commission require that the Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP") surrender its voting rights on the Eklutna Operating Committee ("EOC") for a duration to last at least the term lengths of the Chugach-MOA PPA and MEA-MOA PPA?
2. Has the AHP demonstrated knowledge and expertise, including but not limited to, knowledge and expertise of the Eklutna Project, prudent utility practices, and the Railbelt generation and transmission system as required in Order 39, sufficient such that the RCA may allow the MOA to regain voting rights on the EOC?
    a. In appointing Mark Corsentino as Utility Director of AHP, has the MOA demonstrated to the Commission's satisfaction that it has "acquired the

WILSON SONSINI GOODRICH & ROSATI, P.C.
701 Fifth Avenue, Suite 5100
Seattle, WA 98104-7036
PHONE 206.883.2500

expertise required to fully participate as a voting member of the EOC"?[1]

b. Given that Mr. Corsentino has been the General Manager of Anchorage Water and Wastewater Utility (AWWU) since 2019 and employed by the MOA, has AHP obtained any new expertise as compared with the expertise available to it at the time of the Order 39 surrender?

c. Does Mr. Corsentino have sufficient knowledge and expertise of (i) prudent utility practice as applied to the Eklutna Project, and (ii) the Railbelt electric generation and transmission system as it relates to the Eklutna Project, in order to participate as a voting member of the EOC?

d. In his actions since being appointed Utility Director of AHP on July 2, 2024, has Mr. Corsentino demonstrated adequate knowledge and expertise of the Eklutna Project, prudent utility practices, and the Railbelt generation and transmission system as required in Order 39?

e. Has the MOA complied with Order 39, the Surrender Agreement, and its obligations related to prudent utility practices and implementation of the 1991 Agreement under the Chugach-MOA PPA and MEA-MOA PPA since October 30, 2020?

3. As a condition to the return of MOA's voting rights on the EOC, should the Commission require AHP to accept "as-is" previous decisions and outcomes by the EOC and the Eklutna Owners group that was charged with 1991 Agreement implementation during the period of its surrendered voting rights, including, but not limited to, budgets, expenses, and implementation of the 1991 Agreement and the Final Fish and Wildlife Program?

4. As a condition to the return of MOA's voting rights on the EOC, should the Commission require that MOA recognize and accept that decisions related to

[1] Order 39 at 67.

WILSON SONSINI GOODRICH & ROSATI, P.C.
701 Fifth Avenue, Suite 5100
Seattle, WA 98104-7036
PHONE 206.883.2500

the implementation of the 1991 Agreement shall be made on a one-owner, one-vote basis when consensus cannot be achieved?

5. As a condition to the return of MOA's voting rights on the EOC, should the Commission require that the MOA's EOC voting rights be changed to reflect the MOA's cost responsibility (19.04%) rather than ownership share (53.33%) during the remaining term of the Chugach-MOA PPA term?
6. As a condition to the return of MOA's voting rights on the EOC, what safeguards should the Commission require that AHP put in place to ensure that prudent utility practice obligations will preempt any directives from the Anchorage Assembly or MOA leadership that demand a vote in contravention of such obligations?
7. Are the MOA's proposed memoranda and processes regarding matters before the EOC that present potential conflicts of interest between the Eklutna Owners and AWWU adequate to address such conflicts, or would Mr. Corsentino's/AHP's recusal from such matters be more appropriate?
8. Following a return of MOA's voting rights on the EOC, what happens to the MOA's voting rights on the EOC if Mr. Corsentino resigns from AHP or the MOA or otherwise becomes unable to perform his duties on the EOC?

RESPECTFULLY SUBMITTED this 12th day of November, 2024.

PREFILED DIRECT TESTIMONY OF MARK A. CORSENTINO, P.E.

I. INTRODUCTION

Q.1 Please state your name and title.

A.1 My name is Mark A. Corsentino, P.E., and I am the Utility Director of Anchorage Hydropower ("AHP") and the General Manager of Anchorage Water and Wastewater Utility ("AWWU"), except for matters involving both AHP and AWWU, for which Assistant General Manager David Persinger serves as Acting General Manager of AWWU and I serve only as Utility Director of Anchorage Hydropower.

Q.2 What is the purpose of your testimony?

A.2 The purpose of my testimony is to support AHP's notice and request for acknowledgement that is has acquired the expertise required to participate as a voting member of the Eklutna Operating Committee ("EOC").

Q.3 Have you testified previously before the Commission?

A.3 Yes. I filed prefiled direct testimony in AWWU's rate cases U-19-005/U-19-006, U-22-002/U-22-003, and U-24-005/U-24-006, and prefiled direct testimony and oral testimony in the January 11, 2022, Public Hearing on the stipulation filed in AWWU's rate case U-21-010/U-21-011. I filed prefiled direct testimony in AWWU's tariff filings in TA176-122 and TA177-126 and for AWWU's tariff revision in U-24-008. I also filed an affidavit in support of AWWU's Petition to Create a Regulatory Asset for Recovery of Costs from Earthquake Damage filed on December 23, 2019, in U-19-102/U-19-103.

Q.4 Please summarize your professional qualifications.

A.4 See my resume enclosed as **Exhibit MAC-1**.

Q.5 Please describe how your testimony is organized.

A.5 First, I will summarize AHP's notice and request for acknowledgement that it has acquired the expertise required to participate as a voting member of the EOC. Second, I will describe the purpose of the EOC and how it functions. Third, I will describe my qualifications as they pertain to the expertise needed for AHP to participate as a voting member of the EOC. Fourth, I will discuss the measures in place to address any potential conflicts of interest that may arise due to my roles as both the Utility Director of AHP and the General Manager of AWWU.

II. SUMMARY OF AHP'S NOTICE AND REQUEST FOR ACKNOWLEDGEMENT

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

Q.6 Please summarize AHP's notice and request for acknowledgement that it has acquired the expertise required to participate as a voting member of the EOC.

A.6 In Order No. U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order No. 39"), the Commission approved the sale of most of the electric utility assets of the Municipality of Anchorage ("MOA") d/b/a Municipal Light & Power ("ML&P") to Chugach Electric Association, Inc. ("Chugach"). The MOA retained its ownership interest in the Eklutna Hydroelectric Project ("Eklutna Project"), from which it sells wholesale electric power to Chugach and Matanuska Electric Association, Inc. ("MEA"), pursuant to power purchase agreements approved by the Commission. The Commission issued Certificate of Public Convenience and Necessity No. 780 authorizing the MOA d/b/a AHP to provide wholesale electric public utility service on the condition that the MOA surrender its voting rights on the EOC. Order No. 39 required that the surrender remain in effect until the MOA "has shown to [the Commission's] satisfaction that MHP[1] has acquired the expertise required to fully participate as a voting member of the EOC." The Commission identified two characteristics that AHP's owner representative must have in order to lift the MOA's surrender of voting rights: knowledge of prudent utility practice and knowledge of the Railbelt generation and transmission system.[2]

On October 27, 2020, the MOA surrendered its voting rights as an EOC member, effective as of the closing date of the asset purchase agreement between ML&P and Chugach. The surrender of voting rights remains "in effect until ML&P's successor

[1] In Order No. 39, the Commission referred to the "post-transaction electric utility owned by the MOA as Municipal Hydro Power (MHP)." Order No. 39 at 4, n. 1.
[2] *Id.* at 66.

complies with the RCA requirements pertaining to qualifications for ML&P's representation on the EOC."[3] "Until ML&P's successor complies with the qualification terms of RCA [Order No. 39], all EOC decisions will be by unanimous vote of [Chugach] and [MEA]."[4]

On July 2, 2024, I was unanimously approved by the Anchorage Assembly to be the Utility Director of AHP. As such, I will serve as AHP's owner representative on the EOC. I have the knowledge of prudent utility practice and knowledge of the Railbelt generation and transmission system required by the Commission to lift the MOA's surrender of voting rights and to fully participate on the EOC. As Utility Director of AHP, 20%of my salary is now paid by AHP.

Q.7 Are there other requirements for AHP's owner representative on the EOC?

A.7 Yes. In conjunction with Order No. 39, AHP's owner representative must make all decisions on the EOC consistent with prudent utility practice and the rights and obligations of Chugach and MEA under the Eklutna Power Purchase Agreement ("Eklutna PPA") and the MEA Power Purchase Agreement ("MEA PPA") and consistent with all other requirements of law.

III. THE EOC

Q.8 What is the EOC?

[3] Surrender of Eklutna Operating Committee (EOC) Voting Rights (Oct. 27, 2020).
[4] *Id.*

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

A.8 The EOC was created to make all management decisions regarding the operation, maintenance, and budgeting for the Eklutna Project, including the "Fish and Wildlife Agreement Snettisham and Eklutna Projects." The EOC essentially makes decisions that would be made by a wholly-owned utility by its management team. For instance, it makes the type of decisions that I make for AWWU as General Manager. Such decisions could include decisions about operations, capital investments, budgeting, and maintenance.

Q.9 Please describe the Eklutna Project.

A.9 The Eklutna Project was constructed by the federal government from 1951 to 1955 to provide wholesale electric utility service to ML&P, Chugach, and MEA. The Eklutna Project includes a tap into Eklutna Lake, a tunnel to divert the water from the tap to a powerhouse located in the Matanuska-Susitna Borough ("MSB") containing two generating units, and a trailrace that discharges into the Knik River. The Eklutna Project connects to MEA substations in Anchorage and the MSB, and to Chugach and AHP substations in Anchorage.

Q.10 Please describe the ownership structure of the Eklutna Project.

A.10 In 1995, ML&P, Chugach, and MEA entered into the Eklutna Purchase Agreement with the federal government. Ownership was transferred to ML&P, Chugach, and MEA in 1997. ML&P acquired an undivided ownership interest in the Eklutna Project capacity, energy, and assets of 53.33%. Chugach and MEA acquired undivided ownership interests in the Eklutna Project capacity, energy, and assets of 33% and 16.67% respectively.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

Q.11 How are decisions made by the EOC?

A.11 Since ML&P surrendered its voting rights in 2020, all EOC decisions are made by unanimous vote of Chugach and MEA.[5]

Q.12 How would decisions be made if AHP's notice and request for acknowledgement that it has acquired the expertise required to participate as a voting member of the EOC is approved by the Commission?

A.12 If AHP's notice and request for acknowledgement that it has acquired the expertise required to participate as a voting member of the EOC is approved by the Commission and AHP's voting rights are restored, the decision-making process would revert to the one outlined in the Eklutna Transition Plan. Decisions will be made based upon a double majority consisting of an affirmative vote by at least two utilities whose ownership shares total at least 51% of the Eklutna Project ownership. Since ML&P has more than 50% of the ownership, it will have to approve the action with an affirmative vote from either Chugach or MEA, or both.

IV. QUALIFICATIONS

Q.13 Please summarize your knowledge of prudent utility practice.

A.13 I am a licensed engineer with approximately 20 years of utilities experience. I have been the General Manager of the AWWU since February 2019 and was the Director of

[5] *Id.*

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS

Operations and Maintenance and a Project Management Engineer/Supervisor before that. As the General Manager, I direct and oversee two economically regulated utilities with a combined annual revenue of $139 million, annual capital budgets of $35 million, and a net book value of over one billion dollars. I oversee 280 full-time AWWU employees as well as AWWU's two water treatment plants, three wastewater treatment plants, 1,600 miles of underground pipelines, and 200 water and sewer remote facilities.

During my time at AWWU, I have gained significant experience with operation capital expenditures, leading projects such as SCADA control system upgrades, and providing project management design and construction expertise in water transmission main projects, sewer pump station projects, and wastewater treatment process improvement projects. I have overseen several utility rate cases. I am also versed in compliance with the uniform system of accounts pursuant to 3 AAC 48.277, particularly subsections (9) through (13) for electric public utilities and (14) through (17) for water utilities.

Q.14 Please summarize your knowledge of the Railbelt generation and transmission system.

A.14 As a licensed engineer with a background in electrical engineering, I understand the mechanics and theory of electricity generation and transmission. I have direct experience with hydropower generation, scheduling, maintenance, and integration with other Railbelt resources. As General Manager of AWWU, I oversee the operation and maintenance of the hydropower generation from AWWU's Eklutna Energy Station, as well as AWWU's Reservoir 3&4 Facility and 92nd Street PRV Facility. I also oversee AWWU's co-location

with Chugach's Plant 2A. I am regularly involved in the construction of pump stations and other projects requiring significant power supply from the grid. This has given me a greater understanding of power systems and related issues such as power correction, phase, amplitude, and frequency of AC power.

In addition, I have experience representing AHP on the EOC in a non-voting capacity. As such, I have knowledge of Eklutna Project matters including hydropower generation, scheduling, integration with other Railbelt resources, SCADA (as managed through Chugach), and project maintenance. Further, if there is an issue in which I require assistance, I have access to additional resources through both in-house engineering expertise at the MOA and the ability to engage the expertise of MOA consultant and contractors. In particular, Mark Schimsheimer, the Engineering Director of AWWU, has been designated to provide additional technical and engineering support to AHP, at AHP's expense. Ten percent of his salary is now paid for by AHP. His resume is attached as **Exhibit MAC-2**.

Q.15 Do you believe AHP has the expertise required to fully participate as a voting member of the EOC as required by the Commission?

A.15 Yes. In Order No. 39, the Commission stated that "[u]nder the circumstances, [it] cannot unconditionally find that MHP is managerially or technically fit to maintain majority ownership of the Eklutna Project."[6] The circumstances the Commission were referring to included MHP having a seat on the EOC even though it had no employees and that MHP

would be managed by the Municipal Manager. The Municipal Manager at the time was William D. Falsey, who had a Bachelor of Science degree in physics from Stanford University and a law degree from Yale Law School. Mr. Falsey had worked in legal positions before becoming the MOA's Municipal Manager but did not have any knowledge of the Railbelt generation and transmission system or prudent utility practice. ML&P had suggested that it could use consulting services for industry-specific expertise to help it make informed decisions, but it was not sure if such expertise was available. This is no longer the case. AHP is now managed by its Utility Director who has knowledge and experience with both the Railbelt generation and transmission system and prudent utility practice.

V. CONFLICTS OF INTEREST

Q.16 How has AHP addressed any potential conflicts of interest that may arise due to your roles as the Utility Director of AHP and the General Manager of AWWU?

A.16 AHP and AWWU have entered into a Memorandum of Understanding ("MOU") (**MAC-3**) that established that I will act solely as the Utility Director of AHP and will abstain from any decisions that need to be made by the General Manager of AWWU in any instance of conflicting interests between AHP and AWWU. Under the MOU, I will not take any action in my role as the General Manager of AWWU on "issues that affect the interest, operations, or obligations" of AHP. In this instances, AWWU's interests will be represented by AWWU's Assistant General Manager. All decisions I will make in my role as the AHP

(907) 277-1604

representative on the EOC will be consistent with prudent utility practices and the rights and obligations of Chugach and MEA as required by the Eklutna PPA and MEA PPA.

Q.17 Is your position - General Manager of AWWU, and Utility Director of AHP - unique from a conflict perspective?

A.17 No. Historically, for ML&P and AWWU, even when a different individual represented ML&P and AWWU, these two individuals would both report to the municipal manager because both utilities are part of the municipality. Here, the municipality created an additional layer of protection to ensure prudent utility management through the MOU, one which normally would not exist in a municipality with more than one utility. Another layer of protection is the language of both the MEA and Chugach PPAs, stating that " the Municipality EOC representative shall "make all decisions on the Operating Committee consistent with Prudent Utility Practice and the rights and obligations of the Parties" under the PPAs. Chugach and MEA have procedural remedies both through the PPAs and through the Commission's authorities in the event either believes that the MOA representative is not meeting these requirements or the requirements of its certificate.

Q.18 Does this conclude your prefiled direct testimony?

A.18 Yes, thank you.

Dated this 18th day of September, 2024, at Anchorage, Alaska.

ERRATA PAGES TO

PREFILED REPLY TESTIMONY OF

MARK A. CORSENTINO, P.E.

A.11 As I discussed above, the Commission, in Order 39, identified two characteristics that AHP's owner representative must have in order to lift the MOA's surrender of voting rights: knowledge of prudent utility practice and knowledge of the Railbelt generation and transmission system.[3] While the characteristics listed by Mr. Zellers might be ideal, they go far above and beyond what the Commission has stated it requires of AHP's owner representative in order for the MOA's surrender of its voting rights to be lifted.

Q.12 How did the Commission identify knowledge of prudent utility practice and knowledge of the Railbelt generation and transmission system as the two characteristics that AHP's owner representative must have in order to lift the MOA's surrender of voting rights?

A.12 The Commission discussed testimony from Chugach Witness Dustin Highers, stating that based on his experience as EOC chair, "that to be an owner representative on the EOC, it was essential that the representative have knowledge of prudent utility practice and the Railbelt electric generation and transmission system."[4] The Commission also noted that knowledge of prudent utility practice is "the management standard specified for the [AHP] EOC representative in both the Eklutna PPA and the MEA PPA."[5]

[3] *Id.* at 66.
[4] *Id.*
[5] *Id.* (citing to the Eklutna PPA at 9 and the MEA PPA at 8).

Q.19 Assuming the Commission finds that you have the expertise required to fully participate as a voting member of the EOC and lifts the MOA's surrender of its voting rights, what would happen if or when you leave your position as Utility Director of AHP?

A.19 The MOA would hire a qualified replacement and would rely on the expertise and knowledge of any other AHP executives or employees that may exist at the time of such an event. My replacement, in conjunction with the other officers and employees of AHP, must possess such knowledge. Additionally, as stated in my prefiled direct testimony, the MOA has contracts with professional engineering firms that have knowledge of generation and transmission and there are other members of the MOA Administration that have prudent management experience.

VI. CONFLICT OF INTEREST

Q.20 Prior to AHP filing its Request for Acknowledge of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee with the Commission, has either Chugach or MEA raised concerns about actual or potential conflicts of interest between ML&P or AHP and AWWU that may impact AHP's participation on the EOC?

A.20 I am not aware of Chugach or MEA raising any such concerns. During discovery, Mr. Ori stated he "was not aware of any concerns raised by Chugach to the MOA about potential or actual conflicts of interests between ML&P and AWWU that impacted ML&P's participation on the EOC."[8] Mr. Zellers stated that "as the current MEA representative on the EOC, is not aware of any concerns raised by MEA to the MOA during Mr. Zellers's

[8] **Exhibit MAC-4** at 2-3.

Q.22 In his prefiled testimony, at p. 20:14-18 (Q/A 34), Mr. Zellers stated, "As we move forward implementing the 1991 Agreement and the Final Program, the Project Owners will need to have confidential discussions about various matters and strategy as it related to AWWU. It makes no sense and is a direct conflict of interest to have the General Manager of AWWU in those discussions." How do you respond?

A.22 As I stated above, under the MOU, I will make all decisions as they related to AWWU in my role as the AHP representative on the EOC and not as the General Manger of AWWU. My decisions will be consistent with prudent utility practices and the rights and obligations of Chugach and MEA as required by the Eklutna PPA and MEA PPA. AHP and AWWU have entered into a Supplemental MOU, dated October 29, 2024.[12] Under this Supplemental MOU, I will not exercise the powers of the General Manger of AWWU until a final decision is issued in this docket and any judicial review is compete. As the Director of AHP, I will advise AWWU on matters provided there is no risk of conflict between the interests of AHP and the interests of AWWU regarding the Eklutna Hydroelectric Project. If the MOA regains its voting rights, I will promptly resign from AWWU.

VII. PUMPED STORAGE HYDROPOWER ** PROVISIONAL TESTIMONY **

The provisional testimony below and associated exhibits are presented for consideration only if the Commission issues a decision expanding the scope of this docket to include PSH options at the Eklutna Project.

PREFILED REPLY TESTIMONY OF

MARK A. CORSENTINO, P.E.

WITH NOVEMBER 12, 2024 ERRATA INCLUDED

STATE OF ALASKA

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners:	John M. Espindola, Chairman Robert A. Doyle Robert M. Pickett John C. Springsteen
In the Matter of the Petition Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee	U-24-024

PREFILED REPLY TESTIMONY OF MARK A. CORSENTINO, P.E.

I. INTRODUCTION

Q.1 Please state your name and title.

A.1 My name is Mark A. Corsentino, P.E., and I am the Utility Director of Anchorage Hydropower ("AHP") and the General Manager of Anchorage Water and Wastewater Utility ("AWWU"), except for matters involving both AHP and AWWU, for which Assistant General Manager David Persinger serves as Acting General Manager of AWWU, and I serve only as Utility Director of Anchorage Hydropower.

Q.2 Are you the same Mark Corsentino that prepared direct testimony in this case?

A.2 Yes.

Q.3 What is the purpose of your testimony?

A.3 The purpose of my testimony is to respond to the prefiled responsive testimony of Tony Zellers and Eugene Ori on behalf of Chugach Electric Association, Inc. ("Chugach") and

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

Matanuska Electric Cooperative, Inc. ("MEA"). Specifically, I will respond to Mr. Zellers's and Mr. Ori's testimony regarding membership on the EOC, prudent utility practice, and the MOA's surrender of its voting rights on the EOC. In addition, I will provide provisional testimony regarding pumped storage hydropower ("PSH"). That provisional testimony and associated exhibits are presented for consideration only if the Commission issues a decision expanding the scope of this docket to include PSH options at the Eklutna Project.

Q.4 Will other witnesses provide reply testimony?

A.4 No.

Q.5 Please describe how your testimony is organized.

A.5 First, I will discuss the importance of Commission lifting the MOA's surrender of its voting rights. Second, I will clarify the qualifications the MOA must acquire before the Commission will lift the MOA's surrender of its voting rights. Third, I will discuss the meaning of prudent utility practice. Fourth, I will discuss the effect that the Commission's lifting of the MOA's surrender of its voting rights will have. Fifth, I will discuss the conflict of interest issue. Finally, in my "provisional" testimony, I will discuss PSH at the Eklutna Project.

II. LIFTING THE MOA'S SURRENDER OF ITS VOTING RIGHTS

Q.6 What is the MOA's interest in getting its surrender of its voting rights on the EOC lifted?

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

A.6 First, the MOA wants to meaningfully participate on the EOC. The MOA is the majority owner of the Eklutna Hydroelectric Project ("Eklutna Project"). Like any owner of any property, the MOA has a legitimate interest in exercising all of the rights of ownership. Every EOC decision directly impacts the MOA's property. Moreover, although Chugach and MEA have options to purchase the Eklutna Project after the PPAs expire, there is no guarantee they will do so, and the MOA should have the power to protect its long-term interests in the Eklutna Project. For example, the MOA should have the power to protect its interests regarding a future sale of its assets, a subject regarding which Chugach and MEA have potential conflicts of interest with the MOA, since they have an incentive to minimize the ultimate sales price. Chugach and MEA should not be able to control property they do not own in such a way that could be adverse to the interests of the owner. Second, the MOA is one of Chugach's largest electric customers and relies on electric rates to be reliable and affordable. Decisions made by the EOC regarding its budget and capital expenditures directly affect the rates the MOA pays. Third, the MOA is a home rule city and has an obligation to look out for the public interest, which gives it a different perspective than Chugach and MEA. Fourth, while Chugach and MEA claim the MOA's surrender of its voting rights has resulted in less contentious decision making on the EOC because all decisions require a consensus, there are times when having a third party is necessary to avoid an impasse. On information and belief, there are matters that the EOC can and should resolve which Chugach and MEA have long put off because of the lack of any mechanism to resolve disagreements between Chugach and MEA. Finally, the EOC is responsible for implementing the Final Fish and Wildlife Program ("F&W Program"),

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

which the Governor established on October 2, 2024. Implementing the F&W Program will involve important decisions affecting the F&W Project and the people of Anchorage. AHP is responsible for a portion of the costs resulting from EOC decisions about operations, maintenance, and capital investments for the F&W Program. The payments AHP receives from Chugach and MEA from the PPAs are not based in any part on AHP's actually incurred costs and it is possible the costs of the F&W Program could exceed PPA revenues, potentially impacting AHP and the MOA budget. AHP cannot increase Eklutna Project revenues to address increased costs resulting from the F&W Program. Without a vote on the EOC, AHP has no control over the costs. The MOA deserves to exercise its full voting rights on the EOC with respect to the F&W Program just as much as Chugach and MEA do.

Q.7 Prior to your approval to be the Utility of Director of AHP on June 2, 2024, what efforts did the MOA make to acquire the expertise required to fully participate as a voting member of the EOC?

A.7 The MOA publicly advertised a job posting for AHP General Manager from April 28, 2021 to May 28, 2021, which yielded 10 applicants. The MOA conducted additional recruitment efforts outside of formal job postings over the last several years, which yielded at least three candidates. Among other times, prior to February 3, 2022, the MOA consulted with Chugach and MEA prior to appointing me as its representative to the EOC. For example, there are two documents that reflect such consultation (February 3, 2022, letter from Matt Clarkson, Chugach Executive VP, General Counsel to Kolby A. Hickel, Deputy Municipal

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS

255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

Manger, and Benjamin Bowman, Assistant Municipal Attorney; and February 3, 2022, e-mail from David Pease, MEA In-House Counsel, to Benjamin Bowman, Matthew Clarkson, and Todd Glass, Counsel for Chugach and MEA). Chugach and MEA have asserted attorney-client privilege for those documents.

Q.8 In his prefiled testimony, at p.8:7-10 (Q/A 12), Mr. Ori stated, "[t]he Commission therefore required that the MOA surrender its voting rights on the EOC for a term length at least equal to the terms of the related PPAs and until the MOA could attain the requisite sufficient knowledge of prudent utility practice and of the Railbelt electric system." How do you respond?

A.8 In Order U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39"), the Commission stated that MOA's surrender of its voting rights on the EOC "must have a term at least equal to the term of the [Eklutna Power Purchase Agreement ("Eklutna PPA") with Chugach] and the [MEA Power Purchase Agreement ("MEA PPA")], as those agreements may be extended, and cannot be lifted until such time as [AHP] has shown to [the Commission's] satisfaction that [AHP] has acquired the expertise required to fully participate as a voting member of the EOC."[1]

As AHP has argued in its Brief Regarding Interpretation of Order 39, filed with the Commission on September 18, 2024, my interpretation of Order 39 is that the Commission can lift the MOA's surrender and reinstate the MOA's voting rights before the terms of the Eklutna PPA and MEA PPA expire, so long as the MOA and AHP show AHP has acquired

[1] Order 39 at 67 (May 28, 2020) (emphasis added).

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION

ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

the expertise required to fully participate as a voting member of the EOC to the Commission's satisfaction. I do not believe Order 39 barred the MOA from regaining its voting rights on the EOC until after the Eklutna PPA and MEA PPA expire, regardless of whether AHP has acquired the necessary expertise.

Q.9 In his prefiled testimony, at pp. 15:19 – 16:1 (Q/A 26), Mr. Zellers stated, "We read the Commission's surrender requirements in Order 39 as a fundamental requirement that the MOA should only regain its voting rights with respect to the EOC, implementation of the 1991 Agreement, and operations and maintenance of the Eklutna Project when and only when the MOA demonstrates its representatives will act in a manner consistent with prudent utility practices and with due respect for how the Eklutna Project plays a key role in the generation, transmission, and overall reliability of the Railbelt."

A.9 Mr. Zellers misstates what the Commission has stated it requires from the AHP owner representative in order for the MOA's surrender of its voting rights to be lifted. In Order 39, the Commission identified two characteristics that AHP's owner representative must have in order to lift the MOA's surrender of voting rights: knowledge of prudent utility practice and knowledge of the Railbelt generation and transmission system.[2]

III. EOC REPRESENTITIVE QUALIFICATIONS

Q.10 In his prefiled testimony, at pp. 6:14 – 7:2 (Q/A 10), Mr. Ori stated "[t]he EOC is responsible for the Eklutna Project's: (1) oversight of major maintenance and operations

[2] *Id.* at 66.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION

(907) 277-1604

(power plant and switchyard) and dam safety and inspections; and (2) preparation of the annual project budget, reliability and scheduling occurrences, project status reports, monthly revenue reports and energy usage among members, and notifications related to factors that limit energy or capacity, such as reservoir levels and transmission constraints." Please describe how you are qualified to fulfill these responsibilities.

A.10 I am a licensed engineer with a background in electrical engineering and approximately 20 years of utilities experience. As a licensed engineer, I understand the mechanics and theory of electricity generation and transmission. I have been the General Manager of the AWWU since February 2019 and was the Director of Operations and Maintenance and a Project Management Engineer/Supervisor before that. As the General Manager of AWWU, I oversee the operation and maintenance of the hydropower generation from AWWU's Eklutna Energy Station, as well as AWWU's Reservoir 3&4 Facility and 92nd Street PRV Facility. I also oversee AWWU's co-location with Chugach's Plant 2A. I am regularly involved in the construction of pump stations and other projects requiring significant power supply from the grid. This has given me a greater understanding of power systems and related issues such as power correction, phase, amplitude, and frequency of AC power.

I direct and oversee two economically regulated utilities with a combined annual revenue of $139 million, annual capital budgets of $35 million, and a net book value of over one billion dollars. I oversee 280 full-time AWWU employees as well as AWWU's two water treatment plants, three wastewater treatment plants, 1,600 miles of underground pipelines, and 200 water and sewer remote facilities.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

During my time at AWWU, I have gained significant experience with operation capital expenditures, leading projects such as SCADA control system upgrades, and providing project management design and construction expertise in water transmission main projects, sewer pump station projects, and wastewater treatment process improvement projects. I have overseen several utility rate cases. I am also versed in compliance with the uniform system of accounts pursuant to 3 AAC 48.277, particularly subsections (9) through (13) for electric public utilities and (14) through (17) for water utilities.

In addition, I have experience representing AHP on the EOC in a non-voting capacity for the last several years. As such, I have knowledge of Eklutna Project matters including hydropower generation, scheduling, integration with other Railbelt resources, SCADA (as managed through Chugach), and project maintenance. I have also completed the National Hydropower Association ("NHA") Hydropower Systems Principals Course that covers topics such as operations, maintenance and dam safety.

Q.11 In his prefiled testimony, at p. 8:15-19 (Q/A 15), Mr. Zellers stated, "An effective member of the EOC should have deep knowledge of hydroelectric facilities, their operations and maintenance, and applicable prudent utility practices, as well as a broad understanding of the Railbelt, its systems, reliability standards, how utilities interact with each other to maintain the Railbelt system, and how the Eklutna Project plays a key role in the Railbelt." How do you respond?

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

A.11 As I discussed above, the Commission, in Order 39, identified two characteristics that AHP's owner representative must have in order to lift the MOA's surrender of voting rights: knowledge of prudent utility practice and knowledge of the Railbelt generation and transmission system.[3] While the characteristics listed by Mr. Zellers might be ideal, they go far above and beyond what the Commission has stated it requires of AHP's owner representative in order for the MOA's surrender of its voting rights to be lifted.

Q.12 How did the Commission identify knowledge of prudent utility practice and knowledge of the Railbelt generation and transmission system as the two characteristics that AHP's owner representative must have in order to lift the MOA's surrender of voting rights?

A.12 The Commission discussed testimony from Chugach Witness Dustin Highers, stating that based on his experience as EOC chair, "that to be an owner representative on the EOC, it was essential that the representative have knowledge of prudent utility practice and the Railbelt electric generation and transmission system."[4] The Commission also noted that knowledge of prudent utility practice is "the management standard specified for the [AHP] EOC representative in both the Eklutna PPA and the MEA PPA."[5]

[4] *Id.*
[5] *Id.* (citing to the Eklutna PPA at 9 and the MEA PPA at 8).

IV. PRUDENT UTILITY PRACTICES

Q.13 In his prefiled testimony, at p. 10:5-6 (Q/A 18), Mr. Ori stated, "As a prudent utility operator, Chugach is obligated to use the least cost, most efficient means to operate and maintain our assets." Do you agree that a prudent utility operator is obligated to use the least cost, most efficient means to operate and maintain our assets?

A.13 No, minimizing costs of operation and maintenance, to the exclusion of all other considerations, is not prudent utility practice. As defined in the PPAs between the MOA and Chugach and the MOA and MEA, Prudent Utility Practice requires, among other things, the application of "reasonable judgment" to "accomplish the desired result at the lowest reasonable cost consistent with good business practices, reliability, safety, expedition and the requirements of any governing authority having jurisdiction."[6] Moreover, even simply with respect to costs, there are short term costs and total lifecycle costs that sometimes are in competition and need to be considered and balanced.

Q.14 Are there guidelines for Prudent Utility Practice other than the definitions in the PPAs between the MOA and Chugach and the MOA and MEA as discussed above?

A.14 As a regulated utility, AHP must follow the standards under 3 AAC 52.400 – 3 AAC 52.500, "which ensure that electric utilities will render safe, reliable, and prompt service to the public "and "implement them with diligence and good faith to maintain the proper balance between economic effectiveness and the provision of safe, adequate service to the

[6] Appendix D to Order 39 at 40; Appendix H to Order 39 at 38-39.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS

(907) 277-1604

public."[7] In addition, the Anchorage Municipal Charter, § 16.01(a), states "[e]ach municipal utility shall be operated in accordance with the general standards common to utilities providing the same utility service."

Q.15 In his prefiled testimony, at p.7:17-19 (Q/A 13), Mr. Zellers stated, "[I]t is important for the EOC to follow prudent utility practices to maintain and operate the Eklutna Project in such a way as to maximize its benefit to all members." How do you respond?

A.15 The statement appears to be true and supports the MOA's request to lift the surrender of its voting rights. The only way the MOA can guarantee the EOC maximizes its benefit to all members is for the MOA to participate fully as a voting member.

Q.16 In his prefiled testimony, at p. 10:9-12 (Q/A 19), Mr. Zellers stated, "As the MOA-MEA PPA states, we make decisions that are 'expected to accomplish the desired result at the lowest reasonable cost consistent with good business practices, reliability, safety, expedition and the requirements of any governing authority having jurisdiction.'" How do you respond?

A.16 The statement appears to be true and supports the MOA's request to lift the surrender of its voting rights. The only way the MOA has a say determining the desired result and the lowest reasonable cost is for the MOA to participate fully on the EOC as a voting member.

[7] 3 AAC 52.400(b).

V. EFFECT OF MOA REGAINING VOTING RIGHTS

Q.17 In his prefiled testimony, at p. 9:9-13 (Q/A 17), Mr. Zellers stated, "Before the acquisition transaction, the costs were allocated among the Project Owners in a manner consistent with ownership interests: MOA – 53.33%; Chugach – 30%; MEA 16.67%. After the transaction (and effectiveness of the PPAs) this became: Chugach – 64.29%; MOA – 19.04%; MEA 16.67%." Should the fact the MOA's cost allocation is less than its ownership interest have an effect on the MOA's voting rights?

A.17 No. First, the MOA's ownership interest has not changed. The MOA is still the majority owner with 53.33%. Second, voting rights were set by contract among the Project owners based on ownership, not based on then-current cost allocations or any cost allocations as they may change in the future. Chugach's acquisition of substantially all of the assets of ML&P did not change those contractually assigned voting rights or assign any portion of the MOA's voting rights to Chugach. If Chugach had wanted to purchase the MOA's voting rights in its acquisition of ML&P or purchase the right to exercise the MOA's voting rights commensurate with cost allocation, Chugach could and should have bargained for that valuable right and provided the MOA with valuable consideration. Third, after the PPAs expire, the cost allocation could revert back to what it was previously, consistent with ownership interests. Until then, the MOA needs its voting rights to protect the valuable assets that it still owns and may continue to own even after the expiration of the PPAs.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

Q.18 In his prefiled testimony, at p. 15:12-18 (Q/A 26), Mr. Zellers stated, "Should the MOA regain its voting rights, we expect that the Assembly will attempt to undo, redo or otherwise block the Project Owners' implementation of the Final Fish and Wildlife Program approved by the Governor on October 2, 2024 in pursuit of its own policy goals. We do not trust how the MOA might act if it regains majority voting rights in matters related to the Eklutna Project, the 1991 Agreement, and implementation of the Final Fish and Wildlife Program." How do you respond?

A.18 According to the Anchorage Municipal Charter, § 16.01(a), which binds every element of the Municipality, "Each municipal utility," including AHP, "shall be operated in accordance with the general standards common to utilities providing the same utility service." There is thus no risk that the MOA will use its vote on the EOC in a manner that is inconsistent with prudent utility practice. Mr. Zellers appears to speculate that, within the zone of choices available to all the Project Owners under prudent utility practice, he might end up having different preferences from the Municipality. Any such good faith disagreements among the Project Owners, if they do occur, can and should be resolved using the traditional mechanisms that have always been used to resolve disputes among the Project Owners. The mere possibility of future disagreement among the Project Owners is no basis on which to deny the majority owner its voting rights under the applicable contracts and Order 39.

Q.19 Assuming the Commission finds that you have the expertise required to fully participate as a voting member of the EOC and lifts the MOA's surrender of its voting rights, what would happen if or when you leave your position as Utility Director of AHP?

A.19 The MOA would hire a qualified replacement and would rely on the expertise and knowledge of any other AHP executives or employees that may exist at the time of such an event. My replacement, in conjunction with the other officers and employees of AHP, must possess such knowledge. Additionally, as stated in my prefiled direct testimony, the MOA has contracts with professional engineering firms that have knowledge of generation and transmission and there are other members of the MOA Administration that have prudent management experience.

VI. CONFLICT OF INTEREST

Q.20 Prior to AHP filing its Request for Acknowledge of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee with the Commission, has either Chugach or MEA raised concerns about actual or potential conflicts of interest between ML&P or AHP and AWWU that may impact AHP's participation on the EOC?

A.20 I am not aware of Chugach or MEA raising any such concerns. During discovery, Mr. Ori stated he "was not aware of any concerns raised by Chugach to the MOA about potential or actual conflicts of interests between ML&P and AWWU that impacted ML&P's participation on the EOC."[8] Mr. Zellers stated that "as the current MEA representative on the EOC, is not aware of any concerns raised by MEA to the MOA during Mr. Zellers's

[8] **Exhibit MAC-4** at 2-3.

(907) 277-1604

term on the EOC, about potential conflict of interest between ML&P and AWWU that arose during his time on the EOC."[9] Mr. Zellers noted "that water rights and allocation of water related benefits were allocated to, and subsumed within, ML&P's interests, and to his knowledge, no conflicts between ML&P and AWWU related to water rights and allocation were managed at the EOC."[10]

Q.21 As AHP's owner representative on the EOC, you may be involved in confidential discussions about matters and strategy relating to AWWU. Do you believe your role as both the Utility Director of AHP and the General Manager of AWWU would present a conflict of interest ?

A.21 No. As I stated in my prefiled direct testimony, under the Memorandum of Understanding between AHP and AWWU ("MOU"),[11] I will act solely as the Utility Director of AHP and will abstain from any decisions that need to be made by the General Manager of AWWU in any instance of conflicting interests between AHP and AWWU.

Under the MOU, I will not take any action in my role as the General Manager of AWWU on "issues that effect the interest, operations, or obligations" of AHP. In such instances, AWWU's interests will be represented by AWWU's Assistant General Manager. All decisions I will make in my role as the AHP representative on the EOC will be consistent with prudent utility practices and the rights and obligations of Chugach and MEA as required by the Eklutna PPA and MEA PPA.

[9] **Exhibit MAC-5** at 2.
[10] *Id. at* 2-3.
[11] Previously produced as **Exhibit MAC-3**.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS

Q.22 In his prefiled testimony, at p. 20:14-18 (Q/A 34), Mr. Zellers stated, "As we move forward implementing the 1991 Agreement and the Final Program, the Project Owners will need to have confidential discussions about various matters and strategy as it related to AWWU. It makes no sense and is a direct conflict of interest to have the General Manager of AWWU in those discussions." How do you respond?

A.22 As I stated above, under the MOU, I will make all decisions as they related to AWWU in my role as the AHP representative on the EOC and not as the General Manger of AWWU. My decisions will be consistent with prudent utility practices and the rights and obligations of Chugach and MEA as required by the Eklutna PPA and MEA PPA. AHP and AWWU have entered into a Supplemental MOU, dated October 29, 2024.[12] Under this Supplemental MOU, I will not exercise the powers of the General Manger of AWWU until a final decision is issued in this docket and any judicial review is compete. As the Director of AHP, I will advise AWWU on matters provided there is no risk of conflict between the interests of AHP and the interests of AWWU regarding the Eklutna Hydroelectric Project. If the MOA regains its voting rights, I will promptly resign from AWWU.

VII. PUMPED STORAGE HYDROPOWER ** PROVISIONAL TESTIMONY **

The provisional testimony below and associated exhibits are presented for consideration only if the Commission issues a decision expanding the scope of this docket to include PSH options at the Eklutna Project.

[12] **Exhibit MAC-6**.

Q.23 In his prefiled testimony, at p. 12:8-13 (Q/A 21), Mr. Ori stated, "I do know that the Eklutna Project designed and built in the 1950s was not designed to be operated in a bidirectional manner. Replacing the existing turbines alone would be quite costly. Based on my professional experience, I expect that retrofitting the project to operate in a manner it was never intended to operate, but consistent with prudent utility practices, would be very costly." In his prefiled testimony, at Q/A 31, Mr. Zellers stated, "The Eklutna Project was built in the 1950s, and similar to other hydroelectric projects developed during that time, was never designed to be operated in a bidirectional manner, so the engineering and retrofitting costs will be substantial and the risks to the Project could be well beyond those that a prudent utility operator would take." How do you respond?

A.23 First, the MOA's proposed PSH options were a "concept." The MOA presented PSH concepts to get feedback from the Assembly to request pursuing an evaluation through the Governor's F&W Program review process. As noted in the MOA's presentation, there are data gaps to be filled and much vetting and analysis still to be done, hence why the MOA request was simply to further evaluate the PSH options that are available at Eklutna.

Second, regardless of whether 80 years ago the Eklutna Project was originally designed for bidirectional PSH, like most systems, including the Eklutna tunnel, the Eklutna Project can be modified or retrofitted to uses that were not specifically foreseen. And Chugach and MEA have not "engineer[ed] or model[ed] [PSH options] to see if it was economically or engineeringly feasible at [Eklutna]."[13]

[13] **Exhibit MAC-7** at 31.

Q.24 In his prefiled testimony, at pp. 17:23 – 18:3 (Q/A 30), Mr. Zellers stated, "Our engineering consultants . . . determined that converting the Eklutna Project to a pumped storage project would present significant technical and logistical challenges, making the proposal infeasible from an engineering perspective and likely economically prohibitive." How do you respond?

A.24 Without a formal engineering evaluation to review, those statements are premature. And more importantly, PSH is a concept with many options and variations that can be used to convert variable renewable energy sources ("VREs") to firm power to benefit the Utilities and Railbelt, as noted by the Owners themselves in their November 2022 response to the USF&W comments requesting PSH be evaluated with fish bypass.[14] Further, considering the looming Cook Inlet gas shortage, it is prudent and reasonable to explore alternative energy sources. But without an evaluation, the feasibility and economics cannot be known. After the further evaluation of PSH that is mandated by the Governor's F&W Program has been conducted, I will evaluate in good faith whether, in my professional opinion, implementing any PSH option at Eklutna Lake is feasible and consistent with prudent utility practice, and I will also evaluate in good faith how a PSH option scores under the public interest factors set out in the 1991 Fish and Wildlife Agreement. I will not vote on the EOC to advance a PSH option that I believe to be inconsistent with prudent utility practice.

Robert M. Pickett
John C. Springsteen

In the Matter of the Petition Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee	U-24-024 ORDER NO. 8

ORDER GRANTING MOTION TO DISMISS IN PART AND DISMISSING NOTICE AND REQUEST, DENYING MOTION TO DISMISS IN PART, VACATING PROCEDURAL SCHEDULE, DENYING MOTION TO COMPEL, DENYING REQUEST TO CONSTRUE NOTICE AND REQUEST AS PETITION TO AMEND CERTIFICATE CONDITION, PROVIDING GUIDANCE FOR FUTURE FILINGS, AND CLOSING DOCKET

BY THE COMMISSION:

Summary

We grant the motion to dismiss filed by the Office of the Attorney General, Regulatory Affairs and Public Advocacy Section (RAPA) in part, and dismiss the *Notice and Request for Acknowledgment of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee* (Notice and Request) filed by the Municipality of Anchorage d/b/a Anchorage Hydropower (AHP) on July 18, 2024. We deny the motion to dismiss in part. We vacate the remaining procedural schedule adopted for resolution of this docket, including the prehearing conference scheduled for November 18, 2024, and the public hearing scheduled to begin on November 18, 2024. We deny the motion to compel discovery responses jointly filed

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

by Chugach Electric Association, Inc. (Chugach) and Matanuska Electric Association, Inc. (MEA). We deny the request by AHP to construe its Notice and Request as a petition to modify the conditions on AHP's certificate of public convenience and necessity (certificate). We provide guidance to AHP for its consideration should it make future filings related to reinstatement of Eklutna Operating Committee (EOC) voting rights. We close this docket.

Background

In Order U-18-102(44)[1] we described the Eklutna Hydroelectric Project (Eklutna Project) as follows:

> The Eklutna Project was built and operated by the federal government pursuant to the Eklutna Power Act of 1950. In 1995, Congress authorized sale of the Eklutna Project to [the Municipality of Anchorage d/b/a Municipal Light & Power Department (ML&P)], Chugach, and MEA under the terms of the 1989 Eklutna Purchase Agreement. Under this agreement, the three utilities received an undivided interest in all of the Eklutna Project, water rights, generation plant and the transmission assets interconnecting the Eklutna Project with ML&P, Chugach, and MEA. ML&P obtained a 53.33% ownership interest, Chugach obtained a 30% ownership interest, and MEA obtained a 16.67% interest in the Eklutna Project. Eklutna Project energy, capacity, and costs are to be allocated based on these ownership interests. ML&P and Chugach assert that the Eklutna Project currently has a maximum capacity of 39 MW.
>
> The three utilities created the Eklutna Operating Committee (EOC) to make all management decisions related to operation, maintenance, and budgeting for the Eklutna Project. ML&P, Chugach, and MEA each have a representative on the EOC. Decisions by the EOC are made based upon a double majority consisting of affirmative votes by at least two of the three utilities whose ownership shares total at least 51% of the Eklutna Project ownership. Effectively, management of the Eklutna Project is limited to actions approved by ML&P and at least one of Chugach or MEA.[2]

[1]Order U-18-102(44)/U-19-020(39)/U-19-021(39), *Order Accepting Stipulation in Part, Subject to Conditions; Transferring and Issuing Certificates of Public Convenience and Necessity, Subject to Conditions; Addressing Beluga River Unit Management, Gas Transfer Prices, and Third Party Sales Gas Pricing; and Requiring Filings*, dated May 28, 2020 (Order U-18-102(44)).

[2]Order U-18-102(44) at 60-61 (footnotes omitted).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

Chugach filed a petition seeking our approval of its acquisition of all service obligations and most assets of ML&P, and an application to amend its certificate to reflect the new service obligations.[3] Under the terms of this acquisition, Chugach would offer employment to all ML&P employees and the Municipality of Anchorage would retain no ML&P employees.[4] Under this acquisition, Chugach was not purchasing ML&P's interest in the Eklutna Project Power Plant, but was acquiring a portion of ML&P's share of cost responsibilities and output from the Eklutna Project for a 35 year period.[5] Docket U-19-020 was opened to investigate this petition and application.[6]

As part of this same transaction, ML&P filed an application to amend its certificate to delete its current service territory and add the Eklutna Project Power Plant site as its new service territory.[7]

[3] *Petition for Approvals Needed to Acquire Anchorage Municipal Light and Power and Application to Amend Certificate of Public Convenience and Necessity No. 8*, filed April 1, 2019 (Petition for Approvals), in Docket U-19-020.

[4] *Pre-filed Direct Testimony of Arthur W. Miller*, filed April 1, 2019, in Docket U-19-020, Exhibit AWM-03 at 67 (Section 6.05(a)); Docket U-19-020/U-19-021 Tr. 2708-2709.

[5] Petition for Approvals at 8.

[6] Order U-19-020(1), *Order Addressing Timeline for Decision, Inviting Participation by the Attorney General and Petitions to Intervene, Scheduling Prehearing Conference, Giving Notice of Possible Consolidation, Designating Commission Panel, and Appointing Administrative Law Judge*, dated April 18, 2019.

[7] *Application of the Municipality of Anchorage d/b/a Municipal Light and Power to Amend Certificate of Public Convenience and Necessity No. 121 and to Terminate Dividend Restriction*, filed April 5, 2019 (ML&P Application).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

Docket U-19-021 was opened to investigate this application.[8] Dockets U-19-020 and U-19-021 were consolidated with Docket U-18-102.[9]

We ultimately approved the transaction under which Chugach acquired the service obligations and most of the ML&P assets, subject to conditions.[10] One of these conditions required ML&P to surrender its voting rights on the EOC prior to the effective date of the agreements under which ML&P's successor would be providing part of its share of the Eklutna Project output to Chugach (the Eklutna Power Purchase Agreement (PPA))[11] and selling the remainder of its share of the Eklutna Project output to MEA (the MEA PPA).[12] We required that:

> This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.[13]

---

[8]Order U-19-021, *Order Addressing Timeline for Decision, Inviting Participation by the Attorney General and Petitions to Intervene, Scheduling Prehearing Conference, Giving Notice of Possible Consolidation, Designating Commission Panel, and Appointing Administrative Law Judge*, dated April 18, 2019.

[9]Order U-18-102(8)/U-19-020(2)/U-19-021(2), *Order Consolidating Dockets, Designating Party, Requiring Filing, Granting Petitions to Intervene, Adopting Procedural Schedule, Addressing Timeline for Final Decision, and Amending Docket Captions*, dated May 8, 2019.

[10]As part of this transaction, ML&P's ownership interest in the Eklutna Project transmission system interconnecting the Eklutna Project Power Plant with the transmissions systems of Chugach, ML&P, and MEA was transferred to Chugach and MEA. The Eklutna Project transmission system is not at issue in this docket.

[11]The Eklutna PPA is attached as Appendix D to Order U-18-102(44) and is entitled *Eklutna Power Purchase Agreement Between Chugach Electric Association, Inc. ("Purchaser") and Municipality of Anchorage ("Seller")*.

[12]Order U-18-102(44) at 65-67. The MEA PPA is attached as Appendix H to Order U-18-102(44) and is entitled *Eklutna Power Purchase Agreement Between Municipality of Anchorage ("Seller") and Matanuska Electric Association, Inc. ("Purchaser")*.

[13]Order U-18-102(44) at 67.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

In compliance with this condition, ML&P surrendered its EOC voting rights effective October 30, 2019.[14]

Almost five years later, AHP filed the Notice and Request seeking reinstatement of its EOC voting rights.[15] In this filing, AHP asserted that Anchorage Water and Wastewater (AWWU) General Manager Mark A. Corsentino had been appointed to be the General Manager of AHP and that AWWU Engineering Director Mark Schimscheimer would provide support to Corsentino. AHP filed the resumes of these two employees.[16] To reflect the time these two AWWU employees are expected to spend on AHP business, 20% of Corsentino's salary and 10% of Schimscheimer's salary would be paid by AHP.[17] AHP requested a decision on its Notice and Request within 30 days of the date it was filed, or by August 17, 2024.[18]

We issued public notice of the Notice and Request, with comments due by August 26, 2024.[19] The Native Village of Eklutna filed comments indicating the Village's endorsement of AHP's request.[20] Chugach and MEA jointly filed comments identifying issues related to the Notice and Request that they believed should be investigated.[21]

---

[14]*Notice of ML&P's Surrender of Eklutna Operating Committee Voting Rights*, filed October 30, 2020, in Dockets U-18-102/U-19-020/U-19-021.

Discussion

Motion to Dismiss

In its Motion to Dismiss, RAPA seeks dismissal of AHP's Notice and Request on two grounds. First, RAPA asserts that AHP only desires to have its EOC voting rights restored so that it could have greater input on the Eklutna Project Fish and Wildlife Program identified in Section 104(a) of Public Law 104-58. RAPA states that the Governor has now approved the Eklutna Project Fish and Wildlife Program. Based on this action, RAPA concludes that the Notice and Request is now moot and should be dismissed.[54] Second, RAPA also asserts that the Notice and Request should be dismissed because it is premature under the minimum term of EOC voting rights surrender specified in Order U-18-102(44).[55]

We raised the issue that the Notice and Request appears to be premature under the minimum term of EOC voting rights surrender specified in Order U-18-102(44) at the prehearing conference.[56] That issue has been extensively briefed by the parties and we will address it first.

Dismissal as Premature Under the Terms of Order U-18-102(44)

In Order U-18-102(44) we established a minimum term for ML&P's surrender of its EOC voting rights as a condition of AHP's certification as a public utility and as a condition of our approval of the Eklutna PPA and the MEA PPA. This term is stated as follows:

> We can only find that [AHP] is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders

> its vote on the EOC under the Eklutna Project agreement so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without [AHP] having a vote on operating or management decisions. **This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as [AHP] has shown to our satisfaction that [AHP] has acquired the expertise required to fully participate as a voting member of the EOC**.[57]

AHP based its request for reinstatement of EOC voting rights on the assertion that it had acquired the expertise required to fully participate as a voting member of the EOC in compliance with the second half of this condition.[58] AHP initially made no reference to the minimum term of EOC voting rights surrender required by Order U-18-102(44).[59]

We raised the minimum term of EOC voting rights surrender issue at the prehearing conference, and AHP responded that it disagreed with the suggestion that Order U-18-102(44) mandated a minimum term of EOC voting rights surrender.[60] We requested briefing on this issue.[61] In its briefing on this issue, AHP acknowledged that if Order U-18-102(44) mandated a minimum term of EOC voting rights surrender it would not have EOC voting rights until both the Eklutna PPA and the MEA PPA elapsed.[62] AHP raised several grounds on which it based its belief that Order U-18-102(44) did not mandate a minimum term of EOC voting rights surrender. We address those grounds separately.

Rules of Statutory and Contract Interpretation

AHP asserts:

> It is a principle of both contract law and statutory interpretation that contracts and statutes should not be interpreted in a manner that renders

> language superfluous. To the extent there is any ambiguity in the language of a past Commission Order, the Commission should apply the same rules of interpretation here.[63]

AHP cites to no authority for application of this rule of interpretation to our orders. For the sake of clarity in this proceeding we address this issue as if these rules of interpretation do apply to our orders, without determining if these rules do apply to our orders.

The minimum term of EOC voting rights surrender is stated in Order U-18-102(44) as:

> This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as [A]HP has shown to our satisfaction that [A]HP has acquired the expertise required to fully participate as a voting member of the EOC.

As an initial matter, we agree with RAPA that there is no grammatical ambiguity in the minimum term of EOC voting rights surrender language.[64] AHP has disputed RAPA's grammatical evaluation of this language.[65] However, each of AHP's arguments would result in portions of the language actually used in Order U-18-102(44) being rendered superfluous in violation of the very rules of interpretation AHP suggests that we follow. AHP's arguments for finding a grammatical ambiguity are not convincing and we do not agree with AHP's assertion that there is grammatical ambiguity in the minimum term of EOC voting rights surrender language used in Order U-18-102(44).

AHP also argues that there is a contextual ambiguity in the minimum term of EOC voting rights surrender language in Order U-18-102(44). Specifically, AHP argues that the minimum term of EOC voting rights surrender renders Section 4.2 of the Eklutna PPA and Section 4.2 the MEA PPA superfluous in violation of the rules of construction it

[63]AHP Initial Brief at 13 (footnote omitted).

[64]RAPA Brief at 3-5

[65]AHP Reply Brief at 7-14.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

relies upon.[66] Examination of the context in which the minimum term of EOC voting rights surrender language is stated in Order U-18-102(44) shows that there is no contextual ambiguity between that language and the two Section 4.2 referred to by AHP.

AHP argues that if we intended the minimum term of EOC voting rights to be enforced as written, we would have disapproved the Section 4.2 referred to by AHP.[67] However, in crafting Order U-18-102(44) we "sought to find a way to approve this transaction while leaving as much of the parties' bargain intact as possible."[68] We did not disapprove any part of the transaction documents unless we specifically found that the public interest required disapproval of that part. Our failure to completely harmonize the transaction documents with the substance of Order U-18-102(44) cannot be taken as a basis for nullifying or rendering superfluous any express term stated in Order U-18-102(44).

Section 4.2 of the Eklutna PPA states:

> Section 4.2 Operation of the Facility.
>
> (A) In accordance with the Operations Agreement (as may be amended by the Operations Agreement Amendment), during the Term Purchaser shall manage, control, operate and maintain the Chugach Portion in a manner consistent with Prudent Utility Practice.
>
> (B) During the Term, Seller shall, in consultation with Purchaser, select the person to serve as Seller's representative to the Operating Committee (the "Seller's Representative"). The Seller's Representative shall make all decisions on the Operating Committee consistent with Prudent Utility Practice and the rights and obligations of the Parties under this PPA. Seller's Representative shall also be Seller's representative for any consultation, study, and implementation processes required under the Fish and Wildlife Agreement relating to the Facility. The Seller's Representative shall make all decisions with respect to any processes required under the Fish and Wildlife Agreement with due regard for the rights and obligations of the Parties under this PPA.

[67]AHP Initial Brief at 9-19

[68]Order U-18-102(44) at 11.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

> (C) The Parties acknowledge and agree that Seller has prior rights to not less than 41 million gallons of water per day from Eklutna Lake for public water supply pursuant to the Act of October 30, 1984, 98 Stat. 2823; Alaska Statutes 46.15.150(a); and Certificate of Appropriation AOL 44944. The Parties agree that during the Term, the supply of water available for production of Power by the Seller's Interest shall be net of all water taken by Anchorage Water and Wastewater Utility for public water supply purposes.[69]

Eklutna PPA Subsection 4.2(A) deals with Chugach's obligations as Purchaser and Subsection 4.2(C) only identifies the Municipality of Anchorage's rights to water from Eklutna Lake. Neither of these two subsections are relevant to AHP's argument and we do not address them further.

Subsection 4.2(B) requires AHP, as Seller, to consult with Chugach in the selection of AHP's representative on the EOC. In Order U-18-102(44), we stated:

> We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions. This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.[70]

This language allows, but does not require, AHP to have a non-voting representative attend EOC meetings. Not disapproving Subsection 4.2(B) leaves intact the parties bargain requiring AHP to consult with Chugach when selecting AHP's representative to the EOC. Further, nothing in the Order U-18-102(44) prevents AHP's non-voting EOC representative from participating in EOC meetings "consistent with Prudent Utility Practice

[69]Order U-18-102(44), Appendix D at 9.

[70]Order U-18-102(44) at 67.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

and the rights and obligations of the Parties under this PPA." The "consistent with Prudent Utility Practice and the rights and obligations of the Parties under this PPA" language of Eklutna PPA Subsection 4.2(B) places boundaries on the AHP non-voting representative's participation in EOC meetings and our not disapproving Subsection 4.2(B) leaves intact the parties' bargain for this limitation on AHP.

Subsection 4.2 of the MEA PPA states:

> Section 4.2 Operation of the Facility.
>
> (A) During the Term Seller shall, at its cost and expense, manage, control, operate, and maintain the MEA Portion in accordance with the Operations Agreement and in a manner consistent with Prudent Utility Practice. Without limiting the foregoing, during the Term, as between Seller and Purchaser. Seller shall be responsible for all capital costs, all operations and maintenance expenses, and all costs and expenses for environmental compliance and compliance with Applicable Laws relating to the MEA Portion.
>
> (B) During the Term. Seller shall, after giving Purchaser a reasonable opportunity to consult with Seller. but without in any way limiting Seller's discretion as a result of any such consultation, select the person to serve as Seller's representative to the Operating Committee (the "Seller's Representative"). The Seller's Representative shall make all decisions on the Operating Committee consistent with Prudent Utility Practice and the rights and obligations of the Parties under this PPA and the rights and obligations of the parties under the Chugach Power Purchase Agreement. The Seller's Representative shall also be Seller's representative for any consultation, study. and implementation processes required under the Fish and Wildlife Agreement relating to the Facility. The Seller's Representative shall make all decisions with respect to any processes required under the Fish and Wildlife Agreement with due regard for the rights and obligations of the Parties under this PPA.
>
> (C) The Parties acknowledge and agree that Seller has prior rights to not less than 41 million gallons of water per day from Eklutna Lake for public water supply pursuant to the Act of October 30, 1984. 98 Stat. 2823; Alaska Statutes 46.15.150(a); and Certificate of Appropriation AOL 44944. The Parties agree that during the Term, the supply of water available for production of Power by the Seller's Interest shall be net of all water taken by Anchorage Water and Wastewater Utility for public water supply purposes consistent with the aforementioned water rights.

MEA PPA Subsection 4.2(A) does not address AHP's representation on the EOC and Subsection 4.2(C) only identifies the Municipality of Anchorage's rights to water from

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

Eklutna Lake. Neither of these two subsections are relevant to AHP's argument and we do not address them further.

As discussed above, the minimum term of EOC voting rights surrender condition allows AHP to have a representative attend EOC meetings. The MEA PPA Section 4.2(B) requirement that AHP consult with MEA on AHP's choice of that representative remains effective even if the AHP representative has no voting rights. Also, as discussed above, the "consistent with Prudent Utility Practice and the rights and obligations of the Parties under this PPA" language of MEA PPA Subsection 4.2(B) places boundaries on the AHP non-voting representative's participation in EOC meetings and our not disapproving Subsection 4.2(B) leaves intact the parties' bargain for this limitation on AHP.

Eklutna PPA Section 4.2(B) and MEA PPA Section 4.2(B) are both silent on voting rights and thus the requirement that ML&P surrender its EOC voting rights does not expressly nullify any part of these provisions. Both subsections include the phrase: "Seller's Representative shall make all decisions on the Operating Committee consistent …." This language could imply that AHP makes EOC decisions. As discussed in Order U-18-102(44), with its EOC voting rights intact ML&P had authority to veto decisions of the EOC but did not have authority to make decisions for the EOC except with the agreement of at least Chugach or MEA.[71] Because ML&P never had the authority to make EOC decisions, we read the "Seller's Representative shall make all decisions on the Operating Committee consistent" language to refer to the decisions AHP, as ML&P's successor, makes about its own participation in EOC decisions. Nothing in Order U-18-102(44) renders the language in Eklutna PPA Section 4.2(B) or MEA PPA Section 4.2(B) superfluous, and the existence of the language in these two subsections does not

[71] Order U-18-102(44) at 60-61.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

create any contextual ambiguity in the minimum term of EOC voting rights surrender language used in Order U-18-102(44).

AHP points to history of TA525-18 and TA379-121 where our Staff asked AHP and MEA if MEA PPA Section 4.2(B) needed to be revised based upon the apparent inconsistency with the minimum term of surrender language in Order U-18-102(44) as evidence of contextual ambiguity.[72] In TA525-18 and TA379-121, on October 22, 2020, our Staff asked MEA and ML&P to respond to the following:

> I believe there is an inconsistency between the MEA Eklutna PPA and the final order (U-18- 102(44)/U-19-020(39)/U-19-021(39)) (U-18-102(44).
>
> At page 67 of U-18-102(44) the Commission required MOA/ML&P to surrender its vote on the EOC so Chugach and MEA could manage the Eklutna Hydro project.
>
> The MEA Eklutna PPA, at page 4, Section 4.2(B) appears to allow MOA/ML&P to keep its vote on the EOC.
>
> Does MEA [or ML&P] believe the language between the final order and the MEA Eklutna PPA as summarized above are in conflict? Please explain your response and provide a remedy if appropriate.

MEA responded to this request as follows:

> Mr. Layne, regarding your inquiry, MEA offers the following response.
>
> The MEA Eklutna Hydro PPA, by and between MEA and the MOA, was entered into and executed in September 2019, several months prior to the RCA's May 2020 decision requiring ML&P to surrender its vote on the EOC as a condition of approving the sale of ML&P. This appears to be the reason for the "conflict" you reference because at the time the PPA was negotiated, the parties had no way of knowing the future RCA decision regarding ML&P's surrendering of EOC voting rights. MEA notes that the provision you reference and cite as a conflict in the MEA Eklutna Hydro PPA is contained verbatim in the Chugach Eklutna Hydro PPA (see Appendix D of Order U-18-102(44), Section 4.2(B) at page 9 of 92), which the RCA conditionally approved as part of Order U-18-102(44).
>
> In MEA's view, if the RCA wishes to resolve this perceived conflict, the remedy should be similar and consistent with how the RCA remedied the same conflict in the Chugach Eklutna Hydro PPA, which could include approving the MEA PPA subject to the same conditions the RCA previously imposed in Order U-18-102(44). Specifically, MEA is agreeable to having the same vote

[72] AHP Initial Brief at 14-18; AHP Reply Brief at 15-17 (in this brief, AHP erroneously refers to TA525-18 as being TA525-15).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

surrender language in order U-18-102(44) at page 67 apply to the MEA Eklutna Hydro PPA. Hopefully this helps resolves this matter.[73]

ML&P responded to this request as follows:

> The MOA/ML&P do not believe that the MEA Eklutna PPA is inconsistent Order No. U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39"). The part of Order 39 that you cite states:
>
> "We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the [Chugach] Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions." Order 39 at 67.
>
> To comply with the Order, ML&P will surrender its vote on the EOC prior to the closing of the ML&P sale to Chugach, which will be before the effective date of the Chugach Eklutna PPA and of the MEA Eklutna PPA. ML&P will promptly file a notice of that surrender with the RCA. The surrender will have a term at least equal to the term of the two PPAs, subject to termination of the surrender upon MHP showing to the RCA's satisfaction "that MHP has acquired the expertise required to fully participate as a voting member of the EOC." Order 39 at 67. If and when MHP has a proposed EOC representative that satisfies the qualifications, MHP will file that information and request that the RCA make the necessary finding for termination of the EOC vote surrender.
>
> Like Section 4.2(B) of the Chugach Eklutna PPA, Section 4.2(B) of the MEA Eklutna PPA requires MHP, in consultation with the Purchaser, to select MHP's representative on the EOC. As a result of Order 39, MHP won't have any voting representative on the EOC until the surrender is terminated upon a positive finding by the RCA that MHP's proposed representative is qualified. Thus, Section 4.2(B) of neither PPAs need to be amended. In addition, Section 4.2(B) should remain as written as it will be relevant if and when MHP's voting rights surrender is terminated in the future upon the necessary finding of the RCA.[74]

The ambiguity that our Staff was inquiring about is different from the ambiguity alleged by AHP. Staff was concerned that MEA PPA Section 4.2(B) contractually allowed AHP to exercise a vote on the EOC after the surrender was in effect. This is due to the language used in the MEA PPA, and as noted by MEA, language that is also in the Eklutna PPA.

[73]Correspondence from T. Clark, filed October 23, 2020, in TA525-18.

[74]Correspondence from D. Thompson, filed October 27, 2020, in TA379-121.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

MEA responded that the MEA PPA was negotiated several months before Order U-18-102(44) was issued, and that the language of the MEA PPA did not reflect the surrender of ML&P's voting rights on the EOC required by Order U-18-102(44) because the parties were not aware that we were going to order that surrender. Both MEA and ML&P assured us that the language in Order U-18-102(44) was sufficient to prevent ML&P from having voting rights on the EOC after the effective date of surrender.

ML&P stated in the correspondence quoted above that: "As a result of Order [U-18-102(44)], [A]HP won't have a voting representative on the EOC until the surrender is terminated upon a positive finding by the RCA that MHP's proposed representative is qualified." In the paragraph immediately above, ML&P restated the requirement for restoration of their vote on the EOC as: "The surrender will have a term at least equal to the term of the two PPAs, subject to termination of the surrender upon MHP showing to the RCA's satisfaction "that MHP has acquired the expertise required to fully participate as a voting member of the EOC."" ML&P appears to assert that their modification from the minimum term of EOC voting rights surrender language of Order U-18-102(44) in their informal response to Staff's request should have put us on notice that they were nullifying the first part of the condition stated in Order U-18-102(44).[75]

We disagree with that assertion. If ML&P considered the language we used in Order U-18-102(44) to be unreasonable, erroneous, unlawful, or otherwise defective, their remedy was to timely file a petition for reconsideration under 3 AAC 48.105 or an appeal under AS 22.10.020(d) and Alaska Rule of Appellate Procedure 602(a)(2).[76] As Order U-18-102(44) was issued May 28, 2020, any petition for review was required to be filed by June 12, 2020 and any appeal was due to be filed by June 30, 2020. ML&P

[75]AHP Initial Brief at 16.

[76]Order U-18-102(44) at 143.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

waived its right to challenge the language used in Order U-18-102(44) by failing to take either of those routes. ML&P has no authority to unilaterally revise the requirements of Order U-18-102(44) based on correspondence with our Staff on October 27, 2020, months after waiving its right to seek such revisions.

Staff was specifically asking if the MEA PPA Section 4.2(B) language conflicted with the EOC voting rights surrender required by Order U-18-102(44). Staff was not asking about the minimum term of EOC voting rights surrender or about the methodology for restoration of those voting rights and AHP has provided no evidence that Staff paid any attention at all to ML&P's superfluous comments on those issues. AHP cites to no authority where such remarks can effectively rewrite the express terms of our orders.

In responding to Staff's request, ML&P stated: "Section 4.2(B) should remain as written as it will be relevant if and when [A]HP's voting rights surrender is terminated in the future upon the necessary finding of the RCA." As noted by AHP, we have authority under AS 42.05.271 to modify certificate conditions after providing notice and opportunity for hearing and for good cause shown.[77] Such modification is not necessarily tied to AHP's acquisition of adequate technical and managerial resources to fully participate on the EOC. For example, MEA PPA Section 11.2(A)(3) allows for early termination of the MEA PPA in the event of an uncured default.[78] Eklutna PPA Section 9.2(A)(3) allows for early termination of the Eklutna PPA in the event of an uncured default.[79] Without prejudging the matter, AHP might be able to show good cause for reinstatement of its EOC voting rights, at least in part, upon the early termination of one

[77]AHP Reply Brief at 43.

[78]Order U-18-102(44), Appendix H at 15.

[79]Order U-18-102(44), Appendix D at 16.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

of these agreements but not the other. Therefore, leaving Eklutna PPA Section 4.2(B) and MEA PPA Section 4.2(B) intact leaves that portion of the parties' bargain intact in the event that we do someday modify the minimum term of EOC voting rights surrender stated in order U-18-102(44).

For all the reasons discussed above, AHP has failed to establish a contextual ambiguity based on the language of Eklutna PPA Section 4.2(B) and MEA PPA Section 4.2(B) or our strict interpretation of the minimum term of EOC voting rights surrender stated in Order U-18-102(44). Eklutna PPA Section 4.2(B) and MEA PPA Section 4.2(B) are both currently effective in part and may become fully effective in the manner AHP desires sometime in the future. The continued existence of these two provisions do not justify a revision of the minimum term of EOC voting rights surrender language stated in Order U-18-102(44).

Public Understanding

AHP also suggests that we should modify the minimum term of EOC voting rights surrender stated in Order U-18-102(44) based upon the "public" understanding of that term expressed in various places.[80] AHP cites to no authority for this proposition. We note that part of the "public" understanding AHP relies upon is implied from past statements of Chugach, MEA, and RAPA.[81] In response, RAPA stated:

> At the August 30, 2024, prehearing conference, the Commission—through ALJ Walker—noted two things. First, that neither AHP's request for acknowledgement nor the motion for expedited consideration discussed why the Commission should set aside the minimum time-period for the voting rights surrender. And second, "it appears that the Commission should be considering dismissal of the notice and request for acknowledgment as being prematurely filed…."
>
> When examining AHP's Notice and Request for Acknowledgment, the Office of the Attorney General, Regulatory Affairs & Public Advocacy Section

[80]AHP Initial Brief at 14-20.

[81]AHP Initial Brief at 19-20.

(RAPA) incorrectly focused on the second half of the above-quoted language from Order 39 and not the issues raised by the Commission.[82]

Chugach and MEA stated:

> Chugach and MEA admit that until ALJ Walker raised this issue in this proceeding, they had not examined this issue closely and were theoretically comfortable with an interpretation of the Surrender that if and when the MOA could demonstrate technical and managerial fitness, potentially with certain conditions imposed on the MOA to require MOA act consistently with prudent utility practice, to prevent the MOA from undermining the Project Owners' work in implementing the Final Fish and Wildlife Program, and to protect the Eklutna Project as a valuable resource in the Railbelt, the MOA would be entitled to regain its voting rights on the EOC and with respect to the Fish and Wildlife Agreement before the end of the PPA terms.
>
> Upon further review in this proceeding, however, Chugach and MEA no longer think that this matter is so simple for two primary reasons. First, with respect to this narrow issue, the Commission is asking the parties if they agree or disagree with the Commission's interpretation of the applicability of the term length language, and because Chugach and MEA do see ambiguity in the language, the Commission is in the best position to explain what it intended. There also exists ample reasonable legal basis, well supported by facts, for the Commission's interpretation that the Surrender must last for the duration of the PPA terms centered on the fact that MOA has ceded most of its rights and responsibilities to the Eklutna Project during the duration of those PPAs. Further, the facts that justified the Surrender requirement in the first place are materially unchanged. Second, even if the Commission intended, through its language, to create a path for MOA to regain its voting rights before the end of the PPA terms, such process should not render the length of term requirement language meaningless as MOA's Brief position would. Rather, there must be an acknowledgement of the Surrender term requirement and a demonstration that the concerns behind such requirement will be addressed for the duration of the PPA terms.[83]

In reply, AHP asserts that the responsive arguments of RAPA, Chugach, and MEA are in error.[84] AHP acknowledges that RAPA, Chugach, and MEA changed their position after reviewing the minimum term of EOC voting rights surrender language in Order U-18-102(44) when that language was pointed out to them at the prehearing conference held August 30, 2024.[85]

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

From the explanations provided by RAPA, Chugach, and MEA, their earlier positions on the restoration of EOC voting rights to AHP was based on an incomplete reading of Order U-18-102(44). ML&P never asked us for clarification of the minimum term of EOC voting rights surrender language in Order U-18-102(44), and thus we do not know if ML&P's understanding of that language was based on a complete reading of the order either.

AHP cites to the language used by ML&P in its written surrender of EOC voting rights as evidence that ML&P understood that AHP's EOC voting rights could be restored whenever it made a showing that it had acquired the expertise to fully participate as a voting member of the EOC. AHP quoted from the surrender as follows:

> In accordance with the requirements of order U-18-102(44), the Municipality of Anchorage, dba Municipal Light & Power(ML&P), hereby surrenders its voting rights as an EOC member and under the Fish and Wildlife Agreement effective as of the Closing of the Asset Purchase Agreement between ML&P and Chugach Electric Association (Chugach). **This surrender of voting rights shall remain in effect until ML&P's successor complies with the RCA requirements pertaining to qualifications for ML&P's representation on the EOC.**
>
> **Until ML&P's successor complies with the qualification terms of RCA order U-18-102(44),** all EOC decisions will be by unanimous vote of Chugach and Matanuska Electric Association, Inc. (MEA). Eklutna hydro operations, dispatch and maintenance will continue to follow past practices and policies unless changes are approved through the EOC process.[86]

There is nothing in this surrender language indicating that ML&P is only surrendering its EOC voting rights until such time as its successor makes a showing that it has acquired the expertise required to fully participate as a voting member of the EOC. This surrender language states that ML&P is surrendering its voting rights in accordance with the requirements of Order U-18-102(44) and that the surrender remains in effect until ML&P's successor complies with our requirements pertaining to qualifications for ML&P's

[86]AHP Initial Brief at 17 (emphasis is by AHP in the Brief and is not in the original surrender of EOC voting rights).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

representation on the EOC. Those requirements include the minimum term of surrender and our approval of the transaction under which Chugach acquired ML&P's service obligations and most ML&P assets was conditioned on ML&P's surrender of its voting rights in conformance with that entire requirement.

We are not convinced that there is any reason to change the minimum term of EOC voting rights surrender expressly stated in Order U-18-102(44) based upon 'public' understanding when that understanding was based upon an incomplete reading of the order. We also do not find that ML&P or AHP has the right to modify the minimum term of EOC voting right surrender stated in Order U-18-102(44) based upon a post-hoc assertion that it misunderstood the terms of that order. We note that ML&P's surrender of its EOC voting rights was filed well after the time to request reconsideration of Order U-18-102(44) had passed and the time for appeal of that order had also passed. Thus ML&P no longer had any right to seek revision of the minimum term of EOC voting rights surrender except under a new proceeding seeking revision of that term. Inserting what may now be considered ambiguous language in a compliance filing is not adequate to make such a change.

Evidentiary Context

AHP further claims that we must interpret prior orders within the context of the evidence on which the prior order was based.[87] That is our standard practice. In Dockets U-18-102/U-19-020/U-19-021, we received written testimony from Municipal Attorney Rebecca Windt Pearson[88] that included the following:

---

[87]AHP Reply Brief at 19-21.

[88]*Prefiled Reply Testimony of Rebecca Windt Pearson*, filed August 2, 2019 (Windt Pearson Testimony), in Dockets U-18-102/U-19-020/U-19-021; as corrected by *Municipal Light and Power's Errata to the Prefiled Reply Testimony of Rebecca Windt Pearson*, filed August 9, 2029. This testimony was marked as Hearing Exhibit T-22 in Dockets U-19-020/U-19-021.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

Q12. Why did ML&P retain its ownership share of the Eklutna generation plant and sell the output to Chugach, rather than simply including its share of the Eklutna generation plant in the sale?

A12. Both Chugach and the MOA had interests that were served by having the MOA continue to own its share of the Eklutna generation plant and sell the output of the MOA's share to Chugach (and possibly also to MEA).

Initially, the parties discussed Chugach financing a portion of the asset acquisition price through unsecured payments over a period of time. That changed, however, when the MOA expressed concern regarding the lack of security associated with those payments. The MOA was concerned that, if it sold all of ML&P's assets to Chugach, but Chugach failed to make an unsecured future payment, the MOA would have no recourse other than litigation or pursuing a claim as a general unsecured creditor in a bankruptcy proceeding.

The parties resolved this concern by carving ML&P's ownership interest in the Eklutna generation plant out of the sale. As a result of the MOA retaining the ML&P share of the Eklutna generation plant, Chugach was able to pay for the Transactions without requiring the MOA to incur the risk of unsecured future payments. The Parties then entered into the Chugach PPA to allow Chugach to receive the output from ML&P's Eklutna interest at Chugach's avoided cost.

This arrangement served each party's interests. It benefits the MOA because, if Chugach ever fails to make future payments under the Chugach PPA, ML&P can, as a result of its retained ownership of its share of Eklutna, sell the power from that share to another entity—likely another Railbelt utility, and likely at a higher "avoided cost." The fact that Chugach's avoided costs are lower than other Railbelt utilities also informed the allocation of risks in the Chugach PPA. The MOA likely could sell power from its retained share of Eklutna to another entity at a higher avoided cost rate, but any such transaction would likely require the MOA to accept greater risks. The MOA agreed to sell power to Chugach, at Chugach's avoided cost, at least partly because of the transaction's more preferable risk profile. The Chugach PPA benefits Chugach because it allows it to make power purchase payments over time, thereby avoiding the added margin costs associated with additional upfront financing.[89]

Windt Pearson swore under oath that her written testimony was true and correct, and it was admitted as evidence into the record of Dockets U-19-020/U-19-021.[90] In its Application filed in Docket U-19-021, ML&P stated:

> ML&P will continue to be a department of the MOA, however it will have no employees and any function requiring labor will be performed by the MOA (e.g.

[89]Windt Pearson Testimony at 8-9.

[90]Docket U-19-020/U-19-021 Tr. 2489-2489.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

billing and financial statement preparation will be performed by the MOA Finance Department).[91]

…

As mentioned above, historically the operation and maintenance activities of Eklutna have been performed by Chugach, MEA, and ML&P. After the Transactions close, the division of responsibilities will be allocated between Chugach and MEA. Both Chugach and MEA have power production and transmission experience. They have the necessary expertise to perform all necessary functions to operate Eklutna. As has been the practice in the past, any operational or capital function that is beyond their expertise will be contracted to a firm specializing in the function.

The MOA will receive payments under the Chugach PPA and Chugach will pay all operating, maintenance, and capital costs associated with ML&P's Eklutna interest. If MEA enters into a PPA for its pro rata share of ML&P's Eklutna output, ML&P will be responsible for the operating, maintenance, and capital costs associated with that share of ML&P's Eklutna interest. The MEA PPA payments ML&P receives, however, will be sufficient to pay any operating, maintenance, and capital costs that ML&P will be responsible for. If MEA enters into a PPA for its pro rata share of ML&P's Eklutna output, ML&P will establish a $3 million reserve fund in the first year of operation to address any intra-year revenue shortfalls, to be called upon if revenues received are not sufficient in any year to cover the operating, maintenance, or capital costs of ML&P's Eklutna interest. In addition, if unforeseen adverse events require it, the MOA has sufficient borrowing capacity to make necessary operating, maintenance, or capital investments related to ML&P's Eklutna interest.

The MOA has a Finance Department with experienced professional accountants that have the necessary expertise to perform the required accounting functions for ML&P's limited post-Transactions Eklutna interest ownership and long term wholesale bulk power sales to Chugach or Chugach and MEA under the PPAs. The Finance Department will maintain ML&P's books and records, consistent with the Uniform System of Accounts. These books and records will include ML&P's revenues received under the PPAs and ML&P's share of monthly operational and capital costs. The Finance Department will track any assets purchased or constructed by the EOC, to include tracking operation and maintenance costs for the assets. Further, the Finance Department will maintain continuing property records to include original asset cost, annual depreciation, and net book value of all assets.[92]

At hearing in Dockets U-19-020/U-19-021, Windt Pearson orally testified as follows:

ALJ WALKER:· Is the Municipality, after closure of this transaction, retaining any employees of ML&P?

MS. WINDT PEARSON:· The plan is not to. And I know that we have discussed what we would need to do to have the necessary advice, expertise,

---

[91]ML&P Application at 12.

[92]ML&P Application at 12-14 (heading omitted).

Regulatory Commission of Alaska

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

> and personnel in order to continue to participate in the Eklutna Operating Committee. I think that we envision the stub utility being the department that reports up to the municipal manager. And that, more likely than not, we would utilize consultant services to provide that industry-specific expertise and staffing to help us make informed decisions as a continuing member of the Eklutna Operating Committee. Because we would not be retaining any employees of Municipal Light & Power.
>
> ALJ WALKER:· Have you investigated to see if any such expertise exists in the consulting community?
>
> MS. WINDT PEARSON:· We have not done so yet.[93]

Based on the record from Dockets U-18-102/U-19-020/U-19-021, ML&P was retaining the Eklutna Project Power Plant only for the purpose of preserving a cash flow in the event Chugach defaulted on its payments under the Eklutna PPA. ML&P planned only on collecting revenue under the Eklutna PPA and the MEA PPA, keeping track of the expenses it incurred under the MEA PPA for bookkeeping purposes, and maintaining the net book value of Eklutna Project assets. Maintaining accurate accounting of the net book value of assets will be necessary for calculation of the price Chugach and MEA will have to pay to purchase their proportionate shares of AHP ownership interest in the Eklutna Project under the Eklutna PPA and the MEA PPA.[94]

ML&P assured us that revenue earned under the MEA PPA would be adequate to cover all Eklutna Project capital, operating, and maintenance expense that it would be obligated to pay under that agreement. ML&P further assured us that it would maintain a $3,000,000 cash reserve for the Eklutna Project which, with the Municipality of Anchorage's existing credit capacity, would be adequate to meet any cash flow contingencies that may arise.

On this record, none of the purposes for which ML&P was retaining its ownership interests in the Eklutna Project Power Plant required or would benefit from

(907) 276-6222; TTY 1-800-770-8973

ML&P's participation as voting member of the EOC. ML&P effectively admitted that, as of the time of hearing in Dockets U-19-020 and U-19-021, it would not retain the staff expertise required to sit as a voting member of the EOC and had made no plans to acquire such expertise. ML&P also admitted that Chugach and MEA did have the expertise to sit as voting members of the EOC. These circumstances provide good cause under AS 42.05.271 for conditioning AHP's certificate with a requirement that ML&P's surrender its EOC voting rights for a term at least equal to the term of the Eklutna PPA and the term of the MEA PPA.

Finding Notice and Request Premature Under Order U-18-102(44)

In Order U-18-102(44) we stated that:

> Under these circumstances, we cannot unconditionally find that MHP is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions. **This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC.** This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.[95]

In its briefing, AHP has not shown good cause for modifying or interpreting this certificate condition in a manner that nullifies the minimum term of EOC voting rights surrender specified in Order U-18-102(44). Therefore, AHP's voting rights on the EOC are surrendered for at least the term of the Eklutna PPA and the MEA PPA.

The Eklutna PPA and the MEA PPA both became effective on October 30, 2020, the date on which Chugach acquired the service responsibilities and most assets

[95]Order U-18-102(44) at 67 (Emphasis added).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

of ML&P.[96] The Eklutna PPA and the MEA PPA are both scheduled to expire on October 31, 2055, roughly 31 years from now.[97] There are provisions in these two agreements allowing for both extending them and for terminating them early. At this time, no entity, including ourselves, can predict when the terms of the Eklutna PPA and the MEA PPA will expire.

We have reviewed the documents filed in this docket by AHP and found no commitment on the part of Corsentino or Schimscheimer to remain employed by AHP until such time as the terms of the Eklutna PPA and the MEA PPA expire. We do not know how we could verify the veracity of such commitments had they been made. We also have no way of evaluating what the requirements to fully participate as a voting member of the EOC might be at that time. For these reasons, we grant RAPA's motion to dismiss the Notice and Request on the grounds that it premature under the terms of Order U-18-102(44). This dismissal is without prejudice to refiling closer to the time that Eklutna PPA and the MEA PPA will expire.

Dismissal as Moot

In addition to moving for dismissal of the Notice and Request as being premature under the terms of Order U-18-102(44), RAPA moved for dismissal on the grounds that the Notice and Request were now moot. RAPA asserted that AHP only wanted to have its EOC voting rights reinstated so that it could have greater input on design of the Eklutna Project Fish and Wildlife Program identified in Section 104(a) of Public Law 104-58. RAPA further asserts that the Governor has now approved the Eklutna Project Fish and Wildlife Program. Based on this action, RAPA concludes that

[96] *See*, Order U-18-102(44), Appendix D at 3-4, 35; Appendix H at 7, and *Notice of Transaction Closing*, filed October 30. 2020, in Dockets U-18-102/U-19-020/U-19-021.

[97] Order U-18-102(44), Appendix D at 9, 41; Appendix H at 7, 40.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

the Notice and Request is now moot and should be dismissed.[98] AHP has disputed RAPA's assertions on this issue and claims that dismissal on this ground would be inappropriate.[99] RAPA has replied that its assertions are supported by the record.[100]

Given our decision above to dismiss the Notice and Request on the ground that it is premature under the requirements of Order U-18-102(44), we do not need to decide if the Notice and Request is also moot. We deny RAPA's motion to dismiss on the ground that the Notice and Request is moot on the ground that the mootness issue is now moot.

Vacate Procedural Schedule

We adopted a procedural schedule for resolution of this docket.[101] With our decision to dismiss the Notice and Request there is no need to proceed through hearing in this docket. Therefore, we vacate the remaining procedural schedule for this docket including the prehearing conference scheduled for November 18, 2024, and the hearing scheduled to begin on November 18, 2024.

Deny Motion to Compel Discovery Responses

Chugach and MEA filed a motion to compel discovery responses intended to produce information to be used in their examination of Corsentino.[102] AHP has opposed this motion primarily on the ground that the information requested is not relevant to the scope of this docket.[103] Chugach and MEA have responded to this opposition by asserting that the requested information is relevant to any determination of Corsentino's

---

[98]Motion to Dismiss at 1-7.

[99]AHP Response at 2-6.

[100]RAPA Reply at 2.

[101]Order U-24-024(4).

[102]Motion to Compel at 1-18.

[103]AHP Opposition at 7-22.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

understanding of prudent utility practice and that this determination is within the scope of this docket.[104]

With our decisions above to dismiss the Notice and Request and to vacate the procedural schedule for this docket, there will be no examination of Corsentino. Therefore, we deny the Motion to Compel on the ground that it is now moot.

Deny Request to Construe Notice and Request

AHP has asked us to construe its Notice and Request to be an application to amend its certificate conditions if we find that the minimum term of EOC voting rights surrender in Order U-18-102(44) is enforceable.[105] The timeline under which we are required to resolve this docket runs out January 14, 2025.[106] This would leave approximately 60 days to address modification of AHP's certificate. Under AS 42.05.175(a)(2) we are typically allowed 180 days to resolve a certificate amendment application. We find that there is too little time for us and the parties to address amendment of AHP's certificate in this docket. Therefore, we deny the request to construe the Notice and Request to be an application to modify AHP's certificate.

Guidance for Future Filings

AHP states that if we do not construe its Notice and Request as an application to amend its certificate, or otherwise grant it the relief it seeks in this proceeding, it "could simply file a new application to modify its certificate."[107] We have not construed AHP's Notice and Request to be an application to amend its certificate or otherwise granted AHP the relief it has requested in this proceeding. We provide AHP with guidance on future filings seeking relief from the minimum term of EOC voting rights

[104]Chugach/MEA Reply at 2-10.

[105]AHP Reply Brief at 43.

[106]Order U-24-024(1) at 5.

[107]AHP Reply Brief at 43.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

surrender required by Order U-18-102(44). We provide this guidance without having completed our investigation of the qualifications of Corsentino and Schimscheimer, and this guidance is not a judgement on their qualifications to be AHP's representative on the EOC.

We start by pointing out that in Order U-18-102(44) we did not require ML&P to surrender its EOC voting rights merely because the then Municipal Manager was not qualified to sit as a voting member of the EOC. What we stated was:

> ML&P asserts that billing and record keeping under the Uniform System of Accounts will be done for MHP by the professional accountants working for the MOA's Financial Department. These accountants will also maintain MHP's continuing property records, calculating annual depreciation and net book value of plant in service. ML&P has provided no evidence in support of this assertion that accountants employed by the MOA's Financial Department are trained to maintain records in accordance with the Uniform System of Accounts or to maintain continuing property records. However, we are aware that many of our smaller regulated utilities retain outside accountants to maintain their records in accordance with our regulations and thus we are aware that those private resources are available.
>
> ML&P proposes that MHP will have a seat on the EOC, even though it will have no employees. ML&P states that MHP will be managed by the Municipal Manager, a position currently filled by William D. Falsey. Falsey has a law degree from Yale Law School and a Bachelor of Science degree in physics from Stanford University. Falsey has worked as the MOA's manager since 2017 and worked in legal positions from 2003 through 2017.
>
> Chugach witness Dustin Highers testified based on his experience as chair of the EOC that to be an owner representative on the EOC, it was essential that the representative have knowledge of prudent utility practice and the Railbelt electric generation and transmission system. Dustin Highers testified that there were two ML&P employees he was aware of qualified to sit on the EOC and that both of those employees were being transferred to Chugach as part of the transaction. There is nothing in Falsey's resume indicating that he has any knowledge of the Railbelt generation and transmission system, or prudent utility practice which is the management standard specified for the MHP EOC representative in both the Eklutna PPA and the MEA PPA. ML&P indicated "that, more likely than not, we would utilize consultant services to provide that industry-specific expertise and staffing to help us make informed decisions as a continuing member of the [EOC]." However, ML&P admitted that it has not investigated whether such expertise exists in the consulting community.
>
> Under these circumstances, we cannot unconditionally find that MHP is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that MHP is managerially and technically fit to

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

> maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions. This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.[108]

We required ML&P to surrender its EOC voting rights because it had no person qualified to sit in EOC meetings and understand the discussion, and because ML&P was proposing no definitive support team for their EOC representative.

Prior to the transaction under which Chugach acquired the ML&P service obligations and most of the ML&P assets, each member of the EOC was qualified to participate in meetings and knowledgeably discuss all issues related to management and operation of the Eklutna Project. Each of those representatives was also supported by an independent team consisting of the employees, contractors, and consultants required to operate their vertically integrated electric utility, each of which was interconnected with other vertically integrated electric utilities.

With Chugach's acquisition of ML&P's employees, in addition to ML&P's service obligations and most assets, ML&P, and its successor AHP have no identified support team of employees, contractors, or consultants with the breadth and scope of relevant knowledge that the Chugach and MEA representatives continue to bring to the EOC meetings. In the Notice and Request, AHP addressed this issue merely by stating:

> In addition to the auxiliary in-house expertise that Mr. Schimscheimer provides, AHP will also have access to, and the right to use (at AHP's expense), contracts of the [Municipality of Anchorage] in order to access any additional technical and engineering expertise necessary.

[108]Order U-18-102(44) at 65-67.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

In footnote 30 at the end of this statement, AHP states:

> Exhibit 3 at 2. Such firms include Electric Power Systems, Inc., EDC, Inc., CRW Engineering Group, Inc. and Taku Engineering.

Exhibit 3 to the Notice and Request is a *Memorandum of Understanding Between Anchorage Water and Wastewater Utility and Anchorage Hydropower Utility Re Resolution of Conflicts of Interest*, signed July 18, 2024. The relevant part of this Memorandum is paragraph 3 on page 2, which states:

> AH[P] will have access to and right to use, at AH[P]' expense, contracts of the [Municipality of Anchorage] to access technical and engineering expertise necessary to oversee and conduct operations.[109]

AHP included no resumes for the proposed support group, no contracts showing the term and extent of commitment by the contractors or consultants, and no information about what process AHP will have to go through to pay its contractors and consultants. We find this generic assertion of support for the proposed AHP voting representative on the EOC to be no more substantive than ML&P's assertion in Dockets U-18-102/U-19-020/U-19-021 that they would primarily rely on consultants for the expertise required to fully participate on the EOC even though they admitted that they had not yet investigated to determine if consultants with the required expertise were available.

In addition to addressing the minimum term of EOC voting rights surrender issue, we suggest that in future filings seeking reinstatement of EOC voting rights AHP provide the information to show that it can bring to EOC meetings a depth and breadth of technical and managerial expertise at least comparable to the level of expertise that MEA and Chugach bring to those meetings. This suggestion does not just include the technical

[109]Notice and Request, Exhibit 3 at 2.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300

(907) 276-6222; TTY 1-800-770-8973

expertise of AHP's representative to the EOC, but also includes the team of employees, contractors, and consultants supporting that representative.

We denied AHP's motion for expedited consideration of its Notice and Request because AHP had failed to adequately support its request for reinstatement of its EOC voting rights. Upon initial review of AHP's filings in this docket we could see no way of moving forward without taking the time for prefiled testimony, discovery, and holding a hearing to gather the information necessary to determine if AHP had acquired the expertise required to fully participate as a voting member of the EOC.[110] We believe that efficient resolution of future filings on this issue by AHP will be more likely if AHP provides adequate information in its initial filing.

Final Order

This order constitutes the final decision in this proceeding. This decision may be appealed within thirty days of this order in accordance with AS 22.10.020(d) and Alaska Rule of Appellate Procedure 602(a)(2). In addition to the appellate rights afforded by AS 22.10.020(d), a party has the right to file a petition for reconsideration in accordance with 3 AAC 48.105. If such a petition is filed, the time period for filing an appeal is tolled and then recalculated in accordance with Alaska Rule of Appellate Procedure 602(a)(2).

Docket Closure

No substantive or procedural matters remain in this proceeding. Accordingly, we close this docket.

[110] At the prehearing conference and through the ALJ we denied AHP's motion for expedited consideration and stated that we would explain that decision in a written order to follow. Tr. 15. This is that explanation.

ORDER

THE COMMISSION FURTHER ORDERS:

1. The *Office of the Attorney General's Motion to Dismiss as Moot*, filed October 15, 2024, by the Office of the Attorney General, Regulatory Affairs and Public Advocacy Section is granted in part and denied in part as discussed in the body of this order.

2. The *Notice and Request for Acknowledgment of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee*, filed July 18, 2024, by the Municipality of Anchorage d/b/a Anchorage Hydropower, is dismissed as being premature under the requirements of Order U-18-102(44)/U-19-020(39)/U-19-021(39).

3. *Chugach Electric Association, Inc. and Matanuska Electric Association, Inc.'s Motion to Compel Discovery Responses*, filed October 28, 2024, is denied as being moot.

4. The request at page 43 in the *Municipality of Anchorage d/b/a Anchorage Hydropower's Reply Brief Regarding Interpretation of Order 39*, filed October 29, 2024, to have the *Notice and Request for Acknowledgment of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee*, filed July 18, 2024, construed as an application to modify Certificate of Public Convenience and Necessity No. 780 is denied as discussed in the body of this order.

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

THIRD JUDICIAL DISTRICT AT ANCHORAGE

ANCHORAGE MUNICIPAL ASSEMBLY, Appellant, v. REGULATORY COMMISSION OF ALASKA, et al., Appellees.	)	Case No. 3AN-24-06001CI

MOTION FOR 30-DAY EXTENSION OF TIME TO RESPOND TO MOTION TO DISMISS

The Anchorage Municipal Assembly respectfully moves for a 30-day extension to respond to the RCA's Motion to Dismiss.

On November 14, 2024, the RCA issued a decision in a related administrative proceeding involving the Municipality's request to reinstate its voting rights on the Eklutna Operating Committee. *See* RCA Docket U-24-024. The parties to that RCA proceeding are also parties to this appeal. Subsequently, the Municipal Attorney and the Assembly have initiated settlement discussions with Chugach Electric Association (CEA) and Matanuska Electric Association (MEA) regarding this appeal and the related administrative proceeding. The Assembly requests an additional 30 days to file its response to the RCA's Motion to Dismiss in order to allow the parties time to attempt to reach a global settlement.

ANCHORAGE MUNICIPAL ASSEMBLY, Appellant, v. REGULATORY COMMISSION OF ALASKA, et al., Defendant.	Case No. 3AN-24-06001CI

ORDER DENYING MOTION TO STRIKE

The Municipality of Anchorage filed a motion asking the court to strike the joinder by Chugach Electric Association, Inc. and Matanuska Electric Association. Having reviewed the motion and the response filed by Chugach and MEA, the Court denies the motion because the Municipality will not be unfairly prejudiced by the joinder given the timeline for when its Opposition to the motion to dismiss is due. In line with that decision, the Court will address the Motion for a 30-Day Extension filed by the Municipality, as well as any opposition to that request, at the status hearing scheduled for today.

Dated at Anchorage, Alaska, 12/13/24

JACK R. MCKENNA

STATEMENT OF POINTS ON APPEAL

Pursuant to Alaska Rule of Appellate Procedure 602, appellant Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP") hereby gives notice of the points upon which AHP intends to rely in its appeal of the decision of the Regulatory Commission of Alaska ("RCA") in Order No. U-24-024(8), *Order Granting Motion to Dismiss in Part and Dismissing Notice and Request, Denying Motion to Dismiss in Part, Vacating Procedural Schedule, Denying Motion to Compel, Denying Request to Construe Notice and Request as Petition to Amend Certificate Condition, Providing Guidance for Future Filings, and Closing Docket*, dated November 14, 2024 ("Order 8"):

1. The RCA erred and acted in a manner that was unreasonable, arbitrary, capricious, or contrary to law by granting the Office of the Attorney General,

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200

(907) 277-1604

Regulatory Affairs and Public Advocacy Section's ("RAPA's") motion to dismiss, by vacating the hearing, and by determining that RCA Order No. U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39")[1] did not allow for the surrender of AHP's voting rights on the Eklutna Operating Committee ("EOC") to be lifted prior to the end of the "minimum term" of the surrender, even upon a showing of acquisition of the expertise required to fully participate as a voting member of the EOC.

2. Without limiting the generality of foregoing Point No. 1, through its decision in Order 8, the RCA erred and acted in a manner that was unreasonable, arbitrary, capricious, or contrary to law by:

a. Finding that grammatically, Order 39 unambiguously required that the surrender of AHP's voting rights on the EOC could not be lifted prior to the end of the "minimum term" of the surrender, even upon a showing of acquisition of the expertise required to fully participate as a voting member of the EOC;

b. Finding that the evidentiary context and record did not show that Order 39 allowed for the surrender of AHP's voting rights on the EOC to be lifted prior to the end of the "minimum term" of the surrender, even upon a showing of acquisition of the expertise required to fully participate as a voting member of the EOC;

[1] *Order Accepting Stipulation in Part, Subject to Conditions; Transferring and Issuing Certificates of Public Convenience and Necessity, Subject to Conditions; Addressing Beluga River Unit Management, Gas Transfer Prices, and Third Party Sales Gas Pricing; and Requiring Filings*, dated May 28, 2020.

LAW OFFICES OF

A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

c. Disregarding the understanding of the parties and the public when deciding that Order 39 did not allow for the surrender of AHP's voting rights on the EOC to be lifted prior to the end of the "minimum term" of the surrender, even upon a showing of acquisition of the expertise required to fully participate as a voting member of the EOC;

d. Failing to properly interpret and apply Alaska and federal precedent and rules of interpretation in its decision; and

e. Failing to address AHP's other arguments when deciding that Order 39 did not allow for the surrender of AHP's voting rights on the EOC to be lifted prior to the end of the "minimum term" of the surrender, even upon a showing of acquisition of the expertise required to fully participate as a voting member of the EOC.

3. Even if Order 39 did not allow for the surrender of AHP's voting rights on the EOC to be lifted prior to the end of the "minimum term" of the surrender, the RCA erred and acted in a manner that was unreasonable, arbitrary, capricious, or contrary to law by determining that AHP had not shown good cause to modify its certificate of public convenience and necessity conditions to allow for the surrender of EOC voting rights to be lifted prior to the end of the minimum term of the surrender, and by denying the request to construe AHP's Notice and Request for Acknowledgement of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee as an application to amend its certificate conditions.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

4. The RCA is estopped from asserting that Order 39 did not allow for the surrender of AHP's voting rights on the EOC to be lifted prior to the end of the "minimum term" of the surrender, even upon a showing of acquisition of the expertise required to fully participate as a voting member of the EOC, pursuant to equitable estoppel and quasi-estoppel.

5. The RCA's decision in Order 8 violates state and federal constitutional due process requirements and constitutes an unconstitutional taking of property.

6. The RCA erred and acted in a manner that was unreasonable, arbitrary, capricious, or contrary to law by stating in its guidance for future filings that AHP must not only identify a qualified representative to sit on the EOC but should also identify a "definitive support team" with "a depth and breadth of technical and managerial expertise at least comparable to the level of expertise that MEA and Chugach bring."[2]

The foregoing points on appeal are stated generally and are not intended to be limited to only related or similar points of appeal stated specifically. Instead, a point of appeal stated generally is intended to include all points of appeal that could be included within the general statement.

Order No. U-24-024(8)

STATE OF ALASKA

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners: John M. Espindola, Chairman
Steve DeVries
Robert M. Pickett
John C. Springsteen

In the Matter of the Petition Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee	U-24-024 ORDER NO. 8

ORDER GRANTING MOTION TO DISMISS IN PART AND DISMISSING NOTICE AND REQUEST, DENYING MOTION TO DISMISS IN PART, VACATING PROCEDURAL SCHEDULE, DENYING MOTION TO COMPEL, DENYING REQUEST TO CONSTRUE NOTICE AND REQUEST AS PETITION TO AMEND CERTIFICATE CONDITION, PROVIDING GUIDANCE FOR FUTURE FILINGS, AND CLOSING DOCKET

BY THE COMMISSION:

Summary

We grant the motion to dismiss filed by the Office of the Attorney General, Regulatory Affairs and Public Advocacy Section (RAPA) in part, and dismiss the *Notice and Request for Acknowledgment of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee* (Notice and Request) filed by the Municipality of Anchorage d/b/a Anchorage Hydropower (AHP) on July 18, 2024. We deny the motion to dismiss in part. We vacate the remaining procedural schedule adopted for resolution of this docket, including the prehearing conference scheduled for November 18, 2024, and the public hearing scheduled to begin on November 18, 2024. We deny the motion to compel discovery responses jointly filed

by Chugach Electric Association, Inc. (Chugach) and Matanuska Electric Association, Inc. (MEA). We deny the request by AHP to construe its Notice and Request as a petition to modify the conditions on AHP's certificate of public convenience and necessity (certificate). We provide guidance to AHP for its consideration should it make future filings related to reinstatement of Eklutna Operating Committee (EOC) voting rights. We close this docket.

Background

In Order U-18-102(44)[1] we described the Eklutna Hydroelectric Project (Eklutna Project) as follows:

> The Eklutna Project was built and operated by the federal government pursuant to the Eklutna Power Act of 1950. In 1995, Congress authorized sale of the Eklutna Project to [the Municipality of Anchorage d/b/a Municipal Light & Power Department (ML&P)], Chugach, and MEA under the terms of the 1989 Eklutna Purchase Agreement. Under this agreement, the three utilities received an undivided interest in all of the Eklutna Project, water rights, generation plant and the transmission assets interconnecting the Eklutna Project with ML&P, Chugach, and MEA. ML&P obtained a 53.33% ownership interest, Chugach obtained a 30% ownership interest, and MEA obtained a 16.67% interest in the Eklutna Project. Eklutna Project energy, capacity, and costs are to be allocated based on these ownership interests. ML&P and Chugach assert that the Eklutna Project currently has a maximum capacity of 39 MW.
>
> The three utilities created the Eklutna Operating Committee (EOC) to make all management decisions related to operation, maintenance, and budgeting for the Eklutna Project. ML&P, Chugach, and MEA each have a representative on the EOC. Decisions by the EOC are made based upon a double majority consisting of affirmative votes by at least two of the three utilities whose ownership shares total at least 51% of the Eklutna Project ownership. Effectively, management of the Eklutna Project is limited to actions approved by ML&P and at least one of Chugach or MEA.[2]

[1]Order U-18-102(44)/U-19-020(39)/U-19-021(39), *Order Accepting Stipulation in Part, Subject to Conditions; Transferring and Issuing Certificates of Public Convenience and Necessity, Subject to Conditions; Addressing Beluga River Unit Management, Gas Transfer Prices, and Third Party Sales Gas Pricing; and Requiring Filings*, dated May 28, 2020 (Order U-18-102(44)).

[2]Order U-18-102(44) at 60-61 (footnotes omitted).

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

Chugach filed a petition seeking our approval of its acquisition of all service obligations and most assets of ML&P, and an application to amend its certificate to reflect the new service obligations.[3] Under the terms of this acquisition, Chugach would offer employment to all ML&P employees and the Municipality of Anchorage would retain no ML&P employees.[4] Under this acquisition, Chugach was not purchasing ML&P's interest in the Eklutna Project Power Plant, but was acquiring a portion of ML&P's share of cost responsibilities and output from the Eklutna Project for a 35 year period.[5] Docket U-19-020 was opened to investigate this petition and application.[6]

As part of this same transaction, ML&P filed an application to amend its certificate to delete its current service territory and add the Eklutna Project Power Plant site as its new service territory.[7]

[3] *Petition for Approvals Needed to Acquire Anchorage Municipal Light and Power and Application to Amend Certificate of Public Convenience and Necessity No. 8*, filed April 1, 2019 (Petition for Approvals), in Docket U-19-020.

[4] *Pre-filed Direct Testimony of Arthur W. Miller*, filed April 1, 2019, in Docket U-19-020, Exhibit AWM-03 at 67 (Section 6.05(a)); Docket U-19-020/U-19-021 Tr. 2708-2709.

[5] Petition for Approvals at 8.

[6] Order U-19-020(1), *Order Addressing Timeline for Decision, Inviting Participation by the Attorney General and Petitions to Intervene, Scheduling Prehearing Conference, Giving Notice of Possible Consolidation, Designating Commission Panel, and Appointing Administrative Law Judge*, dated April 18, 2019.

[7] *Application of the Municipality of Anchorage d/b/a Municipal Light and Power to Amend Certificate of Public Convenience and Necessity No. 121 and to Terminate Dividend Restriction*, filed April 5, 2019 (ML&P Application).

701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

Docket U-19-021 was opened to investigate this application.[8] Dockets U-19-020 and U-19-021 were consolidated with Docket U-18-102.[9]

We ultimately approved the transaction under which Chugach acquired the service obligations and most of the ML&P assets, subject to conditions.[10] One of these conditions required ML&P to surrender its voting rights on the EOC prior to the effective date of the agreements under which ML&P's successor would be providing part of its share of the Eklutna Project output to Chugach (the Eklutna Power Purchase Agreement (PPA))[11] and selling the remainder of its share of the Eklutna Project output to MEA (the MEA PPA).[12] We required that:

> This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.[13]

In compliance with this condition, ML&P surrendered its EOC voting rights effective October 30, 2019.[14]

Almost five years later, AHP filed the Notice and Request seeking reinstatement of its EOC voting rights.[15] In this filing, AHP asserted that Anchorage Water and Wastewater (AWWU) General Manager Mark A. Corsentino had been appointed to be the General Manager of AHP and that AWWU Engineering Director Mark Schimscheimer would provide support to Corsentino. AHP filed the resumes of these two employees.[16] To reflect the time these two AWWU employees are expected to spend on AHP business, 20% of Corsentino's salary and 10% of Schimscheimer's salary would be paid by AHP.[17] AHP requested a decision on its Notice and Request within 30 days of the date it was filed, or by August 17, 2024.[18]

We issued public notice of the Notice and Request, with comments due by August 26, 2024.[19] The Native Village of Eklutna filed comments indicating the Village's endorsement of AHP's request.[20] Chugach and MEA jointly filed comments identifying issues related to the Notice and Request that they believed should be investigated.[21]

Discussion

Motion to Dismiss

In its Motion to Dismiss, RAPA seeks dismissal of AHP's Notice and Request on two grounds. First, RAPA asserts that AHP only desires to have its EOC voting rights restored so that it could have greater input on the Eklutna Project Fish and Wildlife Program identified in Section 104(a) of Public Law 104-58. RAPA states that the Governor has now approved the Eklutna Project Fish and Wildlife Program. Based on this action, RAPA concludes that the Notice and Request is now moot and should be dismissed.[54] Second, RAPA also asserts that the Notice and Request should be dismissed because it is premature under the minimum term of EOC voting rights surrender specified in Order U-18-102(44).[55]

We raised the issue that the Notice and Request appears to be premature under the minimum term of EOC voting rights surrender specified in Order U-18-102(44) at the prehearing conference.[56] That issue has been extensively briefed by the parties and we will address it first.

Dismissal as Premature Under the Terms of Order U-18-102(44)

In Order U-18-102(44) we established a minimum term for ML&P's surrender of its EOC voting rights as a condition of AHP's certification as a public utility and as a condition of our approval of the Eklutna PPA and the MEA PPA. This term is stated as follows:

> We can only find that [AHP] is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders

---

[54]Motion to Dismiss at 1-7. *See*, Order U-18-102(44) at 61, and the materials cited in footnote 175, for a discussion of the Fish and Wildlife Program requirements.

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

> its vote on the EOC under the Eklutna Project agreement so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without [AHP] having a vote on operating or management decisions. **This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as [AHP] has shown to our satisfaction that [AHP] has acquired the expertise required to fully participate as a voting member of the EOC**.[57]

AHP based its request for reinstatement of EOC voting rights on the assertion that it had acquired the expertise required to fully participate as a voting member of the EOC in compliance with the second half of this condition.[58] AHP initially made no reference to the minimum term of EOC voting rights surrender required by Order U-18-102(44).[59]

We raised the minimum term of EOC voting rights surrender issue at the prehearing conference, and AHP responded that it disagreed with the suggestion that Order U-18-102(44) mandated a minimum term of EOC voting rights surrender.[60] We requested briefing on this issue.[61] In its briefing on this issue, AHP acknowledged that if Order U-18-102(44) mandated a minimum term of EOC voting rights surrender it would not have EOC voting rights until both the Eklutna PPA and the MEA PPA elapsed.[62] AHP raised several grounds on which it based its belief that Order U-18-102(44) did not mandate a minimum term of EOC voting rights surrender. We address those grounds separately.

Rules of Statutory and Contract Interpretation

AHP asserts:

> It is a principle of both contract law and statutory interpretation that contracts and statutes should not be interpreted in a manner that renders

> language superfluous. To the extent there is any ambiguity in the language of a past Commission Order, the Commission should apply the same rules of interpretation here.[63]

AHP cites to no authority for application of this rule of interpretation to our orders. For the sake of clarity in this proceeding we address this issue as if these rules of interpretation do apply to our orders, without determining if these rules do apply to our orders.

The minimum term of EOC voting rights surrender is stated in Order U-18-102(44) as:

> This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as [A]HP has shown to our satisfaction that [A]HP has acquired the expertise required to fully participate as a voting member of the EOC.

As an initial matter, we agree with RAPA that there is no grammatical ambiguity in the minimum term of EOC voting rights surrender language.[64] AHP has disputed RAPA's grammatical evaluation of this language.[65] However, each of AHP's arguments would result in portions of the language actually used in Order U-18-102(44) being rendered superfluous in violation of the very rules of interpretation AHP suggests that we follow. AHP's arguments for finding a grammatical ambiguity are not convincing and we do not agree with AHP's assertion that there is grammatical ambiguity in the minimum term of EOC voting rights surrender language used in Order U-18-102(44).

AHP also argues that there is a contextual ambiguity in the minimum term of EOC voting rights surrender language in Order U-18-102(44). Specifically, AHP argues that the minimum term of EOC voting rights surrender renders Section 4.2 of the Eklutna PPA and Section 4.2 the MEA PPA superfluous in violation of the rules of construction it

[63]AHP Initial Brief at 13 (footnote omitted).

[64]RAPA Brief at 3-5

[65]AHP Reply Brief at 7-14.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

relies upon.[66] Examination of the context in which the minimum term of EOC voting rights surrender language is stated in Order U-18-102(44) shows that there is no contextual ambiguity between that language and the two Section 4.2 referred to by AHP.

AHP argues that if we intended the minimum term of EOC voting rights to be enforced as written, we would have disapproved the Section 4.2 referred to by AHP.[67] However, in crafting Order U-18-102(44) we "sought to find a way to approve this transaction while leaving as much of the parties' bargain intact as possible."[68] We did not disapprove any part of the transaction documents unless we specifically found that the public interest required disapproval of that part. Our failure to completely harmonize the transaction documents with the substance of Order U-18-102(44) cannot be taken as a basis for nullifying or rendering superfluous any express term stated in Order U-18-102(44).

Section 4.2 of the Eklutna PPA states:

> Section 4.2 Operation of the Facility.
>
> (A) In accordance with the Operations Agreement (as may be amended by the Operations Agreement Amendment), during the Term Purchaser shall manage, control, operate and maintain the Chugach Portion in a manner consistent with Prudent Utility Practice.
>
> (B) During the Term, Seller shall, in consultation with Purchaser, select the person to serve as Seller's representative to the Operating Committee (the "Seller's Representative"). The Seller's Representative shall make all decisions on the Operating Committee consistent with Prudent Utility Practice and the rights and obligations of the Parties under this PPA. Seller's Representative shall also be Seller's representative for any consultation, study, and implementation processes required under the Fish and Wildlife Agreement relating to the Facility. The Seller's Representative shall make all decisions with respect to any processes required under the Fish and Wildlife Agreement with due regard for the rights and obligations of the Parties under this PPA.

[67]AHP Initial Brief at 9-19

[68]Order U-18-102(44) at 11.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

> (C) The Parties acknowledge and agree that Seller has prior rights to not less than 41 million gallons of water per day from Eklutna Lake for public water supply pursuant to the Act of October 30, 1984, 98 Stat. 2823; Alaska Statutes 46.15.150(a); and Certificate of Appropriation AOL 44944. The Parties agree that during the Term, the supply of water available for production of Power by the Seller's Interest shall be net of all water taken by Anchorage Water and Wastewater Utility for public water supply purposes.[69]

Eklutna PPA Subsection 4.2(A) deals with Chugach's obligations as Purchaser and Subsection 4.2(C) only identifies the Municipality of Anchorage's rights to water from Eklutna Lake. Neither of these two subsections are relevant to AHP's argument and we do not address them further.

Subsection 4.2(B) requires AHP, as Seller, to consult with Chugach in the selection of AHP's representative on the EOC. In Order U-18-102(44), we stated:

> We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions. This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.[70]

This language allows, but does not require, AHP to have a non-voting representative attend EOC meetings. Not disapproving Subsection 4.2(B) leaves intact the parties bargain requiring AHP to consult with Chugach when selecting AHP's representative to the EOC. Further, nothing in the Order U-18-102(44) prevents AHP's non-voting EOC representative from participating in EOC meetings "consistent with Prudent Utility Practice

[69]Order U-18-102(44), Appendix D at 9.

[70]Order U-18-102(44) at 67.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

and the rights and obligations of the Parties under this PPA." The "consistent with Prudent Utility Practice and the rights and obligations of the Parties under this PPA" language of Eklutna PPA Subsection 4.2(B) places boundaries on the AHP non-voting representative's participation in EOC meetings and our not disapproving Subsection 4.2(B) leaves intact the parties' bargain for this limitation on AHP.

Subsection 4.2 of the MEA PPA states:

> Section 4.2 Operation of the Facility.
>
> (A) During the Term Seller shall, at its cost and expense, manage, control, operate, and maintain the MEA Portion in accordance with the Operations Agreement and in a manner consistent with Prudent Utility Practice. Without limiting the foregoing, during the Term, as between Seller and Purchaser. Seller shall be responsible for all capital costs, all operations and maintenance expenses, and all costs and expenses for environmental compliance and compliance with Applicable Laws relating to the MEA Portion.
>
> (B) During the Term. Seller shall, after giving Purchaser a reasonable opportunity to consult with Seller. but without in any way limiting Seller's discretion as a result of any such consultation, select the person to serve as Seller's representative to the Operating Committee (the "Seller's Representative"). The Seller's Representative shall make all decisions on the Operating Committee consistent with Prudent Utility Practice and the rights and obligations of the Parties under this PPA and the rights and obligations of the parties under the Chugach Power Purchase Agreement. The Seller's Representative shall also be Seller's representative for any consultation, study. and implementation processes required under the Fish and Wildlife Agreement relating to the Facility. The Seller's Representative shall make all decisions with respect to any processes required under the Fish and Wildlife Agreement with due regard for the rights and obligations of the Parties under this PPA.
>
> (C) The Parties acknowledge and agree that Seller has prior rights to not less than 41 million gallons of water per day from Eklutna Lake for public water supply pursuant to the Act of October 30, 1984. 98 Stat. 2823; Alaska Statutes 46.15.150(a); and Certificate of Appropriation AOL 44944. The Parties agree that during the Term, the supply of water available for production of Power by the Seller's Interest shall be net of all water taken by Anchorage Water and Wastewater Utility for public water supply purposes consistent with the aforementioned water rights.

MEA PPA Subsection 4.2(A) does not address AHP's representation on the EOC and Subsection 4.2(C) only identifies the Municipality of Anchorage's rights to water from

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

Eklutna Lake. Neither of these two subsections are relevant to AHP's argument and we do not address them further.

