MUNICIPALITY OF ANCHORAGE

Assembly Information Memorandum

No. AIM 63-2026

Meeting Date: April 28, 2026

From: **ASSEMBLY CHAIR CONSTANT AND ASSEMBLY MEMBER BALDWIN DAY**

Subject: **REPORT ON ASSEMBLY LITIGATION RELATED TO EKLUTNA HYDROELECTRIC PROJECT; ATTACHMENT FOR AR 2026-82, REVISING AND APPROPRIATING FUNDS FOR THE 2026 MUNICIPAL UTILITIES / ENTERPRISE ACTIVITIES OPERATING AND CAPITAL IMPROVEMENT BUDGETS.**

For the Assembly's information and consideration; please see the report from the Assembly's contracted legal counsel Landye Bennett Blumstein LLP (LBB), "Report on Assembly Litigation Related to Eklutna Hydroelectric Project." The Assembly retained LBB in 2023 to assist in evaluating and defending the Assembly's rights related to the 1991 Fish & Wildlife Agreement and obligations related to implementing that agreement.

This Report is a summary of LBB's work on behalf of the Assembly, separately from the Administration or the Municipal Attorney's office, and is intended to serve to aggregate the work and efforts into a single document. This will provide future members ready access to the details of the Assembly's work- -to date as they consider future legislative actions and budgeting for the Anchorage Hydropower Utility and Anchorage Water and Wastewater Utility and their respective activities related to the focus on the Eklutna River Restoration.

The Report and related documents are available at this page under Resources: https://www.muni.org/Departments/Assembly/Pages/FOCUS-Eklutna-River.aspx and also linked from this page: https://www.muni.org/Departments/Assembly/Pages/Native-Village-of-Eklutna.aspx

Prepared by: Assembly Legal Services Office

Respectfully submitted: Christopher Constant, Assembly Chair
District 1, North Anchorage

Erin Baldwin Day, Assembly Member
District 4, Midtown Anchorage

REPORT ON ASSEMBLY LITIGATION RELATED TO EKLUTNA HYDROELECTRIC PROJECT

Landye Bennett Blumstein LLP

Prepared at the request of the Anchorage Assembly

Through Chair Christopher Constant and Member Erin Baldwin Day

Dated: April 28, 2026

INTRODUCTION

Early in 2024, the Assembly recognized the need to have independent legal counsel assist the Assembly in evaluating and defending its rights related to the August 7, 1991 Agreement Between the Municipality of Anchorage, DBA Municipal Light and Power, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., U.S. Fish and Wildlife Service, National Marine Fisheries Service, Alaska Energy Authority, and the State of Alaska, relative to the Eklutna and Snettisham Hydroelectric Projects (hereinafter the "1991 Agreement"), and its obligations related to implementing the 1991 Agreement. Chair Christopher Constant and then-Vice Chair Meg Zaletel worked with outside counsel on litigation and legislative solutions. Member Zaletel left the Assembly at the end of her term in 2025 and Chair Constant's term ends on April 28, 2026. This report is a summary of outside counsel's work, in coordination with the Office of Assembly Counsel, and after July 1, 2024, the Municipal Attorney's Office. We hope this Report will serve to aggregate the work and efforts into a single document so that future members, including Erin Baldwin Day who is now leading the Assembly's efforts on this front, have ready access to the details of the Assembly's work to date. This Report is not a comprehensive summary of the good work of Assembly Counsel or the Municipal Attorney's office related to the Eklutna River; this Report is the work of the Assembly and should not be understood to be the work of the Administration or the Municipal Attorney's Office.

BACKGROUND

On August 7, 1991, the Municipality of Anchorage (dba Anchorage Municipal Light and Power), Chugach Electric Association, Inc., and Matanuska Electric Association, entered into an agreement with the United States Fish and Wildlife Service, the National Marine Fisheries Service, the Alaska Energy Authority, and the State of Alaska, regarding "protection, mitigation of damages to, and enhancement of fish and wildlife (including related spawning grounds and habitat) affected by hydroelectric development of the Eklutna Hydroelectric Project (the "Project").[1] The 1991 Agreement was a transition from the work in the 1950s by the United States Bureau of reclamation.[2]

The Project consists of a 40-megawatt dam on the Eklutna River. In the 1990s, the federal government agreed to sell the Project to the Municipality of Anchorage (the "Municipality"), Chugach Electric Association ("Chugach"), and Matanuska Electric Association ("MEA") (collectively the "Project Owners"). Specifically, in 1997, the federal Alaska Power Administration sold the Project to MEA, Chugach, and the Municipality d/b/a Municipal Light and Power Department ("ML&P"). MEA obtained a 16.67% undivided ownership interest in the Project, Chugach obtained a 30% undivided ownership interest, and ML&P acquired a 53.33% undivided interest. The utilities operate the Project through the Eklutna Operating Committee ("EOC") based upon affirmative votes of at least two of the utilities with a combined Project ownership interest of at least 50%.

---

[1] *See* Agreement Between the Municipality of Anchorage, dba Municipal Light and Power, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., U.S. Fish and Wildlife Service, National Marine Fisheries Service, Alaska Energy Authority, and the State of Alaska, Relative to the Eklutna and Snettisham Hydroelectric Projects (Aug. 7, 1991). Though the Eklutna and Snettisham projects are both described in the 1991 Agreement, the Snettisham project is not the subject of this Report or the relevant work.

[2] *See* Governor's Decision, In the Matter of the Eklutna River Fish & Wildlife Program, p. 2 (Oct. 2, 2024) (hereinafter "Governor's Decision").

The Project Owners entered into the 1991 Agreement with the State of Alaska, Alaska Energy Authority, and federal agencies (the "1991 Agreement"). The 1991 Agreement described the process for the Project Owners to study and quantify "impacts to fish and wildlife from the Project, and to develop a proposed Final Program for the protection, mitigation, and enhancement of fish and wildlife effected by the Project"[3] and for the other parties to the agreement – the United States Fish and Wildlife Service (the "FWS"), the National Marine Fisheries Service (the "NMFS"), the Alaska Energy Authority (the "AEA"), and the State of Alaska ("State") – to offer their comments on the proposed Final Program.

In or around 2017, the Project Owners entered into a "Common Interest Agreement" to facilitate negotiations regarding implementation of the 1991 Agreement. The Common Interest Agreement was executed by a representative of the Municipality of Anchorage and applies to the Municipality as whole, including all officers, departments, and branches of the municipal government. Importantly, the Assembly was neither consulted nor approved the Common Interest Agreement. As part of the negotiations among the Project Owners regarding implementation of the 1991 Agreement, the Project Owners entered into one or more agreements with the Anchorage Water and Wastewater utility ("AWWU") purportedly governing the Municipality's water rights and access to drinking water from Eklutna Lake. Each of those agreements is subject to Assembly approval;[4] the Project Owners did not seek Assembly approval of those agreements before they were executed.

In 2018, the Municipality sold substantially all of the assets of ML&P to Chugach.[5] As part of that transaction, the Municipality retained its 53.33% ownership in the Project but agreed to sell its share of the power output to Chugach and MEA. The Project Owners agreed that Project management and operations decisions would continue to be made by the EOC, even after the sale of ML&P. The Municipality's interest in the Project is now housed in the Anchorage Hydropower Utility ("AHP"). The Project remained a majority publicly held asset.

According to the terms of the 1991 Agreement, the Project Owners were to commence planning for a Final Program that would "adequately and equitably protect[], mitigate[] damage to, and enhance[] fish and wildlife resources"[6] by 2022 (25 years after the date the Project ownership was officially transferred to the Project Owners – October 2, 1997). Under the 1991 Agreement, the Project was exempted by law from the Federal Energy Regulatory Commission's jurisdiction in exchange for development of a Project fish and wildlife mitigation plan. This mitigation plan is required to be submitted to the Governor of the State of Alaska for approval, and its approval was supposed to be obtained by October 2, 2024. Beginning in 2019, the Project Owners began scoping the work. In 2020, the Project Owners retained technical experts to assist with planning and consultation with the parties. In 2021-2022, the Project Owners began studying plans to shape a proposed Final Program, with the goal of developing a draft for review by the parties to the 1991 Agreement and stakeholders and for public review and comment.[7] This review

and planning process largely took place out of the public's view and without input from the Assembly.

In February of 2024, the Assembly learned that AWWU had entered into a final agreement related to the Project – described by the Project Owners as a "Binding Term Sheet."[8] During the February 2, 2024 Assembly meeting, members of the Assembly requested to view copies of the Binding Term Sheet, which was shown to them by the Bronson Administration during an executive session. Assembly members were not permitted to retain copies of the Binding Term Sheet nor were they permitted to review it in a confidential setting with their legal counsel. Meanwhile, the Project Owners proceeded to evaluate a proposed Fish and Wildlife Program without involving the Assembly.

Pursuant to the 1991 Agreement, the Project Owners must submit a proposed Fish and Wildlife Program to the Governor for approval and then implement the Governor's approved final Fish and Wildlife Program beginning no later than 2027.

In April of 2024, Chugach and MEA submitted a plan to the Governor with Mayor Bronson's support despite the objection of the Assembly. After Suzanne LaFrance was sworn in as Mayor in July of 2024, the Municipality submitted its own proposal to the Governor for consideration. Chugach and MEA proposed a portal valve design that would restore flow to most, but not all, of the Eklutna River. The Municipality's plan was to further study pumped storage hydropower (a proposal that was overlooked by the Project Owners) that would rewater the entire Eklutna River and had the support of the Native Village of Eklutna.

THE ASSEMBLY'S AUTHORITY

The Assembly is a co-equal branch of the Municipality and the legislative and policy-making body. Under Article X, Section 11 of the Alaska Constitution, the Assembly "may exercise all legislative powers not prohibited by law or by charter." And the Constitution also calls for "maximum local self-government" and demands that "[a] liberal construction shall be given to the powers of local government units."[9] Municipal utility policy and budgetary decisions must be approved by the Assembly. The Assembly is charged with "prescrib[ing] rules and procedures for the operation and management of municipal utilities"[10] and, as the body with the purse strings, sets the budget for Municipal utilities. Furthermore, the Assembly, through ordinance, prescribed the Municipality's policy on Eklutna River Restoration to be the restoration of the continuous water flow of the Eklutna River and the fish populations of the River and Eklutna Lake, to the greatest extent possible, subject to all provisions of the 1991 Agreement.[11] The Assembly is the body within the Municipality with the authority to approve the Proposed Final Fish and Wildlife Program: "[t]he Proposed Final Fish and Wildlife Program to protect, mitigate, and enhance fish and wildlife

resources in the Eklutna River shall be submitted to the Assembly with a proposed resolution in support for action, prior to its submission to the Governor of Alaska."[12]

THE PUBLIC PROCESS

Though the Municipality is a 53.33% owner in the Project, the Project Owners have operated as if the implementation of the 1991 Agreement is a private endeavor. The public's review of plans has been limited, feedback from the public largely overlooked, and the Assembly's ability to conduct oversight of the Project constrained. The Assembly pursued a number of litigation options to open the process up to the public, beginning with subpoenaing documents executed by the Project Owners in secret.

THE SUBPOENAS

Despite the Assembly's codified role in setting policy and approving budgets for Municipal utilities, the Project Owners, including the Administration of then-Mayor Bronson, excluded the Assembly from Project discussions and decisions. When the Assembly learned the Bronson Administration signed the Binding Term Sheet and was negotiating with the Project Owners in secret, it endeavored to gather information about what "binding" agreements the Administration was seeking to implement outside of the required approval channels – i.e. Assembly action.

Instead of informing and involving the Assembly in Project decisions – as was appropriate and legally required – the Bronson Administration took great pains to exclude the Assembly and shield the decisions from public view.

During the February 2, 2024 Assembly meeting, Assembly members asked to view copies of the Binding Term Sheet, which Mayor Bronson's administration previously only showed to the Assembly during an executive session. The Assembly members were not permitted to retain copies of the Binding Term Sheet. On March 27, 2024, the Assembly passed and approved AR No. 2024-103, a resolution approving the use of "subpoenas to compel testimony and document production related to the 1991 Fish and Wildlife Agreement (Eklutna Hydropower Project) or water rights to Eklutna Lake."[13]

AR No. 2024-103 provides,

> having taken up these matters in executive session, the Assembly finds that it is necessary in furtherance of the Assembly's legislative powers under the Charter and the Assembly's role to provide legislative oversight of municipal agencies and utilities, to compel production of the binding term sheet so that the Assembly may share the agreement with its counsel for legal review prior to a determination by the Assembly regarding whether it is appropriate and in the public interest to make the agreement a disclosable public record.[14]

On March 27, 2024, pursuant to AR No. 2024-103, Assembly Chair Christopher Constant on behalf of the Assembly issued subpoenas to produce documents to Municipal Manager Kent

[12] AMC 26.30.025(B)(1); AO No. 2023-131, As Amended.
[13] AR No. 2024-103.
[14] *Id.* at 2.

Kohlhase (the "Kohlhase Subpoena")[15] and AWWU General Manager Mark Corsentino (the "Corsentino Subpoena").[16] The Kohlhase and Corsentino Subpoenas were identical in all substantive respects and requested production of the following documents by "5 p.m. on Wednesday, April 3, 2024":

1. The document described as a "binding term sheet" executed between the Eklutna Owners and the Anchorage Water and Wastewater Utility, which had been previously provided for review only in executive session; and

2. Any document constituting an existing agreement among the Eklutna Owners or between the Eklutna Owners and any third party upon which any claim of privilege or confidentiality is based.[17]

On April 2, 2024, then-Mayor Bronson vetoed AR No. 2024-103. In his veto transmission message, Mayor Bronson stated that the requested documents "have been made available" to the Assembly and "are available to them, and this open invitation continues."[18]

On April 3, 2024, Mr. Kohlhase and Mr. Corsentino each responded to the Kohlhase and Corsentino Subpoenas via email to Assembly Legislative Counsel Matthew Hurt, stating that they had "substantially complied" with their respective subpoenas "by making the documents available to the Assembly and its counsel for confidential review through the Municipal Attorney's Office."[19] Mr. Kohlhase and Mr. Corsentino further stated that that their "invitation for the Assembly and its legal counsel to review the documents through the Municipal Attorney's Office remains open."[20]

On April 4, 2024, then Municipal Attorney Anne Helzer allowed Assembly Chair Constant, the Assembly Counsel, and the Assembly's outside legal counsel (Landye Bennett Blumstein LLP) to view copies of the Common Interest Agreement, Binding Term Sheet, and an amendment to the Binding Term Sheet at the Municipal Attorney's Office. However, Ms. Helzer would not allow Assembly Chair Constant to retain copies of those documents. Ms. Helzer also did not allow Chair Constant to have a private conversation regarding the documents with Assembly Counsel and the Assembly's outside counsel. Ms. Helzer insisted that an Assistant Municipal Attorney remain in the room with the documents at all times.

During the April 9, 2024, Assembly meeting, Assembly members reiterated their request for copies of the Common Interest Agreement, Binding Term Sheet, and Amendment to the Binding Term Sheet in order to review and obtain legal advice from Assembly Legal Counsel and outside counsel regarding those documents. Ms. Helzer stated that she could not provide the documents to the Assembly unless each Assembly member signed a confidentiality agreement, which would be subject to approval from the other Project Owners. No other Municipal officer or employee was required to sign an additional confidentiality agreement prior to possessing or

viewing documents under the Common Interest Agreement, including the Binding Term Sheet. The differential treatment is especially notable given that no other officer or employee had a greater interest in the policies and decision than the Assembly, since the Charter explicitly authorizes the Assembly to act in this instance.

On April 9, 2024, the Assembly voted to override the Mayor's veto of AR No. 2024-103.

On April 16, 2024, pursuant to AR No. 2024-103, Assembly Chair Constant on behalf of the Assembly issued a subpoena (the "Subpoena") to Ms. Helzer.[21] The Subpoena required Ms. Helzer to produce the same documents that were described in the Kohlhase and Corsentino Subpoenas, and the amendment to the Binding Term Sheet:

1. The document described as a "binding term sheet" executed between the Eklutna Owners and the Anchorage Water and Wastewater Utility, which had been previously provided for review only in executive session, as well as any amendments, extensions, addendums, or any other writing reflecting a change to the substantive terms thereto; and

2. The document described as the "2017 Common Interest Agreement" and any other document upon which a claim of privilege or confidentiality is based.[22]

The Subpoena was sent to Ms. Helzer via email on Tuesday, April 16, 2024 at 5:08 p.m. by Assembly Counsel Matthew Hurt and required Ms. Helzer to produce the requested documents for the Assembly's inspection and retention by 5:00 p.m. on Wednesday, April 17, 2024.[23]

On Wednesday, April 17, 2024, at 2:23 p.m., Ms. Helzer acknowledged receipt of the Subpoena in an email to Assembly Counsel Hurt.[24] Ms. Helzer requested additional time to comply with the Subpoena because she was traveling but did not offer any explanation for why these readily available documents could not be produced while she was out of the office. On Thursday, April 18, 2024, Assembly Counsel Hurt responded to Ms. Helzer's request for additional time to comply with the Subpoena, providing until "the close of business Monday, April 22."[25]

Ms. Helzer did not comply with the Subpoena by the deadline and did not seek to quash or limit the Subpoena. On April 24, 2024 the Assembly filed a lawsuit in Anchorage Superior Court (Case No. 3AN-24-05979CI) to enforce the Subpoena.[26] The Assembly sought expedited relief so it could obtain copies of the requested documents before the Project Owners submitted their Proposed Final Fish and Wildlife Program proposal to the Governor. The Court granted the

[22] *Id*. at 4.
[23] Email to A. Helzer from M. Hurt at 2 (April 18, 2024), Exhibit 8 to Complaint in Subpoena Case; Letter to A. Helzer at 2.
[24] Email to A. Helzer from M. Hurt at 2.
[25] Email to A. Helzer from M. Hurt at 1. According to Mr. Hurt's email response, "we understand the documents to be readily accessible and, at this time, see no reason that counsel for the other Eklutna Owners would not be reachable by phone or email."
[26] The lawsuit consisted of a Complaint and *Ex Parte* Motion for Order to Show Cause & to Enforce Subpoena filed contemporaneously with a Moton for Expedited Consideration of the Anchorage Assembly's *Ex Parte* Motion for Order to Show Cause and to Enforce Subpoena.

Assembly's request for expedited relief, set a deadline for Ms. Helzer to respond to the *Ex Parte* motion by April 30, 2024, and set a hearing on the Motion for Order to Show Cause for May 1, 2024.

On April 25, 2024, Ms. Helzer ultimately provided the documents to the Assembly.[27] In a Joint Notice to the Court drafted by Ms. Helzer's legal counsel and filed on April 30, 2024, she noted she "does not concede that AMC 2.30.085 and the subpoena issued under its authority are valid under Alaska law, the Alaska Constitution, and the United States Constitution."[28] In a transmittal letter authored by Ms. Helzer she argued the documents were privileged and could not be released before the privileged was waived.[29] That permission was apparently granted on or around April 25, 2026. On May 14, 2024, Ms. Helzer filed a Motion to Dismiss noting she "has not disputed the Assembly's ability to issue a legislative subpoena," seemingly reversing course from her position as of April 30, 2024. Accordingly, the Assembly submitted a Notice of Dismissal on June 7, 2024 along with a proposed Final Judgment noting Ms. Helzer's position and quoting the Motion to Dismiss. Ms. Helzer took issue with the Assembly's pleading and filed a Notice to Court Re: Assembly's Notice of Dismissal on June 7, 2024 stating the Assembly's quote was a "mischaracterization of the Municipal Attorney's actual position. The Municipal Attorney has not conceded any legal issues in this case."[30] Despite Ms. Helzer's notice, the Court signed the Final Judgment as submitted by the Assembly on June 11, 2024 and found that "Plaintiffs have voluntarily dismissed their complaint pursuant to Alaska Rule of Civil Procedure 41(a)(1), without prejudice . . . This case is CLOSED." The Assembly filed a Notice of Clarification on June 12, 2024 standing by its characterization of the record and the fact Ms. Helzer agreed "the Assembly's legislative subpoena power is valid."[31]

Though the Assembly ultimately received copies of the documents referenced in the Subpoena and reassurance from the Court that its subpoena powers are valid, Ms. Helzer's actions frustrated the oversight obligations of the Assembly and caused significant delays and unnecessary expense to the taxpayers. The result, if not the intention, was a delay that assisted Chugach and MEA in their efforts to proceed in finalizing the Proposed Final Fish and Wildlife Program without the Assembly's input.

THE ASSEMBLY'S RCA ACTION

Contemporaneous with the Assembly's work to obtain copies of critical documents from the Eklutna Operating Committee to exercise its oversight and budgeting obligations, the Assembly undertook efforts to reassert its right to set policy related to the EOC. When Mayor Bronson and the members of the EOC continued to shut the Assembly out of the decision-making process and foreclosed the public's ability to know and understand what the Project Owners intended to propose to the Governor, the Assembly filed a Petition to Intervene and Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020 with the Regulatory Commission of Alaska ("RCA"). The Petition and Motion were filed before - and in anticipation of – an

impending EOC vote on the Proposed Final Fish and Wildlife Plan proposal that would then be submitted to the Governor by the Project Owners.

The RCA issued Order 39 on May 28, 2020 in connection with the sale of ML&P to CEA in consolidated dockets U-18-102/U-19-020/U-19-021.[32] Order 39 conditionally granted the Municipality's application to amend its certificate of public convenience and necessity for the Project. When that transaction concluded, the RCA determined that the Municipality no longer had an employee with the qualifications and experience to manage an electric utility and required the Municipality to surrender its vote on the EOC, essentially surrendering its ability to vote on all Project management and operation decisions, including policy decisions implementing the 1991 Agreement, until the Municipality hired staff with the requisite qualifications and experience to serve as a voting representative on the EOC. The Municipality continues to be excluded from voting on management and operations decisions despite holding a 53.33% ownership interest in the Project and securing an appropriately-credentialed director at AHP. [33] This process is further outlined in a later section.

Specifically, Order 39 stated:

> Under these circumstances we cannot unconditionally find that [the Municipality] is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that [the Municipality] is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna [Power Purchase Agreement] or the MEA [Power Purchase Agreement], ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without [the Municipality] having a vote on operation or management decisions.[34]

The Municipality complied with the Order and surrendered its voting rights on the EOC and "under the Fish and Wildlife Agreement."[35]

Beginning in 2019, the EOC was proceeding to study options and begin developing a Proposed Final Fish and Wildlife Program (pursuant to the 1991 Agreement) with the potential to commit the Municipality to a decades-long multi-million dollar mitigation plan all without allowing the Municipality to have a vote in that process.[36] The effect on Anchorage residents and taxpayers was a chief concern of the Assembly, and the Assembly noted the Bronson Administration had taken no action to reinstate the Municipality's vote on the EOC. With this backdrop, the Assembly sought to intervene in the consolidated docket and reopen the docket to modify Order 39 and regain the Municipality's policy making authority and vote on the EOC

decisions related to the Program.[37] Because the Assembly anticipated the EOC would be voting imminently, it requested the Commission consider its request on shortened time and filed a Motion for Expedite Consideration.[38]

In its Motion to Reopen Dockets and Modify Order No. 39, the Assembly asked the RCA to conditionally grant a certificate of public convenience and necessity to allow the Municipality to have a vote on the Project at the EOC. The Assembly's argument was supported by the Municipal code and the Municipal Charter, and the fact that since 2017, the Assembly consistently called for efforts to restore the Eklutna River and ensure continuous water flow to the greatest extent possible.[39] The Assembly argued that regardless of the substantive outcome or content of the Proposed Final Fish and Wildlife Program, there is a legal process that must be followed as prescribed in Municipal Code implemented through AO 2023-131. In the AO, the Assembly codified a requirement for Assembly approval before the plan is submitted to the Governor. "The Proposed Final Fish and Wildlife Program to protect, mitigate, and enhance fish and wildlife resources in the Eklutna River shall be submitted to the Assembly with a proposed resolution in support for action, prior to its submission to the Governor of Alaska."[40] Through the Code, the Assembly ensured there is a public process for the Assembly to have a role in approving the Proposed Final Fish and Wildlife Program before implementation.

In 2024, the Assembly again clarified municipal law surrounding the 1991 Agreement and implemented Municipal law confirming: "[p]ursuant to section 26.30.025, the assembly shall be responsible for all policy decisions related to the municipality's performance under the 1991 Fish and wildlife agreement regarding the Eklutna hydroelectric project."[41] The Assembly has the responsibility to make policy decisions regarding the 1991 Agreement, including deciding whether or not to approve the Proposed Final Fish and Wildlife Program.

At the RCA, the Assembly argued that the concerns the RCA had in 2020 were ameliorated because the Assembly implemented guardrails to ensure that policy decisions regarding the implementation of the 1991 Agreement would be made by the Assembly and not (then-unqualified) AHP staff. The Assembly viewed its role in setting policy as distinct from the technical expertise required to manage day to day hydroelectric operations. The logical follow-on was that the Commission could modify Order 39 to allow the Municipality to exercise its vote as to *policy* decision on the EOC without getting into regulated "button pushing" issues.[42]

No parties opposed the Assembly's Motion or Petition (and only ENSTAR Natural Gas Company opposed the request for expedited consideration).

On April 19, 2024, despite the fact that no parties had opposed the Assembly's requests, the RCA issued an expansive order wherein it denied the relief the Assembly requested. The document was titled an Order Redesignating the Commission Panel; Denying Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020; Denying Petition to Intervene; Denying

[37] *See* Petition to Intervene and Motion to Reopen Dockets.

[40] AO 2023-131 at 3.
[41] AO No. 2024-28, § 1 (Mar. 19, 2024) (codified at AMC 3.20.070).
[42] *See* Motion to Reopen Dockets and Modify Order No. 39 at 10-11.

Motion for Expedited Consideration of Petition to Intervene and Motion to Reopen Docket and Modify Order 39 dated May 28, 2020; and Addressing Anchorage Ordinances.

The Commission denied the Motion to Reopen Dockets as untimely pursuant to 3AAC 48.105 (on motions for reconsideration of an order of the Commission), holding that the Assembly should have filed for reconsideration of the Order within 15 days of the date of the order – or by June 12, 2020. It reasoned that since the date of the Order, Chugach "has expended considerable resources incorporating [ML&P's] assets into Chugach's operations, that the transaction can no longer be undone."[43] The Commission further noted that 3 AAC 48.105 only permits parties to a proceeding to seek reconsideration of an Order and because the Assembly was not directly a party to the earlier proceeding, it likely lacked standing to seek reconsideration (in 2020).

The Commission then denied the Petition stating there was not a process to reopen the dockets under the statutory timelines in AS 42.05.175 and further that petitions to intervene can only be considered in cases that are to be decided upon an evidentiary record after holding a hearing per 3 AAC 48.110(a). Because the Commission believed there was not a way to hold a hearing under the statue, the Commission reasoned there was also not a way to open the docket to consider the Assembly's request to intervene. The Commission denied the Assembly's Petition as moot.

The Commission also denied the request for expedited consideration, noting that the resolution of the pleadings could not be accomplished on the requested timeline because of the need to involve other parties and allow for their input. Instead, the Commission denied the request for expedited consideration without seeking the input from the other parties.

Finally, the Commission addressed two ordinances passed by the Assembly: AO No. 2023-131, As Amended December 19, 2023, and AO No. 2024-28, which passed on March 27, 2024, was vetoed by Mayor Bronson, and the Assembly overrode the Mayor's veto on April 9, 2024. The Commission recounted its belief that the ordinances purported to require the EOC's plan to require Assembly approval before it could be submitted by the EOC to the Governor. The Commission called the Assembly's attention to AS 42.05.641 which states:

> The commission's jurisdiction and authority extend to public utilities operating within a municipality, whether home rule or otherwise. In the event of a conflict between a certificate, order, decision, or regulation of the commission and a charter, permit, franchise, ordinance, rule, or regulation of such a local governmental entity, the certificate, order, decision, or regulation of the commission shall prevail.

It then noted the Commission required "the MOA to surrender its right to vote on the EOC specifically to prevent the MOA from delaying or changing the EOC's Project management decision, including decisions related to the Fish and Wildlife Agreement, until such time as the MOA convinces us that it has acquired the expertise required to fully participate as a voting member of the EOC."[44] The Commission reasoned that because it had not reinstated the MOA's

[43] Order Redesignating the Commission Panel; Denying Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020; Denying Petition to Intervene; Denying Motion for Expedited Consideration of Petition to Intervene and Motion to Reopen Docket and Modify Order 39 dated May 28, 2020; and Addressing Anchorage Ordinances at 3 (April 19, 2024).
[44] *Id*. at 4.

status as a voting member of the EOC, and because the MOA had not convinced it that AHP had acquired the expertise to fully participate as a voting member, "any effort to delay or change EOC Project management decisions by ordinance are void under AS 42.05.641 as being contrary to Order 18-102(44)."[45]

ASSEMBLY'S APPEAL TO SUPERIOR COURT

On April 24, 2024, the Assembly appealed the RCA's decision to the Alaska Superior Courtin Case No. 3AN-24-06001CI. The appeal was filed before the Proposed Final Fish and Wildlife Program were submitted to the Governor on April 24, 2024, thus preserving the Assembly's arguments related to voting rights and participation in the development of the proposed Plan.

In April of 2024, Suzanne LaFrance was elected as Anchorage Mayor. Mayor LaFrance's approach to implementing the 1991 Agreement was a departure from the Bronson Administration and was largely in sync with the Assembly's position. As a result, the Assembly was able to strategically position itself for a cooperative effort beginning upon her swearing in on July 1, 2024.

In its Statement of Points on Appeal (filed the same day as a Notice of Appeal), the Assembly argued:

1. The Regulatory Commission of Alaska ('RCA') erred in denying the Assembly's Petition to Intervene, dated April 15, 2024, because the Assembly meets the requirements of 3 AAC 48.110(a) and has a statutory right to intervene.

2. The RCA erred in denying the Assembly's Petition to Intervene because the Assembly should have been granted permissive intervention.

3. The RCA erred by misconstruing the Assembly's Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020, as a motion for reconsideration of the RCA's Order U-18-102(44)/U-19-020(39)/U-19-021.

4. The RCA erred when it denied the Assembly's request to modify Order 39 to allow the Municipality to vote as a member of the 'EOC' for the purposes of implementation of the 1991 Fish and Wildlife Agreement.

5. The RCA erred when it determined that it lacked statutory authority to reopen the dockets referenced in the Assembly's Motion.

6. The RCA's decision was arbitrary, capricious, and an abuse of discretion.

7. The RCA erred when it relied on facts not in the record.

[45] *Id*.

8. The RCA lacked jurisdiction to enter Order 39.

9. Order 39 violates state and federal law.

The Assembly proceeded to gather the record on appeal and the parties agreed to several extensions of pre-briefing deadlines. On July 18, 2024, AHP opened a new action in the RCA and filed a Notice and Request for Acknowledgement of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee, following AHP's hiring of Mark Corsentino, P.E., as Utility Director for AHP. This, too, is described in more detail below. After the Assembly filed the appeal, Chugach and MEA filed a single proposal with the Governor and the Municipality (inclusive of the Assembly and its position) requested the Governor allow the parties to examine an alternative proposal involving pumped storage hydro. The Governor issued his decision on October 2, 2024, which granted the Municipality's request (as described later in this document).

In October of 2024, the RCA moved to dismiss the appeal.[46] The RCA argued: (1) the Assembly's action in the RCA was time-barred because its request was not filed within 15 days of the Commission's Order in 2020; (2) the issues raised by the Assembly were moot because the Governor issued his decision on October 2, 2024; and (3) because the Assembly lacked a direct interest in the underlying RCA proceedings, was not aggrieved by the proceedings, and failed to participate when the dockets were open, the Assembly lacks standing to challenge the RCA's decision.[47] After the deadline to file dispositive motions (like the Motion to Dismiss) lapsed on October 28, 2024, Chugach and MEA filed a Joinder to the RCA's motion and included new, independent arguments describing the investments Chugach and MEA made in reliance on the Order 39 and that other non-parties have similarly relied on the Order.[48] The Assembly opposed the Joinder, noting it was filed after the dispositive motion deadline,[49] but the Court denied the Assembly's request reasoning that the Assembly had sufficient time to respond to the allegations raised in it.[50]

The Assembly responded to the Motion to Dismiss on January 10, 2025.[51] Therein, the Assembly noted the RCA's flawed reliance on exhaustion principles – the RCA asserted that it could not hear the Assembly's Petition because it cannot reopen dockets except as narrowly authorized by statute. However, in reviewing the RCA's online docket sheets, it is clear the RCA "regularly—and apparently routinely—reopens closed dockets, and has done so numerous times for myriad purposes . . . ."[52] The Assembly provided numerous examples of actions the RCA claimed were not permissible. As to the argument that the Assembly should have intervened in 2020 and sought the relief that it sought in 2024, it is clear that there was no reason for the Assembly to anticipate that Chugach and MEA would sideline the Assembly's appropriating and legislating power related to the 1991 Agreement in 2020. That issue only came to light in 2024 when the Assembly discovered that the Bronson administration, Chugach, and MEA had entered

[46] Motion to Dismiss or, in the Alternative, to Stay Appeal (Oct. 28, 2024).

[52] *Id*. at 5-6, 8-9.

into a secret Binding Term Sheet without informing the Assembly or seeking its input.[53] Further, the Assembly argued that it is not required to seek reconsideration (here, as to Order 39 in 2020) and may appeal a Commission decision without first seeking reconsideration.[54] Lastly, as to the RCA's argument that the appeal was time barred (because an appeal should have been filed in 2020), the Assembly argued the operative appeal deadline followed the RCA's decision in 2024, not in 2020.[55]

In response to the RCA's argument that the Assembly lacked standing because the "Municipality" and not the "Assembly" had standing since the "Municipality's" voting rights were at stake, the Assembly noted the RCA ignored controlling Alaska law. The Alaska Constitution states that "[t]he governing body of the organized borough shall be the assembly, and its composition shall be established by law or charter."[56] And, as described in AMC 3.20.010(6), the Assembly (not the Administration) has authority to make all policy decisions "related to the municipality's performance under the 1991 Fish and Wildlife agreement regarding the Eklutna hydroelectric project." Order 39 directly affected the Assembly's authority, and the Assembly is the proper party to challenge the decision.

Finally, the RCA argued that the appeal was moot because the Governor issued a Decision approving the final Fish and Wildlife Program in October 2024 (while the appeal was pending). On the contrary, the Governor's Decision notes that Order 39 required the Municipality to surrender its vote on Eklutna Project decisions but then requires the parties to the 1991 Agreement to consider several future policy decisions ("Limited Reopeners") that have important implications for the Eklutna River. The Governor's Decision makes reinstating the Assembly's ability to vote on those policy decisions even more important and certainly does not moot the appeal.[57]

In addition to responding to each of the RCA's arguments, the Assembly's Opposition highlighted the RCA's attempt to unilaterally remove the Municipality's voting rights under the 1991 Agreement:

> [T]he process in which that proposed Fish and Wildlife Program was developed, and the associated agreements to use municipal infrastructure and water supply, violated municipal law and contradicted long-standing municipal policies. The Assembly sought RCA approval to modify Order 39 to allow the Assembly to exercise its proper, democratic role as the Municipality's policymaking body, with powers to appropriate municipal resources. Because policy decisions will continue to be made regarding implementation of the Fish and Wildlife Program (even after the Governor's Decision), the Assembly continues to have a strong interest in how the $57-million plan is carried out over the next several decades.[58]

This concern undergirds the Assembly's actions related to the Eklutna River and provides context for why the Assembly has prioritized the policies surrounding the 1991 Agreement. The Assembly

has a fiduciary duty to protect both taxpayers and ratepayers and ensure funds are used prudently. The decisions surrounding the implementation of the 1991 Agreement have a direct effect on the assets and finances of the Municipality.

While the Motion to Dismiss was pending, the RCA issued a novel decision on the Municipality's Request for Acknowledgement of Anchorage Hydropower's Acquisition of Expertise.[59] In sum, the Commission determined that the surrender to be for the full length of the Eklutna Power Purchase Agreement ("PPA") and the MEA PPA, both scheduled to expire on October 31, 2055. The RCA filed a Notice of Supplemental Authority in the Appeal and lodged the RCA's Order.

On February 5, 2025, the Court issued an Order Granting Motion to Dismiss. The Court agreed with the Assembly and found that the Assembly was not required to exhaust administrative remedies before appealing to the Superior Court.[60] However, the Court found the appeal was untimely because it sought to undo the 2020 Order 39 and appeal should have been filed in 2020.[61] The Court further found that the Assembly did have standing to challenge Order 39 because it had a direct interest in the proceedings, a specific interest in the Project, was factually aggrieved, and the Assembly sufficiently participated in the RCA proceedings.[62] The Court found that there remains a live controversy and the appeal was not moot: "the Assembly's ultimate issue is not just with the Fish and Wildlife Program, but its general lack of input on the Eklutna project and the Program. This will continue to be a present, live controversy as long as the project operates."[63]

Importantly, the Court found that the Assembly could be entitled to future relief: "Under Order 39, the Assembly may petition to reinstate its voting rights on the EOC. While the Assembly's most recent petition was denied, the RCA notes that it may petition again in the future or file an appeal. The issue of the Assembly's participation in the Eklutna project clearly remains a live controversy."[64]

The RCA sought attorney's fees as the prevailing party,[65] and then agreed to withdraw the Motion after reaching an agreement with the Assembly.[66] The Court granted the request and the case was closed.

The Assembly elected not to appeal the dismissal and instead turned its focus towards participation in the planning process and working cooperatively with the LaFrance Administration on its RCA actions. The dismissal of the appeal marked the end of the Assembly-led litigation around the Eklutna Project.

THE GOVERNOR'S DECISION

> This [Fish and Wildlife] Agreement is entered into on August 7, 1991 . . . regarding protection, mitigation of damages to, and enhancement of fish and wildlife (including related spawning grounds and habitat) affected by hydroelectric development of the Eklutna . . . Projects. With respect to the implementation provisions called for in this Agreement, the Eklutna Purchasers will be responsible for the consultation, study and implementation provisions applicable to the Eklutna Project . . . .[67]

The 1991 Agreement outlined the process for the parties to study the Project's impacts to fish and wildlife and develop a proposed Final Program for the "protection, mitigation, and enhancement of fish and wildlife affected by" the Project and for the other Parties to offer their comments.[68] The 1991 Agreement requires the parties to consider "the impact on fish and wildlife measures on electric rate payers, municipal water utilities, recreational users and adjacent land use, as well as available means to mitigate these impacts."[69] As described by the Governor, the Project received Congressional approval to substitute the 1991 Agreement and its requirements for federal licensing under the Federal Power Act and accompanying regulations.[70]

The 1991 Agreement laid out relevant timelines and some structure around the study and proposals. The Governor was charged with "evaluat[ing] the Proposed Final Program, attempt[ing] to reconcile differences between the Parties to the Agreement, and establish[ing] a Final Program that 'adequately and equitably protects, mitigates damage to, and enhances fish and wildlife resources.'"[71] The evaluation required consideration of eight (8) factors to "ensure that Eklutna [is] best adapted for power generation and other beneficial public uses."[72] The eight (8) factors are:

1. efficient and economical power production;
2. energy conservation;
3. the protection, mitigation of damage to, and enhancement of fish and wildlife (including related spawning grounds and habitat);
4. the protection of recreation opportunities;
5. municipal water supplies;
6. the preservation of other aspects of environmental quality;
7. other beneficial public uses; and
8. requirements of State law[73]

On April 25, 2024, Chugach and MEA submitted a Proposed Final Fish and Wildlife Program with the support of Mayor Bronson.[74] The Assembly did not approve or support the proposal. Following the submission, the public had 60 days to comment on the Proposed Final Fish and Wildlife Program, followed by 30 days for the Project Owners to respond. Copies of comments can be found at https://eklutnahydro.com/documents/#April2024Final|2.

On June 11, 2024, the Assembly held a public hearing on the Proposed Final Fish and Wildlife Program and passed AR 2024-182(S-1) on June 25, 2024 encapsulating the public comments gathered by the Assembly and reiterating the Assembly's position in support of the Native Village of Eklutna and its proposed alternate plan.[75] The Assembly requested the Project Owners seek a two-year extension to perform additional analysis of alternate plans and to seek consensus among the parties.[76] The Assembly submitted the comments to the Governor on June 26, 2024.

On July 19, 2024, after her swearing-in, Mayor LaFrance submitted the Municipality's response (as a Project Owner) in the form of a letter to the Governor.[77] The letter was approved by the Assembly at its July 19, 2024 meeting and submitted as part of the public comment process.[78]

Chugach and MEA touted the Proposed Final Program as a compromise and response to public input:

> After reviewing all of the comments received, the Project Owners made substantive revisions to the program reflecting negotiations with the parties to the 1991 Agreement and NVE, and are submitting the proposed final program to the Governor. The proposed final program includes the following:
>
> - Construction of the Eklutna River Release Facility and establishment of year-round instream flows in the Eklutna River;
> - Automation of the existing outlet gate at the dam to provide periodic channel maintenance flows in the Eklutna River;
> - Construction of eight new bridges along the Anchorage Water and Wastewater Utility (AWWU) access road to enable AWWU's access to critical infrastructure year-round following the establishment of instream flows;
> - Payment to Chugach State Park for lakeside trail repairs;
> - Establishment of a Committee to oversee implementation of the Monitoring and Adaptive Management Plan;

[77] AM 557-2024(A) Comments to the Governor from the Municipality of Anchorage, In Response to Stakeholder Comments to the Eklutna Hydroelectric Project's Proposed Final Fish and Wildlife Program Put Forth on April 25, 2024 (July 19, 2024).
[78] *Id*.

- Funding to conduct monitoring studies in the Eklutna River throughout the 35-year program;
- Funding for physical habitat enhancement in the Eklutna River based on the monitoring results;
- Procedures for the Committee to adaptively manage the flow regime in the Eklutna River based on the monitoring results;
- Provisions for banking water in Eklutna Lake and potentially increasing the water budget for instream flows in the future;
- Potential installation of a fixed wheel gate to accommodate higher inflows in the future and/or allow higher channel maintenance flows if needed; and
- Potential installation of upstream and downstream fish passage facilities that meet specific criteria in the plan.

> Approval of the Proposed Final Program will enable the Project Owners to implement these significant fish and wildlife measures at the Project, while simultaneously protecting the municipal water supply and continuing to provide firm, low cost, renewable energy to Southcentral Alaska.[79]

The Assembly's perspective on the Proposal was not as positive. The Assembly's sentiments were shared by Mayor LaFrance who expressed:

> The current Proposed Final Fish and Wildlife Program would not result in a 'continuous water flow of the Eklutna River,'[80] or restoration of 'fish populations . . . to Eklutna Lake.'[81] The agencies that submitted stakeholder comments recognized that the proposed Program therefore 'has limitations'[82] and "does not meet the goal of full ecosystem connectivity."[83] They expressed preferences for an alternative that would "re-water[] the river with staged implementation of meaningful mitigation measures to support restoration and resilience of salmon runs in the Eklutna River watershed,"[84] and "[return] flows to the river that provide wetland connectivity, both instream and off-channel spawning and rearing habitats, and the return of salmon runs and marine derived nutrients into the entire river, lake, and its tributaries."[85]

> Alternatives that would preserve power production while also resulting in this majority-preferred "continuous water flow" were proposed. As a result of time pressures, at least one received only an "initial analysis."[86]

Mayor LaFrance reiterated that alternatives to the Proposed Final Fish and Wildlife Program existed and should be considered.[87] Noting the Governor's authority to reconcile differences between the parties, the Municipality requested the Governor consider the Municipality's position and require the Project Owners to:

> use two years of the three-year pre-implementation period to identify an alternative infrastructure and engineering solution to ensure continuous water flow to all 12 miles of the Eklutna River. This will enable the owners to define and develop a practical alternative that will:
>
> - Ensure continuous water flow to all 12 miles of the Eklutna River,
> - Protect drinking water supply for Anchorage residents, and
> - Further contribute to a reliable, affordable energy future for Southcentral Alaska.
>
> In addition, the "limited reopeners" in the proposed final Program are unnecessary, as under the existing 1991 Agreement, the Owners can and should remain open on an ongoing basis to additional river restoration solutions as technology and conditions evolve. We propose you remove the limited reopeners from the final program to ensure clarity on this point.[88]

On August 15, 2024, Governor Dunleavy sent a letter to the parties setting a meeting for September 9, 2024 and requesting briefing on six (6) topics:

> 1. The Governor is required to give equal consideration to eight factors identified in Section 5 of the Agreement. Please identify how the proposed final program or an alternate program promoted by any other parties, or the Native Village of Eklutna, does or does not meet those eight factors.
> 2. Does the Agreement require complete connection between the river and the lake to support fish passage?
> 3. Is MOA Assembly approval required for approval of the Owners' program?
> 4. What effect, if any, did the MOA' s lack of a vote on the Owners' program have on the process set forth in the Agreement?
> 5. Does the Governor have the authority under the Agreement to impose a two-year extension on the process as requested by the MOA?
> 6. Whether the Owners and Anchorage Water and Wastewater Utility ('AWWU') have reached a final and binding agreement concerning the use of AWWU infrastructure as outlined in the Owners' program. If a final agreement has not

[87] LaFrance Letter attached to AR 557-2024(A) at 2.
[88] *Id*. at 2-3.

been reached, what effect will that have on the Owners' ability to implement the final proposed program?[89]

The parties submitted briefs on September 4, 2024. In its brief, the Municipality argued that the Proposed Final Fish and Wildlife Program falls short when compared to other approaches and encouraged the Governor to allow the parties to study alternatives. The Proposed Final Fish and Wildlife Program has a hefty price tag (annualized cost of $3.7 million per year) and reduces power production by 10%.[90] Furthermore, the Proposed Final Fish and Wildlife Program fails to re-water the entire Eklutna River and, in turn, fails to protect, mitigate harm to, or enhance fish and wildlife; it fails to adequately advance recreational and beneficial public uses; it does not meet the Municipality's expectations though it must be approved by the Assembly, risking viability if the Assembly withholds approval.[91]

The U.S. Fish and Wildlife Service, National Marine Fisheries Service, and the Native Village of Eklutna also criticized the Proposed Final Fish and Wildlife Program citing similar concerns, including the Program's failure to rewater the entire Eklutna River.[92] Members of the public agreed.[93] The Municipality encouraged the Governor to allow for study of more promising programs over the following two (2) years, in particular pumped storage hydro.[94] The Municipality also highlighted the difficulties of advancing its position (and the public's) due to the RCA's actions regarding its voting rights and the concurrent obstruction by Chugach and MEA.[95]

In contrast, Chugach and MEA argued that the work to develop the Proposed Program was robust, considered the alternatives, incorporated comments from the parties and the public throughout the process, stating the process utilized "countless staff resources, and significant management time conducting a process of consultation with state and federal resource agencies, rigorous scientific and engineering studies, stakeholder engagement, and careful analysis of dozens of fish and wildlife protection, mitigation, and enhancement proposals."[96] Many of the public comments called out shortcomings with the Proposed Final Fish and Wildlife Program.

On September 4, 2024, the Parties met at the Governor's office and presented their arguments and proposals. On September 5, the Anchorage Assembly and Native Village of Eklutna passed Joint Resolution 2024-001 urging "Governor Dunleavy to establish a final Fish and Wildlife Program that requires the owners to use two years of the three year pre-implementation period to explore alternative infrastructure options, including pumped storage hydropower, that can provide continuous water flow to all twelve miles of the Eklutna River and fish passage into and out of

Eklutna Lake, protect the drinking water supply for Anchorage residents, and ensure a reliable, affordable energy future for Southcentral Alaska."

The Governor issued his decision on October 2, 2024. He struck a compromise, allowing the portal valve project planning to proceed (as proposed by Chugach and MEA) while permitting a study of the pumped storage hydro option (as proposed by the Municipality and Native Village of Eklutna).[97]

THE ADMINISTRATION'S RCA ACTIONS

When the Municipality sold ML&P to Chugach, it surrendered its vote on the EOC because the RCA determined that it no longer had the requisite knowledge of prudent utility practice and the Railbelt electric generation and transmission system required to be a voting owner representative on the EOC. However, by July of 2024, the Administration had secured that expertise by appointing Mark Corsentino, P.E. as Utility Director of AHP. On July 18, 2024, the Administration filed a Notice and Request for Acknowledgement of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee with the RCA.[98] The Notice included a request for expedited consideration so AHP would have a vote on decisions related to the Final Fish and Wildlife Program that would ultimately bind the Municipality to budgetary and policy decisions.

The Native Village of Eklutna filed a letter in support of the Municipality's request.[99] Chugach and MEA opposed the request to consider the matter on shortened time and also raised substantive concerns about whether the RCA should grant the underlying relief.[100] Chief among their concerns was whether AHP's Director would be subject to the whims of the Assembly.[101] Notably, Chugach and MEA did not dispute Mr. Corsentino's qualifications or oppose his becoming a voting member of the EOC.[102] The Assembly filed a Petition to Intervene as a result of Chugach and MEA's "attempt to place at issue the Assembly's role in determining the Municipality's policies with respect to the Eklutna Project and call into question the propriety of the Assembly's actions regarding the 1991 Fish and Wildlife Agreement."[103] Chugach and MEA opposed the Petition.[104]

For a thorough look at options for implementing the 1991 Agreement and the Governor's Decision, see Mark Corsentino's opinion piece, "The biggest hydropower opportunity on the Railbelt isn't on Chugach Electric Association's List," *Anchorage Daily News* (Feb. 26, 2026) (available at: https://www.adn.com/opinions/2026/02/26/opinion-the-biggest-hydropower-opportunity-on-the-railbelt-isnt-on-chugach-electric-associations-list/).

[98] Docket U-24-024.

[99] Letter of Support from Native Village of Eklutna (Aug. 2, 2024).

[100] Chugach Electric Association, Inc. and Matanuska Electric Association, Inc.'s Joint Opposition to AHP's Motion for Expedited Consideration (Aug. 26, 2024) (hereinafter "Joint Opposition"); Initial Comments on Chugach Electric Association, Inc. and Matanuska Electric Association, Inc. (Aug. 26, 2024) (hereinafter "Initial Comments").

[101] Joint Opposition at 2-3.

[102] Initial Comments at 1 ("At this point, we do not oppose AHP's nomination of Mr. Corsentino to become a voting member of the EOC.").

[103] Anchorage Assembly's Petition to Intervene at 1 (Aug. 27, 2024).

[104] Chugach Electric Association, Inc. and Matanuska Electric Association, Inc.'s Joint Opposition to Anchorage Assembly's Petition to Intervene (Sept. 3, 2024).

The RCA scheduled a prehearing conference for August 30, 2024; Administrative Law Judge (ALJ) James L. Walker presided. At the hearing, ALJ Walker denied AHP's request for expedited consideration—electing for a truncated schedule but not as shortened as AHP requested—and denied the Assembly's Petition to Intervene,[105] reasoning the Municipality could represent the Assembly's interests.[106]

During the prehearing conference, ALJ Walker sua sponte posited that the term of the surrender of AHP's vote might have been for the length of the Eklutna PPA and MEA PPA, 35 years,[107] stating "the Commission should be considering dismissal of the notice and request for acknowledgement as being prematurely filed" because it purportedly failed to acknowledge the required term length.[108] No party had argued for this interpretation, but Chugach and MEA immediately adopted it.[109]

The relevant language from the RCA Order regarding the term of the surrender reads:

> We can only find that [AHP] is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreement so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without [AHP] having a vote on operating or management decisions. This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as [AHP] has shown to our satisfaction that [AHP] has acquired the expertise required to fully participate as a voting member of the EOC.[110]

The Commission adopted a schedule to hear evidence and arguments on AHP's request with hearings on the matter scheduled for November 18, 2024 and a Commission decision thereafter.[111]

---

[105] The Assembly did not participate as a party to either of the Administration's RCA actions after this date and the information included in this Report is for context to the Assembly's advocacy but is not an exhaustive report on the Administration's actions and efforts.

[108] *See* U-24-024 Prehearing Conference, Tr. 7, lines 5-7.

[109] *See* Chugach Electric Association, Inc. and Matanuska Electric Association, Inc.'s Joint Brief Regarding Surrender Term, pp. 11-12 (Oct. 8, 2024) ("Chugach and MEA admit that until ALJ Walker raised this issue in this proceeding, they had not examined this issue closely and were theoretically comfortable with an interpretation of the Surrender that if and when the MOA could demonstrate technical and managerial fitness, potentially with certain conditions imposed on the MOA to require MOA act consistently with prudent utility practice, to prevent the MOA from undermining the Project Owners' work in implementing the Final Fish and Wildlife Program, and to protect the Eklutna Project as a valuable resource in the Railbelt, the MOA would be entitled to regain its voting rights on the EOC and with respect to the Fish and Wildlife Agreement before the end of the PPA terms. Upon further review in this proceeding, however, Chugach and MEA no longer think that this matter is so simple. . . .") (hereinafter "Chugach & MEA Brief on Term").

[110] Order U-18-102(44) at 67.

[111] *Id*. at 6-7.

In response to the RCA's request, the parties briefed the question of the surrender term with the Office of the Attorney General, Regulatory Affairs & Public Advocacy Section ("RAPA"), Chugach and MEA arguing the surrender was for a term of at least 35 years.[112] AHP argued that the language in Order 39 did not implement a minimum term and focused on the acquisition of expertise:[113]

> As documented in the Acquisition dockets and the MEA PPA approval docket (TA379-121), as well as in subsequent filings in this docket, the Commission, the owners of the Eklutna Project, and the Office of the Attorney General, Regulatory Affairs & Public Advocacy Section ('RAPA'") all had a public, contemporaneous and continuing understanding that while Order 39 required the term of the surrender to be equal to the terms of the Eklutna and MEA PPAs, that term was subject to termination, and the surrender was subject to being 'lifted' at any time after the MOA made a showing to the Commission's satisfaction that MHP had acquired the expertise required to fully participate as a voting member of the EOC.[114]

On October 15, 2024, RAPA filed a Motion to Dismiss the Notice and Chugach and MEA filed a Joinder on October 24, 2024.[115] RAPA argued that the issues raised by AHP were mooted by the Governor's Decision and Chugach and MEA further argued that the RCA's decision (due after briefing was filed) on the question of a minimum term would determine whether the parties should proceed to a hearing on the underling request.[116]

On November 14, 2024, the RCA issued its decision, finding the minimum term of the surrender was 35 years, the request to restore AHP's vote on the EOC was premature, vacating the hearings set for November 18, 2024, and closing the docket.[117]

On December 13, 2024, AHP appealed the RCA's decision to the Anchorage Superior Courtin Case No. 3AN-24-10554CI.[118]

On July 30, 2025 (while the appeal in Case No. 3AN-24-01554CI was pending and stayed), AHP filed a new action in the RCA, this time requesting the RCA lift the condition requiring the surrender of the vote from the Certificate of Public Convenience and Necessity No. 780 and an

[114] *Id*. at 3.
[115] Motion to Dismiss as Moot (Oct. 15, 2024); Chugach Electric Association, Inc. and Matanuska Electric Association, Inc.'s Joinder in Motion to Dismiss Regarding Surrender Term (Oct. 24, 2024).
[116] *See Id*.
[117] Order Granting Motion to Dismiss in part and Dismissing Notice and Request, Denying Motion to Dismiss in Part, Vacating Procedural Schedule, Denying Motion to Compel, Denying Request to Construe Notice and Request as Petition to Amend Certificate Condition, Providing Guidance for Future Filings, and Closing Docket (Nov. 14, 2024). The RCA found RAPA's motion was moot, given its finding on the minimum surrender term. *See Id*. at 29-30.
[118] Notice of Appeal (Dec. 13, 2024); Statement of Points on Appeal (Dec. 13, 2024).

alternative application to amend Certificate No. 780.[119] The request approached the question of the vote surrender from a different angle and asked the RCA to amend the Certificate of Convenience as opposed to interpret its prior Order 39.[120]

RAPA filed a Motion to Dismiss the new action, relying on the minimum term set by the RCA in Docket U-24-024;[121] Chugach and MEA joined in RAPA's motion.[122] In a 3-2 vote, the RCA granted the Motion to Dismiss on January 26, 2026 finding the minimum term requirement had not been nullified and there was not good cause to grant the request to amend the Certificate of Convenience.[123] AHP filed a Petition for Reconsideration on February 10, 2026.[124] In a 3-2 vote, the RCA denied the Petition on February 27, 2026.[125]

AHP appealed the RCA's February 27, 2026 decision to the Anchorage Superior Court in Case No. 3AN-26-05848CI on March 31, 2026 and simultaneously moved to consolidate it with Case No. 3AN-24-10554CI. The appeals were consolidated in April of 2026 and the Municipality continues to pursue review of the RCA's decisions.[126]

THE ROAD AHEAD

The Assembly serves as the steward of public funds (both taxpayer and ratepayer) and must exercise its authority prudently and in line with its fiduciary duties. The expected path for the Assembly to exercise its oversight and fiduciary duties related to the Eklutna River and the 1991 Agreement have been severely limited, as explained herein. Presently, the Municipality's partners in the Project have the ability to essentially decide how taxpayer and ratepayer funds are spent without the Municipality having a vote, despite the public's ownership stake in the Eklutna Project.

In the face of these difficulties, the Assembly continues to prioritize its government-to-government relationship with the Native Village of Eklutna and works to ensure Eklutna's position is centered in the Assembly's actions related to this Project. The Assembly is considering the related AWWU contracts with Chugach as part of its oversight related to the Eklutna Project. The process surrounding the implementation of the 1991 Agreement was flawed, in particular as it relates to the Assembly's oversight and public participation. But through the Assembly's actions as described in this Report and its continued focus on inclusive policy considerations, the Assembly has worked and continues to work with the Administration to represent the people of Anchorage and their priorities related to the Eklutna River.

AGREEMENT

AGREEMENT BETWEEN
THE MUNICIPALITY OF ANCHORAGE,
DBA ANCHORAGE MUNICIPAL LIGHT AND POWER,
CHUGACH ELECTRIC ASSOCIATION, INC.,
MATANUSKA ELECTRIC ASSOCIATION, INC.,
U.S. FISH AND WILDLIFE SERVICE,
NATIONAL MARINE FISHERIES SERVICE,
ALASKA ENERGY AUTHORITY,
AND THE
STATE OF ALASKA,
RELATIVE TO THE EKLUTNA AND SNETTISHAM
HYDROELECTRIC PROJECTS

This Agreement is entered into on August 7, 1991, between The Municipality of Anchorage, dba, Anchorage Municipal Light and Power, Chugach Electric Association, Inc., and Matanuska Electric Association, Inc. (hereinafter collectively "Eklutna Purchasers"), the United States Fish and Wildlife Service (hereinafter "USFWS"), the National Marine Fisheries Service (hereinafter "NMFS"), the Alaska Energy Authority (hereinafter "AEA") and the State of Alaska (hereinafter "the State"), regarding protection, mitigation of damages to, and enhancement of fish and wildlife (including related spawning grounds and habitat) affected by hydroelectric development of the Eklutna and Snettisham Projects. With respect to the implementation provisions called for in this Agreement, the Eklutna Purchasers will be responsible for the consultation, study and implementation provisions applicable to the Eklutna Project and AEA shall be responsible for the consultation, study and implementation provisions applicable to the Snettisham Project.

WITNESSETH THAT:

WHEREAS, subject to the approval of Congress, the Eklutna and Snettisham Projects will be transferred from the Federal Alaska Power Administration to the Eklutna Purchasers and AEA (collectively, "the Purchasers") without the necessity of their having to obtain a Federal Energy Regulatory Commission (FERC) License for project operation; and

WHEREAS, the Eklutna and Snettisham hydroelectric developments may have resulted in a yet to be quantified impact to fish and wildlife resources; and

WHEREAS, concerns have been expressed that without FERC licensing, there is no opportunity to determine the extent of that fish and wildlife impact, develop measures to protect, mitigate

damages to, and enhance fish and wildlife (including related spawning grounds and habitat), and implement fish and wildlife measures found to be in the public interest.

NOW THEREFORE, the parties agree as follows:

1. **FERC Licensing.**

NMFS, USFWS and the State agree that the following mechanism to develop and implement measures to protect, mitigate damages to, and enhance fish and wildlife (including related spawning grounds and habitat) obviate the need for the Eklutna Purchasers and AEA to obtain FERC licenses.

2. **Study Plan.**

The Purchasers agree to fund studies to examine, and quantify if possible, the impacts to fish and wildlife from the Eklutna and Snettisham Projects. The studies will also examine and develop proposals for the protection, mitigation, and enhancement of fish and wildlife affected by such hydroelectric development. This examination shall consider the impact of fish and wildlife measures on electric rate payers, municipal water utilities, recreational users and adjacent land use, as well as available means to mitigate these impacts.

3. **Carrying Out The Study Plan.**

Study Plans shall be developed by the Purchasers in consultation with the USFWS, NMFS, the Alaska Department of Fish and Game, the Alaska Department of Environmental Conservation and the Alaska Department of Natural Resources (the "State Resource Management Agencies"), or their successors to aid in the formulation of the Program called for in this Agreement. Prior to implementation, the parties to this Agreement shall review the plans and concur with their scope of work.

The Purchasers shall conduct the studies and prepare the evaluations called for in the plans, seeking input from the USFWS, NMFS, the State Resource Management Agencies and other interested parties as the studies progress. The USFWS, NMFS, and State Resource Management Agencies shall have an opportunity to comment on draft study reports, and their comments and a response to their comments shall be included in the final study reports. All study plans, data, reports and comments will be made available to the parties and, upon request, to the public.

4. **Review of Findings.**

After final study reports are prepared, the Purchasers shall prepare a draft Summary of Study Results and prepare a draft Fish and Wildlife Program. The draft Fish and Wildlife Program shall consist of the measures recommended by the Purchasers for the protection, mitigation of damages to, and enhancement of fish and wildlife (including related spawning grounds and habitat) and set a tentative schedule for their implementation. The Purchasers shall provide copies of the draft Summary and draft Fish and Wildlife Program to the USFWS, NMFS, and State Resource Management Agencies for comments or recommendations. If USFWS, NMFS, or the State Resource Management Agencies' comments or recommendations differ from those of the Purchasers, the Purchasers will attempt to resolve such differences giving due weight to the recommendations, expertise, and statutory responsibilities of USFWS, NMFS, and the State Resource Management Agencies.

Once comments and recommendations have been received, the Purchasers shall hold at least one public meeting each in Anchorage and the Matanuska Valley (with respect to the Eklutna Project) and in Juneau (with respect to the Snettisham Project) to receive public comment on the draft Summary, the draft Fish and Wildlife Program, and the comments and recommendations of the USFWS, NMFS, and the State Resource Management Agencies. At least thirty days prior to the proposed public meetings, copies of the draft Fish and Wildlife Program, reports and recommendations will be distributed to representative public libraries in the Anchorage and Matanuska Valley areas (in the case of the Eklutna Project) and in the Juneau area (in the case of the Snettisham Project). Public notice will also be posted in at least two newspapers serving the Anchorage and Matanuska Valley areas (for Eklutna) and the Juneau area (for Snettisham). The public notice shall specify meeting places, times and dates; where studies, reports and recommendations may be obtained for review; and where written comments may be sent. The Purchasers will provide copies of the draft Summary, draft Fish and Wildlife Program, and the comments and recommendations of the USFWS, NMFS, and State to interested members of the public at no charge.

5. **Public Interest Determination.**

The Purchasers shall compile all comments and testimony received; prepare a summary and analysis of them; develop a Proposed Final Fish and Wildlife Program to protect, mitigate, and enhance fish and wildlife resources; and prepare an explanatory statement describing the basis for its Proposed Final Fish and Wildlife Program. All comments, testimony, summary, and analysis materials and the Proposed Final Fish and Wildlife Program shall be provided to the parties to this Agreement and to the Governor

of Alaska. The parties shall have 60 days to submit written comments on the proposed Fish and Wildlife Program, and any alternative recommendations for the protection, mitigation, and enhancement of fish and wildlife resources, to the Governor. The Purchasers shall have 30 days to submit written reply comments to the Governor.

The Governor shall review the Proposed Final Fish and Wildlife Program, the comments, testimony, summary and analysis materials, and any alternative recommendations for the protection, mitigation, and enhancement of fish and wildlife resources. The Governor shall attempt to reconcile any differences between the parties, giving due weight to the recommendations, expertise, and statutory responsibilities of USFWS, NMFS, the State Resource Management Agencies and the Purchasers. In order to ensure that Eklutna and Snettisham are best adapted for power generation and other beneficial public uses, the Governor shall give equal consideration to the purposes of efficient and economical power production, energy conservation, the protection, mitigation of damage to, and enhancement of fish and wildlife (including related spawning grounds and habitat), the protection of recreation opportunities, municipal water supplies, the preservation of other aspects of environmental quality, other beneficial public uses, and requirements of State law. Based on his/her review and consideration, the Governor shall establish a final Fish and Wildlife Program that adequately and equitably protects, mitigates damage to, and enhances fish and wildlife resources (including affected spawning grounds and habitat) affected by the Eklutna Project and the Snettisham Project.

6. **Implementation**.

The Purchasers shall implement the Fish and Wildlife Program established by the Governor, subject to their right to judicial review as provided in Section 9 hereof. However, the Purchasers will implement all provisions of the Program that do not require major capital expenditures pending judicial review, unless otherwise agreed among the Parties or unless a stay is granted by the Court.

7. **Schedule**.

The consultation process leading to the Programs shall be initiated no later than 25 years after the Transaction Date specified in the respective Eklutna and Snettisham Agreements. The Study Plans shall include a schedule for the consultation, comment, and decision making, called for in this Agreement, which shall be adopted by the parties in consultation with the Governor. The schedule shall call for implementation of all provisions of the Fish and Wildlife Program by the Eklutna Purchasers to begin no

later than 30 years after the Transaction Date, and to be completed no later than 35 years after the Transaction Date. The schedule shall call for implementation of all provisions of the Fish and Wildlife Program by AEA (Snettisham) to begin no later than 35 years after the Transaction Date, and to be completed no later than 40 years after the Transaction Date. The schedules shall call for the issuance of the Fish and Wildlife Program by the Governor at least three years prior to the commencement of the period for implementation.

The Purchasers shall repeat the process called for in Sections 2 through 6 of this Agreement on a recurring basis every 35 years, beginning within 25 years of the time implementation of the Fish and Wildlife Program has been completed for the prior consultation process. In addition, prior to undertaking any major structural or operational modification substantially affecting water usage or fish and wildlife at the projects, the Purchasers shall follow the process called for in Sections 2 through 6 of this Agreement. Compliance with the terms of the Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska, entered into between the Alaska Power Administration and the Municipality of Anchorage on February 17, 1984, as amended by a Supplemental Agreement dated August 2, 1988, shall not be construed to be a major structural or operational modification. However, the Eklutna Purchasers will discuss major structural or operational changes from current operations with NMFS and USFWS and will consider any recommendations they have for fisheries mitigation related to such changes.

8. **Dam Construction, Modification, Removal or Abandonment.**

The Purchasers agree to comply with 11 AAC 93.151-.201 with respect to safety inspections, new construction or modifications to existing structures, removal and/or abandonment of all or part of the project.

9. **Enforcement of Fish and Wildlife Program and Agreement.**

The provisions of this Agreement, including the decisions of the Governor and the provisions of the Fish and Wildlife Program, shall be reviewable and enforceable in the United States District Court for the District of Alaska and the Court may order specific performance thereof.

At least thirty days prior to seeking review or enforcement in the United States District Court for the District of Alaska, a party shall send written notice of its concerns to all parties and hold a meeting to attempt informal resolution of its concerns. During the period of informal resolution, any statute of limitations shall toll.

10. Authority of Parties.

Each party to this Agreement warrants that it has the legal authority to sign this Agreement and be fully bound by its terms, subject to any administrative or regulatory approval, if required. This Agreement shall be binding upon and inure to the benefit of the parties and their successors and assigns.

11. Term of Agreement.

This Agreement shall be effective, as to each project, upon the Transaction Date specified in the respective Purchase Agreement and shall remain in full force and effect so long as that project remains in operation. The Agreement shall terminate, as to either project, if that Project becomes subject to the provisions of the Federal Power Act.

12. Severability.

If any section, paragraph, clause or provision of this Agreement or any agreement referred to in this Agreement shall be finally adjudicated by a court of competent jurisdiction or administrative agency to be invalid or unenforceable as to either project, the Agreement shall nonetheless remain in full force and effect as to the other project.

13. Cooperation With Studies.

The Parties agree that they will cooperate with one another in conducting studies pertaining to fish and wildlife other than those called for in this Agreement by:

a. Notifying and consulting with the other parties before beginning a new fish and wildlife study,

b. Providing each other with data on flows, fish populations, and other data already in their possession,

c. Having the option of funding fish and wildlife studies before the process called for in Sections 2 and 3 of this Agreement would otherwise require, whether such studies are conducted by the parties themselves, or by third parties.

IN WITNESS WHEREOF, the parties hereto have executed this agreement as of the day and year first above written.

Summary

We accept in part the stipulation by less than all parties of record filed in Dockets U-18-102, U-19-020, and U-19-021, subject to conditions. We reject parts of the stipulation. We approve the transaction under which Chugach Electric Association, Inc. (Chugach) proposes to acquire most assets and service obligations of the Municipality of

Regulatory Commission of Alaska

Anchorage (MOA) d/b/a Municipal Light & Power Department (ML&P)[1], as that transaction has been amended and subject to conditions. Subject to transaction closure, we grant in part the petition for regulatory approvals filed by Chugach in Docket U-19-020, subject to conditions. We deny the application to amend Certificate of Public Convenience and Necessity (Certificate) No. 8 filed by Chugach and we deny the application to amend Certificate No. 121 filed by ML&P. Subject to transaction closure and other conditions, we transfer Certificate No. 121 to Chugach.[2] We give notice of our intention to revoke Certificate No. 121 effective on the date that Chugach begins serving ratepayers in the Certificate No. 121 service area under the Certificate No. 8 tariff. Subject to transaction closure and other conditions, we grant a new certificate to MHP authorizing the provision of wholesale public electric utility service through part ownership of the Eklutna Hydroelectric Project (Eklutna Project) generation facility. Subject to transaction closure, we grant the petition to terminate the dividend restriction imposed on ML&P. We establish a pricing mechanism for Beluga River Unit (BRU) gas used by ML&P and Chugach to generate electric energy for economy energy sales and sales to ENSTAR Natural Gas Company, a Division of SEMCO Energy, Inc. (ENSTAR).

Introduction and Overview

The Railbelt electric grid (stretching from the Kenai Peninsula to Fairbanks) is comprised of six separate utilities. Three of them serve within the boundaries of the Municipality of Anchorage (Anchorage) — ML&P and Chugach each serve different parts

[1]We refer to the pre-transaction electric utility owned by the MOA as ML&P. The MOA has sold the ML&P name to Chugach as part of the transaction and the surviving utility has not yet been given a name. *See* Dockets U-19-020 and U-19-021 Hearing, Tr. 2525. Solely for the purposes of this order we refer to the post-transaction electric utility owned by the MOA as Municipal Hydro Power (MHP).

[2]As discussed in detail below, for the sake of clarity we refer in this order to the Certificate No. 121 service territory as the North District and the Certificate No. 8 service territory as the South District.

Regulatory Commission of Alaska

of Anchorage, and Matanuska Electric Association, Inc. (MEA), serves north Anchorage from Eagle River through Eklutna.

For decades residents of Anchorage have discussed combining ML&P and Chugach. Combining them could mean better economies of scale in employment, more efficient deployment of existing generation and transmission assets, more efficient inventory management, and better planning to efficiently meet the future electric utility requirements of Anchorage. Further, a combined utility would foster a better business environment because electric rates would be same regardless of where in Anchorage an enterprise was located.

In 2014, the Alaska Legislature directed us to determine whether creating an independent system operator or similar structure for the Railbelt electric grid would be the best option. In 2015 we submitted recommendations that focused on the need for greater collaboration and consistent operating standards among the Railbelt electric utilities. We have worked for more than five years to encourage increased coordination between utilities to reduce collective costs for ratepayers.

Chugach and ML&P have coordinated their efforts in recent years. In 2013, Chugach and ML&P built the Southcentral Power Project together, owning and operating that plant for more than 7 years now. In 2016 Chugach purchased a share in the BRU gas field and ML&P increased the share it already owned in the BRU. Chugach's and ML&P's shares in the BRU provide their ratepayers with low-cost gas. In 2017 Chugach, ML&P, and MEA entered into a power pooling agreement and made progress toward operating a power pool over the next year. However, in 2018 the progress stalled and the significant ratepayers benefits that pooling promises have not been achieved.

ML&P ratepayer frustrations erupted in 2017 after a series of significant utility rate increases, largely needed to pay for a new natural gas combined-cycle electric generation plant (Plant 2A). In addition, declining ratepayer demand made it difficult to

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

hold rates down as fixed costs had to be spread over fewer kilowatt hours (kWh). From 2013 to 2016 ML&P rates increased 24%, followed by a 37% increase in 2017.

In April 2017, the Anchorage Economic Development Corporation recommended on behalf of its working group that ML&P and Chugach explore merger opportunities. In June 2017, the Anchorage Assembly passed a resolution encouraging the MOA, ML&P and Chugach to begin looking at a merger. The MOA signed a contract with Goldman Sachs in July 2017 to provide a preliminary analysis of ML&P's strategic position and a range of potential values based on comparable public entities and precedents. The MOA received the private and confidential report in August 2017. The report became public in January 2018 through a public records request by the Anchorage Daily News. The analysis provided by Goldman Sachs valued ML&P between $707 million and approximately $1 billion.

In December 2017, Mayor Ethan Berkowitz proposed to sell ML&P to Chugach for approximately $1 billion. Under its charter the MOA cannot sell ML&P unless the sale is authorized by voters. In January 2018, the Anchorage Assembly passed an ordinance approving a ballot proposition to be submitted to voters at the April 2018 municipal election. Of those voting on the proposition, 65% voted yes. The proposition stated that the sale was for "a competitive value of approximately $1 billion" and specified disposition of the sale proceeds. They were to be used to retire debt of ML&P and the MOA or to replace ML&P's Municipal Utility Service Assessment (MUSA) with the replacement funds, like MUSA, to be subject to annual appropriation so that property and other taxes subject to the MOA's tax cap would not rise as a result of the sale. The remaining proceeds were to be deposited into the Municipal Trust Fund. The proposition also stated that Chugach would not lay off any employees of ML&P or Chugach and would assume ML&P's collective bargaining agreement. Finally, the proposition stated that base rates for Chugach and ML&P ratepayers would not increase as a result of the sale.

Following voter approval the details of the sale were negotiated. The resulting transaction documents were signed in December 2018. In April 2019, Chugach and ML&P submitted their requests for our approval of various aspects of their transaction along with supporting testimony purporting to show $278 million in savings over 40 years on a net present value basis.

The transaction as conceived by ML&P and Chugach was not straightforward. We could have quickly approved a simple transaction, money in exchange for assets priced at net book value. The benefits of having one utility for Anchorage instead of two are obvious.

In addition to amending the certificates of Chugach and ML&P to transfer ML&P's service area to Chugach, we are asked to assure Chugach that it can recover in rates the entire purchase price (including an upfront payment and two future payment streams), and recover all costs of the transaction. Chugach also seeks approval of regulatory assets allowing recovery over time of transaction costs. Chugach has entered into four separate agreements that, when taken together, effectuate the transaction:

1. An Asset Purchase and Sale Agreement (APSA) that requires a number of approvals from us before the close of the transaction, including approval of the three agreements listed immediately below.
2. An agreement to generate a future stream of revenue from some but not all Chugach ratepayers in uncertain amount to be paid to the MOA over 50 years (Payment In Lieu of Taxes (PILT) Agreement (PILT Agreement)).
3. An agreement to securitize an additional stream of future payments in certain amount from all Chugach ratepayers to be paid to the MOA through a purported power purchase agreement (Eklutna Power Purchase Agreement (Eklutna PPA)).
4. An agreement to reserve the benefits (presumed to be cost savings but uncertain in amount) of one of ML&P's assets being transferred in the sale to a subset of Chugach ratepayers (BRU Fuel Agreement)).

The transaction as presented to us was complicated at filing and became even more so when nearly seven months after the initial filing most of the parties in these

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

proceedings filed a stipulation that changed and added to the terms of the transaction originally filed. The stipulating parties opted to have us consider only the transaction as modified by the stipulation rather than the transaction as originally proposed. Chugach, ML&P and all other parties, except the Attorney General, Regulatory Affairs and Public Advocacy Section (AG), request that we approve their stipulation without modification. The stipulation:

- changes the purchase price;
- provides a subset of Chugach ratepayers immediate rate relief;
- imposes extensive and long-lived post-closing reporting requirements on Chugach;
- terminates a remand proceeding concerning return on equity and the prudence of ML&P's Plant 2A;
- makes provision for a new treatment center in Anchorage;
- maintains separate accounting of costs and benefits for gas produced from the BRU, allocating ML&P's current ownership share to North District ratepayers and allocating Chugach's current ownership share to South District ratepayers, for the economic life of the BRU;
- establishes a proxy price for BRU gas from the ML&P current ownership share that is burned to generate electric energy for consumption by South District ratepayers, with margins on such transfers to benefit North District ratepayers;
- gives ENSTAR a right of first refusal to purchase BRU gas;
- establishes a proxy price for BRU gas burned to make economy energy sales;
- mandates how costs associated with the Eklutna PPA will be recovered from ratepayers;
- based on achieved interest on transaction financing, conditionally changes Chugach's regulatory asset request from one regulatory asset to two; and
- requires conforming amendments to the transaction agreement.

The stipulated transaction, with its expanded list of approval requests, presented many challenges and issues that required extensive analysis which has

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

delayed our final decision. Also contributing to delay were the issues the parties needed to confront as a result of the remand of the Plant 2A prudence dockets. After additional proceedings related to the prudence dockets, we approved in a previous order the amended remand stipulation required by the parties' amended stipulation in these dockets and do not address those issues in this order.

As a further complication the AG, did not sign or support the stipulation that was signed or joined in by every other party in these dockets. When the AG, who represents the public interest in our proceedings, does not support a settlement as being in the public interest, we must carefully analyze its terms to satisfy ourselves that the settlement is in the public interest.

In this order we address two areas of primary concern. The first is the very large acquisition premium we are asked to approve as part of the transaction. The second is the differential rates Chugach intends to charge its two sets of post-closing ratepayers.

An acquisition premium is a payment for utility assets that exceeds the net book value of the assets. Chugach proposes to pay at closing tens of millions more for ML&P assets than its net book value, and seeks to recover this premium in rates from ratepayers. Two ancillary agreements—the PILT Agreement and the Eklutna PPA—further boost the premium above net book value to more than $290 million. Despite arguments and rationalizations to the contrary, careful analysis reveals that these agreements are best understood as mechanisms designed to increase ML&P's sales price without requiring Chugach to pay more up front at the time of closing. These mechanisms further increase the acquisition premium above conventional utility costs that ratepayers under the transaction would have to pay.

To approve recovery in future rates of an acquisition premium we must determine that the benefits of permitting such a premium outweigh the costs. Chugach provided a comparative analysis of individual and combined Chugach and ML&P revenue

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

requirements. This revenue requirement modeling included both base rate revenue requirements and cost of power adjustment elements. This comparative analysis was not included in the original filing but was filed at our direction. While this comparative analysis purported to show global savings from the transaction, it failed to demonstrate that ratepayers in the ML&P service territory would not pay a premium for the privilege of being acquired by Chugach. Nor did it show that Chugach ratepayers would not have their rates increase as a result of the transaction. We concur with the AG that these are tests that must be met.

Chugach and ML&P ask us to approve differential rate treatment associated with aspects of the transaction—differences that would persist for 17 years or more—based merely on a ratepayer's address. Under the PILT Agreement, payments to the MOA would be collected only from the ratepayers in the former ML&P service area through 2033 and thereafter, for the remainder of a 50-year period would be collected from most, but not all, Chugach ratepayers. Under the BRU Fuel Agreement, the benefits of most of Chugach's post-closing low-cost BRU gas would be perpetually (for the life of the BRU) enjoyed by ratepayers whose meters are located in the former ML&P service area. Chugach did not provide a clear and adequate record to justify these rate differences.

Review and analysis of the PILT Agreement and the Eklutna PPA raised another concern. The future premium compensation payments to the MOA, rather than additional up-front payments at closing, was made necessary because of Chugach's equity position. Additional up-front payments would erode Chugach's capital structure. As presented to us, Chugach will have only 13% equity after closing the transaction. A highly leveraged capital structure may increase future borrowing costs and impact Chugach's ability to finance expenditures until its equity position has recovered.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

This transaction contains a commitment by Chugach to not increase base rates as a result of the transaction. AS 42.05.431 is clear on one critical issue: "The financial covenants contained in mortgages and other debt instruments of cooperative utilities organized under AS 10.25 are also valid and enforceable, and rates set by the commission must be adequate to meet those covenants." We cannot unconditionally approve a transaction with terms that would leave Chugach in an overly-weakened financial position. This would expose Chugach ratepayers to unknown rate risks as a result of the transaction.

We have worked diligently to ensure that the obvious benefits of consolidation are maximized. Utility operations, regulatory filings, management of diverse and potentially conflicting interests in the BRU mandate simplification and streamlining. The current economic and financial environment nationally, in Alaska, and specifically in Anchorage, make our approval of this transaction subject to the following three conditions:

1) Unified cost of power adjustment (COPA) surcharges, and rejection of the BRU Fuel Agreement cost and benefit allocations as unreasonably discriminatory.

2) Unified base rates to be filed in Chugach's first rate case. The PILT Agreement's proposed recovery of payments only from ML&P ratepayers through 2033 must be rejected. Chugach's rate design should achieve the following objectives:

   (a) base rates should reasonably approximate load-ratio share between the Chugach and ML&P portions of the new Chugach service territory, and

   (b) rate shock for any ratepayer class should be minimized to the maximum extent practicable.

3) Chugach and MEA forming a tight pool to ensure that broader application of security-constrained merit order dispatch occurs.

We have sought to find a way to approve this transaction while leaving as much of the parties' bargain intact as possible. Accordingly, we provide regulatory assurance for cost recovery in rates of the acquisition costs, including the deferred

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

payments under the PILT Agreement and the Eklutna PPA. We also permit the stipulation's provision for returning $36 million to ML&P ratepayers and its provisions to create two separate regulatory assets to amortize and recover prudently incurred costs of the transaction.

We recognize that ML&P ratepayers have contributed significant capital to the BRU. Unlike the MOA, these ratepayers will not be compensated for this capital at the closing of this transaction. The 2018 year-end net book value of this ML&P ratepayer-contributed capital, which otherwise would have materially reduced rates in previous periods, totals $136 million. As a matter of equity, we order Chugach to amortize and return this sum, with interest, to ratepayers within the ML&P service territory over the next ten years through a negative surcharge. This approximately replicates the 'bargain' contained in the BRU Fuel Agreement, but results in simpler and more coherent ratemaking and operations. Additionally, Chugach's incentives will be clarified in its management of the BRU; greater clarity and simplicity in the COPA will result; different ratepayers in the same rate class will be treated similarly; and regulatory costs will be reduced.

The sale of ML&P, like that of any other jurisdictional utility, must comply with our statutes and regulations and our policies and precedents, which have been established to protect the public interest. Based on the record developed by the parties at hearing, the extensive disclosures filed by Chugach and ML&P at our request, and our independent analysis of data in the record, we have determined that the transaction as stipulated by the parties fails to be fully consistent with the public interest. As a result, we do not approve the sale as proposed, but do approve the sale if the parties agree to modify the transaction as required by this order. Because we do not accept their stipulation in its entirety, the parties must now decide whether to accept our modifications

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

and proceed to unite public electric utility service for the majority of ratepayers in the MOA.

Background

ML&P is authorized to provide retail public electric public utility service to that portion of Anchorage[3] generally bounded by Tudor Road to the south, the southern boundary of Joint Base Elmendorf Richardson (JBER) to the north, Boniface Parkway to the east, and on the west by Arctic Boulevard from Tudor Road to Northern Lights Boulevard, by Forest Park Drive from Northern Lights Boulevard to the Knik Arm, and by the Knik Arm. ML&P is also authorized to provide retail public electric utility service in portions of two sections of land adjacent to its George M. Sullivan Plant 2 near to the Glenn Highway, and to 17 individual locations on JBER.[4] By contract, ML&P currently provides wholesale public electric utility service to JBER.[5]

Chugach provides retail public electric utility service under Certificate No. 8 to those portions of the Anchorage south, east, and west of the ML&P service area, and that are also south and west of the JBER boundaries. Chugach also provides retail public electric utility service to Whittier, portions of the Kenai Peninsula Borough, including the communities of Hope, Moose Pass, Cooper Landing, Tyonek, and Beluga, and a small portion of the Matanuska-Susitna Borough near the community of Beluga.[6]

[3]In this order, we sometimes refer to the geographic area named the Municipality of Anchorage and sometimes to the local government entity named the Municipality of Anchorage. For the sake of clarity, in this order we will refer to the geographic area as Anchorage and to the local government entity as the MOA.

Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

MEA provides retail public electric utility service under Certificate No. 18 to those portions of Anchorage that are north and east of the JBER boundary. MEA also provides retail public electric utility service to the northern portion of JBER and in those parts of the Matanuska-Susitna Borough accessible by road.[7]

In 1951 through 1955, the federal government built the Eklutna Project to provide wholesale electric utility service to ML&P, Chugach, and MEA. The Eklutna Project generation infrastructure includes a tap into Eklutna Lake within Anchorage, a tunnel to carry water from the tap to a power house and tailrace in the Matanuska-Susitna Borough. The Eklutna Project also includes transmission infrastructure connecting the Eklutna Project to MEA substations in Anchorage and the Matanuska-Susitna Borough, to ML&P at substations in Anchorage, and to Chugach substations in Anchorage.

In 1995, the federal government agreed to sell the Eklutna Project to ML&P, Chugach, and MEA.[8] This sale was governed by the terms of the Eklutna Purchase Agreement, a copy of which was filed with us by ML&P as Hearing Exhibit H-132 in Dockets U-16-094 and U-17-008.[9] ML&P, Chugach, and MEA jointly manage the Eklutna Project under the terms of the 1996 Eklutna Project transition plan, as amended. A copy of this transition plan was filed with us by ML&P as Hearing Exhibits H-130 and H-131 in Dockets U-16-094 and U-17-008.[10] Under these agreements, ML&P acquired an

[8]Dockets U-19-020 and U-19-021 Hearing, Exhibit H-77 (Public Law No. 104-58, adopted November 28, 1995).

[9]Dockets U-16-094 and U-17-008 Hearing Tr. 2239-2240. We take official notice of these Eklutna Project documents filed by ML&P in Dockets U-16-094 and U-17-008 under 3 AAC 48.154(b)(4). The Eklutna Transition Plan (Plan) filed in Dockets U-16-094 and U-17-008 does not include the exhibits to that Plan. Those exhibits were filed by ML&P as a supplement to TA329-121 on July 17, 2013, in response to our questions, and we also take official notice of these exhibits under 3 AAC 48.154(b)(4).