As discussed above, the minimum term of EOC voting rights surrender condition allows AHP to have a representative attend EOC meetings. The MEA PPA Section 4.2(B) requirement that AHP consult with MEA on AHP's choice of that representative remains effective even if the AHP representative has no voting rights. Also, as discussed above, the "consistent with Prudent Utility Practice and the rights and obligations of the Parties under this PPA" language of MEA PPA Subsection 4.2(B) places boundaries on the AHP non-voting representative's participation in EOC meetings and our not disapproving Subsection 4.2(B) leaves intact the parties' bargain for this limitation on AHP.

Eklutna PPA Section 4.2(B) and MEA PPA Section 4.2(B) are both silent on voting rights and thus the requirement that ML&P surrender its EOC voting rights does not expressly nullify any part of these provisions. Both subsections include the phrase: "Seller's Representative shall make all decisions on the Operating Committee consistent …." This language could imply that AHP makes EOC decisions. As discussed in Order U-18-102(44), with its EOC voting rights intact ML&P had authority to veto decisions of the EOC but did not have authority to make decisions for the EOC except with the agreement of at least Chugach or MEA.[71] Because ML&P never had the authority to make EOC decisions, we read the "Seller's Representative shall make all decisions on the Operating Committee consistent" language to refer to the decisions AHP, as ML&P's successor, makes about its own participation in EOC decisions. Nothing in Order U-18-102(44) renders the language in Eklutna PPA Section 4.2(B) or MEA PPA Section 4.2(B) superfluous, and the existence of the language in these two subsections does not

[71] Order U-18-102(44) at 60-61.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

create any contextual ambiguity in the minimum term of EOC voting rights surrender language used in Order U-18-102(44).

AHP points to history of TA525-18 and TA379-121 where our Staff asked AHP and MEA if MEA PPA Section 4.2(B) needed to be revised based upon the apparent inconsistency with the minimum term of surrender language in Order U-18-102(44) as evidence of contextual ambiguity.[72] In TA525-18 and TA379-121, on October 22, 2020, our Staff asked MEA and ML&P to respond to the following:

> I believe there is an inconsistency between the MEA Eklutna PPA and the final order (U-18- 102(44)/U-19-020(39)/U-19-021(39)) (U-18-102(44).
>
> At page 67 of U-18-102(44) the Commission required MOA/ML&P to surrender its vote on the EOC so Chugach and MEA could manage the Eklutna Hydro project.
>
> The MEA Eklutna PPA, at page 4, Section 4.2(B) appears to allow MOA/ML&P to keep its vote on the EOC.
>
> Does MEA [or ML&P] believe the language between the final order and the MEA Eklutna PPA as summarized above are in conflict? Please explain your response and provide a remedy if appropriate.

MEA responded to this request as follows:

> Mr. Layne, regarding your inquiry, MEA offers the following response.
>
> The MEA Eklutna Hydro PPA, by and between MEA and the MOA, was entered into and executed in September 2019, several months prior to the RCA's May 2020 decision requiring ML&P to surrender its vote on the EOC as a condition of approving the sale of ML&P. This appears to be the reason for the "conflict" you reference because at the time the PPA was negotiated, the parties had no way of knowing the future RCA decision regarding ML&P's surrendering of EOC voting rights. MEA notes that the provision you reference and cite as a conflict in the MEA Eklutna Hydro PPA is contained verbatim in the Chugach Eklutna Hydro PPA (see Appendix D of Order U-18-102(44), Section 4.2(B) at page 9 of 92), which the RCA conditionally approved as part of Order U-18-102(44).
>
> In MEA's view, if the RCA wishes to resolve this perceived conflict, the remedy should be similar and consistent with how the RCA remedied the same conflict in the Chugach Eklutna Hydro PPA, which could include approving the MEA PPA subject to the same conditions the RCA previously imposed in Order U-18-102(44). Specifically, MEA is agreeable to having the same vote

[72] AHP Initial Brief at 14-18; AHP Reply Brief at 15-17 (in this brief, AHP erroneously refers to TA525-18 as being TA525-15).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

> surrender language in order U-18-102(44) at page 67 apply to the MEA Eklutna Hydro PPA. Hopefully this helps resolves this matter.[73]

ML&P responded to this request as follows:

> The MOA/ML&P do not believe that the MEA Eklutna PPA is inconsistent Order No. U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39"). The part of Order 39 that you cite states:
>
> "We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the [Chugach] Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions." Order 39 at 67.
>
> To comply with the Order, ML&P will surrender its vote on the EOC prior to the closing of the ML&P sale to Chugach, which will be before the effective date of the Chugach Eklutna PPA and of the MEA Eklutna PPA. ML&P will promptly file a notice of that surrender with the RCA. The surrender will have a term at least equal to the term of the two PPAs, subject to termination of the surrender upon MHP showing to the RCA's satisfaction "that MHP has acquired the expertise required to fully participate as a voting member of the EOC." Order 39 at 67. If and when MHP has a proposed EOC representative that satisfies the qualifications, MHP will file that information and request that the RCA make the necessary finding for termination of the EOC vote surrender.
>
> Like Section 4.2(B) of the Chugach Eklutna PPA, Section 4.2(B) of the MEA Eklutna PPA requires MHP, in consultation with the Purchaser, to select MHP's representative on the EOC. As a result of Order 39, MHP won't have any voting representative on the EOC until the surrender is terminated upon a positive finding by the RCA that MHP's proposed representative is qualified. Thus, Section 4.2(B) of neither PPAs need to be amended. In addition, Section 4.2(B) should remain as written as it will be relevant if and when MHP's voting rights surrender is terminated in the future upon the necessary finding of the RCA.[74]

The ambiguity that our Staff was inquiring about is different from the ambiguity alleged by AHP. Staff was concerned that MEA PPA Section 4.2(B) contractually allowed AHP to exercise a vote on the EOC after the surrender was in effect. This is due to the language used in the MEA PPA, and as noted by MEA, language that is also in the Eklutna PPA.

[73]Correspondence from T. Clark, filed October 23, 2020, in TA525-18.

[74]Correspondence from D. Thompson, filed October 27, 2020, in TA379-121.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

MEA responded that the MEA PPA was negotiated several months before Order U-18-102(44) was issued, and that the language of the MEA PPA did not reflect the surrender of ML&P's voting rights on the EOC required by Order U-18-102(44) because the parties were not aware that we were going to order that surrender. Both MEA and ML&P assured us that the language in Order U-18-102(44) was sufficient to prevent ML&P from having voting rights on the EOC after the effective date of surrender.

ML&P stated in the correspondence quoted above that: "As a result of Order [U-18-102(44)], [A]HP won't have a voting representative on the EOC until the surrender is terminated upon a positive finding by the RCA that MHP's proposed representative is qualified." In the paragraph immediately above, ML&P restated the requirement for restoration of their vote on the EOC as: "The surrender will have a term at least equal to the term of the two PPAs, subject to termination of the surrender upon MHP showing to the RCA's satisfaction "that MHP has acquired the expertise required to fully participate as a voting member of the EOC."" ML&P appears to assert that their modification from the minimum term of EOC voting rights surrender language of Order U-18-102(44) in their informal response to Staff's request should have put us on notice that they were nullifying the first part of the condition stated in Order U-18-102(44).[75]

We disagree with that assertion. If ML&P considered the language we used in Order U-18-102(44) to be unreasonable, erroneous, unlawful, or otherwise defective, their remedy was to timely file a petition for reconsideration under 3 AAC 48.105 or an appeal under AS 22.10.020(d) and Alaska Rule of Appellate Procedure 602(a)(2).[76] As Order U-18-102(44) was issued May 28, 2020, any petition for review was required to be filed by June 12, 2020 and any appeal was due to be filed by June 30, 2020. ML&P

[75]AHP Initial Brief at 16.

[76]Order U-18-102(44) at 143.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

waived its right to challenge the language used in Order U-18-102(44) by failing to take either of those routes. ML&P has no authority to unilaterally revise the requirements of Order U-18-102(44) based on correspondence with our Staff on October 27, 2020, months after waiving its right to seek such revisions.

Staff was specifically asking if the MEA PPA Section 4.2(B) language conflicted with the EOC voting rights surrender required by Order U-18-102(44). Staff was not asking about the minimum term of EOC voting rights surrender or about the methodology for restoration of those voting rights and AHP has provided no evidence that Staff paid any attention at all to ML&P's superfluous comments on those issues. AHP cites to no authority where such remarks can effectively rewrite the express terms of our orders.

In responding to Staff's request, ML&P stated: "Section 4.2(B) should remain as written as it will be relevant if and when [A]HP's voting rights surrender is terminated in the future upon the necessary finding of the RCA." As noted by AHP, we have authority under AS 42.05.271 to modify certificate conditions after providing notice and opportunity for hearing and for good cause shown.[77] Such modification is not necessarily tied to AHP's acquisition of adequate technical and managerial resources to fully participate on the EOC. For example, MEA PPA Section 11.2(A)(3) allows for early termination of the MEA PPA in the event of an uncured default.[78] Eklutna PPA Section 9.2(A)(3) allows for early termination of the Eklutna PPA in the event of an uncured default.[79] Without prejudging the matter, AHP might be able to show good cause for reinstatement of its EOC voting rights, at least in part, upon the early termination of one

[77]AHP Reply Brief at 43.

[78]Order U-18-102(44), Appendix H at 15.

[79]Order U-18-102(44), Appendix D at 16.

Regulatory Commission of Alaska

of these agreements but not the other. Therefore, leaving Eklutna PPA Section 4.2(B) and MEA PPA Section 4.2(B) intact leaves that portion of the parties' bargain intact in the event that we do someday modify the minimum term of EOC voting rights surrender stated in order U-18-102(44).

For all the reasons discussed above, AHP has failed to establish a contextual ambiguity based on the language of Eklutna PPA Section 4.2(B) and MEA PPA Section 4.2(B) or our strict interpretation of the minimum term of EOC voting rights surrender stated in Order U-18-102(44). Eklutna PPA Section 4.2(B) and MEA PPA Section 4.2(B) are both currently effective in part and may become fully effective in the manner AHP desires sometime in the future. The continued existence of these two provisions do not justify a revision of the minimum term of EOC voting rights surrender language stated in Order U-18-102(44).

Public Understanding

AHP also suggests that we should modify the minimum term of EOC voting rights surrender stated in Order U-18-102(44) based upon the "public" understanding of that term expressed in various places.[80] AHP cites to no authority for this proposition. We note that part of the "public" understanding AHP relies upon is implied from past statements of Chugach, MEA, and RAPA.[81] In response, RAPA stated:

> At the August 30, 2024, prehearing conference, the Commission—through ALJ Walker—noted two things. First, that neither AHP's request for acknowledgement nor the motion for expedited consideration discussed why the Commission should set aside the minimum time-period for the voting rights surrender. And second, "it appears that the Commission should be considering dismissal of the notice and request for acknowledgment as being prematurely filed…."
>
> When examining AHP's Notice and Request for Acknowledgment, the Office of the Attorney General, Regulatory Affairs & Public Advocacy Section

[80]AHP Initial Brief at 14-20.

[81]AHP Initial Brief at 19-20.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

(RAPA) incorrectly focused on the second half of the above-quoted language from Order 39 and not the issues raised by the Commission.[82]

Chugach and MEA stated:

> Chugach and MEA admit that until ALJ Walker raised this issue in this proceeding, they had not examined this issue closely and were theoretically comfortable with an interpretation of the Surrender that if and when the MOA could demonstrate technical and managerial fitness, potentially with certain conditions imposed on the MOA to require MOA act consistently with prudent utility practice, to prevent the MOA from undermining the Project Owners' work in implementing the Final Fish and Wildlife Program, and to protect the Eklutna Project as a valuable resource in the Railbelt, the MOA would be entitled to regain its voting rights on the EOC and with respect to the Fish and Wildlife Agreement before the end of the PPA terms.
>
> Upon further review in this proceeding, however, Chugach and MEA no longer think that this matter is so simple for two primary reasons. First, with respect to this narrow issue, the Commission is asking the parties if they agree or disagree with the Commission's interpretation of the applicability of the term length language, and because Chugach and MEA do see ambiguity in the language, the Commission is in the best position to explain what it intended. There also exists ample reasonable legal basis, well supported by facts, for the Commission's interpretation that the Surrender must last for the duration of the PPA terms centered on the fact that MOA has ceded most of its rights and responsibilities to the Eklutna Project during the duration of those PPAs. Further, the facts that justified the Surrender requirement in the first place are materially unchanged. Second, even if the Commission intended, through its language, to create a path for MOA to regain its voting rights before the end of the PPA terms, such process should not render the length of term requirement language meaningless as MOA's Brief position would. Rather, there must be an acknowledgement of the Surrender term requirement and a demonstration that the concerns behind such requirement will be addressed for the duration of the PPA terms.[83]

In reply, AHP asserts that the responsive arguments of RAPA, Chugach, and MEA are in error.[84] AHP acknowledges that RAPA, Chugach, and MEA changed their position after reviewing the minimum term of EOC voting rights surrender language in Order U-18-102(44) when that language was pointed out to them at the prehearing conference held August 30, 2024.[85]

[85]AHP Reply Brief at 3-6.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

From the explanations provided by RAPA, Chugach, and MEA, their earlier positions on the restoration of EOC voting rights to AHP was based on an incomplete reading of Order U-18-102(44). ML&P never asked us for clarification of the minimum term of EOC voting rights surrender language in Order U-18-102(44), and thus we do not know if ML&P's understanding of that language was based on a complete reading of the order either.

AHP cites to the language used by ML&P in its written surrender of EOC voting rights as evidence that ML&P understood that AHP's EOC voting rights could be restored whenever it made a showing that it had acquired the expertise to fully participate as a voting member of the EOC. AHP quoted from the surrender as follows:

> In accordance with the requirements of order U-18-102(44), the Municipality of Anchorage, dba Municipal Light & Power(ML&P), hereby surrenders its voting rights as an EOC member and under the Fish and Wildlife Agreement effective as of the Closing of the Asset Purchase Agreement between ML&P and Chugach Electric Association (Chugach). **This surrender of voting rights shall remain in effect until ML&P's successor complies with the RCA requirements pertaining to qualifications for ML&P's representation on the EOC.**
>
> **Until ML&P's successor complies with the qualification terms of RCA order U-18-102(44),** all EOC decisions will be by unanimous vote of Chugach and Matanuska Electric Association, Inc. (MEA). Eklutna hydro operations, dispatch and maintenance will continue to follow past practices and policies unless changes are approved through the EOC process.[86]

There is nothing in this surrender language indicating that ML&P is only surrendering its EOC voting rights until such time as its successor makes a showing that it has acquired the expertise required to fully participate as a voting member of the EOC. This surrender language states that ML&P is surrendering its voting rights in accordance with the requirements of Order U-18-102(44) and that the surrender remains in effect until ML&P's successor complies with our requirements pertaining to qualifications for ML&P's

[86]AHP Initial Brief at 17 (emphasis is by AHP in the Brief and is not in the original surrender of EOC voting rights).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

representation on the EOC. Those requirements include the minimum term of surrender and our approval of the transaction under which Chugach acquired ML&P's service obligations and most ML&P assets was conditioned on ML&P's surrender of its voting rights in conformance with that entire requirement.

We are not convinced that there is any reason to change the minimum term of EOC voting rights surrender expressly stated in Order U-18-102(44) based upon 'public' understanding when that understanding was based upon an incomplete reading of the order. We also do not find that ML&P or AHP has the right to modify the minimum term of EOC voting right surrender stated in Order U-18-102(44) based upon a post-hoc assertion that it misunderstood the terms of that order. We note that ML&P's surrender of its EOC voting rights was filed well after the time to request reconsideration of Order U-18-102(44) had passed and the time for appeal of that order had also passed. Thus ML&P no longer had any right to seek revision of the minimum term of EOC voting rights surrender except under a new proceeding seeking revision of that term. Inserting what may now be considered ambiguous language in a compliance filing is not adequate to make such a change.

Evidentiary Context

AHP further claims that we must interpret prior orders within the context of the evidence on which the prior order was based.[87] That is our standard practice. In Dockets U-18-102/U-19-020/U-19-021, we received written testimony from Municipal Attorney Rebecca Windt Pearson[88] that included the following:

[87]AHP Reply Brief at 19-21.

[88]*Prefiled Reply Testimony of Rebecca Windt Pearson*, filed August 2, 2019 (Windt Pearson Testimony), in Dockets U-18-102/U-19-020/U-19-021; as corrected by *Municipal Light and Power's Errata to the Prefiled Reply Testimony of Rebecca Windt Pearson*, filed August 9, 2029. This testimony was marked as Hearing Exhibit T-22 in Dockets U-19-020/U-19-021.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

Q12. Why did ML&P retain its ownership share of the Eklutna generation plant and sell the output to Chugach, rather than simply including its share of the Eklutna generation plant in the sale?

A12. Both Chugach and the MOA had interests that were served by having the MOA continue to own its share of the Eklutna generation plant and sell the output of the MOA's share to Chugach (and possibly also to MEA).

Initially, the parties discussed Chugach financing a portion of the asset acquisition price through unsecured payments over a period of time. That changed, however, when the MOA expressed concern regarding the lack of security associated with those payments. The MOA was concerned that, if it sold all of ML&P's assets to Chugach, but Chugach failed to make an unsecured future payment, the MOA would have no recourse other than litigation or pursuing a claim as a general unsecured creditor in a bankruptcy proceeding.

The parties resolved this concern by carving ML&P's ownership interest in the Eklutna generation plant out of the sale. As a result of the MOA retaining the ML&P share of the Eklutna generation plant, Chugach was able to pay for the Transactions without requiring the MOA to incur the risk of unsecured future payments. The Parties then entered into the Chugach PPA to allow Chugach to receive the output from ML&P's Eklutna interest at Chugach's avoided cost.

This arrangement served each party's interests. It benefits the MOA because, if Chugach ever fails to make future payments under the Chugach PPA, ML&P can, as a result of its retained ownership of its share of Eklutna, sell the power from that share to another entity—likely another Railbelt utility, and likely at a higher "avoided cost." The fact that Chugach's avoided costs are lower than other Railbelt utilities also informed the allocation of risks in the Chugach PPA. The MOA likely could sell power from its retained share of Eklutna to another entity at a higher avoided cost rate, but any such transaction would likely require the MOA to accept greater risks. The MOA agreed to sell power to Chugach, at Chugach's avoided cost, at least partly because of the transaction's more preferable risk profile. The Chugach PPA benefits Chugach because it allows it to make power purchase payments over time, thereby avoiding the added margin costs associated with additional upfront financing.[89]

Windt Pearson swore under oath that her written testimony was true and correct, and it was admitted as evidence into the record of Dockets U-19-020/U-19-021.[90] In its Application filed in Docket U-19-021, ML&P stated:

> ML&P will continue to be a department of the MOA, however it will have no employees and any function requiring labor will be performed by the MOA (e.g.

[89]Windt Pearson Testimony at 8-9.

[90]Docket U-19-020/U-19-021 Tr. 2489-2489.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

billing and financial statement preparation will be performed by the MOA Finance Department).[91]

…

As mentioned above, historically the operation and maintenance activities of Eklutna have been performed by Chugach, MEA, and ML&P. After the Transactions close, the division of responsibilities will be allocated between Chugach and MEA. Both Chugach and MEA have power production and transmission experience. They have the necessary expertise to perform all necessary functions to operate Eklutna. As has been the practice in the past, any operational or capital function that is beyond their expertise will be contracted to a firm specializing in the function.

The MOA will receive payments under the Chugach PPA and Chugach will pay all operating, maintenance, and capital costs associated with ML&P's Eklutna interest. If MEA enters into a PPA for its pro rata share of ML&P's Eklutna output, ML&P will be responsible for the operating, maintenance, and capital costs associated with that share of ML&P's Eklutna interest. The MEA PPA payments ML&P receives, however, will be sufficient to pay any operating, maintenance, and capital costs that ML&P will be responsible for. If MEA enters into a PPA for its pro rata share of ML&P's Eklutna output, ML&P will establish a $3 million reserve fund in the first year of operation to address any intra-year revenue shortfalls, to be called upon if revenues received are not sufficient in any year to cover the operating, maintenance, or capital costs of ML&P's Eklutna interest. In addition, if unforeseen adverse events require it, the MOA has sufficient borrowing capacity to make necessary operating, maintenance, or capital investments related to ML&P's Eklutna interest.

The MOA has a Finance Department with experienced professional accountants that have the necessary expertise to perform the required accounting functions for ML&P's limited post-Transactions Eklutna interest ownership and long term wholesale bulk power sales to Chugach or Chugach and MEA under the PPAs. The Finance Department will maintain ML&P's books and records, consistent with the Uniform System of Accounts. These books and records will include ML&P's revenues received under the PPAs and ML&P's share of monthly operational and capital costs. The Finance Department will track any assets purchased or constructed by the EOC, to include tracking operation and maintenance costs for the assets. Further, the Finance Department will maintain continuing property records to include original asset cost, annual depreciation, and net book value of all assets.[92]

At hearing in Dockets U-19-020/U-19-021, Windt Pearson orally testified as follows:

ALJ WALKER:· Is the Municipality, after closure of this transaction, retaining any employees of ML&P?

MS. WINDT PEARSON:· The plan is not to. And I know that we have discussed what we would need to do to have the necessary advice, expertise,

[91]ML&P Application at 12.

[92]ML&P Application at 12-14 (heading omitted).

Regulatory Commission of Alaska

> and personnel in order to continue to participate in the Eklutna Operating Committee. I think that we envision the stub utility being the department that reports up to the municipal manager. And that, more likely than not, we would utilize consultant services to provide that industry-specific expertise and staffing to help us make informed decisions as a continuing member of the Eklutna Operating Committee. Because we would not be retaining any employees of Municipal Light & Power.
>
> ALJ WALKER:· Have you investigated to see if any such expertise exists in the consulting community?
>
> MS. WINDT PEARSON:· We have not done so yet.[93]

Based on the record from Dockets U-18-102/U-19-020/U-19-021, ML&P was retaining the Eklutna Project Power Plant only for the purpose of preserving a cash flow in the event Chugach defaulted on its payments under the Eklutna PPA. ML&P planned only on collecting revenue under the Eklutna PPA and the MEA PPA, keeping track of the expenses it incurred under the MEA PPA for bookkeeping purposes, and maintaining the net book value of Eklutna Project assets. Maintaining accurate accounting of the net book value of assets will be necessary for calculation of the price Chugach and MEA will have to pay to purchase their proportionate shares of AHP ownership interest in the Eklutna Project under the Eklutna PPA and the MEA PPA.[94]

ML&P assured us that revenue earned under the MEA PPA would be adequate to cover all Eklutna Project capital, operating, and maintenance expense that it would be obligated to pay under that agreement. ML&P further assured us that it would maintain a $3,000,000 cash reserve for the Eklutna Project which, with the Municipality of Anchorage's existing credit capacity, would be adequate to meet any cash flow contingencies that may arise.

On this record, none of the purposes for which ML&P was retaining its ownership interests in the Eklutna Project Power Plant required or would benefit from

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

ML&P's participation as voting member of the EOC. ML&P effectively admitted that, as of the time of hearing in Dockets U-19-020 and U-19-021, it would not retain the staff expertise required to sit as a voting member of the EOC and had made no plans to acquire such expertise. ML&P also admitted that Chugach and MEA did have the expertise to sit as voting members of the EOC. These circumstances provide good cause under AS 42.05.271 for conditioning AHP's certificate with a requirement that ML&P's surrender its EOC voting rights for a term at least equal to the term of the Eklutna PPA and the term of the MEA PPA.

Finding Notice and Request Premature Under Order U-18-102(44)

In Order U-18-102(44) we stated that:

> Under these circumstances, we cannot unconditionally find that MHP is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions. **This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC.** This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.[95]

In its briefing, AHP has not shown good cause for modifying or interpreting this certificate condition in a manner that nullifies the minimum term of EOC voting rights surrender specified in Order U-18-102(44). Therefore, AHP's voting rights on the EOC are surrendered for at least the term of the Eklutna PPA and the MEA PPA.

The Eklutna PPA and the MEA PPA both became effective on October 30, 2020, the date on which Chugach acquired the service responsibilities and most assets

[95]Order U-18-102(44) at 67 (Emphasis added).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

of ML&P.[96] The Eklutna PPA and the MEA PPA are both scheduled to expire on October 31, 2055, roughly 31 years from now.[97] There are provisions in these two agreements allowing for both extending them and for terminating them early. At this time, no entity, including ourselves, can predict when the terms of the Eklutna PPA and the MEA PPA will expire.

We have reviewed the documents filed in this docket by AHP and found no commitment on the part of Corsentino or Schimscheimer to remain employed by AHP until such time as the terms of the Eklutna PPA and the MEA PPA expire. We do not know how we could verify the veracity of such commitments had they been made. We also have no way of evaluating what the requirements to fully participate as a voting member of the EOC might be at that time. For these reasons, we grant RAPA's motion to dismiss the Notice and Request on the grounds that it premature under the terms of Order U-18-102(44). This dismissal is without prejudice to refiling closer to the time that Eklutna PPA and the MEA PPA will expire.

Dismissal as Moot

In addition to moving for dismissal of the Notice and Request as being premature under the terms of Order U-18-102(44), RAPA moved for dismissal on the grounds that the Notice and Request were now moot. RAPA asserted that AHP only wanted to have its EOC voting rights reinstated so that it could have greater input on design of the Eklutna Project Fish and Wildlife Program identified in Section 104(a) of Public Law 104-58. RAPA further asserts that the Governor has now approved the Eklutna Project Fish and Wildlife Program. Based on this action, RAPA concludes that

[96] *See*, Order U-18-102(44), Appendix D at 3-4, 35; Appendix H at 7, and *Notice of Transaction Closing*, filed October 30. 2020, in Dockets U-18-102/U-19-020/U-19-021.

[97] Order U-18-102(44), Appendix D at 9, 41; Appendix H at 7, 40.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

the Notice and Request is now moot and should be dismissed.[98] AHP has disputed RAPA's assertions on this issue and claims that dismissal on this ground would be inappropriate.[99] RAPA has replied that its assertions are supported by the record.[100]

Given our decision above to dismiss the Notice and Request on the ground that it is premature under the requirements of Order U-18-102(44), we do not need to decide if the Notice and Request is also moot. We deny RAPA's motion to dismiss on the ground that the Notice and Request is moot on the ground that the mootness issue is now moot.

Vacate Procedural Schedule

We adopted a procedural schedule for resolution of this docket.[101] With our decision to dismiss the Notice and Request there is no need to proceed through hearing in this docket. Therefore, we vacate the remaining procedural schedule for this docket including the prehearing conference scheduled for November 18, 2024, and the hearing scheduled to begin on November 18, 2024.

Deny Motion to Compel Discovery Responses

Chugach and MEA filed a motion to compel discovery responses intended to produce information to be used in their examination of Corsentino.[102] AHP has opposed this motion primarily on the ground that the information requested is not relevant to the scope of this docket.[103] Chugach and MEA have responded to this opposition by asserting that the requested information is relevant to any determination of Corsentino's

---

[98]Motion to Dismiss at 1-7.

[99]AHP Response at 2-6.

[100]RAPA Reply at 2.

[101]Order U-24-024(4).

[102]Motion to Compel at 1-18.

[103]AHP Opposition at 7-22.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

understanding of prudent utility practice and that this determination is within the scope of this docket.[104]

With our decisions above to dismiss the Notice and Request and to vacate the procedural schedule for this docket, there will be no examination of Corsentino. Therefore, we deny the Motion to Compel on the ground that it is now moot.

Deny Request to Construe Notice and Request

AHP has asked us to construe its Notice and Request to be an application to amend its certificate conditions if we find that the minimum term of EOC voting rights surrender in Order U-18-102(44) is enforceable.[105] The timeline under which we are required to resolve this docket runs out January 14, 2025.[106] This would leave approximately 60 days to address modification of AHP's certificate. Under AS 42.05.175(a)(2) we are typically allowed 180 days to resolve a certificate amendment application. We find that there is too little time for us and the parties to address amendment of AHP's certificate in this docket. Therefore, we deny the request to construe the Notice and Request to be an application to modify AHP's certificate.

Guidance for Future Filings

AHP states that if we do not construe its Notice and Request as an application to amend its certificate, or otherwise grant it the relief it seeks in this proceeding, it "could simply file a new application to modify its certificate."[107] We have not construed AHP's Notice and Request to be an application to amend its certificate or otherwise granted AHP the relief it has requested in this proceeding. We provide AHP with guidance on future filings seeking relief from the minimum term of EOC voting rights

[104]Chugach/MEA Reply at 2-10.

[105]AHP Reply Brief at 43.

[106]Order U-24-024(1) at 5.

[107]AHP Reply Brief at 43.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

surrender required by Order U-18-102(44). We provide this guidance without having completed our investigation of the qualifications of Corsentino and Schimscheimer, and this guidance is not a judgement on their qualifications to be AHP's representative on the EOC.

We start by pointing out that in Order U-18-102(44) we did not require ML&P to surrender its EOC voting rights merely because the then Municipal Manager was not qualified to sit as a voting member of the EOC. What we stated was:

> ML&P asserts that billing and record keeping under the Uniform System of Accounts will be done for MHP by the professional accountants working for the MOA's Financial Department. These accountants will also maintain MHP's continuing property records, calculating annual depreciation and net book value of plant in service. ML&P has provided no evidence in support of this assertion that accountants employed by the MOA's Financial Department are trained to maintain records in accordance with the Uniform System of Accounts or to maintain continuing property records. However, we are aware that many of our smaller regulated utilities retain outside accountants to maintain their records in accordance with our regulations and thus we are aware that those private resources are available.
>
> ML&P proposes that MHP will have a seat on the EOC, even though it will have no employees. ML&P states that MHP will be managed by the Municipal Manager, a position currently filled by William D. Falsey. Falsey has a law degree from Yale Law School and a Bachelor of Science degree in physics from Stanford University. Falsey has worked as the MOA's manager since 2017 and worked in legal positions from 2003 through 2017.
>
> Chugach witness Dustin Highers testified based on his experience as chair of the EOC that to be an owner representative on the EOC, it was essential that the representative have knowledge of prudent utility practice and the Railbelt electric generation and transmission system. Dustin Highers testified that there were two ML&P employees he was aware of qualified to sit on the EOC and that both of those employees were being transferred to Chugach as part of the transaction. There is nothing in Falsey's resume indicating that he has any knowledge of the Railbelt generation and transmission system, or prudent utility practice which is the management standard specified for the MHP EOC representative in both the Eklutna PPA and the MEA PPA. ML&P indicated "that, more likely than not, we would utilize consultant services to provide that industry-specific expertise and staffing to help us make informed decisions as a continuing member of the [EOC]." However, ML&P admitted that it has not investigated whether such expertise exists in the consulting community.
>
> Under these circumstances, we cannot unconditionally find that MHP is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that MHP is managerially and technically fit to

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

> maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions. This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.[108]

We required ML&P to surrender its EOC voting rights because it had no person qualified to sit in EOC meetings and understand the discussion, and because ML&P was proposing no definitive support team for their EOC representative.

Prior to the transaction under which Chugach acquired the ML&P service obligations and most of the ML&P assets, each member of the EOC was qualified to participate in meetings and knowledgeably discuss all issues related to management and operation of the Eklutna Project. Each of those representatives was also supported by an independent team consisting of the employees, contractors, and consultants required to operate their vertically integrated electric utility, each of which was interconnected with other vertically integrated electric utilities.

With Chugach's acquisition of ML&P's employees, in addition to ML&P's service obligations and most assets, ML&P, and its successor AHP have no identified support team of employees, contractors, or consultants with the breadth and scope of relevant knowledge that the Chugach and MEA representatives continue to bring to the EOC meetings. In the Notice and Request, AHP addressed this issue merely by stating:

> In addition to the auxiliary in-house expertise that Mr. Schimscheimer provides, AHP will also have access to, and the right to use (at AHP's expense), contracts of the [Municipality of Anchorage] in order to access any additional technical and engineering expertise necessary.

[108]Order U-18-102(44) at 65-67.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

In footnote 30 at the end of this statement, AHP states:

> Exhibit 3 at 2. Such firms include Electric Power Systems, Inc., EDC, Inc., CRW Engineering Group, Inc. and Taku Engineering.

Exhibit 3 to the Notice and Request is a *Memorandum of Understanding Between Anchorage Water and Wastewater Utility and Anchorage Hydropower Utility Re Resolution of Conflicts of Interest*, signed July 18, 2024. The relevant part of this Memorandum is paragraph 3 on page 2, which states:

> AH[P] will have access to and right to use, at AH[P]' expense, contracts of the [Municipality of Anchorage] to access technical and engineering expertise necessary to oversee and conduct operations.[109]

AHP included no resumes for the proposed support group, no contracts showing the term and extent of commitment by the contractors or consultants, and no information about what process AHP will have to go through to pay its contractors and consultants. We find this generic assertion of support for the proposed AHP voting representative on the EOC to be no more substantive than ML&P's assertion in Dockets U-18-102/U-19-020/U-19-021 that they would primarily rely on consultants for the expertise required to fully participate on the EOC even though they admitted that they had not yet investigated to determine if consultants with the required expertise were available.

In addition to addressing the minimum term of EOC voting rights surrender issue, we suggest that in future filings seeking reinstatement of EOC voting rights AHP provide the information to show that it can bring to EOC meetings a depth and breadth of technical and managerial expertise at least comparable to the level of expertise that MEA and Chugach bring to those meetings. This suggestion does not just include the technical

[109]Notice and Request, Exhibit 3 at 2.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

expertise of AHP's representative to the EOC, but also includes the team of employees, contractors, and consultants supporting that representative.

We denied AHP's motion for expedited consideration of its Notice and Request because AHP had failed to adequately support its request for reinstatement of its EOC voting rights. Upon initial review of AHP's filings in this docket we could see no way of moving forward without taking the time for prefiled testimony, discovery, and holding a hearing to gather the information necessary to determine if AHP had acquired the expertise required to fully participate as a voting member of the EOC.[110] We believe that efficient resolution of future filings on this issue by AHP will be more likely if AHP provides adequate information in its initial filing.

Final Order

This order constitutes the final decision in this proceeding. This decision may be appealed within thirty days of this order in accordance with AS 22.10.020(d) and Alaska Rule of Appellate Procedure 602(a)(2). In addition to the appellate rights afforded by AS 22.10.020(d), a party has the right to file a petition for reconsideration in accordance with 3 AAC 48.105. If such a petition is filed, the time period for filing an appeal is tolled and then recalculated in accordance with Alaska Rule of Appellate Procedure 602(a)(2).

Docket Closure

No substantive or procedural matters remain in this proceeding. Accordingly, we close this docket.

[110] At the prehearing conference and through the ALJ we denied AHP's motion for expedited consideration and stated that we would explain that decision in a written order to follow. Tr. 15. This is that explanation.

ORDER

THE COMMISSION FURTHER ORDERS:

1. The *Office of the Attorney General's Motion to Dismiss as Moot*, filed October 15, 2024, by the Office of the Attorney General, Regulatory Affairs and Public Advocacy Section is granted in part and denied in part as discussed in the body of this order.

2. The *Notice and Request for Acknowledgment of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee*, filed July 18, 2024, by the Municipality of Anchorage d/b/a Anchorage Hydropower, is dismissed as being premature under the requirements of Order U-18-102(44)/U-19-020(39)/U-19-021(39).

3. *Chugach Electric Association, Inc. and Matanuska Electric Association, Inc.'s Motion to Compel Discovery Responses*, filed October 28, 2024, is denied as being moot.

4. The request at page 43 in the *Municipality of Anchorage d/b/a Anchorage Hydropower's Reply Brief Regarding Interpretation of Order 39*, filed October 29, 2024, to have the *Notice and Request for Acknowledgment of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee*, filed July 18, 2024, construed as an application to modify Certificate of Public Convenience and Necessity No. 780 is denied as discussed in the body of this order.

FILE COPY

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

THIRD JUDICIAL DISTRICT AT ANCHORAGE

ANCHORAGE MUNICIPAL ASSEMBLY, Appellant v. REGULATORY COMMISSION OF ALASKA, et al., Appellees.	)	Case No. 3AN-24-06001CI

ANCHORAGE ASSEMBLY'S OPPOSITION TO MOTION TO DISMISS

The Anchorage Assembly's appeal raises a simple legal question: Can the Regulatory Commission of Alaska (RCA) remove policy-making authority and the power of appropriation from the Municipality's legislative body by requiring the Municipality to surrender its voting rights on *policy decisions* regarding the 1991 Fish and Wildlife Agreement? The answer is unequivocally no. Because the Municipality is contractually obligated to pay for a portion of the Fish and Wildlife Program, Anchorage residents—through their democratically elected representatives—are entitled to have a say in what river restoration program is adopted *and* how it's implemented.[1]

[1] Alaska Const., art. X, § 1 ("A liberal construction shall be given to the powers of local government units.").

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

Ultimately, the Assembly will demonstrate that the RCA lacked statutory authority to unilaterally remove the Municipality's voting rights under the 1991 Fish and Wildlife Agreement—a federal contract requiring the Municipality to plan, fund, and implement Eklutna River restoration. Thus, Order 39 exceeded the RCA's jurisdiction to regulate public utilities.[2] The Assembly looks forward to fully briefing those legal issues in this appeal.

Here, the RCA's pending motion raises three preliminary arguments for dismissal, each of which is meritless. *First*, the Assembly exhausted all available administrative remedies. This is an appeal from the RCA's April 19, 2024 decision denying the Assembly's petition to intervene and motion to modify Order 39. The RCA's contention that the Assembly should have filed a petition to intervene back in 2020—and appealed from that decision—only makes sense if time machines existed. In reality, the Assembly followed all of the applicable agency procedures and timely appealed the RCA's final decision *in this matter*. There were no other administrative remedies for the Assembly to exhaust.

Second, the Assembly has standing to bring this appeal because it (1) participated in the agency proceedings by filing a petition to intervene and motion to modify Order 39, (2) was aggrieved by the RCA's decision denying its petition

[2] The Assembly's underlying request to the RCA was limited to "policy decisions" implementing the Fish and Wildlife Agreement. The Assembly has no interest in inserting itself into technical or engineering decisions regarding management of the Eklutna Hydroelectric Project's electrical generation facility.

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

and motion, and (3) had a direct interest in the outcome of the proceedings.[3] Under Anchorage Municipal Code (AMC) 3.20.010(6), the Assembly has a clear, legally-defined role in setting Eklutna policy, including making *all* policy decisions "related to the municipality's performance under the 1991 Fish and Wildlife agreement regarding the Eklutna hydroelectric project." The Assembly's policy-making authority was directly subverted by Order 39, and the injury to the Assembly is distinct from any injury to the Administration or other entities.

Third, the Governor's Decision does not moot this appeal. Agency appeals are moot if the underlying regulation or order has been modified.[4] If this Court concludes that the Governor's Decision modifies Order 39 by reinstating the Municipality's voting rights, then the Assembly agrees that this appeal is moot and should be dismissed accordingly. Otherwise, this appeal remains a "present, live controversy"[5] and the Court should proceed to set a merits-briefing schedule.

For each of those reasons, the RCA's motion to dismiss should be denied.

I. FACTS AND PROCEEDINGS

Since at least 2017, the Assembly has championed efforts to restore the Eklutna River and return continuous water flow in the river to the greatest extent

---

3 *City of Valdez v. RCA*, 548 P.3d 1067, 1076 (Alaska 2024).

4 *See Ahtna Tene Nene v. State*, 288 P.3d 452, 457-58 (Alaska 2012).

5 *Id*. at 457.

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

possible.[6] The Assembly has established a clear municipal policy supporting the Native Village of Eklutna's customary and traditional uses of the Eklutna River, including supporting a restoration plan that will return all five species of salmon to the river. The Assembly is well-aware of the Municipality's contractual obligations under the Fish and Wildlife Agreement and the Municipal Light & Power (ML&P) sale agreements, which require the Municipality to fund a significant portion of the Eklutna River restoration project. The Assembly's goal is to spend public funds wisely and achieve the best possible outcome for the Eklutna River.

To ensure that the Assembly (and the public) have a voice in policy decisions regarding the Eklutna River, the Assembly has adopted resolutions and ordinances outlining the process for developing the restoration plan (known as the "Fish and Wildlife Program"). In 2023, the Assembly codified a requirement for Assembly approval before any proposed Fish and Wildlife Program is submitted to the governor: "[t]he Proposed Final Fish and Wildlife Program to protect, mitigate, and enhance fish and wildlife resources in the Eklutna River shall be submitted to the Assembly with a proposed resolution in support for action, prior to its submission to the Governor of Alaska."[7]

6 Exhibit 1 (AR No. 2017-324(S), § 1 (Oct. 24, 2017)).

7 Exhibit 2 (AO 2023-131, codified at AMC 26.30.025).

The Assembly also clarified municipal law regarding the authority to make policy decisions regarding implementation of the Fish and Wildlife Agreement. "Pursuant to section 26.30.025, the assembly shall be responsible for all policy decisions related to the municipality's performance under the 1991 Fish and Wildlife agreement regarding the Eklutna hydroelectric project."[8]

However, despite the Assembly's legislative efforts to steer the Municipality's involvement in the Eklutna project—and the Anchorage Charter's recognition of the Assembly's authority over municipal utilities[9]—the Assembly was sidelined by the Bronson Administration, which engaged in secret, unauthorized negotiations with the other Eklutna Owners (Chugach Electric Association (Chugach) and Matanuska Electric Association (MEA)) to develop and implement a Fish and Wildlife Program that would not achieve the Municipality's goal of maximum river restoration, but instead leave significant portions of the river de-watered and prevent full fish restoration.

In February 2024, the Eklutna controversy came to a head. The Assembly learned that the Bronson Administration had entered into a final agreement described as a "Binding Term Sheet," which purported to authorize Chugach and

9 Anchorage Charter § 16.01(c) ("The assembly shall prescribe rules and procedures for the operation and management of municipal utilities.").

MEA to use municipal infrastructure to implement a proposed Fish and Wildlife Program that the Assembly had specifically disapproved.[10]

During an Assembly meeting on February 2, 2024, Assembly members requested to view copies of the "Binding Term Sheet," but then-Municipal Attorney Helzer—purportedly acting at the direction of Chugach and MEA—refused to allow the Assembly to retain copies or receive independent legal advice regarding the "Binding Term Sheet." The Assembly was forced to issue a subpoena to the Municipal Attorney, and seek a court order from Superior Court Judge David A. Nesbett, to compel production of the "Binding Term Sheet" and other related agreements that the Bronson Administration had entered into with Chugach and MEA.[11] Municipal Attorney Helzer only complied with the subpoena after Chugach and MEA had already submitted the proposed final Fish and Wildlife Program to the Governor—without the Assembly's approval as required by AMC 26.30.025.

That controversy was the backdrop of the Assembly's petition to the RCA. On April 15, 2024, the Assembly filed a petition to intervene in RCA docket No. U-

18-102, U-19-020, U-19-021—a matter that originally concerned the sale of ML&P to Chugach. The Assembly moved to re-open the closed docket and modify Order 39, which required the Municipality to surrender its voting rights regarding implementation of the Fish and Wildlife Agreement.

The issue that the Assembly raised in its petition and motion was not just that it disagreed with the Bronson Administration or the proposed Fish and Wildlife Program prepared by Chugach and MEA. Rather, the Assembly pointed out that the process in which that proposed Fish and Wildlife Program was developed, and the associated agreements to use municipal infrastructure and water supply, violated municipal law and contradicted long-standing municipal policies.

The Assembly sought RCA approval to modify Order 39 to allow the Assembly to exercise its proper, democratic role as the Municipality's policy-making body, with powers to appropriate municipal resources. Because policy decisions will continue to be made regarding implementation of the Fish and Wildlife Program (even after the Governor's Decision), the Assembly continues to have a strong interest in how the $57-million plan is carried out over the next several decades.

II. LEGAL STANDARD

"Motions to dismiss are disfavored."[12] They are rarely granted, and only if the movant can establish "beyond doubt that the plaintiff can prove no set of facts that would entitle [the plaintiff] to relief."[13] A decision to grant a motion to dismiss is reviewed by the Alaska Supreme Court de novo.[14]

III. ARGUMENT

A. The Assembly exhausted all administrative remedies.

The RCA's argument that the Assembly failed to exhaust administrative remedies is confused. This is not an appeal from an RCA order issued in 2020, but rather an appeal from the RCA's April 19, 2024 decision denying the Assembly's petition and motion. There were no other administrative remedies for the Assembly to exhaust.

The RCA makes the baffling claim that it "does not have a procedure to reopen dockets" and that the RCA is unable "to reopen a docket that [has] been closed for many years."[15] However, that contention is easily refuted simply by looking at RCA's online docket sheets.[16] The RCA regularly—and apparently

routinely—reopens closed dockets, and has done so numerous times for myriad purposes, including to accept amended stipulations;[17] approve tariff sheets;[18] convene settlement conferences;[19] approve a conditional transfer of eligible carrier status from one entity to another;[20] to consider a request to change certain revenue requirements;[21] and to grant a permanent certificate of public convenience and necessity to a utility upon finding that the operator was fit, willing, and able to provide public water service.[22] For example, in one decision denying an underlying request, the RCA still granted the motion to reopen the docket in question, accepted additional filings, and considered the merits of the request.[23] In fact, outright denial of a motion to reopen a docket seems to be the rare exception to a general rule favoring reopening dockets. Aside from the Assembly's motion and petition, there appear to be only two other instances where the RCA refused to reopen a closed docket upon a motion to reopen.[24]

Although the procedures for reopening dockets may not be codified in statute or regulation, the RCA has, for the duration of its existence, acted as though it had the authority to reopen closed dockets. Accordingly, the RCA's assertion in their Motion to Dismiss that the RCA has no procedure for reopening a closed docket is perplexing—and wrong.

The Assembly followed a process that the RCA regularly uses to modify prior orders in closed dockets. The Assembly gave the RCA a clear opportunity to "develop[] a factual record, apply[] its expertise, or correct[] any errors it may have made," as required under the doctrine of exhaustion.[25] However, because the RCA denied the Assembly's petition and motion, this appeal of that decision is proper.

The RCA (and Chugach and MEA) offer two additional theories for dismissing the Assembly's appeal, but each falls flat. First, the RCA argues that the Assembly should have moved to intervene in 2020 when the dockets were open. Of course, the Assembly does not own a time machine. The Assembly could not have known in 2020 that the other Eklutna Project owners would week to make major policy decisions in 2024 purporting to commit the Municipality to expending significant resources while also seeking to entirely sideline the appropriating and legislating Municipality, leading to a case or controversy that only came into existence in 2024. Regardless of the temporal impossibility of the RCA's argument,

[25] *City of Valdez*, 548 P.3d at 1084-85.

LANDYE BENNETT BLUMSTEIN LLP

ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

the RCA's decision makes it clear that any attempt by the Assembly to intervene in 2020 would have been futile.

Second, the RCA, Chugach, and MEA argue that the Assembly failed to exhaust administrative remedies by failing to timely move for reconsideration of Order 39 (in 2020). But reconsideration is not required. Under AS 42.05.551, RCA orders are subject to judicial review according to the Administrative Procedures Act, which explicitly provides that the "right to appeal is not affected by the failure to seek reconsideration before the agency."[26] Alaska law explicitly exempts reconsideration from the list of administrative remedies that must be exhausted before a party may file an appeal of the agency decision.

Finally, to the extent that the RCA implies that the Assembly's appeal is time-barred, the RCA misunderstands the nature of this appeal. The Assembly is appealing from the RCA's April 19, 2024 decision. This appeal was filed on April 24, 2024—just five days later. The appeal is not time barred.

This Court should reject the RCA's and Chugach and MEA's contrived arguments for dismissing this appeal. The Assembly followed all the required procedures and exhausted all administrative remedies. This appeal is properly before this Court and should be decided on the merits.

TELEPHONE (907) 276-5152, FAX (907) 276-8433

26 AS 44.62.560(a).

B. The Assembly has standing to bring this appeal.

Next, the RCA's motion argues that the Assembly lacks standing to challenge Order 39 because the "Municipality's" voting rights were at stake, "not the Assembly's."[27] But the RCA ignores controlling Alaska law.[28] Under AMC 3.20.010(6), the Assembly (not the Administration) has authority to make all policy decisions "related to the municipality's performance under the 1991 Fish and Wildlife agreement regarding the Eklutna hydroelectric project." Order 39 directly affects the *Assembly's* policy-making authority and, therefore, the Assembly is the proper party to challenge the RCA's decisions. The RCA's contention that the Assembly did not have a "sufficient stake in the underlying merits"[29] is incorrect.

"Standing is a rule of judicial self-restraint based on the principle that courts should not resolve abstract questions or issue advisory opinions."[30] Alaska courts "interpret standing broadly, favoring increased accessibility to judicial forums."[31]

In *City of Valdez*, the Alaska Supreme Court adopted a three-part test to determine whether a challenger has standing to appeal an agency's decision. "To

have standing, a challenger must (1) be directly interested in the proceeding, (2) be factually aggrieved by the decision, and (3) have participated in the proceeding."[32]

The Assembly meets all three standing requirements. First, the Assembly was directly interested in the RCA's proceedings. The Assembly filed a petition to intervene and a motion to modify Order 39. The Assembly's interest in modifying Order 39 was directly related to its policy-making and appropriating authority under AMC 3.20.010, which was curtailed by Order 39. Thus, the Assembly had a direct interest in the proceeding.

Second, the Assembly was factually aggrieved by the RCA's decision denying the petition to intervene and motion to modify Order 39. The RCA's decision leaves in place Order 39, which again, eliminates the Assembly's ability to exercise its policy-making authority (and appropriation powers) related to the Fish and Wildlife Program. The effect of Order 39 is to deprive Anchorage's elected representatives of any role in a multi-million-dollar, multi-decade restoration program. The Assembly is obviously aggrieved by the RCA's decision leaving Order 39 in place.

Third, the Assembly clearly participated in this agency proceeding—it was the Assembly's petition and motion that the RCA denied. Although the Administration participated in the original RCA proceedings in 2020, the

32 *Id*.

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

Administration did not participate in proceedings related to the Assembly's 2024 petition and motion. Regardless, under Anchorage Charter § 16.01 and AMC 3.20.010, the Assembly is the only branch of the Municipality authorized to make policy decisions regarding the Eklutna Project, and therefore, the Assembly has standing to challenge the RCA's decision to remove the Municipality's vote on Eklutna Project decisions. Courts have routinely found that legislative bodies, like the Assembly, have standing to raise claims independently from the executive branch, particularly when the specific legislative interests at stake diverge from the administration's interest.[33]

C. This appeal is not moot.

Finally, the RCA argues that the Governor's Decision approving the final Fish and Wildlife Program moots this appeal. However, the Governor's Decision does not explicitly modify, amend, or repeal Order 39.[34] On the contrary, the Governor's Decision notes that Order 39 required the Municipality to surrender its vote on Eklutna Project decisions, but then goes on to require that the parties to the Fish and Wildlife Agreement consider several future policy decisions ("Limited Reopeners") that have important implications for the Eklutna River. Thus, the

---

34 *See Ahtna Tene Nene v. State*, 288 P.3d 452, 458 (Alaska 2012) ("If a regulation is amended, the case may become moot if the specific relief that the parties seek is no longer available.").

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

Governor's Decision makes reinstating the Assembly's ability to vote on those policy decisions even more important. It does not moot this appeal.

On the other hand, if this Court concludes that the Governor's Decision did modify Order 39 by reinstating the Municipality's vote on Eklutna Project decisions, then the Assembly would stipulate to dismissal under those terms. Otherwise, this appeal very much remains a live case or controversy.

D. There is no need to stay this appeal.

As an alternative to dismissal, the RCA requests that this Court stay this appeal while a parallel RCA proceeding involving the Administration is pending. However, after the RCA's motion was filed, the RCA dismissed the Administration's petition and the Administration subsequently appealed that order. Thus, there is no need to stay this appeal; however, the Assembly would not oppose consolidation of the two RCA appeals in this Court.

IV. CONCLUSION

For the foregoing reasons, this Court should deny the motion to dismiss. The Assembly exhausted all administrative remedies, the Assembly has standing to challenge the RCA's decision denying intervention and modification of Order 39, and the Governor's Decision did not moot this appeal.

AR No. 2017–324(S)

A RESOLUTION OF THE ANCHORAGE MUNICIPAL ASSEMBLY IN SUPPORT OF EFFORTS TO RESTORE THE EKLUTNA RIVER.

WHEREAS, the Native Village of Eklutna is the largest Denai'na settlement in the Municipality of Anchorage; and

WHEREAS, the Eklutna River historically was a major subsistence resource for the Eklutna People; and

WHEREAS, the Eklutna River has been in a badly degraded condition since 1929 due to hydropower dams and water diversions; and

WHEREAS, the Eklutna River still supports five species of salmon, including Cook Inlet king salmon and sockeye salmon, though in **[~~greatly~~]** diminished numbers from historical levels; and

WHEREAS, Eklutna Incorporated, the village corporation for Eklutna, is the largest landowner in the Municipality of Anchorage and owns most of the land along the Eklutna River and around Eklutna Lake; and

WHEREAS, Eklutna Inc., and the Eklutna people have made substantial contributions to the development of the Municipality of Anchorage through school sites, highways, **parks,** railroads, **housing,** powerlines and rights-of-way; and

WHEREAS, The Conservation Fund and Eklutna Inc., are collaborating on a $7.5 million project to dismantle the Lower Eklutna River dam; and

WHEREAS, Little to no water flows out of Eklutna Lake into the Eklutna River because of water diversions for the Eklutna Power Project **and the supply of approximately 86 percent of the drinking water for Anchorage and Eagle River**; and

WHEREAS, Municipal Light and Power (ML&P)**, Chugach Electric Association, and Matanuska Electric Association (collectively the "Eklutna Power Purchasers") jointly own and operate the Eklutna Power Project [~~owns a 52% share of the Eklutna Power Project~~]**; and

Exhibit 1
Page 1 of 2

WHEREAS, The Eklutna Power Project often provides the least expensive renewable power on the Railbelt; and

WHEREAS, **The Eklutna Power Purchasers are contractually obligated to study and develop a proposed Fish and Wildlife program to address [~~ML&P is legally obligated to mitigate for~~]** the impacts of the Eklutna Power Project to fish and wildlife, **pursuant to the 1991 Fish & Wildlife agreement**; and

WHEREAS, Mayor Ethan Berkowitz and members of the Anchorage Assembly have frequently expressed their support for wild salmon and Anchorage's desire to be a "Salmon City;" now, therefore

THE ANCHORAGE ASSEMBLY RESOLVES:

Section 1. The Assembly recognizes the contribution of the Eklutna people and Eklutna Inc. to the development of the Municipality of Anchorage and supports the efforts to restore the hydrology and fisheries of the Eklutna River **subject to all provisions of the Fish & Wildlife agreement of August 7, 1991**.

Section 2. The Assembly urges **the Eklutna Power Purchasers to initiate a consultation process, as defined in the 1991 agreement, [~~Municipal Light and Power~~]** to begin necessary studies **early** to **examine [~~define~~]** the impacts to fish and wildlife of Eklutna Lake and Eklutna River hydropower operations **[~~and to begin collaborative efforts to restore water flows to the Eklutna River~~].**

Section 3. This resolution shall be effective upon passage and approval.

PASSED AND APPROVED by the Anchorage Assembly this 24th day of October, 2017.

ATTEST:

Municipal Clerk

Vice-Chair

Municipal Clerk's Office
Amended and Approved
Date: December 19, 2023

AN ORDINANCE OF THE ANCHORAGE ASSEMBLY AMENDING ANCHORAGE MUNICIPAL CODE TO ADD NEW SECTION 26.30.025 TO ESTABLISH AN OFFICIAL POLICY FOR THE RESTORATION OF THE EKLUTNA RIVER, SUBJECT TO THE 1991 FISH AND WILDLIFE AGREEMENT WITH THE EKLUTNA POWER PURCHASERS, STATE OF ALASKA AND THE FEDERAL GOVERNMENT.

WHEREAS, the Native Village of Eklutna is the oldest and largest Dena'ina settlement in the Municipality of Anchorage; and

WHEREAS, the Native Village of Eklutna is a federally recognized Tribe with all of the attached responsibilities, powers, and obligations of a sovereign, also being recognized by the State of Alaska and the Municipality of Anchorage, and having a government to government relationship with both the federal government and the government of the Municipality of Anchorage; and

WHEREAS, the Eklutna River historically was a major subsistence and cultural resource for the Native Village of Eklutna; and

WHEREAS, the Eklutna River watershed has been in a badly degraded condition since 1929 due to hydropower dams and water diversions; and

WHEREAS, a principal impact from hydropower development in the Eklutna watershed is the loss of the Eklutna River's salmon runs; and

WHEREAS, the Eklutna River is still capable of supporting five species of salmon, including Cook Inlet king salmon and sockeye salmon, though in greatly diminished numbers from historical levels; and

WHEREAS, Eklutna Incorporated, the village corporation for Eklutna, is the largest landowner in the Municipality of Anchorage and owns most of the land along the Eklutna River and around Eklutna Lake; and

WHEREAS, the Native Village of Eklutna and Eklutna Inc. have made substantial contributions to the development of the Municipality of Anchorage providing land for school sites, highways, railroads, powerlines and rights-of-way; and

WHEREAS, The Native Village of Eklutna, Eklutna Inc., and The Conservation Fund collaborated on a $7.5 million project to dismantle the Lower Eklutna River dam; and

WHEREAS, little to no water flows out of Eklutna Lake into the Eklutna River because of water diversions for the Eklutna Hydroelectric Project; and

Exhibit 2
Page 1 of 4

WHEREAS, restored instream flow is necessary to flush the accumulated sediments downstream and allow for the recovery of salmon habitat; and

WHEREAS, stabilized lake levels and fish passage for migrating salmon to and from Eklutna Lake would restore important spawning and rearing habitat for salmon; and

WHEREAS, the Municipality of Anchorage retains **an ownership interest (53%) [~~a majority interest (52%)~~]** in the Eklutna Hydroelectric Project **with Chugach Electric Association (CEA) and Matanuska Electric Association (MEA)**; and

WHEREAS, pursuant to RCA Order U-18-102 (44), the Municipality of Anchorage was required to and surrendered its voting rights on operation and management decisions on the Eklutna Operating Committee regarding the Eklutna Project and the 1991 Fish and Wildlife Agreement; and

WHEREAS, the Municipality of Anchorage, [**~~Chugach Electric Association (~~**]CEA**~~)~~]**, and **[~~Matanuska Electric Association (~~**]MEA**~~)~~]**, are parties to the 1991 Agreement with the State of Alaska and federal agencies to study the impacts of the Eklutna Hydroelectric Project to fish and wildlife, examine and develop proposals for the protection, mitigation, and enhancement of fish and wildlife affected by such hydroelectric development (the "1991 Agreement"), and prepare a Fish and Wildlife Program for the Governor; and

WHEREAS, the RCA ordered that the voting right of the Municipality of Anchorage can be cured if an appropriate person is hired to run the Eklutna Hydropower and the RCA signs off on hire as adequate; and

WHEREAS, the restoration of instream flow to the Eklutna River and restored fish passage to and from Eklutna Lake are the most desirable forms of mitigation for impacts caused by the Eklutna Hydroelectric Project; and

WHEREAS, the Anchorage Assembly supported restoration of the Eklutna River with the passage of AR 2017-324(S) titled "A Resolution in Support of Efforts to Restore the Eklutna River"; and

WHEREAS, the Watershed and Natural Resources Advisory Commission of the Municipality of Anchorage supported restoration of the Eklutna River with the passage of Resolution WNRC 2019-03 titled "A Resolution Regarding Restoration of the Eklutna River"; and

WHEREAS, the Alaska Federation of Natives (AFN) supported restoration of the Eklutna River with passage of Resolution 20-17 "to restore traditional rivers and streams for fish and wildlife habitat…in particular, the efforts of tribes like the Native Village of Eklutna"; and

WHEREAS, the Traditional Tribal Council of the Native Village of Eklutna supported restoration of Eklutna River and Eklutna Lake with the passage of Resolution 2022-04 for "1) continuous flow in the river below the lake sufficient to support thriving salmon populations, with intermittent higher, habitat maintenance and re-creation flows, 2) salmon passage between Eklutna River and Lake, and 3) moderation of

Exhibit 2
Page 2 of 4

Eklutna Lake level variability, at levels sufficient to facilitate sockeye spawning"; now, therefore,

THE ANCHORAGE ASSEMBLY ORDAINS:

Section 1. Anchorage Municipal Code is amended to insert a new section 26.30.025 to read as follows (*requiring no legislative drafting*):

26.30.025 Eklutna River Restoration

A. It is the policy of the Municipality of Anchorage and the Anchorage Hydropower utility to restore the continuous water flow of the Eklutna River and the fish populations of the River and Eklutna Lake, to the greatest extent possible, subject to all provisions of the 1991 Fish & Wildlife Agreement.

B. Under the 1991 Agreement with the State of Alaska, federal agencies, and utility partners, the Municipality of Anchorage, through its Anchorage Hydropower utility and ownership share in the Eklutna Hydroelectric Project, bears responsibility to study and develop proposals for the protection, mitigation, and enhancement of fish and wildlife affected by the hydroelectric development.

1. The Anchorage Hydropower utility shall provide a report to each joint session of the Anchorage Assembly and the Native Village of Eklutna under section 2.30.135B. regarding the restoration of the Eklutna River and Lake and the municipality's performance of its obligations under the 1991 Agreement and the Final Fish and Wildlife Program.

2. The Proposed Final Fish and Wildlife Program to protect, mitigate, and enhance fish and wildlife resources in the Eklutna River shall be submitted to the Assembly with a proposed resolution in support for action, prior to its submission to the Governor of Alaska.

Section 2. This ordinance shall be effective immediately upon passage and approval by the Assembly.

PASSED AND APPROVED by the Anchorage Assembly this 19th day of December, 2023.

Subject: **AN ORDINANCE OF THE ANCHORAGE ASSEMBLY AMENDING ANCHORAGE MUNICIPAL CODE TO ADD NEW SECTION 26.30.025 TO ESTABLISH AN OFFICIAL POLICY FOR THE RESTORATION OF THE EKLUTNA RIVER, SUBJECT TO THE 1991 FISH AND WILDLIFE AGREEMENT WITH THE EKLUTNA POWER PURCHASERS, STATE OF ALASKA AND THE FEDERAL GOVERNMENT.**

The proposed ordinance creates a new section in the Anchorage Municipal Code governing the Eklutna Hydroelectric Project, specific to the alteration of the dam at Eklutna Lake and restoration of continuous water flow in Eklutna River. The intent of this ordinance is to involve the Native Village of Eklutna to the greatest extent possible in the reclamation of the Eklutna River and Lake and acknowledge the legitimate interests and voice of a people who were excluded under the 1991 Agreement. The Agreement has been attached to this AM as Exhibit A for the members' reference. Detailed information on the development of the Fish and Wildlife Program under the Agreement can be viewed at https://eklutnahydro.com/ .

The proposed new Code section would accomplish three things:

First, the ordinance would clearly establish the policy of the Municipality and the Anchorage Hydropower utility as one of the owners of the Eklutna Hydroelectric Project under the 1991 Agreement.

Second, the proposed language requires the regular reporting of the status of the reclamation project to both the Assembly and the Native Village of Eklutna.

Third, the code would require the Final Plan to be submitted to Assembly for review and potential action by a resolution of support or proposed revisions, prior to submitting to the Governor of Alaska, under the terms of Paragraph 5 of the 1991 Agreement.

There are no anticipated economic effects from adding the section to Code, so a SEE is not provided.

I request your support for the ordinance.

AN ORDINANCE OF THE ANCHORAGE ASSEMBLY AMENDING ANCHORAGE MUNICIPAL CODE SECTIONS 3.20.070, 25.20.020, 25.30.020, 26.30.025, AND INSERTING A NEW SECTION 26.40.090 TO REQUIRE ASSEMBLY APPROVAL OF ACTIONS TO ACQUIRE OR DISPOSE OF PROPERTY RIGHTS TO WATER, MINERAL, WIND OR SOLAR RESOURCES, AND OF THE FISH AND WILDLIFE PROGRAM FOR THE EKLUTNA HYDROPOWER PROJECT AND RESTORATION OF CONTINUOUS WATER FLOWS TO THE EKLUNTA RIVER.

THE ANCHORAGE ASSEMBLY ORDAINS:

Section 1. Anchorage Municipal Code section 3.20.070 is hereby amended to read as follows (*the remainder of the section is not affected and therefore not set out)*:

3.20.070 Executive branch organization.

*** *** ***

C. Office of the municipal manager. Within the office of the municipal manager and reporting to the municipal manager or designee are: the office of equal opportunity, the office of emergency management; risk management; health and safety; transportation inspection; culture, entertainment, and arts venues (including the Egan Center, the Dena'ina Civic and Convention Center, the Anchorage Museum at Rasmuson Center, the Anchorage Golf Course, the Sullivan Sports Arena, the Alaska Center for the Performing Arts, and the Boeke and Dempsey Ice Arenas); and the following departments:

*** *** ***

3. Anchorage Water and Wastewater Utility. The Water and Wastewater Utility is responsible for providing water and sanitary sewage services. The utility is also responsible for billing and collecting special assessments.

a. The municipal manager shall have operational oversight of the utility; and

b. The mayor shall be responsible for **operational** policy decisions of the utility, subject to the limitations of subsection c.

c. Pursuant to section 26.30.025, the assembly shall be responsible for all **other** policy decisions **, including those** related to the municipality's performance under the 1991 Fish and Wildlife agreement regarding the Eklutna hydroelectric project.

*** *** ***

6. Anchorage Hydropower Utility. The Anchorage Hydropower Utility is responsible for supplying wholesale electric service to utilities in southcentral Alaska.

   a. The municipal manager shall have operational oversight of the utility; and

   b. The mayor shall be responsible for **operational** policy decisions of the utility, subject to the limitations of subsection c.

   c. Pursuant to section 26.30.025, the assembly shall be responsible for all **other** policy decisions **, including those** related to the municipality's performance under the 1991 Fish and Wildlife agreement regarding the Eklutna hydroelectric project.

Section 2. Anchorage Municipal Code section 25.30.020 is hereby amended to read as follows (*the remainder of the section is not affected and therefore not set out)*:

25.20.020 - Approval by assembly.

In addition to any other assembly action that may be required by law with regard to real property acquisition by the municipality, the following shall be subject to assembly approval:

A. Acquisitions of, or substantive change to the terms governing ownership, control, or access to, real property including an interest in mineral, wind, solar or water rights, except:

*** *** ***

(AO No. 79-170; AO No. 84-61(S))

Section 3. Anchorage Municipal Code section 25.30.020 is hereby amended to read as follows *(the remainder of the section is not affected and therefore not set out)*:

25.30.020 Disposal by ordinance.

A. Except as required or provided otherwise by law, the municipality may dispose of municipal land or any interest therein only by ordinance.

B. For purposes of this section, an interest in municipal land means any estate in real property or improvements thereon, including an interest in mineral, wind, solar, or water rights, but excluding the following if found by the assembly to be without substantial value to the municipality:

1. Revocable permits;

2. Revocable Licenses;

3. Rights-of-way; or

4. Easements.

*** *** ***

(AO No. 79-170; AO No. 80-48(S); AO No. 2007-102, § 1, 8-14-07; AO No. 2015-47, § 2, 5-14-15 , AO No. 2023-107, § 1, 10-10-2023)

Section 4. Anchorage Municipal Code section 26.30.025 is hereby amended to read as follows:

26.30.025 Eklutna River Restoration

A. It is the policy of the Municipality of Anchorage and the Anchorage Hydropower utility to restore the continuous water flow of the Eklutna River and the fish populations of the River and Eklutna Lake, to the greatest extent possible, subject to all provisions of the 1991 Fish & Wildlife Agreement.

B. Under the 1991 Agreement with the State of Alaska, federal agencies, and utility partners, the Municipality of Anchorage, through its Anchorage Hydropower utility and ownership share in the Eklutna Hydroelectric Project, bears responsibility to study and develop proposals for the protection, mitigation, and enhancement of fish and

wildlife affected by the hydroelectric development.

1. The Anchorage Hydropower utility shall provide a report to each joint session of the Anchorage Assembly and the Native Village of Eklutna under section 2.30.135B. regarding the restoration of the Eklutna River and Lake and the municipality's performance of its obligations under the 1991 Agreement and the Final Fish and Wildlife Program.

2. The Proposed Final Fish and Wildlife Program to protect, mitigate, and enhance fish and wildlife resources in the Eklutna River shall be subject to assembly approval [SUBMITTED TO THE ASSEMBLY WITH A PROPOSED RESOLUTION IN SUPPORT FOR ACTION], prior to its submission to the Governor of Alaska.

(AO No. 2023-131 § 1, 12-5-23)

Section 5. Anchorage Municipal Code is amended to insert a new section 26.40.090 to read as follows (requiring no legislative drafting):

26.40.090 Water rights.

The utility may enter agreements for water and water rights for use by or within the municipality, subject to approval by the assembly.

Section 6. This ordinance shall be effective immediately upon passage and approval by the Assembly.

PASSED AND APPROVED by the Anchorage Assembly this 27th day of March, 2024.

Subject: **AO 2024-28 – AN ORDINANCE OF THE ANCHORAGE ASSEMBLY AMENDING ANCHORAGE MUNICIPAL CODE SECTIONS 3.20.070, 25.20.020, 25.30.020, 26.30.025, AND INSERTING A NEW SECTION 26.40.090 TO REQUIRE ASSEMBLY APPROVAL OF ACTIONS TO ACQUIRE OR DISPOSE OF PROPERTY RIGHTS TO WATER, MINERAL, WIND OR SOLAR RESOURCES, AND OF THE FISH AND WILDLIFE PROGRAM FOR THE EKLUTNA HYDROPOWER PROJECT AND RESTORATION OF CONTINUOUS WATER FLOWS TO THE EKLUNTA RIVER.**

The proposed Ordinance is submitted in response to the apparent effort by the Eklutna Owners group to incur financial obligations and dispose of Municipal resources and assets without the approval of or any formal consultation with the Assembly. That is in derogation to the Assembly's legislative powers; it has sole authority to obligate Municipal revenues through its appropriations power, and dispositions of Municipal property, which is apparent in the proposed Draft Fish and Wildlife Plan under the 1991 Agreement, requires Assembly approval. The proposed Ordinance clarifies incurring and obligating the Municipality in these circumstances where the proposed Final Fish and Wildlife Plan will become effective upon approval by the Governor, requires Assembly prior approval.

Section 1. The Proposed AO corrects an oversight in the language of AMC 3.20.070 which had apparently delegated broad policy-making decisions for utilities to the Mayor. This language is an improper delegation of the Assembly's authority as the legislative policy-making branch of the municipal government and directly conflicts with the language of AMC section 26.30.025 as codified in AO 2023-131. The changes proposed in this section will clarify that except for operational policies, the policy making authorities, such as budgetary, financial, construction, and other policy considerations reside with the Assembly and thereby resolves the conflict in the Code.

Sections 2 & 3. These proposed changes clarify the Assembly's approval authority over any agreements acquiring or disposing of any interest in real property, including water rights. Specifically, these changes are meant to address a perceived gap in the Code where creative legal instruments have previously been used to grant private parties exclusive use of Municipal property. These proposed amendments make plain that the Assembly's approval must be obtained for the Municipality to grant, dispose, or alter any parties' right to acquire, dispose of, control or access public property, including wind, solar, mineral and water rights.

Section 4. This proposed change inserts a new requirement for the Assembly to approve the final Fish and Wildlife program proposed under the 1991 Eklutna Dam agreement, prior to submission the Governor. This change has proven necessary, as the Eklutna Owners have made clear their intention to alter the Municipality's access to drinking water and obligate the Municipality to fund the final program inside the tax cap. These decisions have been made ignoring meaningful input from and policy guidance passed and approved by the Assembly over the past seven years and often in direct conflict to the guidance provided time and time again.

Section 5. Finally, Section 5 inserts a new section of code that requires AWWU submit any agreement for water rights to the Assembly for approval.

I request your support for the ordinance.

Municipal Clerk's Office
Amended and Approved
Date: February 2, 2024

A RESOLUTION OF THE ANCHORAGE ASSEMBLY SUBMITTING PUBLIC COMMENT ON THE DRAFT FISH AND WILDLIFE PROGRAM FOR THE EKLUTNA HYDROELECTRIC PROJECT.

WHEREAS, the Municipality of Anchorage, Chugach Electric Association (CEA), and Matanuska Electric Association (MEA) (collectively "the Hydroelectric Project Owners") jointly own the Eklutna Hydroelectric Project and are parties to the 1991 Fish and Wildlife Agreement (the "1991 Agreement") with the State of Alaska, the U.S. Fish and Wildlife Service and the National Marine Fisheries Service (an agreement that notably excludes a key stakeholder, the Native Village of Eklutna, the federally recognized tribe whose ancestral homelands encompass this project) to fund studies to examine and quantify the impacts of the Eklutna Power Project on fish and wildlife; examine and develop proposals for the protection, mitigation, and enhancement of fish and wildlife affected by such hydroelectric development; and prepare a Proposed Final Fish and Wildlife Program (the "Fish and Wildlife Program") for approval by the Governor; and

WHEREAS, once approved by the Governor, the Fish and Wildlife Program will contractually bind operations of the Eklutna Hydroelectric Project and Anchorage Water and Wastewater Utility ("AWWU") for the next 35 years; and

WHEREAS, in their Draft Fish and Wildlife Program to mitigate their impacts to fish and wildlife pursuant to the 1991 Agreement, the Hydroelectric Project Owners propose to utilize AWWU infrastructure to deliver water into the Eklutna River via a Portal Valve (the "Portal Valve Alternative") one mile downstream of Eklutna Lake; and

WHEREAS, the policy of the Municipality of Anchorage has been to support restoration of the Eklutna River since the Anchorage Assembly adopted AR 2017-324(S), "A Resolution in Support of Efforts to Restore the Eklutna River," and AR 2022–262, As Amended, "A Resolution of the Anchorage Municipal Assembly in Support of Efforts to Restore the Eklutna River"; and

WHEREAS, further, through the passage of AO 2023-131, As Amended, the Assembly, through the creation of a specific law, reinforced and declared that it is the official policy of the Municipality of Anchorage, inclusive of the Anchorage Hydropower Utility Department, to restore the continuous water flow of the Eklutna River and the fish populations of the River and Eklutna Lake, to the greatest extent possible, subject to all provisions of the 1991 Agreement; and

WHEREAS, any changes to the Eklutna Hydroelectric Project will impact not only hydroelectric power and drinking water, but also fish and wildlife; and

WHEREAS, Eklutna Lake is the primary source of Municipality's drinking water for which AWWU currently pays approximately $1.2 Million annually to the Eklutna Hydroelectric Project to ensure access to the Municipality's drinking water and any binding agreement relating to the purchase price of water and volumes available to AWWU may impact property rights of AWWU and the regulated price of water to its customers; and

WHEREAS, the Anchorage Assembly was recently briefed about the changing regulatory environment for drinking water, and while the effects of the regulatory changes are currently unknown, concern has been raised about the availability of drinking water from ground wells under the new regulations; and

WHEREAS, the Anchorage Assembly hired an expert engineer, Don Spiegel, who originally designed the Eklutna AWWU system, to evaluate the Portal Valve alternative as it relates to AWWU's operation of the Eklutna Water Treatment Facility and the effectiveness of the Portal Valve Alternative in delivering water to the river to support the restoration of fish species; and

WHEREAS, the initial conclusions of Mr. Spiegel, which were submitted to the Assembly through AIM 2024-11 on January 23, 2024, raise significant doubts as to whether the Portal Valve Alternative will meet the mitigation objectives stated on a year round basis: inability to meet those objectives could result in AWWU and the Municipality being culpable and liable for the death of any in-river species that have returned, depending on water levels provided by the Hydroelectric Project Owners, and could be a limiting condition for AWWU expansion in the future; and

WHEREAS, the public comment period for the Draft Fish and Wildlife Program is open until February 19, 2024; and

WHEREAS, following the public comment period is an opportunity for the Hydroelectric Project Owners to review the comments and resolve any disagreements prior to submitting a final proposal to the Governor; and

WHEREAS, the Native Village of Eklutna has put forward an alternative for removal of the dam at Eklutna Lake, which is supported by the Municipal policy stated in AO 2023-131, As Amended, and codified at AMC 26.30.025A., but was never fully considered by the Hydroelectric Project Owners and has not been presented as an alternative in the Draft Fish and Wildlife Program; and

WHEREAS, in addition to the stated policy and support for dam removal, the Anchorage Assembly has evaluated the Portal Valve Alternative and has concerns about that alternative; and

WHEREAS, in the interest of protecting the future of the Municipal water supply as well as the interests of its residents and municipal taxpayers, the Anchorage Assembly submits the following public comments on the Draft Fish and Wildlife Program regarding the Portal Valve Alternative;

NOW, THEREFORE, THE ANCHORAGE ASSEMBLY RESOLVES and submits the following as its comments on the Draft Fish and Wildlife Program:

Section 1. The following are process and technical concerns particular to the Portal Valve Alternative put forward by the Hydroelectric Project Owners for public comment:

A. **Non-Compliant Process**. The August 7, 1991 Fish and Wildlife Agreement (1991 Agreement) sets forth a process for addressing the Eklutna Hydroelectric Project's impacts on fish and wildlife similar to that for Federal Energy Regulatory Commission ("FERC") licensed projects. The process set forth in the 1991 Agreement was intended to be at least as robust as a normal FERC license process, which is subject to all the provisions of National Environmental Policy Act ("NEPA") and all the authorities typically granted to the federal agencies. The process engaged by the Hydroelectric Project Owners falls short of the FERC standard of analysis. No NEPA analysis was done, the federal agencies were denied the authorities they normally would have, such as to prescribe fish passage, and the public wasn't presented any alternatives to choose from. Moreover, the process engaged in does not appear comparable to the NEPA requirements to consult with Native Tribes impacted by the project (18. C.F.R. 5.7), nor have a dispute resolution process allowing agencies to mandate conditions (18 C.F.R. 5.8 and 5.15).

None of state or federal signatories to the 1991 Agreement have so far supported the Portal Valve Alternative. The comment letters from these state and federal resource agencies raise questions around the process engaged by the Hydroelectric Project Owners, the data inputs used in modeling to develop the Draft Fish and Wildlife Program, and the viability of the Portal Valve Alternative to achieve the stated goals of the 1991 Agreement. These questions are unresolved.

Similarly, the process under the 1991 Agreement diverges substantially from the type of alternatives analysis the Municipality uses on its own capital projects. Often the Municipality's own large capital projects, such as the Port of Alaska Modernization Program ("PAMP") or projects co-funded through the Anchorage Metropolitan Area Transportation Solutions ("AMATS") design alternatives, are evaluated by experts and relevant stakeholders and the Assembly is briefed and able to weigh in on the proposed alternatives, particularly where Municipal resources are required to fund the projects. Based on the information the Assembly has been provided to date, only one alternative was seriously evaluated by the Hydroelectric Project Owners and put forward for consideration even though a Municipal contribution is expected through a property tax assessment.

B. **Potential Impacts to Anchorage Drinking Water .** Throughout this process, there has been very little discussion about any implications

on AWWU and the Municipality's access to drinking water now and into the foreseeable future (the next 35 years). The week of January 22, 2024, well after the Draft Fish and Wildlife Program was released and after years of discussion and presentation by the Eklutna Hydroelectric Project owners, we learned that the Hydroelectric Project Owners and AWWU, all public utilities regulated by the Regulatory Commission of Alaska (RCA), had signed a binding agreement in early October 2023, prior to submitting the Draft Fish and Wildlife Program for public comment. We learned this agreement is based on the Portal Valve Alternative and no other alternative; an alternative that may have significant impacts to the project outcome as well as to regulated rates authorized by the RCA. The Anchorage Assembly has requested a copy of the signed agreement, but we have been told the agreement is confidential and **could only review it in Executive Session** **[~~we therefore have been unable to review it.~~]** This is a significant hinderance on the Anchorage Assembly, and the public, to provide complete comments on the Portal Valve Alternative as related to AWWU operations, potential impacts to Municipal growth and strategic investments for AWWU and the Municipality. Significant legal questions also remain whether a binding agreement can be signed relating to future Municipal utility assets, revenues, and expenditures without Assembly approval.

Before learning of that agreement, the Anchorage Assembly hired an expert to analyze the effectiveness of the Portal Valve option in relation to AWWU's operation at Eklutna. That analysis by engineer Don Spiegel, who designed the Eklutna AWWU system, concluded that the Portal Valve "cannot provide adequate Eklutna River restoration flows, nor can it provide year-round water without interruption. Thus, it is the Author's opinion that the Portal Valve as currently configured is fatally flawed and other Eklutna River restoration alternatives should be studied further."

Furthermore, in the past month, AWWU has briefed the Assembly on new developments concerning drinking water regulation through federal and local entities. The impacts of the new drinking water regulations are yet to be determined, but AWWU leadership has expressed concerns about potential impacts to the Municipality from limitations of retaining full ground well capacity. Until the new regulatory landscape is better understood, particularly any reductions in access to drinking water from sources other than Eklutna, any future limitations on drinking water capacity at Eklutna should be held in abeyance.

C. **Incomplete Analysis and Insufficient Mitigation.** The Portal Valve Alternative does not meet the requirements of the 1991 Agreement regarding "the protection, mitigation of damages to, and enhancement of fish and wildlife affected by hydroelectric development of the Eklutna Hydroelectric Project." There are a number of variables related to lake level that can render the Portal Valve Alternative

inoperable. Additionally, regular and unexpected maintenance at the AWWU water facility will also stop the flow of water into the Portal Valve. Discontinuous water flows will result in fish kills in Eklutna River. The state and federal signatories to the 1991 Agreement have raised questions about the analysis and process used to develop the Draft Fish and Wildlife Program. The Hydroelectric Project Owners failed to consider all reasonable alternatives, including the dam removal alternative proposed by the Native Village of Eklutna. The Hydroelectric Project Owners failed to present the public with a full range of alternatives as would typically occur in similar situations.

D. **Poor Coordination and Questionable Use of Public Funds.** The Hydroelectric Project Owners and AWWU are regulated utilities and need to demonstrate benefit to their rate payers. Additionally, the Assembly, as the steward of taxpayer funds, must demonstrate benefit to the residents of the Municipality through the expenditure of public funds. Treating the Portal Valve Alternative as a singular stand-alone project is short sighted and does not maximize various opportunities to meet the goals and objectives of 1991 Agreement across various entities nor does it meet the requirements of these entities to benefit the public. The Portal Valve Alternative brought forward by the Hydroelectric Project Owners is self-serving and fails to protect the broader public interests of the Municipality of Anchorage. Given the $57 million price tag of the Portal Valve Alternative, its potential impacts to AWWU operations, and the financial implications to ratepayers and taxpayers for the next 35 years, we find this is a poor use of public funds and lacked public coordination.

For all the above reasons, the Anchorage Assembly cannot endorse and thus opposes the Draft Fish and Wildlife Program.

Section 2. The Municipality of Anchorage does not intend to issue authorizations or provide funds or any other form of support of the Draft Fish and Wildlife Program or any alternative that doesn't restore the full length of the Eklutna River and comply with policy of the Municipality, as recently enacted by AO 2023-131, As Amended, and codified at AMC 26.30.025A., as well as AR 2022-262, As Amended, and AR 2017-324(S).

Section 3. The Regulatory Commission of Alaska (RCA), under its statutory powers to initiate investigation into practices and facilities of a public utility, should review the Draft Fish and Wildlife Program and examine any impacts on any of the regulated utilities, including but not limited Chugach Electric, Matanuska Electric, Anchorage Hydropower and AWWU, particularly about impacts to rate payers and their access to uninterrupted service, **before** any option for a Final Fish and Wildlife Program is transmitted to the Governor for review and approval.

Section 4. The Anchorage Assembly requests the Hydroelectric Project Owners to seek a two-year extension of the 1991 Agreement from the signatories, of which the Municipality is one through the Anchorage Hydropower Utility, to perform additional analysis, consultation, and coordination with affected parties, including

the Anchorage Assembly and the Native Village of Eklutna. The issues at play are too significant to our community to rush to judgment or exclude key stakeholders. The residents of the Municipality deserve a measured and comprehensive approach guided by respectful coordination to reach a solution that enjoys broad consensus among the affected parties.

Section 5. This resolution shall be effective immediately upon passage and approval by the Assembly.

PASSED AND APPROVED by the Anchorage Assembly this 2nd day of February, 2024.

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners: John M. Espindola, Chairman
Steve DeVries
Robert M. Pickett
John C. Springsteen

In the Matter of the Petition Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee	U-24-024 ORDER NO. 8

ORDER GRANTING MOTION TO DISMISS IN PART AND DISMISSING NOTICE AND REQUEST, DENYING MOTION TO DISMISS IN PART, VACATING PROCEDURAL SCHEDULE, DENYING MOTION TO COMPEL, DENYING REQUEST TO CONSTRUE NOTICE AND REQUEST AS PETITION TO AMEND CERTIFICATE CONDITION, PROVIDING GUIDANCE FOR FUTURE FILINGS, AND CLOSING DOCKET

BY THE COMMISSION:

Summary

We grant the motion to dismiss filed by the Office of the Attorney General, Regulatory Affairs and Public Advocacy Section (RAPA) in part, and dismiss the *Notice and Request for Acknowledgment of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee* (Notice and Request) filed by the Municipality of Anchorage d/b/a Anchorage Hydropower (AHP) on July 18, 2024. We deny the motion to dismiss in part. We vacate the remaining procedural schedule adopted for resolution of this docket, including the prehearing conference scheduled for November 18, 2024, and the public hearing scheduled to begin on November 18, 2024. We deny the motion to compel discovery responses jointly filed

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

by Chugach Electric Association, Inc. (Chugach) and Matanuska Electric Association, Inc. (MEA). We deny the request by AHP to construe its Notice and Request as a petition to modify the conditions on AHP's certificate of public convenience and necessity (certificate). We provide guidance to AHP for its consideration should it make future filings related to reinstatement of Eklutna Operating Committee (EOC) voting rights. We close this docket.

Background

In Order U-18-102(44)[1] we described the Eklutna Hydroelectric Project (Eklutna Project) as follows:

> The Eklutna Project was built and operated by the federal government pursuant to the Eklutna Power Act of 1950. In 1995, Congress authorized sale of the Eklutna Project to [the Municipality of Anchorage d/b/a Municipal Light & Power Department (ML&P)], Chugach, and MEA under the terms of the 1989 Eklutna Purchase Agreement. Under this agreement, the three utilities received an undivided interest in all of the Eklutna Project, water rights, generation plant and the transmission assets interconnecting the Eklutna Project with ML&P, Chugach, and MEA. ML&P obtained a 53.33% ownership interest, Chugach obtained a 30% ownership interest, and MEA obtained a 16.67% interest in the Eklutna Project. Eklutna Project energy, capacity, and costs are to be allocated based on these ownership interests. ML&P and Chugach assert that the Eklutna Project currently has a maximum capacity of 39 MW.
>
> The three utilities created the Eklutna Operating Committee (EOC) to make all management decisions related to operation, maintenance, and budgeting for the Eklutna Project. ML&P, Chugach, and MEA each have a representative on the EOC. Decisions by the EOC are made based upon a double majority consisting of affirmative votes by at least two of the three utilities whose ownership shares total at least 51% of the Eklutna Project ownership. Effectively, management of the Eklutna Project is limited to actions approved by ML&P and at least one of Chugach or MEA.[2]

[1]Order U-18-102(44)/U-19-020(39)/U-19-021(39), *Order Accepting Stipulation in Part, Subject to Conditions; Transferring and Issuing Certificates of Public Convenience and Necessity, Subject to Conditions; Addressing Beluga River Unit Management, Gas Transfer Prices, and Third Party Sales Gas Pricing; and Requiring Filings*, dated May 28, 2020 (Order U-18-102(44)).

[2]Order U-18-102(44) at 60-61 (footnotes omitted).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

Chugach filed a petition seeking our approval of its acquisition of all service obligations and most assets of ML&P, and an application to amend its certificate to reflect the new service obligations.[3] Under the terms of this acquisition, Chugach would offer employment to all ML&P employees and the Municipality of Anchorage would retain no ML&P employees.[4] Under this acquisition, Chugach was not purchasing ML&P's interest in the Eklutna Project Power Plant, but was acquiring a portion of ML&P's share of cost responsibilities and output from the Eklutna Project for a 35 year period.[5] Docket U-19-020 was opened to investigate this petition and application.[6]

As part of this same transaction, ML&P filed an application to amend its certificate to delete its current service territory and add the Eklutna Project Power Plant site as its new service territory.[7]

[3] *Petition for Approvals Needed to Acquire Anchorage Municipal Light and Power and Application to Amend Certificate of Public Convenience and Necessity No. 8*, filed April 1, 2019 (Petition for Approvals), in Docket U-19-020.

[4] *Pre-filed Direct Testimony of Arthur W. Miller*, filed April 1, 2019, in Docket U-19-020, Exhibit AWM-03 at 67 (Section 6.05(a)); Docket U-19-020/U-19-021 Tr. 2708-2709.

[5] Petition for Approvals at 8.

[6] Order U-19-020(1), *Order Addressing Timeline for Decision, Inviting Participation by the Attorney General and Petitions to Intervene, Scheduling Prehearing Conference, Giving Notice of Possible Consolidation, Designating Commission Panel, and Appointing Administrative Law Judge*, dated April 18, 2019.

[7] *Application of the Municipality of Anchorage d/b/a Municipal Light and Power to Amend Certificate of Public Convenience and Necessity No. 121 and to Terminate Dividend Restriction*, filed April 5, 2019 (ML&P Application).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

Docket U-19-021 was opened to investigate this application.[8] Dockets U-19-020 and U-19-021 were consolidated with Docket U-18-102.[9]

We ultimately approved the transaction under which Chugach acquired the service obligations and most of the ML&P assets, subject to conditions.[10] One of these conditions required ML&P to surrender its voting rights on the EOC prior to the effective date of the agreements under which ML&P's successor would be providing part of its share of the Eklutna Project output to Chugach (the Eklutna Power Purchase Agreement (PPA))[11] and selling the remainder of its share of the Eklutna Project output to MEA (the MEA PPA).[12] We required that:

> This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.[13]

---

[8]Order U-19-021, *Order Addressing Timeline for Decision, Inviting Participation by the Attorney General and Petitions to Intervene, Scheduling Prehearing Conference, Giving Notice of Possible Consolidation, Designating Commission Panel, and Appointing Administrative Law Judge*, dated April 18, 2019.

[9]Order U-18-102(8)/U-19-020(2)/U-19-021(2), *Order Consolidating Dockets, Designating Party, Requiring Filing, Granting Petitions to Intervene, Adopting Procedural Schedule, Addressing Timeline for Final Decision, and Amending Docket Captions*, dated May 8, 2019.

[10]As part of this transaction, ML&P's ownership interest in the Eklutna Project transmission system interconnecting the Eklutna Project Power Plant with the transmissions systems of Chugach, ML&P, and MEA was transferred to Chugach and MEA. The Eklutna Project transmission system is not at issue in this docket.

[11]The Eklutna PPA is attached as Appendix D to Order U-18-102(44) and is entitled *Eklutna Power Purchase Agreement Between Chugach Electric Association, Inc. ("Purchaser") and Municipality of Anchorage ("Seller")*.

[12]Order U-18-102(44) at 65-67. The MEA PPA is attached as Appendix H to Order U-18-102(44) and is entitled *Eklutna Power Purchase Agreement Between Municipality of Anchorage ("Seller") and Matanuska Electric Association, Inc. ("Purchaser")*.

In compliance with this condition, ML&P surrendered its EOC voting rights effective October 30, 2019.[14]

Almost five years later, AHP filed the Notice and Request seeking reinstatement of its EOC voting rights.[15] In this filing, AHP asserted that Anchorage Water and Wastewater (AWWU) General Manager Mark A. Corsentino had been appointed to be the General Manager of AHP and that AWWU Engineering Director Mark Schimscheimer would provide support to Corsentino. AHP filed the resumes of these two employees.[16] To reflect the time these two AWWU employees are expected to spend on AHP business, 20% of Corsentino's salary and 10% of Schimscheimer's salary would be paid by AHP.[17] AHP requested a decision on its Notice and Request within 30 days of the date it was filed, or by August 17, 2024.[18]

We issued public notice of the Notice and Request, with comments due by August 26, 2024.[19] The Native Village of Eklutna filed comments indicating the Village's endorsement of AHP's request.[20] Chugach and MEA jointly filed comments identifying issues related to the Notice and Request that they believed should be investigated.[21]

Discussion

Motion to Dismiss

In its Motion to Dismiss, RAPA seeks dismissal of AHP's Notice and Request on two grounds. First, RAPA asserts that AHP only desires to have its EOC voting rights restored so that it could have greater input on the Eklutna Project Fish and Wildlife Program identified in Section 104(a) of Public Law 104-58. RAPA states that the Governor has now approved the Eklutna Project Fish and Wildlife Program. Based on this action, RAPA concludes that the Notice and Request is now moot and should be dismissed.[54] Second, RAPA also asserts that the Notice and Request should be dismissed because it is premature under the minimum term of EOC voting rights surrender specified in Order U-18-102(44).[55]

We raised the issue that the Notice and Request appears to be premature under the minimum term of EOC voting rights surrender specified in Order U-18-102(44) at the prehearing conference.[56] That issue has been extensively briefed by the parties and we will address it first.

Dismissal as Premature Under the Terms of Order U-18-102(44)

In Order U-18-102(44) we established a minimum term for ML&P's surrender of its EOC voting rights as a condition of AHP's certification as a public utility and as a condition of our approval of the Eklutna PPA and the MEA PPA. This term is stated as follows:

> We can only find that [AHP] is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders

---

[54]Motion to Dismiss at 1-7. *See*, Order U-18-102(44) at 61, and the materials cited in footnote 175, for a discussion of the Fish and Wildlife Program requirements.

[55]Motion to Dismiss at 7-8.

[56]Tr. 6-7.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

> its vote on the EOC under the Eklutna Project agreement so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without [AHP] having a vote on operating or management decisions. **This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as [AHP] has shown to our satisfaction that [AHP] has acquired the expertise required to fully participate as a voting member of the EOC**.[57]

AHP based its request for reinstatement of EOC voting rights on the assertion that it had acquired the expertise required to fully participate as a voting member of the EOC in compliance with the second half of this condition.[58] AHP initially made no reference to the minimum term of EOC voting rights surrender required by Order U-18-102(44).[59]

We raised the minimum term of EOC voting rights surrender issue at the prehearing conference, and AHP responded that it disagreed with the suggestion that Order U-18-102(44) mandated a minimum term of EOC voting rights surrender.[60] We requested briefing on this issue.[61] In its briefing on this issue, AHP acknowledged that if Order U-18-102(44) mandated a minimum term of EOC voting rights surrender it would not have EOC voting rights until both the Eklutna PPA and the MEA PPA elapsed.[62] AHP raised several grounds on which it based its belief that Order U-18-102(44) did not mandate a minimum term of EOC voting rights surrender. We address those grounds separately.

Rules of Statutory and Contract Interpretation

AHP asserts:

> It is a principle of both contract law and statutory interpretation that contracts and statutes should not be interpreted in a manner that renders

> language superfluous. To the extent there is any ambiguity in the language of a past Commission Order, the Commission should apply the same rules of interpretation here.[63]

AHP cites to no authority for application of this rule of interpretation to our orders. For the sake of clarity in this proceeding we address this issue as if these rules of interpretation do apply to our orders, without determining if these rules do apply to our orders.

The minimum term of EOC voting rights surrender is stated in Order U-18-102(44) as:

> This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as [A]HP has shown to our satisfaction that [A]HP has acquired the expertise required to fully participate as a voting member of the EOC.

As an initial matter, we agree with RAPA that there is no grammatical ambiguity in the minimum term of EOC voting rights surrender language.[64] AHP has disputed RAPA's grammatical evaluation of this language.[65] However, each of AHP's arguments would result in portions of the language actually used in Order U-18-102(44) being rendered superfluous in violation of the very rules of interpretation AHP suggests that we follow. AHP's arguments for finding a grammatical ambiguity are not convincing and we do not agree with AHP's assertion that there is grammatical ambiguity in the minimum term of EOC voting rights surrender language used in Order U-18-102(44).

AHP also argues that there is a contextual ambiguity in the minimum term of EOC voting rights surrender language in Order U-18-102(44). Specifically, AHP argues that the minimum term of EOC voting rights surrender renders Section 4.2 of the Eklutna PPA and Section 4.2 the MEA PPA superfluous in violation of the rules of construction it

[63]AHP Initial Brief at 13 (footnote omitted).

[64]RAPA Brief at 3-5

[65]AHP Reply Brief at 7-14.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

relies upon.[66] Examination of the context in which the minimum term of EOC voting rights surrender language is stated in Order U-18-102(44) shows that there is no contextual ambiguity between that language and the two Section 4.2 referred to by AHP.

AHP argues that if we intended the minimum term of EOC voting rights to be enforced as written, we would have disapproved the Section 4.2 referred to by AHP.[67] However, in crafting Order U-18-102(44) we "sought to find a way to approve this transaction while leaving as much of the parties' bargain intact as possible."[68] We did not disapprove any part of the transaction documents unless we specifically found that the public interest required disapproval of that part. Our failure to completely harmonize the transaction documents with the substance of Order U-18-102(44) cannot be taken as a basis for nullifying or rendering superfluous any express term stated in Order U-18-102(44).

Section 4.2 of the Eklutna PPA states:

> Section 4.2 Operation of the Facility.
>
> (A) In accordance with the Operations Agreement (as may be amended by the Operations Agreement Amendment), during the Term Purchaser shall manage, control, operate and maintain the Chugach Portion in a manner consistent with Prudent Utility Practice.
>
> (B) During the Term, Seller shall, in consultation with Purchaser, select the person to serve as Seller's representative to the Operating Committee (the "Seller's Representative"). The Seller's Representative shall make all decisions on the Operating Committee consistent with Prudent Utility Practice and the rights and obligations of the Parties under this PPA. Seller's Representative shall also be Seller's representative for any consultation, study, and implementation processes required under the Fish and Wildlife Agreement relating to the Facility. The Seller's Representative shall make all decisions with respect to any processes required under the Fish and Wildlife Agreement with due regard for the rights and obligations of the Parties under this PPA.

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

> (C) The Parties acknowledge and agree that Seller has prior rights to not less than 41 million gallons of water per day from Eklutna Lake for public water supply pursuant to the Act of October 30, 1984, 98 Stat. 2823; Alaska Statutes 46.15.150(a); and Certificate of Appropriation AOL 44944. The Parties agree that during the Term, the supply of water available for production of Power by the Seller's Interest shall be net of all water taken by Anchorage Water and Wastewater Utility for public water supply purposes.[69]

Eklutna PPA Subsection 4.2(A) deals with Chugach's obligations as Purchaser and Subsection 4.2(C) only identifies the Municipality of Anchorage's rights to water from Eklutna Lake. Neither of these two subsections are relevant to AHP's argument and we do not address them further.

Subsection 4.2(B) requires AHP, as Seller, to consult with Chugach in the selection of AHP's representative on the EOC. In Order U-18-102(44), we stated:

> We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions. This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.[70]

This language allows, but does not require, AHP to have a non-voting representative attend EOC meetings. Not disapproving Subsection 4.2(B) leaves intact the parties bargain requiring AHP to consult with Chugach when selecting AHP's representative to the EOC. Further, nothing in the Order U-18-102(44) prevents AHP's non-voting EOC representative from participating in EOC meetings "consistent with Prudent Utility Practice

[69]Order U-18-102(44), Appendix D at 9.

[70]Order U-18-102(44) at 67.

Regulatory Commission of Alaska

and the rights and obligations of the Parties under this PPA." The "consistent with Prudent Utility Practice and the rights and obligations of the Parties under this PPA" language of Eklutna PPA Subsection 4.2(B) places boundaries on the AHP non-voting representative's participation in EOC meetings and our not disapproving Subsection 4.2(B) leaves intact the parties' bargain for this limitation on AHP.

Subsection 4.2 of the MEA PPA states:

> Section 4.2 Operation of the Facility.
>
> (A) During the Term Seller shall, at its cost and expense, manage, control, operate, and maintain the MEA Portion in accordance with the Operations Agreement and in a manner consistent with Prudent Utility Practice. Without limiting the foregoing, during the Term, as between Seller and Purchaser. Seller shall be responsible for all capital costs, all operations and maintenance expenses, and all costs and expenses for environmental compliance and compliance with Applicable Laws relating to the MEA Portion.
>
> (B) During the Term. Seller shall, after giving Purchaser a reasonable opportunity to consult with Seller. but without in any way limiting Seller's discretion as a result of any such consultation, select the person to serve as Seller's representative to the Operating Committee (the "Seller's Representative"). The Seller's Representative shall make all decisions on the Operating Committee consistent with Prudent Utility Practice and the rights and obligations of the Parties under this PPA and the rights and obligations of the parties under the Chugach Power Purchase Agreement. The Seller's Representative shall also be Seller's representative for any consultation, study. and implementation processes required under the Fish and Wildlife Agreement relating to the Facility. The Seller's Representative shall make all decisions with respect to any processes required under the Fish and Wildlife Agreement with due regard for the rights and obligations of the Parties under this PPA.
>
> (C) The Parties acknowledge and agree that Seller has prior rights to not less than 41 million gallons of water per day from Eklutna Lake for public water supply pursuant to the Act of October 30, 1984. 98 Stat. 2823; Alaska Statutes 46.15.150(a); and Certificate of Appropriation AOL 44944. The Parties agree that during the Term, the supply of water available for production of Power by the Seller's Interest shall be net of all water taken by Anchorage Water and Wastewater Utility for public water supply purposes consistent with the aforementioned water rights.

MEA PPA Subsection 4.2(A) does not address AHP's representation on the EOC and Subsection 4.2(C) only identifies the Municipality of Anchorage's rights to water from

Regulatory Commission of Alaska

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

Eklutna Lake. Neither of these two subsections are relevant to AHP's argument and we do not address them further.

As discussed above, the minimum term of EOC voting rights surrender condition allows AHP to have a representative attend EOC meetings. The MEA PPA Section 4.2(B) requirement that AHP consult with MEA on AHP's choice of that representative remains effective even if the AHP representative has no voting rights. Also, as discussed above, the "consistent with Prudent Utility Practice and the rights and obligations of the Parties under this PPA" language of MEA PPA Subsection 4.2(B) places boundaries on the AHP non-voting representative's participation in EOC meetings and our not disapproving Subsection 4.2(B) leaves intact the parties' bargain for this limitation on AHP.

Eklutna PPA Section 4.2(B) and MEA PPA Section 4.2(B) are both silent on voting rights and thus the requirement that ML&P surrender its EOC voting rights does not expressly nullify any part of these provisions. Both subsections include the phrase: "Seller's Representative shall make all decisions on the Operating Committee consistent …." This language could imply that AHP makes EOC decisions. As discussed in Order U-18-102(44), with its EOC voting rights intact ML&P had authority to veto decisions of the EOC but did not have authority to make decisions for the EOC except with the agreement of at least Chugach or MEA.[71] Because ML&P never had the authority to make EOC decisions, we read the "Seller's Representative shall make all decisions on the Operating Committee consistent" language to refer to the decisions AHP, as ML&P's successor, makes about its own participation in EOC decisions. Nothing in Order U-18-102(44) renders the language in Eklutna PPA Section 4.2(B) or MEA PPA Section 4.2(B) superfluous, and the existence of the language in these two subsections does not

[71] Order U-18-102(44) at 60-61.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

create any contextual ambiguity in the minimum term of EOC voting rights surrender language used in Order U-18-102(44).

AHP points to history of TA525-18 and TA379-121 where our Staff asked AHP and MEA if MEA PPA Section 4.2(B) needed to be revised based upon the apparent inconsistency with the minimum term of surrender language in Order U-18-102(44) as evidence of contextual ambiguity.[72] In TA525-18 and TA379-121, on October 22, 2020, our Staff asked MEA and ML&P to respond to the following:

> I believe there is an inconsistency between the MEA Eklutna PPA and the final order (U-18- 102(44)/U-19-020(39)/U-19-021(39)) (U-18-102(44).
>
> At page 67 of U-18-102(44) the Commission required MOA/ML&P to surrender its vote on the EOC so Chugach and MEA could manage the Eklutna Hydro project.
>
> The MEA Eklutna PPA, at page 4, Section 4.2(B) appears to allow MOA/ML&P to keep its vote on the EOC.
>
> Does MEA [or ML&P] believe the language between the final order and the MEA Eklutna PPA as summarized above are in conflict? Please explain your response and provide a remedy if appropriate.

MEA responded to this request as follows:

> Mr. Layne, regarding your inquiry, MEA offers the following response.
>
> The MEA Eklutna Hydro PPA, by and between MEA and the MOA, was entered into and executed in September 2019, several months prior to the RCA's May 2020 decision requiring ML&P to surrender its vote on the EOC as a condition of approving the sale of ML&P. This appears to be the reason for the "conflict" you reference because at the time the PPA was negotiated, the parties had no way of knowing the future RCA decision regarding ML&P's surrendering of EOC voting rights. MEA notes that the provision you reference and cite as a conflict in the MEA Eklutna Hydro PPA is contained verbatim in the Chugach Eklutna Hydro PPA (see Appendix D of Order U-18-102(44), Section 4.2(B) at page 9 of 92), which the RCA conditionally approved as part of Order U-18-102(44).
>
> In MEA's view, if the RCA wishes to resolve this perceived conflict, the remedy should be similar and consistent with how the RCA remedied the same conflict in the Chugach Eklutna Hydro PPA, which could include approving the MEA PPA subject to the same conditions the RCA previously imposed in Order U-18-102(44). Specifically, MEA is agreeable to having the same vote

[72] AHP Initial Brief at 14-18; AHP Reply Brief at 15-17 (in this brief, AHP erroneously refers to TA525-18 as being TA525-15).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

surrender language in order U-18-102(44) at page 67 apply to the MEA Eklutna Hydro PPA. Hopefully this helps resolves this matter.[73]

ML&P responded to this request as follows:

> The MOA/ML&P do not believe that the MEA Eklutna PPA is inconsistent Order No. U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39"). The part of Order 39 that you cite states:
>
> "We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the [Chugach] Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions." Order 39 at 67.
>
> To comply with the Order, ML&P will surrender its vote on the EOC prior to the closing of the ML&P sale to Chugach, which will be before the effective date of the Chugach Eklutna PPA and of the MEA Eklutna PPA. ML&P will promptly file a notice of that surrender with the RCA. The surrender will have a term at least equal to the term of the two PPAs, subject to termination of the surrender upon MHP showing to the RCA's satisfaction "that MHP has acquired the expertise required to fully participate as a voting member of the EOC." Order 39 at 67. If and when MHP has a proposed EOC representative that satisfies the qualifications, MHP will file that information and request that the RCA make the necessary finding for termination of the EOC vote surrender.
>
> Like Section 4.2(B) of the Chugach Eklutna PPA, Section 4.2(B) of the MEA Eklutna PPA requires MHP, in consultation with the Purchaser, to select MHP's representative on the EOC. As a result of Order 39, MHP won't have any voting representative on the EOC until the surrender is terminated upon a positive finding by the RCA that MHP's proposed representative is qualified. Thus, Section 4.2(B) of neither PPAs need to be amended. In addition, Section 4.2(B) should remain as written as it will be relevant if and when MHP's voting rights surrender is terminated in the future upon the necessary finding of the RCA.[74]

The ambiguity that our Staff was inquiring about is different from the ambiguity alleged by AHP. Staff was concerned that MEA PPA Section 4.2(B) contractually allowed AHP to exercise a vote on the EOC after the surrender was in effect. This is due to the language used in the MEA PPA, and as noted by MEA, language that is also in the Eklutna PPA.

[73]Correspondence from T. Clark, filed October 23, 2020, in TA525-18.

[74]Correspondence from D. Thompson, filed October 27, 2020, in TA379-121.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

MEA responded that the MEA PPA was negotiated several months before Order U-18-102(44) was issued, and that the language of the MEA PPA did not reflect the surrender of ML&P's voting rights on the EOC required by Order U-18-102(44) because the parties were not aware that we were going to order that surrender. Both MEA and ML&P assured us that the language in Order U-18-102(44) was sufficient to prevent ML&P from having voting rights on the EOC after the effective date of surrender.

ML&P stated in the correspondence quoted above that: "As a result of Order [U-18-102(44)], [A]HP won't have a voting representative on the EOC until the surrender is terminated upon a positive finding by the RCA that MHP's proposed representative is qualified." In the paragraph immediately above, ML&P restated the requirement for restoration of their vote on the EOC as: "The surrender will have a term at least equal to the term of the two PPAs, subject to termination of the surrender upon MHP showing to the RCA's satisfaction "that MHP has acquired the expertise required to fully participate as a voting member of the EOC."" ML&P appears to assert that their modification from the minimum term of EOC voting rights surrender language of Order U-18-102(44) in their informal response to Staff's request should have put us on notice that they were nullifying the first part of the condition stated in Order U-18-102(44).[75]

We disagree with that assertion. If ML&P considered the language we used in Order U-18-102(44) to be unreasonable, erroneous, unlawful, or otherwise defective, their remedy was to timely file a petition for reconsideration under 3 AAC 48.105 or an appeal under AS 22.10.020(d) and Alaska Rule of Appellate Procedure 602(a)(2).[76] As Order U-18-102(44) was issued May 28, 2020, any petition for review was required to be filed by June 12, 2020 and any appeal was due to be filed by June 30, 2020. ML&P

[75]AHP Initial Brief at 16.

[76]Order U-18-102(44) at 143.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

waived its right to challenge the language used in Order U-18-102(44) by failing to take either of those routes. ML&P has no authority to unilaterally revise the requirements of Order U-18-102(44) based on correspondence with our Staff on October 27, 2020, months after waiving its right to seek such revisions.

Staff was specifically asking if the MEA PPA Section 4.2(B) language conflicted with the EOC voting rights surrender required by Order U-18-102(44). Staff was not asking about the minimum term of EOC voting rights surrender or about the methodology for restoration of those voting rights and AHP has provided no evidence that Staff paid any attention at all to ML&P's superfluous comments on those issues. AHP cites to no authority where such remarks can effectively rewrite the express terms of our orders.

In responding to Staff's request, ML&P stated: "Section 4.2(B) should remain as written as it will be relevant if and when [A]HP's voting rights surrender is terminated in the future upon the necessary finding of the RCA." As noted by AHP, we have authority under AS 42.05.271 to modify certificate conditions after providing notice and opportunity for hearing and for good cause shown.[77] Such modification is not necessarily tied to AHP's acquisition of adequate technical and managerial resources to fully participate on the EOC. For example, MEA PPA Section 11.2(A)(3) allows for early termination of the MEA PPA in the event of an uncured default.[78] Eklutna PPA Section 9.2(A)(3) allows for early termination of the Eklutna PPA in the event of an uncured default.[79] Without prejudging the matter, AHP might be able to show good cause for reinstatement of its EOC voting rights, at least in part, upon the early termination of one

[77]AHP Reply Brief at 43.

[78]Order U-18-102(44), Appendix H at 15.

[79]Order U-18-102(44), Appendix D at 16.

Regulatory Commission of Alaska

of these agreements but not the other. Therefore, leaving Eklutna PPA Section 4.2(B) and MEA PPA Section 4.2(B) intact leaves that portion of the parties' bargain intact in the event that we do someday modify the minimum term of EOC voting rights surrender stated in order U-18-102(44).

For all the reasons discussed above, AHP has failed to establish a contextual ambiguity based on the language of Eklutna PPA Section 4.2(B) and MEA PPA Section 4.2(B) or our strict interpretation of the minimum term of EOC voting rights surrender stated in Order U-18-102(44). Eklutna PPA Section 4.2(B) and MEA PPA Section 4.2(B) are both currently effective in part and may become fully effective in the manner AHP desires sometime in the future. The continued existence of these two provisions do not justify a revision of the minimum term of EOC voting rights surrender language stated in Order U-18-102(44).

Public Understanding

AHP also suggests that we should modify the minimum term of EOC voting rights surrender stated in Order U-18-102(44) based upon the "public" understanding of that term expressed in various places.[80] AHP cites to no authority for this proposition. We note that part of the "public" understanding AHP relies upon is implied from past statements of Chugach, MEA, and RAPA.[81] In response, RAPA stated:

> At the August 30, 2024, prehearing conference, the Commission—through ALJ Walker—noted two things. First, that neither AHP's request for acknowledgement nor the motion for expedited consideration discussed why the Commission should set aside the minimum time-period for the voting rights surrender. And second, "it appears that the Commission should be considering dismissal of the notice and request for acknowledgment as being prematurely filed…."
>
> When examining AHP's Notice and Request for Acknowledgment, the Office of the Attorney General, Regulatory Affairs & Public Advocacy Section

[80]AHP Initial Brief at 14-20.

[81]AHP Initial Brief at 19-20.

Regulatory Commission of Alaska

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

(RAPA) incorrectly focused on the second half of the above-quoted language from Order 39 and not the issues raised by the Commission.[82]

Chugach and MEA stated:

> Chugach and MEA admit that until ALJ Walker raised this issue in this proceeding, they had not examined this issue closely and were theoretically comfortable with an interpretation of the Surrender that if and when the MOA could demonstrate technical and managerial fitness, potentially with certain conditions imposed on the MOA to require MOA act consistently with prudent utility practice, to prevent the MOA from undermining the Project Owners' work in implementing the Final Fish and Wildlife Program, and to protect the Eklutna Project as a valuable resource in the Railbelt, the MOA would be entitled to regain its voting rights on the EOC and with respect to the Fish and Wildlife Agreement before the end of the PPA terms.
>
> Upon further review in this proceeding, however, Chugach and MEA no longer think that this matter is so simple for two primary reasons. First, with respect to this narrow issue, the Commission is asking the parties if they agree or disagree with the Commission's interpretation of the applicability of the term length language, and because Chugach and MEA do see ambiguity in the language, the Commission is in the best position to explain what it intended. There also exists ample reasonable legal basis, well supported by facts, for the Commission's interpretation that the Surrender must last for the duration of the PPA terms centered on the fact that MOA has ceded most of its rights and responsibilities to the Eklutna Project during the duration of those PPAs. Further, the facts that justified the Surrender requirement in the first place are materially unchanged. Second, even if the Commission intended, through its language, to create a path for MOA to regain its voting rights before the end of the PPA terms, such process should not render the length of term requirement language meaningless as MOA's Brief position would. Rather, there must be an acknowledgement of the Surrender term requirement and a demonstration that the concerns behind such requirement will be addressed for the duration of the PPA terms.[83]

In reply, AHP asserts that the responsive arguments of RAPA, Chugach, and MEA are in error.[84] AHP acknowledges that RAPA, Chugach, and MEA changed their position after reviewing the minimum term of EOC voting rights surrender language in Order U-18-102(44) when that language was pointed out to them at the prehearing conference held August 30, 2024.[85]

[84]AHP Reply Brief at 6-43.

[85]AHP Reply Brief at 3-6.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

From the explanations provided by RAPA, Chugach, and MEA, their earlier positions on the restoration of EOC voting rights to AHP was based on an incomplete reading of Order U-18-102(44). ML&P never asked us for clarification of the minimum term of EOC voting rights surrender language in Order U-18-102(44), and thus we do not know if ML&P's understanding of that language was based on a complete reading of the order either.

AHP cites to the language used by ML&P in its written surrender of EOC voting rights as evidence that ML&P understood that AHP's EOC voting rights could be restored whenever it made a showing that it had acquired the expertise to fully participate as a voting member of the EOC. AHP quoted from the surrender as follows:

> In accordance with the requirements of order U-18-102(44), the Municipality of Anchorage, dba Municipal Light & Power(ML&P), hereby surrenders its voting rights as an EOC member and under the Fish and Wildlife Agreement effective as of the Closing of the Asset Purchase Agreement between ML&P and Chugach Electric Association (Chugach). **This surrender of voting rights shall remain in effect until ML&P's successor complies with the RCA requirements pertaining to qualifications for ML&P's representation on the EOC.**
>
> **Until ML&P's successor complies with the qualification terms of RCA order U-18-102(44),** all EOC decisions will be by unanimous vote of Chugach and Matanuska Electric Association, Inc. (MEA). Eklutna hydro operations, dispatch and maintenance will continue to follow past practices and policies unless changes are approved through the EOC process.[86]

There is nothing in this surrender language indicating that ML&P is only surrendering its EOC voting rights until such time as its successor makes a showing that it has acquired the expertise required to fully participate as a voting member of the EOC. This surrender language states that ML&P is surrendering its voting rights in accordance with the requirements of Order U-18-102(44) and that the surrender remains in effect until ML&P's successor complies with our requirements pertaining to qualifications for ML&P's

[86]AHP Initial Brief at 17 (emphasis is by AHP in the Brief and is not in the original surrender of EOC voting rights).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

representation on the EOC. Those requirements include the minimum term of surrender and our approval of the transaction under which Chugach acquired ML&P's service obligations and most ML&P assets was conditioned on ML&P's surrender of its voting rights in conformance with that entire requirement.

We are not convinced that there is any reason to change the minimum term of EOC voting rights surrender expressly stated in Order U-18-102(44) based upon 'public' understanding when that understanding was based upon an incomplete reading of the order. We also do not find that ML&P or AHP has the right to modify the minimum term of EOC voting right surrender stated in Order U-18-102(44) based upon a post-hoc assertion that it misunderstood the terms of that order. We note that ML&P's surrender of its EOC voting rights was filed well after the time to request reconsideration of Order U-18-102(44) had passed and the time for appeal of that order had also passed. Thus ML&P no longer had any right to seek revision of the minimum term of EOC voting rights surrender except under a new proceeding seeking revision of that term. Inserting what may now be considered ambiguous language in a compliance filing is not adequate to make such a change.

Evidentiary Context

AHP further claims that we must interpret prior orders within the context of the evidence on which the prior order was based.[87] That is our standard practice. In Dockets U-18-102/U-19-020/U-19-021, we received written testimony from Municipal Attorney Rebecca Windt Pearson[88] that included the following:

---

[87]AHP Reply Brief at 19-21.

[88]*Prefiled Reply Testimony of Rebecca Windt Pearson*, filed August 2, 2019 (Windt Pearson Testimony), in Dockets U-18-102/U-19-020/U-19-021; as corrected by *Municipal Light and Power's Errata to the Prefiled Reply Testimony of Rebecca Windt Pearson*, filed August 9, 2029. This testimony was marked as Hearing Exhibit T-22 in Dockets U-19-020/U-19-021.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

Q12. Why did ML&P retain its ownership share of the Eklutna generation plant and sell the output to Chugach, rather than simply including its share of the Eklutna generation plant in the sale?

A12. Both Chugach and the MOA had interests that were served by having the MOA continue to own its share of the Eklutna generation plant and sell the output of the MOA's share to Chugach (and possibly also to MEA).

Initially, the parties discussed Chugach financing a portion of the asset acquisition price through unsecured payments over a period of time. That changed, however, when the MOA expressed concern regarding the lack of security associated with those payments. The MOA was concerned that, if it sold all of ML&P's assets to Chugach, but Chugach failed to make an unsecured future payment, the MOA would have no recourse other than litigation or pursuing a claim as a general unsecured creditor in a bankruptcy proceeding.

The parties resolved this concern by carving ML&P's ownership interest in the Eklutna generation plant out of the sale. As a result of the MOA retaining the ML&P share of the Eklutna generation plant, Chugach was able to pay for the Transactions without requiring the MOA to incur the risk of unsecured future payments. The Parties then entered into the Chugach PPA to allow Chugach to receive the output from ML&P's Eklutna interest at Chugach's avoided cost.

This arrangement served each party's interests. It benefits the MOA because, if Chugach ever fails to make future payments under the Chugach PPA, ML&P can, as a result of its retained ownership of its share of Eklutna, sell the power from that share to another entity—likely another Railbelt utility, and likely at a higher "avoided cost." The fact that Chugach's avoided costs are lower than other Railbelt utilities also informed the allocation of risks in the Chugach PPA. The MOA likely could sell power from its retained share of Eklutna to another entity at a higher avoided cost rate, but any such transaction would likely require the MOA to accept greater risks. The MOA agreed to sell power to Chugach, at Chugach's avoided cost, at least partly because of the transaction's more preferable risk profile. The Chugach PPA benefits Chugach because it allows it to make power purchase payments over time, thereby avoiding the added margin costs associated with additional upfront financing.[89]

Windt Pearson swore under oath that her written testimony was true and correct, and it was admitted as evidence into the record of Dockets U-19-020/U-19-021.[90] In its Application filed in Docket U-19-021, ML&P stated:

> ML&P will continue to be a department of the MOA, however it will have no employees and any function requiring labor will be performed by the MOA (e.g.

billing and financial statement preparation will be performed by the MOA Finance Department).[91]

…

As mentioned above, historically the operation and maintenance activities of Eklutna have been performed by Chugach, MEA, and ML&P. After the Transactions close, the division of responsibilities will be allocated between Chugach and MEA. Both Chugach and MEA have power production and transmission experience. They have the necessary expertise to perform all necessary functions to operate Eklutna. As has been the practice in the past, any operational or capital function that is beyond their expertise will be contracted to a firm specializing in the function.

The MOA will receive payments under the Chugach PPA and Chugach will pay all operating, maintenance, and capital costs associated with ML&P's Eklutna interest. If MEA enters into a PPA for its pro rata share of ML&P's Eklutna output, ML&P will be responsible for the operating, maintenance, and capital costs associated with that share of ML&P's Eklutna interest. The MEA PPA payments ML&P receives, however, will be sufficient to pay any operating, maintenance, and capital costs that ML&P will be responsible for. If MEA enters into a PPA for its pro rata share of ML&P's Eklutna output, ML&P will establish a $3 million reserve fund in the first year of operation to address any intra-year revenue shortfalls, to be called upon if revenues received are not sufficient in any year to cover the operating, maintenance, or capital costs of ML&P's Eklutna interest. In addition, if unforeseen adverse events require it, the MOA has sufficient borrowing capacity to make necessary operating, maintenance, or capital investments related to ML&P's Eklutna interest.

The MOA has a Finance Department with experienced professional accountants that have the necessary expertise to perform the required accounting functions for ML&P's limited post-Transactions Eklutna interest ownership and long term wholesale bulk power sales to Chugach or Chugach and MEA under the PPAs. The Finance Department will maintain ML&P's books and records, consistent with the Uniform System of Accounts. These books and records will include ML&P's revenues received under the PPAs and ML&P's share of monthly operational and capital costs. The Finance Department will track any assets purchased or constructed by the EOC, to include tracking operation and maintenance costs for the assets. Further, the Finance Department will maintain continuing property records to include original asset cost, annual depreciation, and net book value of all assets.[92]

At hearing in Dockets U-19-020/U-19-021, Windt Pearson orally testified as follows:

ALJ WALKER:· Is the Municipality, after closure of this transaction, retaining any employees of ML&P?

MS. WINDT PEARSON:· The plan is not to. And I know that we have discussed what we would need to do to have the necessary advice, expertise,

---

[91]ML&P Application at 12.

[92]ML&P Application at 12-14 (heading omitted).

Regulatory Commission of Alaska

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

> and personnel in order to continue to participate in the Eklutna Operating Committee. I think that we envision the stub utility being the department that reports up to the municipal manager. And that, more likely than not, we would utilize consultant services to provide that industry-specific expertise and staffing to help us make informed decisions as a continuing member of the Eklutna Operating Committee. Because we would not be retaining any employees of Municipal Light & Power.
>
> ALJ WALKER:· Have you investigated to see if any such expertise exists in the consulting community?
>
> MS. WINDT PEARSON:· We have not done so yet.[93]

Based on the record from Dockets U-18-102/U-19-020/U-19-021, ML&P was retaining the Eklutna Project Power Plant only for the purpose of preserving a cash flow in the event Chugach defaulted on its payments under the Eklutna PPA. ML&P planned only on collecting revenue under the Eklutna PPA and the MEA PPA, keeping track of the expenses it incurred under the MEA PPA for bookkeeping purposes, and maintaining the net book value of Eklutna Project assets. Maintaining accurate accounting of the net book value of assets will be necessary for calculation of the price Chugach and MEA will have to pay to purchase their proportionate shares of AHP ownership interest in the Eklutna Project under the Eklutna PPA and the MEA PPA.[94]

ML&P assured us that revenue earned under the MEA PPA would be adequate to cover all Eklutna Project capital, operating, and maintenance expense that it would be obligated to pay under that agreement. ML&P further assured us that it would maintain a $3,000,000 cash reserve for the Eklutna Project which, with the Municipality of Anchorage's existing credit capacity, would be adequate to meet any cash flow contingencies that may arise.

On this record, none of the purposes for which ML&P was retaining its ownership interests in the Eklutna Project Power Plant required or would benefit from

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

ML&P's participation as voting member of the EOC. ML&P effectively admitted that, as of the time of hearing in Dockets U-19-020 and U-19-021, it would not retain the staff expertise required to sit as a voting member of the EOC and had made no plans to acquire such expertise. ML&P also admitted that Chugach and MEA did have the expertise to sit as voting members of the EOC. These circumstances provide good cause under AS 42.05.271 for conditioning AHP's certificate with a requirement that ML&P's surrender its EOC voting rights for a term at least equal to the term of the Eklutna PPA and the term of the MEA PPA.

Finding Notice and Request Premature Under Order U-18-102(44)

In Order U-18-102(44) we stated that:

> Under these circumstances, we cannot unconditionally find that MHP is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions. **This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC.** This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.[95]

In its briefing, AHP has not shown good cause for modifying or interpreting this certificate condition in a manner that nullifies the minimum term of EOC voting rights surrender specified in Order U-18-102(44). Therefore, AHP's voting rights on the EOC are surrendered for at least the term of the Eklutna PPA and the MEA PPA.

The Eklutna PPA and the MEA PPA both became effective on October 30, 2020, the date on which Chugach acquired the service responsibilities and most assets

[95]Order U-18-102(44) at 67 (Emphasis added).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

of ML&P.[96] The Eklutna PPA and the MEA PPA are both scheduled to expire on October 31, 2055, roughly 31 years from now.[97] There are provisions in these two agreements allowing for both extending them and for terminating them early. At this time, no entity, including ourselves, can predict when the terms of the Eklutna PPA and the MEA PPA will expire.

We have reviewed the documents filed in this docket by AHP and found no commitment on the part of Corsentino or Schimscheimer to remain employed by AHP until such time as the terms of the Eklutna PPA and the MEA PPA expire. We do not know how we could verify the veracity of such commitments had they been made. We also have no way of evaluating what the requirements to fully participate as a voting member of the EOC might be at that time. For these reasons, we grant RAPA's motion to dismiss the Notice and Request on the grounds that it premature under the terms of Order U-18-102(44). This dismissal is without prejudice to refiling closer to the time that Eklutna PPA and the MEA PPA will expire.

Dismissal as Moot

In addition to moving for dismissal of the Notice and Request as being premature under the terms of Order U-18-102(44), RAPA moved for dismissal on the grounds that the Notice and Request were now moot. RAPA asserted that AHP only wanted to have its EOC voting rights reinstated so that it could have greater input on design of the Eklutna Project Fish and Wildlife Program identified in Section 104(a) of Public Law 104-58. RAPA further asserts that the Governor has now approved the Eklutna Project Fish and Wildlife Program. Based on this action, RAPA concludes that

[96] *See*, Order U-18-102(44), Appendix D at 3-4, 35; Appendix H at 7, and *Notice of Transaction Closing*, filed October 30. 2020, in Dockets U-18-102/U-19-020/U-19-021.

[97] Order U-18-102(44), Appendix D at 9, 41; Appendix H at 7, 40.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

the Notice and Request is now moot and should be dismissed.[98] AHP has disputed RAPA's assertions on this issue and claims that dismissal on this ground would be inappropriate.[99] RAPA has replied that its assertions are supported by the record.[100]

Given our decision above to dismiss the Notice and Request on the ground that it is premature under the requirements of Order U-18-102(44), we do not need to decide if the Notice and Request is also moot. We deny RAPA's motion to dismiss on the ground that the Notice and Request is moot on the ground that the mootness issue is now moot.

Vacate Procedural Schedule

We adopted a procedural schedule for resolution of this docket.[101] With our decision to dismiss the Notice and Request there is no need to proceed through hearing in this docket. Therefore, we vacate the remaining procedural schedule for this docket including the prehearing conference scheduled for November 18, 2024, and the hearing scheduled to begin on November 18, 2024.

Deny Motion to Compel Discovery Responses

Chugach and MEA filed a motion to compel discovery responses intended to produce information to be used in their examination of Corsentino.[102] AHP has opposed this motion primarily on the ground that the information requested is not relevant to the scope of this docket.[103] Chugach and MEA have responded to this opposition by asserting that the requested information is relevant to any determination of Corsentino's

---

[98]Motion to Dismiss at 1-7.

[99]AHP Response at 2-6.

[100]RAPA Reply at 2.

[101]Order U-24-024(4).

[102]Motion to Compel at 1-18.

[103]AHP Opposition at 7-22.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

understanding of prudent utility practice and that this determination is within the scope of this docket.[104]

With our decisions above to dismiss the Notice and Request and to vacate the procedural schedule for this docket, there will be no examination of Corsentino. Therefore, we deny the Motion to Compel on the ground that it is now moot.

Deny Request to Construe Notice and Request

AHP has asked us to construe its Notice and Request to be an application to amend its certificate conditions if we find that the minimum term of EOC voting rights surrender in Order U-18-102(44) is enforceable.[105] The timeline under which we are required to resolve this docket runs out January 14, 2025.[106] This would leave approximately 60 days to address modification of AHP's certificate. Under AS 42.05.175(a)(2) we are typically allowed 180 days to resolve a certificate amendment application. We find that there is too little time for us and the parties to address amendment of AHP's certificate in this docket. Therefore, we deny the request to construe the Notice and Request to be an application to modify AHP's certificate.

Guidance for Future Filings

AHP states that if we do not construe its Notice and Request as an application to amend its certificate, or otherwise grant it the relief it seeks in this proceeding, it "could simply file a new application to modify its certificate."[107] We have not construed AHP's Notice and Request to be an application to amend its certificate or otherwise granted AHP the relief it has requested in this proceeding. We provide AHP with guidance on future filings seeking relief from the minimum term of EOC voting rights

[104]Chugach/MEA Reply at 2-10.

[105]AHP Reply Brief at 43.

[106]Order U-24-024(1) at 5.

[107]AHP Reply Brief at 43.

Regulatory Commission of Alaska

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

surrender required by Order U-18-102(44). We provide this guidance without having completed our investigation of the qualifications of Corsentino and Schimscheimer, and this guidance is not a judgement on their qualifications to be AHP's representative on the EOC.

We start by pointing out that in Order U-18-102(44) we did not require ML&P to surrender its EOC voting rights merely because the then Municipal Manager was not qualified to sit as a voting member of the EOC. What we stated was:

> ML&P asserts that billing and record keeping under the Uniform System of Accounts will be done for MHP by the professional accountants working for the MOA's Financial Department. These accountants will also maintain MHP's continuing property records, calculating annual depreciation and net book value of plant in service. ML&P has provided no evidence in support of this assertion that accountants employed by the MOA's Financial Department are trained to maintain records in accordance with the Uniform System of Accounts or to maintain continuing property records. However, we are aware that many of our smaller regulated utilities retain outside accountants to maintain their records in accordance with our regulations and thus we are aware that those private resources are available.
>
> ML&P proposes that MHP will have a seat on the EOC, even though it will have no employees. ML&P states that MHP will be managed by the Municipal Manager, a position currently filled by William D. Falsey. Falsey has a law degree from Yale Law School and a Bachelor of Science degree in physics from Stanford University. Falsey has worked as the MOA's manager since 2017 and worked in legal positions from 2003 through 2017.
>
> Chugach witness Dustin Highers testified based on his experience as chair of the EOC that to be an owner representative on the EOC, it was essential that the representative have knowledge of prudent utility practice and the Railbelt electric generation and transmission system. Dustin Highers testified that there were two ML&P employees he was aware of qualified to sit on the EOC and that both of those employees were being transferred to Chugach as part of the transaction. There is nothing in Falsey's resume indicating that he has any knowledge of the Railbelt generation and transmission system, or prudent utility practice which is the management standard specified for the MHP EOC representative in both the Eklutna PPA and the MEA PPA. ML&P indicated "that, more likely than not, we would utilize consultant services to provide that industry-specific expertise and staffing to help us make informed decisions as a continuing member of the [EOC]." However, ML&P admitted that it has not investigated whether such expertise exists in the consulting community.
>
> Under these circumstances, we cannot unconditionally find that MHP is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that MHP is managerially and technically fit to

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

> maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions. This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.[108]

We required ML&P to surrender its EOC voting rights because it had no person qualified to sit in EOC meetings and understand the discussion, and because ML&P was proposing no definitive support team for their EOC representative.

Prior to the transaction under which Chugach acquired the ML&P service obligations and most of the ML&P assets, each member of the EOC was qualified to participate in meetings and knowledgeably discuss all issues related to management and operation of the Eklutna Project. Each of those representatives was also supported by an independent team consisting of the employees, contractors, and consultants required to operate their vertically integrated electric utility, each of which was interconnected with other vertically integrated electric utilities.

With Chugach's acquisition of ML&P's employees, in addition to ML&P's service obligations and most assets, ML&P, and its successor AHP have no identified support team of employees, contractors, or consultants with the breadth and scope of relevant knowledge that the Chugach and MEA representatives continue to bring to the EOC meetings. In the Notice and Request, AHP addressed this issue merely by stating:

> In addition to the auxiliary in-house expertise that Mr. Schimscheimer provides, AHP will also have access to, and the right to use (at AHP's expense), contracts of the [Municipality of Anchorage] in order to access any additional technical and engineering expertise necessary.

[108]Order U-18-102(44) at 65-67.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

In footnote 30 at the end of this statement, AHP states:

> Exhibit 3 at 2. Such firms include Electric Power Systems, Inc., EDC, Inc., CRW Engineering Group, Inc. and Taku Engineering.

Exhibit 3 to the Notice and Request is a *Memorandum of Understanding Between Anchorage Water and Wastewater Utility and Anchorage Hydropower Utility Re Resolution of Conflicts of Interest*, signed July 18, 2024. The relevant part of this Memorandum is paragraph 3 on page 2, which states:

> AH[P] will have access to and right to use, at AH[P]' expense, contracts of the [Municipality of Anchorage] to access technical and engineering expertise necessary to oversee and conduct operations.[109]

AHP included no resumes for the proposed support group, no contracts showing the term and extent of commitment by the contractors or consultants, and no information about what process AHP will have to go through to pay its contractors and consultants. We find this generic assertion of support for the proposed AHP voting representative on the EOC to be no more substantive than ML&P's assertion in Dockets U-18-102/U-19-020/U-19-021 that they would primarily rely on consultants for the expertise required to fully participate on the EOC even though they admitted that they had not yet investigated to determine if consultants with the required expertise were available.

In addition to addressing the minimum term of EOC voting rights surrender issue, we suggest that in future filings seeking reinstatement of EOC voting rights AHP provide the information to show that it can bring to EOC meetings a depth and breadth of technical and managerial expertise at least comparable to the level of expertise that MEA and Chugach bring to those meetings. This suggestion does not just include the technical

[109]Notice and Request, Exhibit 3 at 2.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

expertise of AHP's representative to the EOC, but also includes the team of employees, contractors, and consultants supporting that representative.

We denied AHP's motion for expedited consideration of its Notice and Request because AHP had failed to adequately support its request for reinstatement of its EOC voting rights. Upon initial review of AHP's filings in this docket we could see no way of moving forward without taking the time for prefiled testimony, discovery, and holding a hearing to gather the information necessary to determine if AHP had acquired the expertise required to fully participate as a voting member of the EOC.[110] We believe that efficient resolution of future filings on this issue by AHP will be more likely if AHP provides adequate information in its initial filing.

Final Order

This order constitutes the final decision in this proceeding. This decision may be appealed within thirty days of this order in accordance with AS 22.10.020(d) and Alaska Rule of Appellate Procedure 602(a)(2). In addition to the appellate rights afforded by AS 22.10.020(d), a party has the right to file a petition for reconsideration in accordance with 3 AAC 48.105. If such a petition is filed, the time period for filing an appeal is tolled and then recalculated in accordance with Alaska Rule of Appellate Procedure 602(a)(2).

Docket Closure

No substantive or procedural matters remain in this proceeding. Accordingly, we close this docket.

[110] At the prehearing conference and through the ALJ we denied AHP's motion for expedited consideration and stated that we would explain that decision in a written order to follow. Tr. 15. This is that explanation.

Regulatory Commission of Alaska

ORDER

THE COMMISSION FURTHER ORDERS:

1. The *Office of the Attorney General's Motion to Dismiss as Moot*, filed October 15, 2024, by the Office of the Attorney General, Regulatory Affairs and Public Advocacy Section is granted in part and denied in part as discussed in the body of this order.

2. The *Notice and Request for Acknowledgment of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee*, filed July 18, 2024, by the Municipality of Anchorage d/b/a Anchorage Hydropower, is dismissed as being premature under the requirements of Order U-18-102(44)/U-19-020(39)/U-19-021(39).

3. *Chugach Electric Association, Inc. and Matanuska Electric Association, Inc.'s Motion to Compel Discovery Responses*, filed October 28, 2024, is denied as being moot.

4. The request at page 43 in the *Municipality of Anchorage d/b/a Anchorage Hydropower's Reply Brief Regarding Interpretation of Order 39*, filed October 29, 2024, to have the *Notice and Request for Acknowledgment of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee*, filed July 18, 2024, construed as an application to modify Certificate of Public Convenience and Necessity No. 780 is denied as discussed in the body of this order.

(907) 276-6222; TTY 1-800-770-8973

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

THIRD JUDICIAL DISTRICT AT ANCHORAGE

ANCHORAGE MUNICIPAL ASSEMBLY, Appellant, v. REGULATORY COMMISSION OF ALASKA, et al., Appellees.	Case No. 3AN-24-06001CI

ORDER GRANTING MOTION TO DISMISS

I. INTRODUCTION

The Anchorage Municipal Assembly (Assembly) appealed the Regulatory Commission of Alaska's (RCA) denial of the Assembly's recent motion to intervene in proceedings related to the Eklutna Hydroelectric Project and its associated Fish and Wildlife Program. The RCA argues that the Assembly's appeal is untimely because it is attempting to modify a 2020 final order, while the Assembly argues it is only appealing the RCA's recent denial of its requests to intervene, reopen dockets, and modify the 2020 order. The Court finds that the Assembly's claim is untimely and dismisses the appeal.

II. BACKGROUND

In 1997, the federal government sold the Eklutna Hydroelectric Project to three utilities: Matanuska Electric Company, Inc. (MEA), Chugach Electric Company (Chugach), and the Municipality of Anchorage through Municipal Light and Power

(ML&P).[1] The utilities created the Eklutna Operating Committee (EOC) to manage the project and fulfill the sale agreement's requirement to submit a proposed Fish and Wildlife Program to the Governor by October 2, 2024.[2]

In 2019, the Municipality decided to sell ML&P's assets to Chugach. The proposed agreement allowed the Municipality to retain 53.33% ownership interest in the project but required the Municipality to surrender its voting rights on the EOC for a specified term. The Municipality is able to restore its voting rights upon a showing that it had acquired the requisite expertise to participate as a voting member of the EOC.[3]

On May 28, 2020, the RCA issued Order 39 conditionally approving the sale.[4] On October 30, 2020, the Municipality filed a notice of surrender of its voting rights on the EOC in conformance with the order and Chugach filed notice that the sale closed.[5] On December 23, 2020, the RCA closed its dockets on the matter.[6]

In 2023, the Assembly codified a requirement for its approval on any Fish and Wildlife Program submitted to the Governor for the project.[7] The Assembly required that any proposal "shall be submitted to the Assembly with a proposed resolution in support for action, prior to its submission to the Governor of Alaska."[8] The Assembly also codified its role in making policy decisions related to the Eklutna project. "Pursuant to section 26.30.025, the [A]ssembly shall be responsible for all policy decisions related to the municipality's performance under [the Program]."[9]

---

[1] Order U-10-102(52)/U-19-020(47)/U-19-020(47), Appellant's Notice of Appeal (Apr. 24, 2024) Attachment A at 1 (hereinafter *Attachment A*).
[2] *Id.*
[3] *Id.* at 2.

[7] Appellant's Opp'n to Mot. to Dismiss (Jan. 10, 2025) Ex. 2; AO 2023-131, codified at AMC 26.30.025.
[8] AMC 26.30.025.
[9] AMC 3.20.070.

In February 2024, the Assembly learned of a Binding Term Sheet between the Municipality and the remaining utilities that authorized the use of municipal infrastructure to implement the proposed Fish and Wildlife Program.[10] The Assembly had to seek a subpoena to access the Binding Term Sheet and related documents.[11] The Municipality produced the documents after the Program was already submitted to the Governor without Assembly's approval, contrary to AMC 26.30.025.[12]

On April 15, 2024, the Assembly petitioned to intervene in the RCA's dockets concerning the original sale of ML&P assets to Chugach, moving to reopen the dockets and modify Order 39.[13] On April 19, the RCA denied the Assembly's motion, construing the motion as a request for reconsideration of Order 39 and deeming it untimely.[14] The Assembly filed the current appeal on April 24, 2024.[15] The Governor approved the Fish and Wildlife Program on October 2, 2024.

III. DISCUSSION

To succeed on a motion to dismiss, the movant must establish "beyond doubt that the plaintiff can prove no set of facts that would entitle [the plaintiff] to relief."[16] "Even if the relief demanded is unavailable, the claim should not be dismissed as long as some relief might be available on the basis of the alleged facts."[17] For the following reasons, the Assembly cannot prove that it is entitled to any relief on the basis of the facts alleged.

1. The Assembly is not required to exhaust administrative remedies before appealing to the superior court.

Final administrative orders are subject to judicial review by the superior court if the appeal is filed in accordance with the court rules governing appeals in civil matters.[18] "The right to appeal is not affected by the failure to seek reconsideration before the agency."[19]

The RCA argues that the Assembly failed to exhaust its administrative remedies by not petitioning for reconsideration in the 2020 proceedings. However, the Assembly correctly points out that exhausting administrative remedies before filing this appeal is not required under Alaska law.

2. The Assembly's appeal is untimely.

Although the Assembly was not required to petition for reconsideration before this appeal, it was required to timely file its appeal. Alaska Rule of Appellate Procedure 602(a)(2) requires that an appeal to the superior court must be filed within thirty days from the date a decision is distributed.[20]

The timeliness of this appeal depends on the nature of this appeal; the parties disagree on whether this appeal relates to the 2020 Order 39 or the 2024 petition to intervene. The RCA argues that the Assembly's appeal is challenging the content of Order 39, not the RCA's April 2024 decision declining to reopen the docket and modify Order 39. The Assembly argues that its appeal relates to the RCA's April 2024 decision and is not a petition for reconsideration of Order 39 as interpreted by the RCA.

The Court finds that this appeal seeks to undo the RCA's 2020 order and is therefore time-barred. The Assembly's Statement of Points on Appeal and arguments to preserve its standing demonstrate that the Assembly is attempting to change the content of Order 39. On appeal, the Assembly asserted that the RCA lacked jurisdiction to issue Order 39, violated municipal law, should have modified Order 39, and should have

---

[18] AS 44.62.560.
[19] AS 44.62.560.
[20] Alaska R. App. P. 602(a)(2).

permitted the Assembly to intervene in order to challenge Order 39.[21] In arguing for its standing, the Assembly posits that "Order 39 directly affects the Assembly's policy-making authority" and that its effect "is to deprive Anchorage's selected representatives of any role in a multi-million-dollar, multi-decade restoration program."[22] The Assembly repeatedly emphasizes its interest in modifying the order.[23] Despite asserting that the Assembly is appealing the RCA's April 2024 order declining to reopen its dockets, it is clear that the Assembly's actual arguments regard Order 39.

The Assembly points out that the RCA has previously granted reconsideration of otherwise closed dockets in the past and points to numerous examples.[24] According to the Assembly, this entitles it to review of the RCA's refusal to allow the Assembly to intervene in the dockets related to Order 39. While the RCA may have the discretion to reopen past matters, that does not enlarge the amount of time that the Assembly has to file an appeal. Asking this Court to review the RCA's discretionary decision to not reopen a closed matter, and then use that appeal to bootstrap in otherwise time-barred arguments, would effectively eliminate all time limitations for appealing Order 39. The Court therefore declines to view this appeal in the way argued for by the Assembly.

3. The Assembly has standing as the legislative body for the Municipality.

The RCA argues that the Assembly lacks standing to challenge Order 39 because the order affected the Municipality's voting rights, not the Assembly's. As an initial matter, it is not clear that "the Municipality" and "the Assembly" are separate entities for the purposes of this appeal. However, neither party directly addressed that issue or whether it impacts the Assembly's standing.

---

[21] Appellant's Statement of Points on Appeal (Apr. 24, 2024).
[22] Opp'n at 13.
[23] *Id.*
[24] Opp'n at 9.

To determine standing, the Alaska Supreme Court uses a three-part test.[25] "To have standing, a challenger must (1) be directly interested in the proceeding, (2) be factually aggrieved by the decision, and (3) have participated in the proceeding."[26]

First, the Assembly had a direct interest in the proceedings. "[D]irect interest in an administrative proceeding may be established by showing a material interest that is discrete to some party or class of parties."[27] Here, the Assembly's interest in the proceedings was material and discrete because Order 39 and the unilateral submission of the Fish and Wildlife Program hindered the Assembly's ability to fulfill its specific role in making policy and appropriations for the Program under AMC 3.20.070. Even though the Municipality surrendered its vote on the EOC, the Assembly maintained an interest in the project as it will affect municipal resources.

Second, the Assembly was factually aggrieved. Alaska courts apply an interest-injury analysis; to establish interest-injury standing, a party must show "(1) a sufficient personal stake in the outcome of the controversy and (2) an interest which is adversely affected by the complained-of conduct."[28] Here, the Assembly had a sufficient stake in the outcome and was adversely affected because Order 39 eliminated municipal participation in developing a program that will require municipal resources. Additionally, the development and submission of the Fish and Wildlife Program without Assembly's approval, including the agreements to use municipal infrastructure, circumvented both the Assembly's role as the policy-making and appropriating body for the Municipality and the legal requirement for the Assembly's approval before submission to the Governor.

Finally, the Assembly sufficiently participated in the proceedings. The RCA draws a distinction between the Administration, acting through the municipal manager in 2020, and the Assembly in 2024. It is not clear that this distinction is legally significant. In 2020,

---

[25] *City of Valdez v. Regul. Comm'n of Alaska*, 548 P.3d 1067, 1076 (Alaska 2024), *reh'g denied* (May 31, 2024).
[26] *Id.*
[27] *Id.* at 1077.
[28] *Id.* at 1078 (internal quotations omitted).

the Administration had the authority to represent the Municipality in this matter. In 2024, the Assembly does.[29] Given this change, the Administration's participation in the 2020 proceedings resulting in Order 39 may be attributed to the Assembly and is sufficient to show municipal participation in the proceedings.

4. There is a live controversy as the project continues to be developed and the Fish and Wildlife Program executed.

The RCA argues that this appeal is now moot because the Governor already approved the October 2024 Fish and Wildlife Program. "A claim is moot if it has lost its character as a present, live controversy" and "the party bringing the action would not be entitled to any relief even if it prevails."[30]

The Court declines to find that this case is moot. No final action on the Eklutna project has rendered the controversy moot. Policy and appropriation decisions related to the Municipality, which the Assembly is responsible for, will continue to be required as the Eklutna project operates and the Fish and Wildlife Program is executed. The RCA interprets the Assembly's challenge too narrowly; the Assembly's ultimate issue is not just with the Fish and Wildlife Program, but its general lack of input on the Eklutna project and the Program. This will continue to be a present, live controversy as long as the project operates. Additionally, the Assembly could eventually be entitled to relief. Under Order 39, the Assembly may petition to reinstate its voting rights on the EOC. While the Assembly's most recent petition was denied, the RCA notes that it may petition again in the future or file an appeal.[31] The issue of the Assembly's participation in the Eklutna project clearly remains a live controversy.

---

[31] Order U-24-024(8) (Nov. 14, 2024) at 35.

IV. CONCLUSION

The Assembly's appeal ultimately regarded the content of Order 39, not just the RCA's recent decision to decline the Assembly's motions to intervene, reopen dockets, and modify the order. While the Assembly had standing to appeal Order 39 and its attempts to participate in the Eklutna project remain a live controversy, its appeal was several years overdue. The Court finds that the Assembly's appeal is untimely and dismisses the appeal.

MEMORANDUM IN SUPPORT OF MOTION FOR AWARD OF ATTORNEY'S FEES

Pursuant to Appellate Rule 508(e), Appellee Regulatory Commission of Alaska ("RCA") hereby moves for an award of attorney's fees as prevailing party in the above-captioned action. Appellee RCA requests an award of 20 percent of its attorney's fees.[1]

DEPARTMENT OF LAW
OFFICE OF THE ATTORNEY GENERAL
Anchorage Branch
1031 W. 4th Avenue, Suite 200
Anchorage, AK 99501
Phone: (907) 269-5100 Fax: (907) 276-3697

[1] *Cleaver v. State, CFEC*, 48 P.3d 464, 470 (Alaska 2002) (superior court may look to Civil Rule 82(b)(2) as a guideline for a reasonable award of attorney's fees); *see also Carr-Gottstein Properties v. State*, 899 P.2d 136, 148 (Alaska 1995) (when a party appeals an administrative decision, but receives no money judgment, the guidelines in Civil Rule 82(b)(2) may be applied by analogy to Appellate Rule 508(e) to determine a reasonable award of attorney's fees).

DEPARTMENT OF LAW
OFFICE OF THE ATTORNEY GENERAL
Anchorage Branch
1031 W. 4th Avenue, Suite 200
Anchorage, AK 99501
Phone: (907) 269-5100 Fax: (907) 276-3697

On February 5, 2025, this court issued an Opinion which granted the RCA's Motion to Dismiss. The RCA is therefore a prevailing party in this action and, as such, moves for an award of attorney's fees pursuant to Appellate Rule 508(e).

I. The Appellant is Entitled to an Award of 20 Percent of Necessarily Incurred Attorney Fees.

Alaska Appellate Rule 508(e) provides that prevailing parties in an appeal may be awarded attorney's fees in an amount to be determined by the court. Where the appeal was taken under Appellate Rule 601, the court shall award the prevailing party 20% of its actual attorney's fees that were necessarily incurred, except where the court determines that an award of fees would be so onerous to the non-prevailing party that it would deter similarly situated litigants from the voluntary use of the courts if not reduced.[2]

The superior court may look to Civil Rule 82(b)(2) as a guideline for a reasonable award of attorney's fees. *Cleaver v. State, CFEC*, 48 P.3d 464, 470 (Alaska 2002). When the prevailing party in an administrative appeal receives no money judgment, the guidelines in Civil Rule 82(b)(2) may be applied by analogy to Appellate Rule 508(e) to determine a reasonable award of attorney's fees. *Carr-Gottstein Properties v. State*, 899 P.2d 136, 148 (Alaska 1995). Civil Rule 82(b)(2) provides:

> In cases in which the prevailing party recovers no money judgment, the court shall award the prevailing party in a case . . . resolved without trial 20 percent of its actual attorney's fees which were necessarily incurred. The actual fees shall include fees for legal

> work customarily performed by an attorney but which was delegated to and performed by an investigator, paralegal or law clerk.

Although the Attorney General, as counsel for the state, bills client agencies at a rate far below the market rate of attorneys in private practice, it is well settled that when the state is the prevailing party, it may request reimbursement of attorney's fees at a reasonable market rate. The Attorney General is not limited to recovering fees based on the Department of Law's inter-agency billing rate. There is clear authority for awarding attorney's fees under Civil Rule 82 based on market rates instead of the department's overhead rate.[3]

The Attorney General has worked to identify a uniform reasonable market rate upon which to base attorney fee requests that will more fairly reimburse the State of Alaska and state represented officials for their fees as a prevailing party.[4] This was necessary because the department's historic rate formulae and the newer universal blended rate formula all produce figures far below the market rate and value of the services rendered, and because Civil Rule 82 provides for only 20 percent reimbursement of actual fees where there is no trial or money judgment and 30 percent where the case goes to trial. Based on the recommendations of a working group tasked with assessing the Department of Law's policy on attorney fee requests, the Attorney

[3] *Atlantic Richfield Co. v. State*, 723 P.2d 1249, 1251-52 (Alaska 1996) (Alaska Supreme Court ruled it appropriate to use average of hourly billing rates charged by private attorneys to calculate fee award for legal work performed by assistant attorneys general); *Amfac Hotels v. State, Dept. of Transportation*, 659 P.2d 1189, 1194 (Alaska 1983) (approved fee award based on "the average private billing rate" -- $75 per hour, 34 years ago); *Morrison-Knudsen Co., Inc. v. State*, 519 P.2d 834, 844 (Alaska 1974) (argument rejected that state could not recover attorney's fees at a rate higher than hourly salary of highest paid assistant attorney general who worked on case).

[4] *See* Affidavit of Counsel.

DEPARTMENT OF LAW
OFFICE OF THE ATTORNEY GENERAL
Anchorage Branch
1031 W. 4th Avenue, Suite 200
Anchorage, AK 99501
Phone: (907) 269-5100 Fax: (907) 276-3697

General established in 2018 a policy to request $250 per hour as the market rate for journey level attorneys (Attorneys III and IV) and $300 per hour as the market rate for senior level attorneys (Attorneys V and VI). This decision was based on the working group's review of attorney billing rates statewide, a similar policy in the U.S. Attorney's Office, and review of the average rate (typically reflecting a discount for the state) that the Department pays experienced private practitioners to provide legal services to the state under contract. Paraprofessionals have a billing rate of $125 per hour.

In the case at bar, the court found in favor of the appellee and ordered dismissal of the appeal. In responding to the appeal, these appellee's attorney's fees, calculated using the market rate of $250 per hour for counsel Erin Egan and $300 per hour for counsel David Wilkinson, amount to $31,140[5] A copy of the billing print-out detailing the work done and time spent relative to this case is attached as Exhibit A. RCA's counsel of record in this case, Erin Egan, is classified as an Attorney IV, and has been practicing law over 23 years. Co-counsel for the RCA on this appeal, David Wilkinson, is classified as an Attorney V and has practiced law for more than 12 years. The attorney hours expended in responding to this appeal total 120.8 hours.

Under Appellate Rule 508(e), attorney's fees may be awarded in an amount to be determined by the court. Civil Rule 82(b)(2) has been held by the Alaska Supreme Court to be a guideline of an award of reasonable attorney's fees when the prevailing party receives no monetary judgment. Under Civil Rule 82(b)(2), prevailing parties

[5] *See* Affidavit of Counsel.

who do not receive a money judgment are entitled to 20 percent of their reasonable attorney's fees, including fees for legal work delegated to a paralegal. The RCA prevailed in this case without receiving a monetary judgment. Further, under Appellate Rule 508(e)(4), where the appeal was taken under Appellate Rule 601, the court shall award the prevailing party 20% of its actual attorney's fees that were necessarily incurred, except where the court determines that an award of fees would be so onerous to the non-prevailing party that it would deter similarly situated litigants from the voluntary use of the courts if not reduced. In this case the award of fees would not be so onerous to the appellant's that it would deter similarly situated litigants from the voluntary use of the courts if not reduced.

Therefore, the appellee is entitled to recover 20 percent of its fees. As indicated in Exhibit A, their legal (attorney and paralegal) fees incurred in this action, at appropriate hourly rates, total $31,140. They are entitled to an award of 20 percent of that amount, or $6,228 in attorney's fees.

II. Conclusion

For the reasons set out above, RCA respectfully requests that this court award it attorney's fees in the amount of $6,228.

ANCHORAGE MUNICIPAL ASSEMBLY, Appellant, v. REGULATORY COMMISSION OF ALASKA; MUNICIPALITY OF ANCHORAGE, d/b/a MUNICIPAL LIGHT AND POWER; ENSTAR NATURAL GAS CO.: PROVIDENCE HEALTHY & SERVICES; GOLDEN VALLEY ELECTRIC ASSOCIATION, INC.: STATE OF ALASKA; ALASKA ENERGY AUTHORITY; HOMER ELECTRIC ASSOCIATION, INC.; ALASKA ELECTRIC AND ENERGY COOP., INC.; MATANUSKA ELECTRIC ASSOCIATION, INC.; CHUGACH ELECTRIC ASSOCIATION, INC.; JL PROPERTIES; ALASKA NATIVE HEALTH CONSORTIUM, Appellees.	)	Case No.: 3AN-24-06001 CI

AFFIDAVIT OF COUNSEL

STATE OF ALASKA)
) ss.
THIRD JUDICIAL DISTRICT)

Erin K. Egan, being first duly sworn upon oath, deposes and states as follows:

1. I am the Assistant Attorney General assigned to represent the Regulatory Commission of Alaska ("RCA") in the above-captioned matter.

2. I have personal knowledge of the matters stated in this affidavit.

3. Appellant Anchorage Municipal Assembly filed this appeal seeking to overturn a decision by the Regulatory Commission of Alaska ("RCA"). This court

DEPARTMENT OF LAW
OFFICE OF THE ATTORNEY GENERAL
Anchorage Branch
1031 W. 4th Avenue, Suite 200
Anchorage, AK 99501
Phone: (907) 269-5100 Fax: (907) 276-3697

ruled in the RCA's favor on February 5, 2025. Accordingly, RCA now moves for an award of attorney's fees as the prevailing party.

4. In defending the above-captioned matter, my co-counsel, David Wilkinson and I billed a total of 120.8 hours for things such as document review, legal research, motion practice, and writing a brief in this case. The time spent was necessary.

5. While the purpose of the Department of Law's overhead billing rate has been to track and recover the administrative costs of legal services provided to the State's client agencies, there is authority for awarding attorney's fees based on market rates instead. *Atlantic Richfield Co. v. State*, 723 P.2d 1249, 1251-1252 (Alaska 1996) (finding it appropriate to use average of billing rates charged by private attorneys to calculate fee award for legal work performed by Assistant Attorneys General); *Amfac Hotels v. State, Dept. of Transportation*, 659 P.2d 1189, 1194 (Alaska 1983) (approving fee award based on average private billing rate at the time); *Morrison-Knudsen Co. v. State*, 519 P.2d 834, 844 (Alaska 1974) (rejecting argument that State could not recover attorney's fees at a higher rate than hourly salary of highest paid attorney who worked on the case).

6. Because the State's uniform overhead rates no longer bear a rational relationship to the market rate, the Attorney General has approved a policy that attorney's fees requests should be based on prevailing market rates in order to more fairly compensate the State as the prevailing party in litigation. A working group of the Department of Law canvassed a variety of sources, including a survey of rates

DEPARTMENT OF LAW
OFFICE OF THE ATTORNEY GENERAL
Anchorage Branch
1031 W. 4th Avenue, Suite 200
Anchorage, AK 99501
Phone: (907) 269-5100 Fax: (907) 276-3697

charged by private firms, the U.S. Attorney's Office, the Alaska Legal Services Corporation, and experienced private practitioners who contract to provide legal services to the State. Based on this information, the Attorney General has approved a policy to request $250 per hour as the market rate for journey-level attorneys (attorneys employed by the Department of Law at the level of Attorney III and IV) and $300 per hour for senior-level attorneys (Attorney V and VI).

7. The attorneys who worked on this matter included Erin Egan, who is classified as an Attorney IV, and David Wilkinson, who was classified as an Attorney V. Accordingly, Ms. Egan's fees have been calculated at the market rate of $250 per hour and Mr. Wilkinson's fees have been calculated at $300 per hour.

8. Under Appellate Rule 508(e), attorney's fees may be awarded in an amount to be determined by the court. Civil Rule 82(b)(2) has been held by the Alaska Supreme Court to be a guideline of an award of reasonable attorney's fees when the prevailing party receives no monetary judgment. Under Civil Rule 82(b)(2), prevailing parties who do not receive a money judgment are entitled to 20 percent of their reasonable attorney's fees, including fees for legal work delegated to a paralegal. RCA prevailed in this case without receiving a monetary judgment. Further, under Appellate Rule 508(e)(4), where the appeal was taken under Appellate Rule 601, the court shall award the prevailing party 20% of its actual attorney's fees that were necessarily incurred, except where the court determines that an award of fees would be so onerous to the non-prevailing party that it would deter similarly situated litigants from the voluntary use of the courts if not reduced. In this case the award of fees would not be

Phone: (907) 269-5100 Fax: (907) 276-3697

so onerous to the appellant that it would deter similarly situated litigants from the voluntary use of the courts if not reduced.

9. Therefore, the appellee is entitled to recover 20 percent of its fees. As indicated in Exhibit A, their legal (attorney and paralegal) fees incurred in this action, at appropriate hourly rates, total $31,140. They are entitled to an award of 20 percent of that amount, or $6,228, in attorney's fees.

10. I have determined both that the information presented in Exhibit A is correct and that the time listed was actually incurred in defense of this matter. I do not believe that any of the work performed in this case was unnecessary or duplicative, and I believe that the total amount of time and money expended on behalf of these defendants is reasonable.

FURTHER YOUR AFFIANT SAYETH NAUGHT.

REGULATORY COMMISSION OF ALASKA; OFFICE OF THE ATTORNEY GENERAL REGULATORY AFFAIRS & PUBLIC ADVOCACY SECTION; CHUGACH ELECTRIC ASSOCIATION, INC.; and MATANUSKA ELECTRIC ASSOCIATION, INC., Appellees.	FILED in the TRIAL COURTS State of Alaska Third District JUL 01 2025 Clerk of the Trial Courts By_____Deput **Case No. 3AN-24-10554CI** RCA Docket No. U-24-024 #2

APPELLANT'S UNOPPOSED MOTION TO EXTEND STAY OF PROCEEDINGS

Appellant Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP"), by and through its undersigned counsel, hereby requests that the Court extend the current stay of the proceedings in this appeal until October 1, 2025.

On January 8, 2025, this Court issued its Notice Setting Appeal Procedure in the above-captioned case requiring that AHP's Appellant's brief and excerpt of record be filed by February 7, 2025. On March 6, 2025, AHP filed an unopposed motion to vacate the briefing schedule and stay the proceedings because AHP and Appellees Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc. ("MEA") had been engaged in negotiations of an agreement that could result in the dismissal of

D

AHP's appeal. On March 20, 2025, the Court issued an order vacating the briefing schedule and staying the proceedings until July 1, 2025.

AHP, Chugach, and MEA's negotiations are ongoing, and if successful, will result in dismissal of this appeal.[1] In order to avoid unnecessary briefing and expenditure of time and resources by the parties, and pursuant to Appellate Rule 503(a), AHP requests that the Court issue an order extending the current stay of the proceedings in this appeal to October 1, 2025 (92 days), after which a revised briefing schedule will be issued with Appellant's opening brief due 30 days from the issuance of the revised briefing schedule. If the parties reach an agreement that results in dismissal of this appeal, the appropriate parties will promptly file an agreement or motion to dismiss this appeal under Appellate Rule 511. Counsel for AHP has conferred with counsel for the other parties, and no party opposes this motion.[2]

RESPECTFULLY SUBMITTED this 1st day of July, 2025, at Anchorage, Alaska.

[PROPOSED] ORDER EXTENDING STAY OF PROCEEDINGS

The July 1, 2025, unopposed motion by Municipality of Anchorage d/b/a Anchorage Hydropower ("AHP") to extend the current stay of proceedings is **GRANTED**. The appeal is stayed until October 1, 2025, after which this Court will issue a revised briefing schedule with AHP's opening brief due 30 days from the issuance of the revised briefing schedule. The appropriate parties shall promptly file an agreement or motion to dismiss this appeal under Appellate Rule 511 if those parties reach an agreement that results in dismissal of this appeal.

IT IS SO ORDERED.

DATED at Anchorage, Alaska this 8 day of July, 2025.

In the Matter of the MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S Request to Lift Condition Requiring the Surrender of its Voting Rights from CPCN 780	U-25-025

MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S REQUEST TO LIFT CONDITION REQUIRING THE SURRENDER OF VOTING RIGHTS FROM CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY NO. 780; AND ALTERNATIVE APPLICATION TO AMEND CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY NO. 780

The Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP") hereby requests that the Regulatory Commission of Alaska ("Commission") lift the condition on AHP's Certificate of Public Convenience and Necessity ("CPCN") No. 780 requiring the MOA to surrender its voting rights on the Eklutna Operating Committee ("EOC") for a "minimum term" of the terms of the power purchase agreements between AHP and Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc. ("MEA").[1] As explained below, good

[1] Order No. U-24-024(8), *Order Granting Motion to Dismiss in Part and Dismissing Notice and Request, Denying Motion to Dismiss in Part, Vacating Procedural Schedule, Denying Motion to Compel, Denying Request to Construe Notice and Request as Petition to Amend Certificate Condition, Providing Guidance for Future Filings, and Closing Docket*, dated November 14, 2024. AHP appealed this order to Alaska Superior Court on December 13, 2025 (*see AHP v. Regulatory Commission of Alaska*, 3AN-24-10554CI), and this filing is not intended to waive any arguments made by AHP arguments in that appeal, but makes this request in the alternative. *See also*, Order No. U-18-102(44)/U-19-020(39)/U-19-021(39), *Order Accepting Stipulation in Part, Subject to Conditions; Transferring and Issuing Certificates of Public Convenience and Necessity*, *Subject*

cause exists for the Commission to lift the condition after notice and opportunity for hearing. Further, the condition is no longer needed to protect or promote the public interest.

I. REQUEST TO VACATE CONDITION REQUIRING SURRENDER OF VOTING RIGHTS ON THE EOC

A. Background

At issue is AHP's voting rights as a member of the Eklutna Operating Committee ("EOC"), which was created by the MOA d/b/a Municipal Light & Power ("ML&P"), Chugach, and MEA to make all management decisions related to the operation, maintenance, and budget for the Eklutna Hydroelectric Project ("Eklutna Project").[2] The Commission described the Eklutna Project as follows:

> The Eklutna Project was built and operated by the federal government pursuant to the Eklutna Power Act of 1950. In 1995, Congress authorized sale of the Eklutna Project to [the Municipality of Anchorage d/b/a Municipal Light & Power Department (ML&P)], Chugach, and MEA under the terms of the 1989 Eklutna Purchase Agreement. Under this agreement, the three utilities received an undivided interest in all of the Eklutna Project, water rights, generation plant and the transmission assets interconnecting the Eklutna Project with ML&P, Chugach, and MEA. ML&P obtained a 53.33% ownership interest, Chugach obtained a 30% ownership interest, and MEA obtained a 16.67% interest in the Eklutna Project.
>
> . . .

to Conditions; Addressing Beluga River Unit Management, Gas Transfer Prices, and Third Party Sales Gas Pricing; and Requiring Filings, dated May 28, 2020 ("Order No. 39").

[2] *See* Order No. U-24-024(8) at 2.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS

> ML&P, Chugach, and MEA each have a representative on the EOC. Decisions by the EOC are made based upon a double majority consisting of affirmative votes by at least two of the three utilities whose ownership shares total at least 51% of the Eklutna Project ownership. Effectively, management of the Eklutna Project is limited to actions approved by ML&P and at least one of Chugach or MEA.[3]

In 2019, Chugach filed a petition with the Commission seeking approval to acquire all service obligations and most assets of ML&P (the "Acquisition").[4] As part of the same transaction, ML&P filed an application to amend its CPCN, deleting the current service territory and adding the Eklutna Project Power Plant site.[5] The Commission approved the Acquisition in Order No. 39, subject to conditions. The MOA retained its 53.33% ownership interest in the Eklutna Project, from which it sells wholesale electric power to Chugach and MEA, pursuant to power purchase agreements approved by the Commission.[6] Under the Eklutna PPA, Chugach receives 64.29% of the MOA's share of energy output from the Eklutna Project, and has "the obligation to pay a proportionate share of [the MOA's] Eklutna Project costs, including capital and Fish and Wildlife Agreement costs, for the 35-year term of the Eklutna PPA."[7] Thus, Chugach is

currently responsible for 64.29% of the operations, maintenance, capital, and environmental compliance costs associated with the Eklutna Project, MEA is responsible for 16.67%, and the MOA continues to bear responsibility for 19.05%.[8]

The Commission also granted the MOA d/b/a AHP[9] a new CPCN to "provide wholesale public electric utility service through its ownership share of the Eklutna Project" subject to (1) the closing of the Transaction; (2) AHP's maintenance of a $3,000,000 reserve fund to support Eklutna Project capital expenditures; and (3) the MOA's surrender of its voting rights on the EOC.[10] The Commission was concerned that after the Transaction, the MOA would no longer be "managerially and technically fit to maintain majority ownership of the Eklutna Project" without the surrender of its voting rights on the EOC.[11] With the surrender, the Eklutna Project would be "jointly manage[d] and operate[d]" by Chugach and MEA.[12] The Commission stated that the surrender "must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to [the Commission's] satisfaction that MHP has acquired the expertise required to fully participate

[8] Chugach is responsible for the costs equal to its 30% ownership interest plus 64.29% of the MOA's 53.33% interest. *See* Order No. 39 at 73. The MOA is responsible for 19.05% of the costs. *See id.* at 76. MEA is responsible for costs equal to its 16.67% ownership interest.

[9] In Order No. 39, the Commission referred to the post-transaction electric utility owned by the MOA as Municipal Hydro Power ("MHP") and not AHP.

[10] Order No. 39 at 67.

as a voting member of the EOC."[13] On October 30, 2020, the MOA filed notice with the Commission of its October 27, 2020, Surrender of Eklutna Operating Committee Voting Rights.[14]

On July 18, 2024, AHP filed a Notice and Request for Acknowledgment of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee ("Request for Acknowledgment"). AHP submitted documentation showing that Mark Corsentino, P.E., had been approved as the Utility Director of AHP.[15] AHP provided documentation of Mr. Corsentino's experience as the General Manager of Anchorage Water and Wastewater Utility ("AWWU") and also documentation of the additional technical and managerial resources and support available to Mr. Corsentino, including the assistance of Mark Schimscheimer Engineering Director of AWWU, as well as access to various MOA contractors.[16]

At the prehearing conference held on August 30, 2024, the Administrative Law Judge requested briefing "on the minimum term of the EOC voting rights surrender required by [Order No. 39]."[17] AHP, Chugach and MEA, and RAPA filed briefs.[18] The Commission found that AHP's Request for Acknowledgement was premature and "AHP's voting rights on the EOC

are surrendered for at least the term of the Eklutna PPA and the MEA PPA."[19] The Commission "provided AHP with guidance on future filings seeking relief from the minimum term of EOC voting rights surrender."[20] The Commission stated:

> In addition to addressing the minimum term of voting rights surrender issue, we suggest that in future filings seeking reinstatement of EOC voting right AHP provide the information to show that it can bring to EOC meetings a depth and breadth of technical and managerial expertise at least comparable to the level of expertise that MEA and Chugach bring to those meetings. This suggestion does not just include the technical expertise of AHP's representative to the EOC, but also includes the team of employees, contractors, and consultants supporting that representative.
>
> We denied AHP's motion for expedited consideration of its Notice and Request because AHP had failed to adequately support its request or reinstatement of its EOC voting rights. Upon initial review of AHP's filings in this docket we could see no way of moving forward without taking the time for prefiled testimony, discovery, holding a hearing to gather the information necessary to determine if AHP had acquired the expertise required to fully participate as a voting member of the EOC. We believe that efficient resolution of future filings on this issue by AHP will be more likely if AHP provides adequate information in its initial filing.[21]

On December 13, 2024, AHP appealed Order U-24-024(8) to the Alaska Superior Court. On March 6 and July 1, 2025, AHP filed unopposed motions to vacate the briefing schedule and stay proceedings in the appeal because AHP is engaged in negotiations with Chugach and MEA regarding voting rights on the EOC which might result in a resolution of the appeal. The

Superior Court has extended the stay through October 1, 2025.[22] To the extent that these negotiations might also impact this Request to Lift Surrender Condition, AHP will provide the Commission with any updates regarding negotiation status, as appropriate. In filing this Request to Lift Surrender Condition, AHP does not waive its arguments and points on appeal, but AHP acknowledges that a grant of AHP's Request to Lift Surrender Condition would render its pending appeal moot, and AHP would move to dismiss/withdraw its appeal accordingly at that time.

B. Discussion

Under AS 42.05.241, when the Commission grants a CPCN, it may attach "the terms and conditions it considers necessary to protect and promote the public interest." Under AS 42.05.271(1) the Commission may modify a CPCN "after notice and opportunity for hearing and for good cause shown." The Commission has previously vacated a condition attached to a CPCN when the reason for the condition is no longer a concern. In Docket U-11-067, the Commission granted Oasis Water, LLC's ("Oasis") application for a CPCN, subject to eight conditions.[23] One condition was that Oasis management personnel were required to "satisfactorily complete a course on management of small utilities."[24] "The objective of [the] condition was to ensure that Oasis was properly managed."[25] Instead of Oasis' existing management personnel completing the required course, Oasis hired Northern Utility Services LLC to provide utility

management services.[26] Since NUS had "extensive experience managing small water utilities," the Commission determined that the "that the objective behind [the] condition ha[d] been met and vacate[d] the condition."[27]

1. The Commission should lift the condition requiring the MOA surrender its voting rights on the EOC because the objective of the condition has been met.

Here, the Commission's objective behind its condition requiring the MOA surrender its EOC voting rights was to ensure "each member of the EOC [is] qualified to participate in meetings and knowledgeably discuss all issues related to management and operation of the Eklutna Project" while being "supported by an independent team consisting of the employees, contractors, and consultants required to operate their vertically integrated electric utility, each of which was interconnected with other vertically integrated electric utilities."[28] As discussed in more detail below, Mr. Mark Spafford, P.E., has assumed the role as Director of AHP after Mr. Mark Corsentino stepped down on June 13, 2025. Mr. Spafford is more than qualified to participate in meetings and knowledgeably discuss all issues related to management and operation of the Eklutna Project. To assist Mark Spafford in managing the current workload associated with AHP in concert with his other duties, Mark Schimscheimer will be moving from his engineering role at AWWU to a new engineering role within Anchorage Hydropower. Creation of this new

role is currently in progress within the HR Department. Further, the MOA has entered into contracts that can be used by AHP with engineering and accounting contractors and consultants "with the breadth and scope of relevant knowledge that the Chugach and MEA representatives continue to bring to the EOC meetings."[29]

Mark Spafford, P.E. – Director of AHP

Mr. Spafford is a licensed professional engineer with more than two decades of experience working on utility infrastructure, including more than a decade of work directly for regulated utilities. Mr. Spafford served for five years as General Manager of Solid Waste Services ("SWS"), and has significant experience with management of capital projects, staff, and utility infrastructure. He has been responsible for the evaluation and deployment of large municipal infrastructure challenges such as the development of a 30-MW mass-burn waste to energy facility, stormwater utility, and climate action plan. Mr. Spafford has provided engineering support on a regular basis to an electrical utility in Alaska for grid development and decarbonization services. Mr. Spafford's resume is attached as **Exhibit 1**.

Mr. Spafford assumed the role of Deputy Municipal Manager in November of 2024, with accountability for managing the Municipality's enterprises and utilities (AWWU, SWS, Transit, the Port of Alaska, and AHP) and the Safety Department. He was confirmed as the Director of AHP on June 12, 2025.[30] Mr. Spafford is assuming the duties of the Director of AHP

in addition to his duties as Deputy Municipal Manager. This is not without precedent at the Municipality: three other directors at the Municipality current hold dual roles.

Mark Schimscheimer – Engineer at AHP

Mr. Schimscheimer has extensive experience with infrastructure development projects, including over a decade of experience as a project development manager with the Alaska Industrial Development and Export Authority ("AIDEA") and the Alaska Energy Authority ("AEA"). Mr. Schimscheimer's experience with AIDEA and AEA included projects involving rural power systems, the Healy Clean Coal Project, the Alaska Intertie, Railbelt generation and transmission studies, and Southcentral Alaska energy analysis. Mr. Schimscheimer has experience in negotiation of agreements regarding power sales, fuel source, plant purchase and sale, and operations and maintenance. Additionally, Mr. Schimscheimer's work has included negotiation of federal compliance orders, state and federal power plant permitting, federal grants management, and overall financial due diligence for such work including: village to village electric interties, modular power plant size and placement, and general utility business agreements. Mr. Schimsheimer's resume is attached as **Exhibit 3**.

Coffman Engineers, Inc.

The MOA entered a three-year contract for as-needed civil engineering professional services with Coffman Engineers, Inc. ("Coffman") on October 2, 2024.[31] The contract is attached

[31] The MOA will maintain comparable technical support through employment or contractors going forward.

as **Exhibit 4**. Coffman's Anchorage office has a team of over 100 professionals who offer civil, structural, mechanical, and electrical engineering, as well as project management services. Coffman has expertise and experience with electric generation and transmission, including authoring a report on technologies that could support the decarbonization of the Alaska Railbelt; providing detailed engineering for the electrical infrastructure, power distribution, and communication system upgrades to synchronize, interconnect, and share power between two independent power generation facilities on the North Slope with a 12 mile long, 35kV tie-line; and providing planning and multidiscipline engineering support for the Galena Power Plant upgrade project that focused on replacing the medium voltage generation and distribution switchgear and generation control system while also allowing the flexibility to integrate solar PV and battery energy storage to this isolated microgrid. Biographies for Nicholai Smith, P.E.; Martin Miller, P.E.; and Lee Bolling, P.E. are included in **Exhibit 5**.

Electric Power Systems, Inc.

The MOA entered a three-year contract for as-needed professional services with Electric Power Systems, Inc. ("EPS") on June 28, 2022., which was extended on May 6, 2024, and June 27, 2025. The contracts are attached as **Exhibits 6, 7, and 8**. EPS has been serving Alaska's electric utilities for over 40 years. EPS has substantial experience working with Alaska Railbelt electric generation and transmission design, transmission line routing, and hydroelectric projects. EPS's experience includes projects such as Doyon Utilities' Fort Wainright Central Heating and Power Plant Upgrades; Chugach's University to Quartz Creek 115 (138) kV Transmission Line,

Placer River Relation; and Chugach's Quartz Creek 115 kV Transmission Line Rebuild, Girdwood Substation to Indian Substation. EPS and its sister company, Electric Power Constructors, Inc. ("EPC") designed and constructed the Swan Lake Exciter and Unit Breaker Replacement in Ketchikan and the Tyee Lake Switchgear Upgrade in Wrangell. EPS has also prepared the following studies for the Alaska Energy Authority: a systems analysis of the Railbelt Transmission system for the years 2015 and 2023; a study on transmission routing, feasibility, costs, and required improvements to the Railbelt electrical system for the proposed Susitna Hydroelectric project; and a feasibility level study and assessment of several options for replacing or upgrading the existing line from Teeland Substation to Douglas Substation. Resumes for David Burlingame, P.E.; Dr. James W. Cote, Jr., P.E.; Rich Meier, P.E.; Greg Huffman, P.E., S.E.; Peter Blake, P.E.; Chris Davis, P.E.; Matt Williams, P.E.; and Carrie Miller, E.I.T. are included in **Exhibit 9**.

Engineering Design & Consulting, Inc.

The MOA entered a three-year contract for as-needed mechanical and electrical engineering professional services with Engineering Design & Consulting, Inc. ("EDC") on October 3, 2024. The contract is attached as **Exhibit 10**. EDC has over 30 years of experience providing mechanical and electrical designs in support of water and wastewater projects throughout Alaska. EDC's experience includes designing the new prime power, natural gas microturbine system for the City of Palmer's Spruce Well House, conducting the Ship Creek Energy Recovery Station Hydro Turbine Feasibility Study for AWWU, and preparing the Eklutna Water Treatment Facility, Facility and Asset Management Plan for AWWU. Biographies for John

Pepe, P.E.; Roy Pace, P.E.; John Faschan, P.E.; Cory Wardrope, P.E.; and Zach Boldrick, P.E. are included in **Exhibit 11**.

Stantec Consulting Services, Inc.

The MOA entered a three-year contract for as-needed civil engineering professional services with Stantec Consulting Services, Inc. ("Stantec") on October 3, 2024. The contract is attached as **Exhibit 12**. Stantec is a global consulting firm with industry-leading expertise in hydropower and transmission engineering and design. Stantec's experience with electric generation and transmission projects in Alaska include leading a feasibility study for electrical transmission line connections between Soldotna, Beluga, and Anchorage; leading the wetlands, aquatic, land ownership, permitting, and NEPA tasks for the proposed wind farm at Fairbanks' Shovel Creek; multiple Bradley Lake projects, including the fisheries and instream flow for the original facility and permitting for the Battle Creek expansion; providing the full range of engineering, permitting, and economic studies associated with FERC relicensing of the Cooper Lake Hydroelectric Project; and performing a feasibility analysis of the hydropower resource potential of the glacial Tiekel River watershed and preparing a reconnaissance report documenting alternative scenarios for hydropower development. Stantec is currently leading an in-depth feasibility evaluation of a pumped-storage development at the Eklutna Project, as requested by the Governor. Resumes for Dean Syta, P.E.; Ryan Cooper, M.S., P.W.S.; Mike Manwaring, P.G.; Dylan Wade, P.E.; Brian Sadden P.E.; Heidi Wahto, M.P.A.; Kirby Gilbert; John Marshall, Ph.D.; Zach Baer, P.W.S.; and Victor Ross are included in **Exhibit 13**.

Taku Engineering, LLC

The MOA entered a three-year contract for as-needed mechanical and electrical engineering professional services with Taku Engineering, LLC ("Taku") on October 7, 2024. The contract is attached as **Exhibit 14**. Taku is an Alaskan-owned multidisciplined engineering firm based out of Anchorage, Alaska and has been serving clients for 24 years. Taku provides a full suite of engineering and inspection services, including project management, electrical engineering mechanical engineering, project estimating, regulatory compliance support, and permitting. Taku's experience with hydroelectric projects includes partnering with Rentricity to install two water turbine generators in the Pyramid Water Treatment Plant in the City of Unalaska and designing the pump-as-turbine generator in Alaska Water and Wastewater Utility's 92nd Avenue Vault. Resumes for Bill Mott, P.E.; Bill Cobb, P.E.; Michael Wise, P.E.; and Curtis Nuttall, P.E. are included in **Exhibit 15**.

Wilks Consulting Services, Inc.

The MOA entered a three-year contract for as-needed professional accounting services with Wilks Consulting Services, Inc. ("Wilks Consulting") on February 9, 2023. The contract is attached as **Exhibit 16**. Wilks Consulting personnel have over 48 years combined of experience as MOA employees and have developed detailed financial statements, developed and maintained continuing property records systems for various MOA enterprise activities, provided audit support, year-end workpaper preparation and footnote preparation for both general government and enterprise funds for the MOA. Wilks Consulting assisted the MOA during and

after the Transaction by drafting a white paper assessing the liabilities involved in the creation of AHP and liabilities found in the Eklutna PPA, ensured Commission orders to establish reserves were followed and recorded on AHP's financial statements, and reviewed the request for comment on the allocation of cost for the new power generation facility to ML&P. Resumes for David Wilks and William Wilks are included in **Exhibit 17**.

Altman, Roger & Co.

The MOA entered a three-year contract for as-needed professional accounting services with Altman, Roger & Co. ("Altman") on February 14, 2023. The contract is attached as **Exhibit 18**. Altman has decades of experience providing decades of experience in financial management, business advisory, and strategic planning. While Altman does not have extensive direct experience with the Uniform System of Accounts or maintaining continuing property records, it has a proven track record of quickly adapting to industry-specific standards and requirements. The contract with Altman is provided as an additional source of accounting expertise as needed. Biographies for Steve Wadleigh, CPA; Michael Fontenelle, CPA; and Jennifer Willette are included in **Exhibit 19**.

2. The MOA's continued surrender of its voting rights on the EOC is not necessary to protect and promote the public interest.

The Commission has stated that "continued receipt of generation service from the Eklutna Project is required for the convenience and necessity of the public."[32] The EOC is

[32] Order No. 39 at 63.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS

255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

responsible for all management decisions related to the operation, maintenance, and budget for the Eklutna Project.[33] While not explicitly stated, the Commission has implied that the MOA's failure to present a "person qualified to sit in EOC meetings and understand the discussion" or provide a "definitive support team for their EOC representative" necessitated the condition requiring the MOA's surrender of its voting rights in order to protect and promote the public interest.[34] As discussed above, Mr. Spafford, has assumed the role as Director of AHP and will be assisted by Mr. Schimscheimer, who will be moving from his engineering role at AWWU to a new engineering role within AHP. In addition, the MOA has entered into contracts with several engineering and accounting contractors and consultants to support Mr. Spafford in his role as the MOA's EOC representative. The condition requiring the MOA's surrender of its voting rights is no longer needed to protect and promote the public interest. Further, lifting the condition requiring the MOA's surrender of its voting rights is in the public interest. AHP is responsible for 19.05% of Eklutna Project costs but has no vote regarding how those costs are incurred.[35] This means taxpayers in the MOA pay for these costs without representation on the EOC. Allowing AHP to vote on the EOC would ensure the taxpayers are appropriately represented.

[35] *See* Order No. 39 at 76.

II. ALTERNATIVE APPLICATION TO AMEND CERTIFICATE

Although AHP does not believe it is necessary to submit an application to amend its CPCN No. 780 in order for the Commission to lift the surrender requirement, it has provided one below in the event that the Commission determines it is as necessary and construes this request as an application to amend.

A. AHP is, and will continue to be, fit, willing, and able to provide wholesale bulk power service under the Eklutna PPA and the MEA PPA.

In accordance with AS 42.05.241, the Commission must determine whether AHP is ". . . fit, willing, and able to provide the utility services applied for and that the services are required for the convenience and necessity of the public." "When determining whether an entity is fit, willing, and able to provide service, [the Commission] examine[s] that entity's managerial, technical, and financial fitness."[36] AHP is, and will continue to be, fit, willing and able to provide wholesale bulk power service under the Eklutna PPA and the MEA PPA if the application is approved.

1. Financial Fitness

AHP is responsible for 19.05% of all operating, maintenance, and capital costs for the Eklutna Project.[37] AHP receives payments under the MEA PPA that are sufficient to pay the Eklutna Project costs AHP is responsible for. AHP has also established a $3 million reserve fund

[36] Order No. U-18-011(2) at 2 (July 2, 2018).

(907) 277-1604

to address any intra-year revenue shortfalls, to be used if revenues received are not sufficient in any year to cover AHP's portion of Eklutna Project costs. In addition, if unforeseen adverse events require it, the MOA has sufficient borrowing capacity to make necessary operating, maintenance, or capital investments related to its Eklutna ownership interest.

2. Managerial and Technical Fitness

The MOA has a Finance Department with experienced professional accountants that have the necessary expertise to perform the required accounting functions for AHP's limited post-Transactions Eklutna Project ownership interest and long term wholesale bulk power sales under the Eklutna PPA and MEA PPA. The Finance Department has, and will continue to, maintain AHP's books and records, consistent with the Uniform System of Accounts. These books and records include AHP's revenues received from the Eklutna PPA and MEA PPA and AHP's share of monthly operational and capital costs. The Finance Department tracks, and will continue to track, any assets purchased or constructed by the EOC, including tracking operation and maintenance costs for the assets. Further, the Finance Department maintains, and will continue to maintain, continuing property records to include original asset cost, annual depreciation, and net book value of all assets. In cases where the Finance Department does not have the expertise needed to fulfill its duties, the MOA has contracted with experienced contractors and consultants to assist on an as-needed basis, as discussed above.

The MOA has several individuals with professional management experience that will be able to oversee performance under the PPAs and participate in long term project planning

(907) 277-1604

and operational decision making through membership in the EOC. While the Municipal Manger will have operational oversight of AHP and the mayor will be responsible for policy decisions, ultimate managerial responsibility will lie with Deputy Municipal Manager Mark Spafford. Mr. Spafford assumed the role of Deputy Municipal Manager in November of 2024, with accountability for managing the Municipality's enterprises and utilities (AWWU, SWS, Transit, the Port of Alaska, and AHP) and the Safety Department. Mr. Spafford is assuming the duties of the Director of AHP in addition to his duties as Deputy Municipal Manager. This is not without precedent at the Municipality: three other directors at the Municipality current hold dual roles.

To assist Mark Spafford in managing the current workload associated with AHP in concert with his other duties, Mark Schimscheimer will be moving from his engineering role at AWWU to a new engineering role within Anchorage Hydropower. Creation of this new role is currently in progress within the HR Department. Mr. Spafford is a licensed P.E. with more than two decades of experience working on utility infrastructure, including more than a decade of work directly for regulated utilities. Mr. Spafford served for five years as General Manager of SWS, and has significant experience with management of capital projects, staff, and utility infrastructure. In concert with Mr. Schimscheimer's experience with infrastructure development projects, rural power systems, power sales, fuel source, plant purchase and sale, federal compliance orders, general utility business agreements, and operations and maintenance, Mr. Spafford's experience and expertise establish that the new staffing of AHP is fit, willing, and able to operate the utility. As discussed in more detail above, the MOA has contracted with experienced contractors and

consultants to assist on an as-needed basis to ensure that AHP is managerially and technically fit to maintain its majority ownership interest of the Eklutna Project and exercise its voting rights on the EOC.

B. Form PU 101

In support of this application to amend CPCN No. 780, AHP provides the following information required by the Commission's Form PU 101:

PART I. GENERAL INFORMATION

A. AHP's name, address, and phone number are:

Municipality of Anchorage d/b/a
Anchorage Hydropower
632 West Sixth Avenue
Anchorage, Alaska, 99501
(907) 279-7671

B. All correspondence or communications regarding this application should be directed to:

Dean D. Thompson
Emily M. Walker
Counsel for Anchorage Hydropower
Kemppel, Huffman and Ellis, P.C.
255 E. Fireweed Lane
Anchorage, Alaska 99503
Telephone: (907) 277-1604
E-mail: ddt@khe.com
emw@khe.com

LAW OFFICES OF

ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

C. If this application is granted, AHP will provide wholesale electric power service in the same service area and pursuant to the same power purchase agreements as it currently does.

D. This application seeks amendment of CPCN No. 780.

E. The service area sought in this application is in the certificated service area of MEA; however AHP does not believe that MEA provides wholesale power sales at the location sought by this application.

F. AHP is a municipally-owned utility and a department of the MOA. Its predecessor department, ML&P, was organized to provide electric service in 1932. As part of the Transaction, AHP was created to administer the remaining municipal-owned utility which consists of AHP's ownership share in the Eklutna Hydropower Project. The MOA is a home rule municipality organized under AS 29.10.010-.100.

G. AHP is wholly owned by the MOA.

H. The Commission has previously considered the MOA to be an affiliated interest of ML&P, and thus would likely consider the MOA to also be an affiliated interest of AHP.

I. AHP's books are kept at 632 West Sixth Avenue Anchorage, Alaska, 99501.

(907) 277-1604

PART II. GENERAL DOCUMENTS

A. Key Management. If this application will be approved, the MOA Municipal Manager will have operational oversight of AHP, the mayor will be responsible for policy decisions, and Mr. Spafford will be responsible for day-to-day operations.[38]

B. Organizational Documents. AHP is a Department of the MOA. As part of the MOA, ML&P operates under "The Home Rule Charter for The Municipality of Anchorage, Alaska," which is available online at:

https://library.municode.com/ak/anchorage/codes/code_of_ordinances?nodeled=PTICH.

A copy of the organizational chart is attached as **Exhibit 21**.

C. Benefit to the Public. As previously discussed, lifting the condition requiring the MOA's surrender of its voting rights on the EOC is in the public interest. AHP is responsible for 19.05% of Eklutna Project costs but has no vote regarding how those costs are incurred.[39] This means taxpayers in the MOA pay for these costs without representation on the EOC. Allowing AHP to vote on the EOC would ensure the taxpayers are appropriately represented. Further, the Commission has stated that "continued receipt of generation service from the Eklutna Project is required for the convenience and necessity of the public."[40] The EOC is responsible for all management decisions related to the operation, maintenance, and budget for the

255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

Eklutna Project.[41] The MOA has appointed Mr. Spafford as the Director of AHP and its EOC representative. Mr. Spafford is more than qualified to participate in meetings and knowledgeably discuss all issues related to management and operation of the Eklutna Project. In his role as the MOA's EOC representative, Mr. Spafford will be assisted by Mr. Schimscheimer as well as the engineering and accounting contractors and consultants as described above. The condition requiring the MOA's surrender of its voting rights is no longer needed to protect and promote the public interest.

D. Service Area Maps. According to AHP's CPCN, "the Commission has determined that a description of the authorized area is not applicable under these circumstances for this Certificate," as AHP "only provides wholesale electric power to Eklutna Hydroelectric Project Switchyard located in the SW 1⁄4 of Section 17, T.16 N., R. 2 E, of the Seward Meridian." AHP is not proposing to modify its service area.

E. Utility Practices and Procedures. AHP provides service pursuant to the Eklutna PPA and the MEA PPA.

PART III. TECHNICAL INFORMATION

A. Electric Utility.

1. Not applicable. AHP is not requesting to serve an additional area.

2. Not applicable. AHP is not requesting to serve an additional area.

3. Not applicable. AHP is not requesting to serve an additional area.

4. Not applicable. AHP is not requesting to serve an additional area.

5. Not applicable. AHP is not requesting to serve an additional area.

6. Not applicable. AHP is not requesting to serve an additional area.

7. AHP's system meets the Alaska minimum electric safety standards adopted in AS 18.60.580 (*i.e.*, the National Electrical Safety Code ("NESC")). AHP has complied with the requirements specified in 3 AAC § 52.400 - 3 AAC § 52.500.

8. Not applicable. AHP is not requesting to serve an additional area.

PART IV. FINANCIAL INFORMATION

A. Financial Status. AHP's most recent annual report is attached as **Exhibit 22**.[42]

B. Sources of Financing. Not applicable. AHP is not proposing to build a new facility or expand its current facilities.

PART V. AUTHORIZATION

Pursuant to 3 AAC 48.645, by virtue of the signature below, AHP authorizes the Commission to publish notice of this Application in a newspaper of general circulation in Alaska. AHP agrees to pay the publication costs. Pursuant to 3 AAC 48.645 and .648(e), a draft public notice is attached as **Exhibit 23**. Documentation of arrangements for payment of publication of

[42] AHP requested an extension to file its 2023 and 2024 annual reports on March 20, 2025, because the financial statement audits for both years are not complete.

the notice in the Anchorage Daily News, a newspaper of general circulation in Alaska, is attached as **Exhibit 24**.

III. CONCLUSION.

AHP respectfully requests the Commission, for good cause as discussed above, lift the condition that the MOA surrender its voting rights on the EOC. Alternatively, AHP respectfully submits that the public interest, convenience, and necessity would be furthered by a grant of this Application amending AHP's CPCN to lift the condition requiring the MOA surrender its voting rights on the EOC.

RESPECTFULLY SUBMITTED this 30th day of July, 2025, at Anchorage, Alaska.

SUMMARY

A collaborative leader with a record of success leading organizations, creating strategies and visions, and developing customer-oriented solutions to complex environmental, infrastructure, and organizational challenges. More than 20-years of engineering, operations and management experience in local government and Alaska Native community utilities, federal government and consulting organizations. Proven capabilities to blend innovation, creativity and practicality, delivering results and consistently exceeding expectations.

AREAS OF EXPERTISE

Water, Wastewater, Stormwater, and Solid Waste Utility Management – Strategic Planning
Private and Intergovernmental Partnerships – Organizational Development – Communication and Engagement
Energy Efficiency and Sustainability – Financial Analysis, Budgeting, Rate Planning

EDUCATION

Master of Science Environmental Engineering, University of Central Florida, May 2002
Bachelor of Science Environmental Engineering, University of Central Florida, December 2000

WORK HISTORY

November 2024 to Present *Deputy Municipal Manager, Municipality of Anchorage, Anchorage, Alaska*

Duties include oversight and management of municipal utility (Anchorage Water & Wastewater Utility, Solid Waste Services and Anchorage Hydropower) and enterprise (Merrill Field and Port of Alaska) departments and includes public transit department and the overall safety program for the Municipality of Anchorage. Also responsible for the evaluation and deployment of large municipal infrastructure challenges such as the development of a 30-MW mass-burn waste to energy facility, stormwater utility and climate action plan. Supervise department heads and provide guidance and mentorship with municipal processes. Provided engineering support on a regular basis to an electrical utility in Alaska for grid development and decarbonization services.

September 2022 to November 2024 *Water Group Leader/Client Service Lead, Jacobs, Anchorage, Alaska*

Duties include project management, administrative and technical staff mentoring and direction, leadership and engineering support for Alaska and national utility clients for water, wastewater, solid waste and recycling, decarbonization, electrical grid development and telecom activities. This includes the preparation of engineering plans and specifications, design calculation packages, providing engineering support utilities management recommendations for optimization purposes for a variety of small and large clients. Also responsible for the business development and new client identification for clients in each of the previously referenced utility disciplines for the Jacobs Alaska office. Supervise a staff of seven fulltime employees engaged in completing water/wastewater/solid waste and recycling/telecom and electrical utility development projects. Provided engineering support on a regular basis to an electrical utility in Alaska for grid development and decarbonization services.

October 2021 to September 2022 *Senior Project Manager, Tetra Tech, Anchorage, Alaska*

Duties included development and expansion of local office in Alaska and project management and leadership and mentoring of local staff. Included business development and the completion of work in water, wastewater, solid waste, recycling and electrical utility clients in and around Anchorage, AK.

May 2016 to August 2021 *General Manager, Department of Solid Waste Services, Municipality of Anchorage, Anchorage, Alaska*

The Department of Solid Waste Services (SWS) provides refuse collection and disposal services to approximately 300,000 citizens of the Municipality of Anchorage (MOA). As the General Manager of SWS, I am directly

accountable for leading a staff of 112 employees involved in the planning and delivery of refuse disposal and collection activities for the MOA. The disposal and collection utilities are enterprise activities which operate and provide: a 1,400-ton per day Class I RCRA Subtitle D municipal solid waste landfill; three transfer stations; an over 100 vehicle transfer and collection fleet; garbage and recycle collection services to over 12,000 residential and commercial customers; and, a sustainability division responsible for implementing Anchorage's climate action plan strategies and activities. Manage all financial, engineering, administrative, customer service, operational and maintenance related activities for SWS. This includes annual operational and capital budgeting activities and expenditure and revenues tracking for disposal and collection services. I routinely work with the Mayor, Municipal Manager, Administration staff and the Municipal Assembly to set policies for operation of the disposal and collection utilities as well as implement the vision and direction provided. Interact with customers and service providers and represent the Administration on issues related to solid waste management and recycling to the citizens of the MOA. Interacted with landfill gas to energy facility operators on the managing and selling of collected landfill gas for the operation of a 7.2-MW landfill gas to energy facility. Led SWS through the development of a first ever strategic plan, first master plan in over 30-years, long-range financial plan, and deployment of key performance indicator reporting on-line system to demonstrate performance and accountability with all major Department activities. Oversaw the development and implementation of enhanced recycling and organics collections programs for the MOA as well as developed the Energy Efficiency and Sustainability program and associated climate action plan. Led the effort to plan, design and construct a new $120M Central Transfer Station and conversion of an existing facility to an enhanced recycling and diversion campus for the MOA as well as $15M in new administration, maintenance and warm storage facilities improvements at the Anchorage Regional Landfill. Worked on the development of a statewide mass-burn waste to energy facility and $25M leachate pretreatment and disposal project which has required close collaboration with the Anchorage Water & Wastewater Utility.

October 2013 to May 2016 *Director, Operations and Maintenance Division, Anchorage Water and Wastewater Utility, Municipality of Anchorage, Anchorage, Alaska*

Responsible for approximately 90 employees whose tasks included the overall maintenance and repair of the water distribution system, wastewater collection system, major plant treatment equipment, electrical and mechanical, the Utility-wide SCADA system, buildings and grounds, and fleet vehicles. Responsible for skilled maintenance crafts personnel, directing work activities through subordinate superintendents and supervisors. Established work priorities, allocated manpower, determined staffing and equipment requirements to meet operational objectives, reviewed work schedules, and managed web-based project status reports to track progress and expenditures. Routinely worked with the general manager and leadership team on implementing the goals and vision from the strategic plan and other master plans for utility facilities.

January 2012 to October 2013 *Senior Program Manager, Denali Commission, Anchorage, Alaska*

Assisted with the development of a new role for the Commission with rural Alaska projects (emphasis on Alaska Native communities) with an emphasis on enhanced technical assistance in improving existing infrastructure or the development of new capital projects. Provided leadership for the development of a multi-agency effort to develop a model for community scale energy efficiency program for non-residential and public buildings. Majority of duties consisted of the following activities: develop and maintain working relationships with program partners; promote and maintain local decision-making; develop and support local champions; improve local administrative capacity; community identification of potential infrastructure projects; technical assistance for local project development; serve as a technical peer-review for pending infrastructure development projects; and, assist communities in developing grants, and/or developing working relationships with agencies and other potential funders.

September 2009 to October 2013 and December 2003-February 2007 *Senior Engineering Project Manager: September 2009 – October 2013; Engineer: January 2006 – February 2007; Associate Engineer: December 2003 – January 2006; Alaska Native Tribal Health Consortium, Anchorage, Alaska*

Duties consisted of Project Management, Design Engineering and Construction Management. Project Management duties consisted of the following: overseeing funding related to sanitation facilities improvement projects for numerous rural Alaska communities; assigning tasks to and the managing of engineering staff and technicians completing and preparing design calculations, specifications and construction plans; managing/reviewing A/E contracts and internal mechanical and electrical submittals; preparing state and federal permit applications for water and wastewater construction projects; providing technical support/advice to

communities regarding sanitation facilities; preparing funding applications for infrastructure improvement projects; and, the preparing of project construction cost estimates. Project Engineering activities included: design of water/wastewater treatment facilities; design of water distribution systems; design of wastewater collection/conveyance systems; engineering plans preparation; performing engineering analyses and calculations; performing bench-scale laboratory analyses; and, water treatment pilot-study design and implementation. Construction Management duties consisted of: the daily supervising of and providing support and guidance to construction project managers and superintendents; purchasing, tracking and arranging transportation for materials and equipment to remote areas within Alaska; and, budget tracking and analyses. Spent approximately two years as a detailed employee to the Denali Commission, see above description.

February 2007 to September 2009 *City Engineer – Environmental Utilities Department, City of St. Cloud, St. Cloud, Florida*

Duties consisted of supervising the engineering and operational divisions within the City of St. Cloud's Environmental Utilities Department, which included project management, project engineering and construction management on numerous different projects simultaneously. Engineering responsibilities included: direct supervision of utilities engineer and engineering assistant; the training of engineering staff members in their individual responsibilities as well as providing regular formal as well as non-formal performance evaluations; assisting in the drafting, planning and design of City capital improvement projects; management of the City's water, wastewater and non-potable water hydraulic models; conducting consultant and construction project reviews; providing technical support and assistance to all operational Divisions throughout the Department as well as the City; attendance at City Council meetings to provide information to Council members regarding proposed projects and purchases as well as on an as requested basis by the Director of Environmental Utilities; coordination with engineering and technical personnel from numerous local, state and federal agencies; supervision of the construction of City facilities to ensure consistency with codes and standards; and, the implementation and enforcement of all City policies and standards within the engineering division. Operational responsibilities included the following: providing guidance to the Operations Manager and staff; ensuring the efficient day to day operation and maintenance of two, 3 MGD aeration and a 9 MGD MIEX water treatment facility; one 6.0 MGD water repump station; one 6.5 MGD water repump station; one 6 MGD Modified Ludzack-Ettinger (MLE) wastewater treatment facility; 85 lift stations; a lines system (responsible for line maintenance, construction and system control) division, with approximately 60 department employees; assignment of work goals, objectives and expectations to division personnel; review and preparation of division budgets for departmental and City wide review; and, enforcement of safe work practices on City as well as contract work sites.

April 2002 to November 2003 *Senior Staff Engineer April 2003 – November 2003, Staff Engineer April 2002 – April 2003, GeoSyntec Consultants, Florida Branch*

Duties included preparation of engineering plans and specifications, design calculation packages, providing engineering support for a variety of small and large clients and performing numerous environmental related field activities. Completed engineering design analysis and calculation packages for industrial wastewater (leachate) collection system design, force-main system design, slope stability analysis, pipe structural integrity, bearing capacity and consolidation, as well as in-depth feasibility studies for several large and small scale groundwater treatment projects located throughout the United States. Provided engineering support on a regular basis to a large solid waste company. Support consisted of future planning and financial status updates for over fifty solid waste facilities. Environmental field activities performed have included groundwater monitoring well sampling, soil sampling, oversight of drilling operations related to the installation of groundwater wells and geotechnical investigations, and system operational maintenance on three different groundwater treatment systems.

May 2000 to April 2002 *Post-Graduate Research Assistant, University of Central Florida, Orlando, FL*

Conducted research related to the Florida Bioreactor Demonstration Landfill Project. Duties included data collection, interpretation of water pressure head data, development of recommendations, monthly report preparation, and final report preparation to evaluate the performance of three different landfill leachate collection and removal systems, as well as lab and field experiments on sensors used for the measurement of water pressure head. Also performed design, set-up, and routine maintenance of three data collection stations throughout the state of Florida.

May 1999 to July 2000 *Engineer Technician, Orange County Solid Waste Division, Orlando, FL*

Responsibilities included preparing monthly flow monitoring reports for NPDES (EPA) and FDEP agencies, quarterly surface emissions monitoring for methane, liner integrity inspections and report preparation, leachate and water quality sampling as well as various other duties related to the management and operation of a large municipal solid waste management program.

COMPUTER SKILLS

- Proficient on Microsoft Office programs such as EXCEL, Word, PowerPoint, etc.

LICENSES, CLASSES, PUBLICATIONS & CERTIFICATES

- Professional Engineer (P.E.) Registration - State of Alaska, License Number: AEL C 11298
- Project Management Bootcamp, PSMJ Resources, Inc., October 2009

MUNICIPALITY OF ANCHORAGE

Assembly Memorandum

AM No. 463 - 2025

Meeting Date: June 10, 2025

Municipal Clerk's Office
Approved
Date: June 10, 2025

FROM: MAYOR

SUBJECT: EXECUTIVE APPOINTMENT – MARK W. SPAFFORD, DIRECTOR OF ANCHORAGE HYDROPOWER UTILITY.

Pursuant to Anchorage Municipal Charter section 5.02 and Anchorage Municipal Code sections 2.30.095, 3.20.020, and 3.20.070, I ask the Assembly to confirm the following executive and department head that I have appointed:

Name	Position
Mark W. Spafford	Anchorage Hydropower Director

A resume submitted in accordance with Anchorage Municipal code section 3.30.173 is attached for your information.

THE ADMINISTRATION RECOMMENDS APPROVAL.

Prepared by:	Municipal Manager's Office
Approved by:	Annmarie Billingsley, Acting HR Director
Concur:	William D. Falsey, Chief Administrative Officer
Concur:	Rebecca A. Windt Pearson, Municipal Manager
Respectfully submitted:	Suzanne LaFrance, Mayor

Mark Spafford, P.E.

mark.w.spafford@anchorageak.gov – (907) 830-7403 – 632 West 6th Ave. Suite 850, Anchorage, AK, 99501

SUMMARY

A collaborative leader with a record of success leading organizations, creating strategies and visions, and developing customer-oriented solutions to complex environmental, infrastructure, and organizational challenges. More than 20-years of engineering, operations and management experience in local government and Alaska Native community utilities, federal government and consulting organizations. Proven capabilities to blend innovation, creativity and practicality, delivering results and consistently exceeding expectations.

AREAS OF EXPERTISE

Water, Wastewater, Stormwater, and Solid Waste Utility Management – Strategic Planning
Private and Intergovernmental Partnerships – Organizational Development – Communication and Engagement
Energy Efficiency and Sustainability – Financial Analysis, Budgeting, Rate Planning

EDUCATION

Master of Science Environmental Engineering, University of Central Florida, May 2002
Bachelor of Science Environmental Engineering, University of Central Florida, December 2000

WORK HISTORY

November 2024 to Present *Deputy Municipal Manager, Municipality of Anchorage, Anchorage, Alaska*

Duties include oversight and management of municipal utility (Anchorage Water & Wastewater Utility, Solid Waste Services and Anchorage Hydropower) and enterprise (Merrill Field and Port of Alaska) departments and includes public transit department and the overall safety program for the Municipality of Anchorage. Also responsible for the evaluation and deployment of large municipal infrastructure challenges such as the development of a 30-MW mass-burn waste to energy facility, stormwater utility and climate action plan. Supervise department heads and provide guidance and mentorship with municipal processes. Provided engineering support on a regular basis to an electrical utility in Alaska for grid development and decarbonization services.

September 2022 to November 2024 *Water Group Leader/Client Service Lead, Jacobs, Anchorage, Alaska*

Duties include project management, administrative and technical staff mentoring and direction, leadership and engineering support for Alaska and national utility clients for water, wastewater, solid waste and recycling, decarbonization, electrical grid development and telecom activities. This includes the preparation of engineering plans and specifications, design calculation packages, providing engineering support utilities management recommendations for optimization purposes for a variety of small and large clients. Also responsible for the business development and new client identification for clients in each of the previously referenced utility disciplines for the Jacobs Alaska office. Supervise a staff of seven fulltime employees engaged in completing water/wastewater/solid waste and recycling/telecom and electrical utility development projects. Provided engineering support on a regular basis to an electrical utility in Alaska for grid development and decarbonization services.

October 2021 to September 2022 *Senior Project Manager, Tetra Tech, Anchorage, Alaska*

Duties included development and expansion of local office in Alaska and project management and leadership and mentoring of local staff. Included business development and the completion of work in water, wastewater, solid waste, recycling and electrical utility clients in and around Anchorage, AK.

May 2016 to August 2021 *General Manager, Department of Solid Waste Services, Municipality of Anchorage, Anchorage, Alaska*

The Department of Solid Waste Services (SWS) provides refuse collection and disposal services to approximately 300,000 citizens of the Municipality of Anchorage (MOA). As the General Manager of SWS, I am directly

accountable for leading a staff of 112 employees involved in the planning and delivery of refuse disposal and collection activities for the MOA. The disposal and collection utilities are enterprise activities which operate and provide: a 1,400-ton per day Class I RCRA Subtitle D municipal solid waste landfill; three transfer stations; an over 100 vehicle transfer and collection fleet; garbage and recycle collection services to over 12,000 residential and commercial customers; and, a sustainability division responsible for implementing Anchorage's climate action plan strategies and activities. Manage all financial, engineering, administrative, customer service, operational and maintenance related activities for SWS. This includes annual operational and capital budgeting activities and expenditure and revenues tracking for disposal and collection services. I routinely work with the Mayor, Municipal Manager, Administration staff and the Municipal Assembly to set policies for operation of the disposal and collection utilities as well as implement the vision and direction provided. Interact with customers and service providers and represent the Administration on issues related to solid waste management and recycling to the citizens of the MOA. Interacted with landfill gas to energy facility operators on the managing and selling of collected landfill gas for the operation of a 7.2-MW landfill gas to energy facility. Led SWS through the development of a first ever strategic plan, first master plan in over 30-years, long-range financial plan, and deployment of key performance indicator reporting on-line system to demonstrate performance and accountability with all major Department activities. Oversaw the development and implementation of enhanced recycling and organics collections programs for the MOA as well as developed the Energy Efficiency and Sustainability program and associated climate action plan. Led the effort to plan, design and construct a new $120M Central Transfer Station and conversion of an existing facility to an enhanced recycling and diversion campus for the MOA as well as $15M in new administration, maintenance and warm storage facilities improvements at the Anchorage Regional Landfill. Worked on the development of a statewide mass-burn waste to energy facility and $25M leachate pretreatment and disposal project which has required close collaboration with the Anchorage Water & Wastewater Utility.

October 2013 to May 2016 *Director, Operations and Maintenance Division, Anchorage Water and Wastewater Utility, Municipality of Anchorage, Anchorage, Alaska*

Responsible for approximately 90 employees whose tasks included the overall maintenance and repair of the water distribution system, wastewater collection system, major plant treatment equipment, electrical and mechanical, the Utility-wide SCADA system, buildings and grounds, and fleet vehicles. Responsible for skilled maintenance crafts personnel, directing work activities through subordinate superintendents and supervisors. Established work priorities, allocated manpower, determined staffing and equipment requirements to meet operational objectives, reviewed work schedules, and managed web-based project status reports to track progress and expenditures. Routinely worked with the general manager and leadership team on implementing the goals and vision from the strategic plan and other master plans for utility facilities.

January 2012 to October 2013 *Senior Program Manager, Denali Commission, Anchorage, Alaska*

Assisted with the development of a new role for the Commission with rural Alaska projects (emphasis on Alaska Native communities) with an emphasis on enhanced technical assistance in improving existing infrastructure or the development of new capital projects. Provided leadership for the development of a multi-agency effort to develop a model for community scale energy efficiency program for non-residential and public buildings. Majority of duties consisted of the following activities: develop and maintain working relationships with program partners; promote and maintain local decision-making; develop and support local champions; improve local administrative capacity; community identification of potential infrastructure projects; technical assistance for local project development; serve as a technical peer-review for pending infrastructure development projects; and, assist communities in developing grants, and/or developing working relationships with agencies and other potential funders.

September 2009 to October 2013 and December 2003-February 2007 *Senior Engineering Project Manager: September 2009 – October 2013; Engineer: January 2006 – February 2007; Associate Engineer: December 2003 – January 2006; Alaska Native Tribal Health Consortium, Anchorage, Alaska*

Duties consisted of Project Management, Design Engineering and Construction Management. Project Management duties consisted of the following: overseeing funding related to sanitation facilities improvement projects for numerous rural Alaska communities; assigning tasks to and the managing of engineering staff and technicians completing and preparing design calculations, specifications and construction plans; managing/reviewing A/E contracts and internal mechanical and electrical submittals; preparing state and federal permit applications for water and wastewater construction projects; providing technical support/advice to

communities regarding sanitation facilities; preparing funding applications for infrastructure improvement projects; and, the preparing of project construction cost estimates. Project Engineering activities included: design of water/wastewater treatment facilities; design of water distribution systems; design of wastewater collection/conveyance systems; engineering plans preparation; performing engineering analyses and calculations; performing bench-scale laboratory analyses; and, water treatment pilot-study design and implementation. Construction Management duties consisted of: the daily supervising of and providing support and guidance to construction project managers and superintendents; purchasing, tracking and arranging transportation for materials and equipment to remote areas within Alaska; and, budget tracking and analyses. Spent approximately two years as a detailed employee to the Denali Commission, see above description.

February 2007 to September 2009 *City Engineer – Environmental Utilities Department, City of St. Cloud, St. Cloud, Florida*

Duties consisted of supervising the engineering and operational divisions within the City of St. Cloud's Environmental Utilities Department, which included project management, project engineering and construction management on numerous different projects simultaneously. Engineering responsibilities included: direct supervision of utilities engineer and engineering assistant; the training of engineering staff members in their individual responsibilities as well as providing regular formal as well as non-formal performance evaluations; assisting in the drafting, planning and design of City capital improvement projects; management of the City's water, wastewater and non-potable water hydraulic models; conducting consultant and construction project reviews; providing technical support and assistance to all operational Divisions throughout the Department as well as the City; attendance at City Council meetings to provide information to Council members regarding proposed projects and purchases as well as on an as requested basis by the Director of Environmental Utilities; coordination with engineering and technical personnel from numerous local, state and federal agencies; supervision of the construction of City facilities to ensure consistency with codes and standards; and, the implementation and enforcement of all City policies and standards within the engineering division. Operational responsibilities included the following: providing guidance to the Operations Manager and staff; ensuring the efficient day to day operation and maintenance of two, 3 MGD aeration and a 9 MGD MIEX water treatment facility; one 6.0 MGD water repump station; one 6.5 MGD water repump station; one 6 MGD Modified Ludzack-Ettinger (MLE) wastewater treatment facility; 85 lift stations; a lines system (responsible for line maintenance, construction and system control) division, with approximately 60 department employees; assignment of work goals, objectives and expectations to division personnel; review and preparation of division budgets for departmental and City wide review; and, enforcement of safe work practices on City as well as contract work sites.

April 2002 to November 2003 *Senior Staff Engineer April 2003 – November 2003, Staff Engineer April 2002 – April 2003, GeoSyntec Consultants, Florida Branch*

Duties included preparation of engineering plans and specifications, design calculation packages, providing engineering support for a variety of small and large clients and performing numerous environmental related field activities. Completed engineering design analysis and calculation packages for industrial wastewater (leachate) collection system design, force-main system design, slope stability analysis, pipe structural integrity, bearing capacity and consolidation, as well as in-depth feasibility studies for several large and small scale groundwater treatment projects located throughout the United States. Provided engineering support on a regular basis to a large solid waste company. Support consisted of future planning and financial status updates for over fifty solid waste facilities. Environmental field activities performed have included groundwater monitoring well sampling, soil sampling, oversight of drilling operations related to the installation of groundwater wells and geotechnical investigations, and system operational maintenance on three different groundwater treatment systems.

May 2000 to April 2002 *Post-Graduate Research Assistant, University of Central Florida, Orlando, FL*

Conducted research related to the Florida Bioreactor Demonstration Landfill Project. Duties included data collection, interpretation of water pressure head data, development of recommendations, monthly report preparation, and final report preparation to evaluate the performance of three different landfill leachate collection and removal systems, as well as lab and field experiments on sensors used for the measurement of water pressure head. Also performed design, set-up, and routine maintenance of three data collection stations throughout the state of Florida.

May 1999 to July 2000 *Engineer Technician, Orange County Solid Waste Division, Orlando, FL*

[redacted]

Education & Registration

BS - Civil Engineering; CSUC; 1993
MSPM - (Master of Science in Project Management) UAA, various classes
PE - State of Alaska, Civil Engineer 10955
PMP - Project Management Professional 1925650 (lapsed)
Arctic Engineering – University of Alaska, 1993
CDT - Contract Document Technologist, Construction Specification Institute (CSI)
IEDC/CDFA – Development Finance, various classes

Experience

2019-present: ***Director of Engineering, Anchorage Water and Wastewater Utility (AWWU):*** Responsible for a staff of 45 and annual budgets more than $50 million. Sections of the Engineering Division includes Development Services, Project Management, and Asset Management Planning. Utility serves a metropolitan population of 300,000, processes and distributes 50 MGPD of drinking water and process 45 MGPD of wastewater. Distribution and collection systems are deep-bury for frost conditions. All assets are located in a high seismic region. Step-up General Manager as required. Significant interface with Municipal Assembly, Administration, and State and Federal elected officials. Accomplishments include:

- Division & Utility reorganization: reconfigured division to achieve cost and deliverable efficiencies (eliminated former position).
- Pioneered utility first Public-Private Partnership to develop infrastructure in support of economic development projects

2017- 2019: ***Planning and Development Services Manager*** AWWU, Anchorage, Alaska. Responsible for special assessment districts, development services, real estate management, third party project coordination, and addressing miscellaneous public and utility concerns. Position requires diplomatic abilities towards conflict resolution and negotiations with municipal departments, government officials, and the public at large.

- Water Master Plan: 50,000 customers with a peak daily demand of 40 MGD.
- Risk and Resiliency Assessment: Federal requirements stipulate Assessment be completed to AWWA J100 standards by March 2020.
- Asset Management Plan(s): facility assessments, O&M procedures, break rates, ROI

2015: ***Managing Partner***: Alaska LNG Exporters, Anchorage, Alaska. In conjunction with international business partners created a Delaware based LLC with the goal of exporting excess and stranded Cook Inlet Basin natural gas to Pacific Rim customers. Formulated business plan, confidentiality agreements, and qualified investor presentations. Currently on hold pending Natural Gas price recovery.

2010- 2017: ***Managing Partner***: SMR Developers, Anchorage, Alaska. Formed in 2010, Owner and Managing Partner of a real estate development company. Responsible for all aspects of the corporation: Investor management, financing, accounting, subcontractor management, engineering & permitting, financial and risk analysis.

2013-2015: ***Project Manager***: NANA WorleyParsons, Anchorage, Alaska. Project Manager for mining and energy related projects. Clients include Teck Alaska, Pebble Limited Partnership (PLP) and ConocoPhillips Alaska (CPAI). Specific activities include preparation of proposals, management of work share partners, client interface and overall project management activities. Project types included green-field North Slope drill sites, power grid extensions, subcontracting (EPS), water treatment facilities and LNG handling facilities

2001-2013: ***Project Development Manager***: AIDEA/AEA, Anchorage, Alaska (AIDEA is a small capital-intensive enterprise investment corporation of the State of Alaska wherein each person has wide authority and responsibilities, AEA is a similar not-for-profit energy authority)

- AIDEA: Responsible for approximately $1 Billion of projects at any given time. Duties included all development (concept through execution and closure) and operational aspects of mining, power generation, and vertical construction projects financed by AIDEA.
- AEA: Bulk fuel upgrade and replacement projects throughout rural Alaska (20 projects with a value of $50 million). Responsible for all project phases from conception through close-out including contract negotiation, award and management of Multi-Discipline Design Contracts and Construction Management contracts.
- Projects included village to village electric interties, modular power plant size and placement, utility business agreements

Specific AIDEA activities included:

- Oversee the planning and conceptual design study for an Arctic deep-water port proposed to serve both the Red Dog Mine District and the Western Arctic Coal
- Responsible for an Arctic-grade ore concentrate trans-shipment
- Manage professional technical, legal and construction (EPC, CM, DB, DBB) and asset specific operations contracts
- Reviews all specialty inspection reports such as feasibility, design, design review, value engineering
- Facility inspection to observe condition, maintenance activities, and operation procedures
- Highly familiar with applicable regulations and permitting agencies (EPA, State) regarding NEPA, Clean Air Act, EIS, NPDES
- Negotiation of contracts and litigation settlements in excess of $150 million
- Healy Clean Coal, a 50MW coal-fired power plant: management of litigation team in an unresolved $175 million dispute, plant permitting, negotiation of power sales agreement, project development agreement, coal supply contract, O&M, custodial and transmission contracts, and various agreements and contracts as required. Negotiated sale of asset.
- Negotiated Consent Decree for Title V air permit for plant.

Specific AEA activities included:

- Authored and negotiated master Business Plan requiring sustainability of a rural Alaskan village utility (power & bulk fuel) that became a funding requirement of the Denali Commission. Interfaced with Denali Commission (Federal Agency), USDA/RUS funding program, HUD funding, State and Federal regulators, and village leaders and communities throughout Alaska.

- Authored program manual for $200 million energy program, created master funding schedule. Negotiated all aspects of the program with local leaders, and funding agencies (Federal & State Grants)

1998-2001: ***Project Manager****:* Arctic Slope Consulting Inc., (full time in Barrow) Barrow, Alaska (This company was a subsidiary of ASRC, sold to NANA and is now DBA WHPacific)

- Sr. Project Manager on all Alaska Arctic North Slope village water & sewer projects (approx. $350 million). Responsible for client contact (marketing), office workload management among various project managers, financial tracking and reporting, construction administration proposals & budgeting. Reorganized office and revised & updated document control system including creation of project control tracking procedures. Part of negotiation team on multiple $50 million projects.

- Owner's Construction Representative (OCR) on Alaska Arctic North Slope water and sewer projects for Pt Hope, Nuiqsut, & Anaktuvuk Pass (combined cost approx. $150 million). Projects included construction of sewer treatment and water treatment facilities, all direct-bury collection and distribution systems, and related auxiliary construction. Responsible for pay requests, DC/VRs, change orders, site visits, inspectors, and communication between the owner & the contractor.

1998: ***Superintendent, Surveyor***: UIC Construction, Inc., Anchorage, Alaska

- Site Supervisor and General Foreman for 20-person Alaska Native crew ($4 million per season). Responsibilities included all site paperwork, time sheets, quantity tracking, and scheduling, HR issues, interface with the owner's representative.
- Survey Party Chief on NSB Village Sewer and Water Projects (Anaktuvuk Pass & Pt. Lay). Included project layout, and substantial redesign work.

1994-1998: ***Project Engineer***: Bristol Environmental Services Corporation, Anchorage, Alaska (The business unit no longer exists in the same form)

- Environmental site investigations, geophysical surveys, product recovery systems, large-scale HAZMAT cleanups.
- Experience in environmental cleanup associated with Arctic production facilities

1995 (summer): ***Project Engineer***: South Coast, Inc., Ketchikan, Alaska (This company no longer exists)

- Survey Party Chief and Construction Engineer for Bethel runway rebuild project. ($4 million). Surveyor of road realignment and utilities placement ($1.5 million).
- Survey Party Chief and Construction Supervisor of new airport runway, apron, and access roads ($5.5 million).
- Surveyor for marine ferry terminal dock ($7.75 million). Redesigned highway alignment, drainage flows and culvert placement and utility conflicts on highway and bridge reconstruction project ($4 million).
- General Foreman on Petersburg seaplane float dredging and construction project ($2.5 million).

1993-1994: ***Project Engineer***: Arctic GeoScience, Inc., Anchorage, Alaska, (This company no longer exists)

- Engineered and designed drill pad and road system to support oil exploration activities in Arctic Russia. Design issues included geotechnical analysis, thermal analysis of permafrost stability, and layout of man-camp, flare pit, tank farm, and power modals.
- Served as CONOCO's on-site representative overseeing the winter construction of the system and the placement of the drill rig and ancillary equipment units.

Public Service Activities

- Chair, South Golden View Rural Road Service Area
    - Public Official, seat won through Municipal Election, April 2008, re-elected 2010, 2013, 2016
    - Annual budget $750K of direct tax revenue, grants of up to $4.5 million

- **Candidate for Assembly:** April 2016
- **Participant**: November 2014 Governor Walker/Mallott "Transition Team Member" for Consumer Energy Issues.
- **Participant**: June 2015 "Conversations with Alaskan", Fairbanks, Alaska. Three-day event to give feedback to the Administration on current budget issues and proposed solutions.
- **Storm Water Utility Steering Committee (2017-18)**: member representing rural road service areas

EXHIBIT 4

Docusign Envelope ID: 3138D9E6-B368-49BC-9FC5-0B5F5778AB70

CONTRACT FOR PROFESSIONAL SERVICES WITH COFFMAN ENGINEERS, INC

In consideration of the mutual promises herein, ANCHORAGE and COFFMAN ENGINEERS, INC. agree as follows. This contract consists of:

A. Part I, consisting of 15 sections of Special Provisions
B. Part II, consisting of 11 sections of General Provisions

PART I
SPECIAL PROVISIONS

Section 1. Definitions.

A. "Administrator" means the Engineering Division Director of the Anchorage Water and Wastewater Utility or their designee
B. "Anchorage" means the Municipality of Anchorage.
C. “Owner” means the Anchorage Water and Wastewater Utility
D. "Contractor" means Coffman Engineers, Inc.

Section 2. Scope of Services.

A. Individual delivery orders Contract Task Orders (CTOs) will be issued for specific Owner requested work items. The Contractor is to perform the professional services required to complete the tasks set forth in each CTO.

B. The Contractor shall respond to each CTO with a proposal detailing scope, cost, subcontractor involvement, and time required to complete the work in each CTO. AWWU and the Contractor may refine the proposal for clarification of the scope of services prior to issuing Notice to Proceed for the CTO.

C. Each CTO is limited in scope to the work requested in the request for proposal (RFP 2024P017) that led to this contract and as stated below;

1. This term contract is limited to Civil Engineering and all related branches of Civil Engineering such as but not limited to structural and environmental services for study, design, inspection and/or construction management services.

2. Services may include, but are not limited to studying, reporting on, designing, inspecting, and managing parts of or entire projects for road, site, parking areas, water and sanitary sewer piping as well as facility upgrades.

3. The Contractor may utilize subcontractors in support of Civil Engineering task orders, such as but not limited to specialty knowledge consultants, survey, right-of-way acquisition, public involvement, project controls, project management, specialty training and event hosting. See Section 15 for additional requirements regarding subcontractors and work proposals.

Docusign Envelope ID: 3138D9E6-B368-49BC-9FC5-0B5F5778AB70

D. A Purchase Order (PO) will be issued against this contract for each specific CTO. No work is authorized nor may commence without receipt of a PO. Once received, the Contractor shall perform the professional services required to complete the CTO contained therein. Individual PO's are not to exceed $250,000.00, unless Anchorage's Purchasing Director or their designee approves of a greater amount.

E. Anchorage shall not allow any claim for services other than those described in this section. However, the Contractor may provide, at its own expense, any other services that are consistent with this contract.

Section 3. Time for Performance.

A. This contract becomes effective when signed on behalf of Anchorage and shall remain in effect for three year(s) from the date of final signature.

B. Upon receipt of a PO authorizing work, the Contractor shall commence performance of that work and complete that performance in accordance with the schedule contained therein.

Section 4. Compensation; Method of Payment.

A. Subject to the Contractor's satisfactory performance, Anchorage shall pay the Contractor no more than SEVEN HUNDRED FIFTY THOUSAND DOLLARS ($750,000.00) in accordance with this section.

B. Anchorage shall pay the Contractor for actions performed for a CTO issued under this contract in accordance with the schedule of professional fees provided in response to the Owner's request for proposals, as periodically updated, unless payment is restricted in this or other sections. Once per year, professional fees may be adjusted at a percentage rate that is less than or equal to the published consumer price index (CPI) for Contract Escalation of Anchorage for services other than medical. Any rate adjustment proposals must be mutually agreed to by the contract Administrator and the Contractor.

C. Each month the Contractor shall present a bill to the Owner describing the work for which it seeks payment and documenting expenses and fees to the satisfaction of the Owner. If any payment is withheld because the Contractor's performance is unsatisfactory, the Owner must, within ninety (90) days of the payment denial, notify the Contractor of the payment denial and set forth, with reasonable specificity, what was unsatisfactory and why.

D. The Contractor is not entitled to any compensation under this contract, other than is expressly provided for in this section.

E. As a condition of payment, the Contractor shall have paid all municipal taxes currently due and owing by the Contractor.

F. Labor rates for the Contractor and their subcontractors must be all inclusive. Separate charges for insurance, special pay, pay enhancements, employer paid contributions to retirement programs, employer paid benefits, overhead, and profit, and additional

Docusign Envelope ID: 3138D9E6-B368-49BC-9FC5-0B5F5778AB70

accessory office components associated with the charging position, such as but not limited to, internet, remote office, telephone, computer, computer programs, office supplies, office space, and furniture will not be allowed regardless of what is shown in the fee schedule in or as updated per item B in this section.

Section 5. Termination of the Contractor's Services.

The Contractor's services under Section 2 may be terminated:

A. By mutual consent of the parties.

B. For the convenience of Anchorage, provided that Anchorage notifies the Contractor in writing of its intent to terminate under this paragraph at least 10 days prior to the effective date of the termination.

C. For cause, by either party where the other party fails in any material way to perform its obligations under this contract. Termination under this subsection is subject to the condition that the terminating party notifies the other party of its intent to terminate, stating with reasonable specificity the grounds therefor, and the other party fails to cure the default within thirty (30) days after receiving the notice.

Section 6. Duties Upon Termination.

A. If Anchorage terminates the Contractor's services for convenience, Anchorage shall pay the Contractor for its actual costs reasonably incurred in performing before termination. Payment under this subsection shall never exceed the total compensation allowable under Section 4. All finished and unfinished documents and materials prepared by the Contractor shall become the property of Anchorage.

B. If the Contractor's services are terminated for cause, Anchorage shall pay the Contractor the reasonable value of the services satisfactorily rendered prior to termination less any damages suffered by Anchorage because of the Contractor's failure to perform satisfactorily. The reasonable value of the services rendered shall never exceed the contract rate for such services, and payment under this subsection shall not exceed ninety percent (90%) of the total compensation allowable under Section 4. Any finished or unfinished documents or materials prepared by the Contractor under this contract shall become the property of Anchorage at its option.

C. If the Contractor receives payments exceeding the amount to which it is entitled under subsections A or B of this section, he shall remit the excess to the Administrator within thirty (30) days of receiving notice to do so.

D. The Contractor shall not be entitled to any compensation under this section until the Contractor has delivered to the Administrator all documents, records, work product, materials and equipment owned by Anchorage and requested by the Administrator.

Docusign Envelope ID: 3138D9E6-B368-49BC-9FC5-0B5F5778AB70

E. If the Contractor's services are terminated, for whatever reason, the Contractor shall not claim any compensation under this contract, other than that allowed under this section.

F. Except as provided in this section, termination of the Contractor's services under Section 5 does not affect any other right or obligation of a party under this contract.

G. If a final audit has not been performed before the Contractor's services are terminated, Anchorage may recover any payments for costs disallowed as a result of the final audit.

Section 7. Insurance.

A. The Contractor shall maintain in good standing, for the entire period of the contact, the insurance described in subsection B of this section. Before rendering any services under this contract, the Contractor shall furnish the Administrator with a Certificate of Insurance in accordance with subsection B of this section in a form acceptable to the Risk Manager for Anchorage.

B. The Contractor shall provide the following insurance:

1) $500,000 Employers Liability and Workers Compensation as required by Alaska Law.

2) Commercial Automobile Liability in the amount of $1,000,000 combined single limit to include: owned, hired, and non-owned.

3) Commercial General Liability including:

a. $2,000,000 General Aggregate
b. $2,000,000 Products/Completed Operations
c. $1,000,000 Personal & Advertising Injury
d. $1,000,000 Each Occurrence
e. $5,000 Medical Payments

4) Professional Liability insurance with limits not less than $1,000,000 per occurrence and $2,000,000 aggregate.

5) Cyber/Privacy Liability insurance with limits not less than $3,000,000. The Cyber coverage shall include, but not be limited to, claims involving invasion of privacy violations, Information theft, and release of private information. The policy shall provide coverage for breach response costs as well as regulatory fines and penalties as well as credit monitoring expenses.

C. Policies written on a "claims-made basis" must have a two (2) year tail of coverage, or an unbroken continuation of coverage for two (2) years from the completion of the contract requirements.

D. Each policy of insurance required by this section shall provide advance notice to the MOA/Contract Administrator prior to cancellation in accordance with the policy. If the insurer does not notify the MOA on policy cancellation it shall be the contractor’s responsibility to notify the MOA of such cancellation.

Docusign Envelope ID: 3138D9E6-B368-49BC-9FC5-0B5F5778AB70

E. Except for Workers Compensation and Professional Liability each policy is to name The Municipality as an "additional insured" and the actual policy endorsement shall accompany each Certificate of Insurance.

F. General Liability, Workers Compensation, and Automobile policies shall be endorsed to waive all rights of subrogation against the Municipality of Anchorage by reason of any payment made for claims under the above coverage. This policy endorsement shall accompany each Certificate of Insurance.

G. All policies for general liability shall be primary and noncontributing with any insurance that may be carried by the Municipality.

H. If the Contractor maintains broader coverage and/or higher limits than the minimums shown above, the Municipality requires and shall be entitled to the broader coverage and/or the higher limits maintained by the Contractor. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the Municipality.

I. Contractor shall require and verify that all subcontractors maintain insurance meeting all requirements stated herein, and Contractor shall ensure that the Municipality is an additional insured on insurance required from subcontractors.

Section 8. Assignments.

Unless otherwise allowed by this contract or in writing by the Administrator, any assignment by the Contractor of its interest in any part of this contract or any delegation of duties under this contract shall be void, and an attempt by the Contractor to assign any part of its interest or delegate duties under this contract shall give Anchorage the right immediately to terminate this contract without any liability for work performed.

Section 9. Ownership; Publication, Reproduction and Use of Material.

A. Except as otherwise provided herein, all data, documents and materials produced by the Contractor under this contract shall be the property of Anchorage, which shall retain the exclusive right to publish, disclose, distribute and otherwise use, in whole or in part, any such data, documents or other materials. Exclusive rights shall not be attributed to portions of such materials presently in the public domain or which are not subject to copyright.

B. Should Anchorage elect to reuse Work products provided under this Contract for other than the original project and/or purpose, Anchorage will not hold Contractor liable for any damages resulting from Anchorage's reuse of work products for an unintended purpose. Additionally, any reuse of design drawings or specifications provided under this Contract must be limited to conceptual or preliminary use for adaptation and the original Constructor's or subcontractor's signature, professional seals and dates removed. Reuse of drawings and specifications, which require professional seals and dates removed, will

Docusign Envelope ID: 3138D9E6-B368-49BC-9FC5-0B5F5778AB70

be signed, sealed, and dated by the professional who is in direct supervisory control and responsible for adaptation.

C. Equipment purchased by the Contractor with designated contract funds shall be the sole property of Anchorage marked and inventoried as such with a copy of the inventory forwarded to Anchorage.

Section 10. Notices.

Any notice required pertaining to the subject matter of this contract shall be either sent via facsimile (FAX) or mailed by prepaid first class registered or certified mail, return receipt requested to the following addresses:

Anchorage: Municipality of Anchorage
Anchorage Water and Wastewater Utility
Attn: James Armstrong, P.E.
3000 Arctic Boulevard
Anchorage, AK 99503-3898
FAX: (907) 562-0824

Contractor: Coffman Engineers, Inc.
Attn: Tom Looney, P.E.
301 W. Northern Lights., Suite 200
Anchorage, AK 99503
FAX: (907)276-5042
tom.looney@coffman.com

Notices are effective upon the earlier of receipt, proof of good transmission (facsimiles only), or five (5) days after proof of proper posting.

Section 11. Contract Budget.

In connection with its performance under this contract the Contractor shall not make expenditures other than as provided in line items in the contract budget.

Section 12. Force Majeure.

A. Any failure to perform by either party due to force majeure shall not be deemed a violation or breach hereof.

B. As used in this contract, force majeure is an act or event of substantial magnitude, beyond the control of the delayed party, which delays the completion of this contract, including without limitation:

Docusign Envelope ID: 3138D9E6-B368-49BC-9FC5-0B5F5778AB70

1. Any interruption, suspension or interference resulting solely from the act of the Municipality or negligent act(s) of the Municipality not otherwise governed by the terms of this contract.
2. Strikes or work stoppages.
3. Any interruption, suspension or interference with the project caused by acts of God, or acts of a public enemy, wars, blockades, insurrections, riots, arrests or restraints of governments and people, civil disturbances or similar occurrences.
4. Order of court, administrative agencies or governmental officers other than the Municipality.