[10]Dockets U-16-094 and U-17-008 Hearing, Tr. 2239-2240.

undivided 53.33% ownership interest in the Eklutna Project capacity, energy, and assets, with Chugach acquiring a 33% undivided ownership interest and MEA acquiring a 16.67% undivided ownership interest.[11]

In 1996, ML&P requested approval of its acquisition of a one-third ownership interest in the BRU, a large natural gas and oil production unit on the west side of Cook Inlet. The Alaska Public Utilities Commission (APUC) granted that request subject to three enforceable conditions, one of which was that ML&P ratepayers will be the ultimate beneficiaries of the savings or proceeds resulting from ML&P's purchase of this BRU ownership interest.[12] We approved ML&P's and Chugach's request to jointly acquire another one-third interest in the BRU. With this second acquisition, ML&P owns 56.67% of the BRU leases down to 7,000 feet and 80% of the BRU leases below 7,000 feet. Chugach owns 10% of the BRU leases down to 7,000 feet and 20% of the BRU leases below 7,000 feet. Hilcorp Alaska, LLC (Hilcorp) owns the remaining 33% interest in the BRU leases down to 7,000 feet and serves as the BRU field operator.[13]

We opened Docket U-18-102 to investigate concerns about ML&P's BRU management practices. We required ML&P to file answers to certain questions supported

Chugach filed a petition for approval of its acquisition of most assets of ML&P, to amend Certificate No. 8 to include ML&P's Certificate No. 121 service territory, and for other related approvals (Chugach Petition).[22] In support of the Chugach Petition, Chugach submitted prefiled testimony by Brian Hickey, Dustin Highers, Sherri Highers, Thomas A. Lovas, Todd McCarty, Arthur W. Miller, Kurt Strunk, and Lee D. Thibert.[23] Attached to Miller's testimony were four agreements that document the terms of this transaction: the APSA;[24] the Eklutna PPA;[25] the BRU Fuel Agreement;[26] and the PILT Agreement.[27]

Under the terms of this transaction, Chugach would acquire most ML&P assets other than the Eklutna Project generation facilities and responsibility for providing public electric utility service to the ML&P retail ratepayers. The net book value of the

ML&P assets Chugach would acquire is approximately $715.4 million. In exchange, Chugach would pay the MOA an initial payment of $767.8 million. Under the Eklutna PPA, Chugach would purchase ML&P's share of Eklutna Project output for 35-years with payments estimated to have a net present value of $75 million, plus pay ML&P's share of Eklutna Project costs. Under the PILT Agreement, Chugach would make annual payments to the MOA for 50-years with an estimated net present value of $166.8 million. From transaction close through December 31, 2033, PILT payment obligations would be recovered from North District ratepayers only. Beginning January 1, 2034, PILT payment obligations would be recovered from all Chugach ratepayers located in Anchorage. Under the BRU Fuel Agreement, Chugach would acquire ML&P's 56.67% ownership interest in the BRU. Chugach would be required to allocate all costs and benefits from the former ML&P interest in the BRU to the North District through December 31, 2033, after which that interest in the BRU would become a Chugach system asset.[28]

With its petition, Chugach requested assurance that it could recover the $1,009.6 million in compensation paid to the MOA and an estimated $41.7 million in transaction consummation costs through rates.[29] Chugach also requested permission to create a regulatory asset consisting of approximately $117.5 million of these transaction costs and defer amortization of these costs for the initial 3 years following transaction closing.[30] Chugach asked that we amend its Certificate No. 8 to incorporate the ML&P Certificate No. 121 service area, or North District, and authorize it to adopt the ML&P tariff governing the provision of service in the North District during a transition period.[31]

We issued public notice of the Chugach Petition, with comments due by May 13, 2019. We received 25 comments in favor of, regarding, or against Chugach's proposed acquisition of most ML&P assets.[32] We opened Docket U-19-020 to investigate the Chugach Petition.[33]

In conformance with the agreements filed in Docket U-19-020, ML&P filed an application to amend Certificate No. 121 to eliminate the retail service area and add the Eklutna Project generation facilities to its service area (ML&P Application). ML&P

2019.[58] Chugach filed amendments to the PILT Agreement and the Eklutna PPA.[59] Chugach subsequently filed amendments to the APSA.[60]

We required ML&P to file testimony by Jeff Warner, and ML&P complied.[61] Chugach and MEA jointly filed an agreement under which title to certain transmission assets would be exchanged and operational practices implemented, and under which MEA would not object to Chugach's acquisition of most ML&P assets.[62] At the continued public hearing in Dockets U-19-020 and U-19-021 the parties asked for a one-day continuance to discuss possible settlement of the issues in dispute, which we granted.[63] On October 1, 2019, the parties announced that most of them had reached a tentative settlement agreement of disputed issues in these dockets and disputed issues in the Superior Court remand of Dockets U-16-094 and U-17-008. They requested a continued stay of the public hearing to allow them an opportunity to put their tentative agreement into written form and get approval from their various governing bodies. The parties

consented to an extension of the statutory timeline for issuance of a final order in these dockets.[64]

We scheduled the continued public hearing for Dockets U-19-020 and U-19-021 to begin again on October 29, 2019.[65] On October 28, 2019, ML&P, Chugach, Providence, FEA, MEA, AEA, and ENSTAR filed a stipulation resolving all issues in these dockets between these parties (Original Stipulation).[66] As part of the Original Stipulation, the stipulating parties included amendments to the APSA and the Eklutna PPA, plus a completely revised BRU Agreement (Restated BRU Agreement).[67] In support of the Original Stipulation, ML&P filed supplemental testimony by Reed and Chugach filed

[64]Dockets U-19-020 and U-19-021 Hearing, Tr. 2751-2775; Order U-16-094(14)/U-17-008(18)/U-18-102(30)/U-19-020(24)/U-19-021(24), *Order Recessing Hearing, Extending Statutory Timeline with the Consent of All Parties of Record, and Staying Filing Obligations*, dated October 3, 2019.

[65]Order U-19-020(26)/U-19-021(26), *Order Scheduling Continued Public Hearing*, dated October 11, 2019, as amended by Order U-18-102(32)/U-19-020(27)/U-19-021(27), *Order Requiring Filings and Modifying Procedural Schedule*, dated October 15, 2019.

[66]*Stipulation Resolving All Issues*, filed October 28, 2019, as corrected by *Notice of Filing Corrected Stipulation Exhibit 4*, filed November 5, 2019. The Original Stipulation was marked as Exhibit H-115. Dockets U-19-020 and U-19-021 Hearing, Tr. 2839. A copy of the Original Stipulation and subsequent amendment are attached to this order as Appendix B.

supplemental testimony by Sherri Highers.[68] Chugach subsequently filed further amendments to the APSA, Eklutna PPA, and PILT Agreement.[69]

HEA filed notice that it did not oppose our acceptance of the Original Stipulation and later joined in the Original Stipulation.[70] We required ML&P and Chugach to file documents related to the supplemental testimony of Reed.[71] ML&P and Chugach complied.[72] ML&P and Chugach filed additional documents in support of the Original Stipulation.[73]

On October 29, 2019, Chugach presented a summary of the Original Stipulation on behalf of the parties.[74] All parties of record concurred that the transaction originally proposed in Dockets U-19-020 and U-19-021 had been permanently modified by the Original Stipulation, and that they were willing to proceed at hearing only on the

transaction as modified by the Original Stipulation.[75] We proceeded with taking evidence on the Original Stipulation at the continued public hearing from October 31 through November 8, 2019. During this continuation of the public hearing, we received testimony from Reed, Garrett, Windt Pearson, Henderson, Thibert, Hickey, Sherri Highers, Miller, Strunk, Lovas, Izzo, and Warner. We also received closing arguments from the parties.[76]

The AG is the only party of record that did not join the Original Stipulation and explained why in its closing argument. The AG asserted that stipulations cannot be accepted unless they are in the public interest and consistent with controlling law. The AG questioned whether allowing Chugach's equity to drop down to 13.5% was in the public interest. The AG also questioned whether Chugach had shown tangible benefits directly flowing from the transaction equal to or greater than the requested acquisition premium, and further argued that the PILT payments must be included as part of the acquisition premium. The AG argued that the labor force attrition savings presented by Chugach were speculative rather than tangible. The AG expressed concern that the cost and benefit allocations in the PILT Agreement and BRU Fuel Agreement are unreasonably discriminatory in violation of AS 42.05.391. The AG expressed concern that the proposed restricted rate reduction (RRR) account established by the Original Stipulation violated AS 42.05.391(c), and its return through the COPA mechanism violated our regulations. The AG concluded that our decisions in these proceedings cannot bind future Commissions.[77]

On January 15, 2020, ML&P, Chugach, Providence, FEA, MEA, AEA, HEA, and ENSTAR filed an amendment to the Original Stipulation.[78] Through that amendment the parties replaced a draft stipulation (Remand Stipulation)[79] that was to have been signed by Providence and ML&P and filed in Dockets U-16-094 and U-17-008 (the dockets in which we decided ML&P's most recent rate case). In the Remand Stipulation Providence and ML&P agreed to terminate those rate case dockets without further action. Pending at the time in those dockets were two rate case issues—the prudence of Plant 2A and the appropriate return on equity—that the Alaska Superior Court had remanded to us as a result of Providence's appeal of our rate case decision. The AG opposed the way the other parties proposed to resolve the remanded issues. The replacement stipulation (Amended Remand Stipulation)[80] signed by ML&P, Providence, FEA, and the AG, resolved the remanded issues by agreeing to the permanent rates we had set in the rate case. We accepted the Amended Remand Stipulation, reaffirmed ML&P's current rates as permanent, and closed the dockets.[81]

ML&P and MEA jointly filed an informational copy of a proposed power purchase agreement under which MEA would purchase a portion of ML&P's share of the Eklutna Project capacity and energy (MEA PPA).[82] We extended the statutory timeline for issuance of a final order in Dockets U-18-102, U-19-020, and U-19-021, and our time

to review the pending stipulation, either at the request of the parties or on our own motion, to May 28, 2020.[83]

Copies of the Original Stipulation and First Amendment to Stipulation (Appendix B), APSA as amended (Appendix C), Eklutna PPA as amended (Appendix D), PILT Agreement as amended (Appendix F), and BRU Fuel Agreement as restated (Appendix E), are attached as appendices to this order.

Discussion

ML&P and Chugach make frequent references to the ML&P legacy territory, the Chugach legacy territory, Chugach legacy service area, ML&P legacy customers, and Chugach legacy customers.[84] With respect to ML&P, references to the term "legacy" refer to the pre-transaction Certificate No. 121 service area and the ratepayers located within that service area. With respect to Chugach, references to the term "legacy" refer to the pre-transaction Certificate No. 8 service area and the ratepayers located with that service area.[85] The terms of the transaction at issue in Dockets U-19-020 and U-19-021 will affect ratepayers long after ML&P has ceased providing public electric utility service, including ratepayers who locate into the pre-transaction Certificate No. 121 service area

[83]Order U-18-102(1) at 12 (initial timeline expired November 5, 2019); Order U-18-102(5), *Order Granting, In Part, Petition for Confidential Treatment; Requiring Filing; Adopting Procedural Schedule; and Extending Statutory Timeline with Consent of the Parties*, dated February 6, 2019, at 6 (extending timeline to November 19, 2019); Order U-16-094(14)/U-17-008(18)/U-18-102(30)/U-19-020(24)/U-19-021(24), *Order Recessing Hearing, Extending Statutory Timeline with the Consent of All Parties of Record, and Staying Filing Obligations*, dated October 3, 2019, at 7 (extending timeline to February 17, 2020); Order U-18-102(40)/U-19-020(35)/U-19-021(35), *Order Extending Statutory Timeline with the Consent of All Parties and Extending Time to Consider Stipulation*, dated January 24, 2020, at 3 (extending timeline to February 28, 2020); Order U-18-102(43)/U-19-020(38)/U-19-021(38), *Order Extending Statutory Timeline for Good Cause and Extending Time to Consider Stipulation*, dated February 27, 2020, at 8 (extending timeline to May 28, 2020).

after the transaction closes. Referring to such ratepayers as ML&P legacy customers is both inaccurate and confusing. To avoid this problem, in this order we avoid the use of "legacy" and instead follow the alternate Chugach designation protocol of referring to the pre-transaction Certificate No. 121 service area as the North District and the pre-transaction Certificate No. 8 service area as the South District.[86]

These consolidated proceedings concern two separate topics: (1) the sale to Chugach of ML&P assets, including ML&P's interest in the BRU, a natural gas producing field on the west side of Cook Inlet (the subject of Dockets U-19-020 and U-19-021) and (2) ML&P's management practices as majority owner of the BRU (the subject of Docket U-18-102). The management practices proceeding was ongoing when Chugach and ML&P requested approval of their proposed transaction and we consolidated it with the ML&P sale dockets.

The primary focus of this order is the sale of ML&P assets to Chugach. We do not discuss the issues in Docket U-18-102 in any detail. We accept the parties' resolution of the docket as discussed later in this order. While we resolve Docket U-18-102 in this final order by accepting the portions of the parties' stipulation in these consolidated dockets that address the issue the parties seemed most concerned about in Docket U-18-102—sales of economy energy generated using BRU gas—we continue to have other concerns about future management of the BRU. Those concerns are best addressed after it has been determined whether the ML&P sale will occur. One concern is asset retirement obligations (AROs). The parties did not address AROs in the stipulation that is their final resolution of Docket U-18-102 and we find that the record in these consolidated dockets is not sufficiently complete for us to resolve ARO issues now. Further, we note that we are already considering BRU AROs for both ML&P and Chugach

[86]Chugach Petition, Exhibit Form 101-II.C at 1-2. Dockets U-19-020 and U-19-021 Hearing, Tr. 3536-3537.

(907) 276-6222; TTY (907) 276-4533

in consolidated Dockets U-19-085 and U-19-091 which concern ML&P's and Chugach's gas transfer prices.

One Rate for Anchorage

We expected, when the sale of ML&P assets to Chugach was proposed, that, after a necessary but short transition period, rates for each rate class (residential, commercial, etc.) would be the same for all ratepayers of the newly expanded Chugach. Utilities generally design their rates so that all similarly situated ratepayers within a contiguous service area pay the same rates. Adhering to general practice, Chugach now charges the same rates to all residential ratepayers whether they live in, for example, the Anchorage Bowl or Hope, even though the cost to serve those two areas is likely quite different. This principle of utility ratemaking is so firmly embedded and universally followed, especially by cooperatives (neighbors helping neighbors), that regulators rarely need to articulate it.

What surprised us most about the transaction as proposed was Chugach's failure to even acknowledge this one-rate principle, much less justify deviation from it. Chugach apparently intends, unapologetically, to maintain two sets of base rates and two COPAs—one for its own current ratepayers and another for the ratepayers transferred from ML&P, until 2034 for base rates and until some indefinite future date beyond that for COPA rates—even though Chugach's cost to serve ratepayers living across from one another on Tudor Road (one Chugach/ML&P boundary) will be the same once operations of the two utilities are merged. And those costs will certainly more closely resemble each other than they will the cost of serving a ratepayer living in Hope. Yet, under Chugach's plan a ratepayer living on Tudor Road (the south side) will have the same rates as a Hope ratepayer, but different rates from a neighbor across the street (on the north side of Tudor Road). While that is the case today, the different rates on the north side and south side

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

of Tudor Road are legitimately derived from differences in ML&P's and Chugach's costs to serve those ratepayers.

One of the main goals of Anchorage electric utility consolidation should have been to eliminate Anchorage's electric rate bifurcation. Instead, Chugach and ML&P agreed to perpetuate it. Other parties then exacerbated rather than ameliorated the rate bifurcation with their changes to the transaction. Perpetuating bifurcation unduly complicates and obfuscates both Chugach's formulation of rates and the regulatory review of those rates by future commissions, the AG, and future parties. The stipulated transaction addresses only a few of the myriad choices in allocating costs and benefits that Chugach faces when setting rates. After all those choices are made, some constrained and others unconstrained, we are required by statute to determine whether the resulting rates grant an unreasonable preference or advantage to any ratepayer or subject any ratepayer to an unreasonable prejudice or disadvantage.

The job of establishing appropriate rates for all rate classes of a utility recently melded from two utilities, each having its own somewhat different rate classes, is challenging and complex in the best circumstances. Imposing artificial constraints on that process, here based on novel and unsupported ratemaking concepts, assures future controversy over fairness. The stipulating parties urge us to approve the transaction and leave rate issues for another day. After all, they suggest, we and future commissions are not bound by their bargained-for ratemaking mandates. We disagree. We must consider rate effects now before we decide whether to approve the transaction. Withholding that assessment would be a disservice to the public and to the parties.

As discussed elsewhere in this order, we decline to accept the ratemaking mandates of the stipulated transaction. Approving agreements that commit Chugach to maintaining two sets of rates for decades to come, based on history soon forgotten, is not

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

in the public interest. We direct Chugach, in its first rate case after the transaction closes, to propose only one set of rates for all its ratepayers, regardless of location.

Accept Stipulation in Part Subject to Conditions, and Reject in Part

Original Stipulation

The Original Stipulation is a complex agreement with many moving parts. The following is a summary list of the changes to the transaction under which Chugach proposed to acquire most ML&P assets:

- Reduces the initial cash payment from Chugach to the MOA by $10 million.
- Further reduces the initial cash payment from Chugach to the MOA by the amount the net book value of acquired ML&P plant at the time of transaction closing is below $715.4 million.
- At closing, the MOA will transfer $36 million in cash to Chugach to fund the RRR account. Chugach will manage the RRR account in an interest bearing account. Beginning with Chugach's first COPA filing after closing, Chugach will use the RRR as a COPA credit to North District ratepayer bills. The amount of this credit will be prorated so that the entire RRR account balance plus interest has been distributed to North District ratepayers within 36 months of closing.
- Commits Chugach to filing annual reports from 2021 through 2028: (1) comparing achieved savings with projected savings in the cost savings model identified by Bates No. CHU-000001; (2) identifying actual reductions in employee positions compared to the position reductions identified in the model identified by Bates No. CHU-000692; (3) a narrative description of Chugach's integration of the two systems, specifically identifying areas where savings have been significantly more or less than originally projected; (4) information showing Chugach's compliance with its obligation to amortize the Secondary Regulatory Asset over three years; and (5) information showing Chugach's compliance with its obligation to recover Eklutna PPA payments through base rates charged to all Chugach ratepayers.
- Commits Chugach to filing quarterly reports with its COPA filings showing: (1) for the life of the RRR account compliance with its obligations to prudently manage the RRR account and distribute the funds in that account through its COPA to North District ratepayers; and (2) for the economic life of the BRU field compliance with the BRU cost and benefit allocations specified in the Original Stipulation.
- Termination of proceedings on remand from the Superior Court in Dockets U-16-094 and U-17-008 with no further action.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

- Requiring the MOA to provide $15 million in funding within 5 years of the date of closing for planning, permitting, design, construction, and related demolition costs for a substance use disorder treatment center.
- Requires Chugach to separately account for the costs and benefits of the 56.67% share of BRU acquired from ML&P, and the 10% share of BRU that Chugach acquired pre-transaction, for the economic life of the BRU.
- Requires Chugach to allocate BRU costs and benefits attributable to the BRU share acquired from ML&P to North District ratepayers and allocate BRU costs and benefits attributable to the BRU share Chugach acquired pre-transaction to South District ratepayers for the economic life of the BRU.
- Requires Chugach to (1) estimate the proxy market value of BRU gas before using such gas for economy energy sales, and (2) report all such estimates with each quarterly COPA filing.
- Prohibits Chugach from using any volume of BRU gas for economy energy sales unless the price of the economy energy sale is based in part upon the proxy market value of the gas and (1) Chugach has offered that gas to ENSTAR, and (2) ENSTAR has not offered to buy the gas at a price greater than the proxy market value of gas. If ENSTAR offers to buy the gas at a price greater than the proxy market value of gas, Chugach is required to sell the gas to ENSTAR rather than use it for economy energy sales.
- Requires Chugach to determine if any BRU gas used for economy energy sales or sales to ENSTAR comes from the BRU share acquired from ML&P or the BRU share Chugach acquired pre-transaction, and allocate the revenue from such sales to the North District or South District, respectively.
- If Chugach uses BRU gas where the benefits and costs of which are allocated to one District, the Supplying District, to serve load in the other District, the Served District, Chugach is required to charge the Served District the proxy market value for that gas and credit that revenue to the Supplying District. These inter-District sales are to be recognized on a monthly basis.
- Requires Chugach to request our approval of the disposition of revenue from inter-District sales and notify the parties to the Original Stipulation of all inter-District sales with each COPA filing.
- Unless we impose a different proxy market value for BRU gas, the proxy market value shall be the greater of (a) Chugach's highest priced contracted gas, or (b) 90% of the most recently published Cook Inlet Prevailing Value of Gas determined by the Alaska Department of Revenue.
- Requires Chugach to notify the parties to the Original Stipulation before seeking our approval for an alternative method of determining the proxy market value of BRU gas.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

- Requires Chugach to recover Eklutna PPA payments through the base rates of all Chugach ratepayers.
- Requires Chugach to expense up to $7.6 million of Eklutna PPA payments during the first three years following transaction closing, if Chugach finances the transaction at a weighted average interest rate of 5% or less.
- Requires Chugach to create a $19 million Secondary Regulatory Asset if it finances the transaction at a weighted average interest rate of 4% or lower, and amortize that regulatory asset during the first three years following transaction closing. The amount of the Secondary Regulatory Asset will be prorated down if Chugach finances the transaction at a weighted average interest rate above 4% and less than 5%.
- Allows Chugach to request approval of a Primary Regulatory Asset of approximately $101 million, to be amortized over a period of time up to 30 years beginning after Chugach files its first post-transaction general rate case.
- Allows Chugach to propose an amortization period for the Primary Regulatory Asset consistent with the objective of not increasing base rates as a result of the transaction.
- Allows the parties to the Original Stipulation to seek enforcement of the terms of the Original Stipulation, other than the terms related to the substance use disorder treatment center, by us.[87]

The stipulating parties also ask us to approve all requests for transaction approvals filed by Chugach and ML&P in Dockets U-19-020 and U-19-021, as those requests have been modified through October 28, 2019, the date the Original Stipulation was filed.[88] Each party to the Original Stipulation waives its right to appeal our decision if we accept that stipulation in its entirety and without material changes.[89] The stipulating parties expressly state:

> The validity and enforceability of the agreements contained in this [Original] Stipulation are conditioned on the Commission's acceptance of this [Original] Stipulation in its entirety and without material changes. Section III.D of this [Original] Stipulation requires Providence and ML&P to file a stipulation in the remand proceeding in Dockets U-16-094/U-17-008 providing for termination of that proceeding. If the Commission, in its orders

[87]Original Stipulation at 6-15.

[89]Original Stipulation at 18-19.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

> on this [Original] Stipulation and the Remand Stipulation, does not accept each Stipulation in its entirety or imposes material changes to either, any Settling Party may withdraw from this [Original] Stipulation by notice to the Settling Parties and Commission within 30 days of issuance of such order.[90]

Under this term, it appears that each of the settling parties will individually determine if any conditions we impose on acceptance of the Original Stipulation, as amended, are sufficiently material to justify termination of the entire transaction. We repeat our earlier caution, which was acknowledged by the parties,[91] that there is no time under AS 42.05.175 to reopen the evidentiary hearing in this proceeding in the event of a settling party withdrawal as is contemplated by Section IV.C of the Original Stipulation.[92]

The Original Stipulation was amended only once, two and a half months after filing.[93] That amendment related to the resolution of the remanded issues (prudence of Plant 2A and return on equity) in ML&P's most recent rate case. The Plant 2A issue had to be resolved before we could decide whether to approve the sale of ML&P's assets to Chugach. The size of the acquisition premium (the difference between net book value and purchase price) depended on whether all, part, or none of Plant 2A was included in net book value. Based on the Amended Remand Stipulation (filed as part of the amendment to the Original Stipulation), we resolved the Plant 2A prudence issue, resulting in the full value of Plant 2A being part of ML&P's net book value. Beyond that determination, which we made three months ago in an order in the rate case dockets,[94]

[90]Original Stipulation at 18.

[91]Dockets U-19-020 and U-19-021 Hearing, Tr. 2828–2840.

[92]Original Stipulation at 19. Dockets U-19-020 and U-19-021 Hearing, Tr. 2828-2840.

[93]First Amendment to Stipulation.

[94]Order U-16-094(23).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

the amendment to the Original Stipulation does not affect the issues addressed in this order and we do not further discuss it.

Legal Standards

Parties may stipulate to the disposition of a proceeding or to the disposition of any outstanding issues in a proceeding.[95] If all parties of record join in a stipulation, we can terminate the proceeding if we do not find that the public interest requires the proceeding to continue.[96] If a settlement stipulation is not joined by all parties of record, we consider whether our acceptance of the stipulation may materially prejudice the rights of non-settling parties.[97] If we accept a stipulation, the parties to the stipulation are bound by its terms.[98]

The AG is a party to these proceedings that did not join in the filed Original Stipulation.[99] Therefore, we cannot terminate these dockets pursuant to 3 AAC 48.090(d)(2). Pursuant to AS 42.05.191, we provided an opportunity for hearing on the Original Stipulation.[100]

As will be discussed in greater detail below, we find that the transaction under which Chugach proposes to acquire most of the assets of ML&P, as amended by the Original Stipulation, requires Chugach to pay the MOA more than the net book value of ML&P plant. This payment in excess of net book value is referred to as an acquisition premium. Closure of this transaction is contingent in part on our guaranteeing that

Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

Chugach has the opportunity to recover the full acquisition premium through rates. This proposal is therefore in clear violation of the requirements of AS 42.05.441(b), which states:

> In determining the value for rate-making purposes of public utility property used and useful in rendering service to the public, the commission shall be guided by acquisition cost or, if lower, the original cost of the property to the person first devoting it to public service, less accrued depreciation, plus materials and supplies, and a reasonable allowance for cash working capital when required.

However, we may exempt the Chugach acquisition of most ML&P assets from the requirements of AS 42.05.441(b), under AS 42.05.711(d), which states:

> The commission may exempt a utility, class of utilities, or a utility service from all or a portion of the requirements of [AS 42.05] if the commission finds that the exemption is in the public interest.

Reading AS 42.05.441(b) and AS 42.05.711(d) together, we are required to reject Chugach's request to recover the ML&P asset acquisition premium through rates unless we can affirmatively find that allowing such recovery is in the public interest. Chugach and the AG agree that under this test, the tangible benefits to ratepayers directly flowing from allowing recovery of the acquisition must be equal to or greater than the amount of the acquisition premium.[101]

Overview of Transaction and Stipulation Problem Areas

This transaction was presented to the public as a merging of ML&P with Chugach to reduce duplicative costs of service,[102] and was understood by the public to

[101]Dockets U-19-020 and U-19-021 Hearing, Tr. 3658-3659 (Chugach Closing), 3678-3680 (AG Closing). *RAPA Closing Argument U-19-020/U-19-021 Chugach Acquisition of ML&P* (power point presentation at public hearing on November 8, 2020) at 5-6.

701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

result in the merging of these two utilities.[103] Chugach has estimated a net present value of $11.5 million from the elimination of duplication in regulatory activities by this merger.[104] As proposed, PILT payments will be recovered through rates from North District ratepayers through December 31, 2033, and from all Chugach ratepayers located in Anchorage from January 1, 2034 until expiration of the 50-year term of the PILT Agreement.[105] As proposed in the Restated BRU Agreement, there will be separate gas costs for North District and South District ratepayers for the economic life of the BRU.[106]

The PILT Agreement and Restated BRU Agreement cost and benefit allocations, will prevent Chugach from having fully unified system base rates and COPA surcharges for many years. This will probably eliminate the proposed regulatory savings[107] and possibly increase regulatory costs. The Restated BRU Agreement cost and benefit allocations will also prevent Chugach from managing its majority ownership interest in the BRU under a unified management doctrine, as the interests of North District ratepayers in BRU outcomes will differ from those of South District ratepayers.

As will be discussed in greater detail below, we find the PILT Agreement and Restated BRU Agreement cost and benefit allocations unreasonably discriminatory under AS 42.05.391. However, these cost and benefit allocations are also problematic on a public interest basis. We have determined that the public interest will best be served if Chugach achieves, to the extent possible, unified rates no later than upon approval of its first post-transaction rate case. Our discussion below is substantially guided by this determination.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

One basic premise of the transaction is that base rates for ML&P and Chugach ratepayers will not increase as a direct result of Chugach's acquisition of most ML&P assets. For the reasons discussed below we cannot, and do not, accept that premise as limiting our rate setting authority or obligations under law. We notify the parties and the public that if this transaction closes, base rates for public electric utility service provided by Chugach may have to increase to avoid rate discrimination and insure the continued financial health of Chugach. Therefore, in choosing to close this transaction, the parties are specifically waiving any claims against Chugach related to rate increases that we approve.

For reasons discussed in detail below, we cannot grant some of the approvals requested in the Original Stipulation as currently presented. However, with the conditions required below we find that the transaction will yield tangible benefits to ratepayers and thus the Original Stipulation, as amended, should be accepted in part subject to conditions. In developing the modifications and conditions set out below, we have tried to balance the desires of the various parties with our obligations under AS 42.05. Parts of the Original Stipulation cannot be accepted under AS 42.05, and we reject those parts.

For example, under the record before us we cannot find that MHP will remain managerially and technically fit to own a share of the Eklutna Project after ML&P employees are transferred to Chugach. This lack of fitness means that we cannot unconditionally grant MHP certificate authority to continue ownership of the Eklutna Project as requested in Docket U-19-021. This lack of fitness also means that we cannot unconditionally approve the Eklutna PPA as requested in Docket U-19-020. Given the lack of time to consider options, we impose conditions that address this issue rather than seek input from the parties.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

Another issue with the Eklutna PPA is that it we do not find it to be a power purchase agreement. The Eklutna PPA might be considered a lease, or merely a secured acquisition payment mechanism, but it is not entitled to the protections offered wholesale power purchase agreements under AS 42.05.431(b). We condition our approval of the Eklutna PPA to reflect this, without changing the payments due to the MOA under this agreement.

The PILT agreement is merely a deferred acquisition payment mechanism, and is not materially similar to the MUSA currently paid by ML&P ratepayers. The proposed PILT Agreement is not a payment in lieu of any tax obligation of Chugach, and tax remedies authorized by Section 2.12 of the PILT Agreement are inappropriate under these circumstances. Further, the allocation of responsibility for these deferred payments specified in Section 2.02 of the PILT Agreement discriminates between ratepayers in violation of AS 42.05.391(a). We condition our approval of the PILT Agreement to address these issues.

The proposed Restated BRU Agreement would allocate the costs and benefits of ML&P's existing 56.67% interest in natural gas produced from the BRU to ratepayers located in the North District, and allocate the costs and benefits of Chugach's existing 10% interest in natural gas produced from the BRU to ratepayers located in the South District, for the remainder of natural gas production from the BRU. We understand that this allocation was negotiated to ensure that North District ratepayers receive the benefit of past ratepayer contributions invested by ML&P in the BRU.

Under the gas transfer price (GTP) pricing mechanisms currently in effect, current BRU production estimates, and current contract prices for natural gas marketed in the Anchorage area, the Restated BRU Agreement gives ratepayers in the North District a significant cost of gas advantage over ratepayers located in the South District. That advantage could substantially outweigh the North District ratepayer contributions

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

invested by ML&P in the BRU. For the reasons set out below, we are modifying the GTP pricing mechanism for the ML&P and Chugach shares of BRU natural gas production.

The Restated BRU Agreement requires Chugach to manage the BRU field under two separate economic models, and ultimately could result in Chugach having to show preferential treatment to one set of ratepayers to the disadvantage of another set of ratepayers. For the reasons discussed in greater detail below, we find that the Restated BRU Agreement is inconsistent with the requirements of AS 42.05.391(a), and we cannot approve that agreement. We also find it equitable to reimburse North District ratepayers for their past contributions to ML&P investment in the BRU. Therefore, as a condition for approval of the overall transaction, we require Chugach to reimburse North District ratepayers in an amount approximately equal to this past investment in the form of a temporary credit to their COPA surcharge.[108]

Finally, there is the issue of public interest. Chugach is asking us to grant it permission to recover through rates payments to the MOA for most of the ML&P assets that exceed the net book value of those assets. This request is contrary to the requirements of AS 42.05.441(b), and can only be granted through a public interest exemption under AS 42.05.711(d). To ensure that tangible benefits to ratepayers equal or exceed the acquisition premium that Chugach desires to recover through rates, we require Chugach to file an agreement with MEA on the formation of a tight power pool and single load balancing area incorporating the entire service areas currently served under Certificate Nos. 8, 18, and 121. This agreement must specify a time-period not to exceed six months from transaction closing for actual implementation of the tight power pool, and it must filed as a tariff advice filing not less than 45 days before to closure of the transaction at issue in Dockets U-19-020 and U-19-021.

[108]Chugach refers to its COPA as a Fuel and Purchase Power Cost Adjustment (FPPCA), but for the purposes of this order we will refer to it as a COPA, consistent with our regulation at 3 AAC 52.503(a).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

We address each of these issues in greater detail below.

Public Representation that Base Rates Will Not Increase

We note that this transaction was approved by the MOA Assembly and voters based in part on a public representation by Chugach that base rates for ML&P and Chugach ratepayers would not increase as a result of Chugach's acquisition of most ML&P assets.[109] That public representation is not expressly included in any of the documents that we have been asked to approve, other than being referenced in Exhibit O to the APSA.[110]

In setting utility rates, we are required to ensure that rates are just and reasonable under the tests set out in AS 42.05.381. We are also required to ensure that rates do not grant an unreasonable advantage or disadvantage to any customer or customer class under AS 42.05.391(a). For electric cooperatives such as Chugach, we are also required by AS 42.05.431(a) to set rates that are adequate to meet the debt covenants of the cooperative. For Chugach, we implement these statutory requirements through application of our cost-of-service and rate design regulations set out in 3 AAC 48.500 through 48.560.

Chugach has acknowledged its understanding that nothing in the agreements we are being asked to approve in these dockets will bind us when it comes to cost allocations and rate setting.[111] We notify the parties and the public that if the

Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

transaction under which Chugach proposes to acquire most ML&P assets closes, we will continue establishing Chugach's rates under the statutes and regulations listed above. We do not consider ourselves bound in any way by Chugach's public representation that base rates will not increase as a result of this transaction. We will not, as suggested by Chugach,[112] be establishing the recovery period of the regulatory asset requested by Chugach in Docket U-19-020[113] based upon Chugach's public representation that base rates will not increase as a result of this transaction.

One of the ways in which Chugach has proposed to ensure that base rates will not increase as a result of this transaction is to reduce its authorized TIER[114] from 1.55 to 1.35, or even lower.[115] Chugach recognizes that its financial health at the time of its first rate case after transaction closing may not warrant this change.[116] In Docket U-19-003, we granted Chugach's request to increase its TIER from 1.35 to 1.55, in part to increase margins so that Chugach could achieve its target 40% equity capitalization.[117] With this proposed transaction, Chugach will be reducing its equity level to approximately 13.5%, and with a 1.35 TIER Chugach does not expect to achieve its 40% target equity level until sometime after 2034.[118] On the record before us, and based on the

[112]Dockets U-19-020 and U-19-021 Hearing, Tr. 2214-2218.

[113]Chugach Petition at 17-20. Dockets U-19-020 and U-19-021 Hearing, Tr. 2257.

[114]TIER stands for Times Interest Earned Ratio. The revenue Chugach earns in excess of its cost of service, referred to as margins, is limited by its target TIER. An explanation of the TIER calculation can be found in *Chugach Electric Association, Inc.'s Petition to Increase Target TIER*, filed January 15, 2019, in Docket U-19-003, at 4-5. As an electric cooperative, Chugach does not have shareholders who invest the equity capital required for the business. Chugach's equity consists of margins earned less capital credits retired, referred to as retained margins.

[115]T-8 (Miller Direct) at 40-43; T-19 (Strunk Direct) at 11-12, 30-31, 37-40, Exhibit KGS-02. Dockets U-19-020 and U-19-021 Hearing, Tr. at 2256-2257.

representations of Chugach in Docket U-19-003, we cannot commit to allowing Chugach to reduce its TIER to 1.35 while its equity level is substantially below the target level we accepted as optimal just a few months ago.

Although we believe that in the long term, and with the conditions we impose, this transaction will be beneficial to consumers, rate increases in the short term may be required to ensure the continued financial health of Chugach and to comply with the rate setting statutes and regulations identified above. We expressly do not accept Chugach's public representation that base rates will not increase as a result of its acquisition of most ML&P assets as a limitation on the rates we will approve in future Chugach rate cases. To implement the public representation that base rates will not increase as a result of this transaction, Chugach and ML&P have proposed cost and benefit allocations based on the geographic location of ratepayers rather than the cost of providing service to those ratepayers. As will be discussed in detail below, we find these geographically-based allocations to be discriminatory under AS 42.05.391.

We further find that, aside from a reasonable period of time for transition, the geographic location based allocation of costs and benefits are unreasonable. Chugach has proposed a quick transition period to merge ML&P and Chugach functions and employees, to harvest integration cost savings and minimize impacts on ratepayers.[119] This includes merging the Certificate No. 121 tariff with the Certificate No. 8 tariff so that uniform rates are charged to ratepayer classes throughout the post-transaction Chugach system. However, Chugach has pointed out that this transition will take some time and effort, and for that reason Chugach is proposing to initially provide

[119]Chugach Petition at 25-26; T-8 (Miller Direct) at 60-69; T-9 (Thibert Direct) at 18-21; T-10 (D. Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

service to ratepayers in the North District through adoption of the Certificate No. 121 tariff under 3 AAC 48.400. Chugach proposes to merge the rules sections of these two tariffs before to its first general rate case after closing the transaction, scheduled for no later than December 31, 2023.[120]

Chugach asserts that the cost and benefit allocations included in the PILT Agreement and the Restated BRU Agreement will prevent full integration of the tariff for service to North District ratepayers with the tariff for service to South District ratepayers.[121] For the reasons mentioned above and discussed below, we are rejecting the proposed PILT Agreement and Restated BRU Agreement cost and benefit allocations Chugach is concerned about. Thus, on the record presented, there are no impediments to Chugach serving both sets of ratepayers with one integrated tariff by the conclusion of its next rate case. Therefore, if the transaction closes, we require Chugach to file proposed rule and rate revisions to fully integrate service in the North District into the Certificate No. 8 tariff, including uniform rates for ratepayer classes as determined by a rate design study that does not distinguish between ratepayers based on geographic location in the Chugach service territory, no later than December 31, 2023.

We acknowledge that there will be a period of time before the COPA surcharges for North District and South District ratepayers can be identical. The $36 million RRR account created by Section III.B.2 of the Original Stipulation is to be returned to North District ratepayers as a COPA credit over a 36-month period.[122] Additionally, we will be creating a COPA credit to reimburse North District ratepayers over a 10-year period for their past contributions to ML&P investment in the BRU and an offsetting COPA surcharge for South District ratepayers. These credits and surcharge will be line items

[120]T-8 (Miller Direct) at 15-16, 64.

[121]Dockets U-19-020 and U-19-021 Hearing, Tr. 1974.

[122]Original Stipulation at 6-7.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

on ratepayer bills and should not otherwise affect use of the same COPA calculation methodology for all Chugach ratepayers. We will address these credits and the COPA methodology in greater detail below.

We inform Chugach that we are concerned about the extremely low equity level resulting from this transaction and that we may require an early rate case if Chugach's equity levels do not rebound as quickly as presented in this proceeding. It may be necessary to increase Chugach's base rates solely to remedy Chugach's low equity level caused by this transaction, and we will not allow Chugach's ability to provide safe, reliable, and efficient public electric utility service to be jeopardized just to honor a public representation that may have been improvidently made.

We inform Chugach, the MOA, and ML&P, that closing this transaction under the terms and conditions we require in this order is an express waiver of any claims for remedies under the language of Ballot Measure 10 or any municipal ordinances if Chugach's base rates are increased by us as a result of the costs incurred by Chugach to acquire most of ML&P's assets.

Certificate No. 121

In Docket U-19-021, ML&P requests two actions related to Certificate No. 121: 1) transfer of authority to provide public electric utility service in the Certificate No. 121 service area to Chugach and delete retail service territory from Certificate No. 121; and 2) amend Certificate No. 121 to authorize the provision of wholesale electric generation utility service from the ML&P ownership share of the Eklutna Project.[123] In Docket U-19-020, Chugach requests that we amend the Certificate No. 8 service area to include the Certificate No. 121 service area. Chugach also requests permission to serve

[123]ML&P Application at 2-3.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501

ratepayers in the North District through adoption of the Certificate No. 121 tariff pursuant to 3 AAC 48.400 until it files a general rate case, before the end of 2023.[124]

None of these requests have been amended by the Original Stipulation, which includes a request that we approve these requests as filed.[125]

Transfer of Certificate Authority

We evaluate applications to acquire a certificated public utility under AS 42.05.281, which states that a certificate may not be sold or transferred without our prior approval. We determine whether the transferee is fit, willing, and able to provide the utility services authorized by the certificate and whether the proposed transfer is consistent with the public interest.[126] When determining whether an entity is fit, willing, and able to provide service, we examine that entity's managerial, technical, and financial fitness.

Managerial and Technical Fitness

As of December 31, 2016, ML&P provided public electric utility service to 31,081 service locations with 444.3 megawatts (MW) of installed generation capacity, 50 miles of transmission line, 23 substations, and 371 miles of distribution line.[127] As of December 31, 2016, Chugach provided public electric utility service to 83,855 service locations with 531.2 MW of installed generation capacity, 434 miles of transmission line, 42 substations, and 1,719 miles of distribution line.[128] The ML&P and Chugach service

areas are immediately adjacent to each other.[129] The ML&P and Chugach transmission systems are part of the Railbelt interconnected electric grid.[130]

Under the proposed transaction, ML&P will be transferring its Certificate No. 121 service obligations and all of the facilities used to provide such service, including ML&P's ownership interest in the BRU and excepting ML&P's ownership interest in the Eklutna Project, to Chugach. Chugach will also purchase a portion of ML&P's share of Eklutna Project output.[131] Additionally, all ML&P employees will become Chugach employees upon transaction closure and Chugach has committed that it will retain its entire current workforce.[132] We find that Chugach is technically fit to provide public electric utility service in the North District based on its existing capabilities, and its acquisition of the infrastructure and staffing currently providing public electric utility service to ratepayers in that service area.

Chugach's Chief Executive Officer, Lee D. Thibert, has worked in senior management positions at Chugach since 1987. Chugach's Chief Financial Officer and Vice President of Finance and Administration, Sherri Highers, has worked in the Chugach finance section since 1998. Chugach's Senior Vice President for Production and Engineering, Paul R. Risse, P.E., has worked on the Chugach generation plant and substations since 1995, and worked in generation and transmission systems for another electric utility before his employment by Chugach. Chugach's Chief Operating Officer, Brian J. Hickey, P.E., has over twenty years of experience as a manager at Chugach, plus extensive experience as a project manager for non-utility design and construction firms. Chugach's Vice President for Member and Employee Services, Tyler E. Andrews,

has over twelve years of human relations experience with Chugach, and has substantial additional human relations experience with a telecommunications utility and the State of Alaska. Chugach's Senior Vice President for Regulatory and External Affairs, Arthur W. Miller, has nearly thirty years of rate and regulatory experience at Chugach. Chugach's Executive Manager for Fuel and Corporate Planning, Mark B. Fouts, has over thirty years of planning and management experience with Chugach. Chugach's Vice President and General Counsel, Matthew Clarkson, has served Chugach for a little over two years.[133]

We do not know which management personnel from ML&P will accept positions with Chugach. However, based on the experience of the current Chugach management team in providing public electric utility service in Anchorage, we find that Chugach is managerially fit to provide public electric utility service in the North District.

Financial Fitness

As of December 31, 2018, Chugach owned utility plant with a net book value of $707,548,485, long-term debt of $456,572,084, and equity capital of $194,524,694. For the year 2018, Chugach reported operating revenue of $202,252,742, and operating expenses of $175,395,618.[134] Chugach proposes to finance its acquisition of most ML&P assets solely through the issuance of new long-term debt, originally estimated to be in the amount of $810,100,000.[135] Chugach requests that we specifically condition approval of this transaction on Chugach obtaining this debt at an interest rate of 5.75% or less.[136]

[133]Chugach Petition, Exhibit Form 101-II.A, at 1-10.

[134]Chugach Petition, Exhibit Form 101-IV.A, at 12, 14 16.

[135]T-8 (Miller Direct) at 40 n.20; T-17 (S. Highers Direct) at 5; T-19 (Strunk Direct) at 4, 24, 34, 38. The Original Stipulation results in a reduction of the upfront payment to the MOA by $10,000,000, and may result in a corresponding reduction in the amount Chugach will have to borrow to finance this transaction.

[136]T-8 (Miller Direct) at 40.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

With the addition of this new debt, Chugach will be decreasing its equity level from approximately 27% in 2019[137] to 13.5%.[138] This equity level figure does not include Chugach's contractual obligation to pay the MOA amounts with an estimated net present value of $215,000,000 under the Eklutna PPA and PILT Agreement,[139] which Chugach does not consider to be debt for reporting purposes.[140] Chugach's post-transaction equity level will be significantly below the 40% target equity ratio recommendation Chugach's Board accepted on December 19, 2018,[141] and that we recently accepted as the optimum equity level for Chugach in Docket U-19-003.[142]

We are very concerned about the large debt burden Chugach is taking on with this transaction. This concern is exacerbated by Chugach's becoming majority owner of the BRU with no BRU management experience or BRU capital expenditure plan in place. We have repeatedly expressed in these proceedings our concern about the financial risks Chugach is taking on and have not received responses that reassure us.[143] Chugach has acknowledged that this reduction in equity ratio results in Chugach becoming more vulnerable to disruptions in the external environment.[144]

We could reasonably find that Chugach is not financially fit to acquire most of ML&P's assets under the terms of the transaction presented to us. In an effort to harvest the consumer benefits that could be achieved through the combination of ML&P with Chugach, we have determined that with the imposition of appropriate conditions under AS 42.05.241 on the terms of this transaction the financial health of Chugach can be better protected. With the parties' acceptance of, and compliance with the conditions imposed in this order, we find that Chugach is financially fit to acquire most of the assets of ML&P.

These conditions include the following which are specifically aimed at protecting Chugach's financial health and ability to provide safe, reliable, and efficient public utility service:

1. Chugach is required to file a rate case consistent with the requirements of 3 AAC 48.275(a) and based on a 2022 calendar year test year, on or before December 31, 2023. [145]

2. There will be no reduction of the Chugach target TIER level accepted by Order U-19-003(8) until Chugach has shown to our satisfaction that its equity level is safely within its zone of reasonableness.[146]

3. Formation of a tight power pool with MEA as discussed elsewhere in this order to ensure the most efficient use of generation assets.

Other conditions imposed by this order may serve to protect Chugach's financial health while also serving the public interest in other manners.

[145]If Chugach's financial condition warrants, Chugach may file a rate case based upon an earlier test year.

[146]In Docket U-19-003, Chugach filed a cost of capital study indicating that the zone of reasonableness for Chugach's equity was from 35% to 50%. *Chugach Electric Association, Inc.'s Petition to Increase TIER*, filed January 15, 2019, Attachment I at 5. We relied on that cost of capital study in granting Chugach's petition for an increased target TIER. Order U-19-003(8) at 6, 10.

Transfer to Chugach is in Public Interest

We will transfer the authority granted by Certificate No. 121 from ML&P to Chugach only if we find that this transfer is in the public interest. To make this determination, we will look at the two utilities on a stand-alone basis and then look at the two utilities as combined under Chugach's proposed acquisition of most ML&P assets.

As of December 31, 2012, ML&P was capitalized at 44.5% equity and 55.5% debt. Based on projections that ML&P's equity level would drop to below 30% due to an aggressive capital improvements program, we imposed a dividend restriction on ML&P in an effort to maintain a reasonable equity level in the utility.[147] As of December 31, 2015, ML&P's equity level had dropped to 35.5% despite the beneficial impacts of our dividend restriction and the fact that it had not yet fully funded its new generation facility. Based on these facts, in 2018 we continued the dividend restriction imposed on ML&P in 2015.[148] As of December 31, 2019, ML&P reported debt of $507,431,235 and equity capital of $299,321,917,[149] indicating 37% equity capitalization.[150]

[147]Order U-13-184(22) at 54, 56-68.

[148]Order U-16-094(9)/U-17-008(13), *Order Resolving All Revenue Requirement and Cost-of-Service Issues, Approving Depreciation Rates, Approving Revised Cost of Power Adjustment, Requiring Filings, and Allowing Parties to File Comment*, dated March 23, 2018 (Order U-16-094(9)), at 40-41.

[149]*2018* [*sic*] *Annual Report to the Commission*, filed March 31, 2020 (2019 ML&P Annual Report), by ML&P, at 112, which we take official notice of under 3 AAC 48.154(b)(4).

[150]$299,321,917 ÷ [$299,321,917 + $507,431,235] = 0.371.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

In 2019, we found that the optimum equity level for Chugach was 40%.[151] As of December 31, 2019, Chugach reported long-term debt of $456,572,084 and equity capital of $194,524,694,[152] indicating 30% equity capitalization.[153]

Based on their end of 2019 reports, Chugach and ML&P have a combined $964 million in debt and $494 million in equity yielding a roughly 34% equity level. Assuming Chugach has to borrow $810 million to close the transaction, the combined utility will have approximately $1,266.6 million in debt and $194.5 million in equity. This yields a roughly 13.3% equity level. The transaction under which Chugach will acquire most ML&P assets effectively combines two under-capitalized utilities by harvesting a substantial amount of the existing capital investment from them. We find that this weakening of the financial capacity of the electric utilities serving over 100,000 locations is not in the public interest.

However, Chugach has asserted that this transaction will produce benefits sufficient to offset the costs to consumers and allow it to rebuild its equity level. Chugach has informed us that this transaction will only be closed if we approve Chugach's recovery through rates of the substantial acquisition premium Chugach has agreed to pay the MOA for most of the ML&P assets.[154] As noted above, we can only authorize recovery of an acquisition premium if we find that it is in the public interest for us to waive application of AS 42.05.441(b) to this transaction under AS 42.05.711(d).

The precise amount of the acquisition premium is in dispute and the economic value of some asserted benefits are disputed as being speculative rather than tangible. In our analysis of the acquisition premium below, we go into detail of why we

701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

find that, with appropriate conditions, it is in the public interest for us to approve this transaction. We announce here that we find transfer of the Certificate No. 121 service area to Chugach, subject to the conditions set out in this order, is in the public interest.

Transfer of Certificate No. 121

ML&P asks us to transfer the Certificate No. 121 retail service territory to Chugach, and then modify Certificate No. 121 to include only a service area consisting of MHP's 53.3% interest in the Eklutna Project dam, tunnel, and powerhouse.[155] Chugach asks us to amend Certificate No. 8 to include the Certificate No. 121 service area.[156] Chugach asks us to allow it to initially serve ratepayers in the North District through adoption of the Certificate No. 121 tariff under 3 AAC 48.400.[157]

These requests are conflicting. Our regulation at 3 AAC 48.400(a) states:

> When the name of a utility or pipeline carrier, as shown on a certificate of public convenience and necessity is changed, due to the transfer of operating control of one utility or pipeline carrier to that of another by sale, lease, rental, inheritance, assignment, receivership, acquisition of a controlling interest by any means, or change in the legal form of its organization, or when the name of the utility or pipeline carrier is changed, the utility or pipeline carrier operating after that, if it intends to continue using the tariff shall, for each tariff so used, issue and file with the commission and shall, at the same time, make available for the statutory notice period at every place designated by 3 AAC 48.200 – 3 AAC 48.430, a tariff supplement containing an adoption notice reading substantially as follows:
>
> > (Name of utility or pipeline carrier) hereby adopts as if they had been originally filed by it, all tariffs, rules, notices, concurrences, provisions, authorities, power of attorney, or any other instrument of (name of predecessor utility or pipeline carrier) before (here insert the date of change). By this notice, it also adopts and ratifies all supplements and amendments to any of the above tariffs of the (name of predecessor utility or pipeline carrier).

[155]ML&P Application at 2, 11

[156]Chugach Petition at 21-22.

[157]Chugach Petition at 14, 22-23, Attachment 1; APUC Form PU 101, at 6-7.

Regulatory Commission of Alaska

Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

By requesting to serve ratepayers in the North District through adoption of the Certificate No. 121 tariff pursuant to 3 AAC 48.400(a), Chugach is effectively asking to have its name placed on Certificate No. 121.

Chugach is asking to adopt the Certificate No. 121 tariff under 3 AAC 48.400 for the purpose of establishing rates for ratepayers in the Certificate No. 121 service area during a transition period until all Chugach ratepayers can receive service under the Certificate No. 8 tariff.[158] ML&P has expressed no justification for its continuing to hold Certificate No. 121. We note that the standard for amending the Certificate No. 121 service area to include the Eklutna Project power production facilities is the same under AS 42.05.241 as the standard for issuance of a new certificate.

Allowing Chugach to adopt the Certificate No. 121 tariff under 3 AAC 48.400(a) for a transition period would give North District ratepayers an opportunity to have input into proposed changes to the rules under which they are provided public electric utility service. We find that the public interest would be served by granting Chugach's request to adopt the Certificate No. 121 tariff under 3 AAC 48.400(a), and we find that granting this request will not harm ML&P.

In issuing new certificate authority, we may impose conditions necessary to protect and promote the public interest.[159] We find that the public interest requires clear rules under which public utility service is provided. Allowing Chugach to serve North District ratepayers under a separate set of rules from the rules governing service to South District ratepayers during the transition period is acceptable if that transition period is of a reasonably limited duration. Chugach has represented its intent to propose

[158]Chugach Petition at 13-14, 23, Attachment 1, Attachment 3 at 6-7; T-8 (Miller Direct) at 5, 15-16, 60- 67.

[159]AS 42.05.241.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

consolidation of service to all ratepayers under the Certificate No. 8 tariff no later than the end of calendar year 2023.[160] We accept this representation as defining a reasonable period of time for the transition to unified tariff rules.

As found above, Chugach is fit, willing, and able to provide public electric utility service in the in the North District, and transfer of service responsibility to Chugach is in the public interest if the conditions imposed in this order are accepted by the parties and the transaction closes. To allow Chugach to provide service under the Certificate No. 121 tariff under 3 AAC 48.400(a) during a transition period before service to all Chugach ratepayers can be provided under the Certificate No. 8 tariff, we transfer Certificate No. 121 to Chugach effective the date the transaction closes, subject to the following conditions:

1) The transaction under which Chugach acquires most of the ML&P assets closes, as that term is defined in Article III of the Asset Purchase and Sale Agreement filed as Exhibit AWM-03 to Hearing Exhibit T-8.

2) Chugach is required to file notice of transaction closing within ten days of the date that closing occurs.

3) Chugach shall file tariff revisions under which all Chugach ratepayers will be billed under the same COPA surcharge calculation, including unified GTP no later than 45-days before January 1, 2021.

4) Chugach shall file proposed tariff revisions under which all Chugach ratepayers will be served under the Certificate No. 8 tariff no later than December 31, 2023.

With this decision, we deny ML&P's request that we amend Certificate No. 121 to include the Eklutna Project generation facilities. We give notice of our intent to revoke Certificate No. 121 under AS 42.05.271(1) after Chugach has completed the transition process and all North District ratepayers are being provided public electric utility service under the Certificate No. 8 tariff. The Certificate No. 121 parchment will be transferred to Chugach under separate cover once the transaction has closed.

New Certificate for MHP Ownership of Eklutna Project

A public utility is defined in part as: "every corporation, whether public, cooperative, or otherwise . . . that owns . . . any plant . . . for furnishing, by generation . . . electrical service to the public for compensation."[161] For the purposes of this definition, the term "public" is defined to include any public utility purchasing service from the entity owning the generation plant for resale to the public.[162] "A public utility may not operate and receive compensation for providing a commodity or service without first having obtained from the commission under [AS 42.05] a certificate declaring that public convenience and necessity require or will require the service."[163]

Under the transaction at issue in Dockets U-19-020 and U-19-021, Chugach agreed to pay the MOA approximately $1 billion for most of the ML&P assets.[164] This payment is made up in part by deferred payments under the Eklutna PPA over a 35-year period. To implement the Eklutna PPA, MHP retains ownership of the Eklutna Project generation plant,[165] and will receive a payment stream estimated to have a net present value of $48,200,000 from Chugach in exchange for Chugach getting access to a portion of MHP's share of the Eklutna Project energy output.[166] The MOA also proposes to sell a portion of MHP's share of the Eklutna Project output to MEA for compensation over a

Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

period of 35 years.[167] Therefore, as the transaction has been proposed, MHP will remain a public utility required to hold a certificate.

We review an application for a certificate to determine whether the applicant is fit, willing, and able to provide the utility services applied for, and that those services are required for the public convenience and necessity.[168] A public utility's certificate describes the nature and extent of the authority granted to the utility. Before addressing MHP's fitness, willingness, and ability to provide wholesale electric generation services from its share of the Eklutna Project, we review the Eklutna Project and the power purchase agreements presented to us to determine the scope of responsibilities that MHP will incur through retention of an ownership share of the Eklutna Project.

Eklutna Project

The Eklutna Project was built and operated by the federal government pursuant to the Eklutna Power Act of 1950.[169] In 1995, Congress authorized sale of the Eklutna Project to ML&P, Chugach, and MEA under the terms of the 1989 Eklutna Purchase Agreement.[170] Under this agreement, the three utilities received an undivided interest in all of the Eklutna Project, water rights, generation plant and the transmission assets interconnecting the Eklutna Project with ML&P, Chugach, and MEA.[171] ML&P obtained a 53.33% ownership interest, Chugach obtained a 30% ownership interest, and MEA obtained a 16.67% interest in the Eklutna Project. Eklutna Project energy, capacity,

Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

and costs are to be allocated based on these ownership interests.[172] ML&P and Chugach assert that the Eklutna Project currently has a maximum capacity of 39 MW.[173]

The three utilities created the Eklutna Operating Committee (EOC) to make all management decisions related to operation, maintenance, and budgeting for the Eklutna Project. ML&P, Chugach, and MEA each have a representative on the EOC. Decisions by the EOC are made based upon a double majority consisting of affirmative votes by at least two of the three utilities whose ownership shares total at least 51% of the Eklutna Project ownership.[174] Effectively, management of the Eklutna Project is limited to actions approved by ML&P and at least one of Chugach or MEA.

MHP Obligations under Power Purchase Agreements

Eklutna PPA

Under the Eklutna PPA, MHP is required to name a representative to the EOC who will make decisions on behalf of MHP "consistent with Prudent Utility Practice and the rights and obligations of the parties to [the Eklutna PPA]. This representative shall also represent MHP in all decisions related to the Fish and Wildlife Agreement identified in Section 104(a)(2) of Public Law 104-58.[175] MHP is also required to not curtail Eklutna Project power deliveries except as required by law or Prudent Utility Practice.[176]

energy sold under the MEA PPA.[184] MHP is required to pay MEA restitution for any unexcused failure to deliver power under the MEA PPA.[185] MHP is required to maintain insurance under the MEA PPA.[186] MHP is required to indemnify MEA for third-party claims based on MHP actions.[187] MHP is required to allow MEA to purchase a portion of MHP's interest in the Eklutna Project at the end of the MEA PPA.[188] Finally, MHP is required to not exercise any right to claim sovereign immunity with regard to claims that MHP breached the MEA PPA.[189]

New Certificate for MHP

Public Convenience and Necessity

Under AS 42.05.241, we may issue a certificate only upon finding that the services to be authorized are required for the convenience and necessity of the public. The Eklutna Project has provided reliable generation services to ratepayers of ML&P, Chugach, and MEA for over sixty years. The Eklutna Project has been an extremely reliable generation resource located substantially closer to the Anchorage and Matanuska-Susitna Borough load centers than the only larger hydroelectric generation facility interconnected with these loads, the Bradley Lake Project located east of Homer. We find that continued receipt of generation service from the Eklutna Project is required for the convenience and necessity of the public.

Financial Fitness

ML&P states that under the Eklutna PPA, Chugach will pay all operating, maintenance, and capital costs associated with Chugach's share of MHP's Eklutna

Project output. ML&P asserts that the payments from MEA will be sufficient to pay the Eklutna Project costs that MHP will be responsible for under the MEA PPA. ML&P states that MHP will create a $3,000,000 reserve fund during the first year of operation after closing of the transaction to cover any intra-year revenue shortfalls. ML&P also states that in the event that annual revenue and this reserve is inadequate to meet MHP's Eklutna Project financial obligations, the MOA has sufficient borrowing capacity to make up the difference.[190] ML&P filed its financial statements for the years 2016 and 2017.[191]

ML&P estimates Eklutna Project generation operating expense to be $143,762 per year based on 2017 calendar year experience.[192] ML&P estimates Eklutna Project generation plant depreciation expense to be $210,035 based on 2018 calendar year experience.[193] ML&P estimates a working capital requirement of $17,970.[194] ML&P estimates that annual revenue from the Eklutna PPA, the MEA PPA, and from Anchorage Water and Wastewater Utility for diversion of Eklutna water from electric generation to public water utility use will be $4,654,793.[195]

These cost estimates do not include capital expenditures that MHP will be responsible for under the MEA PPA. These cost estimates also do not include any costs to be incurred under the Eklutna Project memorandum of agreement dated August 7, 1991, regarding protection and enhancement of fish and wildlife (Fish and Wildlife Agreement). Chugach is operating under the assumption that compliance with the Fish and Wildlife Agreement will cost $5,000,000 for studies plus $25,000,000 for remediation,

based upon their environmental costs for another hydroelectric project.[196] Chugach estimates that the remediation expense will be incurred in one year, and ML&P appears to indicate it will happen over four years.[197] The studies on which this compliance effort will be based have not yet been done and thus there is no firm remediation plan or cost estimate.[198]

Based on the information presented, it appears that MHP will have sufficient Eklutna Project revenue to cover its allocated share of normal Eklutna Project operations and maintenance expense. We have been presented with little record showing that the $3 million Eklutna Project reserve account ML&P has agreed to maintain is adequate.[199] However, no party has challenged the adequacy of this reserve account. Based upon the limited information available to us, we find that MHP is financially fit to own an interest in the Eklutna Project, subject to the condition that MHP maintain a $3,000,000 reserve fund to support the Eklutna Project capital expenditures it is obligated to make under the MEA PPA.

Managerial and Technical Fitness

ML&P asserts that billing and record keeping under the Uniform System of Accounts will be done for MHP by the professional accountants working for the MOA's Financial Department. These accountants will also maintain MHP's continuing property records, calculating annual depreciation and net book value of plant in service.[200] ML&P has provided no evidence in support of this assertion that accountants employed by the MOA's Financial Department are trained to maintain records in accordance with the

Uniform System of Accounts or to maintain continuing property records. However, we are aware that many of our smaller regulated utilities retain outside accountants to maintain their records in accordance with our regulations and thus we are aware that those private resources are available.

ML&P proposes that MHP will have a seat on the EOC, even though it will have no employees. ML&P states that MHP will be managed by the Municipal Manager, a position currently filled by William D. Falsey.[201] Falsey has a law degree from Yale Law School and a Bachelor of Science degree in physics from Stanford University. Falsey has worked as the MOA's manager since 2017 and worked in legal positions from 2003 through 2017.[202]

Chugach witness Dustin Highers testified based on his experience as chair of the EOC that to be an owner representative on the EOC, it was essential that the representative have knowledge of prudent utility practice and the Railbelt electric generation and transmission system.[203] Dustin Highers testified that there were two ML&P employees he was aware of qualified to sit on the EOC and that both of those employees were being transferred to Chugach as part of the transaction.[204] There is nothing in Falsey's resume indicating that he has any knowledge of the Railbelt generation and transmission system, or prudent utility practice which is the management standard specified for the MHP EOC representative in both the Eklutna PPA and the MEA PPA.[205] ML&P indicated "that, more likely than not, we would utilize consultant services

to provide that industry-specific expertise and staffing to help us make informed decisions as a continuing member of the [EOC]." However, ML&P admitted that it has not investigated whether such expertise exists in the consulting community.[206]

Under these circumstances, we cannot unconditionally find that MHP is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions. This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.

Certificate Issuance

Subject to our financial fitness condition and surrender of its vote on the EOC, we find MHP to be fit, willing, and able to provide wholesale public electric utility service through its ownership share of the Eklutna Project. Subject also to closure of the transaction at issue in Dockets U-19-020 and U-19-021, we will issue MHP a certificate authorizing the provision of such service to the public for compensation. This new certificate will be issued under separate cover after the transaction has closed.

ML&P Dividend Restriction

ML&P asks that we terminate the dividend restriction imposed by Order U-13-184(22).[207] In that order, we imposed a dividend restriction on ML&P under AS 42.05.521 based on a finding that ML&P might become capital impaired because its equity level of 44.5% was substantially below the equity level projected in its equity management plan and was projected to continue declining.[208] With Order U-16-094(9), we continued this dividend restriction based upon evidence that ML&P's equity level was 35.5%.[209]

ML&P asserts that if the transaction is approved, all of ML&P's debt will be paid off. ML&P further asserts that revenue from the Eklutna PPA and the MEA PPA will allow MHP to maintain a $3 million cash reserve and pay dividends to the MOA without incurring future debt. ML&P states "that, with 100% equity, [MHP]'s post-closing capital will not, by any measure, be impaired." For this reason, ML&P states that the current dividend restriction should be terminated as part of approval of the transaction.[210]

Under most circumstances, we would only consider lifting a dividend restriction in the context of a rate case where we have adequate information on the utility's financial health.[211] In this docket, ML&P has filed financial statements for 2016 and 2017. These indicate that as of December 31, 2017, ML&P was capitalized at 66% debt and

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

34% equity.[212] This is a lower equity level than that under consideration in Order U-16-094(9),[213] and absent closure of the transaction under the conditions imposed by this order, ML&P's request for termination of the dividend restriction imposed by Order U-13-184(22) is denied.

If the transaction closes under the terms and conditions imposed by this order, then MHP may no longer be subject to rate regulation under AS 42.05.711(b)(2) and the request to terminate the dividend restriction would be moot. In relevant part, this statute states:

> Except as otherwise provided in this subsection . . . public utilities owned and operated by a political subdivision of the state . . . are exempt from [AS 42.05], other than AS 42.05.221 – 42.05.281 and 42.05.385. However,
>
> (2) a utility or electric operating entity that is owned and operated by a political subdivision and that directly competes with another utility or electric operating entity is subject to [AS 42.05] and any other utility or electric operating entity owned and operated by the political subdivision is also subject to [AS 42.05]; this paragraph does not apply to a utility or electric operating entity owned and operated by a political subdivision that competes with a telecommunications utility.[214]

As discussed in greater detail below, we do not consider the Eklutna PPA to be a wholesale power contract. Rather, the Eklutna PPA is a deferred transaction payment mechanism under which the size of Chugach's payments to the MOA do not vary based upon how much energy or power Chugach takes from the Eklutna Project. The MOA

[212]ML&P Application, Exhibit 7 at 90.

[213]ML&P reports that as of December 31, 2019, it had long-term debt of $507,431,235 and proprietary capital of $299,321,917, indicating a 37% equity level. 2019 ML&P Annual Report at 112. This indicates that ML&P is gaining financial strength under the dividend restriction, but not to the point that we would lift the dividend restriction absent evidence on the financial plans of ML&P.

[214]AS 42.05.711(b)(2).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

does not view MHP's actions under the Eklutna PPA to be in direct competition with other utilities or electric operating entities, except in the case of payment default by Chugach.[215]

The MEA PPA is a substantially different arrangement from the Eklutna PPA, and ML&P offered no opinion regarding the competitive nature of the MEA PPA. Under the MEA PPA, MHP will sell up to a specific level of output from the Eklutna Project to MEA at the times scheduled by MEA for a price that is equal to 85% of MEA's published avoided energy cost, subject to annual price adjustments and triennial price resetting.[216] MEA is under no take-or-pay obligation and is effectively buying firm energy from MHP at a zero capacity cost and an energy cost lower than MEA's tariffed avoided energy cost. If MEA chose to not take its full allocation of Eklutna Project energy under the MEA PPA, that choice would cost MEA nothing other than lost opportunity and would result in lost revenue to MHP. On the record presented to us, we find that under the MEA PPA, MHP is competing with other electric operating entities and public utilities for MEA's business.

Based on the finding that MHP will be competing with other electric operating entities and public utilities under the MEA PPA, we also find that MHP is fully regulated under AS 42.05 pursuant to the AS 42.05.711(b)(2) exception to the exemption from regulation granted by AS 42.05.711(b). With this finding, and contrary to the expectation of the MOA,[217] Anchorage Water and Wastewater Utility will remain subject to regulation under AS 42.05 pursuant to AS 42.50.711(b)(2).

The financial requirements of ML&P, as a load serving utility, are distinctly different from the financial requirements of MHP, which will only be providing public electric utility service at wholesale. For that reason, if the transaction at issue in Dockets U-19-020 and U-19-021 closes, we will terminate the dividend restriction imposed on

[215]Dockets U-19-020 and U-19-021 Hearing, Tr. 2697-2699.

[216]MEA PPA, Exhibit 1 at 9, 45.

[217]Dockets U-19-020 and U-19-021 Hearing, Tr. 2698-2699.

ML&P by Order U-13-184(22). This will allow disbursement of ML&P assets as contemplated by the transaction.

However, based on the evidence in the record, we find that MHP is a regulated public utility under AS 42.05.711(b)(2). Given MHP's limited asset base, lack of experience as a stand-alone utility, and plan to pay all income other than the reserve fund as dividends to the MOA, borrowing in its own name may be difficult and costly. In these circumstances, we could find under AS 42.05.521 that MHP might become capital impaired and impose a dividend restriction on MHP. Although not specifically a dividend restriction, consistent with the condition on its certificate imposed above, MHP may not pay dividends to the MOA any time that its reserve account balance is under $3,000,000.

Transaction Agreements

The transaction under consideration in Dockets U-19-020 and U-19-021 includes four separate agreements between the MOA, ML&P, and Chugach, all of which require our approval in order for the transaction to close. The transaction also will not close unless we authorize Chugach to recover the transaction costs, including the acquisition premium paid to the MOA, through rates.[218] We are also being asked to approve the return of $36 million of unrestricted cash held by ML&P to North District ratepayers through a credit on Chugach bills over a three-year period, and accept a number of reports from Chugach.[219] The transaction also includes a community donation by the MOA, the enforcement of which the parties have recognized is outside of our jurisdiction.[220] In this section we will address each of the four transaction agreements,

waiver of the AS 42.05.441(a) prohibition on recovery of the acquisition premium through rates, and the AS 42.05.391(c) prohibition on the refund of rates paid under a tariff.

Eklutna Project Agreements

The Eklutna PPA was filed as an integral part of the transaction.[221] Chugach acknowledged that the entire amount paid to the MOA under the Eklutna PPA should be considered part of the acquisition premium.[222] MEA has chosen to purchase a portion of ML&P's share of Eklutna Project output under the MEA PPA.[223] This decision results in the acquisition premium Chugach pays to the MOA under the Eklutna PPA declining from a net present value of $75 million to $48.2 million.[224] Chugach's responsibility for Eklutna Project costs and entitlement to Eklutna Project output also declined from 100% of ML&P's share to 64.29%.[225]

As the Eklutna PPA and the MEA PPA are interrelated we will address each of them in this section. We note that we can approve neither of these Eklutna Project agreements unless we can first find that MHP is fit, willing, and able to serve as an owner of the Eklutna Project. Therefore, a condition to our approval of these Eklutna Project agreements is that MHP obtain a certificate under the conditions established above.

Eklutna PPA

Under the Eklutna PPA, Chugach makes specified monthly payments to the MOA for a period of 35 years.[226] Chugach's obligation to make these payments to the

MOA are not contingent on any power or energy being produced by the Eklutna Project, and are not suspended by any Eklutna Project outages regardless of nature or duration.[227] In exchange for these payments, Chugach receives the right to a portion of ML&P's share of Eklutna Project output and the obligation to pay a proportionate share of ML&P's Eklutna Project costs, including capital and Fish and Wildlife Agreement costs, for the 35-year term of the Eklutna PPA.[228] Chugach has the unilateral right to exercise a purchase option for a portion of the ML&P interest in the Eklutna Project, subject to advance notice provisions and at a net book value price upon termination of the Eklutna PPA.[229]

Section 15.11 of the Eklutna PPA was amended to expressly state the MOA's and Chugach's understanding that the Eklutna PPA is a wholesale power agreement subject to AS 42.05.431(b).[230] Section 10.1 of the Eklutna PPA was amended to allow either party the opportunity to pursue any legal remedy in the event that senior management of the two parties could not negotiate resolution to a dispute within 30-days of the date the dispute is submitted to senior management.[231] The stipulating parties agreed that Chugach would recover payments to the MOA under the Eklutna PPA through base rates charged to all Chugach ratepayers after the first three years following transaction closure and Chugach will expense up to $7.6 million of Eklutna PPA payments during the first three years.[232]

Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

The Eklutna PPA was created to establish a secured deferred payment mechanism for a portion of the transaction price that had already been negotiated between the MOA and Chugach.[233] Chugach asserts that the Eklutna PPA payments are based on Chugach's avoided cost of power.[234] However, the testimony is clear that payments to the MOA under the Eklutna PPA are based on an estimated market price based on assumptions regarding the future value of energy in a Southcentral power pool that does not currently exist. The Eklutna PPA payments are also based on assumptions regarding Eklutna Project operating, maintenance, capital, and Fish and Wildlife Agreement costs that have little to do with Chugach's traditional avoided cost calculations.[235] Eklutna PPA payments are also based on capacity values and a cost of carbon, neither of which have economic value at this time.[236]

Chugach has stated that it would not have entered into the Eklutna PPA except as a part of the overall transaction.[237] The Eklutna PPA places all outage risk and responsibility on Chugach, and yet that risk was not factored into the Eklutna PPA pricing. We find the assertion that the Eklutna PPA payments are based upon Chugach's avoided cost of energy to be highly speculative, at best. Eklutna PPA payments are due to the MOA regardless of whether the Eklutna Project produces any electric energy at all.

Under these circumstances, we find that the Eklutna PPA is not a wholesale power agreement entitled to the protections of AS 42.05.431(b). We do not approve

Amendment No. 1 to the Eklutna Power Purchase Agreement.[238] We make no finding on whether or not the Eklutna PPA qualifies as a "forward contract," "forward agreement," "master netting agreement," or a "commodity forward agreement" under the Bankruptcy Code, as asserted by the MOA and Chugach.[239]

We find that the Eklutna PPA is a deferred payment mechanism for Chugach's acquisition of most ML&P assets. We further find that the stipulating parties' agreement that Eklutna PPA payments will be collected through base rates charged all Chugach ratepayers after the initial three-year transition period is appropriate. Therefore, we approve the Eklutna PPA as amended by Amendment No. 2,[240] Amendment No. 3,[241] and the Original Stipulation.[242] This approval is subject to the condition that MHP complies with the certificate conditions set out above. This approval is also subject to the limitation that we interpret the stipulating parties' agreement that enforcement of the community donation called for in Section III.E of the Original Stipulation shall be through the court system,[243] also applies to enforcement of Amendment No. 3 to the Eklutna PPA. Subject to these conditions, we authorize Chugach to recover Eklutna PPA payments through base rates from all ratepayers as agreed to in the Original Stipulation.

MEA PPA

Under the MEA PPA, the MOA has agreed to sell 37.51% of ML&P's 53.33% share, or 19.05% of Eklutna Project output to MEA for a period of 35 years. The price is initially set at 85% of the avoided cost rate published on line J of MEA's Tariff

701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

Sheet No. 107, and increases by 1% each year thereafter, except that the price will be reset to 85% of MEA's published avoided cost rate at the beginning of each third year. MHP will be responsible for a 19.05% share of Eklutna Project operations, maintenance, capital, and environmental compliance costs. MHP is responsible for delivery of Eklutna Project energy to MEA as scheduled by MEA, in accordance with past practice and prudent utility practice. MEA is responsible for paying for the Eklutna Project energy delivered by MHP to it.[244]

We find that, unlike the Eklutna PPA, the MEA PPA is a wholesale power agreement between public utilities subject to the requirements and protections of AS 42.05.431(b). ML&P and MEA filed the MEA PPA as an informational filing in these dockets, stating that they will file it for our approval through a tariff filing separate from these dockets. We remind the MOA and MEA that the MEA PPA cannot go into effect until after we have approved it.[245] When the MEA PPA is filed for our approval, it must be supported with the information listed in 3 AAC 52.470(d) and if recovery of the cost is intended to be through MEA's COPA the tariff filing must include the information required by 3 AAC 52.502. The tariff filing will not be allowed to go into effect except upon at least 45 days advance notice to us and 30 days advance notice to the public of the MEA PPA tariff filing under AS 42.05.421.

PILT Agreement

In describing the basis for the PILT Agreement, Chugach states that it "committed to making PILT payments to [the MOA] consistent with the payment structure being made by ML&P as payments known as the Municipal Utility Service Assessment or

[244]MEA PPA at Exhibit 1.

[245]AS 42.05.431(b).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

MUSA and currently being recovered in ML&P's rates."[246] Chugach acknowledges that the PILT Agreement payments are not structured identical to the MUSA, saying:

> Under the Anchorage Municipal Code, ML&P's MUSA payment is calculated by applying the applicable MOA property tax mill rate to the net plant in service in each of the tax districts in the [North District]. However, there was a concern that this could create a disincentive to Chugach to invest in plant in the [North District]. The formula that was developed is designed to avoid this by adjusting the net plant in the [North District] by reference to all changes in net plant (increases and decreases) in all parts of the new combined Chugach service territory within the MOA. This eliminated any incentive for Chugach to invest in plant differently in the two [Districts] but yet still limited the PILT assessment to reflect plant and mill rates within the [North District].[247]

Chugach asserts that this revised formula "would reasonably reflect ML&P's MUSA payments over the next 50 years."[248] Chugach asserts that PILT payments should not be counted as part of the acquisition premium Chugach is paying for most ML&P assets because it mimics the MUSA payments already being recovered through ML&P rates and thus adds no incremental cost to the transaction.[249]

The PILT Agreement identifies Anchorage Municipal Code 26.10.025 as the source of ML&P's obligation to make MUSA payments.[250] Article I of the PILT Agreement provides definitions, including definitions for the terms Adjusted Net Book Value and Overall Plant in Service Change, which are material in determining the amount of annual

PILT payment obligations.[251] These terms were substantially modified by Chugach and ML&P to address issues related to contributed plant.[252]

Article II includes the terms under which PILT payments are calculated and paid. Section 2.01 provides a narrative description of the annual PILT payment calculation. Section 2.02 states that PILT payments will be collected solely from North District ratepayers through December 31, 2033, and from all Chugach ratepayers located in Anchorage after January 1, 2034.[253] Section 2.03 requires Chugach to make PILT payments by July 15 of each year and Section 2.04 provides that Chugach shall begin making PILT payments in the calendar year following the last year ML&P makes a MUSA payment under AMC 26.10.025. Section 2.05 describes the manner in which the annual PILT payment calculation is reviewed and disputes about that calculation resolved. Section 2.06 declares that PILT payments will be made for a period of 50 years. Sections 2.09 and 2.10 define PILT payments as tax obligations for regulatory and bankruptcy proceedings. Section 2.11 defines Chugach's ability to withhold PILT payments based upon the MOA's financial obligations to Chugach. Section 2.12 authorizes the MOA to utilize all remedies available for the collection of unpaid taxes to collect PILT payments that are not timely paid.[254]

Article III includes miscellaneous terms related to implementation of the PILT Agreement.[255] Chugach and the MOA included Exhibit A to the PILT Agreement as

[251]T-8 (Miller Direct), Exhibit AWM-06 at 1-2.

[252]*Notice of Filing*, filed September 27, 2019, at 2, Attachment 1 (PILT Agreement Amendment 1).

[253]The record is silent on why Chugach is proposing to make its South District ratepayers within Anchorage pay this obligation, and not requiring South District ratepayers outside of Anchorage, such as Chugach ratepayers living in Whittier and on the Kenai Peninsula, to share in this burden.

[254]T-8 (Miller Direct), Exhibit AWM-06 at 2-5.

a sample calculation of PILT payments for illustrative purposes only.[256] Exhibit A was subsequently deleted and replaced in its entirety to reflect the contributed plant treatment revision in the first amendment to the PILT Agreement.[257] Sections 2.09 and 2.10 were deleted by the second amendment to the PILT Agreement.[258] The stipulating parties to these dockets have asked us to approve the PILT Agreement as amended.[259]

Chugach has acknowledged that it is exempt from local property taxes and that the PILT Agreement does not represent a tax liability on the part of Chugach.[260] Chugach intends to allocate its costs of acquiring most ML&P assets on a system-wide basis, except for the PILT payments and BRU costs.[261] Chugach has also acknowledged that the 2034 transition of PILT payment responsibility from North District ratepayers to all Chugach ratepayers located in Anchorage was merely the result of negotiations,[262] and is subject to being modified by us for good cause.[263]

Chugach and ML&P have emphasized that the MOA's receipt of the PILT payment revenue stream over a 50 year period is an essential element of this transaction.[264] We have reviewed the PILT Agreement as amended, and find that even if we approve Chugach's payment of the PILT revenue stream we must require

substantial revisions to the PILT Agreement. We also find that for the purposes of our public interest analysis under AS 42.05.441(b), we must consider the PILT payments to be part of the acquisition premium Chugach has offered to pay for most ML&P assets. We address each of these findings in detail below.

The PILT Agreement Does Not Create or Replace a Tax Obligation

The MUSA is essentially a tax-like charge based on the net book value of contributed and non-contributed utility plant that the MOA chooses to impose just on those residents who take public utility service from the MOA owned public utilities.[265] The MOA has recognized that it has no authority to impose property taxes on property exempt from taxation by state law,[266] and property of public utilities owned by municipalities are exempt from general taxation.[267] However, the Alaska Supreme Court has determined that the MOA may require municipal public utility ratepayers to pay the MUSA in rates.[268] Therefore, the MUSA itself cannot be considered a tax obligation even if it is a valid utility cost.

Electric cooperatives such as Chugach and MEA, which serve the majority of electric consumers in Anchorage, are exempt under state law from state and local government taxes based on the value of property.[269] In return for this exemption, Chugach and MEA are required to pay to the state $0.0005 for each kWh sold at retail.[270] This electric cooperative tax is refunded in part to local governments based on a formula

established by state law.[271] As an actual and necessary cost of providing service this per kWh charge is included in electric cooperative rates.

We have reviewed the PILT Agreement, and find it to be merely a deferred payment mechanism that the MOA and Chugach have negotiated for this transaction. The PILT Agreement does not create a tax obligation, or serve as a substitute for any tax obligation of Chugach. It is therefore not a cost that is necessary to the provision of public electric utility service. We reject PILT Agreement, Article II, Section 2.12, as we do not find that the tax delinquency remedies authorized by this section are appropriate for a deferred payment agreement. Our approval of the PILT agreement and authorization of Chugach to recover PILT payments through rates is specifically conditioned on Section 2.12 not being a part of the approved PILT Agreement.

Discrimination in Rates

A fundamental premise on which rates are established in Alaska is that:

> [A] public utility may not, as to rates, grant an unreasonable preference or advantage to any of its customers or subject a customer to an unreasonable prejudice or disadvantage. A public utility may not establish or maintain an unreasonable difference as to rates, either as between localities or between classes of service.[272]

PILT Agreement, Article II, Section 2.02 states:

> Chugach agrees that any amounts that Chugach collects from retail customers in connection with the PILT Payments will be collected solely from retail customers of Chugach in the [North District] until December 31, 2033. Beginning on January 1, 2034, Chugach shall collect such amounts from retail customers of Chugach within [the MOA] without restriction.[273]

[273] T-8 (Miller Direct), Exhibit AWM-06 at 2.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

PILT payments are modeled by Chugach as being $8,847,553 per year for the entire 50-year term of the PILT Agreement.[274] As of April 1, 2019, ML&P served 31,278 service locations in the North District and Chugach served 84,106 service locations in the South District.[275] We have received no cost-of-service based justification from Chugach or ML&P for the proposed shifting of PILT payment burden solely to ratepayers in the North District through 2033, and then solely to those Chugach ratepayers located in Anchorage beginning in 2034.

Chugach has asserted that PILT payment obligations are intended to be approximately the same as the MUSA payment obligations already being paid by North District ratepayers, and thus they will not be impacted by continuing to require them to pay the entire Chugach PILT obligation through 2033.[276] The implication is that, because there is no new impact on North District ratepayers the rate discrimination is not "unreasonable" under AS 42.05.391(a). In examining PILT Agreement impacts on ratepayers, we have determined that structural differences between the PILT and MUSA calculations mean that they are not equal and offsetting, or a wash as argued by Chugach.[277] MUSA for ML&P is currently calculated by adding the net book value of contributed and non-contributed plant in each of the seven taxable service areas served by ML&P, and multiplying that sum times the tax rate for each service area. The total MUSA payment obligation is the sum of these seven calculations.[278]

[274] *Chugach Electric Association, Inc.'s Filing in Compliance With Bench Order*, filed October 30, 2019, *NERA Settlement Model (Bates No. CHU-020788)*, at PILT worksheet.

Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

PILT payment obligations are determined by a more complex calculation. This calculation starts with the net book value of ML&P contributed and non-contributed plant in each taxable service area *at the time of transaction closing*. This net book value is then adjusted by a factor representing differences in the net book value of Chugach plant in Anchorage on January 1 of the year compared to the value of North District and South District plant in Anchorage at the time of closing. This adjusted net book value is then multiplied times the current property tax rate for each of the seven taxable service areas that ML&P served, and the PILT obligation is the sum of these seven calculations.[279]

For the PILT formula to yield payments that are equal to MUSA a key condition would have to hold: Post-transaction, the change in net book value of Chugach plant within Anchorage would need to perpetually occur in the exact ratio of Chugach to ML&P net book value *that exists at the time of closing.* Any large investment that occurred in one but not the other District would necessarily cause a material change in this ratio, violating this condition. For example, installation of a Battery Energy Storage System in the South District would cause PILT – but not MUSA – to rise.

Such differences would be magnified if there were any substantial trends in the locational distribution of new and retired plant. Under two highly stylized scenarios we modeled MUSA and PILT payments to assess the extent to which they might differ if this important assumption were relaxed.[280] In Case 1 an annual shrinkage factor of 1% was compounded and applied to each year's net book value of Chugach South District plant, as recorded in the *Revised NERA Settlement Model* (Strunk Model)[281]; and an

[279]T-8 (Miller Direct) at 23-23, Exhibit AWM-06, as modified by *Notice of Filing*, filed September 27, 2019, Attachment 1.

[280]Appendix A to this Order contains an explanation of the modeling approach.

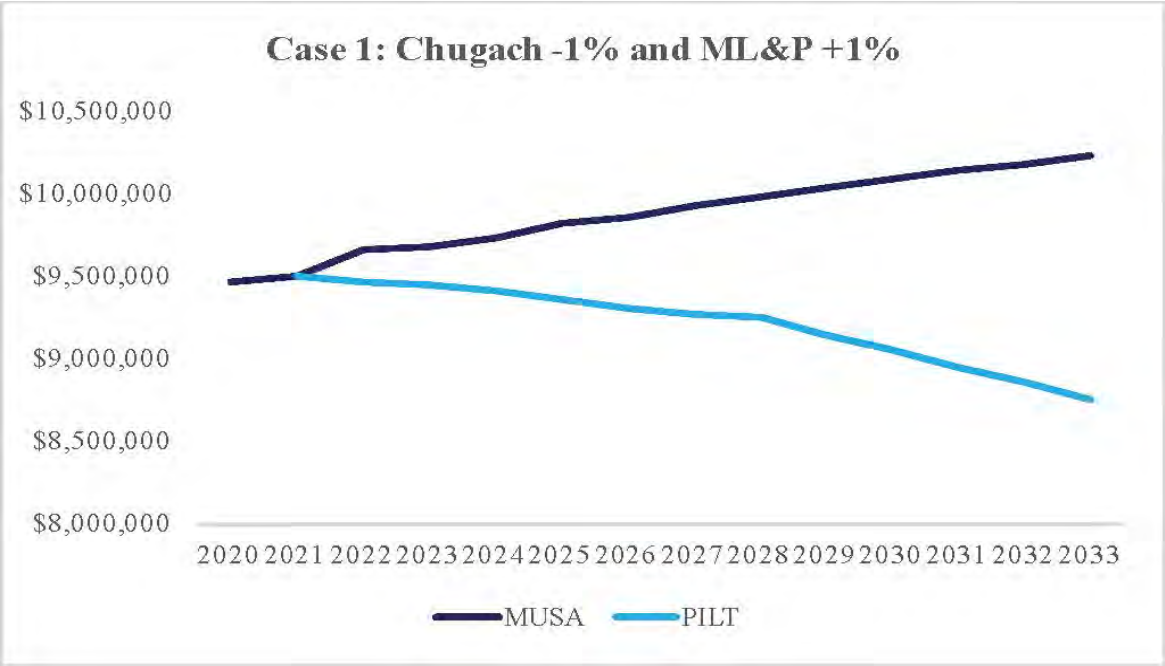
Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

annual growth factor of 1% was compounded and applied to each year's net book value of North District plant. The results are shown below.