Section 13. Financial Management System.

The Contractor shall establish and maintain a financial management system that:

A. Provides accurate, current, and complete disclosure of all financial transactions relating to the contract;

B. Maintains separate accounts by source of funds for all revenues and expenditures and identifies the source and application of funds for the Contractor's performance under this contract, including information pertaining to subcontracts, obligations, unobligated balances, assets, liabilities, outlays and income;

C. Effectively controls and accounts for all municipal funds and contract property;

D. Compares actual expenditures with budgeted amounts and relates financial information to performance or productivity data including unit cost information where applicable;

E. Allocates administrative costs to direct service delivery units;

F. Minimizes the time between receipt of funds from Anchorage and their disbursement by the Contractor;

G. Provides accounting records supported by source documentation; and

H. Provides a systematic method assuring the timely and appropriate resolution of audit findings and recommendations.

Section 14. Funding Requirements.

If any funding source for this contract should impose additional requirements upon Anchorage for the use of those funds, the Contractor agrees to abide by those additional requirements immediately upon receipt of written notice thereof from Anchorage.

Docusign Envelope ID: 3138D9E6-B368-49BC-9FC5-0B5F5778AB70

Section 15. Subcontracts.

The Contractor may enter into subcontracts for the purchase of goods and services necessary for the performance of this contract, provided:

A. Every subcontract shall be reduced to writing and contain a precise description of the services or goods to be provided and the nature of the consideration paid therefore. Each subcontract is to provide a rate sheet with same limitation placed on the rates as the Contractor.
B. Every subcontract under which the Contractor delegates the provision of services shall be subject to review and approval by the Administrator before it is executed by the Contractor.
C. Every subcontract in an amount exceeding $1,000.00 shall require reasonable access to business records of the subcontractor relating to the purchase of goods or services pursuant to the subcontract.
D. The Contractor is not allowed a markup for goods and services. In accordance with item A, this provision extends to subcontractors

Docusign Envelope ID: 3138D9E6-B368-49BC-9FC5-0B5F5778AB70

PART II

GENERAL CONTRACT PROVISIONS

Section 1. Relationship of Parties.

The Contractor shall perform its obligations hereunder as an independent contractor of Anchorage. Anchorage may administer the contract and monitor the Contractor's compliance with its obligations hereunder. Anchorage shall not supervise or direct the Contractor other than as provided in this section.

Section 2. Nondiscrimination.

A. The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, national origin, ancestry, age, sex, sexual orientation, gender identity, or marital status, or who is a "qualified individual with a disability", as that phrase is defined in the Americans With Disabilities Act of 1990. The Contractor will take affirmative action to ensure that applicants are employed and that employees are treated during employment without regard to their race, color, religion, mental or physical disability, sexual orientation or gender identity. Such action shall include, without limitation, employment, upgrading, demotion or transfer, recruitment or recruiting advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training including apprenticeship. The Contractor agrees to post, in conspicuous places available to employees and applicants for employment, notices setting forth the provisions of this nondiscrimination clause.

B. The Contractor shall state, in all solicitations or advertisements for employees to work on contract jobs, that all qualified applicants will receive equal consideration for employment without regard to race, color, religion, national origin, ancestry, age, sex, sexual orientation, gender identity, marital status, or mental or physical disability.

C. The Contractor shall comply with all reporting requirements that may apply to it which the Anchorage Office of Equal Employment Opportunity Contract Compliance may establish by regulation. The contract compliance officer may accept the contractor's compliance with federal requirements or the contractor's federal reporting documents in lieu of reporting under this section.

D. The Contractor shall include the provisions of subsections A through C of this section in every subcontract or purchase order under this contract, so as to be binding upon every such subcontractor or vendor of the Contractor under this contract. The contract compliance officer may accept the contractor's compliance with federal requirements or the contractor's federal reporting documents in lieu of reporting under this section.

E. The Contractor shall comply with all applicable federal, state and municipal laws concerning the prohibition of discrimination including, but not limited to Title 5 and Title 7, Chapter 7.50 of the Anchorage Municipal Code.

Docusign Envelope ID: 3138D9E6-B368-49BC-9FC5-0B5F5778AB70

Section 3. Permits, Laws and Taxes.

The Contractor shall acquire and maintain in good standing all permits, licenses and other entitlements necessary to its performance under this contract. All actions taken by the Contractor under this contract shall comply with all applicable statutes, ordinances, rules and regulations. The Contractor shall pay all taxes pertaining to its performance under this contract.

Section 4. Nonwaiver.

The failure of either party at any time to enforce a provision of this contract shall in no way constitute a waiver of the provision, nor in any way affect the validity of this contract or any part hereof, or the right of such party thereafter to enforce each and every provision hereof.

Section 5. Amendment.

A. This contract shall only be amended, modified or changed by written document, executed by authorized representatives of the parties, with the same formality as this contract was executed.
B. For the purposes of any amendment modification or change to the terms and conditions of this contract, the only authorized representatives of the parties are:

Contractor: Tom Looney, P.E. – VP, Managing Principal

Anchorage: **Mayor, Municipal Manager or Approved Designee**

C. Any attempt to amend, modify, or change this contract by either an unauthorized representative or unauthorized means shall be void.

Section 6. Jurisdiction; Choice of Law.

Any civil action arising from this contract shall be brought in the Superior Court for the Third Judicial District of the State of Alaska at Anchorage. The law of the State of Alaska shall govern the rights and obligations of the parties under this contract.

Section 7. Severability.

Any provision of this contract decreed invalid by a court of competent jurisdiction shall not invalidate the remaining provisions of the contract.

Docusign Envelope ID: 3138D9E6-B368-49BC-9FC5-0B5F5778AB70

Section 8. Integration.

This instrument and all appendices and amendments hereto embody the entire agreement of the parties. There are no promises, terms, conditions or obligations other than those contained herein; and this contract shall supersede all previous communications, representations or agreements, either oral or written, between the parties hereto.

Section 9. Liability.

A. The Contractor shall indemnify, defend, save, and hold Anchorage harmless from any claims, lawsuits or liability, including reasonable attorneys' fees and costs, arising from any wrongful or negligent act, error or omission of the Contractor or any subcontractor as a result of the Contractor's or any subcontractor's performance pursuant to this contract.

B. The Contractor shall not indemnify, defend, save and hold Anchorage harmless from claims, lawsuits, liability, including reasonable attorneys' fees and costs arising from a wrongful or negligent act, error or omission solely of Anchorage occurring during the course of or as a result of Anchorage's performance pursuant to this contract.

C. Where claims, lawsuits or liability, including attorneys' fees and costs arise from wrongful or negligent act of both Anchorage and the Contractor, the Contractor shall indemnify, defend, save and hold Anchorage harmless from only that portion of claims, lawsuits or liability, including attorneys' fees and costs, which result from the Contractor's or any subcontractor's wrongful or negligent acts occurring as a result of the Contractor's performance pursuant to this contract.

Section 10. Inspection and Retention of Records.

The Contractor shall, at any time during normal business hours and as often as Anchorage may deem necessary, make available to Anchorage, for examination, all records with respect to all matters covered by this contract for a period ending three years after the date the Contractor is to complete performance in accordance with Section 2 of the Special Provisions. Upon request, and within a reasonable time, the Contractor shall submit such other information and reports relating to its activities under this contract, to Anchorage, in such form and at such times as Anchorage may reasonably require. The Contractor shall permit Anchorage to audit, examine and make copies of such records, and to make audits of all invoices, materials, payrolls, records of personnel and other data relating to all matters covered by this contract. Anchorage may, at its option, permit the Contractor to submit its records to Anchorage in lieu of the retention requirements of this section.

Docusign Envelope ID: 3138D9E6-B368-49BC-9FC5-0B5F5778AB70

Section 11. Availability of Funds.

Payments under this contract require funds from future appropriations and are subject to future appropriations. If sufficient funds are not appropriated for payments required under this contract, this contract shall terminate without penalty to Anchorage and Anchorage shall not be obligated to make payments under this contract beyond those which have previously been appropriated.

IN WITNESS WHEREOF, the parties have executed this contract on the date and at the place shown below.

Municipality of Anchorage
Mark Corsentino
Director, Anchorage Hydropower Utility
632 W. Sixth Avenue
Anchorage, AK 99501

Subject: Notification of Contract Services Expansion – Anchorage Hydropower Utility

Dear Mr. Corsentino,
We appreciate the opportunity to expand our services to support the Anchorage Hydropower Utility (AHP). Below, we have outlined our firm's expertise and experience in response to your request. We have also included short resumes of key personnel who will be involved in providing these services. In addition to the staff highlighted below, *Coffman's Anchorage office has a team of 132 professionals who offer civil, structural, mechanical, electrical, and fire protection engineering, as well as corrosion control services, commissioning, landscape architecture, and project management services*. We are happy to work with AHP to outline the scope of services and define the right staff to support AHP.

1. Expertise and Experience with Electric Generation and Transmission

   - **Major Utility – Decarbonization Strategy**: Leveraging our multidiscipline experience across our company, Coffman authored a report on the technologies that could support the decarbonization of the Alaska Railbelt. The report was a comprehensive overview of nearly every technology that could be deployed to provide electricity or thermal energy to Alaska with an assessment of scale across the state.
   - **North Slope Electrical Power Sharing**: This project was for a confidential client and included detailed engineering for the electrical infrastructure, power distribution, and communication system upgrades required to synchronize, interconnect, and share power between two independent power generation facilities located on the North Slope of Alaska with a 12 mile long, 35kV tie-line.
   - **Galena Power Plant Upgrades**: Coffman provided planning and multidiscipline engineering support for this project focused on modernizing the Galena Power Plant by replacing the medium voltage generation and distribution switchgear and generation control system while also allowing the flexibility to integrate solar PV and battery energy storage to this isolated microgrid. This multi-phased project included scoping, design, owner's engineering, and commissioning. Currently, our team is designing electrical and communications systems for a new PV/BESS system for the project
   - **Eareckson Air Base Electrical Distribution Infrastructure**: Coffman facilitated an online partial discharge test and condition assessment of the complete electrical distribution system at Eareckson Air Station to determine existing infrastructure condition and level of degradation. The condition assessment was used by Coffman and the client to target replacement of degraded cable and help control project costs. The team also produced a detailed design for the

$40M bid-build construction project to replace six miles of degraded cable, demolish unnecessary equipment, replace 36 damaged transformers, replace 13 damaged cable junction pedestals, and upgrade feeder cross connection switch capabilities by installing 9 pad mounted switches. Construction was completed in 2024.

2. Expertise and Experience with Hydroelectric Projects

   - **Homer Electrical Association Corrosion Services**: Coffman provided comprehensive corrosion services for the Bradley Lake Hydroelectric Dam, commissioned by the Homer Electrical Association. Our work included commissioning new rectifiers and developing detailed design drawings for the Power Tunnel and Diversion Tunnel Gate Houses. Additionally, we conducted an in-depth analysis and provided a summary of corrosion mechanisms potentially causing accelerated corrosion on the Bradley Lake water intake valves.
   - **Kodiak Outletworks Penstock Inspections:** Coffman prepared and executed a comprehensive plan to assess the mechanical integrity of the 36" outletworks pipeline and the 96" and 69" penstock anomalies. This project involved performing detailed site visits, analyzing visual and non-destructive testing data across multiple years inspections, evaluating remaining pipeline strength, and preparing data summary reports that detailed the inspection findings. Additionally, we developed a repair option analysis for the identified anomalies.

3. Experience Maintaining Records in Accordance with Uniform System of Accounts and Maintain Continuing Property Records:

   - We do not have any experience with the Uniform System of Accounts or maintaining continuing property records.

PROPOSED STAFF:

As indicated above, we have a breadth of engineering services to offer and a depth of in-state staffing that AHP may find beneficial for this work. Below are three individuals that are well suited to support AHP, but I am open to discovering the specific needs of AHP and identifying the best staff that Coffman can offer. We can provide more detailed resumes upon request.

Nicholai Smith, PE (*AK#108597*) **| Principal, Electrical Engineer**
Nicholai brings 16 years of electrical engineering expertise, specializing in low and medium voltage power generation and distribution, energy conservation, and control system design. His extensive experience includes client project engineering support, multidiscipline design team management, electrical and instrumentation design, construction, and commissioning support for a wide variety of projects. These projects encompass medium voltage electrical distribution systems, utility power plant upgrades, oil and gas processing and production facilities, and associated SCADA systems.

Nicholai's recent relevant experience includes serving as the lead electrical engineer for electrical distribution line extensions, where he conducted on-site construction inspections. He has worked on projects for Chugach Electric Association for more than 12 years and is familiar with their facilities and processes. His comprehensive knowledge and hands-on experience in electrical engineering makes him a valuable asset to the team, capable of delivering effective solutions that align with the

Municipality's technical, engineering, and management goals. Nicholai co manages Coffman's Anchorage office electrical department (23 total staff).

Martin Miller, PE (*AK#12030*) **| Senior Mechanical Engineer**
Martin has over 21 years of mechanical design and project management experience, specializing in utility, industrial, and commercial projects. His extensive background encompasses all stages of project development, including planning, design, installation, commissioning, and operations. Notably, Martin has worked on at least 25 projects for Chugach Electric Association in the past eight years, providing him with valuable insights into electric generation and transmission systems, particularly within the Alaska Railbelt.

Prior to joining Coffman in 2013, Martin was involved in capital projects at a utility company, further enhancing his expertise in managing large-scale utility operations. His strong technical background and utility experience make him a valued member of our team.

Lee Bolling, PE (*AK#100010*) **| Senior Mechanical Engineer**
Lee Bolling, a lifelong Alaskan, brings 18 years of extensive design experience on projects throughout Alaska, serving as a project manager, design team leader, and lead mechanical engineer. His diverse background includes large industrial oil and gas projects, community energy audits, and alternative energy feasibility studies. Lee has conducted numerous feasibility studies, evaluating the cost-effectiveness of various alternative energy sources such as wind, hydroelectric, biomass, solar thermal, solar PV, and heat pump systems.

Lee has provided engineering services for Chugach Electric Association and other local utilities, where he has developed cost-effective solutions for generator overheating, designed new exhaust fan systems, and contributed to their general engineering contracts. His versatility and hands-on experience in mechanical engineering make him a great addition to the team, capable of delivering effective solutions that align with the Municipality's technical, engineering, and management goals.

I believe that Coffman can provide services for items 1 and 2 in the list above. If you require additional information, please contact me at the phone number on this letterhead or via email at ben.momblow@coffman.com.

Sincerely,

Ben Momblow, PE
Managing Principal

EXHIBIT 6

CONTRACT FOR PROFESSIONAL SERVICES WITH ELECTRIC POWER SYSTEMS, INC.

In consideration of the mutual promises herein, ANCHORAGE and ELECTRIC POWER SYSTEMS, INC. agree as follows. This contract consists of:

A. Part I, consisting of 15 sections of Special Provisions;
B. Part II, consisting of 10 sections of General Provisions;
C. Appendix A – Fee Schedule consisting of two pages.

PART I
SPECIAL PROVISIONS

Section 1. Definitions. In this contract:

A. "Administrator" means the Engineering Division Director of the Anchorage Water and Wastewater Utility or his/her designee.

B. "Anchorage" means the Municipality of Anchorage.

C. "Contractor" means Electric Power Systems, Inc.

Section 2. Scope of Services.

A. Individual delivery orders (Contract Task Orders (CTOs) will be issued for specific projects. The Contractor shall perform the Professional Services required to complete the tasks set forth in each CTO.

B. The Contractor shall respond to each CTO with a proposal detailing cost and time required to complete the work. AWWU and the Contractor may refine the proposal for clarification of the scope of services prior to issuing Notice to Proceed for the CTO.

C. Each CTO is limited in scope to the work requested in the request for proposal (RFP) that led to this contract and as stated below;

1. Provide services to negotiate acquisition of real property interests for right-of-way needs from private, public, and institutional landowners.
2. Will negotiate on behalf of AWWU for purchase of easements, land parcels, temporary construction permits, right of entry, and telecommunication sites
3. Provide support or lead negotiations, appraisal review, escrow and title insurance documents. Obtain and/or provide title reports, legal descriptions, condemnation procedure displacement, property management documents, process compensation payments, expert witness testimony, purchase agreements, and coordination with the Heritage Land Bank.

D. Anchorage shall not allow any claim for services other than those described in this section. However, the Contractor may provide, at its own expense, any other services that are consistent with this contract.

Section 3. Time for Performance.

A. This contract becomes effective when signed on behalf of Anchorage.

B. The Contractor shall commence performance of the work described in Part I Section 2 as agreed upon with each written notice-to-proceed for each task order.

C. The Contractor shall complete all work associated with this contract two (2) years from the date of contract execution by Anchorage.

Section 4. Compensation; Method of Payment.

A. Subject to the Contractor's satisfactory performance, Anchorage shall pay the Contractor on a time and material basis or lump sum basis a sum not to exceed FOUR HUNDRED FIFTY THOUSAND DOLLARS ($450,000.00) in accordance with this section.

B. Anchorage shall pay the Contractor in accordance with the schedule of professional fees attached as Appendix A and incorporated herein by reference for services actually performed under this contract.

C. Each month the Contractor shall present a bill to the Administrator describing the work for which it seeks payment and documenting expenses and fees to the satisfaction of the Administrator. If any payment is withheld because the Contractor's performance is unsatisfactory, the Administrator must, within ten (10) days of the payment denial, notify the Contractor of the payment denial and set forth, with reasonable specificity, what was unsatisfactory and why. The Contractor is not entitled to any compensation under this contract, other than is expressly provided for in this section.

D. As a condition of payment, the Contractor shall have paid all municipal taxes currently due and owing by the Contractor.

Section 5. Termination of the Contractor's Services.

The Contractor's services under Section 2 may be terminated:

A. By mutual consent of the parties.

B. For the convenience of Anchorage, provided that Anchorage notifies the Contractor in writing of its intent to terminate under this paragraph at least 10 days prior to the effective date of the termination.

C. For cause, by either party where the other party fails in any material way to perform its obligations under this contract. For the purposes of this clause and in accordance with language in the Request for Proposal, cause shall include the substitution of team members as listed in the Contractor's response to the Request for Proposal and included in this contract (if so stated), without the prior written consent of the owner. Termination under this subsection is subject to the condition that the terminating party notifies the other party of its intent to terminate, stating with reasonable specificity the grounds therefore, and the other party fails to cure the default within thirty (30) calendar days after receiving the notice.

Section 6. Duties Upon Termination.

A. If Anchorage terminates the Contractor's services for convenience, Anchorage shall pay the Contractor for its actual costs reasonably incurred in performing

before termination. Payment under this subsection shall never exceed the total compensation allowable under Section 4. All finished and unfinished documents and materials prepared by the Contractor shall become the property of Anchorage.

B. If the Contractor's services are terminated for cause, Anchorage shall pay the Contractor the reasonable value of the services satisfactorily rendered prior to termination less any damages suffered by Anchorage because of the Contractor's failure to perform satisfactorily. The reasonable value of the services rendered shall never exceed the contract rate for such services, and payment under this subsection shall not exceed ninety percent (90%) of the total compensation allowable under Section 4. Any finished or unfinished documents or materials prepared by the Contractor under this contract shall become the property of Anchorage at its option.

C. If the Contractor receives payments exceeding the amount to which it is entitled under subsections A or B of this section, he shall remit the excess to the Administrator within thirty (30) days of receiving notice to do so.

D. The Contractor shall not be entitled to any compensation under this section until the Contractor has delivered to the Administrator all documents, records, work product, materials and equipment owned by Anchorage and requested by the Administrator.

E. If the Contractor's services are terminated, for whatever reason, the Contractor shall not claim any compensation under this contract, other than that allowed under this section.

F. If a final audit has not been performed before the Contractor's services are terminated, Anchorage may recover any payments for costs disallowed as a result of the final audit.

G. Except as provided in this section, termination of the Contractor's services under Section 5 does not affect any other right or obligation of a party under this contract.

Section 7. Insurance.

A. The Contractor shall maintain in good standing, for the entire period of the contract, the insurance described in subsection B of this section. Before rendering any services under this contract, the Contractor shall furnish the Administrator with proof of insurance in accordance with subsection B of this section in a form acceptable to the Risk Manager for Anchorage.

B. The Contractor shall provide the following insurance:

1.) $500,000 Employers Liability and Worker's Compensation as required by Alaska Law.

2.) Commercial Automobile Liability per occurrence in the amount of $500,000 single limit to include: owned, hired, and non-owned.

3.) Commercial General Liability in the amount of $1,000,000 combined single limit to include:

Premises Operations

Products and Completed Operations
Blanket Contractual

Broad Form Property Damage
Independent Contractors
Personal Injury

4.) Architects and Engineers Errors and Omissions Liability in the amount of $1,000,000.

Policies written on a "claims made basis" must have a two (2) year tail of coverage, or an unbroken continuation of coverage for two (2) years, from the completion of the contract requirements.

C. Each policy of insurance required by this section shall provide for no less than 20 days advance notice to the MOA/Contract Administrator prior to cancellation in accordance with the policy. If the insurer does not notify the MOA upon policy cancellation it shall be the contractor's responsibility to notify the MOA of such cancellation.

D. With the exception of Worker's Compensation and Professional Liability each policy shall name the Municipality of Anchorage as an "Additional/Named insured" and the actual policy endorsement shall accompany each Certificate of Insurance.

E. General Liability and Automobile policies shall be endorsed to waive all rights of subrogation against the Municipality of Anchorage by reason of any payment made for claims under the above coverage. This policy endorsement should accompany each Certificate of Insurance.

Section 8. Assignments.

Unless otherwise allowed by this contract or in writing by the Administrator, any assignment by the Contractor of its interest in any part of this contract or any delegation of duties under this contract shall be void, and an attempt by the Contractor to assign any part of its interest or delegate duties under this contract shall give Anchorage the right immediately to terminate this contract without any liability for work performed.

Section 9. Ownership; Publication, Reproduction and Use of Material.

A. Except as otherwise provided herein, all data, documents and materials produced by the Contractor under this contract shall be the property of Anchorage, which shall retain the exclusive right to publish, disclose, distribute and otherwise use, in whole or in part, any such data, documents or other materials. Exclusive rights shall not be attributed to portions of such materials presently in the public domain or which are not subject to copyright.

B. Should Anchorage elect to reuse Work products provided under this Contract for other than the original project and/or purpose, Anchorage will not hold Contractor liable for any damages resulting from Anchorage's reuse of work products for an unintended purpose. Additionally, any reuse of design

drawings or specifications provided under this Contract must be limited to conceptual or preliminary use for adaptation and the original Constructor's or subcontractor's signature, professional seals and dates removed. Such reuse of drawings and specifications, which require professional seals and dates removed, will be signed, sealed, and dated by the professional who is in direct supervisory control and responsible for adaptation.

C. Equipment purchased by the Contractor with designated contract funds shall be the sole property of Anchorage marked and inventoried as such with a copy of the inventory forwarded to Anchorage.

Section 10. Notices.

Any notice required pertaining to the subject matter of this contract shall be either sent via facsimile (FAX) or mailed by prepaid first class registered or certified mail, return receipt requested to the following addresses:

Anchorage: Municipality of Anchorage
Anchorage Water and Wastewater Utility
Attn: Brian Baus, P.E.
3000 Arctic Boulevard
Anchorage, AK 99503-3898
FAX: (907) 562-0824

Contractor: Electric Power Systems, Inc.
Attn: David Burlingame, P.E.
3305 Arctic Blvd. Suite 201
Anchorage, AK 99503
FAX: (907) 770-7749

Notices are effective upon the earlier of receipt, proof of good transmission (facsimiles only), or five (5) days after proof of proper posting.

Section 11. Contract Budget.

In connection with its performance under this contract the Contractor shall not make expenditures other than as provided in line items in the contract budget.

Section 12. Force Majeure.

A. Any failure to perform by either party due to force majeure shall not be deemed a violation or breach hereof.

B. As used in this contract, force majeure is an act or event of substantial magnitude, beyond the control of the delayed party, which delays the completion of this contract, including without limitation:

1.) Any interruption, suspension or interference resulting solely from the act of Anchorage or negligent act(s) of Anchorage not otherwise governed by the terms of this contract.

2.) Strikes or work stoppages.

3.) Any interruption, suspension or interference with the project caused by acts of God, or acts of a public enemy, wars, blockades, insurrections, riots, arrests or restraints of governments and people, civil

disturbances or similar occurrences.

4.) Order of court, administrative agencies or governmental officers other than Anchorage.

Section 13. Financial Management System.

The Contractor shall establish and maintain a financial management system that:

A. Provides accurate, current, and complete disclosure of all financial transactions relating to the contract;

B. Maintains separate accounts by source of funds for all revenues and expenditures and identifies the source and application of funds for the Contractor's performance under this contract, including information pertaining to subcontracts, obligations, unobligated balances, assets, liabilities, outlays and income;

C. Effectively controls and accounts for all municipal funds and contract property;

D. Compares actual expenditures with budgeted amounts and relates financial information to performance or productivity data including unit cost information where applicable;

E. Allocates administrative costs to direct service delivery units;

F. Minimizes the time between receipt of funds from Anchorage and their disbursement by the Contractor;

G. Provides accounting records supported by source documentation; and

H. Provides a systematic method assuring the timely and appropriate resolution of audit findings and recommendations.

Section 14. Funding Requirements.

In the event that any funding source for this contract should impose additional requirements upon Anchorage for the use of those funds, the Contractor agrees to abide by those additional requirements immediately upon receipt of written notice thereof from Anchorage.

Section 15. Subcontracts.

The Contractor may enter into subcontracts for the purchase of goods and services necessary for the performance of this contract, provided:

A. Every subcontract shall be reduced to writing and contain a precise description of the services or goods to be provided and the nature of the consideration paid therefore.

B. Every subcontract under which the Contractor delegates the provision of services shall be subject to review and approval by the Administrator before it is executed by the Contractor.

C. Every subcontract in an amount exceeding $1,000.00 shall require reasonable access to business records of the subcontractor relating to the purchase of goods or services pursuant to the subcontract.

PART II
GENERAL CONTRACT PROVISIONS

Section 1. Relationship of Parties.

The Contractor shall perform its obligations hereunder as an independent contractor of Anchorage. Anchorage may administer the contract and monitor the Contractor's compliance with its obligations hereunder. Anchorage shall not supervise or direct the Contractor other than as provided in this section.

Section 2. Nondiscrimination.

A. The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, national origin, ancestry, age, sex, or marital status or who is a "qualified individual with a disability," as that phrase is defined in the Americans With Disabilities Act of 1990. The Contractor will take affirmative action to ensure that applicants are employed and that employees are treated during employment without regard to their race, color, religion, or mental or physical disability. Such action shall include, without limitation, employment, upgrading, demotion or transfer, recruitment or recruiting advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training including apprenticeship. The Contractor agrees to post, in conspicuous places available to employees and applicants for employment, notices setting forth the provisions of this nondiscrimination clause.

B. The Contractor shall state, in all solicitations or advertisements for employees to work on contract jobs, that all qualified applicants will receive equal consideration for employment without regard to race, color, religion, national origin, ancestry, age, sex or marital status, or mental or physical disability.

C. The Contractor shall comply with any and all reporting requirements that may apply to it which the Anchorage Office of Equal Employment Opportunity Contract Compliance may establish by regulation. The contract compliance officer may accept the contractor's compliance with federal requirements or the contractor's federal reporting documents in lieu of reporting under this section.

D. The Contractor shall include the provisions of subsections A through C of this section in every subcontract or purchase order under this contract, so as to be binding upon every such subcontractor or vendor of the Contractor under this contract. The contract compliance officer may accept the contractor's compliance with federal requirements or the contractor's federal reporting documents in lieu of reporting under this section.

E. The Contractor shall comply with all applicable federal, state and municipal laws concerning the prohibition of discrimination including, but not limited to Title 5 and Title 7, Chapter 7.50 of the Anchorage Municipal Code.

Section 3. Permits, Laws and Taxes.

The Contractor shall acquire and maintain in good standing all permits, licenses and other entitlements necessary to its performance under this contract. All actions taken by the

Contractor under this contract shall comply with all applicable statutes, ordinances, rules and regulations. The Contractor shall pay all taxes pertaining to its performance under this contract.

Section 4. Nonwaiver.

The failure of either party at any time to enforce a provision of this contract shall in no way constitute a waiver of the provision, nor in any way affect the validity of this contract or any part hereof, or the right of such party thereafter to enforce each and every provision hereof.

Section 5. Amendment.

A. This contract shall only be amended, modified or changed by writing, executed by authorized representatives of the parties, with the same formality as this contract was executed.

B. For the purposes of any amendment modification or change to the terms and conditions of this contract, the only authorized representatives of the parties are:

Contractor: David Burlingame, P.E.
Principal

Anchorage: **Mayor, Municipal Manager or Approved Designee**

C. Any attempt to amend, modify, or change this contract by either an unauthorized representative or unauthorized means shall be void.

Section 6. Jurisdiction; Choice of Law.

Any civil action rising from this contract shall be brought in the Superior Court for the Third Judicial District of the State of Alaska at Anchorage. The law of the State of Alaska shall govern the rights and obligations of the parties under this contract.

Section 7. Severability.

Any provision of this contract decreed invalid by a court of competent jurisdiction shall not invalidate the remaining provisions of the contract.

Section 8. Integration.

This instrument and all appendices and amendments hereto embody the entire agreement of the parties. There are no promises, terms, conditions or obligations other than those contained herein; and this contract shall supersede all previous communications, representations or agreements, either oral or written, between the parties hereto.

Section 9. Liability.

A. The Contractor shall indemnify, defend, save, and hold Anchorage harmless from any claims, lawsuits or liability, including reasonable attorneys' fees and costs, arising from any wrongful or negligent act, error or omission of the Contractor or any subcontractor as a result of the Contractor's or any subcontractor's performance pursuant to this contract.

B. The Contractor shall not indemnify, defend, save and hold Anchorage harmless from claims, lawsuits, liability, or attorneys' fees and costs arising from wrongful or negligent acts, error or omission solely of Anchorage occurring during the course of or as a result of the performance of this

contract.

C. Where claims, lawsuits or liability, including attorneys' fees and costs arise from wrongful or negligent act of both Anchorage and the Contractor, the Contractor shall indemnify, defend, save and hold Anchorage harmless from only that portion of claims, lawsuits or liability, including attorneys' fees and costs, which result from the Contractor's or any subcontractor's wrongful or negligent acts occurring as a result of the Contractor's performance pursuant to this contract.

Section 10. Inspection and Retention of Records.

The Contractor shall, at any time during normal business hours and as often as Anchorage may deem necessary, make available to Anchorage, for examination, all of its records with respect to all matters covered by this contract for a period ending three years after the date the Contractor is to complete performance in accordance with Section 2 of the Special Provisions. Upon request, and within a reasonable time, the Contractor shall submit such other information and reports relating to its activities under this contract, to Anchorage, in such form and at such times as Anchorage may reasonably require. The Contractor shall permit Anchorage to audit, examine and make copies of such records, and to make audits of all invoices, materials, payrolls, records of personnel and other data relating to all matters covered by this contract. Anchorage may, at its option, permit the Contractor to submit its records to Anchorage in lieu of the retention requirements of this section.

IN WITNESS WHEREOF, the parties have executed this amendment on the date and at the place shown below.

MEMORANDUM

DATE: April 26, 2024

TO: Rachelle Alger, Purchasing Director, Purchasing Department

THRU: Mark A. Corsentino, P.E., General Manager, AWWU

THRU: Mark Schimscheimer, P.E., Director, Engineering Division, AWWU

FROM: James Armstrong, P.E., Project Manager, AWWU

SUBJECT: Amendment No. 1 to the Term Contract for Electric Power Systems, Inc. (4400001444)

Professional Services Contract Amendment No. 1 for Contract Number 4400001444 is attached to this Memorandum for the additional scope of services as described below.

All - Please review and sign this contract amendment or call James Armstrong at (907) 564-2776 if you have any questions or comments.

SUMMARY INFORMATION

Contractor/Consultant:	Electric Power Systems, Inc.
Staff Contact:	James Armstrong, P.E., (907) 564-2776
Scope of Services:	2022-2024 Professional Services Contract Amendment No. 1: Extend existing professional services contract to allow time for completion of existing tasks and the procurement of new services.

CONTRACT SUMMARY

Original Contract	$450,000.00
Amendment No. 1 (Time Extension Only)	$ 0.00
Revised Contract Amount	**$450,000.00**

Funding String: This is a non-encumbering term contract. Task orders are written against specific projects and therefore no specific funding string can be identified.

Assembly Action: N/A

AWWU Contract No. 4400001444

Amendment No. 1
Term Contract for Professional Services
with Electric Power Systems, Inc.

This Amendment is made and entered into by and between the Municipality of Anchorage, Anchorage Water & Wastewater Utility, hereinafter referred to as "AWWU" and Electric Power Systems, Inc., hereinafter referred to as "Contractor".

WHEREAS, AWWU and the Contractor entered into a contract for professional services dated June 28, 2022, hereinafter referred to as the "Contract"; and

WHEREAS, the parties have the authority to amend the Contract pursuant to Part II, Section 5 and desire to do so;

NOW, THEREFORE, in consideration of the mutual covenants and agreements contained in the contract, the parties do hereby agree that the Contract shall be amended as follows:

1. Part 1, Section 3, Time for Performance, Paragraph C of the contract shall be amended as follows:

The Contract is hereby extended through December 31, 2024

The parties agree that all other portions of the Contract shall remain in full force and effect in accordance with its terms.

IN WITNESS WHEREOF, the parties have executed this amendment on the date and at the place shown below.

Amendment No. 2
Term Contract for Professional Services
with Electric Power Systems Inc.

This Amendment is made and entered into by and between the Municipality of Anchorage, Anchorage Water & Wastewater Utility, hereinafter referred to as "AWWU" and Electric Power Systems Inc., hereinafter referred to as "Contractor".

WHEREAS, AWWU and the Contractor entered into a contract for professional services dated June 28, 2022, hereinafter referred to as the "Contract"; and

WHEREAS, the parties have the authority to amend the Contract pursuant to Part II, Section 5 and desire to do so;

NOW, THEREFORE, in consideration of the mutual covenants and agreements contained in the contract, the parties do hereby agree that the Contract shall be amended as follows:

1. Part 1, Section 2, Scope of Services, Paragraph C of the contract shall be deleted in its entirety and replaced as follows:

C. Each CTO is limited in scope to the work requested in the request for proposal (RFP) that led to this contract and as stated below;

1. **Provide services to negotiate acquisition of real property interests for right-of-way needs from private, public, and institutional landowners.**
2. **Will negotiate on behalf of AWWU for purchase of easements, land parcels, temporary construction permits, right of entry, and telecommunication sites**
3. **Provide support or lead negotiations, appraisal review, escrow and title insurance documents. Obtain and/or provide title reports, legal descriptions, condemnation procedure displacement, property management documents, process compensation payments, expert witness testimony, purchase agreements, and coordination with the Heritage Land Bank.**
4. **Electrical Engineering professional services may include, but are not limited to, studying, reporting on, designing, inspecting, and managing parts of or entire projects for design and consultation for such items as pump stations, booster stations, pressure regulating stations, SCADA telemetry, and power transmission and distribution systems for existing and proposed MOA facilities. These facilities may be above ground or below ground.**
5. **The Contractor may utilize subcontractors in support of Electrical Engineering task orders when deemed necessary to complete their work, such as but not limited to specialty knowledge consultants. See Section 15 for additional requirements regarding subcontractors and work proposals.**

c. Part 1, Section 3, Time for Performance, Paragraph C of the contract shall be amended as follows:

The Contract is hereby extended through December 31, 2025

Docusign Envelope ID: 2379E3F6-523B-46B5-A7BD-597EDD872414

The parties agree that all other portions of the Contract shall remain in full force and effect in accordance with its terms.

IN WITNESS WHEREOF, the parties have executed this amendment on the date and at the place shown below.

Re: Qualifications for Professional Engineering Services, Anchorage Hydropower Utility

Mr. Corsentino,

Electric Power Systems, Inc. (EPS) submits the following qualifications to support the Anchorage Hydropower Utility in fulfilling its growth and development goals by providing professional engineering services. Based in Anchorage, we have served Alaska's electric utilities for over 40 years. Over 90% of our work is for Alaska electrical projects, mainly in Southcentral Alaska.

Thank you for considering EPS as a firm to support AHU's future development. If you have questions, please contact myself or Sabrina Wynne at (907) 522–5148 (email: swynne@epsinc.com).

Sincerely,

David Burlingame, PE, President

Key Personnel

David W. Burlingame, P.E., Principal, has lived and worked in the Railbelt for 40+ years. David serves as EPS's CEO and as a Principal Engineer. He earned a BSEE degree from the University of Oklahoma in 1981 and is an Alaska registered P.E. (AELE7356). David has experience in the performance of system studies, relaying and protection design, substation design, substation maintenance, system troubleshooting, and system operations gained from his work as a consulting engineer in addition to the 15+ years of experience working for utilities as an engineering manager, manager of power control, and vice-president in charge of engineering, transmission, and power production. He is a registered professional engineer in the states of Alaska, Hawaii, Guam, Oregon and the Commonwealth of Northern Marianas. He has been involved in studies and planning projects in Alaska, Hawaii, Guam, and Washington.

James W. Cote, Jr., Ph.D., P.E. has 40 years of industry and academic experience with a focus on system dynamics and equipment modeling. He has been an electrical engineer since 1982, and has been with EPS as a Principal Engineer for over 20 years. In that time, he has been EPS' lead studies engineer and studies staff manager. Jim has provided numerous studies to utility owners on the Railbelt system and other utility clients throughout Alaska and the US, including system operations studies, impact and interconnection studies, and renewable generation studies. He is principally responsible for the development of the Alaska Railbelt PSS/e model and many of the custom dynamic models contained therein. Jim has contributed immensely to the simulation, modeling, and understanding of the Railbelt's dynamics throughout his time with EPS and as an Associate Professor at the University of Alaska Fairbanks. Jim focuses on the fundamentals of engineering in his approach and combines both an industrial and academic/research-based approach to solving difficult engineering challenges with a focus on operational impact and finding the most cost-effective solution to meet grid system needs. (Availability: 20-40%)

Richard J. Meier, MSEE, P.E. is a Senior Power System Engineer in EPS's Studies Group and has been intimately involved in Railbelt transmission planning, integration, and operational studies for the last 6+ years at EPS. Rich has 10+ years of experience in power systems modeling, simulation, operations, and software. Rich began his career in the Energy Management System (EMS) space as a power system software engineer. He has worked short stints for a DOE national lab and a vertically integrated utility. Rich has a broad range of studies experience, including power flow, transient stability, controls and protection, interconnection and impact studies, long-range planning studies, power system forensic event analysis, EMT simulation and modeling, as well as renewable generation integration. Rich completed his BSEE and MSEE at Oregon State University in 2013 and 2015 respectively. He holds a PE in the State of Washington. (Availability: 75-100%)

Greg Huffman P.E., S.E. is leading our technical team (State of Alaska Civil C8349 and Structural 13692 Engineer). He will lead engineering and provide quality control and assurance for this project. Greg provided these same services for many previous MEA transmission line and communication addition projects, including Lucas Substation - O'Neill Tap 115 kV double circuit line, Teeland - Redington 115 kV line, EGS to Hospital 115 kV line, Herning 115 kV getaways, EGS to Eklutna Hydro ADSS addition, Hospital to Headquarters ADSS addition, and Hospital to Shaw ADSS addition. He also served in a similar capacity on every project in this proposal's Project Experience section, all of which have been active within the last five years. There is no practicing engineer with more experience on Southcentral Alaska transmission lines.

As EPS' lead technical representative, Greg will be involved in and knowledgeable about all facets of this project. He will work closely with our project manager to facilitate coordination with consultants, MEA and their right of way consultant, and the rest of the project team to ensure we complete the project to EPS' high-quality standards, in full compliance with contract documents to MEA's satisfaction. Mr. Huffman has worked as a civil and structural engineer since the beginning of his career 41 years ago. Twenty-seven years of that time have been focused on Alaska transmission projects. He has contributed engineering and design expertise to hundreds of successful electric power generation, substation, transmission, distribution, and fiber optic communication projects.

Greg has significant experience designing projects for construction and operation in subarctic environments and different geotechnical, climactic, and terrain conditions. He has analyzed and designed transmission structures up to 345kV using wood, tubular steel, and lattice aluminum materials. His foundation experience includes spread footings, drilled piers, driven piles, helical piles, grouted piles, and micropiles. Additionally, Mr. Huffman has investigated and provided engineering and consulting for repairing structures damaged by river scour, avalanches, frost jacking, permafrost degradation, and deep organic (muskeg) conditions.

Peter Blake, P.E. - Transmission Line Engineer
Mr. Blake, PE (State of Alaska Civil 118420 Engineer), is an experienced Alaska line designer. His experience includes delivering analyses, engineering, and designing lines up to 230kV using wood, steel, concrete, and hybrid materials. His work includes self-supporting poles, guyed poles, H-frames, and numerous types of conductors, shield wires, and fiber optic wires on many projects. He is proficient in using PLS-CADD to optimize line design.

Chris Davis, P.E.- Distribution Line Engineer
Mr. Davis (AK EE 10642) has been working as an engineer since 1994. He has wide-ranging experience designing distribution and transmission systems throughout Alaska. Before becoming an employee at EPS in 2006, he had 12 years of project experience in new construction and renovations for building systems. His work has included collecting field data, code analysis, rough-order-of-magnitude budgeting, planning, design, material ordering, quality assurance, and GIS as-builting.

Matthew Williams, P.E. - Transmission and Distribution Line Engineer
Mr. Williams, PE (AK EE 10252), has over 25 years of electrical engineering experience in Alaska, including over 20 years of experience designing transmission and distribution utility systems and infrastructure. His project experience includes design for voltages from 5 kV distribution up to 230 kV transmission and standards development, planning, sectionalizing, distributed generation impact, and coordination studies for distribution systems.

Carrie Miller, E.I.T
Ms. Miller is a civil engineer who has been designing transmission and distribution lines for EPS since 2006. She is proficient in AutoCADD and PLS-CADD operations. Carrie has provided these services on numerous Matanuska Electric Association projects including the current Lucas to O'Neil transmission design project.

Relevant Project Experience

Expertise with Alaska Railbelt Electric Generation Design

Doyon Utilities Ft. Wainwright Central Heating & Power Plant (CHPP) Upgrades, Ft. Wainwright, Alaska

The Fort Wainwright Combined Heat and Power Plant (CHPP) upgrade project corrected deficiencies in the installation's power plant, ensuring reliable power availability at all times. This project was accomplished in three phases. The phases included upgrading the intertie between the Ft. Wainwright coal-fired power plant and the local utility system and an upgrade of the controls and capability of the steam turbine generators. The scope of the project included designing two interties between the plant and a new 138 kV/12.47 kV substation also designed by EPS, and retirement of two existing 69 kV and 12.47 kV utility interties. The new interties required replacing twenty-two 12.47 kV breakers with eleven higher capacity breakers, designing and installing a plant SCADA system, new switchgear controls and protective relaying, automation and monitoring and plant communications as well as SEL-3354 hardened computers, and performed a plant grounding study. The project was completed in an energized plant and the design had to allow the project to be constructed without a plant outage due to the critical loads served from the facility. Each of the four turbine generator control panels were replaced in the new switchgear, four breaker ties to the new substation, a tie breaker and two feeder breakers to a new station service substation. EPS completed the design, construction management, coordination of switching, outage planning, quality control, commissioning, and testing. The project used SEL-300G and SEL-351A relays for the four generators, SEL-351A relays for the seven feeders and SEL-487 relays for the bus protection. The switchgear was integrated into the station HMI with complete automation and control from the HMI for all generation and switchgear functions. The project required high-speed communications for protection and control between the remote substation and power plant.

Doyon Utilities Landfill Gas Power Plant, Anchorage, Alaska

Beginning in 2010, EPS partnered with client Doyon Utilities to evaluate, design and build a power plant with a current capacity of approximately 8.4 MW to allow the Ft. Richardson area of JBER to become almost entirely energy independent from the local city utility and provide the bulk of its electrical requirements from this green energy plant. This power is generated by landfill gas from the nearby Highland Road landfill. To provide additional energy security, the plant has the capability of using a blend of natural gas that can range from 0-100% of the plant's requirements. The greenfield plant design and construction by EPS was all-inclusive. Specifically, the plant design included building design, SCADA control, intertie substation, plant electrical distribution, generation control and switchgear, grounding study, HVAC design for combustion air and cooling, fuel delivery, site development, gas processing facility, gas pipeline, and distribution interconnection. The generation plant, powered by five 1.4 MW GE Jenbacher gas reciprocating engines, is fully automated and can switch from landfill gas to natural gas without an outage. The plant can operate interconnected to the islanded utility grid or as part of an isolated grid serving the Post loads when the local utility service is unavailable. The plant utilizes SEL relays, and a hardened SEL-3354 computer and GE Jenbacher control system in addition to the distributed PLC's and control. The plant substation includes two 12.47 kV feeders and eight 4.16 kV breakers. EPS also completed the construction engineering and start-up support, testing and commissioning, and construction management of the project. The Plant was

completed and in operation less than 12 months from the NTP issuance. EPS has continued to provide operations and maintenance support for the plant since its completion.

The plant was selected as the 2013 recipient of the silver award by the Solid Waste Association of North America Excellence Awards program.

D Street Emergency Power Plant and Substation, Fort Richardson, Alaska

EPS and Electric Power Constructors, Inc. teamed for the design/build installation of a 9 MW diesel-fired emergency power plant and 34.5 kV substation as part of Doyon's ongoing efforts to upgrade and stabilize the power supply and distribution systems on Ft. Richardson. This plant ensures the Post can operate independently should the local electric utility power become unavailable, as well as providing instantaneous emergency backup power should the local utility or Landfill Gas Plant experience an interruption. Working in conjunction with the Landfill Gas Plant, the two plants can serve all of the Post energy requirements. The plant includes three Caterpillar C-175 engines, each capable of producing 3 MW of power. This unmanned facility has a complete SCADA and automation system, which is integrated into the client's overall control system. Cat EMCP 3.3 unit controllers, Woodward EasYgen, SEL-300G, and ancillary meters allow client operators to remotely start, stop, and monitor the performance of equipment at this facility. EPS designed the interconnecting substation which includes three 34.7 kV breakers, a 47 MVA 34.5 kV/12.47 kV transformer, and eleven 12.47 breakers. EPS engineers designed the control and protection system using SEL-351S protective relays for the distribution feeders, and SEL-311C relays for the 34.5 kV ties, as well as SEL-734 meters, and SEL-2890 relays for automation and control. EPC performed the electrical construction and testing of both the power plant and substation.

Fort Greeley CHPP Generator Replacement, Phase I and II, Fort Greely, Alaska

In 2008 EPS began the first phase of a two phase power plant upgrade project for the Combined Heat and Power Plant (CHPP) at Fort Greely. These upgrades were undertaken to provide emergency power and greater energy security to the installation. EPS designed and produced specifications for major upgrades to the prime emergency power units at the Ft. Greely CHPP. Our work included designing and specifying the replacement of three older diesel engines with two new Cat C175s (Phase I), and integration of two remaining older units into the new switchgear and engines (Phase II). In addition to designing the replacement of three older diesel engines with two new Cat C175s, Phase I designs and specifications included upgrades to the plant's fuel delivery and HVAC systems. Each of the new engines has a 3.0 MW capacity. The design includes a complete SCADA system allowing operations personnel to remotely start, stop, and monitor all activities within the plant and adjacent substation from the plant's control room. Each of the engines are equipped with a Cat ECMP 3.3 unit controller and Woodward EasYgen. These can automatically start and synchronize the units to an energized 24.9 kV distribution system, or restore power when faced with a loss of utility power. Our designs include SEL-300G relays for generator protection, SEL-351 for feeder protection and communications for the SCADA system.

In 2011, the second phase of the project began with EPS integrating the two older existing units into the new switchgear. The design included reconnecting the 2400 V generators to 4160 V, installing a new Woodward UG-32 actuator, Woodward 2301D speed controls, Woodward EasYgens, Basler Static Exciters, and SEL-300G relays. In addition to the switchgear installed earlier, three new sections of switchgear were added to support these modifications. Combined, EPS work allowed the new C175s to operate with the left-in-place existing units in

isochronous loadshare, baseload, and droop. Other remaining auxiliary equipment remained in place, and was not upgraded.

The combined capability of the plant can serve the entire energy needs of the Post should the local utility's power become unavailable. The plant can be remotely started, stopped and controlled to operate on its own power or convert over to utility power through the SCADA system.

Expertise with Alaska Railbelt Transmission Design

Roadbelt Intertie Reconnaissance Engineering Report, Ahtna Environmental (Denali Commission), Anchorage, Alaska

EPS worked as a sub-consultant to Ahtna Environmental to study the Eastern Alaska (aka proposed Roadbelt Inter-tie)connectivity to the existing Alaska Intertie (Railbelt Intertie) Transmission System for the Denali Commission. The proposed Roadbelt Intertie would roughly follow the road system from Sutton (Palmer) to Glenallen to Tok and then to Delta Junction to complete an electric loop from Anchorage to Fairbanks. EPS performed a technical study to define the line's required operating voltage and improvements in the MEA and GVEA system needed to accommo-datethe new intertie.

EPS also studied the physical line routing and construction techniques required for this 385-mile-long intertie. We developed design criteria, preliminary design, structure selection, corridor identification and evaluation, and cost estimates. The corridors crossed several mountain ranges, including the Talkeetna Mountains, Wrangell – St. Elias Mountains, and the Alaska Range. Avalanche avoidance/special construction was a vital consideration. The corridors also crossed various weather loading conditions and large areas of muskeg and permafrost ground conditions.

University to Quartz Creek 115 (138) kV Transmission Line, Placer River Relocation, Chugach Electric Association, Anchorage, Alaska

EPS (D&L) provided complete engineering services for relocating a section of 138 kV transmission line due to realigning the Seward Highway and installing a new bridge over the Placer River near Portage, Alaska. Existing wood H-frame structures were modified or replaced in driven pipe piles. The relocated section was designed and constructed for future 230 kV operation. The design included provisions for a future ADSS fiber optic communication cable.

Quartz Creek 115 kV Transmission Line Rebuild, Girdwood Substation to Indian Substation, Chugach Electric Association, Anchorage, Alaska

EPS (D&L) is providing complete engineering and construction support services for rebuilding and upgrading approximately 12 miles of the Quartz Creek 115 kV Transmission Line from Girdwood Tap to Indian Substation and another ¾ of a mile of double circuit line from Girdwood Tap to Girdwood Substation. We are predominantly using new 230 kV H-frame structures using wood and steel poles in the existing right of way. Tall, self-supporting, steel H-frame towers will be used to replace lattice towers along the Turnagain Arm section, and double circuit 230kV steel monopoles with davit arms are being used between Girdwood Tap and Substation.

The project alignment travels a diverse environment, including mountainous terrain, swamps, marine shoreline, and coastal marshlands. Geologic conditions include shallow bedrock, glacial drift, and deep, loose tidal deposits with organics. The route also crosses several avalanche paths, requiring avalanche-resistant structures and conductor break-away measures.

ADSS fiber optic communication cable is included in the design. EPS worked with ADSS manufacturers to establish an optimal ADSS design for the project's extreme loading (1" ice) and long spans (2,390 ft. maximum). The ADSS will be installed in the communication space on new structures, except for the long-span structures along Turnagain Arm, where the ADSS will be installed above the 230 kV phases. This long-span section required consulting with a conductor manufacturer to determine a feasible high-strength conductor to minimize tower heights. 795 kcmil ACSR/HS285 conductor has been selected.

Hilcorp L11B 69kV Transmission Line, Hilcorp Alaska, LLC/Deadhorse, Alaska

EPS designed a new parallel line from Hilcorp's L11 line into the Lisburne Production Center (LPC) pad. The 69 kV construction used wood pole H-Structures insulated to 138 kV using glass insulators. This project was fast-tracked, with design starting in Mid-January 2022 and construction planned in late March. EPS worked closely with Hilcorp personnel on the North Slope to determine what existing materials were available for use on this project and design the line around material that could be procured and delivered to Deadhorse before April. Our work on this project included PLS-CADD, OH 69kV transmission design, UG distribution design, staking sheets, cost estimating, material quantities, fabrication drawings, and construction oversight.

Expertise in Transmission Line Routing

Railbelt Transmission Plan Development, Alaska Energy Authority, Anchorage, AK

EPS performed a systems analysis of the Railbelt Transmission system for the years 2015 and 2023. The analysis included development of planning criteria, power flow and transient stability analysis of the system, identification of deficiencies and development and evaluation of alternatives to remedy the deficiencies. Once developed, the projects were evaluated using power production cost simulations as well other methods to determine the relative costs and benefits of the projects. Cost estimates were completed and an implementation plan is being finalized.

Susitna Hydro Transmission Line Study, Alaska Energy Authority

EPS provided a study on transmission routing, feasibility, costs, and required improvements to the Railbelt electrical system for the proposed Susitna Hydroelectric project. Two generation levels and three power flow base cases for the project were studied. Conceptual designs and cost estimates for 230 kV lines to Fairbanks and Anchorage were developed.

Alaska Intertie Upgrade Study, Alaska Energy Authority, Anchorage, Alaska

EPS prepared a feasibility level study and assessment of several options for replacing or upgrading the existing line from Teeland Substation to Douglas Substation. The study identified several possible routes for a new 230 kV transmission line and comparatively evaluated them using typical 230 kV line design suitable for the Matanuska-Susitna environment. For each route, land ownerships and wetland designations were identified, and estimates for permitting and easement requirements were provided. Meetings were conducted with the appropriate agencies. A multi-disciplinary approach was used to evaluate the routes and compare impacts, including property ownership, number of impacted parcels, anticipated permitting, public participation, and environmental concerns.

Expertise with Hydroelectric Projects

Southeast Alaska Power Agency Swan Lake Exciter & Unit Breaker Replacement, Ketchikan, AK

SEAPA awarded both the design and construction under separate contracts to EPS and sister construction firm Electric Power Constructors, Inc. to complete the design and construction of this project. This critical time-sensitive project utilized EPS to provide integration for the replacement of the digital excitation system, generator switchgear, unit breakers and associated control wiring modifications for two generator units. EPC performed the complete removal and installation of the new cabinets, breakers, electro switch 24 series, generator switchgear and Basler DECS-400 excitation system as well as providing complete testing of the new system and commissioning. The project required 24-hour removal and installation support for Unit #2 exciter and switchgear; 24-hour removal and installation support for Unit #1 exciter and switchgear; on-site startup and commissioning support of each exciter and unit switchgear; protection system verification PT/CT testing; Basler DECS-400 excitation configuration and commissioning; the break down of removed exciter / switchgear into manageable sizes and removal from powerhouse. EPS engineers provided onsite training and continual support for the facility when site personnel have questions. Additionally, EPS provided the complete project design for this work.

Southeast Alaska Power Agency Tyee Lake Switchgear Upgrade, Wrangell, Alaska

The Tyee Lake Station Service Switchgear was nearing 40 years of age and approaching the end of its useful life. The main station service transformers do not have differential protection or arc flash mitigation appurtenances (fiber optic sensors, ARMS switches, etc.) and were identified as “Extreme Danger” with an energy level of 65.3 Cal/cm2 in the last Arc Flash hazard analysis. Auto-trip and transfer functionality, including emergency power transfers to diesel generators does not exist. All feeder and sub-feeder cables are also at the end of their useful life with increased probability of failures. This project resulted in new 480V double-ended Station Service Switchgear,

breakers, feeder and sub-feeder cables, fiber optic Arc Flash protected busbars, Arc Flash Reduction Maintenance Switches (ARMS), complete drawings sets, including updated powerhouse one-line and three-lines, Operations Manuals and Training. The new switchgear was designed with redundancy and isolation in metal-clad rated gear to provide reliability, redundancy and increased safety to onsite personnel with reduced incident energy levels (Arc Flash). This was a design/build project by EPS and EPC.

OVERVIEW

Mr. Burlingame co-founded Electric Power Systems, Inc. in 1996. The firm focuses on delivering engineering services to the power industry. Over the past 26 years, it has grown to employ more than 140 people. The company is now a wholly owned subsidiary of Engineered Solutions Group, Inc. and has offices in Anchorage, Palmer, and Juneau, Alaska, as well as Redmond, Olympia, and Vancouver, Washington. ESG specializes in electrical and mechanical engineering, offering consulting, design, and construction services to utility and industrial clients across Alaska, the Pacific Northwest, Hawaii, and the South Pacific

PROJECT EXPERIENCE

- Project Lead in developing a Long-Range Transmission Plan for the Alaskan Railbelt system, including solutions involving HVDC, BESS, hydro and inverter-connected generation.
- Co-author of a paper on the cause and mitigation measures associated with 250 MW oscillations occurring in the Railbelt system.
- Representative for the Hawaiian utilities in a 30-member group of interested parties to develop the Hawaiian Reliability Standards.
- Coordinator for AEA to reach agreement among the core group of Reliability and Planning Standards for the Railbelt.
- Project Manager for various system studies for the Railbelt utilities on 34.5 kV – 230 kV transmission systems involving transmission losses, metering stability, voltage control and reliability assessments.
- Project Manager for system studies and analysis for a 700 MW load and generation involving 200 miles of overhead transmission line, 60 miles of submarine cable and HVDC terminals.
- Project Manager for system studies for 400 MW of PV, HVDC submarine cables, 100 MW ESS, synchronous condensers and other stability measures to increase renewable penetration to over 50% in Hawaii.
- Project Manager for various Bradley Lake studies to define system stability limits and control solutions for 120 MW power plant.
- Project Manager for long range transmission plans for Anchorage Municipal Light & Power, Chugach Electric Association and Homer Electric Association. Plans involved analyzing various generation project impacts on the Railbelt transmission system's gird stability and loadshedding system.
- Project Manager for the completion of several versions of the Railbelt Transmission Plan. A plan analyzing the improvements required to meet AK-TPL1-4, Transmission Planning standard.
- Project Manager for 25 substation designs from 12.47 kV through 230 kV.
- Completed the feasibility design and analysis for a 1,100 MW IPP development in the State of Washington.

- Project Manager for the design, construction management and inspection of improvements to four 69 kV/ 12.47 kV substations, 138 kV substation, 34.5 kV/12.47 kV substation and 115/24.9 kV substations.
- Developed Long-Range distribution plan for 65,000-meter utility, 7,000-meter utility and 15,000-meter utility.
- Project Manager for the analysis and scope of system stability studies for the Alaska interconnected system.
- Developed Long-Range distribution plan for Chugach Electric Association. Developed transient stability cases used to verify Chugach Transmission Plan. Recommended system improvements to mitigate system stability and operating deficiencies.

TESTIMONY, PUBLICATIONS, PRESENTATIONS

HOMER ELECTRIC ASSOCIATION, STANDBY POWER PLANT DESIGN. Provided testimony on system impact of proposed transmission rates and capacity studies of PNM. Developed transmission impact studies and loss evaluations, coordinated rate case development, negotiations and settlement.

NEW MEXICO UTILITIES COMMISSION. Provided testimony on generation and transmission system, reliability and generation and transmission costs. Provided supporting testimony for Plains rate cases. Provided testimony of Southwest Public Service Co and Public Service Company of Colorado merger impacts.

ALASKA PUBLIC UTILITIES COMMISSION. Provided testimony on transmission reliability and outages.

PROJECT EXPERIENCE

GOLDEN VALLEY ELECTRIC ASSOCIATION, SHOVEL CREEK WIND & BESS IMPACT STUDY - Fairbanks, Alaska (2024). This study evaluated the steady-state and dynamic stability impacts of a 150 MW wind project and 150 MW battery in the Northern region of the Railbelt. The impacts of these added IBRs, including impacts on Alaska Intertie transfer limits, were evaluated. Custom PSS/E models were used for the wind projects and sensitivity cases were run with synthetic inertia available from the wind project. Other sensitivity cases were also run with the proposed Nenana Solar, Delta Wind, and Pogo Solar projects added to the system.

GUAM POWER AUTHORITY, MALOJILOJ SOLAR & ENERGY STORAGE IMPACT STUDY - Malojiloj, Guam (2024). This study evaluated the impact of the 30 MW Malojloj Solar and Energy Storage Project on the Guam Power Authority system, from a steady-state and dynamic stability perspective. Guam Power Authority is an islanded, low-inertia system, and this study included conditions where half of system load is served by IBRs. Multiple sensitivity cases were run under various IBR control modes, and under various system changes to understand the impact of these newly added IBR assets.

CHUGACH ELECTRIC ASSOCIATION, CEA BRADLEY LAKE CUSTOM MODELING - Anchorage, Alaska (2023). This work involved updates and modifications to the custom dynamic model for the Bradley Lake Hydro generation facility. Benchmarking simulations were performed in conjunction with actual Railbelt events. The results indicate that the Bradley Lake custom model is able to capture various divider modes that can results in oscillations on the Grid.

KEPCO MANGILAO SOLAR, KEPCO MANGILAO EMT STUDY - Mangilao, Guam (2021). This study assessed whether the KEPCO Mangilao Solar Project operates adequately during disturbances when interconnected to a system with low short-circuit strength, also known as a “weak” system. Electro-magnetic transient (EMT) simulations were conducted in PSCAD to evaluate Mangilao Solar’s performance when interconnected to an islanded, weak grid system. Based on the results of the EMT study, no control instabilities or fault ride-through problems were found.

HAWAIIAN ELECTRIC COMPANY, FAST FREQUENCY RESPONSE (FFR) / UNDERFREQUENCY LOAD SHEDDING (UFLS) COORDINATION STUDY - Honolulu, Hawaii (2020-21). Conducted a transmission study focused on the impact of adding distribution level energy storage systems on to the grid to provide primary frequency regulation reserves. The study included recommendations for the control parameters for the FFRs to optimize the grid support, while minimizing the impact to the existing UFLS system. The study recommended FFRs performance specifications and required changes to the UFLS system, on two Hawaiian island systems.

RAILBELT SYSTEMS STUDY SUBCOMMITTEE, ALASKA RAILBELT RESERVES STUDY - Alaska (2020-21). This study evaluated the response of different units in the Railbelt to under-frequency events and determined the minimum response required to prevent under-frequency load shedding. The use of battery energy storage systems and shed-in-lieu-of-spin as contingency reserves were also investigated. This work included dynamic model benchmarking and the development of a methodology for quantifying primary frequency response from each unit in the Railbelt.

RICH MEIER, PE

ELECTRICAL ENGINEER

OVERVIEW

Rich has extensive experience in power systems modeling and simulation, including transmission planning, generation interconnections, controls and protection, compliance, forensic analysis and troubleshooting of power system events, EMT analysis, and renewable generation integration. His expertise lies at the intersection of power systems, software, modeling, and simulation. In addition to his role as a consulting engineer at EPS, his past experience includes working as an EMS software engineer, a modeling research assistant at a DOE National Lab, and positions at a vertically integrated utility.

PROJECT EXPERIENCE

COOK INLET REGION, INC., BALD MOUNTAIN WIND FEASIBILITY STUDY - Anchorage, Alaska (2024 - Ongoing). This study evaluated the feasibility of Bald Mountain Wind Project, a proposed 30-60 MW wind project in the Southern region of the Railbelt. The impact of existing transmission system constraints on energy deliverability from Bald Mountain Wind were evaluated and transmission upgrades were proposed that alleviate those constraints. The impact of the Bald Mountain Wind Project on line losses was also evaluated.

RENEWABLE INDEPENDENT POWER PRODUCERS LLC., IEEE 2800 VS. 1547 ANALYSIS & INVERTER SELECTION - Anchorage, Alaska (2024). EPS conducted a detailed review of the IEEE 2800 and IEEE 1547 standards for RIPP, to determine any potential drawbacks of using inverters compliant with IEEE 1547 but not IEEE 2800. EPS developed detailed reports comparing the two standards, making recommendations about the technical aspects of each standard, and developing reviews of inverter systems and their ability to potentially meet the various technical performance requirements.

HOMER ELECTRIC ASSOCIATION & RENEWABLE INDEPENDENT POWER PRODUCERS LLC., KENAI PENINSULA SOLAR FARM INTERCONNECTION & INTEGRATION STUDY - Homer, Alaska (2024). EPS conducted a combined interconnection and integration study for a proposed utility-scale solar generation facility on the Kenai Peninsula. This IBR facility was evaluated from a steady-state power flow perspective, a stability perspective, and from an operational perspective (solar variability and regulation). The interconnection study involved reviewing the IBR facility design and proposed interconnection to the HEA system, detailed power flow and dynamic modeling, and stability simulations across various seasonal cases. The integration study assessed raw solar data, solar statistics, potential impact of variability on system ACE, and ability for HEA to regulate the proposed solar facility.

SEATTLE CITY LIGHT, BOUNDARY HYDROELECTRIC SCL/BPA FORENSIC STUDY - Seattle, Washington (2022). Provided engineering services related to observed power oscillations at the Boundary Hydroelectric facility for SCL. This work involved synchrophasor data processing, on-site testing and troubleshooting, model development and forensic analysis of Boundary's unit controls, amongst other troubleshooting techniques.

DOMINION ENERGY & WUNDERLICH-MALEC ENGINEERING, SOLAR IBR MOD COMPLIANCE ASSISTANCE - Various location in California (2021-22). Throughout 2021 and 2022 EPS assisted Wunderlich-Malec Engineering with NERC MOD compliance studies, modeling, and reporting to California Independent System Operator (CAISO) for multiple utility-scale solar generation facilities. This work involved processing of on-site test data, modeling of both new and existing solar generation interconnection, model testing in accordance with NERC MOD-025, MOD-026, MOD-027, and MOD-032. Final models and reporting were submitted to CAISO for compliance-related approvals.

MATANUSKA ELECTRIC ASSOCIATION, MEA SOLAR REGULATION STUDY - Palmer, Alaska (2020-21). Created a simulation method for analyzing MEA generation sources and their ability to regulate ACE with additional intermittent solar resources added. The study analyzes various combinations of proposed solar resources (size, location, etc.) and their impact on meeting NERC BAL criteria, changes in cost to operate thermal generation, and impact on daily operations at the plant level (e.g. starting, stopping, ramping individual thermal units in order to regulate the variability). This study has been expanded to include study of additional renewable energy sources, different approaches to dispatch, and inclusion of energy storage.

HAWAII ELECTRIC LIGHT COMPANY, HELCO DYNAMIC UFLS REVIEW - Hilo, Hawaii (2019). Conducted a series of transient stability simulations to design new underfrequency load shedding (UFLS) parameters to be used in the Big Island's existing dynamic UFLS remedial action scheme (RAS) that operates within their EMS. Introduced new DF/DT triggers into the UFLS scheme to improve frequency response during significant generation outages depending on the unit commitment, and in particular IBR penetration percentage.

OVERVIEW

Greg is a Professional Engineer licensed in Alaska (Civil & Structural), California (Civil), Hawaii (Civil & Structural), Washington (Civil & Structural). He has over 39 years of experience in electrical power consulting, specializing in civil and structural engineering for generation, substation, transmission, and distribution projects. He has worked at Dryden & LaRue since 1996 and previously spent 14 years at R.W. Beck, focusing largely on transmission projects in Alaska's challenging environments. His expertise includes transmission routing, feasibility studies, and overseeing projects from conception through construction. As a structural engineer, he has designed and upgraded transmission line structures up to 345 kV using wood, steel, and concrete materials, including various types of poles and towers. Additionally, he handles project management, contract preparation, cost estimating, and construction reviews.

PROJECT EXPERIENCE

CHUGACH ELECTRIC ASSOCIATION, QUARTZ CREEK 115kV TRANSMISSION LINE REBUILD. Project Manager responsible for providing design, construction documents and construction support for rebuilding 15 miles of this line between Ingram Creek and Johnson Pass Trailhead. Both wood and steel H-frames were used on the new line, which was designed for future 230 kV operations.

HOMER ELECTRIC ASSOCIATION, SOLDOTNA QUARTZ CREEK 115kV TRANSMISSION LINE ENGINEERING ANALYSIS. Project Manager responsible for managing the integration of LiDAR survey data, conducting engineering analysis, and developing remedial designs for 47 miles of existing 115 kV transmission line. He ensured that clearances and structure strengths were validated in compliance with NESC and HEA requirements. Additionally, he was responsible for developing remedial designs and cost estimates for 14 identified violations.

GOLDEN VALLEY ELECTRIC ASSOCIATION, 230kV NORTHERN INTERTIE PROJECT. Project Engineer responsible for the design and contract document preparation of this 96 mile, 230 kV transmission line project. Five major material procurement contracts and four separate construction contracts were awarded for this project. Guyed, tubular steel X-towers are the predominant structures used in this project, with four- legged "swing-set" towers used for dead ends. Self-supporting steel Y-towers and single-shaft structures are also used. The project included a crossing of the Tanana River near the Fairbanks International Airport. The 167-foot tall tubular steel river crossing towers included aviation illumination provisions. Steel structures for this project were supported on pipe and micro-piles. Pipe piles were driven, some as deep as 80 feet, or augured and grouted into place.

THE FOUR DAM POOL POWER AGENCY, SWAN LAKE - LAKE TYEE 138kV INTERTIE. Project Engineer responsible for the design and contract document preparation of this 57 mile, 138 kV transmission line interconnecting the Swan Lake and Lake Tyee Hydro- electric facilities. Located in the extremely rugged and remote terrain of Southeast Alaska, this line has four major water crossings and four spans longer than one mile each, the longest being nearly 6,900 feet. Much of the line is located in the Tongass National Forest. The entire line will be constructed using only helicopter access and floating work camps. All structures are supported on micro-pile clustered foundations. Use of micro-piles allowed the contractor to use relatively light, helicopter-transportable equipment.

ANCHORAGE MUNICIPAL LIGHT & POWER, ARCTIC BLVD DOUBLE CIRCUIT 115kV TRANSMISSION LINE. Project Manager responsible for the design and preparation of construction documents for this double circuit 115 kV line feeding ML&P's new Substation 22. Laminated wood structures were used for to achieve a stronger structure than what typical wood pols can provide. The design included 12.5 kV and fiber optic underbuild.

TECK-POGO, POGO MINE 138 kV TRANSMISSION LINE. PProject Manager responsible for the route selection, design, contract document preparation, and construction engineering of this 45 mile, 138 kV transmission line project. The line taps GVEA's 138kV Delta line and feeds the Pogo gold mine located approximately 38 miles north of Delta Junction, Alaska. The line uses wood and steel pole H-frame construction. It includes sections with overhead static wires and 13.8 kV underbuild. A 5-mile section required winter access, and was completed from ice roads in approximately a three-week period. Several structures required driven H-pile foundations.

HOMER ELECTRIC ASSOCIATION, MARATHON TO IVANOFF LAKE 115kV INTERTIE. Project Manager responsible for professional and engineering services necessary to permit, acquire legal access, design and prepare for construction a 115kV transmission line between the Bernice Lake and Soldotna Substations. The line is approximately seven miles long and includes 25 kV distribution and communication underbuild on wood poles. Sections of the line crossed wet peat bogs, requiring pile foundations. This project required extensive efforts to resolve conflicts between the operational aspects of the Kenai Airport facilities and the project which was located partially on airport lands.

MATANUSKA ELECTRIC ASSOCIATION, TEELAND TO REDINGTON 115kV UPGRADE. Project Manager responsible for providing full design services for 10 miles of new 115 kV transmission line. The line interconnects Redington Substation with Teeland Substation, replacing a 34.5 kV line. The new line and substation addition are de-signed and detailed to maintain existing 34.5 kV facilities energized during construction. The line is also designed for upgrading existing distribution underbuild facilities.

SEATTLE CITY LIGHT DEPARTMENT, LiDAR & RATING ANALYSIS FOR 115kV & 230KV TRANSMISSION LINES. Project Manager responsible for managing the climbing inspections, condition assessment, recommendations for repair and maintenance, remaining life estimates, inspection reports, and data files for asset management for over 80 115kV and 230kV transmission towers. The inspections were typically of Seattle City Light's critical structures, such as river crossing structures. They included tubular steel poles and lattice steel structures.

CHUGACH ELECTRIC ASSOCIATION, CORROSION INSPECTION OF 138kV TRANSMISSION LINE TOWERS. Project Manager responsible for the field inspection and reporting of nine corroding transmission towers along Turnagain Arm, Alaska. Steel member thicknesses were electronically measured to estimate steel loss. This field data was used to estimate strength loss and recommendations for corrective actions.

SEATTLE CITY LIGHT DEPARTMENT, LiDAR & RATING ANALYSIS FOR 115kV & 230kV TRANSMISSION LINES. Project Manager responsible for validation of facility ratings for over 500 circuit miles of 115 kV and 230 kV transmission lines. He solicited and coordinated airborne LiDAR survey and imagery acquisition. This data along with real time weather and metered power data was used to model the transmission lines and identify clearance violations in accordance with the NESC.

ALASKA ELECTRIC LIGHT & POWER, SNETTISHAM 138kV AVALANCHE MITIGATION. Project Manager responsible for providing avalanche mitigation studies and structure analysis and design for protecting the Snettisham transmission line from avalanche damage. Several lattice steel towers were modeled and analyzed for estimated avalanche loading and for rerouting the alignment. For three particularly vulnerable towers, 40-ft. tall, splitting wedge structures were designed to defend the towers from avalanches.

COPPER VALLEY ELECTRIC ASSOCIATION, THOMPSON PASS AVALANCHE MITIGATION FOR 138kV TRANSMISSION LINE. Project Manager responsible for engineering line repairs to the Solomon Gulch 138 kV Transmission Line resulting from avalanches in 1988, 2000, 2003, and 2006. Additionally, he provided several study reports over these years for mitigating avalanche damage. Finally, in 2012, he was responsible for permitting and design of relocating approximately 3.5 miles of the transmission line to a safer location.

MATANUSKA ELECTRIC ASSOCIATION, EGS - HOSPITAL 115kV DOUBLE CIRCUIT TRANSMISSION LINE. Project Manager responsible for providing a routing study, right of way, permitting, engineering, and construction management services for a new 115 kV double circuit transmission line interconnecting the new Eklutna Generating Station with the Hospital Substation. The line, approximately 10.6 miles in length, also included an overhead optical ground wire and 12.5 kV distribution underbuild. The project also included 115 kV and 230 kV getaway lines from the EGS switchyard to the existing Eklutna double circuit transmission line and to Reed Substation. Structures are tubular steel with either driven pipe pile or direct embedded foundations.

ALASKA ENERGY AUTHORITY, RECONFIGURATION OF THE TALKEETNA RIVER CROSSING FOR THE ANCHORAGE-FAIRBANKS INTERTIE. Project Manager responsible for evaluating river erosion mitigation options for the Anchorage-Fairbanks Intertie, which is designed to operate at 345 kV. The river was threatening two of the existing towers, and it was decided to remove these towers from the flood plain and replace them with a single span across the river. Mr. Huffman managed a turnkey project including complete engineering, procurement and construction of the project. It involved installing a new 145-ft. tall, deadend structures to support the 3,030-ft. crossing using special high strength 954 kcmil AACSR conductor.

Anchorage, AK 99503

OVERVIEW

Peter has extensive experience in civil engineering and construction across the utility and transportation sectors. Since joining EPS in 2018, he has contributed structural and civil engineering expertise to various utility projects. His responsibilities include detailed structural design and analysis, material procurement, preparing contract and construction bid packages, public involvement, and construction management.

PROJECT EXPERIENCE

CITY OF SITKA, MARINE ST. SUBSTATION EXPANSION. Provided complete civil/structural design for over $2M substation expansion in Sitka, AK. Design included civil layout, grading and drainage, equipment foundations, oil containment, 2 steel structure designs for shop fabrication, wood getaway support structure with vertical mounted switch, 15 ft high reinforced concrete retaining wall around site, security fencing, procurement and construction support. Responsible for complete set of stamped plans for all civil and structural work.

ALASKA VILLAGE ELECTRIC COOPERATIVE, BETHEL POWER PLANT UPGRADE. Provided structural engineering, design and analysis for equipment additions to existing power plant.

ANCHORAGE MUNICIPALITY LIGHT & POWER, SUBSTATION 3 EXPANSION. Provided civil/structural design for substation expansion in downtown Anchorage. Work included several equipment foundations, seismic analysis and design, and reinforced concrete retaining wall along with construction management assistance.

ALYESKA SEAFOOD, POWER FACTOR CORRECTION EQUIPMENT. Provided structural analysis and design for addition of power factor equipment in existing building to support increased loads.

NUSHAGAK COOPERATIVE, NETC POWER PLANT UPGRADES. Provided seismic analysis and design for electrical equipment in powerplant including steel battery racks and cable tray additions.

CHUGACH ELECTRIC ASSOCIATION, 115kV TOWER INSPECTION TURNAGAIN ARM. Provided field review, inspection coordination, analysis and final reports for existing 115kV steel towers along Turnagain Arm near Girdwood, AK.

3305 Arctic Blvd. Suite 201
Anchorage, AK 99503

OVERVIEW

Chris has over 30 years of engineering experience, with 18 years focused on power transmission and distribution. He also brings 12 years of expertise in managing new construction and renovation projects for commercial building electrical systems. His broad experience includes electric distribution and transmission, site and interior lighting, low voltage power, fire alarm systems, as well as access control, security camera, wireless LAN, and telecommunications systems. He serves as the Distribution Manager, overseeing design and study projects for several organizations, including Chugach Electric Association, Matanuska Electric Association, Seward Electric, Elmhurst Mutual Power & Light, Copper Valley Electric Association, and the Fort Knox Gold Mine.

PROJECT EXPERIENCE

ELMHURST MUTUAL POWER & LIGHT, MULTIPLE PROJECTS - Tacoma-Puyallup, Washington (2022-PRESENT). Chris has been serving as the "On-Call" EMP&L System Engineer, providing support for all line extensions and standards development. Historically, EMP&L has been a small residential utility, but in recent years, the company has faced increased demand from large commercial customers, such as an Amazon warehouse, which has required additional engineering support.

CITY OF ST. PAUL, AIRPORT FEEDER - St. Paul, Alaska (2022-2025). The City of Saint Paul's electrical distribution system is entirely underground, with three circuits feeding the city from the powerhouse: 1) Airport Feeder, 2) Town Feeder, and 3) Harbor Feeder. The exposed concentric neutral feeders were direct-buried around 1983 and have since exceeded their 35-year expected lifespan. During a field inspection, EPS noted that many of the padmount devices were showing signs of premature rusting and were at risk of oil leakage. As a result, the scope of the project was expanded to include a full system condition assessment. This led to the development of plans, staking sheets, cost estimates, and assistance for the City of Saint Paul in securing RUS grants and loans for the necessary improvements.

SOUTHEAST ALASKA REGIONAL HEALTH CONSORTIUM, DEDICATED FEEDER MT. EDGECUME CAMPUS - Sitka, Alaska (2020-2024). Performed design and design oversight for a 1.5-mile dedicated feeder to supply power to a new medical campus in Sitka, Alaska. This project included a half-mile undersea cable crossing between Baranof Island and Japonski Island, where the campus is located. The work encompassed design, cost estimation, and construction engineering, along with ongoing support services throughout the project.

ALASKA MUNICIPAL LIGHT & POWER, 10 YEAR PLAN - Anchorage, Alaska (2018-2019). Performed a 10-year planning study for the transmission side of the Anchorage ML&P utility system. Duties included condition assessment of all transmission poles in the system, 10-year load forecast analysis of the AM&P service area, and project cost estimates.

DOWL ENGINEERS FOR ALASKA ENERGY AUTHORITY, BATTLE CREEK DIVERSION - Bradley Lake, Alaska (2017-2020). EPS collaborated with Dowl Engineers on the distribution design for the power line between the Bradley Lake Hydro Gate House and the Battle Creek Diversion Dam. The project involved approximately 2 miles of 7.2kV single-phase distribution and communication fiber, installed along the access road next to the HDPE penstock. Multiple services were added along the route, and a recloser was included to isolate the line extension on generator power, helping to mitigate potential overload issues. EPS provided system planning, engineering studies, bid documents, submittal reviews, on-site quality assurance (QA), and as-built documentation.

KINROSS GOLD CORPORATION, FORT KNOX 13.8Kv DISTRIBUTION LINE RELOCATIONS - Fort Knox, Alaska (2015-2020). As the mine pit at Fort Knox continues to expand, the electrical distribution systems supporting the mine complex must evolve to meet the growing demand. The existing 13.8kV distribution line feeding the pit dewatering system has been modified and rebuilt multiple times over the past three years as the pit operations have moved into areas originally served by the line. The 2017 relocation is expected to be the final position for this line. In the same year, we designed four miles of line extensions to accommodate the relocated loads and support the addition of a new Water Treatment plant. Additionally, we conducted studies and preliminary designs for a new distribution line intended to power a 3.8 MW Electric Rope Shovel, though this project was later deemed cost-prohibitive.

MCMILLAN LLC FOR COPPER VALLEY ELECTRIC ASSOCIATION, ALLISON CREEK INTERTIE DESIGN - Valdez, Alaska (2012-2013). Collaborated closely with the developer and our firm's right-of-way department to design, route, provide cost estimates for, and stake a new double-circuit 25 kV intertie line between the Dayville Road Switchyard and the proposed Allison Creek Hydro Project near Valdez, Alaska. The line traverses challenging terrain typical of the Valdez area and was strategically routed parallel to the Trans-Alaska Pipeline to avoid conflicts with University of Alaska and City of Valdez properties.

CITY OF METLAKATLA, WALDEN POINT 35kV LINE EXTENSION- Metlakatla, Alaska (2011-2019). Provided permitting, design, and project management services—including material ordering—for a 14-mile, 35 kV sub-transmission line and a four-mile, 35 kV submarine cable for the City of Metlakatla. The project is ongoing, as funding for the submarine cable crossing and associated substation work has not yet been secured.

COPPER VALLEY ELECTRIC ASSOCIATION, SOLOMON POWER LINE - Valdez, Alaska (2009-2010). Verified existing conditions, designed, and staked new power and communication lines between the Solomon Gulch Hydroelectric Facility powerhouse and valve house. The new lines are engineered to withstand a 2-inch radial snow load, replacing the original design, which was vulnerable to being pulled from the penstock due to ice and snow accumulation.

DOYON UTILITIES, FWA, FGA, & FRA FEEDER UPGRADES - Fort Greely, Fort Wainwright, & JBER-Richardson, Alaska (2007-2015). Provided system upgrade planning, bid documents, quality control (QC), and GPS as-built documentation for the project to upgrade over 66 miles of 12.5 kV feeders at Fort Wainwright for Doyon. The work involved installing a backbone of 336.4 kcmil ACSR (Merlin) and taps of #1/0 ACSR (Raven), along with the construction of double-circuit lines. Additionally, Chris supported voltage conversion projects, including upgrades from 2400V and 7200V to 14.4/24.9 kV at Fort Greely, and from 7200V to 7.2/12.5 kV at JBER-Richardson.

MATT WILLIAMS, PE

ELECTRICAL ENGINEER

PROFESSIONAL REGISTRATIONS
Professional Electrical Engineer

State of Alaska
License no. 10252

EDUCATION
B.S. Electrical Engineering
Gonzaga University (1995)

CONTACT
Cell: (907) 632-4252
Email: mwilliams@epsinc.com
3305 Arctic Blvd. Suite 201
Anchorage, AK 99503

OVERVIEW

Matt has over 27 years of experience in the electrical engineering field in Alaska, with extensive expertise in power transmission and distribution across the state. His project experience includes the design of distribution and transmission systems, as well as the development of engineering standards. He has also worked on planning and sectionalizing studies, distributed generation impact studies, and coordination studies for distribution systems.

PROJECT EXPERIENCE

SOUTHEAST ALASKA REGIONAL HEALTH CONSORTIUM, DEDICATED FEEDER MT. EDGECUME CAMPUS - Sitka, Alaska. Performed design and oversight for a 1.5-mile dedicated feeder to supply power to a ne medical campus in Sitka, Alaska. This project included a half-mile undersea cable crossing between Baranof Island and Japonski Island, where the campus is situated. The work encompassed design, cost estimation, construction engineering, and ongoing support services.

KOTZEBUE ELECTRIC ASSOCIATION, DISTRIBUTION ENGINEERING SERVICES- Kotzebue, Alaska. Providing ongoing electrical distribution engineering services for Kotzebue Electric Association (KEA). Current projects include line extensions, service and transformer sizing, feeder protection and sectionalizing upgrades, and a feeder voltage conversion project. A key component of the work is the integration of photovoltaic (PV) and wind power into KEA's isolated grid.

HOMER ELECTRIC ASSOCIATION, SOUTH KACHEMAK BAY SUBMARINE CABLE STUDY - Homer & Seldovia, Alaska. Conducted a study for a potential submarine cable installation between Homer and Seldovia to supplement the existing Kachemak Bay submarine crossing cable that serves the South Kachemak Bay communities. The proposed new submarine crossing was approximately 16 miles in length. The study included cable sizing, cost estimation, determination of appropriate reactive compensation for the cable's capacitive effects, and an evaluation of a Battery Energy Storage System (BESS) for both outage mitigation and reactive power compensation.

SANDIA NATIONAL LABORATORIES, PORT OF ALASKA RESILIENT MICROGRID STUDY - Anchorage, Alaska. Performed a feasibility level study for on-site generation and microgrid infrastructure at the Port of Alaska in Anchorage, Alaska with the goal of providing resiliency to the critical infrastructure of the Port in the event of catastrophic power utility failure. Work included estimating port loads and forecasting future load growth for the port; preparing concept designs and sketches of a local grid infrastructure with generation, PV, and battery storage; reviewing potential connections to other critical loads in the Port area, and sizing potential on-site diesel generation.

MATANUSKA ELECTRIC ASSOCIATION, WILLOW SOLAR SITE PV IMPACT STUDY - Willow, Alaska. Conducted a PV impact study for a 1 MW Willow Solar site to assess its integration into MEA's distribution system. The study followed the industry-standard NRECA PV System Impact Guide and included the evaluation of steady-state load flow and voltage levels under both minimum and peak feeder loading conditions, with and without PV generation. Additionally, the study involved short-circuit analysis and a screening for the risk of islanding. A comprehensive PV system impact report was prepared, summarizing the findings and recommendations.

ALASKA VILLAGE ELECTRIC COOPERATIVE, STEBBINS TO ST. MICHAEL 12.47 kV INTERTIE - AVEC Region, Alaska. Provided design and design oversight, engineering management, and construction inspection services for approximately 10 miles of new 12.47 kV distribution intertie between two villages in northwest Alaska, aimed at enhancing operational efficiency and reliability. The design also included pile foundations in areas with poor soil conditions.

DOYON UTILITIES, FWA, FGA, & FRA FEEDER UPGRADES - Fort Greely, Fort Wainwright, & JBER-Richardson, Alaska. Provided engineering management and design oversight for over 50 miles of distribution line upgrades, including design, standards development, staking, and as-built documentation. The projects involved upgrading voltage from 2400V and 7200V to 14.4/24.9 kV at Fort Greely, and from 7200V to 7.2/12.5 kV at JBER-Richardson.

SEATTLE CITY LIGHT, DESIGN STANDARDS DEVELOPMENT 26kV OVERHEAD LINE DESIGN STANDARDS - Seattle, Washington. A project to develop a series of design standards for overhead facilities in the Seattle City Light 26 kV system. The standards cover clearances, sag and tension, loading, construction grades, structural analysis, and framing for both primary and secondary circuits, as well as joint-use facilities on overhead poles.

KETCHIKAN PUBLIC UTLITIES, GRAVINA ISLAND ELECTRICAL & TELECOM LINES EXTENSION - Ketchikan, Alaska. Designed a 34.5kV transmission line extension to Gravina Island for Ketchikan Public Utilities, including approximately one mile of submarine cable and ¾ mile of overhead line.

ALASKA MUNICIPAL LIGHT & POWER, 10 YEAR PLAN - Anchorage, Alaska. Conducted a 10-year planning study for the distribution system of the Anchorage ML&P utility. Responsibilities included preparing a load growth study for the service area, performing a 10-year load forecast analysis using Synergi software, developing proposed distribution system upgrade projects to accommodate forecasted loads, and providing project cost estimates.

ANCHORAGE MUNICIPAL LIGHT & POWER, EKLUTNA TRANSMISSION LINE REBUILD - Anchorage, Alaska. Rebuilt a 230 kV transmission line for Anchorage Municipal Light & Power, replacing the existing wood structures with new steel pole structures. The project spanned approximately 22 miles.

CARRIE MILLER, EIT

3305 Arctic Blvd. Suite 201
Anchorage, AK 99503

OVERVIEW

Carrie has been with EPS since 2006, bringing extensive experience in civil design for substations, transmission, and distribution powerlines across the northwest, Alaska, and Hawaii. She has worked on a wide range of projects, addressing the unique challenges of both urban and rural design and construction. Carrie's expertise includes complex transmission line design, substation upgrades, grading and drainage plans, and fiber optic installations.

TRANSMISSION PROJECT EXPERIENCE

CONOCO PHILLIPS INC., FIBER OPTIC ALPINE TO KUPARUK - North Slope, Alaska (2012-Present). Provided engineering services and design for the attachment of fiber optic cable to existing steel pipeline structures from Pump Station #1 to Kuparuk Operation Center. It is a fast paced project requiring communication between Conoco Phillips and Alyeska Pipeline. The design requires above ground attachments and clearance requirements to be met, along with underground road crossings.

CHUGACH ELECTRIC ASSOCIATION, QUARTZ CREEK 115kV/230kV TRANSMISSION LINE - Turnagain Arm, Alaska (2011-2013). Provided engineering services and design from the replacement of 15 miles of existing wood H-Frame 115kV transmission line with a combination of wood H-Frame and steel structures through Turnagain Pass. The project contained design elements of 20ft of snow and large canyon crossings. Part of the project required the consideration of helicopter installations.

ANCHORAGE MUNICIPAL LIGHT & POWER, ARCTIC BLVD 115kV DOUBLE CIRCUIT - Anchorage, Alaska (2011-2012). Provided engineering and services and design for laminated wood pole 115kV double circuit transmission line, 12.5kV distribution underbuild, and ADSS. Design elements required the existing lines to stay energized through a high traffic area in midtown Anchorage.

MATANUSKA ELECTRIC ASSOCIATION, TEELAND-REDDINGTON 115kV TRANSMISSION LINE - Wasilla, Alaska (2010-2011). Provided engineering services and design for the rebuild of a 115kV transmission line and 25kV underbuild. The line is approximately 9.6 miles long extending from Teeland Substation owned by Chugach Electric Association to Redington Substation owned by Matanuska Electric Association. The 25kV is required to stay energized during construction.

SUBSTATION PROJECT EXPERIENCE

CHUGACH ELECTRIC ASSOCIATION, HOPE SUBSTATION UPGRADE - Turnagain, Alaska (2012-Present). Provided engineering services and design grading and drainage plan to expand and upgrade the existing Hope Substation. Design elements required the new substation pad to meet the existing substation pad, while still having access around the pad with sufficient distance from an existing cliff on the site.

MATANUSKA ELECTRIC ASSOCIATION, PARKS SUBSTATION REBUILD - Wasilla, Alaska (2012-Present). Provided engineering services and design grading and drainage plan to expand and upgrade the existing Parks Substation. Design elements required the new substation pad to meet the existing substation pad, retaining an elevation difference of 20 across the site with a 25’ buffer from property lines. The elevation changes required gravity retaining walls.

DOYON, LANDFILL GAS POWER PLANT - Joint Base Elemdorf-Richardson, Alaska (2011-2012). Provided engineering services and design grading and drainage plan for a processing building at the Anchorage Regional Landfill.

KAUAI ISLAND UTILITY, AEPO SUBSTATION - Kauai, Alaska (2010-2012). Provided engineering services and design grading and drainage for the Aepo Substation. Design elements required the reroute of an existing trench and long access roads to approach the substation.

EXHIBIT 10

Docusign Envelope ID: 9D66E8E1-A0B2-4867-95D2-1111A7A86C5D

CONTRACT FOR PROFESSIONAL SERVICES WITH EDC, INC.

In consideration of the mutual promises herein, ANCHORAGE and EDC, INC. agree as follows. This contract consists of:

A. Part I, consisting of 15 sections of Special Provisions
B. Part II, consisting of 11 sections of General Provisions
C. Appendix A – Fee Schedule, consisting of 1 page, excluding cover

PART I
SPECIAL PROVISIONS

Section 1. Definitions.

A. "Administrator" means the Engineering Division Director of the Anchorage Water and Wastewater Utility or their designee
B. "Anchorage" means the Municipality of Anchorage.
C. “Owner” means the Anchorage Water and Wastewater Utility
D. "Contractor" means EDC, Inc.

Section 2. Scope of Services.

A. Individual delivery orders Contract Task Orders (CTOs) will be issued for specific Owner requested work items. The Contractor is to perform the professional services required to complete the tasks set forth in each CTO.

B. The Contractor shall respond to each CTO with a proposal detailing scope, cost, subcontractor involvement, and time required to complete the work in each CTO. AWWU and the Contractor may refine the proposal for clarification of the scope of services prior to issuing Notice to Proceed for the CTO.

C. Each CTO is limited in scope to the work requested in the request for proposal (RFP 2024P017) that led to this contract and as stated below;

1. This term contract is limited to Mechanical and Electrical Engineering professional services.

2. Services may include, but are not limited to, studying, reporting on, designing, inspecting, and managing parts of or entire projects for design and consultation for such items as pump stations, booster stations, pressure regulating stations, SCADA telemetry, and HVAC systems in existing and proposed AWWU facilities. These facilities may be above ground or below ground.

3. The Contractor may utilize subcontractors in support of Mechanical and Electrical Engineering task orders when deemed necessary to complete their work, such as but not limited to specialty knowledge consultants. See Section 15 for additional requirements regarding subcontractors and work proposals.

Docusign Envelope ID: 9D66E8E1-A0B2-4867-95D2-1111A7A86C5D

D. A Purchase Order (PO) will be issued against this contract for each specific CTO. No work is authorized nor may commence without receipt of a PO. Once received, the Contractor shall perform the professional services required to complete the CTO contained therein. Individual PO's are not to exceed $250,000.00, unless Anchorage's Purchasing Director or their designee approves of a greater amount.

E. Anchorage shall not allow any claim for services other than those described in this section. However, the Contractor may provide, at its own expense, any other services that are consistent with this contract.

Section 3. Time for Performance.

A. This contract becomes effective when signed on behalf of Anchorage and shall remain in effect for three year(s) from the date of final signature.

B. Upon receipt of a PO authorizing work, the Contractor shall commence performance of that work and complete that performance in accordance with the schedule contained therein.

Section 4. Compensation; Method of Payment.

A. Subject to the Contractor's satisfactory performance, Anchorage shall pay the Contractor no more than SEVEN HUNDRED FIFTY THOUSAND DOLLARS ($750,000.00) in accordance with this section.

B. Anchorage shall pay the Contractor for actions performed for a CTO issued under this contract in accordance with the schedule of professional fees provided in response to the Owner's request for proposals.

C. Each month the Contractor shall present a bill to the Owner describing the work for which it seeks payment and documenting expenses and fees to the satisfaction of the Owner. If any payment is withheld because the Contractor's performance is unsatisfactory, the Owner must, within ninety (90) days of the payment denial, notify the Contractor of the payment denial and set forth, with reasonable specificity, what was unsatisfactory and why.

D. The Contractor is not entitled to any compensation under this contract, other than is expressly provided for in this section.

E. As a condition of payment, the Contractor shall have paid all municipal taxes currently due and owing by the Contractor.

F. Labor rates for the Contractor and their subcontractors must be all inclusive. Separate charges for insurance, special pay, pay enhancements, employer paid contributions to retirement programs, employer paid benefits, overhead, and profit, and additional accessory office components associated with the charging position, such as but not limited to, internet, remote office, telephone, computer, computer programs, office supplies, office space, and furniture will not be allowed regardless of what is shown in the fee schedule in or as updated per item B in this section.

Docusign Envelope ID: 9D66E8E1-A0B2-4867-95D2-1111A7A86C5D

Section 5. Termination of the Contractor's Services.

The Contractor's services under Section 2 may be terminated:

A. By mutual consent of the parties.

B. For the convenience of Anchorage, provided that Anchorage notifies the Contractor in writing of its intent to terminate under this paragraph at least 10 days prior to the effective date of the termination.

C. For cause, by either party where the other party fails in any material way to perform its obligations under this contract. Termination under this subsection is subject to the condition that the terminating party notifies the other party of its intent to terminate, stating with reasonable specificity the grounds therefor, and the other party fails to cure the default within thirty (30) days after receiving the notice.

Section 6. Duties Upon Termination.

A. If Anchorage terminates the Contractor's services for convenience, Anchorage shall pay the Contractor for its actual costs reasonably incurred in performing before termination. Payment under this subsection shall never exceed the total compensation allowable under Section 4. All finished and unfinished documents and materials prepared by the Contractor shall become the property of Anchorage.

B. If the Contractor's services are terminated for cause, Anchorage shall pay the Contractor the reasonable value of the services satisfactorily rendered prior to termination less any damages suffered by Anchorage because of the Contractor's failure to perform satisfactorily. The reasonable value of the services rendered shall never exceed the contract rate for such services, and payment under this subsection shall not exceed ninety percent (90%) of the total compensation allowable under Section 4. Any finished or unfinished documents or materials prepared by the Contractor under this contract shall become the property of Anchorage at its option.

C. If the Contractor receives payments exceeding the amount to which it is entitled under subsections A or B of this section, he shall remit the excess to the Administrator within thirty (30) days of receiving notice to do so.

D. The Contractor shall not be entitled to any compensation under this section until the Contractor has delivered to the Administrator all documents, records, work product, materials and equipment owned by Anchorage and requested by the Administrator.

E. If the Contractor's services are terminated, for whatever reason, the Contractor shall not claim any compensation under this contract, other than that allowed under this section.

F. Except as provided in this section, termination of the Contractor's services under Section 5 does not affect any other right or obligation of a party under this contract.

Docusign Envelope ID: 9D66E8E1-A0B2-4867-95D2-1111A7A86C5D

G. If a final audit has not been performed before the Contractor's services are terminated, Anchorage may recover any payments for costs disallowed as a result of the final audit.

Section 7. Insurance.

A. The Contractor shall maintain in good standing, for the entire period of the contact, the insurance described in subsection B of this section. Before rendering any services under this contract, the Contractor shall furnish the Administrator with a Certificate of Insurance in accordance with subsection B of this section in a form acceptable to the Risk Manager for Anchorage.

B. The Contractor shall provide the following insurance:

1) $500,000 Employers Liability and Workers Compensation as required by Alaska Law.

2) Commercial Automobile Liability in the amount of $1,000,000 combined single limit to include: owned, hired, and non-owned.

3) Commercial General Liability including:

a. $2,000,000 General Aggregate
b. $2,000,000 Products/Completed Operations
c. $1,000,000 Personal & Advertising Injury
d. $1,000,000 Each Occurrence
e. $5,000 Medical Payments

4) Professional Liability insurance with limits not less than $1,000,000 per occurrence and $2,000,000 aggregate.

5) Cyber/Privacy Liability insurance with limits not less than $3,000,000. The Cyber coverage shall include, but not be limited to, claims involving invasion of privacy violations, Information theft, and release of private information. The policy shall provide coverage for breach response costs as well as regulatory fines and penalties as well as credit monitoring expenses.

C. Policies written on a "claims-made basis" must have a two (2) year tail of coverage, or an unbroken continuation of coverage for two (2) years from the completion of the contract requirements.

D. Each policy of insurance required by this section shall provide advance notice to the MOA/Contract Administrator prior to cancellation in accordance with the policy. If the insurer does not notify the MOA on policy cancellation it shall be the contractor's responsibility to notify the MOA of such cancellation.

E. Except for Workers Compensation and Professional Liability each policy is to name The Municipality as an "additional insured" and the actual policy endorsement shall accompany each Certificate of Insurance.

Docusign Envelope ID: 9D66E8E1-A0B2-4867-95D2-1111A7A86C5D

F. General Liability, Workers Compensation, and Automobile policies shall be endorsed to waive all rights of subrogation against the Municipality of Anchorage by reason of any payment made for claims under the above coverage. This policy endorsement shall accompany each Certificate of Insurance.

G. All policies for general liability shall be primary and noncontributing with any insurance that may be carried by the Municipality.

H. If the Contractor maintains broader coverage and/or higher limits than the minimums shown above, the Municipality requires and shall be entitled to the broader coverage and/or the higher limits maintained by the Contractor. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the Municipality.

I. Contractor shall require and verify that all subcontractors maintain insurance meeting all requirements stated herein, and Contractor shall ensure that the Municipality is an additional insured on insurance required from subcontractors.

Section 8. Assignments.

Unless otherwise allowed by this contract or in writing by the Administrator, any assignment by the Contractor of its interest in any part of this contract or any delegation of duties under this contract shall be void, and an attempt by the Contractor to assign any part of its interest or delegate duties under this contract shall give Anchorage the right immediately to terminate this contract without any liability for work performed.

Section 9. Ownership; Publication, Reproduction and Use of Material.

A. Except as otherwise provided herein, all data, documents and materials produced by the Contractor under this contract shall be the property of Anchorage, which shall retain the exclusive right to publish, disclose, distribute and otherwise use, in whole or in part, any such data, documents or other materials. Exclusive rights shall not be attributed to portions of such materials presently in the public domain or which are not subject to copyright.

B. Should Anchorage elect to reuse Work products provided under this Contract for other than the original project and/or purpose, Anchorage will not hold Contractor liable for any damages resulting from Anchorage's reuse of work products for an unintended purpose. Additionally, any reuse of design drawings or specifications provided under this Contract must be limited to conceptual or preliminary use for adaptation and the original Constructor's or subcontractor's signature, professional seals and dates removed. Reuse of drawings and specifications, which require professional seals and dates removed, will be signed, sealed, and dated by the professional who is in direct supervisory control and responsible for adaptation.

Docusign Envelope ID: 9D66E8E1-A0B2-4867-95D2-1111A7A86C5D

C. Equipment purchased by the Contractor with designated contract funds shall be the sole property of Anchorage marked and inventoried as such with a copy of the inventory forwarded to Anchorage.

Section 10. Notices.

Any notice required pertaining to the subject matter of this contract shall be either sent via facsimile (FAX) or mailed by prepaid first class registered or certified mail, return receipt requested to the following addresses:

Anchorage: Municipality of Anchorage
Anchorage Water and Wastewater Utility
Attn: James Armstrong, P.E.
3000 Arctic Boulevard
Anchorage, AK 99503-3898
FAX: (907) 562-0824

Contractor: EDC, Inc.
Attn: John Pepe, P.E.
1500 West 33rd Avenue, Suite 100
Anchorage, AK 99503
FAX: (907) 276-4763
johnp@edc-alaska.com

Notices are effective upon the earlier of receipt, proof of good transmission (facsimiles only), or five (5) days after proof of proper posting.

Section 11. Contract Budget.

In connection with its performance under this contract the Contractor shall not make expenditures other than as provided in line items in the contract budget.

Section 12. Force Majeure.

A. Any failure to perform by either party due to force majeure shall not be deemed a violation or breach hereof.

B. As used in this contract, force majeure is an act or event of substantial magnitude, beyond the control of the delayed party, which delays the completion of this contract, including without limitation:

1. Any interruption, suspension or interference resulting solely from the act of the Municipality or negligent act(s) of the Municipality not otherwise governed by the terms of this contract.

Docusign Envelope ID: 9D66E8E1-A0B2-4867-95D2-1111A7A86C5D

2. Strikes or work stoppages.
3. Any interruption, suspension or interference with the project caused by acts of God, or acts of a public enemy, wars, blockades, insurrections, riots, arrests or restraints of governments and people, civil disturbances or similar occurrences.
4. Order of court, administrative agencies or governmental officers other than the Municipality.

Section 13. Financial Management System.

The Contractor shall establish and maintain a financial management system that:

A. Provides accurate, current, and complete disclosure of all financial transactions relating to the contract;

B. Maintains separate accounts by source of funds for all revenues and expenditures and identifies the source and application of funds for the Contractor's performance under this contract, including information pertaining to subcontracts, obligations, unobligated balances, assets, liabilities, outlays and income;

C. Effectively controls and accounts for all municipal funds and contract property;

D. Compares actual expenditures with budgeted amounts and relates financial information to performance or productivity data including unit cost information where applicable;

E. Allocates administrative costs to direct service delivery units;

F. Minimizes the time between receipt of funds from Anchorage and their disbursement by the Contractor;

G. Provides accounting records supported by source documentation; and

H. Provides a systematic method assuring the timely and appropriate resolution of audit findings and recommendations.

Section 14. Funding Requirements.

If any funding source for this contract should impose additional requirements upon Anchorage for the use of those funds, the Contractor agrees to abide by those additional requirements immediately upon receipt of written notice thereof from Anchorage.

Docusign Envelope ID: 9D66E8E1-A0B2-4867-95D2-1111A7A86C5D

Section 15. Subcontracts.

The Contractor may enter into subcontracts for the purchase of goods and services necessary for the performance of this contract, provided:

A. Every subcontract shall be reduced to writing and contain a precise description of the services or goods to be provided and the nature of the consideration paid therefore. Each subcontract is to provide a rate sheet with same limitation placed on the rates as the Contractor.
B. Every subcontract under which the Contractor delegates the provision of services shall be subject to review and approval by the Administrator before it is executed by the Contractor.
C. Every subcontract in an amount exceeding $1,000.00 shall require reasonable access to business records of the subcontractor relating to the purchase of goods or services pursuant to the subcontract.
D. The Contractor is not allowed a markup for goods and services. In accordance with item A, this provision extends to subcontractors

Docusign Envelope ID: 9D66E8E1-A0B2-4867-95D2-1111A7A86C5D

PART II

GENERAL CONTRACT PROVISIONS

Section 1. Relationship of Parties.

The Contractor shall perform its obligations hereunder as an independent contractor of Anchorage. Anchorage may administer the contract and monitor the Contractor's compliance with its obligations hereunder. Anchorage shall not supervise or direct the Contractor other than as provided in this section.

Section 2. Nondiscrimination.

A. The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, national origin, ancestry, age, sex, sexual orientation, gender identity, or marital status, or who is a "qualified individual with a disability", as that phrase is defined in the Americans With Disabilities Act of 1990. The Contractor will take affirmative action to ensure that applicants are employed and that employees are treated during employment without regard to their race, color, religion, mental or physical disability, sexual orientation or gender identity. Such action shall include, without limitation, employment, upgrading, demotion or transfer, recruitment or recruiting advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training including apprenticeship. The Contractor agrees to post, in conspicuous places available to employees and applicants for employment, notices setting forth the provisions of this nondiscrimination clause.

B. The Contractor shall state, in all solicitations or advertisements for employees to work on contract jobs, that all qualified applicants will receive equal consideration for employment without regard to race, color, religion, national origin, ancestry, age, sex, sexual orientation, gender identity, marital status, or mental or physical disability.

C. The Contractor shall comply with all reporting requirements that may apply to it which the Anchorage Office of Equal Employment Opportunity Contract Compliance may establish by regulation. The contract compliance officer may accept the contractor's compliance with federal requirements or the contractor's federal reporting documents in lieu of reporting under this section.

D. The Contractor shall include the provisions of subsections A through C of this section in every subcontract or purchase order under this contract, so as to be binding upon every such subcontractor or vendor of the Contractor under this contract. The contract compliance officer may accept the contractor's compliance with federal requirements or the contractor's federal reporting documents in lieu of reporting under this section.

E. The Contractor shall comply with all applicable federal, state and municipal laws concerning the prohibition of discrimination including, but not limited to Title 5 and Title 7, Chapter 7.50 of the Anchorage Municipal Code.

Docusign Envelope ID: 9D66E8E1-A0B2-4867-95D2-1111A7A86C5D

Section 3. Permits, Laws and Taxes.

The Contractor shall acquire and maintain in good standing all permits, licenses and other entitlements necessary to its performance under this contract. All actions taken by the Contractor under this contract shall comply with all applicable statutes, ordinances, rules and regulations. The Contractor shall pay all taxes pertaining to its performance under this contract.

Section 4. Nonwaiver.

The failure of either party at any time to enforce a provision of this contract shall in no way constitute a waiver of the provision, nor in any way affect the validity of this contract or any part hereof, or the right of such party thereafter to enforce each and every provision hereof.

Section 5. Amendment.

A. This contract shall only be amended, modified or changed by written document, executed by authorized representatives of the parties, with the same formality as this contract was executed.
B. For the purposes of any amendment modification or change to the terms and conditions of this contract, the only authorized representatives of the parties are:

Contractor: John Pepe, P.E., Principal

Anchorage: **Mayor, Municipal Manager or Approved Designee**

C. Any attempt to amend, modify, or change this contract by either an unauthorized representative or unauthorized means shall be void.

Section 6. Jurisdiction; Choice of Law.

Any civil action arising from this contract shall be brought in the Superior Court for the Third Judicial District of the State of Alaska at Anchorage. The law of the State of Alaska shall govern the rights and obligations of the parties under this contract.

Section 7. Severability.

Any provision of this contract decreed invalid by a court of competent jurisdiction shall not invalidate the remaining provisions of the contract.

Docusign Envelope ID: 9D66E8E1-A0B2-4867-95D2-1111A7A86C5D

Section 8. Integration.

This instrument and all appendices and amendments hereto embody the entire agreement of the parties. There are no promises, terms, conditions or obligations other than those contained herein; and this contract shall supersede all previous communications, representations or agreements, either oral or written, between the parties hereto.

Section 9. Liability.

A. The Contractor shall indemnify, defend, save, and hold Anchorage harmless from any claims, lawsuits or liability, including reasonable attorneys' fees and costs, arising from any wrongful or negligent act, error or omission of the Contractor or any subcontractor as a result of the Contractor's or any subcontractor's performance pursuant to this contract.

B. The Contractor shall not indemnify, defend, save and hold Anchorage harmless from claims, lawsuits, liability, including reasonable attorneys' fees and costs arising from a wrongful or negligent act, error or omission solely of Anchorage occurring during the course of or as a result of Anchorage's performance pursuant to this contract.

C. Where claims, lawsuits or liability, including attorneys' fees and costs arise from wrongful or negligent act of both Anchorage and the Contractor, the Contractor shall indemnify, defend, save and hold Anchorage harmless from only that portion of claims, lawsuits or liability, including attorneys' fees and costs, which result from the Contractor's or any subcontractor's wrongful or negligent acts occurring as a result of the Contractor's performance pursuant to this contract.

Section 10. Inspection and Retention of Records.

The Contractor shall, at any time during normal business hours and as often as Anchorage may deem necessary, make available to Anchorage, for examination, all records with respect to all matters covered by this contract for a period ending three years after the date the Contractor is to complete performance in accordance with Section 2 of the Special Provisions. Upon request, and within a reasonable time, the Contractor shall submit such other information and reports relating to its activities under this contract, to Anchorage, in such form and at such times as Anchorage may reasonably require. The Contractor shall permit Anchorage to audit, examine and make copies of such records, and to make audits of all invoices, materials, payrolls, records of personnel and other data relating to all matters covered by this contract. Anchorage may, at its option, permit the Contractor to submit its records to Anchorage in lieu of the retention requirements of this section.

Docusign Envelope ID: 9D66E8E1-A0B2-4867-95D2-1111A7A86C5D

Section 11. Availability of Funds.

Payments under this contract require funds from future appropriations and are subject to future appropriations. If sufficient funds are not appropriated for payments required under this contract, this contract shall terminate without penalty to Anchorage and Anchorage shall not be obligated to make payments under this contract beyond those which have previously been appropriated.

IN WITNESS WHEREOF, the parties have executed this contract on the date and at the place shown below.

Subject: Request for Professional Services Qualifications - Electrical & Mechanical Engineering Services

Dear Mark:

Engineering Design & Consulting (EDC), Inc. is pleased to provide a summary of our Professional Electrical & Mechanical Engineering Services and Resources. EDC has a long history of providing these design services for Southcentral Alaska. We take pride and are committed to further serving utilities in our community.

We understand that EDC's role would be to support personnel in a variety of tasks as part of planned capital improvement projects. EDC provides quick support for these short-duration tasks. Tasks may include a wide variety facility mechanical and electrical design tasks as well as construction administration services, evaluation of existing systems, and independent technical review of design documents produced by others.

As President and one of the principals at EDC. I will be the point of contact for any further inquiries. I am fully authorized to represent the company.

The required responses to the 'Notification of Contract Service Expansion', received on March 13, 2025, are as follows:

1. Firm's expertise and experience - see the 'Local Area Experience' section below.
2. Firm's experience with Hydroelectric projects – see the 'Local Area Experience' section below.
3. Firm's experience with maintaining records in accordance with the 'Uniform System of Accounts' – EDC has limited experience with this system.
4. Resumes of key personnel – see the 'Staff Qualifications and Experience' section below.

Sincerely,

John Pepe, PE
Principal, EDC, Inc.
1500 W 33rd Avenue, Suite 100
Anchorage, AK 99503

Email: johnp@edc-alaska.com

Firm Qualifications and Experience

EDC as a company has over 30 years of experience providing mechanical and electrical designs in support of water and wastewater projects throughout the State of Alaska. Having held several previous term contracts, we are familiar with many utilitys' standards, practices, and methods. We understand an owner's commitment to high quality construction practices as reflected in your own standard details and specifications whose requirements often exceed conventional standards. We have worked well with utility project managers, engineers, maintenance personnel and operators. This relationship has seen the successful completion of numerous projects with similar design elements, locations, complexity, and/or personnel as anticipated.

EDC has completed a number of mechanical and electrical designs for hydro-generation facilities. Typical design elements include HVAC, plumbing, power distribution, lighting, PLC-based process control systems and SCADA. Many of these projects have been multi-discipline projects where EDC has excelled in teamwork, planning, coordination, and successful completion.

Staff Qualifications and Experience

Our professional engineering design staff has over 100 years of combined experience in Alaska. The personnel proposed for this Contract are as follows (no sub-consultants are anticipated):

Contract Task Order Manager | Lead/Principal Electrical Engineer
John Pepe, P.E., President of EDC | BSEE Oregon State University, 1994 | Alaska Registration No. AELE-11287 (Electrical Engineer) & AELO-14325 (Control Systems Engineer) | 28+ yrs. exp.

Responsibilities: Mr. Pepe will provide project management and serve as an engineer of record. He will also function as internal reviewer for quality control of all task orders under this contract.
Experience: John brings more than 28+ years of facility electrical and control systems engineering to his project management. John's focus has been facility electrical power, lighting, telecommunications, and SCADA control systems.

Principal Electrical Project Engineer | Project Manager
Roy Pace, P.E., Principal of EDC | BSEE University of Alaska Fairbanks, 2004 | Alaska Registration No. AELE-12053 (Electrical Engineer) & AELO-14323 (Control Systems Engineer) | 20+ yrs. exp.

Responsibilities: Mr. Pace will serve as the project manager and engineer of record for projects as assigned. Additionally, he may serve as an internal reviewer.
Experience: Roy has been with EDC since 2003 and brings more than 20+ years of engineering experience to projects. His experience includes lighting, SCADA design, telecommunications, power distribution, technical reviews, specification development, site inspections, and construction administration.

Senior Electrical Project Engineer
John Faschan, P.E., Senior Engineer of EDC | BSEE Rutgers University, 1986 | Alaska Registration No. AELE-8286 (Electrical Engineer) & 108599 (Control Systems Engineer) | 38+ yrs. exp.

Responsibilities: Mr. Faschan will serve multiple functions under this contract. He will serve as the term contract technical reviewer and Quality Control manager, as well as project engineer of record for select projects.
Experience: John helped found EDC in 1994 as the original principal in the firm. John's focus for the past 3 decades has been municipal water and wastewater projects. He brings the experience of 38 years of developing power distribution, standby power, lighting, instrumentation, control, and SCADA system design solutions related to water and wastewater treatment facilities to the team.

Senior Electrical Project Engineer
Cory Wardrope, P.E., EDC | BSEE University of Alaska Anchorage, 2013 | Alaska Registration No. 129346 (Electrical Engineer) | 12+ yrs. exp.

Responsibilities: Mr. Wardrope will provide electrical engineering tasks as assigned, including technical memorandums, design development, coordination with other disciplines, construction cost estimating, submittal review, and site inspections.
Experience: Cory has been with EDC since 2013 when he began a summer internship. Project work has included technical

memorandum development, utility service upgrades; power distribution and motor control center design; standby power system design; telecommunication and SCADA system design; construction administration and startup services.

Principal Mechanical Engineer | Project Manager
Zach Boldrick, P.E., Principal of EDC | BSME Baylor University, 2008 | Alaska Registration No. ME-14283 (Mechanical Engineer) | 16+ yrs. exp.

Responsibilities: Mr. Boldrick will serve as the mechanical engineering project manager and engineer of record. Anticipated tasks include technical memorandums, design development, coordination with other disciplines, construction cost estimating, submittal review, and site inspections.
Experience: Zach started his professional career with EDC in 2009. Since that time, he has worked on hydro-generations projects for AWWU and microturbine projects throughout Southcentral Alaska.

Local Area Experience

EDC has been in business since 1994 and has served the Municipality for 30 years. In that time, the company gained valuable knowledge of alternative energy and hydro generation facilities and systems through numerous projects including the following:

City of Palmer Spruce Well House Microturbine (2024-25)
Design of new prime power, natural gas microturbine system. Project included coordination with the equipment manufacturer and electric service utility (MEA)
Client: City of Palmer
Project Manager: Chris Bowman, PE, HDL, Ph: (907) 761-1206

AWWU Ship Creek Energy Recovery Station (ERS) Hydro Turbine Feasibility Study (2019)
Electrical evaluation of the proposed alternatives as well as the basic electrical requirements for each alternative installation of a new hydro turbine at the ERS facility. EDC assisted in the cost evaluation of the electrical elements of the proposed alternative ROIs and the evaluation of the utility's net metering and buyback policies in alternative ROI calculations.
Client: AWWU / R&M
Project Manager: Don Porter, PE, R&M, Ph: (907) 646-9603

AWWU Eklutna Water Treatment Facility (EWTF) Facility and Asset Management Plan (2018)
Review and Evaluation of existing Eklutna WTF process and non-process (i.e., facilities) mechanical/electrical and controls infrastructure for regulatory compliance with current and applicable codes, Identified operational concerns and high-risk assets and prioritized risk mitigation. This work included the Eklutna hydro-turbine and proposed upgrades to the electric utility (CEA) infrastructure.
Client: CDM Smith
Project Manager: Mike Hyland PE, CDM Smith, Ph: (206) 518-2297
Owner's Representative: Steve Nuss, PE

Consultant Location

EDC has maintained its headquarters office in Anchorage since 1994. We recently relocated to an office at 1500 W 33rd Avenue, Suite 100, in Anchorage. Being located conveniently in midtown Anchorage, any department personnel can easily meet with team members on short notice for over-the-shoulder reviews or check-ins. Our central location also gives us the ability to quickly respond to critical and emergency situations.

Availability of Personnel and Resources

All proposed team members are based in Anchorage. EDC currently employs four licensed electrical engineers and a licensed mechanical engineer. We also provide internal quality reviews of each other's projects. This allows us to shift project responsibilities depending on workload and client schedules. When quick Contract Task Order schedules are requested, workloads can be shifted as necessary to provide the required timely response by personnel that can most efficiently provide it.

EDC is a fully automated office: workstations and software are available and integrated for all our staff. All staff have remote log-in access to our network and files. The technical support for drawing production includes AutoCAD workstations, all linked

to a file server and high-quality printers. Drafting is done using AutoCAD 2024 in the Windows environment. EDC uses the industry standard for power systems analysis software, SKM Power Tools. We have provided extensive fault current studies/arc flash analysis in large single-phase and three-phase networks, as well as protective device coordination studies. We also maintain a direct internet-based industry code subscription service and current lighting analysis software.

To meet production needs, in addition to AutoCAD production staff, all of EDC's staff is AutoCAD-literate. The mechanical and electrical department personnel will often assist each other with drafting tasks when necessary to meet urgent schedules. The production staff are all fluent in both REVIT and CIVIL 3D to integrate seamlessly with any vertical construction A/E teams.

CONTRACT FOR PROFESSIONAL SERVICES
WITH STANTEC CONSULTING SERVICES, INC.

In consideration of the mutual promises herein, ANCHORAGE and STANTEC CONSULTING SERVICES, INC. agree as follows. This contract consists of:

A. Part I, consisting of 15 sections of Special Provisions
B. Part II, consisting of 11 sections of General Provisions
C. Appendix A – Fee Schedule, consisting of 2 pages, excluding cover

PART I
SPECIAL PROVISIONS

Section 1. Definitions.

A. "Administrator" means the Engineering Division Director of the Anchorage Water and Wastewater Utility or their designee
B. "Anchorage" means the Municipality of Anchorage.
C. “Owner” means the Anchorage Water and Wastewater Utility
D. "Contractor" means Stantec Consulting Services, Inc.

Section 2. Scope of Services.

A. Individual delivery orders Contract Task Orders (CTOs) will be issued for specific Owner requested work items. The Contractor is to perform the professional services required to complete the tasks set forth in each CTO.

B. The Contractor shall respond to each CTO with a proposal detailing scope, cost, subcontractor involvement, and time required to complete the work in each CTO. AWWU and the Contractor may refine the proposal for clarification of the scope of services prior to issuing Notice to Proceed for the CTO.

C. Each CTO is limited in scope to the work requested in the request for proposal (RFP 2024P017) that led to this contract and as stated below;

1. This term contract is limited to Civil Engineering and all related branches of Civil Engineering such as but not limited to structural and environmental services for study, design, inspection and/or construction management services.

2. Services may include, but are not limited to studying, reporting on, designing, inspecting, and managing parts of or entire projects for road, site, parking areas, water and sanitary sewer piping as well as facility upgrades.

3. The Contractor may utilize subcontractors in support of Civil Engineering task orders, such as but not limited to specialty knowledge consultants, survey, right-of-way acquisition, public involvement, project controls, project management, specialty training and event hosting. See Section 15 for additional requirements regarding subcontractors and work proposals.

Docusign Envelope ID: 68B19F97-0464-450E-8EA3-7A2D57C2C5A4

D. A Purchase Order (PO) will be issued against this contract for each specific CTO. No work is authorized nor may commence without receipt of a PO. Once received, the Contractor shall perform the professional services required to complete the CTO contained therein. Individual PO's are not to exceed $250,000.00, unless Anchorage's Purchasing Director or their designee approves of a greater amount.

E. Anchorage shall not allow any claim for services other than those described in this section. However, the Contractor may provide, at its own expense, any other services that are consistent with this contract.

Section 3. Time for Performance.

A. This contract becomes effective when signed on behalf of Anchorage and shall remain in effect for three year(s) from the date of final signature.

B. Upon receipt of a PO authorizing work, the Contractor shall commence performance of that work and complete that performance in accordance with the schedule contained therein.

Section 4. Compensation; Method of Payment.

A. Subject to the Contractor's satisfactory performance, Anchorage shall pay the Contractor no more than SEVEN HUNDRED FIFTY THOUSAND DOLLARS ($750,000.00) in accordance with this section.

B. Anchorage shall pay the Contractor for actions performed for a CTO issued under this contract in accordance with the schedule of professional fees provided in response to the Owner's request for proposals.

C. Each month the Contractor shall present a bill to the Owner describing the work for which it seeks payment and documenting expenses and fees to the satisfaction of the Owner. If any payment is withheld because the Contractor's performance is unsatisfactory, the Owner must, within ninety (90) days of the payment denial, notify the Contractor of the payment denial and set forth, with reasonable specificity, what was unsatisfactory and why.

D. The Contractor is not entitled to any compensation under this contract, other than is expressly provided for in this section.

E. As a condition of payment, the Contractor shall have paid all municipal taxes currently due and owing by the Contractor.

F. Labor rates for the Contractor and their subcontractors must be all inclusive. Separate charges for insurance, special pay, pay enhancements, employer paid contributions to retirement programs, employer paid benefits, overhead, and profit, and additional accessory office components associated with the charging position, such as but not limited to, internet, remote office, telephone, computer, computer programs, office supplies, office space, and furniture will not be allowed regardless of what is shown in the fee schedule in or as updated per item B in this section.

Docusign Envelope ID: 68B19F97-0464-450E-8EA3-7A2D57C2C5A4

Section 5. Termination of the Contractor's Services.

The Contractor's services under Section 2 may be terminated:

A. By mutual consent of the parties.

B. For the convenience of Anchorage, provided that Anchorage notifies the Contractor in writing of its intent to terminate under this paragraph at least 30 days prior to the effective date of the termination.

C. For cause, by either party where the other party fails in any material way to perform its obligations under this contract. Termination under this subsection is subject to the condition that the terminating party notifies the other party of its intent to terminate, stating with reasonable specificity the grounds therefor, and the other party fails to cure the default within thirty (30) days after receiving the notice.

Section 6. Duties Upon Termination.

A. If Anchorage terminates the Contractor's services for convenience, Anchorage shall pay the Contractor for its actual costs reasonably incurred in performing before termination. Payment under this subsection shall never exceed the total compensation allowable under Section 4. All finished and unfinished documents and materials prepared by the Contractor shall become the property of Anchorage.

B. If the Contractor's services are terminated for cause, Anchorage shall pay the Contractor the reasonable value of the services satisfactorily rendered prior to termination less any damages suffered by Anchorage because of the Contractor's failure to perform satisfactorily. The reasonable value of the services rendered shall never exceed the contract rate for such services, and payment under this subsection shall not exceed ninety percent (90%) of the total compensation allowable under Section 4. Any finished or unfinished documents or materials prepared by the Contractor under this contract shall become the property of Anchorage at its option.

C. If the Contractor receives payments exceeding the amount to which it is entitled under subsections A or B of this section, he shall remit the excess to the Administrator within thirty (30) days of receiving notice to do so.

D. The Contractor shall not be entitled to any compensation under this section until the Contractor has delivered to the Administrator all documents, records, work product, materials and equipment owned by Anchorage and requested by the Administrator.

E. If the Contractor's services are terminated, for whatever reason, the Contractor shall not claim any compensation under this contract, other than that allowed under this section.

F. Except as provided in this section, termination of the Contractor's services under Section 5 does not affect any other right or obligation of a party under this contract.

Docusign Envelope ID: 68B19F97-0464-450E-8EA3-7A2D57C2C5A4

G. If a final audit has not been performed before the Contractor's services are terminated, Anchorage may recover any payments for costs disallowed as a result of the final audit.

Section 7. Insurance.

A. The Contractor shall maintain in good standing, for the entire period of the contact, the insurance described in subsection B of this section. Before rendering any services under this contract, the Contractor shall furnish the Administrator with a Certificate of Insurance in accordance with subsection B of this section in a form acceptable to the Risk Manager for Anchorage.

B. The Contractor shall provide the following insurance:

1) $500,000 Employers Liability and Workers Compensation as required by Alaska Law.

2) Commercial Automobile Liability in the amount of $1,000,000 combined single limit to include: owned, hired, and non-owned.

3) Commercial General Liability including:

a. $2,000,000 General Aggregate
b. $2,000,000 Products/Completed Operations
c. $1,000,000 Personal & Advertising Injury
d. $1,000,000 Each Occurrence
e. $5,000 Medical Payments

4) Professional Liability insurance with limits not less than $1,000,000 per occurrence and $2,000,000 aggregate.

5) Cyber/Privacy Liability insurance with limits not less than $3,000,000. The Cyber coverage shall include, but not be limited to, claims involving invasion of privacy violations, Information theft, and release of private information. The policy shall provide coverage for breach response costs as well as regulatory fines and penalties as well as credit monitoring expenses.

C. Policies written on a "claims-made basis" must have a two (2) year tail of coverage, or an unbroken continuation of coverage for two (2) years from the completion of the contract requirements.

D. Each policy of insurance required by this section shall provide advance notice to the MOA/Contract Administrator prior to cancellation in accordance with the policy. If the insurer does not notify the MOA on policy cancellation it shall be the contractor's responsibility to notify the MOA of such cancellation.

E. Except for Workers Compensation and Professional Liability each policy is to name The Municipality as an "additional insured" and the actual policy endorsement shall accompany each Certificate of Insurance.

Docusign Envelope ID: 68B19F97-0464-450E-8EA3-7A2D57C2C5A4

F. General Liability, Workers Compensation, and Automobile policies shall be endorsed to waive all rights of subrogation against the Municipality of Anchorage by reason of any payment made for claims under the above coverage. This policy endorsement shall accompany each Certificate of Insurance.

G. All policies for general liability shall be primary and noncontributing with any insurance that may be carried by the Municipality.

H. Contractor shall require and verify that all subcontractors maintain insurance meeting all requirements stated herein, and Contractor shall ensure that the Municipality is an additional insured on insurance required from subcontractors.

Section 8. Assignments.

Unless otherwise allowed by this contract or in writing by the Administrator, any assignment by the Contractor of its interest in any part of this contract or any delegation of duties under this contract shall be void, and an attempt by the Contractor to assign any part of its interest or delegate duties under this contract shall give Anchorage the right immediately to terminate this contract without any liability for work performed.

Section 9. Ownership; Publication, Reproduction and Use of Material.

A. Except as otherwise provided herein, all data, documents and materials produced by the Contractor under this contract shall be the property of Anchorage, which shall retain the exclusive right to publish, disclose, distribute and otherwise use, in whole or in part, any such data, documents or other materials. Exclusive rights shall not be attributed to portions of such materials presently in the public domain or which are not subject to copyright.

B. Should Anchorage elect to reuse Work products provided under this Contract for other than the original project and/or purpose, Anchorage will not hold Contractor liable for any damages resulting from Anchorage's reuse of work products for an unintended purpose. Additionally, any reuse of design drawings or specifications provided under this Contract must be limited to conceptual or preliminary use for adaptation and the original Constructor's or subcontractor's signature, professional seals and dates removed. Reuse of drawings and specifications, which require professional seals and dates removed, will be signed, sealed, and dated by the professional who is in direct supervisory control and responsible for adaptation.

C. Equipment purchased by the Contractor with designated contract funds shall be the sole property of Anchorage marked and inventoried as such with a copy of the inventory forwarded to Anchorage.

Section 10. Notices.

Docusign Envelope ID: 68B19F97-0464-450E-8EA3-7A2D57C2C5A4

Any notice required pertaining to the subject matter of this contract shall be either sent via facsimile (FAX) or mailed by prepaid first class registered or certified mail, return receipt requested to the following addresses:

Anchorage: Municipality of Anchorage
Anchorage Water and Wastewater Utility
Attn: James Armstrong, P.E.
3000 Arctic Boulevard
Anchorage, AK 99503-3898
FAX: (907) 562-0824

Contractor: Stantec Consulting Services, Inc.
Attn: Dean Syta, P.E.
725 E. Fireweed Lane, Suite 200
Anchorage, AK 99503
FAX: (907) 258-4653
dean.syta@stantec.com

Notices are effective upon the earlier of receipt, proof of good transmission (facsimiles only), or five (5) days after proof of proper posting.

Section 11. Contract Budget.

In connection with its performance under this contract the Contractor shall not make expenditures other than as provided in line items in the contract budget.

Section 12. Force Majeure.

A. Any failure to perform by either party due to force majeure shall not be deemed a violation or breach hereof.

B. As used in this contract, force majeure is an act or event of substantial magnitude, beyond the control of the delayed party, which delays the completion of this contract, including without limitation:

1. Any interruption, suspension or interference resulting solely from the act of the Municipality or negligent act(s) of the Municipality not otherwise governed by the terms of this contract.
2. Strikes or work stoppages.
3. Any interruption, suspension or interference with the project caused by acts of God, or acts of a public enemy, pandemics, wars, blockades, insurrections, riots, arrests or restraints of governments and people, civil disturbances or similar occurrences.
4. Order of court, administrative agencies or governmental officers other than the Municipality.

Docusign Envelope ID: 68B19F97-0464-450E-8EA3-7A2D57C2C5A4

Section 13. Financial Management System.

The Contractor shall establish and maintain a financial management system that:

A. Provides accurate, current, and complete disclosure of all financial transactions relating to the contract;

B. Maintains separate accounts by source of funds for all revenues and expenditures and identifies the source and application of funds for the Contractor's performance under this contract, including information pertaining to subcontracts, obligations, unobligated balances, assets, liabilities, outlays and income;

C. Effectively controls and accounts for all municipal funds and contract property;

D. Compares actual expenditures with budgeted amounts and relates financial information to performance or productivity data including unit cost information where applicable;

E. Allocates administrative costs to direct service delivery units;

F. Minimizes the time between receipt of funds from Anchorage and their disbursement by the Contractor;

G. Provides accounting records supported by source documentation; and

H. Provides a systematic method assuring the timely and appropriate resolution of audit findings and recommendations.

Section 14. Funding Requirements.

If any funding source for this contract should impose additional requirements upon Anchorage for the use of those funds, the Contractor agrees to abide by those additional requirements immediately upon receipt of written notice thereof from Anchorage.

Section 15. Subcontracts.

The Contractor may enter into subcontracts for the purchase of goods and services necessary for the performance of this contract, provided:

A. Every subcontract shall be reduced to writing and contain a precise description of the services or goods to be provided and the nature of the consideration paid therefore. Each subcontract is to provide a rate sheet with same limitation placed on the rates as the Contractor.

B. Every subcontract under which the Contractor delegates the provision of services shall be subject to review and approval by the Administrator before it is executed by the Contractor.

Docusign Envelope ID: 68B19F97-0464-450E-8EA3-7A2D57C2C5A4

C. Every subcontract in an amount exceeding $1,000.00 shall require reasonable access to business records of the subcontractor relating to the purchase of goods or services pursuant to the subcontract.
D. The Contractor is not allowed a markup for goods and services. In accordance with item A, this provision extends to subcontractors.

Docusign Envelope ID: 68B19F97-0464-450E-8EA3-7A2D57C2C5A4

PART II

GENERAL CONTRACT PROVISIONS

Section 1. Relationship of Parties.

The Contractor shall perform its obligations hereunder as an independent contractor of Anchorage. Anchorage may administer the contract and monitor the Contractor's compliance with its obligations hereunder. Anchorage shall not supervise or direct the Contractor other than as provided in this section.

Section 2. Nondiscrimination.

A. The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, national origin, ancestry, age, sex, sexual orientation, gender identity, or marital status, or who is a "qualified individual with a disability", as that phrase is defined in the Americans With Disabilities Act of 1990. The Contractor will take affirmative action to ensure that applicants are employed and that employees are treated during employment without regard to their race, color, religion, mental or physical disability, sexual orientation or gender identity. Such action shall include, without limitation, employment, upgrading, demotion or transfer, recruitment or recruiting advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training including apprenticeship. The Contractor agrees to post, in conspicuous places available to employees and applicants for employment, notices setting forth the provisions of this nondiscrimination clause.

B. The Contractor shall state, in all solicitations or advertisements for employees to work on contract jobs, that all qualified applicants will receive equal consideration for employment without regard to race, color, religion, national origin, ancestry, age, sex, sexual orientation, gender identity, marital status, or mental or physical disability.

C. The Contractor shall comply with all reporting requirements that may apply to it which the Anchorage Office of Equal Employment Opportunity Contract Compliance may establish by regulation. The contract compliance officer may accept the contractor's compliance with federal requirements or the contractor's federal reporting documents in lieu of reporting under this section.

D. The Contractor shall include the provisions of subsections A through C of this section in every subcontract or purchase order under this contract, so as to be binding upon every such subcontractor or vendor of the Contractor under this contract. The contract compliance officer may accept the contractor's compliance with federal requirements or the contractor's federal reporting documents in lieu of reporting under this section.

E. The Contractor shall comply with all applicable federal, state and municipal laws concerning the prohibition of discrimination including, but not limited to Title 5 and Title 7, Chapter 7.50 of the Anchorage Municipal Code.

Docusign Envelope ID: 68B19F97-0464-450E-8EA3-7A2D57C2C5A4

Section 3. Permits, Laws and Taxes.

The Contractor shall acquire and maintain in good standing all permits, licenses and other entitlements necessary to its performance under this contract. All actions taken by the Contractor under this contract shall comply with all applicable statutes, ordinances, rules and regulations. The Contractor shall pay all taxes pertaining to its performance under this contract.

Section 4. Nonwaiver.

The failure of either party at any time to enforce a provision of this contract shall in no way constitute a waiver of the provision, nor in any way affect the validity of this contract or any part hereof, or the right of such party thereafter to enforce each and every provision hereof.

Section 5. Amendment.

A. This contract shall only be amended, modified or changed by written document, executed by authorized representatives of the parties, with the same formality as this contract was executed.
B. For the purposes of any amendment modification or change to the terms and conditions of this contract, the only authorized representatives of the parties are:

Contractor: Dean Syta, P.E., Senior Prinipal

Anchorage: **Mayor, Municipal Manager or Approved Designee**

C. Any attempt to amend, modify, or change this contract by either an unauthorized representative or unauthorized means shall be void.

Section 6. Jurisdiction; Choice of Law.

Any civil action arising from this contract shall be brought in the Superior Court for the Third Judicial District of the State of Alaska at Anchorage. The law of the State of Alaska shall govern the rights and obligations of the parties under this contract.

Section 7. Severability.

Any provision of this contract decreed invalid by a court of competent jurisdiction shall not invalidate the remaining provisions of the contract.

Docusign Envelope ID: 68B19F97-0464-450E-8EA3-7A2D57C2C5A4

Section 8. Integration.

This instrument and all appendices and amendments hereto embody the entire agreement of the parties. There are no promises, terms, conditions or obligations other than those contained herein; and this contract shall supersede all previous communications, representations or agreements, either oral or written, between the parties hereto.

Section 9. Liability.

A. The Contractor shall indemnify, defend, save, and hold Anchorage harmless from any claims, lawsuits or liability, including reasonable attorneys' fees and costs, arising from any wrongful or negligent act, error or omission of the Contractor or any subcontractor as a result of the Contractor's or any subcontractor's performance pursuant to this contract.

B. The Contractor shall not indemnify, defend, save and hold Anchorage harmless from claims, lawsuits, liability, including reasonable attorneys' fees and costs arising from a wrongful or negligent act, error or omission solely of Anchorage occurring during the course of or as a result of Anchorage's performance pursuant to this contract.

C. Where claims, lawsuits or liability, including attorneys' fees and costs arise from wrongful or negligent act of both Anchorage and the Contractor, the Contractor shall indemnify, defend, save and hold Anchorage harmless from only that portion of claims, lawsuits or liability, including attorneys' fees and costs, which result from the Contractor's or any subcontractor's wrongful or negligent acts occurring as a result of the Contractor's performance pursuant to this contract.

Section 10. Inspection and Retention of Records.

The Contractor shall, at any time during normal business hours and as often as Anchorage may deem necessary, make available to Anchorage, for examination, all records with respect to all matters covered by this contract for a period ending three years after the date the Contractor is to complete performance in accordance with Section 2 of the Special Provisions. Upon request, and within a reasonable time, the Contractor shall submit such other information and reports relating to its activities under this contract, to Anchorage, in such form and at such times as Anchorage may reasonably require. The Contractor shall permit Anchorage to audit, examine and make copies of such records, and to make audits of all invoices, materials, payrolls, records of personnel and other data relating to all matters covered by this contract. Anchorage may, at its option, permit the Contractor to submit its records to Anchorage in lieu of the retention requirements of this section.

Docusign Envelope ID: 68B19F97-0464-450E-8EA3-7A2D57C2C5A4

Section 11. Availability of Funds.

Payments under this contract require funds from future appropriations and are subject to future appropriations. If sufficient funds are not appropriated for payments required under this contract, this contract shall terminate without penalty to Anchorage and Anchorage shall not be obligated to make payments under this contract beyond those which have previously been appropriated.

IN WITNESS WHEREOF, the parties have executed this contract on the date and at the place shown below.

Amendment No. 1
Term Contract for Professional Services
with Stantec Consulting Services Inc.

This Amendment is made and entered into by and between the Municipality of Anchorage, Anchorage Water & Wastewater Utility, hereinafter referred to as "AWWU" and Stantec Consulting Services Inc., hereinafter referred to as "Contractor".

WHEREAS, AWWU and the Contractor entered into a contract for professional services dated October 03, 2024, hereinafter referred to as the "Contract"; and

WHEREAS, the parties have the authority to amend the Contract pursuant to Part II, Section 5 and desire to do so;

NOW, THEREFORE, in consideration of the mutual covenants and agreements contained in the contract, the parties do hereby agree that the Contract shall be amended as follows:

1. Part 1, Section 4, Compensation; Method of Payment, Paragraph A of the contract shall be amended as follows:

   Subject to the Contractor's satisfactory performance, Anchorage shall pay the Contractor on a time-and-materials basis, or a lump-sum basis, a sum not to exceed TWO MILLION SEVEN HUNDRED FIFTY THOUSAND DOLLARS ($2,750,000), an increase of $2,000,000, in accordance with this section.

The parties agree that all other portions of the Contract shall remain in full force and effect in accordance with its terms.

IN WITNESS WHEREOF, the parties have executed this amendment on the date and at the place shown below.

March 18, 2025

Municipality of Anchorage
Anchorage Hydropower Utility
632 W. 6th Avenue, Anchorage, AK 99501

Reference: Anchorage Hydropower Utility - Notice of Contract Services Expansion

Dear Anchorage Hydropower Utility:

Stantec Consulting Services, Inc (Stantec) is a global consulting firm with industry-leading expertise in hydropower and transmission engineering and design. Our firm is consistently ranked as one of the top 10 firms providing hydropower, dams, and water resource consulting services. Stantec's Alaskan experience includes a rich history of developing projects across the state – ranging from smaller, local projects to large, complex infrastructure developments - including Susitna-Watana, Cooper Lake (Kenai), Tiekel River (Copper Valley), Allison Creek (Valdez), Chester Lake (Metlakatla), and now Eklutna Lake. Together, we have continued to expand our hydropower work in Alaska, and throughout the American West.

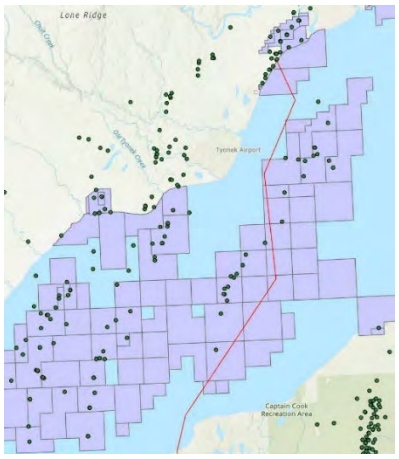
Stantec is pleased to respond to your subject notice with our qualifications for:

1. Electric generation and transmission, locally on the Alaska Railbelt and elsewhere.
2. Hydroelectric projects, locally and elsewhere.
3. Stantec is not providing services for Uniform System of Accounts or property records.

1 Project Examples

1.1 Electric Generation and Transmission Project Examples

Railbelt Innovation and Resiliency Project (Transmission Lines) | AEA
Cost: $850,000
Reference: James Mendenhall, AEA, 907-771-3040
Stantec is currently leading a feasibility study for electrical transmission line connections between Soldotna, Beluga, and Anchorage – following three routes across the Kenai Peninsula and under Cook Inlet. **Successes:** Stantec is providing Environmental Critical Issues Analysis, Client and Stakeholder Involvement, High-Voltage Direct Current (HVDC) Preliminary Design, Cable Preliminary Design, and Cost Estimate. For environmental work, Stantec is focusing on the wetlands, aquatic, wildlife, land ownership, and Cook Inlet Beluga Whale Endangered Species Act considerations for construction. These are paired with the onshore utility congestion and land ownership issues at the potential emergence points in Anchorage for any transmission line under Cook Inet. **Experience:** These projects are similar to the types of transmission line studies AHU may need under the term contract.



AEA Transmission Line Alignment

Stantec is already working with the utilities and new market entrants (Little Mt. Susitna Wind) to evaluate the best way to improve the transmission system and plotting feasible ways forward. Stantec's unique experience working with multiple stakeholders gives us a more holistic view of the transmission network.

Shovel Creek Wind and Transmission Line Site Investigations

Little Mt Susitna Wind and Shovel Creek Wind Projects | Longroad Energy
Cost: $750,000
Reference: Lindsey Kester, Longroad Energy, 385-312-3938
Stantec is currently leading the wetlands, aquatic, land ownership, permitting, and NEPA tasks for the proposed wind farm at Fairbanks' Shovel Creek, and the overall strategy and permitting for Beluga's Little Mt. Susitna. **Successes:** Longroad isn't looking to Stantec to execute clearly defined tasks but instead to create and manage their entire environmental program. Stantec provides comprehensive environmental strategy and services, including managing contractors (i.e. ABR), collecting baseline data (i.e. wetlands, wildlife), developing agency relationships, and addressing litigation risk. Stantec is also responsible for permitting and environmental work on the transmission system, local landowners, tribes, and key agency influencers. **Experience:** Stantec develops utility-grade power generation projects in Alaska. We provide project developers with valuable technical and strategic advice, including a turnkey environmental program for wetlands, cultural resources, wildlife, and fisheries. For example, our relationship with NMFS on construction in beluga whale habitat benefits both Shovel Creek's Cook Inlet barging plans and AEA's Cook Inlet transmission line plans. The agency regulators have also worked with Stantec on these projects—and have come to trust our advice and analysis.

1.2 Hydroelectric Project Examples

Bradley Lake Environmental and Regulatory Services* | AEA *(*Staff experience at Stantec and with previous employers)*
Cost: $300,000+ **Reference:** Bryan Carey, AEA, 907-771-3000
Our team has worked on multiple Bradley Lake projects, including the fisheries and instream flow for the original facility, and the permitting for the Battle Creek expansion. **Successes:** Heidi served on the Bradley Lake 2006 FERC Part 12 and Potential Failure Mode Analysis consultant team. Ryan completed fish and wildlife implementation plans and wildlife impact assessments for the Battle Creek expansion.

Bradley Lake

Eklutna Lake Hydro

Eklutna Lake Hydro | Anchorage Hydropower Utility
Cost: $400,000+ **Reference:** Mark Corsentino, Anchorage Hydropower Utility, 907-917-6551
Stantec is currently leading an in-depth feasibility evaluation of a pumped-storage development at the Eklutna Lake Hydro Project, as requested by the Governor, and with Stantec in preference to the previous contractors. Dean and Ryan are leading Stantec's work on alternative analysis, hydrology, fisheries/instream flow, and agency/public involvement. **Successes:** Dean and Ryan specialize in moving complex projects through alternative design, permitting, and stakeholder engagement process. Utilities in particular value our ability to navigate complex competing interests of stakeholders, while maintaining trust in high-quality products. We've been using our team's fishery experience on Alaskan glacial and non-glacial streams to help design alternatives in a process that is better understood by all of the stakeholders.

Cooper Lake Hydroelectric Project Relicensing | Chugach Electric Association
Cost: $3 million
Reference: Burke Wick, Chugach Electric, 907-563-7494
Our team provided the full range of engineering, permitting and economic studies associated with FERC relicensing of the Cooper Lake Hydroelectric Project located on the Kenai Peninsula. **Successes:** The FERC relicensing program spanned a period of about six years and involved internal strategy meetings, compilation of background data, studies, operations modeling, cost estimates, and economic analyses. Services included conceptual designs, hydrology studies, economic studies, flood modeling, FERC reports, and Stetson Diversion project concept development, feasibility, and permitting.

Cooper Lake

Susitna-Watana Project Licensing | AEA
Cost: $5 million **Reference:** Bryan Carey, AEA, 907-771-3065
Stantec began and executed the licensing process with FERC, including developing the strategy, consultation, and baseline/impact studies for other consultants to complete. **Successes:** Our team was trusted by AEA to manage the most difficult licensing process for an Alaskan hydro project. First, we developed a data gap analysis from the 1980s data and designed a strategy to contract out the required new studies. Second, from a licensing perspective, a key early decision that we helped the AEA make was to use the FERC integrated licensing process instead of the traditional licensing process, as it was a better fit for this new controversial project. Our team successfully facilitated agency meetings and performed studies and data gap analyses in the areas of aquatics, wildlife, hydrology, water quality, subsistence, socioeconomics, transportation, recreation, and cultural resources. We developed key components of the public outreach efforts, including the project website (Susitna-watanahydro.org) and a site visit for FERC staff and agencies.

Susitna Watana Project

Tiekel River Reconnaissance Study | Copper Valley Electric Association
Cost: $250,000
Reference: Travis Million, Copper Valley Electric, 907-822-8345
Copper Valley Electric Association (CVEA) selected our team to perform a feasibility analysis assessing the hydropower resource potential of the glacial Tiekel River watershed.
Successes: We performed the analysis and prepared a reconnaissance report documenting alternative scenarios for hydropower development. Preliminary design of conceptual layouts included 12 hydropower schemes on the Tiekel River. Our team provided FERC licensing feasibility and strategy analysis and also provided analysis on the potential for terrestrial, aquatic, and cultural resource issues. This effort included identifying dam type, sizing waterways, and preparation of Class 5 cost estimates. Our team also quantified CVEA's hydropower generation and load-matching scenarios for local industry, regional, or statewide markets.

Tiekel River

1.3 Maintaining records in accordance with the Uniform System of Accounts and maintaining continuing property records

The Uniform Systems of Accounts is an accounting requirement unique to the Federal Energy Regulatory Commission (FERC). Stantec is not proposing to offer services for this category.

2 Resumes

Dean Syta, PE AELC 9349, AELM 14229, AELV 14230 | **Contract Manager** | 32 Years of Experience | Stantec | Alaska | **Duties:** As contract manager, Dean is responsible for Client Service and customer satisfaction, providing you the level of service and quality you expect from Stantec. In this role, Dean will be overseeing all our work with your team and maintaining compliance with both the contract terms and Stantec's own quality requirements. As a Senior Principal, Dean has the authority to prioritize Stantec resources to meet your needs, conduct negotiations and commit the firm. Leveraging his diverse experience, he will participate at key points of the project to offer design and construction insights and lessons learned. **Qualifications:** Based in Anchorage, Dean is a senior principal for Stantec Alaska, with over 32 years of experience managing utility, water, and power projects. He has a Bachelor of Science and a Civil Engineering Master of Science degree from the University of Alaska, Fairbanks. Dean is a versatile engineer - triple licensed and practiced in civil, mechanical, and environmental engineering. Dean is a hands-on engineer, as experienced with construction as he is with design. He coordinates the permitting for most of his projects and participates in the construction contract administration. Dean has the unique ability to recognize what elements of a project are going to work well, versus what is likely to cause construction or operational problems. **Experience:** As a multidiscipline engineer, Dean has managed the design and construction of utility projects throughout Alaska. He is presently the project manager for the AEA Kenai-to-Beluga High-Voltage Direct Current (HVDC) planning project, which is developing the project implementation plan and construction cost estimates for 38 miles of HVDC subsea transmission cable. In Anchorage, Dean assists the Anchorage Hydropower Authority with a feasibility study examining pumped-storage hydropower opportunities at Eklutna Lake to enhance both power and fish habitat. Dean was the project manager for the Chester Lake Dam Raise project in Metlakatla, Alaska which will raise the existing reservoir 15 feet to increase community water supply. In an example of a major utility project, Dean was the manager for the 2018 North Pole Water Expansion project, with constructed over 30 miles of new water main, water tanks, pump station, and treatment systems in less than three years from start of design to finish of construction, including all easement and property acquisitions. Both ADEC and the City of Anchorage Water and Wastewater Utility contract with Dean for third-party peer review services. **References:** James W. Mendenhall, PE, AEA, 907-771-3040; Bryan Carey, PE, AEA, 907-771-3065; Mark A. Corsentino, PE, Director, Anchorage Hydropower Utility, 907-786-5511

Ryan Cooper, MS, PWS | **Environmental Hydropower Lead | 18 Years of Experience | Stantec | Alaska | Duties:** Ryan is based in Anchorage and will serve as the environmental lead for hydropower work. **Qualifications:** Ryan has a Bachelor of Science in Biology, another in Business, and a Master of Science in Biology from the University of Alaska, Fairbanks. Ryan is a fish biologist and senior project manager, leading Stantec's 300-person environmental staff for Alaska and the US Mountain Region. Clients bring Ryan into projects to manage the diverse technical disciplines (i.e. environmental, ROW, engineering) and create a single, cohesive project. Ryan worked on Bradley Lake about 10 years ago, including writing Bradley Lake's fisheries habitat management implementation plan and the Battle Creek Diversion Project wildlife impact analysis. He is currently leading instream flow analysis for habitat suitability and modeling for Eklutna Lake Pumped Storage Hydro. Ryan is working with AEA on the electrical transmission line project from Kenai to Beluga and is leading the environmental work for the utility-grade energy projects Shovel Creek Wind and Little Mt. Susitna Wind. **Experience:** Ryan spent years as a fisheries biologist, running research and fish weirs for ADF&G and other employers in Alaskan glacial and freshwater streams. Ryan is experienced in the fisheries components of instream flow modeling, and has led work on hydroelectric projects across Alaska, including Bradley Lake, Susitna-Watana, Chester Creek, and Blue Lake. He has

worked on some of the most complex environmental projects in Alaska, including the Red Dog Mine Expansion, Alaska Gasline Development Corporation gas line, Ambler Road, and large Chukchi Sea oil exploration programs. In the past, Ryan was appointed by the Secretary of the Interior to help improve the coordination of science research between agencies in Alaska. **References:** Mark Corsentino, Anchorage Hydropower Utility, 907-917-6551; Julie Engebretsen, City of Homer, 907-435-3119; James W. Mendenhall, PE AEA, 907-771-3040.

Mike Manwaring, PG | **Hydropower and Pumped Storage Expert | 25 Years of Experience | Stantec | Washington | Duties:** Mike will serve as a strategic advisor and technical resource for the project supporting the engineering and regulatory team. **Qualifications:** He is an engineering professional with over 25-years of technical experience in the power and water infrastructure industry, with a deep understanding of pumped storage hydropower, conventional hydropower, dams, and water resources infrastructure. Over the past 15 years he has become a recognized industry expert on hydropower and pumped storage projects, having worked on over 50 water infrastructure projects across North America, ranging from 5 MWs to over 1,500 MWs. Mike serves as a strategic and technical advisor for a broad range of public and private clients across the U.S. and Canada, where he focuses on project development, engineering assessments, energy market evaluations, and contracting strategies. Mike has also supported the U.S. hydropower industry for over a decade, including serving on the Board of Directors for the Northwest Hydroelectric Association, National Hydropower Association, and Hydropower Foundation. He served as the Chair of NHA's Pumped Storage Development Council for six years and has supported multiple U.S. Department of Energy technical and policy studies related to pumped storage. **References:** Wayne Dyok, H2O Ecopower, former Project Manager for Susitna-Watana Hydropower Project, 916-719-7022; Joel Metzger, Utica Water and Power Authority 209-736-9419; Ralph Torres, California Department of Water Resources, 916-891-7294.

Dylan Wade, PE | Senior Hydromechanical Engineer | 20 Years of Experience | Stantec | Wyoming | Duties: Dylan will serve as the lead engineer for executing the project design and technical assessment. Dylan has significant experience in engineering and technical studies for multiple water resources, civil, and mechanical design projects. His expertise includes pumped storage planning, hydropower planning, design, and construction, dam and reservoir technical and economic feasibility studies, permitting, and design, flood hydrology, dam break hydrology, routing and inundation mapping, watershed hydrology, and hydraulic modeling and design. **References:** Clint Bassett, City of Cheyenne Board of Public Utilities, Water Treatment Division Manager, 307-632-9890 – Sherard Hydroelectric Project.

Brian Sadden, PE | Hydropower Subject Matter Expert | 40 Years of Experience | Stantec | Washington | Duties: Mr. Sadden will serve as a technical advisor to the engineering team. **Qualifications:** Brian brings global hydropower and pumped storage expertise, including previously serving as the engineer lead for the Susitna-Watana Hydropower Project. His career has focused on a broad range engineering and technical leadership roles for hydropower and water resource project. He has been responsible for water resources infrastructure engineering operations in California, London, and Singapore, in addition to duties managing all engineering for the San Francisco Public Utilities Commission (SFPUC) - including rehabilitation of the Hetch Hetchy water supply for San Francisco. His technical specialties include dam and hydro power design and construction, and Mr. Sadden has provided input to projects in Africa, Asia, Europe, the Middle East, North America, South America, and the United Kingdom, as well as residing in a number of countries. Mr. Sadden is approved by the Federal Energy Regulatory Commission (FERC) as an Independent Consultant under Pt 12 regulations and is thus approved for inspections of all types of large hydro dams in the USA. **References:** Wayne Dyok, H2O Ecopower, former Project Manager for Susitna-Watana Hydropower Project, 916-719-7022; Bryan Carey, PE, AEA, 907-771-3065.

Heidi Wahto, MPA | **FERC Licensing Expert | 24 Years of Experience | Stantec | Washington | Duties:** Heidi will be the FERC regulatory lead for this project coordinating between the environmental and state permitting efforts and the license amendment and other federal approval processes. **Qualifications:** Heidi is a licensing and compliance consultant with a career focused on serving Alaska and the Pacific Northwest. She has worked on 13 FERC-regulated projects in Alaska and on five new development hydro projects in Alaska. She is a senior project manager providing a range of regulatory and environmental services including licensing, permitting, and developing compliance programs for hydropower and water-resource-related projects. In her many years as a practitioner of FERC licensing and compliance, Heidi has managed a range of FERC processes including the integrated licensing process, alternative licensing process, and traditional licensing process, minor and major amendments, and compliance filings. **Experience:** Heidi has supported FERC licensees through all phases of a hydro project's life cycle, including licensing and associated state, federal and local permitting; managing natural resource studies; developing and implementing environmental management plans; performing environmental monitoring; identifying need for and timing of license amendments; and supporting dam safety reviews, submittals, and authorizations. Heidi's relevant project experience includes Allison Creek and Solomon Gulch Licensing and Compliance (Copper Valley Electric Association), Salmon/Annex Creek Relicensing (Alaska Electric Light and Power), Rush Creek Relicensing (California, Southern California Edison), Scotts Flat Spillway Replacement Project (California, Nevada Irrigation District [NID]), Chikuminuk Lake Licensing (Nuvista), Barber Dam Relicensing (Idaho), Bradley Lake FERC Potential Failure Mode Analysis (Alaska) and Part 12 Report (Alaska, AEA), and Chackachamna Lake Licensing (Alaska, TDX Power). **References:** Travis Million, Golden Valley Electric Association, 907-822-3171; Alec Mesdag, Alaska Electric Light and Power, 907-463-6387; Kevin Webb, Central Rivers Power, 978-935-6039.

Kirby Gilbert | **Senior FERC Licensing Expert | 40 Years of Experience | Stantec | Washington** | **Duties:** Kirby will serve as a FERC regulatory advisor. **Qualifications:** Kirby brings 40 years of FERC licensing and relicensing experience for planning, stakeholder outreach, and regulatory compliance needs on hydroelectric and energy transmission projects. Kirby has led numerous licensings and relicensings, successful amendment applications, helped licensees comply with license terms, and negotiated successful changes in license conditions. **Experience:** He served as regulatory licensing and social sciences studies lead for AEA's extensive licensing process for the proposed Susitna-Watana Hydroelectric project. Kirby also has served as a FERC licensing and regulatory compliance specialist on Chugach Electric's Cooper Lake Relicensing implementation. In the lower 48 states, he has led many capacity and non-capacity amendments to FERC licenses and helped orchestrate successful agency consultation and documentation requirements leading to FERC approvals. Other Alaska specific experience includes FERC feasibility study and planning roles for TDX Power's proposed Chackachamna Hydroelectric project, as well as other proposed hydroelectric projects on the Tiekel River, Kisaralik River, and Chikuminuk Lake. For Ketchikan Public Utilities, Kirby contributed to the first environmental analysis of the Swan Lake–Tyee Lake Intertie project. For Marathon Oil, he prepared the use and population projections for several sites on the Kenai Peninsula as part of human health risk assessment. Kirby also helped formulate and write the National Environmental Policy Act (NEPA) documentation for the proposed Port Valdez LNG terminal facility for FERC in the 1990s. **References:** Jeremiah McNeil, California Department of Water Resources, 916-557-4554; Joel Metzger, Utica Water and Power Authority 209-736-9419; Adam Ward, American Municipal Power, 614-540-0946.

John Marshall, PhD | **Terrestrial Resources Scientist** | **26 Years of Experience | Stantec | Alaska | Duties:** John will lead the terrestrial resources tasks. **Qualifications:** John has a broad ecological and wildlife skill set, developed over decades of fieldwork in Alaska. He has been the lead avian ecologist for breeding bird surveys for compliance with the Migratory Bird Treaty Act, shorebird and species of conservation interest, and raptor and eagle surveys for compliance with the Bald and Golden Eagle Protection Act. He has conducted vegetation surveys across much of Alaska, including for native and invasive species. John has strong mapping experience in both terrestrial wildlife and in wetland/stream habitats. John's fisheries experience includes instream salmonid surveys (e.g. smolt trapping), Didson radar deployment, habitat assessments, electroshocking snorkel surveys, and macroinvertebrate sampling. **Experience:** John is leading the comprehensive terrestrial and vegetation research for the Shovel Creek wind project. He led four years of comprehensive environmental wildlife, fisheries, and vegetation studies for the inventory work at Joint Base Elmendorf Richardson (JBER). He also led the extensive habitat mapping work for Susitna-Watana Hydro, using imagery to identify annual stream habitat changes over 20+ years. John also led the wetland permitting for Cooper Lake Hydro. **References: David Jadhon, US Army Corps, 907-753-2595, Jonathan Hutchinson, DOT&PF, 907-451-5479, Bryan Carey, AEA, 907-771-3065**

Zach Baer, PWS | **Wetlands and Vegetation Scientist | 18 Years of Experience | Stantec | Alaska | Duties:** Zach will manage and conduct wetlands, vegetation inventory, and mapping tasks. **Qualifications:** Zach has 18 years of Alaska wetland and vegetation resources work and leads wetlands delineations and permitting. Zach has managed field data collection teams, permitting, and mapping for projects in southcentral Alaska, ranging in size from small commercial parcels to 300-mile remote linear routes. Zach manages wetland reports, functional assessments, habitat reports, and Section 404/10 permit applications, allowing projects to move forward efficiently. He has designed wetland and waters mitigation projects for several projects in Alaska. **Experience:** Zach has conducted wetland field determinations and rare and exotic plant surveys throughout Alaska, personally mapping wetlands and vegetation communities totaling more than 450,000 acres. He has conducted wetland delineations and invasive plant surveys in Homer. Around Southern Cook Inlet, he has conducted wetland and stream delineations and vegetation surveys in glacial landscapes, including near the heads of glacial-fed rivers on the Johnson Tract project, Donlin mine, and the Pebble project. **References:** Allegra Cairns, Contango Ore, 604-629-1165; Jonathan Hutchinson, PE, DOT&PF, 907-451-5479; David Fischer, PE, DOT&PF, 907-451-5357.

Victor Ross | **Permitting | 40 Years of Experience | Stantec | Alaska** | **Duties:** Victor will lead the permitting for the project. **Qualifications:** Victor Ross leads Stantec's Alaska permitting team, including supervising five Alaskan permitting staff. Victor led Section 404 and Section 401 permitting for the US Army Corps of Engineers Regulatory Division Alaska for 20 years, including supervising an Alaska District. For the past 13 years he has been permitting large Alaskan projects as a consultant. Victor is an expert in Section 401/404 permitting, least environmental damaging practicable alternatives analysis for the CWA 404(b)(1) Guidelines, and waters of the United States. Complex development projects specifically seek out Victor to make use of his unique knowledge and personal relationships and move projects through the permitting process. **Experience:** Victor has led permitting on some of the most complex projects proposed in Alaska, including the Donlin Mine, Fort Knox Mine, and Red Dog Mine, plus AIDEA's Red Dog Port. Victor uses his experience managing all the permitting required for a project to build a strategic permitting pathway, focused on moving projects forward. Victor helps influence how to improve the regulatory environment through his service on the Alaska Miners Association's Board of Directors. In 2020, he was appointed to the State of Alaska Mineral Commission and is currently serving his second term. **References:** Bartly Kleven, Kinross, 907-490-2207; Enric Fernandez, Donlin Gold LLC, 907-980-2930; Michael Rieser, Teck American Incorporated 907-754-3816.

Stantec is well qualified to provide any of the services Anchorage Hydropower Utility may need. Should you have any questions about our services or our qualifications, please do not hesitate to contact me at Dean.Syta@stantec.com or 907-343-5206, Michael Manwaring at Michael.Manwaring@stantec.com or 425-750-7989, or Ryan Cooper at ryan.cooper@stantec.com or (907) 343-5241.

Thank you,
Stantec Consulting Services Inc.

CONTRACT FOR PROFESSIONAL SERVICES
WITH TAKU ENGINEERING, LLC

In consideration of the mutual promises herein, ANCHORAGE and TAKU ENGINEERING, LLC agree as follows. This contract consists of:

A. Part I, consisting of 15 sections of Special Provisions
B. Part II, consisting of 11 sections of General Provisions
C. Appendix A - Fee Schedule, consisting of two pages, including cover

PART I
SPECIAL PROVISIONS

Section 1. Definitions.

A. "Administrator" means the Engineering Division Director of the Anchorage Water and Wastewater Utility or their designee
B. "Anchorage" means the Municipality of Anchorage.
C. “Owner” means the Anchorage Water and Wastewater Utility
D. "Contractor" means Taku Engineering, LLC

Section 2. Scope of Services.

A. Individual delivery orders Contract Task Orders (CTOs) will be issued for specific Owner requested work items. The Contractor is to perform the professional services required to complete the tasks set forth in each CTO.

B. The Contractor shall respond to each CTO with a proposal detailing scope, cost, subcontractor involvement, and time required to complete the work in each CTO. AWWU and the Contractor may refine the proposal for clarification of the scope of services prior to issuing Notice to Proceed for the CTO.

C. Each CTO is limited in scope to the work requested in the request for proposal (RFP 2024P017) that led to this contract and as stated below;

1. This term contract is limited to Mechanical and Electrical Engineering professional services. In addition the Contractor is may also perform corrosion control related work.

2. Services may include, but are not limited to, studying, reporting on, designing, inspecting, and managing parts of or entire projects for design and consultation for such items as pump stations, booster stations, pressure regulating stations, SCADA telemetry and programming, corrosion control, coatings and HVAC systems in existing and proposed AWWU facilities. These facilities may be above ground or below ground.

3. The Contractor may utilize subcontractors in support of Mechanical and Electrical Engineering task orders when deemed necessary to complete their work, such as but not limited to specialty knowledge consultants. See Section 15 for additional requirements regarding subcontractors and work proposals.

Docusign Envelope ID: 5EC5DE54-7676-414B-8799-4DC87C5B9DBC

D. Preparing and reviewing corrosion control designs (cathodic protection), perform and review soil corrosivity evaluations, prepare coating specifications, provide NACE certified coating inspectors and corrosion technicians/testers for inspection and testing, and provide training to AWWU personnel

E. A Purchase Order (PO) will be issued against this contract for each specific CTO. No work is authorized nor may commence without receipt of a PO. Once received, the Contractor shall perform the professional services required to complete the CTO contained therein. Individual PO's are not to exceed $250,000.00, unless Anchorage's Purchasing Director or their designee approves of a greater amount.

F. Anchorage shall not allow any claim for services other than those described in this section. However, the Contractor may provide, at its own expense, any other services that are consistent with this contract.

Section 3. Time for Performance.

A. This contract becomes effective when signed on behalf of Anchorage and shall remain in effect for three year(s) from the date of final signature.

B. Upon receipt of a PO authorizing work, the Contractor shall commence performance of that work and complete that performance in accordance with the schedule contained therein.

Section 4. Compensation; Method of Payment.

A. Subject to the Contractor's satisfactory performance, Anchorage shall pay the Contractor no more than SEVEN HUNDRED FIFTY THOUSAND DOLLARS ($750,000.00) in accordance with this section.

B. Anchorage shall pay the Contractor for actions performed for a CTO issued under this contract in accordance with the schedule of professional fees provided in response to the Owner's request for proposals, identified as Appendix A to this Contract.

C. Each month the Contractor shall present a bill to the Owner describing the work for which it seeks payment and documenting expenses and fees to the satisfaction of the Owner. If any payment is withheld because the Contractor's performance is unsatisfactory, the Owner must, within ninety (90) days of the payment denial, notify the Contractor of the payment denial and set forth, with reasonable specificity, what was unsatisfactory and why.

D. The Contractor is not entitled to any compensation under this contract, other than is expressly provided for in this section.

E. As a condition of payment, the Contractor shall have paid all municipal taxes currently due and owing by the Contractor.

F. Labor rates for the Contractor and their subcontractors must be all inclusive. Separate charges for insurance, special pay, pay enhancements, employer paid contributions to retirement programs, employer paid benefits, overhead, and profit, and additional

Docusign Envelope ID: 5EC5DE54-7676-414B-8799-4DC87C5B9DBC

accessory office components associated with the charging position, such as but not limited to, internet, remote office, telephone, computer, computer programs, office supplies, office space, and furniture will not be allowed regardless of what is shown in the fee schedule in or as updated per item B in this section.

Section 5. Termination of the Contractor's Services.

The Contractor's services under Section 2 may be terminated:

A. By mutual consent of the parties.

B. For the convenience of Anchorage, provided that Anchorage notifies the Contractor in writing of its intent to terminate under this paragraph at least 10 days prior to the effective date of the termination.

C. For cause, by either party where the other party fails in any material way to perform its obligations under this contract. Termination under this subsection is subject to the condition that the terminating party notifies the other party of its intent to terminate, stating with reasonable specificity the grounds therefor, and the other party fails to cure the default within thirty (30) days after receiving the notice.

Section 6. Duties Upon Termination.

A. If Anchorage terminates the Contractor's services for convenience, Anchorage shall pay the Contractor for its actual costs reasonably incurred in performing before termination. Payment under this subsection shall never exceed the total compensation allowable under Section 4. All finished and unfinished documents and materials prepared by the Contractor shall become the property of Anchorage.

B. If the Contractor's services are terminated for cause, Anchorage shall pay the Contractor the reasonable value of the services satisfactorily rendered prior to termination less any damages suffered by Anchorage because of the Contractor's failure to perform satisfactorily. The reasonable value of the services rendered shall never exceed the contract rate for such services, and payment under this subsection shall not exceed ninety percent (90%) of the total compensation allowable under Section 4. Any finished or unfinished documents or materials prepared by the Contractor under this contract shall become the property of Anchorage at its option.

C. If the Contractor receives payments exceeding the amount to which it is entitled under subsections A or B of this section, he shall remit the excess to the Administrator within thirty (30) days of receiving notice to do so.

D. The Contractor shall not be entitled to any compensation under this section until the Contractor has delivered to the Administrator all documents, records, work product, materials and equipment owned by Anchorage and requested by the Administrator.

Docusign Envelope ID: 5EC5DE54-7676-414B-8799-4DC87C5B9DBC

E. If the Contractor's services are terminated, for whatever reason, the Contractor shall not claim any compensation under this contract, other than that allowed under this section.

F. Except as provided in this section, termination of the Contractor's services under Section 5 does not affect any other right or obligation of a party under this contract.

G. If a final audit has not been performed before the Contractor's services are terminated, Anchorage may recover any payments for costs disallowed as a result of the final audit.

Section 7. Insurance.

A. The Contractor shall maintain in good standing, for the entire period of the contact, the insurance described in subsection B of this section. Before rendering any services under this contract, the Contractor shall furnish the Administrator with a Certificate of Insurance in accordance with subsection B of this section in a form acceptable to the Risk Manager for Anchorage.

B. The Contractor shall provide the following insurance:

1) $500,000 Employers Liability and Workers Compensation as required by Alaska Law.

2) Commercial Automobile Liability in the amount of $1,000,000 combined single limit to include: owned, hired, and non-owned.

3) Commercial General Liability including:

a. $2,000,000 General Aggregate
b. $2,000,000 Products/Completed Operations
c. $1,000,000 Personal & Advertising Injury
d. $1,000,000 Each Occurrence
e. $5,000 Medical Payments

4) Professional Liability insurance with limits not less than $1,000,000 per occurrence and $2,000,000 aggregate.

5) Cyber/Privacy Liability insurance with limits not less than $3,000,000. The Cyber coverage shall include, but not be limited to, claims involving invasion of privacy violations, Information theft, and release of private information. The policy shall provide coverage for breach response costs as well as regulatory fines and penalties as well as credit monitoring expenses.

C. Policies written on a "claims-made basis" must have a two (2) year tail of coverage, or an unbroken continuation of coverage for two (2) years from the completion of the contract requirements.

D. Each policy of insurance required by this section shall provide advance notice to the MOA/Contract Administrator prior to cancellation in accordance with the policy. If the insurer does not notify the MOA on policy cancellation it shall be the contractor's responsibility to notify the MOA of such cancellation.

Docusign Envelope ID: 5EC5DE54-7676-414B-8799-4DC87C5B9DBC

E. Except for Workers Compensation and Professional Liability each policy is to name The Municipality as an "additional insured" and the actual policy endorsement shall accompany each Certificate of Insurance.

F. General Liability, Workers Compensation, and Automobile policies shall be endorsed to waive all rights of subrogation against the Municipality of Anchorage by reason of any payment made for claims under the above coverage. This policy endorsement shall accompany each Certificate of Insurance.

G. All policies for general liability shall be primary and noncontributing with any insurance that may be carried by the Municipality.

H. If the Contractor maintains broader coverage and/or higher limits than the minimums shown above, the Municipality requires and shall be entitled to the broader coverage and/or the higher limits maintained by the Contractor. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the Municipality.

I. Contractor shall require and verify that all subcontractors maintain insurance meeting all requirements stated herein, and Contractor shall ensure that the Municipality is an additional insured on insurance required from subcontractors.

Section 8. Assignments.

Unless otherwise allowed by this contract or in writing by the Administrator, any assignment by the Contractor of its interest in any part of this contract or any delegation of duties under this contract shall be void, and an attempt by the Contractor to assign any part of its interest or delegate duties under this contract shall give Anchorage the right immediately to terminate this contract without any liability for work performed.

Section 9. Ownership; Publication, Reproduction and Use of Material.

A. Except as otherwise provided herein, all data, documents and materials produced by the Contractor under this contract shall be the property of Anchorage, which shall retain the exclusive right to publish, disclose, distribute and otherwise use, in whole or in part, any such data, documents or other materials. Exclusive rights shall not be attributed to portions of such materials presently in the public domain or which are not subject to copyright.

B. Should Anchorage elect to reuse Work products provided under this Contract for other than the original project and/or purpose, Anchorage will not hold Contractor liable for any damages resulting from Anchorage's reuse of work products for an unintended purpose. Additionally, any reuse of design drawings or specifications provided under this Contract must be limited to conceptual or preliminary use for adaptation and the original Constructor's or subcontractor's signature, professional seals and dates removed. Reuse of drawings and specifications, which require professional seals and dates removed, will

Docusign Envelope ID: 5EC5DE54-7676-414B-8799-4DC87C5B9DBC

be signed, sealed, and dated by the professional who is in direct supervisory control and responsible for adaptation.

C. Equipment purchased by the Contractor with designated contract funds shall be the sole property of Anchorage marked and inventoried as such with a copy of the inventory forwarded to Anchorage.

Section 10. Notices.

Any notice required pertaining to the subject matter of this contract shall be either sent via facsimile (FAX) or mailed by prepaid first class registered or certified mail, return receipt requested to the following addresses:

Anchorage: Municipality of Anchorage
Anchorage Water and Wastewater Utility
Attn: James Armstrong, P.E.
3000 Arctic Boulevard
Anchorage, AK 99503-3898
FAX: (907) 562-0824

Contractor: Taku Engineering, LLC
Attn: William Mott, P.E.
P.O. Box 241386
Anchorage, AK 99524
FAX: (907) 562-1247
billmott@takuengineering.com

Notices are effective upon the earlier of receipt, proof of good transmission (facsimiles only), or five (5) days after proof of proper posting.

Section 11. Contract Budget.

In connection with its performance under this contract the Contractor shall not make expenditures other than as provided in line items in the contract budget.

Section 12. Force Majeure.

A. Any failure to perform by either party due to force majeure shall not be deemed a violation or breach hereof.

B. As used in this contract, force majeure is an act or event of substantial magnitude, beyond the control of the delayed party, which delays the completion of this contract, including without limitation:

Docusign Envelope ID: 5EC5DE54-7676-414B-8799-4DC87C5B9DBC

1. Any interruption, suspension or interference resulting solely from the act of the Municipality or negligent act(s) of the Municipality not otherwise governed by the terms of this contract.
2. Strikes or work stoppages.
3. Any interruption, suspension or interference with the project caused by acts of God, or acts of a public enemy, wars, blockades, insurrections, riots, arrests or restraints of governments and people, civil disturbances or similar occurrences.
4. Order of court, administrative agencies or governmental officers other than the Municipality.

Section 13. Financial Management System.

The Contractor shall establish and maintain a financial management system that:

A. Provides accurate, current, and complete disclosure of all financial transactions relating to the contract;

B. Maintains separate accounts by source of funds for all revenues and expenditures and identifies the source and application of funds for the Contractor's performance under this contract, including information pertaining to subcontracts, obligations, unobligated balances, assets, liabilities, outlays and income;

C. Effectively controls and accounts for all municipal funds and contract property;

D. Compares actual expenditures with budgeted amounts and relates financial information to performance or productivity data including unit cost information where applicable;

E. Allocates administrative costs to direct service delivery units;

F. Minimizes the time between receipt of funds from Anchorage and their disbursement by the Contractor;

G. Provides accounting records supported by source documentation; and

H. Provides a systematic method assuring the timely and appropriate resolution of audit findings and recommendations.

Section 14. Funding Requirements.

If any funding source for this contract should impose additional requirements upon Anchorage for the use of those funds, the Contractor agrees to abide by those additional requirements immediately upon receipt of written notice thereof from Anchorage.

Docusign Envelope ID: 5EC5DE54-7676-414B-8799-4DC87C5B9DBC

Section 15. Subcontracts.

The Contractor may enter into subcontracts for the purchase of goods and services necessary for the performance of this contract, provided:

A. Every subcontract shall be reduced to writing and contain a precise description of the services or goods to be provided and the nature of the consideration paid therefore. Each subcontract is to provide a rate sheet with same limitation placed on the rates as the Contractor.
B. Every subcontract under which the Contractor delegates the provision of services shall be subject to review and approval by the Administrator before it is executed by the Contractor.
C. Every subcontract in an amount exceeding $1,000.00 shall require reasonable access to business records of the subcontractor relating to the purchase of goods or services pursuant to the subcontract.
D. The Contractor is not allowed a markup for goods and services. In accordance with item A, this provision extends to subcontractors

Docusign Envelope ID: 5EC5DE54-7676-414B-8799-4DC87C5B9DBC

PART II

GENERAL CONTRACT PROVISIONS

Section 1. Relationship of Parties.

The Contractor shall perform its obligations hereunder as an independent contractor of Anchorage. Anchorage may administer the contract and monitor the Contractor's compliance with its obligations hereunder. Anchorage shall not supervise or direct the Contractor other than as provided in this section.

Section 2. Nondiscrimination.

A. The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, national origin, ancestry, age, sex, sexual orientation, gender identity, or marital status, or who is a "qualified individual with a disability", as that phrase is defined in the Americans With Disabilities Act of 1990. The Contractor will take affirmative action to ensure that applicants are employed and that employees are treated during employment without regard to their race, color, religion, mental or physical disability, sexual orientation or gender identity. Such action shall include, without limitation, employment, upgrading, demotion or transfer, recruitment or recruiting advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training including apprenticeship. The Contractor agrees to post, in conspicuous places available to employees and applicants for employment, notices setting forth the provisions of this nondiscrimination clause.

B. The Contractor shall state, in all solicitations or advertisements for employees to work on contract jobs, that all qualified applicants will receive equal consideration for employment without regard to race, color, religion, national origin, ancestry, age, sex, sexual orientation, gender identity, marital status, or mental or physical disability.

C. The Contractor shall comply with all reporting requirements that may apply to it which the Anchorage Office of Equal Employment Opportunity Contract Compliance may establish by regulation. The contract compliance officer may accept the contractor's compliance with federal requirements or the contractor's federal reporting documents in lieu of reporting under this section.

D. The Contractor shall include the provisions of subsections A through C of this section in every subcontract or purchase order under this contract, so as to be binding upon every such subcontractor or vendor of the Contractor under this contract. The contract compliance officer may accept the contractor's compliance with federal requirements or the contractor's federal reporting documents in lieu of reporting under this section.

E. The Contractor shall comply with all applicable federal, state and municipal laws concerning the prohibition of discrimination including, but not limited to Title 5 and Title 7, Chapter 7.50 of the Anchorage Municipal Code.

Docusign Envelope ID: 5EC5DE54-7676-414B-8799-4DC87C5B9DBC

Section 3. Permits, Laws and Taxes.

The Contractor shall acquire and maintain in good standing all permits, licenses and other entitlements necessary to its performance under this contract. All actions taken by the Contractor under this contract shall comply with all applicable statutes, ordinances, rules and regulations. The Contractor shall pay all taxes pertaining to its performance under this contract.

Section 4. Nonwaiver.

The failure of either party at any time to enforce a provision of this contract shall in no way constitute a waiver of the provision, nor in any way affect the validity of this contract or any part hereof, or the right of such party thereafter to enforce each and every provision hereof.

Section 5. Amendment.

A. This contract shall only be amended, modified or changed by written document, executed by authorized representatives of the parties, with the same formality as this contract was executed.
B. For the purposes of any amendment modification or change to the terms and conditions of this contract, the only authorized representatives of the parties are:

Contractor: William Mott, P.E., General Manager & Co-Owner

Anchorage: **Mayor, Municipal Manager or Approved Designee**

C. Any attempt to amend, modify, or change this contract by either an unauthorized representative or unauthorized means shall be void.

Section 6. Jurisdiction; Choice of Law.

Any civil action arising from this contract shall be brought in the Superior Court for the Third Judicial District of the State of Alaska at Anchorage. The law of the State of Alaska shall govern the rights and obligations of the parties under this contract.

Section 7. Severability.

Any provision of this contract decreed invalid by a court of competent jurisdiction shall not invalidate the remaining provisions of the contract.

Docusign Envelope ID: 5EC5DE54-7676-414B-8799-4DC87C5B9DBC

Section 8. Integration.

This instrument and all appendices and amendments hereto embody the entire agreement of the parties. There are no promises, terms, conditions or obligations other than those contained herein; and this contract shall supersede all previous communications, representations or agreements, either oral or written, between the parties hereto.

Section 9. Liability.

A. The Contractor shall indemnify, defend, save, and hold Anchorage harmless from any claims, lawsuits or liability, including reasonable attorneys' fees and costs, arising from any wrongful or negligent act, error or omission of the Contractor or any subcontractor as a result of the Contractor's or any subcontractor's performance pursuant to this contract.

B. The Contractor shall not indemnify, defend, save and hold Anchorage harmless from claims, lawsuits, liability, including reasonable attorneys' fees and costs arising from a wrongful or negligent act, error or omission solely of Anchorage occurring during the course of or as a result of Anchorage's performance pursuant to this contract.

C. Where claims, lawsuits or liability, including attorneys' fees and costs arise from wrongful or negligent act of both Anchorage and the Contractor, the Contractor shall indemnify, defend, save and hold Anchorage harmless from only that portion of claims, lawsuits or liability, including attorneys' fees and costs, which result from the Contractor's or any subcontractor's wrongful or negligent acts occurring as a result of the Contractor's performance pursuant to this contract.

Section 10. Inspection and Retention of Records.

The Contractor shall, at any time during normal business hours and as often as Anchorage may deem necessary, make available to Anchorage, for examination, all records with respect to all matters covered by this contract for a period ending three years after the date the Contractor is to complete performance in accordance with Section 2 of the Special Provisions. Upon request, and within a reasonable time, the Contractor shall submit such other information and reports relating to its activities under this contract, to Anchorage, in such form and at such times as Anchorage may reasonably require. The Contractor shall permit Anchorage to audit, examine and make copies of such records, and to make audits of all invoices, materials, payrolls, records of personnel and other data relating to all matters covered by this contract. Anchorage may, at its option, permit the Contractor to submit its records to Anchorage in lieu of the retention requirements of this section.

Docusign Envelope ID: 5EC5DE54-7676-414B-8799-4DC87C5B9DBC

Section 11. Availability of Funds.

Payments under this contract require funds from future appropriations and are subject to future appropriations. If sufficient funds are not appropriated for payments required under this contract, this contract shall terminate without penalty to Anchorage and Anchorage shall not be obligated to make payments under this contract beyond those which have previously been appropriated.

IN WITNESS WHEREOF, the parties have executed this contract on the date and at the place shown below.

MUNICIPALITY OF ANCHORAGE

Subcontractor Work & Expenses

* Full time (40-hr/wk.) assignments in client's office for more than 4 months duration.

** Overtime hours will be charged at 120% of normal labor rates for each wage category.

EXHIBIT 15

Mr. Mark A. Corsentino March 18, 2025

Director, Anchorage Hydropower Utility
632 W. 6th Avenue
Anchorage, AK, 99501

Re: Municipality of Anchorage – Anchorage Hydropower Utility

Mr. Corsentino,

Taku Engineering, LLC is pleased to provide this written response Re: Notification of Contract Services Expansion. We are specifically interested in providing services to Anchorage Hydropower Utility (AHU) pertaining to Item 2, hydroelectric projects. We are an Alaskan-owned multi-discipline engineering firm based out of Anchorage, Alaska. Established in 2001 with a small team of engineers, we have been serving our clients in Alaska and beyond for 24 years. We provide a full suite of engineering and inspection services to help our clients build and protect their assets and infrastructure. We have the expertise to assist with any project, but we still offer the "small firm" feel – personable, flexible, and reliable.

Taku independently offers the following services:

- Project Management
- Electrical Engineering
- Mechanical Engineering
- Civil Engineering
- Materials/Corrosion Engineering
- Welding Engineering
- Fire & Gas System Design
- Project Estimating
- Regulatory Compliance Support
- Facility As-Builts
- Construction Administration & Commissioning
- Permitting
- Suitability for Service/Condition Assessments
- American Water Works Association (AWWA), American Petroleum Institute (API), & Steel Tank Institute (STI) Compliant Repair Design Packages
- Coatings Engineering
- Cathodic Protection Design/Testing
- NDE Inspection Services

Specific to hydroelectric projects, Taku Engineering has assisted utilities with modifying existing infrastructure to utilize hydropower in both Anchorage and the City of Unalaska. Brief descriptions of these projects are included below:

- *City of Unalaska – Pyramid Water Treatment Plant Power Generation* – Between 2019 and 2022, Taku Engineering partnered with Rentricity to install two water turbine generators in the Pyramid Water Treatment Plant (PWTP)of the City of Unalaska. The intent of the project was to utilize the excess head pressure provided by the elevation of Icy Creek reservoir to create usable electricity. The existing PWTP was reconfigured to accommodate varying water processing demands as well as include the option to utilize water from the reservoir that is in excess of processing demand to generate an additional increment of power. This project consisted of significant piping modifications, installation of lo low-voltage (600V) electrical equipment, conductors, and raceways to support the installation of the new water turbine generators, and SCADA/control integration of the new water turbine control panel into the existing system. Taku Engineering also coordinated all required permitting with the ADEC, APDES, and AKDNR.

- *Anchorage Water and Wastewater Utility – 92nd Avenue Vault Energy Recovery Turbine Installation* – In 2020-2021, Taku designed the installation of a pump-as-turbine (PAT) generator in AWWU's 92nd avenue vault. Prior to the installation, pressure in the water distribution piping in that vault was reduced through pressure-reducing-valves. This installation installed a bypass line that recovered energy by reducing the pressure through a pump-as-turbine generator. The recovered electricity was fed to AWWU's King Street facility and ultimately the Chugach Electric power grid. The pump-as-turbine approach was selected because it involved traditional equipment that is familiar to AWWU's technicians and requires no significant learning curve to operate and maintain.

The team that Taku plans to use to support AHU includes individuals with an extensive array of credentials to go with their experience. These include:

- Bill Mott PE, Project Lead
  - Alaska licensed Professional Materials Engineer
  - More than 30-years of corrosion engineering & tank inspection experience
  - NACE (now AMPP) certified Senior Internal Corrosion Technologist and Cathodic Protection Specialist.
- Bill Cobb PE, Principal Mechanical Engineer
  - Alaska licensed Professional Mechanical Engineer
  - BS in Mechanical and Civil Engineering
  - More than 25 years of facilities engineering and construction, including oil and gas, pipeline and public utilities
- Michael Wise PE, Principal Electrical Engineer
  - Alaska Licensed Professional Electrical Engineer
  - More than 30-years of experience designing electrical systems in Alaska
  - Extensive experience with project management and quality control
- Curtis Nuttall PE, Principal Civil Engineer
  - Alaska Licensed Professional Civil Engineer
  - More than 30-years of engineering and project management experience

Copies of full resumes are included as Attachment A.

Best regards,

William Mott, P.E.
General Manager – Taku Engineering, LLC

William R. Mott Jr., P.E.

Principal Corrosion Engineer

Mr. Mott has been actively involved in Cathodic Protection (CP), Corrosion Engineering, Integrity Management, and Materials Engineering for the past 30 years. He has worked as the Principal Engineer for Taku Engineering, LLC since 2001. From 1990 to 2001, Mr. Mott was the Principal Engineer of Alaska Operations for Corrpro Companies. During that period, he provided corrosion engineering support for the Trans-Alaska Pipeline, Prior to 1990, Mr. Mott was a Corrosion Research Engineer for Ocean City Research Corporation.

A brief summary of his experience is outlined below.

Education

BSE Chemical and Materials Engineering - *University of Connecticut, 1986*

Registrations/Certification & Training

- Registered Professional Engineer, Materials and Metallurgical Engineering, Alaska # 13991
- Registered Professional Engineer, Chemical Engineering, Alaska #8983, Washington #53462
- Board Member, State of Alaska, Board of Architects, Engineers and Land Surveyors 2017-2020
- NACE - Certified Cathodic Protection Specialist (CP-4), #29359
- NACE – CP Interference, In-Line Inspection, Advanced Internal Corrosion, Coating Inspection Level 1 & 2.
- NACE -Certified Sr. Internal Corrosion Technologist
- Clarion Pipeline Integrity Management Training
- Transportation Worker Identification Credential (TWIC)

taku engineering

Project Experience

Anchorage Water and Wastewater Utility (AWWU)

Anchorage, Alaska

Mr. Mott was the Principal Corrosion Engineer for contracts providing corrosion engineering expertise to AWWU through three 2-year term services contracts (2015-2017, 2017-2019 and 2019-present). Support provided to AWWU during these contracts included tank inspections, piping inspections, coatings engineering, electrical inspections, cathodic protection inspections. failure analyses, repair procedures, condition assessments, project designs, project closeout and implementation oversight. Mr. Mott was in charge of all technical aspects of these efforts.

Alyeska Pipeline Service Company - Ballast Water Piping Corrosion Evaluation & Pipe Replacement Study - *Valdez, Alaska*

Mr. Mott was the project engineer on the conceptual study for replacement of ballast water piping at Alyeska Pipeline's Valdez Marine Terminal (VMT). High corrosion rates on existing piping and reduced capacity requirements caused the need to study alternates for large diameter (42-inch) piping. Alternate materials and capacities were evaluated for technical and economic viability. He developed a white-paper report and associated Power Point presentation summarizing the findings for presentation to the TAPS executive team.

Alyeska Pipeline Service Co. – Ballast Water Tank Inspections and Repairs

Valdez, Alaska

William was the principal corrosion engineer for the inspection and repair of the ballast water treatment tanks at the Valdez Marine Terminal. The project included tank cleaning, inspection, tank repairs, cathodic protection system design (internal and external), recoating and return to service. Mr. Mott provided cradle-to-grave, technical lead services for the projects.

Alyeska Pipeline Service Co. - Mainline Cathodic Protection Study

Various Locations, Alaska

William participated in a study to determine the effects of pump station CP systems on the 48-inch diameter mainline of the Trans-Alaska Pipeline System. The investigation was conducted to evaluate the possibility of utilizing pump station CP systems as a supplemental source of impressed current CP for the mainline. The project included detailed potential and current surveys sampled over 1-hour intervals during varying phases of CP system operation. He coordinated pipe-to-soil potential surveys, CP current surveys, system adjustments, data compilation, telluric activity analysis, data analysis and reporting.

Alyeska Pipeline Service Co. Mainline CP System Review and Design

Valdez, Alaska

Mr. Mott was the principal cathodic protection (CP) design engineer for system upgrades for low potential areas the last 20 miles of the Trans-Alaska Pipeline System's (TAPS) mainline. The CP systems along milepost 780-800 had a long history of failing to meet NACE criteria for adequate CP and were the subject of a USDOT-OPS warning letter to Alyeska Pipeline Service Company (APSC). The low potential areas include extremely mountainous geography with limited power availability. Mr. Mott completed a detailed review of the existing CP systems and historical CP issues for the area. He identified the causes of failure of the existing systems and developed conceptual CP designs. He worked with APSC's Integrity Management group to garner management, owner, and regulatory body approval for the upgrades. This work included a CP system design package and management of field engineering activities during implementation. The installation was successful, and the areas targeted by the installation now meet NACE criteria.

Alyeska Pipeline Service Company – Development of CP Coupons

TAPS Corridor- Alaska

Mr. Mott worked with Alyeska Pipeline's Corrosion Engineering Team, The USDOT-OPS (Now PHMSA), the Joint Pipeline Office and State Regulatory Consultants, to develop the first cathodic protection coupon designs. Mr. Mott collected field data on pipeline coating conditions that was utilized to size pipeline coupons so that they represented existing conditions. He assisted with laboratory data reviews and coordinated with the Federal regulatory bodies overseeing TAPS to gain approval for the use of CP coupons to account for IR-drop. This effort not only resulted in the use of CP coupons on TAPS, but also led to industry-wide acceptance of coupon technology.

National Association of Corrosion Engineers (NACE) - Cathodic Protection Specialist Examination Development

Houston, Texas

In 2019, NACE appointed Mr. Mott to a panel of cathodic protection experts, tasked with developing new Cathodic Protection Specialist (CP-4) exams. Mr. Mott worked with other panel members to develop problem scenarios, exam questions and answers. This effort was necessary in order to transition the examinations to a standardized computer-based model.

National Association of Corrosion Engineers (NACE) - Cathodic Protection Technologist Examination Revision

Houston, Texas

In 2017, NACE appointed Mr. Mott to a panel of cathodic protection experts, tasked with rewriting the Cathodic Protection Technologist (CP-3) exam. In this effort, Mr. Mott played an active role in ensuring that the exam questions were revised to be accurate and written in a clear and concise manner.

Alyeska Pipeline Service Company – Milepost 19-26 Cathodic Protection Upgrades

TAPS Corridor, Alaska

Mr. Mott assessed failing cathodic protection data along the northernmost portions of TAPS (Milepost 19-26). In these areas, the pipeline is buried in continuous permafrost, except for thaw bulbs at river crossings. Historically, the presence of permafrost prevented the wide-spread distribution and uniform application of cathodic protection currents to these areas. The areas had a history of low potentials despite numerous attempts to improve CP potentials. Mr. Mott designed distinct, distributed CP upgrades to cathodic protections in those low CP areas. He utilized impressed current linear anode beds, powered by remote solar/wind skids, to successfully protect isolated segments of the mainline pipe in permafrost areas.

National Association of Corrosion Engineers (NACE) – Innovation of the Year Award

Houston, Texas

In 2019, NACE and *Materials Performance* magazine awarded Mr. Mott and Taku Engineering, an *Innovation of the Year* award for Taku's development of the Pi-1 Pocket Interrupter. The Pi-1 is a hand-held, GPS synchronized, CP current interrupter used for cathodic protection surveys.

Alyeska Pipeline - Cathodic Protection Surveys

TAPS Corridor, Alaska

Mr. Mott organized and managed the annual cathodic protection surveys on TAPS (facilities and mainline) from the 1990s to the early 2000s. Mr. Mott also oversaw incorporation of tellurically nulling CP monitoring techniques and GPS synchronized technology to account for the impact of telluric currents on pipeline-to-soil potentials.

North Slope Borough – Nuiqsut Gas Pipeline Conceptual Approach Peer Review

Nuiqsut, Alaska

Mr. Mott was the primary investigator on a peer review of an Options Evaluation completed for the repair of the Nuiqsut Gas Pipeline. PHMSA had issued warning letters to the Operator regarding damaged coating on the line. The engineers tasked with developing repair options recommended full replacement of the pipeline. Mr. Mott's efforts resulted in identifying less intrusive and lower risk means to repair the pipeline and still ensure safe, long-term operating life of the natural gas system.

Trans-Alaska Pipeline System Tank Corrosion Inspections & Maintenance

Various Locations, Alaska

Mr. Mott supported the Tank Maintenance Program at APSC's marine terminal and pump stations from 1991 - 2014. He was responsible for all technical aspects of the tank maintenance program including project scoping, development of engineering packages, designing CP systems, leak detection evaluations, developing inspection criteria, supervising implementation activities, design changes, project turnover and project close out. He has participated in shell distortion root cause investigations and planned/executed the API 653 out-of-service inspections on APSC's major aboveground storage tanks. Mr. Mott has a detailed working knowledge of all aspects of API 650 & API 653. Mr. Mott represented Alyeska with the regulatory agencies that oversee TAPS' tanks (PHMSA, the ADEC, and Prince William Sound Regional Citizens Advisory Council).

The North Slope Borough - Nuiqsut Gas Pipeline Coating Repairs

Nuiqsut, Alaska

Mr. Mott designed long-term coating repairs for the Nuiqsut gas pipeline. These repairs were deigned to protect the pipeline from corrosion and protected the coatings from future mechanical damage. Mr. Mott's designs included coating materials that could be applied during arctic winter conditions and also included wear guards to protect the coatings (new and existing) from damage at supports. Mr. Mott coordinated with PHMSA's Alaskan based personnel to ensure that they concurred with the repairs being executed.

Alaska Department of Environmental Conservation – North Slope Spills Analysis Expert Panel

Anchorage, Alaska

Mr. Mott represented the State of Alaska, Department of Environmental Protection, as a Corrosion Expert on a panel evaluating oil spills on the North Slope. Mr. Mott was the sole Corrosion Expert on the panel assessing the frequency and severity of oil spills on the Slope. The effort resulted in a series of recommendations for actions to reduce spills on the North Slope. The report was directed at the North Slope oil industry owners and operators.

Alyeska Pipeline Coating Systems Program Testing & Evaluation

Valdez, Alaska

Mr. Mott performed multiple coating systems evaluations on behalf of Alyeska Pipeline Service Company (APSC) to assess the corrosion protection reliability and/or limitations of use in belowground, immersion service or atmospheric environments. The coatings evaluated included epoxy, zinc rich, and inorganic zinc coating systems. Laboratory and field-testing included adhesion testing, abrasion testing, corrosion scratch testing, cure-time, cure temperature verification, cathodic disbondment testing and chemical resistance testing.

Alyeska Pipeline Service Co., Tank 111 CP System Design

Prudhoe Bay, Alaska

Mr. Mott was the Principal CP Design Engineer on a replacement CP system for Tank 111, a 180-ft diameter crude relief tank. Mr. Mott designed a mixed metal oxide grid type, CP system for the tank bottom. The design incorporated monitoring capabilities and inherent system flexibility to account for varying environmental conditions.

US Air Force Tank Corrosion Evaluation & Repair

Cape Lisburne, Alaska

William was the project engineer responsible for the investigation and mitigation of internal corrosion associated with two remote location water storage tanks at a USAF Facility. The investigation examined the condition of internal coatings and documented the extent of tank floor and shell corrosion via magnetic flux equipment (MFE) and ultrasonic thickness (UT) measurements. He provided on-site supervision and direction of the NDE effort, generated corrosion rate and remaining life calculation, and developed repair procedures to extend the life of the two 50-foot diameter tanks. The final report provided NSF replacement coating recommendations and an internal cathodic protection design for each tank.

Education

B.S. Mechanical Engineering – *University of Florida – Gainesville, 1998*

B.S. Civil Engineering – *University of Florida – Gainesville, 1999*

Registrations/Certification & Training

- Washington Registered PE, ME, 22027934
- Alaska Registered PE, ME, #140252
- Missouri Registered PE, #2017022045

- NCEES PE Exam Development
- Toastmasters International
- ASD Gifted Mentorship

taku engineering

William Cobb, PE

Principal Mechanical Engineer

Mr. Cobb is a principal level Mechanical Engineer with 24-years of diverse experience. During his career he has developed competency in piping design, pipe stress analysis, fuel delivery systems, heat transfer, hydraulics, steam systems, tank terminals, energy audits, pump analysis and pump selection. A summary of his work experience is outlined below:

Project Experience

Badami Pipeline Stress Analysis

Glacier Oil and Gas Corporation, Badami Pipeline, Kaktovik, Alaska

Mr. Cobb performed a pipe stress analysis for the Badami 12-inch Sales Oil and 6-inch NGL pipelines per a 2021 survey to identify the impacts to sustained and occasional stresses from VSM jacking and settling. A total of 12 repairs were identified.

Tank 34 Reconstruction

Crowley, Port of Alaska, Anchorage

Mr. Cobb participated in the investigation of a groundwater intrusion study for a 990 MBBL jet fuel tank and developed a reconstruction plan for portions of the tank floor that were removed for inspection. He developed a cost-effective weld procedure to reinstall the tank sump and floor cutouts.

Tank 51 & 52 Inspection and Evaluation

Crowley, St. Mary's, Alaska

Mr. Cobb participated in the API 653 inspection of two 100 KGal Jet-A storage tanks in St. Mary's. Alaska. The initial project scope of work included evaluation of the tank bottom, shell, roof, appurtenances, and foundation. Mr. Cobb assessed damages due to tank jacking and groundwater intrusion under the tanks, determined if the tanks could remain in temporary service and designed repairs to bring one of the tanks into API 650 compliance. Mr. Cobb was onsite during all repairs and modifications to the tank floor to ensure all work was compliant with API 653.

SeaTac Reservoir Repairs, Seattle-Tacoma International Airport

Seattle, Washington

Mr. Cobb helped to identify several opportunities to improve the function and longevity of the SeaTac Reservoir. Work included selection of a replacement backpressure valve for the water inlet piping, mitigation of water intrusion into an underground vault and installation of a sump pump, installation of new level gauges for the tank, and reviewing the inlet piping to the tank to ensure the piping stresses were within code limits.

East Metering Building Dual Offtake Piping

Alyeska Pipeline Service Company - Valdez, Alaska

Mr. Cobb assisted with the piping modifications for the East Metering Building to allow more efficient routing of fluid during relief events. He modeled hydraulic transient loads associated with relief valve closures for the redesigned intake piping and performed static and dynamic pipe stress analyses to predict pipe stresses and displacements. The final displacements during simulated relief events were found to be within 5% of the displacements predicted by the model.

East Metering Building Pig Receiver Piping Replacement

Alyeska Pipeline Service Company - Valdez, Alaska

Mr. Cobb developed design drawings and specifications for the replacement of corroded drain piping from the 48" mainline pig receiver. Modifications included replacement of corroded fittings on the pig receiver.

Pipeline System Upgrade Projects

Alyeska Pipeline Service Company – Prudhoe Bay, Alaska

Mr. Cobb served as lead mechanical engineer for a variety of facilities upgrade projects for the Trans Alaska Pipeline. Facilities ranged from Pump Station 1 to the Valdez Marine Terminal. Experience includes preparation of scopes of work, development of conceptual layouts, determination of design basis, the selection of equipment and materials and the preparation and assembling of calculations and specifications.

Steam System Optimization
Alaska Omega Nutrition - Nikiski, Alaska
Mr. Cobb analyzed the steam and condensate system for a fish processing plant and identified several opportunities to improve plant operability, efficiency, and safety. The upgrades he identified included the installation of a pump trap to solve condensate stalling, resizing and reselection of steam traps, the development of insulation specifications for unprotected pipe and equipment, the performance of pipe stress analyses to verify piping flexibility, the review of sizing for steam and condensate lines, the development of nitrogen purge plan for equipment passivation, and updating plant piping and instrument diagrams.

Steam Turbine Feasibility Study
Alyeska Pipeline Service Company - Valdez, Alaska
Mr. Cobb assessed the feasibility of using vintage Terry steam turbines as variable speed drives for fuel oil pumps, boiler feedwater pumps and combustion air fans in the VMT Power Vapor Plant. He defined existing and new operating points for pumps and fans and the associated savings in steam by operating turbines at reduced speeds. He also developed run test procedures for the reconfigured turbines.

Pump Station 1 Decommissioning Work
Alyeska Pipeline Service Company – Prudhoe Bay, Alaska
Mr. Cobb served as lead mechanical engineer for the decommissioning of the Lisburne and Endicott metering buildings, which entailed identifying piping cut points and design of blinds to allow for draining and corrosion monitoring. He also was responsible for developing the demolition and installation plans for four replacement vapor pressure analyzer units for the Pump Station Quality Bank.

Kuparuk & Oliktok Pipeline VSM Repairs
ConocoPhillips – North Slope, Alaska
Mr. Cobb Developed repairs for DOT pipeline supports on the North Slope that had heaved, subsided or were leaning. Mr. Cobb utilized AutoPIPE to determine the resulting stresses and to identify supports that required repair. He developed pipe lift and repair plans based on client standards,

VMT Boiler Upgrades
Alyeska Pipeline Service Company - Valdez, Alaska
Mr. Cobb developed a strategy and total-installed-cost estimate to upgrade an aging boiler feedwater demineralization system for the Valdez Marine Terminal. The plan included repositioning of PSV's to allow for safer personnel access.

Hydrostatic Leak Test Procedures
Alyeska Pipeline Service Company – Valdez, Alaska
Mr. Cobb revised the hydrostatic leak test procedure for the tank to berth pipeline at the Valdez Marine Terminal (VMT). Mr. Cobb optimized calculations to determine pipeline thermal volume changes, specified temperature transmitters to measure soil temperatures and developed error propagation calculation to provide range of uncertainty for leak volumes. This effort improved the accuracy and confidence in test results reported to the Coast Guard.

Crude Firing Project
ExxonMobil - Chad
Mr. Cobb traveled to Chad where he served as lead mechanical engineer for the design of piping and selection of transfer pumps to allow for the conditioning of crude oil to be used as fuel for gas turbine generators. Mr. Cobb developed material specifications for low pH water wash system, designed two source water wells and developed commissioning specifications for mothballed GE oil conditioning equipment.

Sulphur Handling Facility Upgrades
Savage Sulphur Services – Texas, Louisiana. Florida, Arizona & Illinois
Mr. Cobb was the Lead Mechanical Engineer for upgrades to sulfur handling facilities in Galveston, TX, Tampa, FL and Donaldsonville, LA. He developed specifications for API 650 tank repairs, participated in tank inspections/damage assessments, specified high density concrete for repairs to molten sulfur trenches, and developed scope of work for repairs to half-mile molten sulfur delivery line. He also held responsible charge for sulfur terminal designs in Arizona and Chicago, IL.

Mobile Well Test Separator
ExxonMobil - Chad
Bill coordinated the design of a mobile well test separator units to allow the gas and liquid phases of oil producing wells to be measured. He oversaw commissioning of the test units in Chad.

Relief Valve Hydraulic Transient Loads
Alyeska Pipeline Service Company - Valdez, Alaska
Mr. Cobb modeled hydraulic transient loads associated with relief valve closures for redesigned intake piping to the Valdez Marine Terminal East Metering Building, Bill performed static and dynamic pipe stress analyses to predict pipe stresses and displacements. The final displacements measured during simulated relief events were found to be within 5% of the displacements predicted by the model.

Molten Salt Test Facility
Shell – Houston, Texas
Mr. Cobb developed surface equipment and piping specifications for a downhole test facility utilizing molten salt at 1000o F as heat media. The equipment utilized included a circulation pump, mixing tanks, and a natural draft cooler and Aerogel insulation to minimize heat losses.

Field Surveillance Engineering
ExxonMobil – Aneth, Utah

Mr. Cobb performed surveillance engineering for the McElmo Creek and Ratherford fields in the 4-Corners area of the US. The facilities involved CO2 reinjection station, tank batteries and water reinjection. Mr. Cobb gained excellent experience with reciprocating compressors, injection pumps, tank construction, sour gas and root cause failure analysis, equipment protection requirements.

Production Platform & Support Facility Upgrades
Mobil Equatorial Guinea Inc. – Malabo, Equatorial Guinea

Mr. Cobb served as the Project Manager for upgrades to onshore helicopter refueling facility which entailed replacement of an aging UL-142 Jet-A storage tank, the fuel gas heating module for Jade Platform and for a steam condensate treatment facility for Zafiro Producer FPU. Mr. Cobb developed company standard project management procedures. This work included several trips to Malabo.

Drilling Engineer
ExxonMobil – Norway
From 1999-2001 Mr. Cobb developed and oversaw drilling and completion procedures for subsurface well programs in the North Sea. He maintained daily drilling reporting systems and wrote final well reports as an expat living in Norway.

Infantryman
US Army – Berlin Brigade
Mr. Cobb was an infantryman for the US Army's Berlin Brigade from 1989-1991 and received an Honorable Discharge.

Additional Qualifications

- Have strong knowledge of arc welding procedures and design of weldments
- Have machine shop and light fabrication experience
- Familiar with principles of galvanic corrosion and selection of piping materials to prevent galvanic corrosion
- Competent with Bentley AutoPIPE for pipe stress analysis

Michael A Wise

Principal Electrical Engineer

Mr. Wise has been actively involved in designing electrical systems in Alaska and for over 30 years. His professional experience includes power generation, instrumentation, communications, fire protection, SCADA, and lighting systems. His work included remote installations located throughout the State. A cursory summary of his experience is outlined below.

Education

BSE Electrical Engineering – Colorado State *University, 1988*

MSE Electrical Engineering – Ohio *University, 1989*

Registrations/Certification & Training

- Licensed Electrical Engineer, State of Alaska, EE 8065
- Electrical Administrator, State of Alaska, No 1465

Project Experience

Dowland Back, Director of Engineering

Anchorage, AK

Overall responsibility for technical design and quality control of Dowland-Bach's engineered and manufactured products. Responsibilities also included managing the Projects Department including schedules, workloads and budgets.

Major projects include design of industrial control panels for Alaska's North Slope Oil and Gas industry as well as bulk fuel, water and wastewater projects throughout remote Alaska. Also responsible for the electrical and control system design for Chemical Injection truckable modules, Wellhead Control Panels and DB's solar-powered Wellhead Safety Systems for BP Colombia.

Veco Alaska, Electrical, Controls & Communications Engineering

Anchorage, AK

Electrical and Instrumentation Supervisor. Engineering Supervisor for communications, electrical, and instrumentation engineers and designers. Planning, organizing, and managing the activities of engineers and designers on projects for Alyeska Pipeline, British Petroleum and ARCO.

Major projects included: Engineer-of-record on RTU replacement on Alyeska Pipeline's remote gate valve SCADA system, electrical engineer responsible for design of power systems installed as part of cathodic protection systems along the pipeline, electrical engineer involved in study to route a gas pipeline from North Slope to Nikiski.

Arctic Slope Consulting Group – Electrical Engineering

Anchorage, AK

Senior Electrical Engineer. Contracted to Alyeska Pipeline Service Company. Extensive design and field experience in Alyeska Pipeline's facilities. Project engineer and electrical design engineer responsible for the preparation and coordination of feasibility studies, final designs and on-site construction support of power, controls, fire protection and instrumentation systems. Other projects included design of power, lighting and communication systems for commercial building.

Veco Alaska/Alyeska Pipeline Service Company – Electrical Engineering

Anchorage, AK

Electrical Engineer on the Alyeska Pipeline Controls and Telecommunications Long-Range Planning team. Researched and recommended technology upgrades to power generation, fire protection, and SCADA systems as well as overall operational improvements. Conducted cost/benefit analyses of each alternative.

Construction engineer responsible for on-site electrical and instrumentation support for major improvements to the Pump Station 1 vapor recovery and flare system. Project Engineer for new PLC-based gas voting systems at each Pump Station.

Curtis R. Nuttall, P.E.

Principal Civil Engineer

Mr. Nuttall has over 30 years of comprehensive achievements across Project Management, Engineering, Contracting and Maintenance disciplines. He has a proven history of achieving cost savings and enhancing system performance and a track record of solving tough business and technical problems. He has overseen numerous piping repair and replacement projects and implemented cutting edge technologies resulting in enhanced system performance and client cost savings. A summary of his experience is outlined below.

Education

BS Civil Engineering - *University of Colorado, 1982*

Registrations/Certification & Training

- Registered Professional Engineer, Civil Engineering, Alaska # 7371
- Project Management Institute (PMI) Training – *Project Management Body of Knowledge*
- International Projects Association (IPA) Training – *Decision Making for Capital Effectiveness*
- International Projects Association (IPA) Training – *Successful Megaprojects*
- Transportation Worker Identification Credential (TWIC)

taku engineering

Project Experience

North Slope Borough – Point Lay Water & Wastewater Upgrade Conceptual Study

Point Lay, Alaska

Mr. Nuttall was the primary engineer on the conceptual study for upgrades to the Point Lay water & wastewater piping. Mr. Nuttall led a team of engineers that identified six options for maintenance or repair of the water and sewage piping. The study recommended that the existing belowground piping be replaced with an aboveground recirculating water piping system and an aboveground vacuum sewage piping system.

North Slope Borough – Kaktovik Wastewater Outfall Replacement

Kaktovik, Alaska

The existing sewage outfall piping for the Kaktovik wastewater treatment plant has suffered significant structural damage due to the eroding shoreline and the buildup of frozen effluent during the winter months. Curtis and his team identified a shore area that was less susceptible to erosion and designed a more robust support structure.

Alyeska Pipeline Service Co. - Ballast Water Treatment System Redesign

Valdez, Alaska

Mr. Nuttall oversaw a series of projects that fully redesigned the system that treated the Valdez Marine Terminal's ballast and wastewater. These projects captured and thermally treated vapors from the secondary and quaternary treatment equipment. The projects also added a tertiary treatment (strippers) into the process and modified the quaternary treatment to include settlement to remove suspended solids. The systems resulted in significantly cleaner water flowing into Port Valdez, lower air emissions and lower operating costs.

Alyeska Pipeline Service Co. - Ballast Water Tank Headspace Volatility

Valdez, Alaska

Mr. Nuttall oversaw the project to manage vapors in the headspace of Ballast Water Tanks 93 & 94 at the Valdez Marine Terminal (VMT). The original tank configuration resulted in headspace vapors that comprised a flammable mixture of hydrocarbon and oxygen. Curtis led this project from conceptual engineering, through construction and close-out. He forged the use of horizontal directional drilling (HDD) to connect the ballast tanks, to the existing vapor recovery system at the Terminal's East Tank Farm. HDD allowed the project to utilize high-density polyethylene pipe (HDPE) in-lieu of duplex stainless steel. This resulted in safer tank operations, a piping system with an extremely long service life, and a significant cost savings for the client.

Alyeska Pipeline Service Company – Ballast Water Plant Piping Replacement

Valdez, Alaska

Mr. Nuttall provided overall management of a series of projects that replaced the plant ballast water piping at the Valdez Marine Terminal (VMT). These projects were initiated because the coated carbon steel piping in the facility, was severely degraded due to corrosion. The project team developed a novel approach that utilized the existing piping as a conduit for new, smaller diameter fiber reinforced polymer (FRP) piping. The new piping is corrosion resistant and expected to last for the life of the facility.

Alyeska Pipeline Service Co. - Crude Storage Tank Program

Valdez, Alaska

Mr. Nuttall developed the plan and strategy for a major tank renovation and cathodic protection (CP) program that revitalized Alyeska's crude storage tanks and extended the length of tank service intervals between out-of-service inspections. This program pioneered the first use of tank magnetic-flux-exclusion (MFE) in the United States. Mr. Nuttall brought in new sludge processing technique that eliminated a major source of hazardous waste. He also oversaw Alyeska's conversion to the use of programs to perform repetitive or multi-year projects in a more efficient manner. The cumulative savings of this effort was over $110-million.

Alyeska Pipeline Service Co. - Thompson Pass Backpressure Project

Valdez, Alaska

Mr. Nuttall led an effort to design and install backpressure systems at the VMT's East Metering facility. The backpressure systems were required to alleviate a severe pipeline vibration issue caused by cavitation of oil coming off the top of Thompson Pass. Mr. Nuttall developed an innovative approach for installing backpressure systems that utilized the world's largest hot-tap to avoid a lengthy and costly shutdown of TAPS. Curtis's approach negated the need for a lengthy shutdown and saved the TAPS Owners more than 3 million barrels of deferred oil (~$100 million)

DocuSign Envelope ID: EBEFE7DF-400C-4A3F-AA16-4072DBFD9171

CONTRACT FOR PROFESSIONAL SERVICES WITH WILKS CONSULTING SERVICES, INC.

In consideration of the mutual promises herein, ANCHORAGE and Wilks Consulting Services, Inc.. agrees as follows. This contract consists of:

A. Part I, consisting of 15 sections of Special Provisions;

B. Part II, consisting of 9 sections of General Provisions;

C. Appendix A: Scope of Services consisting of 1 page; and

D. Appendix B: Fee Schedule consisting of 1 page.

PART I
SPECIAL PROVISIONS

Section 1. Definitions. In this contract:

A. "Administrator" means the Municipality of Anchorage Controller of the Finance Department of or his/her designee.
B. "Anchorage" means the Municipality of Anchorage.
C. "Contractor" means Wilks Consulting Services, Inc.

Section 2. Scope of Services.

A. The Contractor shall perform professional services in accordance with Appendix A, which is attached hereto and incorporated in this section by reference.

B. Contract Task Orders (CTOs) will be provided for specific tasks. The Contractor shall respond to each CTO with a proposal detailing the cost and time required to complete the work. Anchorage and the Contractor may refine the proposal for clarification of the scope of services.

C. Once the CTO is agreed to, individual Purchase Orders will be issued with a Notice to Proceed (NTP). The Contractor shall perform the Professional Services required to complete the task set forth therein. Individual purchase orders against this contract are not to exceed $250,000.00 without the prior approval of the Purchasing Director.

D. The Contractor shall commence the performance of the work for each CTO/NTP upon receipt of an approved Purchase Order (PO) or written approval of the Purchasing Officer in the event of an emergency. No work is authorized without a Purchase Order or written approval.

E. Anchorage shall not allow any claim for services other than those described in this section. However, the Contractor may provide, at its own expense, any other services that are consistent with this contract.

DocuSign Envelope ID: EBEFE7DF-400C-4A3F-AA16-4072DBFD9171

[1]Section 3. Time for Performance.

A. This contract becomes effective when signed on behalf of Anchorage.
B. The Contractor shall commence the performance of the work described in Part I Section 2 upon written notice-to-proceed for each task order.
C. The contractor shall complete all work associated with this contract three (3) years from the date of contract execution.

Section 4. Compensation; Method of Payment.

A. Subject to the Contractor's satisfactory performance, Anchorage shall pay the Contractor no more than FIVE HUNDRED THOUSAND DOLLARS ($500,000) in accordance with this section.
B. Anchorage shall pay the Contractor in accordance with the schedule of professional fees attached as Appendix B and incorporated herein by reference for services performed under this contract.
C. Each month the Contractor shall present a bill to the Administrator describing the work for which it seeks payment and documenting expenses and fees to the satisfaction of the Administrator. If any payment is withheld because the Contractor's performance is unsatisfactory, the Administrator must, within ten (10) days of the payment denial, notify the Contractor of the payment denial and set forth, with reasonable specificity, what was unsatisfactory and why.
D. The Contractor is not entitled to any compensation under this contract, other than as expressly provided for in this section.
E. As a condition of payment, the Contractor shall have paid all municipal taxes currently due and owing by the Contractor.

Section 5. Termination of the Contractor's Services.

The Contractor's services under Section 2 may be terminated:

A. By mutual consent of the parties.
B. For the convenience of Anchorage, provided that Anchorage notifies the Contractor in writing of its intent to terminate under this paragraph at least 10 days before the effective date of the termination.
C. For cause, by either party where the other party fails in any material way to perform its obligations under this contract. Termination under this subsection is subject to the condition that the terminating party notifies the other party of its intent to terminate, stating with reasonable specificity the grounds therefor, and the other party fails to cure the default within thirty (30) days after receiving the notice.

DocuSign Envelope ID: EBEFE7DF-400C-4A3F-AA16-4072DBFD9171

Section 6. Duties Upon Termination.

A. If Anchorage terminates the Contractor's services for convenience, Anchorage shall pay the Contractor for its actual costs reasonably incurred in performing before termination. Payment under this subsection shall never exceed the total compensation allowable under Section 4. All finished and unfinished documents and materials prepared by the Contractor shall become the property of Anchorage.

B. If the Contractor's services are terminated for cause, Anchorage shall pay the Contractor the reasonable value of the services satisfactorily rendered prior to termination less any damages suffered by Anchorage because the Contractor fails to perform satisfactorily. The reasonable value of the services rendered shall never exceed the contract rate for such services, and payment under this subsection shall not exceed ninety percent (90%) of the total compensation allowable under Section 4. Any finished or unfinished documents or materials prepared by the Contractor under this contract shall become the property of Anchorage at its option.

C. If the Contractor receives payments exceeding the amount to which it is entitled under subsections A or B of this section, he shall remit the excess to the Administrator within thirty (30) days of receiving notice to do so.

D. The Contractor shall not be entitled to any compensation under this section until the Contractor has delivered to the Administrator all documents, records, work products, materials, and equipment owned by Anchorage and requested by the Administrator.

E. If the Contractor's services are terminated, for whatever reason, the Contractor shall not claim any compensation under this contract, other than that allowed under this section.

G. Except, as provided in this section, termination of the Contractor's services under Section 5, does not affect any other right or obligation of a party under this contract.

Section 7. Insurance.

A. The Contractor shall maintain in good standing, for the entire period of the contract, the insurance described in subsection B of this section. Before rendering any services under this contract, the Contractor shall furnish the Administrator with a Certificate of Insurance in accordance with subsection B of this section in a form acceptable to the Risk Manager for Anchorage.

DocuSign Envelope ID: EBEFE7DF-400C-4A3F-AA16-4072DBFD9171

B. The Contractor shall provide the following insurance:

1.) $500,000 Employers Liability and Workers Compensation as required by Alaska Law.

2.) Commercial Automobile Liability in the amount of $1,000,000 combined single limit to include: owned, hired, and non-owned.

3.) Commercial General Liability including:

$2,000,000 General Aggregate
$2,000,000 Products/Completed Operations
$1,000,000 Personal & Advertising Injury
$1,000,000 Each Occurrence
$5,000 Medical Payments

4.) Professional Liability insurance with limits not less than $1,000,000 per occurrence and $2,000,000 aggregate.

5) Cyber/Privacy Liability insurance with limits not less than $1,000,000. The Cyber coverage shall include, but not be limited to, claims involving invasion of privacy violations (including HIPPA), Information theft, and release of private information. The policy shall provide coverage for breach response costs as well as regulatory fines and penalties as well as credit monitoring expenses.

C. Policies written on a "claims-made basis" must have a two (2) year tail of coverage or an unbroken continuation of coverage for two (2) years from the completion of the contract requirements.

D. Each policy of insurance required by this section shall provide advance notice to the MOA/Contract Administrator prior to cancellation in accordance with the policy. If the insurer does not notify the MOA of policy cancellation it shall be the contractor's responsibility to notify the MOA of such cancellation.

E. With the exception of Worker's Compensation and Professional Liability, each policy shall name The Municipality as an "additional insured" and the actual policy endorsement shall accompany each Certificate of Insurance.

F. General Liability, Worker's Compensation, and Automobile policies shall be endorsed to waive all rights of subrogation against the Municipality of Anchorage by reason of any payment made for claims under the above coverage. This policy endorsement shall accompany each Certificate of Insurance.

G. All policies for general liability shall be primary and noncontributing with any insurance that may be carried by the Municipality.

H. If the Contractor maintains broader coverage and/or higher limits than the minimums shown above, the Municipality requires and shall be entitled to the broader coverage and/or the higher limits maintained by the Contractor. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the Municipality.

I. The contractor shall require and verify that all subcontractors maintain insurance meeting all requirements stated herein, and the Contractor shall ensure that the Municipality is an additional insured on insurance required from subcontractors.

Section 8. Assignments.

Unless otherwise allowed by this contract or in writing by the Administrator, any assignment by the Contractor of its interest in any part of this contract or any delegation of duties under this contract shall be void, and an attempt by the Contractor to assign any part of its interest or delegate duties under this contract shall give Anchorage the right immediately to terminate this contract without any liability for work performed.

Section 9. Ownership; Publication, Reproduction, and Use of Material.

A. Except as otherwise provided herein, all data, documents, and materials produced by the Contractor under this contract shall be the property of Anchorage, which shall retain the exclusive right to publish, disclose, distribute, and otherwise use, in whole or in part, any such data, documents or other materials. Exclusive rights shall not be attributed to portions of such materials present in the public domain or which are not subject to copyright.

B. Equipment purchased by the Contractor with designated contract funds shall be the sole property of Anchorage marked and inventoried as such with a copy of the inventory forwarded to Anchorage.

Section 10. Notices.

Any notice required pertaining to the subject matter of this contract shall be either sent via facsimile (FAX) or mailed by prepaid first class registered or certified mail, with return receipt requested to the following addresses:

Anchorage: Municipality of Anchorage
Department of Finance
P.O. Box 196650

DocuSign Envelope ID: EBEFE7DF-400C-4A3F-AA16-4072DBFD9171

Anchorage, AK 99519-6650
FAX: (907) 343-6616

Contractor: Wilks Consulting Services, Inc.
2100 Atwood Drive
Anchorage, AK 99517
FAX: (907) 242-0659_

Notices are effective upon the earlier of receipt, proof of good transmission (facsimiles only), or five (5) days after proof of proper posting.

Section 11. Contract Budget.

In connection with its performance under this contract, the Contractor shall not make expenditures other than as provided in line items in the contract budget.

Section 12. Force Majeure.

A. Any failure to perform by either party due to force majeure shall not be deemed a violation or breach hereof.
B. As used in this contract, force majeure is an act or event of substantial magnitude, beyond the control of the delayed party, which delays the completion of this contract, including without limitation:

1. Any interruption, suspension, or interference resulting solely from the act of the Municipality or negligent act(s) of the Municipality not otherwise governed by the terms of this contract.
2. Strikes or work stoppages.
3. Any interruption, suspension, or interference with the project caused by acts of God, acts of a public enemy, wars, blockades, insurrections, riots, arrests or restraints of governments and people, civil disturbances, or similar occurrences.
4. Order of the court, administrative agencies or governmental officers other than the Municipality.

Section 13. Financial Management System.

The Contractor shall establish and maintain a financial management system that:
A. Provides accurate, current, and complete disclosure of all financial transactions relating to the contract;
B. Maintains separate accounts by the source of funds for all revenues and expenditures and identifies the source and application of funds for the Contractor's performance under this contract, including information pertaining to subcontracts, obligations, unobligated balances, assets, liabilities, outlays, and income;

DocuSign Envelope ID: EBEFE7DF-400C-4A3F-AA16-4072DBFD9171

C. Effectively controls and accounts for all municipal funds and contract property;
D. Compares actual expenditures with budgeted amounts and relates financial information to performance or productivity data including unit cost information where applicable;
E. Allocates administrative costs to direct service delivery units;
F. Minimizes the time between receipt of funds from Anchorage and their disbursement by the Contractor;
G. Provides accounting records supported by source documentation; and
H. Provides a systematic method assuring the timely and appropriate resolution of audit findings and recommendations.

Section 14. Funding Requirements.

In the event that any funding source for this contract should impose additional requirements upon Anchorage for the use of those funds, the Contractor agrees to abide by those additional requirements immediately upon receipt of written notice thereof from Anchorage.

Section 15. Subcontracts.

The Contractor may enter into subcontracts for the purchase of goods and services necessary for the performance of this contract, provided:

A. Every subcontract shall be reduced to writing and contain a precise description of the services or goods to be provided and the nature of the consideration paid therefor.
B. Every subcontract under which the Contractor delegates the provision of services shall be subject to review and approval by the Administrator before it is executed by the Contractor.
C. Every subcontract in an amount exceeding $1,000.00 shall require reasonable access to business records of the subcontractor relating to the purchase of goods or services pursuant to the subcontract.

DocuSign Envelope ID: EBEFE7DF-400C-4A3F-AA16-4072DBFD9171

PART II

GENERAL CONTRACT PROVISIONS

Section 1. Relationship of Parties.

The Contractor shall perform its obligations hereunder as an independent contractor of Anchorage. Anchorage may administer the contract and monitor the Contractor's compliance with its obligations hereunder. Anchorage shall not supervise or direct the Contractor other than as provided in this section.

Section 2. Nondiscrimination.

A. The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, national origin, ancestry, age, sex, sexual orientation, gender identity, or marital status, or who is a "qualified individual with a disability", as that phrase is defined in the Americans With Disabilities Act of 1990. The Contractor will take affirmative action to ensure that applicants are employed and that employees are treated during employment without regard to their race, color, religion, mental or physical disability, sexual orientation, or gender identity. Such action shall include, without limitation, employment, upgrading, demotion or transfer, recruitment or recruiting advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training including apprenticeship. The Contractor agrees to post, in conspicuous places available to employees and applicants for employment, notices setting forth the provisions of this nondiscrimination clause.

B. The Contractor shall state, in all solicitations or advertisements for employees to work on contract jobs, that all qualified applicants will receive equal consideration for employment without regard to race, color, religion, national origin, ancestry, age, sex, sexual orientation, gender identity, marital status, or mental or physical disability.

C. The Contractor shall comply with any and all reporting requirements that may apply to it which the Anchorage Office of Equal Employment Opportunity Contract Compliance may establish by regulation. The contract compliance officer may accept the contractor's compliance with federal requirements or the contractor's federal reporting documents in lieu of reporting under this section.

D. The Contractor shall include the provisions of subsections A through C of this section in every subcontract or purchase order under this contract, so as to be binding upon every such subcontractor or vendor of the Contractor under this contract. The contract compliance officer may accept the contractor's compliance with federal requirements or the contractor's federal reporting documents in lieu of reporting under this section.

DocuSign Envelope ID: EBEFE7DF-400C-4A3F-AA16-4072DBFD9171

E. The Contractor shall comply with all applicable federal, state, and municipal laws concerning the prohibition of discrimination including, but not limited to Title 5 and Title 7, Chapter 7.50 of the Anchorage Municipal Code.

Section 3. Permits, Laws, and Taxes.

The Contractor shall acquire and maintain in good standing all permits, licenses, and other entitlements necessary to its performance under this contract. All actions taken by the Contractor under this contract shall comply with all applicable statutes, ordinances, rules, and regulations. The Contractor shall pay all taxes pertaining to its performance under this contract.

Section 4. Nonwaiver.

The failure of either party at any time to enforce a provision of this contract shall in no way constitute a waiver of the provision, or in any way affect the validity of this contract or any part thereof, or the right of such party thereafter to enforce each and every provision hereof.

Section 5. Amendment.

A. This contract shall only be amended, modified, or changed by writing, executed by authorized representatives of the parties, with the same formality as this contract was executed.
B. For the purposes of any amendment modification or change to the terms and conditions of this contract, the only authorized representatives of the parties are:

Contractor William J. Wilks

President

Anchorage: **Mayor, Municipal Manager, or Approved Designee**

C. Any attempt to amend, modify, or change this contract by either an unauthorized representative or unauthorized means shall be void.

Section 6. Jurisdiction; Choice of Law.

Any civil action rising from this contract shall be brought in the Superior Court for the Third Judicial District of the State of Alaska at Anchorage. The law of the State of Alaska shall govern the rights and obligations of the parties under this contract.

DocuSign Envelope ID: EBEFE7DF-400C-4A3F-AA16-4072DBFD9171

Section 7. Severability.

Any provision of this contract decreed invalid by a court of competent jurisdiction shall not invalidate the remaining provisions of the contract.

Section 8. Integration.

This instrument and all appendices and amendments hereto embody the entire agreement of the parties. There are no promises, terms, conditions, or obligations other than those contained herein; and this contract shall supersede all previous communications, representations, or agreements, either oral or written, between the parties hereto.

Section 9. Liability.

A. The Contractor shall indemnify, defend, save and hold Anchorage(or Municipality) harmless from any and all claims, lawsuits, or liability, including attorney fees and costs, allegedly arising out of loss, damage, or injury to persons or property or from any wrongful or negligent act, error or omission of Contractor, Contractor's agents, employees, subcontractors or invitees, occurring during the course of, or as a result of the Contractor's, Contractor's agents, employees, contractors, subcontractors or invitees performance pursuant to this contract.

B. The Contractor shall not indemnify, defend, save and hold Anchorage harmless from claims, lawsuits, liability, or attorneys' fees and costs arising from wrongful or negligent acts, error, or omission solely of Anchorage occurring during the course of or as a result of the performance of this contract.

C. Where claims, lawsuits, or liability, including attorneys' fees and costs, arising from the wrongful or negligent act of both Anchorage and the Contractor, the Contractor shall indemnify, defend, save and hold Anchorage harmless from only that portion of claims, lawsuits or liability, including attorneys' fees and costs, which result from the Contractor's or any subcontractor's wrongful or negligent acts occurring as a result of the Contractor's performance pursuant to this contract.

DocuSign Envelope ID: EBEFE7DF-400C-4A3F-AA16-4072DBFD9171

Section 10. Inspection and Retention of Records.

The Contractor shall, at any time during normal business hours and as often as Anchorage may deem necessary, make available to Anchorage, for examination, all of its records with respect to all matters covered by this contract for a period ending three years after the date the Contractor is to complete performance in accordance with Section 2 of the Special Provisions. Upon request, and within a reasonable time, the Contractor shall submit such other information and reports relating to its activities under this contract, to Anchorage, in such form and at such times as Anchorage may reasonably require. The Contractor shall permit Anchorage to audit, examine and make copies of such records, and to make audits of all invoices, materials, payrolls, records of personnel, and other data relating to all matters covered by this contract. Anchorage may, at its option, permit the Contractor to submit its records to Anchorage in lieu of the retention requirements of this section.

Section 11. Availability of Funds.

Payments under this contract require funds from future appropriations and are subject to future appropriations. If sufficient funds are not appropriated for payments required under this contract, this contract shall terminate without penalty to Anchorage and Anchorage shall not be obligated to make payments under this contract beyond those which have previously been appropriated.

DocuSign Envelope ID: EBEFE7DF-400C-4A3F-AA16-4072DBFD9171

IN WITNESS WHEREOF, the parties have executed this contract on the date and at the place shown below.

MUNICIPALITY OF ANCHORAGE

Tax Status: Taxable [ ] Non-Taxable [ ]

RECOMMEND FOR APPROVAL:

Grant Yutrzenka
Name: Grant Yutrzenka

Title: Chief Fiscal Officer

Date: 02/08/2023

DocuSign Envelope ID: EBEFE7DF-400C-4A3F-AA16-4072DBFD9171

APPENDIX A

SCOPE OF SERVICES

3.0 SCOPE OF WORK

General

Provide as-needed professional accounting services to support the MOA Controller Division. Services may include, but aren't limited to the following:

1. Implementation of new GASB Accounting Standards
2. Governmental Fund Accounting
3. Enterprise Fund Accounting
4. Fiduciary Fund Accounting
5. Internal Service Fund Accounting
6. Grant Accounting
7. Capital Project Accounting
8. Cost Allocations
9. Fund Balance Review
10. Draft Policies and Procedures
11. Recommend Improvements to Business Processes
12. Audit Support
    - Audit Process Support
    - Year-end Workpaper Preparation / Review
    - Financial Statement Preparation / Review
    - Footnote Preparation / Review
13. Reporting and Data Visualization
    - Depreciation
    - Management / Assembly / Public Outreach
    - Federal and State Reports as required

Contract Task Orders

Work will be assigned by Contract Task Orders which will have a negotiated scope and fee. Once scope and fee are agreed upon, a Notice-to-Proceed will be issued and made a binding part of the Term Contract. The Notice-to-Proceed will state the scope of work, maximum fee allowable, and completion date.

It is expected that each of the selected term contractors will perform more than one Contract Task Order during the contract period. However, MOA does not guarantee any minimum amount to be paid under the Term Contract.

DocuSign Envelope ID: EBEFE7DF-400C-4A3F-AA16-4072DBFD9171

APPENDIX B

Schedule of Professional Fees

Position	Hourly Rates
Principal/Partner With Discount	$213.75
Principal/Partner Without Discount	$225.00

Wilks Consulting Services (WCS) offers Anchorage a 5% discount off the hourly rates if Anchorage pays WCS's invoice within 15 days from invoice date. Invoices paid after 15 days from the invoice date do not qualify for a discount. The table above shows the hourly rates both with and without the payment term discount.

C/O Municipal Purchasing Department
632 West Sixth Avenue, Suite 520
Anchorage, Alaska 99501

Re: Notification of Contract Services Expansion

Dear Mark:

Wilks Consulting Services (WCS or the firm) reviewed the Municipality of Anchorage notification of Contract Services Expansion to contracts 4400001633 & 4400001634 between the Municipality of Anchorage (MOA) and our firm to include providing professional accounting services to support the Anchorage Hydropower Utility (AHP) on an as needed basis. WCS is ready to assist you to meet your regulatory and financial accounting responsibilities.