Case 1

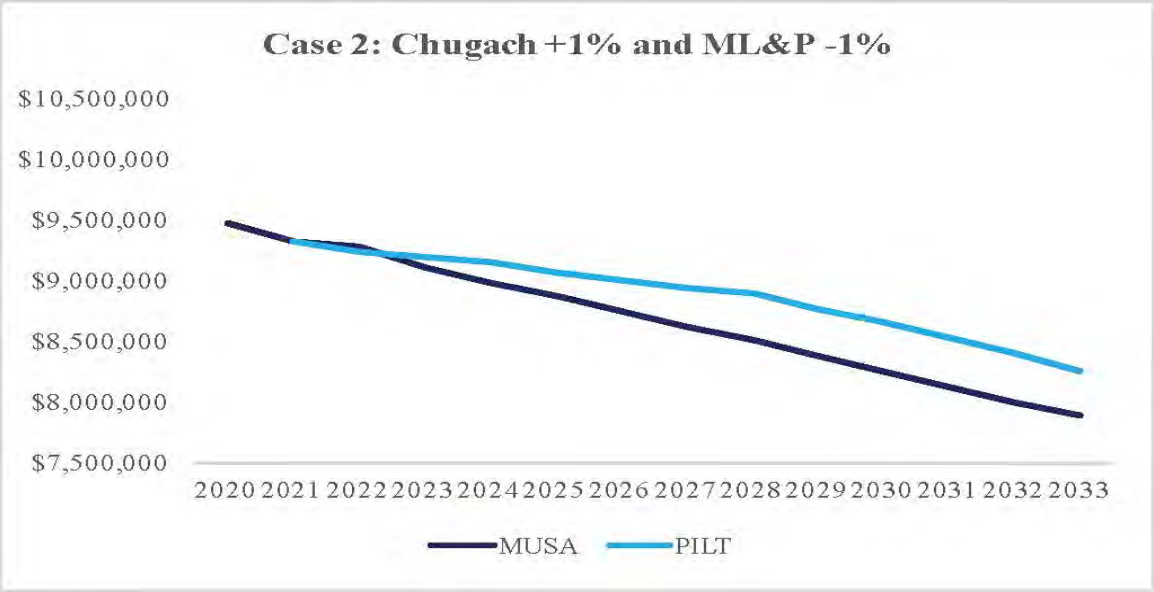


In Case 2 we imposed mirroring conditions to Case 1: an annual growth factor of 1% was compounded and applied to each year's projected net book value of South District plant; while a 1% shrinkage factor was compounded and applied to each year's projected net book value of North District plant.[282]

[282] *See* Appendix A, Schedules H.1, H.2 (showing respectively the underlying calculations for Case 1 and Case 2).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

Case 2



We have received no evidence that Chugach plans on maintaining the ratio of net plant balances between the two Districts at the historic transaction closing figure into the future. Indeed, the fact that the PILT formula exists as it does is evidence that the MOA was concerned that Chugach might, post-acquisition, geographically locate new plant investment with the intention of reducing PILT payment obligations. Otherwise, the PILT Agreement could have more simply calculated PILT payment obligations on the basis of Chugach property balances within the North District.

Our modeling clearly shows that the PILT payment calculation is not equivalent to the MUSA payment calculation, except under restrictive assumptions. We accordingly have no basis for finding the PILT Agreement's rate discrimination provisions acceptable. We reject Chugach's proposed 'no harm, no foul' arguments for approval of discriminatory ratemaking.

As an aside, we note that Chugach's testimony concerning the value of PILT payments obscures the overall benefits to the MOA associated with this transaction. Chugach represents the net present value for the PILT payments, in 2019 dollars to be

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

of $166,782,107.[283] This value is derived by taking the adjusted ML&P MUSA payment accepted for the 2015 test year in Docket U-17-008, in the amount of $8,847,553, and assuming that this amount would be the PILT payment for each of the next 50 annual payments due under the PILT Agreement.[284]

As discussed above, PILT payments will be made as a function of evolving net plant balances of Chugach property in Anchorage. The Chugach sponsored figure is thus inconsistent with Chugach's own projections of such property, which materially change between now and 2033. As part of our effort to determine whether Chugach's proposed acquisition adjustment can be recovered through rates, discussed below, we modeled PILT payments based on the amended PILT Agreement formula and net plant balance projections consistent with those sponsored by Chugach witness Strunk.[285] The results indicate that the net present value of the stream of PILT payments over 50 years is just shy of $146 million, in 2019 dollars.[286]

Chugach has chosen to enter into the transaction to acquire most assets of ML&P for the benefit of all North District and South District ratepayers.[287] As discussed above, the PILT Agreement is not a payment in lieu of any tax obligation of Chugach. The PILT Agreement is merely one of the deferred payment mechanisms that Chugach

[283]T-8 (Miller Direct) at 4 n.2, 18-19, 22. Miller actually testifies to the rounded figure of $166.8 million, which comes from the Strunk Model, PILT Worksheet at column E, line 8.

[284]*See* Strunk Model at PILT Worksheet, column E (showing a PILT payment of $8,847,553 for each of the annual payments and citing to Docket U-16-094); *Municipal Light and Power's Filing in Compliance with Ordering Paragraph 3 of Order No. U-16-094(9)/U-17-008(13)*, filed April 20, 2018, in Dockets U-16-094 and U-17-008, Exhibit 2 at 2 (Schedule 2, line 35), accepted by Order U-16-094(10)/U-17-008(14), *Order Accepting Compliance Filings, Approving Tariff Sheets, and Approving Request for Authorization of Release of Escrow Funds*, dated May 25, 2018.

and the MOA have negotiated for Chugach to acquire the ML&P assets. The stipulating parties, including Chugach and ML&P, have agreed that payments under the other deferred payment mechanism they have negotiated, the Eklutna PPA, will be recovered from all Chugach ratepayers through base rates.[288]

No cost-based justification has been presented for making North District ratepayers share in this burden for all 50-years, South District ratepayers located in Anchorage sharing in this burden for 34-years, and South District ratepayers located outside of Anchorage not sharing this burden at all. PILT Agreement Section 2.02 allocates the PILT payment portion of transaction costs solely based on ratepayer geographic location and yet this is not a cost based on location. We find that implementation of PILT Agreement Section 2.02 would result in an unreasonable difference in rates as between localities, in violation of AS 42.05.391(a).

Our approval of the PILT Agreement and authorization of Chugach to recover PILT payments through rates is specifically conditioned on Section 2.02 not being a part of the approved PILT Agreement. As PILT payments are merely a deferred payment for Chugach's acquisition of most ML&P assets, there is no apparent reason why these costs should not be allocated to all post-transaction Chugach ratepayers the same as Chugach proposes for the other deferred acquisition payments.

ML&P's MUSA payment obligations will end and Chugach's PILT payment obligations will begin effective the date the transaction closes.[289] ML&P's current rates are based upon a revenue requirement that included MUSA expense.[290] After transaction closing, MUSA expense will no longer be a cost of providing service to North District

[288]Original Stipulation at 13.

[289]T-8 (Miller Direct), Exhibit AWM-03 at 122-123.

[290]Order U-16-094(9) at 5, Appendix at 4.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

ratepayers. If the transaction closes within 120 days of the date of this order in accordance with the APSA,[291] Chugach's first PILT payment will be due by July 15, 2021.[292]

Chugach cannot incorporate PILT payments into rates outside of a rate case, and for the reasons discussed above we find that it is reasonable for Chugach to adopt ML&P's current tariff rates for service in the North District until Chugach files its next rate case, before December 31, 2023. As will be discussed in the next section, we find that MUSA expense obligation of ML&P can reasonably be expected to range from somewhat more than PILT payment obligations, to slightly less than PILT payment obligations. This effectively means that until Chugach files its first post-transaction rate case, North District ratepayers are effectively paying PILT Agreement obligations that should be allocated to all Chugach post-transaction ratepayers. We do not find this locational allocation to be unreasonable for the relatively short transition period proposed by Chugach.

We approve the PILT Agreement, subject to closure of the transaction and the condition that PILT payments are funded by all Chugach ratepayers through base rates following the date of Chugach's first post-transaction rate case. PILT Agreement Sections 2.02 and 2.12 are not a part of the PILT Agreement that we approve.

PILT Payments are Part of the Acquisition Premium

While acknowledging that they have offered to pay an acquisition premium for most of ML&P's assets, Chugach has consistently argued that the PILT payments should not be considered a part of that premium. Chugach has based this argument on the assertion that PILT payments are merely a continuation of MUSA payments and thus

[291] T-8 (Miller Direct), Exhibit AWM-03 at 34.

[292] T-8 (Miller Direct), Exhibit AWM-06 at 2-3.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

are not a cost incremental to the transaction.[293] Our review of the acquisition premium is in the context of AS 42.05.441(b), which states:

> In determining the value for rate-making purposes of public utility property used and useful in rendering service to the public, the commission shall be guided by acquisition cost or, if lower, the original cost of the property to the person first devoting it to public service, less accrued depreciation, plus materials and supplies and a reasonable allowance for cash working capital when required.

We traditionally refer to the original cost of the property to the person first devoting it to public service, less accrued depreciation, as the net book value of plant used and useful in rendering service to the public.[294]

Under the transaction at issue in Dockets U-19-020 and U-19-021, as amended by the Original Stipulation, Chugach will be acquiring ML&P assets with a net book value estimated to be $715.4 million. If, at closing, the net book value of the ML&P assets being acquired is less than $715.4 million, there will be an equivalent reduction in the purchase price paid by Chugach. Should the net book value of ML&P assets being acquired be less than $715.4 million at closing, this adjustment means that there will be no increase to the amount of the acquisition premium. If the net book value of the ML&P assets being acquired is greater than $715.4 million at closing, there will be no upward purchase price adjustment. [295] Thus, if the ML&P assets being acquired by Chugach have a net book value at closing greater than $715.4 million, there will be a reduction in the acquisition premium.

---

[293]Chugach Application at 8, 9-10; T-8 (Miller Direct) at 4 n.2, 21, 28-29, 34; T-9 (Thibert Direct) at 14-15; T-19 (Strunk Direct) at 5, 14-15; T-21 (Miller Reply) at 17-20.

[295]Original Stipulation at 6 (Section III.B.1); Dockets U-19-020 and U-19-021 Hearing, Tr. 2818; Exhibit H-114 at 11.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

Chugach is proposing to pay the MOA for these ML&P assets with an immediate payment equal to $757.8 million at closing, subject to downward adjustment if net book value of the ML&P assets is less than $715.4 million,[296] plus deferred payments under the Eklutna PPA with a net present value estimated at $48.2 million.[297] Chugach acknowledges that with these payments, it is paying an acquisition premium for most ML&P assets and that it is seeking recovery of this premium through rates.[298] Thus, there is no dispute that we have to make a public interest finding under AS 42.05.711(d) to waive the prohibition in AS 42.05.441(b) against recovery of the acquisition premium through rates in order to approve this transaction.

Chugach has stated its belief that we will allow the recovery of the acquisition premium through rates "when ratepayers will benefit, and the utility has demonstrated specific, tangible benefits in an amount at least equal to the cost of the acquisition [premium]."[299] We view Chugach's objection to counting the PILT payments as part of the acquisition premium to be related to the amount of the acquisition premium that must be offset by transaction benefits to ratepayers. This view is supported by Chugach's assertion that if we count the PILT payments as part of the acquisition premium, we must offset that amount by including savings related to termination of MUSA obligations as part of the transaction benefits.[300]

Under our acquisition premium analysis, the acquisition premium is the difference between the amount paid to acquire utility plant and the net book value of that

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

plant. Chugach has acknowledged that we have not previously determined the amount of an acquisition premium based on whether or not there are incremental costs or savings related to the amount paid to acquire utility plant.[301] Chugach and ML&P have both asserted that PILT payments to the MOA are an essential element of this transaction.[302] As discussed above, we find the PILT Agreement to be merely a deferred payment mechanism for Chugach's acquisition of most ML&P assets. PILT payments are part of the price Chugach is paying to the MOA for ML&P assets and seeking to recover through rates. Therefore, we agree with the AG that PILT payments must be included in our calculation of the acquisition premium.[303] We address Chugach's argument that MUSA savings must be used to offset the PILT payment portion of the acquisition premium below in our public interest evaluation.

BRU Asset Transfer

In 1996, ML&P requested authority to acquire a one-third working interest in the BRU field from Shell Western E&P, Inc. and Shell Onshore Ventures, Inc. (jointly Shell Western) for $125 million. This purchase was to be entirely financed with debt. At the time of the purchase, ML&P estimated that the purchase included 316 billion cubic feet of unproduced recoverable natural gas, enough to meet 100% of ML&P's natural gas requirements for up to 25 years. Complicating this purchase was the fact that Shell Western had natural gas sales contracts with Aurora Gas, Inc. and Chugach, both of whom objected to ML&P's purchase of Shell Western's BRU field interests.[304]

APUC Staff and ML&P filed a stipulation that included the following language:

> ML&P and Staff have stipulated that ML&P's ratepayers will be the ultimate beneficiaries of the savings or proceeds resulting from the purchase or ownership of the Beluga gas field interests. In approving this transaction, the Commission acknowledges and incorporates this stipulation and will enforce it in future ML&P rate proceedings.[305]

The APUC specifically accepted this stipulation in approving ML&P's acquisition of Shell Western's one-third working interest in the BRU field.[306]

In the ratemaking phase of the docket in which ML&P's acquisition of Shell Western's interest in the BRU field was considered, controversy arose over the price at which ML&P would provide itself gas from its ownership interest in the BRU.[307] We established an interim and refundable GTP mechanism to establish the price ML&P would charge itself for natural gas produced from its interest in the BRU. This mechanism was based on a debt service coverage rate of return based upon our finding that all ML&P risk related to its acquisition of an interest in the BRU was borne by ratepayers. This mechanism also required ML&P to use revenue from third-party natural gas sales as an offset against the BRU revenue requirement used to annually adjust the GTP.[308]

Under the BRU field operating agreements, if one owner does not take all of its share of the BRU field production, the other owners can take the underlifted gas for

their purposes and compensate the underlifting owner. In 2004, ML&P received $16 million in settlement of its 2003 BRU underlift. We authorized ML&P to utilize a portion of this money to remove a BRU related deferred asset, and the remainder to pay for its share of the 2005, 2006, and part of 2007 planned BRU capital improvements.[309] In 2005, ML&P received almost $20 million in settlement of its 2004 BRU underlift. We authorized ML&P to utilize those funds to pay for its share of the remaining 2007, 2008, 2009, 2010, and part of 2011 planned BRU capital improvements.[310]

In 2006, ML&P received $22,950,406 in settlement of its 2005 underlift. ML&P requested permission to loan this amount plus interest earnings for a total of $23,530,064 to its electric fund for replacement of Generation Unit No. 3. ML&P proposed that loan repayments, including interest, from its electric fund to its gas fund would be placed in a restricted future gas purchase (FGP) account. The FGP account would be used to offset the cost of gas purchased as BRU field production declines. We granted ML&P's request for this use of its 2005 underlift settlement.[311]

In 2007, a rapid increase in the market price of gas threatened to result in a negative GTP for ML&P. ML&P asked for permission to modify its GTP calculation to remove third-party sales revenue and to create a deferred regulatory liability from gas sales (DRLGS) account in which to capture that revenue. Interest and principal of the DRLGS account would be used to fund ML&P's share of BRU capital projects and the

future purchase of gas from other producers. We approved modification of the GTP calculation methodology and creation of the DRLGS account as requested by ML&P.[312]

In 2013, ML&P reported that it had placed nearly $130 million into the DRLGS account, and used approximately $60 million of that amount to fund its share of BRU capital projects. ML&P requested to use $5.5 million of the $70 million DRLGS balance to off-set a projected revenue deficiency.[313] We did not reach a decision on this proposed use of the DRLGS balance and denied a related request by Providence to use the DRLGS balance as an offset against ML&P's rate base.[314]

ML&P filed a petition in 2014 seeking permission to use a portion of the DRLGS balance to fund its BRU ARO through December 31, 2013, and to modify its GTP to include an ARO surcharge equal to the annual ARO booked under current accounting standards. ML&P proposed using $6,208,891 of the DRLGS balance to create an ARO sinking fund, and then to add money recovered through the ARO surcharge to that fund. The ARO fund will be used to pay ML&P's share of BRU dismantlement, removal, and restoration (DR&R) costs required at the time of well or field abandonment. We granted ML&P's petition.[315]

In 2016, ML&P and Chugach jointly filed a petition for authority to acquire ConocoPhillips Alaska, Inc.'s (CPAI) one-third interest in the BRU for $152 million. Under

Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

this proposal, ML&P would acquire 70% of CPAI's interest for $106.4 million and Chugach would acquire 30% of CPAI's interest for $45.6 million. ML&P proposed to pay for its share of this purchase with $13.2 million of CPAI underlift obligations owed to ML&P related to BRU operation, the entire DRLGS fund balance which was $68.9 million as of December 31, 2015, the entire FGP account balance which was $18.0 million as of December 31, 2015, and approximately $6.2 million from the ML&P gas fund unrestricted cash reserves. We approved the proposed ML&P and Chugach acquisition of the CPAI interest in the BRU, and ML&P's proposal for financing its share of this acquisition.[316]

In concluding its purchase of CPAI's BRU interest, ML&P actually used the $13.2 million in underlift settlement, $61 million from the DRLGS account, $18.2 million from the FGP account, and $11.5 million of gas fund equity. ML&P requested a modification to the return portion of its GTP calculation from a debt service coverage methodology to a rate base rate of return methodology. We required ML&P to use the remaining $9.1 million DRLGS balance in funding its acquisition of CPAI's interest in the BRU, and allowed ML&P to use the rate base rate of return methodology for calculating the return on the remaining $2.4 million equity investment in the acquisition. After acquiring CPAI's interest in the BRU, ML&P owns a 56.67% interest in the BRU leases down to 7,000 feet, and 80% of the BRU leases below 7,000 feet. Chugach owns 10% of the BRU leases down to 7,000 feet and 20% of the BRU leases below 7,000 feet.[317]

Amended and Restated BRU Fuel Agreement

With the transaction at issue in Dockets U-19-020 and U-19-021, ML&P will be selling its entire interest in the BRU to Chugach.[318] Chugach's use of this asset was

[316]Order U-16-012(14) at 19.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

to be governed by the BRU Fuel Agreement.[319] The BRU Fuel Agreement required Chugach to use the share of BRU gas acquired from ML&P through 2033 to serve North District ratepayers at a price consistent with the current ML&P GTP calculation, with revenue from any excess gas sold and the revenue placed in the DRLGS account for the benefit of North District ratepayers. Beginning January 1, 2034, Chugach will be allowed to utilize BRU gas on a system-wide basis for the benefit of all ratepayers.[320] Chugach asserts that this allocation is required to ensure that neither North District nor South District ratepayers "should be seen as achieving a major benefit (or cost) at the expense of the other as a result of the Transaction."[321]

Providence expressed concern that the BRU Fuel Agreement did not adequately compensate North District ratepayers for their capital contribution to ML&P's interest in the BRU.[322] The Original Stipulation, to which Providence is a party, replaced the BRU Fuel Agreement with a new agreement entitled the *Amended and Restated BRU Fuel Agreement* (Restated BRU Agreement).[323] The Restated BRU Agreement addresses many of Providence's concerns by requiring Chugach to account for the gas and costs of the BRU interests acquired from ML&P separate from the BRU interest Chugach acquired pre-transaction for the economic life of the BRU.[324] All benefits and costs of the BRU interest Chugach is acquiring from ML&P are allocated to North District ratepayers, and all benefits and costs of the BRU interest Chugach acquired pre-transaction are allocated to South District ratepayers. The Restated BRU Agreement

establishes a proxy market price for BRU gas sales to third-parties and for inter-District gas transfers. Upon making third-party sales or inter-District transfers of BRU gas, Chugach is required to seek our permission to either flow the revenue achieved through the COPA for the benefiting District or into the DRLGS account for the benefiting District.[325]

ML&P witness Reed testified that the Original Stipulation terms related to the BRU were intended to recognize ML&P ratepayer contributions to the BRU and return that value to them.[326] ML&P has quantified the net present value of ratepayer contribution to ML&P BRU plant in service as of December 31, 2018, as being $136,002,239. This amount represents funds that should have been used to reduce ML&P ratepayer rates under the APUC decision in Order U-96-036(6). This rate reduction was postponed by our later decisions allowing ML&P to use these funds to benefit future ratepayers. We recognize the equitable claim of ML&P ratepayers to receive the benefit of this contribution.

However, we find that the methodology proposed in the Restated BRU Agreement does not reasonably accomplish return of this contribution to the North District ratepayers who should receive it. The Restated BRU Agreement, by its terms, will require Chugach to maintain separate North District and South District COPA filings for the economic life of the BRU. This will necessarily reduce the regulatory savings projected to support our approval of this transaction.[327]

The separate accounting for North District and South District interests in the BRU will also significantly complicate Chugach's management of the BRU and its generation system. For example, North District ratepayers' interest in the BRU may justify

[325]Original Stipulation, Exhibit 4 at 2-3, as corrected by *Notice of Filing Corrected Stipulation Exhibit 4*, filed November 5, 2019.

[326]Dockets U-19-020 and U-19-021 Hearing, Tr. 2954.

[327]T-15 (Lovas Direct) at 21-22.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

an accelerated investment and production management plan in order to have excess gas available for sale or inter-District transfers. South District ratepayers' interest may justify a less aggressive investment and production management plan in order to extend the period lower cost BRU gas is available to reduce market price gas purchases for a longer period of time.

Also, the cost of gas can directly affect generation dispatch schedules, and determination of whether natural gas fueled units should be refurbished or retired. The differential gas price for North District load and South District load could easily create conflict in generation dispatch schedules and long-term generation planning. If these decisions are to be left to the Chugach member elected board of directors, then we have to consider that the North District has less than half the number of ratepayers as the number of ratepayers in the South District. This could lead to systematic discrimination against the interests of North District ratepayers.

The allocation benefits of the Restated BRU Agreement are necessarily defined by how much gas is ultimately produced from the BRU and the cost of producing that gas. Neither of these variables can be determined with any degree of certainty at this time. Therefore the location based cost and benefit allocation portions of the Restated BRU Agreement are rejected as being unduly discriminatory under AS 42.05.391(a). We further find that if the transaction closes it would be unreasonable for Chugach to manage the BRU as if there were two separate ownership interests. Pursuant to the authority granted by AS 42.05.431(a), our approval of the transaction under which Chugach acquires most ML&P assets is specifically conditioned on the requirement that Chugach propose a single COPA calculation, including a unified GTP for BRU gas, applicable to North District and South District ratepayers. This single COPA calculation will be modified on ratepayer bills by the RRR credit and by the BRU contributed capital surcharge and credit discussed below.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

With these findings, we do not reject the Restated BRU Agreement in its entirety. One of the issues we specifically opened Docket U-18-102 to address was the pricing of BRU gas used for generating electric energy sold at wholesale, including economy energy sales.[328] ML&P witness Henderson stated that pricing BRU gas for economy energy sales at the ML&P GTP was reasonable, but she did not otherwise address our concerns expressed in Order U-18-102(1) about sharing BRU ownership benefits with ratepayers who did not share in the risks of ownership and the distorted price signals resulting from this practice. Henderson agreed that market pricing of BRU gas for economy energy sales could also be appropriate.[329]

Providence witness Garrett testified that so long as the margins earned on economy energy sales were sufficiently great to return all incremental costs, including the market value for any BRU gas used, and a margin on generation, the margins were adequate. However, Garrett testified that currently ML&P does not maintain adequate records to determine if this is true for all economy energy sales and that a process needs to be implemented to make the pricing of economy energy sales more transparent so it could be determined that no non-economic economy energy sales are made.[330] AG witness Smith generally took a position similar to that taken by Garrett, and raised additional issues related to the potential impact on the competitive economy energy market of ML&P pricing economy energy based on the GTP for BRU gas.[331]

Chugach witnesses Fouts and Miller testified that if Chugach acquired ML&P's interest in the BRU, it did not plan on making any economy energy sales with

[328]Order U-18-102(1) at 4-10.

[329]T-6 (Henderson Direct) at 8.

[330]T-2 (Garrett Direct) at 16-20.

[331]T-1 (Smith Testimony) at 24-33.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

BRU gas or any third-party gas sales.[332] Chugach witness Miller testified that if circumstances arose where Chugach did make third-party gas sales or economy energy sales using BRU gas, it would price that gas at market and place the revenue in the DRLGS fund.[333]

No party has convinced us that use of the BRU gas GTP in pricing economy energy sales is reasonable. No party has argued that the use of a market price for gas used in generating economy energy is unreasonable, regardless of whether the gas was produced from a utility ownership interest in the BRU or gas actually purchased from other producers in the market. We find that pricing economy energy sales based on the cost-based GTP calculation for gas produced from the generating utility's ownership interest in a natural gas production asset is an unreasonable practice.

We find that the market value proxy methodology set out in Section 2.05 of the Restated BRU Agreement and agreed to by Chugach, the MOA, and Providence establishes a reasonable pricing mechanism for gas produced from the generating utility's ownership interest in a natural gas production asset and used to make economy energy sales. We note that although the AG did not sign on to the Original Stipulation and objected to portions of the Restated BRU Agreement, the AG did not oppose use of Section 2.05 market value proxy.[334] We further find that the limitation on sales in Section 2.03 of the Restated BRU Agreement provides a reasonable test for the validity of the market value proxy.

Pursuant to the authority granted by AS 42.05.431(a), we determine that economy energy sales by ML&P or Chugach that utilize gas produced from their respective ownership interests in the BRU must include the market value proxy in Section

2.05 of the Restated BRU Agreement as part of the incremental cost of the economy energy sale transaction. We further require ML&P and Chugach to utilize the process set out in Section 2.03 of the Restated BRU Agreement before utilizing gas produced from their interest in the BRU for making an economy energy sale. These requirements are effective the date of this order. To the extent compliance with these requirements result in ML&P or Chugach needing to modify their tariffs, such modification shall be filed as a tariff advice letter and not in these dockets.

Rebate of BRU Contributed Capital

The MOA has identified $136 million in ratepayer contributed capital in the Gas Fund that was accumulated through the collection of electric rates from what will become the North District. This capital was collected in anticipation of provision of future service at favorable rates. Ordinarily, ratepayer contributed capital is collected from specific ratepayers to construct facilities or plant which continue to serve those ratepayers even if subsequently sold to another utility. In this case, the contributed capital was accumulated to obtain access to a resource that would be consumed into the future. Therefore, the full benefit of that contribution will not continue to flow to the class of ratepayers that contributed the capital upon sale of the resource.

To remedy this mismatch between historical capital contributions and future benefits, we require[335] Chugach, by tariff, to rebate the remaining value of the net capital contribution to the North District over a period of 10 years and with a 5% interest. We recognize that the $136 million figure is not the current net book value of contributed BRU assets. However, we also recognize that Chugach will be receiving funds from the restricted DRLGS and FGP accounts that represent additional ML&P ratepayer contributions of capital. Therefore, we find that requiring rebate of the $136,002,239 contributed capital to North District ratepayers is more equitable and reasonable than the

[335] AS 42.05.431(a).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

allocation of costs and benefits required by the Restated BRU Agreement. This will also allow Chugach to operate its interests in the BRU and its generation fleet as a unified owner, which should result in achieving the benefits to ratepayers projected for this transaction.

We instruct Chugach on how to account for the $136 million rebate. The amortization of the $136 million, with carrying costs, will be handled through equal yearly sums that are paid or recovered in a per kWh surcharge/contra-cost basis. Chugach will add a line item to its COPA for South District ratepayers that reflects a per kWh surcharge for the annual amortization amount. Chugach will add a line item to its COPA for the North District ratepayers that reflects a per kWh rebate of the annual amortization. The formula to calculate this surcharge and rebate is discussed below.

We recognize that the per kWh amount will not be fixed at a single per kWh amount over the next 10 years, given the uncertainties of load from year to year, which may result in an under- or over-collection and payment. As a result, Chugach will be required to maintain a separate balancing account for the annual amortization amounts and report, in a separate schedule with its quarterly COPA filings, the balancing account balance and the balance of the $136 million rebate, with carrying costs. The balancing account will reflect:

- debit entries equal to the equal monthly amounts of the annual amortization amount, and
- credit entries equal to the monthly rebate amount paid to North District ratepayers.

Any under-collection of the previous quarter's amortization amount will increase the balancing account and be used to increase the surcharge or credit over the next quarter and any over-collection will decrease the balancing account and be used to

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

decrease the surcharge or credit. The following formula will be used to calculate the surcharge:

$$Surcharge = \frac{(AA/4) + B}{SQS}$$

Where:

AA = the annual amortization amount
B = the previous end of quarter balancing account balance
SQS = projected quarterly kWh sales for the South District

We recognize that the kWh sales for each District will be different; therefore, the following formula will be used to calculate the rebate:

$$Rebate = \frac{(AA/4) + B}{NQS}$$

Where:

AA = the annual amortization amount
B = the previous end of quarter balancing account balance
NQS = projected quarterly kWh sales for the North District

The annual amortization amount is divided by four to reflect the quarterly amount used in calculating the surcharge/rebate. The projected quarterly kWh sales will be for the same period as the sales used in Chugach's COPA surcharge calculation.

We require Chugach to file tariff sheets, as a new tariff advice filing, to reflect this surcharge/rebate mechanism when it files its unified COPA filing.

Asset Purchase and Sale Agreement

The APSA serves as the primary agreement between the MOA and Chugach governing the transaction at issue in Dockets U-19-020 and U-19-021, with the Eklutna PPA, PILT Agreement, and Restated BRU Agreement serving as ancillary agreements.[336] The MOA and Chugach have not specifically requested our approval of

[336] T-8 (Miller Direct) at 12, 17 n.6, Exhibit AWM-03 at 9.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

the APSA.[337] However, the APSA is the agreement under which ML&P proposes to discontinue the public utility service responsibilities assigned to it by Certificate No. 121, and transfer those responsibilities to Chugach.[338] Under AS 42.50.281, we clearly have authority over the terms of any such transfer. Closing of the APSA is also contingent on our granting approval to a number of requests that will affect Chugach rates long into the future.[339] We clearly have the authority to ensure that Chugach's rates are just, reasonable, and not unreasonably discriminatory.[340] Therefore, our approval of the APSA is essential for this transaction to proceed.

Article I of the APSA includes the definitions used in this agreement.[341] Article II identifies the assets and liabilities being acquired by Chugach and the assets and liabilities being retained by the MOA. It also identifies certain obligations related to the purchase price and the purchase price dispute resolution mechanisms.[342] Article III addresses the transaction closing process and closing deliverables.[343] Article IV lists the representations and warranties offered by the MOA, and Article V lists the representations and warranties offered by Chugach.[344] Article VI addresses the covenants between the MOA and Chugach regarding behavior during the time the transaction is pending, and Article VII addresses the conditions that have to be met for the transaction to close.[345]

Article VIII addresses terms of the APSA that survive closing, and continuing indemnification obligations between the MOA and Chugach.[346] Article IX identifies how the APSA can be terminated before closing, and Article X includes miscellaneous terms.[347]

Most terms of the APSA do not raise issues under AS 42.05, and we do not address those terms further in this order. However, the terms identified below must be addressed.

APSA Section 6.16(a)

This subsection states in its entirety:

> [Chugach] will take such actions, including the use of Cost of Power and Non-Cost of Power ratemaking allocation methods that are consistent with those used by [the MOA] prior to the Closing, as are reasonably necessary and appropriate to ensure that the Non-Cost of Power Adjustment rates for any Persons that are ratepayers of ML&P or [the MOA] as of the Closing Date will not increase as a result of the transactions contemplated by this Agreement.[348]

We do not accept the implied premise in this section that the parties to this transaction can, in any way, limit our ability to establish the rates Chugach charges for public utility service under the standards set out in AS 42.05 and our regulations. We note that Chugach itself has a legal obligation to charge rates that are just and reasonable, and not unreasonably discriminatory.[349] We see no public benefit in mandating, as this Section 6.16(a) does, that Chugach manipulate cost allocation principles to meet an artificial rate-making goal. Our approval required for the APSA to close is specifically conditioned on Section 6.16(a) not being part of the approved APSA.

[346]T-8 (Miller Direct), Exhibit AWM-3 at 88-95.

[347]T-8 (Miller Direct), Exhibit AWM-3 at 95-102.

APSA Section 6.21

This section states in its entirety:

> (a) [Chugach] covenants and agrees that it will comply in full with all applicable requirements of Ordinance No. 2018-1(S) of the Anchorage Assembly (the **Ordinance**) and all applicable requirements of the ballot proposition presented to the voters of [the MOA] in connection with the Ordinance ("**Proposition 10**"). Without limiting the foregoing or any other provision of this Agreement, in furtherance of the requirements of the Ordinance and Proposition 10, [Chugach] covenants and agrees that, for a period of ten (10) years after the Closing Date, [Chugach] will provide to [the MOA], not later than thirty (30) days following each anniversary of the Closing Date, a written confirmation from a duly authorized officer of [Chugach] in the form attached hereto as Exhibit O
>
> (b) [Chugach] covenants and agrees that the rights and remedies of [the MOA] for any noncompliance by [Chugach] with the requirements of the Ordinance and Proposition 10 and with the requirements of this Section 6.21 shall include having such provision specifically enforced by any court having equity jurisdiction, it being acknowledged and agreed that any such breach or threatened breach shall cause irreparable injury to [the MOA] and that money damages would not provide an adequate remedy to [the MOA].[350]

Ordinance No. 2018-1(S) includes the following provision: "**No Increase in Base Rates.** Base rates for existing ML&P and Chugach Electric ratepayers would not increase as a result of the transaction."[351] Proposition 10 includes the following provision: "**No Increase in Base Rates.** Base rates for existing ML&P and Chugach Electric ratepayers would not increase as a result of the transaction."[352]

For the reasons discussed above, these quoted terms prohibiting base rate increases as a result of the transaction are inconsistent with our obligations and Chugach's obligations under AS 42.05. We are specifically mandated by AS 42.05.431(a) to ensure that Chugach's rates are sufficient to meet its debt covenants. We cannot allow Chugach to be subject to legal claims under Section 6.21(b) for specific performance of

[350]T-8 (Miller Direct), Exhibit AWM-03 at 80 (emphasis in original).

[351]T-9 (Thibert Direct), Exhibit LDT-02 at 3.

[352]Dockets U-19-020 and U-19-021 Hearing, Exhibit H-36 at 2.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

the requirements of Ordinance No. 2018-1(S) or Proposition 10, when such performance may put Chugach's financial health at risk. To be clear, we declare under our authority in AS 42.05.141(a)(3) that any covenant by Chugach to comply with the rate provisions of Ordinance No. 2018-1(S) or Proposition 10 quoted above is an unreasonable practice that is void and unenforceable. Our approval required for the APSA to close is specifically conditioned on Section 6.21 not being part of the approved APSA. Additionally, our approval required for the APSA to close is specifically conditioned on the requirement that by the act of proceeding to closure of this transaction the MOA specifically waiving any and all rights to enforce these rate provisions of Ordinance No. 2018-1(S) and Proposition 10 under any other enforcement mechanism.

APSA Section 8.02(d)

This section states subject to the other terms of Article VIII and the appropriation of funds, the MOA will indemnify Chugach for any losses incurred by reason of:

> (d) the Assumed Environmental Liabilities, to the extent, if any, that Losses incurred by [Chugach] in connection with the same prior to the tenth (10th) anniversary of the Closing Date exceed the amount of $25,000,000 in the aggregate, but not in any event including any Environmental Claims, Liabilities, or Losses arising directly out of any asset retirement obligations or arising solely by reason of [Chugach's] ownership and operation of the Purchased Assets following the Closing Date.[353]

In the APSA, the term Assumed Environmental Liabilities is defined as "means Environmental Claims and Liabilities under Environmental Laws that, in each case, are directly related to the Purchased Assets (including violations of Environmental Laws and the presence or Release of Hazardous Materials at, in, or under or migrating from or to, the Purchased Assets)." The terms "Environmental Claims" and "Environmental Laws" are very broadly defined in the APSA.[354]

[353]T-8 (Miller Direct), Exhibit AWM-03 at 89.

[354]T-8 (Miller Direct), Exhibit AWM-03 at 10, 14-15.

Regulatory Commission of Alaska

Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

In its disclosure schedule 4.18, ML&P discloses that its Hank Nikkels Plant One, Operations and Dispatch Center, and Transformer Shop, all on East First Avenue, are listed as Open Contaminated Sites on the Alaska Department of Environmental Conservation Contaminated Sites Database. ML&P also discloses polychlorinated biphenyl (PCB) contaminated paint flaking off of Tank 1 at Plant 2, equipment containing PCB's, the possibility of asbestos materials and lead based paint in its older buildings, and a number of past violations of Environmental Law.[355]

Given the scope of known environmental liabilities, we are concerned about the level of environmental liability risk Chugach is taking on under the APSA and the relatively short period of time that the MOA is subject to indemnification if the cost of remediation exceeds $25 million. ML&P witness Henderson testified that remediation is required any time they open the asphalt at Plant One, and ML&P has no estimate of the cost of remediation.[356] It would be an unreasonable management practice under AS 42.05.141(a)(3) for Chugach not to take full advantage of the MOA's indemnification obligations under Section 8.02(d) by aggressively pursuing environmental remediation of the known and potential contamination related to the assets Chugach is acquiring from ML&P.

To alleviate our concerns related to this issue, we add the following conditions to our approval of the APSA:

1. Within 18 months of the transaction closing date, Chugach shall file with us a plan for remediating the contaminated sites disclosed by ML&P in the APSA. This plan must ensure that remediation activities are concluded before the tenth anniversary of the transaction closing date. To the extent remediation activity results in the DR&R of a Purchased Asset previously deemed retired by ML&P or now considered retired by Chugach, DR&R activity is acceptable.

[355]T-8 Miller Direct), Exhibit AWM-03 at 198-202.

[356]Dockets U-19-020 and U-19-021 Hearing, Tr. 3171-3172, 3177-3178

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

However, DR&R is not the primary goal of this requirement and this requirement does not create any ARO.

2. Within 18 months of the transaction closing date, Chugach shall file with us a plan for thoroughly investigating all ML&P assets being acquired through the transaction at issue in Docket U-19-020 to determine the existence of any environmental liabilities other than those disclosed by ML&P in the APSA. This investigation is to be concluded within one year of the date the plan is filed.

3. If the investigation required by paragraph 2 above results in the discovery of additional contaminated sites, Chugach shall file with us a plan for remediating such contaminated site before the tenth anniversary of the transaction closing date within 18 months of the date the contamination is discovered.

Public Interest

Chugach is specifically requesting permission to recover the acquisition premium being paid to the MOA for most of ML&P's assets through future rates.[357] As identified above, the recovery of an acquisition premium through an acquisition adjustment to rates is directly contrary to the requirements of AS 42.05.441(b), and can only be approved pursuant to an exemption granted pursuant to AS 42.05.711(d). Such exemption can only be granted if we find that it is in the public interest.[358] We have previously held that:

In evaluating acquisition adjustment, we begin with the standard set by AS 42.05.441(b). This statute provides, in pertinent part, that:

> In determining the value for rate-making purposes of public utility property used and useful in rendering service to the public, the commission shall be guided by acquisition cost or, if lower, the original cost of the property to the person first devoting it to public service.

This statute states a well-accepted ratemaking principle that acquisition adjustments will not generally be allowed in a utility's rate base because the ratepayers should not be

[357]T-8 (Miller Direct) at 6.

[358]AS 42.05.711(d).

Regulatory Commission of Alaska

required to pay the cost of speculation in utility assets. We have recognized an exception to the general rule against acquisition adjustments when the ratepayers will benefit, and the utility has demonstrated specific, tangible benefits in an amount at least equal to the cost of the acquisition adjustment. We have disallowed acquisition adjustments when alleged benefits are speculative or derived from causes other than the acquisition.[359]

To be permissibly recovered in rates a utility must generally show that ratepayers would be worse off but for the acquisition and its attendant acquisition adjustment. In the instant case both Chugach and ML&P pre-transaction ratepayers will shoulder a portion of the acquisition adjustment if the transaction closes. We must therefore assess whether net savings from the transaction, after accounting for the acquisition adjustment's inclusion in rates and the costs of the transaction, are favorable for each set of ratepayers.

Chugach did not provide the commission with its own assessment of rates. Instead, Chugach initially provided only a comparative assessment of base rate revenue requirements.[360] That is, Chugach's initial analysis compares a *portion* of the revenue requirements of Chugach and ML&P, as if they were continued to be separately owned on a stand-alone basis, with a portion of the revenue requirement of the combined utility. This fractional analysis is deficient in a number of respects.

As an initial matter, we note that Chugach implicitly presumes that if the combined utility can reduce its cost structure overall then consumers within each service

territory will necessarily benefit. This clearly is not a logical consequence of the transaction. More importantly, the North District versus South District rate discrimination provisions that the PILT Agreement and Restated BRU Agreement both embody raise questions of whether ratepayers in each service territory will indeed both benefit. Savings associated with the combined-utility revenue requirement does not shed light on how those savings, let alone total utility costs, might be allocated across ratepayers. It is precisely the allocation of costs that must be addressed if we are to be able to find that the proposed acquisition adjustment can be recovered in rates without harming the pre-transaction ratepayers of the acquired, or acquiring, utilities.

Moreover, as previously indicated, Chugach's initial analysis did not include the COPA portion of each separate, nor of the combined, utility revenue requirements. Our acquisition adjustment precedent is concerned with the full rate impacts on consumers – not a portion of the rates that they pay. This is problematic especially given that the Restated BRU Agreement is essentially concerned only with securing our approval of discriminatory rate treatment of the benefits associated with comparatively low cost-of-service BRU gas. It was not helpful to our deliberations that Chugach declined to provide their intended approach to having two separate COPAs – one for its North District ratepayers and one for its South District ratepayers. This raises the possibility of any number of compensating measures that might be proposed. Heat rates of particular generation units, economy energy margins, or wheeling revenue might also be differentially allocated across Chugach's North District and South District. As discussed above, we cannot approve the Restated BRU Agreement discriminatory cost and benefit allocation terms.

Nevertheless at hearing Chugach asserted, in essence, that the presence of global base rate savings would ensure that all consumers might be made better off (or

Regulatory Commission of Alaska

Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

at least be left unharmed).[361] Given the existence of sufficient savings, and our ability to make rates, we could defer to the future the means by which it would ensure that the transaction would satisfy our acquisition adjustment tests.[362] While such an outcome is logically possible, such a strategy is practically fraught with difficulty. Testing future proposed rates against what hypothetically would have occurred had the transaction not proceeded is without precedent.

We asked Chugach and ML&P, at a number of different times and in a number of different ways, to supplement the record to address our concerns. Unfortunately, none of the responses provided direct insight into the rate consequences of the proposed acquisition adjustment. We briefly review our requests and the responses of Chugach and ML&P.

First, we asked for all analyses of rates that had been presented to the Chugach board or the MOA Assembly.[363] Responses were filed and a portion of Chugach's response was marked as confidential.[364] No petition for classification of these records as confidential was filed under 3 AAC 48.045 and the status of these marked documents has not been resolved. Without disclosing the particulars of the filings, actual rate impacts of the transaction were not contained in the materials that were presented.

Second, we asked Chugach to estimate base rates, post-transaction, for the combined service territory using its current rate design.[365] Chugach complied with

Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

our request but specifically denied that the results would be indicative of future rates.[366] As well, that exercise was directed toward the original proposed transaction, rather than the transaction as modified by the Original Stipulation that we are asked to consider here. It is accordingly of little use in addressing whether the proposed acquisition adjustment may permissibly be recovered in rates.

Third, upon receiving the Original Stipulation, we asked Chugach to estimate transaction savings when the revenue requirements included COPA surcharges.[367] Among other things, we required Chugach to separate out the annual base rate portion of the revenue requirement for 2020 through 2034, and to identify costs that contributed to base rates and costs that contributed to COPA surcharges.[368]

Chugach filed the Strunk Model identified above in response to Order U-18-102(35). The Strunk Model consists of an Excel spreadsheet model that projects revenue requirements for the two stand-alone utilities and savings associated with the combined utility. Unfortunately, that filing is insufficient. Its approach to modeling total revenue requirements suffers from several important structural inadequacies for purposes of long term evaluation of the proposed transaction. The Strunk Model also does not allocate the savings of the combined utility between the North District and the South District and, in consequence, it provides no direct insight into whether the proposed acquisition adjustment is permissible. Finally – and most understandably – the Strunk Model does not reflect our findings regarding the BRU Fuel Agreement, the rate discrimination provisions of the PILT Agreement, or amortization of ML&P ratepayer

[366] *Chugach Electric Association, Inc.'s Notice of Compliance with Order U-18-102(36)/U-19-020(31)/U-19-021(31)*, filed November 5, 2019, Exhibit 1.

[367] Order U-18-102(35). This request was made after we received the NERA Settlement Model sponsored by Strunk, filed as the document identified by Bates No. CHU-020788 attached to *Chugach Electric Association, Inc.'s Filing in Compliance with Bench Order*, filed October 30, 2019 (in response to the Bench Order found at Dockets U-19-020 and U-19-021 Hearing, Tr. 2844).

contributed capital in the BRU. We explain the changes that we have made to the Strunk Model so that we could analyze the proposed acquisition adjustment, consistent with our earlier findings.

Adjustments to the Strunk Model

No model can perfectly project future events or mimic reality. Important deficiencies in the Strunk Model have been corrected to enable reasonable insight into whether the proposed acquisition adjustment is permissible. Every change made to the Strunk Model is detailed in the attached Appendix A[369] and accompanying Schedules. The following provides a high level overview of the major issues and approaches we have taken.

Fuel Costs and the COPA Surcharge

The Strunk Model is particularly deficient in its approach to modeling fuel use for each of the stand-alone utilities as well as the combined utility. For the Chugach stand-alone case there is no breakout of fuel costs at all. Instead, fuel costs are subsumed within a single COPA figure that is held constant for each of the next 15 years. Meanwhile, for ML&P, BRU gas volumes were assumed to equal total ML&P needs.[370] This is inconsistent with the projections of BRU production provided by ML&P and Chugach,[371] and ignores that ML&P will need to make third-party gas purchases during the forecast period.

These simplified assumptions concerning utility gas costs are particularly problematic. Fuel is the major component of the COPA surcharge for both utilities. BRU

[369]Appendix A is entitled *RCA Modelling and Analysis*.

Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

gas is expected to confer important benefits to ratepayers under the Restated BRU Agreement, yet BRU gas production is expected by both Chugach and ML&P to decline over the next fifteen years.[372] Such declines will need to be met with third-party fuel purchases. Meanwhile, third-party fuel costs are affected by gas contract prices and electricity demand (which the Strunk Model otherwise shows); neither source of variability in overall cost structure is reflected.

We have enhanced the Strunk Model's projections of COPA costs by explicitly modeling ML&P and Chugach stand-alone gas consumption, as well as combined-utility gas consumption. A model of BRU gas production costs, reflecting the BRU gas production forecasts provided by ML&P and Chugach, and relying on BRU cost data contained in the Strunk Model, addresses the first source of natural gas upon which Chugach and ML&P are assumed to rely. Remaining gas demand, reflecting the gas needs of each utility, is assumed to be met through third-party gas purchases that are priced consistently with Chugach's most recently-approved gas supply agreement.[373] Savings associated with the reduced gas needs of the combined utility, which reflect merit order dispatch across the enlarged service area, are calculated from the work papers underlying Warner's Hearing Exhibits JW-2 and consistent with his findings.[374] The combined-utility COPA reflects our finding rejecting the Restated BRU Agreement cost and gas allocation provisions. The data supplied by Warner indicate that the utilities would have saved approximately $5 - $7 million per year in natural gas costs to meet the

combined native load from unified operations.[375] This is roughly on par with the annual personnel savings that Chugach expects to flow from the acquisition.

Our finding – that it is appropriate to consider dispatch savings that stem from the transaction – is at odds with Chugach's position. Lovas testified that Chugach did not ascribe dispatch savings to the transaction because a power pool that would result in those savings being achieved was expected to be formed with or without the acquisition's approval.[376] As explained below in our discussion on the Chugach and MEA tight power pool, we find – absent our action in these Dockets – the likelihood of a tight power pool being formed in the near future is speculative. Meanwhile, we have particular confidence that material savings from security-constrained economic dispatch across the North District and South District are real and durable.[377] These savings flow from simple engineering optimization rather than the vagaries of personnel retention policies and union agreements.

There are numerous other non-fuel cost elements in both the Chugach and ML&P COPA calculations. For the ML&P COPA, we have generally taken these cost elements from data contained in the Strunk Model and have held them constant. For the Chugach COPA, because no similar data projections are available, we have taken the non-fuel portions of Chugach's COPA calculation from actual data for mid-2018 to mid-2019 and assumed these to be constant for the modeled period. Our COPA calculations maintain maximum possible consistency with the Strunk Model, reflect the Lovas

[375]T-31 (Warner Direct) at Exhibit JW-2.

[376]T-15 (Lovas Direct) at 24.

[377]We acknowledge that the precise estimate described here is a function of the third-party natural gas prices paid and native load of the North and South Districts during a discrete historical period. This does not discount our confidence in material available savings, however, given that they are, in the first instance, a function of operational engineering.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501

assessment of cost savings,[378] while avoiding double counting any particular cost element. Contra-costs (revenues that offset costs) associated with economy energy margins and wheeling are benchmarked off data from mid-2018 to mid-2019, with appropriate adjustments to reflect the merging of Chugach and ML&P interests.

ML&P's Cost of Capital

As Strunk testified, the interest rate on financing after Chugach closes the acquisition will have a major effect on the ultimate savings that the transaction will deliver.[379] The Strunk Model, however, "bakes in" savings from the transaction through its method of calculating ML&P's stand-alone base rate revenue requirements. It does so by assuming that that ML&P's weighted average cost of capital (WACC) should be held constant at 6.75%[380] – a figure that is not otherwise supported or justified – and simultaneously assumes that ML&P does not have a major bond financing to undertake if the transaction does not close. Neither of these approaches are valid in light of currently known facts. It is thus concerning that in the Strunk Model a more favorable interest rate environment has the effect of reducing the combined-utility revenue requirement but does not similarly affect the ML&P stand-alone revenue requirement.

ML&P's last adjudicated rate case provided a WACC of 6.33%.[381] Had this WACC been assumed for the ML&P stand-alone revenue requirements going forward the savings associated with the acquisition would necessarily have been materially smaller.

[378]T-15 (Lovas Direct) at 26; T-19 (Strunk Direct) at 29; Dockets U-19-020 and U-19-021 Hearing, Tr. 1499. *Chugach Electric Association, Inc.'s Filing in Compliance With Bench Order*, filed October 30, 2019, *Cost Savings Settlement Model (Bates No. CHU-020787)* (Lovas Settlement Model).

[381]Order U-16-094(9) at 41.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

This is not to say, for modeling purposes, that an adjustment to the WACC might not be justified. If one were to assume that the most recently-adjudicated return on equity of 10.7% should be held constant and that the dividend restriction remains in effect, then ML&P's thicker equity percentage would imply a higher WACC.[382]

However, ML&P's modeled WACC should at minimum reflect known facts, and for savings assessment purposes the modeled ML&P WACC should reflect the same interest environment that Chugach will face when it is time to finance their acquisition. In the Bonds tab of the Strunk Model, $192 million[383] bond balance and a $25 million[384] new debt were assumed to bear a 5%[385] interest rate. The $192 million appears to reflect borrowing related to the Plant 2A construction.[386] That borrowing, however, is currently managed in a short-term arrangement; it has not yet been financed with revenue bonds.[387] Accordingly, we find that for modeling transaction savings the $192 million of debt associated with the construction of Plant 2A will be financed if the Chugach

[382] According to CHU-020789, sheet "ML&P EMP" cell D157, ML&P had 38.66% equity in 2019. As noted above, ML&P reported an achieved 2019 equity level of 37%. Both of these are greater than the 35.5% equity level on which ML&P's WACC of 6.33% was adjudicated. Order U-16-094(9) at 41.

[386] Municipality of Anchorage Comprehensive Annual Financial Report, for the fiscal year ending December 31, 2017, at 77. "In April 2015, the Electric Utility redeemed all outstanding commercial paper and entered into a short-term borrowing agreement with Wells Fargo Municipal Capital Strategies, LLC, herein referred to as the Direct Drawdown Purchase Program (DDPP). The DDPP was used by the Electric Utility to complete construction of Generation Plant 2A. At December 31, 2016 the outstanding balance of DDPP notes payable was $181,000,000. On November 30, 2017, the loan term was extended to November 29, 2019. At December 31, 2017 the balance was $191,900,000 and long-term notes payable on the Utility's Statement of Net Position, as the principal is not expected to be paid within one year".

[387] Municipality of Anchorage Comprehensive Annual Financial Report, for the fiscal year ending December 31, 2018, shows a total outstanding indebtedness of $315,505,000 (p. 78). This is in line with the previous year's indebtedness, allowing us to conclude that the nearly $192 million held by Wells Fargo has not yet been financed.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

acquisition does not proceed. Meanwhile, the $25 million of additional new debt would also be financed at prevailing interest rates.

It is unreasonable to suppose that ML&P would be forced to pay higher interest rates on roughly $217 million in revenue bonds than Chugach would for over $700 million. ML&P is not only less leveraged than Chugach will be, but it also has access to tax-exempt bonding authority. Nevertheless, this is exactly what the Strunk Model does. Given the low interest rate environment cited in the proceeding as a key consideration for the transaction and the 4.10% interest rate assumed for the long-term transaction related debt, the 5% interest rate associated with Plant 2A debt is arbitrary and unsupportable for considering the ML&P's stand-alone costs.

Accordingly we revise the WACC that is to be used to generate the ML&P stand-alone revenue requirement. We do so by assuming that cost of debt for the roughly $217 million in new bonds will be financed at the same cost of debt as will apply to Chugach's financing of the transaction, while retaining the embedded cost of debt from ML&P's last rate case for roughly $300 million. ML&P's capital structure, as assessed by the Strunk model in 2019, and the previously adjudicated return on equity, result in WACC of 6.59%. This calculation detail is contained in Appendix A, at Schedule I.

Directionally our approach almost certainly overstates the savings associated with the acquisition, for reasons previously articulated. However, we have no basis for determining how much less costly ML&P's new tranche of debt might be.

PILT-MUSA

The Strunk Model assumes that PILT and MUSA payments to the MOA are the same and also equal to $8.9 million each and every year for the next 50 years.[388] As previously discussed, PILT and MUSA payments are not identical. Moreover, PILT payments, under the data assumptions contained in the Strunk Model itself, can be

[388]CHU-020789, PILT worksheet.

Regulatory Commission of Alaska

expected to decline during 2021-2034 along with net plant values. To correct this failure to known changes to MUSA and PILT payment obligations, we have calculated MUSA for the ML&P stand-alone revenue requirement, and PILT for the combined-utility revenue requirement.

Rebating Ratepayer Contributed Capital in BRU

We have found that the net value of capital that ML&P ratepayers have invested in the BRU should, as a matter of equity, should be amortized through the contra-cost and surcharge mechanism that we have described above. For the combined utility these adjustments to the COPA are reflected in our assessment of effective COPA rates for both North District and South District ratepayers.

Calculating Ratepayer Savings

The Strunk Model calculates the net plant value of savings associated with the transaction by comparing the sum of the yearly stand-alone total revenue requirements for Chugach and ML&P with yearly total revenue requirements post-transaction for the period 2020-2034. We make several necessary modifications to this calculation. First, because the transaction is unlikely to close until the latter half of this year we calculate savings from the COPA portion of the relevant requirements beginning January 1, 2021. Accordingly, we consider the net plant value of savings over a maximum period of fourteen years, because 2034 is the end point of the Strunk Model's cost projections. Second, because base rates for the combined utility will be subject to a rate moratorium until January 1, 2024, we calculate no transaction savings associated with base rates before that time. This is because we find that there can be no direct transaction-induced base rate savings for ratepayers if any achieved savings are instead retained by Chugach during this period.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

Allocating Costs of the Combined Utility

Some allocation of base rate costs to the North District and South District of the post-transaction Chugach service territory is required if we are to assess possible ratepayer savings to North District and South District ratepayers. Normally a particular rate design would allocate total costs across different ratepayer classes within the service area. The relative prevalence of ratepayers within the North District and South District of the combined Chugach service area would then permit assessment of whether the proposed acquisition adjustment was consistent with our precedent.

No party sponsored a rate design for our consideration. Instead, Chugach insisted that the tool that we require to assess whether the proposed acquisition adjustment is permissible (a rate design) is something that will be considered in a future rate case.[389] Doing so saddles a future commission with the task of protecting ratepayers from a potentially inappropriate acquisition adjustment after it has already been granted. ML&P has acknowledged that once this transaction closes, it cannot be undone and utility service returned to pre-transaction conditions.[390]

The representation made to the voters to not raise base rates has perhaps hindered Chugach's ability to specify particular cost allocations and rate design, and the distribution of acquisition adjustment costs and transaction savings that would result. We face no such constraint. To satisfy ourselves that the proposed acquisition adjustment is permissible, we allocate the combined revenue requirement across the two service territories in the simplest manner possible: according to load ratio share. That is, in every year we allocate to each District the share of the combined revenue requirement -- both base rates and COPA surcharge -- according to the ratio of the utility's projected native load to total native load of the combined utility. Doing so leaves open the question of how

[389]Dockets U-19-020 and U-19-021 Hearing, Tr. 2437-2441.

rates across ratepayer classes will be developed. We discuss this problem, and some parameters for how Chugach should address it in its next rate case, elsewhere in this order.

Model Results and Findings

Chugach has stressed that the net present value of savings to ratepayers considered collectively, discounted at 5%, was both positive and significant.[391] The net present value is a metric usually used to assess the current dollar sum of a stream of cash flows that are both positive and negative; it allows, for example, evaluation of whether a near-term investment (negative cash flow) is worthwhile given a subsequent stream of revenue (positive cash flow).

Total annual savings accruing to the acquisition are material and positive in each year of the analysis. This result is robust to different forecasts of BRU gas production, interest rates on the debt used to finance the transaction as high as 5.25%, and a 25% reduction in the level of projected personnel savings.

More importantly, given our precedent, annual savings remain positive for both North District and South District ratepayers under a range of credible future events. The two sets of figures, below, assume a financing interest rate of 4.1% and a 25% reduction in projected personnel savings.[392] They demonstrate both stand-alone and allocated combined-utility annual revenue requirements, and savings from the transaction (shaded areas), for ratepayers in the post-transaction North District and South District.

[391]T-8 (Miller Direct) at 7; T-19 (Strunk Direct) at 36, 49; Lovas Settlement Model at worksheets Cost Savings Model-Base, TAL-02, TAL-03.1, TAL-03.2, TAL-03.3. Dockets U-19-020 and U-19-021 Hearing, Tr. 126, 374, 834-836, 1071-1076, 1443, 1820.

[392]The transaction's personnel savings received considerable attention at hearing. We are not persuaded that projected savings will fully materialize. As Figures 1 and 2 demonstrate, however, both sets of ratepayers will benefit even if a significant portion of the personnel savings projected by Chugach does not materialize.

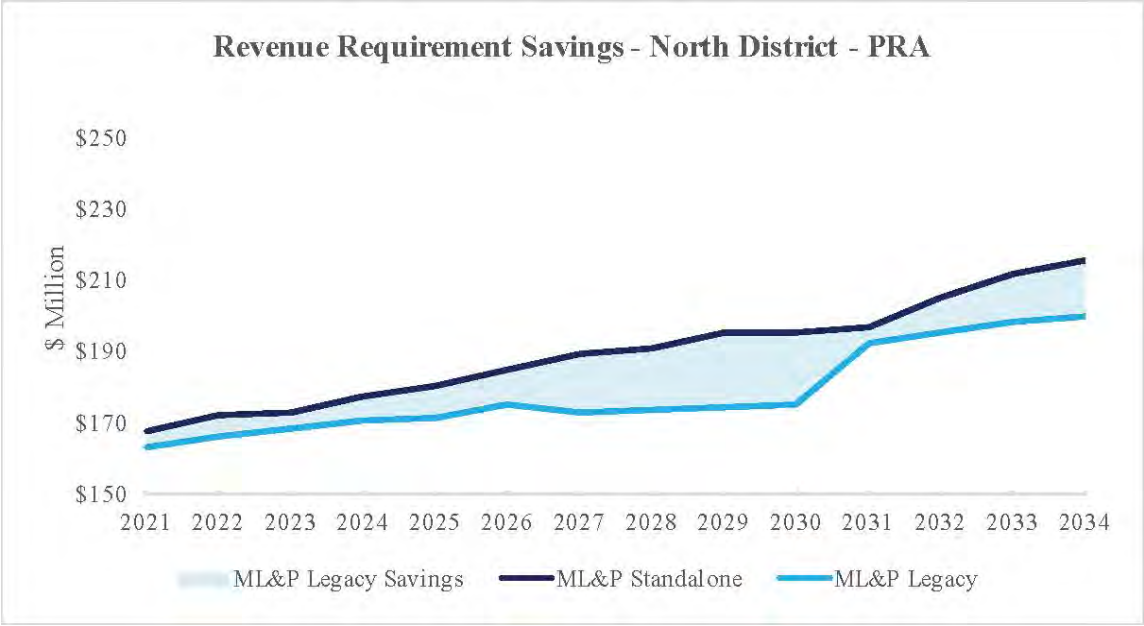
They also illustrate the importance of PRA (Figure 1) and Ryder Scott (Figure 2) BRU production forecasts – holding all else equal[393] – to the temporal distribution of transaction savings across North District and South District ratepayers.



[393]Of course things are never equal. The results could change materially if BRU capital investment, or third-party market costs of gas, were different than what we assume.

Future events will determine whether the relative distribution of savings across the Chugach service territory will prove somewhat more favorable to one or the other District. Interest rates, Cook Inlet natural gas prices, personnel savings, BRU production, the level of future economy energy sales and a host of other factors will all affect both overall transaction savings and the distribution of those savings across the combined service territory. In addition, given confluence of sufficiently unfortunate events, it is possible that in a given year some group of ratepayers could be worse off with the acquisition than they would otherwise be without the acquisition. However, based on the record presented, and given what we believe to be reasonable and credible ranges of future outcomes, we find that ratepayers in both the North District and the South District of the combined service territory are much more likely to be substantially better off with the acquisition than without. The robustness of this result is significantly underpinned by the relatively equal overall distribution of savings between North District and South District

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

ratepayers – a result of our allocation of base rate costs according to the relative shares of electric load between the two Districts.[394]

We have not previously found an acquisition adjustment permissible on the basis of the net present value of savings to ratepayers. We find no need to do so here. The annual and sustained savings to both sets of ratepayers, including dispatch savings, are not speculative. Given the robustness of annual modeled savings to future events we find that both North District and South District ratepayers will be better off if the acquisition proceeds than if it does not. We are also persuaded that, absent our permission that the acquisition adjustment may be collected in rates, the acquisition will not proceed and ratepayers will be denied these benefits. Accordingly, we find that the proposed acquisition adjustment are permissible. We grant their recovery in future rates subject to the conditions in this order.

Our finding is premised on Chugach developing a unified rate design that produces an allocation of costs across both the North District and the South District that reasonably approximates the relative share of each District's consumption of electric energy. Assuming that the transaction is consummated, we require Chugach in its next filed rate case to propose a rate design that achieves this goal. Our finding is also premised on Chugach entering into a tight power pool with MEA as discussed in the next section.

Formation of a Chugach – MEA Tight Power Pool

Background and Findings

For more than six years we have gathered information on, and exhorted Railbelt electric utilities to make progress on formal arrangements to deliver more efficient

[394]The costs recovered in the COPA are always recovered on a per kWh basis and thus necessarily reflect the relative shares of electricity consumption across the two Districts.

and reliable electricity service.[395] In our first letter to the Legislature in response to the appropriation in Section 31(b) of Chapter 18 of the 2014 Session Laws of Alaska, we found that significant and readily-available consumer savings might be obtained from developing an inter-utility system of security-constrained economic dispatch.[396] Chugach and ML&P, and then Chugach, ML&P, and MEA, made early and promising efforts to formalize commercial and operational arrangements to do so amongst themselves.

In January of 2017 the Commission received as an informational filing from Chugach, MEA, and ML&P, the *Amended and Restated Power Pooling and Joint Dispatch Agreement* (Pooling Agreement).[397] The Pooling Agreement was designed to formalize a tight pool, in which the operation of the utilities' combined plant would be managed to provide the lowest possible cost of power over the region, regardless of plant ownership. Payments among the utilities would ensure that all parties were made better off through the facility sharing arrangement.

The Pooling Agreement was admittedly incomplete, with significant elements remaining to be negotiated and finalized over the coming year – what the Pooling Agreement referred to as the Development Period. Nevertheless, the parties to that agreement projected considerable savings from formation of a tight pool.[398]

Progress was slower than originally hoped. Over the next twenty months the Commission received periodic progress reports. At our public meeting held June 13, 2018, representatives of the three utilities informed us that they had formalized the commercial aspects of their power pool agreement.[399] They provided a timeline, explaining that the rest of the power pool agreement would be finalized by September 30, 2018.[400] On October 5, 2018, we received an informational filing from Chugach and ML&P that explained that efforts to finalize the power pool would temporarily cease. The acquisition and subsequent integration of ML&P's assets was given as the reason for this cessation.[401]

Chugach and MEA filed an *Operations and Exchange Agreement* as an information filing in these dockets.[402] That agreement, among other things, requires the two parties to resume and consummate their efforts to form a bilateral tight pool. The effort is intended to be completed within 90-days of the closing on Chugach's purchase of most ML&P assets.

The indefinite deferral of the known consumer benefits achievable through a tight power pool that has persisted to date, and that will continue to result from this delay, is troubling. Available annual consumer savings are material in amount, and yet have been permanently lost for want of sufficient attention, focus, or motivation. With the

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

announcement of the Pooling Agreement Chugach issued a press release estimating annual ratepayer savings of $12-$16 million.[403] A MOA-sponsored study estimated annual savings of $10-$20 million.[404] In these dockets, Hickey testified that dispatch savings from the acquisition would come to $8 - $10 million a year, and that if security-constrained economic dispatch were extended to include MEA via a tight pool an additional $4 - $6 million in savings could be achieved.[405]

We find that the public interest requires conditioning the sale of most ML&P assets upon Chugach and MEA forming a tight pool. The parties have demonstrated a willingness to form a wholesale power contract that would effectuate this, and we accept their good intentions. The parties have also testified that an agreement could be brokered within months.[406] We take them at their word. We condition our approval of the transaction in this manner because in doing so ratepayer interests will be materially advanced; if we do not then such benefits may be lost indefinitely.

While easy to start, and readily progressed, institutional innovation is difficult to finalize. Company priorities change, new crises emerge, and critical personnel move on. For the foreseeable future, both Chugach and MEA will have a lot on their plates. Both Chugach and MEA will undoubtedly be significantly focused in the next eighteen months on helping to form and achieve certification of an electricity reliability

organization.[407] Chugach will surely need to spend long hours over a great many months to integrate ML&P's operations, employees, and business processes into its own.[408] And post-transaction Chugach will emerge in a potentially dominant commercial position in the Railbelt. The asymmetric commercial relationship between Chugach and MEA could be more than enough to prevent consummation of a bilateral tight power pool.

The annual savings associated with security-constrained economic dispatch are material and anything but speculative. We cannot know their exact size, as this is driven by load and by fuel prices. However, the existence of these material savings are a function of engineering and math. Given fewer constraints and more resources, the security-constrained optimal dispatch over the combined Chugach-MEA service territory is necessarily more efficient. (Such savings are in distinction to the credible but less certain savings projections to which Chugach, through its witnesses Lovas and Strunk, have sponsored.) The ratepayers of Chugach and MEA deserve to realize these benefits that can and should flow today.

We are mindful of the commercial leverage that our requirement to form a tight pool could potentially give to MEA. However, we also note that MEA believes it will significantly benefit from closure of the Chugach-ML&P transaction – as evidenced by its own contingent agreement with Chugach to acquire various transmission assets and rights it has long sought.[409] We also believe that by being somewhat prescriptive concerning what such an agreement should look like, with respect to positions that the

parties have publicly indicated that they can agree to, we can blunt the rise of any temptation to take advantage.

Specific Terms

We require Chugach and MEA to file an acceptable wholesale energy and power contract creating a tight power pool as a tariff advice filing in these dockets at least 45 days before transaction close. After 45 days the Commission may ultimately determine that the wholesale contract as filed cannot be approved. However, this filing condition that we impose on Chugach's acquisition of ML&P assets will be satisfied so long as we do not, within the 45-day window, reject the proposed contract as being facially inconsistent with the terms outlined below. In keeping with the provisions of their 2017 Pooling Agreement, the term of the contract should be at least twenty years.[410] This is less than the period that has expired since formal modeling exercises and reports have been undertaken to capture more efficient dispatch.[411]

The contract must effectuate a "tight pool." The services that must be transacted within the tight pool are both limited and staged. In its first year, subject to the reservation of resources needed to provide for adequate frequency regulation of their respective service territories, the agreement must ensure that the joint dispatch of all generation and transmission resources under Chugach and MEA's direct control is done to meet the energy and spinning reserve needs of their two service areas in the most cost efficient manner, irrespective of resource ownership. Within the first year of tight pool

[410]Pooling Agreement, Section 2.1(d).

[411]*Study of Electric Utility Restructuring in Alaska*, filed July 8, 1999, in Docket R-97-010, at 11.7-11.8 (estimating $40.9 million in annual savings if power pooling was implemented in the Railbelt).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

operation, MEA and Chugach shall form a single load balancing area.[412] Thus, in addition to energy and spinning reserves, the joint dispatch of resources must provide for the most cost efficient provision of frequency regulation services.

Chugach and MEA must dedicate and prioritize the use of their owned, leased, or controlled generation and transmission resources for tight pool benefit before economy energy transactions are made to parties outside the tight pool. At the same time the agreement must accommodate existing and future contractual requirements.[413] These provisions are consistent with the original Pooling Agreement.[414]

The economic settlement of energy transactions should equally split the transaction's energy production-cost savings between buyer and seller.[415] This is congruent with public presentations that have been made by Chugach and MEA when reporting on their earlier progress toward forming a tight pool.[416] We have not received

---

[412]Operating as a single load balancing area would require one of the utilities to become the Balancing Authority. A Balancing Authority is the responsible entity that integrates resource plans ahead of time, maintains load-interchange-generation balance within a Load Balancing Area, and supports interconnection frequency in real time. A Load Balancing Area is the collection of generation, transmission, and loads within the metered boundaries of the Balancing Authority. The Balancing Authority maintains load-resource balance within this area.

[413]For example, Seward Electrical System is currently an all-requirements customer of Chugach, and Chugach has obligations to effectuate transmission under the Bradley Lake Services Agreement. Such arrangements will need to be accommodated. We find that the *Memorandum of Understanding Between Golden Valley Electric Association, Inc., Fairbanks, AK, and Chugach Electric Association, Inc., Anchorage, AK*, filed July 12, 2019, which was presented to us as fitting within the parties' economy energy transaction tariffs, is not a pre-existing contractual requirement that trumps dedication of resources to the pool.

[414]Pooling Agreement, Section 3.2(a).

[415]We do not know whether Chugach and MEA have the software to enable precise implementation of an exact split-the-savings rule upon contract approval. Accordingly, during the contract's first year, we permit the parties to settle transactions within the range of cost savings should they need to develop the appropriate documentation and auditing tools.

[416]June 13, 2018, Public Meeting, Tr. 12-13.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

testimony on how the parties previously intended to price spin and regulation transactions. Accordingly, we suspect that there may be technical difficulties to implementing a similar "split the savings" rule as they have promoted for energy transactions. If so we require, at minimum, that spin and regulation transactions provide compensation for the seller at a level no less than the full incremental cost of supply.

In part because we require a contract of such long duration we are mindful of the potential for unintended consequences. Membership in the tight pool should not cause a party material financial regret. Accordingly, the agreement must substantively address rights and obligations associated with a number of issues that are necessarily raised by the pledging of resources under a party's dispatch control within the larger Railbelt market. These include:

- Purchases from and sales of economy energy with non-pooling parties;[417]
- Wholesale contracts to purchase non-firm power from parties outside the tight pool;[418]
- Wholesale contracts to purchase firm power from parties outside the tight pool; and
- Firm sales contracts to parties outside the tight pool.[419]

We recognize that the imposition of per megawatt hour wheeling charges, consistent with current transmission tariffs, may inhibit the tight pool's ability to take full advantage of efficiency gains that might otherwise be had.[420] This would be an

[417]The agreement must address whether economy energy purchases, if permitted, are tight pool resources or individual utility resources. It must also ensure that a tight pool purchaser does not unreasonably profit, at the tight pool seller's expense, from making economy energy sales through the capacity that the tight pool purchase enabled.

[418]For example, contracts for non-firm power, such as Chugach's contract to purchase output from CIRI's Fire Island Wind project, raise issues of who should bear the costs of regulation of such resources.

[419]Examples include Chugach's current net requirements contract with Seward Electrical System, and ML&P's net requirements contract with JBER.

[420]April 29, 2015, Public Meeting, Tr. 18-19.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

unfortunate outcome. Accordingly, we put the parties on notice that, in crafting a split-the-savings mechanism, the Commission is receptive to entertaining accompanying proposals to modify how transmission use might be compensated.

We anticipate that the tight pool contract will be filed with us as a wholesale power contract under AS 42.05.431. We find that the Pooling Agreement, at Article 8 – *Governing Law and Dispute Resolution*, contains a dispute resolution mechanism wholly inadequate for an arrangement of this financial importance and duration. Had that agreement been approved the parties' only recourse, should they have a dispute that they could not amicably resolve, was litigation in the Superior Court. The range of possible friction in a tight pool agreement is wide. For instance, disagreements around optimal dispatch to a forecasted load can have material financial consequences; the appropriate measurement of a given generator's start costs can matter. Accordingly, a resilient agreement should have dispute resolution provisions that are fit for a broad range of purposes. There should be, for example, mechanisms that accommodate the need for expeditious and necessary decisions, address parameters that need to be initially established or have 'drifted' and no longer reflect reality, and identify and correct potentially strategic behavior of one's counterparty. Transaction costs of resolving disagreements should be low enough that matters can be satisfactorily resolved.

We will only accept a tight pool contract that recognizes the Commission's ability to establish a just and reasonable rate, or rate mechanism, if we determine that a rate established under the contract is not just and reasonable.[421] To enable us to do so we require the parties to generate and retain readily-retrievable documentation that reflect each tight pool transaction in each hour. Documentation should be sufficient to allow the parties, and the commission, the ability to verify that during the first year each hour's

[421] AS 42.05.431(b).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

energy transactions are priced between the incremental and decremental cost of service, and that after the first year all transactions equally split the cost savings engendered.

Interest Rate Cap

The stipulating parties requested that we approve all Chugach requests for approvals in Docket U-19-020, as those requests have been amended.[422] Chugach expressly asked us to condition our approval of the transaction on Chugach's financing it at a weighted average effective interest rate of 5.75% or less.[423] When given the opportunity to amend this request, Chugach chose not to do so.[424] Therefore, each of our approvals in this order is specifically subject to the condition that Chugach finance its acquisition of most ML&P assets at a weighted average effective interest rate of 5.75%. Chugach shall file its report on financing within 30-days of the date of transaction closing.[425]

Restricted Rate Reduction Account

The parties to the Original Stipulation created the RRR account to provide immediate rate relief to North District ratepayers. This account is to be funded by a transfer of $36 million of ML&P's unrestricted cash from the MOA to Chugach, with no corresponding increase in the price Chugach is paying to acquire most ML&P assets. Chugach is required to manage this account prudently and to provide rate reductions to North District ratepayers through an adjustment to their COPA surcharge. The amount of this surcharge adjustment is to be calculated quarterly and is to be in approximately equal amounts each quarter such that the RRR account balance is exhausted in 3 years.[426]

(907) 276-6222; TTY (907) 276-4533

The AG opposed approval of the RRR account, asserting that it violated the restriction on refunds in AS 42.05.391(c) and was an unreasonable preference to North District ratepayers in violation of AS 42.05.391(a). The AG also asserted that use of Chugach's COPA mechanism to provide this rate relief violates our regulations at 3 AAC 52.502 through 52.504. Finally, the AG asserts that if we are to allow refund of this money to North District ratepayers, it should be returned partially through base rates and partially through the COPA surcharge.[427]

In discussing the rebate of BRU contributed capital, we found that the Gas Fund was accumulated through the collection of electric rates from what will become the North District, and that the mismatch between the historical capital contributions and future benefits from consumption of the resources in the BRU was a sufficient basis to require the rebate of the net ratepayer contributed capital contribution to the North District. Although not phrased in precisely the same terms, we are asked to apply similar treatment to RRR.

According to Henderson, the unrestricted Gas Fund balance was approximately $40 million and was accumulated from earnings on the Gas Fund.[428] In other words, the retained earnings on ratepayer contributed capital is roughly equal to the amount the parties have stipulated will be rebated to the North District ratepayers through the RRR account. Although with a more complete record, or in a contested case, we might have found that a different mechanism, amount or period would better balance the equities implicated in compensating for retained earnings on ratepayer contributed capital, here the parties have stipulated to the mechanism, the amount, and the period over which the rebate will be applied, and the stipulated treatment is not unreasonable.

[427]AG Closing at 24-31; Dockets U-19-020 and U-19-021 Hearing, Tr. 3693-3695.

Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

While the AG opposed approval of the RRR, that opposition was on conceptual grounds, and neither the amount nor the period over which the rebate should be applied were challenged. Therefore, we approve the RRR and the rebate as stipulated.

We agree with the AG that the RRR account rebate does not meet the criteria established in 3 AAC 52.502(a) for inclusion as an element in Chugach's COPA calculation. However, we read the Original Stipulation to say that the Chugach COPA mechanism is merely being used as the method by which the MOA desires to provide temporary rate relief to North District ratepayers, and not as a request to include the RRR account rebate as an element of Chugach's COPA. While we do not anticipate that COPA mechanism's will typically be used in this manner, we do not find the RRR account rebate proposal in the Original Stipulation to be an inappropriate use of the Chugach monthly billing system.

We note that if Chugach had objected to use of its billing system in this manner, it is unlikely that we would approve it. However, Chugach is party to the Original Stipulation and is not objecting to the extra work that the RRR account rebate will require. Therefore, we approve Chugach flowing the RRR account rebate through its billing system to North District ratepayers as set out in the Original Stipulation. We provide the following guidance on implementation of the RRR account rebate.

Section III.B.2 of the Original Stipulation provides that ML&P will create a new account, the RRR account, using $36 million of unrestricted cash. This account will be managed by Chugach for the benefit of North District ratepayers and will be credited to those ratepayers over a three year period. The stipulating parties agreed that the RRR credit will be a reduction to North District ratepayer's COPA surcharge, filed quarterly with Chugach's COPA filing. The stipulating parties also agreed that the RRR account funds

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

will be disbursed in approximately equal amounts every quarter for a three-year period, or until all of the RRR account funds have been distributed.[429]

As discussed elsewhere in this order, one condition of approval of the transaction is that there will be unified COPA surcharges for the North and South Districts. We instruct Chugach how to account for the $36 million RRR credit for North District ratepayers. As provided in the Section III.B.2.c, Chugach will calculated quarterly disbursements of the RRR account funds in approximately equal amounts every quarter. Chugach will add a line item to its COPA for North District ratepayers that reflects a per kWh credit of the quarterly amounts.

Chugach will be required to maintain a separate balancing account for the quarterly disbursement amounts and report, in a separate schedule with its quarterly COPA filings, the balancing account balance and the balance of the $36 million credit, with interest if applicable. The balancing account will reflect

- debit entries equal to the equal monthly amounts of the RRR account disbursement;
- debit entries equal to any interest earned in that reported month, if applicable; and,
- credit entries equal to the monthly credit amount paid to North District ratepayers.

Any under-collection of the previous quarter's disbursement amount will increase the balancing account and be used to increase the credit over the next quarter and any over-collection will decrease the balancing account and decrease the credit over the next

[429] *Stipulation Resolving All Issues*, filed October 25, 2019, at 6, 7.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

quarter. The following formula will be used to calculate the credit:

$$Rebate = \frac{(AD/4) + B}{NQS}$$

Where:

AD = the annual disbursement amount
B = the previous end of quarter balancing account balance
NQS = projected quarterly kWh sales for the North District

The annual disbursement amount is divided by four to reflect the quarterly amount used in calculating the credit, as agreed to by the stipulating parties. The projected quarterly kWh sales will be for the same period as the sales used in Chugach's COPA surcharge calculation.

We require Chugach to file tariff sheets, as a new tariff advice filing, to reflect this credit mechanism when it files its unified COPA filing.

Regulatory Assets

Chugach initially requested permission to create a regulatory asset consisting of transaction costs, recovery of which will be deferred over the first three years following transaction closing. These costs totaled an estimated $117.5 million, consisting of the $48.7 million portion of the initial payment to the MOA in excess of the estimated net book value of ML&P assets being acquired, $26.2 million of pre-closing transaction consummation costs, $6.8 million of post-closing integration costs, $3.7 million to defease ML&P's debt, $11.8 million for the first three years of Eklutna PPA payments, and $11.6 million in interest on this deferral.[430] Chugach was not actually asking us to create the regulatory asset at this time. Instead, Chugach requested "a statement recognizing the need for expenditures needed to consummate the Transaction and assurance that

[430]Chugach Petition at 17-20; T-8 (Miller Direct) at Exhibit AWM-07.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

prudently incurred expenses such as those listed above will be includable in Chugach's revenue requirement used to set future rates."[431] Chugach asked to defer these costs until it files its first post-closing general rate case, and to amortize these costs over a 30-year period.[432]

With the Original Stipulation, the stipulating parties have agreed to creation of a Primary Regulatory Asset, which could be in an amount as low as $83.4 million. The Primary Regulatory Asset recovery would be deferred over the initial three-year transition period, and then amortized over an approximately 20-year period. If Chugach finances the transaction at a weighted average interest rate no higher than 5%, Chugach will expense up to $7.6 million of Eklutna PPA payments during the three-year transition period rather than defer those costs. If Chugach finances the transaction at a weighted average interest rate below 5%, Chugach will create a Secondary Regulatory Asset. If Chugach finances the transaction at a weighted average interest rate of no more than 4%, the Secondary Regulatory Asset will include $19 million of transaction costs. If Chugach finances the transaction at a weighted average interest rate of between 4% and 5%, the Secondary Regulatory Asset will be prorated between $0 and $19 million depending on what the achieved weighted average interest rate for transaction financing is. The Secondary Regulatory Asset, if created, will be completely amortized over the three-year transition period.[433]

We have previously informed Chugach that its practice of deferring the recovery of routine expenses through the use of regulatory assets was expensive for ratepayers and no longer acceptable to us. However, we did not prohibit Chugach from

[431]Chugach Petition at 16.

[432]Chugach Petition at 17.

[433]Original Stipulation at 13-14; Dockets U-19-020 and U-19-021 Hearing, Tr. 3650.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

proposing the creation of regulatory assets for the recovery of large and unexpected expenses, with shorter amortization periods.[434] We granted Chugach's request to increase its target TIER from 1.35 to 1.55 to allow greater capacity to expense costs rather than defer recovery.[435]

Chugach began the process of acquiring most ML&P assets about three years ago,[436] and thus the transaction costs cannot be considered unexpected. However, we agree that within the scope of Chugach's revenue requirement the expected transaction costs are large. All parties to these dockets except the AG agreed to creation of the regulatory assets identified in the Original Stipulation, and the AG did not object to their creation.[437]

We find that the type and scope of transaction costs identified for deferral in the Chugach Petition are appropriate for inclusion in a regulatory asset for recovery through future rates, and we approve creation of the Primary Regulatory Asset and the Secondary Regulatory Asset as proposed in the Original Stipulation. However, consistent with Chugach's request and our practice, we will allow recovery through future rates of only those transaction costs that were prudently incurred. Further, and consistent with our decision in Order U-18-036(3), we will be looking at the shortest amortization period possible without causing harm to Chugach's financial health. Chugach will bear the burden of showing that each deferred transaction cost proposed for recovery through

rates was prudently incurred, and will bear the burden of proving to us that its proposed amortization period for these regulatory assets cannot be reasonably shortened.

BRU Management and Asset Retirement Obligations

We opened Docket U-18-102 to investigate the BRU management practices of ML&P, including specifically the disposition and pricing of BRU gas used to produce electric power at wholesale.[438] We resolved that issue above by adopting the market value proxy pricing proposed by the stipulating parties in the Restated BRU Agreement.[439] The other specific issues under investigation in Docket U-18-102 include ML&P's management of BRU gas production and the adequacy of the ARO calculation used by ML&P.[440]

We expanded the scope of Docket U-18-102 to include the BRU management plans of Chugach when we consolidated Docket U-18-102 with Dockets U-19-020 and U-19-021.[441] Chugach informed us that it planned no changes in BRU management if it acquires ML&P's ownership interest.[442] We received updated BRU production studies,[443] prefiled testimony,[444] and held a three-day public hearing in Docket U-18-102.[445]

What we could not get accomplished was development of an adequate record on our Docket U-18-102 BRU management practices and ARO issues to have a

[438]Order U-18-102(1) at 4-10.

[439]Original Stipulation, Exhibit 4 at 2-3.

[440]Order U-18-102(1) at 3, 10-11.

[441]Order U-18-102(8) at 10-11.

[442]T-4 (Fouts Direct) at 4.

[445]Docket U-18-102 Hearing, Tr. 82-576.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

basis for ordering changes to current practice. The uncertainty related to future BRU responsibilities caused by Chugach's proposed acquisition of ML&P's BRU interest at issue in Docket U-19-020 has apparently, and possibly not unreasonably, made it impossible for the parties and their witnesses to substantively address our issues. Therefore, we have decided that we will not be taking further action on these issues in Docket U-18-102.

We give the parties advance warning that our concerns regarding BRU management practices and the adequacy current ARO surcharges are not resolved. We will be issuing orders in Dockets U-19-085 and U-19-091 requesting information and comments on possible ARO revision impacts to the GTP's suspended in those dockets.

Final Order

This order constitutes the final decision in these proceedings. This decision may be appealed within thirty days of this order in accordance with AS 22.10.020(d) and Alaska Rule of Appellate Procedure 602(a)(2). In addition to the appellate rights afforded by AS 22.10.020(d), a party has the right to file a petition for reconsideration in accordance with 3 AAC 48.105. If such a petition is filed, the time period for filing an appeal is tolled and then recalculated in accordance with Alaska Rule of Appellate Procedure 602(a)(2).

ORDER

THE COMMISSION FURTHER ORDERS:

1. The *Stipulation Resolving All Issues*, filed October 28, 2019, by the Municipality of Anchorage d/b/a Municipal Light & Power Department; Chugach Electric Association, Inc.; Providence Health & Services; the Federal Executive Agencies; Matanuska Electric Association, Inc.; the Alaska Energy Authority; and ENSTAR Natural Gas Company, a Division of SEMCO Energy, Inc., (as corrected by *Notice of Filing Corrected Stipulation Exhibit 4*, filed November 5, 2019; supplemented by *HEA's Joinder*

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

in Stipulation Resolving All Issues, filed November 7, 2019; and amended by *First Amendment to Stipulation Resolving All Issues*, filed January 15, 2020), is accepted in part, subject to the conditions set out in the body of this order, and rejected in part.

2. The *Asset Purchase and Sale Agreement* between Municipality of Anchorage, Alaska and Chugach Electric Association, Inc. dated as of December 28, 2018, and filed April 1, 2019 (as revised by *Amendment No. 1 to Asset Purchase and Sale Agreement*, filed September 30, 2019, *Amendment No. 2 to Asset Purchase and Sale Agreement*, filed October 30, 2019, and the unsigned *Amendment No. 3 to Asset Purchase and Sale Agreement*, filed October 28, 2019, as Exhibit 1 to *Stipulation Resolving All Issues*), is approved subject to the condition that Sections 6.16(a) and 6.21 are not part of the agreement and the other conditions set out in the body of this order.

3. The *Eklutna Power Purchase Agreement* between Chugach Electric Association, Inc. and the Municipality of Anchorage, dated as of December 28, 2018, and filed April 1, 2019 (as revised by *Amendment No. 1 to Eklutna Power Purchase Agreement*, filed September 27, 2019; *Amendment No. 2 to Eklutna Power Purchase Agreement*, filed October 30, 2019; and the unsigned *Amendment No. 3 to Eklutna Power Purchase Agreement*, filed October 28, 2019 as Exhibit 3 to *Stipulation Resolving All Issues*), is approved subject to the condition that it is not a power purchase agreement under AS 42.05.431(b) and the other conditions set out in the body of this order.

4. The *Amended and Restated BRU Fuel Agreement* between the Municipality of Anchorage and Chugach Electric Association, Inc., filed October 28, 2019 (as Exhibit 4 to the *Stipulation Resolving All Issues*) is rejected, except as discussed in Ordering Paragraph No. 5 to this order.

5. Upon closing as defined in Section 3.01 of the *Asset Purchase and Sale Agreement* approved in Ordering Paragraph No. 2 of this order, Chugach Electric Association, Inc. shall manage all of its Beluga River Unit assets in a unified manner as

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

discussed in the body of this order. If Chugach Electric Association, Inc. uses natural gas produced from its Beluga River Unit assets to make economy energy sales or make natural gas sales to other parties, it shall value that natural gas in a manner consistent with Section 2.05 of the *Amended and Restated BRU Fuel Agreement* between the Municipality of Anchorage and Chugach Electric Association, Inc., filed October 28, 2019. Chugach Electric Association, Inc. shall only use natural gas produced from its Beluga River Unit assets to make economy energy sales or make natural gas sales to other parties in a manner consistent with the limitation set out in Section 2.03 of the *Amended and Restated BRU Fuel Agreement* between the Municipality of Anchorage and Chugach Electric Association, Inc., filed October 28, 2019.