Attached are the items requested in your notification letter:

1. **State and include examples of your firm's expertise and experience with electric generation and transmission, locally on the Alaska Railbelt and elsewhere.**
    a. **Municipal Light and Power-**
        i. **Multiple regulatory dockets involving:**
            1. **Witness on multiple revenue requirement studies.**
            2. **Witness on lead-lag studies.**
            3. **Witness on affiliated transactions.**
            4. **Adjusted Gas Transfer Price ML&P Gas Utility charged ML&P electric utility for gas fuel purchases.**
        ii. **MOA engagement to determine close out of ML&P after sale of utility to CEA.**
            1. **Engagement resulted in a draft white paper involving assessment of liabilities involving creation of AHP and liabilities found in power purchase agreement.**
    b. **Anchorage Hydropower Utility-**
        i. **Reviewed MOA request to modify ML&P Certificate of Public Convenience and Necessity to establish AHP.**
        ii. **Ensure RCA orders to establish reserves were followed and recorded on AHP financial statements and made recommendations and produced pro forma financial**

statements for AHP for additional reserves to recognize liabilities for Treatment Center.

iii. Made recommendations for developing the first ever budget and financial statements for utility.

iv. Made recommendation for restoring MOA voting membership rights in the Eklutna Operating Committee.

v. The RCA order in Docket U-24-024 provides a pathway to getting approval to restore voting rights which is critical given restoration costs and typical operating and other capital costs of Eklutna River.

c. Chugach Electric Association-

i. Reviewed request for comment on allocations of cost for new power generation facility to ML&P. Resulting in significant reduction to allocations being charged ML&P.

ii. Reviewed Purchase Agreement between CEA and MOA on sale of utility including RCA orders conditionally approving the sale and ensuring conditions had been complied with and properly recorded on MOA financial statements.

d. British Columbia, Canada Hydro Electric Company-

i. Engagement required that we develop a strategy to categorize plant in service to a uniform chart of accounts that met their regulatory requirements for continuing property records (CPR) to include:

1. **Gather record drawings of their infrastructure.**
2. **Gather financial data of their plant in service by date placed in service.**
3. **Create an Item Class Master (ICLM) that identifies plant in service by retirement units according to the Federal Energy Regulatory Commission (FERC) and establish a base price by retirement unit.**
4. **Create a cost index to establish the cost of plant additions before and after the base.**
5. **Develop a work order master and tie the master to record drawings.**
6. **Allocate the cost at the base year from their financial statements plant in service, depreciation over each retirement units**
7. **Establish a CPR policy and procedure to update it accordingly and facilitate future depreciation studies.**
8. **FERC has specific requirements for an entity to prove ownership of its plant and the above strategies are meant to establish that ownership.**

e. **Doyon Utilities LLC for its Electric Utility Service at Fort Greely, Alaska. Set revenue requirement and filed getting RCA approval on rates as filed.**
f. **Doyon Utilities LLC for its Electric Utility service at Fort Richardson, Alaska. Set revenue requirement and filed getting RCA approval on rates as filed.**
g. **Doyon Utilities LLC for its Electric Utility service at Fort Wainwright, Alaska. Set revenue requirement and filed getting RCA approval on rates as filed.**
h. **TDX North Slope Generating Electric Utility. Multiple engagements to set revenue requirement and filed getting RCA approval on rates as filed.**
i. **TDX Sand Point Generating Electric Utility. Multiple engagements to set revenue requirement and filed getting RCA approval on rates as filed.**
j. **City of Saint Paul Electric Utility. Engagement to set revenue requirement and seek approval by city council on forward-looking electric rates.**

2. **State and Include examples of your firm's expertise and with hydroelectric projects, locally and elsewhere.**
   a. **Deschutes Valley Water District. Engagement was to evaluate both its water and hydroelectric utilities revenue requirements and make recommendations as needed. Analysis resulted in identifying subsidy of hydroelectric utility that reduced rates for its water utility. Recommendation was to have both utilities fund its revenue requirements with rates and no subsidies.**
   b. **See items 1.b and 1.d above.**

3. **State and include examples of your firm's experience with maintaining records in accordance with the Uniform System of Accounts and maintaining continuing property records.**
   a. **British Columbia, Canada Hydro Electric Company-**
      i. **Engagement required that we develop a strategy to categorize plant in service to a uniform chart of accounts that met their regulatory requirements for continuing property records (CPR) to include:**
         1. **Gather record drawings of their infrastructure.**
         2. **Gather financial data of their plant in service by date placed in service.**
         3. **Create an Item Class Master (ICLM) that identifies plant in service by retirement units according to the Federal Energy Regulatory Commission**

(FERC) and establish a base price by retirement unit.

4. **Create a cost index to establish the cost of plant additions before and after the base.**
5. **Develop a work order master and tie the master to record drawings.**
6. **Allocate the cost at the base year from their financial statements plant in service, depreciation over each retirement units**
7. **Establish a CPR policy and procedure to update it accordingly and facilitate future depreciation studies.**
8. **FERC has specific requirements for an entity to prove ownership of its plant and the above strategies are meant to establish that ownership**

We believe our firm is uniquely qualified to provide these services because the personnel slated for this engagement have collectively over 48 years of experience as Municipality of Anchorage (MOA) employees performing the requested services sought in this notification of extension. Our personnel, as MOA employees have developed detailed financial statements, developed and maintained Continuing Property Records (CPR) system for various MOA enterprise activities, provided audit support, year-end workpaper preparation and footnote preparation for both general government and enterprise funds of the MOA.

We have likewise provided the above-mentioned accounting services to the MOA as consultants over multiple years and engagements to include financial statement preparation, impairment determination of the MOA ERP accounting system, intragovernmental cost allocations review, and rate development for MOA enterprise funds to include the Anchorage Water and Wastewater utility, Anchorage Solid Waste Services, Port of Alaska, and the former Municipal Light and Power.

What all this expertise should mean to the MOA in reviewing our proposal for this engagement is that our firm can simply hit the ground running to efficiently and effectively provide these accounting services to the AHP.

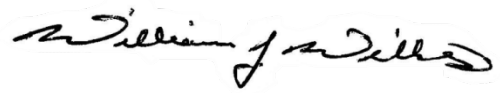
WCS's contact for this RFP is William Wilks, Telephone Number (907) 242-0659, E-mail – williamwilks2003@yahoo.com.

The following individuals are authorized to make representations for WCS in in this matter.

Bill Wilks – President
2100 Atwood Dr
Anchorage, AK 99501
(907) 242-0659

David Wilks - Principal
2512 Crestwood
Anchorage, Alaska 99508
(907) 240-9888

Cordially,



William J. Wilks
President
Wilks Consulting Services Inc.

Key Project Staff and Resources

If WCS is selected to provide the request services, William and David Wilks would be providing the requested accounting services. Their individual resumes are provided in this proposal that more fully describes their expertise in provided these services for the Controller Division staff. Below is the contact information for both William and David Wilks:

Bill Wilks – President
2100 Atwood Dr
Anchorage, AK 99501
(907) 242-0659

David Wilks - Principal
2512 Crestwood
Anchorage, Alaska 99508
(907) 240-9888

Contractor Availability

WCS maintains offices in Anchorage, Alaska and each facility maintains high-speed data access and up-to-date software-based analytical tools. The firm provides remote services to many of its clients but also maintains a policy to provide on-site support whenever necessary. The proximity of WCS's Anchorage office, located two miles from MOA's principal offices, provides the firm's Anchorage personnel the ability to be on-site at MOA at a moment's notice.

Through the efficient application of the firm's resources, I can confidently state that we commit to and will successfully accomplish the requested services sought by the Municipality in its Notification of Contract Services Expansion.

CONTRACT FOR PROFESSIONAL SERVICES WITH ALTMAN, ROGERS & CO.

In consideration of the mutual promises herein, ANCHORAGE and Altman Rogers & Co. agree as follows. This contract consists of:

A. Part I, consisting of 15 sections of Special Provisions;

B. Part II, consisting of 9 sections of General Provisions;

C. Appendix A: Scope of Services consisting of 1 page; and

D. Appendix B: Fee Schedule consisting of 1 page.

PART I
SPECIAL PROVISIONS

Section 1. Definitions. In this contract:

A. "Administrator" means the Municipality of Anchorage Controller of the Finance Department of or his/her designee.
B. "Anchorage" means the Municipality of Anchorage.
C. "Contractor" means Altman, Rogers & Co..

Section 2. Scope of Services.

A. The Contractor shall perform professional services in accordance with Appendix A, which is attached hereto and incorporated in this section by reference.

B. Contract Task Orders (CTO's) will be provided for specific tasks. The Contractor shall respond to each CTO with a proposal detailing cost and time required to complete the work. Anchorage and the Contractor may refine the proposal for clarification of the scope of services.

C. Once the CTO is agreed to, individual Purchase Orders will be issued with a Notice to Proceed (NTP). The Contractor shall perform the Professional Services required to complete the task set forth therein. Individual purchase orders against this contract are not to exceed $250,000.00 without the prior approval of the Purchasing Director.

D. The Contractor shall commence performance of the work for each CTO/NTP upon receipt of an approved Purchase Order (PO) or upon written approval of the Purchasing Officer in the event of an emergency. No work is authorized without a Purchase Order or written approval.

E. Anchorage shall not allow any claim for services other than those described in this section. However, the Contractor may provide, at its own expense, any other services that are consistent with this contract.

DocuSign Envelope ID: 6CB71328-B1B2-4AF7-9077-71EC1AE6CD74

[1]Section 3. Time for Performance.

A. This contract becomes effective when signed on behalf of Anchorage.
B. The Contractor shall commence performance of the work described in Part I Section 2 upon written notice-to-proceed for each task order.
C. The contractor shall complete all work associated with this contract three (3) years from the date of contract execution.

Section 4. Compensation; Method of Payment.

A. Subject to the Contractor's satisfactory performance, Anchorage shall pay the Contractor no more than SEVEN HUNDRED FIFTY THOUSAND DOLLARS ($750,000) in accordance with this section.
B. Anchorage shall pay the Contractor in accordance with the schedule of professional fees attached as Appendix B and incorporated herein by reference for services actually performed under this contract.
C. Each month the Contractor shall present a bill to the Administrator describing the work for which it seeks payment and documenting expenses and fees to the satisfaction of the Administrator. If any payment is withheld because the Contractor's performance is unsatisfactory, the Administrator must, within ten (10) days of the payment denial, notify the Contractor of the payment denial and set forth, with reasonable specificity, what was unsatisfactory and why.
D. The Contractor is not entitled to any compensation under this contract, other than is expressly provided for in this section.
E. As a condition of payment, the Contractor shall have paid all municipal taxes currently due and owing by the Contractor.

Section 5. Termination of the Contractor's Services.

The Contractor's services under Section 2 may be terminated:

A. By mutual consent of the parties.
B. For the convenience of Anchorage, provided that Anchorage notifies the Contractor in writing of its intent to terminate under this paragraph at least 10 days prior to the effective date of the termination.
C. For cause, by either party where the other party fails in any material way to perform its obligations under this contract. Termination under this subsection is subject to the condition that the terminating party notifies the other party of its intent to terminate, stating with reasonable specificity the grounds therefor, and the other party fails to cure the default within thirty (30) days after receiving the notice.

DocuSign Envelope ID: 6CB71328-B1B2-4AF7-9077-71EC1AE6CD74

Section 6. Duties Upon Termination.

A. If Anchorage terminates the Contractor's services for convenience, Anchorage shall pay the Contractor for its actual costs reasonably incurred in performing before termination. Payment under this subsection shall never exceed the total compensation allowable under Section 4. All finished and unfinished documents and materials prepared by the Contractor shall become the property of Anchorage.
B. If the Contractor's services are terminated for cause, Anchorage shall pay the Contractor the reasonable value of the services satisfactorily rendered prior to termination less any damages suffered by Anchorage because of the Contractor's failure to perform satisfactorily. The reasonable value of the services rendered shall never exceed the contract rate for such services, and payment under this subsection shall not exceed ninety percent (90%) of the total compensation allowable under Section 4. Any finished or unfinished documents or materials prepared by the Contractor under this contract shall become the property of Anchorage at its option.
C. If the Contractor receives payments exceeding the amount to which it is entitled under subsections A or B of this section, he shall remit the excess to the Administrator within thirty (30) days of receiving notice to do so.
D. The Contractor shall not be entitled to any compensation under this section until the Contractor has delivered to the Administrator all documents, records, work product, materials and equipment owned by Anchorage and requested by the Administrator.
E. If the Contractor's services are terminated, for whatever reason, the Contractor shall not claim any compensation under this contract, other than that allowed under this section.
G. Except as provided in this section, termination of the Contractor's services under Section 5 does not affect any other right or obligation of a party under this contract.

Section 7. Insurance.

A. The Contractor shall maintain in good standing, for the entire period of the contact, the insurance described in subsection B of this section. Before rendering any services under this contract, the Contractor shall furnish the Administrator with a Certificate of Insurance in accordance with subsection B of this section in a form acceptable to the Risk Manager for Anchorage.

DocuSign Envelope ID: 6CB71328-B1B2-4AF7-9077-71EC1AE6CD74

B. The Contractor shall provide the following insurance:

1.) $500,000 Employers Liability and Workers Compensation as required by Alaska Law.

2.) Commercial Automobile Liability in the amount of $1,000,000 combined single limit to include: owned, hired, and non-owned.

3.) Commercial General Liability including:

$2,000,000 General Aggregate
$2,000,000 Products/Completed Operations
$1,000,000 Personal & Advertising Injury
$1,000,000 Each Occurrence
$5,000 Medical Payments

4.) Professional Liability insurance with limits not less than $1,000,000 per occurrence and $2,000,000 aggregate.

5) Cyber/Privacy Liability insurance with limits not less than $3,000,000. The Cyber coverage shall include, but not be limited to, claims involving invasion of privacy violations (including HIPPA), Information theft, and release of private information. The policy shall provide coverage for breach response costs as well as regulatory fines and penalties as well as credit monitoring expenses.

C. Policies written on a "claims-made basis" must have a two (2) year tail of coverage, or an unbroken continuation of coverage for two (2) years from the completion of the contract requirements.

D. Each policy of insurance required by this section shall provide for advance notice to the MOA/Contract Administrator prior to cancellation in accordance with the policy. IF the insurer does not notify the MOA on policy cancellation it shall be the contractor's responsibility to notify the MOA of such cancellation.

E. With the exception of Workers Compensation and Professional Liability each policy shall name The Municipality as an "additional insured" and the actual policy endorsement shall accompany each Certificate of Insurance.

F. General Liability, Workers Compensation, and Automobile policies shall be endorsed to waive all rights of subrogation against the Municipality of Anchorage by reason of any payment made for claims under the above coverage. This policy endorsement shall accompany each Certificate of Insurance.

G. All policies for general liability shall be primary and noncontributing with any insurance that may be carried by the Municipality.

H. If the Contractor maintains broader coverage and/or higher limits than the minimums shown above, the Municipality requires and shall be entitled to the broader coverage and/or the higher limits maintained by the Contractor. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the Municipality.

I. Contractor shall require and verify that all subcontractors maintain insurance meeting all requirements stated herein, and Contractor shall ensure that the Municipality is an additional insured on insurance required from subcontractors.

Section 8. Assignments.

Unless otherwise allowed by this contract or in writing by the Administrator, any assignment by the Contractor of its interest in any part of this contract or any delegation of duties under this contract shall be void, and an attempt by the Contractor to assign any part of its interest or delegate duties under this contract shall give Anchorage the right immediately to terminate this contract without any liability for work performed.

Section 9. Ownership; Publication, Reproduction and Use of Material.

A. Except as otherwise provided herein, all data, documents and materials produced by the Contractor under this contract shall be the property of Anchorage, which shall retain the exclusive right to publish, disclose, distribute and otherwise use, in whole or in part, any such data, documents or other materials. Exclusive rights shall not be attributed to portions of such materials presently in the public domain or which are not subject to copyright.

B. Equipment purchased by the Contractor with designated contract funds shall be the sole property of Anchorage marked and inventoried as such with a copy of the inventory forwarded to Anchorage.

Section 10. Notices.

Any notice required pertaining to the subject matter of this contract shall be either sent via facsimile (FAX) or mailed by prepaid first class registered or certified mail, return receipt requested to the following addresses:

Anchorage: Municipality of Anchorage
Department of Finance
P.O. Box 196650

DocuSign Envelope ID: 6CB71328-B1B2-4AF7-9077-71EC1AE6CD74

Anchorage, AK 99519-6650
FAX: (907) _____

Contractor: Altman, Rogers & Co.
3000 C Street N.,
Suite 201
Anchorage, AK 99503

FAX: (907) _____

Notices are effective upon the earlier of receipt, proof of good transmission (facsimiles only), or five (5) days after proof of proper posting.

Section 11. Contract Budget.

In connection with its performance under this contract the Contractor shall not make expenditures other than as provided in line items in the contract budget.

Section 12. Force Majeure.

A. Any failure to perform by either party due to force majeure shall not be deemed a violation or breach hereof.
B. As used in this contract, force majeure is an act or event of substantial magnitude, beyond the control of the delayed party, which delays the completion of this contract, including without limitation:

1. Any interruption, suspension or interference resulting solely from the act of the Municipality or negligent act(s) of the Municipality not otherwise governed by the terms of this contract.
2. Strikes or work stoppages.
3. Any interruption, suspension or interference with the project caused by acts of God, or acts of a public enemy, wars, blockades, insurrections, riots, arrests or restraints of governments and people, civil disturbances or similar occurrences.
4. Order of court, administrative agencies or governmental officers other than the Municipality.

Section 13. Financial Management System.

The Contractor shall establish and maintain a financial management system that:

A. Provides accurate, current, and complete disclosure of all financial transactions relating to the contract;
B. Maintains separate accounts by source of funds for all revenues and expenditures and identifies the source and application of funds for the Contractor's performance under this contract, including information pertaining to subcontracts, obligations, unobligated balances, assets, liabilities, outlays and income;

DocuSign Envelope ID: 6CB71328-B1B2-4AF7-9077-71EC1AE6CD74

C. Effectively controls and accounts for all municipal funds and contract property;
D. Compares actual expenditures with budgeted amounts and relates financial information to performance or productivity data including unit cost information where applicable;
E. Allocates administrative costs to direct service delivery units;
F. Minimizes the time between receipt of funds from Anchorage and their disbursement by the Contractor;
G. Provides accounting records supported by source documentation; and
H. Provides a systematic method assuring the timely and appropriate resolution of audit findings and recommendations.

Section 14. Funding Requirements.

In the event that any funding source for this contract should impose additional requirements upon Anchorage for the use of those funds, the Contractor agrees to abide by those additional requirements immediately upon receipt of written notice thereof from Anchorage.

Section 15. Subcontracts.

The Contractor may enter into subcontracts for the purchase of goods and services necessary for the performance of this contract, provided:

A. Every subcontract shall be reduced to writing and contain a precise description of the services or goods to be provided and the nature of the consideration paid therefore.
B. Every subcontract under which the Contractor delegates the provision of services shall be subject to review and approval by the Administrator before it is executed by the Contractor.
C. Every subcontract in an amount exceeding $1,000.00 shall require reasonable access to business records of the subcontractor relating to the purchase of goods or services pursuant to the subcontract.

DocuSign Envelope ID: 6CB71328-B1B2-4AF7-9077-71EC1AE6CD74

PART II

GENERAL CONTRACT PROVISIONS

Section 1. Relationship of Parties.

The Contractor shall perform its obligations hereunder as an independent contractor of Anchorage. Anchorage may administer the contract and monitor the Contractor's compliance with its obligations hereunder. Anchorage shall not supervise or direct the Contractor other than as provided in this section.

Section 2. Nondiscrimination.

A. The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, national origin, ancestry, age, sex, sexual orientation, gender identity, or marital status, or who is a "qualified individual with a disability", as that phrase is defined in the Americans With Disabilities Act of 1990. The Contractor will take affirmative action to ensure that applicants are employed and that employees are treated during employment without regard to their race, color, religion, mental or physical disability, sexual orientation or gender identity. Such action shall include, without limitation, employment, upgrading, demotion or transfer, recruitment or recruiting advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training including apprenticeship. The Contractor agrees to post, in conspicuous places available to employees and applicants for employment, notices setting forth the provisions of this nondiscrimination clause.

B. The Contractor shall state, in all solicitations or advertisements for employees to work on contract jobs, that all qualified applicants will receive equal consideration for employment without regard to race, color, religion, national origin, ancestry, age, sex, sexual orientation, gender identity, marital status, or mental or physical disability.

C. The Contractor shall comply with any and all reporting requirements that may apply to it which the Anchorage Office of Equal Employment Opportunity Contract Compliance may establish by regulation. The contract compliance officer may accept the contractor's compliance with federal requirements or the contractor's federal reporting documents in lieu of reporting under this section.

D. The Contractor shall include the provisions of subsections A through C of this section in every subcontract or purchase order under this contract, so as to be binding upon every such subcontractor or vendor of the Contractor under this contract. The contract compliance officer may accept the contractor's compliance with federal requirements or the contractor's federal reporting documents in lieu of reporting under this section.

DocuSign Envelope ID: 6CB71328-B1B2-4AF7-9077-71EC1AE6CD74

E. The Contractor shall comply with all applicable federal, state and municipal laws concerning the prohibition of discrimination including, but not limited to Title 5 and Title 7, Chapter 7.50 of the Anchorage Municipal Code.

Section 3. Permits, Laws and Taxes.

The Contractor shall acquire and maintain in good standing all permits, licenses and other entitlements necessary to its performance under this contract. All actions taken by the Contractor under this contract shall comply with all applicable statutes, ordinances, rules and regulations. The Contractor shall pay all taxes pertaining to its performance under this contract.

Section 4. Nonwaiver.

The failure of either party at any time to enforce a provision of this contract shall in no way constitute a waiver of the provision, nor in any way affect the validity of this contract or any part hereof, or the right of such party thereafter to enforce each and every provision hereof.

Section 5. Amendment.

A. This contract shall only be amended, modified or changed by a writing, executed by authorized representatives of the parties, with the same formality as this contract was executed.
B. For the purposes of any amendment modification or change to the terms and conditions of this contract, the only authorized representatives of the parties are:

Contractor Steve E. Wadleigh

Principal

Anchorage: **Mayor, Municipal Manager or Approved Designee**

C. Any attempt to amend, modify, or change this contract by either an unauthorized representative or unauthorized means shall be void.

Section 6. Jurisdiction; Choice of Law.

Any civil action rising from this contract shall be brought in the Superior Court for the Third Judicial District of the State of Alaska at Anchorage. The law of the State of Alaska shall govern the rights and obligations of the parties under this contract.

DocuSign Envelope ID: 6CB71328-B1B2-4AF7-9077-71EC1AE6CD74

Section 7. Severability.

Any provision of this contract decreed invalid by a court of competent jurisdiction shall not invalidate the remaining provisions of the contract.

Section 8. Integration.

This instrument and all appendices and amendments hereto embody the entire agreement of the parties. There are no promises, terms, conditions or obligations other than those contained herein; and this contract shall supersede all previous communications, representations or agreements, either oral or written, between the parties hereto.

Section 9. Liability.

A. The Contractor shall indemnify, defend, save and hold Anchorage(or Municipality) harmless from any and all claims, lawsuits or liability, including attorney fees and costs, allegedly arising out of loss, damage or injury to persons or property or from any wrongful or negligent act, error or omission of Contractor, Contractor's agents, employees, subcontractors or invitees, occurring during the course of, or as a result of the Contractor's, Contractor's agents, employees, contractors, subcontractors or invitees performance pursuant to this contract.

B. The Contractor shall not indemnify, defend, save and hold Anchorage harmless from claims, lawsuits, liability, or attorneys' fees and costs arising from wrongful or negligent acts, error or omission solely of Anchorage occurring during the course of or as a result of the performance of this contract.

C. Where claims, lawsuits or liability, including attorneys' fees and costs arise from wrongful or negligent act of both Anchorage and the Contractor, the Contractor shall indemnify, defend, save and hold Anchorage harmless from only that portion of claims, lawsuits or liability, including attorneys' fees and costs, which result from the Contractor's or any subcontractor's wrongful or negligent acts occurring as a result of the Contractor's performance pursuant to this contract.

DocuSign Envelope ID: 6CB71328-B1B2-4AF7-9077-71EC1AE6CD74

Section 10. Inspection and Retention of Records.

The Contractor shall, at any time during normal business hours and as often as Anchorage may deem necessary, make available to Anchorage, for examination, all of its records with respect to all matters covered by this contract for a period ending three years after the date the Contractor is to complete performance in accordance with Section 2 of the Special Provisions. Upon request, and within a reasonable time, the Contractor shall submit such other information and reports relating to its activities under this contract, to Anchorage, in such form and at such times as Anchorage may reasonably require. The Contractor shall permit Anchorage to audit, examine and make copies of such records, and to make audits of all invoices, materials, payrolls, records of personnel and other data relating to all matters covered by this contract. Anchorage may, at its option, permit the Contractor to submit its records to Anchorage in lieu of the retention requirements of this section.

Section 11. Availability of Funds.

Payments under this contract require funds from future appropriations and are subject to future appropriations. If sufficient funds are not appropriated for payments required under this contract, this contract shall terminate without penalty to Anchorage and Anchorage shall not be obligated to make payments under this contract beyond those which have previously been appropriated.

DocuSign Envelope ID: 6CB71328-B1B2-4AF7-9077-71EC1AE6CD74

IN WITNESS WHEREOF, the parties have executed this contract on the date and at the place shown below.

APPENDIX A

SCOPE OF SERVICES

3.0 SCOPE OF WORK

General

Provide as needed professional accounting services to support the MOA Controller Division. Services may include, but aren't limited to the following:

1. Implementation of new GASB Accounting Standards
2. Governmental Fund Accounting
3. Enterprise Fund Accounting
4. Fiduciary Fund Accounting
5. Internal Service Fund Accounting
6. Grant Accounting
7. Capital Project Accounting
8. Cost Allocations
9. Fund Balance Review
10. Draft Policies and Procedures
11. Recommend Improvements to Business Processes
12. Audit Support
    - Audit Process Support
    - Year-end Workpaper Preparation / Review
    - Financial Statement Preparation / Review
    - Footnote Preparation / Review
13. Reporting and Data Visualization
    - Depreciation
    - Management / Assembly / Public Outreach
    - Federal and State Reports as required

Contract Task Orders

Work will be assigned by Contract Task Orders which will have a negotiated scope and fee. Once scope and fee are agreed upon, a Notice-to-Proceed will be issued and made a binding part of the Term Contract. The Notice-to-Proceed will state the scope of work, maximum fee allowable, and completion date.

It is expected that each of the selected term contractors will perform more than one Contract Task Order during the contract period. However, MOA does not guarantee any minimum amount to be paid under the Term Contract.

Municipality of Anchorage- Anchorage Hydropower Utility

Contract Service Proposal

Altman, Rogers & Co.
3000 C Street N, Suite 201
Anchorage, AK 99503
(907) 274-2992

March 17, 2025

Thank you for the opportunity to expand our services under our existing contract with the Municipality of Anchorage to support Anchorage Hydropower Utility (AHP).

Our firm is eager to assist AHP in meeting its objectives as an active member of the Eklutna Operating Committee (EOC). While we acknowledge that our current team does not yet possess extensive direct experience with the Uniform System of Accounts and maintaining continuing property records specifically within the utility sector, we are highly confident in our ability to rapidly acquire and apply this expertise to provide valuable and effective services.

We bring considerable experience in related areas, such as financial management, business advisory, and strategic planning, and have a proven track record of quickly adapting to industry-specific standards and requirements. Our team's professional credentials and adaptability assure that we can swiftly align with AHP's specific needs.

We are committed to investing the necessary resources to promptly familiarize ourselves with these accounting standards and practices to ensure compliance and excellence in our support services.

We look forward to the possibility of working closely with AHP and contributing positively to your operational goals.

Key Personnel

All our staff complete at least 40 hours of continuing professional education (CPE) each year. Our principals and managers complete over 20 hours of industry-specific training. Staying ahead of GASB changes and impacts on our clients is vital as we serve many governmental entities throughout Alaska.

STEVE WADLEIGH, CPA (Principal)

Mr. Wadleigh is a licensed CPA by the State of Alaska (Certificate #2768). With over two decades at Altman, Rogers & Co., Steve Wadleigh, CPA, leads our Client Accounting Services (CAAS) department and serves as a principal auditor. Since joining the firm in 1998, he has provided advisory, audit, review, and compilation services, bringing a strategic, big-picture perspective to every client engagement.

Steve's extensive expertise is especially valuable for clients who require audited financial statements for funding, bonding, or compliance reporting. He also works closely with businesses and organizations that need customized accounting solutions tailored to their specific needs. He has over 27 years of governmental accounting experience.

A graduate of Vanguard University, where he earned honors in 1996, Steve is an active member of:

- American Institute of Certified Public Accountants (AICPA)
- Alaska Society of Certified Public Accountants (AKCPA)
- Government Finance Officers Association (GFOA)

Steve's commitment to excellence and deep industry knowledge make him a trusted advisor for clients navigating complex financial and reporting requirements.

MICHAEL FONTENELLE, CPA

Michael Fontenelle is a licensed CPA by the State of Louisiana (Certificate #CPA.0027144). He joined Altman, Rogers & Co. in August 2023, initially serving as a Municipality Management Consultant before advancing to his current role as Advisory Consultant. Michael holds Bachelor's degrees in Accounting, Business Administration, and Hotel, Restaurant, and Tourism from the University of New Orleans and became a licensed CPA in 2013. His professional background includes extensive experience in government accounting and management, sales tax audits, and healthcare financial services.

Prior to joining Altman, Rogers & Co., Michael served for two years as Controller and Contracts Manager for a local governing authority. In this capacity, he managed behavioral health services, developmental disabilities programs, and Federally Qualified Health Center (FQHC) departments, overseeing an annual budget of approximately $33 million. Additionally, he led teams responsible for accounting, accounts payable, accounts receivable, and payroll functions.

Michael is actively involved in professional organizations, including the American Institute of Certified Public Accountants, Alaska Government Finance Officers Association, Louisiana Government Officers Association, Louisiana Society of Certified Public Accountants, Jefferson Chamber of Commerce, and the Certified Fraud Examiners Association.

JENNIFER WILLETTE

Jennifer (Jen) Willette brings over 20 years of expertise in bookkeeping, accounting, and financial management to Altman, Rogers & Co. She joined the firm as a CAAS Specialist in 2020 and was quickly promoted to CAAS Supervisor in 2021.

A graduate of Bowdoin College, Jen earned her Bachelor of Arts in Archaeology, graduating Magna Cum Laude with honors in Latin and German. Since 2005, she has successfully operated her own bookkeeping and accounting business, working with a diverse range clients.

Jen specializes in bridging the gap between clients and tax professionals, general ledger clean-up, audit preparation, and developing custom financial tracking tools. She is also an active board member of The Alaska Huts Association.

Her extensive experience and commitment to financial clarity make her a trusted resource for businesses and organizations seeking expert financial guidance.

ANCHORAGE, ALASKA
AO No. 2025-57, Corrected*

AN ORDINANCE AMENDING ANCHORAGE MUNICIPAL CODE SECTIONS 3.20.070 AND 26.30.025 TO CLARIFY RESPONSIBILITIES WITHIN THE MUNICIPALITY FOR IMPLEMENTING THE 1991 FISH AND WILDLIFE AGREEMENT.

WHEREAS, pursuant to Anchorage Charter Section 16.01, which provides that "[*t]he assembly shall prescribe the rules and procedures for the operation and management of municipal utilities*" (emphasis added), the Anchorage Assembly is responsible for the oversight and policies of all municipal utilities; and

WHEREAS, the Anchorage Assembly, when it deems necessary and appropriate, may delegate policy-making authority to the Mayor or other Administration officials for operational oversight and policy decisions of each municipal utility; and

WHEREAS, the Municipality of Anchorage retains an ownership interest (53%) in the Eklutna Hydroelectric Project with Chugach Electric Association (CEA) and Matanuska Electric Association (MEA); and

WHEREAS, the Municipality of Anchorage, CEA, and MEA are parties to the 1991 Agreement with the State of Alaska and federal agencies to study the impacts of the Eklutna Hydroelectric Project to fish and wildlife; examine and develop proposals for the protection, mitigation, and enhancement of fish and wildlife affected by such hydroelectric development (the "1991 Agreement"); and prepare a Fish and Wildlife Program for the Governor; and

WHEREAS, on December 19, 2023, the Anchorage Assembly, exercising its legislative authority to establish municipal policy, adopted AO 2023-131, As Amended, codifying an official municipal policy in support of the restoration of the Eklutna River: "It is the policy of the Municipality of Anchorage and the Anchorage Hydropower utility to restore the continuous water flow of the Eklutna River and the fish populations of the River and Eklutna Lake, to the greatest extent possible, subject to all provisions of the 1991 Fish & Wildlife Agreement" (codified at AMC 26.30.025A); and

WHEREAS, AO 2023-131, As Amended, further provided that the "Proposed Final Fish and Wildlife Program to protect, mitigate, and enhance fish and wildlife resources in the Eklutna River shall be submitted to the Assembly with a proposed resolution in support of action, prior to its submission to the Governor" (codified at AMC 26.40.025B(2)); and

WHEREAS, in adopting AO 2023-131, the Anchorage Assembly explained its expectations that before submitting the final Fish and Wildlife Program to the

*Clerk's Note: Corrected Scrivenor's Error on page 3, line 25 from 2025 to 2024.

Governor pursuant to the 1991 Agreement, the Final Plan would "be submitted to Assembly for review and potential action by a resolution of support or proposed revisions, prior to submitting to the Governor" (AM 953-2023); and

WHEREAS, on February 2, 2024, the Anchorage Assembly adopted AR 2024-40, As Amended, incorporating the Assembly's public comment on a draft fish and wildlife program that was developed by CEA and MEA and published for public comment. AR 2024-40 unequivocally rejected the draft fish and wildlife program proposed by CEA and MEA, providing that "[t]he Municipality of Anchorage *does not intend to issue authorizations or provide funds or any other form of support of the Draft Fish and Wildlife Program* or any alternative that doesn't restore the full length of the Eklutna River and comply with policy of the Municipality" (emphasis added); and

WHEREAS, after rejecting the proposed fish and wildlife program, the Anchorage Assembly learned that Mayor Bronson "clandestinely negotiated and is presently attempting to bind the Municipality to a series of agreements implicating tens of millions of taxpayers' and ratepayers' funds and access to drinking water for decades in direct contradiction of policies duly established and codified by the Assembly" and by the Charter of the Municipality of Anchorage (AM 350-024); and

WHEREAS, the Anchorage Assembly determined that it was necessary and appropriate under the circumstances to clarify roles and expectations under municipal law regarding policy decisions implementing the 1991 Agreement, and specifically, as explained in AM 2080-240, to "correct an oversight in AMC 3.20.070 which had apparently delegated broad policy-making decisions for utilities to the Mayor . . . The changes proposed in this section will clarify that except for operational policies, the policy making authorities, such as budgetary, financial, construction, and other policy considerations reside with the Assembly" (AM 280-2024); and

WHEREAS, on March 27, 2024, the Anchorage Assembly adopted AO 2024-28, As Amended, clarifying that the Assembly shall be responsible for policy decisions of the Anchorage Water and Wastewater and the Anchorage Hydropower utility, "including those related to the municipality's performance under the 1991 Fish and Wildlife Agreement regarding the Eklutna hydroelectric project" (codified at AMC 3.20.070B(3)(c) and (6)(c)); and

WHEREAS, in overriding the Mayor's veto of AO 2024-28, As Amended, the Anchorage Assembly reiterated that "it is inherently the Assembly's role to articulate and codify the policy of the Municipal Government" (AM 350-2024); and

WHEREAS, on April 26, 2024, CEA and MEA (using the Municipality's official seal without authorization) submitted the Proposed Fish and Wildlife Program to the Governor in substantially the same form as the draft that was previously rejected by the Assembly through AR 2024-40, and without the Assembly's approval as required by AMC 26.30.025B(2); and

WHEREAS, on April 26, 2024, along with the Proposed Fish and Wildlife Program submitted by CEA and MEA, Mayor Bronson submitted a letter to the Governor expressing "support" for the Proposed Fish and Wildlife Program in direct violation

of the codified municipal policy; and

WHEREAS, because Mayor Bronson's letter to the Governor and the actions of other Bronson Administration officials were in direct violation of municipal law and policy, the Anchorage Assembly adopted AO 2024-52, providing that "[a]ny declaration, comment, response, or other official statement submitted, published, or communicated in the name of the municipality pursuant to the 1991 agreement shall be approved by the assembly prior to its submission, publication, or communication"; and

WHEREAS, AO 2024-52 further provided that "[i]t shall be among the prescribed duties of the mayor to implement the policy and positions approved by the assembly under this subsection through research, dissemination of information, and advocacy before local, state, tribal or federal governments, their agencies and any relevant administrative bodies"; and

WHEREAS, the Anchorage Assembly's aforementioned legislation related to implementation of the 1991 Fish and Wildlife Agreement was the result of an extraordinary and unprecedented disregard by the Bronson Administration of the Anchorage Assembly's lawful responsibilities and authority over municipal utilities, requiring the Assembly to clarify in code the existing law, and roles and responsibilities within the Municipality for implementing the 1991 Fish and Wildlife Agreement; and

WHEREAS, beginning on July 1, 2024 and continuing through the present, Mayor LaFrance and her administration have committed to following established municipal policy with respect to Eklutna River restoration; and

WHEREAS, because the current Mayor and Administration have demonstrated respect for the rule of law and long established principles of separation of powers, and respect for the Anchorage Assembly in providing oversight and establishing policy directions for all municipal utilities, the code changes adopted in response to the previous administration's actions are no longer necessary; now therefore,

THE ANCHORAGE ASSEMBLY ORDAINS:

Section 1. Anchorage Municipal Code section 3.20.070 is hereby amended to read as follows (*the omitted portion of the section not affected; this is effectively repealing Section 1 of AO 2024-28, As Amended):*

3.20.070 - Executive branch organization.

Section 2. Anchorage Municipal Code section 26.30.025 is hereby amended to read as follows (*the omitted portion of the section not affected; this is effectively repealing AO 2024-52 amendments to the section)*:

26.30.025 - Eklutna River Restoration.

*** *** ***

B. Under the 1991 Agreement with the State of Alaska, federal agencies, and utility partners, the Municipality of Anchorage, through its Anchorage Hydropower utility and ownership share in the Eklutna Hydroelectric Project, bears responsibility to study and develop proposals for the protection, mitigation, and enhancement of fish and wildlife affected by the hydroelectric development.

1. The Anchorage Hydropower utility shall provide a report to each joint session of the Anchorage Assembly and the Native Village of Eklutna under subsection 2.30.135B. regarding the restoration of the Eklutna River and Lake and the municipality's performance of its obligations under the 1991 Agreement and the Final Fish and Wildlife Program.

2. The Proposed Final Fish and Wildlife Program to protect, mitigate, and enhance fish and wildlife resources in the Eklutna River shall be subject to assembly approval, prior to its submission to the Governor of Alaska.

[3. ANY DECLARATION, COMMENT, RESPONSE, OR OTHER OFFICIAL STATEMENT SUBMITTED, PUBLISHED, OR COMMUNICATED IN THE NAME OF THE MUNICIPALITY PURSUANT TO THE 1991 AGREEMENT SHALL BE APPROVED BY THE ASSEMBLY PRIOR TO ITS SUBMISSION, PUBLICATION, OR COMMUNICATION.

4. IT SHALL BE AMONG THE PRESCRIBED DUTIES OF THE MAYOR TO IMPLEMENT THE POLICY AND POSITIONS APPROVED BY THE ASSEMBLY UNDER THIS SUBSECTION THROUGH RESEARCH, DISSEMINATION OF INFORMATION,

AND ADVOCACY BEFORE LOCAL, STATE, TRIBAL OR FEDERAL GOVERNMENTS, THEIR AGENCIES AND ANY RELEVANT ADMINISTRATIVE BODIES.]

(AO No. 2023-131 § 1, 12-5-23; AO No 2024-28 § 4, 3-27-24; AO No. 2024-52, § 1, 5-21-24)

Section 3. This ordinance is effective immediately upon passage and approval by the Assembly.

PASSED AND APPROVED by the Anchorage Assembly this 6th day of May, 2025.

Christopher Constant

Chair

ATTEST:

Municipal Clerk

MUNICIPALITY OF ANCHORAGE
ASSEMBLY MEMORANDUM

No. AM 383-2025

Meeting Date: April 22, 2025

From: **Assembly Chair Constant and Assembly Vice Chair Zaletel**

Subject: **AN ORDINANCE AMENDING ANCHORAGE MUNICIPAL CODE SECTIONS 3.20.070 AND 26.30.025 TO CLARIFY RESPONSIBILITIES WITHIN THE MUNICIPALITY FOR IMPLEMENTING THE 1991 FISH AND WILDLIFE AGREEMENT.**

Background

The Municipality of Anchorage is a home rule municipality with "all legislative powers not prohibited by law or by charter" under Article X, § 11 of the Alaska Constitution and the Anchorage Home Rule Charter § 3.01. In the context of public utilities oversight, the Anchorage Home Rule Charter § 16.01(c) grants the Assembly authority to "prescribe rules and procedures for the operation and management of municipal utilities." Thus, the Anchorage Assembly is granted clear legislative authority under the Anchorage Municipal Charter. This authority is foundational to the functioning of our local government and reflects the will of the people as expressed in the Charter's adoption.

In prior years, certain provisions were added to the Anchorage Municipal Code to restate or make more explicit elements of this authority—particularly in response to instances where the Assembly's Charter authority was improperly constrained or challenged. These Code provisions did not *create* new powers for the Assembly, but rather affirmed powers already vested by the Charter. They were added as necessary guardrails during a period when the Assembly's role in governance required additional protection.

Current Context

With the seating of a new Mayor and Administration who have expressed a renewed commitment to respecting the separation of powers and the Charter framework, the Assembly recognizes an opportunity to clean up and streamline municipal code. There is no longer a need for certain redundancies where the Charter speaks clearly. This ordinance would remove or revise those duplicative Code sections, affirming both the Assembly's trust in this Administration and the enduring strength of the Charter itself.

Proposed Action

This ordinance proposes the removal of identified sections of the Anchorage Municipal Code that were inserted to defend or clarify the Assembly's Charter authority, but which are no longer necessary due to current mutual respect for the Charter-defined roles of the legislative and executive branches. The removal of these provisions does not alter the Assembly's authority, which continues to be grounded in the Charter, nor does it limit the Assembly's ability to respond should future conditions warrant similar clarity.

Conclusion

The removal of these provisions marks a return to clean Code and streamlined governance, reflecting a shared respect for our foundational documents and a new era of interbranch cooperation. The Assembly recommends approval of the attached ordinance.

We request your support for the ordinance.

INSTRUCTIONS FOR ANNUAL REPORT COMPLETION

The purpose of this form is to collect financial and operational information from electric utilities regulated by the Regulatory Commission of Alaska (RCA). The commission's authority for requiring this report is found in Alaska Statute 42.05.451. This report is a non-confidential public use form. However, utilities may request the report be filed in confidential status by following the guidelines of the Alaska Administrative Code at 3 AAC 48.045. In order for confidentiality requests to be approved by the commission, the utility must show convincing evidence that disclosure of the report to the public might competitively or financially disadvantage the utility, AND that the need for confidentiality outweighs the public interest in disclosure.

All water utilities regulated by RCA are required to complete this form. Completed forms must be submitted to RCA within 90 days of the close of the utilities authorized accounting period. (Unless special authorization has been granted by the commission, the authorized accounting period is the calendar year.)

Complete reports should be sent to: Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage AK. 99501-3469

Complete each question fully and accurately, even if it has been answered in a previous annual report. Schedules or questions which are not applicable should be marked NA rather than left blank.

Do not substitute pages or schedules from other reports for those included in this report. Do not make references to reports of previous years or to other reports in lieu of required entries.

Wherever schedules call for comparisons of figures of a previous year, the figures reported must be based upon those shown by the annual report of the previous year, or an appropriated explanation as to why different figures were used must be given.

Indicate negative amounts (such as decreases) by enclosing the figures in parentheses ( ).

All entries must distinguish between utility related and non-utility related operations if applicable.

The schedule entitled "Attestation" must be signed before submission of the report.

If available, audited financial statements, including notes and the auditor's opinion should be submitted with this report.

The amount shown on all supporting schedules shall agree with the item in the statements that they support.

Prepare this report in conformity with the appropriate Uniform System of Accounts prescribed by the National Association of Regulatory Utility Commissioners.

DocuSign Envelope ID: 5402DB97-EB4E-4AFD-804E-C78F50875477

REQUIRED GENERAL INFORMATION

1. Please include an organizational chart of the utility's operations. Indicate names of key personnel. The information can be separately submitted or complete an Organization Chart on Page 1.

2. Complete the Summary of Officer's/Owners Compensation, Page 2. This information is essential to aid the commission in evaluating the reasonableness of regulated expenses.

3. Complete the General Information Update Form, Page 3.

4. This report must be attested to by an officer of the company. Be sure that the Attestation on Page 4 is completed.

5. Attach a schedule showing major capital expenditures anticipated in the next year and estimated cost.

6. What portion of Construction-Work-In-Progress does the utility anticipate putting into service during the next year? $ 50,000.0

7. Did the utility pay, during the reporting year, or is the utility paying a management fee, lease fee or other fee to an affiliated interest (Individual or Corporate)? If so, attach a brief description including dollar amount.

Yes	☐	
No	☒	x

8. Is the financial data included in this report based on audited information? If so, include the auditor's opinion.

Yes	☐	
No	☒	x

9. If your utility is a participant in the Power Cost Equalization Program (PCE), it is necessary for your electric utility to complete the RCA Electric Utility PCE Form on Page 5.

Municipality of Anchorage DBA Anchorage	[X] An Original [ ] A Resubmission	March 31, 2023	12/31/2022

PART IV: STATEMENT OF INCOME FOR THE YEAR

1. Report amounts for all accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in the Other Utility column (h l, or jk) in a similar manner to a utility department. Spread the amount(s) over lines 1 to 22 as appropriate. Include these amounts in column (b) and (c) totals.

2. Report amounts for account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413.

3. Provide an explanation in the Notes to Financial Statements of such unsettled rate proceedings where a contingency exits that refunds of a material amount may need to be made to the utility's customers or which may result in a material refund to the utility with respect to power or gas purchases. State for each year affected the gross revenues or costs to which the contingency relates and the tax effects: include an explanation for the major factors which affect the rights of the utility to retain such revenues or to recover amounts paid with respect to power or gas purchases.

4. Provide an explanation in the Notes to Financial Statements of significant amounts of any refunds made or received during the year resulting from any rate proceedings affecting revenues received or costs incurred for power or gas purchases and a summary of the adjustments made to the financial statements.

5. If any notes appearing in the report to stockholders are applicable to the statement of income, include such notes.

6. Provide and explanation in the Notes to the Financial Statements of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and appropriations from those used in the preceding year. Also, give an approximate dollar effect of such changes.

Municipality of Anchorage DBA Anchorage Hydropower	x An Original A Resubmission	3/31/2023	12/31/2022

PART V: STATEMENT OF RETAINED EARNINGS

1. Report on this part all changes in appropriated and unappropriated retained earnings for the year.
2. Identify each credit and debit made during the year by identifying the retained account in which the credit and debit is recorded (accounts 433, 436-439 inclusive). Also, identify the contra primary account affected. First list account 439, Adjustments to Retained Earnings, reflecting adjustments to the opening balance of retained earnings. Follow the adjustments by credit then debit items, in that order.
3. Report dividends for each class and series of capital stock. Show amounts of dividends per share.
4. Report separately in column (a) the state and federal income tax effect of items shown in account 439, Adjustments to Retained Earnings.
5. Explain in a footnote, the basis for determining the amount reserved or appropriated. If such reservation or appropriation is to be recurrent, state the number and annual amounts to be reserved or appropriated as well as the totals eventually to be accumulated.
6. If any notes appearing in the report to stockholders are applicable to this statement, either include such notes in an attachment ore enter such data in the Notes to the Financial Statements on page 12.
7. Enter on line 20 the total amount set aside through appropriations of retained earnings as of the end of the year, in compliance with the provisions of federally granted hydroelectric project licenses held by the respondent. If any reductions or charges other than the normal annual credits hereto have been made during the year, explain such items in a footnote.

Municipality of Anchorage DBA Anchorage Hydropower	x An Original / A Resubmission	3/31/2023	12/31/2022

PART VI: STATEMENT OF CASH FLOWS

1. If the notes to the cash flow statement in the respondents annual stockholders report are applicable to this statement, such notes should be attached to the Notes to the Financial Statements. Information about noncash investing and financing activities should be provided in the Notes to the Financial Statements. Also provide a reconciliation between "cash and cash equivalents at end of year" with related amounts on the balance sheet.

2. Under "Other" Specify significant amounts and group others.

3. Operating activities - Other: Include gains and losses pertaining to operating activities only. Gains and losses pertaining to investing and financing activities should be reported in those activities. Show the amounts of interest paid (Net of the amount capitalized) on the Notes to the Financial Statements. Also show income tax paid.

4. Investing Activities: Include at Other (line 31) net cash outflow to acquire other companies. Provide a reconciliation of assets acquired with liabilities assumed on the Notes to the Financial Statements.

Do not include on this statement the dollar amount of leases capitalized per USofA General Instruction 20; instead provide a reconciliation of the dollar amount of leases capitalized with the plant cost on the Notes to the Financial Statements.

5. Codes used:
(a) Net proceeds or payments.
(b) Bonds, debentures and other long-term debt.
(c) Include commercial paper.
(d) Identify separately such items as investments, fixed assets intangibles, etc.

6. Enter clarifications and explanations on the Notes to the Financial Statements.

Line No.	Description *(See Instructions for Explanation of Codes)* (a)	Amount

NOTES TO THE FINANCIAL STATEMENTS

1. Use the space below for important notes regarding the Balance Sheet, Income Statement, Statement of Retained Earnings, and Statement of Cash Flows, or any account thereof. Classify the notes according to each basic statement, providing a subheading for each statement except where a note is applicable to more than one statement.

2. Furnish particulars (details) as to any significant contingent assets or liabilities existing at the end of the year, including a brief explanation of any action initiate by the Internal Revenue Service involving possible assessment of additional income taxes or a material amount, or of a claim for refund of income taxes of a material amount initiated by the utility. Give also a brief explanation of any dividends in arrears on cumulative preferred stock.

3. For Account 116, Utility Plant Adjustments, explain the origin of such amount, debits and credits during the year, and plan of disposition contemplated, giving reference to Commission orders or other authorizations respecting classification of amounts as plant adjustments and required as to disposition thereof.

4. Where Account 189, Unamortized Loss on Reacquired Debt, and 257, Unamortized Gain on Reacquired Debt, are not used, give an explanation, providing the rate treatment given these items. See General Instruction 17 of the Uniform System of Accounts.

5. Give a concise explanation of any retained earnings restrictions and state the amount of retained earnings affected by such restrictions.

6. If the notes to financial statements relating to the respondent company appearing in the annual report to the stockholders are applicable and furnish the data required by instructions above and on pages 6-11, such notes may be attached hereto.

Balance Sheet
Included in Account 130 Cash and Working Funds are $3,000,000 in cash and investments set aside for an operating reserve.
Included in Account 143 Other Accounts Receivable in $99,406,418 in a long-term recievable from Chugach Electric Association for payments pursuant to the Eklutna Power Purchase Agreement between Chugach Electric Association, Inc. and the Municipality of Anchorage, as amended and modified by Order No. 44 in U-18-102. (PPA)
The other $32,820.00 in other accounts recievable are related to revenues received in the normal course of business.

Included in Account 253 Other Deferred Credits is $99,406,418 in deffered revenues pursuant to the PPA.

Income Statement
Included in Account 241 Miscllaneous Non-operating Income is $2,514,561 in contractural revenues received from Chugach
Also included in this account are $9.00 in MEA Capital Credits.

PART VIII: ALLOWANCES (Accounts 158.1 and 158.2)

1. Report below the particular (details) called for concerning allowances.
2. Report all acquisitions of allowances at cost.
3. Report allowances in accordance with a weighted average cost allocation method and other accounting as prescribed by General instruction No. 21 in the Uniform System of Accounts.
4. Report the allowances transactions by the period they are first eligible for use: the current year's allowances in columns (b)-(c), allowances for the three succeeding years in columns (d)-(i), starting with the following year, and allowances for the remaining succeeding years in columns (j)-(k).
5. Report on line 4 the Environmental Protection Agency (EPA) issued allowances. Report withheld portions on line 36-40.
6. Report on line 5 allowances returned by the EPA. Report on line 39 the EPA's sales of the withheld allowances. Report on lines 43-46 the net sales proceeds and gains/losses resulting from the EPA's sale or auction of the withheld allowances.
7. Report on lines 8-14 the names of vendors/transferors of allowances acquired and identify assoc. companies (See "assoc. company" under "Definitions" in the Uniform System of Acts.)
8. Report on lines 22-27 the names of purchasers/transferees of allowances disposed of and identify associated companies.
9. Report the net costs and benefits of hedging transaction on a separate line under purchases/transfers and sales/ transfers.
10. Report on lines 32-35 & 43-46 the net sales proceeds and gains or losses from allowance sales.

Notice of Utility Application

The REGULATORY COMMISSION OF ALASKA (Commission) gives notice that on July 30, 2025, the Municipality of Anchorage (MOA) d/b/a Anchorage Hydropower (AHP) filed an application seeking to lift the requirement imposed by Orders No. U-18-102(44)/U-19-020(39)/U-19-021(39) that the MOA surrender its voting rights on the Eklutna Operating Committee.

The Commission has not assessed the completeness of the application. AHP has not requested a waiver of any filing requirements and has not requested confidential treatment of any information. The Commission will determine whether the application is complete by [DATE].

You may obtain information about this filing by contacting Dean Thompson, Attorney for AHP, at 255 East Fireweed Lane, Suite 200, Anchorage, AK 99503; phone: (907) 277-1604. The complete filing is also available for inspection at the Commission's office at 701 West 8th Avenue, Suite 300, Anchorage, AK 99501; phone: (907) 276-6222, or may be viewed at the Commission's website at http://rca.alaska.gov by typing Docket No. "U-25-XXX" in the Find a Matter search box.

To comment on this filing, please file your comments by 5:00 p.m. on [DATE] at the Commission address given above or via our website at:

https://rca.alaska.gov/RCAWeb/WhatsNew/PublicNoticesComments.aspx

Please reference Docket No. U-25-XXX and include a statement that you have filed a copy of the comments with AHP at its address above.

Individuals or groups of people with disabilities, who require special accommodations, auxiliary aids or service, or alternative communication formats, please contact Michelle Morris at (907) 276-6222, toll-free at 1-800-390-2782, or TTY/Alaska Relay: 7-1-1 or 1-800-770-8937, or send a request via electronic mail to rca.mail@alaska.gov by [DATE].

DATED at Anchorage, Alaska, this ___ day of [Month], 2025.

NOTICE OF UTILITY REQUEST

The REGULATORY COMMISSION OF ALASKA (Commission) gives notice that on July 30, 2025, the Municipality of Anchorage (MOA) d/b/a Anchorage Hydropower (AHP) filed a request that the Commission lift the condition on AHP's Certificate of Public Convenience and Necessity (Certificate) No. 780 requiring the MOA to surrender its voting rights on the Eklutna Operating Committee (EOC). AHP also filed an alternative application to amend Certificate No. 780 in order for the Commission to lift the surrender requirement. Docket U-25-025 was opened to address this matter.

AHP, Chugach Electric Association, Inc., and Matanuska Electric Association, Inc. own the Eklutna Hydroelectric Project and operate it through the EOC. AHP is authorized under Certificate No. 780 to provide wholesale public electric utility service through its ownership share of the Eklutna Hydroelectric Project but currently does not have voting rights on the EOC.

No motion for waiver or petition for confidential treatment were filed with AHP's request or application. The Commission has not assessed the completeness of the application. The Commission may determine whether the application is complete by August 20, 2025.

You may obtain information about this request by contacting Dean Thompson, Attorney for AHP, at 255 East Fireweed Lane, Suite 200, Anchorage, AK 99503; phone: (907) 277-1604. The complete filing is also available for inspection at the Commission's office at 701 West 8th Avenue, Suite 300, Anchorage, AK, 99501; Phone: (907) 276-6222, or may be viewed at the Commission's website, http://rca.alaska.gov/ by typing Docket No. "U-25-025" in the *Find a Matter* search box.

To comment on this filing, please file your comments by 5:00 p.m., August 27, 2025, at the Commission's address above or via our website at:

https://rca.alaska.gov/RCAWeb/WhatsNew/PublicNoticesComments.aspx

Please reference Docket No. U-25-025 and include a statement that you have filed a copy of the comments with AHP at the address given above. In the Matter of the Application Filed by Municipality of Anchorage d/b/a Anchorage Hydropower to Amend Its Certificate of Public Convenience and Necessity No. 780	)))))	U-25-025

OFFICE OF THE ATTORNEY GENERAL'S MOTION TO DISMISS

I. Introduction

The Municipality of Anchorage (MOA) d/b/a Anchorage Hydro Power (AHP) requests the Regulatory Commission of Alaska (Commission) lift the condition on AHP's Certificate of Public Convenience and Necessity No. 780 requiring the MOA to surrender its voting rights on the Eklutna Operating Committee ("EOC") for a minimum term. The Office of the Attorney General, Regulatory Affairs & Public Advocacy Section (RAPA) moves to dismiss this matter because the filing by the MOA/AHP is premature.

II. Relevant Background

On May 28, 2020, Order 39[1] approved Chugach Electric Association's acquisition of most of the assets and service obligations of the Municipality of

[1] Order U-18-102(44)/U-19-020(39)/U-19-021(39).

Attorney General

Anchorage d/b/a Municipal Light & Power Department.[2] The Commission made the approval of the acquisition subject to several conditions including that the Municipality surrender its voting rights on the EOC.[3] The Municipality surrendered its EOC voting rights on October 27, 2020.[4]

Three-and-one-half-years later, the Assembly moved the Commission to reopen dockets and to modify Order 39 to allow the Municipality to exercise its vote "specifically on the proposed final Fish and Wildlife Program[.]"[5] The Commission denied the Assembly's motion.[6]

On July 18, 2024, the MOA filed a Notice and Request for Acknowledgement of AHP's acquisition of expertise required to participate as a voting member of the EOC.[7] At the prehearing conference in Docket U-24-024, the administrative law judge raised the issue of a minimum term of the EOC voting rights surrender required by Order 39 and requested briefing by the parties.[8] After briefing, RAPA moved to dismiss the

MOA's Notice and Request for Acknowledgment.[9] The MOA/AHP raised various arguments in its opposition to dismissal. The Commission granted RAPA's motion on the grounds that the MOA's Notice and Request was premature under the terms of Order 39.[10]

In Order U-24-024(8) the Commission reiterated: "In Order U-18-102(44) we established a minimum term for ML&P's surrender of its EOC voting rights as a condition of AHP's certification as a public utility and as a condition of our approval of the Eklutna PPA and the MEA PPA."[11] Further, the Commission observed: "In its briefing on this issue, AHP acknowledged that if Order U-18-102(44) mandated a minimum term of EOC voting rights surrender it would not have EOC voting rights until both the Eklutna PPA and the MEA PPA elapsed."[12]

In Docket U-24-024, the MOA/AHP raised many arguments against a minimum time period for the surrender of voting rights. The Commission addressed and rejected each point raised by MOA/AHP. The Commission returned to the financing-cashflow purpose of the PPAs shown in Dockets U18-102/U-19-020/U-19-021.[13] For example, "Based on the record from Dockets U-18-102/U-19-020/U-19-021, ML&P was

retaining the Eklutna Project Power Plant only for the purpose of preserving a cash flow in the event Chugach defaulted on its payments under the Eklutna PPA."[14]

The Commission concluded that "AHP's voting rights on the EOC are surrendered for at least the term of the Eklutna PPC and the MEA PPA"[15] and granted RAPA's motion to dismiss on the grounds that AHP's request was premature under the terms of Order U-18-102(44).[16]

AHP appealed the Commission's decision. AHP's appeal points assert that "Failing to address AHP's other arguments when deciding that Order 39 did not allow for the surrender of AHP's voting rights on the EOC to be lifted prior to the end of the "minimum term" of the surrender, even upon a showing of acquisition of the expertise required to fully participate as a voting member of the EOC." [17]

In July of this year, the MOA/AHP filed a request to lift the condition requiring the surrender of voting rights from its CPCN 780 or to amend its CPCN. RAPA moves to dismiss this latest request as premature.

III. Argument

The thrust of the MOA/AHP's request is that when the Commission grants a CPCN with conditions, the Commission may modify the CPCN if the basis for the

condition is no longer a concern.[18] In the alternative, the MOA/AHP seeks to modify its CPCN. But both requests are premature. The MOA/AHP has not shown that the Eklutna PPA and the MEA PPA have expired, are about to expire, or that the current filing is close to the time the PPA will expire.

AS 42.05.241 governs the issuance of a CPCN and provides in part: "The commission may issue a certificate granting an application in whole or in part and attach to the grant of it the terms and conditions it considered necessary to protect and promote the public interest…." In Order U-18-102(44)/U-19-020(39)/U-19-021(39), the Commission stated several conditions including that "before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project…."[19] And, the term of the MOA's voting rights surrender must be at least equal to the terms of the Eklutna PPA and the MEA PPA.[20]

Subsequently in Order U-24-024(8), discussed above, the Commission confirmed that the MOA's voting rights surrender had a minimum time period tied to the terms of

Attorney General

[18] MOA/AHP Request to Lift Condition at 7.

[19] Order U-18-102(44)/U-19-020(39)/U-19-021(39) at 67. The Commission further required the acquisition close before issuing AHP a CPCN. *Id.*

[20] Order U-18-102(44)/U-19-020(39)/U-19-021(39) at 67.

the Eklutna PPA and the MEA PPA.[21] In that Order, the Commission also provided guidance for a future AHP filing and stated:

> In addition to addressing the minimum term of EOC voting rights surrender issue, we suggest that in future filings seeking reinstatement of EOC voting rights AHP provide the information to show that it can bring to EOC meetings a depth and breadth of technical and managerial expertise at least comparable to the level of expertise that MEA and Chugach bring to those meetings.[22]

That future guidance in the Order does not eviscerate the minimum time period for the surrender of voting rights required in Order 39 and confirmed in Order U-24-024(8). Instead, it explains what should be filed when a future filing is appropriate. That point is clarified where the Commission discussed the dismissal of the MOA's Notice and Request for Acknowledgement: "This dismissal is without prejudice to **refiling closer to the time that Eklutna PPA and the MEA PPA will expire**."[23] And as the Commission noted in Docket U-24-024: "At this time, no entity, including ourselves, can predict when the terms of the Eklutna PPA and the MEA PPA will expire."

Order U-24-024(8) shows that there is a minimum time period for the surrender of voting rights and when the MOA makes a future filing (that should include all the

information noted by the Commission), that filing should be made close to the time the PPAs expire.

MOA/AHP has not shown that its current filing is close to the time when the two PPAs will expire. Therefore, the MOA/AHP's current filing is premature and should be dismissed.

IV. Conclusion

Order U-24-024(8) confirmed that the MOA's surrender of voting rights is subject to a minimum time period consistent with the terms of the Eklutna PPA and the MEA PPA and clarified that any future refiling about voting rights should be closer to the time that Eklutna PPA and the MEA PPA will expire. Because the MOA/AHP has not shown that the Eklutna PPA and the MEA PPA have expired, are about to expire, or that the current filing is close to the time the PPA will expire, the filing is premature, and this matter should be dismissed.

BEFORE THE REGULATORY COMMISSION OF ALASKA

Before Commissioners:	John M. Espindola, Chairman Steven D. DeVries Mark A. Johnston Robert M. Pickett John C. Springsteen
In the Matter of the Application Filed by Municipality of Anchorage d/b/a Anchorage Hydropower to Amend Its Certificate of Public Convenience and Necessity No. 780	U-25-025

CHUGACH ELECTRIC ASSOCIATION, INC. AND MATANUSKA ELECTRIC ASSOCIATION, INC.'S JOINDER IN MOTION TO DISMISS

Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc. ("MEA") hereby join in the Office of Attorney General, Regulatory Affairs & Public Advocacy Section ("RAPA") Motion to Dismiss in the above captioned proceeding. The Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP") has requested that the Regulatory Commission of Alaska ("Commission") lift the condition on AHP's Certificate of Public Convenience and Necessity ("CPCN") No. 780 requiring the surrender of its voting rights on the Eklutna Operating Committee ("EOC") for a certain minimum term length. The Commission has now considered and decided on this matter twice; acknowledging the Commission's orders, Chugach and MEA agree with RAPA that AHP's request is premature, and this matter should be dismissed.

If the Commission proceeds with further consideration of AHP's request, Chugach and MEA also want to alert the Commission that the voting rights that AHP has requested – reinstatement of those rights that existed prior to Chugach's acquisition of the former Municipal Light & Power Department ("ML&P") – would result in AHP regaining majority voting rights on the EOC, despite AHP's much narrower involvement and economic stake in the Eklutna Project than that of ML&P. Given the current power

WILSON SONSINI GOODRICH & ROSATI, P.C.

PHONE 206.883.2500

purchase arrangements among the owners of the Eklutna Project and the utility expertise with the MOA and AHP, Chugach and MEA cannot support the untenable reinstatement of the MOA's majority voting rights.

I. Relevant Background

In 1995, Congress authorized the sale of the Eklutna Hydroelectric Project ("Eklutna Project") from the federal government to Chugach, MEA and ML&P.[1] At the time of purchase, ownership shares between the three owners were: 53.3% for MOA (d/b/a ML&P), 30% for Chugach, and 16.7% for MEA.[2] In 1996, in connection with the acquisition, the three owners also agreed to a "Manner of Acting, Functional Responsibilities, and Staffing" governing the management of the Eklutna Project through the EOC (the "1996 Manner of Acting")[3]. Under this arrangement, each owner paid for Eklutna Project costs in proportion to its ownership share. Decisions of the EOC were – pursuant to the 1996 Manner of Acting – required to be by double majority, or a vote of two of the three owners whose shares totaled at least 51% of the Eklutna Project shares.[4] As the owner of more than 51% of the shares, this meant that no decision of the EOC could be made without approval by ML&P.

This structure remained in place for over twenty years after the initial Eklutna Project purchase. Then, as overviewed by RAPA in its Motion to Dismiss,[5] in 2020, the Commission approved a transaction pursuant to which Chugach acquired the majority of

ML&P's assets and service obligations.[6] While this transaction excluded the purchase of MOA's ownership shares in the Eklutna Project, it did include a significant shift in the MOA's relationship with the Eklutna Project. Rather than taking and delivery power from the project to a service area of ratepayers in proportion to its ownership shares, the MOA signed two 35-year Power Purchase Agreements, one with Chugach (the "Eklutna PPA") and one with MEA (the "MEA PPA").[7] Taken together, the post-transaction arrangement is broadly as follows: (1) the MOA sells its entire 53.3% share of Eklutna Project generation output at wholesale to Chugach and MEA; (2) Chugach assumes the costs attributable to the portion of the Eklutna Project it buys from the MOA, leaving the MOA only responsible for 19.05% percent of Eklutna Project costs[8], and (3) the MOA significantly downsized its operational responsibility and Project risk exposure, passing on most of its former responsibilities and risks related to Eklutna Project operation to Chugach pursuant to the Eklutna PPA.[9] ML&P then ceased to exist, and for the limited purpose of continuing to own a portion of the Eklutna Project and to provide wholesale public electric service to Chugach and MEA under the Eklutna PPA and the MEA PPA (the "PPAs"), the MOA created AHP.[10]

As a condition to approving the overall transaction, and approving AHP's newly requested CPCN, the Commission required that the MOA surrender its voting rights on the

EOC for a minimum term length to match the term lengths of the PPAs.[11] The MOA agreed to this condition and surrendered its voting rights on October 27, 2020.[12]

As further reviewed by RAPA in its Motion to Dismiss[13], the MOA sought to regain its EOC voting rights last year in Docket U-24-024.[14] In that proceeding, after the conclusion of briefing specifically requested by the Commission on the minimum term of the EOC voting rights surrender, RAPA moved to dismiss on alternative grounds.[15] Chugach and MEA joined the motion to dismiss specifically on the surrender term issue:

> The briefing ordered by the Commission in Order U-24-024 with respect to the surrender issue will be complete on October 29 and will be ripe for decision. If the Commission finds that the surrender term required in Order 39 has a minimum term of 35 years before the Municipality's voting rights may be regained, there is no reason to continue the process (including holding a hearing) in this docket."[16]

In its Order U-24-024(8), the Commission granted RAPA's motion to dismiss on the basis that the request was premature given the minimum surrender term length requirement and the fact that the PPAs are still mid-term.[17]

AHP has now filed a request to lift the condition to AHP's CPCN regarding the surrender of voting rights, or to amend AHP's CPCN, based upon an argument that the basis underlying the condition is no longer a concern.[18] RAPA has again moved to dismiss

Seattle, WA 98104-7036
PHONE 206.883.2500

based on its understanding of the Commission's orders on the MOA's surrender of EOC voting rights.

II. Argument

Chugach and MEA agree with RAPA that AHP's filing in this docket is premature due to the surrender term. In Order U-24-024(8), the Commission reiterated its prior decision that: (1) the MOA's surrender of voting rights on the EOC was a condition to its approval of AHP's CPCN, and (2) that such surrender was required to last as long as the minimum terms of such 35-year PPAs.[19] The PPAs are still in effect and therefore the minimum term of the surrender has not been satisfied. Chugach and MEA believe that the Commission has been clear on this point. Consequently, they again join RAPA's motion to dismiss because there is no reason to relitigate the fundamental question in this new docket.

AHP fails to provide reasonable justification for why the Commission should revisit the surrender requirement and its recent and clear prior decisions on this matter. First and foremost, the PPAs are still in effect and therefore the minimum term of the surrender has not been satisfied. Second, other circumstances have not materially changed with respect to the underlying basis for the surrender requirement. The relevant facts with respect to AHP's function, and with respect to its relationship with the Eklutna Project, remain very similar to those in existence immediately after the Chugach-ML&P transaction, and at the time of the Commission's Order No. U-24-024(8) last year: (1) AHP, unlike its predecessor in ML&P, is not operating as a ratepayer-serving utility; (2) even with the creation of two new staff roles, AHP still has minimal staff and no bench of utility expertise, and therefore has only limited "knowledge of prudent utility practice and the Railbelt electric generation and transmission system";[20] (3) AHP is responsible for only

[19] Order U-24-024(8) at 10, 21, 24 and 29.

[20] Order 39 at 66.

WILSON SONSINI GOODRICH & ROSATI, P.C.
701 Fifth Avenue, Suite 5100
Seattle, WA 98104-7036
PHONE 206.883.2500

19.05% percent of Eklutna Project costs despite its majority ownership stake; (5) AHP exists only to sell power generated by the Eklutna Project on a wholesale basis to Chugach and MEA via the two PPAs and bears significantly less responsibility, cost and risk associated with, the Eklutna Project.

Until the PPAs have otherwise expired or terminated, or the facts changed materially, there is simply no new justification for the Commission revisiting its recent prior decisions on this matter. The request from AHP in this docket is therefore premature.

III. Additional Comments in Opposition to Majority Vote Structure Reinstatement

If the Commission dismisses RAPA's motion and believes that AHP's request raises new issues and therefore necessitates further proceedings in this docket, Chugach and MEA want to be clear that AHP's request to reinstate the MOA's majority voting rights as requested in its initial filing is untenable. Chugach and MEA will fight it vigorously.

The Eklutna Project is an important part of both Chugach and MEA's generation portfolio. Under a reinstatement of the 1996 Manner of Acting majority vote framework for MOA, however, Chugach and MEA will no longer be able to determine how to operate and maintain the Eklutna Project in a manner consistent with prudent utility practice without AHP's agreement. Yet, Chugach and MEA will bear the vast majority of the costs and risks of such decisions (or lack of action). Specifically, Chugach bears **64.29%** of the costs of operations, maintenance, capital, and environmental costs of the Eklutna Project, and MEA bears **16.67%** of such costs[21] – together more than **80%** of the total costs of the Eklutna Project. Yet, under the MOA's requested result, Chugach and MEA would possess only 46.67% of the EOC voting rights and would, therefore, not be able to make any decisions individually or together with respect to the Eklutna Project without MOA agreement. The majority vote framework set forth in the 1996 Manner of Acting requiring

[21] MOA/AHP Request to Lift Condition at 3-4.

WILSON SONSINI GOODRICH & ROSATI, P.C.
701 Fifth Avenue, Suite 5100
Seattle, WA 98104-7036
PHONE 206.883.2500

majority owner approval for every decision only made sense and served the public interest when the majority owner was a large operating utility, proportional risk sharer, and majority cost contributor. This will not be the case for AHP for so long as the two PPAs are in effect.

IV. Conclusion

The Commission has clearly decided on the matter raised by AHP in this docket twice. Based on the facts before the Commission at the time of the ML&P acquisition in 2020 and again in Order U-24-024(8) last year – facts which are materially unchanged today – the Commission has held that AHP must maintain a surrender of EOC voting rights for the duration of the Eklutna PPA and MEA PPA. Those agreements are still in effect and this matter is therefore premature. To the extent that the Commission chooses to reopen this matter, Chugach and MEA oppose reinstatement of MOA's majority voting rights.

RESPECTFULLY SUBMITTED this 22nd day of August, 2025.

In the Matter of the Application Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower to Amend Its Certificate of Public Convenience and Necessity No. 780	U-25-025

CHUGACH ELECTRIC ASSOCIATION, INC. AND MATANUSKA ELECTRIC ASSOCIATION, INC.'S JOINT PETITION TO INTERVENE

Pursuant to 3 AAC 48.110, Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association Inc. ("MEA"), by and through their counsel, file this petition to intervene as parties in the above referenced proceeding.

On July 30, 2025, the Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP") filed a request that the Regulatory Commission of Alaska ("Commission") lift the condition on AHP's Certificate of Public Convenience and Necessity No. 780 ("CPCN"), requiring AHP to surrender its voting rights on the Eklutna Operating Committee ("EOC"), and also included an alternative application to amend its CPCN and acknowledge that it has acquired the expertise required to participate as a voting member of the EOC (the "MOA Request to Lift Condition"). Notably, the EOC makes management decisions for the Eklutna Hydroelectric Project (the "Eklutna Project"), jointly owned by Chugach, MEA and the MOA, including oversight of major maintenance and operations (power plant and switchyard) and dam safety and inspections, preparation of the annual project budget, reliability and scheduling occurrences, project status reports, monthly revenue reports and energy usage

WILSON SONSINI GOODRICH & ROSATI, P.C.

Seattle, WA 98104-7036
PHONE 206.883.2500

among members, and notifications related to factors that limit energy or capacity, such as reservoir levels and transmission constraints.

I. DISCUSSION

The Commission's regulations allow intervention whenever it "will be conducive to the ends of justice and will not unduly delay the conduct of the proceeding." 3 AAC 48.110(a). When considering a petition to intervene, the Commission considers seven factors. Each of those factors is discussed below.

1) The nature of the petitioner's right under statute to be made a party to the proceeding.

Chugach and MEA are not aware of a specific statutory basis for it to be made a party to this docket, but they were active parties in dockets previously before the Commission that dealt substantively with the same topic (the MOA's EOC voting rights): Dockets U-18-102/U-19-020/U-19-021 (Chugach's acquisition most of MOA's Municipal Power & Light's assets) and U-24-024 (MOA's Petition for Acknowledgement of Acquisition of Expertise Required to Participate as Voting Member in EOC). Chugach and MEA are also parties in the appeal of the Commission's U-24-024(8) in *AHP v. Regulatory Commission of Alaska*, 3AN-24-10554CI. Accordingly, Chugach and MEA have due process rights to participate in this proceeding.

2) The nature and extent of the property, financial, or other interest of the petitioner.

As the Commission has recognized in previous dockets dealing with the same matter, Chugach and MEA each have substantial property and financial interests that may be impacted by the outcome of this proceeding. As mentioned above, Chugach, MEA and the MOA jointly own the Eklutna Project. Specifically, Chugach owns a 30% in interest and MEA owns a 16.67% interest. Additionally, pursuant to long term power purchase agreements with MOA, Chugach and MEA purchase electricity from the MOA's portion of the Eklutna Project (collectively, the "Eklutna PPAs"). Pursuant to

WILSON SONSINI GOODRICH & ROSATI, P.C.
701 Fifth Avenue, Suite 5100
Seattle, WA 98104-7036
PHONE 206.883.2500

the Eklutna PPAs which re-allocate costs among the owners, Chugach is currently responsible for 64.29% of costs of Eklutna Project and MEA is responsible for 16.67%. The Commission recognized the interests and expertise of Chugach and MEA in U-24-024 and designated them as parties.[1]

3) The effect on petitioner's interest of the order which may be entered in the proceeding.

Chugach and MEA's interests in the Eklutna Project, its operations, and its costs could be significantly impacted by the Commission's decision on the merits in this docket. If the Commission restores MOA's voting rights on the EOC as requested by AHP, all EOC decisions – including decisions pertaining to the Eklutna Project budget, and decisions that ensure the Eklutna Project operates in a reliable, cost-effective manner, will require MOA approval, even though AHP is not a fully staffed operating public utility.[2] Chugach and MEA will no longer be able to determine how to operate and maintain the Eklutna Project in a manner consistent with prudent utility practice without AHP's agreement because the MOA will regain a majority voting right over all EOC

---

[1] The Eklutna Project is an integral part of the generation and transmission system providing electric public utility service to consumers in the Municipality of Anchorage and the Matanuska-Susitna Borough. Chugach and MEA are the certificated public utilities with responsibility for providing safe and reliable electric utility services to these consumers. Chugach and MEA are also part-owners of the Eklutna Project and members of the EOC who will have to work directly with AHP if we reinstate AHP's voting rights on the EOC. Additionally, we relied on the expertise of Chugach in determining that we needed to condition the Municipality's continued ownership of an interest in the Eklutna Project on surrender of its EOC voting rights.

Therefore, we designate Chugach and MEA as parties, subject to filing a notice of non-participation, and anticipate being informed by their expertise on the question of whether AHP has acquired the expertise required to fully participate as a voting member of the EOC.

U-24-024(1), at 4-5 (footnotes omitted).

[2] *See* Order No. U-24-024(8), at 2.

WILSON SONSINI GOODRICH & ROSATI, P.C.

PHONE 206.883.2500

decisions. Yet, Chugach and MEA together will bear over 80% costs associated with such decisions (or lack of action) and such decisions will be relevant to numerous of Chugach and MEA's contractual and operational obligations.

4) The availability of other means by which the petitioner's interest may be protected.

There are no other means through which Chugach and MEA can protect their interests in ensuring a qualified and well-functioning EOC. Chugach and MEA are the only other owners of the Eklutna Project and have significant financial and contractual interests relevant to this proceeding that can only be represented through participation in this proceeding.

5) The extent to which petitioner's interest will be represented by existing parties.

Other than MOA, Chugach and MEA are the only entities that are responsible for Eklutna Project costs and that have actual operational knowledge and expertise regarding the Eklutna Project's operations and maintenance. There is no other party that is currently, or could, represent this interest.

6) The extent to which petitioner's participation may reasonably be expected to assist in the development of a sound record, including the issues that petitioner intends to address in the proceeding.

Chugach and MEA currently operate the Eklutna Project in a manner consistent with prudent utility practices and are the only current voting members of the EOC at this time. They are therefore uniquely situated to assist the Commission in developing a sound record and in reaching a reasoned decision regarding MOA's request for the reinstatement of its voting rights, considering all the pertinent factors. If permitted to intervene, Chugach and MEA will address issues necessary for a full evaluation of the MOA Request to Lift Condition, including to provide expertise on the Eklutna Project and the functioning and qualifications needed to participate on the EOC.

WILSON SONSINI GOODRICH & ROSATI, P.C.
701 Fifth Avenue, Suite 5100
Seattle, WA 98104-7036
PHONE 206.883.2500

7) The extent to which participation of the petitioner will broaden the issue or delay the proceeding.

MEA and Chugach's participation in this docket will not unduly broaden or delay the proceeding. MEA and Chugach intend to address only those issues that are relevant to the Commission's evaluation of the MOA Request to Lift Condition.

II. CONCLUSION

Based on the foregoing, Chugach and MEA satisfy the factors for intervention, and their participation in this proceeding will be "conducive to the ends of justice and will not unduly delay the conduct of the proceeding."[3] Chugach and MEA respectfully request the Commission grant its petition to intervene.

RESPECTFULLY SUBMITTED this 22nd day of August, 2025.

In the Matter of the Application Filed by MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER to Amend Its Certificate of Public Convenience and Necessity No. 780	U-25-025

MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S OPPOSITION TO THE OFFICE OF THE ATTORNEY GENERAL'S MOTION TO DISMISS

The Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP") opposes the Office of the Attorney General, Regulatory Affairs & Public Advocacy Section's ("RAPA's") Motion to Dismiss ("Motion"), filed on August 8, 2025. Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc. ("MEA") filed a Joinder in Motion to Dismiss ("Joinder") on August 22, 2025. RAPA, Chugach, and MEA argue that AHP's Request to Lift Condition Requiring the Surrender of Voting Rights from Certificate of Public Convenience No. 780; and Alternative Application to Amend Certificate of Public Convenience and Necessity No. 780 ("Request/Application") is premature because the Regulatory Commission of Alaska ("Commission"), in Order No. U-24-024(8),[1] prohibited AHP from requesting the condition be lifted until the minimum surrender term is closer to expiring.[2]

[1] Order No. U-24-024(8) (Nov. 11, 2024) ("Order No. 8").

[2] *See* Motion at 7. *See also* Joinder at 5.

RAPA's Motion appears to seek dismissal in order to avoid expending resources reviewing and litigating the merits of AHP's Request/Application if the Commission will ultimately deny, without adjudicating the merits, any request to lift AHP's EOC voting rights surrender prior to the end of the terms of Chugach and MEA PPAs.[3] However, the Commission's holding in Order No. 8 does not preclude or limit AHP's ability to request a finding of good cause to modify or lift the minimum surrender term. RAPA's Motion should be denied because it is based on an incorrect interpretation of the Commission's Order No. 8.

I. BACKGROUND.

In 2019, Chugach filed a petition with the Commission seeking approval to acquire all service obligations and most assets of the MOA d/b/a Municipal Light & Power ("ML&P") (the "Acquisition").[4] As part of the same transaction, ML&P filed an application to amend its CPCN, deleting the current service territory and adding the Eklutna Hydroelectric Project plant site.[5] The Commission approved the Acquisition in Order Nos. U-18-102(44)/ U-19-020(39)/ U-19-021(39) ("Order No. 39") subject to conditions. The Commission also granted the MOA d/b/a AHP[6] a new CPCN to "provide wholesale public electric utility service through its ownership share of the Eklutna Project" subject to conditions, which included the MOA's surrender of its voting

[3] *See generally* Motion at 5-7.

[4] Petition for Approvals Needed to Acquire Anchorage Municipal Light and Power and Application to Amend Certificate of Public Convenience and Necessity No. 8 (Apr. 1, 2019).

[5] Application of the Municipality of Anchorage d/b/a Municipal Light and Power to Amend Certificate of Public Convenience and Necessity No. 121 and to Terminate Dividend Restriction (Apr. 5, 2019).

[6] In Order No. 39, the Commission referred to the post-transaction electric utility owned by the MOA as Municipal Hydro Power ("MHP") and not AHP.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS

rights on the EOC.[7] The Commission stated that the surrender "must have a term at least equal to the term of the Eklutna [Power Purchase Agreement ("PPA")] and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to [the Commission's] satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC."[8] On October 30, 2020, the MOA filed notice with the Commission of its October 27, 2020, Surrender of Eklutna Operating Committee Voting Rights.[9]

On July 18, 2024, AHP filed a Notice and Request for Acknowledgment of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee ("Request for Acknowledgment"). At the prehearing conference held on August 30, 2024, the Administrative Law Judge requested briefing "on the minimum term of the EOC voting rights surrender required by [Order No. 39]."[10] AHP, Chugach and MEA, and RAPA filed briefs.[11] The Commission found that AHP's Request for Acknowledgement was premature and "AHP's voting rights on the EOC are surrendered for at least the term of the Eklutna PPA and the MEA PPA."[12] The Commission also declined to consider AHP's alternative request to "construe [AHP's] Notice and Request to be an application to amend

[7] Order No. 39 at 67, 147.

its certificate conditions if we find that the minimum term of EOC voting rights surrender . . . is enforceable."[13]

The Commission explained that it was declining to entertain the request to amend the certificate conditions, not because the minimum term had not yet expired, but because "there is too little time for us and the parties to address amendment of AHP's certificate in this docket," noting that there were then approximately 60 days remaining to issue a final decision and the Commission usually takes 180 days to adjudicate requests to amend certificates. The Commission then "provided AHP with guidance on future filings seeking relief from the minimum term of EOC voting rights surrender."[14] The Commission summarized its decision in Order 39: "We required ML&P to surrender its EOC voting rights because it had no person qualified to sit in EOC meetings and understand the discussion, and because ML&P was proposing no definitive support team for their EOC representative."[15] The Commission then concluded:

> We denied AHP's motion for expedited consideration of its Notice and Request because AHP had failed to adequately support its request or reinstatement of its EOC voting rights. Upon initial review of AHP's filings in this docket we could see no way of moving forward without taking the time for prefiled testimony, discovery, holding a hearing to gather the information necessary to determine if AHP had acquired the expertise required to fully participate as a voting member of the EOC. We believe that efficient resolution of future filings on this issue by AHP will be more likely if AHP provides adequate information in its initial filing.[16]

II. DISCUSSION.

A. RAPA's Motion is based on an incorrect interpretation of Order No. 8.

RAPA claims Order No. 8 "shows that there is a minimum time period for the surrender of voting rights and when the MOA makes a future filing . . . that filing should be made close to the time the PPAs expire."[17] To support its claim, RAPA relies solely on a ***single sentence*** in Order No. 8, where the Commission dismissed AHP's Notice and Request for Acknowledgement "without prejudice to refiling closer to the time that Eklutna PPA and the MEA PPA will expire."[18]

First, this sentence referred only to AHP's filing of a notice and request for acknowledgment that it had satisfied the applicable requirements, not a request to lift a condition or an application to amend AHP's CPCN.[19] Here, AHP has filed such a request and application. Order No. 8 expressly contemplated that an application to amend AHP's CPCN to remove the minimum term would be appropriate at any time during the minimum term provided that such application includes the necessary information regarding AHP's ability to participate on the EOC.[20]

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

[17] Motion at 6-7.

[18] *Id.* at 6 (quoting Order No. 8 at 29).

[19] *See* Order No. 8 at 31 ("[W]e have not construed AHP's Notice and Request to be an application to amend its certificate or otherwise granted AHP the relief it has requested in this proceeding.").

[20] *See id.* (declining to consider AHP's alternative application to amend the CPCN to remove the minimum term requirement, not because the term was not yet over, but because "there [wa]s too little time" left in that docket to complete a 180-day CPCN amendment process).

Second, the Commission "provide[d] AHP with guidance on future filings ***seeking relief from the minimum term of EOC voting rights surrender***."[21] If Order No. 8 forever precludes AHP from seeking "relief from the minimum term" until ***after*** the minimum term has ended (or shortly before), as RAPA, Chugach, and MEA suggest, the Commission's guidance would be gratuitous and superfluous. There is no reasonable reading of Order No. 8 that requires AHP to wait to seek "relief from the minimum term" until after the minimum term has expired.

Third, even if the Commission in Order No. 8 had decided that the "surrender was required to last as long as the minimum terms of such 35-year PPAs,"[22] and that no request to revise that condition could be entertained until the end of those terms, regardless of the merits of doing so, this Commission can modify the minimum term for good cause shown.[23] Granting RAPA's Motion would deny AHP the procedural opportunity to show good cause to modify or lift the minimum surrender term, before even assessing whether such good cause exists. It would also incorrectly imply that a present Commission is bound by prior Commissions' rulings, even if the present Commission finds good cause to modify or deviate from the prior ruling.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

[21] *Id.* (emphasis added). *See also id.* at 34 ("In addition to addressing the minimum term of EOC voting rights surrender issue, we suggest that in future filings seeking reinstatement of EOC voting rights AHP provide the information to show that it can bring to EOC meetings a depth and breadth of technical and managerial experience at least comparable to the level of expertise that MEA and Chugach bring to those meetings.").

[22] Joinder at 5.

[23] *See* AS 45.05.241 and AS 42.05.271(1).

B. Chugach and MEA's Joinder addresses the merits of AHP's Request/Application, not whether Order No. 8 precludes Commission consideration of such a Request/Application.

Chugach and MEA argue that "[u]ntil the PPAs have otherwise expired or terminated, or the facts changed materially, there is simply no new justification for the Commission revising its recent prior decision on this matter."[24] However, whether facts changed materially goes to the merits of AHP's Application/Request, not whether Order No. 8 precludes AHP from filing its Application/Request in the first place. Chugach and MEA also ignore the Commission's ability to modify or vacate the minimum surrender term. For these reasons, the Commission is justified in revisiting its prior decisions relating to AHP's voting rights on the EOC. To the extent Chugach and MEA included additional comments about AHP's Application/Request, AHP again notes that these comments go to the merits of AHP's Application/Request and are not pertinent to RAPA's Motion.

Chugach and MEA appear to primarily complain that, in their view, the contracts "allocating" voting rights on the EOC would give AHP too much voting power if AHP regains its vote.[25] Chugach and MEA apparently would prefer that they have more voting power and that AHP have less voting power, or none at all, despite AHP having to pay significant project costs that it currently has no voting ability to affect.[26] Chugach and MEA's preference to have unearned

[24] Joinder at 6.

[25] *Id.* at 6-7.

[26] *Id.* at 6 (admitting that the cost allocation provisions of the existing PPAs assign AHP with the responsibility to pay over 19% of all project costs).

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS

(907) 277-1604

sole control of property that they do not solely own is not a proper basis on which to object to AHP even having an opportunity to show good cause to restore its vote on the EOC.

In negotiating the ML&P acquisition, Chugach deliberately chose to ***not*** purchase ML&P's ownership share of, or corresponding voting interest in, the Eklutna Hydroelectric Project.[27] Neither Chugach nor MEA can now reasonably expect this Commission to unilaterally (and without compensation to AHP) alter the private bargain they knowingly struck. The voting rules governing the EOC are set by contract among Chugach, MEA, and AHP. AHP is open to a reasonable negotiated solution that could revise the terms of those voting rules by mutual agreement of the parties, and AHP would welcome serious engagement by the other parties in reaching such an agreement if they have a good faith desire to do so. But, until such a negotiated agreement is reached, AHP is entitled under the existing contracts to its full voting share if the restriction the Commission imposed is lifted.

Ultimately, however, Chugach and MEA's preference to have more voting power on the EOC than they are currently contractually entitled to is irrelevant to the question posed in RAPA's Motion. That motion addresses only whether the Commission in Order No. 8 purported to require AHP to wait until ***after the end*** of the minimum term to even "seek[] relief from the minimum term."[28] Because the answer to that question is, and must be, no, the Motion should be denied, and this docket should swiftly proceed to the merits of AHP's Request/Application.

STATE OF ALASKA

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners: John M. Espindola, Chairman
Steven D. DeVries
Mark A. Johnston
Robert M. Pickett
John C. Springsteen

In the Matter of the Application Filed by Municipality of Anchorage d/b/a Anchorage Hydropower to Amend Its Certificate of Public Convenience and Necessity No. 780	)))))	U-25-025

OFFICE OF THE ATTORNEY GENERAL'S REPLY TO OPPOSITION TO MOTION TO DISMISS

The Office of the Attorney General, Regulatory Affairs & Public Advocacy Section (RAPA) replies to the Municipality of Anchorage d/b/a Anchorage Hydropower's (MOA/AHP) opposition to RAPA's motion to dismiss.

In Order U-18-102(44)/U-19-020(39)/U-19-021(39) (Order 39), the Regulatory Commission of Alaska (Commission) required a minimum term for the voting rights surrender by MOA/AHP. Order U-24-024(8) (Order 8) interpreted Order 39 and confirmed the minimum term for the voting rights surrender: "In its briefing, AHP has not shown good cause for modifying or interpreting this certificate condition in a manner that nullifies the minimum term of EOC voting rights surrender specified in Order U-18-102(44)."[1]

[1] Order U-24-024(8) at 28.

Attorney General
Regulatory Affairs & Public Advocacy

Anchorage, Alaska 99501
(907) 334-2394, (907) 269-5100, (907) 276-3697 Fax

RAPA's motion to dismiss is simple. Order 39 contained a minimum term for the EOC voting rights surrender. Order 8 interpreted Order 39 and confirmed the voting rights surrender minimum term. The minimum voting rights surrender term in Order 39 has not been nullified. The Commission, MOA/AHP, RAPA, and any intervenors should not have to expend scarce resources (that are ultimately funded by ratepayers) if the minimum term has not expired or is not about to expire.

RAPA's motion to dismiss should be granted.

DATED August 28, 2025, at Anchorage, Alaska.

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners: John M. Espindola, Chair
Steve DeVries
Mark Johnston
Robert M. Pickett
John C. Springsteen

In the Matter of the Request Filed by the MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER to Lift a Condition from Certificate of Public Convenience and Necessity No. 780 and Alternate Application to Amend Certificate of Public Convenience and Necessity No. 780	U-25-025 ORDER NO. 1

ORDER GRANTING JOINT PETITION TO INTERVENE, ADDRESSING TIMELINE FOR DECISION, DESIGNATING COMMISSION PANEL, AND APPOINTING ADMINISTRATIVE LAW JUDGE

BY THE COMMISSION:

Summary

We grant the joint petition to intervene filed by Chugach Electric Association, Inc. (Chugach) and Matanuska Electric Association, Inc. (MEA). We address a timeline for a final decision. The chair designates a Commission Panel and a Commission Docket Manager and appoints an administrative law judge.

Background

On July 30, 2025, the Municipality of Anchorage d/b/a Anchorage Hydropower (AHP) filed a request to lift a condition requiring the surrender of its voting rights on the Eklutna Operating Committee (EOC) from Certificate of Public Convenience and Necessity (certificate) No. 780. In the alternative, AHP requests to amend Certificate

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501

No. 780 to lift the condition requiring surrender of its voting rights on the EOC.[1] On August 20, 2025, AHP supplemented its Application.[2]

On August 6, 2025, we issued public notice of the Application with comments due by August 27, 2025. No comments were filed.

On August 8, 2025, the Office of the Attorney General, Regulatory Affairs and Public Advocacy Section (RAPA) filed a notice of election to participate in this proceeding and a motion to dismiss.[3] On August 22, 2025, Chugach and MEA filed a joint petition to intervene.[4] Chugach and MEA filed a joinder in the Motion to Dismiss.[5] AHP filed an opposition to the Motion to Dismiss.[6] RAPA filed a reply to the Opposition to Motion to Dismiss.[7]

[1] *Municipality of Anchorage d/b/a Anchorage Hydropower's Request to Lift Condition Requiring the Surrender of Voting Rights from Certificate of Public Convenience and Necessity No. 780; and Alternative Application to Amend Certificate of Public Convenience and Necessity No. 780*, filed July 30, 2025 (Application).

[2] Correspondence from D. Thompson, filed August 20, 2025.

[3] *Notice of Election to Participate*, filed August 8, 2025; *Office of the Attorney General's Motion to Dismiss*, filed August 8, 2025 (Motion to Dismiss).

[4] *Chugach Electric Association, Inc. and Matanuska Electric Association, Inc.'s Joint Petition to Intervene*, filed August 22, 2025 (Joint Petition to Intervene).

[5] *Chugach Electric Association, Inc. and Matanuska Electric Association, Inc's Joinder in Motion to Dismiss*, filed August 22, 2025.

[6] *Municipality of Anchorage D/B/A Anchorage Hydropower's Opposition to the Office of the Attorney General's Motion to Dismiss*, filed August 25, 2025 (Opposition to Motion to Dismiss).

[7] *Office of the Attorney General's Reply to Opposition to Motion to Dismiss*, filed August 28, 2025.

Regulatory Commission of Alaska

Discussion

Petition to Intervene

Petitions to intervene are reviewed under 3 AAC 48.110. A person with a statutory right to be made a party to a proceeding will be permitted to intervene. Further, we have the discretion to permit intervention by any person whose participation will be conducive to the ends of justice and will not unduly delay the conduct of this proceeding.[8] A person wishing to intervene is required to file a petition setting out the facts and reasons why that person should be granted permission to intervene and should make specific reference to the factors identified in 3 AAC 48.110(b).[9]

When considering a petition to intervene, the following factors, among others, will be considered:

(1) the nature of the petitioner's right under statute to be made a party to the proceeding;

(2) the nature and extent of the property, financial, or other interest of the petitioner;

(3) the effect on petitioner's interest of the order which may be entered in the proceeding;

(4) the availability of other means by which the petitioner's interest may be protected;

(5) the extent to which petitioner's interest will be represented by existing parties;

(6) the extent to which petitioner's participation may reasonably be expected to assist in the development of a sound record, including the issues that petitioner intends to address in the proceeding; and

(7) the extent to which participation of the petitioner will broaden the issue or delay the proceeding.[10]

[8] 3 AAC 48.110(a).

[9] 3 AAC 48.110(c).

[10] 3 AAC 48.110(b).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

The Application is in relation to the surrender of AHP's voting rights on the EOC.[11] Chugach and MEA are members of the EOC.[12] AHP did not file an opposition to the Joint Petition to Intervene. We find that the relief sought by AHP in the Application would impact the property and financial interests of Chugach and MEA and their participation will assist in the development of a sound record in this proceeding. We find that intervention by Chugach and MEA is conducive to the ends of justice and will not unduly delay the conduct of this proceeding. We therefore grant the Joint Petition to Intervene.

Decision Timeline

In adjudicated docket matters that come before us under state or federal law and are not subject to a timeline under federal law or AS 42.05.175(a)–(e), we are required by AS 42.05.175(i) to issue a final decision not later than 180 days after the filing of an initiating petition. We are required by AS 42.05.175(a)(2) to issue a final order regarding an application to amend a certificate not later than 180 days after a complete application is filed.

In the Application, AHP requests to vacate the condition requiring surrender of voting rights on the EOC and in the alternative asks that we construe its request as an application to amend Certificate No. 780.[13] AHP's request to vacate the condition requiring surrender of voting rights on the EOC is not subject to a timeline under federal law or AS 42.05.175(a)–(e). Based on the July 30, 2025, filing date of Application the resulting timeline for a final decision required by AS 42.05.175(i) would be January 26, 2026. However, AHP's alternative request to amend Certificate No. 780 is subject to the timeline imposed by AS 42.05.175(a)(2). We reviewed the Application for completeness

[11]Application at 1.

[12]Application at 2-3.

[13]Application at 1, 17.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

under 3 AAC 48.648, and found that the Application is complete as supplemented on August 20, 2025, and that the resulting timeline for a final decision required by AS 42.05.175(a)(2) would be February 16, 2026. Pursuant to AS 42.05.175(k) if a single proceeding implicates more than one timeline the latest applicable deadline for the issuance of a final order shall apply. Therefore, the corresponding timeline for a final order in this proceeding is February 16, 2026.[14]

Commission Panel

The chair designates Commissioners Steve DeVries, Mark Johnston, Robert M. Pickett, John C. Springsteen, and himself as the Commission Panel and further designates Commissioner Springsteen as the Commission Docket Manager.[15]

Administrative Law Judge

Under AS 42.04.070(b), the chair appoints Administrative Law Judge Patrick S. Sheridan to facilitate conduct of the docket. Orders issued by the administrative law judge will be considered orders of the Commission for purposes of petitions for reconsideration under AS 42.05.171.

ORDER

THE COMMISSION FURTHER ORDERS:

1. *Chugach Electric Association, Inc. and Matanuska Electric Association, Inc.'s Joint Petition to Intervene*, filed August 22, 2025, is granted.

2. Commissioners Steve DeVries, John M. Espindola, Mark Johnston, Robert M. Pickett, and John C. Springsteen are designated as the Commission Panel.

[14]Since February 16, 2026, is President's Day, we will issue an order by Friday, February 13, 2026.

[15]Under AS 42.04.080(a), the chair designates a Commission Panel to hear, or, if a hearing is not required, to otherwise consider and decide docketed matters.

APPELLANT'S UNOPPOSED MOTION TO EXTEND STAY OF PROCEEDINGS

Appellant Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP"), by and through its undersigned counsel, hereby requests that the Court extend the current stay of the proceedings in this appeal until January 1, 2026.

On January 8, 2025, this Court issued its Notice Setting Appeal Procedure in the above-captioned case requiring that AHP's Appellant's brief and excerpt of record be filed by February 7, 2025. On March 6, 2025, AHP filed an unopposed motion to vacate the briefing schedule and stay the proceedings because AHP and Appellees Chugach Electric Association, Inc. ("Chugach") and Matanuska Electric Association, Inc. ("MEA") had been engaged in negotiations of an agreement that could result in the dismissal of

ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

AHP's appeal. On March 20, 2025, the Court issued an order vacating the briefing schedule and staying the proceedings until July 1, 2025. On July 1, 2025, AHP filed an unopposed motion to extend the stay because AHP, Chugach, and MEA's negotiations of an agreement were ongoing. On July 8, 2025, the Court issued an order extending the stay until October 1, 2025.

AHP, Chugach, and MEA's negotiations are ongoing, and if successful, will result in dismissal of this appeal.[1] In order to avoid unnecessary briefing and expenditure of time and resources by the parties, and pursuant to Appellate Rule 503(a), AHP requests that the Court issue an order extending the current stay of the proceedings in this appeal to January 1, 2026 (92 days), after which a revised briefing schedule will be issued with Appellant's opening brief due 30 days from the issuance of the revised briefing schedule. If the parties reach an agreement that results in dismissal of this appeal, the appropriate parties will promptly file an agreement or motion to dismiss this appeal under Appellate Rule 511. Counsel for AHP has conferred with counsel for the other parties, and no party opposes this motion.[2]

RESPECTFULLY SUBMITTED this 30th day of September, 2025, at Anchorage, Alaska.

In the Matter of the Request Filed by the MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER to Lift a Condition from Certificate of Public Convenience and Necessity No. 780 and Alternate Application to Amend Certificate of Public Convenience and Necessity No. 780	U-25-025 ORDER NO. 2

ORDER GRANTING MOTION TO DISMISS AND CLOSING DOCKET

BY THE COMMISSION:

Summary

We grant the motion to dismiss filed by the Office of the Attorney General, Regulatory Affairs and Public Advocacy Section (RAPA). We close this docket.

Background

On July 30, 2025, the Municipality of Anchorage (MOA) d/b/a Anchorage Hydropower (AHP) filed a request to lift a condition requiring the surrender of its voting rights on the Eklutna Operating Committee (EOC) from Certificate of Public Convenience and Necessity (certificate) No. 780. In the alternative, AHP requests to amend Certificate

Regulatory Commission of Alaska

No. 780 to lift the condition requiring surrender of its voting rights on the EOC.[1] On August 20, 2025, AHP supplemented its Application.[2]

On August 6, 2025, we issued public notice of the Application with comments due by August 27, 2025. No comments were filed.

On August 8, 2025, RAPA filed a notice of election to participate in this proceeding and a motion to dismiss.[3] On August 22, 2025, Chugach Electric Association, Inc. (Chugach) and Matanuska Electric Association, Inc. (MEA), filed a joint petition to intervene, which we granted.[4] Chugach and MEA filed a joinder in the Motion to Dismiss.[5] AHP filed an opposition to the Motion to Dismiss.[6] RAPA filed a reply to the Opposition to Motion to Dismiss.[7]

[1] *Municipality of Anchorage d/b/a Anchorage Hydropower's Request to Lift Condition Requiring the Surrender of Voting Rights from Certificate of Public Convenience and Necessity No. 780; and Alternative Application to Amend Certificate of Public Convenience and Necessity No. 780*, filed July 30, 2025 (Application).

Discussion

In Order U-18-102(44),[8] we described the Eklutna Hydroelectric Project (Eklutna Project) as follows:

> The Eklutna Project was built and operated by the federal government pursuant to the Eklutna Power Act of 1950. In 1995, Congress authorized sale of the Eklutna Project to [the Municipality of Anchorage d/b/a Municipal Light & Power Department (ML&P)], Chugach, and MEA under the terms of the 1989 Eklutna Purchase Agreement. Under this agreement, the three utilities received an undivided interest in all of the Eklutna Project, water rights, generation plant and the transmission assets interconnecting the Eklutna Project with ML&P, Chugach, and MEA. ML&P obtained a 53.33% ownership interest, Chugach obtained a 30% ownership interest, and MEA obtained a 16.67% interest in the Eklutna Project. Eklutna Project energy, capacity, and costs are to be allocated based on these ownership interests. ML&P and Chugach assert that the Eklutna Project currently has a maximum capacity of 39 MW.
>
> The three utilities created the Eklutna Operating Committee (EOC) to make all management decisions related to operation, maintenance, and budgeting for the Eklutna Project. ML&P, Chugach, and MEA each have a representative on the EOC. Decisions by the EOC are made based upon a double majority consisting of affirmative votes by at least two of the three utilities whose ownership shares total at least 51% of the Eklutna Project ownership. Effectively, management of the Eklutna Project is limited to actions approved by ML&P and at least one of Chugach or MEA.[9]

Chugach filed a petition seeking our approval of its acquisition of all service obligations and most assets of ML&P, and an application to amend its certificate to reflect the new service obligations.[10] Under the terms of this acquisition, Chugach would offer

[8]Order U-18-102(44)/U-19-020(39)/U-19-021(39), *Order Accepting Stipulation in Part, Subject to Conditions; Transferring and Issuing Certificates of Public Convenience and Necessity, Subject to Conditions; Addressing Beluga River Unit Management, Gas Transfer Prices, and Third Party Sales Gas Pricing; and Requiring Filings*, dated May 28, 2020 (Order U-18-102(44)), as corrected by *Errata Notice to Order U-18-102(44)/U-19-020(39)/U-19-021(39),* dated June 5, 2020, and December 22, 2020.

employment to all ML&P employees, and the MOA would retain no ML&P employees.[11] Under this acquisition, Chugach was not purchasing ML&P's interest in the Eklutna Project, but was acquiring a portion of ML&P's share of cost responsibilities and output from the Eklutna Project for a 35 year period.[12] As part of this same transaction, ML&P filed an application to amend its certificate to delete its service territory and add the Eklutna Project site as its new service territory.[13]

On May 28, 2020, we approved Chugach's acquisition of most of the assets and service obligations of ML&P, subject to conditions.[14] One of these conditions required ML&P to surrender its voting rights on the EOC prior to the effective date of the agreements under which ML&P's successor[15] would be providing part of its share of the Eklutna Project output to Chugach (the Eklutna Power Purchase Agreement (Eklutna PPA)) and selling the remainder of its share of the Eklutna Project output to MEA (the MEA PPA)(collectively, PPAs).[16] In compliance with this condition, ML&P surrendered its EOC voting rights effective October 30, 2019.[17]

Almost five years after this surrender, AHP filed a notice and request seeking reinstatement of its EOC voting rights.[18] In this filing, AHP asserted that Anchorage Water and Wastewater (AWWU) General Manager Mark A. Corsentino (Corsentino) had been appointed to serve as AHP's Utility Director,[19] and that AWWU Engineering Director Mark Schimscheimer (Schimscheimer) would provide support to Corsentino.[20]

RAPA filed a motion to dismiss AHP's Docket U-24-024 Notice and Request.[21] We granted RAPA's Docket U-24-024 Motion to Dismiss, finding AHP's voting rights on the EOC are surrendered for at least the duration of the Eklutna PPA and the MEA PPA.[22] We concluded that in its briefing on the issue AHP had not shown good cause for modifying or interpreting the condition in a manner that nullifies the minimum term of surrender of EOC voting rights in Order U-18-102(44).[23] We found that the Eklutna PPA and the MEA PPA are both scheduled to expire on October 31, 2055.[24] We noted that both agreements contain provisions allowing for extension as well as early

termination. We further noted that, at that time, no entity could predict when the terms of the Eklutna PPA and the MEA PPA would expire.[25]

We stated that we had reviewed the documents filed by AHP and found no commitment by Corsentino or Schimscheimer to remain employed by AHP until the expiration of the Eklutna PPA and the MEA PPA. We also stated that we had no way to evaluate what would be required to fully participate as a voting member of the EOC at that time. For these reasons, we granted the Docket U-24-024 Motion to Dismiss on the grounds that it was premature under the terms of Order U-18-102(44). This dismissal was without prejudice to refile closer to the time when the Eklutna PPA and the MEA PPA are expected to expire.[26]

AHP has now filed the Application requesting to lift the condition requiring the surrender of its voting rights on the EOC from Certificate No. 780, or in the alternative, to amend Certificate No. 780 to lift the condition requiring surrender of its voting rights on the EOC.[27] In the Application, AHP argues that we should lift the condition requiring the MOA to surrender its voting rights on the EOC because the objective of the condition has been met, as AHP has retained what it contends are qualified personnel and consultants to participate in the EOC.[28] AHP also argues that we should lift the conditions because the continued surrender of its voting rights on the EOC is not necessary to protect and promote the public interest, asserting that with the acquisition of qualified personnel to sit on the EOC, the condition is no longer needed to protect and promote the public interest.[29] AHP in the alternative presents an application to amend Certificate No. 780 to remove

the surrender requirement, arguing that AHP is and will continue to be fit, willing, and able to provide wholesale bulk power under the Eklutna PPA and the MEA PPA if the Application is approved.[30]

Standard of Review

The Commission looks to Alaska's Rules of Civil Procedure to determine the standard of review applicable to dispositive motions, and has previously explained:

> We look to Rule 56 of the Alaska Rules of Civil Procedure as a framework for reviewing motions for summary disposition. We have used summary disposition judiciously to simplify and focus issues and avoid unnecessary hearings. Under this approach, a party may move for a ruling on all or a portion of a case on the basis of the pleadings, depositions, answers to interrogatories, and admissions, together with affidavits. If there is no genuine issue as to any material fact, the party is entitled to judgment in its favor as a matter of law. Summary judgment may be rendered for or against the moving party. In deciding such motions, all reasonable inferences of fact must be against the moving party and in favor of the non-moving party. The burden of proof is on the moving party, and to prevail the non-moving party only needs to show the existence of material facts to be litigated.[31]

RAPA Motion to Dismiss

RAPA has filed the Motion to Dismiss seeking dismissal of the AHP's Application.[32] In the Motion to Dismiss, RAPA argues that AHP's requests made to either modify its certificate or modify the conditions of the certificate are premature.[33] RAPA states that AHP has not shown that the Eklutna PPA and the MEA PPA have expired, are about to expire, or that the current filing is close to the time the PPAs will expire.[34]

[30]Application at 17-25.

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

RAPA states that in Order U-18-102(44) we established several conditions applicable to the certificate issued to AHP, including that "before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project…." RAPA also states that we clarified "that the term of the MOA's voting rights surrender must be at least equal to the terms of the Eklutna PPA and the MEA PPA.[35]

RAPA states that in Order U-24-024(8) we confirmed the MOA's voting rights surrender had a minimum time period tied to the terms of the Eklutna PPA and the MEA PPA.[36] RAPA notes that in Order U-24-024(8) we provided guidance for future AHP filings, that in addition to addressing the minimum term of EOC voting rights surrender issue, AHP should provide the information to show that it can bring to EOC meetings a depth and breadth of technical and managerial expertise at least comparable to the level of expertise that MEA and Chugach bring to the meetings.[37] RAPA argues that this guidance does not "eviscerate" the minimum time period for the surrender of voting rights required in Order U-18-102(44) and confirmed in Order U-24-024(8). RAPA contends that the guidance instead explains what should be filed when a future filing is appropriate. RAPA states this is clarified when we discussed the dismissal of the Docket U-24-024 Notice and Request, pointing to our ruling that the dismissal was without prejudice for refiling closer to the time the Eklutna PPA and MEA PPA will expire.[38]

RAPA states that Order U-24-024(8) shows there is a minimum time period for the surrender of voting rights and when the MOA makes a filing for restoration of EOC

voting rights it should be close to the time the PPAs expire. RAPA states that filing should include all of the information noted in the guidance in Order U-24-024(8).[39] RAPA states that AHP has not shown that its current filing is close to the time when the PPAs will expire and therefore the Application is premature and should be dismissed.[40]

Chugach and MEA Joinder in Motion to Dismiss

MEA and Chugach joined In RAPA's Motion to Dismiss. MEA and Chugach state that we have now considered and decided this matter twice and the matter should be dismissed. MEA and Chugach also state that if we proceed with further consideration of AHP's request, the reinstatement of those voting rights would result in AHP regaining majority voting rights on the EOC, despite AHP's much narrower involvement and economic stake in the Eklutna Project than its predecessor, ML&P.[41] MEA and Chugach state that given the current PPAs among the owners of the Eklutna Project and the utility expertise within the MOA and AHP, Chugach and MEA cannot support the reinstatement of the AHP's majority voting rights.[42]

MEA and Chugach agree with RAPA that AHP's filing in this docket is premature due to the surrender term. MEA and Chugach state that in Order U-24-024(8) we reiterated our prior decision that the surrender of voting rights on the EOC was a condition of our approval of AHP's certificate, and that the surrender was required to last as long at the minimum term of the PPAs. MEA and Chugach state that the PPAs are still in effect and therefore the minimum term of the surrender has not been satisfied. Chugach and MEA believe that we have been clear on this point, and consequently, they

again join in RAPA's Motion to Dismiss because there is no reason to relitigate the fundamental question in this new docket.[43]

MEA and Chugach state that AHP has failed to provide reasonable justification for why we should revisit the surrender requirement and our recent and clear prior decisions on the matter. MEA and Chugach state that first, the PPAs are still in effect and therefore the minimum term of the surrender has not been satisfied. MEA and Chugach state that, second, the circumstances have not materially changed with respect to the underlying basis for the surrender requirement. MEA and Chugach state that the relevant facts with respect to AHP's function and with respect to its relationship with the Eklutna Project, remain very similar to those in existence immediately after the transaction between Chugach and ML&P and at the time of Order U-24-024(8).[44] MEA and Chugach state that AHP, unlike its predecessor ML&P, is not operating as a ratepayer-serving utility and even with the creation of two new staff roles, AHP still has minimal staff and no bench of utility expertise, and therefore only has limited "knowledge of prudent utility practice and the Railbelt electric generation and transmission system."[45] MEA and Chugach state that AHP is responsible for only 19.05% of Eklutna Project costs despite its majority ownership stake.[46] MEA and Chugach state that AHP exists only to sell power generated by the Eklutna Project on a wholesale basis to Chugach and MEA via the PPAs and bears significantly less responsibility, cost, and risk associated with the Eklutna Project. MEA and Chugach state that until the PPAs have otherwise expired or terminated, or the facts

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

change materially, there is simply no new justification for us to revisit our decision on this matter and the request is therefore premature.[47]

MEA and Chugach make an additional comment in opposition to the reinstatement of AHP's majority vote structure and state that if we deny RAPA's Motion to Dismiss and believe that AHP's request raises new issues and therefore necessitates further proceedings, Chugach and MEA will fight the reinstatement of AHP's majority voting rights vigorously. Chugach and MEA state that under a reinstatement of a majority vote framework for AHP, MEA and Chugach will no longer be able to determine how to operate and maintain the Eklutna Project in a manner consistent with prudent utility practice without AHP's agreement. MEA and Chugach state that they will bear the vast majority of the costs and risks of decisions or lack of action, specifically noting that Chugach bears 64.29% of the costs of operations, maintenance, capital, and environmental costs of the Eklutna Project and MEA bears 16.67% of such costs. MEA and Chugach state that with their 46.67% of EOC voting rights, independent or joint decisions cannot be made on the Eklutna Project without AHP's agreement.[48] MEA and Chugach state that the majority vote framework requiring majority owner approval for every decision only made sense and served the public interest when the majority owner was a large operating utility, proportional risk sharer, and majority cost contributor, which will not be the case for AHP so long as the two PPAs are in effect.[49]

Opposition to Motion to Dismiss

AHP opposes RAPA's Motion to Dismiss.[50] AHP argues that the Motion to Dismiss appears to seek dismissal in order to avoid expending resources reviewing and

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

litigating the merits of the Application. AHP takes the position that our holding in Order U-24-024(8) does not preclude or limit its ability to request a finding of good cause to modify or lift the minimum surrender term. AHP states that RAPA's Motion to Dismiss incorrectly interpreted Order U-24-024(8) and for that reason should be denied.[51]

AHP first argues that RAPA's Motion to Dismiss is based on an incorrect interpretation of Order U-24-024(8).[52] AHP asserts that RAPA is relying on a single sentence contained in Order U-24-024(8) where we dismissed the Docket U-24-024 Notice and Request "without prejudice to refiling closer to the time that Eklutna PPA and the MEA PPA will expire."[53]

AHP argues that the sentence in question refers only to AHP's filing of a notice and request for acknowledgement that it had satisfied the applicable requirements and not to a request to lift a condition or an application to amend AHP's certificate. AHP states that it has filed such a request and application. AHP argues that Order U-24-024(8) expressly contemplated that an application to amend AHP's certificate to remove the minimum term would be appropriate at any time during the minimum term provided that such applications includes the necessary information regarding AHP's ability to participate on the EOC.[54] In support of this, AHP cites Order U-24-024(8) where we declined to consider AHP's alternative application to amend the certificate to remove the minimum term requirement due to the time remaining in Docket U-24-024.[55]

AHP also argues that if Order U-24-024(8) forever precludes AHP from seeking relief from the minimum term until after the minimum term has ended the

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

guidance provided in Order U-24-024(8) would be gratuitous and superfluous.[56] AHP also argues that we can modify the minimum term for good cause shown.[57] AHP states that granting the Motion to Dismiss would deny AHP the procedural opportunity to show good cause to modify or lift the minimum surrender term before assessing whether such good cause exists. AHP states this would also incorrectly imply that a present Commission is bound by a prior Commission's ruling even if the present Commission finds good cause to modify or deviate from the prior ruling.[58]

AHP additionally argues that Chugach and MEA's Joinder in Motion to Dismiss addresses the merits of the Application, and not whether Order U-24-024(8) precludes us from consideration of the Application.[59] AHP states that Chugach and MEA argue that until the PPAs have otherwise expired or terminated, or the material facts have changed, there is simply no new justification for us revising our recent decision on this matter.[60] AHP argues that whether material facts have changed goes to the merits of the Application, not whether Order U-24-024(8) precludes AHP from filing the Application in the first place. AHP also states that MEA and Chugach ignore our ability to modify or vacate the minimum surrender term.[61]

RAPA Reply

RAPA states in its reply, that in Order U-18-102(44) we required a minimum term for the voting rights surrender by AHP.[62] RAPA states that Order U-24-024(8)

[56]Opposition to Motion to Dismiss at 6.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

interpreted Order U-18-102(44), and that it confirmed the minimum term for the voting rights surrender, quoting the order: "[i]n its briefing, AHP has not shown good cause for modifying or interpreting this certificate condition in a manner that nullifies the minimum term of EOC voting rights surrender specified in Order U-18-102(44)."[63] RAPA concludes its motion to dismiss is simple:

> [Order U-18-102(44)] contained a minimum term for the EOC voting rights surrender. [Order U-24-024(8)] interpreted [Order U-18-102(44)] and confirmed the voting rights surrender minimum term. The minimum voting rights surrender term in [Order U-18-102(44)] has not been nullified. The Commission, MOA/AHP, RAPA, and any intervenors should not have to expend scarce resources (that are ultimately funded by ratepayers) if the minimum term has not expired or is not about to expire.[64]

Decision

With Order U-18-102(44), we conditionally approved Chugach's Petition for Approvals and ML&P's Application. This approval included conditional approval of the Eklutna PPA and the MEA PPA. One of the conditions imposed was a surrender of ML&P's voting rights. We stated:

> Under these circumstances, we cannot unconditionally find that [the successor to ML&P, now known as AHP] is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that [A]HP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without [A]HP having a vote on operation or management decisions. This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as [A]HP has shown to our satisfaction that [A]HP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit [A]HP from attending EOC meetings, but may not allow [A]HP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.[65]

[63]RAPA Reply at 1 (quoting Order U-24-024(8) at 28).

[64]RAPA Reply at 2.

[65]Order U-18-102(44) at 67.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

No petitions for reconsideration or appeals of the decisions in Order U-18-102(44) were timely filed. In compliance with the condition quoted above, ML&P filed a written surrender of its EOC voting rights on October 30, 2020.[66]

In Order U-24-024(8), following briefing on whether this surrender was subject to a minimum term, we concluded that AHP had not shown good cause for modifying or interpreting this condition in a manner that nullifies the minimum term of EOC voting rights surrender. We concluded that "AHP's voting rights on the EOC are surrendered for at least the term of the Eklutna PPA and the MEA PPA."[67] We dismissed the Docket U-24-024 Notice and Request on the grounds that it was premature under the terms of Order U-18-102(44). This dismissal was without prejudice for refiling closer to the time the Eklutna PPA and the MEA PPA will expire.[68]

AHP now seeks to restore its voting rights on the EOC by requesting that we lift the minimum surrender condition rather than finding that they have satisfied the condition as they did in the Docket U-24-024 Notice and Request. While this may be a separate procedural request, it ultimately is seeking the same result. The basis on which AHP argues relief from the minimum term of surrender is warranted is that the objective of the condition has been met and that the continued surrender of its voting rights on the EOC is not necessary to protect and promote the public interest.[69] Central to AHP's Application is the acquisition of what AHP contends is sufficient technical expertise to address our concerns. AHP asserts that Mark Stafford (Stafford) has assumed the role as Director of AHP and that he is qualified to participate in meetings and knowledgably

[66]Notice of Surrender.

[67]Order U-24-024(8) at 28.

[68]Order U-24-024(8) at 29.

[69]Application at 8-16.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

discuss all issues related to management and operation of the Eklutna Project.[70] AHP states also that Stafford will be assisted in managing the workload of AHP by Schimscheimer who will be moving from his engineering role at AWWU to a new role at AHP.[71] AHP states also that the MOA has entered into contracts that can be used by AHP with engineering and accounting contractors and consultants with the breadth and scope of relevant knowledge that the Chugach and MEA representatives bring to the EOC meetings.[72]

AHP, in the Application, asserts as the only change in facts or circumstances that it has acquired qualified personnel to sit on the EOC and exercise voting rights. However, the surrender condition that we imposed on AHP had both a minimum surrender provision, as well as a requirement that AHP show, to our satisfaction, sufficient technical expertise to fully participate on the EOC. That is, for the restoration of EOC voting rights, it must be shown that both the minimum term has elapsed and that AHP has qualified personnel and technical expertise to participate in the EOC. If the demonstration of personnel and technical expertise on its own was sufficient good cause for the restoration of voting rights, the minimum term provision would have been unnecessary. At any point prior to the expiration of the PPAs, AHP could simply present personnel and technical expertise it believes is sufficient for the restoration of EOC voting rights. The condition imposed by Order U-18-102(44) set a time and circumstances where a showing of technical expertise to restore EOC voting rights would be appropriate. We will not entertain a request for relief from the minimum surrender term imposed in Order U-18-102(44) based only on a showing of AHP acquiring what it contends to be qualified personnel and technical expertise until at or near the time that the Chugach and

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

MEA PPAs are set to expire. Additional changes in facts or circumstances that might warrant relief from the minimum term of surrender must be pled.

AHP argues that, in Order U-24-024(8), we expressly contemplated that an application to amend AHP's certificate to remove the minimum term would be appropriate at any time during the minimum term, provided that such an application includes the necessary information regarding AHP's ability to participate on the EOC.[73] The basis for this assertion appears to be the fact that in Order U-24-024(8) we declined to consider AHP's Docket U-24-024 Notice and Request as an application to amend AHP's certificate to remove the minimum term of surrender on the grounds that there was too little time remaining in that docket.[74] We did deny the request to construe the Docket U-24-024 Notice and Request as an application to amend certificate on the grounds that there was not sufficient time to resolve the request.[75] However, we did not rule on the sufficiency of the Docket U-24-024 Notice and Request as an application to amend the certificate. Denying a request on one ground does not imply that it would be sufficient on other grounds.

AHP also argues that we provided guidance for future filings seeking relief from the minimum term of EOC voting rights surrender in Order U-24-024(8), and that guidance would be superfluous if AHP was barred from seeking relief until the minimum term had expired.[76] AHP is correct that, in Order U-24-024(8), we provided guidance for future filings. In Order U-24-024(8) we stated:

> In addition to addressing the minimum term of EOC voting rights surrender issue, we suggest that in future filings seeking reinstatement of EOC voting rights AHP provide the information to show that it can bring to EOC meetings

a depth and breadth of technical and managerial expertise at least comparable to the level of expertise that MEA and Chugach bring to those meetings.[77]

The "in addition" language reflects that the need for AHP to demonstrate sufficient technical expertise is an issue separate from the basis for relief from the minimum term of EOC voting rights surrender. The guidance was not superfluous, but addressed deficiencies in the Docket U-24-024 Notice and Request regarding the proposed technical expertise that must be addressed in *any* future filing for restoration of EOC voting rights, whether presented after the termination of the PPAs, or earlier in a request for relief from the minimum term. The guidance regarding technical expertise was provided because, in Docket U-24-024, we determined AHP had failed to adequately support its request for reinstatement of EOC voting rights, and we saw no way of moving forward without taking the time for prefiled testimony, discovery, and holding hearings to gather information necessary to determine if AHP had acquired the expertise required to fully participate as a voting member of the EOC.[78] The guidance was provided so that the issue of expertise could be more efficiently addressed in future filings, but that does not equate to technical expertise being sufficient grounds for relief from the minimum term of surrender, or AHP providing more details regarding technical expertise relieving them from the need to address the minimum term of surrender if seeking relief from that provision.

We find that AHP's Application did not present on its face changes in facts or circumstances that would warrant our reconsideration of the Order U-18-102(44) minimum term of surrender requirement prior to the expiration of the minimum term. We do not find that the facts as presented in the Application, the acquisition of technical

[77]Order U-24-024(8) at 34.

[78]Order U-24-024(8) at 35.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

expertise, would constitute good cause to modify AHP's certificate or otherwise grant AHP relief from the condition. This is not a determination on the merits or sufficiency of the technical expertise and personnel presented in the Application for the restoration of EOC voting rights, but rather a determination that AHP acquiring what it contends is sufficient technical expertise is not a change in facts or circumstance that on its own provides a basis for relief from the minimum term of surrender. Order U-18-102(44) imposed both a minimum term of surrender as well as a requirement that the successor to ML&P, AHP, demonstrate sufficient technical expertise to participate in the EOC for voting rights to be restored. Order U-18-102(44) set the time when a demonstration of technical expertise would be appropriate. While AHP is not forever barred from seeking relief from the minimum term of surrender, such a request must be accompanied by a showing of facts or circumstances that warrant relief from that minimum term separate from the acquisition of appropriate technical expertise as the acquisition of technical expertise was contemplated in Order U-18-102(44), and the time at which the restoration of EOC voting rights would be appropriate on those grounds was set. AHP acknowledges that it must procedurally show good cause to modify or lift the minimum surrender term.[79] The good cause for this articulated by AHP in the Application ultimately is only the contention that AHP has acquired sufficient technical expertise to participate in the EOC, with no other changes in facts or circumstances which would warrant lifting the minimum surrender term. As pled, we do not find that AHP has articulated sufficient changes in facts or circumstances that might constitute good cause for relief.

We have recently considered a petition by Chugach to modify elements of Order U-18-102(44), stating:

> Almost three years have passed since we issued Order U-18-102(44) et al., which was a large multi-party settlement that resulted from many negotiations and compromises. The economic and financial landscape are entirely different

[79]Opposition to Motion to Dismiss at 6.

Regulatory Commission of Alaska

> today. It is impossible to adjust one part of Order U-18-102(44) et al. without it affecting other parts of the settlement.[80]

This caution to modifying Order U-18-102(44) is applicable to this Application as well. Over five years have passed since we issued Order U-18-102(44), which was a large multi-party settlement that resulted from many negotiations and compromises. The economic and financial landscapes have shifted substantially, and it is impossible to adjust one part of Order U-18-102(44) without it affecting other parts of the settlement. While circumstances might be presented that warrant reconsideration of the minimum term of surrender from Order U-18-102(44), AHP has not done so in the Application.

We concur with the conclusion reached by RAPA in the RAPA Reply. Order U-18-102(44) contained a minimum term for the EOC voting rights surrender. Order U-24-024(8) interpreted Order U-18-102(44) and confirmed the voting rights surrender minimum term. The minimum voting rights surrender term in Order U-18-102(44) has not been nullified. AHP has not articulated facts or circumstances that might warrant relief from the minimum term in Order U-18-102(44). For these reasons, we find that when viewing all reasonable inferences of fact in favor of AHP, there are no genuine issues as to any material fact. We grant RAPA's Motion to Dismiss.

Final Order

This order constitutes the final decision in this proceeding. This decision may be appealed within 30 days of this order in accordance with AS 22.10.020(d) and Alaska Rule of Appellate Procedure 602(a)(2). In addition to the appellate rights afforded by AS 22.10.020(d), a party has the right to file a petition for reconsideration in accordance with 3 AAC 48.105. If such a petition is filed, the time period for filing an

In the Matter of the Application Filed by the MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER to Lift a Condition from Certificate of Public Convenience and Necessity No. 780 and Alternate Application to Amend Certificate of Public Convenience and Necessity No. 780	U-25-025

MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S PETITION FOR RECONSIDERATION OF ORDER U-25-025(2)

Pursuant to 3 AAC 48.105, the Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP") respectfully requests reconsideration of Order No. U-25-025(2)[1] ("Order 2"). Order 2 summarily dismissed AHP's request to lift the condition requiring surrender of voting rights on the Eklutna Operating Committee ("EOC") and declined to address the merits of AHP's showing of managerial and technical fitness. Order 2 is "unreasonable, erroneous, unlawful, or otherwise defective," 3 AAC 48.105, because:

(1) It misconstrues and misapplies the original rationale for the EOC vote surrender requirement from Order No. U-18-102(44)[2] ("Order 44")—as a temporary condition to

[1] Order U-25-025(2), *Order Granting Motion to Dismiss and Closing Docket*, dated January 26, 2026.

remedy what the Commission determined to be a lack of managerial or technical fitness to maintain majority ownership of the Eklutna Hydroelectric Project ("Eklutna");

(2) It misconstrues and misapplies Order No. Order U-24-024(8)[3] ("Order 8");

(3) It is arbitrary and capricious to the extent that it deprives AHP, the majority owner of the Eklutna Hydroelectric Project ("Eklutna") of the ability to vote on important Eklutna matters before the EOC, without addressing the merits of whether AHP is managerially or technically fit to maintain majority ownership of [Eklutna]."

AHP requests that the Commission reconsider Order 2, and

(1) Lift the EOC vote surrender requirement, as requested in AHP's July 30, 2025, request to lift condition and alternative request to amend Certificate of Public Convenience and Necessity ("CPCN") No. 780 to lift the condition; or

(2) In the alternative, lift the EOC vote surrender requirement subject to AHP agreeing to equal, per-capita EOC voting rights (one owner, one vote); or

(3) In the alternative, reopen Docket U-25-025, or open a new docket, to address the merits of whether AHP is managerially and technically fit to own its Eklutna interest.

BACKGROUND

Eklutna Project Ownership and Governance

The Eklutna Hydroelectric Project is jointly owned by three entities: ML&P's successor, AHP, holds a majority ownership interest of approximately 53.33%, Chugach Electric Association ("Chugach") holds 30%, and Matanuska Electric Association ("MEA") holds approximately 16.67%.[4] Governance of the Project is exercised through the EOC, which was created by the owners to make management decisions related to Project operations, maintenance, and budgeting.[5] Under the current governing agreements, EOC decisions require a super-majority vote, consisting of affirmative votes by at least two owners whose combined ownership interests exceed 51 percent.[6] EOC voting authority directly affects operational decisions, financial obligations, and ratepayer outcomes. Because EOC governance determines how Project costs are incurred and allocated, the Commission has treated voting authority on the EOC as a matter of regulatory significance tied to findings of managerial and technical fitness.[7] The Commission, Chugach, and MEA have noted that the current EOC voting requirements (without surrender) provides AHP with veto-right voting power.

Order 44

In Order 44, the Commission addressed AHP's fitness to continue participating in EOC governance in light of the Commission's determination that after the sale of ML&P assets to Chugach, AHP, at that point in time, would lack adequate managerial and technical fitness.[8] The Commission concluded that it could not, at that time, "unconditionally find that [A]HP is managerially or technically fit to maintain majority ownership of the Eklutna Project," and therefore approved continued ownership subject to a conditional surrender of EOC voting rights.[9] The Commission expressly reserved the possibility of reinstatement, providing that the surrender could be ***lifted*** only after AHP had shown, to the Commission's satisfaction, that it had acquired the expertise required to fully participate as a voting member of the EOC.[10] AHP reiterates that "lifted" implies premature cessation of a condition prior to the **expiration** of its natural term. The purpose of the condition was to ensure managerial and technical fitness. Nowhere in the record of Docket U-18-102 (other than Order 44) was the surrender of EOC voting rights or a term of such surrender mentioned, by any party, prior to issuance of Order 44.

Order 8

Following issuance of Order 44, ML&P filed a notice of its temporary surrender of EOC voting rights, as a compliance filing to allow the transaction to close.[11] After taking steps to

address the expertise concerns identified by the Commission, AHP filed a Notice and Request in Docket U-24-024 seeking Commission acknowledgment that it had acquired the requisite expertise and asking the Commission to reach the merits of that showing.[12] In Order 8, the Commission dismissed the request as premature, concluding that the minimum surrender term tied to the Eklutna and MEA PPAs had not yet elapsed, and therefore declined to adjudicate whether AHP had satisfied the fitness condition reserved in Order 44.[13] The Commission made no findings regarding AHP's qualifications and closed the docket without prejudice, leaving the merits of the expertise determination unresolved.

Order 2

On July 30, 2025, AHP filed its most recent request to lift the EOC vote surrender condition. In Order 2, the Commission summarily granted motion to dismiss filed by the Office of the Attorney General, Regulatory Affairs and Public Advocacy Section ("RAPA"). That order concluded that Order 44 contained a minimum term for the EOC voting rights surrender, and that the "facts and circumstances" presented did not warrant relief from that minimum term.

Assembly Ordinance No. 2024-123(S), As Amended

Attached as Exhibit 1 is Anchorage Assembly Ordinance AO No. 2024-123(S), which was unanimously passed on December 16, 2025. In Section 5, the Assembly's approval of certain water-related agreements are subject to resolution of the EOC voting rights surrender issue

[12] Notice and Request for Acknowledgement of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee, filed July 18, 2024.

among AHP, Chugach, and MEA, as set forth in that section and including AHP regaining a per-capita voting rights (i.e., AHP, Chugach, and MEA would each have one vote, which would require any two owners to pass an EOC vote. Since passage of the ordinance, Chugach and MEA have declined to proceed with the actions set forth in Section 5.

DISCUSSION

The Commission Expressly Reserved Authority to Reinstate Voting Rights

In Order 44, the entire rationale for the voting rights surrender condition was to ensure only knowledgeable representatives were able to vote on the EOC, and the Commission determined that at that time APH did not have such an individual to serve. The structure of the paragraph at issue supports the argument that the term of the surrender was not intended to be absolute. By starting the paragraph with "[u]nder these circumstances," the Commission signaled that the surrender due to AHP's lack of a knowledgeable representative is contingent, not permanent. The factual predicate for the voting rights surrender is not time, but lack of fitness. The surrender, then, is a conditional regulatory accommodation. It is and was remedial from the beginning, as opposed to being punitive. It existed to cure a specific regulatory concern and becomes logically unnecessary once that concern is cured. This structure is characteristic of a condition subsequent; it was a restriction imposed that was designed to lapse if the condition of concern is satisfied. This is supported by the sentence structure:

> This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS

> our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC.[14]

The clause which introduces the minimum time requisite is not a stand-alone clause, and as such it must be read in the context of the larger sentence, paragraph, and order. Grammatically and structurally, the Commission links duration and expertise with the conjunctive "and" signifying that the surrender remains in place while both conditions are unmet. The Commission did not say the surrender must remain regardless of expertise. Rather, the Commission said it "cannot be lifted until" expertise is shown—language that presupposes the surrender can be lifted, prior to the end of the term, once that showing is made. If the minimum term were absolute and independent of expertise, the expertise clause would be surplusage. Administrative orders are not read to render express conditions meaningless. Such a reading would also make the surrender punitive rather than remedial.

The paragraph of Order 44 that speaks to the surrender of voting rights fits a condition subsequent, a condition that, when satisfied, terminates an existing restriction. Here, the initial condition, that AHP lacked sufficient expertise, led the Commission to require a voting surrender; in the interim, AHP was allowed to attend meetings but not vote. The condition subsequent can be seen in the line "until such time as [A]HP has shown to our satisfaction that [A]HP has acquired the expertise required."[15] This shows that once the basis for the surrender no longer exists, a reinstatement becomes permissible. The paragraph as a whole carefully preserves Commission discretion to lift the condition once the deficiency is cured. That preservation would

[14] Order U-18-102(44) at 67.

[15] *Id.*

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS

be unnecessary, and misleading, if reinstatement were categorically unavailable until the PPAs expire.

Read together, the paragraph supports the interpretation that the minimum term ensures that, if nothing changes—i.e., if AHP continues to lack a suitable representative—the surrender will remain in place for at least the PPA term. But the expertise clause establishes a condition that allows the Commission to lift the surrender earlier if the original justification disappears. This reading harmonizes all clauses while also protecting governance stability and Commission flexibility. Such a reading also avoids locking in an exclusion untethered from its rationale.

To read the paragraph as setting an absolute term minimum would convert a fitness condition into a free-standing penalty, contrary to the Commission's stated rationale. It would also nullify the expertise clause. Finally, a reading that neglects the expertise clause creates an irrational outcome, where AHP remains excluded from voting in the present, because at a crucial moment five years ago it did not meet a novel prerequisite of heightened expertise. A condition subsequent reading of the paragraph avoids these issues. The intent of the voting surrender was to prevent an individual, who the Commission saw as unqualified, from participating in EOC decision-making during a period when expertise had not yet been demonstrated. Once that factual predicate changes, as it has with involvement of the individuals AHP discussed in its request, that continued enforcement of the condition without reassessment risks converting a protective condition into an arbitrary and punitive exclusion, contrary to the Commission's stated objectives.

Reinstatement was not only contemplated but affirmatively anticipated by the Commission's order. By conditioning the surrender of EOC voting rights on AHP's failure to

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION

(907) 277-1604

demonstrate managerial and technical expertise—and by expressly providing that the surrender "cannot be lifted until such time as" AHP makes that showing—the Commission necessarily presupposed that reinstatement would be a legally available outcome upon satisfaction of the condition. That reservation would be rendered meaningless if the Commission were to treat the surrender as effectively permanent or to decline ever to reach the merits of AHP's qualifications. Administrative orders must be read to give effect to all operative language, and the Commission cannot nullify its own express reservation of authority by construing the condition in a manner that forecloses the very merits determination it expressly anticipated.

Order No. 8 Resolved Only Timing, Not Entitlement

Order 8 resolves only a question of timing and does not adjudicate AHP's entitlement to reinstatement of voting rights. In dismissing AHP's request, the Commission made clear that it was acting on procedural grounds, concluding that the request was premature in light of its interpretation of the minimum surrender term tied to the Eklutna and MEA PPAs.[16] The Commission expressly declined to assess whether AHP had acquired the managerial or technical expertise required to participate as a voting member of the EOC, and made no findings, favorable or unfavorable, regarding AHP's competence, qualifications, or fitness to vote.[17] Rather, Order 8 repeatedly framed the dismissal as a threshold determination based on timing rather than a substantive evaluation of the expertise condition reserved in Order 44. As a result, Order 8 left

[16] Order U-24-024(8) at 19-21.

[17] Order U-24-024(8) at 20-22.

LAW OFFICES OF

unresolved the central merits question the Commission itself anticipated: whether AHP has now satisfied the expertise standard necessary for reinstatement.

A dismissal based on prematurity does not operate as a merits bar and does not foreclose reconsideration where the underlying condition remains unresolved. Order 8 did not purport to extinguish AHP's right to seek reinstatement, nor did it hold that the expertise condition could never be evaluated prior to expiration of the PPAs. Instead, the Commission closed the docket without prejudice, preserving its continuing jurisdiction to revisit both the timing and substance of the voting-rights condition.[18] Where, as here, a regulatory restriction was imposed as a conditional safeguard rather than a permanent divestiture, a prematurity dismissal leaves open the possibility that the Commission may later amend, clarify, or modify the timing floor to ensure that the condition continues to serve its stated purpose. The underlying question—whether AHP is fit to vote on the EOC—thus remains live, and reconsideration is appropriate to prevent a procedural timing determination from hardening into an effective merits denial untethered from the expertise-based framework the Commission originally adopted.

The "Minimum Term" Condition Should Be Reconsidered in Light of Its Purpose

The "minimum term" voting-surrender condition should be reconsidered in light of the purpose for which it was imposed. In Order 44, the Commission made clear that the surrender of EOC voting rights was not intended as a categorical or punitive restriction, but as a protective measure designed to ensure competent management during a period of transition and to prevent

(907) 277-1604

governance risk.[19] The Commission's concern centered on AHP no longer having anyone who was able to participate in EOC meetings and add to discussion related to management and operations of the Project.[20] The condition was therefore calibrated to address a temporary governance risk, not to permanently exclude an owner from participation irrespective of future developments.

Since the imposition of the condition, circumstances have materially changed, warranting reconsideration to avoid a purely mechanical application divorced from regulatory purpose. AHP's subsequent filings demonstrate the acquisition of managerial and technical expertise responsive to the concerns identified by the Commission, including personnel and organizational changes intended to ensure informed participation in EOC governance.[21] Where the factual risk that the condition was designed to mitigate has been substantially reduced, continued exclusion without reassessment risks transforming a purpose-driven safeguard into an arbitrary restraint. The Commission regulated AHP's EOC voting authority because of its momentary lack of a qualified representative who could participate in meetings and add to discussions relating to management and operations at the Project.[22] However, now that those deficiencies are remedied, refusing to reconsider the condition undermines both the rationale for the voting surrender and the alignment between ownership interests and governance

responsibilities. In addition, as Exhibit 1 demonstrates, if AHP having veto power voting rights is the significant problem, AHP and the Anchorage Assembly are willing to consider a change in EOC voting rights that would not provide veto power to any one owner.

Public Interest Considerations Favor Reconsideration

Eklutna is governed through the EOC, yet the current structure leaves the majority owner without any voting authority, creating a governance imbalance that undermines accountability and alignment between ownership interests and decision-making responsibility. The Commission has recognized that EOC voting authority is the mechanism by which owners discharge their obligations for oversight of operations, budgeting, and compliance; continued exclusion of the majority owner from that process—after the expertise concerns prompting the restriction have been addressed—dilutes representative governance and weakens the link between ownership risk and governance responsibility. Reconsideration would restore a governance framework that more accurately reflects ownership interests while remaining subject to Commission oversight.

CONCLUSION

For the reasons set forth above, AHP respectfully requests that the Commission reconsider Order 2, and

(1) Lift the EOC vote surrender requirement, as requested in AHP's July 30, 2025, request to lift condition and alternative request to amend Certificate of Public Convenience and Necessity ("CPCN") No. 780 to lift the condition; or

(2) In the alternative, lift the EOC vote surrender requirement subject to AHP agreeing to equal, per-capita EOC voting rights (one owner, one vote); or

Exhibit 1

Municipal Clerk's Office
Amended and Approved
Date: December 16, 2025

Submitted by: Chair of the Assembly at the request of the Mayor
Prepared by: Dept. of Law
For reading: April 22, 2025

ANCHORAGE, ALASKA
AO No. 2024-123(S), As Amended

AN ORDINANCE AUTHORIZING THE MUNICIPALITY OF ANCHORAGE, ANCHORAGE WATER & WASTEWATER UTILITY (AWWU), AND THE MUNICIPALITY OF ANCHORAGE, ANCHORAGE HYDRO POWER (AHP) TO EXECUTE AND ENTER INTO THREE AGREEMENTS PERTAINING TO THE MUNICIPAL PUBLIC WATER SUPPLY AND THE EKLUTNA HYDROELECTRIC PROJECT FISH AND WILDLIFE PROGRAM.

WHEREAS, the Municipality of Anchorage is the majority owner of the Eklutna Hydroelectric Project and is a party to the 1991 Fish and Wildlife Agreement that obligates the Municipality and the other owners of the Eklutna Hydroelectric Project to develop a fish and wildlife program that provides for the protection, mitigation of damages to, and enhancement of fish and wildlife affected by the Project, and,

WHEREAS, the owners of the Eklutna Hydroelectric Project, the Municipality, Chugach Electric Association, and Matanuska Electric Association, hold the priority water rights to all flows into the Eklutna Lake reservoir, and,

WHEREAS, the Municipality of Anchorage, Anchorage Water and Wastewater Utility (AWWU) derives approximately ninety percent of the Municipality's public water supply from Eklutna Lake under a preferred use permit issued by the State of Alaska, and,

WHEREAS, the 1984 Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska between the Alaska Power Administration and the Municipality of Anchorage, governing AWWU's access to the public water supply, the interconnection between Eklutna Hydroelectric Project infrastructure and AWWU's drinking water facilities and the compensation AWWU owes the Project owners for reductions in electricity generation caused by withdrawing public drinking water from Eklutna Lake, expires on December 31, 2025, and must be replaced prior to that date to secure the Municipality's public water supply, and,

WHEREAS, on October 2, 2024, Governor Mike Dunleavy established a Final Fish and Wildlife Program for the Eklutna Hydropower Project that could utilize AWWU facilities at Eklutna Lake [IF PUMPED STORAGE HYDROPOWER IS NOT ULTIMATELY SELECTED BY THE GOVERNOR], and,

WHEREAS, the Governor's Final Fish and Wildlife Program also directed the parties to the 1991 Fish and Wildlife Agreement and the Native Village of Eklutna to study pumped storage hydropower as an alternative, noted the Governor's ability to alter the Final Fish and Wildlife Program, and stated that a pumped storage hydropower alternative could ultimately be selected; and,

WHEREAS, in consideration of the Eklutna Hydroelectric Project owners' desire to

use AWWU facilities in the Fish and Wildlife Program and in recognition of the impending need to replace the 1984 Agreement for Public Water Supply and Energy Generation, the Project owners and AWWU negotiated three draft agreements that, if executed, would set the terms for the owners' use of AWWU infrastructure as part of the Fish and Wildlife Program and replacing the 1984 agreement with a new Public Water Supply Agreement that gives AWWU the option to obtain priority water rights at Eklutna Lake in 2055: the Water Facilities Interconnection Agreement (Exhibit A); Long-Term Water Transportation Agreement (Exhibit B); Public Water Supply Agreement (Exhibit C); and,

WHEREAS, the Long-Term Water Transportation Agreement, the Interconnection Agreement, and the Public Water Supply Agreement negotiated by the Parties contain terms to facilitate the implementation of a Final Program that uses the Facility and the Facility's long-term operation, but the original versions of these agreements did not contemplate the Governor's potentially selecting a pumped storage hydropower alternative as a major component of the Final Fish and Wildlife Program, rendering certain additions to the agreements appropriate; and,

WHEREAS, "the municipality may dispose of municipal land or any interest therein only by ordinance;" (AMC 25.30.020A) and interests in municipal land include "water rights;" (AMC 25.30.020B) and furthermore, "[a]ny conveyance, disposal, contract, or other agreement that transfers or conveys substantial or total control over the operation or use of a municipal property or facility shall be treated as a disposal for purposes of this subsection and require an ordinance," (AMC 25.30.020D) now, therefore,

THE ANCHORAGE ASSEMBLY ORDAINS:

Section 1. *After deleting Article 14.5(b) of the Water Facilities Interconnection Agreement, the [The]* authorized representatives for AWWU and AHP may execute the Water Facilities Interconnection Agreement (Exhibit A) and, if that agreement is executed by all parties, act upon the Municipality's obligations contained therein.

Section 2. The authorized representatives for AWWU and AHP may execute the Long-Term Water Transportation Agreement (Exhibit B) and, if that agreement is executed by all parties, act upon the Municipality's obligations contained therein.

Section 3. The authorized representatives for AWWU and AHP may execute the Public Water Supply Agreement (Exhibit C) and, if that agreement is executed by all parties, act upon the Municipality's obligations contained therein.

Section 4. By enacting this ordinance, the Assembly does not waive any rights, remedies, or causes of action under the 1991 Fish and Wildlife Agreement.

Section 5. *The approvals in Sections 1 to 3 shall become effective only after all of the following have occurred: (1) Chugach Electric Association ("CEA") and Matanuska Electric Association, Inc. ("MEA") have committed in writing to support in good faith, before the Regulatory Commission of Alaska ("RCA") and any other*

appropriate forum, AHP's efforts to regain its vote on the Eklutna Hydroelectric Project on a per capita basis, with AHP, CEA and MEA each holding one equal vote; (2) AHP submits a modified request for a per capita vote; and (3) CEA and MEA submit, within 3 days of AHP's modified request, a suitable response supporting AHP's modified request and withdrawing any prior objections that are inconsistent with CEA and MEA's commitment to support AHP's modified request. The Municipal Attorney shall authorize execution of the agreements by the authorized representatives of AWWU and AHP when these conditions have been satisfied and inform the Assembly accordingly.

Section 6. *This ordinance shall become effective upon passage and approval by the Assembly.*

PASSED AND APPROVED by the Anchorage Assembly this 16th day of December, 2025.

Chair

ATTEST:

Municipal Clerk

MUNICIPALITY OF ANCHORAGE

Assembly Memorandum

AM No. 352-2025

Meeting Date: April 22, 2025

FROM: MAYOR

SUBJECT: AN ORDINANCE AUTHORIZING THE MUNICIPALITY OF ANCHORAGE, ANCHORAGE WATER & WASTEWATER UTILITY (AWWU), AND THE MUNICIPALITY OF ANCHORAGE, ANCHORAGE HYDRO POWER (AHP) TO EXECUTE AND ENTER INTO THREE AGREEMENTS PERTAINING TO THE MUNICIPAL PUBLIC WATER SUPPLY AND THE EKLUTNA HYDROELECTRIC PROJECT FISH AND WILDLIFE PROGRAM.

Anchorage Water & Wastewater Utility (AWWU) previously brought to the Assembly for its consideration three draft agreements related to the Municipality of Anchorage's public water supply and the use of AWWU facilities as part of the Final Fish and Wildlife Program for the Eklutna Hydropower Project (the Project). AWWU's original ordinance and accompanying AM (AM 2024-963) attached three proposed contracts: Water Facilities Interconnection Agreement (Exhibit A); Long-Term Water Transportation Agreement (Exhibit B); and Public Water Supply Agreement (Exhibit C).

As AWWU's submission noted, on October 2, 2024, Governor Mike Dunleavy established a Final Fish and Wildlife Program under the 1991 Fish and Wildlife Agreement for the Eklutna Hydropower Project that could utilize AWWU facilities at Eklutna. The Governor further directed the parties to the 1991 Fish and Wildlife Agreement and the Native Village of Eklutna to study pumped storage hydropower as an alternative, noted the Governor's ability to alter the Final Fish and Wildlife Program, and stated that a pumped storage hydropower alternative could ultimately be selected.

The original contracts attached to AWWU's prior submission to the Assembly were all negotiated before the Governor's October 2, 2024 decision and do not contemplate the Governor's potentially selecting a pumped storage hydropower alternative as a major component of the Final Fish and Wildlife Program. Accordingly, the Municipal Manager has submitted an S-version of AO 2024-123 and includes as Exhibits A- C to this Memorandum, updated versions of the three agreements.

The updated agreements contain additional factual recitals at the beginning and a new article at the end, that provide for (1) negotiation of replacement agreements to accommodate a pumped storage hydropower program upon completion of the pumped storage hydropower study; and (2) if pumped storage hydropower is ultimately selected by the Governor, suspension of the three agreements and

execution of the negotiated new agreements. These contracts have not yet been approved by the other parties, but they are unchanged in all other material terms.

AO 2024-123(S) and this Memorandum make no changes to Exhibits D, E, and F to AWWU's AM 2024-963 and incorporate AM 2024-963 by reference.

Prepared by:	Eva R. Gardner, Municipal Attorney
Concur:	Mark Corsentino, Director, Anchorage Hydropower Utility
Concur:	David Persinger, General Manager, Anchorage Water & Wastewater Utility
Concur:	Rebecca A. Windt Pearson, Municipal Manager
Respectfully submitted:	Suzanne LaFrance, Mayor

WATER FACILITIES INTERCONNECTION AGREEMENT

This WATER FACILITIES INTERCONNECTION AGREEMENT (this "Agreement"), dated as of [_____] (the "Effective Date"), is entered into by and between Anchorage Water and Wastewater Utility ("AWWU"), and Chugach Electric Association, Inc. ("Chugach"), Matanuska Electric Association, Inc. ("MEA"), and the Municipality of Anchorage ("MOA") (each of Chugach, MEA, and MOA is an "Owner" and collectively they are referred to as the "Owners"). The Owners and AWWU are sometimes referred to herein as a "Party" or collectively as the "Parties".

R E C I T A L S

WHEREAS, the Owners own and operate the Eklutna Hydroelectric Project, commissioned in 1954, which includes an earthen dam at the outlet of Eklutna Lake and which, under normal operating conditions, diverts the inflows of all water into the Eklutna Lake for hydroelectric production rather than into the Eklutna River;

WHEREAS, AWWU owns and operates certain existing water diversion and transportation facilities integrated with the Eklutna Hydroelectric Project as further detailed in Exhibit B (the "AWWU Facilities") located near the outlet of Eklutna Lake and adjacent to the Eklutna River, and AWWU uses such AWWU Facilities to provide public water supply for its customers;

WHEREAS, the Owners are parties to the 1991 Agreement (as defined below), pursuant to which they are required to develop and implement a Fish and Wildlife program every thirty-five years to protect, mitigate damages to, and enhance fish and wildlife impacted by the development of the Eklutna Hydroelectric Project (the "Fish and Wildlife Program");

WHEREAS, as a result of the process set forth in the 1991 Agreement, the Owners have developed a draft Fish and Wildlife Program in which the Owners have proposed to: (1) develop an Eklutna River release facility consisting in part of AWWU Facilities and facilities constructed pursuant to this Agreement, all as further described and depicted in Exhibit A-1, Exhibit A-2, and Exhibit A-3 (the "Facility"); (2) to transport water from Eklutna Lake through the Facility and release it into the Eklutna River; and (3) to operate and maintain the Facility;

WHEREAS, in connection with their proposal to develop the Facility, the Owners have also agreed to install bridges at eight locations across the Eklutna River to improve and preserve access to AWWU Facilities, as further described in Exhibit K (the "Access Bridges");

WHEREAS, in connection with the execution of this Agreement and in order to enable future implementation of the Fish and Wildlife Program (if approved), and to address compensation for AWWU's present and future use of a portion of Owners' water rights, the Parties are also entering into a Long-Term Water Transportation Agreement (the "Transportation Agreement") and a new Public Water Supply Agreement (the "Water Supply Agreement");

WHEREAS, Owners desire to construct the Facility in coordination with AWWU and AWWU is willing to allow for the interconnection and use of AWWU Facilities as part of the

Facility and to otherwise cooperate with Owners all pursuant to the terms and conditions set forth in this Agreement;

WHEREAS, on October 2, 2024, Alaska Governor Mike Dunleavy established a Final Fish and Wildlife Program for the Eklutna Hydropower Project that directed the parties to the 1991 Agreement and the Native Village of Eklutna to study pumped storage hydropower as an alternative to the Facility, noted the Governor's ability to alter the Final Fish and Wildlife Program, and stated that a pumped storage hydropower alternative could ultimately be selected; and

WHEREAS, the Long-Term Water Transportation Agreement, the Interconnection Agreement, and the Public Water Supply Agreement negotiated by the Parties contain terms to facilitate the implementation of a Final Program that uses the Facility and the Facility's long-term operation, but the original versions of these agreements did not contemplate the Governor's potentially selecting a pumped storage hydro alternative as a major component of the Final Fish and Wildlife Program, rendering certain additions appropriate; and

NOW, THEREFORE, in consideration of the premises of this Agreement, the Transportation Agreement, and the Water Supply Agreement, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Owners and AWWU, intending to be legally bound, hereby agree as follows:

ARTICLE 1.
DEFINITIONS; INTERPRETATION; EXHIBITS

1.1 Defined Terms. Capitalized terms used in this Agreement without other definition shall have the meanings set forth in Schedule 1.1, unless the context requires otherwise.

1.2 Interpretation. As used in this Agreement, the terms "herein," "herewith" and "hereof" are references to this Agreement, taken as a whole; the terms "includes" or "including" shall mean "including, without limitation"; and references to a "Section," "Article", "Exhibit" or "Schedule" shall mean a Section, Article, Exhibit or Schedule of this Agreement, as the case may be, unless in any such case the context requires otherwise. All references to a given Exhibit, Schedule, agreement, instrument or other document shall be a reference to that agreement, instrument or other document as modified, amended, supplemented and restated through the date as of which such reference is made. A reference to a Person includes its permitted successors and permitted assigns. The singular shall include the plural and the masculine shall include the feminine and neuter, and vice versa.

ARTICLE 2.
OWNERS RESPONSIBILITIES

2.1 General Responsibilities of Owners. Subject to Sections 4.1, 4.3 and 4.4, the Owners shall be responsible for designing, engineering, obtaining all Approvals for (except with respect to AWWU Approvals), constructing and performing related activities for the successful completion of (i) the Facility and interconnection of the Facility to the AWWU Facilities pursuant

to the Facility Criteria; and (ii) the Access Bridges, the costs of which shall be paid for by the Owners.

2.2 Standard of Work; Skill and Expertise. Throughout the performance of all aspects of the Work, the Owners shall comply with, and shall ensure that each Subcontractor complies with, all applicable Laws and Prudent Industry Standards (the "Standard of Work"). The Owners shall, throughout the performance of the Work, use commercially reasonable efforts to ensure that all employees and contractors engaged in connection with the maintenance of, operation of, service of, and any future modification to (to include design, construction, commissioning, and installation) the Facility shall have the appropriate and necessary experience, skill and expertise to carry out the tasks efficiently, professionally, and in accordance with the Standard of Work.

2.3 Scope of Work. Without limiting the generality of Sections 2.1 and 2.2, the Owners shall perform all of the specific tasks in accordance with the Scope of Work and the Project Schedule, subject to any Change Orders pursuant to ARTICLE 7, in order to achieve Commercial Operation and Final Acceptance of the Facility in accordance with ARTICLE 4, and to commence the Parties' obligations under the Transportation Agreement, whereupon the Work under this Agreement shall be concluded and the obligations under the Transportation Agreement shall begin.

2.4 Project Manager. The Owners shall identify to AWWU and at all times during the term of this Agreement maintain a Project Manager. The Project Manager shall act as AWWU's primary point of contact with the Owners with respect to the Work, and shall be available to meet with AWWU as reasonably requested by AWWU to discuss the Work or any issue related thereto. The Project Manager shall have full authority to act for the Owners under this Agreement; provided, that the Project Manager shall under no circumstances have the authority to amend (except for the issuance of Change Orders), terminate, or assign this Agreement. The Owners may change the Project Manager at any time upon written notice to AWWU. As of the Effective Date, the Project Manager is listed in Exhibit E.

2.5 Status of Individual Owners. Each of the Owners shall be jointly and severally liable for the obligations of the Owners under this Agreement. The delineation of specific responsibilities set forth hereunder as among the Owners shall be at the sole discretion of the Owners, not AWWU. If, at any time, the Owners agree that one or two of the Owners need no longer be party to this Agreement, such unnecessary Owner(s) may be removed as parties to this Agreement upon written notice to AWWU and, if agreed, shall retain no liability upon removal, with the remaining Owner(s) automatically assuming the full obligations of the Owners hereunder. If an Event of Default exists hereunder at any time with respect to an Owner, it shall be considered an Event of Default with respect to the Owners together as one Party hereunder, provided, that if another Owner agrees to assume such defaulting Owner's obligations under this Agreement by removing such Owner as a party pursuant to the preceding sentence of this Section 2.5 prior to the expiration of any applicable cure period, this shall not be considered an Event of Default hereunder.

ARTICLE 3.
AWWU RESPONSIBILITIES

3.1 Access to Site. As of the Effective Date, AWWU shall, with respect to the land and AWWU Facilities within its control, provide the Owners with a non-exclusive license to access the Site and the AWWU Facilities necessary to enable the Owners to perform their obligations under this Agreement in accordance with the Project Schedule, provided, that AWWU may from time to time limit access to the Site or the AWWU Facilities under AWWU control temporarily only to the extent necessary to address reasonable security or safety issues, and to avoid putting AWWU's public water supply at risk of interruption or contamination. To the extent that any additional access permissions from third-party landowners adjacent to the Site may be required for Owners to access the Site and conduct the Work pursuant to the site license granted under this Section 3.1, obtaining such Approvals shall be the responsibility of the Owners, provided that (i) AWWU shall be responsible for any such permissions associated with the construction and maintenance of the Access Bridges; (ii) if the Parties agree that in certain other circumstances AWWU responsibility is more appropriate, AWWU shall bear such responsibility; and (iii) AWWU shall assist the Owners with obtaining such Approvals as is reasonably requested by the Owners, including by being the first and primary point of contact with such third party in situations where AWWU has an existing easement or applicable existing relationship with such third party. To the extent that AWWU adds access or other security limitations to the Site, to the Owners' Portion, or to the AWWU Facilities, the Owners and AWWU shall cooperate to ensure continuous access for the Owners and their contractors, to enable them to perform the Owners' obligations under this Agreement.

3.2 Required Approvals. After the Owners' achievement of the Construction Start CPs, AWWU shall be responsible for obtaining and maintaining those Governmental Approvals and third-party approvals necessary for the completion of the Work as set forth on Exhibit F hereto (the "AWWU Approvals"), any costs of which shall be initially paid for by AWWU and reimbursed by Owners pursuant to Section 5.3. The Owners shall provide AWWU with such reasonable assistance as AWWU may request in obtaining such AWWU Approvals.

3.3 AWWU Representative. AWWU shall designate in writing and maintain at all times during the term of this Agreement an AWWU Representative to represent AWWU and to receive communications from the Owners with regard to the Work and the development of the Facility and the Access Bridges. The AWWU Representative shall act as the Owner's primary point of contact with the AWWU with respect to the Work, and shall be available to meet with the Owners and Project Manager, as reasonably requested, to discuss the Work or any issue related thereto. The AWWU Representative shall have full authority to act for AWWU under this Agreement; provided, that AWWU's Representative shall under no circumstances have the authority to amend (except for the signing of Change Orders), terminate or assign this Agreement. AWWU may change the AWWU Representative at any time upon written notice to the Owners. As of the Effective Date, the AWWU Representative shall be [_____][2].

[2] **Note to Accompany Final Draft**: To be populated after Governor approval and prior to execution.

3.4 Duty to Cooperate. AWWU shall, throughout the performance of the Work, cooperate with the Owners and perform its responsibilities, obligations and services under this Agreement in a timely manner, to facilitate the Owners timely and efficient performance of the Work and the Owners' obligations under this Agreement. AWWU shall provide timely reviews and approvals, including completing the design approval set forth in Section 4.3, such approvals not to be unreasonably withheld or delayed.

3.5 Site and AWWU Facilities Information. Except as set forth on Schedule 3.5, AWWU hereby represents and warrants that the conditions of the Site and of the AWWU Facilities are suitable for the Work and the completion of the Facility. AWWU hereby acknowledges that the Owners shall be entitled to rely on Schedule 3.5 and Exhibit B in preparing their assessment of the Work necessary to complete the Facility, as well as their work preparing the Project Schedule; and that if any information contained in Schedule 3.5 or Exhibit B is later found to be inaccurate, the Owners shall be entitled to a Change Order at their discretion pursuant to Section 7.3.

ARTICLE 4.
CONDITIONS PRECEDENT; PROJECT SCHEDULE, DESIGN APPROVAL

4.1 Construction Start Conditions Precedent.

(a) The obligations of the Owners to design, engineer, permit and construct the Facility as set forth in this Agreement, and the right of the Owners to conduct Work at the Site, and to physically interconnect the Facility with the AWWU Facilities as set forth in this Agreement, shall not be effective until the achievement of the following conditions precedent (the "Construction Start CPs"):

(i) The Owners receive final approval from the Governor of Alaska, with such approval not subject to any pending judicial review or appeal, for a Fish and Wildlife Program that requires the use of the AWWU Facilities as contemplated in this Agreement, provided that such approval includes no unexpected conditions materially adverse to the Owners or to AWWU, as determined in good faith by the Parties and in the exercise of commercially reasonable business judgment;

(ii) The Owners are issued lawful documentation from the Alaska Department of Natural Resources authorizing the use and transport of water as contemplated under the Transportation Agreement, including but not limited to an amendment of the Owners' Water Rights or other approval(s) authorizing a change of use to allow the Owners to use a portion of the Owners' Water Right to establish and continue instream flows in the Eklutna River;

(iii) The Owners and AWWU, with regard to AWWU Approvals, have obtained all Approvals necessary to conduct the Work; and

(iv) The Transportation Agreement and the Water Supply Agreement are in full force and effect and are valid, binding and enforceable against AWWU and the Owners in accordance with their terms.

(b) Notwithstanding Section 4.1(a), nothing in this Agreement shall be construed to prevent the Owners from conducting design and permitting work in preparation for Facility construction prior to the achievement of the Construction Start CPs. Such pre-construction Work shall be done at the sole discretion and financial risk of the Owners, and shall be treated as Work for which all of AWWU's duties and responsibilities hereunder shall apply unless otherwise stated.

4.2 Project Schedule. The Owners shall perform all Work in accordance with the Scope of Work and the Project Schedule. The Owners shall use commercially reasonably efforts to meet all milestones set forth in the Project Schedule, provided that all such milestones may be extended at the discretion of the Owners as may be reasonably necessary to accommodate delays in the achievement of the Construction Start CPs or the receipt of necessary Approvals that are outside the control of the Owners.

4.3 Submission for Design Approval. As of the Effective Date, the proposed design for the Facility is set forth in Exhibit A-3. The Owners may modify such design at their discretion until the achievement of the Construction Start CPs, at which point prior to the commencement of any construction activities at the Site, the Owners shall provide to AWWU final design drawings and proposals (and any applicable calculations, models, and reports developed in support thereof) for the Facility for AWWU's review and approval, such approval to not be unreasonably withheld or delayed. AWWU shall indicate to the Owners within thirty 30 Days after receipt of such design drawings, proposals, calculations, models, and reports whether it approves or denies the design. If AWWU denies the design, the parties shall work in good faith to resolve the applicable issues and develop an updated design for AWWU approval.

4.4 Failure to Obtain Approvals. If, at any point during the Owners performance of the Work, the Owners or AWWU are unable to obtain any Approval necessary to construct or operate the Facility as intended herein and in the Fish and Wildlife Program, despite taking all reasonable commercial efforts to obtain such Approvals, then either Party may terminate this Agreement upon forty-five (45) Days prior written notice; and the Owners shall restore the site pursuant to Section 11.7.

4.5 Installation; Testing Procedures.

(a) Conduct of Tests. As soon as possible after installation of all Equipment necessary, as determined by the Owners in their sole discretion, to render the Facility mechanically and structurally complete, the Owners shall begin to conduct, or cause to be conducted, the Commissioning Procedures, in accordance with this Section 4.5 and the Commissioning Procedures Guidelines. Owners may perform and re-perform any number of Commissioning Procedures in accordance with the Commissioning Procedures Guidelines, and the Owners, at their discretion, may prematurely terminate any Commissioning Procedures so long as the remaining Commissioning Procedures are completed prior to Commercial Operation.

(b) AWWU Personnel. The Owners shall provide AWWU at least two (2) Business Days' prior notice of the intended commencement of the Commissioning Procedures. AWWU shall have at least one representative at the Site throughout the performance of the Commissioning Procedures, in order to monitor the taking of measurements to determine the

performance and safety of the Facility, all in accordance with the Commissioning Procedures Guidelines.

4.6 Commercial Operation. When the Owners consider that the criteria for Commercial Operation have been met, including successful completion of the Commissioning Procedures in accordance with Section 4.5, the Owners shall so notify AWWU in writing, and shall provide AWWU with a completed Commercial Operation certificate issued by an independent licensed professional engineer, in the form set forth in Exhibit H (the "Commercial Operation Certificate").

4.7 Final Acceptance. The criteria for achieving Final Acceptance shall be that: (a) Commercial Operation has occurred; (b) AWWU has received from the Owners copies of all as-built drawings for the Work and the Facility; (c) AWWU has received from Owners all Equipment Documentation related to the AWWU Portion; (d) Owners have removed from the Site and properly disposed of all wastes created at or brought onto the Site by the Owners; and (e) an Owners' training program for AWWU's operation and maintenance personnel has been completed in accordance with the Scope of Work. When the Owners consider that the criteria for Final Acceptance have been met, the Owners shall so notify AWWU in writing. Within five (5) Days thereafter, AWWU shall either: (i) notify the Owners in writing that it agrees that Final Acceptance has been achieved, or (ii) advise the Owners of the items in Section 4.7(a) through (e) (collectively, "Final Acceptance Items") that AWWU believes have not yet been satisfied. Upon receipt of any notice from AWWU of an alleged failure to satisfy a Final Acceptance Item, the Owners shall either: (A) satisfy such Final Acceptance Item(s); or (B) advise AWWU in writing that the Owners believes in good faith that all Final Acceptance Item(s) have been satisfied and shall request the commencement of negotiations pursuant to Section 11.5(a).

4.8 Post-Completion Facility O&M. Upon Final Acceptance and the applicable title transfers set forth in ARTICLE 6, AWWU shall be responsible for operating and maintaining the AWWU Facilities and the AWWU Portion; and the Owners shall be responsible for operating and maintaining the Owners' Portion. Each of AWWU and the Owners shall also have further specific ongoing operations and maintenance obligations for portions of the Facility during the "Delivery Term" of the Transportation Agreement, as further detailed in the Transportation Agreement.

4.9 Post-Completion Access Bridge Maintenance. Upon completion of any Access Bridge by the Owners, and possession and applicable title having passed to AWWU pursuant to Section 6.1(d), full responsibility for (and associated costs of) such Access Bridge maintenance shall belong to AWWU, except that the Owners shall use commercially reasonable efforts to obtain a one-year materials and workmanship warranty from the contractor(s) engaged by the Owners to construct the Access Bridges and then shall pass such warranty on to AWWU.

4.10 Skill and Expertise. Each Party shall use commercially reasonable efforts to ensure that all employees and contractors engaged in connection with the maintenance of, operation of, service of, and any future modification to (to include design, construction, commissioning, and installation) the Facility shall have the appropriate and necessary experience, skill and expertise to carry out the tasks efficiently, professionally, and in accordance with Prudent Industry Standards and applicable Laws.

ARTICLE 5.
COSTS; TAXES; REIMBURSEMENT

5.1 Costs. All costs to complete the Facility and perform the Work hereunder shall be the responsibility of Owners. The Owners shall reimburse AWWU pursuant to Section 5.3 for AWWU's reasonable actual costs related to or arising out of the development and construction of the Facility and related to all of AWWU's responsibilities set forth in ARTICLE 3, including but not limited to documented direct and indirect costs, overhead, general and administrative costs, staff time, and all other costs related to or arising out of the planning, engineering and project management associated with the Facility; provided that AWWU shall use commercially reasonable efforts to minimize such costs.

5.2 Taxes. The Owners shall be responsible for and shall pay any sales, use, gross receipts, occupation, and other taxes (excluding income and franchise tax imposed upon AWWU) that from time to time may become payable as a consequence of this Agreement.

5.3 Payments. For any costs described in Section 5.1 initially borne by AWWU, AWWU shall submit to each of the Owners a detailed accounting of such cost for which AWWU is seeking reimbursement, together with such supporting documentation as the Owners shall reasonably require. Within sixty (60) Days after receiving a properly completed application for reimbursement and all required supporting documentation, each of the Owners shall individually: (i) pay AWWU their respective Cost Responsibility Proportion of the amounts set forth in AWWU's application for payment; or (ii) notify AWWU in writing that such Owner believes in good faith that a requested payment amount is not due and owing and shall request the commencement of negotiations pursuant to Section 11.5(a). In addition to the requirement that each Owner pay its Cost Responsibility Proportion as required in this Section, the Owners shall each be jointly and severally liable for all reimbursement obligations owed to AWWU under this Article 5.

ARTICLE 6.
TITLE; LOSS OR DAMAGE; FORCE MAJEURE

6.1 Title.

(a) Legal title to and ownership of the AWWU Portion shall pass to AWWU upon achievement of Final Acceptance free and clear of any and all liens, claims, security interests or other encumbrances. Title to drawings, specifications and like materials provided by Owners with respect to the AWWU Portion shall also pass to AWWU upon achievement of Final Acceptance. Owners shall deliver to AWWU such assignments, bills of sale or other documents as reasonably requested by AWWU to evidence such transfers of title and ownership.

(b) Legal title to and ownership of the Owners' Portion shall remain with Owners after Final Acceptance and throughout the term of the Transportation Agreement, free and clear of any and all liens, claims, security interests or other encumbrances imposed by AWWU.

(c) Legal title to and ownership of the AWWU Facilities shall remain with AWWU before, during, and after the construction of the Facility.

(d) Legal title to and ownership of any Access Bridge shall pass to AWWU upon completion of such Access Bridge. Owners shall deliver to AWWU such assignments, bills of sale or other documents as reasonably requested by AWWU to evidence such transfers of title and ownership, and if the Parties determine that an additional agreement between the Parties is necessary to detail specific Access Bridge construction and ownership transfer terms and conditions, the Parties shall negotiate such documentation in good faith and in accordance with the terms of this Agreement.

(e) Legal title to and ownership of all Owners' Water shall remain with the Owners at all times during construction of the Facility, including during the performance of the Commissioning Procedures.

6.2 Risk of Loss.

(a) Equipment. Notwithstanding anything herein to the contrary, the Owners shall have the full responsibility for care, custody and control of material and Equipment incorporated into the Work (including all Equipment and materials used in connection therewith), and shall bear the risk of loss thereof, until an applicable transfer of title to the Equipment for the AWWU Portion occurs, at which time risk of loss shall pass to AWWU.

(b) Water. For any quantity of Owners' Water flowing through AWWU's Facilities as part of the Commissioning Procedures or otherwise during the construction of the Facility: control, custody and risk of loss of such Owners' Water shall transfer from the Owners to AWWU at the Injection Point, where such Owners' Water shall comingle with AWWU's Water until reaching the Delivery Point, at which point the custody, control and risk of loss of a quantity of water equal to the original quantity of Owners' Water released into the AWWU Facilities at the Injection Point shall pass back to the Owners.

6.3 Force Majeure. Each Party shall be excused from performance and shall not be considered to be in default with respect to any obligation hereunder, except for the Owners' obligation to reimburse AWWU for costs pursuant to ARTICLE 5, if and to the extent that such Party's failure of, or delay in, performance is due to a Force Majeure Event; provided, that:

(a) such Party gives the other Party prompt written notice describing the particulars of the Force Majeure Event as soon as is reasonably practicable after becoming aware of the occurrence of the Force Majeure Event;

(b) the suspension of performance is of no greater scope and of no longer duration than are reasonably required by the Force Majeure Event;

(c) no obligations of an affected Party that arose before the occurrence of the Force Majeure Event causing the suspension of performance shall be excused as a result of such Force Majeure Event, unless and only to the extent that the performance of such obligations is impaired by the Force Majeure Event;

(d) the Party uses diligent commercially reasonable efforts to overcome or mitigate the effects of the Force Majeure Event; and

(e) when the Party is able to resume performance of its obligations under this Agreement, such Party shall give the other Party written notice to that effect, and shall promptly resume performance hereunder.

ARTICLE 7.
CHANGES

7.1 Change Orders. The Owners may propose Change Orders to AWWU if those Change Orders: (i) improve the Facility; (ii) are required by a Governmental Authority as a condition precedent to issuance of any Governmental Approval; or (iii) are otherwise advisable for the Work. This shall not affect the obligation of the Owners to perform the Work and to install the Facility in accordance with the terms of this Agreement, except as otherwise set forth in the Change Order or in Sections 7.2 or 7.3.

7.2 Changes to Project Schedule. In the event that any Change Order affects the amount of time needed to complete any portion of the Work, there shall be an equitable adjustment of the time of performance and the Project Schedule, as agreed to by the Parties.

7.3 Unanticipated Conditions. If any unusual or unanticipated conditions exist or arise at the Site such as Hazardous Materials, structural or geotechnical deficiencies, environmental conditions, pollution or archeological findings not known to the Owners as of the Effective Date (collectively, "Unanticipated Conditions"), which conditions would involve the Owners incurring any expenses or delays to correct such conditions, the Owners shall submit a request for approval of the corrective work and expense pursuant to a Change Order, the approval of which by AWWU shall not be unreasonably withheld, conditioned or delayed, and such corrective work shall be deemed incorporated into the Scope of Work; provided, however, if any Unanticipated Conditions exist or arise that are contrary to those set forth on Schedule 3.5 or Exhibit B, then the Change Order submitted by the Owners in connection with such Unanticipated Conditions shall be deemed to be automatically approved by AWWU. All change orders under this Agreement shall be fulfilled at the sole expense of the Owners.

ARTICLE 8.
WARRANTIES

8.1 Warranties.

(a) Except as expressly set forth in Section 8.1(b), Owners do not make (and hereby expressly disclaim) any other warranties of any kind whatsoever.

(b) The Owners hereby warrant that as of the Commercial Operation Date: (i) the Facility will meet the requirements set forth in the Facility Criteria; (ii) the Facility will be free from defects in workmanship under normal operating conditions, provided that such warranty shall not apply to existing AWWU Facilities incorporated within the Facility; (iii) all Work will have been performed in accordance with Prudent Industry Standards and all requirements of this Agreement; and (iv) the Work, including but not limited to each item of Equipment incorporated therein, will be new and shall conform in all material respects with the plans and specifications prepared in accordance with this Agreement and all descriptions set forth herein.

(c) In conjunction with achievement of the Commercial Operation Date, the Owners hereby agree to assign to AWWU, and AWWU agrees to assume, all Subcontractor, supplier and manufacturer warranties set forth on Exhibit G relating to the AWWU Portion, and thereafter AWWU shall pursue all warranty claims thereunder directly with such Subcontractors, suppliers and manufacturers.

8.2 Warranty Period. Owners shall remedy any breach of the warranties set forth in Sections 8.1(b) discovered within 12 months of the Commercial Operation Date (the "Warranty Period").

8.3 Remedies. If the warranty set forth in Section 8.1 is breached or a defect or deficiency is discovered by Owners or AWWU during the Warranty Period, Owners shall repair, replace, and/or correct the applicable Work on a reasonably expedited basis while minimizing any impact of the failure on Facility availability and functionality or AWWU Facilities availability and functionality. AWWU shall permit the Owners access to the AWWU Facilities and the AWWU Portion necessary or useful to perform Owners' warranty obligations under this Agreement. All costs of Owners' performance of their warranty obligations shall be borne by Owners, including any removal, replacement and reinstallation of Equipment and materials necessary to gain access to defective Work.

8.4 Warranty Exclusions. The warranty obligations set forth in this ARTICLE 8 do not extend to Work that is damaged by or other potential warranty claims arising from: (a) the negligent acts or omissions of AWWU or its contractors, agents, employees, representatives or any other Person acting on behalf of AWWU; (b) Force Majeure Events; (c) any Equipment included in the AWWU Portion that is not maintained and operated by AWWU in accordance with all Equipment Documentation; (d) normal wear and tear; (e) any alteration, repair or replacement made without the prior written approval of the Owners or contrary to instructions from the Owners; or (f) conditions that existed prior to the completion of the Work, including any defects or deficiencies in any equipment included in AWWU Facilities not directly caused by the Owners as part of the Work (collectively, "Non-Owner Work"). In the event that the warranty service requested is related to Non-Owner Work or is covered by any warranty set forth on Exhibit G, the Owners shall have no further obligation.

8.5 NO IMPLIED WARRANTIES. EXCEPT AS EXPRESSLY PROVIDED IN THIS AGREEMENT, THE OWNERS MAKE NO WARRANTIES OR GUARANTEES, EXPRESS OR IMPLIED, AND AWWU DISCLAIMS ANY WARRANTY OR GUARANTEE IMPLIED BY LAW, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT AND IMPLIED WARRANTIES OF CUSTOM OR USAGE.

ARTICLE 9.
LIMITATIONS ON LIABILITY

9.1 Aggregate Limitation of Liability. Notwithstanding any other provision of this Agreement, the total aggregate liability of the Owners and the total aggregate liability of AWWU arising out of or relating to this Agreement, from any and all causes, whether based on contract, tort (including negligence), strict liability or any other cause of action, shall in no event exceed ten

million dollars ($10,000,000) for AWWU, and ten million dollars ($10,000,000) for the Owners collectively, provided that such limit shall not apply in the case of such Party's (i) gross negligence or willful misconduct, (ii) third-party indemnity obligation, or (iii) breach of any representation or warranty.

9.2 CUMULATIVE REMEDIES. IF NO REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY PROVIDED, OR IF A REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY NON-EXCLUSIVE, THE NON-DEFAULTING PARTY SHALL HAVE THE RIGHT TO EXERCISE ALL RIGHTS AND REMEDIES AVAILABLE TO IT AT LAW OR IN EQUITY; PROVIDED, HOWEVER, THAT THE LIABILITY OF THE DEFAULTING PARTY SHALL BE LIMITED TO DIRECT, ACTUAL DAMAGES ONLY AND ALL OTHER DAMAGES AND REMEDIES ARE WAIVED.

9.3 WAIVER OF CERTAIN DAMAGES. EXCEPT WITH RESPECT TO INDEMNIFICATION OF THIRD PARTY CLAIMS PURSUANT TO ARTICLE 10, OR AS OTHERWISE EXPRESSLY PROVIDED FOR HEREIN, IN NO EVENT SHALL EITHER PARTY BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY, INDIRECT, BUSINESS INTERRUPTION OR SIMILAR DAMAGES, WHETHER BY STATUTE, IN TORT, BY CONTRACT OR OTHERWISE.

ARTICLE 10.
INDEMNIFICATION

10.1 Indemnity. To the fullest extent permitted by Law, each Party shall indemnify, hold harmless and defend the other Party and its directors, officers, shareholders, partners, agents and employees, and the Affiliates of the same (collectively, the "Indemnified Parties"), from and against any and all claims, loss, damage, expense and liability, including court costs and reasonable attorneys' fees (collectively, "Liabilities") incurred by the Indemnified Parties in connection with or arising from (i) the Work; and (ii) any claim for physical damage to or physical destruction of any part of the Facility, the AWWU Facilities, or death of or bodily injury to any person, to the extent any such Liability was caused by the negligence of the Indemnifying Party or its agents or employees or others under such Indemnifying Party's control, except any Liabilities incurred due to the negligence or willful misconduct of an Indemnified Party. For the purpose of the definition of "Indemnified Parties" AWWU shall not be considered to be an "Affiliate" of the MOA.

10.2 Environmental Indemnity. Notwithstanding any other provision hereof, each Party shall indemnify, defend and hold harmless the other Party and its Indemnified Parties from and against all Liabilities arising out of or relating to the existence at, on, above, below or near the Site of any Hazardous Material to the extent such Hazardous Material is deposited, spilled, released or otherwise caused by the Indemnifying Party or its Subcontractors or agents in connection with the Work.

10.3 Defense of Claims. A Party with an indemnification obligation pursuant to this ARTICLE 10 (an "Indemnifying Party") shall have the right to defend the Indemnified Parties pursuant to this ARTICLE 10 by counsel of the Indemnifying Party's selection (including insurance counsel) reasonably satisfactory to the Indemnified Party, unless in the opinion of counsel for the Indemnifying Party a conflict of interest between the Parties may exist with respect

to such claim. If the Indemnifying Party does not assume the defense of the Indemnified Party, or if a conflict precludes counsel for the Indemnifying Party from providing the defense, then the Indemnifying Party shall reimburse the Indemnified Party on a monthly basis for the Indemnified Party's defense through separate counsel of the Indemnified Party's choice. Even if the Indemnifying Party assumes the defense of the Indemnified Party with acceptable counsel, the Indemnified Party, at its sole option, may participate in the defense, at its own expense, with counsel of its own choice without relieving the Indemnifying Party of any of its obligations hereunder. The Parties shall give each other prompt written notice of any asserted claims or actions indemnified against hereunder and shall cooperate with each other in the defense of any such claims or actions. Without the prior written consent of the Indemnified Party, which consent shall not be unreasonably withheld, conditioned or delayed, no Indemnifying Party shall settle any such claims or actions in a manner that would require any action or forbearance from action by any Indemnified Party.

ARTICLE 11.
DEFAULT AND REMEDIES; TERMINATION; DISPUTE RESOLUTION

11.1 Event of Default. The following shall constitute events of default on the part of either party (each, an "Event of Default") under this Agreement:

(a) If a Party makes a general assignment for the benefit of its creditors, or if a receiver is appointed on account of the insolvency of such Party, or if such Party files a petition seeking to take advantage of any other Law relating to bankruptcy, insolvency, reorganization, winding up or composition of or readjustment of debts and, in the case of any such proceeding instituted against such Party (but not by such Party) such proceeding is not dismissed within sixty (60) days of such filing;

(b) If a Party fails to comply with any material terms of this Agreement not otherwise set forth as an Event of Default in this Section 12.1(b) and fails to cure or remedy such failure within thirty (30) days after notice and a written demand is made by the non-defaulting Party to the defaulting Party to cure the same or, if such failure cannot be cured within thirty (30) days, the defaulting Party fails to commence to cure such failure within thirty (30) days after such notice and written demand and thereafter diligently pursue such cure to completion, which shall in no event be later than ninety (90) days after such notice;

(c) If a Party fails to make any payment due hereunder within sixty (60) days after written notice from the non-defaulting Party;

(d) If a Party defaults under the Water Supply Agreement or the Transportation Agreement; or

(e) If any representation or warranty of a Party in this Agreement proves to have been false or misleading in any material respect when made, and such Party has not, within thirty (30) days after written notification thereof from the non-defaulting Party, either fully remedied, or commenced and diligently pursued the remedy, of all adverse impacts on the non-defaulting Party resulting therefrom, all to the reasonable satisfaction of the non-defaulting Party.

11.2 Remedies Upon Event of Default. Upon the occurrence and continuation of an Event of Default, the non-defaulting Party shall have the right to terminate this Agreement and the Water Supply Agreement upon ten (10) days' prior written notice, and pursue any other remedy available to such non-defaulting party at law or in equity arising out of such Event of Default, including a claim for monetary damage or specific performance.

11.3 Site Restoration Upon Termination. If either Party terminates this Agreement for any reason during construction, the Owners shall promptly withdraw from the Site and shall remove all Equipment, returning the Site to its previous condition, all at Owners' cost, provided that if the Owners terminate for an AWWU Event of Default under this Agreement or the Water Supply Agreement or Transportation Agreement, AWWU shall reimburse the Owners for the costs of such removal.

11.4 Automatic Cross-Agreement Termination. If this Agreement is terminated for any reason, the Water Supply Agreement and the Transportation Agreement shall automatically terminate effective as of the same date as this Agreement's termination.

11.5 Dispute Resolution. In the event of any dispute arising under this Agreement (a "Dispute"), within ten (10) Business Days following notice by either Party, (i) each Party shall appoint a representative, and (ii) the representatives shall meet, negotiate and attempt in good faith to resolve the Dispute quickly, informally and inexpensively. In the event the representatives cannot resolve the Dispute within thirty (30) Days after the first meeting, either Party may request that consideration and resolution of the Dispute be transferred to a designated representative of each Party's senior management. Within ten (10) Days following such a request, each Party shall submit a written summary of the Dispute describing the issues and claims to a senior officer of each Party designated to address the Dispute. Within ten (10) Business Days after receipt of each Party's Dispute summaries, the senior management representatives for both Parties shall negotiate in good faith to resolve the Dispute. If such senior management representatives are unable to resolve the Dispute within thirty (30) Days thereafter, either Party may pursue any available legal remedies.

ARTICLE 12.
REPRESENTATIONS

12.1 General Representations and Warranties. Each Owner and AWWU hereby represents and warrants that:

(a) It is duly organized, validly existing and in good standing under the Laws of the state of its formation and is duly qualified to do business in the jurisdiction where the Site is located.

(b) It has all necessary power and authority to execute, deliver and perform its obligations under this Agreement; its execution, delivery and performance of this Agreement have been duly authorized by all necessary corporate, municipal, or other action on its part; and this Agreement has been duly and validly executed and delivered by it and constitutes its legal, valid and binding obligation enforceable against it in accordance with its terms, except as the enforceability thereof may be limited by bankruptcy, insolvency, reorganization or moratorium or

other similar Laws relating to the enforcement of creditors' rights generally and by general equitable principles.

(c) It is not in violation of any applicable Law, or any judgment entered by any federal, state, local or other Governmental Authority, which violations, individually or in the aggregate, would adversely affect its performance of any obligations under this Agreement. There are no legal or arbitration proceedings or any proceeding by or before any Governmental Authority, now pending or (to its best knowledge) threatened against it which, if adversely determined, could have a material adverse effect upon its financial condition, operations, prospects or business, as a whole, or its ability to perform under this Agreement.

(d) No authorization, approval, exemption, or consent of or by any Person is required by it in connection with the execution, delivery, and performance of this Agreement. In addition, each Party represents and warrants to the other Party that the Governmental Approvals required to be obtained by such Party either have been obtained by such Party and are in full force and effect on the date hereof or will be obtained by such Party and will be in full force and effect on or prior to the date on which they are required, under applicable Law, to be in full force and effect, so as to permit the Owners to commence and prosecute the Work to completion in accordance with the Project Schedule.

(e) The execution and delivery of this Agreement, and the consummation of the transactions herein contemplated and compliance with the terms and provisions hereof by it, will not conflict with or result in a material breach of, or require any consent under, any of its constitutive documents, or any applicable Law, or any agreement or instrument to which it is a party or by which it is bound or to which it is subject, or constitute a material default under any such agreement or instrument.

ARTICLE 13.
NOTICES

13.1 Writing. Except as set forth in Section 13.2, any notice, statement, demand, claim, offer or other written instrument required or permitted to be given pursuant to this Agreement shall be in writing signed by the Party giving such notice and shall be sent by email, facsimile, hand messenger delivery, overnight courier service, or certified mail (receipt requested) to the other Party at the address set forth in Exhibit L. Each Party shall have the right to change the address information to which notice shall be sent or delivered or to specify additional addresses to which copies of notices may be sent, in either case by similar notice sent or delivered in like manner to the other Party. All notices shall be effective upon receipt.

13.2 Technical Communications. Any technical or other communications pertaining to the Work shall be between the Project Manager and the AWWU Representative or other representatives appointed by the Project Manager or the AWWU Representative. Each Party shall notify the other in writing of the name of such representatives. The Project Manager or other designated representatives shall be reasonably satisfactory to AWWU, have knowledge of the Work, and be available at all reasonable times for consultation.

ARTICLE 14.

CONFIDENTIALITY; PUBLIC STATEMENTS

14.1 Confidentiality. The Parties agree that the Parties' proposals, communications, negotiations, and information exchanged prior to the Effective Date concerning this Agreement and the development thereof, and technical and other information regarding or relating to the Facility, the Access Bridges or the Work exchanged between the Parties that is or otherwise clearly communicated to the receiving Party as "Confidential" constitute "Confidential Information" of the disclosing Party. The Owners and AWWU each agree to hold such Confidential Information wholly confidential. Such Confidential Information may only be used by the Parties for the purposes related to the approval, or administration or enforcement of this Agreement.

14.2 Disclosure. Each Party agrees not to disclose Confidential Information of the other Party to any other Person (other than its Affiliates, counsel, consultants, lenders, partners, members, employees, officers and director, and then only to Persons subject to similar confidentiality restrictions as those set forth herein), without the prior written consent of the other Party, provided, that, either Party may disclose Confidential Information, if such disclosure is required by Law, including without limitation, pursuant to an order of a court or regulatory agency or in order to enforce this Agreement or to seek approval of this Agreement. In the event a Party is required by Law or a Governmental Authority to disclose Confidential Information, such Party, prior to such disclosure, shall provide reasonable advance notice to the other Party of the time and scope of the intended disclosure, in order to permit such non-disclosing Party the opportunity to obtain a protective order or to otherwise seek to prevent or limit the scope or otherwise impose conditions upon such disclosure.

14.3 Injunctive Relief. Each Party agrees that violation of the terms of Sections 14.1 and 14.2 constitutes irreparable harm to the other, and that the harmed Party may seek any and all remedies available to it at law or in equity, including but not limited to injunctive relief.

14.4 Release of Agreement. The Parties agree that this Agreement, upon execution, shall not be considered Confidential Information. Except as required by Law, releasing the Agreement to the public shall be the sole responsibility of the Owners, to be released in the manner at a time decided in their sole discretion.

14.5 AWWU Public Statements.

(a) Until that date upon which the Fish and Wildlife Program is approved by the Governor of Alaska, and absent any pending judicial review or appeal, any public statements made by AWWU about the Fish and Wildlife Program or the development of the Facility must be approved by the Owners, such approval not to be unreasonably withheld or delayed. Notwithstanding the foregoing, AWWU may respond to any inquiries from any Governmental Authority in a manner consistent with this Agreement.

(b) AWWU shall make best efforts to ensure that all of the employees, agents, contractors and consultants of AWWU do not engage in any public activities while acting as employees, agents, contractors or consultants of AWWU, to include the public expression of statements that are reasonably likely to have an adverse effect on the public's perception of the

Fish and Wildlife Program and the development of the Facility, it being understood by both AWWU and the Owners that such negative public statements may undermine the ability of the Owners to satisfy their obligations under the 1991 Agreement; provided, however, that the Parties acknowledge that AWWU cannot restrict the rights of such people to express their personal opinions as private citizens.

ARTICLE 15.
MISCELLANEOUS

15.1 Reasonability. The Parties shall act in a reasonable manner and in accordance with principles of good faith and fair dealing in the performance of this Agreement. Unless expressly provided otherwise in this Agreement and whether or not stated: (a) where this Agreement requires the consent, approval, or similar action by a Party, such consent or approval shall not be unreasonably withheld, conditioned, or delayed; and (b) wherever this Agreement gives a Party a right to determine, require, request, specify, or take similar action with respect to a matter, such determination, requirement, request, specification, or similar action must be reasonable.

15.2 Entire Agreement. This Agreement, together with all Schedule and Exhibits hereto, embodies the entire agreement and understanding of the Parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements and understandings of the Parties, verbal or written, relating to the subject matter hereof.

15.3 Waiver. Any waiver of the provisions of this Agreement must be in writing and shall not be implied by any usage of trade, course of dealing or course of performance. No exercise of any right or remedy by AWWU or the Owners constitutes a waiver of any other right or remedy contained or provided by Law. Any delay or failure of a Party to exercise, or any partial exercise of, its rights and remedies under this Agreement shall not operate to limit or otherwise affect such rights or remedies. Any waiver of performance hereunder shall be limited to the specific performance waived and shall not, unless otherwise expressly stated in writing, constitute a continuous waiver or a waiver of future performance.

15.4 Assignment. Neither Party shall assign this Agreement or any of its rights hereunder without the prior written consent of the other Party, which consent shall not be unreasonably withheld, conditioned or delayed. Notwithstanding the foregoing, either Party, without relieving itself from liability hereunder, and without the need for consent from the other Party, provided that any such assignee shall agree to be bound by all terms and conditions hereof, may transfer, pledge or assign this Agreement: (a) to any person or entity succeeding to all or substantially all of the assets of the assigning Party; or (b) to a successor entity in a merger or acquisition transaction. Any assignment made in contravention of this Section 15.4 shall be void and unenforceable.

15.5 Governing Law; Submission to Jurisdiction; Venue; No Jury Trial.

(a) Governing Law. THIS AGREEMENT SHALL BE GOVERNED BY, AND INTERPRETED AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF ALASKA, EXCLUDING ANY CHOICE OF LAW RULES.

(b) Submission to Jurisdiction, Venue. The Parties agree that any suit, action or other legal proceeding by or against any Party (or its Affiliates or designees) with respect to or arising out of this Agreement shall be brought exclusively in the courts of the State of Alaska, in the Municipality of Anchorage, as the Party instituting such suit, action or other legal proceeding may elect, provided that claims related to federal water rights, federal legislation enabling the Facility or AWWU Facilities, or the 1991 Agreement may be brought in the United States District Court for the District of Alaska. By execution and delivery of this Agreement, each Party (for itself, its Affiliates and its designees) irrevocably and unconditionally consents and submits to the exclusive jurisdiction of such courts and the appellate courts therefrom, and waives any right it may have to assert the doctrine of forum non conveniens or similar doctrine or to object to venue with respect to any proceeding. The Parties irrevocably consent to the service of process in any such action or proceeding by the mailing of copies thereof by registered or certified mail, first class postage prepaid to the addresses set forth in Section 13.1.

(c) No Jury Trial. EACH OF THE PARTIES HEREBY WAIVES ANY AND ALL RIGHTS TO DEMAND A TRIAL BY JURY IN ANY ACTION, SUIT, OR PROCEEDING ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY.

(d) Duty to Proceed. Pending final resolution of any Dispute, the Owners and AWWU shall continue to fulfill their respective obligations hereunder that are not the subject of the Dispute.

15.6 Construction. This Agreement is to be construed so as to effectuate the normal and reasonable expectations of a sophisticated buyer and seller of the equipment and services covered by this Agreement and shall not be construed either for or against either Party. No provision of this Agreement shall be construed or interpreted for or against either Party because such Party drafted or caused its legal representative to draft the provision.

15.7 Headings. The titles or headings of the various sections, articles and paragraphs hereof are intended solely for convenience and ease of reference and are not intended, and are not to be deemed for any purpose, to modify or explain or place any interpretation or construction upon any of the provisions of this Agreement.

15.8 Status of the Parties. The Owners and its Subcontractors shall be independent contractors in relation to AWWU with respect to the Work; and neither the Owners nor their Subcontractors, nor the employees or agents of either, shall be deemed to be the employees, representatives or agents of AWWU in connection with any matter relating to this Agreement. No provision of this Agreement shall be construed or represented as creating a partnership, trust, joint venture, fiduciary or any similar relationship between the Parties.

15.9 Insurance. The Owners shall maintain the required insurance policies as set forth on Exhibit J-1 and AWWU shall maintain the required insurance policy as set forth on Exhibit J-2.

15.10 No Third Party Beneficiaries. This Agreement is made and entered into for the sole protection and legal benefit of the Owners and AWWU, and their permitted successors and assigns,

and no other person shall be a direct or indirect legal beneficiary of, or have any direct or indirect cause of action or claim in connection with, this Agreement.

15.11 Further Assurances. Each Party agrees to execute and deliver all further instruments and documents, and take all further action, as may be reasonably necessary to complete performance by the Parties hereunder and to effectuate the purposes and intent of this Agreement.

15.12 Amendments. Except for any Change Order issued pursuant to ARTICLE 7, a removal of an Owner pursuant to Section 2.5, or a redesignation of the Project Manager, the AWWU Representative or notice information under Section 13.1, no change, amendment or modification of this Agreement shall be valid or binding upon the Parties unless such change, amendment or modification shall be in writing and duly executed by the Parties.

15.13 Severability. If any provision of this Agreement is determined to be illegal or unenforceable, such determination will not affect any other provision of this Agreement and all other provisions will remain in full force and effect.

15.14 Conflicting Provisions. In the event of any conflict between this document and any Schedule or Exhibit attached hereto, the terms and provisions of this document, as amended from time to time, shall control. In the event of any conflict among the Exhibits, the Exhibit of the latest date mutually agreed to by the Parties shall control.

15.15 Survival. The provisions of ARTICLE 1, ARTICLE 6, ARTICLE 8, ARTICLE 9, ARTICLE 10, ARTICLE 11, ARTICLE 12, ARTICLE 13, and ARTICLE 15 shall survive termination of this Agreement for any reason.

15.16 Counterparts. This Agreement may be executed in any number of separate counterparts and delivered by electronic means, each of which when so executed shall be deemed an original, and all of said counterparts taken together shall be deemed to constitute but one and the same instrument.

ARTICLE 16.
EFFECT OF PUMPED STORAGE HYDROPOWER ALTERNATIVE

16.1 Pumped Storage Hydropower Study; Negotiation of Replacement Agreements. The parties shall, in good faith, conduct the pumped storage hydropower study required by the Governor of Alaska's October 2, 2024 Final Fish and Wildlife Program, in the same or substantially the same form as the study submitted to the Anchorage Assembly in AIM ____ (PSH Study). Within 30 days of the completion of the PSH Study, the parties shall meet and negotiate replacement agreements that (1) provide for any needed access to, use of, or interference with AWWU infrastructure to facilitate the potential alternative, and (2) replace the 1984 Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska, as amended, regarding use of and compensation for Eklutna Lake water by AWWU. Such agreements shall be subject to approval by the Anchorage Assembly to the extent required by municipal law.

16.2 Alternative Program Selected. If the Governor of Alaska selects an alternative Final Fish and Wildlife Program that does not involve the Facility, such as pumped storage hydropower, then:

(a) The Long-Term Water Transportation Agreement, the Interconnection Agreement, and the Water Supply Agreement shall immediately be suspended.

(b) The Parties shall expeditiously execute new agreements, if not already executed, to facilitate the implementation and long-term operation and maintenance of the alternative Final Program selected by the Governor. Such agreements shall be subject to approval by the Anchorage Assembly to the extent required by municipal law.

16.3 Continuity of Municipal Water Supply. In the event the Public Water Supply Agreement is suspended in accordance with the preceding section, the terms for the Municipality's water supply that were in effect as of April 22, 2025 under the 1984 Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska, as amended, shall be restored and remain in effect until replacement agreements for the Municipality's public water supply are negotiated, approved by the Anchorage Assembly, and executed.

16.4 Reservation of Rights. The parties reserve all rights, remedies, and causes of action available to them under the 1991 Fish and Wildlife Agreement.

[***Remainder of page intentionally left blank***]

IN WITNESS WHEREOF, the Parties have caused this Water Facilities Interconnection Agreement to be executed by their duly authorized representatives as of the Effective Date.

Schedule 1.1

Definitions

"1991 Agreement" means that certain Agreement between the Municipality of Anchorage, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., the United States Fish and Wildlife Service, the National Marine Fisheries Service, the State of Alaska, and the Alaska Energy Authority Relative to the Eklutna and Snettisham Hydroelectric Projects, dated August 7, 1991, as amended.

"Access Bridges" has the meaning set forth in the Recitals.

"Affiliate" means, with respect to any Person, any other Person controlling, controlled by or under common control with such first Person. For purposes of this definition and the Agreement, the term "control" (and correlative terms) means (1) the ownership of 50% or more of the equity interest in a Person, or (2) the power, whether by contract, equity ownership or otherwise, to direct or cause the direction of the policies or management of a Person.

"Agreement" has the meaning set forth in the Preamble, and shall include all Exhibits and Schedules hereto.

"Approvals" means Governmental Approvals and third-party approvals.

"AWWU" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of AWWU.

"AWWU Approvals" has the meaning set forth in Section 3.2.

"AWWU Isolation Valve" has the meaning set forth in Exhibit A-1.

"AWWU Facilities" has the meaning set forth in the Recitals.

"AWWU Representative" means the person designated by AWWU in accordance with Section 3.3 to act as the Owners' primary point of contact with AWWU.

"AWWU's Portion" has the meaning set forth in Exhibit A-1.

"AWWU's Water Permit" means that permit belonging to AWWU (LAS 2569) to use Owners' Water Rights for up to 41 million gallons per day for public water supply pursuant to the Act of October 30, 1984, 98 Stat. 2823, as may be replaced as described in Section 3.1 of the Water Supply Agreement.

"AWWU's Water" means any and all water belonging to AWWU pursuant to AWWU's Water Permit.

"Business Day" means any day other than a Saturday, Sunday or legal holiday in the state of Alaska.

"Change Order" means a written order signed by Project Manager and AWWU authorizing a change in the Work or an adjustment in the Project Schedule for performance or delivery of the Work.

"Chugach" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of Chugach.

"Commercial Operation" means that: (a) Owners have completed the Commissioning Procedures and the Facility has met the Facility Criteria; and (b) Owners have provided the Commercial Operation Certificate to AWWU.

"Commercial Operation Certificate" has the meaning set forth in Section 4.6.

"Commercial Operation Date" means the date upon which Commercial Operation is achieved.

"Commissioning Procedures" means a test of function of the Facility in accordance with the Commissioning Procedures Guidelines and Section 4.5.

"Commissioning Procedures Guidelines" means the guidelines for the Commissioning Procedures set forth on Exhibit E.

"Confidential Information" has the meaning set forth in Section 14.1.

"Construction Start CPs" has the meaning set forth in Section 4.1.

"Cost Responsibility Proportion" shall mean, with respect to each Owner, the percentage of the total applicable Eklutna Hydroelectric Project costs that such Owner is obligated to pay as agreed to by the Owners, which as of the Effective Date shall be, with respect to MOA, 19.05%, with respect to Chugach, 64.28%, and with respect to MEA, 16.67%, and which may be changed hereunder upon agreement between the Owners at any time.

"Day" or "day" means a calendar day, unless expressly specified otherwise.

"Delivery Point" has the meaning set forth in Exhibit A-1 and is depicted on the schematic included as part of Exhibit B.

"Delivery Point Meter" has the meaning set forth in Exhibit A-1.

"Dispute" has the meaning set forth in Section 11.5.

"Effective Date" has the meaning set forth in the Preamble.

"Eklutna Hydroelectric Project" means the Eklutna Hydroelectric Project initially authorized, constructed and operated pursuant to the Eklutna Project Act of July 31, 1950 (64 Stat. 382, as amended), including any and all property and facilities acquired or used in connection therewith, all of which was then sold to the Owners by the United States of America on October 2, 1997.

"Equipment" means all of the equipment, materials, apparatus, structures, supplies and other goods required by the terms of this Agreement to complete the Work and to be incorporated into the Facility. Equipment shall not include any materials, apparatus or tools owned by the Owners or any Subcontractor that are used to complete the Work but are not contemplated under this Agreement to become part of the Work or the Facility.

"Equipment Documentation" means copies or originals of all recommended operating specifications, warranties, manuals, test reports, vendor information and all other similar information obtained or prepared, and to be delivered, by the Owners in accordance with the terms of this Agreement.

"Event of Default" has the meaning set forth in Section 11.1.

"Facility" has the meaning set forth in the Recitals.

"Facility Criteria" means the criteria set forth in Exhibit I.

"Final Acceptance" means the final acceptance of the Work by AWWU, as demonstrated by the process set forth in Section 4.5.

"Final Acceptance Items" has the meaning set forth in Section 4.5.

"Fish and Wildlife Program" has the meaning set forth in the Recitals.

"Force Majeure Event" means the occurrence of any act or event beyond the reasonable control of the Party affected that prevents the affected Party from performing its obligations under this Agreement, in full or part, if such act or event is beyond the reasonable control of, and not the result of the fault or negligence of, the affected Party and such Party has been unable to overcome such act or event with the exercise of due diligence (including the expenditure of reasonable sums), including the following: drought, flood, earthquake, storm, fire, lightning, epidemic, war, riot, civil disturbance, sabotage, terrorism or threat of terrorism, strike or labor difficulty, accident or curtailment of supply or equipment, total casualty to equipment, or restraint, order or decree by a Governmental Authority. Notwithstanding the foregoing, Force Majeure Events shall expressly not include mechanical or equipment failures (except to the extent any such failure is itself caused by a Force Majeure Event), nor any diminution in water quality in Eklutna Lake.

"Governmental Approvals" means all authorizations, consents, licenses, leases, rulings, certifications, registrations, exemptions, permits, certificates, and approvals from any Governmental Authority.

"Governmental Authority" means any federal, state or local government, any political subdivision thereof, or any governmental, quasi-governmental, judicial, public or statutory instrumentality, administrative agency, authority, body or other entity having jurisdiction over the performance of the Work, the Facility or its operations, or the health, safety or environmental conditions of the Site or otherwise over the Parties.

"Hazardous Material" means any waste, chemical or other substance or material that is defined as "hazardous" or "toxic" or by any other similar term under any applicable Law relating to environmental, health or safety matters.

"Indemnified Parties" has the meaning set forth in Section 10.1.

"Indemnifying Party" has the meaning set forth in Section 10.3.

"Injection Point" means the point where AWWU Facilities meet facilities owned by the Owners near the outlet of the Eklutna Lake, where AWWU receives all of AWWU's Water from Eklutna Lake, as depicted in the schematic included as part of Exhibit B.

"Isolation Valve Structure" has the meaning set forth in Exhibit A-1.

"Isolation Valves" has the meaning set forth in Exhibit A-1.

"Law" means any constitution, charter, act, statute, law, ordinance, code, rule, regulation, order, specified standards or objective criteria contained in any applicable permit or approval (which standards or

criteria must be met in order for the Work to be performed lawfully) or other legislative or administrative action of any Governmental Authority or a final decree, judgment or order of a court or tribunal.

"Liabilities" has the meaning set forth in Section 10.1.

"MEA" has the meaning set forth in the Preamble, and shall include all successor sand assigns of MEA.

"MOA" has the meaning set forth in the Preamble, and shall include all successor sand assigns of MOA.

"Non-Owner Work" has the meaning set forth in Section 8.4.

"Owners" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of the Owners.

"Owner" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of an Owner.

"Owners' Isolation Valve" has the meaning set forth in Exhibit A-1.

"Owners' Portion" has the meaning set forth in Exhibit A-1.

"Owners' Water" means any and all water belonging to the Owners pursuant to the Owners' Water Rights.

"Owners' Water Rights" means that certain senior priority water right held by the Owners for the water in Eklutna Lake for use in generating power for the Eklutna Hydroelectric Project as described in water rights certificate ADL 44944.

"Party" and "Parties" has the meaning set forth in the Preamble.

"Person" means any individual, partnership, corporation, limited liability company, association, business, trust, government or political subdivision thereof, Governmental Authority or other entity.

"Project Manager" means the Project Manager designated by the Owners in accordance with Section 2.5.

"Project Schedule" means the Project Schedule attached hereto as Exhibit D.

"Prudent Industry Standards" means those standards of care and diligence normally practiced by water transportation infrastructure engineering, construction and installation firms in performing services of a similar nature in a similar jurisdiction in which the Work will be performed. Prudent Industry Standards are not intended to be limited to optimum practice or methods, but rather to be a spectrum of reasonable and prudent practices and methods that must take the conditions specific to any given water transportation facility under consideration.

"River Release Structure" has the meaning set forth in Exhibit A-1.

"Scope of Work" means the Scope of Work attached hereto as Exhibit C.

"Site" means the location of the Facility as further described in Exhibit B.

"Standard of Work" has the meaning set forth in Section 2.2.

"Subcontractor" means any Person with whom the Owners, or any individual Owner, enters into an arrangement for the performance of any portion of the Work, including Persons at any tier with whom any Subcontractor has further subcontracted any portion of the Work, and the legal or personal representatives, successors, and assigns of such Person.

"Transportation Agreement" has the meaning set forth in the Recitals.

"Unanticipated Conditions" has the meaning set forth in Section 7.3.

"Warranty Period" has the meaning set forth in Section 8.2.

"Water Supply Agreement" has the meaning set forth in the Recitals.

"Work" means all phases of Owners' performance of their construction-related obligations under this Agreement, including engineering, design, procurement, construction, erection, installation, training, testing with respect to the Facility, and the installation of the Access Bridges. For the sake of clarity, any operation and maintenance of the Facility occurring after Final Acceptance does not constitute Work hereunder, unless such operation or maintenance is being conducted pursuant to the warranty provisions set forth in ARTICLE 8.

Schedule 3.5[3]

Site and AWWU Facilities Conditions

[3] **Note to Accompany Final Draft**: This Exhibit will be populated by AWWU after Governor approval and prior to signing.

Exhibit A-1[4]

Eklutna River Release Facility Description and Definitions

The **"*Eklutna River Release Facility"*** shall consist of an Isolation Valve Structure and the River Release Structure.

The "***Isolation Valve Structure***" shall include:

- a new tee to be built in the AWWU pipeline downstream of the AWWU tunnel/pipeline transition and upstream of the AWWU portal valve (the "***Delivery Point***")
- A 54-inch gate valve on the main segment of AWWU pipeline intended to provide dual means of isolation for AWWU's pipeline segment ("***AWWU Isolation Valve***")
- A 42-inch gate valve on the branch segment of AWWU pipeline intended to provide isolation to the river release structure ("***Owners' Isolation Valve***", together with the AWWU Isolation Valve, the "***Isolation Valves***").
- Related controls and communication technology to be installed by the Owners in the main line of the AWWU Facilities.

The "***River Release Structure***" shall include:

- [A new pipeline from the Isolation Valve Structure to the Eklutna River]
- Control valves
- A new meter installed at the Delivery Point ("***Delivery Point Meter***")
- Monitoring and control equipment to be installed by Owners [*describe where]*.

"***AWWU's Portion***" of the Facility shall consist of the Isolation Valve Structure [and _____]

The "***Owners' Portion***" of the Facility shall consist of the River Release Structure [and _____]

[4] **Note to Accompany Final Draft**: This Exhibit will be revised and finalized by Owners to reflect the proposal approved by the Governor and prior to signing.

Exhibit A-2[5]

Description of Facility Controls, Metering, and Communication Facilities

[5] **Note to Accompany Final Draft**: This Exhibit will be populated after Governor approval and prior to signing.

Exhibit A-3[6]

Design (as of Effective Date)

[6] **Note to Accompany Final Draft**: This Exhibit will be populated by Owners after Governor approval and prior to signing.

Exhibit B[7]

Description and Schematic of Site, AWWU Facilities, and Injection Point and Delivery Point

[7] **Note to Accompany Final Draft**: This Exhibit will be populated by Owners after Governor approval and prior to signing.

Exhibit C

Scope of Work[8]

(a) Supply and Procurement. Owners shall at their own expense procure or supply and pay for all of the Equipment, and arrange and pay for the delivery of all of the Equipment to the Site.

(b) Engineering and Design. Owners shall at their own expense design and provide engineering services with respect to the Facility in a manner that shall be:

(i) Consistent with the actual conditions existing at the Site;

(ii) Consistent with the requirements set forth in this Scope of Work;

(iii) Sufficient, complete, and adequate in all respects necessary to enable the Facility to satisfy (A) the Facility Criteria and (B) all required Governmental Approvals;

(iv) In conformance with applicable Laws, including national, state, and local engineering, construction, safety, and electrical codes and standards, as specified in the Scope of Work, or if none are specified for the particular matter, with Prudent Industry Standards; and

(v) In form and content acceptable to all Governmental Authorities.

(c) Construction and Installation. Owners shall provide, install, complete and pay for all labor, Equipment, tools, supplies, construction equipment and machinery, utilities and consumables, transportation and other facilities and services (including any temporary materials, equipment, supplies and facilities) necessary for the proper execution and completion of the Work. All construction and installation performed by the Owners under this Agreement shall be in accordance with the given manufacturer's written instructions and Prudent Industry Standards, in each case unless otherwise agreed by AWWU in advance in writing.

(d) Utilities. The Owners shall provide all of the transmission, power, and communication facilities necessary for construction.

(e) Equipment Documentation and Equipment Training. The Owners shall provide AWWU with all Equipment Documentation for the AWWU Portion, and shall provide AWWU's personnel with up to five (5) days of on-site training in the use and operation of the AWWU Portion, as further detailed in the Transportation Agreement.

---

[8] **Note to Accompany Final Draft**: This Exhibit is subject to further revisions and will be finalized after Governor approval and prior to signing.

(f) Approvals. Except for applicable AWWU Approvals, the Owners shall obtain and maintain all Approvals (including all fees and permits) required to perform the Work, including (without limitation) approvals and agreements required to interconnect the Facility with the AWWU Facilities. The Owners shall pay for all such Approvals, and shall reimburse AWWU for costs associated with obtaining and maintaining all AWWU Approvals. Owners shall promptly provide AWWU with copies of all such Approvals upon the Owners' obtaining such Approvals. In order to assist the Owners in obtaining such Approvals, AWWU shall provide the Owners with such reasonable assistance as the Owners may request.

(g) Security. The Owners shall be responsible for the security of the Work and shall construct security facilities (e.g. fencing surrounding the Facility at the Site) to ensure the security of the Work. The Owners shall coordinate with AWWU for the ingress and egress of the Owners' personnel to and from the Site to minimize disruption of AWWU operations.

(h) Conduct at Site. AWWU shall have access to the Site at all times, and the Owners shall, and shall require their Subcontractors to, use commercially reasonable efforts to avoid inhibiting the operations of AWWU at the Site, and the operation of the AWWU Facilities. The Owners shall comply with work rules and work hours reasonably established by AWWU with regard to Work involving the AWWU Facilities.

LONG-TERM WATER TRANSPORTATION AGREEMENT

This LONG-TERM WATER TRANSPORTATION AGREEMENT (this "Agreement"), dated as of [_____] (the "Effective Date"), is entered into by and between Anchorage Water and Wastewater Utility ("AWWU"), and Chugach Electric Association, Inc. ("Chugach"), Matanuska Electric Association, Inc. ("MEA"), and the Municipality of Anchorage ("MOA") (each of Chugach, MEA, and MOA is an "Owner" and collectively they are referred to as the "Owners"). The Owners and AWWU are sometimes referred to herein as a "Party" or collectively as the "Parties".

R E C I T A L S

WHEREAS, the Owners own and operate the Eklutna Hydroelectric Project, commissioned in 1954, which includes an earthen dam at the outlet of Eklutna Lake and which, under normal operating conditions, diverts all inflows of water into the Eklutna Lake for hydroelectric production rather than into the Eklutna River;

WHEREAS, AWWU owns and operates certain existing water transportation facilities integrated with the Eklutna Hydroelectric Project as further described and depicted in Exhibit B (the "AWWU Facilities") located near the outlet of Eklutna Lake and adjacent to the Eklutna River, which AWWU uses to provide public water supply for its customers;

WHEREAS, the Owners are parties to the 1991 Agreement (as defined below), pursuant to which they are required to develop and implement a Fish and Wildlife program every thirty-five years to protect, mitigate damages to, and enhance fish and wildlife impacted by the development of the Eklutna Hydroelectric Project (the "Fish and Wildlife Program");

WHEREAS, as a result of the process set forth in the 1991 Agreement, the Owners have developed a draft Fish and Wildlife Program in which the Owners propose to: (1) develop an Eklutna River release facility consisting in part of AWWU Facilities and facilities constructed pursuant to the Interconnection Agreement, all as further described in Exhibit A and as will be depicted as-built in the Operating Procedures (the "Facility"); (2) to transport water from Eklutna Lake through the Facility and release it into the Eklutna River; and (3) to maintain and operate the Facility;

WHEREAS, in connection with the execution of this Agreement and in order to enable future implementation of the Fish and Wildlife Program (if approved by the Governor of Alaska) and address compensation for AWWU's use of Owners' Water Rights, the Parties also entered into a Water Facilities Interconnection Agreement (the "Interconnection Agreement") pursuant to which the Parties will construct the Facility, and a new Public Water Supply Agreement (the "Water Supply Agreement");

WHEREAS, after the Facility achieves Final Acceptance pursuant to the terms of the Interconnection Agreement and all other conditions precedent set forth herein are achieved, (1) the Owners' desire to engage AWWU to provide, and AWWU desires to provide, the Water Transportation Services; and (2) the Owners and AWWU each desire to operate and maintain portions of the Facility pursuant to the terms and conditions set forth in this Agreement;

WHEREAS, on October 2, 2024, Alaska Governor Mike Dunleavy established a Final Fish and Wildlife Program for the Eklutna Hydropower Project that directed the parties to the 1991 Agreement and the Native Village of Eklutna to study pumped storage hydropower as an alternative to the Facility, noted the Governor's ability to alter the Final Fish and Wildlife Program, and stated that a pumped storage hydropower alternative could ultimately be selected; and

WHEREAS, the Long-Term Water Transportation Agreement, the Interconnection Agreement, and the Public Water Supply Agreement negotiated by the Parties contain terms to facilitate the implementation of a Final Program that uses the Facility and the Facility's long-term operation, but the original versions of these agreements did not contemplate the Governor's potentially selecting a pumped storage hydro alternative as a major component of the Final Fish and Wildlife Program, rendering certain additions appropriate; and

NOW, THEREFORE, in consideration of the premises of this Agreement, the Interconnection Agreement, and the Water Supply Agreement, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Owners and AWWU, intending to be legally bound, hereby agree as follows:

ARTICLE 1.
DEFINITIONS; INTERPRETATION; EXHIBITS

1.1 Defined Terms. Capitalized terms used in this Agreement without other definition shall have the meanings set forth in Schedule 1.1, unless the context requires otherwise.

1.2 Interpretation. As used in this Agreement, the terms "herein," "herewith" and "hereof" are references to this Agreement, taken as a whole; the terms "includes" or "including" shall mean "including, without limitation"; and references to a "Section," "Article", "Exhibit" or "Schedule" shall mean a Section, Article, Exhibit or Schedule of this Agreement, as the case may be, unless in any such case the context requires otherwise. All references to a given Exhibit, Schedule, agreement, instrument or other document shall be a reference to that agreement, instrument or other document as modified, amended, supplemented and restated through the date as of which such reference is made. A reference to a Person includes its permitted successors and permitted assigns. The singular shall include the plural and the masculine shall include the feminine and neuter, and vice versa.

ARTICLE 2.
TERM

2.1 Term.

(a) The term of this Agreement shall commence on the Effective Date and continue until the conclusion of the Delivery Term or unless earlier terminated pursuant to the terms of this Agreement (the "Term").

(b) AWWU's obligation to provide the Water Transportation Services and the Parties' obligations to commence the Operational Work hereunder shall be effective on the date upon which the Facility achieves Final Acceptance under terms of the Interconnection Agreement (the "Delivery Term Effective Date") and shall continue in full force and effect for 35 years

thereafter, subject to any early termination provisions set forth herein (the "Initial Delivery Term"). At the conclusion of the Initial Delivery Term, the Agreement shall automatically renew each year, unless a Party notifies the other Party at least 60 days prior to the expiration of the Initial Delivery Term or each extended year thereafter that it does not wish to renew the Agreement. The Initial Delivery Term as so extended is the "Delivery Term".

ARTICLE 3.
WATER TRANSPORTATION AND SCHEDULING

3.1 Water Transportation Services. During the Delivery Term, AWWU shall, pursuant to the schedules set forth in Section 3.2 and the Operating Procedures developed pursuant to Section 5.1, transport Owners' Water, comingled with and undifferentiated from AWWU's Water, through AWWU Facilities from the Injection Point to the Delivery Point, in any amount requested by the Owners (the "Water Transportation Services"), provided, that, such requested amount shall under no circumstances: (a) inhibit the ability of AWWU to deliver a daily flow rate of at least 41 MGD to the downstream Eklutna Water Treatment Facility at a pressure sufficient to allow normal operation of the EWTF as currently configured; (b) exceed the hydraulic capacity or design criteria of the AWWU Facilities; or (c) exceed any then-active Curtailment Limit (clauses (a)-(c), the "Water Release Limits").

3.2 Scheduling.

(a) During the first week of each month of each year of the Delivery Term, and in accordance with the Operating Procedures, the Owners shall provide AWWU with a written anticipated daily Owners' Water release schedule for the following month (e.g., on the first Business Day of January, the Owners shall provide the anticipated schedule for each day of February) based on Eklutna Lake levels and Fish and Wildlife Program obligations, all subject to the Water Release Limits (the "Monthly Water Release Schedule").

(b) No later than the last Business Day of each week of the Delivery Term, the Owners may submit in writing in accordance with the Operating Procedures, updated daily Owners' Water release amounts for the following week, provided that under no circumstance shall such updates exceed the Water Release Limits.

3.3 Metering.

(a) At all times during the Delivery Term, AWWU shall maintain an Injection Point Flow Meter to measure real-time water flowing into AWWU's Facilities from Eklutna Lake.

(b) At all times during the Delivery Term, the Owners shall maintain the Delivery Point Meter to measure real-time water quantities flowing into the River Release Structure at the Delivery Point, which shall be used to calculate the amount of Owners' Water received by the Owners as part of the Water Transportation Services.

(c) Each Party shall take reasonable measures to ensure that the other Party has access to real-time water flow quantity information from both the Injection Point Flow Meter and the Delivery Point Meter, as applicable, pursuant to procedures set forth in the Operating Procedures.

(d) For each month of the Delivery Term, the Owners shall prepare a written report for AWWU detailing the actual water flow amounts through the Injection Point Flow Meter and the Delivery Point Meter, and the amount of Owners' Water delivered to the Delivery Point, all as compared with the Monthly Water Release Schedule (as updated by Section 3.2(b) and pursuant to the procedures detailed in the Operating Procedures).

ARTICLE 4.
OPERATION AND MAINTENANCE

4.1 AWWU Facilities and AWWU's Portion. Throughout the Delivery Term, the AWWU Facilities and AWWU's Portion shall be exclusively operated, managed, and maintained by AWWU or any AWWU designee in accordance with all Governmental Approvals, applicable Law, Prudent Industry Standards, all subject to the Owners' maintenance access rights to the Owners' Isolation Valve as set forth in Section 4.3.

4.2 Owners' Portion. Throughout the Delivery Term, the Owners' Portion shall be exclusively operated, managed, and maintained by the Owners or any designee of the Owners in accordance with all Governmental Approvals, applicable Law, and Prudent Industry Standards.

4.3 Owners' Isolation Valve. Throughout the Delivery Term, the Owners shall be responsible for all operation and maintenance of the Owners' Isolation Valve contained within AWWU's Portion. As part of the Access License granted by AWWU to the Owners pursuant to Section 9.1, AWWU shall ensure that at all times the Owners have access to the Owners' Isolation Valve as necessary to enable the Owners to maintain and operate the Owners' Isolation Valve in accordance with the Operating Procedures, provided, that, AWWU may from time to time assume operational responsibility for the Owners' Isolation Valve temporarily only to the extent necessary to address urgent security or safety issues and to avoid putting AWWU's public water supply at risk of interruption or contamination.

4.4 Approvals. Throughout the Delivery Term, AWWU shall be responsible for obtaining and maintaining all Approvals necessary for the provision of Water Transportation Services and all Operational Work set forth herein, except for those Approvals set forth on Exhibit C hereto, for which the Owners will be responsible for obtaining and maintaining (the "Owners' Approvals"). Each Party shall provide the other Party with such reasonable assistance as such first Party may request in obtaining applicable Approvals.

4.5 Duty to Cooperate. Each Party shall, throughout the Delivery Term, cooperate with the other Party as necessary to facilitate the provision of the Water Transportation Services, the Operational Work and all other responsibilities and obligations under this Agreement in a timely manner.

4.6 Skill and Expertise. Each Party shall, throughout the Delivery Term, use commercially reasonable efforts to ensure that all employees and contractors engaged in connection with the provision of the Water Transportation Services, the Operational Work or any other maintenance of, operation of, service of, and any future modification to (to include design, construction, commissioning, and installation) the Facility shall have the appropriate and necessary

experience, skill and expertise to carry out the tasks efficiently, professionally, and in accordance with Prudent Industry Standards and applicable Law.

4.7 Successor Operator. If, during the Term, the Owners wish to no longer be responsible for any of the operation and maintenance responsibilities set forth in Sections 4.2 and 4.3, for any reason, prior to turning over such operation and maintenance to a third-party entity, AWWU must consent to such third-party entity, such consent not to be unreasonably withheld, conditioned, or delayed. For the sake of clarity, this Section 4.7 does not impact the Owners' right to freely use Subcontractors to conduct any of its responsibilities under Sections 4.2 and 4.3; this Section 4.7 only applies in situations where the Owners plan to no longer be ultimately liable for such obligations hereunder.

ARTICLE 5.
OPERATING PROCEDURES

5.1 Operating Procedures.

(a) At least 60 days prior to the commencement of the Delivery Term, AWWU and the Owners shall develop written detailed operating procedures governing the Water Transportation Services pursuant to the terms in this Agreement (the "Operating Procedures"). Such Operating Procedures shall comply with all applicable Approvals, Prudent Industry Standards and applicable Law and shall, at a minimum, set forth (i) the agreed methods for day-to-day communication and reporting requirements of each Party; (ii) key personnel lists for AWWU and for the Owners necessary for the facilitation of the Operational Work and the provision of the Water Transportation Services; (iii) processes for planning and communication between the Parties to coordinate regarding scheduling pursuant to Section 3.2 and Excused Events pursuant to Article 8; (iv) reporting and determining Curtailment Durations and Curtailment Limits for Excused Events pursuant to Article 8; (v) sharing of information from the Delivery Point Meter and the Injection Point Flow Meter pursuant to Section 3.3; (vi) ongoing reporting requirements of the Owners of metered water flow quantities measured at the Delivery Point and the Injection Point pursuant to Section 3.3; (vii) the process for obtaining and maintaining necessary Approvals throughout the Delivery Term; (viii) reference to necessary Facility equipment specifications and operation and maintenance manuals; (ix) inclusion of the final as-built drawings for the Facility developed pursuant to the Interconnection Agreement; (x) a clear process for ensuring that at all times during the Delivery Term, the Water Release Limits are met; (xi) each Party's legal notice address information for the delivery of notices required under this Agreement; and (xii) any other procedures related to the provision of the Water Transportation Services and Operational Work that the Parties deem necessary. Such Operating Procedures shall include any and all detailed definitions, drawings, and descriptions of the AWWU Facilities and the Facility as necessary to facilitate the coordination and responsibilities of the Parties as set forth herein. In the event of any disagreement in the development of the Operating Procedures, the Parties shall work in good faith to promptly resolve differences. AWWU's actual costs of developing such Operating Procedures shall be reimbursed by the Owners pursuant to Section 6.3.

(b) Throughout the Delivery Term, the Operating Procedures shall be updated from time to time by AWWU as needed upon written notice to the Owners, or upon written request by the Owners, to reflect ministerial changes to ensure continued accuracy and relevancy (e.g.

personnel, contact/notice information, and Facility equipment upgrades), provided, that, such changes made pursuant to this Section 5.1(b) shall under no circumstances materially modify the obligations and responsibilities of the Parties as set forth herein.

ARTICLE 6.
COSTS; TAXES; REIMBURSEMENT

6.1 Costs and Compensation. Unless specifically stated otherwise, all costs borne initially by each Party in connection with the exercising of its rights and the performance of its obligations under this Agreement shall be the responsibility of such Party initially incurring such costs. In partial consideration of the costs to AWWU incurred in provision of the Water Transportation Services provided under this Agreement for the benefit of the Owners, the Parties entered into the Water Supply Agreement for the same duration as this Agreement, pursuant to which AWWU shall have access to the use of certain of the Owners' facilities without additional compensation for its provision of public water supply.

6.2 Taxes. The Owners shall be responsible for and shall reimburse AWWU for any sales, use, gross receipts, occupation, and other taxes (excluding income, and franchise tax) imposed upon AWWU from time to time payable related to AWWU's provision of services set forth herein.

6.3 Reimbursement. For those AWWU costs that the Owners are specifically required to reimburse hereunder, AWWU shall submit to each of the Owners a detailed accounting of such cost for which AWWU is seeking reimbursement, together with such supporting documentation as the Owners shall reasonably require, including a reference to the applicable section of this Agreement demonstrating the Owners' responsibility for such costs. Within sixty (60) Days after receiving a properly completed application for reimbursement and all required supporting documentation, each of the Owners shall individually: (i) pay AWWU their respective Cost Responsibility Proportion of the amounts set forth in AWWU's application for payment; or (ii) notify AWWU in writing that such Owner believes in good faith that a requested payment amount is not due and owing and shall request the commencement of negotiations pursuant to Section 12.5. In addition to the requirement that each Owner pay its Cost Responsibility Proportion as required in this Section, the Owners shall each be jointly and severally liable for all reimbursement obligations owed to AWWU under this Article 6.

ARTICLE 7.
TITLE

7.1 Title; Custody; Risk of Loss

(a) Legal title to and ownership of all Owners' Water shall remain with the Owners at all times during the provision of Water Transportation Services.

(b) For Owners' Water flowing through AWWU's Facilities as part of the Water Transportation Services: control, custody and risk of loss of such Owners' Water shall transfer from the Owners to AWWU at the Injection Point, where such Owners' Water shall comingle with AWWU's Water until reaching the Delivery Point, at which point the custody,

control and risk of loss for an amount of water equal to the original amount of Owners' Water released into the AWWU Facilities at the Injection Point shall pass back to the Owners.

ARTICLE 8.
EMERGENCY CURTAILMENT; FORCE MAJEURE

8.1 Outages

(a) Planned Outages. AWWU shall be excused from the performance of the Water Transportation Services in the event of Planned Outages noticed by and compliant with this Section 8.1(a). AWWU and the Owners shall develop a schedule and protocol, pursuant to the procedures set forth in the Operating Procedures, for Planned Outages of the Facility or the AWWU Facilities in order to allow for routine maintenance and inspection activities. Such schedule for each Planned Outage shall specify the associated Curtailment Limits and Curtailment Duration. Such schedule and protocol shall take into account routine hydropower operations to ensure that Planned Outages only be scheduled at times when there is sufficient water available in Eklutna Lake to allow water releases through the maintenance gate of the diversion dam in the amounts necessary for the Owners to meet their obligations under the Fish and Wildlife Program. In addressing Planned Outages on AWWU Facilities and the AWWU Portion, AWWU shall use commercially reasonable efforts to minimize the length of the Curtailment Duration and the level of Curtailment Limits. For the sake of clarity, planned outages to AWWU Facilities or other AWWU property downriver of the Isolation Valve Structure do not meet the definition of Planned Outage and are addressed in Section 8.1(c)(i) below.

(b) Forced Outages. AWWU shall be excused from the performance of the Water Transportation Services in the event of Forced Outages noticed by and compliant with this Section 8.1(b). AWWU shall (i) use commercially reasonable efforts to notify the Owners of any Forced Outage, and (ii) provide an initial written or email estimate of the expected Curtailment Duration and Curtailment Limit within two (2) hours thereafter. In managing Forced Outages, AWWU shall use commercially reasonable efforts to minimize the duration of resulting Curtailment Duration and the level of Curtailment Limits. For the sake of clarity, forced outages to AWWU Facilities or other AWWU property downriver of the Isolation Valve Structure do not meet the definition of Forced Outage and are addressed in Section 8.1(c)(ii) below. During a Forced Outage, the Owners shall be responsible for complying with their Fish and Wildlife Program obligations through other means (such as releasing water into the river through the maintenance gate of the diversion dam).

(c) Outages to Downstream AWWU Infrastructure.

(i) In the event of any planned outage in the AWWU Facilities or in other AWWU property downstream of the Isolation Valve Structure that, without the closing of the Owners' Isolation Valve, would have an effect on the flow of water through the AWWU Facilities from the Injection Point to the River Release Structure, AWWU must notify the Owners at least thirty (30) days in advance of such planned outage to allow the Owners to adjust the Owners' Isolation Valve in such a way that allows for continued Water Transportation Services during such outage.

(ii) In the event of any forced, unexpected outage in the AWWU Facilities or at the Eklutna Water Treatment Facility downstream of the Isolation Valve Structure that, without the closing of the Owners' Isolation Valve, would have an effect on the flow of water through the AWWU Facilities from the Injection Point to the River Release Structure, AWWU shall notify the Owners as soon as possible to allow for the Owners to adjust the Owners' Isolation Valve to allow for the greatest possible continued flows of water into the Eklutna River through the River Release Structure during the duration of such forced outage.

8.2 Force Majeure. Each Party shall be excused from performance and shall not be considered to be in default with respect to any obligation hereunder, except for the Owners' obligation to reimburse AWWU for costs pursuant to Section 6.3, if and to the extent that such Party's failure of, or delay in, performance is due to a Force Majeure Event; provided, that:

(a) such Party gives the other Party prompt written notice describing the particulars of the Force Majeure Event as soon as is reasonably practicable after becoming aware of the occurrence of the Force Majeure Event;

(b) the suspension of performance is of no greater scope and of no longer duration than is reasonably required by the Force Majeure Event;

(c) no obligations of affected Party that arose before the occurrence of the Force Majeure Event causing the suspension of performance shall be excused as a result of such Force Majeure Event, unless and only to the extent that the performance of such obligations is impaired by the Force Majeure Event;

(d) the Party uses diligent commercially reasonable efforts to overcome or mitigate the effects of the Force Majeure Event; and

(e) when the Party is able to resume performance of its obligations under this Agreement, such Party shall give the other Party written notice to that effect and shall promptly resume performance hereunder.

ARTICLE 9.
ACCESS; ROADS AND BRIDGES

9.1 Site Access. Throughout the Delivery Term, AWWU shall, with respect to the land and access roads within its control, provide the Owners with a non-exclusive license to access the Site (through use of AWWU's access road), AWWU's Portion, and the AWWU Facilities as necessary to enable the Owners to operate and maintain the Owners' Isolation Valve and the Owners' Portion, and as otherwise reasonably necessary to facilitate the Owners' rights and obligations hereunder (the "Access License"), provided, that, AWWU may from time to time limit access to the Site or the AWWU Facilities temporarily only to the extent necessary to address reasonable security or safety issues and to avoid putting AWWU's public water supply at risk of interruption or contamination. To the extent that any additional access permissions from third-party landowners adjacent to the Site may be required for the Owners to exercise their rights or perform their obligations hereunder, obtaining such Approvals shall be the responsibility of the Owners, subject to AWWU's duty to assist and cooperate under Section 4.5, and provided that such assistance and cooperation with respect to such third-party approvals may require that

AWWU be the first and primary point of contact with such third party in situations where AWWU has an existing easement or applicable existing relationship with such third party. AWWU shall be reimbursed for any and all of its reasonable and documented costs or expenses of providing such assistance and cooperation with respect to such third-party approvals. To the extent that AWWU adds access or other security or safety limitations to the Site, to AWWU's Portion or to the AWWU Facilities, the Owners and AWWU shall cooperate in ensuring continuous access for the Owners and their contractors to enable operation and maintenance of the Owners' Isolation Valve and the Owners' Portion, subject to the new limitations.