6. The *Payment in Lieu of Taxes Agreement* between the Municipality of Anchorage, Alaska and Chugach Electric Association, Inc. dated as of December 28, 2018, and filed April 1, 2019, between the Municipality of Anchorage, Alaska and Chugach Electric Association, Inc. dated as of December 28, 2018, and filed April 1, 2019 (as revised by *Amendment No. 1 to Payment in Lieu of Taxes Agreement*, filed September 27, 2019; and *Amendment No. 2 to Payment in Lieu of Taxes Agreement*, filed October 30, 2019), is accepted subject to the conditions that: (1) it not be considered a tax or tax-like obligation in any forum; (2) that Sections 2.02 and 2.12 are not part of the approved agreement: (3) that by January 1, 2024, costs incurred by Chugach Electric Association, Inc. as a result of the *Payment in Lieu of Taxes Agreement* shall be recovered through base rates charged all Chugach Electric Association, Inc. ratepayers; and (4) the other conditions set out in the body of this order.

7. The application to amend Certificate of Public Convenience and Necessity No. 121 contained in the *Application of the Municipality of Anchorage d/b/a Municipal Light and Power to Amend Certificate of Public Convenience and Necessity No. 121 and to Terminate Dividend Restriction*, filed April 5, 2019, is denied.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

8. The application of Chugach Electric Association, Inc. to amend Certificate of Public Convenience and Necessity No. 8 to include the service area currently being served by the Municipality of Anchorage d/b/a Municipal Light & Power Department under Certificate of Public Convenience and Necessity No. 121, contained in *Petition for Approvals Needed to Acquire Anchorage Municipal Light and Power and Application to Amend Certificate of Public Convenience and Necessity No. 8*, filed April 1, 2019, is denied.

9. Certificate of Public Convenience and Necessity No. 121 is transferred to Chugach Electric Association, Inc. effective on the date of closing as defined in Section 3.01 of the *Asset Purchase and Sale Agreement* approved in Ordering Paragraph No. 2 of this order, subject to the condition that Chugach Electric Association, Inc. will begin to serve ratepayers in the Certificate of Public Convenience and Necessity No. 121 service area under the rules contained in the Certificate of Public Convenience and Necessity No. 8 tariff, but not the rates stated therein, by no later than December 31, 2023. This transfer is also subject to the other conditions set out in the body of this order.

10. The petition by Chugach Electric Association, Inc. to adopt the current Certificate of Public Convenience and Necessity No. 121 tariff under 3 AAC 48.400 to temporarily govern service provided under the service obligations acquired through this order is granted, subject to the conditions set out in the body of this order. Chugach Electric Association, Inc. shall file in these dockets a tariff adoption notice under 3 AAC 48.400 within 10 days of the date of closing as defined in Section 3.01 of the *Asset Purchase and Sale Agreement* approved in Ordering Paragraph No. 2 of this order. Within 90 days after filing the tariff adoption notice, Chugach Electric Association, Inc. shall file in these dockets a tariff in its own name for the Certificate of Public Convenience and Necessity No. 121 service area.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

11. Effective on the date of closing as defined in Section 3.01 of the *Asset Purchase and Sale Agreement* approved in Ordering Paragraph No. 2 of this order, a certificate of public convenience and necessity is granted to the Municipality of Anchorage authorizing ownership and provision of generation electric utility service to the public for compensation from its share of the Eklutna Hydroelectric Project, subject to the condition that: (1) before this effective date the Municipality of Anchorage has filed documentation that it has surrendered its voting rights on the Eklutna Hydroelectric Project operating committee; (2) that the Municipality of Anchorage shall maintain a $3,000,000 reserve fund to support its Eklutna Hydroelectric Project financial obligations under the Eklutna Power Purchase Agreement with Matanuska Electric Association, Inc. filed January 27, 2020; and (3) subject to the other conditions set out in the body of this order.

12. Section III.B.1 of the *Stipulation Resolving All Issues* identified in Ordering Paragraph No. 1 of this order is accepted. Subject to closing of the transaction as defined in Section 3.01 of the *Asset Purchase and Sale Agreement* approved in Ordering Paragraph No. 2 of this order, and the other conditions set out in the body of this order, we authorize Chugach Electric Association, Inc. to incur the Purchase Price as defined in this Section III.B.1 and to recover those costs through rates in a manner to be determined in its next general rate case.

13. Section III.B.2 of the *Stipulation Resolving All Issues* identified in Ordering Paragraph No. 1 of this order is accepted subject to the instructions set out in the body of this order and the conditions set out in this order.

14. Section III.B.3 of the *Stipulation Resolving All Issues* identified in Ordering Paragraph No. 1 of this order is accepted subject to the conditions set out in Ordering Paragraph No. 2 of this order.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

15. Section III.C of the *Stipulation Resolving All Issues* identified in Ordering Paragraph No. 1 of this order is accepted. Chugach Electric Association, Inc. shall not file the reports required by this Section III.C in these dockets.

16. Section III.D of the *Stipulation Resolving All Issues* identified in Ordering Paragraph No. 1 of this order was effectively accepted when Order U-16-094(23)/ U-17-008(27), *Order Granting Alaska Native Tribal Health Consortium's Request to Withdraw from Dockets and Request to Withdraw Opposition, Accepting Stipulation by Less Than All of the Parties, Vacating Briefing Schedule, and Closing Dockets*, dated February 21, 2020, was issued. No further action on this Section III.D is taken in these dockets.

17. Section III.E of the *Stipulation Resolving All Issues* identified in Ordering Paragraph No. 1 of this order addresses a matter outside of our jurisdiction, and no action regarding this Section III.E is taken nor will enforcement of this Section III.E, including enforcement of Amendment No. 3 to the *Eklutna Power Purchase Agreement* approved in Ordering Paragraph No. 3 of this order be undertaken.

18. Section III.F of the *Stipulation Resolving All Issues* identified in Ordering Paragraph No. 1 of this order is rejected, except those terms similar to Sections 2.03 and 2.05 of the *Amended and Restated BRU Fuel Agreement*, which will be treated as stated in Ordering Paragraph No. 5 of this order.

19. Section III.G.1 of the *Stipulation Resolving All Issues* identified in Ordering Paragraph No. 1 of this order is accepted, subject to the conditions set out in the body of this order.

20. Section III.G.2 is accepted in part. Chugach Electric Association, Inc. is authorized to accumulate and defer recovery of costs prudently incurred in its acquisition of most assets of the Municipality of Anchorage d/b/a Municipal Light & Power Department and of the type identified in the *Pre-filed Direct Testimony of Arthur W. Miller*,

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

filed April 1, 2019, at Exhibit AWM-07. Chugach Electric Association, Inc. shall bear the burden of proving that the costs accumulated in the Primary Regulatory Asset were prudently incurred, and that the amortization period for recovery of the deferred costs is reasonable.

21. Section III.G.3 of the *Stipulation Resolving All Issues* identified in Ordering Paragraph No. 1 of this order is rejected for the reasons stated in the body of this order.

22. The request to terminate the dividend restriction imposed by Order U-13-184(22), dated July 16, 2015, contained in the *Application of the Municipality of Anchorage d/b/a Municipal Light and Power to Amend Certificate of Public Convenience and Necessity No. 121 and to Terminate Dividend Restriction*, filed April 5, 2019, is granted, subject to the conditions set out in the body of this order.

23. We find that it is in the public interest to exercise our authority under AS 42.05.711(d) and waive the requirements of AS 42.05.441(b) to allow Chugach Electric Association, Inc. to recover through rates the amount that it is paying to the Municipality of Anchorage for assets held by the Municipality of Anchorage d/b/a Municipal Light & Power Department in excess of the net book value of those assets. This waiver is subject to the condition that all conditions set out in the body of this order must be complied with by the Municipality of Anchorage and Chugach Electric Association, Inc. This waiver applies to the Purchase Price defined in Section 2.02 of the *Asset Purchase and Sale Agreement* approved in Ordering Paragraph No. 2 of this order, payments made under the *Eklutna Power Purchase Agreement* approved in Ordering Paragraph No. 3 of this order, and payments made under the *Payment in Lieu of Taxes Agreement* approved in Ordering Paragraph No. 6 of this order.

24. Our finding of public interest in Ordering Paragraph No. 23 of this order, and our approvals in Ordering Paragraph Nos. 1 through 22 of this order, are conditioned

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY (907) 276-4533

on Chugach Electric Association, Inc. rebating the Beluga River Unit contribute capital as discussed in the body of this order.

25. At least 45 days before closing as defined in Section 3.01 of the *Asset Purchase and Sale Agreement* approved in Ordering Paragraph No. 2 of this order, Chugach Electric Association, Inc. and Matanuska Electric Association, Inc. shall submit, as a tariff advice filing, an acceptable wholesale energy and power contract creating a tight power pool that meets the requirements for a tight power pool specified in the body of this order.

26. Within ten days after the date of closing as defined in Section 3.01 of the *Asset Purchase and Sale Agreement* approved in Ordering Paragraph No. 2 of this order, Chugach Electric Association, Inc. shall file notice of transaction closing specifying the date of closing.

27. Within 18 months after the date of closing as defined in Section 3.01 of the *Asset Purchase and Sale Agreement* approved in Ordering Paragraph No. 2 of this order, Chugach Electric Association, Inc. shall file a plan for remediating the contaminated sites disclosed by the Municipality of Anchorage d/b/a/ Municipal Light & Power Department in that agreement.

28. Within 18 months after the date of closing as defined in Section 3.01 of the *Asset Purchase and Sale Agreement* approved in Ordering Paragraph No. 2 of this order, Chugach Electric Association, Inc. shall file a plan to investigate all assets being acquired from the Municipality of Anchorage d/b/a Municipal Light & Power Department under that agreement to determine the existence of any environmental liabilities other than those disclosed in that agreement.

29. Within 18 months after beginning the investigation required by Ordering Paragraph No. 27 of this order, Chugach Electric Association, Inc. shall file a plan for remediating, before the tenth anniversary of the date of closing as defined in Section 3.01

Regulatory Commission of Alaska

of the *Asset Purchase and Sale Agreement* approved in Ordering Paragraph No. 2 of this order, any contamination discovered in the investigation.

30. Within 90 days after the date of this order, Chugach Electric Association, Inc. shall submit, as a tariff advice filing, proposed tariff sheets establishing a methodology to calculate a unified cost of power adjustment for the combined Certificate of Public Convenience and Necessity No. 8 and Certificate of Public Convenience and Necessity No. 121 service areas.

31. Within 90 days after the date of this order, Chugach Electric Association, Inc. shall submit, as a tariff advice filing, proposed tariff sheets governing disbursement in compliance with this order to ratepayers in the Certificate of Public of Public Convenience and Necessity No. 121 service area of the Restricted Rate Reduction Account approved in this order.

32. Within 90 days after the date of this order, Chugach Electric Association, Inc. shall submit, as a tariff advice filing, proposed tariff sheets governing collection of surcharges from ratepayers in the Certificate of Public Convenience and Necessity No. 8 service area and disbursement of rebates to ratepayers in the Certificate of Public Convenience and Necessity No. 121 service area in compliance with the decision in this order to require Chugach Electric Association, Inc. to return Beluga River Unit contributed capital to ratepayers in the Certificate of Public of Public Convenience and Necessity No. 121 service area.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501

In Order No. U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order 39"), the Regulatory Commission of Alaska ("RCA") approved, subject to conditions, the sale to Chugach Electric Association, Inc. ("Chugach") of most of the electric utility assets of the Municipality of Anchorage d/b/a Municipal Light and Power ("ML&P") ("Transaction"). Order 39 also approved the MOA-Chugach Eklutna Power Purchase Agreement ("Chugach PPA"), subject to conditions, effective on the date of closing of the Transaction. In Order 39, the RCA granted to the MOA, effective upon the date of closing of the Transaction, a certificate of public convenience and necessity authorizing ownership and provision of generation electric utility service to the public for compensation from its share of Eklutna, subject to conditions, including that before the effective date of the Chugach PPA or the MOA-Matanuska Electric Association, Inc. ("MEA") Power Purchase Agreement ("MEA PPA"), the MOA has filed documentation that it has surrendered its voting rights on the Eklutna Operating Committee ("EOC").[1] In Order 39, the RCA required that the MOA's surrender of its EOC voting rights "cannot be lifted until such time as [the MOA] has shown to our satisfaction that [the MOA] has acquired the expertise required to fully participate as voting member of the EOC."[2]

Enclosed as Exhibit 1 is a Surrender of Eklutna Operating Committee Voting Rights document, signed by ML&P, Chugach, and MEA. The Surrender will remain in effect until the MOA shows to the RCA's satisfaction that the MOA has acquired the expertise required to participate as a voting member of the EOC (or upon expiration or termination of the terms of the Chugach PPA and the MEA PPA).

[1] Order 39 at 147, Ordering ¶ 11; *see also* Order 39 at 66-67.

Exhibit 1

October 27, 2020

Surrender of Eklutna Operating Committee (EOC) Voting Rights

In accordance with the requirements of order U-18-102(44), the Municipality of Anchorage, dba Municipal Light & Power(ML&P), hereby surrenders its voting rights as an EOC member and under the Fish and Wildlife Agreement effective as of the Closing of the Asset Purchase Agreement between ML&P and Chugach Electric Association (Chugach). This surrender of voting rights shall remain in effect until ML&P's successor complies with the RCA requirements pertaining to qualifications for ML&P's representation on the EOC.

Until ML&P's successor complies with the qualification terms of RCA order U-18-102(44), all EOC decisions will be by unanimous vote of Chugach and Matanuska Electric Association, Inc. (MEA). Eklutna hydro operations, dispatch and maintenance will continue to follow past practices and policies unless changes are approved through the EOC process.

Fish and Wildlife Program; the Chugach Electric Association's ("Chugach") board of directors intends to meet on or about April 24 for the same purpose. On information and belief, once the proposed final Fish and Wildlife Program is approved by both MEA and Chugach, it will be submitted to the governor pursuant to the 1991 Agreement.

15. On Friday, April 11, 2024, I emailed counsel of record for the parties in this matter who may be affected by the Assembly's Petition to Intervene and Motion to Reopen Docket and Modify Order No. 39 Dated May 28, 2020. My email informed counsel of the Assembly's intent to file a Motion for Expedited Consideration of both the underlying Petition and Motion, and requested that each party inform the Assembly of its position, consistent with the requirements of 3 AAC 48.091(g).

FURTHER AFFIANT SAYETH NAUGHT.

Pursuant to 3 AAC 48.091(g), the Anchorage Assembly respectfully moves for expedited consideration of its concurrently filed (1) Petition to Intervene, and (2) Motion to Reopen Docket and Modify Order No. 39 Dated May 28, 2020. Decisions are needed on both the principal Petition and Motion no later than **THURSDAY, APRIL 25, 2024**, which is before the usual time for responses and decisions. A certificate indicating when and how the opposing parties were served with this motion and the principal motions, and their respective positions on this motion, is included herein.[1] This motion is also supported by the accompanying affidavit of counsel.[2]

The Assembly seeks to intervene in this action for the purpose of requesting a modification to Order No. 39, which required the Municipality to surrender its voting rights as a majority owner of the Eklutna Hydroelectric Project (the "Project").[3] The Assembly's principal Motion requests that the Commission modify the Order to allow the Municipality to vote on policy matters regarding implementation of the 1991 Fish and Wildlife Agreement, specifically whether to approve the proposed final Fish and Wildlife Program. Under the 1991 Agreement, the Municipality is required to implement and contribute public funds to the final Fish and Wildlife Program once that plan is approved by the governor. The current draft Fish and Wildlife Program was developed by the minority Project owners, Chugach Electric Association

("Chugach") and Matanuska Electric Association ("MEA"), but it has not been submitted to or approved by the Assembly as required by law.[4]

A decision is needed by April 25, 2024 because Chugach and MEA have indicated that they intend to submit the proposed final Fish and Wildlife Program to the governor before the end of this month.[5]

The Assembly proposes the following expedited schedule regarding the underlying Petition to Intervene and Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020:

- April 17 – Responses to Motion for Expedited Consideration
- April 19 – Responses to Underlying Motions
- April 22 – Assembly's Replies in Support of Underlying Motions
- April 25 – Commission decisions on Underlying Motions

The Anchorage Assembly respectfully moves to reopen the docket in this matter and modify Order No. 39 dated May 28, 2020, conditionally granting the Municipality's application to amend its certificate of public convenience and necessity for the Eklutna Hydroelectric Project (the "Project").[1] The Order required the Municipality to surrender its vote on all Project management and operation decisions, including policy decisions implementing the 1991 Fish and Wildlife Agreement.[2] The Assembly requests that the Commission modify the Order to allow the Municipality to exercise its vote as a majority owner of the Project, specifically on the proposed final Fish and Wildlife Program—a multi-decades, multi-million-dollar fish and wildlife mitigation plan governing the future of the Eklutna Dam.

Currently, under the conditions of the Order, the Municipality does not have a vote on the proposed final Fish and Wildlife Program even though the Municipality will be responsible for funding a portion of the implementation costs. Unless the Commission modifies the Order and allows the Municipality to vote, the proposed final Fish and Wildlife Program is expected to be submitted to the governor by the

end of this month, potentially binding the Municipality to an estimated $57-million mitigation plan that has not been approved by the Assembly as required by law.[3]

INTRODUCTION

In 2018, the Municipality sold Municipal Light & Power ("ML&P") to Chugach Electric Association, Inc. ("Chugach"). As part of that transaction, the Municipality retained its 53.33 percent ownership interest in the Project but agreed to sell its share of the power output to Chugach and the Matanuska Electric Association ("MEA") (collectively with the Municipality, the "Project Owners"). The Project Owners agreed that Project management and operations decisions would continue to be made by the Eklutna Operating Committee ("EOC")—a group of representatives from each of the Project Owners. From 1996 until the May 28, 2020 Order, EOC decisions had been made "by double majority (a vote of two of the three Eklutna [Owners] whose shares total at least 51% of the Eklutna Project shares)."[4]

In 2020, the Commission concluded that it could only approve the ML&P sale if the Municipality surrendered its vote on the EOC.[5] The Order noted that after the

4 Eklutna Transition Plan, Exhibit E at 2 [attached as **Exhibit 3**].

5 Order U-18-102(44)/U-19-020(39)/U-19-021(39) at 147.

ML&P sale the Municipality no longer had an employee with the qualifications and experience to manage an electric utility.[6] The Commission explained,

> Under these circumstances we cannot unconditionally find that [the Municipality] is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that [the Municipality] is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna [Power Purchase Agreement] or the MEA [Power Purchase Agreement], ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without [the Municipality] having a vote on operation or management decisions.[7]

On October 27, 2020, the Municipality complied with the Order by entering into an agreement with the Project Owners in which the Municipality surrendered its voting rights on the EOC "and under the Fish and Wildlife Agreement."[8]

While the Order may have been useful at the time based on the expectation that the Municipality would soon hire qualified staff for the Anchorage Hydropower Utility, the present circumstances in which a final proposed Fish and Wildlife Program will be imminently transmitted to the governor for approval without any

affirmative act by the Municipality, nor its consent, renders the Order substantially unjust and deeply contrary to the public interest. Importantly, Anchorage Municipal Code is clear that the Assembly must approve the final proposed Fish and Wildlife Program before it is submitted to the governor.[9] Thus, it is in the public interest that the Order be modified to allow the Municipality to exercise its vote as the majority owner of the Project on policy matters regarding implementation of the 1991 Agreement, specifically the adoption of a multi-decade, multi-million dollar fish and wildlife mitigation plan, which Anchorage residents will be obligated to pay for.

FACTUAL BACKGROUND

The Eklutna Project consists of a 40-megawatt dam on the Eklutna River that was originally constructed by the federal government in 1950s. In the 1990s the federal government agreed to sell the Project to the Municipality, Chugach, and MEA. Thus, the Municipality acquired a 53.33 percent interest in the Project; Chugach and MEA acquired the remaining 30 percent and 16.67 percent, respectively.

Because there were concerns regarding the Project's affects on fish and wildlife, the Project Owners entered into a fish and wildlife agreement with the State of Alaska, Alaska Energy Authority, and federal agencies.[10] The 1991 Agreement requires the Project Owners to carry out certain measures to "protect, mitigate damages to, and enhance fish and wildlife (including related spawning grounds and

habitat)" in lieu of complying with certain federal hydroelectric licensing statutes.[11] Under the 1991 Agreement, the Project Owners must conduct studies, publish a draft fish and wildlife program containing measures "for the protection, mitigation of damages to, and enhancement of fish and wildlife," and submit a proposed final Fish and Wildlife Program to the governor for approval. The Project Owners "shall implement the Fish and Wildlife Program established by the Governor,"[12] beginning no later than 2027 and to be completed no later than 2032.[13]

In October 2023, the Project Owners released a draft fish and wildlife program based on a two-year study program and alternatives analysis.[14] The draft program, referred to as the "portal valve alternative," proposed to leave the Eklutna Dam in place but add a new valve and release structure to provide limited continuous, year-round flows from Eklutna Lake to the Eklutna River.[15] The draft program proposes to use existing water line infrastructure to transport the water from the lake one mile downstream from the dam to the release structure, leaving a portion of the Eklutna

13 *Id*.

14 The draft program was developed by Chugach and MEA. Although the Municipality's seal and name appears on the cover page, the Municipality did not have a vote on any decisions made by Chugach and MEA.

15 *See* Eklutna Hydroelectric Project, Draft Fish and Wildlife Program (October 2023), available at https://eklutnahydro.com/wp-content/uploads/2023/10/2023-10-27-Eklutna-Draft-Fish-and-Wildlife-Program_with-Appendices.pdf.

River de-watered. The Project Owners anticipate that the draft program will cost approximately $57 million—and will be funded by increases to electric ratepayers and municipal property taxes.[16] Importantly, the draft program did not consider a full dam removal option that was proposed by the Native Village of Eklutna and supported by many organizations and community members.[17]

On February 2, 2024, the Assembly adopted Assembly Resolution No. 2024-40, outlining the Assembly's concerns with the draft program's process and the potential affects to Anchorage drinking water. According to the Resolution, the "Municipality does not intend to issue authorizations or provide funds or any other form of support of the Draft Fish and Wildlife Program or any alternative that doesn't restore the full length of the Eklutna River or comply with policy of the Municipality, as recently enacted by AO 2023-131."[18]

On April 3, the Project Owners stated that "an alternatives analysis is not required under the 1991 Agreement [and] the Project Owners were not required to

The consultant flatly rejected undertaking any dam removal analysis.").

18 AR No. 2024-40, As Amended, § 2 (Feb. 2, 2024) [attached as **Exhibit 7**].

bring a handful of alternative proposals to the public."[19] The Project Owners indicated that they intended to submit the proposed final Fish and Wildlife Program to the governor by the end of April without the Assembly's approval as required by AMC 26.30.025B.2.[20]

LEGAL STANDARD

The Assembly seeks to narrowly modify an order conditionally granting a certificate of public convenience and necessity. When considering whether to grant a certificate under the Public Utilities Regulatory Act, AS 42.05, the Commission determines whether the "applicant is fit, willing, and able to provide the utility services applied for, and that those services are required for the public convenience and necessity."[21] The Commission considers three factors in deciding whether an entity is fit, willing, and able to provide service: the entity's managerial, technical, and financial fitness.[22]

ARGUMENT

A. Authorizing the Municipality to Vote on Policy Decisions Implementing the 1991 Agreement Is Overwhelmingly in the Public Interest, and Assembly Approval of the Fish and Wildlife Program Is Required by Law.

Anchorage voters reasonably expect that their elected government will have a say in how public tax dollars are spent. However, if the proposed final Fish and Wildlife Program is submitted to the governor without the Municipality's vote as a majority owner of the Project, the Municipality may be required to fund and implement an Eklutna mitigation plan that the Municipality did not formally approve.

It is vital that the Municipality's vote on matters regarding the 1991 Agreement be reinstated. Since 2017, the Assembly has consistently called for efforts to restore the Eklutna River and ensure continuous water flow to the greatest extent possible.[23] However, regardless of the substantive outcome or content of the proposed final Fish and Wildlife Program, there is a legal process that must be followed. Under AO 2023-131, the Assembly codified a requirement for Assembly approval before the plan is submitted to the governor. "The Proposed Final Fish and Wildlife Program to protect, mitigate, and enhance fish and wildlife resources in the Eklutna River shall be submitted to the Assembly with a proposed resolution in support for action, prior to its submission to the Governor of Alaska."[24] That code provision ensures that there is

LANDYE BENNETT BLUMSTEIN LLP

24 Exhibit 2 at 3.

a public process and that Anchorage's elected policy-making body, the Assembly, will have a role in approving the proposed final Fish and Wildlife Program before it is implemented.

Subsequently, in February 2024, the Assembly clarified municipal law regarding the authority to make policy decisions implementing the 1991 Agreement. "Pursuant to section 26.30.025, the assembly shall be responsible for all policy decisions related to the municipality's performance under the 1991 Fish and Wildlife agreement regarding the Eklutna hydroelectric project."[25] Municipal law is clear; the Assembly has the responsibility to make policy decisions regarding the 1991 Agreement, including deciding whether or not to approve the proposed Fish and Wildlife Program.

The recent code changes mean that the Commission's specific concerns at the time of the ML&P sale in 2020 are no longer applicable. There is no risk that policy decisions regarding implementation of the 1991 Agreement, specifically the adoption of the proposed final Fish and Wildlife Program, will be made by a municipal employee who lacks the required qualifications and experience. Although the Municipality has attempted to fill the open position with Anchorage Hydropower but has not succeeded, the lack of qualified employees is now a moot point. All policy

LANDYE BENNETT BLUMSTEIN LLP

[25] AO No. 2024-28, § 1 (Mar. 19, 2024) (to be codified at AMC 3.20.070) [attached as **Exhibit 10**].

decisions, including whether to approve the Fish and Wildlife Program, may only be made by the Assembly.

Thus, the Commission should modify Order No. 39 to allow the Municipality to exercise its vote as a majority owner of the Project on policy decisions regarding implementation of the 1991 Agreement, specifically whether to approve the proposed final Fish and Wildlife Program.[26]

B. Modification of Order No. 39 Will Not Affect Any Day-to-Day Management and Operation Decisions Regarding the Project.

The Assembly's request is narrow. The Municipality's vote on the EOC should be reinstated but only for policy decisions under the 1991 Agreement. The Assembly does not propose to reinstate the Municipality's vote on any technical aspects of the Project, utility operations, or day-to-day management decisions. Those decisions, as outlined in the Exhibit E to the Eklutna Transition Plan,[27] would continue to be made by Chugach and MEA "until such time as [Municipal Hydropower] has shown to [the

ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152. FAX (907) 276-8433

[26] The Assembly expressly reserves and does not waive the argument that the Commission lacked jurisdiction and authority to require the Municipality to surrender its voting rights under the 1991 Agreement, and that the Administration lacked authority to enter into the 2020 "Surrender of Eklutna Operating Committee (EOC) Voting Rights."

[27] *See* Exhibit 3.

Commission's] satisfaction that [Municipal Hydropower] has acquired the expertise required to fully participate as a voting member of the EOC."[28]

CONCLUSION

For the foregoing reasons, the Commission should reopen the docket in this matter and modify Order No. 39 dated May 28, 2020. The Commission should allow the Municipality to exercise its vote on the EOC as the majority owner of the Project, but only on policy matters regarding implementation of the 1991 Agreement, including whether or not to approve the proposed final Fish and Wildlife Program before it is submitted to the governor. Because Anchorage law requires Assembly approval of the proposed final Fish and Wildlife Program, and the Municipality will be contractually bound to fund and implement the plan, there is no just reason why the Municipality should not have a vote before the plan is submitted to the governor.

The Anchorage Assembly respectfully petitions to intervene in this action pursuant to 3 AAC 48.110. The Assembly is the legislative and policy-making body of the Municipality of Anchorage (the "Municipality"), and by intervening in this action seeks to modify Order No. 39 dated May 28, 2020, requiring the surrender of the Municipality's voting rights under the 1991 Fish and Wildlife Agreement.[1]

INTRODUCTION

This consolidated docket concerns applications and petitions filed in connection with the sale of Municipal Light & Power Department ("ML&P) to Chugach Electric Association ("Chugach"). When that transaction concluded, the Municipality no longer had an employee with the qualifications and experience to manage an electric utility.[2] Accordingly, the Commission required the Municipality to surrender its voting rights on the Eklutna Operating Committee ("EOC"), a group of representatives from each owner of the Eklutna Hydropower Project (the "Project").[3] Although the Municipality holds a 53.33 percent ownership interest in the Project, the Order required that all policy and management decisions regarding the Project be made by the minority Project Owners, Chugach and Matanuska Electric

Association ("MEA"), until the Municipality hired staff with the requisite qualifications and experience to serve as its voting representative on the EOC.

However, in the four years since ML&P's sale and entry of the Order, the Municipality has been unable to fill the open position with Anchorage Hydropower—the department responsible for managing the Municipality's ownership interest in the Project. In the meantime, the EOC has moved forward with developing a proposed Fish and Wildlife Program pursuant to the 1991 Agreement that would potentially commit the Municipality to a decades-long, multi-million dollar mitigation plan. The Project Owners—including the Municipality—are required to fund and implement the Fish and Wildlife Program once it is adopted by the governor.

Despite potentially binding the Municipality to significant financial and other commitments, the Municipality presently has no opportunity to vote on the proposed final Fish and Wildlife Program. Resident taxpayers of the Municipality may ultimately be responsible for funding a portion of the $57 million mitigation plan even though they had no formal representation in the decision-making process. The Administration has taken no action to reinstate the Municipality's vote on the EOC regarding implementation of the 1991 Agreement. Thus, the Assembly seeks to intervene under 3 AAC 48.110 for the purpose of filing a motion to reopen dockets and modify Order No. 39, urging this Commission to reinstate the Municipality's voting right as to the narrow but important issue of the 1991 Agreement.

ARGUMENT

I. The Assembly Is Entitled to Intervene as a Matter of Right.

"Any person who has a statutory right to be made a party to that proceeding will be permitted to intervene."[4] Anchorage is a home rule municipality and the Assembly is vested with governmental powers under the Anchorage Charter. Under Article X, Section 11 of the Alaska Constitution, the Assembly "may exercise all legislative powers not prohibited by law or by charter."[5] The Alaska Constitution also explicitly calls for "maximum local self-government" and demands that "[a] liberal construction shall be given to the powers of local government units." Here, the Assembly has exercised its legislative authority to require that the proposed final Fish and Wildlife Program be submitted to the Assembly for approval before being transmitted to the governor.[6] Thus, the Assembly should be entitled to intervene as a matter of right in this proceeding.

II. Alternatively, the Assembly Should Be Permitted to Intervene at the Commission's Discretion.

Under 3 AAC 48.110 "any person whose intervention will be conducive to the ends of justice and will not unduly delay the conduct of the proceeding" may be

---

4 3 AAC 48.110(a).

5 Alaska Const. Art. X, § 11.

6 *See* Exhibit 2 at 3, Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020.

permitted to intervene.[7] In ruling on a petition for intervention, the Commission considers seven factors:

> (1) the nature of the petitioner's right under statute to be made a party to the proceeding;
>
> (2) the nature and extent of the property, financial, or other interest of the petitioner;
>
> (3) the effect on petitioner's interest of the order which may be entered in the proceeding;
>
> (4) the availability of other means by which the petitioner's interest may be protected;
>
> (5) the extent to which petitioner's interest will be represented by existing parties;
>
> (6) the extent to which petitioner's participation may reasonably be expected to assist in the development of a sound record, including the issues that petitioner intends to address in the proceeding; and
>
> (7) the extent to which participation of the petitioner will broaden the issue or delay the proceeding.[8]

The Assembly's Petition satisfies each of the seven factors for permissive intervention.

First, the Assembly has a statutory right to be made a party to this proceeding, as explained above.

Second, the Assembly has a financial interest in this matter. The proposed final Fish and Wildlife Program is anticipated to cost at least $57 million and will be funded by increases to Anchorage electricity ratepayers and property taxpayers. The responsibility for appropriating money and determining tax rates is vested in the Assembly.

Third, the Assembly is significantly and uniquely affected by Order No. 39 in this matter. The Order required the Municipality to surrender its vote on decisions implementing the 1991 Agreement. However, the Assembly recently codified a process in which the Assembly must approve the proposed final Fish and Wildlife Program before it is submitted to the governor.[9] Thus, the Order undermines the Assembly's legal authority to approve the mitigation plan. As the elected representative body for residents of the Municipality, the Assembly has a clear and cognizable interest in protecting its constituents' voice in this proceeding.

Fourth, intervention by the Assembly is the only way its interests will be protected. There is no alternative forum in which the Assembly can seek modification of the Order. On information and belief, the other Project Owners are scheduled to vote on approving the proposed final Fish and Wildlife Program in the coming weeks. Once Chugach and MEA approve the plan, it is expected to be submitted to the

9 *See* Exhibits 2 and 10, Anchorage Assembly's Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020.

governor before the end of this month. The Assembly's challenge to the Order must be raised first with this Commission before seeking any judicial relief.

Fifth, the Assembly's interests are not already represented in this matter because the Administration has not taken any steps to reinstate the Municipality's vote on decisions implementing the 1991 Agreement. Courts allow legislative bodies to intervene in actions when the executive branch is a already a party but where the executive has failed to enforce or defend an existing law.[10] Here, the Assembly is the only party presently advancing the argument that the Order should be modified to permit the Assembly to exercise its legal authority under AMC 26.30.025.[11]

Sixth, because the Municipality has taken no action on this issue, the Assembly's participation is imperative to the development of a sound record. As discussed above, the Assembly's interests are not adequately represented because the Administration has not taken any action to modify the Order or to advocate for the Municipality's legally-required role in implementing the 1991 Agreement. Without the Assembly's intervention, the record will be incomplete and the interests of justice will not be served.

Seventh and finally, the Assembly's intervention will not unnecessarily delay the proceeding or broaden the issues. The Assembly's Petition and Motion are

---

10 *See Hollingsworth v. Perry*, 570 U.S. 693 (2013); *Karcher v. May*, 484 U.S. 72 (1987).

11 *See* Exhibits 2 and 10, Anchorage Assembly's Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020.

focused on a single, narrow issue: whether the Municipality should be allowed to vote on the EOC's decision to submit a proposed final Fish and Wildlife Program to the governor. The Assembly does not seek to relitigate issues previously decided or to expand the scope of this proceeding beyond the key issues. The Assembly seeks only to respond to new developments that could not have been contemplated when the Order was initially entered.

Thus, as a matter of law and equity, the Assembly's Petition to Intervene should be granted.

CONCLUSION

For the foregoing reasons the Commission should grant the Assembly's petition to intervene in this matter. The Assembly should be permitted to intervene as a matter of right. Alternatively, the Commission should permit the Assembly to intervene for the limited purpose of seeking to modify Order No. 39.

DATED: April 15, 2024.

After a complex proceeding, with multiple parties and multiple weeks of hearing, the Regulatory Commission of Alaska ("Commission") authorized Chugach Electric Association, Inc. ("Chugach") to acquire most of the assets of the Municipality of Anchorage d/b/a Municipal Light & Power Department ("ML&P").[1] The Commission described the purchase "conceived by ML&P and Chugach" as "not straightforward."[2] Ultimately, this Commission only approved the transaction after imposing significant conditions. Without the required conditions this Commission would not have approved the acquisition.[3] The Anchorage Assembly now untimely seeks to revisit one of those conditions and unravel the Commission's carefully crafted decision on an expedited basis. The Commission should flatly deny the request for expedited consideration.

The requirement for ML&P to surrender its vote on the Eklutna Operating Committee under the Eklutna Project Agreements, which is the subject of the Anchorage Assembly's request, was specifically identified by the Commission as an example of one of its required conditions:

> For example, under the record before us we cannot find that MHP [Municipal Hydro Power] will remain managerially and technically fit to own a share of the Eklutna Project after ML&P employees are transferred to Chugach. This lack of fitness means that we cannot unconditionally grant MHP certificate authority to continue ownership of the Eklutna Project as

> requested in Docket U-19-021. This lack of fitness also means that we cannot unconditionally approve the Eklutna PPA as requested in Docket U-19-020. Given the lack of time to consider options, we impose conditions that address this issue [and require ML&P to surrender its vote on the Eklutna Operating Committee] rather than seek input from the parties.[4]

The Commission was well aware of the obligation for the Eklutna Operating Committee to work with Fish and Wildlife when it imposed the condition complained of by the Anchorage Assembly:

> [W]e cannot unconditionally find that MHP is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements *so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions*… This does not prohibit MHP from attending EOC meetings, *but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC*.[5]

The Anchorage Assembly did not petition for reconsideration or appeal the Commission's decision.

The municipal ordinance that the Anchorage Assembly claims requires "modification" of the Commission's requirement was passed and approved on December 19, 2023, with an immediate effective date.[6] The Anchorage Assembly then waited

5 *Id*. at 67 (emphasis added).

6 *Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020*, filed April 15, 2024, at Ex. 2.

almost four months to file its motion with the Commission. In contrast, the Anchorage Assembly would have the parties to this proceeding respond to their substantive request in four days and the Commission issue a decision in ten calendar days. This is patently unreasonable. The Commission's requirement at issue was an integral part of its overall decision in Order U-18-102(44)/U-19-020(39)/U-19-021(39) and was put in place based on the Commission's obligations under statute.[7] The Commission should deny the motion for expedited consideration on such an important matter and provide the parties with sufficient time to address the primary motion.

DATED this 17th day of April 2024, at Anchorage, Alaska.

HOMER ELECTRIC ASSOCIATION'S STATEMENT OF NON-PARTICIPATION AND WAIVER OF PARTY RIGHTS IN ANY PROCEEDINGS RELATED TO THE ANCHORAGE ASSEMBLY REQUESTS - EKLUTNA HYDROELECTRIC PROJECT

Birch, Horton, Bittner & Cherot, P.C., through Elisabeth H. Ross, hereby enters a limited appearance on behalf of Homer Electric Association, Inc. ("HEA"), and provides the following statement on HEA's behalf: On April 15, 2024, the Anchorage Assembly filed a Petition to Intervene, Motion to Reopen Dockets and Modify Order No. 39 dated May 28, 2020, and other supporting documents in U-18-102/U-19-020/U-19-021. HEA had participated as a party in proceedings that culminated in Order 39.

HEA has no interest related to the Anchorage Assembly's request. It waives all rights it may have as a party to participate in further proceedings, if any, in these dockets related to the Anchorage Assembly's requests,[1] including responding to pleadings or participating in any hearings or conferences. It takes no position on the requests and asks that it be removed from service lists related to the requests. If the Commission decides to conduct further proceedings on the requests, HEA asks that the Commission excuse it from all duties and obligations as a party under 3 AAC 48.155(b).[2] HEA seeks to avoid unnecessary costs for its members.

For purposes of her appearance on behalf of HEA, Ms. Ross's address is as follows:

Elisabeth H. Ross
Birch Horton Bittner & Cherot, P.C.
1150 Connecticut Avenue, NW, Suite 350
Washington, DC 20036
(202) 659-5800 (Phone) (202) 659-1027 (Fax)
eross@bhb.com

RESPECTFULLY SUBMITTED this 17th day of April, 2024.

BIRCH HORTON BITTNER & CHEROT
HOMER ELECTRIC ASSOCIATION, INC.

AFFIDAVIT OF CHRISTOPHER CONSTANT IN SUPPORT OF THE ANCHORAGE ASSEMBLY'S MOTION FOR EXPEDITED CONSIDERATION

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152. FAX (907) 276-8433

STATE OF ALASKA)
) ss.
THIRD JUDICIAL DISTRICT)

Christopher Constant, being duly sworn, states that:

1. I have personal knowledge of the facts and information set forth in this affidavit, and if called as a witness, I could and would testify to them.

2. I am the Chair of the Municipality of Anchorage Assembly (the "Assembly").

3. This affidavit is submitted in support of the Assembly's Motion for Expedited Consideration.

4. In October 2023, Eklutna Hydroelectric Project (the "Project") minority owners Chugach Electric Association and Matanuska Electric Association released a Draft Fish and Wildlife Program (the "Draft Program") for public review and comment, which noted their intent to submit a Final Proposed Fish and Wildlife Program to the governor for approval in April 2024.

5. The Draft Program fell short of the Assembly's expectations in several ways, including by failing to consider full dam removal, an alternative supported by some of the Project's key stakeholders including the Native Village of Eklutna ("NVE"), Eklutna, Inc., and the Assembly.

6. In response to the Draft Program, the Assembly enacted AO 2023-131 as amended, requiring that the Proposed Final Fish and Wildlife Program be submitted to the Assembly for approval before being submitted to the governor.

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152. FAX (907) 276-8433

7. In early 2024, the public engagement process for the Draft Program continued and public meetings were held in Anchorage and the Mat-Su Valley in late January 2024. The public comment deadline was February 19, 2024.

8. During the public comment period, the Assembly continued to advocate for changes to the Draft Program, including by adopting Assembly Resolution 2024-40 as amended, requesting that the Project owners seek a two-year extension of the deadline to submit a Proposed Final Fish and Wildlife Program to adequately address concerns by the public and the Assembly regarding the Draft Program.

9. On February 12, 2024, the Project owners rejected the Assembly's request to seek an extension, but indicated that they were revising the Draft Program to address concerns raised by stakeholders and the public. The Project owners stated that they were now assessing the dam removal alternative, and would release their assessment publicly in due course. A true and correct copy of the letter sent by the Project Owners to the Assembly is attached as **Exhibit 11**.

10. Throughout February and March 2024, it was reasonable for the Assembly to believe that its concerns were being considered and that additional changes to the Draft Program would be implemented before the Program was finalized.

11. On April 3, the Project owners announced that they would not implement any significant changes to the Draft Program to address the concerns raised

by NVE, Eklutna Inc., and the Assembly, or to seriously consider full dam removal and restoration of the Eklutna River.

12. As soon as the Assembly learned its concerns would not be incorporated into the proposed final Fish and Wildlife Program, the Assembly acted as quickly as reasonably possible under law and assembly procedure to protect its rights and the interests of Anchorage rate- and taxpayers, including overriding the Mayor's veto of AO 2024-28 as amended, and filing the Petition to Intervene, Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020, and Motion for Expedited Consideration.

FURTHER AFFIANT SAYETH NAUGHT.

Although the transaction that originally gave rise to this matter was "not straightforward,"[1] the relief that the Anchorage Assembly seeks now is simple. The elected representatives of the Municipality of Anchorage should have a vote on whether to approve a program that could potentially bind the Municipality to a multi-decades, multi-million dollar fish and wildlife mitigation plan. The Assembly's narrow request to modify Order No. 39 with respect to a minor part of a condition imposed solely on the Municipality does not "unravel" any of the substantive conditions of the transaction or affect—let alone prejudice—any other party to the original proceedings, particularly not ENSTAR.

While ENSTAR acknowledges that this is an "important matter" of public concern, ENSTAR's chief complaint is that the Assembly waited until now to raise the issue. However, the timeline has always been out of the Assembly's control. As described in the attached affidavit of Assembly Chair Christopher Constant, the Project Owners (Chugach and MEA) published a draft Fish and Wildlife Program in October 2023, followed by a public comment period that ended on February 19, 2024. During that time, the Assembly reasonably expected the Project Owners to incorporate into the final proposed program the Assembly's expectations for the fish and wildlife mitigation plan, as described in AR No. 2024-40 as amended,[2] and the

---

[2] *See* Anchorage Assembly's Exhibit 7.

Native Village of Eklutna's suggestions for a dam removal alternative.[3] However, on April 3, the Project Owners announced that they would not implement any significant changes to the Draft Program, nor analyze dam removal alternatives.[4] The Assembly moved promptly on April 9 to override the Mayor's veto of AO 2024-28 as amended, which clarified that the Assembly is responsible for all policy decisions "related to the municipality's performance under the 1991 Fish and Wildlife agreement."[5] The Assembly filed its petition to intervene and Motion to Modify Order No. 39 on an expedited basis less than a week later. Thus, there was no delay in the Assembly seeking relief.

The fact that Chugach and MEA intend to move forward by submitting the proposed final Fish and Wildlife Program to the governor by the end of April without the Municipality's consent or the Assembly's approval as required by law overwhelmingly justifies expedited consideration of this "important matter."

Background

In 1997, the federal Alaska Power Administration sold the Eklutna Hydroelectric Project (Project) to Matanuska Electric Association, Inc. (MEA), Chugach Electric Association, Inc. (Chugach), and the Municipality of Anchorage (MOA) d/b/a Municipal Light and Power Department (ML&P). Through this transaction MEA obtained a 16.67% undivided ownership interest in the Project, Chugach obtained a 30% undivided ownership interest, and ML&P acquired a 53.33% undivided interest. Under this transaction the utilities operate the Project through the Eklutna Operating Committee (EOC) based upon affirmative votes of at least two of the utilities with a combined Project ownership interest of at least 50%. This transaction was subject to the Fish and Wildlife Agreement, Snettisham and Eklutna Projects, dated August 7, 1991 (Fish and Wildlife Agreement). Under the Fish and Wildlife Agreement, the Eklutna Hydroelectric Project was exempted by law from the Federal Energy Regulatory Commission's jurisdiction in exchange for development of a Project fish and wildlife mitigation plan. This mitigation plan is required to be submitted to the Governor of the State of Alaska for approval, and its approval is supposed to be obtained by October 2, 2024.

Chugach and the MOA entered into an Asset Purchase and Sale Agreement (APSA) under which Chugach acquired most of the assets of ML&P for a substantial acquisition premium over the book value of those assets. Under the APSA the MOA would terminate the employment of all ML&P employees and those employees would be offered employment by Chugach. Among the ML&P assets retained by the MOA was the 53.33% undivided ownership interest in the Eklutna Hydroelectric Project. Chugach and ML&P asked us to approve this APSA. We opened Dockets U-19-020 and U-19-021 to consider the APSA, and then consolidated those dockets with Docket U-18-102. On May 28, 2020, we issued Order U-18-102(44)/Order U-19-020(39)/U-19-021(39) (Order U-18-102(44)) conditionally approving purchase by Chugach of most ML&P assets. One of the conditions we imposed in granting approval of the APSA is stated on page 67 of Order 44 as follows:

> Under these circumstances, we cannot unconditionally find that [the MOA retained electric

> utility referred to in Order U-18-102(44) as MHP] is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, **including negotiating compliance with the Fish and Wildlife Agreement**, without MHP having a vote on operation or management decisions. This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC. (emphasis added)

On October 30, 2020, the MOA d/b/a ML&P filed notice of surrender of its voting rights on the EOC in conformance with this condition in a manner that allowed the EOC to operate the Project based on unanimous agreement between MEA and Chugach. On October 30, 2020, Chugach filed notice that the transaction set out in the APSA, as modified by Order U-18-102(44) had closed. We closed these dockets with Order U-18-102(51)/U-19-020(46)/U-19-021(46), dated December 23, 2020.

On April 15, 2024, we received in these dockets a filing entitled *Anchorage Assembly's Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020*. On that same date we also received in these dockets filings entitled *Anchorage Assembly's Petition to Intervene*, *Anchorage Assembly's Motion for Expedited Consideration of Petition to Intervene and Motion to Reopen Docket and Modify Order No. 39 Dated May 28, 2020*, and *Affidavit of Andrew Erickson in Support of the Anchorage Assembly's Petition to Intervene; Motion to Reopen Dockets and Modify Order No. 39; & Motion for Expedited Consideration*. On April 17, 2024, we received in these dockets an entry of appearance and statement of non-participation from Homer Electric Association, Inc. and an opposition to the motion for expedited consideration from ENSTAR Natural Gas Company, LLC (ENSTAR). The Anchorage Assembly filed a response to ENSTAR's opposition on April 18, 2024, supported by an affidavit by Christopher Constant, chair of the Anchorage Assembly.

Discussion

Redesignation of Commission Panel

The chairman redesignates the Commission Panel for these dockets. The chairman designates Commissioners John Espindola, Keith Kurber II, and Robert M. Pickett and himself as the Commission Panel. Commissioner Robert M Pickett remains the Docket Manager.

Deny Motion to Reopen Dockets and Modify Order U-18-102(44)

We have reviewed the Anchorage Assembly's motion to reopen these dockets and modify Order U-18-102(44). This motion asserts that the Anchorage Assembly disagrees with the Fish and Wildlife Agreement mitigation plan prepared by MEA and Chugach through the EOC. The Anchorage Assembly seeks through this motion to regain its vote on the EOC in order to delay or prevent submission of the MEA/Chugach approved EOC mitigation plan to the Governor for approval. We

note that the Anchorage Assembly does not assert that the MOA has acquired the expertise required to fully participate as a voting member of the EOC.

We find that the motion to reopen these dockets and modify Order U-18-102(44) is a petition for reconsideration of that portion of Order U-18-102(44) quoted above. Under our regulation at 3 AAC 48.105, any party can petition for reconsideration of an order if the petition is filed within 15 days of the date that the order is issued. Order U-18-102(44) was issued May 28, 2020, and thus any petition for reconsideration of that order was due by June 12, 2020. Had the Anchorage Assembly timely filed a petition for reconsideration of that portion of Order U-18-102(44), we could have either found an alternative solution to the lack of managerial and technical fitness of MHP or we could have rejected the ASPA in its entirety. Now that the transaction under which Chugach acquired most ML&P assets has closed and Chugach has expended considerable resources incorporating those assets into Chugach's operations, that transaction can no longer be undone. Therefore, we deny the *Anchorage Assembly's Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020*, on the ground that it was untimely filed. This denial is without prejudice to the MOA seeking to regain its vote on the EOC under the terms set out in Order U-18-102(44).

We note that under 3 AAC 48.105, only parties to a proceeding can file a petition for reconsideration of an order. It is unclear to us that the Anchorage Assembly was a party to these proceedings, and based on the filing of a petition to intervene by the Anchorage Assembly it appears that the Assembly does not believe that it was a party to these dockets. Given our resolution of the motion to reopen and modify above, we do not need to resolve this issue. We raise it so that the Anchorage Assembly can address it if they choose to seek reconsideration of this order.

Deny Petition to Intervene

Under our regulation at 3 AAC 48.110(a), "[p]etitions for permission to intervene as a party will be considered only in those cases that are to be decided upon an evidentiary record after notice and hearing." The relief that the Anchorage Assembly seeks in these dockets will affect the substantive rights of others and cannot be granted without giving those others a reasonable opportunity to respond. These dockets have been closed for over three years and we have no process under the statutory timelines established by AS 42.05.175 to reopen these dockets and hold another evidentiary hearing. As we cannot schedule another hearing in these dockets, we do not consider the Anchorage Assembly's petition to intervene in these dockets and deny that petition as being moot.

Deny Motion for Expedited Consideration

We have reviewed the Anchorage Assembly's motion for expedited consideration of its motion to reopen these dockets and its petition to intervene. We are issuing this order before the April 25, 2024, decision date requested by the Anchorage Assembly. However, we can only do so because we are denying those pleadings without waiting for input from the parties to these dockets. We agree with the opposition filed by ENSTAR that any other resolution of these pleadings cannot reasonably be accomplished consistent with the requirements of Due Process on the timeline requested by the Anchorage Assembly. Therefore, we deny the Anchorage Assembly's motion for expedited consideration.

Addressing Anchorage Ordinances

Attached to the Affidavit of Andrew Erickson in support of the Anchorage Assembly's pleadings, as Exhibit 2 and Exhibit 10, are ordinances designated as AO No. 2023-131, As Amended December 19, 2023, and AO No. 2024-28, which passed on March 27, 2024, and the Mayor's veto was overridden on April 9, 2024. These ordinances both purport to prohibit submission of the Fish and Wildlife mitigation plan developed by the EOC to the Governor without prior Assembly approval. We remind the Anchorage Assembly of AS 42.05.641, which states:

> The commission's jurisdiction and authority extend to public utilities operating within a municipality, whether home rule or otherwise. In the event of a conflict between a certificate, order, decision, or regulation of the commission and a charter, permit, franchise, ordinance, rule, or regulation of such a local governmental entity, the certificate, order, decision, or regulation of the commission shall prevail.

We required in Order U-18-102(44) that the MOA to surrender its right to vote on the EOC specifically to prevent the MOA from delaying or changing the EOC's Project management decisions, including decisions related to the Fish and Wildlife Agreement, until such time as the MOA convinces us that it has acquired the expertise required to fully participate as a voting member of the EOC. The MOA has failed to make any showing that it has acquired the expertise required to fully participate as a voting member of the EOC, and we have not reinstated the MOA's status as a voting member of the EOC. We inform the Anchorage Assembly that any effort to delay or change EOC Project management decisions by ordinance is void under AS 42.05.641 as being contrary to Order U-18-102(44).

Order

1. Commissioners Robert A. Doyle, John Espindola, Keith Kurber II, and Robert M. Picket are designated as the Commission Panel.

2. *Anchorage Assembly's Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020*, filed in Dockets U-18-102, U-19-020, and U-19-021, on April 15, 2024, is denied.

3. *Anchorage Assembly's Petition to Intervene*, filed in Dockets U-18-102, U-19-020, and U-19-021, on April 15, 2024, is denied.

4. *Anchorage Assembly's Motion for Expedited Consideration of Petition to Intervene and Motion to Reopen Docket and Modify Order No. 39 Dated May 28, 2020*, filed in Dockets U-18-102, U-19-020, and U-19-021, on April 15, 2024, is denied.

Subject: Order U-18-102(52)/U-19-020(47)/U-19-021(47) ML&P - Chugach
Date: Friday, April 19, 2024 8:04:04 AM

BY THE COMMISSION

Order U-18-102(52)/U-19-020(47)/U-19-021(47)

ORDER REDESIGNATING COMMISSION PANEL; DENYING MOTION TO REOPEN DOCKETS AND MODIFY ORDER NO. 39 DATED MAY 28, 2020; DENYING PETITION TO INTERVENE; DENYING MOTION FOR EXPEDITED CONSIDERATION OF PETITION TO INTERVENE AND MOTION TO REOPEN DOCKET AND MODIFY ORDER 39 DATED MAY 28, 2020; AND ADDRESSING ANCHORAGE ORDINANCES

Background

In 1997, the federal Alaska Power Administration sold the Eklutna Hydroelectric Project (Project) to Matanuska Electric Association, Inc. (MEA), Chugach Electric Association, Inc. (Chugach), and the Municipality of Anchorage (MOA) d/b/a Municipal Light and Power Department (ML&P). Through this transaction MEA obtained a 16.67% undivided ownership interest in the Project, Chugach obtained a 30% undivided ownership interest, and ML&P acquired a 53.33% undivided interest. Under this transaction the utilities operate the Project through the Eklutna Operating Committee (EOC) based upon affirmative votes of at least two of the utilities with a combined Project ownership interest of at least 50%. This transaction was subject to the Fish and Wildlife Agreement, Snettisham and Eklutna Projects, dated August 7, 1991 (Fish and Wildlife Agreement). Under the Fish and Wildlife Agreement, the Eklutna Hydroelectric Project was exempted by law from the Federal Energy Regulatory Commission's jurisdiction in exchange for development of a Project fish and wildlife mitigation plan. This mitigation plan is required to be submitted to the Governor of the State of Alaska for approval, and its approval is supposed to be obtained by October 2, 2024.

Chugach and the MOA entered into an Asset Purchase and Sale Agreement (APSA) under which Chugach acquired most of the assets of ML&P for a substantial acquisition premium over the book value of those assets. Under the APSA the MOA would terminate the employment of all ML&P employees and those employees would be offered employment by Chugach. Among the ML&P assets retained by the MOA was the 53.33% undivided ownership interest in the Eklutna Hydroelectric Project. Chugach and ML&P asked us to approve this APSA. We opened Dockets U-19-020 and U-19-021 to consider the APSA, and then consolidated those dockets with Docket U-18-102. On May 28, 2020, we issued Order U-18-102(44)/Order U-19-020(39)/U-19-021(39) (Order U-18-102(44)) conditionally approving purchase by Chugach of most ML&P assets. One of the conditions we imposed in granting approval of the APSA is stated on page 67 of Order 44 as follows:

> Under these circumstances, we cannot unconditionally find that [the MOA retained electric

> utility referred to in Order U-18-102(44) as MHP] is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, **including negotiating compliance with the Fish and Wildlife Agreement**, without MHP having a vote on operation or management decisions. This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC. (emphasis added)

On October 30, 2020, the MOA d/b/a ML&P filed notice of surrender of its voting rights on the EOC in conformance with this condition in a manner that allowed the EOC to operate the Project based on unanimous agreement between MEA and Chugach. On October 30, 2020, Chugach filed notice that the transaction set out in the APSA, as modified by Order U-18-102(44) had closed. We closed these dockets with Order U-18-102(51)/U-19-020(46)/U-19-021(46), dated December 23, 2020.

On April 15, 2024, we received in these dockets a filing entitled *Anchorage Assembly's Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020*. On that same date we also received in these dockets filings entitled *Anchorage Assembly's Petition to Intervene*, *Anchorage Assembly's Motion for Expedited Consideration of Petition to Intervene and Motion to Reopen Docket and Modify Order No. 39 Dated May 28, 2020*, and *Affidavit of Andrew Erickson in Support of the Anchorage Assembly's Petition to Intervene; Motion to Reopen Dockets and Modify Order No. 39; & Motion for Expedited Consideration*. On April 17, 2024, we received in these dockets an entry of appearance and statement of non-participation from Homer Electric Association, Inc. and an opposition to the motion for expedited consideration from ENSTAR Natural Gas Company, LLC (ENSTAR). The Anchorage Assembly filed a response to ENSTAR's opposition on April 18, 2024, supported by an affidavit by Christopher Constant, chair of the Anchorage Assembly.

Discussion

Redesignation of Commission Panel

The chairman redesignates the Commission Panel for these dockets. The chairman designates Commissioners John Espindola, Keith Kurber II, and Robert M. Pickett and himself as the Commission Panel. Commissioner Robert M Pickett remains the Docket Manager.

Deny Motion to Reopen Dockets and Modify Order U-18-102(44)

We have reviewed the Anchorage Assembly's motion to reopen these dockets and modify Order U-18-102(44). This motion asserts that the Anchorage Assembly disagrees with the Fish and Wildlife Agreement mitigation plan prepared by MEA and Chugach through the EOC. The Anchorage Assembly seeks through this motion to regain its vote on the EOC in order to delay or prevent submission of the MEA/Chugach approved EOC mitigation plan to the Governor for approval. We

note that the Anchorage Assembly does not assert that the MOA has acquired the expertise required to fully participate as a voting member of the EOC.

We find that the motion to reopen these dockets and modify Order U-18-102(44) is a petition for reconsideration of that portion of Order U-18-102(44) quoted above. Under our regulation at 3 AAC 48.105, any party can petition for reconsideration of an order if the petition is filed within 15 days of the date that the order is issued. Order U-18-102(44) was issued May 28, 2020, and thus any petition for reconsideration of that order was due by June 12, 2020. Had the Anchorage Assembly timely filed a petition for reconsideration of that portion of Order U-18-102(44), we could have either found an alternative solution to the lack of managerial and technical fitness of MHP or we could have rejected the ASPA in its entirety. Now that the transaction under which Chugach acquired most ML&P assets has closed and Chugach has expended considerable resources incorporating those assets into Chugach's operations, that transaction can no longer be undone. Therefore, we deny the *Anchorage Assembly's Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020*, on the ground that it was untimely filed. This denial is without prejudice to the MOA seeking to regain its vote on the EOC under the terms set out in Order U-18-102(44).

We note that under 3 AAC 48.105, only parties to a proceeding can file a petition for reconsideration of an order. It is unclear to us that the Anchorage Assembly was a party to these proceedings, and based on the filing of a petition to intervene by the Anchorage Assembly it appears that the Assembly does not believe that it was a party to these dockets. Given our resolution of the motion to reopen and modify above, we do not need to resolve this issue. We raise it so that the Anchorage Assembly can address it if they choose to seek reconsideration of this order.

Deny Petition to Intervene

Under our regulation at 3 AAC 48.110(a), "[p]etitions for permission to intervene as a party will be considered only in those cases that are to be decided upon an evidentiary record after notice and hearing." The relief that the Anchorage Assembly seeks in these dockets will affect the substantive rights of others and cannot be granted without giving those others a reasonable opportunity to respond. These dockets have been closed for over three years and we have no process under the statutory timelines established by AS 42.05.175 to reopen these dockets and hold another evidentiary hearing. As we cannot schedule another hearing in these dockets, we do not consider the Anchorage Assembly's petition to intervene in these dockets and deny that petition as being moot.

Deny Motion for Expedited Consideration

We have reviewed the Anchorage Assembly's motion for expedited consideration of its motion to reopen these dockets and its petition to intervene. We are issuing this order before the April 25, 2024, decision date requested by the Anchorage Assembly. However, we can only do so because we are denying those pleadings without waiting for input from the parties to these dockets. We agree with the opposition filed by ENSTAR that any other resolution of these pleadings cannot reasonably be accomplished consistent with the requirements of Due Process on the timeline requested by the Anchorage Assembly. Therefore, we deny the Anchorage Assembly's motion for expedited consideration.

Addressing Anchorage Ordinances

Attached to the Affidavit of Andrew Erickson in support of the Anchorage Assembly's pleadings, as Exhibit 2 and Exhibit 10, are ordinances designated as AO No. 2023-131, As Amended December 19, 2023, and AO No. 2024-28, which passed on March 27, 2024, and the Mayor's veto was overridden on April 9, 2024. These ordinances both purport to prohibit submission of the Fish and Wildlife mitigation plan developed by the EOC to the Governor without prior Assembly approval. We remind the Anchorage Assembly of AS 42.05.641, which states:

> The commission's jurisdiction and authority extend to public utilities operating within a municipality, whether home rule or otherwise. In the event of a conflict between a certificate, order, decision, or regulation of the commission and a charter, permit, franchise, ordinance, rule, or regulation of such a local governmental entity, the certificate, order, decision, or regulation of the commission shall prevail.

We required in Order U-18-102(44) that the MOA to surrender its right to vote on the EOC specifically to prevent the MOA from delaying or changing the EOC's Project management decisions, including decisions related to the Fish and Wildlife Agreement, until such time as the MOA convinces us that it has acquired the expertise required to fully participate as a voting member of the EOC. The MOA has failed to make any showing that it has acquired the expertise required to fully participate as a voting member of the EOC, and we have not reinstated the MOA's status as a voting member of the EOC. We inform the Anchorage Assembly that any effort to delay or change EOC Project management decisions by ordinance is void under AS 42.05.641 as being contrary to Order U-18-102(44).

Order

1. Commissioners Robert A. Doyle, John Espindola, Keith Kurber II, and Robert M. Picket are designated as the Commission Panel.

2. *Anchorage Assembly's Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020*, filed in Dockets U-18-102, U-19-020, and U-19-021, on April 15, 2024, is denied.

3. *Anchorage Assembly's Petition to Intervene*, filed in Dockets U-18-102, U-19-020, and U-19-021, on April 15, 2024, is denied.

4. *Anchorage Assembly's Motion for Expedited Consideration of Petition to Intervene and Motion to Reopen Docket and Modify Order No. 39 Dated May 28, 2020*, filed in Dockets U-18-102, U-19-020, and U-19-021, on April 15, 2024, is denied.

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

THIRD JUDICIAL DISTRICT AT ANCHORAGE

ANCHORAGE MUNICIPAL ASSEMBLY, and CHRISTOPHER CONSTANT, in his official capacity as Chair of the Anchorage Assembly, Plaintiffs, v. ANNE HELZER, in her official capacity as the Anchorage Municipal Attorney, Defendant.	)	Case No. 3AN-24-_____CI

(PROPOSED) ORDER TO SHOW CAUSE

This matter comes before the Court on the Plaintiff's *Ex Parte* Motion for Order to Show Cause and to Enforce Subpoena, filed pursuant to Alaska Rule of Civil Procedure 90(b) and Anchorage Municipal Code 2.30.085. This Court has considered the Motion, Complaint, and accompanying Affidavits and Exhibits, and finds that the Plaintiffs have made a proper showing that the Defendant Anne Helzer has not complied with a valid subpoena for production of documents.

It is therefore ORDERED that the Defendant shall appear and show cause on the ____ day of _____, 2024 at _____ am / pm in Courtroom ____.

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

The show-cause hearing may be automatically vacated if the Defendant complies with the Subpoena by Friday, April 26, 2024 at 12 noon. The Parties are directed to file a Joint Notice of Compliance if that condition is satisfied.

IT IS SO ORDERED.

DATED this _____ day of _____, 2024, at Anchorage, Alaska.

AFFIDAVIT OF LESLIE NEED IN SUPPORT OF THE ANCHORAGE ASSEMBLY'S MOTION FOR EXPEDITED CONSIDERATION

STATE OF ALASKA)
) ss.
THIRD JUDICIAL DISTRICT)

Leslie Need, being duly sworn, states that:

1. I have personal knowledge of the facts and information set forth in this affidavit, and if called as a witness, I could and would testify to them.

2. I am an attorney at the law firm of Landye Bennett Blumstein LLP and am counsel of record for Plaintiffs.

3. This affidavit is submitted in support of the Plaintiffs' Motion for Expedited Consideration.

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152. FAX (907) 276-8433

4. On Monday, April 22, 2024, the Defendant Anne Helzer was notified of the Anchorage Assembly's intent to file an enforcement action in this matter. A true and accurate copy of the email to Ms. Helzer and her response is attached as Exhibit 9. The notification requested Ms. Helzer's position regarding the Assembly's intent to file a motion for expedited consideration.

5. Although Ms. Helzer responded on Tuesday, April 23, 2024, she did not express an opinion regarding the Assembly's motion for expedited consideration. *See* Exhibit 9.

FURTHER AFFIANT SAYETH NAUGHT.

Hi Andy,
I am in D.C. at the US Supreme Court.
The MOA signed on as an amici in the Grants Pass v. Johnson case heard yesterday, April 22. I am heading out now to a family funeral on April 25.

I would appreciate it, as a professional courtesy, that we first have a conversation before you demand or compel me to do something. Your email sent at 1:41 AM(my time) is the first and only communication I received from you on this issue.

Your email states you will seek court action against me in my official capacity if I do not provide possession to you of lawyer-client documents before 4:00 PM today. Please understand, there is no simply opportunity for me to meaningfully consult with affected municipal clients before that time in order to comply with your demand.

On April 17, Mr. Hurt, Assembly Counsel, asked me for my input on a reasonable time frame to comply with the subpoena and I suggested April 30 was reasonable. Due to my out of state travel this week and last, I have been unable to meaningfully consult with affected departments and clients. The April 22 date was selected even though I was at the US Supreme Court the same day, and even though I am getting on a plane to a family funeral this afternoon.

One further complication is that your subpoena requires me, the lawyer, and not the client, to turn over possession of lawyer-client protected documents. Accordingly, I am required to consult with affected municipal department clients before possession of any lawyer client protected documents can be released.

You spent many hours in our conference room on April 4 reviewing the same documents you now seek possession of by compelled subpoena. Please let me know if you will also afford me a reasonable time to speak with affected municipal client departments and the Mayor about releasing possession of those same documents you already have access to, and Assembly members have access to, or if you will continue with a motion to compel.

Anne R. Helzer
Municipal Attorney
Municipality of Anchorage

From: Andy Erickson <andye@lbblawyers.com>

Subject: Anchorage Assembly v. Anne Helzer; Notice of Subpoena Enforcement Action

[EXTERNAL EMAIL]

Dear Ms. Helzer,
As you know, Leslie Need and I represent the Anchorage Assembly in matters regarding the Eklutna Hydroelectric Project. On April 16, 2024, the Assembly Leadership issued a "Subpoena to Produce Documents" that was served to you via email by Legislative Counsel Matthew Hurt. Your April 17 email to Mr. Hurt acknowledged receipt of that subpoena, and an extension was subsequently granted allowing you until Monday, April 22, 2024 at the close of business to comply with the subpoena. As of this writing, the Assembly Leadership has not received any documents from you or any substantive response to the subpoena. This email serves as notice that the Assembly Leadership has instructed us to file an enforcement action against you, in your official capacity as the Municipal Attorney, pursuant to AMC 2.30.085B. The Municipal Code provides that "[i]f a person refuses to comply with a subpoena issued under subsection A of this section, the superior court may, on application of the chair of the assembly, compel obedience by proceedings for contempt in the same manner as in the case of disobedience to the requirements of a subpoena issued by the court for refusal to testify in the court." AMC 2.30.085B (as amended by AO 2023-133). Under Alaska Rule of Civil Procedure 90(b), "For every contempt . . . upon a proper showing on ex parte motion supported by affidavits, the court shall either order the accused party to show cause at some reasonable time, to be therein specified, why the accused party should not be punished for the alleged contempt, or shall issue a bench warrant for the arrest of such party."

Because the Assembly has repeatedly emphasized that “time is of the essence in this matter,” we intend to move for expedited consideration of this enforcement action in the superior court, including a motion to compel production of the requested documents. Please let us know by Tuesday, at 4 pm (Alaska Time), whether you will agree to expedited consideration, or if not, the reasons why. Please let me know if you have any questions.

All further correspondence regarding this matter should be directed to Leslie Need and me, and cc’d to Dean Gates and Matthew Hurt.

Thanks,
Andy

Attorneys for the Plaintiffs

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

THIRD JUDICIAL DISTRICT AT ANCHORAGE

ANCHORAGE MUNICIPAL ASSEMBLY, and CHRISTOPHER CONSTANT, in his official capacity as Chair of the Anchorage Assembly, Plaintiffs, v. ANNE HELZER, in her official capacity as the Anchorage Municipal Attorney, Defendant.	Case No. 3AN-24-_____CI

COMPLAINT TO ENFORCE SUBPOENA ISSUED BY THE ANCHORAGE MUNICIPAL ASSEMBLY

Plaintiffs Anchorage Municipal Assembly, through its Chair, Christopher Constant (collectively the "Assembly"), respectfully request that this Court issue an

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

Order directing that the Defendant Anne Helzer (the "Defendant" or "Ms. Helzer") show cause and produce documents requested in a subpoena issued by Chair Chistopher Constant on behalf of the Assembly on April 16, 2024. This Complaint is brought pursuant to Alaska Rules of Civil Procedure 45 and 90(b) and Anchorage Municipal Code ("AMC") 2.30.085, and is supported by the accompanying Affidavit of Assembly Legislative Counsel Matthew Hurt, *Ex Parte* Motion for Order to Show Cause and to Enforce Subpoena, and the attachments thereto.

As the basis for this Complaint, the Assembly alleges as follows:

PARTIES

1. Plaintiffs are the Anchorage Municipal Assembly and its Chair, Christopher Constant, in his official capacity. Under the Anchorage Charter, the Assembly is the co-equal legislative branch of the Municipality of Anchorage.

2. At all times relevant to the events that are the subject of this dispute, Defendant Anne Helzer has served as the Anchorage Municipal Attorney. On information and belief, Ms. Helzer has custody and control of all the responsive documents that are described in the Subpoena. Ms. Helzer is sued in her official capacity.

JURISDICTION AND VENUE

3. This Court has jurisdiction over this action under AS 22.10.020, Alaska Rules of Civil Procedure 45 and 90(b), and AMC 2.30.085B.

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

4. Venue is proper in this Court under Alaska Rule of Civil Procedure 3 because this claim arose in Anchorage and the Defendant may be personally served in the Third Judicial District.

LEGAL BACKGROUND

5. The Assembly is authorized to issue subpoenas for the production of documents that relate to public matters being considered by the Assembly. AMC 2.30.085 provides in full:

> A. Subject to the privileges which witnesses have in courts of this state, the chairman of the assembly, with the approval of a majority vote of the assembly, may, in the chair's official capacity and on behalf and in the name of the assembly:
>
> 1. Compel by subpoena, at a specified time and place, the appearance and sworn testimony of a person whom the assembly reasonably believes may be able to give information relating to a public matter being considered by the assembly; and
>
> 2. Compel a person, by subpoena, to produce documents, papers or objects which the assembly reasonably believes may relate to a public matter being considered by the assembly.
>
> B. If a person refuses to comply with a subpoena issued under subsection A of this section, the superior court may, on application of the chair of the assembly, compel obedience by proceedings for contempt in the same manner as in the case of disobedience to the requirements of a subpoena issued by the court for refusal to testify in the court.

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

> C. A person who seeks to quash or limit a subpoena issued pursuant to this section may file an action against the assembly in superior court.[1]

6. Alaska Rule of Civil Procedure 45 provides that a subpoena may "command the person to whom it is directed to produce the books, papers, documents, electronically stored information, or other tangible things designated therein."

7. "Failure by any person without adequate excuse to obey a subpoena served upon that person may be deemed a contempt of the court from which the subpoena issued." Alaska R. Civ. P. 45(f).

8. Under Alaska Rule of Civil Procedure 90(b), "[f]or every contempt . . . upon a proper showing on ex parte motion supported by affidavits, the court shall either order the accused party to show cause at some reasonable time, to be therein specified, why the accused party should not be punished for the alleged contempt, or shall issue a bench warrant for the arrest of such party."

FACTUAL BACKGROUND

9. The Eklutna Hydroelectric Project consists of a 40-megawatt dam on the Eklutna River. In the 1990s the federal government agreed to sell the Project to the Municipality, Chugach Electric Association ("Chugach"), and Matanuska Electric Association ("MEA") (collectively the "Project Owners"). The Project Owners entered into a fish and wildlife agreement with the State of Alaska, Alaska Energy

Authority, and federal agencies (the "1991 Fish and Wildlife Agreement"). The 1991 Fish and Wildlife Agreement requires the Project Owners to carry out certain measures to "protect, mitigate damages to, and enhance fish and wildlife (including related spawning grounds and habitat)." Pursuant to the 1991 Fish and Wildlife Agreement, the Project Owners must submit a proposed Fish and Wildlife Program to the governor for approval and then implement the governor's approved final Fish and Wildlife Program beginning no later than 2027.

10. In or around 2017, the Project Owners entered into a "Common Interest Agreement" to facilitate negotiations regarding implementation of the 1991 Fish and Wildlife Agreement.

11. On information and belief, the Common Interest Agreement was executed by a representative of the Municipality of Anchorage and applies to the Municipality as whole, including all officers, departments, and branches of the municipal government.

12. As part of the negotiations among the Project Owners regarding implementation of the 1991 Fish and Wildlife Agreement, the Project Owners have entered into one or more agreements purportedly governing the Municipality's water rights and access to drinking water from Eklutna Lake. Each of those agreements is subject to Assembly approval.[2]

---

[2] *See* Exhibit 2 (AO No. 2024-28, As Amended).

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

13. On or about February 2, 2024, the Assembly learned that the Municipality and the Anchorage Water and Wastewater Utility ("AWWU") had entered into a final agreement described as a "Binding Term Sheet." *See* Emily Goodykoontz & Alex DeMarban, "What's Behind the Fight Over the Eklutna River," *Anchorage Daily News* (Apr. 18, 2024) ("[T]he Assembly earlier this year learned that the Bronson administration signed a deal with the utilities last October that will govern Anchorage's drinking water rights for 25 years. The agreement, a 'binding term sheet,' was based on the utilities' plan to tap into the city's water supply. It would go into effect if the governor approves the Fish and Wildlife program, city officials have said.").

14. During the February 2, 2024 Assembly Meeting, members of the Assembly requested to view copies of the Binding Term Sheet, which was shown to them by the Defendant during an executive session. The Assembly members were not permitted to retain copies of the Binding Term Sheet.

15. On March 27, 2024, the Assembly passed and approved AR No. 2024-103, a resolution approving the use of "subpoenas to compel testimony and document production related to the 1991 Fish and Wildlife Agreement (Eklutna Hydropower Project) or water rights to Eklutna Lake."[3]

[3] Exhibit 3 (AR No. 2024-103).

16. Also on March 27, 2024, pursuant to AR No. 2024-103, Chair Christopher Constant on behalf of the Assembly, issued subpoenas to produce documents to Municipal Manager Kent Kohlhase (the "Kohlhase Subpoena")[4] and AWWU General Manager Mark Corsentino (the "Corsentino Subpoena").[5]

17. The Kohlhase and Corsentino Subpoenas were identical in all substantive respects and requested production of the following documents by "5 p.m. on Wednesday, April 3, 2024":

> 1. The document described as a "binding term sheet" executed between the Eklutna Owners and the Anchorage Water and Wastewater Utility, which had been previously provided for review only in executive session; and
>
> 2. Any document constituting an existing agreement among the Eklutna Owners or between the Eklutna Owners and any third party upon which any claim of privilege or confidentiality is based.[6]

18. On April 2, 2024, Mayor Dave Bronson vetoed AR No. 2024-103. In his veto transmission, Mayor Bronson stated that the requested documents "have been made available" to the Assembly and "are available to them, and this open invitation continues."[7]

19. On April 3, 2024, Mr. Kohlhase and Mr. Corsentino each responded to the Kohlhase and Corsentino Subpoenas via email to Legislative Counsel Matthew Hurt, stating that they had "substantially complied" with their respective subpoenas "by making the documents available to the Assembly and its counsel for confidential review through the Municipal Attorney's Office."[8] Mr. Kohlhase and Mr. Corsentino further stated that that their "invitation for the Assembly and its legal counsel to review the documents through the Municipal Attorney's Office remains open."[9]

20. On April 4, 2024, Ms. Helzer allowed an Assembly member, the Assembly Counsel, and the Assembly's outside legal counsel to view copies of the Common Interest Agreement, Binding Term Sheet, and an amendment to the Binding Term Sheet at the Municipal Attorney's Office. However, Ms. Helzer would not allow the Assembly member to retain copies of those documents. Ms. Helzer also did not allow the Assembly member to have a confidential and attorney-client-privileged discussion regarding the documents with Assembly Counsel and the Assembly's outside legal counsel while they reviewed the documents. Ms. Helzer insisted that an Assistant Municipal Attorney remain in the room with the documents at all times.

21. On April 9, 2024, during an Assembly meeting, Assembly members reiterated their request for copies of the Common Interest Agreement, Binding Term Sheet, and amendment to the Binding Term Sheet in order to review and obtain legal

---

8 Exhibit 6 at 1-2.

9 Exhibit 6 at 1-2.

advice regarding those documents. Ms. Helzer stated that she could not provide the documents to the Assembly unless each Assembly member signed an additional confidentiality agreement, which would be subject to approval from the other Project Owners.

22. On information and belief, no other municipal officer or employee has been required to sign an additional confidentiality agreement prior to possessing or viewing documents under the Common Interest Agreement, including the Binding Term Sheet.

23. On April 9, 2024, the Assembly voted to override the Mayor's veto of AR No. 2024-103.

ISSUANCE AND SERVICE OF THE SUBPOENA

24. On April 16, 2024, pursuant to AR No. 2024-103, Chair Christopher Constant on behalf of the Assembly issued a subpoena (the "Subpoena") to Ms. Helzer.[10] The Subpoena required Ms. Helzer to produce the same documents that were described in the Kohlhase and Corsentino Subpoenas, and the amendment to the Binding Term Sheet:

> 1. The document described as a "binding term sheet" executed between the Eklutna Owners and the Anchorage Water and Wastewater Utility, which had been previously provided for review only in executive session, as well as any amendments, extensions,

ANCHORAGE, ALASKA
AO No. 2023-133

AN ORDINANCE OF THE ANCHORAGE ASSEMBLY AMENDING ANCHORAGE MUNICIPAL CODE SECTION 2.30.085, SUBPOENA POWERS.

WHEREAS, the Assembly formally codified its ability to issue subpoenas in 1991, by passing and approving AO 91-15(S) which enacted AMC Section 2.30.085; and

WHEREAS, when originally introduced, the intent if AO 91-15 was to recognize in the Assembly a subpoena power "similar to what the Alaska Legislature has under State Statutes"[1]; and

WHEREAS, the original proposed ordinance was modified by a substitute (S) version which included the words "involving municipal funds" to clarify that the subpoena was intended to apply to "any matter that the city is involved in directly, and it would exclude, by that language, private business matters that happen to reside within the geographical area"[2]; and

WHEREAS, the language "involving municipal funds" has been misconstrued to limit the Assembly's subpoena power strictly to matters of fiscal policy, while the state legislature's subpoena power is not limited in this way; and

WHEREAS, the intent of this ordinance is merely to clarify the Assembly's existing subpoena power, and not to expand its scope; now, therefore,

THE ANCHORAGE ASSEMBLY ORDAINS:

Section 1. Anchorage Municipal Code section 2.30.085 is hereby amended to read as follows (*the remainder of the section is not affected and therefore not set out)*:

2.30.085 Subpoena powers.

A. Subject to the privileges which witnesses have in courts of this state, the chair[MAN] of the assembly, with the approval of a majority vote of the assembly, may, in the chair's official capacity and on behalf and in the name of the assembly:

1. Compel by subpoena, at a specified time and place, the appearance and sworn testimony of a person whom the assembly reasonably believes may be able to give information relating to a public matter [INVOLVING MUNICIPAL FUNDS AND POLICY] being considered by the assembly; and

[1] AM 131-91 (Memorandum of Fred Dyson).
[2] Regular Assembly Meeting of Feb. 12, 1991.

2. Compel a person, by subpoena, to produce documents, papers or objects which the assembly reasonably believes may relate to a public [THE] matter being considered by the assembly [UNDER CONSIDERATION].

B. If a person refuses to comply with a subpoena issued under subsection A of this section, the superior court may, on application of the chair[MAN] of the assembly, compel obedience by proceedings for contempt in the same manner as in the case of disobedience to the requirements of a subpoena issued by the court for refusal to testify in the court.

C. A person who seeks to quash or limit a subpoena issued pursuant to this section may file an action against the assembly in superior court.

(AO No. 91-15(S))

Section 2. This ordinance shall be effective immediately upon passage and approval by the Assembly.

PASSED AND APPROVED by the Anchorage Assembly this 16th day of January, 2023.

Christopher Constant
Chair

MUNICIPALITY OF ANCHORAGE

ASSEMBLY MEMORANDUM

No. AM 955-2023

Meeting Date: December 5, 2023

From: **Assembly Chair Constant**

Subject: **AN ORDINANCE OF THE ANCHORAGE ASSEMBLY AMENDING ANCHORAGE MUNICIPAL CODE SECTION 2.30.085, SUBPOENA POWERS.**

The proposed ordinance clarifies the section of the Anchorage Municipal Code governing the Assembly's power to issue subpoenas. In keeping with the original intent of AO 91-15 as well as the relevant caselaw, the Assembly's authority to gather information needed to legislate on any matter of public concern "is an essential and appropriate auxiliary to the legislative function"[1]. It is not limited to only matters involving municipal funds, but instead broadly covers any public matter on which the Assembly may act or is considering legislative action. As such, this ordinance makes minor clarifying changes to the language already in Code and does not substantively alter the scope or process of the powers already possessed by this body.

There are no anticipated economic effects by this ordinance, so a summary of economic effects is not required.

I request your support for the ordinance.

From: Mayor Dave Bronson

Subject: Veto of Ordinance No. AO 2023-133

Today, in accordance with Section 2.30.100 of the Anchorage Municipal Code (AMC) and Section 5.02 of the Municipal Charter, I am issuing a veto for AO 2023-133, which was approved during the Assembly's special meeting on January 16, 2024.

Several Assembly members have pointed out that the original 1991 subpoena ordinance restricted the scope of subpoenas to "municipal funds and policy." For this reason, AO 2023-133 was passed by the Assembly to solidify the expansion of subpoena powers, allowing the Assembly to subpoena individuals within its authority for any "public matter being considered by the assembly."

Citizen participation in Municipal governance is voluntary under normal circumstances. Citizens are encouraged to participate through their Community Councils, Boards and Commissions, public commentary at Assembly meetings, or by contacting their Assembly Member. The Assembly subpoena process changes voluntary participation into mandatory participation—even in the face of citizen objection. Uncontrolled Assembly subpoena powers will create a potential chilling effect on citizen volunteers participating in their municipal government. In a recent incident, four Anchorage residents were subpoenaed by the Assembly in relation to an election matter. Three of them sought legal representation, eventually persuading the Assembly to accept their voluntary appearance at a public meeting instead of a mandated one. For these citizens, the subpoena process itself became a form of punishment or penalty, and the broadening of this process raises deep concerns.

Moreover, critics argue that the expanded subpoena powers are unnecessary. The Municipality already has a prosecution department for handling misdemeanors. Ultimately, the additional financial burden falls on the Anchorage taxpayer.

Because this ordinance allows the Assembly to mandate citizen testimony in an otherwise voluntary public venue, expands Assembly power to subpoena testimony and document production, and imposes additional financial burden on the Anchorage taxpayer, I hereby veto AO 2023-133.

(AO No. 79-170; AO No. 84-61(S))

Section 3. Anchorage Municipal Code section 25.30.020 is hereby amended to read as follows *(the remainder of the section is not affected and therefore not set out)*:

25.30.020 Disposal by ordinance.

A. Except as required or provided otherwise by law, the municipality may dispose of municipal land or any interest therein only by ordinance.

B. For purposes of this section, an interest in municipal land means any estate in real property or improvements thereon, including an interest in mineral, wind, solar, or water rights, but excluding the following if found by the assembly to be without substantial value to the municipality:

1. Revocable permits;

2. Revocable Licenses;

3. Rights-of-way; or

4. Easements.

*** *** ***

(AO No. 79-170; AO No. 80-48(S); AO No. 2007-102, § 1, 8-14-07; AO No. 2015-47, § 2, 5-14-15 , AO No. 2023-107, § 1, 10-10-2023)

Section 4. Anchorage Municipal Code section 26.30.025 is hereby amended to read as follows:

26.30.025 Eklutna River Restoration

A. It is the policy of the Municipality of Anchorage and the Anchorage Hydropower utility to restore the continuous water flow of the Eklutna River and the fish populations of the River and Eklutna Lake, to the greatest extent possible, subject to all provisions of the 1991 Fish & Wildlife Agreement.

B. Under the 1991 Agreement with the State of Alaska, federal agencies, and utility partners, the Municipality of Anchorage, through its Anchorage Hydropower utility and ownership share in the Eklutna Hydroelectric Project, bears responsibility to study and develop proposals for the protection, mitigation, and enhancement of fish and

wildlife affected by the hydroelectric development.

1. The Anchorage Hydropower utility shall provide a report to each joint session of the Anchorage Assembly and the Native Village of Eklutna under section 2.30.135B. regarding the restoration of the Eklutna River and Lake and the municipality's performance of its obligations under the 1991 Agreement and the Final Fish and Wildlife Program.

2. The Proposed Final Fish and Wildlife Program to protect, mitigate, and enhance fish and wildlife resources in the Eklutna River shall be subject to assembly approval [SUBMITTED TO THE ASSEMBLY WITH A PROPOSED RESOLUTION IN SUPPORT FOR ACTION], prior to its submission to the Governor of Alaska.

(AO No. 2023-131 § 1, 12-5-23)

Section 5. Anchorage Municipal Code is amended to insert a new section 26.40.090 to read as follows (requiring no legislative drafting):

26.40.090 Water rights.

The utility may enter agreements for water and water rights for use by or within the municipality, subject to approval by the assembly.

Section 6. This ordinance shall be effective immediately upon passage and approval by the Assembly.

PASSED AND APPROVED by the Anchorage Assembly this 27th day of March, 2024.

Christopher Constant
Chair

ATTEST:

Municipal Clerk

MUNICIPALITY OF ANCHORAGE
ASSEMBLY MEMORANDUM

No. AM 280-2024

Meeting Date: March 27, 2024

From: **Assembly Chair Constant**

Subject: **AO 2024-28 – AN ORDINANCE OF THE ANCHORAGE ASSEMBLY AMENDING ANCHORAGE MUNICIPAL CODE SECTIONS 3.20.070, 25.20.020, 25.30.020, 26.30.025, AND INSERTING A NEW SECTION 26.40.090 TO REQUIRE ASSEMBLY APPROVAL OF ACTIONS TO ACQUIRE OR DISPOSE OF PROPERTY RIGHTS TO WATER, MINERAL, WIND OR SOLAR RESOURCES, AND OF THE FISH AND WILDLIFE PROGRAM FOR THE EKLUTNA HYDROPOWER PROJECT AND RESTORATION OF CONTINUOUS WATER FLOWS TO THE EKLUNTA RIVER.**

The proposed Ordinance is submitted in response to the apparent effort by the Eklutna Owners group to incur financial obligations and dispose of Municipal resources and assets without the approval of or any formal consultation with the Assembly. That is in derogation to the Assembly's legislative powers; it has sole authority to obligate Municipal revenues through its appropriations power, and dispositions of Municipal property, which is apparent in the proposed Draft Fish and Wildlife Plan under the 1991 Agreement, requires Assembly approval. The proposed Ordinance clarifies incurring and obligating the Municipality in these circumstances where the proposed Final Fish and Wildlife Plan will become effective upon approval by the Governor, requires Assembly prior approval.

Section 1. The Proposed AO corrects an oversight in the language of AMC 3.20.070 which had apparently delegated broad policy-making decisions for utilities to the Mayor. This language is an improper delegation of the Assembly's authority as the legislative policy-making branch of the municipal government and directly conflicts with the language of AMC section 26.30.025 as codified in AO 2023-131. The changes proposed in this section will clarify that except for operational policies, the policy making authorities, such as budgetary, financial, construction, and other policy considerations reside with the Assembly and thereby resolves the conflict in the Code.

Sections 2 & 3. These proposed changes clarify the Assembly's approval authority over any agreements acquiring or disposing of any interest in real property, including water rights. Specifically, these changes are meant to address a perceived gap in the Code where creative legal instruments have previously been used to grant private parties exclusive use of Municipal property. These proposed amendments make plain that the Assembly's approval must be obtained for the Municipality to grant, dispose, or alter any parties' right to acquire, dispose of, control or access public property, including wind, solar, mineral and water rights.

Section 4. This proposed change inserts a new requirement for the Assembly to approve the final Fish and Wildlife program proposed under the 1991 Eklutna Dam agreement, prior to submission the Governor. This change has proven necessary, as the Eklutna Owners have made clear their intention to alter the Municipality's access to drinking water and obligate the Municipality to fund the final program inside the tax cap. These decisions have been made ignoring meaningful input from and policy guidance passed and approved by the Assembly over the past seven years and often in direct conflict to the guidance provided time and time again.

Section 5. Finally, Section 5 inserts a new section of code that requires AWWU submit any agreement for water rights to the Assembly for approval.

I request your support for the ordinance.

Prepared by: Assembly Counsel's Office

District 1- Northern Anchorage

MUNICIPALITY OF ANCHORAGE
MAYOR DAVE BRONSON

OFFICE OF THE MAYOR

RECEIVED
OFFICE OF
APR 03 2024
MUNICIPAL CLERK

Date: April 3, 2024

To: Anchorage Assembly

From: Mayor Dave Bronson

Subject: Veto of Ordinance No. AO 2024-28 (As Amended)

Today, in accordance with Section 2.30.100 of the Anchorage Municipal Code (AMC) and Section 5.02 of the Municipal Charter, I am issuing a veto for AO 2024-28 (As Amended), which was approved during the Assembly's special meeting of March 27, 2024.

History is instructive here. Seven years ago, the Assembly passed a resolution supporting the restoration of the hydrology and fisheries of the Eklutna River "subject to all provisions of the Fish and Wildlife agreement of August 7, 1991." (AR 2017-324(S)). While the Assembly at that time appropriately urged support from the utilities to restore hydrology and fisheries of the Eklutna River, the Assembly never presumed the power to second guess the operational decisions of the utilities themselves. (Anchorage Assembly, Regular Meeting of October 24, 2017 (51:30 - 58:38)).

Under Charter Section 16.01, municipal utilities are required to be operated as utilities, not as political tools. Municipal utilities combine subject-matter expertise and decision-making that is in the best interest of the Municipality and its citizens. In the past six months, however, the Assembly has shifted its stance to one of imposing operational control over the proposed Eklutna Fish and Wildlife Program to achieve a political purpose. This shift has resulted in legislation that pits politicians against subject matter experts, both inside and outside of the of the Municipality (AR 2024-75 (as amended)). This imposition by the Assembly has created tension between the utilities, affected departments, and executive staff charged with making operational decisions in the best interests of the Municipality. The ordinance I am vetoing today, AO 2024-28 (as amended), removes the policymaking power of the mayor as it was historically established in code for utilities – AWWU and the Anchorage Hydropower Utility.

There is no need to change Title 3 of the Anchorage Municipal Code to shift policymaking from one government branch to the other. As was stated at the March 27, 2024 meeting (32:05 – 32:30), and has been repeated numerous times before, serious concerns arise when powers are shifted between branches. Previous mayors signed documents on behalf of the Municipality relating to Eklutna Lake. Those actions were valid and binding upon the Municipality as a whole. The Municipality of Anchorage Charter grants executive and administrative power to the mayor. Assembly action that purports to strip executive and

administrative power from the mayor or municipal manager and grant that same power to itself raises the question of a charter violation.

The executive branch has held the power to make policy and execute agreements when the original agreements were signed in 1984 and 1991 and continues to hold this power today. Should the Assembly wish to disapprove executive branch actions, there are ways to accomplish its goals without dismantling the structure of our home rule municipal government as defined by the Anchorage Municipal Charter.

For the above reasons, I hereby veto AO 2024-28 (As Amended).

MUNICIPALITY OF ANCHORAGE

ASSEMBLY MEMORANDUM

No. AM 350-2024

Meeting Date: A p r i l 9 , 2024

From: **Assembly Chair Constant and Vice Chair Zaletel**

Subject: **Response to Mayoral vetoes of AR 2024-103 and AO 2024-28, As Amended.**

We request the Assembly override the Mayoral vetoes of AR 2024-103, dated April 2, 2024 and AO 2024-28, As Amended, dated April 3, 2024. Both vetoes are either woefully uniformed, or deliberately misleading. For the sake of clarity this memo addresses each veto in turn:

AR 2024-103

In the veto message of AR 2024-103, Mayor Dave Bronson states that "[b]ecause the Assembly is part of the Municipality of Anchorage, we have no objection to Assembly members making their own copies of the confidential term sheet and of the confidential Common Interest Agreement."[1] This statement is remarkable, not only for its sound logic, but particularly because it is the first time **any** member of the Administration has expressed this view to members of the Assembly, and it came in the form of a Mayoral veto.

On January 23, 2024, the Assembly learned of the existence of a "binding term sheet" between the Eklutna Owners and AWWU. It is notable that neither the Administration, nor the Department of Law saw fit to inform the Assembly of the existence of this document, but rather the Assembly Leadership was forced to send the Municipal Attorney a request asking to inspect it. The following day, the Municipal Attorney confirmed the existence of a document titled as a binding term sheet, but refused to allow us to see it, asserting that its terms and conditions were "confidential." This assertion of confidentiality notably lacked reference or citation to any legal authority, merely that, whatever its basis for a claim of confidentiality, the Municipal Attorney did not consider the Assembly to have the appropriate standing to see this document upon request.

Further, when Assembly Leadership agreed to take up this agreement in executive session on February 2, 2024, the Administration only provided a copy of the binding term sheet after receiving the consent of the other Eklutna Owners. When the Assembly requested to see correspondence between the Municipal Attorney and the Eklutna Owners, this was also refused as being "confidential." And finally, on April 4th when the Chair recently attempted to review the term sheet with the Assembly's attorneys, as the Mayor's veto clearly stated he would be able to, he was denied the opportunity to either retain a copy or even review and discuss it

[1] Veto of AR 2024-103.

without a municipal attorney present until the Eklutna Owners approved the language of a confidentiality agreement she intended to have both the Chair and the Attorneys sign. In this extraordinary change in Municipal policy, the Municipal Attorney didn't bother to apprise the Assembly Chair of her unilateral decision to restrict his ability to confer with counsel. Until the language of the confidentiality agreement was approved, the Chair and the Assembly's attorneys would only be allowed to view the document with a member of the Department of Law physically present in the room.

Despite the repeated affirmations of the Municipal Attorney that their office works for the Municipality of Anchorage and that its job is to advise both branches of the Municipal Government, the Assembly has been consistently treated as a third party, if not a party opponent, to the Eklutna Owners, and has been denied meaningful access to these documents.

AO 2024-28, As Amended.

The Mayor's veto quite condescendingly states that "[h]istory is instructive here"[2]. Ironically, we cannot agree more.

As the legislative branch of the Municipal Government, it is inherently the Assembly's role to articulate and codify the policy of the Municipal Government.[3]

The Administration's assertion that "[t]he executive branch held the power to make policy and executive agreements when the original agreements were signed in 1984 and 1991"[4] strikes us as statement that could be best described as grossly inaccurate.

The Mayor describes previous mayors as having "signed documents on behalf of the Municipality relating to Eklutna Lake. Those actions were valid and binding upon the Municipality as a whole."[5] However, the historical record of the Eklutna Project reflects substantial involvement by the Assembly and the public in those agreements.

In 1987, Mayor Tony Knowles presented the prospect of purchasing the Eklutna Hydropower Project and requested both public hearings and the Assembly's endorsement to even begin the negotiations for its purchase.[6] In 1989, Mayor Tom Fink presented the purchase agreement to the Assembly and requested authority from them to sign on behalf of the Municipality,[7] and again in 1991, requesting the Assembly's approval of the final amendment to the agreement.[8] The actions of these previous mayors were "valid and binding" not because there were the inherent prerogative of the executive, but rather, because they were done openly, with the

[2] Veto of AO 2024-28 (As Amended), pg 1.

advice, consultation, and **consent** of the Assembly.

History is instructive indeed.

By way of comparison, should we examine the actions of this administration? Not just with regard to Eklutna Lake, but his management of public utilities and public finances as a whole?

It is this Mayor who disregarded the requirements of code and unilaterally discontinued the fluoridation of the Municipality's water supply in violation of AMC 26.40.050.[9]

It is this Mayor who ignored the Assembly's authority to over contracts under AMC and illegally executed a multi-million dollar contract on a tent purportedly intended to shelter human beings but lacking any approved and verifiable engineering data pertaining to its capacity to hold snow load or withstand wind as required by Title 23 of the Municipal Code.[10]

It is this Mayor who ignored the State Legislative Program, duly enacted by the Assembly under AMC 2.10.075 and its published advocacy pamphlet, and instead printed a separate program and advocated his own personal policies to the State Legislature, undermining his own government, betraying the people of Anchorage, and violating subsection 2.10.075B.[11]

This Mayor clandestinely negotiated and is presently attempting to bind the Municipality to a series of agreements implicating tens of millions of taxpayers' and ratepayers' funds and access to drinking water for decades in direct contradiction of policies duly established and codified by the Assembly. Moreover, the Mayor's actions were done without clearly informing the public of the substance and effect of the unauthorized agreements he is attempting to make.

Nevertheless, with this historical context, this Mayor still has the temerity to assert that it is the action of the Assembly which "raises the question of a charter violation."[12]

History is instructive here, but not nearly so instructive as the law. We strongly encourage the Administration to apprise itself of both before implying that we have strayed from our sworn duties under the Charter. That the code had previously

delegated certain policy-making powers to the executive branch, does not, should not, and cannot be presumed to create an insurmountable impediment to returning such power to the policy-making branch: the legislative. This is particularly important now, when that power has been so grossly abused by an Administration so seemingly incapable of performing the most basic of functions of government without violating the law.

Regardless of the characterizations implied by the Mayor's vetoes, the actions of this body do not constitute an expansion of the Assembly's power or an impermissible intrusion into the authority of the executive. Rather, these are the measured and reasonable actions of a body attempting to secure information to which it is already entitled, to exercise legislative powers it has not had to exercise in the past, and to implement policies inherently within its authority.

We request your support for overriding the veto of both the ordinance and resolution.

ANCHORAGE, ALASKA
AR No. 2024-103

A RESOLUTION OF THE ANCHORAGE ASSEMBLY APPROVING THE USE OF SUBPOENAS TO COMPEL TESTIMONY AND DOCUMENT PRODUCTION RELATED TO THE 1991 FISH AND WILDLIFE AGREEMENT (EKLUTNA HYDROPOWER PROJECT) OR WATER RIGHTS TO EKLUTNA LAKE, PURSUANT TO ANCHORAGE MUNICIPAL CODE SECTION 2.30.085.

WHEREAS, Anchorage Municipal Code section 2.30.085, *Subpoena powers,* authorizes the Assembly Chair with the approval of a majority of the Assembly, to compel by subpoena the "testimony of a person whom the assembly reasonably believes may be able to give information relating to a public matter being considered by the assembly" and to "produce documents, papers or objects which the assembly reasonably believes may relate to a public matter being considered by the assembly"; and

WHEREAS, in 1984 the Alaska Power Administration and the Municipality Anchorage negotiated and executed an Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska (1984 Agreement) to secure water rights for the diversion of water from Eklutna Lake while protecting water volume needed for the Eklutna Hydropower Project; and

WHEREAS, in 1991, the Federal Government sold the Eklutna Dam Hydroelectric facility to the Chugach Electric Association, Matanuska Electric Association, and the Municipality of Anchorage (doing business as Anchorage Municipal Light and Power (ML&P)); and

WHEREAS, the terms of the 1991 Fish and Wildlife Agreement require a robust public process, in place of the process required for a Federal Energy Regulatory Commission license, whereby the owners are to study and propose a plan for mitigating the impact of the Eklutna Dam on local fish and wildlife; and

WHEREAS, in 1993, the Alaska Power Administration and the Municipality of Anchorage executed a supplemental agreement to their earlier 1984 Agreement (1993 Supplement) which currently governs Anchorage Water & Wastewater Utility's (AWWU) rights and access to drinking water from Eklutna Lake and is set to expire in 2025; and

WHEREAS, in May of 2020, the Regulatory Commission of Alaska (RCA) approved the sale of the ML&P from the Municipality of Anchorage to Chugach Electric Association (CEA), with the requirement that the Municipality surrender its vote as a member of the Eklutna Operating Committee, until it could demonstrate to the RCA that it has sufficient expertise within Municipal Hydro Power to participate again as a voting member; and

WHEREAS, the Assembly Leadership recently learned that in October 2023, AWWU and the Eklutna Owner's Group, executed an agreement which the Administration described to the Assembly as a "binding term sheet," the terms of which would govern AWWU's rights and access to drinking water from Eklutna Lake in the event the Governor endorses the currently proposed Fish and Wildlife Plan; and

WHEREAS, the Municipal Attorney and representatives of AWWU produced the binding term sheet in executive session and it was examined by the Assembly Members on February 2, 2024; and

WHEREA, on February 23, 2024, the Assembly met again and recessed to an executive session to discuss the legal implications of the binding term sheet and the Proposed Fish and Wildlife Program; and

WHEREAS, having taken up these matters in executive session, the Assembly finds that it is necessary in furtherance of the Assembly's legislative powers under the Charter and the Assembly's role to provide legislative oversight of municipal agencies and utilities, to compel production of the binding term sheet so that the Assembly may share the agreement with its counsel for legal review prior to a determination by the Assembly regarding whether it is appropriate and in the public interest to make the agreement a disclosable public record; and

WHEREAS, the Chair of the Assembly now requests authorization of the Assembly, per AMC section 2.30.085, to issue subpoenas for the production of agreements and other records specified herein, and Assembly's retention thereof;

NOW, THEREFORE BE IT RESOLVED THAT THE ANCHORAGE ASSEMBLY:

Section 1. Does hereby, pursuant to AMC section 2.30.085, authorize the Chair of the Assembly, on behalf and in the name of the Assembly, to compel by subpoena the attendance of persons to provide testimony or produce documents at a time and place specified by the Chair, as described below:

A. The agreement described as a "binding term sheet" executed between the Eklutna Owners and the Anchorage Water and Wastewater Utility, which had been previously provided for review only in executive session; and

B. Any existing agreement among the Eklutna Owners or between the Eklutna Owners and any third party, upon which a claim of privilege or confidentiality is based.

Section 2. This resolution shall be effective immediately upon passage and approval by the Assembly.

PASSED AND APPROVED by the Anchorage Assembly this 27th day of March, 2024.

ATTEST:

Jamie Heinz
Municipal Clerk

MUNICIPALITY OF ANCHORAGE
MAYOR DAVE BRONSON

OFFICE OF THE MAYOR

RECEIVED
OFFICE OF THE
APR 02 2024
MUNICIPAL CLERK

Date: April 2, 2024

To: Anchorage Assembly

From: Mayor Dave Bronson

Subject: Veto of Resolution No. AR 2024-103

Today, in accord with Section 2.30.100 of the Anchorage Municipal Code (AMC) and Section 5.02 of the Municipal Charter, I am issuing a veto for AR 2024-103, which was approved during the Assembly's special meeting on March 27, 2024.

Why are assembly members spending taxpayer dollars for their attorneys to subpoena documents they already have access to? These documents have been made available to them, are available to them, and this open invitation continues. These threatening subpoenas are nothing more than scare tactics to bully municipal employees into potentially breaching municipal contracts. As one of the Assembly's own members put it, these extreme tactics are mere "chest puffing."

The Assembly and their own lawyers have said the real reason for the subpoena is to make the term sheet public. However, the term sheet they seek to make public is subject to a prior contract - a Common Interest Agreement signed by the Municipality of Anchorage in 2017. Because the Assembly is part of the Municipality of Anchorage, we have no objection to Assembly members making their own copies of the confidential term sheet and of the confidential Common Interest Agreement. Indeed, disclosure has already been made, and is available to members of the Assembly and their paid outside counsel – if the confidentiality is properly maintained, and the Common Interest Agreement is not breached. I simply do not see why the Anchorage Assembly believes they are not bound by the 2017 Common Interest Agreement and, consequently, I do not agree that the Assembly has a unilateral right to publicly release documents subject to a Common Interest Agreement. If the Anchorage Assembly makes this document public as they want to, the Municipality will surely be sued for breach of contract.

The Municipality agreed in 2017 that no party would have the authority to waive any privilege or defense on behalf of any other party without the consent from the other parties. Chugach and MEA have not waived their rights under the Common Interest Agreement.

A subpoena is unnecessary when we have already made these documents available to Assembly Members and their counsel. AR 2024-103 is an attempt to interfere and potentially

breach the contractual obligations agreed to by the Municipality in 2017 during the Berkowitz administration.

For the above reasons, I hereby veto AR 2024-103.

MUNICIPALITY OF ANCHORAGE

ASSEMBLY MEMORANDUM

No. AM 350-2024

Meeting Date: A p r i l 9 , 2024

From: **Assembly Chair Constant and Vice Chair Zaletel**

Subject: **Response to Mayoral vetoes of AR 2024-103 and AO 2024-28, As Amended.**

We request the Assembly override the Mayoral vetoes of AR 2024-103, dated April 2, 2024 and AO 2024-28, As Amended, dated April 3, 2024. Both vetoes are either woefully uniformed, or deliberately misleading. For the sake of clarity this memo addresses each veto in turn:

AR 2024-103

In the veto message of AR 2024-103, Mayor Dave Bronson states that "[b]ecause the Assembly is part of the Municipality of Anchorage, we have no objection to Assembly members making their own copies of the confidential term sheet and of the confidential Common Interest Agreement."[1] This statement is remarkable, not only for its sound logic, but particularly because it is the first time **any** member of the Administration has expressed this view to members of the Assembly, and it came in the form of a Mayoral veto.

On January 23, 2024, the Assembly learned of the existence of a "binding term sheet" between the Eklutna Owners and AWWU. It is notable that neither the Administration, nor the Department of Law saw fit to inform the Assembly of the existence of this document, but rather the Assembly Leadership was forced to send the Municipal Attorney a request asking to inspect it. The following day, the Municipal Attorney confirmed the existence of a document titled as a binding term sheet, but refused to allow us to see it, asserting that its terms and conditions were "confidential." This assertion of confidentiality notably lacked reference or citation to any legal authority, merely that, whatever its basis for a claim of confidentiality, the Municipal Attorney did not consider the Assembly to have the appropriate standing to see this document upon request.

Further, when Assembly Leadership agreed to take up this agreement in executive session on February 2, 2024, the Administration only provided a copy of the binding term sheet after receiving the consent of the other Eklutna Owners. When the Assembly requested to see correspondence between the Municipal Attorney and the Eklutna Owners, this was also refused as being "confidential." And finally, on April 4th when the Chair recently attempted to review the term sheet with the Assembly's attorneys, as the Mayor's veto clearly stated he would be able to, he was denied the opportunity to either retain a copy or even review and discuss it

Re: Request for certain documents concerning Municipal access to drinking water from Eklutna Lake

Dear Mr. Kohlhase:

At a recent executive session the General Manager of the Anchorage Water and Wasterwater Utility and the Municipal Attorney appeared and provided information regarding the substance of a "binding term sheet" which had been executed between the Anchorage Water and Wastewater Utility and the Eklutna Owners Group governing the Municipality's access to drinking water from Eklutna Lake. As we have stated before, this is a matter of significant public interest.

After having taken up these matters in executive session, the Assembly finds that it is necessary in furtherance of the Assembly's legislative powers under the Charter and the Assembly's role to provide legislative oversight of municipal agencies and utilities, to compel production of the binding term sheet so that the Assembly may share the agreement with its counsel for legal review prior to a determination by the Assembly regarding whether it is appropriate and in the public interest to make the agreement a disclosable public record.

Given the foregoing, the Assembly leadership hereby requests you produce copies of the following documents:

- The agreement described as a "binding term sheet" executed between the Eklutna Owners and the Anchorage Water and Wastewater Utility, which had been previously provided for review only in executive session; and

- Any existing agreement among the Eklutna Owners or between the Eklutna Owners and any third party, upon which a claim of privilege or confidentiality is based.

Please provide the requested documents to us either physically or via email **no later than 5p.m. Wednesday, April 3, 2024.** Your attention is invited to the attached subpoena compelling the production of these documents.

We will appreciate your prompt attention to this matter.

Subject: LeJ er and Subpoena

Good afternoon, Mr. Hurt,

As Municipal Manager, I have substantially complied with the attached Subpoena by making the documents available to the Assembly and its counsel for confidential review through the Municipal Attorney's Office.
My invitation for the Assembly and its legal counsel to review the documents through the Municipal Attorney's Office remains open.

Further, I assert the client-lawyer privilege because all documents responsive to the Subpoena in my possession are privileged communications. Additionally, the documents are confidential under the terms of a Common Interest Agreement executed in 2017, and I cannot breach my duty of confidentiality under that Agreement because I do not wish to expose the Municipality to legal liability.

Please include the Municipal Attorney on any further communications with me about this matter.

Thank you,

Kent

Matthew,

As AWWU's General Manager, I have substantially complied with the attached Subpoena by making the documents available to the Assembly and its counsel for confidential review through the Municipal Attorney's Office.
My invitation for the Assembly and its legal counsel to review the documents through the Municipal Attorney's Office remains open.

Further, I assert the client-lawyer privilege because all documents responsive to the Subpoena in my possession are privileged communications made for the purpose of facilitating the provision of legal services to AWWU.
Additionally, the documents are confidential under the terms of a Common Interest Agreement executed in 2017, and I cannot breach my duty of confidentiality under that Agreement because I do not wish to expose AWWU or the Municipality to legal liability.

Please include the Municipal Attorney on any further communications with me about this matter.

Thank you,

Re: Demand for Full, Free, and Unrestricted Access to Certain Documents Concerning Municipal Access to Drinking Water from Eklutna Lake

Dear Ms. Helzer,

As you know, on April 9, 2024, the Assembly overrode the Mayor's veto of AR 2024-103, which authorized the Chair to issue subpoenas on behalf the Assembly for certain documents in the Administration's possession related to the Eklutna Project. While the Assembly does not concede that the Mayor may validly veto a resolution authorizing a subpoena pursuant to AMC 2.30.085, in this instance, the Assembly has removed any doubt by overriding the veto.

After having taken up these matters in executive session, the Assembly has determined that this is a matter of significant public interest and it remains necessary to compel production of certain public documents in the Administration's possession.

The Assembly recently learned that in 2017, the Municipality entered into a "Common Interest Agreement" with Chugach Electric Association and Matanuska Electric Association, who, along with the Municipality, collectively own and manage the Eklutna Hydroelectric Project. The Assembly understands that the purpose of the Common Interest Agreement was to facilitate negotiations, including communications among the Project Owners' attorneys, regarding implementation of the 1991 Fish and Wildlife Agreement. The Assembly further understands that the Common Interest Agreement was intended to apply to the Municipality of Anchorage as whole and that no other municipal employee or officer has been required to sign a supplemental confidentiality agreement prior to receiving access to materials designated as confidential under the Common Interest Agreement.

The Assembly also recently learned that the Project Owners, including the Municipality and the Anchorage Water and Wastewater Utility ("AWWU"), entered into an agreement described as a "Binding Term Sheet." That agreement purportedly commits the Municipality to certain obligations regarding implementation of the 1991 Fish and Wildlife Agreement and negotiations regarding the Municipality's water rights and access to Eklutna Lake. Importantly, the Binding Term Sheet also contains a provision [redacted]

[redacted]

Finally, on April 4, the Assembly learned of an "Amendment to the Binding Term Sheet," which contained [redacted]
Each of those [redacted] will be subject to Assembly approval prior to their execution.

The Assembly has repeatedly asked to review each of the aforementioned documents in private with Assembly Counsel and the Assembly's outside attorneys. However, on April 4, when reviewing the documents in your office with Assembly Counsel, you refused to allow Assembly members to discuss the documents confidentially, outside of the presence of an Assistant Municipal Attorney.

The Assembly is the co-equal legislative branch of the Municipality of Anchorage. As part of the Municipality, the Assembly has a legitimate and compelling interest in providing legislative oversight of municipal agencies and utilities. In particular, the Assembly has a responsibility to Anchorage residents to ensure that any agreements that purport to legally bind municipal agencies or commit municipal resources are in the public interest. In carrying out its duties, the Assembly is entitled to seek the advice of the Assembly Counsel, including outside counsel. Under AMC 2.20.065, the Assembly Counsel is entitled to "full, free, and unrestricted access" to all public records and "all activities of the municipal government and its various departments."

The Assembly finds that it is necessary in furtherance of the Assembly's legislative powers under the Charter to compel production of the following documents for the Assembly to retain and share with their counsel:

- The document described as a "binding term sheet" executed between the Eklutna Owners and the Anchorage Water and Wastewater Utility, which had been previously provided for review only in executive session, as well as any amendments, extensions, addendums, or any other writing reflecting a change to the substantive terms thereto; and

- The document described as the "2017 Common Interest Agreement" and any document upon which a claim of privilege or confidentiality is based.

Please provide the requested documents to us either physically or via email **no later than 5p.m. Wednesday, April 17, 2024.** Time is of the essence in this matter. Should you have questions or require additional time to provide these documents please do not hesitate to contact the Office of the Assembly Counsel, and we will endeavor to accommodate a reasonable request.

We appreciate your prompt attention to this matter.

Sincerely,

Christopher Constant, Assembly Chair

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

THIRD JUDICIAL DISTRICT AT ANCHORAGE

ANCHORAGE MUNICIPAL ASSEMBLY, and CHRISTOPHER CONSTANT, in his official capacity as Chair of the Anchorage Assembly, Plaintiffs, v. ANNE HELZER, in her official capacity as the Anchorage Municipal Attorney, Defendant.	)	Case No. 3AN-24-_____CI

MOTION FOR EXPEDITED CONSIDERATION OF THE ANCHORAGE ASSEMBLY'S *EX PARTE* MOTION FOR ORDER TO SHOW CAUSE AND TO ENFORCE SUBPOENA

"Time is of the essence in this matter."[1]

Pursuant to Alaska Rule of Civil Procedure 77(g), the Plaintiffs Anchorage Municipal Assembly, through its Chair, Christopher Constant (collectively the "Assembly"), respectfully request expedited consideration of the concurrently filed *Ex Parte* Motion for Order to Show Cause and to Enforce Subpoena. A decision is requested on the Assembly's *Ex Parte* Motion on or before **THURSDAY, APRIL 25, 2024**.

[1] Exhibit 7 at 2.

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100

ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

A decision is needed before the Eklutna Hydroelectric Project Owners (Chugach Electric Association and Matanuska Electric Association) submit their proposed final Fish and Wildlife Program to the Governor pursuant to the 1991 Fish and Wildlife Agreement.

On information and belief, the Eklutna Hydroelectric Project Owners intend to submit their proposed final Fish and Wildlife Program to the Governor on or about April 27, 2024. Once the Project Owners' proposed final Fish and Wildlife Program is approved by the Governor, certain provisions of the Binding Term Sheet (which is a document described in the Subpoena) become effective and may bind the Municipality of Anchorage. The Assembly has a compelling and legitimate need to review copies of the Binding Term Sheet, and other associated documents described in the Subpoena, before legal consequences may accrue to the Municipality. Because the opportunity to influence the proposed final Fish and Wildlife Program diminishes once the Program is submitted to the Governor, the Assembly has a significant need to review the documents described in the Subpoena immediately. It is imperative that the Assembly, Assembly Counsel, and the Assembly's outside counsel have the opportunity to possess, meaningfully review, analyze, and discuss the Binding Term Sheet before the proposed Fish and Wildlife Program is submitted to the Governor.

For the foregoing reasons, the Assembly respectfully requests this Court grant expedited consideration of its *Ex Parte* Motion at the soonest possible opportunity, and in any event no later than **THURSDAY, APRIL 25**. This will allow the

Defendant a reasonable opportunity to respond while reducing the risk of irreparable injury to the Assembly from the Defendant's ongoing and unreasonable disobedience of the Assembly's valid Subpoena.

Because this matter comes to the Court under Alaska Rule of Civil Procedure 90(b), which authorizes an "*ex parte* motion," the Assembly requests that the Court issue the Proposed Order to Show Cause and set a Show Cause Hearing for Monday, April 29, 2024. The Proposed Order also contemplates that the Defendant Anne Helzer may comply with the Subpoena on or before Friday, April 26, 2024, in which case the Assembly would stipulate to vacating the Show Cause Hearing.

This Motion is supported by the attached Affidavit of Leslie Need.

DATED: April 24, 2024.

LANDYE BENNETT BLUMSTEIN LLP

THIRD JUDICIAL DISTRICT AT ANCHORAGE

ANCHORAGE MUNICIPAL ASSEMBLY, and CHRISTOPHER CONSTANT, in his official capacity as Chair of the Anchorage Assembly, Plaintiffs, v. ANNE HELZER, in her official capacity as the Anchorage Municipal Attorney, Defendant.	)	Case No. 3AN-24-_____CI

EX PARTE MOTION FOR ORDER TO SHOW CAUSE AND TO ENFORCE SUBPOENA

All public officials, especially attorneys, are expected to comply with the law. When a municipal official is subpoenaed by the Assembly, compliance with that subpoena is not voluntary and the recipient may not dictate the terms of their compliance.[1] There is a clear legal process for objecting to an Assembly subpoena, and that process is available to any subpoena recipient.[2]

---

1 *See* AMC 2.30.085.

2 *See* Exhibit 1 (AO No. 2023-133 (to be codified at AMC 2.30.085C) ("A person who seeks to quash or limit a subpoena issued pursuant to this section may file an action against the assembly in superior court.")). All Exhibits referenced in this Motion are attached to the Anchorage Assembly's Complaint to Enforce Subpoena Issued by the Anchorage Municipal Assembly, filed concurrently.

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

Here, the Defendant Anne Helzer received a valid subpoena from the Anchorage Assembly on April 16, 2024 (the "Subpoena").[3] Ms. Helzer understood the terms of the Subpoena,[4] and it should have come as no surprise following months of repeated requests by Assembly members for the documents described in the Subpoena.[5] Although Ms. Helzer was afforded additional time to comply with the Subpoena,[6] she did not "seek to quash or limit" the Subpoena. Instead, Ms. Helzer insisted that she would only comply with the Subpoena at a time of her choosing.[7]

As of this filing, Ms. Helzer has not complied with the Subpoena. That willful action constitutes contempt and should be addressed by this Court as expeditiously as possible. A proposed order to show cause, or alternatively requiring Ms. Helzer to comply immediately with the Subpoena, accompanies this motion.

ARGUMENT

The Anchorage Municipal Code ("AMC") authorizes the Assembly to enforce a subpoena through "proceedings for contempt in the same manner as in the case of

LANDYE BENNETT BLUMSTEIN LLP

4 *See* Exhibit 8 at 2.

5 *See* Exhibit 3 at 5-6.

6 Exhibit 8 at 1.

7 *Id*.

disobedience to the requirements of a subpoena issued by the court."[8] Failure to comply with a lawful subpoena is deemed a contempt of court.[9]

Under Alaska Rule of Civil Procedure 90(b), an order for contempt requires four elements:

> (1) the existence of a valid order directing the contemnor to do or refrain from doing something and the court's jurisdiction to enter that order; (2) the contemnor's notice of the order within sufficient time to comply with it; and in most cases, (3) the contemnor's ability to comply with the order; and (4) the contemnor's willful failure to comply with the order.[10]

Because each of the four elements are satisfied here, this Court should order Ms. Helzer to show cause why she should not be punished for the contempt of failing to comply with the Subpoena. Alternatively, if Ms. Helzer complies with the Subpoena by Friday, April 26, 2024 at 12 noon, the Assembly will stipulate that no show-cause hearing is necessary.

I. The Assembly Issued a Valid Subpoena to Produce Documents.

On April 16, 2024, pursuant to AR No. 2024-103, Assembly Chair Christopher Constant, on behalf of the Assembly, issued the Subpoena to Ms. Helzer to produce documents related to the implementation of the 1991 Fish and Wildlife Agreement

and the Municipality's water rights and access to Eklutna Lake,[11] which were public matters being considered by the Assembly.[12]

The Assembly is the co-equal legislative branch of the Municipality of Anchorage. As part of the Municipality, the Assembly has a legitimate and compelling interest in providing legislative oversight of municipal agencies and utilities.[13] In particular, the Assembly has a responsibility to Anchorage residents to ensure that any agreements that purport to legally bind municipal agencies or commit municipal resources are in the public interest.[14] In carrying out its duties, the Assembly is entitled to subpoena documents and to seek the advice of the Assembly Counsel, including outside legal counsel. Under AMC 2.20.065, the Assembly

---

11 *See* AMC 2.30.085B.

12 Exhibit 3 at 2; *see, e.g.*, Joe Cadotte, "Litigation Authorized by Assembly Related to Environmental Impact Program for Hydroelectric Project," *Alaska's News Source* (Feb. 23, 2024); Emily Goodykoontz, "Anchorage Assembly Approves Legal Action Over Eklutna Dam Mitigation," *Anchorage Daily News* (Feb. 24, 2024); Jeremy Hsieh, "Anchorage Assembly Seeks 2-Year Extension on Eklutna Lake Fish and Wildlife Plan Process," *Alaska Public Media* (Feb. 6, 2024).

13 *See* Exhibit 3 at 2.

14 *See* Emily Goodykoontz & Alex DeMarban, "What's Behind the Fight Over the Eklutna River," *Anchorage Daily News* (Apr. 18, 2024) ("[T]he Assembly earlier this year learned that the Bronson administration signed a deal with the utilities last October that will govern Anchorage's drinking water rights for 25 years. The agreement, a 'binding term sheet,' was based on the utilities' plan to tap into the city's water supply. It would go into effect if the governor approves the Fish and Wildlife program, city officials have said.").

Counsel is entitled to "full, free and unrestricted access" to all public records and "all activities of the municipal government and its various departments."

Thus, the Assembly had a legitimate interest in reviewing the requested documents and the Subpoena was validly issued.

II. Ms. Helzer Had Notice and Sufficient Time to Comply with the Subpoena.

The Subpoena was served via email to Ms. Helzer on April 16, 2024, and a response was demanded by the next day, April 17 at 5 p.m. Nevertheless, Ms. Helzer had ample time to comply with the Subpoena.

First, Ms. Helzer acknowledged receiving the Subpoena on April 17 at 2:30 p.m., and demonstrated a clear understanding of exactly what documents were described in the Subpoena.[15] There was no need for Ms. Helzer to search for or locate, or conduct a scope review, for any potentially unknown documents prior to complying with the Subpoena. All that was required was for her to send the clearly-identifiable, "readily accessible" documents to the Assembly Counsel via email.[16]

Second, Ms. Helzer was on reasonable notice since at least March 27 that the documents would be subpoenaed. On March 27, the Assembly passed and approved AR No. 2024-103, a resolution authorizing the use of "subpoenas to compel testimony and document production related to the 1991 Fish and Wildlife Agreement (Eklutna

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

15 *See* Exhibit 8.

16 Exhibit 8 at 1.

Hydropower Project) or water rights to Eklutna Lake." That resolution was adopted in the context of the Assembly's requests for the documents described in the Subpoena. On March 27, the Assembly subpoenaed the same documents from Municipal Manager Kent Kohlhase and AWWU General Manager Mark Corsentino. The Subpoena should not have come as a surprise. Ms. Helzer had ample time to seek judicial review to limit or quash the Subpoena if she believed that was appropriate.

Third, Ms. Helzer has known since at least the Assembly meeting on February 2, 2024—over two months ago—that the Assembly has repeatedly requested access to and copies of the documents described in the Subpoena. Thus, Ms. Helzer had sufficient time to consult with her clients (municipal agencies and utilities) and any affected third parties regarding her ability to produce the documents to the Assembly.

III. Ms. Helzer Had the Ability to Comply with the Subpoena.

The Municipal Code provides a clear option for any Assembly subpoena recipient to challenge the subpoena's scope: "A person who seeks to quash or limit a subpoena issued pursuant to this section may file an action against the assembly in superior court."[17] Ms. Helzer did not file an action to limit or quash the subpoena, and she should not be permitted to raise those arguments challenging the scope of the

[17] Exhibit 1 at 1 (AMC 2.30.085C).

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

Subpoena for the first time in this enforcement action.[18] Regardless, there is no valid legal reason why Ms. Helzer could not have complied with the Subpoena.

A. No Privileges Prohibit the Assembly from Reviewing the Documents.

The Municipal Manager and AWWU General Manager have previously invoked attorney-client privilege over the documents described in the Subpoena. However, the attorney-client privilege does not prevent Ms. Helzer's compliance with the Subpoena. Ms. Helzer has already shared the documents with the Assembly in executive session and with an individual Assembly member, Assembly Counsel, and the Assembly's outside legal counsel. The attorney-client privilege covers the Municipality of Anchorage as a whole, including the Assembly. Thus, because the Assembly is part of the Municipality (the "client"), the Assembly is authorized to review the documents, even if they would otherwise be protected by the attorney-client privilege.

B. The "Common Interest Agreement" Does Not Prohibit Production of the Documents to the Assembly.

In her April 17 response email, Ms. Helzer noted that the documents described in the Subpoena may be "contractually confidential documents." On information and

[18] Allowing subpoena recipients to defy subpoenas and wait for an enforcement action to challenge the validity and scope of the subpoena eviscerates the intent of AMC 2.30.085C and creates a perverse incentive for recipients to defy the Assembly. It is inequitable to allow Ms. Helzer to raise arguments here that could have and should have been raised in an action to limit or quash the Subpoena.

LANDYE BENNETT BLUMSTEIN LLP

belief, the Common Interest Agreement (which is a document that is described in the Subpoena) creates a contractual obligation for the Municipality to keep certain "common interest" materials confidential. But because the Assembly is part of the Municipality, the Common Interest Agreement would not prohibit the Assembly from reviewing any confidential documents, including the Common Interest Agreement itself. The stated purpose of the Subpoena is for the Assembly to determine—with the independent advice of the Assembly's legal counsel—whether certain documents described in the Subpoena are covered by the Common Interest Agreement or whether those documents, including the Binding Term Sheet, should be made public.[19]

Finally, during the April 9, 2024 Assembly meeting, Ms. Helzer suggested that she would only produce the documents described in the Subpoena if each Assembly member signed an additional confidentiality agreement. However, the Municipal Attorney has no authority to require Assembly members to sign such an additional confidentiality agreement. The Assembly is a co-equal branch of the Municipality; allowing the Municipal Attorney to dictate the terms in which the Assembly may view municipal agreements or documents clearly violates the doctrine of separation of powers.

LANDYE BENNETT BLUMSTEIN LLP

---

19 *See Anchorage School District v. Anchorage Daily News*, 779 P.2d 1191, 1193 (Alaska 1991) ("[A] public agency may not circumvent the statutory disclosure requirements by agreeing to keep the terms of a settlement agreement confidential. Under Alaska law, a confidentiality provision such as the one in the case at bar is unenforceable because it violates the public records disclosure statutes.").

Importantly, no other Municipal officer or employee has been required to sign an additional confidentiality agreement prior to possessing or viewing the documents described in the Subpoena. Ms. Helzer cannot cite any authority to require the Assembly (or its legal counsel) to sign an additional confidentiality agreement when other Municipal officers and employees are not subject to the same requirement.

IV. Ms. Helzer's Failure to Comply with the Subpoena Was Willful.

The Assembly does not accuse the Municipal Attorney of willful malfeasance lightly, but in this case, there is no question that Ms. Helzer understood the terms of the Subpoena and made an intentional decision not to comply. Ms. Helzer is an attorney and must "act with reasonable diligence and promptness in representing"[20] the Municipality. If Ms. Helzer believed the Assembly's request for compliance by April 22 was unreasonable, she could have, and should have, filed a motion pursuant to AMC 2.30.085C in this court. Simply putting off complying with the Subpoena until her preferred response time was not an option authorized by law.

RELIEF REQUESTED

Normally, a person who is held in contempt of court is subject to punishment, such as fines or imprisonment. Here, the Assembly does not seek to punish Ms. Helzer for her contempt, but instead require immediate compliance with the Subpoena. It is within this Court's discretion to issue the appropriate relief, and the public interest

20 Alaska R. Prof. Conduct 1.3.

favors a speedy resolution to this issue. A proposed order setting a show-cause hearing pursuant to Rule 90(b) is attached. The proposed order provides that if Ms. Helzer complies with the Subpoena by Friday, April 26, 2024, at 12 noon (Alaska Time), the show-cause hearing will be automatically vacated. The Assembly believes that Ms. Helzer will comply with this Court's instructions in good faith.

CONCLUSION

For the foregoing reasons, this Court should conclude that Ms. Helzer is in contempt by willfully refusing to comply with the Subpoena to produce documents. The appropriate relief at this stage is for this Court to enter an order directing Ms. Helzer to show cause why she should not be punished for the contempt.

DATED: April 24, 2024.

BY THE COMMISSION

Order U-18-102(52)/U-19-020(47)/U-19-021(47)

ORDER REDESIGNATING COMMISSION PANEL; DENYING MOTION TO REOPEN DOCKETS AND MODIFY ORDER NO. 39 DATED MAY 28, 2020; DENYING PETITION TO INTERVENE; DENYING MOTION FOR EXPEDITED CONSIDERATION OF PETITION TO INTERVENE AND MOTION TO REOPEN DOCKET AND MODIFY ORDER 39 DATED MAY 28, 2020; AND ADDRESSING ANCHORAGE ORDINANCES

Background

In 1997, the federal Alaska Power Administration sold the Eklutna Hydroelectric Project (Project) to Matanuska Electric Association, Inc. (MEA), Chugach Electric Association, Inc. (Chugach), and the Municipality of Anchorage (MOA) d/b/a Municipal Light and Power Department (ML&P). Through this transaction MEA obtained a 16.67% undivided ownership interest in the Project, Chugach obtained a 30% undivided ownership interest, and ML&P acquired a 53.33% undivided interest. Under this transaction the utilities operate the Project through the Eklutna Operating Committee (EOC) based upon affirmative votes of at least two of the utilities with a combined Project ownership interest of at least 50%. This transaction was subject to the Fish and Wildlife Agreement, Snettisham and Eklutna Projects, dated August 7, 1991 (Fish and Wildlife Agreement). Under the Fish and Wildlife Agreement, the Eklutna Hydroelectric Project was exempted by law from the Federal Energy Regulatory Commission's jurisdiction in exchange for development of a Project fish and wildlife mitigation plan. This mitigation plan is required to be submitted to the Governor of the State of Alaska for approval, and its approval is supposed to be obtained by October 2, 2024.

Chugach and the MOA entered into an Asset Purchase and Sale Agreement (APSA) under which Chugach acquired most of the assets of ML&P for a substantial acquisition premium over the book value of those assets. Under the APSA the MOA would terminate the employment of all ML&P employees and those employees would be offered employment by Chugach. Among the ML&P assets retained by the MOA was the 53.33% undivided ownership interest in the Eklutna Hydroelectric Project. Chugach and ML&P asked us to approve this APSA. We opened Dockets U-19-020 and U-19-021 to consider the APSA, and then consolidated those dockets with Docket U-18-102. On May 28, 2020, we issued Order U-18-102(44)/Order U-19-020(39)/U-19-021(39) (Order U-18-102(44)) conditionally approving purchase by Chugach of most ML&P assets. One of the conditions we imposed in granting approval of the APSA is stated on page 67 of Order 44 as follows:

> Under these circumstances, we cannot unconditionally find that [the MOA retained electric

utility referred to in Order U-18-102(44) as MHP] is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, **including negotiating compliance with the Fish and Wildlife Agreement**, without MHP having a vote on operation or management decisions. This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC. (emphasis added)

On October 30, 2020, the MOA d/b/a ML&P filed notice of surrender of its voting rights on the EOC in conformance with this condition in a manner that allowed the EOC to operate the Project based on unanimous agreement between MEA and Chugach. On October 30, 2020, Chugach filed notice that the transaction set out in the APSA, as modified by Order U-18-102(44) had closed. We closed these dockets with Order U-18-102(51)/U-19-020(46)/U-19-021(46), dated December 23, 2020.

On April 15, 2024, we received in these dockets a filing entitled *Anchorage Assembly's Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020*. On that same date we also received in these dockets filings entitled *Anchorage Assembly's Petition to Intervene*, *Anchorage Assembly's Motion for Expedited Consideration of Petition to Intervene and Motion to Reopen Docket and Modify Order No. 39 Dated May 28, 2020*, and *Affidavit of Andrew Erickson in Support of the Anchorage Assembly's Petition to Intervene; Motion to Reopen Dockets and Modify Order No. 39; & Motion for Expedited Consideration*. On April 17, 2024, we received in these dockets an entry of appearance and statement of non-participation from Homer Electric Association, Inc. and an opposition to the motion for expedited consideration from ENSTAR Natural Gas Company, LLC (ENSTAR). The Anchorage Assembly filed a response to ENSTAR's opposition on April 18, 2024, supported by an affidavit by Christopher Constant, chair of the Anchorage Assembly.

Discussion

Redesignation of Commission Panel

The chairman redesignates the Commission Panel for these dockets. The chairman designates Commissioners John Espindola, Keith Kurber II, and Robert M. Pickett and himself as the Commission Panel. Commissioner Robert M Pickett remains the Docket Manager.

Deny Motion to Reopen Dockets and Modify Order U-18-102(44)

We have reviewed the Anchorage Assembly's motion to reopen these dockets and modify Order U-18-102(44). This motion asserts that the Anchorage Assembly disagrees with the Fish and Wildlife Agreement mitigation plan prepared by MEA and Chugach through the EOC. The Anchorage Assembly seeks through this motion to regain its vote on the EOC in order to delay or prevent submission of the MEA/Chugach approved EOC mitigation plan to the Governor for approval. We

note that the Anchorage Assembly does not assert that the MOA has acquired the expertise required to fully participate as a voting member of the EOC.

We find that the motion to reopen these dockets and modify Order U-18-102(44) is a petition for reconsideration of that portion of Order U-18-102(44) quoted above. Under our regulation at 3 AAC 48.105, any party can petition for reconsideration of an order if the petition is filed within 15 days of the date that the order is issued. Order U-18-102(44) was issued May 28, 2020, and thus any petition for reconsideration of that order was due by June 12, 2020. Had the Anchorage Assembly timely filed a petition for reconsideration of that portion of Order U-18-102(44), we could have either found an alternative solution to the lack of managerial and technical fitness of MHP or we could have rejected the ASPA in its entirety. Now that the transaction under which Chugach acquired most ML&P assets has closed and Chugach has expended considerable resources incorporating those assets into Chugach's operations, that transaction can no longer be undone. Therefore, we deny the *Anchorage Assembly's Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020*, on the ground that it was untimely filed. This denial is without prejudice to the MOA seeking to regain its vote on the EOC under the terms set out in Order U-18-102(44).

We note that under 3 AAC 48.105, only parties to a proceeding can file a petition for reconsideration of an order. It is unclear to us that the Anchorage Assembly was a party to these proceedings, and based on the filing of a petition to intervene by the Anchorage Assembly it appears that the Assembly does not believe that it was a party to these dockets. Given our resolution of the motion to reopen and modify above, we do not need to resolve this issue. We raise it so that the Anchorage Assembly can address it if they choose to seek reconsideration of this order.

Deny Petition to Intervene

Under our regulation at 3 AAC 48.110(a), "[p]etitions for permission to intervene as a party will be considered only in those cases that are to be decided upon an evidentiary record after notice and hearing." The relief that the Anchorage Assembly seeks in these dockets will affect the substantive rights of others and cannot be granted without giving those others a reasonable opportunity to respond. These dockets have been closed for over three years and we have no process under the statutory timelines established by AS 42.05.175 to reopen these dockets and hold another evidentiary hearing. As we cannot schedule another hearing in these dockets, we do not consider the Anchorage Assembly's petition to intervene in these dockets and deny that petition as being moot.

Deny Motion for Expedited Consideration

We have reviewed the Anchorage Assembly's motion for expedited consideration of its motion to reopen these dockets and its petition to intervene. We are issuing this order before the April 25, 2024, decision date requested by the Anchorage Assembly. However, we can only do so because we are denying those pleadings without waiting for input from the parties to these dockets. We agree with the opposition filed by ENSTAR that any other resolution of these pleadings cannot reasonably be accomplished consistent with the requirements of Due Process on the timeline requested by the Anchorage Assembly. Therefore, we deny the Anchorage Assembly's motion for expedited consideration.

Addressing Anchorage Ordinances

Attached to the Affidavit of Andrew Erickson in support of the Anchorage Assembly's pleadings, as Exhibit 2 and Exhibit 10, are ordinances designated as AO No. 2023-131, As Amended December 19, 2023, and AO No. 2024-28, which passed on March 27, 2024, and the Mayor's veto was overridden on April 9, 2024. These ordinances both purport to prohibit submission of the Fish and Wildlife mitigation plan developed by the EOC to the Governor without prior Assembly approval. We remind the Anchorage Assembly of AS 42.05.641, which states:

> The commission's jurisdiction and authority extend to public utilities operating within a municipality, whether home rule or otherwise. In the event of a conflict between a certificate, order, decision, or regulation of the commission and a charter, permit, franchise, ordinance, rule, or regulation of such a local governmental entity, the certificate, order, decision, or regulation of the commission shall prevail.

We required in Order U-18-102(44) that the MOA to surrender its right to vote on the EOC specifically to prevent the MOA from delaying or changing the EOC's Project management decisions, including decisions related to the Fish and Wildlife Agreement, until such time as the MOA convinces us that it has acquired the expertise required to fully participate as a voting member of the EOC. The MOA has failed to make any showing that it has acquired the expertise required to fully participate as a voting member of the EOC, and we have not reinstated the MOA's status as a voting member of the EOC. We inform the Anchorage Assembly that any effort to delay or change EOC Project management decisions by ordinance is void under AS 42.05.641 as being contrary to Order U-18-102(44).

Order

1. Commissioners Robert A. Doyle, John Espindola, Keith Kurber II, and Robert M. Picket are designated as the Commission Panel.

2. *Anchorage Assembly's Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020*, filed in Dockets U-18-102, U-19-020, and U-19-021, on April 15, 2024, is denied.

3. *Anchorage Assembly's Petition to Intervene*, filed in Dockets U-18-102, U-19-020, and U-19-021, on April 15, 2024, is denied.

4. *Anchorage Assembly's Motion for Expedited Consideration of Petition to Intervene and Motion to Reopen Docket and Modify Order No. 39 Dated May 28, 2020*, filed in Dockets U-18-102, U-19-020, and U-19-021, on April 15, 2024, is denied.

DATED AND EFFECTIVE at Anchorage, Alaska this 19th day of April, 2024.

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

THIRD JUDICIAL DISTRICT AT ANCHORAGE

ANCHORAGE MUNICIPAL ASSEMBLY, Appellant v. REGULATORY COMMISSION OF ALASKA; MUNICIPALITY OF ANCHORAGE d/b/a MUNICIPAL LIGHT & POWER; ENSTAR NATURAL GAS CO.; PROVIDENCE HEALTH & SERVICES; GOLDEN VALLEY ELECTRIC ASSOCIATION, INC.; STATE OF ALASKA; ALASKA ENERGY AUTHORITY; HOMER ELECTRIC ASSOCIATION, INC.; ALASKA ELECTRIC AND ENERGY COOP., INC.; MATANUSKA ELECTRIC ASSOCIATION, INC.; CHUGACH ELECTRIC ASSOCIATION, INC.; JL PROPERTIES; ALASKA NATIVE HEALTH CONSORTIUM, Appellees.	)	Case No. 3AN-24-_____CI RCA Nos. U-18-102/U-19-020/U-19-021

STATEMENT OF POINTS ON APPEAL

The Anchorage Municipal Assembly (the "Assembly"), through counsel and pursuant to Alaska Rule of Appellate Procedure 602 submits the following Statement of Points on Appeal.

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

1. The Regulatory Commission of Alaska ("RCA") erred in denying the Assembly's Petition to Intervene, dated April 15, 2024, because the Assembly meets the requirements of 3 AAC 48.110(a) and has a statutory right to intervene.

2. The RCA erred in denying the Assembly's Petition to Intervene because the Assembly should have been granted permissive intervention.

3. The RCA erred by misconstruing the Assembly's Motion to Reopen Dockets and Modify Order No. 39 Dated May 28, 2020, as a motion for reconsideration of the RCA's Order U-18-102(44)/U-19-020(39)/U-19-021 ("Order 39").

4. The RCA erred when it denied the Assembly's request to modify Order 39 to allow the Municipality to vote as a member of the Eklutna Operating Committee (the "EOC") for the purposes of implementation of the 1991 Fish and Wildlife Agreement.

5. The RCA erred when it determined that it lacked statutory authority to reopen the dockets referenced in the Assembly's Motion.

6. The RCA's decision was arbitrary, capricious, and an abuse of discretion.

7. The RCA erred when it relied on facts not in the record.

8. The RCA lacked jurisdiction to enter Order 39.

9. Order 39 violates state and federal law.

DATED: April 24, 2024.

Christopher.constant@anchorageak.gov

To Anchorage Assembly Leadership,

Copies of two documents are attached to this letter: (1) the Binding Term Sheet between Eklutna Owners and AWWU and (2) the Amendment to Binding Term Sheet between Eklutna Owners and AWWU.

The position of the Municipality of Anchorage Department of Law has been consistent: the documents requested by Assembly leadership were privileged under lawyer-client privilege until such time as the affected municipal departments clients waived that privilege. The express language of AMC 2.30.085 is clear that any legislative subpoena is subject to the privileges that may be asserted in Alaska courts. Generally, an attorney cannot waive lawyer-client privilege on behalf of clients.

After the Assembly requested and was permitted to view the Binding Term Sheet during the February 2, 2024 Assembly Executive Session, the MOA successfully obtained a waiver of lawyer-client privilege from all parties holding any privilege. That limited waiver restricted the circumstances under which the MOA was authorized to produce the Binding Term Sheet and Common Interest Agreement to the Assembly. Those circumstances were limited in three ways: (1) review in executive session, (2) private or "in-camera" review, or (3) the members providing sufficient assurances of their intent to maintain the continued confidentiality of the documents. These opportunities for Assembly access to the documents or Assembly were never withdrawn.

On March 27, 2024, the Assembly passed a resolution authorizing Chair Constant to subpoena the Binding Term Sheet and the Common Interest Agreement. Subpoenas were issued to the Municipal Manager and the AWWU General Manager. The Mayor vetoed the resolution that authorized those subpoenas and those subpoenas became ineffective. Despite the ineffectiveness of the subpoenas, the Municipal Manager and the AWWU General Manager both chose to reply informally to the subpoenas to let the Assembly know that the documents were lawyer-client privileged and confidential under an agreement signed in 2017 during a prior administration.

Assembly leadership was again provided the opportunity to review the Binding Term Sheet, the Common Interest Agreement, and the Amendment to Binding Term Sheet (effective March 27, 2024) on April 4, 2024. The only access that was denied to the Assembly was the ability to retain or make copies of the documents without agreeing to maintain the confidentiality of those documents.

The Assembly overrode the veto on April 9, 2024. The Department of Law, the Municipal Manager, and the AWWU General Manager were prepared to respond to renewed subpoenas issued after the Assembly overrode the mayoral veto. However, they expected the subpoenas would continue to be directed to one of the municipal utilities. Instead, Assembly Leadership chose to subpoena the documents from the Anchorage Municipal Attorney. Issuing a subpoena to an attorney directly is unusual. Attorneys hold documents for the purpose of providing legal services to their clients, not on their own behalf.

The subpoena was directed to the Municipal Attorney in her professional capacity and was sent the afternoon of April 16. The subpoena required production of the requested documents the next day, 25 hours

later. In the Municipal Attorney's correspondence with Assembly Counsel, Matthew Hurt, the Municipal Attorney informed him that she was traveling out of state on April 17, 2024 and after attending a prearranged Municipal Lawyer's conference from the 18th through the 21st, she would be attending the United States Supreme Court oral arguments in the *Grants Pass v. Johnson* case on April 22, 2024. Despite indicating that she could not respond until after obtaining a waiver of lawyer-client privilege from all affected parties, the Assembly required production by the close of business on April 22, 2024.

The Municipal Attorney had previously received written statements of non-waiver from Municipal departments. The Municipality also received objections and demand letters regarding the confidentiality provisions from the other parties to the Common Interest Agreement.

Assembly outside counsel emailed the Municipal Attorney at 1:41 a.m. the next morning on April 23, 2024 informing her that Assembly leadership and their outside counsel had intended to file an enforcement action against the Municipal Attorney, which could result in professional discipline before the superior court in her official capacity. The Municipal Attorney responded to that email at 6:39 a.m. informing them that she was still in Washington, D.C. at the U.S. Supreme Court and was leaving D.C. that day to attend a family funeral. She requested, as a professional courtesy, that Assembly outside counsel have a conversation with her in order to clarify some of the open legal issues that needed to be resolved before responding to the subpoena. In that email it was explained that the documents were privileged under lawyer-client privilege and that, as the attorney, she had to first obtain waiver of that privilege from the affected municipal department clients. The Municipal Attorney does not have the ability to waive privilege on behalf of any municipal clients.

Despite the legal action filed against the Municipal Attorney yesterday, the MOA Department of Law has continued to seek waiver of lawyer-client privilege from all necessary parties in a good faith effort to fulfill the Assembly's demand. As of April 25, 2024, 9:11 a.m. (AKDT), in accord with our efforts to obtain waiver, MOA Department of Law has received written waiver of lawyer-client privilege for the attached documents from all necessary parties. Accordingly, attached are copies of (1) the Binding Term Sheet between Eklutna Owners and AWWU and (2) the Amendment to Binding Term Sheet between Eklutna Owners and AWWU.

Confidentiality Waived – 4/25/2024

Execution Version

BINDING TERM SHEET

WATER FACILITIES INTERCONNECTION AND LONG-TERM WATER TRANSPORTATION SERVICES

EFFECTIVE DATE: OCTOBER 27, 2023

In furtherance of their obligations to implement a Fish and Wildlife Program (defined below) pursuant to the 1991 Agreement,[1] the Eklutna Owners (defined below) desire to transport a portion of the water reserved for hydroelectric production in their Eklutna Hydroelectric Project through the water utility tunnel and pipeline system owned by Anchorage Water and Wastewater Utility for the purpose of establishing instream water flows in the Eklutna River. Anchorage Water and Wastewater Utility is willing to allow its water utility tunnel, pipeline, and other infrastructure as appropriate to be used for this purpose should the Governor of Alaska approve the Fish and Wildlife Program inclusive of the proposed usage of Anchorage Water and Wastewater Utility's infrastructure. In entering into this Term Sheet and the Agreements (as defined below), however, Anchorage Water and Wastewater Utility does not, and shall not, take any position on whether or not using Anchorage Water and Wastewater Utility's infrastructure is the best alternative for establishing instream water flows in the Eklutna River as the foundation of the Fish and Wildlife Program. Instead, Anchorage Water and Wastewater Utility merely states its willingness to allow use of its infrastructure under the agreed terms and conditions, pursuant to a Governor-approved Fish and Wildlife Program. The parties, as Customer and Service Provider as defined below, have investigated the engineering, interconnection, operational, and regulatory requirements necessary for Service Provider to operate water facilities interconnections and long-term water transportation services to Customer and have agreed to the terms set forth below, which will be memorialized in detailed contractual agreements by March 1, 2024, subject to certain conditions precedent. This Term Sheet shall bind the parties as set forth in this Term Sheet and inure to the benefit of the respective successors and permitted assigns of each of the Parties signatory hereto; provided, however, that neither this Term Sheet nor any rights, benefits, obligations or duties hereunder may be assigned, transferred, hypothecated or otherwise conveyed without the prior express written consent of the other Party. Any such purported assignment, transfer, hypothecation or other conveyance without such prior express written consent shall be void.

1. **Eklutna Owners/ Customer**	Chugach Electric Association, Inc., Matanuska Electric Association, Inc., and the Municipality of Anchorage ("***Eklutna Owners***" or collectively, the "***Customer***").
2. **Service Provider**	Anchorage Water and Wastewater Utility ("***Service Provider***" or "***AWWU***", and collectively with Customer, the "***Parties***").

[1] Agreement between the Municipality of Anchorage, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., the United States Fish and Wildlife Service, the National Marine Fisheries Service, the State of Alaska, and the Alaska Energy Authority Relative to the Eklutna and Snettisham Hydroelectric Projects, dated August 7, 1991 (the "1991 Agreement").

3. **Agreements**	(1) Water Facilities Interconnection Agreement ("***Interconnection Agreement***"); and (2) Long-Term Water Transportation Services Agreement ("***Transportation Agreement***") (collectively with the Interconnection Agreement, the "***Agreements***").
4. **Binding Term Sheet**	The Parties will use commercially reasonable efforts to negotiate and execute the Agreements and associated documentation promptly following the date of this binding Term Sheet ("***Term Sheet***") in accordance with the substantive terms set forth below. Until such time as this Term Sheet is replaced by any such further documentation, or is terminated pursuant to the terms herein, this Term Sheet remains binding on the signatory parties, and memorializes the legal and enforceable rights and obligations of, the Parties. If the Parties fail to enter into the Agreements by March 1, 2024, either Party may terminate this Term Sheet upon thirty (30) days written notice. The Parties also acknowledge that design is in its early stages and that the current concept for development of the Eklutna River Release Facility, and use of the AWWU Facilities (as defined below) may be further refined after the date of this Term Sheet. Accordingly, the substantive terms of this Term Sheet are subject to change during the course of the negotiation of the Agreements due to any material refinement of such designs and neither Party shall be in breach of this Term Sheet by seeking to change said substantive terms to address such material refinements arising out of the design process, provided that in seeking such a change or changes, such Party is operating in good faith to preserve the primary purpose of this Term Sheet that the Customer and AWWU cooperate to use AWWU Facilities to transport water from Eklutna Lake into the Eklutna River as part of the Eklutna Owners' implementation of the Fish and Wildlife Program.
5. **Purpose**	The Parties intend to enter into definitive Agreements, the key terms of which are set forth in this Term Sheet (subject to the right to change said terms due to material refinements in design process provided in Article 4 above), to enable the Eklutna Owners to implement a fish and wildlife program as required by the 1991 Agreement (the "***Fish and Wildlife Program***"), upon approval by the Governor of Alaska. Specifically, the Eklutna Owners intend to reestablish and preserve instream flows of the Eklutna River to implement the Fish and Wildlife Program through

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

	two primary mechanisms, and to mitigate the impact of the Fish and Wildlife Program on AWWU's public water system as required under Section 2 of the 1991 Agreement: (1) the construction of the Eklutna River Release Facility (as defined in Section 6 below), to consist of a River Release Structure (as defined below) to be owned and managed by Customer and an Isolation Valve Structure (as defined below) to be owned by Service Provider and managed in part by Service Provider and in part by Customer (as further described herein), all to be interconnected to the existing AWWU Facilities (as defined in Subsection (2) below), which shall be used for the ultimate delivery of water to the Eklutna River; and (2) the use of existing water transportation facilities owned and operated by AWWU on terms defined below, including but not limited to the AWWU Eklutna Lake raw water diversion bypass tunnel and pipeline ("***AWWU Facilities***"), which will allow for the transport of Customer's water from the Injection Point to the Delivery Point defined and described below ("***Water Transportation Services***"). A more detailed overview of the Eklutna River Release Facility is set forth in Appendix A. Appendix A also shows: • the "***Injection Point***" (the existing "T" in the tunnel downstream of the Eklutna power plant intake in Eklutna Lake where the AWWU tunnel begins) at which the custody, control, and risk of loss of water is exchanged from Customer to Service Provider, • the AWWU Facilities, an existing tunnel and pipeline covering a distance of roughly 1.6 miles, • the "***Delivery Point***" (the outlet of a new "T" to be built in the AWWU pipeline downstream of the AWWU tunnel/pipeline transition and upstream of the AWWU portal valve) at which the custody, control, and risk of loss of water is exchanged from Service Provider back to Customer, • A 54-inch gate valve on the main segment of AWWU pipeline intended to provide dual means of

	isolation for AWWU's pipeline segment (the "***AWWU Isolation Valve***"); and • A 42-inch gate valve on the branch segment of AWWU pipeline intended to provide isolation to the river release structure ("***Customer Isolation Valve***", together with the AWWU Isolation Valve, the "***Isolation Valves***"). Accordingly, this binding Term Sheet sets forth key terms of definitive Agreements, wherein the Eklutna Owners desire for (1) the Parties to mutually set forth certain obligations and understandings regarding the development, construction, and operation of the Eklutna River Release Facility, which shall be connected to AWWU Facilities, and (2) compensate AWWU for the provision of Water Transportation Services.
6. **Eklutna River Release Facility Definition**	The "***Eklutna River Release Facility***" shall consist of the proposed Isolation Valve Structure and the River Release Structure. The "Isolation Valve Structure" shall include the tee, the Isolation Valves, controls, and communication technology to be installed in the main line of the AWWU Facilities and owned and operated by Service Provider, provided that Customer shall have coordinated control of the Customer Isolation Valve for maintenance throughout the Delivery Term; and the "River Release Structure" shall include a new pipeline, control valve, the Delivery Point Meter (as defined below) and monitoring and control equipment and will be owned and operated by Customer. The Eklutna River Release Facility shall be designed, engineered, and constructed by Customer, all potentially as shown in Appendix B (the 15% design), which is subject to change and approval by both Parties in all respects during the design and approval stages of project development.
7. **Effective Dates and Conditions Precedent**	The definitive Agreements will become effective upon execution (the "***Execution Date***"), but the construction and operational obligations set forth in the definitive Agreements will become binding upon the Parties only upon the satisfaction of the following conditions precedent (such date, the "***Construction Start Effective Date***"): (1) The Eklutna Owners gain final approval of their Fish and Wildlife Program by the Governor of Alaska that requires use of AWWU Facilities as contemplated in this

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

	Term Sheet without any conditions materially adverse to the Eklutna Owners or AWWU, as determined in good faith and in the exercise of commercial reasonable business judgment, and that such Eklutna Owners' Fish and Wildlife Program and the Governor's final approval is not subject to any pending judicial review or appeal; (2) The Eklutna Owners obtain all permits necessary to construct the Eklutna River Release Facility; and (3) The Eklutna Owners obtain or provide evidence of lawful Certificates of Appropriation from the Alaska Department of Natural Resources for the use and transport of water as contemplated under the Transportation Agreement, including but not limited to an amendment of existing water rights or other approval(s) authorizing a change of use allowing Eklutna Owners' use of a portion of their certificated water right to establish and continue instream flows. The Eklutna Owners will commence final engineering and construction of the Eklutna River Release Facility on the Construction Start Effective Date, and endeavor to complete construction within a reasonable time to be defined in the Agreements following the Governor's approval in a manner consistent with the approved Fish and Wildlife Program and the 1991 Agreement. The obligations to provide and take Water Transportation Services shall begin when the Eklutna Owners achieve Commercial Operation of the Eklutna River Release Facility. "***Commercial Operation***" means, with respect to the Eklutna River Release Facility, that all construction, testing and operational conditions have been fulfilled as evidenced by a certificate from a licensed professional engineer.
8. **Term**	The Agreements shall continue for 35 years from the Commercial Operation date (the "***Delivery Term***"), unless terminated earlier in accordance with the terms thereof. The "***Term***" of the Agreements shall begin on the Execution Date and continue until the expiration of the Delivery Term. At the conclusion of the Term, the Agreements shall thereafter renew on a year-to-year basis, unless terminated earlier in accordance with the terms hereof.

9. **Interconnection Agreement**	Commencing on Effective Date, the Parties shall take all commercially reasonable efforts to develop the Eklutna River Release Facility pursuant to the Interconnection Agreement, which shall include, but not be limited to, the following terms: a. **Customer Responsibilities.** Following the Effective Date, the Customer shall be responsible, solely at its own expense, to (i) design, engineer, permit, and construct the Eklutna River Release Facility to meet the layout and design criteria as presented in Appendix B (15% design), which may be updated and refined from time to time hereafter; for the avoidance of doubt, this shall include all transmission, power, and communication facilities associated with construction; (ii) provide to Service Provider the design drawings pertaining to the Eklutna River Release Facility and any updates to the specifications for the Service Provider's review and approval; (iii) obtain all real property interests necessary for the construction, operation, and maintenance of the Eklutna River Release Facility; (iv) complete all permitting and environmental impact studies necessary for the construction, operation, and maintenance of the Eklutna River Release Facility; (v) acquire and maintain all governmental authorizations and other necessary Approvals for the design, construction, commissioning, ownership, operation, and maintenance of the Eklutna River Release Facility; achieve all milestones to be set forth in a definitive Interconnection Agreement; (vi) construct the Eklutna River Release Facility; (vii) construct security facilities (e.g., fencing, [cameras]) surrounding the Eklutna River Release Facility; (viii) enable Service Provider to have access at all times, (ix) operate the River Release Structure, which is connected to the Isolation Valve Structure at the Delivery Point, and (x) operate the Customer Isolation Valve for maintenance in close coordination with Service Provider. Upon commissioning, the Customer will provide the Service Provider with all as-built/record drawings and operation/maintenance documentation for all constructed facilities.

	b. **Service Provider Responsibilities**. Following the Effective Date, Service Provider shall be responsible to (i) provide assistance and cooperation to all reasonable requests of Customer regarding the design, engineering, permitting, construction, installation, testing, start-up and commissioning of the Eklutna River Release Facility (including timely written review and approval of Customer's design and engineering), and on obtaining and maintaining all governmental authorizations and third party owned real property interests necessary for the construction, operation, and maintenance of the AWWU Facilities to the Delivery Point, and (ii) operating the AWWU Facilities and the Isolation Valve Structure, but in such a way that allows Customer to access and operate the Customer Isolation Valve for maintenance on a coordinated basis. Service Provider shall further agree to not suspend or otherwise halt access to the AWWU Facilities during the period of construction, except to the extent needed to address reasonable security or safety issues and to avoid putting AWWU's water supply at risk of interruption or contamination. The foregoing responsibilities described in this Subsection b are referred to herein as the "***Service Provider Responsibilities***". c. **Development Costs**. The Customer shall be solely responsible for and shall pay all costs and expenses incurred in connection with performing the responsibilities necessary to build the Eklutna River Release Facility; Customer shall reimburse Service Provider for its actual costs related to or arising out of the development and construction of the Eklutna River Release Facility and related Service Provider Responsibilities, including but not limited to documented direct and indirect costs, overhead, general and administrative costs, staff time, and all other costs related to or arising out of the planning, engineering and project management associated with Eklutna River Release Facility and Service Provider Responsibilities, provided that Service Provider shall use commercially reasonable efforts to minimize such costs.

	d. **Tie-In / Installation Costs.** Customer will be responsible for, and will pay or reimburse Service Provider, all costs required to connect the Eklutna River Release Facility to the AWWU Facilities; provided that, for any easements or other rights-of-way or land use permits required on AWWU-owned land to so connect AWWU Facilities to Eklutna River Release Facility, Service Provider shall provide such easements at a reasonable or no cost to Customer. To the extent necessary but not held by AWWU, Customer shall be solely responsible for obtaining and paying for any and all easements, rights-of-way, or land use rights from third parties which are necessary for the connection of the River Release Structure to the AWWU Facilities through the Isolation Valve Structure. Connection costs include but are not limited to engineering, soil testing, site preparation, demolition, implementation of civil work, mechanical improvements, structural upgrades, piping, electrical improvements, instrumentation and controls upgrades, communications improvements, safety, fire protection, environmental testing, equipment rentals, permitting, and construction support.
10. **Transportation Agreement**	Commencing on Commercial Operation, AWWU shall perform, and the Customer shall take, on an exclusive basis, the Water Transportation Services pursuant to the Transportation Agreement, which shall include, but are not limited to, the following terms: a. **Amount.** During the Delivery Term Service Provider shall transport Customer's water from the Injection Point to the Delivery Point commingled with and undifferentiated from Service Provider's raw water deliveries to the Eklutna Water Treatment Facility ("***EWTF***"). At the Delivery Point, Customer's water (not intended for municipal water) supply may be released to the Eklutna River through the Eklutna River Release Facility. Control valves in the Eklutna River Release Facility downstream of the Delivery Point will be used to set the rate of release of Customer water to the Eklutna River, in accordance with a predetermined dynamic delivery schedule established in the final Fish and Wildlife Program

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

documentation. The total amount released will be measured by flow meters at the Delivery Point by the Delivery Point Meter (as defined below). The maximum daily rate of conveyance (the "***Contract Maximum***") will be determined based on hydraulic analysis of the AWWU Facilities and the Eklutna River Release Facility under various operating scenarios. The maximum daily flow available at the Eklutna River Release Facility will not inhibit the ability to deliver a flow rate of at least 41 MGD to the EWTF at a pressure sufficient to allow normal operation of the EWTF as currently configured, or exceed the hydraulic capacity or design criteria of the AWWU Facilities. The Contract Maximum shall be reduced as a result of any Excused Events, force majeure or other unforeseen outages or conditions.

b. **Control.** The AWWU Facilities shall be solely operated, managed, and maintained by Service Provider or its designee materially in accordance with all governmental authorizations and in accordance with applicable law, prudent industry practices, the most current editions of the AWWU Design and Construction Practices Manual, Municipality of Anchorage Standard Specifications and Anchorage Municipal Code, provided that as part of such operation, management and maintenance, Service Provider shall cooperate and provide access as needed to Customer for Customer's operation, management, and maintenance of Customer Isolation Valve on a coordinated basis.

c. **Costs and Exchange of Services.** All costs of water transportation, operations, management and maintenance borne by AWWU (including but not limited to the use of the AWWU Facilities, the tee and the valves described above) will be exchanged on an equal basis for AWWU's continued use of the Customer's intake, hydrotunnel and any other facilities necessary to supply water from the Eklutna Lake to the AWWU tunnel and related water transportation, operations, management and maintenance costs borne by Customer.

	d. **Operating Procedures and Coordination.** Service Provider shall, at Customer's expense, develop proposed written operating procedures for the provision of Water Transportation Services (the "***Operating Procedures***") in close coordination with the Customer as set forth in the Transportation Agreement. The Operating Procedures shall include the Parties' respective obligations for the following considerations: (i) method of day-to-day communication and reporting; (ii) key personnel lists for Service Provider and Customer; (iii) reasonable coordination regarding timing of planned outages; (iv) reporting of emergencies, planned outages and forced outages of AWWU Facilities; (v) reporting of curtailment periods; (vi) ongoing reporting of metered quantities measured at the Delivery Point and Injection Point; and (vii) reasonable coordination regarding requisite permits and all other necessary federal, state, and local Approvals; and (viii) a clear statement of operational priority of the Service Provider's public water supply.
11. **Title**	Control, custody, and risk of loss, of the Customer's water shall transfer to Service Provider between the Injection Point and the Delivery Point. Control, custody, and risk of loss, of the Customer's water shall then revert back to the Customer once the water is delivered to the Customer at the Delivery Point. For the avoidance of doubt, the Customer, as holders of water rights certificate ADL 44944, shall retain title at all times to all its water transported by Service Provider. The AWWU Facilities shall remain the property of AWWU; the Eklutna River Release Facility downstream of the Delivery Point will be owned by the Customer; the Isolation Valve Structure will be owned by AWWU, provided that Customer shall have coordinated control of the Customer Isolation Valve for maintenance throughout the Delivery Term. The Parties shall collaborate in good faith to determine the exact demarcation of ownership of the new facilities in the Interconnection Agreement.
12. **Public Water Supply Agreement and Water Rights Application**	a. **Public Water Supply Agreement.** As part of the negotiations of the Agreements, the Parties shall negotiate a new agreement to replace the Agreement for Public Water Supply and Energy

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

	Generation from Eklutna Lake, Alaska, dated February 17, 1984 ("***1984 Agreement***"), as amended, which expires in 2025. The 1984 Agreement and the new agreement are required by Alaska state law, AS 46.15.150, which permits AWWU's preferred water use status only if AWWU agrees to compensate Customer, who holds a senior water right to AWWU, for damages sustained by the preferred use. Such new agreement replacing the 1984 Agreement shall provide that the Service Provider shall: (i) as required under AS 46.15.150, continue to compensate the Customer (or any individual Eklutna Owner, as applicable) for water or replacement energy and use of Customer's facilities pursuant to substantially similar terms as those included in the 1984 Agreement; provided, however, that (x) AWWU's compensation shall be capped at $600,000 per year, which amount shall be adjusted annually to reflect inflationary changes as reflected in Bureau of Labor Statistics' Consumer Price Index (CPI-U) and such compensation payments shall end upon AWWU obtaining priority water rights from Customer pursuant to Subsection b of this Section 12 below or otherwise, (y) such AWWU payments shall be payable to Chugach; and (z) all other costs and losses attributable to AWWU's decreased compensation shall be netted out of the Municipality of Anchorage's (MOA's) ownership share of the water used in the Eklutna Project pursuant to provisions in the two power purchase agreements among the Eklutna Owners, effective October 30, 2020, (ii) be entitled to continued use of the Customer's intake, hydrotunnel and any other facilities necessary to supply water to the AWWU Facilities, so long as such facilities are being used by the Eklutna Owners to generate power for the Eklutna Hydroelectric Project

(iii) receive a first right of refusal to purchase the Customer's intake, hydrotunnel and any other of the Customer's facilities necessary to supply water to the AWWU Facilities in the event Customer's power production facilities are permanently shut down, and

(iv) have the right to approve any successor to Customer as operator of the Eklutna River Release Facility, provided that such approval will not be unreasonably withheld, conditioned, or delayed.

The term of the new agreement replacing the 1984 Agreement shall begin upon approval of the Fish and Wildlife Program by the Governor of Alaska and shall continue through October 30, 2060; provided, however, that in the event that litigation or other legal challenges lead to a final Fish and Wildlife Program that does not include the use of the AWWU Facilities for instream flows as contemplated in this Term Sheet, the new agreement replacing the 1984 Agreement shall be terminated and AWWU and the Eklutna Owners shall meet in good faith to negotiate a replacement agreement with terms and conditions then deemed appropriate, including compensation, risk mitigation, transfer or purchase of priority water rights, etc.

b. **Water Permit and Certificate Application.** Customer acknowledges and agrees that Service Provider has a permit for preferred water use for up to 41 million gallons per day for public water supply pursuant to the Act of October 30, 1984, 98 Stat. 2823; Alaska Statutes 46.15.150(a), LAS 2569, and Certificate of Appropriation ADL 44944, and the 1984 Agreement and its successor agreement. Customer acknowledges that the Service Provider's water permit provides for public water supply priority and preference for Service Provider's permitted water rights. In addition, upon the earlier of October 31, 2055 or the MOA's sale of its interests in the Eklutna Project, AWWU may exercise an option to exchange its rights for preferred water use for public water supply for an equal portion of Eklutna Owners' priority state

	water rights (i.e., Certificate of Appropriation ADL 44944), but not to exceed 41 million gallons per day, by quitclaim deed (or other then-acceptable means of transfer); provided (i) AWWU must issue notice of its intention to exercise such option no later than October 30, 2050 (which date aligns with a purchase option related to the Eklutna Project in a power purchase agreement among the Eklutna Owners); (ii) no additional compensation will be due from AWWU to the Eklutna Owners; and (iii) adjustments among the Eklutna Owners to accommodate AWWU's rights will be handled separately.
13. **Measurement and Metering**	Water shall be measured at the Injection Point by an existing flow meter in the AWWU Facilities (the "***Injection Point Meter***"). Water shall be measured at the Delivery Point by a new meter installed as part of the River Release Structure (the "***Delivery Point Meter***"). Delivery Point Meter measurements shall be used to calculate the amount of water received by Customer, but both Parties shall have real-time information as to such metering measurements. Reports for both the Delivery Point Meter and Injection Point Meter shall be included in a report by the Customer for each Month throughout the Delivery Term and shared with AWWU on a monthly basis.
14. **Taxes**	Customer shall be responsible for and shall pay any sales, use, gross receipts, occupation, and other taxes (excluding income, and franchise tax imposed upon Service Provider) from time to time payable as a consequence of the Interconnection Agreement and provision of Water Transportation Services.
15. **Standard of Performance; Obligations re Facilities.**	a. During the Term, the Customer shall cause the Eklutna River Release Facility to be constructed, operated, maintained, permitted and serviced in accordance with all prudent industry practices, applicable law, and the Interconnection Agreement. During the Term, Service Provider will cause the AWWU Facilities to be constructed, operated, maintained, permitted and serviced in accordance with all prudent industry practices, applicable law, and the Transportation Agreement.

	Both Parties shall use commercially reasonable efforts to ensure that all employees and contractors engaged in connection with the maintenance, operation, service, and any future modification (to include design, construction, commissioning, and installation) to have the appropriate and necessary experience and skill, and expertise to carry out the tasks efficiently, professionally, and in accordance with prudent industry practice and applicable law. b. Customer shall, in its sole discretion, develop and implement at its own expense an alternative method, plan, or procedures for dealing with emergencies, maintenance, and other planned or unplanned shutdowns or partial shutdowns of the Eklutna River Release Facility, the AWWU Facilities, or any of the Customer's intake, hydrotunnel or other facilities needed for the public water supply, provided that Service Provider (i) in the case of all non-emergency shutdowns, follows the schedules and protocols to be developed pursuant to Subsection c, (ii) in the case of emergency shutdowns, (a) uses best efforts to first address the situation in such way that does not involve a shutdown that would affect the Water Transportation Services; (b) provides as much notice as is practicable prior to any shutdown that will affect the Water Transportation Services; and (c) uses best efforts to minimize the duration of such shutdown. c. Customer and Service Provider shall develop a schedule and protocol for routine planned shutdowns in order to allow for maintenance and inspection activities in their respective facilities to occur in a coordinated manner that minimizes impacts on Service Provider's utility water supply obligations and Customers' obligations under the Fish and Wildlife Program. Such schedule and protocol shall take into account routine hydropower operations to ensure that planned shutdowns only be scheduled at times when there is sufficient water available in Eklutna Lake to allow water releases through the maintenance gate of the diversion dam in the amounts necessary for Customer to meet its obligations under the Fish and Wildlife Program.

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

16. **Site Access License**	Service Provider shall provide Customer with a non-exclusive license for the purpose of installation, operation and maintenance of certain equipment, meters and other facilities owned by Customer and reasonable access thereto during the term of the Agreements and a reasonable right to enter upon Service Provider's property for all other purposes contemplated under the Agreements, subject to the reasonable scheduling and security requirements. Customer acknowledges that it may need to seek a site access license from one or more third parties in order to secure access the site.
17. **Road and Bridges**	Service Provider shall be responsible at its own expense for brushing, clearing and maintaining its access road along the AWWU Facilities, both above and below the Isolation Valve Structure. Customer may use such access road as part of its site license granted pursuant to Section 16. At eight (8) locations where such access road crosses the Eklutna River, and which are currently only accessible by ford-style crossings, Customer shall be responsible for installing at its own expense new bridges allowing the access road to cross the Eklutna River. Once installed, Service Provider shall perform, or cause to be performed, all maintenance of the bridges. The cost of such bridge maintenance shall be borne by Service Provider unless such cost is caused, directly or indirectly, by the Customer's negligence or intentional misconduct.
18. **EWTF Power Production**	Service Provider shall continue to be compensated for excess power it produces at the EWTF and delivers to Matanuska Electric Association ("***MEA***") pursuant to terms consistent with the terms of 1984 Agreement, as amended, and the terms of MEA's tariff for purchasing cogenerated power.
19. **Excused Events**	The Parties shall negotiate and include terms related to forced or planned outages or in response to any force majeure event, emergency, or other condition determined by Service Provider in its reasonable discretion to be a threat to any of the AWWU Facilities requiring interruption or reduction of flow to Customer. An Interruption or curtailment in these cases shall be known as an "***Excused Event***" in the Agreements. It is understood that the exercise of an Excused Event will be in accordance with Agreements, Operating Procedures, and in close coordination between Parties and (i) Customer shall not interfere with or otherwise adversely affect Service

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

	Provider's provision of water service as a public utility, unless any such Excused Event is closely coordinated with Service Provider, and (ii) Service Provider shall not interfere with or otherwise adversely affect Customer's provision of water for instream flows pursuant to the 1991 Agreement, unless any such Excused Event is closely coordinated with Customer or, if close coordination is not possible, coordination as soon as is reasonable under the circumstances.
20. **Force Majeure**	The Agreements shall contain customary definitions of force majeure events. Neither Party shall be liable to the other Party in the event it is prevented from performing its obligations hereunder in whole or in part due to a force majeure event. The Party rendered unable to fulfill any obligation by reason of a Force Majeure event shall take all commercially reasonable actions necessary to remove such inability with due speed and diligence. Nothing herein shall be construed as permitting that Party to continue to fail to perform after said cause has been removed. The obligation to use due speed and diligence shall not be interpreted to require acceleration of labor supply or resolution of labor disputes by acceding to demands of the opposition when such course is inadvisable in the discretion of the Party having such difficulty. Neither Party shall be considered in breach or default of the Agreements if and to the extent that any failure or delay in the Party's performance of one or more of its obligations hereunder is caused by a force majeure event. The occurrence and continuation of a force majeure event shall not suspend or excuse the obligation of a Party to make any payments due hereunder.
21. **Liability**	No party to the Agreements shall be liable for any consequential, incidental, indirect, special, or punitive damages with respect to the construction of the Eklutna River Release Facility. Except for a Party's (i) gross negligence or willful misconduct, (ii) third-party indemnity obligation, or (iii) breach of any representation or warranty, the party's maximum liability under the Agreements shall be equal to amount to be set forth in the definitive Agreements.

22. **Governmental Approvals**	Service Provider shall be responsible for obtaining and maintaining all permits, waivers, licenses, authorizations, and governmental approvals ("***Approvals***") required for the operations, maintenance, and management of the AWWU Facilities. The Customer shall be responsible for obtaining and maintaining all Approvals required for the construction, operations, and maintenance of the Eklutna River Release Facility, and Customer shall obtain or provide evidence of lawful Certificates of Appropriation from the Alaska Department of Natural Resources for the use and transport of water as contemplated under the Transportation Agreement, including but not limited to an amendment of existing water rights or other approval(s) authorizing a change of use allowing Eklutna Owners' use of a portion of their certificated water right to establish and continue instream flows. Service Provider shall not object or interfere with Customer's application for such amendment of Customer's water rights. The Parties shall use commercially reasonable efforts to cooperate with each other in obtaining and retaining the foregoing Approvals and water rights amendment.
23. **Governing Law**	This Term Sheet and the Agreements shall be interpreted, construed, and enforced in accordance with, and otherwise governed in all respects by, the laws of the State of Alaska.
24. **Confidentiality**	a. The Parties agree that this Term Sheet, the contents therein, and negotiations of the Agreements shall remain confidential subject to the Common Interest Agreement, dated effective September 15, 2017, as amended and confirmed. Upon execution, however, the Agreements shall become non-confidential, subject to Subsections b-c below. b. The Parties agree that any public release of the Agreements and the Term Sheet, each after execution, shall be the sole responsibility of Customer, and until that date upon which the Fish and Wildlife Program is approved without any pending judicial review or appeal, any public statements to be made by AWWU about the Fish and Wildlife Program or the proposals contained therein, including but not limited to about the use of AWWU infrastructure to transport water into the Eklutna River must first be approved by the Eklutna Owners, such approval not to be unreasonably withheld or

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

	delayed. For the purposes of any public release of such information, the Municipality of Anchorage and not AWWU, shall represent the Municipality of Anchorage in its role as an Eklutna Owner. Notwithstanding the foregoing, Service Provider may respond to any inquiries from the Municipal Assembly, RCA, and other regulatory and judicial authorities in a manner consistent with this Term Sheet and the Agreements. c. Service Provider shall make best efforts to ensure that all of the employees, agents, contractors and consultants of AWWU do not engage in activities as employees or agents of AWWU, including making public statements, that are reasonably likely to have an adverse effect on the public's perception of the Fish and Wildlife Program and the proposals contained therein, including but not limited to about the use of AWWU infrastructure to transport water into the Eklutna River, it being understood by both AWWU and the Eklutna Owners that such negative public statements can undermine the ability of the Eklutna Owners to satisfy their obligations under the 1991 Agreement; provided, however, that Service Provider cannot restrict the rights of such people as private citizens.
25. **Representations and Warranties**	Service Provider and the Customer shall provide customary representations and warranties, including (without limitation): due organization and good standing; due authorization, execution, and delivery; enforceability; solvency; and no conflicts.
26. **Indemnification**	Service Provider and the Customer shall provide customary reciprocal third-party indemnities for (i) any breach by such party of the Agreements, or (ii) its negligence or willful misconduct. Customer shall also indemnify and defend, and hold Service Provider harmless from any damage to AWWU's infrastructure, including but not limited to its infrastructure downstream from the Eklutna River Release Facility (*i.e.*, scouring or erosion of the river bed or banks that damages AWWU's water line and/or facilities). Customer shall further be solely responsible for, and shall indemnify, defend and hold Service Provider harmless from all claims or liability of any kind directly related to fish and wildlife mitigation measures and arising out of normal operation of the AWWU Facilities, the

	Eklutna River Release Facility or any other facilities of the Service Provider, in a manner consistent with the definitive Agreements, prudent industry practices, the most current editions of the AWWU Design and Construction Practices Manual, Municipality of Anchorage Standard Specifications and Anchorage Municipal Code unless such claim or liability arose directly out of negligence, violation of law, or intentional misconduct by the Service Provider.
27. **Insurance**	During the Term, each Party shall maintain, at its own cost and expense, such insurance as shall be determined by the Parties in the Agreements. Notwithstanding the foregoing, Service Provider shall at all times during the Term maintain insurance coverage in compliance with Applicable Law in connection with the provision of Water Transportation Services.
28. **Other Terms**	The definitive Agreements will contain other usual and customary terms for transactions of a similar nature to those addressed thereby.
29. **Counterparts**	The Term Sheet may be executed by a number of counterparts, each of which shall be deemed an original, and all of which, together, shall constitute a single agreement.