9.2 AWWU Access Road. AWWU shall be responsible, at its own expense, for brushing, clearing, plowing, and maintaining its access road and all bridges thereon to the AWWU Facilities, both upstream and downstream of the Facility. The Owners may use such access road as part of its Access License granted pursuant to Section 9.1, and may, at their discretion, brush, clear, and plow the access road as needed to facilitate the Owners' access to the Facility, provided that under no circumstances shall the Owners be required to conduct such brushing, clearing or plowing.

9.3 Access Bridges. Pursuant to the Interconnection Agreement, the Owners agreed to install Access Bridges to improve Facility access and account for the additional traffic on the AWWU access road connected with the activities described in the Interconnection Agreement and this Agreement. As set forth in the Interconnection Agreement, upon completion of Access Bridge construction, the full responsibility for (and associated costs of) such bridge maintenance passes to AWWU, provided, that the Owners shall be responsible for any maintenance associated with damage caused by the Owners' gross negligence or intentional misconduct.

ARTICLE 10.
LIMITATIONS ON LIABILITY

10.1 Aggregate Limitation of Liability. Notwithstanding any other provision of this Agreement, the total aggregate liability of the Owners and the total aggregate liability of AWWU arising out of or relating to this Agreement, from any and all causes, whether based on contract, tort (including negligence), strict liability or any other cause of action, shall in no event exceed ten million dollars ($10,000,000.00) for AWWU, and ten million dollars ($10,000,000.00) for the Owners collectively, provided that such limit shall not apply in the case of such Party's (i) gross negligence or willful misconduct, (ii) third-party indemnity obligation, or (iii) breach of any representation or warranty.

10.2 CUMULATIVE REMEDIES. IF NO REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY PROVIDED, OR IF A REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY NON-EXCLUSIVE, THE NON-DEFAULTING PARTY SHALL HAVE THE RIGHT TO EXERCISE ALL RIGHTS AND REMEDIES AVAILABLE TO IT AT LAW OR IN EQUITY; PROVIDED, HOWEVER, THAT THE LIABILITY OF THE DEFAULTING PARTY SHALL BE LIMITED TO DIRECT, ACTUAL DAMAGES ONLY AND ALL OTHER DAMAGES AND REMEDIES ARE WAIVED.

10.3 WAIVER OF CERTAIN DAMAGES. EXCEPT WITH RESPECT TO INDEMNIFICATION OF THIRD-PARTY CLAIMS PURSUANT TO ARTICLE 11, OR AS

OTHERWISE EXPRESSLY PROVIDED FOR HEREIN, IN NO EVENT SHALL EITHER PARTY BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY, INDIRECT, BUSINESS INTERRUPTION OR SIMILAR DAMAGES, WHETHER BY STATUTE, IN TORT, BY CONTRACT OR OTHERWISE.

ARTICLE 11.
INDEMNIFICATION

11.1 Indemnity. To the fullest extent permitted by Law, each Party shall indemnify, hold harmless and defend the other Party and its directors, officers, shareholders, partners, agents and employees, and the Affiliates of the same (collectively, the "Indemnified Parties"), from and against any and all claims, loss, damage, expense and liability, including court costs and reasonable attorneys' fees (collectively, "Liabilities") incurred by the Indemnified Parties in connection with or arising from: (i) the Water Transportation Services and (ii) any claim for physical damage to or physical destruction of any part of the Facility, the AWWU Facilities, or death of or bodily injury to any person, to the extent such Liabilities were caused by the negligence of the Indemnifying Party or its agents or employees or others under such Indemnifying Party's control, except any Liabilities incurred due to the negligence or willful misconduct of an Indemnified Party. For the purpose of the definition of "Indemnified Parties" AWWU shall not be considered to be an "Affiliate" of the MOA.

11.2 Additional Owners Indemnity. To the fullest extent permitted by Law, the Owners shall indemnify, hold harmless, and defend AWWU and its Indemnified Parties from any Liabilities incurred by AWWU and its Indemnified Parties arising from damage to AWWU's water line and other infrastructure, including but not limited to its infrastructure downstream of the Facility (*i.e.* conditions caused by scouring or erosion of the river bed or banks that damage AWWU's water line and/or facilities) as a direct result of the instream water flows conveyed into the Eklutna River as part of the Water Transportation Services. The Owners shall further indemnify, defend and hold AWWU harmless from any Liabilities directly related to fish and wildlife mitigation measures and arising out of normal operation of the AWWU Facilities, the Facility, or any other facilities of AWWU, in a manner consistent with this Agreement, the Interconnection Agreement, the Water Supply Agreement, Prudent Industry Standards, the most current edition of the AWWU Design and Construction Practices Manual, the Municipality of Anchorage Standard Specifications and Anchorage Municipal Code, unless such Liabilities arose out of the negligence, violation of Law, or intentional misconduct by AWWU.

11.3 Defense of Claims. A Party with an indemnification obligation pursuant to this ARTICLE 11 (an "Indemnifying Party") shall have the right to defend the Indemnified Parties pursuant to this ARTICLE 11 by counsel of the Indemnifying Party's selection (including insurance counsel) reasonably satisfactory to the Indemnified Party, unless in the opinion of counsel for the Indemnifying Party a conflict of interest between the Parties may exist with respect to such claim. If the Indemnifying Party does not assume the defense of the Indemnified Party, or if a conflict precludes counsel for the Indemnifying Party from providing the defense, then the Indemnifying Party shall reimburse the Indemnified Party on a monthly basis for the Indemnified Party's defense through separate counsel of the Indemnified Party's choice. Even if the Indemnifying Party assumes the defense of the Indemnified Party with acceptable counsel, the Indemnified Party, at its sole option, may participate in the defense, at its own expense, with

counsel of its own choice without relieving the Indemnifying Party of any of its obligations hereunder. The Parties shall give each other prompt written notice of any asserted claims or actions indemnified against hereunder and shall cooperate with each other in the defense of any such claims or actions. Without the prior written consent of the Indemnified Party, which consent shall not be unreasonably withheld, conditioned or delayed, no Indemnifying Party shall settle any such claims or actions in a manner that would require any action or forbearance from action by any Indemnified Party.

ARTICLE 12.
DEFAULT AND REMEDIES; TERMINATION; DISPUTE RESOLUTION

12.1 Event of Default. The following shall constitute events of default on the part of either party (each, an "Event of Default") under this Agreement:

(a) If a Party makes a general assignment for the benefit of its creditors, or if a receiver is appointed on account of the insolvency of such Party, or if such Party files a petition seeking to take advantage of any other Law relating to bankruptcy, insolvency, reorganization, winding up or composition of or readjustment of debts and, in the case of any such proceeding instituted against such Party (but not by such Party) such proceeding is not dismissed within sixty (60) days of such filing;

(b) If a Party fails to comply with any material terms of this Agreement not otherwise set forth as an Event of Default in this Section 12.1(b) and fails to cure or remedy such failure within thirty (30) days after notice and a written demand is made by the non-defaulting Party to the defaulting Party to cure the same or, if such failure cannot be cured within thirty (30) days, the defaulting Party fails to commence to cure such failure within thirty (30) days after such notice and written demand and thereafter diligently pursue such cure to completion, which shall in no event be later than ninety (90) days after such notice;

(c) If a Party defaults under the Water Supply Agreement or the Interconnection Agreement;

(d) If a Party fails to make any payment due hereunder within sixty (60) days after written notice from the non-defaulting Party; or

(e) If any representation or warranty of a Party in this Agreement proves to have been false or misleading in any material respect when made, and such Party has not, within thirty (30) days after written notification thereof from the non-defaulting Party, either fully remedied, or commenced and diligently pursued the remedy, of all adverse impacts on the non-defaulting Party resulting therefrom, all to the reasonable satisfaction of the non-defaulting Party.

12.2 Remedies Upon Event of Default. Upon the occurrence and continuation of an Event of Default, the non-defaulting Party shall have the right to terminate this Agreement and the Water Supply Agreement upon ten (10) days written notice and pursue any other remedy available to such non-defaulting party at law or in equity arising out of such Event of Default, including a claim for monetary damage or specific performance.

12.3 Automatic Cross-Agreement Termination. If this Agreement is terminated for any reason during the Delivery Term, the Interconnection Agreement and the Water Supply Agreement shall automatically terminate effective as of the same date of this Agreement's termination.

12.4 Termination for Failure of Conditions Precedent. If, prior to the Delivery Term, the Owners, in their reasonable discretion, decide to not construct the Facility due to the failure to achieve the Construction Start CPs as defined in the Interconnection Agreement, the Owners may terminate this Agreement without liability.

12.5 Dispute Resolution. In the event of any dispute arising under this Agreement (a "Dispute"), within ten (10) Business Days following notice by either Party, (i) each Party shall appoint a representative, and (ii) the representatives shall meet, negotiate and attempt in good faith to resolve the Dispute quickly, informally and inexpensively. In the event the representatives cannot resolve the Dispute within thirty (30) Days after the first meeting, either Party may request that consideration and resolution of the Dispute be transferred to a designated representative of each Party's senior management. Within ten (10) Days following such a request, each Party shall submit a written summary of the Dispute describing the issues and claims to a senior officer of each Party designated to address the Dispute. Within ten (10) Business Days after receipt of each Party's Dispute summaries, the senior management representatives for both Parties shall negotiate in good faith to resolve the Dispute. If such senior management representatives are unable to resolve the Dispute within thirty (30) Days thereafter, either Party may pursue any available legal remedies.

ARTICLE 13.
REPRESENTATIONS

13.1 General Representations and Warranties. Each Owner and AWWU hereby represents and warrants as of the Effective Date and the Delivery Term Effective Date that:

(a) It is duly organized, validly existing and in good standing under the Laws of the state of its formation and is duly qualified to do business in the jurisdiction where the Site is located.

(b) It has all necessary power and authority to execute, deliver and perform its obligations under this Agreement; its execution, delivery and performance of this Agreement have been duly authorized by all necessary corporate, municipal, or other action on its part; and this Agreement has been duly and validly executed and delivered by it and constitutes its legal, valid and binding obligation enforceable against it in accordance with its terms, except as the enforceability thereof may be limited by bankruptcy, insolvency, reorganization or moratorium or other similar Laws relating to the enforcement of creditors' rights generally and by general equitable principles.

(c) It is not in violation of any applicable Law, or any judgment entered by any federal, state, local or other Governmental Authority, which violations, individually or in the aggregate, would adversely affect its performance of any obligations under this Agreement. There are no legal or arbitration proceedings or any proceeding by or before any Governmental Authority, now pending or (to its best knowledge) threatened against it which, if adversely

determined, could have a material adverse effect upon its financial condition, operations, prospects or business, as a whole, or its ability to perform under this Agreement.

(d) No authorization, approval, exemption, or consent of or by any Person is required by it in connection with the execution, delivery, and performance of this Agreement. In addition, each Party represents and warrants to the other Party that the Governmental Approvals required to be obtained by such Party either have been obtained by such Party and are in full force and effect on the date hereof or will be obtained by such Party and will be in full force and effect on or prior to the date on which they are required, under applicable Law, to be in full force and effect, so as to permit AWWU to perform the Water Transportation Services and the parties to otherwise complete their obligations hereunder.

(e) The execution and delivery of this Agreement, the consummation of the transactions herein contemplated and compliance with the terms and provisions hereof by it will not conflict with or result in a material breach of, or require any consent under, any of its constitutive documents, or any applicable Law, or any agreement or instrument to which it is a party or by which it is bound or to which it is subject, or constitute a material default under any such agreement or instrument.

ARTICLE 14.
NOTICES

14.1 Writing. Except as set forth in Section 14.2, any notice, statement, demand, claim, offer or other written instrument required or permitted to be given pursuant to this Agreement shall be in writing signed by the Party giving such notice and shall be sent by email, facsimile, hand messenger delivery, overnight courier service, or certified mail (receipt requested) to the other Party as follows: (i) prior to the finalization of the Operating Procedures, such notices shall be sent to the addresses set forth in Exhibit E; and (ii) after the finalization of the Operating Procedures, such notices shall be sent to the legal notice addresses listed in such Operating Procedures. Each Party shall have the right to change the address information to which notice shall be sent or delivered or to specify additional addresses to which copies of notices may be sent, in either case by similar notice sent or delivered in like manner to the other Party, which, after the development of the Operating Procedures, shall be reflected in such Operating Procedures. All notices shall be effective upon receipt.

14.2 Technical Communications. Any technical or other communications pertaining to the Facility, the Water Transportation Services, and the Operational Work shall follow the procedures set forth in the Operating Procedures, to be updated from time to time pursuant to Section 5.1(b).

ARTICLE 15.

CONFIDENTIALITY; PUBLIC STATEMENTS

15.1 Confidentiality. The Parties agree that the Parties' proposals, communications, negotiations and information exchanged prior to the Effective Date concerning this Agreement and the development thereof, and technical and other information regarding or relating to the Facility, the AWWU Facilities, the Access Bridges, and the provision of the Water Transportation Services

exchanged between the Parties that is marked, or otherwise clearly communicated to the receiving Party as "Confidential" constitutes "Confidential Information" of the disclosing Party. The Owners and AWWU each agree to hold such Confidential Information wholly confidential. Such Confidential Information may only be used by the Parties for the purposes related to the approval, or administration or enforcement of this Agreement.

15.2 Disclosure. Each Party agrees not to disclose Confidential Information of the other Party to any other Person (other than its Affiliates, counsel, consultants, lenders, partners, members, employees, officers and director, and then only to Persons subject to similar confidentiality restrictions as those set forth herein), without the prior written consent of the other Party, provided, that, either Party may disclose Confidential Information, if such disclosure is required by Law, including without limitation, pursuant to an order of a court or regulatory agency or in order to enforce this Agreement or to seek approval of this Agreement. In the event a Party is required by Law or a Governmental Authority to disclose Confidential Information, such Party, prior to such disclosure, shall provide reasonable advance notice to the other Party of the time and scope of the intended disclosure in order to permit such disclosing Party the opportunity to obtain a protective order or otherwise seek to prevent or limit the scope or otherwise impose conditions upon such disclosure.

15.3 Injunctive Relief. Each Party agrees that violation of the terms of Sections 15.1 and 15.2 constitutes irreparable harm to the other, and that the harmed Party may seek any and all remedies available to it at law or in equity, including but not limited to injunctive relief.

15.4 Release of Agreement. The Parties agree that this Agreement, upon execution, shall not be considered Confidential Information. Except as required by Law, releasing the Agreement to the public shall be the sole responsibility of the Owners, to be released in the manner at a time decided in their sole discretion.

ARTICLE 16.
MISCELLANEOUS

16.1 Reasonability. The Parties shall act in a reasonable manner and in accordance with principles of good faith and fair dealing in the performance of this Agreement. Unless expressly provided otherwise in this Agreement and whether or not stated: (a) where this Agreement requires the consent, approval, or similar action by a Party, such consent or approval shall not be unreasonably withheld, conditioned, or delayed; and (b) wherever this Agreement gives a Party a right to determine, require, request, specify, or take similar action with respect to a matter, such determination, requirement, request, specification, or similar action must be reasonable.

16.2 Entire Agreement. This Agreement, together with all Schedule and Exhibits hereto, embodies the entire agreement and understanding of the Parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements and understandings of the Parties, verbal or written, relating to the subject matter hereof.

16.3 Waiver. Any waiver of the provisions of this Agreement must be in writing and shall not be implied by any usage of trade, course of dealing or course of performance. No exercise of any right or remedy by AWWU or the Owners constitutes a waiver of any other right or remedy

contained or provided by Law. Any delay or failure of a Party to exercise, or any partial exercise of, its rights and remedies under this Agreement shall not operate to limit or otherwise affect such rights or remedies. Any waiver of performance hereunder shall be limited to the specific performance waived and shall not, unless otherwise expressly stated in writing, constitute a continuous waiver or a waiver of future performance.

16.4 Assignment. Neither Party shall assign this Agreement or any of its rights hereunder without the prior written consent of the other Party, which consent shall not be unreasonably withheld, conditioned or delayed. Notwithstanding the foregoing, either Party, without relieving itself from liability hereunder, and without the need for consent from the other Party provided that any such assignee shall agree to be bound by all terms and conditions hereof, may transfer, pledge or assign this Agreement: (a) to any person or entity succeeding to all or substantially all of the assets of the assigning Party; or (b) to a successor entity in a merger or acquisition transaction. Any assignment made in contravention of this Section 16.4 shall be void and unenforceable.

16.5 Governing Law; Submission to Jurisdiction; Venue; No Jury Trial.

(a) Governing Law. THIS AGREEMENT SHALL BE GOVERNED BY, AND INTERPRETED AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF ALASKA, EXCLUDING ANY CHOICE OF LAW RULES.

(b) Submission to Jurisdiction, Venue. The Parties agree that any suit, action or other legal proceeding by or against any Party (or its Affiliates or designees) with respect to or arising out of this Agreement shall be brought exclusively in the courts of the State of Alaska, in the Municipality of Anchorage, as the Party instituting such suit, action or other legal proceeding may elect, provided that claims related to federal water rights, federal legislation enabling the Facility or AWWU Facilities, or the 1991 Agreement may be brought in the United States District Court for the District of Alaska. By execution and delivery of this Agreement, each Party (for itself, its Affiliates and its designees) irrevocably and unconditionally consents and submits to the exclusive jurisdiction of such courts and the appellate courts therefrom, and waives any right it may have to assert the doctrine of forum non conveniens or similar doctrine or to object to venue with respect to any proceeding. The Parties irrevocably consent to the service of process in any such action or proceeding by the mailing of copies thereof by registered or certified mail, first class postage prepaid to the addresses set forth in Section 14.1.

(c) No Jury Trial. EACH OF THE PARTIES HEREBY WAIVES ANY AND ALL RIGHTS TO DEMAND A TRIAL BY JURY IN ANY ACTION, SUIT, OR PROCEEDING ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY.

(d) Duty to Proceed. Pending final resolution of any Dispute, the Owners and AWWU shall continue to fulfill their respective obligations hereunder that are not the subject of the Dispute.

16.6 Construction. This Agreement is to be construed so as to effectuate the normal and reasonable expectations of a sophisticated buyer and seller of the equipment and services covered

by this Agreement and shall not be construed either for or against either Party. No provision of this Agreement shall be construed or interpreted for or against either Party because such Party drafted or caused its legal representative to draft the provision.

16.7 Headings. The titles or headings of the various sections, articles and paragraphs hereof are intended solely for convenience and ease of reference and are not intended, and are not to be deemed for any purpose, to modify or explain or place any interpretation or construction upon any of the provisions of this Agreement.

16.8 Status of the Parties. AWWU and its Subcontractors shall be independent contractors to the Owners with respect to the Water Transportation Services and neither the AWWU nor its Subcontractors, nor the employees or agents of either, shall be deemed to be the employees, representatives or agents of the Owners in connection with any matter relating to this Agreement. No provision of this Agreement shall be construed or represented as creating a partnership, trust, joint venture, fiduciary or any similar relationship between the Parties.

16.9 Status of Individual Owners. Each of the Owners shall be jointly and severally liable for the obligations of the Owners under this Agreement. The delineation of specific responsibilities set forth hereunder as among the Owners shall be at the sole discretion of the Owners, not AWWU. If at any time, the Owners agree that one or two of the Owners need no longer be party to this Agreement, such unnecessary Owner(s) may be removed as parties to this Agreement upon written notice to AWWU, if agreed, and shall retain no liability upon removal, with the remaining Owner(s) automatically assuming the full obligations of the Owners hereunder. If an Event of Default exists hereunder at any time with respect to an Owner, it shall be considered an Event of Default with respect to the Owners together as one Party hereunder, provided, that if another Owner agrees to assume such defaulting Owner's obligations under this Agreement by removing such Owner as a party pursuant to the preceding sentence of this Section 16.9 prior to the expiration of any applicable cure period, this shall not be considered an Event of Default hereunder.

16.10 Insurance. Throughout the Delivery Term, the Owners shall maintain the required insurance policies as set forth on Exhibit D-1 and AWWU shall maintain the required insurance policy as set forth on Exhibit D-2.

16.11 No Third-Party Beneficiaries. This Agreement is made and entered into for the sole protection and legal benefit of the Owners and AWWU, and their permitted successors and assigns, and no other person shall be a direct or indirect legal beneficiary of, or have any direct or indirect cause of action or claim in connection with, this Agreement.

16.12 Further Assurances. Each Party agrees to execute and deliver all further instruments and documents, and take all further action, as may be reasonably necessary to complete performance by the Parties hereunder and to effectuate the purposes and intent of this Agreement.

16.13 Amendments. No change, amendment or modification of this Agreement shall be valid or binding upon the Parties unless such change, amendment or modification shall be in writing and duly executed by the Parties.

16.14 Severability. If any provision of this Agreement is determined to be illegal or unenforceable, such determination will not affect any other provision of this Agreement and all other provisions will remain in full force and effect.

16.15 Conflicting Provisions. In the event of any conflict between this document and any Schedule or Exhibit attached hereto, the terms and provisions of this document, as amended from time to time, shall control. In the event of any conflict among the Exhibits, the Exhibit of the latest date mutually agreed to by the Parties shall control.

16.16 Survival. The provisions of ARTICLE 1, ARTICLE 7, ARTICLE 10, ARTICLE 11, ARTICLE 12, ARTICLE 13, ARTICLE 14, and ARTICLE 16 shall survive termination of this Agreement for any reason.

16.17 Counterparts. This Agreement may be executed in any number of separate counterparts and delivered by electronic means, each of which when so executed shall be deemed an original, and all of said counterparts taken together shall be deemed to constitute but one and the same instrument.

ARTICLE 17.
EFFECT OF PUMPED STORAGE HYDROPOWER ALTERNATIVE

17.1 Pumped Storage Hydropower Study; Negotiation of Replacement Agreements. The parties shall, in good faith, conduct the pumped storage hydropower study required by the Governor of Alaska's October 2, 2024 Final Fish and Wildlife Program, in the same or substantially the same form as the study submitted to the Anchorage Assembly in AIM ____ (PSH Study). Within 30 days of the completion of the PSH Study, the parties shall meet and negotiate replacement agreements that (1) provide for any needed access to, use of, or interference with AWWU infrastructure to facilitate the potential alternative, and (2) replace the 1984 Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska, as amended, regarding use of and compensation for Eklutna Lake water by AWWU. Such agreements shall be subject to approval by the Anchorage Assembly to the extent required by municipal law.

17.2 Alternative Program Selected. If the Governor of Alaska selects an alternative Final Fish and Wildlife Program that does not involve the Facility, such as pumped storage hydropower, then:

(a) The Long-Term Water Transportation Agreement, the Interconnection Agreement, and the Water Supply Agreement shall immediately be suspended.

(b) The Parties shall expeditiously execute new agreements, if not already executed, to facilitate the implementation and long-term operation and maintenance of the alternative Final Program selected by the Governor. Such agreements shall be subject to approval by the Anchorage Assembly to the extent required by municipal law.

17.3 Continuity of Municipal Water Supply. In the event the Public Water Supply Agreement is suspended in accordance with the preceding section, the terms for the Municipality's water supply that were in effect as of April 22, 2025 under the 1984 Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska, as amended, shall be restored and remain in effect until replacement agreements for the Municipality's public water supply are negotiated, approved by the Anchorage Assembly, and executed.

17.4 Reservation of Rights. The parties reserve all rights, remedies, and causes of action available to them under the 1991 Fish and Wildlife Agreement.

[***Remainder of page intentionally left blank***]

IN WITNESS WHEREOF, the Parties have caused this Long-Term Water Transportation Agreement to be executed by their duly authorized representatives as of the Effective Date.

Schedule 1.1

Definitions

"1991 Agreement" means that certain Agreement between the Municipality of Anchorage, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., the United States Fish and Wildlife Service, the National Marine Fisheries Service, the State of Alaska, and the Alaska Energy Authority Relative to the Eklutna and Snettisham Hydroelectric Projects, dated August 7, 1991.

"Access Bridges" means those bridges installed by the Owners on the Eklutna River pursuant to the terms of the Interconnection Agreement.

"Affiliate" means, with respect to any Person, any other Person controlling, controlled by or under common control with such first Person. For purposes of this definition and the Agreement, the term "control" (and correlative terms) means (1) the ownership of 50% or more of the equity interest in a Person, or (2) the power, whether by contract, equity ownership or otherwise, to direct or cause the direction of the policies or management of a Person.

"Access License" has the meaning set forth in Section 9.1.

"Agreement" has the meaning set forth in the Preamble, and shall include all Exhibits and Schedules hereto.

"Approvals" means Governmental Approvals and third-party approvals.

"AWWU" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of AWWU.

"AWWU Design and Construction Practices Manual" means the edition dated _____, 20__, as updated and amended from time to time.[2]

"Event of Default" has the meaning set forth in Section 12.1.

"AWWU's Isolation Valve" has the meaning set forth in Exhibit A-1.

"AWWU Facilities" has the meaning set forth in the Recitals.

"AWWU's Portion" has the meaning set forth in Exhibit A-1.

"AWWU's Water Permit" means that permit belonging to AWWU (LAS 2569) to use Owners' Water Rights for up to 41 MGD for public water supply pursuant to the Act of October

[2] **Note to Accompany Final Draft**: To be populated after Governor approval and prior to execution to reflect the most up to date version.

30, 1984, 98 Stat. 2823, as may be replaced as described in Section 3.1 of the Water Supply Agreement.

"AWWU's Water" means any and all water belonging to AWWU pursuant to AWWU's Water Permit.

"Business Day" means any day other than a Saturday, Sunday or legal holiday in the state of Alaska.

"Chugach" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of Chugach.

"Confidential Information" has the meaning set forth in Section 15.1.

"Cost Responsibility Proportion" shall mean, with respect to each Owner, the percentage of the total applicable Eklutna Hydroelectric Project costs that such Owner is obligated to pay as agreed to by the Owners, which as of the Effective Date shall be, with respect to MOA, 19.05%, with respect to Chugach, 64.28%, and with respect to MEA, 16.67%, and which may be changed hereunder upon agreement between the Owners at any time.

"Curtailment Duration" means, with respect to a curtailment in Water Transportation Services during an Excused Event, the duration of such curtailment.

"Curtailment Limit" means, with respect to each day of the Delivery Term where there exists an Excused Event, the amount of Owners' Water in MGD that can be transported to the Delivery Point on such day. For the avoidance of doubt, this amount can equal zero (0) MGD.

"Day" or "day" means a calendar day, unless expressly specified otherwise.

"Delivery Point" has the meaning set forth in Exhibit A-1 and is depicted on the schematic included as part of Exhibit B.

"Delivery Point Meter" has the meaning set forth in Exhibit A-1.

"Delivery Term" has the meaning set forth in Section 2.1.

"Delivery Term Effective Date" has the meaning set forth in Section 2.1.

"Dispute" has the meaning set forth in Section 12.5.

"Effective Date" has the meaning set forth in the Preamble.

"Eklutna Hydroelectric Project" means the Eklutna Hydroelectric Project initially authorized, constructed and operated pursuant to the Eklutna Project Act of July 31, 1950 (64 Stat. 382, as amended), including any and all property and facilities acquired or used in connection therewith, all of which was then sold to the Owners by the United States of America on October 2, 1997.

"Eklutna Water Treatment Facility" means the water treatment plant owned by AWWU located alongside the Eklutna River.

"Event of Default" has the meaning set forth in Section 12.1.

"Excused Event" means a Planned Outage, a Forced Outage, or an Force Majeure Event causing a reduction or suspension of the Water Transportation Services.

"Facility" has the meaning set forth in the Recitals.

"Final Acceptance" has the meaning set forth in the Interconnection Agreement.

"Fish and Wildlife Program" has the meaning set forth in the Recitals.

"Force Majeure Event" means the occurrence of any act or event beyond the reasonable control of the Party affected that prevents the affected Party from performing its obligations under this Agreement, in full or part, if such act or event is beyond the reasonable control of, and not the result of the fault or negligence of, the affected Party and such Party has been unable to overcome such act or event with the exercise of due diligence (including the expenditure of reasonable sums), including the following: drought, flood, earthquake, storm, fire, lightning, epidemic, war, riot, civil disturbance, sabotage, terrorism or threat of terrorism, strike or labor difficulty, accident or curtailment of supply or equipment, total casualty to equipment, or restraint, order or decree by a Governmental Authority. Notwithstanding the foregoing, Force Majeure Events shall expressly not include mechanical or equipment failures (except to the extent any such failure is itself caused by a Force Majeure Event), diminution in water quality in Eklutna Lake, Planned Outages, or Forced Outages (unless such Forced Outage is caused by a Force Majeure Event).

"Forced Outage" means; (i) any unplanned necessary reduction or suspension of Water Transportation Services available from the Facility; or (2) any other unavailability of the AWWU Facilities of Facility in whole or in part, each in response to an equipment malfunction or other emergency condition determined by AWWU in its reasonable discretion to be a threat to any AWWU Facilities. For the sake of clarity, forced outages in AWWU infrastructure downstream of the Isolation Valve Structure are not considered a Forced Outage.

"Governmental Approvals" means all authorizations, consents, licenses, leases, rulings, certifications, registrations, exemptions, permits, certificates, and approvals from any Governmental Authority.

"Governmental Authority" means any federal, state or local government, any political subdivision thereof, or any governmental, quasi-governmental, judicial, public or statutory instrumentality, administrative agency, authority, body or other entity having jurisdiction over the performance of the Water Transportation Services, the Operational Work, the Facility or its operations, or the health, safety or environmental conditions of the Site or otherwise over the Parties' rights and obligations under this Agreement.

"Indemnified Parties" has the meaning set forth in Section 11.1.

"Indemnifying Party" has the meaning set forth in Section 11.3.

"Initial Delivery Term" has the meaning set forth in Section 2.1.

"Injection Point" means the point where AWWU Facilities meet facilities owned by the Owners near the outlet of the Eklutna Lake, where AWWU receives all of AWWU's Water from Eklutna Lake, as depicted in the schematic included as part of Exhibit B.

"Interconnection Agreement" has the meaning set forth in the Recitals.

"Injection Point Flow Meter" means a meter measuring the flow of water passing into AWWU Facilities at the Injection Point.

"Isolation Valve Structure" has the meaning set forth in Exhibit A-1.

"Isolation Valves" has the meaning set forth in Exhibit A-1.

"Law" means any constitution, charter, act, statute, law, ordinance, code, rule, regulation, order, specified standards or objective criteria contained in any applicable permit or approval (which standards or criteria must be met in order for the Water Transportation Services or Operational Work to be performed lawfully) or other legislative or administrative action of any Governmental Authority or a final decree, judgment or order of a court or tribunal.

"Liabilities" has the meaning set forth in Section 11.1.

"MEA" has the meaning set forth in the Preamble, and shall include all successor sand assigns of MEA.

"MGD" means millions of gallons per day.

"MOA" has the meaning set forth in the Preamble, and shall include all successor sand assigns of MOA.

"Monthly Water Release Schedule" has the meaning set forth in Section 3.2.

"Operating Procedures" has the meaning set forth in Section 5.1.

"Operational Work" means all phases of AWWU and the Owners' performance of their obligations under this Agreement to operate and maintain the Facility and the AWWU Facilities.

"Owners" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of the Owners.

"Owner" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of such Owner.

"Owners' Isolation Valve" has the meaning set forth in Exhibit A-1.

"Owners' Approvals" has the meaning set forth in Section 4.4.

"Owners' Portion" has the meaning set forth in Exhibit A-1.

"Owners' Water Rights" means that certain senior priority water rights held by the Owners for the water in Eklutna Lake for use in generating power for the Eklutna Hydroelectric Project as described in water rights certificate ADL 44944.

"Owners' Water" means any and all water belonging to the Owners pursuant to the Owners' Water Right.

"Party" and "Parties" has the meaning set forth in the Preamble.

"Person" means any individual, partnership, corporation, limited liability company, association, business, trust, government or political subdivision thereof, Governmental Authority or other entity.

"Planned Outage" means the removal of Facility equipment from service availability for inspection and/or overhaul or repair in such a way that requires a reduction or halt in flow of Owners' Water through the AWWU Facilities to the Delivery Point. For the sake of clarity, planned outages in AWWU infrastructure downstream of the Isolation Valve Structure are not considered a Planned Outage. To qualify as a Planned Outage, the maintenance (a) must actually be conducted during the Planned Outage, and in AWWU's reasonable discretion must be of the type that is necessary to reliably maintain the Facility or the AWWU Facilities, and (b) cannot be reasonably conducted during normal Facility or AWWU Facilities' operations.

"Prudent Industry Standards" means those standards of care and diligence normally practiced by water transportation infrastructure operation and maintenance firms in performing services of a similar nature in a similar jurisdiction in which the Water Transportation Services and Operational Work will be performed. Prudent Industry Standards are not intended to be limited to optimum practice or methods, but rather to be a spectrum of reasonable and prudent practices and methods that must take the conditions specific to any water transportation facility under consideration.

"River Release Structure" has the meaning set forth in Exhibit A-1.

"Site" means the location of the Facility as further described and depicted in Exhibit B.

"Subcontractor" means any Person with whom the Owners, or any Owner, enters into an arrangement for the performance of any portion of the Water Transportation Services or Operational Work, including Persons at any tier with whom any Subcontractor has further subcontracted any portion of the Water Transportation Services or Operational Work, and the legal or personal representatives, successors, and assigns of such Person.

"Term" has the meaning set forth in Section 2.1(a).

"Water Release Limits" has the meaning set forth in Section 3.1.

"Water Supply Agreement" has the meaning set forth in the Recitals.

"Water Transportation Services" has the meaning set forth in Section 3.1.

Exhibit A

Eklutna River Release Facility Description and Definitions[3]

The **"*Eklutna River Release Facility*"** shall consist of an Isolation Valve Structure and the River Release Structure.

The "***Isolation Valve Structure***" shall include:

- a new tee to be built in the AWWU pipeline downstream of the AWWU tunnel/pipeline transition and upstream of the AWWU portal valve (the "***Delivery Point***")
- A 54-inch gate valve on the main segment of AWWU pipeline intended to provide dual means of isolation for AWWU's pipeline segment ("***AWWU's Isolation Valve***")
- A 42-inch gate valve on the branch segment of AWWU pipeline intended to provide isolation to the river release structure ("***Owners' Isolation Valve***", together with AWWU's Isolation Valve, the "***Isolation Valves***").
- Related controls and communication technology to be installed by the Owners in the main line of the AWWU Facilities.

The "***River Release Structure***" shall include:

- [A new pipeline from the Isolation Valve Structure to the Eklutna River]
- Control valves
- A new meter installed at the Delivery Point ("***Delivery Point Meter***")
- Monitoring and control equipment to be installed by Owners [*describe where]*.

"***AWWU's Portion***" of the Facility shall consist of the Isolation Valve Structure [and _____]

The "***Owners' Portion***" of the Facility shall consist of the River Release Structure [and _____]

[3] **Note to Accompany Final Draft**: This Exhibit will be revised and finalized by Owners to reflect the proposal approved by the Governor and prior to signing.

Exhibit B[4]

Description and Schematic of Site, AWWU Facilities, and Injection Point and Delivery Point

[4] **Note to Accompany Final Draft**: This Exhibit will be populated after Governor approval and prior to signing.

PUBLIC WATER SUPPLY AGREEMENT

This PUBLIC WATER SUPPLY AGREEMENT (this "Agreement"), dated as of [_____] (the "Effective Date"), is entered into by and between Anchorage Water and Wastewater Utility ("AWWU"), and Chugach Electric Association, Inc. ("Chugach"), Matanuska Electric Association, Inc. ("MEA"), and the Municipality of Anchorage ("MOA") (each of Chugach, MEA, and MOA is an "Owner" and collectively they are referred to as the "Owners"). The Owners and AWWU are sometimes referred to herein as a "Party" or collectively as the "Parties".

R E C I T A L S

WHEREAS, the federal Alaska Power Administration ("APA") originally developed, owned and operated the Eklutna Hydroelectric Project, which began operations in 1954 for the production of electric power that APA sold to electric utilities serving the Anchorage and Matanuska Valley areas;

WHEREAS, as then-owner of the Eklutna Hydroelectric Project assets, the APA possessed senior water rights (both federal reserved water rights and water rights granted under State of Alaska law), with a priority date of 1954, to all the water that may be feasibly appropriated from Eklutna Lake for use in generating electric power for the Eklutna Hydroelectric Project as reflected in water rights certificate ADL 44944 ("Project Water Rights");

WHEREAS, in the 1980s, AWWU:

(i) determined that Eklutna Lake was a necessary source of water for the City of Anchorage;

(ii) entered into that certain "Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska" with APA, dated February 17, 1984, as amended (the "1984 Agreement"), which among other things provides terms and conditions relating to (i) AWWU facility interconnection to Eklutna Hydroelectric Project; and (ii) the compensation by AWWU to the Owners for AWWU's diversion of water for public water supply that reduces the Project Water Rights otherwise available for use to generate energy at the Eklutna Hydroelectric Project;

(iii) obtained: (1) "preferred use status" from the Alaska Department of Natural Resources ("DNR") through an application that demonstrated the need for AWWU to take prior-appropriated water for public water supply purposes and which is conditioned upon the validity and existence of the 1984 Agreement (the "Preferred Use Status") pursuant to Alaska Statute 46.15.150(b); (2) a permit (LAS 2569) to use Project Water Rights for up to 41 million gallons per day for public water supply pursuant to the Act of October 30, 1984, 98 Stat. 2823, (the "AWWU Water Permit"); and

(iv) constructed and began operations of the water project diverting water from the Eklutna Hydroelectric Project intake tunnel to AWWU's water system (the "AWWU Water Project");

WHEREAS, the 1984 Agreement remains in effect "until the year 2025" and the AWWU Water Permit expires on December 31, 2025;

WHEREAS, in October 1997, the Owners purchased from APA the Eklutna Hydroelectric Project and all related project assets, including Project Water Rights and became parties to the 1984 Agreement through assignment (the "Owners' Facilities");

WHEREAS, pursuant to the 1991 Agreement (as defined below), the Owners have studied and developed a Fish and Wildlife program to protect, mitigate damages to, and enhance fish and wildlife impacted by the development of the Eklutna Hydroelectric Project centered on establishing instream flows in the Eklutna River as part of the implementation of the Fish and Wildlife Program (the "Fish and Wildlife Program"); a program which proposes to: (1) develop an Eklutna River release facility consisting in part of AWWU Facilities and facilities constructed pursuant to the Interconnection Agreement, all as further described in Exhibit A to the Long-Term Water Transportation Agreement and as will be depicted as-built in the Operating Procedures (the "Facility"); (2) to transport water from Eklutna Lake through the Facility and release it into the Eklutna River; and (3) to maintain and operate the Facility;~~;~~

WHEREAS, in order to establish such instream flows, the Owners and AWWU have negotiated two agreements: (1) a Water Facilities Interconnection Agreement (the "Interconnection Agreement"), which shall govern the construction and interconnection of the Parties' respective facilities for conveyance of water from the Eklutna Lake to the Eklutna River using AWWU facilities; and (2) a Long-Term Water Transportation Services Agreement (the "Transportation Agreement"), which shall govern the provision of conveyance services for transporting water from the Eklutna Lake to the Eklutna River;

WHEREAS, in coordination and joint consideration with the Interconnection Agreement and the Transportation Agreement, the Parties desire to enter into this Agreement in order to replace the 1984 Agreement and set forth new terms and conditions relating to (i) the compensation from AWWU to the Owners for AWWU's use of the Project Water Rights in accordance with Alaska Statute 46.15.150 and; (ii) the extension of other future rights to AWWU; ~~and~~

WHEREAS, on October 2, 2024, Alaska Governor Mike Dunleavy established a Final Fish and Wildlife Program for the Eklutna Hydropower Project that directed the parties to the 1991 Agreement and the Native Village of Eklutna to study pumped storage hydropower as an alternative to the Facility, noted the Governor's ability to alter the Final Fish and Wildlife Program, and stated that a pumped storage hydropower alternative could ultimately be selected; and

WHEREAS, the Long-Term Water Transportation Agreement, the Interconnection Agreement, and the Public Water Supply Agreement negotiated by the Parties contain terms to facilitate the implementation of a Final Program that uses the Facility and the Facility's long-term operation, but the original versions of these agreements did not contemplate the Governor's potentially selecting a pumped storage hydro alternative as a major component of the Final Fish and Wildlife Program, rendering certain additions appropriate; and

NOW, THEREFORE, in consideration of the premises of this Agreement, the Transportation Agreement, and the Interconnection Agreement, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Owners and AWWU, intending to be legally bound, hereby agree as follows:

ARTICLE I
DEFINITIONS; INTERPRETATION

Section 1.1 Defined Terms. Capitalized terms used in this Agreement without other definition shall have the meanings set forth in Schedule 1.1, unless the context requires otherwise.

Section 1.2 Interpretation. As used in this Agreement, the terms "herein," "herewith" and "hereof" are references to this Agreement, taken as a whole; the terms "includes" or "including" shall mean "including, without limitation"; and references to a "Section," "Article", "Exhibit" or "Schedule" shall mean a Section, Article, Exhibit or Schedule of this Agreement, as the case may be, unless in any such case the context requires otherwise. All references to a given Exhibit, Schedule, agreement, instrument or other document shall be a reference to that agreement, instrument or other document as modified, amended, supplemented and restated through the date as of which such reference is made. A reference to a Person includes its permitted successors and permitted assigns. The singular shall include the plural and the masculine shall include the feminine and neuter, and vice versa.

ARTICLE II
EFFECTIVE DATE; TERM

Section 2.1 Effective Date. This Agreement shall become binding on the Parties on the Effective Date, subject to Section 2.2.

Section 2.2 Conditions Precedent. The rights and obligations of the Parties as set forth in Articles III – VI in this Agreement shall not be effective until the achievement of the following conditions precedent (the "Conditions Precedent"), a written notice of which shall be sent to AWWU by Owners:

(a) The Owners receive final approval from the Governor of Alaska, with such approval for a Fish and Wildlife Program that requires the use of the AWWU Facilities for instream flows as contemplated in this Agreement, provided that such approval includes no unexpected conditions materially adverse to the Owners or to AWWU, as determined in good faith by the Parties and in the exercise of commercially reasonable business judgment, and neither the approval from the Governor of Alaska nor the Fish and Wildlife Program is subject to any pending judicial review or appeal;

(b) Owners and AWWU obtain and provide evidence of lawful water rights from DNR for the use and transport of water as contemplated under the Agreement, including but not limited to a renewal, extension, or replacement of the AWWU Water Permit, Preferred Use Status, and all other approval(s) authorizing continued use of the Owners' Water Rights by AWWU;

(c) Chugach obtains final Regulatory Commission of Alaska ("RCA") approval of its applicable tariff rates necessary to implement the compensation outlined in Section 3.2 below

pursuant to, and in a manner consistent with, Section 6.23 of the MOA-Chugach APSA as such terms are defined therein; and

(d) The Interconnection Agreement and the Transportation Agreement are in full force and effect and are valid, binding and enforceable against AWWU and the Owners in accordance with their terms.

Section 2.3 Failure to Achieve Conditions Precedent. In the event that this Agreement does not become fully effective (i) due to the failure to achieve the Conditions Precedent as set forth in Section 2.2 by [June 1, 2025], or (ii) because the Governor of Alaska approves a Fish and Wildlife Program that does not require the use of the AWWU Facilities for instream flows as contemplated in this Agreement, then: (A) this Agreement will be terminated upon thirty (30) days' written notice by either Party (B) the automatic cross-agreement termination provisions of Section 10.3 shall apply; and (C) the Parties shall meet promptly to negotiate in good faith an alternate agreement to replace the 1984 Agreement that expires in 2025 with terms and conditions that include but are not limited to adequate compensation, risk mitigation, potential transfer or purchase of water rights, and other terms and conditions then deemed appropriate by the Parties without prejudice due to the prior existence, or the subsequent termination, of this Agreement.

Section 2.4 Term. Unless agreed to otherwise by the Parties, this Agreement will continue in full force and effect starting on the Effective Date and terminating on October 30, 2060, subject to any early termination provision set forth herein (the "Term").

Section 2.5 Effect on 1984 Agreement. The Parties intend that, upon thirty (30) days' written notice by the Owners of the achievement of the Conditions Precedent as set forth in Section 2.2, this Agreement shall become fully effective and replace the 1984 Agreement in its entirety, and the 1984 Agreement will be terminated.

ARTICLE III
WATER USE AND COMPENSATION

Section 3.1 Water Use. The Owners shall make available and allow AWWU to continue to interconnect the AWWU Water Project to the Eklutna Hydroelectric Project, use the project's intake, tunnel, and other Owners' Facilities necessary to divert and use a portion of Project Water Rights up to 41 million gallons per day for public water supply purposes in a manner consistent with AWWU's Preferred Use Status, the AWWU Water Permit, and Alaska Statute 46.15.150(b). The Parties understand that after the Effective Date, AWWU may initiate a process to replace all or part of the AWWU Water Permit with a certificated water right under Alaska Statute 46.15. The Owners consent to such conversion provided that AWWU's certificated water right does not exceed 41 million gallons per day for public water supply purposes, such certification is subject to all requirements of Alaska Statute 46.15.150 and any and all regulations implementing AWWU's Preferred Use Status, and AWWU remains committed to compensate Owners for such water as set forth in Section 3.2 below.

Section 3.2 Compensation.

(a) Compensation. Subject to the limitation in subsection (b) below, AWWU and the MOA shall compensate the Owners for all reductions in electrical energy generation at the Eklutna

Hydroelectric Project, costs, and losses that result from water diversions for the AWWU Water Project as set forth in Exhibit A (collectively, the "Replacement Energy"). The compensation paid by AWWU for the Replacement Energy shall be both in kind through electrical energy recovered by AWWU at the Eklutna Water Treatment Facility ("EWTF") in excess of AWWU's own needs at the EWTF ("Recovered Electrical Energy"), and in cash payments (the cash portion shall be referred to as the "Replacement Energy Payment(s)"). The Recovered Electrical Energy shall act as an offset to the Replacement Energy Payment obligations. All costs associated with such deliveries of Recovered Electrical Energy, including metering, will be borne by AWWU.

(b) Compensation Limitations and Procedures. The compensation owed to the Owners by AWWU, calculated and accounted for as set forth in Exhibit A and Section 3.2(a), shall be subject to the following limitations: (a) in no event shall the Replacement Energy Payment owed and payable to Chugach by AWWU exceed six hundred thousand dollars ($600,000) per year in value in aggregate, as such amount will be adjusted annually for inflation reflected in the Bureau of Labor Statistics' Consumer Price Index; (b) in no event shall any such compensation be required in the event that the Owners permanently cease operations of the Eklutna Hydroelectric Project; and (c) in no event shall any such compensation be required in the event of a transfer of a priority water right from the Owners to AWWU as contemplated in Article VI. For the purposes of clarity, the words "total compensation owed and payable to Chugach by AWWU," in the preceding sentence applies to the Replacement Energy Payment and specifically includes the independent in-kind compensation through the Recovered Electrical Energy. The Recovered Electrical Energy shall not include any power generated by AWWU at any location other than the EWTF, which power generated at other locations may be sold by AWWU as co-generated power. Notwithstanding the foregoing limitation on compensation to be paid by AWWU, nothing in this Agreement is intended to change the MOA's obligations set forth in any of: (i) the MOA-Chugach Eklutna PPA; (ii) Section 6.23 of the MOA-Chugach APSA; and (iii) the MOA-MEA Eklutna PPA. In any month of the Term, to the extent that AWWU does not fully compensate Chugach for the total amount of Replacement Energy in such month due to application of the AWWU compensation cap set forth above, such matters will be resolved among the Owners and the MOA will make Chugach whole as outlined in Exhibit A.

(c) Costs. Other than the compensation for water diversions set forth in Sections 3.2(a) and (b) above, all costs borne initially by each Party in connection with the exercising of its respective rights and the performance of its respective obligations under this Agreement shall be the responsibility of such Party initially incurring such costs. In partial consideration of the costs to Owners incurred in maintaining its facilities necessary for AWWU to continue to interconnect to Eklutna Hydroelectric Project, and to divert and use a portion of Project Water Rights under this Agreement for the benefit of the AWWU, the Parties entered into the Transportation Agreement for the same duration as this Agreement, pursuant to which AWWU will provide conveyance services for transporting water from the Eklutna Lake to the Eklutna River at no cost to Owners.

ARTICLE IV
OWNERS' RESPONSIBILITIES

Section 4.1 Reservoir Operations. Subject to the terms herein, Owners shall retain full authority and responsibility to operate the Eklutna Hydroelectric Project and manage and allocate

water in Eklutna Lake in accordance with ADL 44944 and the requirements of the Eklutna Hydroelectric Project.

Section 4.2 Assurance of Water Project Allocation, Quality, and Access. Subject to the terms herein, Owners will operate the Eklutna Lake reservoir in such a manner that the projected allocations of water to the AWWU Water Project are available to MOA upon request at a flow rate of at least 41 MGD to the EWTF at a pressure sufficient to allow normal operation of the EWTF as currently configured. The Owners will take no action regarding Eklutna Lake that has the effect of reducing the quality or increasing the turbidity of the lake water from those conditions which exist as of the Effective Date; nor will the Owners take or authorize any other action with regard to Eklutna Lake that may have the effect of reducing its present suitability for use as a source of public water supply. This Section 4.2 is not intended to preclude or inhibit maintenance and repair activities determined to be necessary by the Owners, nor does it apply to the management of the lake surface and surrounding areas for public recreation, which is outside the scope of this Agreement. For the avoidance of doubt, the Owners shall ensure continued use and access to AWWU of the Owners' Facilities that are necessary to supply water to the AWWU Facilities to the extent that Owners' Facilities continue in commercial operation.

ARTICLE V
AWWU RESPONSIBILITIES

Section 5.1 Compensation. AWWU shall compensate the Owners as set forth in Section 3.2(a) subject to the limitation in Section 3.2(b). To the extent that the total compensation owed to the Owners by AWWU under Section 3.2 is not satisfied by the netting against the MOA's ownership share of the water used in the Eklutna Hydroelectric Project, AWWU will pay the Owners directly within thirty (30) days of receipt of invoice.

Section 5.2 Maintenance, Repair, and Material Modifications to AWWU Water Project.

(a) AWWU Water Project. To the extent AWWU must perform maintenance, repairs, or make any material modification to the AWWU Water Project that adversely affects the Eklutna Hydroelectric Project, prior to the commencement of such action, AWWU shall furnish to the Owners copies of all plans, specifications, and schedules regarding such work. AWWU shall coordinate with the Owners all such activities in order to avoid or minimize disruption of the Owner's activities at the Eklutna Hydroelectric Project, to the maximum extent possible. AWWU will take commercially reasonable steps to minimize any of its actions set forth in this subsection that may adversely affect energy generation from the Eklutna Hydroelectric Project. AWWU shall reimburse the Owners, by payment of lost revenues to the Owners or by Replacement Energy, as may be mutually agreed by the Parties, for any such losses incurred by the Owners that are attributable to such maintenance or material modifications of the AWWU Water Project that impacts the Eklutna Hydroelectric Project, such as maintenance or material modifications to the project's intake tunnel connected to Eklutna Lake.

(b) AWWU Water Project Interconnection. Notwithstanding Section 5.2(a), AWWU shall obtain specific plan approval from the Owners before initiating any material modification on any existing facilities for the delivery of water from the Eklutna Hydroelectric Project to the AWWU Water Project, including any facilities that are interconnected to the present Owners'

water intake tunnel. AWWU will take commercially reasonable steps to minimize any of its actions set forth in this subsection that may adversely affect energy generation from the Eklutna Hydroelectric Project.

ARTICLE VI
RIGHTS UPON CEASING OPERATIONS OR TERMINATION

Section 6.1 Right of First Offer. If the Owners elect to permanently cease operations of the Eklutna Hydroelectric Project, the Owners shall provide written notice to AWWU of such intention. For a period of six (6) months after such notice, neither Owners nor their successors and assigns, nor their respective Affiliates, shall enter into an obligation or agreement to sell or transfer the Eklutna Hydroelectric Project, unless the (i) Owners first offer, in writing, to sell to AWWU that portion of Owners' Facilities that are necessary to supply water from Eklutna Lake to the AWWU Facilities; and (ii) AWWU declines to purchase such portion of Owners' Facilities within thirty days after notification of the offer to sell. If, within thirty days after notification of the offer to sell, AWWU indicates a good faith intention to purchase such portion subject to a need for ongoing review, then this shall trigger an additional 90-day period during which the Parties shall meet and negotiate in good faith terms and conditions then deemed appropriate and the Owners shall in good faith provide necessary documentation to facilitate such review. If at the end of such 90-day period, AWWU has not yet purchased such portion, then the Owners shall be permitted to pursue other options for the transfer of the Eklutna Hydroelectric Project.

Section 6.2 Option to Acquire Owners' Water Rights and Termination. Upon the earlier of October 31, 2055, or the MOA's sale of its interests in the Eklutna Hydroelectric Project, AWWU may exercise an option to acquire sole ownership of a portion of the Owners' first-priority water rights that is then operative and reflected in the AWWU Water Permit and any subsequent certificate, which shall in no event exceed 41 million gallons per day, by quitclaim deed or other then-acceptable means of transfer, in exchange for relinquishing its AWWU Water Permit and Preferred Use Status (and associated legal rights) as no longer being legally functional or operative; provided, however, that AWWU shall (a) issue a written notice to the Owners of its intention to exercise such option no later than October 30, 2050; (b) prepare all legal documents necessary to transfer such water rights from the Owners to AWWU (subject to Owners' review and approval prior to execution); and (c) obtain all required Governmental Approvals to effectuate such acquisition at AWWU's sole cost and expense (the "AWWU Option"). Upon closing of the AWWU Option, this Agreement and the Parties' obligations hereunder shall terminate except for the right of first offer in Section 6.1 above, which shall survive and continue while Owners continue operations of the Eklutna Hydroelectric Project.

ARTICLE VII
TITLE; LOSS OR DAMAGE; FORCE MAJEURE

Section 7.1 Title.

(a) Legal title to and ownership of the Owners' Facilities, including Owners' Water Rights, shall remain with Owners throughout the Term of this Agreement, free and clear of any and all liens, claims, security interests or other encumbrances imposed by AWWU.

(b) Legal title to and ownership of the AWWU Facilities, including the AWWU Water Permit, and any resulting certificate of appropriation, shall remain with AWWU throughout the Term of this Agreement.

Section 7.2 Force Majeure. Each Party shall be excused from performance and shall not be considered to be in default with respect to any obligation hereunder, if and to the extent that such Party's failure of, or delay in, performance is due to a Force Majeure Event; provided, that:

(a) such Party gives the other Party prompt written notice describing the particulars of the Force Majeure Event as soon as is reasonably practicable after becoming aware of the occurrence of the Force Majeure Event;

(b) the suspension of performance is of no greater scope and of no longer duration than is reasonably required by the Force Majeure Event;

(c) no obligations of the affected Party that arose before the occurrence of the Force Majeure Event causing the suspension of performance shall be excused as a result of such Force Majeure Event, unless and only to the extent that the performance of such obligations is impaired by the Force Majeure Event;

(d) the Party uses diligent commercially reasonable efforts to overcome or mitigate the effects of the Force Majeure Event; and

(e) when the Party is able to resume performance of its obligations under this Agreement, such Party shall give the other Party written notice to that effect and shall promptly resume performance hereunder.

ARTICLE VIII
LIMITATIONS ON LIABILITY

Section 8.1 Aggregate Limitation of Liability. Notwithstanding any other provision of this Agreement, the total aggregate liability of the Owners and the total aggregate liability of AWWU arising out of or relating to this Agreement, from any and all causes, whether based on contract, tort (including negligence), strict liability or any other cause of action, shall in no event exceed ten million dollars ($10,000,000) for AWWU, or ten million dollar ($10,000,000) for the Owners collectively, provided that such limits shall not apply in the case of such Party's (i) gross negligence or willful misconduct, (ii) third-party indemnity obligation, or (iii) breach of any representation or warranty.

Section 8.2 CUMULATIVE REMEDIES. IF NO REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY PROVIDED, OR IF A REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY NON-EXCLUSIVE, THE NON-DEFAULTING PARTY SHALL HAVE THE RIGHT TO EXERCISE ALL RIGHTS AND REMEDIES AVAILABLE TO IT AT LAW OR IN EQUITY; PROVIDED, HOWEVER, THAT THE LIABILITY OF THE DEFAULTING PARTY SHALL BE LIMITED TO DIRECT, ACTUAL DAMAGES ONLY AND ALL OTHER DAMAGES AND REMEDIES ARE WAIVED.

Section 8.3 WAIVER OF CERTAIN DAMAGES. EXCEPT WITH RESPECT TO INDEMNIFICATION OF THIRD PARTY CLAIMS PURSUANT TO ARTICLE XI, OR AS OTHERWISE EXPRESSLY PROVIDED FOR HEREIN, IN NO EVENT SHALL EITHER PARTY BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY, INDIRECT, BUSINESS INTERRUPTION OR SIMILAR DAMAGES, WHETHER BY STATUTE, IN TORT, BY CONTRACT OR OTHERWISE.

ARTICLE IX
INDEMNIFICATION

Section 9.1 Indemnity. To the fullest extent permitted by Law, each Party shall indemnify, hold harmless and defend the other Party and its directors, officers, shareholders, partners, agents and employees, and the Affiliates of the same (collectively, the "Indemnified Parties"), from and against any and all loss, damage, expense and liability, including court costs and reasonable attorneys' fees (collectively, "Liabilities") arising incurred by the Indemnified Parties in connection with or arising from any claim for physical damage to or physical destruction to any property of any third party, or death of or bodily injury to any person, to the extent caused by the negligence of the Indemnifying Party or its agents or employees or others under such Indemnifying Party's control, except any Liabilities incurred due to the negligence or willful misconduct of an Indemnified Party. For the purpose of the definition of "Indemnified Parties" AWWU shall not be considered to be an "Affiliate" of the MOA.

Section 9.2 Defense of Claims. A Party with an indemnification obligation pursuant to this Article IX (an "Indemnifying Party") shall have the right to defend the Indemnified Parties pursuant to this Article IX by counsel of the Indemnifying Party's selection (including insurance counsel) reasonably satisfactory to the Indemnified Party, unless in the opinion of counsel for the Indemnifying Party a conflict of interest between the Parties may exist with respect to such claim. If the Indemnifying Party does not assume the defense of the Indemnified Party, or if a conflict precludes counsel for the Indemnifying Party from providing the defense, then the Indemnifying Party shall reimburse the Indemnified Party on a monthly basis for the Indemnified Party's defense through separate counsel of the Indemnified Party's choice. Even if the Indemnifying Party assumes the defense of the Indemnified Party with acceptable counsel, the Indemnified Party, at its sole option, may participate in the defense, at its own expense, with counsel of its own choice without relieving the Indemnifying Party of any of its obligations hereunder. The Parties shall give each other prompt written notice of any asserted claims or actions indemnified against hereunder and shall cooperate with each other in the defense of any such claims or actions. Without the prior written consent of the Indemnified Party, which consent shall not be unreasonably withheld, conditioned or delayed, no Indemnifying Party shall settle any such claims or actions in a manner that would require any action or forbearance from action by any Indemnified Party.

ARTICLE X
DEFAULT AND REMEDIES; TERMINATION; DISPUTE RESOLUTION

Section 10.1 Event of Default. The following shall constitute events of default on the part of either party (each, an "Event of Default") under this Agreement:

(a) If a Party makes a general assignment for the benefit of its creditors, or if a receiver is appointed on account of the insolvency of such Party, or if such Party files a petition seeking to take advantage of any other Law relating to bankruptcy, insolvency, reorganization, winding up or composition of or readjustment of debts and, in the case of any such proceeding instituted against such Party (but not by such Party), such proceeding is not dismissed within sixty (60) days of such filing;

(b) If a Party fails to comply with any material terms of this Agreement not otherwise set forth as an Event of Default in this Section 10.1(b) and fails to cure or remedy such failure within thirty (30) days after notice and a written demand is made by the non-defaulting Party to the defaulting Party to cure the same or, if such failure cannot be cured within thirty (30) days, the defaulting Party fails to commence to cure such failure within thirty (30) days after such notice and written demand and thereafter diligently pursue such cure to completion, which shall in no event be later than ninety (90) days after such notice;

(c) If a Party defaults under the Interconnection Agreement or the Transportation Agreement;

(d) If a Party fails to make any payment due hereunder within sixty (60) days after receipt of written notice from the non-defaulting Party; or

(e) If any representation or warranty of a Party in this Agreement proves to have been false or misleading in any material respect when made, and such Party has not, within thirty (30) days after written notification thereof from the non-defaulting Party, either fully remedied, or commenced and diligently pursued the remedy, of all adverse impacts on the non-defaulting Party resulting therefrom, all to the reasonable satisfaction of the non-defaulting Party.

Section 10.2 Remedies Upon Event of Default. Upon the occurrence and continuation of an Event of Default, the non-defaulting Party shall have the right to terminate this Agreement and the Interconnection Agreement and the Transportation Agreement; upon ten (10) days written notice and pursue any other remedy available to such non-defaulting party at law or in equity arising out of such Event of Default, including a claim for monetary damage or specific performance.

Section 10.3 Automatic Cross-Agreement Termination. If this Agreement is terminated for any reason during the Term, the Interconnection Agreement and the Transportation Agreement shall automatically terminate, effective as of the same date as this Agreement's termination date.

Section 10.4 Dispute Resolution. In the event of any dispute arising under this Agreement (a "Dispute"), within ten (10) Business Days following notice by either Party, (i) each Party shall appoint a representative, and (ii) the representatives shall meet, negotiate and attempt in good faith to resolve the Dispute quickly, informally and inexpensively. In the event the representatives cannot resolve the Dispute within thirty (30) Days after the first meeting, either Party may request that consideration and resolution of the Dispute be transferred to a designated representative of each Party's senior management. Within ten (10) Days following such a request, each Party shall submit a written summary of the Dispute describing the issues and claims to a senior officer of each Party designated to address the Dispute. Within ten (10) Business Days after

receipt of each Party's Dispute summaries, the senior management representatives for both Parties shall negotiate in good faith to resolve the Dispute. If such senior management representatives are unable to resolve the Dispute within thirty (30) Days thereafter, either Party may pursue any available legal remedies.

ARTICLE XI
REPRESENTATIONS

Section 11.1 General Representations and Warranties. Each Owner and AWWU hereby represents and warrants that:

(a) It is duly organized, validly existing and in good standing under the Laws of the state of its formation and is duly qualified to do business in the State of Alaska.

(b) It has all necessary power and authority to execute, deliver and perform its obligations under this Agreement; its execution, delivery and performance of this Agreement have been duly authorized by all necessary corporate, municipal, or other action on its part; and this Agreement has been duly and validly executed and delivered by it and constitutes its legal, valid and binding obligation enforceable against it in accordance with its terms, except as the enforceability thereof may be limited by bankruptcy, insolvency, reorganization or moratorium or other similar Laws relating to the enforcement of creditors' rights generally and by general equitable principles.

(c) It is not in violation of any applicable Law, or any judgment entered by any federal, state, local or other Governmental Authority, which violations, individually or in the aggregate, would adversely affect its performance of any obligations under this Agreement. There are no legal or arbitration proceedings or any proceeding by or before any Governmental Authority, now pending or (to its best knowledge) threatened against it which, if adversely determined, could have a material adverse effect upon its financial condition, operations, prospects or business as a whole, or upon its ability to perform under this Agreement.

(d) No authorization, approval, exemption, or consent of or by any Person is required by it in connection with the execution, delivery, and performance of this Agreement. In addition, each Party represents and warrants to the other Party that the Governmental Approvals required to be obtained by such Party either have been obtained by such Party and are in full force and effect on the date hereof, or will be obtained by such Party and will be in full force and effect on or prior to the date on which they are required, under applicable Law, to be in full force and effect.

(e) The execution and delivery of this Agreement, the consummation of the transactions herein contemplated and compliance with the terms and provisions hereof by it will not conflict with or result in a material breach of, or require any consent under, any of its constitutive documents or any applicable Law, or under any agreement or instrument to which it is a party or by which it is bound or to which it is subject, or will constitute a material default under any such agreement or instrument.

ARTICLE XII
NOTICES

Section 12.1 Writing. Any notice, statement, demand, claim, offer or other written instrument required or permitted to be given pursuant to this Agreement shall be in writing and signed by the Party giving such notice, and shall be sent by email, facsimile, hand messenger delivery, overnight courier service, or certified mail (receipt requested) to the other Party, and shall be sent to the addresses set forth in Exhibit B. Each Party shall have the right to change the address information to which notice shall be sent or delivered or to specify additional addresses to which copies of notices may be sent. All notices shall be effective upon receipt.

ARTICLE XIII
CONFIDENTIALITY

Section 13.1 Confidentiality. The Parties agree that the Parties' proposals, communications, negotiations and information exchanged prior to the Effective Date concerning this Agreement and the development thereof, and technical and other information regarding or relating to the subject of this Agreement exchanged between the Parties that is marked, or otherwise clearly communicated to the receiving Party as "Confidential," constitutes "Confidential Information" of the disclosing Party. The Owners and AWWU each agree to hold such Confidential Information wholly confidential. Such Confidential Information may only be used by the Parties for the purposes related to the approval, administration or enforcement of this Agreement.

Section 13.2 Disclosure. Each Party agrees not to disclose Confidential Information of the other Party to any other Person (other than its Affiliates, counsel, consultants, lenders, partners, members, employees, officers and directors, and then only to Persons subject to similar confidentiality restrictions as those set forth herein), without the prior written consent of the other Party, provided, that either Party may disclose Confidential Information if such disclosure is required by Law, including without limitation, pursuant to an order of a court or regulatory agency to enforce this Agreement or to seek approval of this Agreement. In the event a Party is required by Law or a Governmental Authority to disclose Confidential Information, such Party, prior to such disclosure, shall provide reasonable advance notice to the other Party of the time and scope of the intended disclosure in order to permit such other Party the opportunity to obtain a protective order, or to otherwise seek to prevent or limit the scope or otherwise impose conditions upon such disclosure.

Section 13.3 Injunctive Relief. Each Party agrees that a violation of the terms of Sections 13.1 and 13.2 constitutes irreparable harm to the other Party, and that the harmed Party may seek any and all remedies available to it at law or in equity, including but not limited to injunctive relief.

Section 13.4 Release of Agreement. The Parties agree that this Agreement, upon execution, shall not be considered Confidential Information. Except as required by Law, releasing the Agreement to the public shall be the sole responsibility of the Owners, to be released in the manner at a time decided in their sole discretion.

ARTICLE XIV
MISCELLANEOUS

Section 14.1 Reasonability. The Parties shall act in a reasonable manner and in accordance with principles of good faith and fair dealing in the performance of this Agreement. Unless expressly provided otherwise in this Agreement and whether or not stated: (a) where this Agreement requires the consent, approval, or similar action by a Party, such consent or approval shall not be unreasonably withheld, conditioned, or delayed; and (b) wherever this Agreement gives a Party a right to determine, require, request, specify, or take similar action with respect to a matter, such determination, requirement, request, specification, or similar action must be reasonable.

Section 14.2 Entire Agreement. This Agreement, together with all Schedules and Exhibits hereto, embodies the entire agreement and understanding of the Parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements and understandings of the Parties, verbal or written, relating to the subject matter hereof.

Section 14.3 Waiver. Any waiver of the provisions of this Agreement must be in writing and shall not be implied by any usage of trade, course of dealing or course of performance. No exercise of any right or remedy by AWWU or the Owners constitutes a waiver of any other right or remedy contained in or provided by Law. Any delay or failure of a Party to exercise, or any partial exercise of, its rights and remedies under this Agreement shall not operate to limit or otherwise affect such rights or remedies. Any waiver of performance hereunder shall be limited to the specific performance waived and shall not, unless otherwise expressly stated in writing, constitute a continuous waiver or a waiver of future performance.

Section 14.4 Assignment. Neither Party shall assign this Agreement or any of its rights hereunder without the prior written consent of the other Party, which consent shall not be unreasonably withheld, conditioned or delayed. Notwithstanding the foregoing, either Party, without relieving itself from liability hereunder, and without the need for consent from the other Party provided that any such assignee shall agree to be bound by all terms and conditions hereof, may transfer, pledge or assign this Agreement: (a) to any person or entity succeeding to all or substantially all of the assets of the assigning Party; or (b) to a successor entity in a merger or acquisition transaction. Any assignment made in contravention of this Section 14.4 shall be void and unenforceable.

Section 14.5 Governing Law; Submission to Jurisdiction; Venue; No Jury Trial.

(a) Governing Law. THIS AGREEMENT SHALL BE GOVERNED BY, AND INTERPRETED AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF ALASKA, EXCLUDING ANY CHOICE OF LAW RULES.

(b) Submission to Jurisdiction, Venue. The Parties agree that any suit, action or other legal proceeding by or against any Party (or its Affiliates or designees) with respect to or arising out of this Agreement shall be brought exclusively in the courts of the State of Alaska, in the Municipality of Anchorage, as the Party instituting such suit, action or other legal proceeding may elect, provided that claims related to federal water rights, federal legislation enabling the Eklutna

Hydroelectric Project or AWWU Facilities, or the 1991 Agreement may be brought in the United States District Court for the District of Alaska. By execution and delivery of this Agreement, each Party (for itself, its affiliates and its designees) irrevocably and unconditionally consents and submits to the exclusive jurisdiction of such courts and the appellate courts therefrom, and waives any right it may have to assert the doctrine of forum non conveniens or similar doctrine or to object to venue with respect to any proceeding. The Parties irrevocably consent to the service of process in any such action or proceeding by the mailing of copies thereof by registered or certified mail, first class postage prepaid to the addresses set forth in Exhibit B.

(c) No Jury Trial. EACH OF THE PARTIES HEREBY WAIVES ANY AND ALL RIGHTS TO DEMAND A TRIAL BY JURY IN ANY ACTION, SUIT, OR PROCEEDING ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY.

(d) Duty to Proceed. Pending final resolution of any Dispute, the Owners and AWWU shall continue to fulfill their respective obligations hereunder that are not the subject of the Dispute.

Section 14.6 Headings. The titles or headings of the various sections, articles and paragraphs hereof are intended solely for convenience and ease of reference and are not intended, and are not to be deemed for any purpose, to modify or explain or place any interpretation or construction upon any of the provisions of this Agreement.

Section 14.7 Status of the Parties. No provision of this Agreement shall be construed or represented as creating a partnership, trust, joint venture, fiduciary or any similar relationship between the Parties.

Section 14.8 Status of Individual Owners. Each of the Owners shall be jointly and severally liable for the obligations of the Owners under this Agreement. The delineation of specific responsibilities set forth hereunder as among the Owners shall be at the sole discretion of the Owners, not AWWU. If at any time, the Owners agree that one or two of the Owners need no longer be party to this Agreement, such unnecessary Owner(s) may be removed as parties to this Agreement upon written notice to AWWU, if agreed, and shall retain no liability upon removal, with the remaining Owner(s) automatically assuming the full obligations of the Owners hereunder. If an Event of Default exists hereunder at any time with respect to an Owner, it shall be considered an Event of Default with respect to the Owners together as one Party hereunder, provided, that if another Owner agrees to assume such defaulting Owner's obligations under this Agreement by removing such Owner as a party pursuant to the preceding sentence of this Section 14.8 prior to the expiration of any applicable cure period, this shall not be considered an Event of Default hereunder.

Section 14.9 Insurance. Throughout the Term, the Owners shall maintain the required insurance policies as set forth on Exhibit D-1 and AWWU shall maintain the required insurance policy as set forth on Exhibit D-2.

Section 14.10 No Third Party Beneficiaries. This Agreement is made and entered into for the sole protection and legal benefit of the Owners and AWWU, and their permitted successors

and assigns, and no other person shall be a direct or indirect legal beneficiary of, or have any direct or indirect cause of action or claim in connection with, this Agreement.

Section 14.11 Further Assurances. Each Party agrees to execute and deliver all further instruments and documents, and take all further action, as may be reasonably necessary to complete performance by the Parties hereunder and to effectuate the purposes and intent of this Agreement, including (1) support of amendment of water rights necessary to implement this Agreement; and (2) AWWU's support of Chugach's tariff revisions necessary to implement the compensation and gain RCA approval as outlined in Section 2.2.

Section 14.12 Amendments. No change, amendment or modification of this Agreement shall be valid or binding upon the Parties unless such change, amendment or modification shall be in writing and duly executed by the Parties.

Section 14.13 Severability. If any provision of this Agreement is determined to be illegal or unenforceable, such determination will not affect any other provision of this Agreement and all other provisions will remain in full force and effect.

Section 14.14 Conflicting Provisions. In the event of any conflict between this document and any Schedule or Exhibit attached hereto, the terms and provisions of this document, as amended from time to time, shall control. In the event of any conflict among the Exhibits, the Exhibit of the latest date mutually agreed to by the Parties shall control.

Section 14.15 Survival. The provisions of Article I, Article VII, Article VIII, Article IX, Article X, Article XI, Article XII, Article XIV, and Article XIV shall survive termination of this Agreement for any reason.

Section 14.16 Counterparts. This Agreement may be executed in any number of separate counterparts and delivered by electronic means, each of which when so executed shall be deemed an original, and all of said counterparts taken together shall be deemed to constitute but one and the same instrument.

ARTICLE XV
EFFECT OF PUMPED STORAGE HYDROPOWER ALTERNATIVE

Section 15.1 Pumped Storage Hydropower Study; Negotiation of Replacement Agreements. The parties shall, in good faith, conduct the pumped storage hydropower study required by the Governor of Alaska's October 2, 2024 Final Fish and Wildlife Program, in the same or substantially the same form as the study submitted to the Anchorage Assembly in AIM ____ (PSH Study). Within 30 days of the completion of the PSH Study, the parties shall meet and negotiate replacement agreements that (1) provide for any needed access to, use of, or interference with AWWU infrastructure to facilitate the potential alternative, and (2) replace the 1984 Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska, as amended, regarding use of and compensation for Eklutna Lake water by AWWU. Such agreements shall be subject to approval by the Anchorage Assembly to the extent required by municipal law.

Section 15.2 Alternative Program Selected. If the Governor of Alaska selects an alternative Final Fish and Wildlife Program that does not involve the Facility, such as pumped storage hydropower, then:

(a) The Long-Term Water Transportation Agreement, the Interconnection Agreement, and the Water Supply Agreement shall immediately be suspended.

(b) The Parties shall expeditiously execute new agreements, if not already executed, to facilitate the implementation and long-term operation and maintenance of the alternative Final Program selected by the Governor. Such agreements shall be subject to approval by the Anchorage Assembly to the extent required by municipal law.

Section 15.3 Continuity of Municipal Water Supply. In the event the Public Water Supply Agreement is suspended in accordance with the preceding section, the terms for the Municipality's water supply that were in effect as of April 22, 2025 under the 1984 Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska, as amended, shall be restored and remain in effect until replacement agreements for the Municipality's public water supply are negotiated, approved by the Anchorage Assembly, and executed.

Section 15.4 Reservation of Rights. The parties reserve all rights, remedies, and causes of action available to them under the 1991 Fish and Wildlife Agreement.

[*Remainder of page intentionally left blank*]

IN WITNESS WHEREOF, the Parties have caused this Public Water Supply Agreement to be executed by their duly authorized representatives as of the Effective Date.

Schedule 1.1
Definitions

"1984 Agreement" has the meaning set forth in the Recitals.

"1991 Agreement" means that certain Agreement between the Municipality of Anchorage, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., the United States Fish and Wildlife Service, the National Marine Fisheries Service, the State of Alaska, and the Alaska Energy Authority Relative to the Eklutna and Snettisham Hydroelectric Projects, dated August 7, 1991.

"Affiliate" means, with respect to any Person, any other Person controlling, controlled by or under common control with such first Person. For purposes of this definition and the Agreement, the term "control" (and correlative terms) means (1) the ownership of 50% or more of the equity interest in a Person, or (2) the power, whether by contract, equity ownership or otherwise, to direct or cause the direction of the policies or management of a Person.

"Agreement" has the meaning set forth in the introductory paragraph, and shall include all Exhibits and Schedules hereto.

"APA" has the meaning set forth in the Recitals.

"AWWU" has the meaning set forth in the introductory paragraph, and shall include all successors and permitted assigns of AWWU.

"AWWU Facilities" means the existing water transportation facilities owned and operated by AWWU, including the AWWU Eklutna Lake raw water diversion bypass tunnel interconnected with the intake tunnel of the Eklutna Hydroelectric Project and pipeline.

"AWWU Option" has the meaning set forth in Section 6.2.

"AWWU Water Permit" has the meaning set forth in the Recitals and as may be replaced as described in Section 3.1.

"AWWU Water Project" has the meaning set forth in the Recitals.

"Business Day" means any day other than a Saturday, Sunday or legal holiday in the state of Alaska.

"Chugach" has the meaning set forth in the introductory paragraph, and shall include all successors and permitted assigns of Chugach.

"Conditions Precedent" has the meaning set forth in Section 2.2.

"Confidential Information" has the meaning set forth in Section 13.1.

"Day" or "day" means a calendar day, unless expressly specified otherwise.

"Dispute" has the meaning set forth in Section 10.4.

"DNR" has the meaning set forth in the Recitals.

"Effective Date" has the meaning set forth in the introductory paragraph.

"Eklutna Hydroelectric Project" means the Eklutna Hydroelectric Project initially authorized, constructed and operated pursuant to the Eklutna Project Act of July 31, 1950 (64 Stat. 382, as amended), including any and all property and facilities acquired or used in connection therewith, all of which was then sold to the Owners by the United States of America on October 2, 1997.

"Equivalent Energy Production" has the meaning set forth in Exhibit A – Compensation.

"EWTF" has the meaning set forth in Section 3.2(a).

"Fish and Wildlife Program" has the meaning set forth in the Recitals.

"Force Majeure Event" means the occurrence of any act or event beyond the reasonable control of the Party affected that prevents the affected Party from performing its obligations under this Agreement, in full or part, if such act or event is beyond the reasonable control of, and not the result of the fault or negligence of, the affected Party and such Party has been unable to overcome such act or event with the exercise of due diligence (including the expenditure of reasonable sums), including the following: drought, flood, earthquake, storm, fire, lightning, epidemic, war, riot, civil disturbance, sabotage, terrorism or threat of terrorism, strike or labor difficulty, accident or curtailment of supply or equipment, total casualty to equipment, or restraint, order or decree by a Governmental Authority. Notwithstanding the foregoing, Force Majeure Events shall expressly not include mechanical or equipment failures (except to the extent any such failure is itself caused by a Force Majeure Event) nor diminution in water quality in Eklutna Lake.

"Governmental Approvals" means all authorizations, consents, licenses, leases, rulings, certifications, registrations, exemptions, permits, certificates, and approvals from any Governmental Authority.

"Governmental Authority" means any federal, state or local government, any political subdivision thereof, or any governmental, quasi-governmental, judicial, public or statutory instrumentality, administrative agency, authority, body or other entity having jurisdiction over the Eklutna Hydroelectric Project or AWWU Water Project or their operations, or the health, safety or environmental conditions or otherwise over the Parties.

"Indemnified Parties" has the meaning set forth in Section 9.1.

"Indemnifying Party" has the meaning set forth in Section 9.2.

"Interconnection Agreement" has the meaning set forth in the Recitals.

"Law" means any constitution, charter, act, statute, law, ordinance, code, rule, regulation, order, specified standards or objective criteria contained in any applicable permit or approval or other legislative or administrative action of any Governmental Authority or a final decree, judgment or order of a court or tribunal.

"Liabilities" has the meaning set forth in Section 9.1.

"MEA" has the meaning set forth in the introductory paragraph, and shall include all successor sand assigns of MEA.

"MOA" has the meaning set forth in the introductory paragraph, and shall include all successor sand assigns of MOA.

"MOA-Chugach APSA" means that certain Asset Purchase and Sale Agreement by and between the MOA and Chugach, as amended on December 28, 2018.

"MOA-Chugach Eklutna PPA" means that certain Power Purchase Agreement by and between the MOA and Chugach, dated December 28, 2018, as amended.

"MOA-MEA Eklutna PPA" means that certain Power Purchase Agreement by and between the MOA and MEA, dated September 16, 2019, as amended.

"Owners" has the meaning set forth in the introductory paragraph, and shall include all successors and permitted assigns of the Owners.

"Owners' Facilities" has the meaning set forth in the Recitals.

"Owners' Water Rights" has the meaning set forth in the Recitals.

"Party" and "Parties" has the meaning set forth in the Recitals.

"Person" means any individual, partnership, corporation, limited liability company, association, business, trust, government or political subdivision thereof, Governmental Authority or other entity.

"Preferred Use Status" has the meaning set forth in the Recitals.

"Project Water Rights" has the meaning set forth in the Recitals.

"RCA" has the meaning set forth in Section 2.2(c).

"Recovered Electrical Energy" has the meaning set forth in Section 3.2(a).

"Replacement Energy" has the meaning set forth in Section 3.2(a).

"Replacement Energy Amount" has the meaning set forth in Exhibit A.

"Replacement Energy Payments" has the meaning set forth in Section 3.2(a).

"Term" has the meaning set forth in Section 2.4.

"Transportation Agreement" has the meaning set forth in the Recitals.

EXHIBIT A

Water Scheduling and Compensation

Scheduling & Reporting:

1. Prior to April 1 of each year, AWWU will furnish to the Owners its estimate of:

    a) Anticipated annual diversions of water for public water supply in the AWWU Water Project for the next five water years (June 1 – May 31), by year, for that same period; and

    b) Anticipated monthly diversions of water for public water supply in the AWWU Water Project for the next water year.

2. Within ten (10) days of the beginning of each month, AWWU will furnish to the Owners, on a monthly basis, the daily actual meter readings showing (a) water used by the AWWU Water Project in the preceding month, and (b) electric energy generated by the AWWU Water Project and delivered to the Owners.

Compensation:

As set forth in Section 3.2(a) and (b) of the Agreement and as was previously agreed to by the Parties in the 1984 Agreement, AWWU's use of the Project Water Rights shall remain a burden solely on the MOA's proportionate ownership share of the Project, and for the avoidance of doubt, shall not be allocated to Chugach's or MEA's proportionate ownership shares. Allocation of cost responsibility to the MOA shall be accounted for in the Eklutna Hydroelectric Project's water balancing account maintained among the Owners rather than through billing or other payment compensation owed by AWWU, except as set forth in Section 3.2 and in this Exhibit A. If the MOA's allocation of the Eklutna Hydroelectric Project's water in any given month is insufficient to cover AWWU's use of the Eklutna Hydroelectric Project's water in that month, AWWU will remain entitled to take its water needs within the parameters set forth in the Agreement and AWWU's Water Permit, and the Owners will make necessary adjustments to the MOA's water position within the Eklutna Hydroelectric Project's water balancing account accordingly.

AWWU will compensate the Owners for Replacement Energy (the reduction in electric energy generation attributable to AWWU's use of the Eklutna Hydroelectric Project's water) through Recovered Electrical Energy and Replacement Energy Payments. In other words, AWWU will pay Owners for MWhs not produced, rather than for the quantity of water used by AWWU.

AWWU will not, however, be required to compensate the Owners for water used by AWWU for public water supply in the AWWU Water Project during unplanned reservoir spill events at the Eklutna Hydroelectric Project (i.e., water spills over Eklutna Hydroelectric

Project's dam or through the spillway other than such releases by Owners as part of their implementation of the Fish and Wildlife Program) as measured on a day for day basis. In other words, during days of unplanned reservoir spill events, AWWU will not be required to compensate the Owners for water and equivalent energy generation.

Each month during the term of the Agreement, Chugach (as the Owners' representative designated by the Owners) shall compute the compensation owed by AWWU to Owners pursuant to Section 3.2 of the Agreement and as provided below. Chugach shall provide an invoice to AWWU showing billing determinants, charges, rebates (if any), total amount due, as well as detail regarding the Replacement Energy Payment calculation and Recovered Electrical Energy accounting. As set forth in Section 5.1 of the Agreement, Chugach shall collect such payments from AWWU, allocate values among the Owners as applicable (e.g., pass through its share of the compensation to the MOA), and maintain records as appropriate.

Monthly Compensation Calculation

1. Following receipt of the meter readings from AWWU, the total number of gallons of water used by AWWU during that month, less water used during days in which the unplanned reservoir spill events described above, shall be converted to acre-feet.

2. The energy equivalent for AWWU's water shall then be calculated by multiplying the acre-feet of water used by AWWU by the Eklutna Hydroelectric Project's average energy production per unit of water (kWh/acre-foot) for the month; the result of this calculation is the Equivalent Energy Production (kWh) attributable to AWWU's water usage. Equivalent Energy Production for a given month will be the Replacement Energy for that month.

3. The Replacement Energy in that month shall then be reduced by metered Recovered Electrical Energy at EWTF delivered to MEA and as reported by MEA meter readings to determine the amount of net Replacement Energy (kWh) for which AWWU owes compensation to Chugach for that billing period (the "Replacement Energy Amount").

4. The billing charges for Replacement Energy Amount shall then be calculated as the product of the Replacement Energy (kWh) (after deduction of the Recovered Electrical Energy) and the monthly energy rate set forth in Chugach's Tariff -- "Replacement Energy Service -AWWU" (as may be amended); such charges for Replacement Energy may be adjusted on a kilowatt-hour basis to recover the cost of power as described in Chugach's Tariff -- Fuel and Purchased Cost of Power Adjustment (comprised of fuel, purchased power, and renewable energy adjustment factors) and the Beluga River Unit Contributed Capital Surcharge and Rebate (when applicable).

5. Compensation for Replacement Energy owed by AWWU to Chugach will be capped at $600,000 per water year in value in aggregate as set forth in Section 3.2(b) of the Agreement, as such amount will be adjusted annually for inflation rate using a 15 year rolling average reflected in the Bureau of Labor Statistics' Urban Alaska Consumer Price Index (CPI-U) (as currently reported by State of Alaska Department of Labor and Workforce Development at https://live.laborstats.alaska.gov/cpi/table) ("AWWU Compensation Cap"). In any month of the Term, to the extent that AWWU does not fully compensate Chugach for the total Replacement Energy Amount owed due to application of the AWWU Compensation Cap, the MOA will make Chugach whole through the calculation of a monetary sum equal to the Replacement Energy Amount multiplied by rates set forth in the Chugach tariff for the Replacement Energy Service -- AWWU that shall paid by the MOA to Chugach (i) as an offset against the MOA's ownership share of AWWU payments owed by Chugach pursuant to Section 6.23 of the MOA-Chugach APSA, (ii) cash payments from the MOA to Chugach, or (iii) if necessary, as an offset against other payment obligations owed by Chugach to the MOA pursuant to the MOA-Chugach Eklutna PPA.

Owners' Allocations

1. The Owners hold the following proportionate ownership shares of the Project: MOA – 53.33%; Chugach – 30.00%; MEA – 16.67%.

2. Pursuant to reallocations, terms and conditions set forth in the (i) the MOA-Chugach Eklutna PPA, (ii) Section 6.23 of the MOA-Chugach APSA, and (iii) the MOA-MEA Eklutna PPA, the Project's water (and resulting power output) is allocated to the Owners in the following proportionate shares: MOA – 0%; Chugach – 64.29%; MEA – 35.71%.

3. The cost responsibility for implementation of the Fish and Wildlife Program is borne by the Owners as follows: MOA – 19.04%; Chugach – 64.29%; MEA – 16.67%.

4. MEA shall compensate the MOA for Recovered Electrical Energy at the EWTF received by MEA through the Eklutna Hydroelectric Project's water balancing account.

EXHIBIT B[2]

In the Matter of the Application Filed by Municipality of Anchorage d/b/a Anchorage Hydropower to Amend Its Certificate of Public Convenience and Necessity No. 780	))))	U-25-025

OFFICE OF THE ATTORNEY GENERAL'S
MOTION FOR EXPEDITED CONSIDERATION

Pursuant to 3 AAC 48.091(g), the Office of the Attorney General, Regulatory Affairs & Public Advocacy Section (RAPA) respectfully requests expedited consideration of its Unopposed Motion for Extension of Time to Respond to Municipality of Anchorage D/B/A Anchorage Hydropower's Petition for Reconsideration of Order U-25-025(2).

RAPA's Response to The Municipality of Anchorage D/B/A Anchorage Hydropower's (AHP) Petition for Reconsideration of Order U-25-025(2) is due on Friday, February 20, 2026. The accompanying Unopposed Motion for Extension of Time requests RAPA be given until February 27, 2026, to respond to Anchorage Hydropower's Petition for Reconsideration. Expedited consideration is necessary to ensure the Commission has time to rule on RAPA's request for an extension before the current deadline.

OFFICE OF THE ATTORNEY GENERAL'S UNOPPOSED MOTION FOR EXTENSION OF TIME TO RESPOND TO MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S PETITION FOR RECONSIDERATION OF ORDER U-25-025(2)

The Office of the Attorney General, Regulatory Affairs & Public Advocacy Section (RAPA) hereby requests an extension of time to respond to the Municipality of Anchorage D/B/A Anchorage Hydropower's (AHP) Petition for Reconsideration of Order U-25-025(2). RAPA's response is currently due February 20, 2026. Counsel for AHP, Matanuska Electric Association, Inc., and Chugach Electric Association, Inc. have agreed to an extension until February 27, 2026. A motion for expedited consideration accompanies this motion.

STATE OF ALASKA

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners: John M. Espindola, Chair
Steve DeVries
Mark Johnston
Robert M. Pickett
John C. Springsteen

In the Matter of the Application Filed by the MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER to Lift a Condition from Certificate of Public Convenience and Necessity No. 780 and Alternate Application to Amend Certificate of Public Convenience and Necessity No. 780	U-25-025

ANCHORAGE HYDROPOWER'S MOTION FOR SETTLEMENT CONFERENCE

Pursuant to 3 AAC 48.121(a) (alternative dispute resolution procedures) and 3 AAC 48.140 (Conferences), the Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP") requests that the Commission schedule a settlement conference among the parties and an administrative law judge or commissioner to facilitate mediation of a potential settlement of AHP's July 30, 2025, request to lift condition requiring the surrender of Eklutna Operating Committee ("EOC") voting rights ("Request to Lift Condition") and AHP's pending February 10, 2026, petition for reconsideration of Order No. U-25-025(2). AHP requests that the Commission designate a mediator and schedule the settlement conference to convene as soon as possible, and allow parties to participate via WebEx if that would allow more expedited participation by any of the other parties. Under 3 AAC 48.121(k), none of the statements or comments made at the settlement conference will be admissible in the adjudication of AHP's pending petition for reconsideration or in any subsequent appeal.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

Currently, the other parties' responses to AHP's petition for reconsideration will be due February 27, 2026 (assuming the Office of the Attorney General, Regulatory Affairs & Public Advocacy Section's ("RAPA's") February 20, 2026, expedited unopposed motion for a seven-day extension of time is granted). Under 3 AAC 48.105, the 30-day timeline for a Commission decision on AHP's petition for reconsideration ends on March 12, 2026, unless the Commission finds good cause to extend that due date in light of RAPA's motion for extension of time.

In compliance with 3 AAC 48.121(c), AHP provides the following:

(1) The matter to be resolved is whether the parties can stipulate to a resolution of AHP's Request to Lift Condition that will be acceptable to the Commission. AHP believes such a stipulation is possible in light of recent consideration and discussion of potential changes in the EOC voting rights from super-majority to per-capita voting rights.

(2) The type of alternative dispute resolution AHP seeks is best described as facilitation and mediation.

(3) AHP requests that the settlement conference be conducted by a Commission administrative law judge or a commissioner, as determined by the Commission. As contemplated in 3 AAC 48.121(h)(3), if the Commission believes it would be most expeditious to have Administrative Law Judge James L. Walker conduct the conference, AHP would consent in writing to that despite the fact that he is the administrative law judge assigned to this docket.

(4) AHP certifies that AHP, Chugach Electric Association, Inc. ("Chugach"), and Matanuska Electric Association, Inc. ("MEA") have previously attempted in good faith to negotiate the matter to be resolved.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

(5) AHP believes a settlement conference has a reasonable potential of resolving the dispute among the parties regarding restoring EOC voting rights to AHP. That is particularly the case given that the nature of EOC member voting rights (e.g., something other than the current super-majority voting requirements) may provide an opportunity for consensus that did not exist when AHP filed it Request to Lift Condition.

(6) Convening a settlement conference need not adversely impact any timelines in this docket. The Commission has already issued a "final order" within the AS 42.05.175 statutory timeline, and the only timelines remaining are the other parties' response to AHP's petition for reconsideration, the 30-day timeline for decision on AHP's petition for reconsideration, and the 30-day timeline for appeal of a Commission order on reconsideration.

(7) AHP proposes that the settlement conference be scheduled for one day at the earliest availability of whoever the Commission decides should conduct the conference. Although it may require more time, AHP believes it may be possible that an agreement in principle could be mediated in as little as three hours, depending on the engagement by the parties with the assistance of a Commission-designated mediator.

AHP will confer with the other parties and request that they respond promptly to this motion and identify when they can be available for a settlement conference. AHP will notify the Commission by supplemental filing if any dates for settlement conference can be agreed upon.

Based on the foregoing, AHP respectfully requests that the Commission schedule a mediation settlement conference as described above.

John C. Springsteen

In the Matter of the Application Filed by Municipality of Anchorage d/b/a Anchorage Hydropower to Amend Its Certificate of Public Convenience and Necessity No. 780	))))	U-25-025

OFFICE OF THE ATTORNEY GENERAL'S OPPOSITION TO MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S PETITION FOR RECONSIDERATION OF ORDER U-25-025(2)

I. Introduction and Summary

Pursuant to 3 AAC 48.105, the Office of the Attorney General, Regulatory Affairs & Public Advocacy Section (RAPA), opposes the Municipality of Anchorage dba Anchorage Hydropower's (AHP) petition for reconsideration of Order U-25-025(2) (Order No. 2) because

- the Regulatory Commission of Alaska (Commission) properly interpreted its own order(s)
- the minimum time period does not make the fitness/expertise requirement a free-standing penalty, does not nullify the expertise requirement, and does not create an irrational outcome as AHP asserts
- determining if AHP has acquired the necessary expertise is not ripe and is moot.

II. Reconsideration Standard

3 AAC 48.105 provides that a party can seek reconsideration of an order if the order is unreasonable, erroneous, unlawful, or otherwise defective. The definition of "unreasonable" includes: "Not guided by reason; irrational or capricious."[1] "Erroneous" means: "Involving error; deviating from the law."[2] "Unlawful" means "That which is contrary to, prohibited, or unauthorized by law."[3] In Order U-06-119(2) the Commission held that an order closing a docket while an appeal was pending as "otherwise defective." In Order U-97-034(7) the Commission held that an order was otherwise defective because there was insufficient information in the record.[4] Other jurisdictions have considered whether an order is arbitrary[5] or overbroad.[6]

Pursuant to 3 AAC 48.105, AHP must specifically set forth grounds and show why the Commission's order should be reconsidered.

III. Argument

A. The Commission properly interpreted its own order(s).

The Commission has interpreted its own orders—Order U-18-102(44) and Order U-24-024(8)—to include two terms guiding the AHP's voting rights surrender: (1) a minimum time of surrender linked to the terms of the Eklutna and MEA PPAs, and (2) AHP's acquisition of expertise sufficient to participate as a voting member of the Eklutna Operating Committee (EOC).

AHP claims that the Commission misconstrued and misapplies the original rationale in Order U-18-102(44).[7] AHP points to the structure of the paragraph in Order No. 44 and asserts that the surrender of voting rights was not based on time but on lack of fitness.[8] To support its argument, AHP focuses on the word "and" in the language

> This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, **and** cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC.[9]

AHP claims that "If the minimum term were absolute and independent of expertise, the expertise clause would be surplusage."[10] AHP therefore reasons that "This

---

Attorney General
Regulatory Affairs & Public Advocacy
1031 West Fourth Avenue, Suite 200
Anchorage, Alaska 99501
(907) 334-2394, (907) 269-5100, (907) 276-3697 Fax

shows that once the basis for the surrender no longer exists [this being the lack of expertise], a reinstatement becomes permissible."[11]

AHP then argues that "Read together, the paragraph supports the interpretation that the minimum term ensures that, if nothing changes—i.e., if AHP continues to lack a suitable representative—the surrender will remain in place for at least the PPA term. But the expertise clause establishes a condition that allows the Commission to lift the surrender earlier if the original justification disappears."[12]

AHP's repeated assertions interpreting the language from Order No. 44 in AHP's proposed manner ignores the simple and straightforward meaning of the Commission's words.

AHP ignores three plain items in Order No. 44:

- the words "at least equal to"
- the connector **and**
- along with the next phrase "cannot be lifted until…."

The Commission's plain words state that the minimum term of the surrender is the term of the Eklutna PPA and the MEA PPA. The phrase "and cannot be lifted until…" is in addition to this minimum term. Stated another way, when the Eklutna PPA and MEA PPAs' terms end, if AHP does not have the required expertise at that time then the voting rights surrender continues regardless of the termination of the PPAs. If,

11 Petition at 7

12 Petition at 8.

Attorney General
Regulatory Affairs & Public Advocacy
1031 West Fourth Avenue, Suite 200
Anchorage, Alaska 99501
(907) 334-2394, (907) 269-5100, (907) 276-3697 Fax

and only if, AHP has the required expertise in place when (or after) the PPAs' terms expire then, and only then, can the voting rights surrender be lifted. The expertise requirement may lengthen the voting rights surrender period, but it does not shorten it.

B. The minimum term does not make the fitness/expertise requirement a free-standing penalty, does not nullify the expertise requirement, and does not create an irrational outcome.

AHP also claims that a minimum term would convert the fitness/expertise requirement into a free-standing penalty, would nullify the expertise requirement, and create an irrational outcome. AHP does not explain how or present any authority why any of these (and RAPA does not agree with AHP's descriptors) makes Order No. 2 unreasonable, erroneous, unlawful, or otherwise defective.

The fitness/expertise requirement is one of two requirements. Until both requirements are fulfilled—(1) the Eklutna PPA and MEA PPA have expired and (2) AHP has the necessary expertise—the voting rights surrender stays in place. Therefore, it is not a free-standing penalty. In fact, it is not a penalty at all. It was a requirement for the Chugach acquisition to proceed.

AHP did not cite any authority on free-standing penalty clauses to support its assertion. A free-standing penalty clause is a provision that operates independently from

Attorney General
Regulatory Affairs & Public Advocacy
1031 West Fourth Avenue, Suite 200
Anchorage, Alaska 99501
(907) 334-2394, (907) 269-5100, (907) 276-3697 Fax

a primary requirement or obligation.[13] Here, the minimum term and the fitness/expertise requirements operate together.

As addressed above, a minimum term does not nullify the fitness/expertise requirement. Rather, they work together. If the PPAs expire and AHP does not have the expertise in place, then the voting rights surrender continues beyond the minimum term.

The minimum term does not create an irrational outcome because the PPAs are not power purchase agreements in the normal sense.[14] Instead, they are agreements that helped the Chugach acquisition to proceed. It is not irrational to link the voting rights surrender's minimum term to the PPAs.

C. Determining if AHP has acquired the necessary expertise is not ripe and is moot.

AHP next asserts that Order U-24-024(8) resolved only a timing issue,[15] meaning that AHP should still be allowed to show it has acquired the necessary expertise. AHP supports this with its argument that the Commission misconstrued and misapplies the original rational in Order No. 44. AHP argues that its fitness to vote on the Eklutna Operating Committee remains a live issue.[16]

16 Petition at 10.

Attorney General
Regulatory Affairs & Public Advocacy
1031 West Fourth Avenue, Suite 200
Anchorage, Alaska 99501
(907) 334-2394, (907) 269-5100, (907) 276-3697 Fax

An adjudicator should decide matters only where a party has standing and the matter is "ripe and not moot."[17] A matter is moot where a decision on the issue has lost its character as a "present, live controversy," or where a party bringing the action would not be entitled to any relief even if they prevailed.[18]

AHP appears to be seeking an advisory or declaratory decision from the Commission on whether it has currently obtained the necessary expertise—what AHP refers to as a remaining "live" issue. There are two problems with AHP's assertion.

First, whether AHP has obtained the necessary expertise to restore its voting rights is not a current "need" that must be decided. What matters is if AHP has acquired the expertise at the time the PPAs will expire. As RAPA has noted in the past, there is no indication that both PPAs are about to expire or terminate.

A current advisory decision would also be an unnecessary expenditure of party and Commission resources. Showing that you are fit to run a marathon today is not relevant if you are not going to run a marathon for a couple of decades.

Second, AHP would not be entitled to any relief even if the Commission determined that AHP had acquired the necessary expertise today. While an advisory decision by the Commission on AHP's current level of expertise may be useful for AHP in its discussions with the utilities, the PPA are not about to expire or terminate.

---

(907) 334-2394, (907) 269-5100, (907) 276-3697 Fax

IV. Conclusion

AHP's petition for reconsideration should be denied because AHP has not shown that Order No. 2 is unreasonable, erroneous, unlawful, or otherwise defective. The Regulatory Commission of Alaska (Commission) properly interpreted its own order(s), the minimum time period does not make the fitness/expertise requirement a free-standing penalty, does not nullify the expertise requirement, and does not create an irrational outcome, as AHP asserts, and determining if AHP has acquired the necessary expertise is not ripe but instead is moot.

recently in this docket in January 2026.[4] Each time, the Commission has decided that AHP – which (i) has no ratepayers, (ii) exists exclusively to own part of the Eklutna Project, from which it sells all associated generation wholesale to Chugach and MEA through two power purchase agreements ("PPAs"), and (iii) voluntarily surrendered its majority-ownership voting rights in 2020[5] – should not have voting rights on the Eklutna Operating Committee (EOC) for the duration of the terms of such PPAs.[6] The Commission's reasoning in these three decisions is clear, consistent, and considered, and all relevant facts remain unchanged. AHP nonetheless persists in questioning the Commission's interpretation of its own orders on the minimum term voting surrender condition. Chugach and MEA do not join in this questioning. If AHP remains dissatisfied with the Commission's rulings on the matter of its voting rights, AHP should appeal.

RESPECTFULLY SUBMITTED this 27th day of February, 2026.

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners: John M. Espindola, Chair
Steve DeVries
Mark Johnston
Robert M. Pickett
John C. Springsteen

In the Matter of the Request Filed by the MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER to Lift a Condition from Certificate of Public Convenience and Necessity No. 780 and Alternate Application to Amend Certificate of Public Convenience and Necessity No. 780	U-25-025 ORDER NO. 3

ORDER DENYING PETITION FOR RECONSIDERATION AND FINDING MOTIONS MOOT

BY THE COMMISSION:

Summary

We deny the petition for reconsideration filed by the Municipality of Anchorage d/b/a Anchorage Hydropower (AHP). We find the motions for extension of time and expedited consideration filed by the Office of the Attorney General, Regulatory Affairs and Public Advocacy Section (RAPA) moot. We find the motion for settlement conference filed by AHP moot.

Background

On July 30, 2025, AHP filed a request to lift a condition requiring the surrender of its voting rights on the Eklutna Operating Committee (EOC) from Certificate of Public Convenience and Necessity (certificate) No. 780. In the alternative, AHP

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

requested to amend Certificate No. 780 to lift the condition requiring surrender of its voting rights on the EOC.[1]

On August 8, 2025, RAPA filed a notice of election to participate in this proceeding and a motion to dismiss.[2] On August 22, 2025, Chugach Electric Association, Inc. (Chugach) and Matanuska Electric Association, Inc. (MEA), filed a joint petition to intervene, which we granted.[3] Chugach and MEA filed a joinder in the Motion to Dismiss.[4] AHP filed an opposition to the Motion to Dismiss.[5] RAPA filed a reply to the Opposition to Motion to Dismiss.[6]

We issued our final order granting the Motion to Dismiss and closed this docket.[7] AHP filed a petition for reconsideration of Order U-25-025(2).[8] RAPA filed a motion for extension of time to respond to Petition for Reconsideration and an expedited

consideration of its motion.[9] AHP filed a motion for settlement conference.[10] RAPA filed an opposition to the Petition for Reconsideration.[11]

Discussion

Petition for Reconsideration

Petitions for reconsideration are governed by 3 AAC 48.105. A petitioner seeking reconsideration of an order must specifically identify the grounds upon which it believes the order is "unreasonable, erroneous, unlawful, or otherwise defective."[12]

AHP identifies three grounds on which it contends Order U-25-025(2) is unreasonable, erroneous, unlawful, or otherwise defective. First, AHP argues that Order U-25-025(2) misconstrues and misapplies the original rationale for the EOC vote surrender requirement in Order U-18-102(44).[13] Second, AHP argues Order U-25-025(2) misconstrues and misapplies Order U-24-024(8).[14] Third, AHP argues Order U-25-025(2)

[10] *Anchorage Hydropower's Motion for Settlement Conference,* filed February 24, 2026 (Motion for Settlement Conference).

[11] *Office of the Attorney General's Opposition to Municipality of Anchorage d/b/a Anchorage Hydropower's Petition for Reconsideration of Order U-25-025(2),* filed February 26, 2026.

[12] 3 AAC 48.105.

[13] Order U-18-102(44)/U-19-020(39)/U-19-021(39), *Order Accepting Stipulation in Part, Subject to Conditions; Transferring and Issuing Certificates of Public Convenience and Necessity, Subject to Conditions; Addressing Beluga River Unit Management, Gas Transfer Prices, and Third Party Sales Gas Pricing; and Requiring Filings*, dated May 28, 2020 (Order U-18-102(44)), as corrected by *Errata Notice to Order U-18-102(44)/U-19-020(39)/U-19-021(39),* dated June 5, 2020, and December 22, 2020; Petition for Reconsideration at 1-2.

[14] Order U-24-024(8), *Order Granting Motion to Dismiss in Part and Dismissing Notice and Request, Denying Motion to Dismiss in Part, Vacating Procedural Schedule, Denying Motion to Compel, Denying Request to Construe Notice and Request as Petition to Amend Certificate Condition, Providing Guidance for Future Filings, and Closing Docket*, dated November 14, 2024; Petition for Reconsideration at 2.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

is arbitrary and capricious to the extent that it deprives AHP, the majority owner of the Eklutna Hydroelectric Project (Eklutna), of the ability to vote on important Eklutna matters before the EOC, without addressing the merits of whether AHP is managerially or technically fit to maintain ownership of Eklutna.[15]

We have reviewed the Petition for Reconsideration. We do not find a basis articulated by AHP to conclude that our decision in Order U-25-025(2) was unreasonable, erroneous, unlawful, or otherwise defective. Our interpretation of Order U-18-102(44) is contained in Order U-24-024(8) and Order U-25-025(2). Order U-25-025(2) reflects our view on all matters raised by AHP in the Petition for Reconsideration. Therefore, we deny the Petition for Reconsideration.

Motion for Extension and Motion for Expedited Consideration

On February 20, 2026, RAPA filed the Motion for Extension to extend its time to respond to the Petition for Reconsideration.[16] With the Motion for Extension, RAPA filed the Motion for Expedited Consideration seeking expedited consideration of the Motion for Extension.[17] With our denial of the Motion for Reconsideration we find these motions moot.

Motion for Settlement Conference

AHP filed a Motion for Settlement Conference pursuant to 3 AAC 48.121 and 3 AAC 48.140 on February 24, 2026, in this docket.[18] AHP requests that we schedule a settlement conference and appoint an administrative law judge or commissioner to facilitate mediation of a potential settlement of the Application and Petition for Reconsideration.[19] 3 AAC 48.121(a) states that "[a] person may request alternative

[15]Petition for Reconsideration at 2.

dispute resolution by petition if no adjudicatory proceeding is open, or by motion in an existing adjudicatory proceeding." Order U-25-025(2) closed this docket effective January 26, 2026.[20] With our denial of the Petition for Reconsideration, this docket remains closed and there are no matters remaining in this docket to address. The Motion for Settlement Conference is therefore moot.

ORDER

THE COMMISSION FURTHER ORDERS:

1. The *Municipality of Anchorage d/b/a Anchorage Hydropower's Petition for Reconsideration of Order U-25-025(2),* filed February 10, 2026, is denied.

2. The *Office of the Attorney General's Unopposed Motion for Extension of Time to Respond to Municipality of Anchorage d/b/a Anchorage Hydropower's Petition for Reconsideration of Order U-25-025(2),* filed February 20, 2026, is found moot.

3. The *Office of the Attorney General's Motion for Expedited Consideration,* filed February 20, 2026, is found moot.

4. The *Anchorage Hydropower's Motion for Settlement Conference,* filed February 24, 2026, is found moot.

DATED AND EFFECTIVE at Anchorage, Alaska, this 27th day of February, 2026.

ORDER GRANTING MOTION TO DISMISS AND CLOSING DOCKET

BY THE COMMISSION:

Summary

We grant the motion to dismiss filed by the Office of the Attorney General, Regulatory Affairs and Public Advocacy Section (RAPA). We close this docket.

Background

On July 30, 2025, the Municipality of Anchorage (MOA) d/b/a Anchorage Hydropower (AHP) filed a request to lift a condition requiring the surrender of its voting rights on the Eklutna Operating Committee (EOC) from Certificate of Public Convenience and Necessity (certificate) No. 780. In the alternative, AHP requests to amend Certificate

No. 780 to lift the condition requiring surrender of its voting rights on the EOC.[1] On August 20, 2025, AHP supplemented its Application.[2]

On August 6, 2025, we issued public notice of the Application with comments due by August 27, 2025. No comments were filed.

On August 8, 2025, RAPA filed a notice of election to participate in this proceeding and a motion to dismiss.[3] On August 22, 2025, Chugach Electric Association, Inc. (Chugach) and Matanuska Electric Association, Inc. (MEA), filed a joint petition to intervene, which we granted.[4] Chugach and MEA filed a joinder in the Motion to Dismiss.[5] AHP filed an opposition to the Motion to Dismiss.[6] RAPA filed a reply to the Opposition to Motion to Dismiss.[7]

Discussion

In Order U-18-102(44),[8] we described the Eklutna Hydroelectric Project (Eklutna Project) as follows:

> The Eklutna Project was built and operated by the federal government pursuant to the Eklutna Power Act of 1950. In 1995, Congress authorized sale of the Eklutna Project to [the Municipality of Anchorage d/b/a Municipal Light & Power Department (ML&P)], Chugach, and MEA under the terms of the 1989 Eklutna Purchase Agreement. Under this agreement, the three utilities received an undivided interest in all of the Eklutna Project, water rights, generation plant and the transmission assets interconnecting the Eklutna Project with ML&P, Chugach, and MEA. ML&P obtained a 53.33% ownership interest, Chugach obtained a 30% ownership interest, and MEA obtained a 16.67% interest in the Eklutna Project. Eklutna Project energy, capacity, and costs are to be allocated based on these ownership interests. ML&P and Chugach assert that the Eklutna Project currently has a maximum capacity of 39 MW.
>
> The three utilities created the Eklutna Operating Committee (EOC) to make all management decisions related to operation, maintenance, and budgeting for the Eklutna Project. ML&P, Chugach, and MEA each have a representative on the EOC. Decisions by the EOC are made based upon a double majority consisting of affirmative votes by at least two of the three utilities whose ownership shares total at least 51% of the Eklutna Project ownership. Effectively, management of the Eklutna Project is limited to actions approved by ML&P and at least one of Chugach or MEA.[9]

Chugach filed a petition seeking our approval of its acquisition of all service obligations and most assets of ML&P, and an application to amend its certificate to reflect the new service obligations.[10] Under the terms of this acquisition, Chugach would offer

---

[8]Order U-18-102(44)/U-19-020(39)/U-19-021(39), *Order Accepting Stipulation in Part, Subject to Conditions; Transferring and Issuing Certificates of Public Convenience and Necessity, Subject to Conditions; Addressing Beluga River Unit Management, Gas Transfer Prices, and Third Party Sales Gas Pricing; and Requiring Filings*, dated May 28, 2020 (Order U-18-102(44)), as corrected by *Errata Notice to Order U-18-102(44)/U-19-020(39)/U-19-021(39),* dated June 5, 2020, and December 22, 2020.

[9]Order U-18-102(44) at 60-61 (footnotes omitted).

employment to all ML&P employees, and the MOA would retain no ML&P employees.[11] Under this acquisition, Chugach was not purchasing ML&P's interest in the Eklutna Project, but was acquiring a portion of ML&P's share of cost responsibilities and output from the Eklutna Project for a 35 year period.[12] As part of this same transaction, ML&P filed an application to amend its certificate to delete its service territory and add the Eklutna Project site as its new service territory.[13]

On May 28, 2020, we approved Chugach's acquisition of most of the assets and service obligations of ML&P, subject to conditions.[14] One of these conditions required ML&P to surrender its voting rights on the EOC prior to the effective date of the agreements under which ML&P's successor[15] would be providing part of its share of the Eklutna Project output to Chugach (the Eklutna Power Purchase Agreement (Eklutna PPA)) and selling the remainder of its share of the Eklutna Project output to MEA (the MEA PPA)(collectively, PPAs).[16] In compliance with this condition, ML&P surrendered its EOC voting rights effective October 30, 2019.[17]

[11] *Pre-filed Direct Testimony of Arthur W. Miller*, filed April 1, 2019, in Docket U-19-020, Exhibit AWM-03 at 67 (Section 6.05(a)); Docket U-19-020/U-19-021, Tr. 2708-2709.

[12] Petition for Approvals at 8.

[13] *Application of the Municipality of Anchorage d/b/a Municipal Light and Power to Amend Certificate of Public Convenience and Necessity No. 121 and to Terminate Dividend Restriction*, filed April 5, 2019, in Docket U-19-021 (ML&P Application).

[14] Order U-18-102(44).

[15] AHP operates as the successor of ML&P.

[16] Order U-18-102(44) at 65-67.

[17] *Notice of ML&P's Surrender of Eklutna Operating Committee Voting Rights*, filed October 30, 2020, in Dockets U-18-102, U-19-020, and U-19-021(Notice of Surrender).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

Almost five years after this surrender, AHP filed a notice and request seeking reinstatement of its EOC voting rights.[18] In this filing, AHP asserted that Anchorage Water and Wastewater (AWWU) General Manager Mark A. Corsentino (Corsentino) had been appointed to serve as AHP's Utility Director,[19] and that AWWU Engineering Director Mark Schimscheimer (Schimscheimer) would provide support to Corsentino.[20]

RAPA filed a motion to dismiss AHP's Docket U-24-024 Notice and Request.[21] We granted RAPA's Docket U-24-024 Motion to Dismiss, finding AHP's voting rights on the EOC are surrendered for at least the duration of the Eklutna PPA and the MEA PPA.[22] We concluded that in its briefing on the issue AHP had not shown good cause for modifying or interpreting the condition in a manner that nullifies the minimum term of surrender of EOC voting rights in Order U-18-102(44).[23] We found that the Eklutna PPA and the MEA PPA are both scheduled to expire on October 31, 2055.[24] We noted that both agreements contain provisions allowing for extension as well as early

[18]*Notice and Request for Acknowledgment of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee*, filed July 18, 2024, in Docket U-24-024 (Docket U-24-024 Notice and Request).

[19]Docket U-24-024 Notice and Request at 3-4.

[20]Docket U-24-024 Notice and Request at 6-7.

[21]*Office of the Attorney General's Motion to Dismiss as Moot*, filed October 15, 2024, in Docket U-24-024 (Docket U-24-024 Motion to Dismiss).

[22]Order U-24-024(8), *Order Granting Motion to Dismiss in Part and Dismissing Notice and Request, Denying Motion to Dismiss in Part, Vacating Procedural Schedule, Denying Motion to Compel, Denying Request to Construe Notice and Request as Petition to Amend Certificate Condition, Providing Guidance for Future Filings, and Closing Docket*, dated November 14, 2024 (Order U-24-024(8)) at 28-29.

[23]Order U-24-024(8) at 28.

[24]Order U-24-024(8) at 29 (citations omitted).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

termination. We further noted that, at that time, no entity could predict when the terms of the Eklutna PPA and the MEA PPA would expire.[25]

We stated that we had reviewed the documents filed by AHP and found no commitment by Corsentino or Schimscheimer to remain employed by AHP until the expiration of the Eklutna PPA and the MEA PPA. We also stated that we had no way to evaluate what would be required to fully participate as a voting member of the EOC at that time. For these reasons, we granted the Docket U-24-024 Motion to Dismiss on the grounds that it was premature under the terms of Order U-18-102(44). This dismissal was without prejudice to refile closer to the time when the Eklutna PPA and the MEA PPA are expected to expire.[26]

AHP has now filed the Application requesting to lift the condition requiring the surrender of its voting rights on the EOC from Certificate No. 780, or in the alternative, to amend Certificate No. 780 to lift the condition requiring surrender of its voting rights on the EOC.[27] In the Application, AHP argues that we should lift the condition requiring the MOA to surrender its voting rights on the EOC because the objective of the condition has been met, as AHP has retained what it contends are qualified personnel and consultants to participate in the EOC.[28] AHP also argues that we should lift the conditions because the continued surrender of its voting rights on the EOC is not necessary to protect and promote the public interest, asserting that with the acquisition of qualified personnel to sit on the EOC, the condition is no longer needed to protect and promote the public interest.[29] AHP in the alternative presents an application to amend Certificate No. 780 to remove

the surrender requirement, arguing that AHP is and will continue to be fit, willing, and able to provide wholesale bulk power under the Eklutna PPA and the MEA PPA if the Application is approved.[30]

Standard of Review

The Commission looks to Alaska's Rules of Civil Procedure to determine the standard of review applicable to dispositive motions, and has previously explained:

> We look to Rule 56 of the Alaska Rules of Civil Procedure as a framework for reviewing motions for summary disposition. We have used summary disposition judiciously to simplify and focus issues and avoid unnecessary hearings. Under this approach, a party may move for a ruling on all or a portion of a case on the basis of the pleadings, depositions, answers to interrogatories, and admissions, together with affidavits. If there is no genuine issue as to any material fact, the party is entitled to judgment in its favor as a matter of law. Summary judgment may be rendered for or against the moving party. In deciding such motions, all reasonable inferences of fact must be against the moving party and in favor of the non-moving party. The burden of proof is on the moving party, and to prevail the non-moving party only needs to show the existence of material facts to be litigated.[31]

RAPA Motion to Dismiss

RAPA has filed the Motion to Dismiss seeking dismissal of the AHP's Application.[32] In the Motion to Dismiss, RAPA argues that AHP's requests made to either modify its certificate or modify the conditions of the certificate are premature.[33] RAPA states that AHP has not shown that the Eklutna PPA and the MEA PPA have expired, are about to expire, or that the current filing is close to the time the PPAs will expire.[34]