GENERAL NOTES:

1. THESE ABBREVIATIONS APPLY TO THE ENTIRE SET OF CONTRACT DRAWINGS.
2. LISTING OF ABBREVIATIONS DOES NOT IMPLY ALL ABBREVIATIONS ARE USED IN THE CONTRACT DRAWINGS.
3. ABBREVIATIONS SHOWN ON THIS SHEET INCLUDE VARIATIONS OF THE WORD. FOR EXAMPLE, "MOD" MAY MEAN MODIFY OR MODIFICATION; "INC" MAY MEAN INCLUDED OR INCLUDING; "REINF" MAY MEAN EITHER REINFORCE OR REINFORCING.
4. SCREENING OR SHADING OF WORK IS USED TO INDICATE EXISTING COMPONENTS OR TO DE-EMPHASIZE PROPOSED IMPROVEMENTS TO HIGHLIGHT SELECTED TRADE WORK. REFER TO CONTEXT OF EACH SHEET FOR USAGE.

SITE PLAN LINE TYPES

- FENCE LINE
- OVERHEAD POWER
- MAJOR CONTOUR
- MINOR CONTOUR
- EXIST MAJOR CONTOUR
- EXIST MINOR CONTOUR
- EDGE OF WATERLINE
- TOE OF SLOPE
- TOP OF BANK
- SANITARY SEWER
- STORM DRAIN
- EDGE OF PAVEMENT
- EDGE OF GRAVEL
- WATTLE
- SILT FENCE
- CONSTRUCTION FENCE
- GAS LINE
- TURBIDITY CURTAIN
- IRRIGATION LINE
- WATER LINE
- TELEPHONE LINE
- COMMUNICATION LINE
- OHP — OVERHEAD ELECTRICAL/POWER
- UG — UNDERGROUND ELECTRICAL
- P/L — PROPERTY LINE
- EXISTING OVERHEAD POWER LINE
- EXISTING OVERHEAD POWER & TELEPHONE LINE
- EXISTING OVERHEAD TELEPHONE LINE
- EXISTING BURIED TELEPHONE LINE EVIDENCED BY PEDESTALS & WARNING PADDLES
- EXISTING FENCE LINE
- PROJECT BOUNDARY
- TREE PROTECTION FENCE
- LIMITS OF DISTURBANCE
- SHORING

SITE PLAN SYMBOLS

- ARROW INDICATES DIRECTION OF PLAN NORTH
- CONIFER TREE: FIR, SPRUCE, LARCH OR PINE, 8" DIAMETER OR LARGER
- DECIDUOUS TREE: COTTONWOOD, HAWTHORN, ASPEN, 8" DIAMETER OR LARGER
- MH — MANHOLE
- ED — ELECTRIC BOX
- STORM DRAIN MANHOLE
- FH — FIRE HYDRANT
- YH-X — YARD HYDRANT
- SURVEY CONTROL POINT, AS NOTED.
- POLE ANCHOR
- POWER POLE
- LIGHT POLE
- SIGN
- SURVEY HUB
- SECTION CORNER
- BENCH MARK
- EXISTING HEADWALL
- EXISTING MONITORING STATION
- EXISTING FENCE
- STATE PLANE COORDINATE MARKER
- EXISTING TREE LINE
- EXISTING BUILDING, STRUCTURES
- EXISTING SECTION CORNER MONUMENT FOUND AS DESCRIBED
- EXISTING 5/8" REBAR CONTROL POINT MONUMENT, BORING LOCATION
- EW — EXISTING HOSE BIB
- EXISTING PORTABLE IRRIGATION WATER PUMP
- WELL — EXISTING 6" WATER WELL
- EXISTING ELECTRICAL OUTLET
- EXISTING POWER POLE
- EXISTING TELEPHONE PEDESTAL
- CONTROL POINT
- PUMP
- PUMP
- TP — TEST PIT LOCATION

MISCELLANEOUS SYMBOLS

- CHANGE OF PIPE MTL
- OR — END OF PIPE
- ℄ — CENTERLINE
- Ø — DIAMETER
- ∠ — ANGLE
- PL — PLATE
- ± — PLUS/MINUS

GENERAL NOTES:

1. ALL SYMBOLS ARE NOT NECESSARILY USED. THIS IS A STANDARD DRAWING SHOWING COMMON SYMBOLS ON THIS PROJECT.
2. SCREENING OR SHADING OF WORK IS USED TO INDICATE EXISTING COMPONENTS OR TO DE-EMPHASIZE PROPOSED IMPROVEMENTS TO HIGHLIGHT SELECTED TRADE WORK. REFER TO CONTEXT OF EACH DRAWING FOR USAGE.

HATCH SYMBOLS

- ROCK, TYPE AS NOTED (PLAN/SECTION)
- BED ROCK
- EXISTING GRADE (SECTION)
- NEW SOIL (SECTION)
- CONCRETE EXISTING (SECTION/PLAN)
- CONCRETE 1ST STAGE (SECTION/PLAN)
- CONCRETE 2ND STAGE (SECTION/PLAN)
- SAND, GROUT (PLAN/SECTION)
- STEEL (SECTION)
- GRATING (PLAN)
- MASONRY (PLAN)
- WOOD, SIZE/TYPE AS NOTED (PLAN)
- WOOD, SIZE/TYPE AS NOTED (SECTION)
- RIP RAP (PLAN/SECTION)
- RIGID INSULATION (SECTION)
- ASPHALT CONCRETE PAVEMENT SURFACE (PLAN/SECTION)
- GRASS/VEGETATION (PLAN)
- BATT INSULATION (SECTION)
- NEW CONSTRUCTION
- EXISTING
- EXISTING TO BE REMOVED OR DEMOLISHED
- CLEARING AND GRUBBING
- ASPHALT
- GRASS/VEGETATION
- GRAVEL

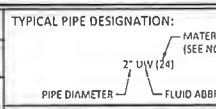
RW	RAW WATER	2,8	2,8	8	8	150	WATER	(A)

PIPING MATERIAL SCHEDULE (SEE NOTE 1)			
GROUP NO.	PIPE MATERIAL	FITTINGS / JOINTS	LININGS AND COATINGS (SEE NOTE 13)
2	STEEL, ASTM A53, SCHEDULE 40, BLACK WELDED, GALVANIZED	2 1/2" AND SMALLER, MALLEABLE IRON, ASME B16.3, THREADED, BANDED, GALVANIZED 150 PSI. 3" AND LARGER, CAST IRON, ASME B16.1, 125 PSI FLANGED OR MECHANICAL COUPLING.	SEE SECTION 40 23 15
8	WELDED STEEL PIPE (AWWA C200 & MODIFIED PER SECTION 331111) (ALL PIPE CALLOUT DIAMETERS ARE 'ID' OF MORTAR LINING)	WELDED STEEL, AWWA C208 MODIFIED PER SECTION 331111, FABRICATED.	SEE SECTION 33 11 11

TYPICAL PIPE DESIGNATION:



NOTES:

NOTE 1
ALTHOUGH SEVERAL PIPE MATERIAL GROUPS MAY BE LISTED ON THIS SHEET FOR A GIVEN FLUID SERVICE, CONTRACTOR SHALL PROVIDE ONLY THE PIPE MATERIAL GROUP SHOWN ON THE DRAWINGS AND SPECIFIED FOR THAT FLUID SERVICE.

NOTE 2
LEAKAGE ALLOWANCE IS AS FOLLOWS:
A. PIPES SO DESIGNATED SHALL SHOW ZERO LEAKAGE.
B. PIPES SO DESIGNATED SHALL SHOW ZERO LEAKAGE FOR UNBURIED PIPE AND NOT MORE THAN 0.03 GALLON PER HOUR PER INCH DIAMETER PER 100 FEET OF BURIED PIPE.
C. PIPES SO DESIGNATED SHALL NOT SHOW A LEAKAGE OF MORE THAN 0.15 GALLON PER HOUR PER INCH OF DIAMETER PER 100 FEET OF PIPE.
D. PIPES SO DESIGNATED SHALL NOT SHOW A LOSS OF PRESSURE OF MORE THAN 5 PERCENT.
E. PIPE SO DESIGNATED SHALL NOT SHOW A LOSS OF VACUUM OF MORE THAN 4 INCHES MERCURY COLUMN.

NOTE 3
FOR FIELD TEST PROCEDURES AND ADDITIONAL TEST REQUIREME. SEE PIPING SECTION OF SPECIFICATIONS.

NOTE 4
NO SUBSTITUTIONS U.N.O. IN THE SPECIFICATIONS.

NOTE 5
NOT USED

NOTE 6
STATIC WATER TEST WITH SURFACE 5 FEET ABOVE HIGH POINT OF PIPE.

NOTE 7
INSPECTION AND TESTING SHALL BE IN ACCORDANCE WITH APPLICABLE PLUMBING CODE.

GENERAL STRUCTURAL NOTES:
THE FOLLOWING NOTES ARE GENERAL AND APPLY TO THE ENTIRE PROJECT, UNLESS SPECIFICALLY NOTED OTHERWISE (UNO)

1) GENERAL:

A. CONSTRUCTION DOCUMENTS:
1. THE CONTRACTOR SHALL REVIEW THE APPROVED CONTRACT DOCUMENTS AND NOTIFY THE ENGINEER OF ANY ERRORS OR DISCREPANCIES PRIOR TO THE START OF CONSTRUCTION.
2. THE CONTRACTOR SHALL NOTIFY THE OWNER IMMEDIATELY IF ANY UNIDENTIFIED EXISTING UNDERGROUND UTILITIES ARE DISCOVERED.
3. THE STRUCTURAL CONTRACT DRAWINGS REPRESENT THE FINISHED STRUCTURE. THEY DO *NOT* INDICATE THE METHOD OF CONSTRUCTION. THE CONTRACTOR SHALL PROVIDE ALL MEASURES NECESSARY TO PROTECT THE STRUCTURE DURING CONSTRUCTION. SUCH MEASURES SHALL INCLUDE, BUT ARE NOT LIMITED TO, BRACING AND/OR SHORING FOR LOADS DUE TO CONSTRUCTION EQUIPMENT, ETC
4. UNDER NO CIRCUMSTANCES CAN STRUCTURAL COMPONENTS BE SUBSTITUTED, OMITTED, OR ALTERED FROM THE APPROVED SET OF CONSTRUCTION DOCUMENTS WITHOUT WRITTEN APPROVAL FROM THE ENGINEER.

B. DIMENSIONS AND NOTATIONS:
1. WRITTEN DIMENSIONS SHALL TAKE PRECEDENCE OVER SCALED DIMENSIONS. DO NOT SCALE DRAWINGS.
2. ABBREVIATIONS USED ON THE APPROVED CONSTRUCTION DOCUMENTS SHALL BE CONSIDERED TYPICAL ABBREVIATIONS FOR THE INDUSTRY. THE CONTRACTOR SHALL BE RESPONSIBLE TO NOTIFY THE ENGINEER IMMEDIATELY OF ANY ABBREVIATIONS THAT ARE UNKNOWN TO THE CONTRACTOR.

C. TYPICAL NOTES AND DETAILS:
1. SPECIFIC NOTES AND DETAILS SHALL TAKE PRECEDENCE OVER STANDARD TYPICAL NOTES AND DETAILS.
2. STANDARD TYPICAL NOTES AND DETAILS ARE TO BE USED WHEN REFERRED TO OR WHEN NO OTHER MORE RESTRICTIVE OR DIFFERENT DETAILS ARE SHOWN ON THE DRAWINGS.
3. WORK NOT PARTICULARLY SHOWN OR SPECIFIED SHALL BE THE SAME AS SIMILAR PARTS THAT ARE SHOWN OR SPECIFIED.

D. CODE REQUIREMENTS:
1. ALL WORK SHALL CONFORM TO THE MINIMUM STANDARDS OF REGULATING AGENCIES WHICH MAY HAVE AUTHORITY OVER ANY PORTION OF THE WORK.
2. SPECIFICATIONS, CODES AND STANDARDS NOTED SHALL BE OF THE LATEST APPROVED ISSUE, INCLUDING SUPPLEMENTS, UNLESS NOTED OTHERWISE
3. MINIMUM UNIFORM (BLANKET) ROOF SNOW LOAD, AS DEFINED BY LOCAL BUILDING OFFICIAL OR STATE, SHALL BE DESIGNED FOR, AND IT IS THE RESPONSIBILITY OF THE ENGINEER TO CONFIRM IF ONE EXISTS BY CONTACTING THE LOCAL BUILDING OFFICIAL.

E. DEFERRED SUBMITTALS:
1. DEFERRED STRUCTURE SUBMITTAL ITEMS HAVE NOT BEEN PERMITTED UNDER THE BASE BUILDING APPLICATION.
2. THE CONTRACTOR SHALL SUBMIT COMPONENT SYSTEM DOCUMENTS FOR DEFERRED SUBMITTAL ITEMS, STAMPED BY A PROFESSIONAL ENGINEER LICENSED IN THE JURISDICTION HAVING AUTHORITY, TO THE REGISTERED DESIGN PROFESSIONAL IN RESPONSIBLE CHARGE FOR REVIEW AND FORWARD THE REVIEWED DOCUMENTS TO THE BUILDING OFFICIAL IN COMPLIANCE WITH SECTION 107.3.4.1 OF THE CDC.
3. DEFERRED SUBMITTAL ITEMS SHALL NOT BE INSTALLED UNTIL THE COMPONENT SYSTEM DOCUMENTS HAVE BEEN APPROVED BY THE BUILDING OFFICIAL.
4. THE FOLLOWING CONTRACTOR-DESIGNED PROJECT ELEMENTS ARE DEFINED AS DEFERRED STRUCTURAL SUBMITTAL ITEMS:

PRE-ENGINEERED METAL BUILDINGS

2) CODES, STANDARDS, AND REFERENCES:

A. ASCE 7-16: MINIMUM DESIGN LOADS AND ASSOCIATED CRITERIA FOR BUILDINGS AND OTHER STRUCTURES.
B. ACI 318-14: BUILDING CODE REQUIREMENTS FOR STRUCTURAL CONCRETE.
C. ACI 350-06: CODE REQUIREMENTS FOR ENVIRONMENTAL ENGINEERING CONCRETE STRUCTURES.
D. AISC 360-16 SPECIFICATION FOR STRUCTURAL STEEL BUILDINGS

3) FOUNDATIONS AND GEOTECHNICAL:

A. GEOTECHNICAL DESIGN CRITERIA IS BASED ON THE RECOMMENDATIONS DOCUMENTED IN THE DESIGN DOCUMENTATION REPORT:

4) GRATING:

A. WEIGHT OF GRATING SECTION SHALL NOT EXCEED 80 LBS.
B. PROVIDE A MINIMUM OF 4 CLIPS PER GRATING PANEL, APPROX 4" FROM PANEL CORNERS.
C. WIDTH OF GRATING SECTIONS SHALL NOT EXCEED 3'-0"
D. SHOP DRAWINGS BASED ON FIELD DIMENSIONS SHALL BE SUBMITTED TO THE ENGINEER PRIOR TO FABRICATION.
E. PROVIDE GRATING FASTENERS AS REQUIRED.
F. THE HORIZONTAL CLEARANCE BETWEEN THE GRATING AND GRATING SUPPORTS SHALL NOT BE LESS THAN ¼" NOR GREATER THAN ½"
G. ALL GRATING SECTIONS, WHEN IN PLACE, SHALL ALWAYS BE FIRMLY ANCHORED TO THEIR SUPPORTS
H. PROVIDE MINIMUM BEARING PER MANUFACTURERS RECOMMENDATIONS FOR ALL GRATING

5) NON-SHRINK GROUT:
1. ALL GROUT WORK SHALL CONFORM TO THE LATEST EDITION OF ACI 301.
2. FORMWORK: DESIGN, ERECT, SUPPORT, BRACE AND MAINTAIN FORMWORK TO SUPPORT VERTICAL, LATERAL, STATIC AND DYNAMIC LOADS THAT MIGHT BE APPLIED UNTIL STRUCTURE CAN SUPPORT SUCH LOADS.

6) STRUCTURAL AND MISCELLANEOUS STEEL:

A. STRUCTURAL STEEL SHALL CONFORM TO THE FOLLOWING ASTM STANDARDS:
a) WIDE FLANGE SHAPES — A992, GR 50 GALV
b) OTHER SHAPES, PLATES, ANGLES AND BARS — A36 GALV
c) STEEL PIPE — A53, GRADE B GALV
d) HOLLOW STRUCTURAL SECTIONS — A500, GRADE B GALV
C. WELDS: PROVIDE 70KSI LOW HYDROGEN ELECTRODE OR PROCESS IN ACCORDANCE WITH AWS A5.1.
D. BOLTS, U.N.O.:
1. STAINLESS STEEL: ASTM A193, GRADE 8, CLASS 2, AISI TYPE 316
H. DRILL AND EPOXY ANCHOR BOLTS:
1. STAINLESS STEEL ASTM A193, GRADE 8, CLASS 2, AISI TYPE 316 OR EQUAL APPROVED BY ENGINEER
I. EPOXY BOLT OR EXPANSION BOLT SUBSTITUTIONS FOR EMBEDDED BOLTS IS PROHIBITED WITHOUT WRITTEN CONSENT FROM THE ENGINEER.
J. UNLESS NOTED OTHERWISE ON THE DRAWINGS, ALL EPOXY BOLTS SHALL BE AS SPECIFIED.
K. ALL STRUCTURAL STEEL SHALL BE DETAILED, FABRICATED, AND ERECTED IN ACCORDANCE WITH THE AISC CODE OF STANDARD PRACTICE, EXCEPT AS MODIFIED IN THESE NOTES AND THE PROJECT SPECIFICATIONS.
L. ALL STAINLESS STEEL SHALL BE TYPE 316.
M. SPLICING OF STEEL MEMBERS, UNLESS SHOWN ON THE DRAWINGS, IS PROHIBITED WITHOUT WRITTEN APPROVAL OF THE PROJECT ENGINEER.
N. GALVANIC PROTECTION SHALL BE PROVIDED BETWEEN DISSIMILAR METALS
O. WELDING SHOWN FOR STAINLESS STEEL ELEMENTS SHALL COMPLY WITH AWS D1 6/D1 6M

7) CONCRETE:

A. ALL CONCRETE WORK SHALL CONFORM TO THE LATEST EDITION OF ACI 301 AND ACI 117, EXCEPT AS MODIFIED BY THE FOLLOWING SUPPLEMENTAL REQUIREMENTS:
B. ALL CONCRETE SHALL BE NORMAL WEIGHT CONCRETE.
C. CONCRETE MIX DESIGN SHALL BE ESTABLISHED IN ACCORDANCE WITH CHAPTER 5 OF ACI 350.
D. COMPRESSIVE STRENGTH (28 DAYS) F'C — 4,500 PSI
E. REINFORCEMENT FOR CONCRETE:
1. ALL REINFORCING SHALL BE SUPPORTED IN FORMS SPACED WITH NECESSARY ACCESSORIES AND SHALL BE SECURELY WIRED TOGETHER IN ACCORDANCE WITH THE LATEST EDITION OF THE CRSI "MANUAL OF STANDARD PRACTICE"
2. CLEAR COVER
a) CONCRETE CAST AGAINST EARTH = 3"
b) ALL OTHER CONCRETE, UNO = 2"
F. SLAB-ON-GRADE REINFORCEMENT SHALL BE PLACED AT THE MID-DEPTH OF THE SLAB, UNO.
G. FORMWORK: DESIGN, ERECT, SUPPORT, BRACE AND MAINTAIN FORMWORK TO SUPPORT VERTICAL, LATERAL, STATIC AND DYNAMIC LOADS THAT MIGHT BE APPLIED UNTIL STRUCTURE CAN SUPPORT SUCH LOADS

8) ALUMINUM:

A. ALL ALUMINUM WORK SHALL CONFORM TO THE LATEST EDITION OF THE ALUMINUM DESIGN MANUAL BY THE ALUMINUM ASSOCIATION.
B. UNLESS OTHERWISE INDICATED, ALUMINUM METALWORK SHALL BE FABRICATED FROM ALLOY 6061-T6, EXCEPT GRATING WHICH SHALL BE PER DESIGN.

9) REINFORCEMENT:

A. ASTM A615 - FY = 60,000 PSI
B. SEE SPECIFICATIONS FOR REINFORCING PLACEMENT REQUIREMENTS
C. ABSOLUTELY NO WELDING OF REINFORCING BARS OR TORCHING TO BEND REINFORCING BARS SHALL BE ALLOWED WITHOUT SPECIFIC APPROVAL FROM THE STRUCTURAL ENGINEER

10) TESTS AND INSPECTIONS:

A. INSPECTIONS
1. CONSTRUCTION SHALL BE SUBJECT TO INSPECTION BY THE BUILDING OFFICIAL OR THE AUTHORITY HAVING JURISDICTION AND SUCH CONSTRUCTION OR WORK SHALL REMAIN ACCESSIBLE AND EXPOSED FOR INSPECTION PURPOSES UNTIL APPROVED.
2. THE CONTRACTOR IS RESPONSIBLE TO NOTIFY THE BUILDING OFFICIAL OR THE AUTHORITY HAVING JURISDICTION WHEN WORK IS READY FOR INSPECTION. IN ADDITION, THE CONTRACTOR IS RESPONSIBLE TO PROVIDE ACCESS TO AND MEANS FOR INSPECTIONS OF SUCH WORK THAT ARE REQUIRED BY THE BUILDING OFFICIAL OR AUTHORITY HAVING JURISDICTION.

B. STATEMENT OF SPECIAL INSPECTIONS
1. THE DESIGN ENGINEER HAS PREPARED AND SUBMITTED A STATEMENT OF SPECIAL INSPECTIONS TO THE BUILDING OFFICIAL SPECIFYING THE SCOPE OF WORK TO BE INSPECTED BY A SPECIAL INSPECTION AGENCY (IN ADDITION TO THE INSPECTIONS BY THE BUILDING OFFICIAL OR AUTHORITY HAVING JURISDICTION) TO SATISFY THE REQUIREMENTS OF THE CALIFORNIA BUILDING CODE, SECTION 1704. THE CONTRACTOR SHALL REVIEW THIS DOCUMENT AND SUBMIT A WRITTEN STATEMENT OF RESPONSIBILITY TO THE BUILDING OFFICIAL AND OWNER (OR THE OWNER'S AUTHORIZED AGENT) PRIOR TO COMMENCEMENT OF THE WORK THAT ACKNOWLEDGES AWARENESS OF THE REQUIREMENTS CONTAINED IN THE STATEMENT OF SPECIAL INSPECTIONS.
2. THE CONTRACTOR IS RESPONSIBLE FOR COORDINATING THEIR WORK WITH THE SPECIAL INSPECTION AGENCY. THE CONSTRUCTION OR WORK FOR WHICH SPECIAL INSPECTION OR TESTING IS REQUIRED SHALL REMAIN ACCESSIBLE AND EXPOSED FOR SPECIAL INSPECTION AND TESTING PURPOSES UNTIL COMPLETION OF THE REQUIRED SPECIAL INSPECTIONS OR TESTS.

IEEE STANDARD CONTROL AND PROTECTION DEVICES FUNCTION NUMBERS

01	MASTER ELEMENT
02	TIME-DELAY STARTING OR CLOSING RELAY (TDPU)
03	CHECKING OR INTERLOCKING RELAY
04	MASTER CONTACTOR
05	STOPPING DEVICE
06	STARTING CIRCUIT BREAKER
07	RATE-OF-CHANGE RELAY
08	CONTROL POWER DISCONNECTING DEVICE
09	REVERSING DEVICE
10	UNIT SEQUENCE SWITCH
11	MULTIFUNCTION DEVICE
12	OVER-SPEED DEVICE
13	SYNCHRONOUS SPEED DEVICE
14	UNDER-SPEED DEVICE
15	SPEED OR FREQUENCY MATCHING DEVICE
16	DATA COMMUNICATIONS DEVICE
17	SHUNTING OR DISCHARGE SWITCH
18	ACCELERATING OR DECELERATING DEVICE
19	STARTING-TO RUNNING TRANSITION CONTACTOR
20	ELECTRONICALLY OPERATED VALVE
21	DISTANCE RELAY
22	EQUALIZER CIRCUIT BREAKER
23	TEMPERATURE CONTROL DEVICE
24	VOLTS PER HERTZ RELAY
25	SYNCHRONIZING OR SYNCHRONISM - CHECK DEVICE
26	APPARATUS THERMAL DEVICE
27	UNDERVOLTAGE RELAY
28	FLAME DETECTOR
29	ISOLATING CONTACTOR
30	ANNUNCIATOR RELAY
31	SEPARATE EXCITATION DEVICE
32	DIRECTIONAL POWER RELAY
33	POSITION SWITCH
34	MASTER SEQUENCE DEVICE
35	BRUSH OPERATING OF SLIP-RING SHORT-CIRCUITING DEVICE
36	POLARITY OR POLARIZING VOLTAGE DEVICE
37	UNDERCURRENT OR UNDERPOWER RELAY
38	BEARING PROTECTIVE DEVICE
39	MECHANICAL CONDITION MONITOR
40	FIELD (OVER/UNDER EXCITATION) RELAY
41	FIELD CIRCUIT BREAKER
42	RUNNING CIRCUIT BREAKER
43	MANUAL TRANSFER OR SELECTOR DEVICE
44	UNIT SEQUENCE STARTING RELAY
45	ATMOSPHERIC CONDITION MONITOR
46	REVERSE-PHASE OR PHASE-BALANCE CURRENT RELAY
47	PHASE-SEQUENCE OR PHASE-BALANCE VOLTAGE RELAY
48	INCOMPLETE SEQUENCE RELAY
49	MACHINE OR TRANSFORMER THERMAL RELAY
50	INSTANTANEOUS OVERCURRENT OR RATE-OF-RISE RELAY
51	AC INVERSE TIME OVERCURRENT RELAY
52	AC CIRCUIT BREAKER
53	EXCITER OR DC GENERATOR RELAY
54	TURNING GEAR ENGAGING DEVICE
55	POWER FACTOR RELAY
56	FIELD APPLICATION RELAY
57	SHORT-CIRCUITING OR GROUNDING DEVICE
58	RECTIFICATION FAILURE RELAY
59	OVERVOLTAGE RELAY
60	VOLTAGE OR CURRENT BALANCE RELAY
61	DENSITY SWITCH OR SENSOR
62	TIME-DELAY STOPPING OR OPENING RELAY (TDDO)
63	PRESSURE SWITCH
64	GROUND DETECTOR RELAY
65	GOVERNOR
66	NOTCHING OR JOGGING DEVICE
67	AC DIRECTIONAL OVERCURRENT RELAY
68	BLOCKING RELAY
69	PERMISSIVE CONTROL DEVICE
70	RHEOSTAT
71	LEVEL SWITCH
72	DC CIRCUIT BREAKER
73	LOAD-RESISTOR CONTACTOR
74	ALARM RELAY
75	POSITION CHANGING MECHANISM
76	DC OVERCURRENT RELAY
77	PULSE TRANSMITTER
78	PHASE-ANGLE MEASURING OR OUT-OF-STEP PROTECTIVE RELAY
79	AC RECLOSING RELAY
80	FLOW SWITCH
81	FREQUENCY RELAY
82	DC RECLOSING RELAY
83	AUTOMATIC SELECTIVE CONTROL OR TRANSFER RELAY
84	OPERATING MECHANISM
85	CARRIER OR PILOT-WIRE RECEIVER RELAY
86	LOCKOUT RELAY
87	DIFFERENTIAL PROTECTIVE RELAY
88	AUXILIARY MOTOR OR MOTOR GENERATOR
89	LINE SWITCH
90	REGULATING DEVICE
91	VOLTAGE DIRECTIONAL RELAY
92	VOLTAGE AND POWER DIRECTIONAL RELAY
93	FIELD-CHANGING CONTACTOR
94	TRIPPING OR TRIP-FREE RELAY
95	RESERVED FOR FUTURE APPLICATION
96	RESERVED FOR FUTURE APPLICATION
97	RESERVED FOR FUTURE APPLICATION
98	CREEP DETECTOR DEVICE
99	RESERVED FOR FUTURE APPLICATION

METERING SYSTEMS AND DEVICES INDEX

A	AMMETER	PB	PUSHBUTTON
AH	AMPERE HOUR METER	PF	POWER FACTOR METER
AS	AMMETER SELECTOR SWITCH	PH	PHASE METER
C	COUNTER	PI	POSITION INDICATOR
CMA	CONTACT MAKING AMMETER	REC	RECORDER
CMC	CONTACT MAKING CLOCK	RF	REACTIVE FACTOR METER
CMV	CONTACT MAKING VOLTMETER	RPM	SPEED INDICATOR
CS	CONTROL STATION	SW	TRANSFER SWITCH
DM	DEMAND METER	SY	SYNCHROSCOPE
ETM	ELAPSE TIME METER	T	TEMPERATURE METER
F	FREQUENCY METER	TLM	TELEMETER
G	GALVANOMETER	TOC	TRUCK-OPERATED CONTACT
GD	GROUND FAULT DETECTOR	TS	TIME SWITCH
KV	KILO-VOLTMETER	V	VOLTMETER
KW	KILO-WATTMETER	VAR	VARMETER
KWH	KILO-WATT HOUR METER	VH	VAR HOUR METER
mA	MILLI AMMETER (TRANSDUCER)	VS	VOLTMETER SELECTOR SWITCH
MOC	MECHANISM-OPERATED CONTACT	W	WATTMETER
OHM	OHMMETER	WH	WATT HOUR METER
OSC	OSCILLOGRAPH	WHDM	WATT HOUR DEMAND METER

NOTE: "R" IN FRONT OF LETTERS INDICATES A RECORDING TYPE METER.

PILOT - INDICATOR LIGHT INDEX

A	AMBER
B	BLUE
C	CLEAR
G	GREEN
NE	NEON
O	ORANGE
OP	OPALESCENT
P	PURPLE
R	RED
W	WHITE
Y	YELLOW

FIRST LETTER SUFFIX OF IEEE DEVICE DESIGNATION

A	GOVERNOR SYSTEM (OR ACTUATOR SYSTEMS - GATES)
B	BATTERY CHARGING AND MONITORING SYSTEM OR BUS
C	HIGH-VOLTAGE CABLE SYSTEM OR CLOSING RELAY/CONTACTOR
D	DATA ACQUISITION SYSTEM
E	EXCITATION SYSTEM INCLUDING TRANSFORMER AND REGULATOR BUT NOT MAIN FIELD
F	FIRE AND CO2 SYSTEM
G	MAIN GENERATOR INCLUDING AUXILIARY SYSTEMS OR GROUND
G/M	GENERATOR MOTOR INCLUDING AUXILIARY SYSTEMS IN PUMPED STORAGE APPLICATIONS
H	TURBINE OR MAIN PUMP INCLUDING AUXILIARY SYSTEMS
I	ISOLATED AND OTHER POWER BUS SYSTEMS (NOT HIGH VOLTAGE CABLE)
J	POWER CIRCUIT BREAKER INCLUDING AUXILIARY SYSTEMS
K	POWER TRANSFORMER INCLUDING AUXILIARY SYSTEMS
L	ANNUNCIATOR SYSTEM, SECURITY SYSTEM, LINE, OR LOWERING RELAY/CONTACTOR
M	MAIN PUMP MOTOR INCLUDING AUXILIARY SYSTEMS AND VARIABLE SPEED DRIVE
N	AIR (PNEUMATIC) SYSTEM OR NEUTRAL
O	OPENING RELAY/CONTACTOR
P	PENSTOCK OR DISCHARGE LINE SYSTEM
Q	OIL STORAGE, HANDLING, PURIFICATION SYSTEM
R	FIELD FLASHING SYSTEM, PHASE REVERSAL SWITCH INCLUDING AUXILIARY SYSTEM, OR RAISING RELAY/CONTACTOR
S	STATION SERVICE SUBSTATION SYSTEM INCLUDING ENGINE/GENERATOR SYSTEM
T	TONE AND TRANSFER TRIP SYSTEM OR TRANSFORMER
U	UNIT CONTROL CIRCUIT SYSTEM OR UNINTERRUPTIBLE POWER SUPPLY SYSTEM
V	INTAKE AND/OR DISCHARGE VALVE SYSTEM
W	WATER SYSTEMS INCLUDING INTAKE/OUTLET WORKS AND PLANT WATER AND SUMP SYSTEMS
X	DEFINED FOR SYSTEMS UNIQUE TO A FACILITY
Y	DEFINED FOR SYSTEMS UNIQUE TO A FACILITY
Z	DEFINED FOR SYSTEMS UNIQUE TO A FACILITY

SECOND AND SUBSEQUENT LETTER SUFFIXES OF THE IEEE DEVICE DESIGNATION

A	ABNORMAL, A.C., ACCELERATION, ADMISSION, ALARM, AMPERES, AUTOMATIC, AUXILIARIES, PHASE A, ECT
B	BACKUP, BEARING, BLOCK, BLOWER, BOOSTER, BRAKES, BUS, BUTTON, BYPASS, PHASE B, ETC.
C	CABLE, CARRIER, CHARGER, CHECK, CHLORINATION, CLOSE, COLLECTOR, COMMON, COMPENSATOR, COMPRESSOR, CONTROL, COOLING, CURRENT, CYCLE, CYLINDER, PHASE C, CONVEYOR, ECT.
D	D.C, DECELERATION, DELAY, DEPRESS, DETECTOR, DIELECTRIC, DIFFERENTIAL, DISCHARGE, DISCONNECT, DISCORDANCE, DOMESTIC, DOWN, DOWNSTREAM, DRAFT TUBE, DRAIN, ETC
E	EJECTOR, ELEVATOR, EMERGENCY, EXPLOSIVE, ETC.
F	FAILURE, FAN, FAULT, FEEDER, FIELD, FILTER, FIRE, FLAME, FLOW, FOLLOWER, FORWARD, FREQUENCY, FULL, FUMES, FUSE, ETC.
G	GAS, GATE, GATING (SCR), GENERATE, GROUND, GUIDE BEARING, ETC.
H	HALON, HAND, HEAT, HEATER, HIGH, HOIST, HORN, IIOT, HOUSING, HYDROPNEUMATIC TANK, ETC.
I	INDICATION, INITIAL, INLET, INOUT, INSTANTANEOUS, INTAKE, INTERFACE, INTERLOCK, INTERRUPT, INVERTER, IONIZATION, ETC.
J	JACKING, JET, ETC
K	KEY, TRANSDUCER
L	LAMPS, LEFT, LEVEL, LIGHTS, LIMITS, LINE, LIQUID, LOCAL, LOGIC, LOSS, LOUVERS, LOW, LOWER, LUBRICATION, ETC.
M	MAIN, MALFUNCTION, MANUAL, METER, METERING, MOTOR, ETC.
N	NEGATIVE, NETWORK, NEUTRAL, NORMAL, ETC.
O	OPEN, OUTLET, OUTPUT, ETC.
P	PACKING BOX, PARALLEL, PARAMETER, PENSTOCK, PHASE, PHASEBACK, PILOT, PIT, POSITION, POTENTIAL, POTHEAD, POWER, PRESSURE, PRIMARY, PROTECTION, PULSE, PUMP, PURIFICATION, PUSH, ETC
Q	OIL, ETC
R	RAISE, REACTOR, RECLOSE, RECORD, RECTIFIER, REED, REFRIGERATION, REGULATE, RELAY, RELEASE, RELIEF, REMOTE, RESERVOIR, RESET, RESISTOR, RIGHT, ROTATION, ROTOR, RUNNER, ETC.
S	SEALS, SECONDARY, SELECTOR, SEWAGE, SHORTING, SHUTDOWN, SIGNAL, SKIMMER, SLUDGE, SMOKE, SOLENOID, SPEED, SPIRAL OR SCROLL CASE, SPLICE, STABILIZER, STANDBY, STARTING, STATOR, STEPPING, STORAGE, STRAINER, SUCTION, SUMP, SUPPLY, SWITCH, SYNCHRONIZING, ETC.
T	TANK, TEMPERATURE, TEST, THERMAL, THRUST BEARING, THYRATRON, TIE, TIME, TRANSDUCER, TRANSFER, TRANSMITTER, TRIP, TROUBLE, TRASHRAKE, ETC.
U	UNIT, UNLOADER, UNWATERING, UP, UPPER, UPSTREAM, ETC.
V	VALVE, VARS, VIBRATION. VOLTAGE, ETC.
W	WATER, WATTS, WINDINGS, ETC
X	AUXILIARY DEVICE, ETC
Y	AUXILIARY TO DEVICE X, ANTIPUMP RELAY, ETC
Z	AUXILIARY TO DEVICE Y

ABBREVIATIONS

A, AMP	AMP, AMPERE
AAAC	ALL ALUMINUM ALLOY CONDUCTOR
AC	ALTERNATING CURRENT
AF	AMPERE FRAME SIZE
AFD	ADJUSTABLE FREQUENCY DRIVE
AFF	ABOVE FINISHED FLOOR
AH	AMPERE HOURS
AHJ	AUTHORITY HAVING JURISDICTION
AHU	AIR HANDLING UNIT
AL	ALUMINUM
A/R	AS REQUIRED
AT	AMPERE TRIP
ATS	AUTOMATIC TRANSFER SWITCH
AVR	AUTOMATIC VOLTAGE REGULATOR
BAT	BATTERY
C	CONDUIT
CB	CIRCUIT BREAKER
CKT	CIRCUIT
CLF	CURRENT LIMITING FUSE
CO	CONDUIT ONLY
CP	CONTROL PANEL
CPT	CONTROL POWER TRANSFORMER
CR	CONTROL RELAY
CS	CONTROL SWITCH
CT	CURRENT TRANSFORMER
DC	DIRECT CURRENT
DCS	DISTRIBUTED CONTROL SYSTEM
DISC	DISCONNECT
DP	DISTRIBUTION PANEL
DPDT	DOUBLE-POLE, DOUBLE-THROW
DPST	DOUBLE-POLE, SINGLE-THROW
EDH	ELECTRIC DUCT HEATER
EG	ENGINE GENERATOR
EPT	EXCITATION POWER TRANSFORMER
EUH	ELECTRIC UNIT HEATER
EV	ELECTRICAL VAULT
F, FU	FUSE
FA	FIRE ALARM
FACP	FIRE ALARM CONTROL PANEL
FAS	FIRE ALARM SYSTEM
FREQ	FREQUENCY
FS	FLOAT SWITCH
FT	FLOW TRANSMITTER
FVNR	FULL VOLTAGE NON-REVERSING
FVR	FULL VOLTAGE REVERSING
GEN	GENERATOR
GFI	GROUND FAULT INTERRUPTION
GFP	GROUND FAULT PROTECTION
GND	GROUND
GPR	GENERATOR PROTECTION RELAY
GSU	GENERATOR STEP-UP TRANSFORMER
HMI	HUMAN-MACHINE INTERFACE
HOA	HAND-OFF-AUTO
HOR	HAND-OFF-REMOTE
HPU	HYDRAULIC POWER UNIT
HTR	HEATER
HZ	HERTZ (CYCLES PER SECOND)
IC	INTERRUPTING CAPACITY
I & C	INSTRUMENTATION AND CONTROL
I/O	INPUT/OUTPUT
INST	INSTANTANEOUS
INTLK	INTERLOCK
IP	INTERNET PROTOCOL
K	KEY INTERLOCK
kV	KILOVOLTS
kVA	KILOVOLT AMPERES (APPARENT POWER)
kVAR	KILOVARS (REACTIVE POWER)
kW	KILOWATTS (REAL POWER)
kWH	KILOWATT HOUR
LC	LIGHTING CONTROLLER
LCP	LOCAL CONTROL PANEL
LE	LEVEL ELEMENT
LIT	LEVEL INDICATING TRANSMITTER
LOR	LOCAL-OFF-REMOTE
LP	LIGHTING PANEL
LS	LEVEL SWITCH
LT	LEVEL TRANSMITTER
mA	MILLIAMPERES
M	MOTOR, MAN, MANUAL
MAG	MAGNETIC
MCC	MOTOR CONTROL CENTER
MDP	MAIN DISTRIBUTION PANEL
MFM	MULTIFUNCTIONAL METER
MPR	MOTOR PROTECTION RELAY
MTS	MANUAL TRANSFER SWITCH
mV	MILLIVOLTS
MVA	MEGAVOLT AMPERES (APPARENT POWER)
MVAR	MEGAVARS (REACTIVE POWER)
MW	MEGAWATTS (REAL POWER)
MWH	MEGAWATT HOUR
NEUT	NEUTRAL
NGR	NEUTRAL GROUNDING RESISTOR
OHM	OHMMETER
OL	OVERLOAD
OPER	OPERATOR, OPERATED
PB	PANELBOARD, PULLBOX, PUSH BUTTON
PC	PHOTOCELL
PCB	POWER CIRCUIT BREAKER
PCC	POINT OF COMMON CONNECTION
PF	POWER FACTOR
PH, Ø	PHASE
PMP	PUMP
PNL	PANEL
PLC	PROGRAMMABLE LOGIC CONTROLLER
POI	POINT OF INTER-CONNECTION
PS	PRESSURE SWITCH
PTT	PUSH-TO-TEST
PWR	POWER
R	RELAY, REVERSE, RUN
RCP	RECEPTACLE
RIO	REMOTE I/O
RTD	RESISTANCE TEMPERATURE DETECTOR
RVNR	REDUCED VOLTAGE NON REVERSING
RVR	REDUCED VOLTAGE REVERSING
S	SYNC SCOPE
SA	SURGE ARRESTER
SC	SURGE CAPACITOR
SDP	STANDBY DISTRIBUTION PANEL
SEL	SELECTOR, SCHWEITZER ENGINEERING LABORATORIES
SPD	SURGE PROTECTION DEVICE
SPDT	SINGLE-POLE, DOUBLE-THROW
SPST	SINGLE-POLE, SINGLE-THROW
S/S	STATION SERVICE
SV	SOLENOID VALVE
SW	SWITCH
SWBD	SWITCHBOARD
SWGR	SWITCHGEAR
T	THERMOSTAT
TB	TERMINAL BLOCK, TERMINAL BOX
TD	TEMPERATURE DETECTOR, TIME DELAY
TEL	TELEPHONE
TS	THERMOSTAT
TSP	TWISTED SHIELDED PAIR
TST	TWISTED SHIELDED TRIAD
TX	TRANSMITTER
UH	UNIT HEATER
UP	UTILITY POWER
UPS	UNINTERRUPTIBLE POWER SUPPLY
V	VOLTS
VAC	VOLTS ALTERNATING CURRENT
VC	VIDEO CAMERA
VCB	VACUUM CIRCUIT BREAKER
VDC	VOLTS DIRECT CURRENT
VFD	VARIABLE FREQUENCY DRIVE
W	WIRE, WATTS
WP	WEATHER PROOF
XD	TRANSDUCER
XFMR	TRANSFORMER
XLP	CROSS LINKED POLYETHYLENE
XP	EXPLOSION PROOF

DIAGRAMS

HIGH - MEDIUM VOLTAGE SWITCHING

- POWER CIRCUIT BRK, DRAWOUT
- POWER CIRCUIT BRK, NON-DRAWOUT
- HV ISOLATING SW MOTOR OPERATED
- HV INTERRUPTER SW FUSED
- CENTER-BREAK SW MOTOR OPERATED
- DUAL-BREAK SW MOTOR OPERATED
- LOAD-BREAK SW MOTOR OPERATED
- HORN GAP SW

TRANSFORMERS WINDING CONNECTIONS:

- DELTA 3PH3W
- DELTA CENTER TAP GND 3PH4W
- DELTA CORNER GRD 3PH3W
- BROKEN DELTA 3PH2W
- OPEN DELTA 2PH2W
- WYE 3PH3W
- WYE GRD 3PH4W
- ZIG-ZAG 3PH3W
- ZIG-ZAG GRD 3PH4W

MISC DEVICES & CONNECTIONS:

- DEVICE TERMINAL POINT
- TERMINAL BLOCK
- EXTERNAL EQUIPMENT INTERCONNECTION
- RELAY, SOLENOID, OR CONTACTOR COIL (XX / XX)
- TRANSDUCER (TD XX)
- INDICATING METER (I XX)
- TELEMETRY (TLM XX)
- PUSH-TO-TEST LIGHT
- PILOT/INDIC LIGHT
- FUSE, SIZE AS INDICATED (XA)
- FUSE DUMMY
- DISC SW FUSED (XA)
- FUSIBLE LINK
- CAPACITOR
- REACTOR (3X)
- RESISTOR (RES)
- RESISTOR VARIABLE (RES)
- HEATER ELEMENT (OR)
- RECTIFIER SOLID STATE
- RECTIFIER FULLWAVE (AC, DC+, DC-, AC)
- DC BRAKE
- GROUND
- CHASSIS GROUND
- CURRENT SHUNT

LOW VOLTAGE SWITCHING:

- DISCONNECTING SWITCH, MANUALLY GANG-OPERATED
- MOLDED CASE OR AIR CIRCUIT BREAKER
- CONTACTOR WITH THERMAL OL TRIP
- CONTACTOR WITH MAGNETIC OL TRIP
- CONTACTOR WITH THERMAL AND MAGNETIC OL TRIP
- CIR BKR DRAWOUT ELEC OPER (E)
- CIR BKR THERMO O/L DRAWOUT ELEC OPER (E)
- CIR BKR MAG O/L DRAWOUT ELEC OPER (E)
- CIR BKR THERMO/MAG O/L DRAWOUT ELEC OPER (E)

CONTROL SWITCHING:

- XX — PB SWITCH NORM OPEN
- XX — PB SWITCH NORM CLOSED
- XX, OFF, MAN / AUTO — SELECTOR SWITCH
- XX — LIMIT SW NORM OPEN
- XX — LIMIT SW NORM CLOSED
- XX — LIMIT SW NORM OPEN HELD CLOSED
- XX — LIMIT SW NORM CLOSED HELD OPEN
- SOLENOID
- XX — CONTACT NORM OPEN
- XX — CONTACT NORM CLOSED
- XX — FLOW OPER NORM OPEN
- XX — FLOW OPER NORM CLOSED
- XX — LEVEL OPER NORM OPEN
- XX — LEVEL OPER NORM CLOSED
- XX — SWITCH NORM OPEN
- XX — SWITCH NORM CLOSED
- XX — TEMP ACT SW NORM OPEN
- XX — TEMP ACT SW NORM CLOSED
- XX — FOOT OPER NORM OPEN
- XX — FOOT OPER NORM CLOSED
- XX — PRESS OPER NORM OPEN
- XX — PRESS OPER NORM CLOSED

MOMENTARY CONTACTS:

- NO / NC — SINGLE CIRCUIT
- NO & NC — DOUBLE CIRCUIT

MAINTAINED CONTACTS:

- TWO SINGLE CIRCUIT
- ONE DOUBLE CIRCUIT
- ESS — E-STOP, 2NC

INSTANT OPERATION CONTACTS WITH BLOWOUT
- XA — NO
- XA — NC

INSTANT OPERATION CONTACTS WITHOUT BLOWOUT
- XA — NO
- XA — NC

TIMED CONTACTS - CONTACT ACTION DELAYED AFTER COIL IS ENERGIZED
- XX SEC — NOTC
- XX SEC — NCTC

TIMED CONTACTS - CONTACT ACTION DELAYED AFTER COIL IS DE-ENERGIZED
- XX SEC — NOTC
- XX SEC — NCTC

SUPPLEMENTARY CONTACTS SYMBOLS:

- SPST, NO SINGLE-BREAK
- SPST, NO DOUBLE-BREAK
- SPST, NC SINGLE-BREAK
- SPST, NC DOUBLE-BREAK
- SPDT, SINGLE-BREAK
- SPDT, DOUBLE-BREAK
- DPST, NO, SINGLE-BREAK
- DPST, NO, DOUBLE-BREAK
- DPST, NC, SINGLE-BREAK
- DPST, NC, DOUBLE-BREAK
- DPDT, SINGLE-BREAK
- DPDT, DOUBLE-BREAK

SELECTOR:

TWO-POSITION X-CONTACT CLOSED

	J	K
A1	X	
A2		X

THREE-POSITION X-CONTACT CLOSED

	J	K	L
A1	X		
A2			X

TWO-POSITION SELECTOR PUSHBUTTON X-CONTACT CLOSED

CONTACTS	SELECTOR POSITION A		SELECTOR POSITION B	
	BUTTON FREE	BUTTON CONTACTS	BUTTON FREE	BUTTON CONTACTS
1-2	X			
3-4		X	X	X

TRANSFORMERS:

- POWER XFMR
- MAG CORE XFMR
- LOAD TAP CHANGING XFMR
- SPLIT SECONDARY XFMR
- AUTO-XFMR

HIGH - MEDIUM VOLTAGE DEVICES

- LIGHTNING ARRESTER
- WAVE TRAP (WT)
- GROUND SW MOTOR OPER (S7)
- MV CABLE TERMINATION
- CABLE POTHEAD OIL-FILLED

INSTRUMENT TRANSFORMERS:

- POTENTIAL XFMR
- POTENTIAL XFMR DUAL SECONDARY
- (3) 800:5 — CURRENT XFMR, QTY & RATIO AS INDICATED
- (1) 50:5 — CORE BALANCE CURRENT XFMR RATIO AS INDICATED
- (3) 800:5 — BUSHING CURRENT XFMR, QTY & RATIO AS INDICATED
- KWH — KILOWATT-HOUR METER

MISC DEVICES & CONNECTIONS:

- IN/OUT LINE
- 01 / 02 — PROTECTIVE DEVICE ELEMENT, SEE DEVICE FUNCTION INDEX
- TEST SWITCH
- TEST SWITCH, CURRENT SHORTING
- BATTERY
- GROUND
- DISCONNECTING DEVICE
- NEUTRAL CONNECTION
- ISOL PH BUS FLEX CONN
- ISOL PH BUS REMOVEABLE LINK

MACHINES:

- M — MOTOR-DC (XXHP)
- M — MOTOR-AC (XXHP)
- G — AC GENERATOR (XXKW XXPF)

NOTE:

1. "X" OR "XX" SHOWN ON SYMBOLS WILL BE SUBSTITUTED WITH DEVICE FUNCTION NUMBERS, LETTER SUFFIXES, PILOT LIGHT COLORS, OR OTHER DESCRIPTIVE TEXT, WHICH ARE DEFINED ELSEWHERE IN THESE LEGEND DRAWINGS.

AMENDMENT TO

BINDING TERM SHEET

WATER FACILITIES INTERCONNECTION AND LONG-TERM WATER TRANSPORTATION SERVICES

This AMENDMENT TO BINDING TERM SHEET, dated effective as of March 27, 2024, is made and entered into by and between Chugach Electric Association, Inc. ("***Chugach***"), Matanuska Electric Association, Inc. ("***MEA***"), the Municipality of Anchorage, and Anchorage Water and Wastewater Utility ("***Amendment***") to amend that certain Binding Term Sheet related to water facilities interconnection and long-term water transportation services entered into by the same parties on October 27, 2023 ("***Term Sheet***"). The capitalized terms in this Amendment shall have the same meaning as set forth in the Term Sheet unless otherwise defined or revised as set forth in this Amendment.

RECITALS

WHEREAS, the Eklutna Owners and AWWU entered into that certain Term Sheet on October 27, 2023;

WHEREAS, the Eklutna Owners and AWWU have completed negotiations of the Agreements (as such term is amended herein to include and a new Public Water Supply Agreement to replace the 1984 Agreement), each as contemplated in the Term Sheet and have come to agreement on other related matters;

WHEREAS, the effectiveness of the Agreements are conditioned on obtaining the Governor of Alaska's approval of the Fish and Wildlife Program that requires use of AWWU Facilities as contemplated in the Term Sheet without any conditions materially adverse to the Eklutna Owners or AWWU;

WHEREAS, by executing this Amendment, AWWU is reiterating that it does not, and shall not, take any position on whether or not using AWWU's infrastructure is the best alternative for establishing instream water flows in the Eklutna River as the foundation of the Fish and Wildlife Program; AWWU is merely stating its willingness to allow use of its infrastructure under the agreed terms and conditions of the Term Sheet and forms of Agreements, all only as pursuant to a Governor-approved Fish and Wildlife Program; and

WHEREAS, AWWU requires certain approvals before it may enter into one or more of the Agreements and such approvals likely cannot be obtained before the Governor's approval of the Fish and Wildlife Program, with such approval expected by October 2024;

NOW THEREFORE, in consideration for the premises and agreements set forth in this Amendment, the Parties agree as follows:

1. Term. The effective term of the Term Sheet and its commitments shall be extended until December 31, 2024 in order to allow time for: (a) the Eklutna Owners to file the Fish and

Wildlife Program with the Governor of Alaska and seek necessary approval under the 1991 Agreement; and thereafter (b) AWWU to seek and gain approvals necessary for it to enter into one or more of the Agreements. References to March 1, 2024 as an outside date for execution of Agreements as referenced in the preamble and in Section 4 of the Term Sheet shall be accordingly replaced with December 31, 2024.

2. Definition of Agreements. Section 3 of the Term Sheet shall be amended and restated in its entirety as follows:

3. Agreements	(1) Water Facilities Interconnection Agreement ("***Interconnection Agreement***"); (2) Long-Term Water Transportation Agreement ("***Transportation Agreement***"); and (3) Public Water Supply Agreement (collectively with the Interconnection Agreement and the Transportation Agreement, the "***Agreements***").

3. Form of Agreements. The final forms of the Agreements, except for certain exhibits which will be completed later as engineering work is completed or to otherwise ensure accuracy at the time of execution, are attached to this Amendment as follows:

Attachment A - ***Interconnection Agreement***

Attachment B - ***Transportation Agreement***

Attachment C - ***Public Water Supply Agreement***

The Parties agree that the substantive terms of the Agreements are complete and reflect a negotiated balance of interests, terms, and conditions. The Parties agree to support and defend the form of the Agreements and seek all necessary approvals of them in their present form in a timely and expeditious manner. The Parties agree not to reopen issues or renegotiate the Agreements, provided that certain exhibits may be updated as described in footnotes to the forms of the Agreements.

4. Limited Right of First Offer. As consideration for this Amendment, the Eklutna Owners hereby grant to AWWU a limited right of first offer to purchase from certain Eklutna Owners' water rights up to 41 million gallons per day for AWWU's public water supply on the following terms:

a. In the event that the Eklutna Owners' decide to remove, abandon, or sell the Eklutna Hydroelectric Project to the any person other than among the Eklutna Owners themselves, the Eklutna Owners shall provide AWWU with advance written notice of the intended action and opportunity to purchase such water rights at least three (3) months prior to initiating such action or transaction;

b. AWWU shall respond to such notice within thirty (30) days of its desire to its intention to exercise such option; if AWWU wants to purchase the water rights, the Parties shall then meet and negotiate in good faith terms and conditions then deemed appropriate, including compensation, risk mitigation, and means of transfer or purchase of priority water rights (e.g., quitclaim deed or other then-acceptable means of transfer) during the balance of the three (3) month period;

c. The water rights subject to this right of first offer are only that portion of Eklutna Owners' priority state water rights, up to 41 million gallons per day, consistent with, and not in addition to, AWWU's permit for preferred water use for pursuant to the Act of October 30, 1984, 98 Stat. 2823; Alaska Statutes 46.15.150(a), LAS 2569, and Certificate of Appropriation ADL 44944;

d. If AWWU fails to make a written offer within the notice period, if AWWU waives the right to make a first offer in writing, or if the Parties are unable to reach terms, the Eklutna Owners may proceed to remove, abandon, or sell the Eklutna Hydroelectric Project as they deem appropriate; and

e. Except for the potential sale of water rights, nothing in the limited right of first offer is intended to encumber, limit, or condition the Eklutna Owners' disposal or sale of the Eklutna Hydroelectric Project.

5. Execution of Agreements. The Agreements will be executed within thirty (30) days after the later of the following three prerequisites to their execution:

a. Governor approval of the Fish and Wildlife Program that requires use of AWWU Facilities as contemplated in the Term Sheet without any conditions materially adverse to the Eklutna Owners or AWWU;

b. Approval by the Municipality of Anchorage Assembly to the extent necessary for the Municipality of Anchorage to execute and perform under the Agreements; and

c. Board approvals (as may be necessary) for MEA and Chugach to execute and perform under the Agreements.

6. Effective Date and Incorporation of Terms of the Term Sheet. This Amendment shall be deemed effective as of the Effective Date of the Term Sheet and, without limiting the superseding effect of the amendments and the attachments set forth in this Amendment, shall be subject to all the terms and conditions of the Term Sheet, including Confidentiality (Section 24) and Governing Law (Section 23).

7. Failure to Achieve Conditions Precedent. In the event that the Agreements do not become fully effective (i) due to the failure to achieve the Conditions Precedent as set forth in Section 2.2 of Attachment C and Section 5 of this Amendment by June 1, 2025, or (ii) because the Governor of Alaska approves a Fish and Wildlife Program that does not require the use of the AWWU Facilities (as defined in the Agreements) for instream flows as contemplated in the Agreements, the effective term of the 1984 Agreement and its terms shall be extended for one (1) year from the date of the failure to achieve the Conditions Precedent or the date the Governor of

Alaska selects an alternate Fish and Wildlife Program that does not require use of AWWU Facilities as defined in the Agreements (referred to herein as the "***One (1) Year Extension Period***"). The Parties shall then meet promptly after the commencement of the One (1) Year Extension Period to negotiate in good faith an alternate agreement to replace the 1984 Agreement that expires on December 31, 2025 with terms and conditions that include but are not limited to adequate compensation, risk mitigation, potential transfer or purchase of water rights, and other terms and conditions then deemed appropriate by the Parties without prejudice due to the prior existence, or the subsequent termination, of the Agreements and shall execute a replacement for the 1984 Agreement by the end of the One (1) Year Extension period.

8. Counterparts. This Amendment may be executed by a number of counterparts, each of which shall be deemed an original, and all of which, together, shall constitute a single agreement.

WATER FACILITIES INTERCONNECTION AGREEMENT

This WATER FACILITIES INTERCONNECTION AGREEMENT (this "Agreement"), dated as of [_____] (the "Effective Date"), is entered into by and between Anchorage Water and Wastewater Utility ("AWWU"), and Chugach Electric Association, Inc. ("Chugach"), Matanuska Electric Association, Inc. ("MEA"), and the Municipality of Anchorage ("MOA") (each of Chugach, MEA, and MOA is an "Owner" and collectively they are referred to as the "Owners"). The Owners and AWWU are sometimes referred to herein as a "Party" or collectively as the "Parties".

RECITALS

WHEREAS, the Owners own and operate the Eklutna Hydroelectric Project, commissioned in 1954, which includes an earthen dam at the outlet of Eklutna Lake and which, under normal operating conditions, diverts the inflows of all water into the Eklutna Lake for hydroelectric production rather than into the Eklutna River;

WHEREAS, AWWU owns and operates certain existing water diversion and transportation facilities integrated with the Eklutna Hydroelectric Project as further detailed in Exhibit B (the "AWWU Facilities") located near the outlet of Eklutna Lake and adjacent to the Eklutna River, and AWWU uses such AWWU Facilities to provide public water supply for its customers;

WHEREAS, the Owners are parties to the 1991 Agreement (as defined below), pursuant to which they are required to develop and implement a Fish and Wildlife program every thirty-five years to protect, mitigate damages to, and enhance fish and wildlife impacted by the development of the Eklutna Hydroelectric Project (the "Fish and Wildlife Program");

WHEREAS, as a result of the process set forth in the 1991 Agreement, the Owners have developed a draft Fish and Wildlife Program in which the Owners have proposed to: (1) develop an Eklutna River release facility consisting in part of AWWU Facilities and facilities constructed pursuant to this Agreement, all as further described and depicted in Exhibit A-1, Exhibit A-2, and Exhibit A-3 (the "Facility"); (2) to transport water from Eklutna Lake through the Facility and release it into the Eklutna River; and (3) to operate and maintain the Facility;

WHEREAS, in connection with their proposal to develop the Facility, the Owners have also agreed to install bridges at eight locations across the Eklutna River to improve and preserve access to AWWU Facilities, as further described in Exhibit K (the "Access Bridges");

WHEREAS, in connection with the execution of this Agreement and in order to enable future implementation of the Fish and Wildlife Program (if approved), and to address compensation for AWWU's present and future use of a portion of Owners' water rights, the Parties are also entering into a Long-Term Water Transportation Agreement (the "Transportation Agreement") and a new Public Water Supply Agreement (the "Water Supply Agreement");

WHEREAS, Owners desire to construct the Facility in coordination with AWWU and AWWU is willing to allow for the interconnection and use of AWWU Facilities as part of the

Facility and to otherwise cooperate with Owners all pursuant to the terms and conditions set forth in this Agreement;

NOW, THEREFORE, in consideration of the premises of this Agreement, the Transportation Agreement, and the Water Supply Agreement, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Owners and AWWU, intending to be legally bound, hereby agree as follows:

ARTICLE 1.
DEFINITIONS; INTERPRETATION; EXHIBITS

1.1 Defined Terms. Capitalized terms used in this Agreement without other definition shall have the meanings set forth in Schedule 1.1, unless the context requires otherwise.

1.2 Interpretation. As used in this Agreement, the terms "herein," "herewith" and "hereof" are references to this Agreement, taken as a whole; the terms "includes" or "including" shall mean "including, without limitation"; and references to a "Section," "Article", "Exhibit" or "Schedule" shall mean a Section, Article, Exhibit or Schedule of this Agreement, as the case may be, unless in any such case the context requires otherwise. All references to a given Exhibit, Schedule, agreement, instrument or other document shall be a reference to that agreement, instrument or other document as modified, amended, supplemented and restated through the date as of which such reference is made. A reference to a Person includes its permitted successors and permitted assigns. The singular shall include the plural and the masculine shall include the feminine and neuter, and vice versa.

ARTICLE 2.
OWNERS RESPONSIBILITIES

2.1 General Responsibilities of Owners. Subject to Sections 4.1, 4.3 and 4.4, the Owners shall be responsible for designing, engineering, obtaining all Approvals for (except with respect to AWWU Approvals), constructing and performing related activities for the successful completion of (i) the Facility and interconnection of the Facility to the AWWU Facilities pursuant to the Facility Criteria; and (ii) the Access Bridges, the costs of which shall be paid for by the Owners.

2.2 Standard of Work; Skill and Expertise. Throughout the performance of all aspects of the Work, the Owners shall comply with, and shall ensure that each Subcontractor complies with, all applicable Laws and Prudent Industry Standards (the "Standard of Work"). The Owners shall, throughout the performance of the Work, use commercially reasonable efforts to ensure that all employees and contractors engaged in connection with the maintenance of, operation of, service of, and any future modification to (to include design, construction, commissioning, and installation) the Facility shall have the appropriate and necessary experience, skill and expertise to carry out the tasks efficiently, professionally, and in accordance with the Standard of Work.

2.3 Scope of Work. Without limiting the generality of Sections 2.1 and **Error! Reference source not found.**, the Owners shall perform all of the specific tasks in accordance with the Scope of Work and the Project Schedule, subject to any Change Orders pursuant to ARTICLE 7, in order to achieve Commercial Operation and Final Acceptance of the Facility in

accordance with ARTICLE 4, and to commence the Parties' obligations under the Transportation Agreement, whereupon the Work under this Agreement shall be concluded and the obligations under the Transportation Agreement shall begin.

2.4 Project Manager. The Owners shall identify to AWWU and at all times during the term of this Agreement maintain a Project Manager. The Project Manager shall act as AWWU's primary point of contact with the Owners with respect to the Work, and shall be available to meet with AWWU as reasonably requested by AWWU to discuss the Work or any issue related thereto. The Project Manager shall have full authority to act for the Owners under this Agreement; provided, that the Project Manager shall under no circumstances have the authority to amend (except for the issuance of Change Orders), terminate, or assign this Agreement. The Owners may change the Project Manager at any time upon written notice to AWWU. As of the Effective Date, the Project Manager is listed in Exhibit E.

2.5 Status of Individual Owners. Each of the Owners shall be jointly and severally liable for the obligations of the Owners under this Agreement. The delineation of specific responsibilities set forth hereunder as among the Owners shall be at the sole discretion of the Owners, not AWWU. If, at any time, the Owners agree that one or two of the Owners need no longer be party to this Agreement, such unnecessary Owner(s) may be removed as parties to this Agreement upon written notice to AWWU and, if agreed, shall retain no liability upon removal, with the remaining Owner(s) automatically assuming the full obligations of the Owners hereunder. If an Event of Default exists hereunder at any time with respect to an Owner, it shall be considered an Event of Default with respect to the Owners together as one Party hereunder, provided, that if another Owner agrees to assume such defaulting Owner's obligations under this Agreement by removing such Owner as a party pursuant to the preceding sentence of this Section 2.5 prior to the expiration of any applicable cure period, this shall not be considered an Event of Default hereunder.

ARTICLE 3.
AWWU RESPONSIBILITIES

3.1 Access to Site. As of the Effective Date, AWWU shall, with respect to the land and AWWU Facilities within its control, provide the Owners with a non-exclusive license to access the Site and the AWWU Facilities necessary to enable the Owners to perform their obligations under this Agreement in accordance with the Project Schedule, provided, that AWWU may from time to time limit access to the Site or the AWWU Facilities under AWWU control temporarily only to the extent necessary to address reasonable security or safety issues, and to avoid putting AWWU's public water supply at risk of interruption or contamination. To the extent that any additional access permissions from third-party landowners adjacent to the Site may be required for Owners to access the Site and conduct the Work pursuant to the site license granted under this Section 3.1, obtaining such Approvals shall be the responsibility of the Owners, provided that (i) AWWU shall be responsible for any such permissions associated with the construction and maintenance of the Access Bridges; (ii) if the Parties agree that in certain other circumstances AWWU responsibility is more appropriate, AWWU shall bear such responsibility; and (iii) AWWU shall assist the Owners with obtaining such Approvals as is reasonably requested by the Owners, including by being the first and primary point of contact with such third party in situations where AWWU has an existing easement or applicable existing relationship with such third party.

To the extent that AWWU adds access or other security limitations to the Site, to the Owners' Portion, or to the AWWU Facilities, the Owners and AWWU shall cooperate to ensure continuous access for the Owners and their contractors, to enable them to perform the Owners' obligations under this Agreement.

3.2 Required Approvals. After the Owners' achievement of the Construction Start CPs, AWWU shall be responsible for obtaining and maintaining those Governmental Approvals and third-party approvals necessary for the completion of the Work as set forth on Exhibit F hereto (the "AWWU Approvals"), any costs of which shall be initially paid for by AWWU and reimbursed by Owners pursuant to Section 5.3. The Owners shall provide AWWU with such reasonable assistance as AWWU may request in obtaining such AWWU Approvals.

3.3 AWWU Representative. AWWU shall designate in writing and maintain at all times during the term of this Agreement an AWWU Representative to represent AWWU and to receive communications from the Owners with regard to the Work and the development of the Facility and the Access Bridges. The AWWU Representative shall act as the Owner's primary point of contact with the AWWU with respect to the Work, and shall be available to meet with the Owners and Project Manager, as reasonably requested, to discuss the Work or any issue related thereto. The AWWU Representative shall have full authority to act for AWWU under this Agreement; provided, that AWWU's Representative shall under no circumstances have the authority to amend (except for the signing of Change Orders), terminate or assign this Agreement. AWWU may change the AWWU Representative at any time upon written notice to the Owners. As of the Effective Date, the AWWU Representative shall be [_____][2].

3.4 Duty to Cooperate. AWWU shall, throughout the performance of the Work, cooperate with the Owners and perform its responsibilities, obligations and services under this Agreement in a timely manner, to facilitate the Owners timely and efficient performance of the Work and the Owners' obligations under this Agreement. AWWU shall provide timely reviews and approvals, including completing the design approval set forth in Section 4.3, such approvals not to be unreasonably withheld or delayed.

3.5 Site and AWWU Facilities Information. Except as set forth on Schedule 3.5, AWWU hereby represents and warrants that the conditions of the Site and of the AWWU Facilities are suitable for the Work and the completion of the Facility. AWWU hereby acknowledges that the Owners shall be entitled to rely on Schedule 3.5 and Exhibit B in preparing their assessment of the Work necessary to complete the Facility, as well as their work preparing the Project Schedule; and that if any information contained in Schedule 3.5 or Exhibit B is later found to be inaccurate, the Owners shall be entitled to a Change Order at their discretion pursuant to Section 7.3.

[2] **Note to Accompany Final Draft**: To be populated after Governor approval and prior to execution.

ARTICLE 4.
CONDITIONS PRECEDENT; PROJECT SCHEDULE, DESIGN APPROVAL

4.1 Construction Start Conditions Precedent.

(a) The obligations of the Owners to design, engineer, permit and construct the Facility as set forth in this Agreement, and the right of the Owners to conduct Work at the Site, and to physically interconnect the Facility with the AWWU Facilities as set forth in this Agreement, shall not be effective until the achievement of the following conditions precedent (the "Construction Start CPs"):

(i) The Owners receive final approval from the Governor of Alaska, with such approval not subject to any pending judicial review or appeal, for a Fish and Wildlife Program that requires the use of the AWWU Facilities as contemplated in this Agreement, provided that such approval includes no unexpected conditions materially adverse to the Owners or to AWWU, as determined in good faith by the Parties and in the exercise of commercially reasonable business judgment;

(ii) The Owners are issued lawful documentation from the Alaska Department of Natural Resources authorizing the use and transport of water as contemplated under the Transportation Agreement, including but not limited to an amendment of the Owners' Water Rights[3] or other approval(s) authorizing a change of use to allow the Owners to use a portion of the Owners' Water Right to establish and continue instream flows in the Eklutna River;

(iii) The Owners and AWWU, with regard to AWWU Approvals, have obtained all Approvals necessary to conduct the Work; and

(iv) The Transportation Agreement and the Water Supply Agreement are in full force and effect and are valid, binding and enforceable against AWWU and the Owners in accordance with their terms.

(b) Notwithstanding Section 4.1(a), nothing in this Agreement shall be construed to prevent the Owners from conducting design and permitting work in preparation for Facility construction prior to the achievement of the Construction Start CPs. Such pre-construction Work shall be done at the sole discretion and financial risk of the Owners, and shall be treated as Work for which all of AWWU's duties and responsibilities hereunder shall apply unless otherwise stated.

4.2 Project Schedule. The Owners shall perform all Work in accordance with the Scope of Work and the Project Schedule. The Owners shall use commercially reasonably efforts to meet all milestones set forth in the Project Schedule, provided that all such milestones may be extended at the discretion of the Owners as may be reasonably necessary to accommodate delays in the

[3] Note to AWWU: "Owners' Water Right" is a defined term already linked to a specific certificate.

achievement of the Construction Start CPs or the receipt of necessary Approvals that are outside the control of the Owners.

4.3 Submission for Design Approval. As of the Effective Date, the proposed design for the Facility is set forth in Exhibit A-3. The Owners may modify such design at their discretion until the achievement of the Construction Start CPs, at which point prior to the commencement of any construction activities at the Site, the Owners shall provide to AWWU final design drawings and proposals (and any applicable calculations, models, and reports developed in support thereof) for the Facility for AWWU's review and approval, such approval to not be unreasonably withheld or delayed. AWWU shall indicate to the Owners within thirty 30 Days after receipt of such design drawings, proposals, calculations, models, and reports whether it approves or denies the design. If AWWU denies the design, the parties shall work in good faith to resolve the applicable issues and develop an updated design for AWWU approval.

4.4 Failure to Obtain Approvals. If, at any point during the Owners performance of the Work, the Owners or AWWU are unable to obtain any Approval necessary to construct or operate the Facility as intended herein and in the Fish and Wildlife Program, despite taking all reasonable commercial efforts to obtain such Approvals, then either Party may terminate this Agreement upon forty-five (45) Days prior written notice; and the Owners shall restore the site pursuant to Section 11.7.

4.5 Installation: Testing Procedures.

(a) Conduct of Tests. As soon as possible after installation of all Equipment necessary, as determined by the Owners in their sole discretion, to render the Facility mechanically and structurally complete, the Owners shall begin to conduct, or cause to be conducted, the Commissioning Procedures, in accordance with this Section 4.5 and the Commissioning Procedures Guidelines. Owners may perform and re-perform any number of Commissioning Procedures in accordance with the Commissioning Procedures Guidelines, and the Owners, at their discretion, may prematurely terminate any Commissioning Procedures so long as the remaining Commissioning Procedures are completed prior to Commercial Operation.

(b) AWWU Personnel. The Owners shall provide AWWU at least two (2) Business Days' prior notice of the intended commencement of the Commissioning Procedures. AWWU shall have at least one representative at the Site throughout the performance of the Commissioning Procedures, in order to monitor the taking of measurements to determine the performance and safety of the Facility, all in accordance with the Commissioning Procedures Guidelines.

4.6 Commercial Operation. When the Owners consider that the criteria for Commercial Operation have been met, including successful completion of the Commissioning Procedures in accordance with Section 4.5, the Owners shall so notify AWWU in writing, and shall provide AWWU with a completed Commercial Operation certificate issued by an independent licensed professional engineer, in the form set forth in Exhibit H (the "Commercial Operation Certificate").

4.7 Final Acceptance. The criteria for achieving Final Acceptance shall be that: (a) Commercial Operation has occurred; (b) AWWU has received from the Owners copies of all as-built drawings for the Work and the Facility; (c) AWWU has received from Owners all Equipment Documentation related to the AWWU Portion; (d) Owners have removed from the Site and properly disposed of all wastes created at or brought onto the Site by the Owners; and (e) an Owners' training program for AWWU's operation and maintenance personnel has been completed in accordance with the Scope of Work. When the Owners consider that the criteria for Final Acceptance have been met, the Owners shall so notify AWWU in writing. Within five (5) Days thereafter, AWWU shall either: (i) notify the Owners in writing that it agrees that Final Acceptance has been achieved, or (ii) advise the Owners of the items in Section **Error! Reference source not found.**7(a) through (e) (collectively, "Final Acceptance Items") that AWWU believes have not yet been satisfied. Upon receipt of any notice from AWWU of an alleged failure to satisfy a Final Acceptance Item, the Owners shall either: (A) satisfy such Final Acceptance Item(s); or (B) advise AWWU in writing that the Owners believes in good faith that all Final Acceptance Item(s) have been satisfied and shall request the commencement of negotiations pursuant to Section **Error! Reference source not found.**.

4.8 Post-Completion Facility O&M. Upon Final Acceptance and the applicable title transfers set forth in ARTICLE 6, AWWU shall be responsible for operating and maintaining the AWWU Facilities and the AWWU Portion; and the Owners shall be responsible for operating and maintaining the Owners' Portion. Each of AWWU and the Owners shall also have further specific ongoing operations and maintenance obligations for portions of the Facility during the "Delivery Term" of the Transportation Agreement, as further detailed in the Transportation Agreement.

4.9 Post-Completion Access Bridge Maintenance. Upon completion of any Access Bridge by the Owners, and possession and applicable title having passed to AWWU pursuant to Section 6.1(d), full responsibility for (and associated costs of) such Access Bridge maintenance shall belong to AWWU, except that the Owners shall use commercially reasonable efforts to obtain a one-year materials and workmanship warranty from the contractor(s) engaged by the Owners to construct the Access Bridges and then shall pass such warranty on to AWWU.

4.10 Skill and Expertise. Each Party shall use commercially reasonable efforts to ensure that all employees and contractors engaged in connection with the maintenance of, operation of, service of, and any future modification to (to include design, construction, commissioning, and installation) the Facility shall have the appropriate and necessary experience, skill and expertise to carry out the tasks efficiently, professionally, and in accordance with Prudent Industry Standards and applicable Laws.

ARTICLE 5.
COSTS; TAXES; REIMBURSEMENT

5.1 Costs. All costs to complete the Facility and perform the Work hereunder shall be the responsibility of Owners. The Owners shall reimburse AWWU pursuant to Section 5.3 for AWWU's reasonable actual costs related to or arising out of the development and construction of the Facility and related to all of AWWU's responsibilities set forth in ARTICLE 3, including but not limited to documented direct and indirect costs, overhead, general and administrative costs, staff time, and all other costs related to or arising out of the planning, engineering and project

management associated with the Facility; provided that AWWU shall use commercially reasonable efforts to minimize such costs.

5.2 Taxes. The Owners shall be responsible for and shall pay any sales, use, gross receipts, occupation, and other taxes (excluding income and franchise tax imposed upon AWWU) that from time to time may become payable as a consequence of this Agreement.

5.3 Payments. For any costs described in Section 5.1 initially borne by AWWU, AWWU shall submit to each of the Owners a detailed accounting of such cost for which AWWU is seeking reimbursement, together with such supporting documentation as the Owners shall reasonably require. Within sixty (60) Days after receiving a properly completed application for reimbursement and all required supporting documentation, each of the Owners shall individually: (i) pay AWWU their respective Cost Responsibility Proportion of the amounts set forth in AWWU's application for payment; or (ii) notify AWWU in writing that such Owner believes in good faith that a requested payment amount is not due and owing and shall request the commencement of negotiations pursuant to Section **Error! Reference source not found.**. In addition to the requirement that each Owner pay its Cost Responsibility Proportion as required in this Section, the Owners shall each be jointly and severally liable for all reimbursement obligations owed to AWWU under this Article 5.

ARTICLE 6.
TITLE; LOSS OR DAMAGE; FORCE MAJEURE

6.1 Title.

(a) Legal title to and ownership of the AWWU Portion shall pass to AWWU upon achievement of Final Acceptance free and clear of any and all liens, claims, security interests or other encumbrances. Title to drawings, specifications and like materials provided by Owners with respect to the AWWU Portion shall also pass to AWWU upon achievement of Final Acceptance. Owners shall deliver to AWWU such assignments, bills of sale or other documents as reasonably requested by AWWU to evidence such transfers of title and ownership.

(b) Legal title to and ownership of the Owners' Portion shall remain with Owners after Final Acceptance and throughout the term of the Transportation Agreement, free and clear of any and all liens, claims, security interests or other encumbrances imposed by AWWU.

(c) Legal title to and ownership of the AWWU Facilities shall remain with AWWU before, during, and after the construction of the Facility.

(d) Legal title to and ownership of any Access Bridge shall pass to AWWU upon completion of such Access Bridge. Owners shall deliver to AWWU such assignments, bills of sale or other documents as reasonably requested by AWWU to evidence such transfers of title and ownership, and if the Parties determine that an additional agreement between the Parties is necessary to detail specific Access Bridge construction and ownership transfer terms and conditions, the Parties shall negotiate such documentation in good faith and in accordance with the terms of this Agreement.

(e) Legal title to and ownership of all Owners' Water shall remain with the Owners at all times during construction of the Facility, including during the performance of the Commissioning Procedures.

6.2 Risk of Loss.

(a) Equipment. Notwithstanding anything herein to the contrary, the Owners shall have the full responsibility for care, custody and control of material and Equipment incorporated into the Work (including all Equipment and materials used in connection therewith), and shall bear the risk of loss thereof, until an applicable transfer of title to the Equipment for the AWWU Portion occurs, at which time risk of loss shall pass to AWWU.

(b) Water. For any quantity of Owners' Water[4] flowing through AWWU's Facilities as part of the Commissioning Procedures or otherwise during the construction of the Facility: control, custody and risk of loss of such Owners' Water shall transfer from the Owners to AWWU at the Injection Point, where such Owners' Water shall comingle with AWWU's Water until reaching the Delivery Point, at which point the custody, control and risk of loss of a quantity of water equal to the original quantity of Owners' Water released into the AWWU Facilities at the Injection Point shall pass back to the Owners.

6.3 Force Majeure. Each Party shall be excused from performance and shall not be considered to be in default with respect to any obligation hereunder, except for the Owners' obligation to reimburse AWWU for costs pursuant to ARTICLE 5, if and to the extent that such Party's failure of, or delay in, performance is due to a Force Majeure Event; provided, that:

(a) such Party gives the other Party prompt written notice describing the particulars of the Force Majeure Event as soon as is reasonably practicable after becoming aware of the occurrence of the Force Majeure Event;

(b) the suspension of performance is of no greater scope and of no longer duration than are reasonably required by the Force Majeure Event;

(c) no obligations of an affected Party that arose before the occurrence of the Force Majeure Event causing the suspension of performance shall be excused as a result of such Force Majeure Event, unless and only to the extent that the performance of such obligations is impaired by the Force Majeure Event;

(d) the Party uses diligent commercially reasonable efforts to overcome or mitigate the effects of the Force Majeure Event; and

(e) when the Party is able to resume performance of its obligations under this Agreement, such Party shall give the other Party written notice to that effect, and shall promptly resume performance hereunder.

---

[4] Note to AWWU: Minor change as Owners' Water is a defined term

ARTICLE 7.
CHANGES

7.1 Change Orders. The Owners may propose Change Orders to AWWU if those Change Orders: (i) improve the Facility; (ii) are required by a Governmental Authority as a condition precedent to issuance of any Governmental Approval; or (iii) are otherwise advisable for the Work. This shall not affect the obligation of the Owners to perform the Work and to install the Facility in accordance with the terms of this Agreement, except as otherwise set forth in the Change Order or in Sections 7.2 or 7.3.

7.2 Changes to Project Schedule. In the event that any Change Order affects the amount of time needed to complete any portion of the Work, there shall be an equitable adjustment of the time of performance and the Project Schedule, as agreed to by the Parties.

7.3 Unanticipated Conditions. If any unusual or unanticipated conditions exist or arise at the Site such as Hazardous Materials, structural or geotechnical deficiencies, environmental conditions, pollution or archeological findings not known to the Owners as of the Effective Date (collectively, "Unanticipated Conditions"), which conditions would involve the Owners incurring any expenses or delays to correct such conditions, the Owners shall submit a request for approval of the corrective work and expense pursuant to a Change Order, the approval of which by AWWU shall not be unreasonably withheld, conditioned or delayed, and such corrective work shall be deemed incorporated into the Scope of Work; provided, however, if any Unanticipated Conditions exist or arise that are contrary to those set forth on Schedule 3.5 or Exhibit B, then the Change Order submitted by the Owners in connection with such Unanticipated Conditions shall be deemed to be automatically approved by AWWU. All change orders under this Agreement shall be fulfilled at the sole expense of the Owners.

ARTICLE 8.
WARRANTIES

8.1 Warranties.

(a) Except as expressly set forth in Section 8.1(b), Owners do not make (and hereby expressly disclaim) any other warranties of any kind whatsoever.

(b) The Owners hereby warrant that as of the Commercial Operation Date: (i) the Facility will meet the requirements set forth in the Facility Criteria; (ii) the Facility will be free from defects in workmanship under normal operating conditions, provided that such warranty shall not apply to existing AWWU Facilities incorporated within the Facility; (iii) all Work will have been performed in accordance with Prudent Industry Standards and all requirements of this Agreement; and (iv) the Work, including but not limited to each item of Equipment incorporated therein, will be new and shall conform in all material respects with the plans and specifications prepared in accordance with this Agreement and all descriptions set forth herein.

(c) In conjunction with achievement of the Commercial Operation Date, the Owners hereby agree to assign to AWWU, and AWWU agrees to assume, all Subcontractor, supplier and manufacturer warranties set forth on Exhibit G relating to the AWWU Portion, and

thereafter AWWU shall pursue all warranty claims thereunder directly with such Subcontractors, suppliers and manufacturers.

8.2 Warranty Period. Owners shall remedy any breach of the warranties set forth in Sections 8.1(b) discovered within 12 months of the Commercial Operation Date (the "Warranty Period").

8.3 Remedies. If the warranty set forth in Section 8.1 is breached or a defect or deficiency is discovered by Owners or AWWU during the Warranty Period, Owners shall repair, replace, and/or correct the applicable Work on a reasonably expedited basis while minimizing any impact of the failure on Facility availability and functionality or AWWU Facilities availability and functionality. AWWU shall permit the Owners access to the AWWU Facilities and the AWWU Portion necessary or useful to perform Owners' warranty obligations under this Agreement. All costs of Owners' performance of their warranty obligations shall be borne by Owners, including any removal, replacement and reinstallation of Equipment and materials necessary to gain access to defective Work.

8.4 Warranty Exclusions. The warranty obligations set forth in this ARTICLE 8 do not extend to Work that is damaged by or other potential warranty claims arising from: (a) the negligent acts or omissions of AWWU or its contractors, agents, employees, representatives or any other Person acting on behalf of AWWU; (b) Force Majeure Events; (c) any Equipment included in the AWWU Portion that is not maintained and operated by AWWU in accordance with all Equipment Documentation; (d) normal wear and tear; (e) any alteration, repair or replacement made without the prior written approval of the Owners or contrary to instructions from the Owners; or (f) conditions that existed prior to the completion of the Work, including any defects or deficiencies in any equipment included in AWWU Facilities not directly caused by the Owners as part of the Work (collectively, "Non-Owner Work"). In the event that the warranty service requested is related to Non-Owner Work or is covered by any warranty set forth on Exhibit G, the Owners shall have no further obligation.

8.5 NO IMPLIED WARRANTIES. EXCEPT AS EXPRESSLY PROVIDED IN THIS AGREEMENT, THE OWNERS MAKE NO WARRANTIES OR GUARANTEES, EXPRESS OR IMPLIED, AND AWWU DISCLAIMS ANY WARRANTY OR GUARANTEE IMPLIED BY LAW, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT AND IMPLIED WARRANTIES OF CUSTOM OR USAGE.

ARTICLE 9.
LIMITATIONS ON LIABILITY

9.1 Aggregate Limitation of Liability. Notwithstanding any other provision of this Agreement, the total aggregate liability of the Owners and the total aggregate liability of AWWU arising out of or relating to this Agreement, from any and all causes, whether based on contract, tort (including negligence), strict liability or any other cause of action, shall in no event exceed ten million dollars ($10,000,000) for AWWU, and ten million dollars ($10,000,000) for the Owners collectively, provided that such limit shall not apply in the case of such Party's (i) gross negligence

or willful misconduct, (ii) third-party indemnity obligation, or (iii) breach of any representation or warranty.

9.2 CUMULATIVE REMEDIES. IF NO REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY PROVIDED, OR IF A REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY NON-EXCLUSIVE, THE NON-DEFAULTING PARTY SHALL HAVE THE RIGHT TO EXERCISE ALL RIGHTS AND REMEDIES AVAILABLE TO IT AT LAW OR IN EQUITY; PROVIDED, HOWEVER, THAT THE LIABILITY OF THE DEFAULTING PARTY SHALL BE LIMITED TO DIRECT, ACTUAL DAMAGES ONLY AND ALL OTHER DAMAGES AND REMEDIES ARE WAIVED.

9.3 WAIVER OF CERTAIN DAMAGES. EXCEPT WITH RESPECT TO INDEMNIFICATION OF THIRD PARTY CLAIMS PURSUANT TO ARTICLE 10, OR AS OTHERWISE EXPRESSLY PROVIDED FOR HEREIN, IN NO EVENT SHALL EITHER PARTY BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY, INDIRECT, BUSINESS INTERRUPTION OR SIMILAR DAMAGES, WHETHER BY STATUTE, IN TORT, BY CONTRACT OR OTHERWISE.

ARTICLE 10.
INDEMNIFICATION

10.1 Indemnity. To the fullest extent permitted by Law, each Party shall indemnify, hold harmless and defend the other Party and its directors, officers, shareholders, partners, agents and employees, and the Affiliates of the same (collectively, the "Indemnified Parties"), from and against any and all claims, loss, damage, expense and liability, including court costs and reasonable attorneys' fees (collectively, "Liabilities") incurred by the Indemnified Parties in connection with or arising from (i) the Work; and (ii) any claim for physical damage to or physical destruction of any part of the Facility, the AWWU Facilities, or death of or bodily injury to any person, to the extent any such Liability was caused by the negligence of the Indemnifying Party or its agents or employees or others under such Indemnifying Party's control, except any Liabilities incurred due to the negligence or willful misconduct of an Indemnified Party. For the purpose of the definition of "Indemnified Parties" AWWU shall not be considered to be an "Affiliate" of the MOA.

10.2 Environmental Indemnity. Notwithstanding any other provision hereof, each Party shall indemnify, defend and hold harmless the other Party and its Indemnified Parties from and against all Liabilities arising out of or relating to the existence at, on, above, below or near the Site of any Hazardous Material to the extent such Hazardous Material is deposited, spilled, released or otherwise caused by the Indemnifying Party or its Subcontractors or agents in connection with the Work.

10.3 Defense of Claims. A Party with an indemnification obligation pursuant to this ARTICLE 10 (an "Indemnifying Party") shall have the right to defend the Indemnified Parties pursuant to this ARTICLE 10 by counsel of the Indemnifying Party's selection (including insurance counsel) reasonably satisfactory to the Indemnified Party, unless in the opinion of counsel for the Indemnifying Party a conflict of interest between the Parties may exist with respect to such claim. If the Indemnifying Party does not assume the defense of the Indemnified Party, or if a conflict precludes counsel for the Indemnifying Party from providing the defense, then the

Indemnifying Party shall reimburse the Indemnified Party on a monthly basis for the Indemnified Party's defense through separate counsel of the Indemnified Party's choice. Even if the Indemnifying Party assumes the defense of the Indemnified Party with acceptable counsel, the Indemnified Party, at its sole option, may participate in the defense, at its own expense, with counsel of its own choice without relieving the Indemnifying Party of any of its obligations hereunder. The Parties shall give each other prompt written notice of any asserted claims or actions indemnified against hereunder and shall cooperate with each other in the defense of any such claims or actions. Without the prior written consent of the Indemnified Party, which consent shall not be unreasonably withheld, conditioned or delayed, no Indemnifying Party shall settle any such claims or actions in a manner that would require any action or forbearance from action by any Indemnified Party.

ARTICLE 11.
DEFAULT AND REMEDIES; TERMINATION; DISPUTE RESOLUTION

11.1 Event of Default. The following shall constitute events of default on the part of either party (each, an "Event of Default") under this Agreement:

(a) If a Party makes a general assignment for the benefit of its creditors, or if a receiver is appointed on account of the insolvency of such Party, or if such Party files a petition seeking to take advantage of any other Law relating to bankruptcy, insolvency, reorganization, winding up or composition of or readjustment of debts and, in the case of any such proceeding instituted against such Party (but not by such Party) such proceeding is not dismissed within sixty (60) days of such filing;

(b) If a Party fails to comply with any material terms of this Agreement not otherwise set forth as an Event of Default in this Section 12.1(b) and fails to cure or remedy such failure within thirty (30) days after notice and a written demand is made by the non-defaulting Party to the defaulting Party to cure the same or, if such failure cannot be cured within thirty (30) days, the defaulting Party fails to commence to cure such failure within thirty (30) days after such notice and written demand and thereafter diligently pursue such cure to completion, which shall in no event be later than ninety (90) days after such notice;

(c) If a Party fails to make any payment due hereunder within sixty (60) days after written notice from the non-defaulting Party;

(d) If a Party defaults under the Water Supply Agreement or the Transportation Agreement; or

(e) If any representation or warranty of a Party in this Agreement proves to have been false or misleading in any material respect when made, and such Party has not, within thirty (30) days after written notification thereof from the non-defaulting Party, either fully remedied, or commenced and diligently pursued the remedy, of all adverse impacts on the non-defaulting Party resulting therefrom, all to the reasonable satisfaction of the non-defaulting Party.

11.2 Remedies Upon Event of Default. Upon the occurrence and continuation of an Event of Default, the non-defaulting Party shall have the right to terminate this Agreement and the Water Supply Agreement upon ten (10) days' prior written notice, and pursue any other remedy

available to such non-defaulting party at law or in equity arising out of such Event of Default, including a claim for monetary damage or specific performance.

11.3 Site Restoration Upon Termination. If either Party terminates this Agreement for any reason during construction, the Owners shall promptly withdraw from the Site and shall remove all Equipment, returning the Site to its previous condition, all at Owners' cost, provided that if the Owners terminate for an AWWU Event of Default under this Agreement or the Water Supply Agreement or Transportation Agreement, AWWU shall reimburse the Owners for the costs of such removal.

11.4 Automatic Cross-Agreement Termination. If this Agreement is terminated for any reason, the Water Supply Agreement and the Transportation Agreement shall automatically terminate effective as of the same date as this Agreement's termination.

11.5 Dispute Resolution. In the event of any dispute arising under this Agreement (a "Dispute"), within ten (10) Business Days following notice by either Party, (i) each Party shall appoint a representative, and (ii) the representatives shall meet, negotiate and attempt in good faith to resolve the Dispute quickly, informally and inexpensively. In the event the representatives cannot resolve the Dispute within thirty (30) Days after the first meeting, either Party may request that consideration and resolution of the Dispute be transferred to a designated representative of each Party's senior management. Within ten (10) Days following such a request, each Party shall submit a written summary of the Dispute describing the issues and claims to a senior officer of each Party designated to address the Dispute. Within ten (10) Business Days after receipt of each Party's Dispute summaries, the senior management representatives for both Parties shall negotiate in good faith to resolve the Dispute. If such senior management representatives are unable to resolve the Dispute within thirty (30) Days thereafter, either Party may pursue any available legal remedies.

ARTICLE 12.
REPRESENTATIONS

12.1 General Representations and Warranties. Each Owner and AWWU hereby represents and warrants that:

(a) It is duly organized, validly existing and in good standing under the Laws of the state of its formation and is duly qualified to do business in the jurisdiction where the Site is located.

(b) It has all necessary power and authority to execute, deliver and perform its obligations under this Agreement; its execution, delivery and performance of this Agreement have been duly authorized by all necessary corporate, municipal, or other action on its part; and this Agreement has been duly and validly executed and delivered by it and constitutes its legal, valid and binding obligation enforceable against it in accordance with its terms, except as the enforceability thereof may be limited by bankruptcy, insolvency, reorganization or moratorium or other similar Laws relating to the enforcement of creditors' rights generally and by general equitable principles.

(c) It is not in violation of any applicable Law, or any judgment entered by any federal, state, local or other Governmental Authority, which violations, individually or in the aggregate, would adversely affect its performance of any obligations under this Agreement. There are no legal or arbitration proceedings or any proceeding by or before any Governmental Authority, now pending or (to its best knowledge) threatened against it which, if adversely determined, could have a material adverse effect upon its financial condition, operations, prospects or business, as a whole, or its ability to perform under this Agreement.

(d) No authorization, approval, exemption, or consent of or by any Person is required by it in connection with the execution, delivery, and performance of this Agreement. In addition, each Party represents and warrants to the other Party that the Governmental Approvals required to be obtained by such Party either have been obtained by such Party and are in full force and effect on the date hereof or will be obtained by such Party and will be in full force and effect on or prior to the date on which they are required, under applicable Law, to be in full force and effect, so as to permit the Owners to commence and prosecute the Work to completion in accordance with the Project Schedule.

(e) The execution and delivery of this Agreement, and the consummation of the transactions herein contemplated and compliance with the terms and provisions hereof by it, will not conflict with or result in a material breach of, or require any consent under, any of its constitutive documents, or any applicable Law, or any agreement or instrument to which it is a party or by which it is bound or to which it is subject, or constitute a material default under any such agreement or instrument.

ARTICLE 13.
NOTICES

13.1 Writing. Except as set forth in Section 13.2, any notice, statement, demand, claim, offer or other written instrument required or permitted to be given pursuant to this Agreement shall be in writing signed by the Party giving such notice and shall be sent by email, facsimile, hand messenger delivery, overnight courier service, or certified mail (receipt requested) to the other Party at the address set forth in Exhibit L. Each Party shall have the right to change the address information to which notice shall be sent or delivered or to specify additional addresses to which copies of notices may be sent, in either case by similar notice sent or delivered in like manner to the other Party. All notices shall be effective upon receipt.

13.2 Technical Communications. Any technical or other communications pertaining to the Work shall be between the Project Manager and the AWWU Representative or other representatives appointed by the Project Manager or the AWWU Representative. Each Party shall notify the other in writing of the name of such representatives. The Project Manager or other designated representatives shall be reasonably satisfactory to AWWU, have knowledge of the Work, and be available at all reasonable times for consultation.

ARTICLE 14.

CONFIDENTIALITY; PUBLIC STATEMENTS

14.1 Confidentiality. The Parties agree that the Parties' proposals, communications, negotiations, and information exchanged prior to the Effective Date concerning this Agreement and the development thereof, and technical and other information regarding or relating to the Facility, the Access Bridges or the Work exchanged between the Parties that is or otherwise clearly communicated to the receiving Party as "Confidential" constitute "Confidential Information" of the disclosing Party. The Owners and AWWU each agree to hold such Confidential Information wholly confidential. Such Confidential Information may only be used by the Parties for the purposes related to the approval, or administration or enforcement of this Agreement.

14.2 Disclosure. Each Party agrees not to disclose Confidential Information of the other Party to any other Person (other than its Affiliates, counsel, consultants, lenders, partners, members, employees, officers and director, and then only to Persons subject to similar confidentiality restrictions as those set forth herein), without the prior written consent of the other Party, provided, that, either Party may disclose Confidential Information, if such disclosure is required by Law, including without limitation, pursuant to an order of a court or regulatory agency or in order to enforce this Agreement or to seek approval of this Agreement. In the event a Party is required by Law or a Governmental Authority to disclose Confidential Information, such Party, prior to such disclosure, shall provide reasonable advance notice to the other Party of the time and scope of the intended disclosure, in order to permit such non-disclosing Party the opportunity to obtain a protective order or to otherwise seek to prevent or limit the scope or otherwise impose conditions upon such disclosure.

14.3 Injunctive Relief. Each Party agrees that violation of the terms of Sections 14.1 and 14.2 constitutes irreparable harm to the other, and that the harmed Party may seek any and all remedies available to it at law or in equity, including but not limited to injunctive relief.

14.4 Release of Agreement. The Parties agree that this Agreement, upon execution, shall not be considered Confidential Information. Except as required by Law, releasing the Agreement to the public shall be the sole responsibility of the Owners, to be released in the manner at a time decided in their sole discretion.

14.5 AWWU Public Statements.

(a) Until that date upon which the Fish and Wildlife Program is approved by the Governor of Alaska, and absent any pending judicial review or appeal, any public statements made by AWWU about the Fish and Wildlife Program or the development of the Facility must be approved by the Owners, such approval not to be unreasonably withheld or delayed. Notwithstanding the foregoing, AWWU may respond to any inquiries from any Governmental Authority in a manner consistent with this Agreement.

(b) AWWU shall make best efforts to ensure that all of the employees, agents, contractors and consultants of AWWU do not engage in any public activities while acting as employees, agents, contractors or consultants of AWWU, to include the public expression of statements that are reasonably likely to have an adverse effect on the public's perception of the Fish and Wildlife Program and the development of the Facility, it being understood by both AWWU and the Owners that such negative public statements may undermine the ability of the Owners to satisfy their obligations under the 1991 Agreement; provided, however, that the Parties

acknowledge that AWWU cannot restrict the rights of such people to express their personal opinions as private citizens.

ARTICLE 15.
MISCELLANEOUS

15.1 Reasonability. The Parties shall act in a reasonable manner and in accordance with principles of good faith and fair dealing in the performance of this Agreement. Unless expressly provided otherwise in this Agreement and whether or not stated: (a) where this Agreement requires the consent, approval, or similar action by a Party, such consent or approval shall not be unreasonably withheld, conditioned, or delayed; and (b) wherever this Agreement gives a Party a right to determine, require, request, specify, or take similar action with respect to a matter, such determination, requirement, request, specification, or similar action must be reasonable.

15.2 Entire Agreement. This Agreement, together with all Schedule and Exhibits hereto, embodies the entire agreement and understanding of the Parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements and understandings of the Parties, verbal or written, relating to the subject matter hereof.

15.3 Waiver. Any waiver of the provisions of this Agreement must be in writing and shall not be implied by any usage of trade, course of dealing or course of performance. No exercise of any right or remedy by AWWU or the Owners constitutes a waiver of any other right or remedy contained or provided by Law. Any delay or failure of a Party to exercise, or any partial exercise of, its rights and remedies under this Agreement shall not operate to limit or otherwise affect such rights or remedies. Any waiver of performance hereunder shall be limited to the specific performance waived and shall not, unless otherwise expressly stated in writing, constitute a continuous waiver or a waiver of future performance.

15.4 Assignment. Neither Party shall assign this Agreement or any of its rights hereunder without the prior written consent of the other Party, which consent shall not be unreasonably withheld, conditioned or delayed. Notwithstanding the foregoing, either Party, without relieving itself from liability hereunder, and without the need for consent from the other Party, provided that any such assignee shall agree to be bound by all terms and conditions hereof, may transfer, pledge or assign this Agreement: (a) to any person or entity succeeding to all or substantially all of the assets of the assigning Party; or (b) to a successor entity in a merger or acquisition transaction. Any assignment made in contravention of this Section 15.4 shall be void and unenforceable.

15.5 Governing Law; Submission to Jurisdiction; Venue; No Jury Trial.

(a) Governing Law. THIS AGREEMENT SHALL BE GOVERNED BY, AND INTERPRETED AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF ALASKA, EXCLUDING ANY CHOICE OF LAW RULES.

(b) Submission to Jurisdiction, Venue. The Parties agree that any suit, action or other legal proceeding by or against any Party (or its Affiliates or designees) with respect to or arising out of this Agreement shall be brought exclusively in the courts of the State of Alaska, in the Municipality of Anchorage, as the Party instituting such suit, action or other legal proceeding

may elect, provided that claims related to federal water rights, federal legislation enabling the Facility or AWWU Facilities, or the 1991 Agreement may be brought in the United States District Court for the District of Alaska. By execution and delivery of this Agreement, each Party (for itself, its Affiliates and its designees) irrevocably and unconditionally consents and submits to the exclusive jurisdiction of such courts and the appellate courts therefrom, and waives any right it may have to assert the doctrine of forum non conveniens or similar doctrine or to object to venue with respect to any proceeding. The Parties irrevocably consent to the service of process in any such action or proceeding by the mailing of copies thereof by registered or certified mail, first class postage prepaid to the addresses set forth in Section 13.1.

(c) No Jury Trial. EACH OF THE PARTIES HEREBY WAIVES ANY AND ALL RIGHTS TO DEMAND A TRIAL BY JURY IN ANY ACTION, SUIT, OR PROCEEDING ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY.

(d) Duty to Proceed. Pending final resolution of any Dispute, the Owners and AWWU shall continue to fulfill their respective obligations hereunder that are not the subject of the Dispute.

15.6 Construction. This Agreement is to be construed so as to effectuate the normal and reasonable expectations of a sophisticated buyer and seller of the equipment and services covered by this Agreement and shall not be construed either for or against either Party. No provision of this Agreement shall be construed or interpreted for or against either Party because such Party drafted or caused its legal representative to draft the provision.

15.7 Headings. The titles or headings of the various sections, articles and paragraphs hereof are intended solely for convenience and ease of reference and are not intended, and are not to be deemed for any purpose, to modify or explain or place any interpretation or construction upon any of the provisions of this Agreement.

15.8 Status of the Parties. The Owners and its Subcontractors shall be independent contractors in relation to AWWU with respect to the Work; and neither the Owners nor their Subcontractors, nor the employees or agents of either, shall be deemed to be the employees, representatives or agents of AWWU in connection with any matter relating to this Agreement. No provision of this Agreement shall be construed or represented as creating a partnership, trust, joint venture, fiduciary or any similar relationship between the Parties.

15.9 Insurance. The Owners shall maintain the required insurance policies as set forth on Exhibit J-1 and AWWU shall maintain the required insurance policy as set forth on Exhibit J-2.

15.10 No Third Party Beneficiaries. This Agreement is made and entered into for the sole protection and legal benefit of the Owners and AWWU, and their permitted successors and assigns, and no other person shall be a direct or indirect legal beneficiary of, or have any direct or indirect cause of action or claim in connection with, this Agreement.

15.11 Further Assurances. Each Party agrees to execute and deliver all further instruments and documents, and take all further action, as may be reasonably necessary to

complete performance by the Parties hereunder and to effectuate the purposes and intent of this Agreement.

15.12 Amendments. Except for any Change Order issued pursuant to ARTICLE 7, a removal of an Owner pursuant to Section 2.5, or a redesignation of the Project Manager, the AWWU Representative or notice information under Section 13.1, no change, amendment or modification of this Agreement shall be valid or binding upon the Parties unless such change, amendment or modification shall be in writing and duly executed by the Parties.

15.13 Severability. If any provision of this Agreement is determined to be illegal or unenforceable, such determination will not affect any other provision of this Agreement and all other provisions will remain in full force and effect.

15.14 Conflicting Provisions. In the event of any conflict between this document and any Schedule or Exhibit attached hereto, the terms and provisions of this document, as amended from time to time, shall control. In the event of any conflict among the Exhibits, the Exhibit of the latest date mutually agreed to by the Parties shall control.

15.15 Survival. The provisions of ARTICLE 1, ARTICLE 6, ARTICLE 8, ARTICLE 9, ARTICLE 10, ARTICLE 11, ARTICLE 12, ARTICLE 13, and ARTICLE 15 shall survive termination of this Agreement for any reason.

15.16 Counterparts. This Agreement may be executed in any number of separate counterparts and delivered by electronic means, each of which when so executed shall be deemed an original, and all of said counterparts taken together shall be deemed to constitute but one and the same instrument.

[*Remainder of page intentionally left blank*]

IN WITNESS WHEREOF, the Parties have caused this Water Facilities Interconnection Agreement to be executed by their duly authorized representatives as of the Effective Date.

Schedule 1.1

Definitions

"1991 Agreement" means that certain Agreement between the Municipality of Anchorage, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., the United States Fish and Wildlife Service, the National Marine Fisheries Service, the State of Alaska, and the Alaska Energy Authority Relative to the Eklutna and Snettisham Hydroelectric Projects, dated August 7, 1991, as amended.

"Access Bridges" has the meaning set forth in the Recitals.

"Affiliate" means, with respect to any Person, any other Person controlling, controlled by or under common control with such first Person. For purposes of this definition and the Agreement, the term "control" (and correlative terms) means (1) the ownership of 50% or more of the equity interest in a Person, or (2) the power, whether by contract, equity ownership or otherwise, to direct or cause the direction of the policies or management of a Person.

"Agreement" has the meaning set forth in the Preamble, and shall include all Exhibits and Schedules hereto.

"Approvals" means Governmental Approvals and third-party approvals.

"AWWU" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of AWWU.

"AWWU Approvals" has the meaning set forth in Section 3.2.

"AWWU Event of Default" has the meaning set forth in Section 4.1.

"AWWU Isolation Valve" has the meaning set forth in Exhibit A-1.

"AWWU Facilities" has the meaning set forth in the Recitals.

"AWWU Representative" means the person designated by AWWU in accordance with Section 3.3 to act as the Owners' primary point of contact with AWWU.

"AWWU's Portion" has the meaning set forth in Exhibit A-1.

"AWWU's Water Permit" means that permit belonging to AWWU (LAS 2569) to use Owners' Water Rights for up to 41 million gallons per day for public water supply pursuant to the Act of October 30, 1984, 98 Stat. 2823, as may be replaced as described in Section 3.1 of the Water Supply Agreement.

"AWWU's Water" means any and all water belonging to AWWU pursuant to AWWU's Water Permit.

"Business Day" means any day other than a Saturday, Sunday or legal holiday in the state of Alaska.

"Change Order" means a written order signed by Project Manager and AWWU authorizing a change in the Work or an adjustment in the Project Schedule for performance or delivery of the Work.

"Chugach" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of Chugach.

"Commercial Operation" means that: (a) Owners have completed the Commissioning Procedures and the Facility has met the Facility Criteria; and (b) Owners have provided the Commercial Operation Certificate to AWWU.

"Commercial Operation Certificate" has the meaning set forth in Section 4.7.

"Commercial Operation Date" means the date upon which Commercial Operation is achieved.

"Commissioning Procedures" means a test of function of the Facility in accordance with the Commissioning Procedures Guidelines and Section 4.5.

"Commissioning Procedures Guidelines" means the guidelines for the Commissioning Procedures set forth on Exhibit E.

"Confidential Information" has the meaning set forth in Section 14.1.

"Construction Start CPs" has the meaning set forth in Section 4.1.

"Cost Responsibility Proportion" shall mean, with respect to each Owner, the percentage of the total applicable Eklutna Hydroelectric Project costs that such Owner is obligated to pay as agreed to by the Owners, which as of the Effective Date shall be, with respect to MOA, 19.05%, with respect to Chugach, 64.28%, and with respect to MEA, 16.67%, and which may be changed hereunder upon agreement between the Owners at any time.

"Day" or "day" means a calendar day, unless expressly specified otherwise.

"Delivery Point" has the meaning set forth in Exhibit A-1 and is depicted on the schematic included as part of Exhibit B.

"Delivery Point Meter" has the meaning set forth in Exhibit A-1.

"Dispute" has the meaning set forth in Section 11.5.

"Effective Date" has the meaning set forth in the Preamble.

"Eklutna Hydroelectric Project" means the Eklutna Hydroelectric Project initially authorized, constructed and operated pursuant to the Eklutna Project Act of July 31, 1950 (64 Stat. 382, as amended), including any and all property and facilities acquired or used in connection therewith, all of which was then sold to the Owners by the United States of America on October 2, 1997.

"Equipment" means all of the equipment, materials, apparatus, structures, supplies and other goods required by the terms of this Agreement to complete the Work and to be incorporated into the Facility. Equipment shall not include any materials, apparatus or tools owned by the Owners or any Subcontractor that are used to complete the Work but are not contemplated under this Agreement to become part of the Work or the Facility.

"Equipment Documentation" means copies or originals of all recommended operating specifications, warranties, manuals, test reports, vendor information and all other similar information obtained or prepared, and to be delivered, by the Owners in accordance with the terms of this Agreement.

"Event of Default" has the meaning set forth in Section **Error! Reference source not found.**1.

"Facility" has the meaning set forth in the Recitals.

"Facility Criteria" means the criteria set forth in Exhibit I.

"Final Acceptance" means the final acceptance of the Work by AWWU, as demonstrated by the process set forth in Section 4.5.

"Final Acceptance Items" has the meaning set forth in Section 4.5.

"Fish and Wildlife Program" has the meaning set forth in the Recitals.

"Force Majeure Event" means the occurrence of any act or event beyond the reasonable control of the Party affected that prevents the affected Party from performing its obligations under this Agreement, in full or part, if such act or event is beyond the reasonable control of, and not the result of the fault or negligence of, the affected Party and such Party has been unable to overcome such act or event with the exercise of due diligence (including the expenditure of reasonable sums), including the following: drought, flood, earthquake, storm, fire, lightning, epidemic, war, riot, civil disturbance, sabotage, terrorism or threat of terrorism, strike or labor difficulty, accident or curtailment of supply or equipment, total casualty to equipment, or restraint, order or decree by a Governmental Authority. Notwithstanding the foregoing, Force Majeure Events shall expressly not include mechanical or equipment failures (except to the extent any such failure is itself caused by a Force Majeure Event), nor any diminution in water quality in Eklutna Lake.

"Governmental Approvals" means all authorizations, consents, licenses, leases, rulings, certifications, registrations, exemptions, permits, certificates, and approvals from any Governmental Authority.

"Governmental Authority" means any federal, state or local government, any political subdivision thereof, or any governmental, quasi-governmental, judicial, public or statutory instrumentality, administrative agency, authority, body or other entity having jurisdiction over the performance of the Work, the Facility or its operations, or the health, safety or environmental conditions of the Site or otherwise over the Parties.

"Hazardous Material" means any waste, chemical or other substance or material that is defined as "hazardous" or "toxic" or by any other similar term under any applicable Law relating to environmental, health or safety matters.

"Indemnified Parties" has the meaning set forth in Section 10.1.

"Indemnifying Party" has the meaning set forth in Section 10.3.

"Injection Point" means the point where AWWU Facilities meet facilities owned by the Owners near the outlet of the Eklutna Lake, where AWWU receives all of AWWU's Water from Eklutna Lake, as depicted in the schematic included as part of Exhibit B.

"Isolation Valve Structure" has the meaning set forth in Exhibit A-1.

"Isolation Valves" has the meaning set forth in Exhibit A-1.

"Law" means any constitution, charter, act, statute, law, ordinance, code, rule, regulation, order, specified standards or objective criteria contained in any applicable permit or approval (which standards or criteria must be met in order for the Work to be performed lawfully) or other legislative or administrative action of any Governmental Authority or a final decree, judgment or order of a court or tribunal.

"Liabilities" has the meaning set forth in Section 10.1.

"MEA" has the meaning set forth in the Preamble, and shall include all successor sand assigns of MEA.

"MOA" has the meaning set forth in the Preamble, and shall include all successor sand assigns of MOA.

"Non-Owner Work" has the meaning set forth in Section 8.4.

"Owners" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of the Owners.

"Owner" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of an Owner.

"Owners' Isolation Valve" has the meaning set forth in Exhibit A-1.

"Owners' Portion" has the meaning set forth in Exhibit A-1.

"Owners' Water" means any and all water belonging to the Owners pursuant to the Owners' Water Rights.

"Owners' Water Rights" means that certain senior priority water right held by the Owners for the water in Eklutna Lake for use in generating power for the Eklutna Hydroelectric Project as described in water rights certificate ADL 44944.

"Party" and "Parties" has the meaning set forth in the Preamble.

"Person" means any individual, partnership, corporation, limited liability company, association, business, trust, government or political subdivision thereof, Governmental Authority or other entity.

"Project Manager" means the Project Manager designated by the Owners in accordance with Section 2.5.

"Project Schedule" means the Project Schedule attached hereto as Exhibit D.

"Prudent Industry Standards" means those standards of care and diligence normally practiced by water transportation infrastructure engineering, construction and installation firms in performing services of a similar nature in a similar jurisdiction in which the Work will be performed. Prudent Industry Standards are not intended to be limited to optimum practice or methods, but rather to be a spectrum of reasonable

and prudent practices and methods that must take the conditions specific to any given water transportation facility under consideration.

"River Release Structure" has the meaning set forth in Exhibit A-1.

"Scope of Work" means the Scope of Work attached hereto as Exhibit C.

"Site" means the location of the Facility as further described in Exhibit B.

"Standard of Work" has the meaning set forth in Section 2.2.

"Subcontractor" means any Person with whom the Owners, or any individual Owner, enters into an arrangement for the performance of any portion of the Work, including Persons at any tier with whom any Subcontractor has further subcontracted any portion of the Work, and the legal or personal representatives, successors, and assigns of such Person.

"Transportation Agreement" has the meaning set forth in the Recitals.

"Unanticipated Conditions" has the meaning set forth in Section 7.3.

"Warranty Period" has the meaning set forth in Section 8.2.

"Water Supply Agreement" has the meaning set forth in the Recitals.

"Work" means all phases of Owners' performance of their construction-related obligations under this Agreement, including engineering, design, procurement, construction, erection, installation, training, testing with respect to the Facility, and the installation of the Access Bridges. For the sake of clarity, any operation and maintenance of the Facility occurring after Final Acceptance does not constitute Work hereunder, unless such operation or maintenance is being conducted pursuant to the warranty provisions set forth in ARTICLE 8.

Schedule 3.5[5]

Site and AWWU Facilities Conditions

[5] **Note to Accompany Final Draft**: This Exhibit will be populated by AWWU after Governor approval and prior to signing.

Exhibit A-1[6]

Eklutna River Release Facility Description and Definitions

The "***Eklutna River Release Facility***" shall consist of an Isolation Valve Structure and the River Release Structure.

The "***Isolation Valve Structure***" shall include:

- a new tee to be built in the AWWU pipeline downstream of the AWWU tunnel/pipeline transition and upstream of the AWWU portal valve (the "***Delivery Point***")
- A 54-inch gate valve on the main segment of AWWU pipeline intended to provide dual means of isolation for AWWU's pipeline segment ("***AWWU Isolation Valve***")
- A 42-inch gate valve on the branch segment of AWWU pipeline intended to provide isolation to the river release structure ("***Owners' Isolation Valve***", together with the AWWU Isolation Valve, the "***Isolation Valves***").
- Related controls and communication technology to be installed by the Owners in the main line of the AWWU Facilities.

The "***River Release Structure***" shall include:

- [A new pipeline from the Isolation Valve Structure to the Eklutna River]
- Control valves
- A new meter installed at the Delivery Point ("***Delivery Point Meter***")
- Monitoring and control equipment to be installed by Owners [*describe where*].

"***AWWU's Portion***" of the Facility shall consist of the Isolation Valve Structure [and _____]

The "***Owners' Portion***" of the Facility shall consist of the River Release Structure [and _____]

Exhibit B[9]

Description and Schematic of Site, AWWU Facilities, and Injection Point and Delivery Point

[9] **Note to Accompany Final Draft**: This Exhibit will be populated by Owners after Governor approval and prior to signing.

Execution Version

Exhibit C

Scope of Work[10]

(a) Supply and Procurement. Owners shall at their own expense procure or supply and pay for all of the Equipment, and arrange and pay for the delivery of all of the Equipment to the Site.

(b) Engineering and Design. Owners shall at their own expense design and provide engineering services with respect to the Facility in a manner that shall be:

(i) Consistent with the actual conditions existing at the Site;

(ii) Consistent with the requirements set forth in this Scope of Work;

(iii) Sufficient, complete, and adequate in all respects necessary to enable the Facility to satisfy (A) the Facility Criteria and (B) all required Governmental Approvals;

(iv) In conformance with applicable Laws, including national, state, and local engineering, construction, safety, and electrical codes and standards, as specified in the Scope of Work, or if none are specified for the particular matter, with Prudent Industry Standards; and

(v) In form and content acceptable to all Governmental Authorities.

(c) Construction and Installation. Owners shall provide, install, complete and pay for all labor, Equipment, tools, supplies, construction equipment and machinery, utilities and consumables, transportation and other facilities and services (including any temporary materials, equipment, supplies and facilities) necessary for the proper execution and completion of the Work. All construction and installation performed by the Owners under this Agreement shall be in accordance with the given manufacturer's written instructions and Prudent Industry Standards, in each case unless otherwise agreed by AWWU in advance in writing.

(d) Utilities. The Owners shall provide all of the transmission, power, and communication facilities necessary for construction.

(e) Equipment Documentation and Equipment Training. The Owners shall provide AWWU with all Equipment Documentation for the AWWU Portion, and shall provide AWWU's personnel with up to five (5) days of on-site training in the use and operation of the AWWU Portion, as further detailed in the Transportation Agreement.

---

[10] **Note to Accompany Final Draft**: This Exhibit is subject to further revisions and will be finalized after Governor approval and prior to signing.

(f) Approvals. Except for applicable AWWU Approvals, the Owners shall obtain and maintain all Approvals (including all fees and permits) required to perform the Work, including (without limitation) approvals and agreements required to interconnect the Facility with the AWWU Facilities. The Owners shall pay for all such Approvals, and shall reimburse AWWU for costs associated with obtaining and maintaining all AWWU Approvals. Owners shall promptly provide AWWU with copies of all such Approvals upon the Owners' obtaining such Approvals. In order to assist the Owners in obtaining such Approvals, AWWU shall provide the Owners with such reasonable assistance as the Owners may request.

(g) Security. The Owners shall be responsible for the security of the Work and shall construct security facilities (e.g. fencing surrounding the Facility at the Site) to ensure the security of the Work. The Owners shall coordinate with AWWU for the ingress and egress of the Owners' personnel to and from the Site to minimize disruption of AWWU operations.

(h) Conduct at Site. AWWU shall have access to the Site at all times, and the Owners shall, and shall require their Subcontractors to, use commercially reasonable efforts to avoid inhibiting the operations of AWWU at the Site, and the operation of the AWWU Facilities. The Owners shall comply with work rules and work hours reasonably established by AWWU with regard to Work involving the AWWU Facilities.

LONG-TERM WATER TRANSPORTATION AGREEMENT

This LONG-TERM WATER TRANSPORTATION AGREEMENT (this "Agreement"), dated as of [_____] (the "Effective Date"), is entered into by and between Anchorage Water and Wastewater Utility ("AWWU"), and Chugach Electric Association, Inc. ("Chugach"), Matanuska Electric Association, Inc. ("MEA"), and the Municipality of Anchorage ("MOA") (each of Chugach, MEA, and MOA is an "Owner" and collectively they are referred to as the "Owners"). The Owners and AWWU are sometimes referred to herein as a "Party" or collectively as the "Parties".

RECITALS

WHEREAS, the Owners own and operate the Eklutna Hydroelectric Project, commissioned in 1954, which includes an earthen dam at the outlet of Eklutna Lake and which, under normal operating conditions, diverts all inflows of water into the Eklutna Lake for hydroelectric production rather than into the Eklutna River;

WHEREAS, AWWU owns and operates certain existing water transportation facilities integrated with the Eklutna Hydroelectric Project as further described and depicted in Exhibit B (the "AWWU Facilities") located near the outlet of Eklutna Lake and adjacent to the Eklutna River, which AWWU uses to provide public water supply for its customers;

WHEREAS, the Owners are parties to the 1991 Agreement (as defined below), pursuant to which they are required to develop and implement a Fish and Wildlife program every thirty-five years to protect, mitigate damages to, and enhance fish and wildlife impacted by the development of the Eklutna Hydroelectric Project (the "Fish and Wildlife Program");

WHEREAS, as a result of the process set forth in the 1991 Agreement, the Owners have developed a draft Fish and Wildlife Program in which the Owners propose to: (1) develop an Eklutna River release facility consisting in part of AWWU Facilities and facilities constructed pursuant to the Interconnection Agreement, all as further described in Exhibit A and as will be depicted as-built in the Operating Procedures (the "Facility"); (2) to transport water from Eklutna Lake through the Facility and release it into the Eklutna River; and (3) to maintain and operate the Facility;

WHEREAS, in connection with the execution of this Agreement and in order to enable future implementation of the Fish and Wildlife Program (if approved by the Governor of Alaska) and address compensation for AWWU's use of Owners' Water Rights, the Parties also entered into a Water Facilities Interconnection Agreement (the "Interconnection Agreement") pursuant to which the Parties will construct the Facility, and a new Public Water Supply Agreement (the "Water Supply Agreement");

WHEREAS, after the Facility achieves Final Acceptance pursuant to the terms of the Interconnection Agreement and all other conditions precedent set forth herein are achieved, (1) the Owners' desire to engage AWWU to provide, and AWWU desires to provide, the Water Transportation Services; and (2) the Owners and AWWU each desire to operate and maintain portions of the Facility pursuant to the terms and conditions set forth in this Agreement;

NOW, THEREFORE, in consideration of the premises of this Agreement, the Interconnection Agreement, and the Water Supply Agreement, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Owners and AWWU, intending to be legally bound, hereby agree as follows:

ARTICLE 1.
DEFINITIONS; INTERPRETATION; EXHIBITS

1.1 Defined Terms. Capitalized terms used in this Agreement without other definition shall have the meanings set forth in Schedule 1.1, unless the context requires otherwise.

1.2 Interpretation. As used in this Agreement, the terms "herein," "herewith" and "hereof" are references to this Agreement, taken as a whole; the terms "includes" or "including" shall mean "including, without limitation"; and references to a "Section," "Article", "Exhibit" or "Schedule" shall mean a Section, Article, Exhibit or Schedule of this Agreement, as the case may be, unless in any such case the context requires otherwise. All references to a given Exhibit, Schedule, agreement, instrument or other document shall be a reference to that agreement, instrument or other document as modified, amended, supplemented and restated through the date as of which such reference is made. A reference to a Person includes its permitted successors and permitted assigns. The singular shall include the plural and the masculine shall include the feminine and neuter, and vice versa.

ARTICLE 2.
TERM

2.1 Term.

(a) The term of this Agreement shall commence on the Effective Date and continue until the conclusion of the Delivery Term or unless earlier terminated pursuant to the terms of this Agreement (the "Term").

(b) AWWU's obligation to provide the Water Transportation Services and the Parties' obligations to commence the Operational Work hereunder shall be effective on the date upon which the Facility achieves Final Acceptance under terms of the Interconnection Agreement (the "Delivery Term Effective Date") and shall continue in full force and effect for 35 years thereafter, subject to any early termination provisions set forth herein (the "Initial Delivery Term"). At the conclusion of the Initial Delivery Term, the Agreement shall automatically renew each year, unless a Party notifies the other Party at least 60 days prior to the expiration of the Initial Delivery Term or each extended year thereafter that it does not wish to renew the Agreement. The Initial Delivery Term as so extended is the "Delivery Term".

ARTICLE 3.
WATER TRANSPORTATION AND SCHEDULING

3.1 Water Transportation Services. During the Delivery Term, AWWU shall, pursuant to the schedules set forth in Section 3.2 and the Operating Procedures developed pursuant to Section 3.3, transport Owners' Water, comingled with and undifferentiated from AWWU's Water, through AWWU Facilities from the Injection Point to the Delivery Point, in any amount requested

by the Owners (the "Water Transportation Services"), provided, that, such requested amount shall under no circumstances: (a) inhibit the ability of AWWU to deliver a daily flow rate of at least 41 MGD to the downstream Eklutna Water Treatment Facility at a pressure sufficient to allow normal operation of the EWTF as currently configured; (b) exceed the hydraulic capacity or design criteria of the AWWU Facilities; or (c) exceed any then-active Curtailment Limit (clauses (a)-(c), the "Water Release Limits").

3.2 Scheduling.

(a) During the first week of each month of each year of the Delivery Term, and in accordance with the Operating Procedures, the Owners shall provide AWWU with a written anticipated daily Owners' Water release schedule for the following month (e.g., on the first Business Day of January, the Owners shall provide the anticipated schedule for each day of February) based on Eklutna Lake levels and Fish and Wildlife Program obligations, all subject to the Water Release Limits (the "Monthly Water Release Schedule").

(b) No later than the last Business Day of each week of the Delivery Term, the Owners may submit in writing in accordance with the Operating Procedures, updated daily Owners' Water release amounts for the following week, provided that under no circumstance shall such updates exceed the Water Release Limits.

3.3 Metering.

(a) At all times during the Delivery Term, AWWU shall maintain an Injection Point Flow Meter to measure real-time water flowing into AWWU's Facilities from Eklutna Lake.

(b) At all times during the Delivery Term, the Owners shall maintain the Delivery Point Meter to measure real-time water quantities flowing into the River Release Structure at the Delivery Point, which shall be used to calculate the amount of Owners' Water received by the Owners as part of the Water Transportation Services.

(c) Each Party shall take reasonable measures to ensure that the other Party has access to real-time water flow quantity information from both the Injection Point Flow Meter and the Delivery Point Meter, as applicable, pursuant to procedures set forth in the Operating Procedures.

(d) For each month of the Delivery Term, the Owners shall prepare a written report for AWWU detailing the actual water flow amounts through the Injection Point Flow Meter and the Delivery Point Meter, and the amount of Owners' Water delivered to the Delivery Point, all as compared with the Monthly Water Release Schedule (as updated by Section 3.2(b) and pursuant to the procedures detailed in the Operating Procedures).

ARTICLE 4.
OPERATION AND MAINTENANCE

4.1 AWWU Facilities and AWWU's Portion. Throughout the Delivery Term, the AWWU Facilities and AWWU's Portion shall be exclusively operated, managed, and maintained by AWWU or any AWWU designee in accordance with all Governmental Approvals, applicable

Law, Prudent Industry Standards, all subject to the Owners' maintenance access rights to the Owners' Isolation Valve as set forth in Section 4.3.

4.2 Owners' Portion. Throughout the Delivery Term, the Owners' Portion shall be exclusively operated, managed, and maintained by the Owners or any designee of the Owners in accordance with all Governmental Approvals, applicable Law, and Prudent Industry Standards.

4.3 Owners' Isolation Valve. Throughout the Delivery Term, the Owners shall be responsible for all operation and maintenance of the Owners' Isolation Valve contained within AWWU's Portion. As part of the Access License granted by AWWU to the Owners pursuant to Section 9.1, AWWU shall ensure that at all times the Owners have access to the Owners' Isolation Valve as necessary to enable the Owners to maintain and operate the Owners' Isolation Valve in accordance with the Operating Procedures, provided, that, AWWU may from time to time assume operational responsibility for the Owners' Isolation Valve temporarily only to the extent necessary to address urgent security or safety issues and to avoid putting AWWU's public water supply at risk of interruption or contamination.

4.4 Approvals. Throughout the Delivery Term, AWWU shall be responsible for obtaining and maintaining all Approvals necessary for the provision of Water Transportation Services and all Operational Work set forth herein, except for those Approvals set forth on Exhibit C hereto, for which the Owners will be responsible for obtaining and maintaining (the "Owners' Approvals"). Each Party shall provide the other Party with such reasonable assistance as such first Party may request in obtaining applicable Approvals.

4.5 Duty to Cooperate. Each Party shall, throughout the Delivery Term, cooperate with the other Party as necessary to facilitate the provision of the Water Transportation Services, the Operational Work and all other responsibilities and obligations under this Agreement in a timely manner.

4.6 Skill and Expertise. Each Party shall, throughout the Delivery Term, use commercially reasonable efforts to ensure that all employees and contractors engaged in connection with the provision of the Water Transportation Services, the Operational Work or any other maintenance of, operation of, service of, and any future modification to (to include design, construction, commissioning, and installation) the Facility shall have the appropriate and necessary experience, skill and expertise to carry out the tasks efficiently, professionally, and in accordance with Prudent Industry Standards and applicable Law.

4.7 Successor Operator. If, during the Term, the Owners wish to no longer be responsible for any of the operation and maintenance responsibilities set forth in Sections 4.2 and 4.3, for any reason, prior to turning over such operation and maintenance to a third-party entity, AWWU must consent to such third-party entity, such consent not to be unreasonably withheld, conditioned, or delayed. For the sake of clarity, this Section 4.7 does not impact the Owners' right to freely use Subcontractors to conduct any of its responsibilities under Sections 4.2 and 4.3; this Section 4.7 only applies in situations where the Owners plan to no longer be ultimately liable for such obligations hereunder.

ARTICLE 5.
OPERATING PROCEDURES

5.1 Operating Procedures.

(a) At least 60 days prior to the commencement of the Delivery Term, AWWU and the Owners shall develop written detailed operating procedures governing the Water Transportation Services pursuant to the terms in this Agreement (the "Operating Procedures"). Such Operating Procedures shall comply with all applicable Approvals, Prudent Industry Standards and applicable Law and shall, at a minimum, set forth (i) the agreed methods for day-to-day communication and reporting requirements of each Party; (ii) key personnel lists for AWWU and for the Owners necessary for the facilitation of the Operational Work and the provision of the Water Transportation Services; (iii) processes for planning and communication between the Parties to coordinate regarding scheduling pursuant to Section 3.2 and Excused Events pursuant to Article 8; (iv) reporting and determining Curtailment Durations and Curtailment Limits for Excused Events pursuant to Article 8; (v) sharing of information from the Delivery Point Meter and the Injection Point Flow Meter pursuant to Section 3.3; (vi) ongoing reporting requirements of the Owners of metered water flow quantities measured at the Delivery Point and the Injection Point pursuant to Section 3.3; (vii) the process for obtaining and maintaining necessary Approvals throughout the Delivery Term; (viii) reference to necessary Facility equipment specifications and operation and maintenance manuals; (ix) inclusion of the final as-built drawings for the Facility developed pursuant to the Interconnection Agreement; (x) a clear process for ensuring that at all times during the Delivery Term, the Water Release Limits are met; (xi) each Party's legal notice address information for the delivery of notices required under this Agreement; and (xii) any other procedures related to the provision of the Water Transportation Services and Operational Work that the Parties deem necessary. Such Operating Procedures shall include any and all detailed definitions, drawings, and descriptions of the AWWU Facilities and the Facility as necessary to facilitate the coordination and responsibilities of the Parties as set forth herein. In the event of any disagreement in the development of the Operating Procedures, the Parties shall work in good faith to promptly resolve differences. AWWU's actual costs of developing such Operating Procedures shall be reimbursed by the Owners pursuant to Section 6.3.

(b) Throughout the Delivery Term, the Operating Procedures shall be updated from time to time by AWWU as needed upon written notice to the Owners, or upon written request by the Owners, to reflect ministerial changes to ensure continued accuracy and relevancy (e.g. personnel, contact/notice information, and Facility equipment upgrades), provided, that, such changes made pursuant to this Section 5.1(b) shall under no circumstances materially modify the obligations and responsibilities of the Parties as set forth herein.

ARTICLE 6.
COSTS; TAXES; REIMBURSEMENT

6.1 Costs and Compensation. Unless specifically stated otherwise, all costs borne initially by each Party in connection with the exercising of its rights and the performance of its obligations under this Agreement shall be the responsibility of such Party initially incurring such costs. In partial consideration of the costs to AWWU incurred in provision of the Water Transportation Services provided under this Agreement for the benefit of the Owners, the Parties

entered into the Water Supply Agreement for the same duration as this Agreement, pursuant to which AWWU shall have access to the use of certain of the Owners' facilities without additional compensation for its provision of public water supply.

6.2 Taxes. The Owners shall be responsible for and shall reimburse AWWU for any sales, use, gross receipts, occupation, and other taxes (excluding income, and franchise tax) imposed upon AWWU from time to time payable related to AWWU's provision of services set forth herein.

6.3 Reimbursement. For those AWWU costs that the Owners are specifically required to reimburse hereunder, AWWU shall submit to each of the Owners a detailed accounting of such cost for which AWWU is seeking reimbursement, together with such supporting documentation as the Owners shall reasonably require, including a reference to the applicable section of this Agreement demonstrating the Owners' responsibility for such costs. Within sixty (60) Days after receiving a properly completed application for reimbursement and all required supporting documentation, each of the Owners shall individually: (i) pay AWWU their respective Cost Responsibility Proportion of the amounts set forth in AWWU's application for payment; or (ii) notify AWWU in writing that such Owner believes in good faith that a requested payment amount is not due and owing and shall request the commencement of negotiations pursuant to **Section Error! Reference source not found.**. In addition to the requirement that each Owner pay its Cost Responsibility Proportion as required in this Section, the Owners shall each be jointly and severally liable for all reimbursement obligations owed to AWWU under this Article 6.

ARTICLE 7.
TITLE

7.1 Title; Custody; Risk of Loss

(a) Legal title to and ownership of all Owners' Water shall remain with the Owners at all times during the provision of Water Transportation Services.

(b) For Owners' Water flowing through AWWU's Facilities as part of the Water Transportation Services: control, custody and risk of loss of such Owners' Water shall transfer from the Owners to AWWU at the Injection Point, where such Owners' Water shall comingle with AWWU's Water until reaching the Delivery Point, at which point the custody, control and risk of loss for an amount of water equal to the original amount of Owners' Water released into the AWWU Facilities at the Injection Point shall pass back to the Owners.

ARTICLE 8.
EMERGENCY CURTAILMENT; FORCE MAJEURE

8.1 Outages

(a) Planned Outages. AWWU shall be excused from the performance of the Water Transportation Services in the event of Planned Outages noticed by and compliant with this Section 8.1(a). AWWU and the Owners shall develop a schedule and protocol, pursuant to the procedures set forth in the Operating Procedures, for Planned Outages of the Facility or the AWWU Facilities in order to allow for routine maintenance and inspection activities. Such

schedule for each Planned Outage shall specify the associated Curtailment Limits and Curtailment Duration. Such schedule and protocol shall take into account routine hydropower operations to ensure that Planned Outages only be scheduled at times when there is sufficient water available in Eklutna Lake to allow water releases through the maintenance gate of the diversion dam in the amounts necessary for the Owners to meet their obligations under the Fish and Wildlife Program. In addressing Planned Outages on AWWU Facilities and the AWWU Portion, AWWU shall use commercially reasonable efforts to minimize the length of the Curtailment Duration and the level of Curtailment Limits. For the sake of clarity, planned outages to AWWU Facilities or other AWWU property downriver of the Isolation Valve Structure do not meet the definition of Planned Outage and are addressed in Section 8.1(c)(i) below.

(b) Forced Outages. AWWU shall be excused from the performance of the Water Transportation Services in the event of Forced Outages noticed by and compliant with this Section 8.1(b). AWWU shall (i) use commercially reasonable efforts to notify the Owners of any Forced Outage, and (ii) provide an initial written or email estimate of the expected Curtailment Duration and Curtailment Limit within two (2) hours thereafter. In managing Forced Outages, AWWU shall use commercially reasonable efforts to minimize the duration of resulting Curtailment Duration and the level of Curtailment Limits. For the sake of clarity, forced outages to AWWU Facilities or other AWWU property downriver of the Isolation Valve Structure do not meet the definition of Forced Outage and are addressed in Section 8.1(c)(ii) below. During a Forced Outage, the Owners shall be responsible for complying with their Fish and Wildlife Program obligations through other means (such as releasing water into the river through the maintenance gate of the diversion dam).

(c) Outages to Downstream AWWU Infrastructure.

(i) In the event of any planned outage in the AWWU Facilities or in other AWWU property downstream of the Isolation Valve Structure that, without the closing of the Owners' Isolation Valve, would have an effect on the flow of water through the AWWU Facilities from the Injection Point to the River Release Structure, AWWU must notify the Owners at least thirty (30) days in advance of such planned outage to allow the Owners to adjust the Owners' Isolation Valve in such a way that allows for continued Water Transportation Services during such outage.

(ii) In the event of any forced, unexpected outage in the AWWU Facilities or at the Eklutna Water Treatment Facility downstream of the Isolation Valve Structure that, without the closing of the Owners' Isolation Valve, would have an effect on the flow of water through the AWWU Facilities from the Injection Point to the River Release Structure, AWWU shall notify the Owners as soon as possible to allow for the Owners to adjust the Owners' Isolation Valve to allow for the greatest possible continued flows of water into the Eklutna River through the River Release Structure during the duration of such forced outage.

8.2 Force Majeure. Each Party shall be excused from performance and shall not be considered to be in default with respect to any obligation hereunder, except for the Owners' obligation to reimburse AWWU for costs pursuant to Section 6.3, if and to the extent that such Party's failure of, or delay in, performance is due to a Force Majeure Event; provided, that:

(a) such Party gives the other Party prompt written notice describing the particulars of the Force Majeure Event as soon as is reasonably practicable after becoming aware of the occurrence of the Force Majeure Event;

(b) the suspension of performance is of no greater scope and of no longer duration than is reasonably required by the Force Majeure Event;

(c) no obligations of affected Party that arose before the occurrence of the Force Majeure Event causing the suspension of performance shall be excused as a result of such Force Majeure Event, unless and only to the extent that the performance of such obligations is impaired by the Force Majeure Event;

(d) the Party uses diligent commercially reasonable efforts to overcome or mitigate the effects of the Force Majeure Event; and

(e) when the Party is able to resume performance of its obligations under this Agreement, such Party shall give the other Party written notice to that effect and shall promptly resume performance hereunder.

ARTICLE 9.
ACCESS; ROADS AND BRIDGES

9.1 Site Access. Throughout the Delivery Term, AWWU shall, with respect to the land and access roads within its control, provide the Owners with a non-exclusive license to access the Site (through use of AWWU's access road), AWWU's Portion, and the AWWU Facilities as necessary to enable the Owners to operate and maintain the Owners' Isolation Valve and the Owners' Portion, and as otherwise reasonably necessary to facilitate the Owners' rights and obligations hereunder (the "Access License"), provided, that, AWWU may from time to time limit access to the Site or the AWWU Facilities temporarily only to the extent necessary to address reasonable security or safety issues and to avoid putting AWWU's public water supply at risk of interruption or contamination. To the extent that any additional access permissions from third-party landowners adjacent to the Site may be required for the Owners to exercise their rights or perform their obligations hereunder, obtaining such Approvals shall be the responsibility of the Owners, subject to AWWU's duty to assist and cooperate under Section 4.5, and provided that such assistance and cooperation with respect to such third-party approvals may require that AWWU be the first and primary point of contact with such third party in situations where AWWU has an existing easement or applicable existing relationship with such third party. AWWU shall be reimbursed for any and all of its reasonable and documented costs or expenses of providing such assistance and cooperation with respect to such third-party approvals. To the extent that AWWU adds access or other security or safety limitations to the Site, to AWWU's Portion or to the AWWU Facilities, the Owners and AWWU shall cooperate in ensuring continuous access for the Owners and their contractors to enable operation and maintenance of the Owners' Isolation Valve and the Owners' Portion, subject to the new limitations.

9.2 AWWU Access Road. AWWU shall be responsible, at its own expense, for brushing, clearing, plowing, and maintaining its access road and all bridges thereon to the AWWU Facilities, both upstream and downstream of the Facility. The Owners may use such access road

as part of its Access License granted pursuant to Section 9.1, and may, at their discretion, brush, clear, and plow the access road as needed to facilitate the Owners' access to the Facility, provided that under no circumstances shall the Owners be required to conduct such brushing, clearing or plowing.

9.3 Access Bridges. Pursuant to the Interconnection Agreement, the Owners agreed to install Access Bridges to improve Facility access and account for the additional traffic on the AWWU access road connected with the activities described in the Interconnection Agreement and this Agreement. As set forth in the Interconnection Agreement, upon completion of Access Bridge construction, the full responsibility for (and associated costs of) such bridge maintenance passes to AWWU, provided, that the Owners shall be responsible for any maintenance associated with damage caused by the Owners' gross negligence or intentional misconduct.

ARTICLE 10.
LIMITATIONS ON LIABILITY

10.1 Aggregate Limitation of Liability. Notwithstanding any other provision of this Agreement, the total aggregate liability of the Owners and the total aggregate liability of AWWU arising out of or relating to this Agreement, from any and all causes, whether based on contract, tort (including negligence), strict liability or any other cause of action, shall in no event exceed ten million dollars ($10,000,000.00) for AWWU, and ten million dollars ($10,000,000.00) for the Owners collectively, provided that such limit shall not apply in the case of such Party's (i) gross negligence or willful misconduct, (ii) third-party indemnity obligation, or (iii) breach of any representation or warranty.

10.2 CUMULATIVE REMEDIES. IF NO REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY PROVIDED, OR IF A REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY NON-EXCLUSIVE, THE NON-DEFAULTING PARTY SHALL HAVE THE RIGHT TO EXERCISE ALL RIGHTS AND REMEDIES AVAILABLE TO IT AT LAW OR IN EQUITY; PROVIDED, HOWEVER, THAT THE LIABILITY OF THE DEFAULTING PARTY SHALL BE LIMITED TO DIRECT, ACTUAL DAMAGES ONLY AND ALL OTHER DAMAGES AND REMEDIES ARE WAIVED.

10.3 WAIVER OF CERTAIN DAMAGES. EXCEPT WITH RESPECT TO INDEMNIFICATION OF THIRD-PARTY CLAIMS PURSUANT TO ARTICLE 11, OR AS OTHERWISE EXPRESSLY PROVIDED FOR HEREIN, IN NO EVENT SHALL EITHER PARTY BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY, INDIRECT, BUSINESS INTERRUPTION OR SIMILAR DAMAGES, WHETHER BY STATUTE, IN TORT, BY CONTRACT OR OTHERWISE.

ARTICLE 11.
INDEMNIFICATION

11.1 Indemnity. To the fullest extent permitted by Law, each Party shall indemnify, hold harmless and defend the other Party and its directors, officers, shareholders, partners, agents and employees, and the Affiliates of the same (collectively, the "Indemnified Parties"), from and against any and all claims, loss, damage, expense and liability, including court costs and reasonable

attorneys' fees (collectively, "Liabilities") incurred by the Indemnified Parties in connection with or arising from: (i) the Water Transportation Services and (ii) any claim for physical damage to or physical destruction of any part of the Facility, the AWWU Facilities, or death of or bodily injury to any person, to the extent such Liabilities were caused by the negligence of the Indemnifying Party or its agents or employees or others under such Indemnifying Party's control, except any Liabilities incurred due to the negligence or willful misconduct of an Indemnified Party. For the purpose of the definition of "Indemnified Parties" AWWU shall not be considered to be an "Affiliate" of the MOA.

11.2 Additional Owners Indemnity. To the fullest extent permitted by Law, the Owners shall indemnify, hold harmless, and defend AWWU and its Indemnified Parties from any Liabilities incurred by AWWU and its Indemnified Parties arising from damage to AWWU's water line and other infrastructure, including but not limited to its infrastructure downstream of the Facility (*i.e.* conditions caused by scouring or erosion of the river bed or banks that damage AWWU's water line and/or facilities) as a direct result of the instream water flows conveyed into the Eklutna River as part of the Water Transportation Services. The Owners shall further indemnify, defend and hold AWWU harmless from any Liabilities directly related to fish and wildlife mitigation measures and arising out of normal operation of the AWWU Facilities, the Facility, or any other facilities of AWWU, in a manner consistent with this Agreement, the Interconnection Agreement, the Water Supply Agreement, Prudent Industry Standards, the most current edition of the AWWU Design and Construction Practices Manual, the Municipality of Anchorage Standard Specifications and Anchorage Municipal Code, unless such Liabilities arose out of the negligence, violation of Law, or intentional misconduct by AWWU.

11.3 Defense of Claims. A Party with an indemnification obligation pursuant to this ARTICLE 11 (an "Indemnifying Party") shall have the right to defend the Indemnified Parties pursuant to this ARTICLE 11 by counsel of the Indemnifying Party's selection (including insurance counsel) reasonably satisfactory to the Indemnified Party, unless in the opinion of counsel for the Indemnifying Party a conflict of interest between the Parties may exist with respect to such claim. If the Indemnifying Party does not assume the defense of the Indemnified Party, or if a conflict precludes counsel for the Indemnifying Party from providing the defense, then the Indemnifying Party shall reimburse the Indemnified Party on a monthly basis for the Indemnified Party's defense through separate counsel of the Indemnified Party's choice. Even if the Indemnifying Party assumes the defense of the Indemnified Party with acceptable counsel, the Indemnified Party, at its sole option, may participate in the defense, at its own expense, with counsel of its own choice without relieving the Indemnifying Party of any of its obligations hereunder. The Parties shall give each other prompt written notice of any asserted claims or actions indemnified against hereunder and shall cooperate with each other in the defense of any such claims or actions. Without the prior written consent of the Indemnified Party, which consent shall not be unreasonably withheld, conditioned or delayed, no Indemnifying Party shall settle any such claims or actions in a manner that would require any action or forbearance from action by any Indemnified Party.

ARTICLE 12.
DEFAULT AND REMEDIES; TERMINATION; DISPUTE RESOLUTION

12.1 Event of Default. The following shall constitute events of default on the part of either party (each, an "Event of Default") under this Agreement:

(a) If a Party makes a general assignment for the benefit of its creditors, or if a receiver is appointed on account of the insolvency of such Party, or if such Party files a petition seeking to take advantage of any other Law relating to bankruptcy, insolvency, reorganization, winding up or composition of or readjustment of debts and, in the case of any such proceeding instituted against such Party (but not by such Party) such proceeding is not dismissed within sixty (60) days of such filing;

(b) If a Party fails to comply with any material terms of this Agreement not otherwise set forth as an Event of Default in this Section 12.1(b) and fails to cure or remedy such failure within thirty (30) days after notice and a written demand is made by the non-defaulting Party to the defaulting Party to cure the same or, if such failure cannot be cured within thirty (30) days, the defaulting Party fails to commence to cure such failure within thirty (30) days after such notice and written demand and thereafter diligently pursue such cure to completion, which shall in no event be later than ninety (90) days after such notice;

(c) If a Party defaults under the Water Supply Agreement or the Interconnection Agreement;

(d) If a Party fails to make any payment due hereunder within sixty (60) days after written notice from the non-defaulting Party; or

(e) If any representation or warranty of a Party in this Agreement proves to have been false or misleading in any material respect when made, and such Party has not, within thirty (30) days after written notification thereof from the non-defaulting Party, either fully remedied, or commenced and diligently pursued the remedy, of all adverse impacts on the non-defaulting Party resulting therefrom, all to the reasonable satisfaction of the non-defaulting Party.

12.2 Remedies Upon Event of Default. Upon the occurrence and continuation of an Event of Default, the non-defaulting Party shall have the right to terminate this Agreement and the Water Supply Agreement upon ten (10) days written notice and pursue any other remedy available to such non-defaulting party at law or in equity arising out of such Event of Default, including a claim for monetary damage or specific performance.

12.3 Automatic Cross-Agreement Termination. If this Agreement is terminated for any reason during the Delivery Term, the Interconnection Agreement and the Water Supply Agreement shall automatically terminate effective as of the same date of this Agreement's termination.

12.4 Termination for Failure of Conditions Precedent. If, prior to the Delivery Term, the Owners, in their reasonable discretion, decide to not construct the Facility due to the failure to achieve the Construction Start CPs as defined in the Interconnection Agreement, the Owners may terminate this Agreement without liability.

12.5 Dispute Resolution. In the event of any dispute arising under this Agreement (a "Dispute"), within ten (10) Business Days following notice by either Party, (i) each Party shall appoint a representative, and (ii) the representatives shall meet, negotiate and attempt in good faith to resolve the Dispute quickly, informally and inexpensively. In the event the representatives cannot resolve the Dispute within thirty (30) Days after the first meeting, either Party may request that consideration and resolution of the Dispute be transferred to a designated representative of each Party's senior management. Within ten (10) Days following such a request, each Party shall submit a written summary of the Dispute describing the issues and claims to a senior officer of each Party designated to address the Dispute. Within ten (10) Business Days after receipt of each Party's Dispute summaries, the senior management representatives for both Parties shall negotiate in good faith to resolve the Dispute. If such senior management representatives are unable to resolve the Dispute within thirty (30) Days thereafter, either Party may pursue any available legal remedies.

ARTICLE 13.
REPRESENTATIONS

13.1 General Representations and Warranties. Each Owner and AWWU hereby represents and warrants as of the Effective Date and the Delivery Term Effective Date that:

(a) It is duly organized, validly existing and in good standing under the Laws of the state of its formation and is duly qualified to do business in the jurisdiction where the Site is located.

(b) It has all necessary power and authority to execute, deliver and perform its obligations under this Agreement; its execution, delivery and performance of this Agreement have been duly authorized by all necessary corporate, municipal, or other action on its part; and this Agreement has been duly and validly executed and delivered by it and constitutes its legal, valid and binding obligation enforceable against it in accordance with its terms, except as the enforceability thereof may be limited by bankruptcy, insolvency, reorganization or moratorium or other similar Laws relating to the enforcement of creditors' rights generally and by general equitable principles.

(c) It is not in violation of any applicable Law, or any judgment entered by any federal, state, local or other Governmental Authority, which violations, individually or in the aggregate, would adversely affect its performance of any obligations under this Agreement. There are no legal or arbitration proceedings or any proceeding by or before any Governmental Authority, now pending or (to its best knowledge) threatened against it which, if adversely determined, could have a material adverse effect upon its financial condition, operations, prospects or business, as a whole, or its ability to perform under this Agreement.

(d) No authorization, approval, exemption, or consent of or by any Person is required by it in connection with the execution, delivery, and performance of this Agreement. In addition, each Party represents and warrants to the other Party that the Governmental Approvals required to be obtained by such Party either have been obtained by such Party and are in full force and effect on the date hereof or will be obtained by such Party and will be in full force and effect on or prior to the date on which they are required, under applicable Law, to be in full force and

effect, so as to permit AWWU to perform the Water Transportation Services and the parties to otherwise complete their obligations hereunder.

(e) The execution and delivery of this Agreement, the consummation of the transactions herein contemplated and compliance with the terms and provisions hereof by it will not conflict with or result in a material breach of, or require any consent under, any of its constitutive documents, or any applicable Law, or any agreement or instrument to which it is a party or by which it is bound or to which it is subject, or constitute a material default under any such agreement or instrument.

ARTICLE 14.
NOTICES

14.1 Writing. Except as set forth in Section 14.2, any notice, statement, demand, claim, offer or other written instrument required or permitted to be given pursuant to this Agreement shall be in writing signed by the Party giving such notice and shall be sent by email, facsimile, hand messenger delivery, overnight courier service, or certified mail (receipt requested) to the other Party as follows: (i) prior to the finalization of the Operating Procedures, such notices shall be sent to the addresses set forth in Exhibit E; and (ii) after the finalization of the Operating Procedures, such notices shall be sent to the legal notice addresses listed in such Operating Procedures. Each Party shall have the right to change the address information to which notice shall be sent or delivered or to specify additional addresses to which copies of notices may be sent, in either case by similar notice sent or delivered in like manner to the other Party, which, after the development of the Operating Procedures, shall be reflected in such Operating Procedures. All notices shall be effective upon receipt.

14.2 Technical Communications. Any technical or other communications pertaining to the Facility, the Water Transportation Services, and the Operational Work shall follow the procedures set forth in the Operating Procedures, to be updated from time to time pursuant to Section 5.2.

ARTICLE 15.

CONFIDENTIALITY; PUBLIC STATEMENTS

15.1 Confidentiality. The Parties agree that the Parties' proposals, communications, negotiations and information exchanged prior to the Effective Date concerning this Agreement and the development thereof, and technical and other information regarding or relating to the Facility, the AWWU Facilities, the Access Bridges, and the provision of the Water Transportation Services exchanged between the Parties that is marked, or otherwise clearly communicated to the receiving Party as "Confidential" constitutes "Confidential Information" of the disclosing Party. The Owners and AWWU each agree to hold such Confidential Information wholly confidential. Such Confidential Information may only be used by the Parties for the purposes related to the approval, or administration or enforcement of this Agreement.

15.2 Disclosure. Each Party agrees not to disclose Confidential Information of the other Party to any other Person (other than its Affiliates, counsel, consultants, lenders, partners, members, employees, officers and director, and then only to Persons subject to similar

confidentiality restrictions as those set forth herein), without the prior written consent of the other Party, provided, that, either Party may disclose Confidential Information, if such disclosure is required by Law, including without limitation, pursuant to an order of a court or regulatory agency or in order to enforce this Agreement or to seek approval of this Agreement. In the event a Party is required by Law or a Governmental Authority to disclose Confidential Information, such Party, prior to such disclosure, shall provide reasonable advance notice to the other Party of the time and scope of the intended disclosure in order to permit such disclosing Party the opportunity to obtain a protective order or otherwise seek to prevent or limit the scope or otherwise impose conditions upon such disclosure.

15.3 Injunctive Relief. Each Party agrees that violation of the terms of Sections 15.1 and 15.2 constitutes irreparable harm to the other, and that the harmed Party may seek any and all remedies available to it at law or in equity, including but not limited to injunctive relief.

15.4 Release of Agreement. The Parties agree that this Agreement, upon execution, shall not be considered Confidential Information. Except as required by Law, releasing the Agreement to the public shall be the sole responsibility of the Owners, to be released in the manner at a time decided in their sole discretion.

ARTICLE 16.
MISCELLANEOUS

16.1 Reasonability. The Parties shall act in a reasonable manner and in accordance with principles of good faith and fair dealing in the performance of this Agreement. Unless expressly provided otherwise in this Agreement and whether or not stated: (a) where this Agreement requires the consent, approval, or similar action by a Party, such consent or approval shall not be unreasonably withheld, conditioned, or delayed; and (b) wherever this Agreement gives a Party a right to determine, require, request, specify, or take similar action with respect to a matter, such determination, requirement, request, specification, or similar action must be reasonable.

16.2 Entire Agreement. This Agreement, together with all Schedule and Exhibits hereto, embodies the entire agreement and understanding of the Parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements and understandings of the Parties, verbal or written, relating to the subject matter hereof.

16.3 Waiver. Any waiver of the provisions of this Agreement must be in writing and shall not be implied by any usage of trade, course of dealing or course of performance. No exercise of any right or remedy by AWWU or the Owners constitutes a waiver of any other right or remedy contained or provided by Law. Any delay or failure of a Party to exercise, or any partial exercise of, its rights and remedies under this Agreement shall not operate to limit or otherwise affect such rights or remedies. Any waiver of performance hereunder shall be limited to the specific performance waived and shall not, unless otherwise expressly stated in writing, constitute a continuous waiver or a waiver of future performance.

16.4 Assignment. Neither Party shall assign this Agreement or any of its rights hereunder without the prior written consent of the other Party, which consent shall not be unreasonably withheld, conditioned or delayed. Notwithstanding the foregoing, either Party,

without relieving itself from liability hereunder, and without the need for consent from the other Party provided that any such assignee shall agree to be bound by all terms and conditions hereof, may transfer, pledge or assign this Agreement: (a) to any person or entity succeeding to all or substantially all of the assets of the assigning Party; or (b) to a successor entity in a merger or acquisition transaction. Any assignment made in contravention of this Section 16.4 shall be void and unenforceable.

16.5 Governing Law; Submission to Jurisdiction; Venue; No Jury Trial.

(a) Governing Law. THIS AGREEMENT SHALL BE GOVERNED BY, AND INTERPRETED AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF ALASKA, EXCLUDING ANY CHOICE OF LAW RULES.

(b) Submission to Jurisdiction, Venue. The Parties agree that any suit, action or other legal proceeding by or against any Party (or its Affiliates or designees) with respect to or arising out of this Agreement shall be brought exclusively in the courts of the State of Alaska, in the Municipality of Anchorage, as the Party instituting such suit, action or other legal proceeding may elect, provided that claims related to federal water rights, federal legislation enabling the Facility or AWWU Facilities, or the 1991 Agreement may be brought in the United States District Court for the District of Alaska. By execution and delivery of this Agreement, each Party (for itself, its Affiliates and its designees) irrevocably and unconditionally consents and submits to the exclusive jurisdiction of such courts and the appellate courts therefrom, and waives any right it may have to assert the doctrine of forum non conveniens or similar doctrine or to object to venue with respect to any proceeding. The Parties irrevocably consent to the service of process in any such action or proceeding by the mailing of copies thereof by registered or certified mail, first class postage prepaid to the addresses set forth in Section 14.1.

(c) No Jury Trial. EACH OF THE PARTIES HEREBY WAIVES ANY AND ALL RIGHTS TO DEMAND A TRIAL BY JURY IN ANY ACTION, SUIT, OR PROCEEDING ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY.

(d) Duty to Proceed. Pending final resolution of any Dispute, the Owners and AWWU shall continue to fulfill their respective obligations hereunder that are not the subject of the Dispute.

16.6 Construction. This Agreement is to be construed so as to effectuate the normal and reasonable expectations of a sophisticated buyer and seller of the equipment and services covered by this Agreement and shall not be construed either for or against either Party. No provision of this Agreement shall be construed or interpreted for or against either Party because such Party drafted or caused its legal representative to draft the provision.

16.7 Headings. The titles or headings of the various sections, articles and paragraphs hereof are intended solely for convenience and ease of reference and are not intended, and are not to be deemed for any purpose, to modify or explain or place any interpretation or construction upon any of the provisions of this Agreement.

16.8 Status of the Parties. AWWU and its Subcontractors shall be independent contractors to the Owners with respect to the Water Transportation Services and neither the AWWU nor its Subcontractors, nor the employees or agents of either, shall be deemed to be the employees, representatives or agents of the Owners in connection with any matter relating to this Agreement. No provision of this Agreement shall be construed or represented as creating a partnership, trust, joint venture, fiduciary or any similar relationship between the Parties.

16.9 Status of Individual Owners. Each of the Owners shall be jointly and severally liable for the obligations of the Owners under this Agreement. The delineation of specific responsibilities set forth hereunder as among the Owners shall be at the sole discretion of the Owners, not AWWU. If at any time, the Owners agree that one or two of the Owners need no longer be party to this Agreement, such unnecessary Owner(s) may be removed as parties to this Agreement upon written notice to AWWU, if agreed, and shall retain no liability upon removal, with the remaining Owner(s) automatically assuming the full obligations of the Owners hereunder. If an Event of Default exists hereunder at any time with respect to an Owner, it shall be considered an Event of Default with respect to the Owners together as one Party hereunder, provided, that if another Owner agrees to assume such defaulting Owner's obligations under this Agreement by removing such Owner as a party pursuant to the preceding sentence of this Section 16.9 prior to the expiration of any applicable cure period, this shall not be considered an Event of Default hereunder.

16.10 Insurance. Throughout the Delivery Term, the Owners shall maintain the required insurance policies as set forth on Exhibit D-1 and AWWU shall maintain the required insurance policy as set forth on Exhibit D-2.

16.11 No Third-Party Beneficiaries. This Agreement is made and entered into for the sole protection and legal benefit of the Owners and AWWU, and their permitted successors and assigns, and no other person shall be a direct or indirect legal beneficiary of, or have any direct or indirect cause of action or claim in connection with, this Agreement.

16.12 Further Assurances. Each Party agrees to execute and deliver all further instruments and documents, and take all further action, as may be reasonably necessary to complete performance by the Parties hereunder and to effectuate the purposes and intent of this Agreement.

16.13 Amendments. No change, amendment or modification of this Agreement shall be valid or binding upon the Parties unless such change, amendment or modification shall be in writing and duly executed by the Parties.

16.14 Severability. If any provision of this Agreement is determined to be illegal or unenforceable, such determination will not affect any other provision of this Agreement and all other provisions will remain in full force and effect.

16.15 Conflicting Provisions. In the event of any conflict between this document and any Schedule or Exhibit attached hereto, the terms and provisions of this document, as amended from time to time, shall control. In the event of any conflict among the Exhibits, the Exhibit of the latest date mutually agreed to by the Parties shall control.

16.16 Survival. The provisions of ARTICLE 1, ARTICLE 7, ARTICLE 10, ARTICLE 11, ARTICLE 12, ARTICLE 13, ARTICLE 14, and ARTICLE 16 shall survive termination of this Agreement for any reason.

16.17 Counterparts. This Agreement may be executed in any number of separate counterparts and delivered by electronic means, each of which when so executed shall be deemed an original, and all of said counterparts taken together shall be deemed to constitute but one and the same instrument.

[*Remainder of page intentionally left blank*]

IN WITNESS WHEREOF, the Parties have caused this Long-Term Water Transportation Agreement to be executed by their duly authorized representatives as of the Effective Date.

Schedule 1.1

Definitions

"1991 Agreement" means that certain Agreement between the Municipality of Anchorage, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., the United States Fish and Wildlife Service, the National Marine Fisheries Service, the State of Alaska, and the Alaska Energy Authority Relative to the Eklutna and Snettisham Hydroelectric Projects, dated August 7, 1991.

"Access Bridges" means those bridges installed by the Owners on the Eklutna River pursuant to the terms of the Interconnection Agreement.

"Affiliate" means, with respect to any Person, any other Person controlling, controlled by or under common control with such first Person. For purposes of this definition and the Agreement, the term "control" (and correlative terms) means (1) the ownership of 50% or more of the equity interest in a Person, or (2) the power, whether by contract, equity ownership or otherwise, to direct or cause the direction of the policies or management of a Person.

"Access License" has the meaning set forth in Section 9.1.

"Agreement" has the meaning set forth in the Preamble, and shall include all Exhibits and Schedules hereto.

"Approvals" means Governmental Approvals and third-party approvals.

"AWWU" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of AWWU.

"AWWU Design and Construction Practices Manual" means the edition dated _____, 20__, as updated and amended from time to time.[2]

"Event of Default" has the meaning set forth in Section 12.1.

"AWWU's Isolation Valve" has the meaning set forth in Exhibit A-1.

"AWWU Facilities" has the meaning set forth in the Recitals.

"AWWU's Portion" has the meaning set forth in Exhibit A-1.

"AWWU's Water Permit" means that permit belonging to AWWU (LAS 2569) to use Owners' Water Rights for up to 41 MGD for public water supply pursuant to the Act of October

[2] **Note to Accompany Final Draft**: To be populated after Governor approval and prior to execution to reflect the most up to date version.

30, 1984, 98 Stat. 2823, as may be replaced as described in Section 3.1 of the Water Supply Agreement.

"AWWU's Water" means any and all water belonging to AWWU pursuant to AWWU's Water Permit.

"Business Day" means any day other than a Saturday, Sunday or legal holiday in the state of Alaska.

"Chugach" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of Chugach.

"Confidential Information" has the meaning set forth in Section 14.1.

"Cost Responsibility Proportion" shall mean, with respect to each Owner, the percentage of the total applicable Eklutna Hydroelectric Project costs that such Owner is obligated to pay as agreed to by the Owners, which as of the Effective Date shall be, with respect to MOA, 19.05%, with respect to Chugach, 64.28%, and with respect to MEA, 16.67%, and which may be changed hereunder upon agreement between the Owners at any time.

"Curtailment Duration" means, with respect to a curtailment in Water Transportation Services during an Excused Event, the duration of such curtailment.

"Curtailment Limit" means, with respect to each day of the Delivery Term where there exists an Excused Event, the amount of Owners' Water in MGD that can be transported to the Delivery Point on such day. For the avoidance of doubt, this amount can equal zero (0) MGD.

"Day" or "day" means a calendar day, unless expressly specified otherwise.

"Delivery Point" has the meaning set forth in Exhibit A-1 and is depicted on the schematic included as part of Exhibit B.

"Delivery Point Meter" has the meaning set forth in Exhibit A-1.

"Delivery Term" has the meaning set forth in Section 2.1.

"Delivery Term Effective Date" has the meaning set forth in Section 2.1.

"Dispute" has the meaning set forth in Section 12.5.

"Effective Date" has the meaning set forth in the Preamble.

"Eklutna Hydroelectric Project" means the Eklutna Hydroelectric Project initially authorized, constructed and operated pursuant to the Eklutna Project Act of July 31, 1950 (64 Stat. 382, as amended), including any and all property and facilities acquired or used in connection therewith, all of which was then sold to the Owners by the United States of America on October 2, 1997.

"Eklutna Water Treatment Facility" means the water treatment plant owned by AWWU located alongside the Eklutna River.

"Event of Default" has the meaning set forth in Section 12.1.

"Excused Event" means a Planned Outage, a Forced Outage, or an Force Majeure Event causing a reduction or suspension of the Water Transportation Services.

"Facility" has the meaning set forth in the Recitals.

"Final Acceptance" has the meaning set forth in the Interconnection Agreement.

"Fish and Wildlife Program" has the meaning set forth in the Recitals.

"Force Majeure Event" means the occurrence of any act or event beyond the reasonable control of the Party affected that prevents the affected Party from performing its obligations under this Agreement, in full or part, if such act or event is beyond the reasonable control of, and not the result of the fault or negligence of, the affected Party and such Party has been unable to overcome such act or event with the exercise of due diligence (including the expenditure of reasonable sums), including the following: drought, flood, earthquake, storm, fire, lightning, epidemic, war, riot, civil disturbance, sabotage, terrorism or threat of terrorism, strike or labor difficulty, accident or curtailment of supply or equipment, total casualty to equipment, or restraint, order or decree by a Governmental Authority. Notwithstanding the foregoing, Force Majeure Events shall expressly not include mechanical or equipment failures (except to the extent any such failure is itself caused by a Force Majeure Event), diminution in water quality in Eklutna Lake, Planned Outages, or Forced Outages (unless such Forced Outage is caused by a Force Majeure Event).

"Forced Outage" means; (i) any unplanned necessary reduction or suspension of Water Transportation Services available from the Facility; or (2) any other unavailability of the AWWU Facilities of Facility in whole or in part, each in response to an equipment malfunction or other emergency condition determined by AWWU in its reasonable discretion to be a threat to any AWWU Facilities. For the sake of clarity, forced outages in AWWU infrastructure downstream of the Isolation Valve Structure are not considered a Forced Outage.

"Governmental Approvals" means all authorizations, consents, licenses, leases, rulings, certifications, registrations, exemptions, permits, certificates, and approvals from any Governmental Authority.

"Governmental Authority" means any federal, state or local government, any political subdivision thereof, or any governmental, quasi-governmental, judicial, public or statutory instrumentality, administrative agency, authority, body or other entity having jurisdiction over the performance of the Water Transportation Services, the Operational Work, the Facility or its operations, or the health, safety or environmental conditions of the Site or otherwise over the Parties' rights and obligations under this Agreement.

"Indemnified Parties" has the meaning set forth in Section 11.1.

"Indemnifying Party" has the meaning set forth in Section 10.4.

"Initial Delivery Term" has the meaning set forth in Section 3.1.

"Injection Point" means the point where AWWU Facilities meet facilities owned by the Owners near the outlet of the Eklutna Lake, where AWWU receives all of AWWU's Water from Eklutna Lake, as depicted in the schematic included as part of Exhibit B.

"Interconnection Agreement" has the meaning set forth in the Recitals.

"Injection Point Flow Meter" means a meter measuring the flow of water passing into AWWU Facilities at the Injection Point.

"Isolation Valve Structure" has the meaning set forth in Exhibit A-1.

"Isolation Valves" has the meaning set forth in Exhibit A-1.

"Law" means any constitution, charter, act, statute, law, ordinance, code, rule, regulation, order, specified standards or objective criteria contained in any applicable permit or approval (which standards or criteria must be met in order for the Water Transportation Services or Operational Work to be performed lawfully) or other legislative or administrative action of any Governmental Authority or a final decree, judgment or order of a court or tribunal.

"Liabilities" has the meaning set forth in Section 11.1.

"MEA" has the meaning set forth in the Preamble, and shall include all successor sand assigns of MEA.

"MGD" means millions of gallons per day.

"MOA" has the meaning set forth in the Preamble, and shall include all successor sand assigns of MOA.

"Monthly Water Release Schedule" has the meaning set forth in Section 3.2.

"Operating Procedures" has the meaning set forth in Section 5.1.

"Operational Work" means all phases of AWWU and the Owners' performance of their obligations under this Agreement to operate and maintain the Facility and the AWWU Facilities.

"Owners" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of the Owners.

"Owner" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of such Owner.

"Owners' Isolation Valve" has the meaning set forth in Exhibit A-1.

"Owners' Approvals" has the meaning set forth in Section 4.4.

"Owners' Portion" has the meaning set forth in Exhibit A-1.

"Owners' Water Rights" means that certain senior priority water rights held by the Owners for the water in Eklutna Lake for use in generating power for the Eklutna Hydroelectric Project as described in water rights certificate ADL 44944.

"Owners' Water" means any and all water belonging to the Owners pursuant to the Owners' Water Right.

"Party" and "Parties" has the meaning set forth in the Preamble.

"Person" means any individual, partnership, corporation, limited liability company, association, business, trust, government or political subdivision thereof, Governmental Authority or other entity.

"Planned Outage" means the removal of Facility equipment from service availability for inspection and/or overhaul or repair in such a way that requires a reduction or halt in flow of Owners' Water through the AWWU Facilities to the Delivery Point. For the sake of clarity, planned outages in AWWU infrastructure downstream of the Isolation Valve Structure are not considered a Planned Outage. To qualify as a Planned Outage, the maintenance (a) must actually be conducted during the Planned Outage, and in AWWU's reasonable discretion must be of the type that is necessary to reliably maintain the Facility or the AWWU Facilities, and (b) cannot be reasonably conducted during normal Facility or AWWU Facilities' operations.

"Prudent Industry Standards" means those standards of care and diligence normally practiced by water transportation infrastructure operation and maintenance firms in performing services of a similar nature in a similar jurisdiction in which the Water Transportation Services and Operational Work will be performed. Prudent Industry Standards are not intended to be limited to optimum practice or methods, but rather to be a spectrum of reasonable and prudent practices and methods that must take the conditions specific to any water transportation facility under consideration.

"River Release Structure" has the meaning set forth in Exhibit A-1.

"Site" means the location of the Facility as further described and depicted in Exhibit B.

"Subcontractor" means any Person with whom the Owners, or any Owner, enters into an arrangement for the performance of any portion of the Water Transportation Services or Operational Work, including Persons at any tier with whom any Subcontractor has further subcontracted any portion of the Water Transportation Services or Operational Work, and the legal or personal representatives, successors, and assigns of such Person.

"Term" has the meaning set forth in Section 2.1(a).

"Water Release Limits" has the meaning set forth in Section 3.1.

"Water Supply Agreement" has the meaning set forth in the Recitals.

"Water Transportation Services" has the meaning set forth in Section 3.1.

Exhibit A

Eklutna River Release Facility Description and Definitions[3]

The ***"Eklutna River Release Facility"*** shall consist of an Isolation Valve Structure and the River Release Structure.

The "***Isolation Valve Structure***" shall include:

- a new tee to be built in the AWWU pipeline downstream of the AWWU tunnel/pipeline transition and upstream of the AWWU portal valve (the "***Delivery Point***")
- A 54-inch gate valve on the main segment of AWWU pipeline intended to provide dual means of isolation for AWWU's pipeline segment ("***AWWU's Isolation Valve***")
- A 42-inch gate valve on the branch segment of AWWU pipeline intended to provide isolation to the river release structure ("***Owners' Isolation Valve***", together with AWWU's Isolation Valve, the "***Isolation Valves***").
- Related controls and communication technology to be installed by the Owners in the main line of the AWWU Facilities.

The "***River Release Structure***" shall include:

- [A new pipeline from the Isolation Valve Structure to the Eklutna River]
- Control valves
- A new meter installed at the Delivery Point ("***Delivery Point Meter***")
- Monitoring and control equipment to be installed by Owners [*describe where*].

"***AWWU's Portion***" of the Facility shall consist of the Isolation Valve Structure [and _____]

The "***Owners' Portion***" of the Facility shall consist of the River Release Structure [and _____]

PUBLIC WATER SUPPLY AGREEMENT

This PUBLIC WATER SUPPLY AGREEMENT (this "Agreement"), dated as of [_____] (the "Effective Date"), is entered into by and between Anchorage Water and Wastewater Utility ("AWWU"), and Chugach Electric Association, Inc. ("Chugach"), Matanuska Electric Association, Inc. ("MEA"), and the Municipality of Anchorage ("MOA") (each of Chugach, MEA, and MOA is an "Owner" and collectively they are referred to as the "Owners"). The Owners and AWWU are sometimes referred to herein as a "Party" or collectively as the "Parties".

RECITALS

WHEREAS, the federal Alaska Power Administration ("APA") originally developed, owned and operated the Eklutna Hydroelectric Project, which began operations in 1954 for the production of electric power that APA sold to electric utilities serving the Anchorage and Matanuska Valley areas;

WHEREAS, as then-owner of the Eklutna Hydroelectric Project assets, the APA possessed senior water rights (both federal reserved water rights and water rights granted under State of Alaska law), with a priority date of 1954, to all the water that may be feasibly appropriated from Eklutna Lake for use in generating electric power for the Eklutna Hydroelectric Project as reflected in water rights certificate ADL 44944 ("Project Water Rights");

WHEREAS, in the 1980s, AWWU:

(i) determined that Eklutna Lake was a necessary source of water for the City of Anchorage;

(ii) entered into that certain "Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska" with APA, dated February 17, 1984, as amended (the "1984 Agreement"), which among other things provides terms and conditions relating to (i) AWWU facility interconnection to Eklutna Hydroelectric Project; and (ii) the compensation by AWWU to the Owners for AWWU's diversion of water for public water supply that reduces the Project Water Rights otherwise available for use to generate energy at the Eklutna Hydroelectric Project;

(iii) obtained: (1) "preferred use status" from the Alaska Department of Natural Resources ("DNR") through an application that demonstrated the need for AWWU to take prior-appropriated water for public water supply purposes and which is conditioned upon the validity and existence of the 1984 Agreement (the "Preferred Use Status") pursuant to Alaska Statute 46.15.150(b); (2) a permit (LAS 2569) to use Project Water Rights for up to 41 million gallons per day for public water supply pursuant to the Act of October 30, 1984, 98 Stat. 2823, (the "AWWU Water Permit"); and

(iv) constructed and began operations of the water project diverting water from the Eklutna Hydroelectric Project intake tunnel to AWWU's water system (the "AWWU Water Project");

WHEREAS, the 1984 Agreement remains in effect "until the year 2025" and the AWWU Water Permit expires on December 31, 2025;

WHEREAS, in October 1997, the Owners purchased from APA the Eklutna Hydroelectric Project and all related project assets, including Project Water Rights and became parties to the 1984 Agreement through assignment (the "Owners' Facilities");

WHEREAS, pursuant to the 1991 Agreement (as defined below), the Owners have studied and developed a Fish and Wildlife program to protect, mitigate damages to, and enhance fish and wildlife impacted by the development of the Eklutna Hydroelectric Project centered on establishing instream flows in the Eklutna River as part of the implementation of the Fish and Wildlife Program (the "Fish and Wildlife Program");

WHEREAS, in order to establish such instream flows, the Owners and AWWU have negotiated two agreements: (1) a Water Facilities Interconnection Agreement (the "Interconnection Agreement"), which shall govern the construction and interconnection of the Parties' respective facilities for conveyance of water from the Eklutna Lake to the Eklutna River using AWWU facilities; and (2) a Long-Term Water Transportation Services Agreement (the "Transportation Agreement"), which shall govern the provision of conveyance services for transporting water from the Eklutna Lake to the Eklutna River;

WHEREAS, in coordination and joint consideration with the Interconnection Agreement and the Transportation Agreement, the Parties desire to enter into this Agreement in order to replace the 1984 Agreement and set forth new terms and conditions relating to (i) the compensation from AWWU to the Owners for AWWU's use of the Project Water Rights in accordance with Alaska Statute 46.15.150 and; (ii) the extension of other future rights to AWWU; and

NOW, THEREFORE, in consideration of the premises of this Agreement, the Transportation Agreement, and the Interconnection Agreement, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Owners and AWWU, intending to be legally bound, hereby agree as follows:

ARTICLE I
DEFINITIONS; INTERPRETATION

Section 1.1 Defined Terms. Capitalized terms used in this Agreement without other definition shall have the meanings set forth in Schedule 1.1, unless the context requires otherwise.

Section 1.2 Interpretation. As used in this Agreement, the terms "herein," "herewith" and "hereof" are references to this Agreement, taken as a whole; the terms "includes" or "including" shall mean "including, without limitation"; and references to a "Section," "Article", "Exhibit" or "Schedule" shall mean a Section, Article, Exhibit or Schedule of this Agreement, as the case may be, unless in any such case the context requires otherwise. All references to a given Exhibit, Schedule, agreement, instrument or other document shall be a reference to that agreement, instrument or other document as modified, amended, supplemented and restated through the date as of which such reference is made. A reference to a Person includes its permitted successors and permitted assigns. The singular shall include the plural and the masculine shall include the feminine and neuter, and vice versa.

ARTICLE II
EFFECTIVE DATE; TERM

Section 2.1 Effective Date. This Agreement shall become binding on the Parties on the Effective Date, subject to Section 2.2.

Section 2.2 Conditions Precedent. The rights and obligations of the Parties as set forth in Articles III – VI in this Agreement shall not be effective until the achievement of the following conditions precedent (the "Conditions Precedent"), a written notice of which shall be sent to AWWU by Owners:

(a) The Owners receive final approval from the Governor of Alaska, with such approval for a Fish and Wildlife Program that requires the use of the AWWU Facilities for instream flows as contemplated in this Agreement, provided that such approval includes no unexpected conditions materially adverse to the Owners or to AWWU, as determined in good faith by the Parties and in the exercise of commercially reasonable business judgment, and neither the approval from the Governor of Alaska nor the Fish and Wildlife Program is subject to any pending judicial review or appeal;

(b) Owners and AWWU obtain and provide evidence of lawful water rights from DNR for the use and transport of water as contemplated under the Agreement, including but not limited to a renewal, extension, or replacement of the AWWU Water Permit, Preferred Use Status, and all other approval(s) authorizing continued use of the Owners' Water Rights by AWWU;

(c) Chugach obtains final Regulatory Commission of Alaska ("RCA") approval of its applicable tariff rates necessary to implement the compensation outlined in Section 3.2 below pursuant to, and in a manner consistent with, Section 6.23 of the MOA-Chugach APSA as such terms are defined therein; and

(d) The Interconnection Agreement and the Transportation Agreement are in full force and effect and are valid, binding and enforceable against AWWU and the Owners in accordance with their terms.

Section 2.3 Failure to Achieve Conditions Precedent. In the event that this Agreement does not become fully effective (i) due to the failure to achieve the Conditions Precedent as set forth in Section 2.2 by [June 1, 2025], or (ii) because the Governor of Alaska approves a Fish and Wildlife Program that does not require the use of the AWWU Facilities for instream flows as contemplated in this Agreement, then: (A) this Agreement will be terminated upon thirty (30) days' written notice by either Party (B) the automatic cross-agreement termination provisions of Section 10.3 shall apply; and (C) the Parties shall meet promptly to negotiate in good faith an alternate agreement to replace the 1984 Agreement that expires in 2025 with terms and conditions that include but are not limited to adequate compensation, risk mitigation, potential transfer or purchase of water rights, and other terms and conditions then deemed appropriate by the Parties without prejudice due to the prior existence, or the subsequent termination, of this Agreement.

Section 2.4 Term. Unless agreed to otherwise by the Parties, this Agreement will continue in full force and effect starting on the Effective Date and terminating on October 30, 2060, subject to any early termination provision set forth herein (the "Term").

Section 2.5 Effect on 1984 Agreement. The Parties intend that, upon thirty (30) days' written notice by the Owners of the achievement of the Conditions Precedent as set forth in Section 2.2, this Agreement shall become fully effective and replace the 1984 Agreement in its entirety, and the 1984 Agreement will be terminated.

ARTICLE III
WATER USE AND COMPENSATION

Section 3.1 Water Use. The Owners shall make available and allow AWWU to continue to interconnect the AWWU Water Project to the Eklutna Hydroelectric Project, use the project's intake, tunnel, and other Owners' Facilities necessary to divert and use a portion of Project Water Rights up to 41 million gallons per day for public water supply purposes in a manner consistent with AWWU's Preferred Use Status, the AWWU Water Permit, and Alaska Statute 46.15.150(b). The Parties understand that after the Effective Date, AWWU may initiate a process to replace all or part of the AWWU Water Permit with a certificated water right under Alaska Statute 46.15. The Owners consent to such conversion provided that AWWU's certificated water right does not exceed 41 million gallons per day for public water supply purposes, such certification is subject to all requirements of Alaska Statute 46.15.150 and any and all regulations implementing AWWU's Preferred Use Status, and AWWU remains committed to compensate Owners for such water as set forth in Section 3.2 below.

Section 3.2 Compensation.

(a) Compensation. Subject to the limitation in subsection (b) below, AWWU and the MOA shall compensate the Owners for all reductions in electrical energy generation at the Eklutna Hydroelectric Project, costs, and losses that result from water diversions for the AWWU Water Project as set forth in Exhibit A (collectively, the "Replacement Energy"). The compensation paid by AWWU for the Replacement Energy shall be both in kind through electrical energy recovered by AWWU at the Eklutna Water Treatment Facility ("EWTF") in excess of AWWU's own needs at the EWTF ("Recovered Electrical Energy"), and in cash payments (the cash portion shall be referred to as the "Replacement Energy Payment(s)"). The Recovered Electrical Energy shall act as an offset to the Replacement Energy Payment obligations. All costs associated with such deliveries of Recovered Electrical Energy, including metering, will be borne by AWWU.

(b) Compensation Limitations and Procedures. The compensation owed to the Owners by AWWU, calculated and accounted for as set forth in Exhibit A and Section 3.2(a), shall be subject to the following limitations: (a) in no event shall the Replacement Energy Payment owed and payable to Chugach by AWWU exceed six hundred thousand dollars ($600,000) per year in value in aggregate, as such amount will be adjusted annually for inflation reflected in the Bureau of Labor Statistics' Consumer Price Index; (b) in no event shall any such compensation be required in the event that the Owners permanently cease operations of the Eklutna Hydroelectric Project; and (c) in no event shall any such compensation be required in the event of a transfer of a priority water right from the Owners to AWWU as contemplated in Article VI. For the purposes of clarity, the words "total compensation owed and payable to Chugach by AWWU," in the preceding sentence applies to the Replacement Energy Payment and specifically includes the independent in-kind compensation through the Recovered Electrical Energy. The Recovered Electrical Energy shall not include any power generated by AWWU at any location other than the EWTF, which

power generated at other locations may be sold by AWWU as co-generated power. Notwithstanding the foregoing limitation on compensation to be paid by AWWU, nothing in this Agreement is intended to change the MOA's obligations set forth in any of: (i) the MOA-Chugach Eklutna PPA; (ii) Section 6.23 of the MOA-Chugach APSA; and (iii) the MOA-MEA Eklutna PPA. In any month of the Term, to the extent that AWWU does not fully compensate Chugach for the total amount of Replacement Energy in such month due to application of the AWWU compensation cap set forth above, such matters will be resolved among the Owners and the MOA will make Chugach whole as outlined in Exhibit A.

(c) Costs. Other than the compensation for water diversions set forth in Sections **Error! Reference source not found.** and (b) above, all costs borne initially by each Party in connection with the exercising of its respective rights and the performance of its respective obligations under this Agreement shall be the responsibility of such Party initially incurring such costs. In partial consideration of the costs to Owners incurred in maintaining its facilities necessary for AWWU to continue to interconnect to Eklutna Hydroelectric Project, and to divert and use a portion of Project Water Rights under this Agreement for the benefit of the AWWU, the Parties entered into the Transportation Agreement for the same duration as this Agreement, pursuant to which AWWU will provide conveyance services for transporting water from the Eklutna Lake to the Eklutna River at no cost to Owners.

ARTICLE IV
OWNERS' RESPONSIBILITIES

Section 4.1 Reservoir Operations. Subject to the terms herein, Owners shall retain full authority and responsibility to operate the Eklutna Hydroelectric Project and manage and allocate water in Eklutna Lake in accordance with ADL 44944 and the requirements of the Eklutna Hydroelectric Project.

Section 4.2 Assurance of Water Project Allocation, Quality, and Access. Subject to the terms herein, Owners will operate the Eklutna Lake reservoir in such a manner that the projected allocations of water to the AWWU Water Project are available to MOA upon request at a flow rate of at least 41 MGD to the EWTF at a pressure sufficient to allow normal operation of the EWTF as currently configured. The Owners will take no action regarding Eklutna Lake that has the effect of reducing the quality or increasing the turbidity of the lake water from those conditions which exist as of the Effective Date; nor will the Owners take or authorize any other action with regard to Eklutna Lake that may have the effect of reducing its present suitability for use as a source of public water supply. This Section 4.2 is not intended to preclude or inhibit maintenance and repair activities determined to be necessary by the Owners, nor does it apply to the management of the lake surface and surrounding areas for public recreation, which is outside the scope of this Agreement. For the avoidance of doubt, the Owners shall ensure continued use and access to AWWU of the Owners' Facilities that are necessary to supply water to the AWWU Facilities to the extent that Owners' Facilities continue in commercial operation.

ARTICLE V
AWWU RESPONSIBILITIES

Section 5.1 Compensation. AWWU shall compensate the Owners as set forth in Section 3.2(a) subject to the limitation in Section 3.2(b). To the extent that the total compensation owed to the Owners by AWWU under Section 3.2 is not satisfied by the netting against the MOA's ownership share of the water used in the Eklutna Hydroelectric Project, AWWU will pay the Owners directly within thirty (30) days of receipt of invoice.

Section 5.2 Maintenance, Repair, and Material Modifications to AWWU Water Project.

(a) AWWU Water Project. To the extent AWWU must perform maintenance, repairs, or make any material modification to the AWWU Water Project that adversely affects the Eklutna Hydroelectric Project, prior to the commencement of such action, AWWU shall furnish to the Owners copies of all plans, specifications, and schedules regarding such work. AWWU shall coordinate with the Owners all such activities in order to avoid or minimize disruption of the Owner's activities at the Eklutna Hydroelectric Project, to the maximum extent possible. AWWU will take commercially reasonable steps to minimize any of its actions set forth in this subsection that may adversely affect energy generation from the Eklutna Hydroelectric Project. AWWU shall reimburse the Owners, by payment of lost revenues to the Owners or by Replacement Energy, as may be mutually agreed by the Parties, for any such losses incurred by the Owners that are attributable to such maintenance or material modifications of the AWWU Water Project that impacts the Eklutna Hydroelectric Project, such as maintenance or material modifications to the project's intake tunnel connected to Eklutna Lake.

(b) AWWU Water Project Interconnection. Notwithstanding Section 5.2, AWWU shall obtain specific plan approval from the Owners before initiating any material modification on any existing facilities for the delivery of water from the Eklutna Hydroelectric Project to the AWWU Water Project, including any facilities that are interconnected to the present Owners' water intake tunnel. AWWU will take commercially reasonable steps to minimize any of its actions set forth in this subsection that may adversely affect energy generation from the Eklutna Hydroelectric Project.

ARTICLE VI
RIGHTS UPON CEASING OPERATIONS OR TERMINATION

Section 6.1 Right of First Offer. If the Owners elect to permanently cease operations of the Eklutna Hydroelectric Project, the Owners shall provide written notice to AWWU of such intention. For a period of six (6) months after such notice, neither Owners nor their successors and assigns, nor their respective Affiliates, shall enter into an obligation or agreement to sell or transfer the Eklutna Hydroelectric Project, unless the (i) Owners first offer, in writing, to sell to AWWU that portion of Owners' Facilities that are necessary to supply water from Eklutna Lake to the AWWU Facilities; and (ii) AWWU declines to purchase such portion of Owners' Facilities within thirty days after notification of the offer to sell. If, within thirty days after notification of the offer to sell, AWWU indicates a good faith intention to purchase such portion subject to a need for ongoing review, then this shall trigger an additional 90-day period during which the Parties shall meet and negotiate in good faith terms and conditions then deemed appropriate and the

Owners shall in good faith provide necessary documentation to facilitate such review. If at the end of such 90-day period, AWWU has not yet purchased such portion, then the Owners shall be permitted to pursue other options for the transfer of the Eklutna Hydroelectric Project.

Section 6.2 Option to Acquire Owners' Water Rights and Termination. Upon the earlier of October 31, 2055, or the MOA's sale of its interests in the Eklutna Hydroelectric Project, AWWU may exercise an option to acquire sole ownership of a portion of the Owners' first-priority water rights that is then operative and reflected in the AWWU Water Permit and any subsequent certificate, which shall in no event exceed 41 million gallons per day, by quitclaim deed or other then-acceptable means of transfer, in exchange for relinquishing its AWWU Water Permit and Preferred Use Status (and associated legal rights) as no longer being legally functional or operative; provided, however, that AWWU shall (a) issue a written notice to the Owners of its intention to exercise such option no later than October 30, 2050; (b) prepare all legal documents necessary to transfer such water rights from the Owners to AWWU (subject to Owners' review and approval prior to execution); and (c) obtain all required Governmental Approvals to effectuate such acquisition at AWWU's sole cost and expense (the "AWWU Option"). Upon closing of the AWWU Option, this Agreement and the Parties' obligations hereunder shall terminate except for the right of first offer in Section 6.1 above, which shall survive and continue while Owners continue operations of the Eklutna Hydroelectric Project.

ARTICLE VII
TITLE; LOSS OR DAMAGE; FORCE MAJEURE

Section 7.1 Title.

(a) Legal title to and ownership of the Owners' Facilities, including Owners' Water Rights, shall remain with Owners throughout the Term of this Agreement, free and clear of any and all liens, claims, security interests or other encumbrances imposed by AWWU.

(b) Legal title to and ownership of the AWWU Facilities, including the AWWU Water Permit, and any resulting certificate of appropriation, shall remain with AWWU throughout the Term of this Agreement.

Section 7.2 Force Majeure. Each Party shall be excused from performance and shall not be considered to be in default with respect to any obligation hereunder, if and to the extent that such Party's failure of, or delay in, performance is due to a Force Majeure Event; provided, that:

(a) such Party gives the other Party prompt written notice describing the particulars of the Force Majeure Event as soon as is reasonably practicable after becoming aware of the occurrence of the Force Majeure Event;

(b) the suspension of performance is of no greater scope and of no longer duration than is reasonably required by the Force Majeure Event;

(c) no obligations of the affected Party that arose before the occurrence of the Force Majeure Event causing the suspension of performance shall be excused as a result of such Force Majeure Event, unless and only to the extent that the performance of such obligations is impaired by the Force Majeure Event;

(d) the Party uses diligent commercially reasonable efforts to overcome or mitigate the effects of the Force Majeure Event; and

(e) when the Party is able to resume performance of its obligations under this Agreement, such Party shall give the other Party written notice to that effect and shall promptly resume performance hereunder.

ARTICLE VIII
LIMITATIONS ON LIABILITY

Section 8.1 Aggregate Limitation of Liability. Notwithstanding any other provision of this Agreement, the total aggregate liability of the Owners and the total aggregate liability of AWWU arising out of or relating to this Agreement, from any and all causes, whether based on contract, tort (including negligence), strict liability or any other cause of action, shall in no event exceed ten million dollars ($10,000,000) for AWWU, or ten million dollar ($10,000,000) for the Owners collectively, provided that such limits shall not apply in the case of such Party's (i) gross negligence or willful misconduct, (ii) third-party indemnity obligation, or (iii) breach of any representation or warranty.

Section 8.2 CUMULATIVE REMEDIES. IF NO REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY PROVIDED, OR IF A REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY NON-EXCLUSIVE, THE NON-DEFAULTING PARTY SHALL HAVE THE RIGHT TO EXERCISE ALL RIGHTS AND REMEDIES AVAILABLE TO IT AT LAW OR IN EQUITY; PROVIDED, HOWEVER, THAT THE LIABILITY OF THE DEFAULTING PARTY SHALL BE LIMITED TO DIRECT, ACTUAL DAMAGES ONLY AND ALL OTHER DAMAGES AND REMEDIES ARE WAIVED.

Section 8.3 WAIVER OF CERTAIN DAMAGES. EXCEPT WITH RESPECT TO INDEMNIFICATION OF THIRD PARTY CLAIMS PURSUANT TO ARTICLE XI, OR AS OTHERWISE EXPRESSLY PROVIDED FOR HEREIN, IN NO EVENT SHALL EITHER PARTY BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY, INDIRECT, BUSINESS INTERRUPTION OR SIMILAR DAMAGES, WHETHER BY STATUTE, IN TORT, BY CONTRACT OR OTHERWISE.

ARTICLE IX
INDEMNIFICATION

Section 9.1 Indemnity. To the fullest extent permitted by Law, each Party shall indemnify, hold harmless and defend the other Party and its directors, officers, shareholders, partners, agents and employees, and the Affiliates of the same (collectively, the "Indemnified Parties"), from and against any and all loss, damage, expense and liability, including court costs and reasonable attorneys' fees (collectively, "Liabilities") arising incurred by the Indemnified Parties in connection with or arising from any claim for physical damage to or physical destruction to any property of any third party, or death of or bodily injury to any person, to the extent caused by the negligence of the Indemnifying Party or its agents or employees or others under such Indemnifying Party's control, except any Liabilities incurred due to the negligence or willful

misconduct of an Indemnified Party. For the purpose of the definition of "Indemnified Parties" AWWU shall not be considered to be an "Affiliate" of the MOA.

Section 9.2 Defense of Claims. A Party with an indemnification obligation pursuant to this Article IX (an "Indemnifying Party") shall have the right to defend the Indemnified Parties pursuant to this Article IX by counsel of the Indemnifying Party's selection (including insurance counsel) reasonably satisfactory to the Indemnified Party, unless in the opinion of counsel for the Indemnifying Party a conflict of interest between the Parties may exist with respect to such claim. If the Indemnifying Party does not assume the defense of the Indemnified Party, or if a conflict precludes counsel for the Indemnifying Party from providing the defense, then the Indemnifying Party shall reimburse the Indemnified Party on a monthly basis for the Indemnified Party's defense through separate counsel of the Indemnified Party's choice. Even if the Indemnifying Party assumes the defense of the Indemnified Party with acceptable counsel, the Indemnified Party, at its sole option, may participate in the defense, at its own expense, with counsel of its own choice without relieving the Indemnifying Party of any of its obligations hereunder. The Parties shall give each other prompt written notice of any asserted claims or actions indemnified against hereunder and shall cooperate with each other in the defense of any such claims or actions. Without the prior written consent of the Indemnified Party, which consent shall not be unreasonably withheld, conditioned or delayed, no Indemnifying Party shall settle any such claims or actions in a manner that would require any action or forbearance from action by any Indemnified Party.

ARTICLE X
DEFAULT AND REMEDIES; TERMINATION; DISPUTE RESOLUTION

Section 10.1 Event of Default. The following shall constitute events of default on the part of either party (each, an "Event of Default") under this Agreement:

(a) If a Party makes a general assignment for the benefit of its creditors, or if a receiver is appointed on account of the insolvency of such Party, or if such Party files a petition seeking to take advantage of any other Law relating to bankruptcy, insolvency, reorganization, winding up or composition of or readjustment of debts and, in the case of any such proceeding instituted against such Party (but not by such Party), such proceeding is not dismissed within sixty (60) days of such filing;

(b) If a Party fails to comply with any material terms of this Agreement not otherwise set forth as an Event of Default in this Section 10.1(b) and fails to cure or remedy such failure within thirty (30) days after notice and a written demand is made by the non-defaulting Party to the defaulting Party to cure the same or, if such failure cannot be cured within thirty (30) days, the defaulting Party fails to commence to cure such failure within thirty (30) days after such notice and written demand and thereafter diligently pursue such cure to completion, which shall in no event be later than ninety (90) days after such notice;

(c) If a Party defaults under the Interconnection Agreement or the Transportation Agreement;

(d) If a Party fails to make any payment due hereunder within sixty (60) days after receipt of written notice from the non-defaulting Party; or

(e) If any representation or warranty of a Party in this Agreement proves to have been false or misleading in any material respect when made, and such Party has not, within thirty (30) days after written notification thereof from the non-defaulting Party, either fully remedied, or commenced and diligently pursued the remedy, of all adverse impacts on the non-defaulting Party resulting therefrom, all to the reasonable satisfaction of the non-defaulting Party.

Section 10.2 Remedies Upon Event of Default. Upon the occurrence and continuation of an Event of Default, the non-defaulting Party shall have the right to terminate this Agreement and the Interconnection Agreement and the Transportation Agreement; upon ten (10) days written notice and pursue any other remedy available to such non-defaulting party at law or in equity arising out of such Event of Default, including a claim for monetary damage or specific performance.

Section 10.3 Automatic Cross-Agreement Termination. If this Agreement is terminated for any reason during the Term, the Interconnection Agreement and the Transportation Agreement shall automatically terminate, effective as of the same date as this Agreement's termination date.

Section 10.4 Dispute Resolution. In the event of any dispute arising under this Agreement (a "Dispute"), within ten (10) Business Days following notice by either Party, (i) each Party shall appoint a representative, and (ii) the representatives shall meet, negotiate and attempt in good faith to resolve the Dispute quickly, informally and inexpensively. In the event the representatives cannot resolve the Dispute within thirty (30) Days after the first meeting, either Party may request that consideration and resolution of the Dispute be transferred to a designated representative of each Party's senior management. Within ten (10) Days following such a request, each Party shall submit a written summary of the Dispute describing the issues and claims to a senior officer of each Party designated to address the Dispute. Within ten (10) Business Days after receipt of each Party's Dispute summaries, the senior management representatives for both Parties shall negotiate in good faith to resolve the Dispute. If such senior management representatives are unable to resolve the Dispute within thirty (30) Days thereafter, either Party may pursue any available legal remedies.

ARTICLE XI
REPRESENTATIONS

Section 11.1 General Representations and Warranties. Each Owner and AWWU hereby represents and warrants that:

(a) It is duly organized, validly existing and in good standing under the Laws of the state of its formation and is duly qualified to do business in the State of Alaska.

(b) It has all necessary power and authority to execute, deliver and perform its obligations under this Agreement; its execution, delivery and performance of this Agreement have been duly authorized by all necessary corporate, municipal, or other action on its part; and this Agreement has been duly and validly executed and delivered by it and constitutes its legal, valid and binding obligation enforceable against it in accordance with its terms, except as the

enforceability thereof may be limited by bankruptcy, insolvency, reorganization or moratorium or other similar Laws relating to the enforcement of creditors' rights generally and by general equitable principles.

(c) It is not in violation of any applicable Law, or any judgment entered by any federal, state, local or other Governmental Authority, which violations, individually or in the aggregate, would adversely affect its performance of any obligations under this Agreement. There are no legal or arbitration proceedings or any proceeding by or before any Governmental Authority, now pending or (to its best knowledge) threatened against it which, if adversely determined, could have a material adverse effect upon its financial condition, operations, prospects or business as a whole, or upon its ability to perform under this Agreement.

(d) No authorization, approval, exemption, or consent of or by any Person is required by it in connection with the execution, delivery, and performance of this Agreement. In addition, each Party represents and warrants to the other Party that the Governmental Approvals required to be obtained by such Party either have been obtained by such Party and are in full force and effect on the date hereof, or will be obtained by such Party and will be in full force and effect on or prior to the date on which they are required, under applicable Law, to be in full force and effect.

(e) The execution and delivery of this Agreement, the consummation of the transactions herein contemplated and compliance with the terms and provisions hereof by it will not conflict with or result in a material breach of, or require any consent under, any of its constitutive documents or any applicable Law, or under any agreement or instrument to which it is a party or by which it is bound or to which it is subject, or will constitute a material default under any such agreement or instrument.

ARTICLE XII
NOTICES

Section 12.1 Writing. Except as set forth in Section 14.2, any notice, statement, demand, claim, offer or other written instrument required or permitted to be given pursuant to this Agreement shall be in writing and signed by the Party giving such notice, and shall be sent by email, facsimile, hand messenger delivery, overnight courier service, or certified mail (receipt requested) to the other Party, and shall be sent to the addresses set forth in Exhibit B. Each Party shall have the right to change the address information to which notice shall be sent or delivered or to specify additional addresses to which copies of notices may be sent. All notices shall be effective upon receipt.

ARTICLE XIII
CONFIDENTIALITY

Section 13.1 Confidentiality. The Parties agree that the Parties' proposals, communications, negotiations and information exchanged prior to the Effective Date concerning this Agreement and the development thereof, and technical and other information regarding or relating to the subject of this Agreement exchanged between the Parties that is marked, or otherwise clearly communicated to the receiving Party as "Confidential," constitutes "Confidential

Information" of the disclosing Party. The Owners and AWWU each agree to hold such Confidential Information wholly confidential. Such Confidential Information may only be used by the Parties for the purposes related to the approval, administration or enforcement of this Agreement.

Section 13.2 Disclosure. Each Party agrees not to disclose Confidential Information of the other Party to any other Person (other than its Affiliates, counsel, consultants, lenders, partners, members, employees, officers and directors, and then only to Persons subject to similar confidentiality restrictions as those set forth herein), without the prior written consent of the other Party, provided, that either Party may disclose Confidential Information if such disclosure is required by Law, including without limitation, pursuant to an order of a court or regulatory agency to enforce this Agreement or to seek approval of this Agreement. In the event a Party is required by Law or a Governmental Authority to disclose Confidential Information, such Party, prior to such disclosure, shall provide reasonable advance notice to the other Party of the time and scope of the intended disclosure in order to permit such other Party the opportunity to obtain a protective order, or to otherwise seek to prevent or limit the scope or otherwise impose conditions upon such disclosure.

Section 13.3 Injunctive Relief. Each Party agrees that a violation of the terms of Sections 13.1 and 13.2 constitutes irreparable harm to the other Party, and that the harmed Party may seek any and all remedies available to it at law or in equity, including but not limited to injunctive relief.

Section 13.4 Release of Agreement. The Parties agree that this Agreement, upon execution, shall not be considered Confidential Information. Except as required by Law, releasing the Agreement to the public shall be the sole responsibility of the Owners, to be released in the manner at a time decided in their sole discretion.

ARTICLE XIV
MISCELLANEOUS

Section 14.1 Reasonability. The Parties shall act in a reasonable manner and in accordance with principles of good faith and fair dealing in the performance of this Agreement. Unless expressly provided otherwise in this Agreement and whether or not stated: (a) where this Agreement requires the consent, approval, or similar action by a Party, such consent or approval shall not be unreasonably withheld, conditioned, or delayed; and (b) wherever this Agreement gives a Party a right to determine, require, request, specify, or take similar action with respect to a matter, such determination, requirement, request, specification, or similar action must be reasonable.

Section 14.2 Entire Agreement. This Agreement, together with all Schedules and Exhibits hereto, embodies the entire agreement and understanding of the Parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements and understandings of the Parties, verbal or written, relating to the subject matter hereof.

Section 14.3 Waiver. Any waiver of the provisions of this Agreement must be in writing and shall not be implied by any usage of trade, course of dealing or course of performance. No exercise of any right or remedy by AWWU or the Owners constitutes a waiver of any other right

or remedy contained in or provided by Law. Any delay or failure of a Party to exercise, or any partial exercise of, its rights and remedies under this Agreement shall not operate to limit or otherwise affect such rights or remedies. Any waiver of performance hereunder shall be limited to the specific performance waived and shall not, unless otherwise expressly stated in writing, constitute a continuous waiver or a waiver of future performance.

Section 14.4 Assignment. Neither Party shall assign this Agreement or any of its rights hereunder without the prior written consent of the other Party, which consent shall not be unreasonably withheld, conditioned or delayed. Notwithstanding the foregoing, either Party, without relieving itself from liability hereunder, and without the need for consent from the other Party provided that any such assignee shall agree to be bound by all terms and conditions hereof, may transfer, pledge or assign this Agreement: (a) to any person or entity succeeding to all or substantially all of the assets of the assigning Party; or (b) to a successor entity in a merger or acquisition transaction. Any assignment made in contravention of this Section 13.4 shall be void and unenforceable.

Section 14.5 Governing Law; Submission to Jurisdiction; Venue; No Jury Trial.

(a) Governing Law. THIS AGREEMENT SHALL BE GOVERNED BY, AND INTERPRETED AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF ALASKA, EXCLUDING ANY CHOICE OF LAW RULES.

(b) Submission to Jurisdiction, Venue. The Parties agree that any suit, action or other legal proceeding by or against any Party (or its Affiliates or designees) with respect to or arising out of this Agreement shall be brought exclusively in the courts of the State of Alaska, in the Municipality of Anchorage, as the Party instituting such suit, action or other legal proceeding may elect, provided that claims related to federal water rights, federal legislation enabling the Eklutna Hydroelectric Project or AWWU Facilities, or the 1991 Agreement may be brought in the United States District Court for the District of Alaska. By execution and delivery of this Agreement, each Party (for itself, its affiliates and its designees) irrevocably and unconditionally consents and submits to the exclusive jurisdiction of such courts and the appellate courts therefrom, and waives any right it may have to assert the doctrine of forum non conveniens or similar doctrine or to object to venue with respect to any proceeding. The Parties irrevocably consent to the service of process in any such action or proceeding by the mailing of copies thereof by registered or certified mail, first class postage prepaid to the addresses set forth in Exhibit B.

(c) No Jury Trial. EACH OF THE PARTIES HEREBY WAIVES ANY AND ALL RIGHTS TO DEMAND A TRIAL BY JURY IN ANY ACTION, SUIT, OR PROCEEDING ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY.

(d) Duty to Proceed. Pending final resolution of any Dispute, the Owners and AWWU shall continue to fulfill their respective obligations hereunder that are not the subject of the Dispute.

Section 14.6 Headings. The titles or headings of the various sections, articles and paragraphs hereof are intended solely for convenience and ease of reference and are not intended,

and are not to be deemed for any purpose, to modify or explain or place any interpretation or construction upon any of the provisions of this Agreement.

Section 14.7 Status of the Parties. No provision of this Agreement shall be construed or represented as creating a partnership, trust, joint venture, fiduciary or any similar relationship between the Parties.

Section 14.8 Status of Individual Owners. Each of the Owners shall be jointly and severally liable for the obligations of the Owners under this Agreement. The delineation of specific responsibilities set forth hereunder as among the Owners shall be at the sole discretion of the Owners, not AWWU. If at any time, the Owners agree that one or two of the Owners need no longer be party to this Agreement, such unnecessary Owner(s) may be removed as parties to this Agreement upon written notice to AWWU, if agreed, and shall retain no liability upon removal, with the remaining Owner(s) automatically assuming the full obligations of the Owners hereunder. If an Event of Default exists hereunder at any time with respect to an Owner, it shall be considered an Event of Default with respect to the Owners together as one Party hereunder, provided, that if another Owner agrees to assume such defaulting Owner's obligations under this Agreement by removing such Owner as a party pursuant to the preceding sentence of this Section 14.8 prior to the expiration of any applicable cure period, this shall not be considered an Event of Default hereunder.

Section 14.9 Insurance. Throughout the Term, the Owners shall maintain the required insurance policies as set forth on Exhibit D-1 and AWWU shall maintain the required insurance policy as set forth on Exhibit D-2.

Section 14.10 No Third Party Beneficiaries. This Agreement is made and entered into for the sole protection and legal benefit of the Owners and AWWU, and their permitted successors and assigns, and no other person shall be a direct or indirect legal beneficiary of, or have any direct or indirect cause of action or claim in connection with, this Agreement.

Section 14.11 Further Assurances. Each Party agrees to execute and deliver all further instruments and documents, and take all further action, as may be reasonably necessary to complete performance by the Parties hereunder and to effectuate the purposes and intent of this Agreement, including (1) support of amendment of water rights necessary to implement this Agreement; and (2) AWWU's support of Chugach's tariff revisions necessary to implement the compensation and gain RCA approval as outlined in Section 2.2.

Section 14.12 Amendments. No change, amendment or modification of this Agreement shall be valid or binding upon the Parties unless such change, amendment or modification shall be in writing and duly executed by the Parties.

Section 14.13 Severability. If any provision of this Agreement is determined to be illegal or unenforceable, such determination will not affect any other provision of this Agreement and all other provisions will remain in full force and effect.

Section 14.14 Conflicting Provisions. In the event of any conflict between this document and any Schedule or Exhibit attached hereto, the terms and provisions of this document, as

amended from time to time, shall control. In the event of any conflict among the Exhibits, the Exhibit of the latest date mutually agreed to by the Parties shall control.

Section 14.15 Survival. The provisions of Article I, Article VII, Article VIII, Article IX, Article X, Article XI, Article XII, Article XIV, and Article XIV shall survive termination of this Agreement for any reason.

Section 14.16 Counterparts. This Agreement may be executed in any number of separate counterparts and delivered by electronic means, each of which when so executed shall be deemed an original, and all of said counterparts taken together shall be deemed to constitute but one and the same instrument.

2

[*Remainder of page intentionally left blank*]

[2] Note to AWWU: this Agreement will not be signed until Assembly approval has been gained; see note on cover page; 14.17 should be removed because we cannot abide the risk that the Assembly approves, we execute, and then the Assembly subsequently withdraws such approval.

IN WITNESS WHEREOF, the Parties have caused this Public Water Supply Agreement to be executed by their duly authorized representatives as of the Effective Date.

Schedule 1.1
Definitions

"1984 Agreement" has the meaning set forth in the Recitals.

"1991 Agreement" means that certain Agreement between the Municipality of Anchorage, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., the United States Fish and Wildlife Service, the National Marine Fisheries Service, the State of Alaska, and the Alaska Energy Authority Relative to the Eklutna and Snettisham Hydroelectric Projects, dated August 7, 1991.

"Affiliate" means, with respect to any Person, any other Person controlling, controlled by or under common control with such first Person. For purposes of this definition and the Agreement, the term "control" (and correlative terms) means (1) the ownership of 50% or more of the equity interest in a Person, or (2) the power, whether by contract, equity ownership or otherwise, to direct or cause the direction of the policies or management of a Person.

"Agreement" has the meaning set forth in the introductory paragraph, and shall include all Exhibits and Schedules hereto.

"APA" has the meaning set forth in the Recitals.

"AWWU" has the meaning set forth in the introductory paragraph, and shall include all successors and permitted assigns of AWWU.

"AWWU Facilities" means the existing water transportation facilities owned and operated by AWWU, including the AWWU Eklutna Lake raw water diversion bypass tunnel interconnected with the intake tunnel of the Eklutna Hydroelectric Project and pipeline.

"AWWU Option" has the meaning set forth in Section 6.2.

"AWWU Water Permit" has the meaning set forth in the Recitals and as may be replaced as described in Section 3.1.

"AWWU Water Project" has the meaning set forth in the Recitals.

"Business Day" means any day other than a Saturday, Sunday or legal holiday in the state of Alaska.

"Chugach" has the meaning set forth in the introductory paragraph, and shall include all successors and permitted assigns of Chugach.

"Conditions Precedent" has the meaning set forth in Section 2.2.

"Confidential Information" has the meaning set forth in Section 13.1.

"Day" or "day" means a calendar day, unless expressly specified otherwise.

"Dispute" has the meaning set forth in Section 10.4.

"DNR" has the meaning set forth in the Recitals.

"Effective Date" has the meaning set forth in the introductory paragraph.

"Eklutna Hydroelectric Project" means the Eklutna Hydroelectric Project initially authorized, constructed and operated pursuant to the Eklutna Project Act of July 31, 1950 (64 Stat. 382, as amended), including any and all property and facilities acquired or used in connection therewith, all of which was then sold to the Owners by the United States of America on October 2, 1997.

"Equivalent Energy Production" has the meaning set forth in Exhibit A – Compensation.

"EWTF" has the meaning set forth in Section 3.2(a).

"Fish and Wildlife Program" has the meaning set forth in the Recitals.

"Force Majeure Event" means the occurrence of any act or event beyond the reasonable control of the Party affected that prevents the affected Party from performing its obligations under this Agreement, in full or part, if such act or event is beyond the reasonable control of, and not the result of the fault or negligence of, the affected Party and such Party has been unable to overcome such act or event with the exercise of due diligence (including the expenditure of reasonable sums), including the following: drought, flood, earthquake, storm, fire, lightning, epidemic, war, riot, civil disturbance, sabotage, terrorism or threat of terrorism, strike or labor difficulty, accident or curtailment of supply or equipment, total casualty to equipment, or restraint, order or decree by a Governmental Authority. Notwithstanding the foregoing, Force Majeure Events shall expressly not include mechanical or equipment failures (except to the extent any such failure is itself caused by a Force Majeure Event) nor diminution in water quality in Eklutna Lake.

"Governmental Approvals" means all authorizations, consents, licenses, leases, rulings, certifications, registrations, exemptions, permits, certificates, and approvals from any Governmental Authority.

"Governmental Authority" means any federal, state or local government, any political subdivision thereof, or any governmental, quasi-governmental, judicial, public or statutory instrumentality, administrative agency, authority, body or other entity having jurisdiction over the Eklutna Hydroelectric Project or AWWU Water Project or their operations, or the health, safety or environmental conditions or otherwise over the Parties.

"Indemnified Parties" has the meaning set forth in Section 9.1.

"Indemnifying Party" has the meaning set forth in Section 9.2.

"Interconnection Agreement" has the meaning set forth in the Recitals.

"Law" means any constitution, charter, act, statute, law, ordinance, code, rule, regulation, order, specified standards or objective criteria contained in any applicable permit or approval or other legislative or administrative action of any Governmental Authority or a final decree, judgment or order of a court or tribunal.

"Liabilities" has the meaning set forth in Section 9.1.

"MEA" has the meaning set forth in the introductory paragraph, and shall include all successor sand assigns of MEA.

"MOA" has the meaning set forth in the introductory paragraph, and shall include all successor sand assigns of MOA.

"MOA-Chugach APSA" means that certain Asset Purchase and Sale Agreement by and between the MOA and Chugach, as amended on December 28, 2018.

"MOA-Chugach Eklutna PPA" means that certain Power Purchase Agreement by and between the MOA and Chugach, dated December 28, 2018, as amended.

"MOA-MEA Eklutna PPA" means that certain Power Purchase Agreement by and between the MOA and MEA, dated September 16, 2019, as amended.

"Owners" has the meaning set forth in the introductory paragraph, and shall include all successors and permitted assigns of the Owners.

"Owners' Facilities" has the meaning set forth in the Recitals.

"Owners' Water Rights" has the meaning set forth in the Recitals.

"Party" and "Parties" has the meaning set forth in the Recitals.

"Person" means any individual, partnership, corporation, limited liability company, association, business, trust, government or political subdivision thereof, Governmental Authority or other entity.

"Preferred Use Status" has the meaning set forth in the Recitals.

"Project Water Rights" has the meaning set forth in the Recitals.

"RCA" has the meaning set forth in Section 2.2(c).

"Recovered Electrical Energy" has the meaning set forth in Section 3.2(a).

"Replacement Energy" has the meaning set forth in Section 3.2(a).

"Replacement Energy Amount" has the meaning set forth in Exhibit A.

"Replacement Energy Payments" has the meaning set forth in Section 3.2(a).

"Term" has the meaning set forth in Section 2.4.

"Transportation Agreement" has the meaning set forth in the Recitals.

EXHIBIT A

Water Scheduling and Compensation

Scheduling & Reporting:

1. Prior to April 1 of each year, AWWU will furnish to the Owners its estimate of:

    a) Anticipated annual diversions of water for public water supply in the AWWU Water Project for the next five water years (June 1 – May 31), by year, for that same period; and

    b) Anticipated monthly diversions of water for public water supply in the AWWU Water Project for the next water year.

2. Within ten (10) days of the beginning of each month, AWWU will furnish to the Owners, on a monthly basis, the daily actual meter readings showing (a) water used by the AWWU Water Project in the preceding month, and (b) electric energy generated by the AWWU Water Project and delivered to the Owners.

Compensation:

As set forth in Section 3.2(a) and (b) of the Agreement and as was previously agreed to by the Parties in the 1984 Agreement, AWWU's use of the Project Water Rights shall remain a burden solely on the MOA's proportionate ownership share of the Project, and for the avoidance of doubt, shall not be allocated to Chugach's or MEA's proportionate ownership shares. Allocation of cost responsibility to the MOA shall be accounted for in the Eklutna Hydroelectric Project's water balancing account maintained among the Owners rather than through billing or other payment compensation owed by AWWU, except as set forth in Section 3.2 and in this Exhibit A. If the MOA's allocation of the Eklutna Hydroelectric Project's water in any given month is insufficient to cover AWWU's use of the Eklutna Hydroelectric Project's water in that month, AWWU will remain entitled to take its water needs within the parameters set forth in the Agreement and AWWU's Water Permit, and the Owners will make necessary adjustments to the MOA's water position within the Eklutna Hydroelectric Project's water balancing account accordingly.

AWWU will compensate the Owners for Replacement Energy (the reduction in electric energy generation attributable to AWWU's use of the Eklutna Hydroelectric Project's water) through Recovered Electrical Energy and Replacement Energy Payments. In other words, AWWU will pay Owners for MWhs not produced, rather than for the quantity of water used by AWWU.

AWWU will not, however, be required to compensate the Owners for water used by AWWU for public water supply in the AWWU Water Project during unplanned reservoir spill events at the Eklutna Hydroelectric Project (i.e., water spills over Eklutna Hydroelectric

Project's dam or through the spillway other than such releases by Owners as part of their implementation of the Fish and Wildlife Program) as measured on a day for day basis. In other words, during days of unplanned reservoir spill events, AWWU will not be required to compensate the Owners for water and equivalent energy generation.

Each month during the term of the Agreement, Chugach (as the Owners' representative designated by the Owners) shall compute the compensation owed by AWWU to Owners pursuant to Section 3.2 of the Agreement and as provided below. Chugach shall provide an invoice to AWWU showing billing determinants, charges, rebates (if any), total amount due, as well as detail regarding the Replacement Energy Payment calculation and Recovered Electrical Energy accounting. As set forth in Section 5.1 of the Agreement, Chugach shall collect such payments from AWWU, allocate values among the Owners as applicable (e.g., pass through its share of the compensation to the MOA), and maintain records as appropriate.

Monthly Compensation Calculation

1. Following receipt of the meter readings from AWWU, the total number of gallons of water used by AWWU during that month, less water used during days in which the unplanned reservoir spill events described above, shall be converted to acre-feet.

2. The energy equivalent for AWWU's water shall then be calculated by multiplying the acre-feet of water used by AWWU by the Eklutna Hydroelectric Project's average energy production per unit of water (kWh/acre-foot) for the month; the result of this calculation is the Equivalent Energy Production (kWh) attributable to AWWU's water usage. Equivalent Energy Production for a given month will be the Replacement Energy for that month.

3. The Replacement Energy in that month shall then be reduced by metered Recovered Electrical Energy at EWTF delivered to MEA and as reported by MEA meter readings to determine the amount of net Replacement Energy (kWh) for which AWWU owes compensation to Chugach for that billing period (the "Replacement Energy Amount").

4. The billing charges for Replacement Energy Amount shall then be calculated as the product of the Replacement Energy (kWh) (after deduction of the Recovered Electrical Energy) and the monthly energy rate set forth in Chugach's Tariff -- "Replacement Energy Service -AWWU" (as may be amended); such charges for Replacement Energy may be adjusted on a kilowatt-hour basis to recover the cost of power as described in Chugach's Tariff -- Fuel and Purchased Cost of Power Adjustment (comprised of fuel, purchased power, and renewable energy adjustment factors) and the Beluga River Unit Contributed Capital Surcharge and Rebate (when applicable).

5. Compensation for Replacement Energy owed by AWWU to Chugach will be capped at $600,000 per water year in value in aggregate as set forth in Section 3.2(b) of the Agreement, as such amount will be adjusted annually for inflation rate using a 15 year rolling average reflected in the Bureau of Labor Statistics' Urban Alaska Consumer Price Index (CPI-U) (as currently reported by State of Alaska Department of Labor and Workforce Development at https://live.laborstats.alaska.gov/cpi/table) ("AWWU Compensation Cap"). In any month of the Term, to the extent that AWWU does not fully compensate Chugach for the total Replacement Energy Amount owed due to application of the AWWU Compensation Cap, the MOA will make Chugach whole through the calculation of a monetary sum equal to the Replacement Energy Amount multiplied by rates set forth in the Chugach tariff for the Replacement Energy Service -- AWWU that shall paid by the MOA to Chugach (i) as an offset against the MOA's ownership share of AWWU payments owed by Chugach pursuant to Section 6.23 of the MOA-Chugach APSA, (ii) cash payments from the MOA to Chugach, or (iii) if necessary, as an offset against other payment obligations owed by Chugach to the MOA pursuant to the MOA-Chugach Eklutna PPA.

Owners' Allocations

1. The Owners hold the following proportionate ownership shares of the Project: MOA – 53.33%; Chugach – 30.00%; MEA – 16.67%.

2. Pursuant to reallocations, terms and conditions set forth in the (i) the MOA-Chugach Eklutna PPA, (ii) Section 6.23 of the MOA-Chugach APSA, and (iii) the MOA-MEA Eklutna PPA, the Project's water (and resulting power output) is allocated to the Owners in the following proportionate shares: MOA – 0%; Chugach – 64.29%; MEA – 35.71%.

3. The cost responsibility for implementation of the Fish and Wildlife Program is borne by the Owners as follows: MOA – 19.04%; Chugach – 64.29%; MEA – 16.67%.

4. MEA shall compensate the MOA for Recovered Electrical Energy at the EWTF received by MEA through the Eklutna Hydroelectric Project's water balancing account.

EXHIBIT B[3]

Appellee.

Appeal Court Case No.: 3AN-24-06001CI

NOTICE OF PREPARATION OF RECORD IN AN ADMINISTRATIVE APPEAL

To: Regulatory Commission of Alaska

Attached is a copy of the notice of appeal filed on 04/24/2024 from an order or decision of your agency. Pursuant to the Appellate Rules:

1. Within 10 days of service of this notice, the agency must file with this court a list of names and addresses of all counsel and pro se parties who appeared in the matter before the agency. Please use the enclosed form AP-311. Appellate Rule 602(d)(2).

2. The agency must number the pages of the agency file consecutively throughout all volumes. Form AP-215 (https://public.courts.alaska.gov/web/forms/docs/ap-215.pdf) contains more detailed instructions for preparing the agency file. The agency shall forward to the superior court within 40 days from the date of service of this notice:
   a. A copy of the numbered agency file.
   b. The transcript of proceedings before the agency, unless electronic recordings are authorized by Appellate Rule 604(b)(1)(A) or court order.
   c. All documentary and photographic exhibits no larger than 8.5" x 14" that are not filed in the agency case file, and a list of the exhibits being transmitted.
   d. A list of all exhibits retained by the agency.
   e. A copy of all depositions filed with the agency.
   f. A *Transmittal of Agency Record* (form AP-312, which is enclosed).

   Appellate Rule 604(b).

3. The appellant must arrange and pay for preparation of a transcript unless electronic recordings are authorized by Appellate Rule 604(b)(1)(A) or by court order. The appellant must also pay all reasonable costs incurred by the agency to prepare the court's copy of the agency file, unless otherwise ordered by the court or agreed to by the parties. The agency may require advance payment of the costs. Appellate Rule 604(b)(1)(B)(iv).

AMENDMENT TO

BINDING TERM SHEET

WATER FACILITIES INTERCONNECTION AND LONG-TERM WATER TRANSPORTATION SERVICES

This AMENDMENT TO BINDING TERM SHEET, dated effective as of March 27, 2024, is made and entered into by and between Chugach Electric Association, Inc. ("***Chugach***"), Matanuska Electric Association, Inc. ("***MEA***"), the Municipality of Anchorage, and Anchorage Water and Wastewater Utility ("***Amendment***") to amend that certain Binding Term Sheet related to water facilities interconnection and long-term water transportation services entered into by the same parties on October 27, 2023 ("***Term Sheet***"). The capitalized terms in this Amendment shall have the same meaning as set forth in the Term Sheet unless otherwise defined or revised as set forth in this Amendment.

RECITALS

WHEREAS, the Eklutna Owners and AWWU entered into that certain Term Sheet on October 27, 2023;

WHEREAS, the Eklutna Owners and AWWU have completed negotiations of the Agreements (as such term is amended herein to include and a new Public Water Supply Agreement to replace the 1984 Agreement), each as contemplated in the Term Sheet and have come to agreement on other related matters;

WHEREAS, the effectiveness of the Agreements are conditioned on obtaining the Governor of Alaska's approval of the Fish and Wildlife Program that requires use of AWWU Facilities as contemplated in the Term Sheet without any conditions materially adverse to the Eklutna Owners or AWWU;

WHEREAS, by executing this Amendment, AWWU is reiterating that it does not, and shall not, take any position on whether or not using AWWU's infrastructure is the best alternative for establishing instream water flows in the Eklutna River as the foundation of the Fish and Wildlife Program; AWWU is merely stating its willingness to allow use of its infrastructure under the agreed terms and conditions of the Term Sheet and forms of Agreements, all only as pursuant to a Governor-approved Fish and Wildlife Program; and

WHEREAS, AWWU requires certain approvals before it may enter into one or more of the Agreements and such approvals likely cannot be obtained before the Governor's approval of the Fish and Wildlife Program, with such approval expected by October 2024;

NOW THEREFORE, in consideration for the premises and agreements set forth in this Amendment, the Parties agree as follows:

1. Term. The effective term of the Term Sheet and its commitments shall be extended until December 31, 2024 in order to allow time for: (a) the Eklutna Owners to file the Fish and

Wildlife Program with the Governor of Alaska and seek necessary approval under the 1991 Agreement; and thereafter (b) AWWU to seek and gain approvals necessary for it to enter into one or more of the Agreements. References to March 1, 2024 as an outside date for execution of Agreements as referenced in the preamble and in Section 4 of the Term Sheet shall be accordingly replaced with December 31, 2024.

2. Definition of Agreements. Section 3 of the Term Sheet shall be amended and restated in its entirety as follows:

3. Agreements	(1) Water Facilities Interconnection Agreement ("***Interconnection Agreement***"); (2) Long-Term Water Transportation Agreement ("***Transportation Agreement***"); and (3) Public Water Supply Agreement (collectively with the Interconnection Agreement and the Transportation Agreement, the "***Agreements***").

3. Form of Agreements. The final forms of the Agreements, except for certain exhibits which will be completed later as engineering work is completed or to otherwise ensure accuracy at the time of execution, are attached to this Amendment as follows:

Attachment A - ***Interconnection Agreement***

Attachment B - ***Transportation Agreement***

Attachment C - ***Public Water Supply Agreement***

The Parties agree that the substantive terms of the Agreements are complete and reflect a negotiated balance of interests, terms, and conditions. The Parties agree to support and defend the form of the Agreements and seek all necessary approvals of them in their present form in a timely and expeditious manner. The Parties agree not to reopen issues or renegotiate the Agreements, provided that certain exhibits may be updated as described in footnotes to the forms of the Agreements.

4. Limited Right of First Offer. As consideration for this Amendment, the Eklutna Owners hereby grant to AWWU a limited right of first offer to purchase from certain Eklutna Owners' water rights up to 41 million gallons per day for AWWU's public water supply on the following terms:

a. In the event that the Eklutna Owners' decide to remove, abandon, or sell the Eklutna Hydroelectric Project to the any person other than among the Eklutna Owners themselves, the Eklutna Owners shall provide AWWU with advance written notice of the intended action and opportunity to purchase such water rights at least three (3) months prior to initiating such action or transaction;

b. AWWU shall respond to such notice within thirty (30) days of its desire to its intention to exercise such option; if AWWU wants to purchase the water rights, the Parties shall then meet and negotiate in good faith terms and conditions then deemed appropriate, including compensation, risk mitigation, and means of transfer or purchase of priority water rights (e.g., quitclaim deed or other then-acceptable means of transfer) during the balance of the three (3) month period;

c. The water rights subject to this right of first offer are only that portion of Eklutna Owners' priority state water rights, up to 41 million gallons per day, consistent with, and not in addition to, AWWU's permit for preferred water use for pursuant to the Act of October 30, 1984, 98 Stat. 2823; Alaska Statutes 46.15.150(a), LAS 2569, and Certificate of Appropriation ADL 44944;

d. If AWWU fails to make a written offer within the notice period, if AWWU waives the right to make a first offer in writing, or if the Parties are unable to reach terms, the Eklutna Owners may proceed to remove, abandon, or sell the Eklutna Hydroelectric Project as they deem appropriate; and

e. Except for the potential sale of water rights, nothing in the limited right of first offer is intended to encumber, limit, or condition the Eklutna Owners' disposal or sale of the Eklutna Hydroelectric Project.

5. Execution of Agreements. The Agreements will be executed within thirty (30) days after the later of the following three prerequisites to their execution:

a. Governor approval of the Fish and Wildlife Program that requires use of AWWU Facilities as contemplated in the Term Sheet without any conditions materially adverse to the Eklutna Owners or AWWU;

b. Approval by the Municipality of Anchorage Assembly to the extent necessary for the Municipality of Anchorage to execute and perform under the Agreements; and

c. Board approvals (as may be necessary) for MEA and Chugach to execute and perform under the Agreements.

6. Effective Date and Incorporation of Terms of the Term Sheet. This Amendment shall be deemed effective as of the Effective Date of the Term Sheet and, without limiting the superseding effect of the amendments and the attachments set forth in this Amendment, shall be subject to all the terms and conditions of the Term Sheet, including Confidentiality (Section 24) and Governing Law (Section 23).

7. Failure to Achieve Conditions Precedent. In the event that the Agreements do not become fully effective (i) due to the failure to achieve the Conditions Precedent as set forth in Section 2.2 of Attachment C and Section 5 of this Amendment by June 1, 2025, or (ii) because the Governor of Alaska approves a Fish and Wildlife Program that does not require the use of the AWWU Facilities (as defined in the Agreements) for instream flows as contemplated in the Agreements, the effective term of the 1984 Agreement and its terms shall be extended for one (1) year from the date of the failure to achieve the Conditions Precedent or the date the Governor of

Alaska selects an alternate Fish and Wildlife Program that does not require use of AWWU Facilities as defined in the Agreements (referred to herein as the "***One (1) Year Extension Period***"). The Parties shall then meet promptly after the commencement of the One (1) Year Extension Period to negotiate in good faith an alternate agreement to replace the 1984 Agreement that expires on December 31, 2025 with terms and conditions that include but are not limited to adequate compensation, risk mitigation, potential transfer or purchase of water rights, and other terms and conditions then deemed appropriate by the Parties without prejudice due to the prior existence, or the subsequent termination, of the Agreements and shall execute a replacement for the 1984 Agreement by the end of the One (1) Year Extension period.

8. Counterparts. This Amendment may be executed by a number of counterparts, each of which shall be deemed an original, and all of which, together, shall constitute a single agreement.

WATER FACILITIES INTERCONNECTION AGREEMENT

This WATER FACILITIES INTERCONNECTION AGREEMENT (this "Agreement"), dated as of [_____] (the "Effective Date"), is entered into by and between Anchorage Water and Wastewater Utility ("AWWU"), and Chugach Electric Association, Inc. ("Chugach"), Matanuska Electric Association, Inc. ("MEA"), and the Municipality of Anchorage ("MOA") (each of Chugach, MEA, and MOA is an "Owner" and collectively they are referred to as the "Owners"). The Owners and AWWU are sometimes referred to herein as a "Party" or collectively as the "Parties".

RECITALS

WHEREAS, the Owners own and operate the Eklutna Hydroelectric Project, commissioned in 1954, which includes an earthen dam at the outlet of Eklutna Lake and which, under normal operating conditions, diverts the inflows of all water into the Eklutna Lake for hydroelectric production rather than into the Eklutna River;

WHEREAS, AWWU owns and operates certain existing water diversion and transportation facilities integrated with the Eklutna Hydroelectric Project as further detailed in Exhibit B (the "AWWU Facilities") located near the outlet of Eklutna Lake and adjacent to the Eklutna River, and AWWU uses such AWWU Facilities to provide public water supply for its customers;

WHEREAS, the Owners are parties to the 1991 Agreement (as defined below), pursuant to which they are required to develop and implement a Fish and Wildlife program every thirty-five years to protect, mitigate damages to, and enhance fish and wildlife impacted by the development of the Eklutna Hydroelectric Project (the "Fish and Wildlife Program");

WHEREAS, as a result of the process set forth in the 1991 Agreement, the Owners have developed a draft Fish and Wildlife Program in which the Owners have proposed to: (1) develop an Eklutna River release facility consisting in part of AWWU Facilities and facilities constructed pursuant to this Agreement, all as further described and depicted in Exhibit A-1, Exhibit A-2, and Exhibit A-3 (the "Facility"); (2) to transport water from Eklutna Lake through the Facility and release it into the Eklutna River; and (3) to operate and maintain the Facility;

WHEREAS, in connection with their proposal to develop the Facility, the Owners have also agreed to install bridges at eight locations across the Eklutna River to improve and preserve access to AWWU Facilities, as further described in Exhibit K (the "Access Bridges");

WHEREAS, in connection with the execution of this Agreement and in order to enable future implementation of the Fish and Wildlife Program (if approved), and to address compensation for AWWU's present and future use of a portion of Owners' water rights, the Parties are also entering into a Long-Term Water Transportation Agreement (the "Transportation Agreement") and a new Public Water Supply Agreement (the "Water Supply Agreement");

WHEREAS, Owners desire to construct the Facility in coordination with AWWU and AWWU is willing to allow for the interconnection and use of AWWU Facilities as part of the

Facility and to otherwise cooperate with Owners all pursuant to the terms and conditions set forth in this Agreement;

NOW, THEREFORE, in consideration of the premises of this Agreement, the Transportation Agreement, and the Water Supply Agreement, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Owners and AWWU, intending to be legally bound, hereby agree as follows:

ARTICLE 1.
DEFINITIONS; INTERPRETATION; EXHIBITS

1.1 Defined Terms. Capitalized terms used in this Agreement without other definition shall have the meanings set forth in Schedule 1.1, unless the context requires otherwise.

1.2 Interpretation. As used in this Agreement, the terms "herein," "herewith" and "hereof" are references to this Agreement, taken as a whole; the terms "includes" or "including" shall mean "including, without limitation"; and references to a "Section," "Article", "Exhibit" or "Schedule" shall mean a Section, Article, Exhibit or Schedule of this Agreement, as the case may be, unless in any such case the context requires otherwise. All references to a given Exhibit, Schedule, agreement, instrument or other document shall be a reference to that agreement, instrument or other document as modified, amended, supplemented and restated through the date as of which such reference is made. A reference to a Person includes its permitted successors and permitted assigns. The singular shall include the plural and the masculine shall include the feminine and neuter, and vice versa.

ARTICLE 2.
OWNERS RESPONSIBILITIES

2.1 General Responsibilities of Owners. Subject to Sections 4.1, 4.3 and 4.4, the Owners shall be responsible for designing, engineering, obtaining all Approvals for (except with respect to AWWU Approvals), constructing and performing related activities for the successful completion of (i) the Facility and interconnection of the Facility to the AWWU Facilities pursuant to the Facility Criteria; and (ii) the Access Bridges, the costs of which shall be paid for by the Owners.

2.2 Standard of Work; Skill and Expertise. Throughout the performance of all aspects of the Work, the Owners shall comply with, and shall ensure that each Subcontractor complies with, all applicable Laws and Prudent Industry Standards (the "Standard of Work"). The Owners shall, throughout the performance of the Work, use commercially reasonable efforts to ensure that all employees and contractors engaged in connection with the maintenance of, operation of, service of, and any future modification to (to include design, construction, commissioning, and installation) the Facility shall have the appropriate and necessary experience, skill and expertise to carry out the tasks efficiently, professionally, and in accordance with the Standard of Work.

2.3 Scope of Work. Without limiting the generality of Sections 2.1 and **Error! Reference source not found.**, the Owners shall perform all of the specific tasks in accordance with the Scope of Work and the Project Schedule, subject to any Change Orders pursuant to ARTICLE 7, in order to achieve Commercial Operation and Final Acceptance of the Facility in

accordance with ARTICLE 4, and to commence the Parties' obligations under the Transportation Agreement, whereupon the Work under this Agreement shall be concluded and the obligations under the Transportation Agreement shall begin.

2.4 Project Manager. The Owners shall identify to AWWU and at all times during the term of this Agreement maintain a Project Manager. The Project Manager shall act as AWWU's primary point of contact with the Owners with respect to the Work, and shall be available to meet with AWWU as reasonably requested by AWWU to discuss the Work or any issue related thereto. The Project Manager shall have full authority to act for the Owners under this Agreement; provided, that the Project Manager shall under no circumstances have the authority to amend (except for the issuance of Change Orders), terminate, or assign this Agreement. The Owners may change the Project Manager at any time upon written notice to AWWU. As of the Effective Date, the Project Manager is listed in Exhibit E.

2.5 Status of Individual Owners. Each of the Owners shall be jointly and severally liable for the obligations of the Owners under this Agreement. The delineation of specific responsibilities set forth hereunder as among the Owners shall be at the sole discretion of the Owners, not AWWU. If, at any time, the Owners agree that one or two of the Owners need no longer be party to this Agreement, such unnecessary Owner(s) may be removed as parties to this Agreement upon written notice to AWWU and, if agreed, shall retain no liability upon removal, with the remaining Owner(s) automatically assuming the full obligations of the Owners hereunder. If an Event of Default exists hereunder at any time with respect to an Owner, it shall be considered an Event of Default with respect to the Owners together as one Party hereunder, provided, that if another Owner agrees to assume such defaulting Owner's obligations under this Agreement by removing such Owner as a party pursuant to the preceding sentence of this Section 2.5 prior to the expiration of any applicable cure period, this shall not be considered an Event of Default hereunder.

ARTICLE 3.
AWWU RESPONSIBILITIES

3.1 Access to Site. As of the Effective Date, AWWU shall, with respect to the land and AWWU Facilities within its control, provide the Owners with a non-exclusive license to access the Site and the AWWU Facilities necessary to enable the Owners to perform their obligations under this Agreement in accordance with the Project Schedule, provided, that AWWU may from time to time limit access to the Site or the AWWU Facilities under AWWU control temporarily only to the extent necessary to address reasonable security or safety issues, and to avoid putting AWWU's public water supply at risk of interruption or contamination. To the extent that any additional access permissions from third-party landowners adjacent to the Site may be required for Owners to access the Site and conduct the Work pursuant to the site license granted under this Section 3.1, obtaining such Approvals shall be the responsibility of the Owners, provided that (i) AWWU shall be responsible for any such permissions associated with the construction and maintenance of the Access Bridges; (ii) if the Parties agree that in certain other circumstances AWWU responsibility is more appropriate, AWWU shall bear such responsibility; and (iii) AWWU shall assist the Owners with obtaining such Approvals as is reasonably requested by the Owners, including by being the first and primary point of contact with such third party in situations where AWWU has an existing easement or applicable existing relationship with such third party.

To the extent that AWWU adds access or other security limitations to the Site, to the Owners' Portion, or to the AWWU Facilities, the Owners and AWWU shall cooperate to ensure continuous access for the Owners and their contractors, to enable them to perform the Owners' obligations under this Agreement.

3.2 Required Approvals. After the Owners' achievement of the Construction Start CPs, AWWU shall be responsible for obtaining and maintaining those Governmental Approvals and third-party approvals necessary for the completion of the Work as set forth on Exhibit F hereto (the "AWWU Approvals"), any costs of which shall be initially paid for by AWWU and reimbursed by Owners pursuant to Section 5.3. The Owners shall provide AWWU with such reasonable assistance as AWWU may request in obtaining such AWWU Approvals.

3.3 AWWU Representative. AWWU shall designate in writing and maintain at all times during the term of this Agreement an AWWU Representative to represent AWWU and to receive communications from the Owners with regard to the Work and the development of the Facility and the Access Bridges. The AWWU Representative shall act as the Owner's primary point of contact with the AWWU with respect to the Work, and shall be available to meet with the Owners and Project Manager, as reasonably requested, to discuss the Work or any issue related thereto. The AWWU Representative shall have full authority to act for AWWU under this Agreement; provided, that AWWU's Representative shall under no circumstances have the authority to amend (except for the signing of Change Orders), terminate or assign this Agreement. AWWU may change the AWWU Representative at any time upon written notice to the Owners. As of the Effective Date, the AWWU Representative shall be [_____][2].

3.4 Duty to Cooperate. AWWU shall, throughout the performance of the Work, cooperate with the Owners and perform its responsibilities, obligations and services under this Agreement in a timely manner, to facilitate the Owners timely and efficient performance of the Work and the Owners' obligations under this Agreement. AWWU shall provide timely reviews and approvals, including completing the design approval set forth in Section 4.3, such approvals not to be unreasonably withheld or delayed.

3.5 Site and AWWU Facilities Information. Except as set forth on Schedule 3.5, AWWU hereby represents and warrants that the conditions of the Site and of the AWWU Facilities are suitable for the Work and the completion of the Facility. AWWU hereby acknowledges that the Owners shall be entitled to rely on Schedule 3.5 and Exhibit B in preparing their assessment of the Work necessary to complete the Facility, as well as their work preparing the Project Schedule; and that if any information contained in Schedule 3.5 or Exhibit B is later found to be inaccurate, the Owners shall be entitled to a Change Order at their discretion pursuant to Section 7.3.

---

[2] **Note to Accompany Final Draft**: To be populated after Governor approval and prior to execution.

ARTICLE 4.
CONDITIONS PRECEDENT; PROJECT SCHEDULE, DESIGN APPROVAL

4.1 Construction Start Conditions Precedent.

(a) The obligations of the Owners to design, engineer, permit and construct the Facility as set forth in this Agreement, and the right of the Owners to conduct Work at the Site, and to physically interconnect the Facility with the AWWU Facilities as set forth in this Agreement, shall not be effective until the achievement of the following conditions precedent (the "Construction Start CPs"):

(i) The Owners receive final approval from the Governor of Alaska, with such approval not subject to any pending judicial review or appeal, for a Fish and Wildlife Program that requires the use of the AWWU Facilities as contemplated in this Agreement, provided that such approval includes no unexpected conditions materially adverse to the Owners or to AWWU, as determined in good faith by the Parties and in the exercise of commercially reasonable business judgment;

(ii) The Owners are issued lawful documentation from the Alaska Department of Natural Resources authorizing the use and transport of water as contemplated under the Transportation Agreement, including but not limited to an amendment of the Owners' Water Rights[3] or other approval(s) authorizing a change of use to allow the Owners to use a portion of the Owners' Water Right to establish and continue instream flows in the Eklutna River;

(iii) The Owners and AWWU, with regard to AWWU Approvals, have obtained all Approvals necessary to conduct the Work; and

(iv) The Transportation Agreement and the Water Supply Agreement are in full force and effect and are valid, binding and enforceable against AWWU and the Owners in accordance with their terms.

(b) Notwithstanding Section 4.1(a), nothing in this Agreement shall be construed to prevent the Owners from conducting design and permitting work in preparation for Facility construction prior to the achievement of the Construction Start CPs. Such pre-construction Work shall be done at the sole discretion and financial risk of the Owners, and shall be treated as Work for which all of AWWU's duties and responsibilities hereunder shall apply unless otherwise stated.

4.2 Project Schedule. The Owners shall perform all Work in accordance with the Scope of Work and the Project Schedule. The Owners shall use commercially reasonably efforts to meet all milestones set forth in the Project Schedule, provided that all such milestones may be extended at the discretion of the Owners as may be reasonably necessary to accommodate delays in the

[3] Note to AWWU: "Owners' Water Right" is a defined term already linked to a specific certificate.

achievement of the Construction Start CPs or the receipt of necessary Approvals that are outside the control of the Owners.

4.3 Submission for Design Approval. As of the Effective Date, the proposed design for the Facility is set forth in Exhibit A-3. The Owners may modify such design at their discretion until the achievement of the Construction Start CPs, at which point prior to the commencement of any construction activities at the Site, the Owners shall provide to AWWU final design drawings and proposals (and any applicable calculations, models, and reports developed in support thereof) for the Facility for AWWU's review and approval, such approval to not be unreasonably withheld or delayed. AWWU shall indicate to the Owners within thirty 30 Days after receipt of such design drawings, proposals, calculations, models, and reports whether it approves or denies the design. If AWWU denies the design, the parties shall work in good faith to resolve the applicable issues and develop an updated design for AWWU approval.

4.4 Failure to Obtain Approvals. If, at any point during the Owners performance of the Work, the Owners or AWWU are unable to obtain any Approval necessary to construct or operate the Facility as intended herein and in the Fish and Wildlife Program, despite taking all reasonable commercial efforts to obtain such Approvals, then either Party may terminate this Agreement upon forty-five (45) Days prior written notice; and the Owners shall restore the site pursuant to Section 11.7.

4.5 Installation; Testing Procedures.

(a) Conduct of Tests. As soon as possible after installation of all Equipment necessary, as determined by the Owners in their sole discretion, to render the Facility mechanically and structurally complete, the Owners shall begin to conduct, or cause to be conducted, the Commissioning Procedures, in accordance with this Section 4.5 and the Commissioning Procedures Guidelines. Owners may perform and re-perform any number of Commissioning Procedures in accordance with the Commissioning Procedures Guidelines, and the Owners, at their discretion, may prematurely terminate any Commissioning Procedures so long as the remaining Commissioning Procedures are completed prior to Commercial Operation.

(b) AWWU Personnel. The Owners shall provide AWWU at least two (2) Business Days' prior notice of the intended commencement of the Commissioning Procedures. AWWU shall have at least one representative at the Site throughout the performance of the Commissioning Procedures, in order to monitor the taking of measurements to determine the performance and safety of the Facility, all in accordance with the Commissioning Procedures Guidelines.

4.6 Commercial Operation. When the Owners consider that the criteria for Commercial Operation have been met, including successful completion of the Commissioning Procedures in accordance with Section 4.5, the Owners shall so notify AWWU in writing, and shall provide AWWU with a completed Commercial Operation certificate issued by an independent licensed professional engineer, in the form set forth in Exhibit H (the "Commercial Operation Certificate").

4.7 Final Acceptance. The criteria for achieving Final Acceptance shall be that: (a) Commercial Operation has occurred; (b) AWWU has received from the Owners copies of all as-built drawings for the Work and the Facility; (c) AWWU has received from Owners all Equipment Documentation related to the AWWU Portion; (d) Owners have removed from the Site and properly disposed of all wastes created at or brought onto the Site by the Owners; and (e) an Owners' training program for AWWU's operation and maintenance personnel has been completed in accordance with the Scope of Work. When the Owners consider that the criteria for Final Acceptance have been met, the Owners shall so notify AWWU in writing. Within five (5) Days thereafter, AWWU shall either: (i) notify the Owners in writing that it agrees that Final Acceptance has been achieved, or (ii) advise the Owners of the items in Section **Error! Reference source not found.**7(a) through (e) (collectively, "Final Acceptance Items") that AWWU believes have not yet been satisfied. Upon receipt of any notice from AWWU of an alleged failure to satisfy a Final Acceptance Item, the Owners shall either: (A) satisfy such Final Acceptance Item(s); or (B) advise AWWU in writing that the Owners believes in good faith that all Final Acceptance Item(s) have been satisfied and shall request the commencement of negotiations pursuant to Section **Error! Reference source not found.**.

4.8 Post-Completion Facility O&M. Upon Final Acceptance and the applicable title transfers set forth in ARTICLE 6, AWWU shall be responsible for operating and maintaining the AWWU Facilities and the AWWU Portion; and the Owners shall be responsible for operating and maintaining the Owners' Portion. Each of AWWU and the Owners shall also have further specific ongoing operations and maintenance obligations for portions of the Facility during the "Delivery Term" of the Transportation Agreement, as further detailed in the Transportation Agreement.

4.9 Post-Completion Access Bridge Maintenance. Upon completion of any Access Bridge by the Owners, and possession and applicable title having passed to AWWU pursuant to Section 6.1(d), full responsibility for (and associated costs of) such Access Bridge maintenance shall belong to AWWU, except that the Owners shall use commercially reasonable efforts to obtain a one-year materials and workmanship warranty from the contractor(s) engaged by the Owners to construct the Access Bridges and then shall pass such warranty on to AWWU.

4.10 Skill and Expertise. Each Party shall use commercially reasonable efforts to ensure that all employees and contractors engaged in connection with the maintenance of, operation of, service of, and any future modification to (to include design, construction, commissioning, and installation) the Facility shall have the appropriate and necessary experience, skill and expertise to carry out the tasks efficiently, professionally, and in accordance with Prudent Industry Standards and applicable Laws.

ARTICLE 5.
COSTS; TAXES; REIMBURSEMENT

5.1 Costs. All costs to complete the Facility and perform the Work hereunder shall be the responsibility of Owners. The Owners shall reimburse AWWU pursuant to Section 5.3 for AWWU's reasonable actual costs related to or arising out of the development and construction of the Facility and related to all of AWWU's responsibilities set forth in ARTICLE 3, including but not limited to documented direct and indirect costs, overhead, general and administrative costs, staff time, and all other costs related to or arising out of the planning, engineering and project

management associated with the Facility; provided that AWWU shall use commercially reasonable efforts to minimize such costs.

5.2 Taxes. The Owners shall be responsible for and shall pay any sales, use, gross receipts, occupation, and other taxes (excluding income and franchise tax imposed upon AWWU) that from time to time may become payable as a consequence of this Agreement.

5.3 Payments. For any costs described in Section 5.1 initially borne by AWWU, AWWU shall submit to each of the Owners a detailed accounting of such cost for which AWWU is seeking reimbursement, together with such supporting documentation as the Owners shall reasonably require. Within sixty (60) Days after receiving a properly completed application for reimbursement and all required supporting documentation, each of the Owners shall individually: (i) pay AWWU their respective Cost Responsibility Proportion of the amounts set forth in AWWU's application for payment; or (ii) notify AWWU in writing that such Owner believes in good faith that a requested payment amount is not due and owing and shall request the commencement of negotiations pursuant to Section **Error! Reference source not found.**. In addition to the requirement that each Owner pay its Cost Responsibility Proportion as required in this Section, the Owners shall each be jointly and severally liable for all reimbursement obligations owed to AWWU under this Article 5.

ARTICLE 6.
TITLE; LOSS OR DAMAGE; FORCE MAJEURE

6.1 Title.

(a) Legal title to and ownership of the AWWU Portion shall pass to AWWU upon achievement of Final Acceptance free and clear of any and all liens, claims, security interests or other encumbrances. Title to drawings, specifications and like materials provided by Owners with respect to the AWWU Portion shall also pass to AWWU upon achievement of Final Acceptance. Owners shall deliver to AWWU such assignments, bills of sale or other documents as reasonably requested by AWWU to evidence such transfers of title and ownership.

(b) Legal title to and ownership of the Owners' Portion shall remain with Owners after Final Acceptance and throughout the term of the Transportation Agreement, free and clear of any and all liens, claims, security interests or other encumbrances imposed by AWWU.

(c) Legal title to and ownership of the AWWU Facilities shall remain with AWWU before, during, and after the construction of the Facility.

(d) Legal title to and ownership of any Access Bridge shall pass to AWWU upon completion of such Access Bridge. Owners shall deliver to AWWU such assignments, bills of sale or other documents as reasonably requested by AWWU to evidence such transfers of title and ownership, and if the Parties determine that an additional agreement between the Parties is necessary to detail specific Access Bridge construction and ownership transfer terms and conditions, the Parties shall negotiate such documentation in good faith and in accordance with the terms of this Agreement.

(e) Legal title to and ownership of all Owners' Water shall remain with the Owners at all times during construction of the Facility, including during the performance of the Commissioning Procedures.

6.2 Risk of Loss.

(a) Equipment. Notwithstanding anything herein to the contrary, the Owners shall have the full responsibility for care, custody and control of material and Equipment incorporated into the Work (including all Equipment and materials used in connection therewith), and shall bear the risk of loss thereof, until an applicable transfer of title to the Equipment for the AWWU Portion occurs, at which time risk of loss shall pass to AWWU.

(b) Water. For any quantity of Owners' Water[4] flowing through AWWU's Facilities as part of the Commissioning Procedures or otherwise during the construction of the Facility: control, custody and risk of loss of such Owners' Water shall transfer from the Owners to AWWU at the Injection Point, where such Owners' Water shall comingle with AWWU's Water until reaching the Delivery Point, at which point the custody, control and risk of loss of a quantity of water equal to the original quantity of Owners' Water released into the AWWU Facilities at the Injection Point shall pass back to the Owners.

6.3 Force Majeure. Each Party shall be excused from performance and shall not be considered to be in default with respect to any obligation hereunder, except for the Owners' obligation to reimburse AWWU for costs pursuant to ARTICLE 5, if and to the extent that such Party's failure of, or delay in, performance is due to a Force Majeure Event; provided, that:

(a) such Party gives the other Party prompt written notice describing the particulars of the Force Majeure Event as soon as is reasonably practicable after becoming aware of the occurrence of the Force Majeure Event;

(b) the suspension of performance is of no greater scope and of no longer duration than are reasonably required by the Force Majeure Event;

(c) no obligations of an affected Party that arose before the occurrence of the Force Majeure Event causing the suspension of performance shall be excused as a result of such Force Majeure Event, unless and only to the extent that the performance of such obligations is impaired by the Force Majeure Event;

(d) the Party uses diligent commercially reasonable efforts to overcome or mitigate the effects of the Force Majeure Event; and

(e) when the Party is able to resume performance of its obligations under this Agreement, such Party shall give the other Party written notice to that effect, and shall promptly resume performance hereunder.

---

[4] Note to AWWU: Minor change as Owners' Water is a defined term

ARTICLE 7.
CHANGES

7.1 Change Orders. The Owners may propose Change Orders to AWWU if those Change Orders: (i) improve the Facility; (ii) are required by a Governmental Authority as a condition precedent to issuance of any Governmental Approval; or (iii) are otherwise advisable for the Work. This shall not affect the obligation of the Owners to perform the Work and to install the Facility in accordance with the terms of this Agreement, except as otherwise set forth in the Change Order or in Sections 7.2 or 7.3.

7.2 Changes to Project Schedule. In the event that any Change Order affects the amount of time needed to complete any portion of the Work, there shall be an equitable adjustment of the time of performance and the Project Schedule, as agreed to by the Parties.

7.3 Unanticipated Conditions. If any unusual or unanticipated conditions exist or arise at the Site such as Hazardous Materials, structural or geotechnical deficiencies, environmental conditions, pollution or archeological findings not known to the Owners as of the Effective Date (collectively, "Unanticipated Conditions"), which conditions would involve the Owners incurring any expenses or delays to correct such conditions, the Owners shall submit a request for approval of the corrective work and expense pursuant to a Change Order, the approval of which by AWWU shall not be unreasonably withheld, conditioned or delayed, and such corrective work shall be deemed incorporated into the Scope of Work; provided, however, if any Unanticipated Conditions exist or arise that are contrary to those set forth on Schedule 3.5 or Exhibit B, then the Change Order submitted by the Owners in connection with such Unanticipated Conditions shall be deemed to be automatically approved by AWWU. All change orders under this Agreement shall be fulfilled at the sole expense of the Owners.

ARTICLE 8.
WARRANTIES

8.1 Warranties.

(a) Except as expressly set forth in Section 8.1(b), Owners do not make (and hereby expressly disclaim) any other warranties of any kind whatsoever.

(b) The Owners hereby warrant that as of the Commercial Operation Date: (i) the Facility will meet the requirements set forth in the Facility Criteria; (ii) the Facility will be free from defects in workmanship under normal operating conditions, provided that such warranty shall not apply to existing AWWU Facilities incorporated within the Facility; (iii) all Work will have been performed in accordance with Prudent Industry Standards and all requirements of this Agreement; and (iv) the Work, including but not limited to each item of Equipment incorporated therein, will be new and shall conform in all material respects with the plans and specifications prepared in accordance with this Agreement and all descriptions set forth herein.

(c) In conjunction with achievement of the Commercial Operation Date, the Owners hereby agree to assign to AWWU, and AWWU agrees to assume, all Subcontractor, supplier and manufacturer warranties set forth on Exhibit G relating to the AWWU Portion, and

thereafter AWWU shall pursue all warranty claims thereunder directly with such Subcontractors, suppliers and manufacturers.

8.2 Warranty Period. Owners shall remedy any breach of the warranties set forth in Sections 8.1(b) discovered within 12 months of the Commercial Operation Date (the "Warranty Period").

8.3 Remedies. If the warranty set forth in Section 8.1 is breached or a defect or deficiency is discovered by Owners or AWWU during the Warranty Period, Owners shall repair, replace, and/or correct the applicable Work on a reasonably expedited basis while minimizing any impact of the failure on Facility availability and functionality or AWWU Facilities availability and functionality. AWWU shall permit the Owners access to the AWWU Facilities and the AWWU Portion necessary or useful to perform Owners' warranty obligations under this Agreement. All costs of Owners' performance of their warranty obligations shall be borne by Owners, including any removal, replacement and reinstallation of Equipment and materials necessary to gain access to defective Work.

8.4 Warranty Exclusions. The warranty obligations set forth in this ARTICLE 8 do not extend to Work that is damaged by or other potential warranty claims arising from: (a) the negligent acts or omissions of AWWU or its contractors, agents, employees, representatives or any other Person acting on behalf of AWWU; (b) Force Majeure Events; (c) any Equipment included in the AWWU Portion that is not maintained and operated by AWWU in accordance with all Equipment Documentation; (d) normal wear and tear; (e) any alteration, repair or replacement made without the prior written approval of the Owners or contrary to instructions from the Owners; or (f) conditions that existed prior to the completion of the Work, including any defects or deficiencies in any equipment included in AWWU Facilities not directly caused by the Owners as part of the Work (collectively, "Non-Owner Work"). In the event that the warranty service requested is related to Non-Owner Work or is covered by any warranty set forth on Exhibit G, the Owners shall have no further obligation.

8.5 NO IMPLIED WARRANTIES. EXCEPT AS EXPRESSLY PROVIDED IN THIS AGREEMENT, THE OWNERS MAKE NO WARRANTIES OR GUARANTEES, EXPRESS OR IMPLIED, AND AWWU DISCLAIMS ANY WARRANTY OR GUARANTEE IMPLIED BY LAW, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT AND IMPLIED WARRANTIES OF CUSTOM OR USAGE.

ARTICLE 9.
LIMITATIONS ON LIABILITY

9.1 Aggregate Limitation of Liability. Notwithstanding any other provision of this Agreement, the total aggregate liability of the Owners and the total aggregate liability of AWWU arising out of or relating to this Agreement, from any and all causes, whether based on contract, tort (including negligence), strict liability or any other cause of action, shall in no event exceed ten million dollars ($10,000,000) for AWWU, and ten million dollars ($10,000,000) for the Owners collectively, provided that such limit shall not apply in the case of such Party's (i) gross negligence

or willful misconduct, (ii) third-party indemnity obligation, or (iii) breach of any representation or warranty.

9.2 CUMULATIVE REMEDIES. IF NO REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY PROVIDED, OR IF A REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY NON-EXCLUSIVE, THE NON-DEFAULTING PARTY SHALL HAVE THE RIGHT TO EXERCISE ALL RIGHTS AND REMEDIES AVAILABLE TO IT AT LAW OR IN EQUITY; PROVIDED, HOWEVER, THAT THE LIABILITY OF THE DEFAULTING PARTY SHALL BE LIMITED TO DIRECT, ACTUAL DAMAGES ONLY AND ALL OTHER DAMAGES AND REMEDIES ARE WAIVED.

9.3 WAIVER OF CERTAIN DAMAGES. EXCEPT WITH RESPECT TO INDEMNIFICATION OF THIRD PARTY CLAIMS PURSUANT TO ARTICLE 10, OR AS OTHERWISE EXPRESSLY PROVIDED FOR HEREIN, IN NO EVENT SHALL EITHER PARTY BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY, INDIRECT, BUSINESS INTERRUPTION OR SIMILAR DAMAGES, WHETHER BY STATUTE, IN TORT, BY CONTRACT OR OTHERWISE.

ARTICLE 10.
INDEMNIFICATION

10.1 Indemnity. To the fullest extent permitted by Law, each Party shall indemnify, hold harmless and defend the other Party and its directors, officers, shareholders, partners, agents and employees, and the Affiliates of the same (collectively, the "Indemnified Parties"), from and against any and all claims, loss, damage, expense and liability, including court costs and reasonable attorneys' fees (collectively, "Liabilities") incurred by the Indemnified Parties in connection with or arising from (i) the Work; and (ii) any claim for physical damage to or physical destruction of any part of the Facility, the AWWU Facilities, or death of or bodily injury to any person, to the extent any such Liability was caused by the negligence of the Indemnifying Party or its agents or employees or others under such Indemnifying Party's control, except any Liabilities incurred due to the negligence or willful misconduct of an Indemnified Party. For the purpose of the definition of "Indemnified Parties" AWWU shall not be considered to be an "Affiliate" of the MOA.

10.2 Environmental Indemnity. Notwithstanding any other provision hereof, each Party shall indemnify, defend and hold harmless the other Party and its Indemnified Parties from and against all Liabilities arising out of or relating to the existence at, on, above, below or near the Site of any Hazardous Material to the extent such Hazardous Material is deposited, spilled, released or otherwise caused by the Indemnifying Party or its Subcontractors or agents in connection with the Work.

10.3 Defense of Claims. A Party with an indemnification obligation pursuant to this ARTICLE 10 (an "Indemnifying Party") shall have the right to defend the Indemnified Parties pursuant to this ARTICLE 10 by counsel of the Indemnifying Party's selection (including insurance counsel) reasonably satisfactory to the Indemnified Party, unless in the opinion of counsel for the Indemnifying Party a conflict of interest between the Parties may exist with respect to such claim. If the Indemnifying Party does not assume the defense of the Indemnified Party, or if a conflict precludes counsel for the Indemnifying Party from providing the defense, then the

Indemnifying Party shall reimburse the Indemnified Party on a monthly basis for the Indemnified Party's defense through separate counsel of the Indemnified Party's choice. Even if the Indemnifying Party assumes the defense of the Indemnified Party with acceptable counsel, the Indemnified Party, at its sole option, may participate in the defense, at its own expense, with counsel of its own choice without relieving the Indemnifying Party of any of its obligations hereunder. The Parties shall give each other prompt written notice of any asserted claims or actions indemnified against hereunder and shall cooperate with each other in the defense of any such claims or actions. Without the prior written consent of the Indemnified Party, which consent shall not be unreasonably withheld, conditioned or delayed, no Indemnifying Party shall settle any such claims or actions in a manner that would require any action or forbearance from action by any Indemnified Party.

ARTICLE 11.
DEFAULT AND REMEDIES; TERMINATION; DISPUTE RESOLUTION

11.1 Event of Default. The following shall constitute events of default on the part of either party (each, an "Event of Default") under this Agreement:

(a) If a Party makes a general assignment for the benefit of its creditors, or if a receiver is appointed on account of the insolvency of such Party, or if such Party files a petition seeking to take advantage of any other Law relating to bankruptcy, insolvency, reorganization, winding up or composition of or readjustment of debts and, in the case of any such proceeding instituted against such Party (but not by such Party) such proceeding is not dismissed within sixty (60) days of such filing;

(b) If a Party fails to comply with any material terms of this Agreement not otherwise set forth as an Event of Default in this Section 12.1(b) and fails to cure or remedy such failure within thirty (30) days after notice and a written demand is made by the non-defaulting Party to the defaulting Party to cure the same or, if such failure cannot be cured within thirty (30) days, the defaulting Party fails to commence to cure such failure within thirty (30) days after such notice and written demand and thereafter diligently pursue such cure to completion, which shall in no event be later than ninety (90) days after such notice;

(c) If a Party fails to make any payment due hereunder within sixty (60) days after written notice from the non-defaulting Party;

(d) If a Party defaults under the Water Supply Agreement or the Transportation Agreement; or

(e) If any representation or warranty of a Party in this Agreement proves to have been false or misleading in any material respect when made, and such Party has not, within thirty (30) days after written notification thereof from the non-defaulting Party, either fully remedied, or commenced and diligently pursued the remedy, of all adverse impacts on the non-defaulting Party resulting therefrom, all to the reasonable satisfaction of the non-defaulting Party.

11.2 Remedies Upon Event of Default. Upon the occurrence and continuation of an Event of Default, the non-defaulting Party shall have the right to terminate this Agreement and the Water Supply Agreement upon ten (10) days' prior written notice, and pursue any other remedy

available to such non-defaulting party at law or in equity arising out of such Event of Default, including a claim for monetary damage or specific performance.

11.3 Site Restoration Upon Termination. If either Party terminates this Agreement for any reason during construction, the Owners shall promptly withdraw from the Site and shall remove all Equipment, returning the Site to its previous condition, all at Owners' cost, provided that if the Owners terminate for an AWWU Event of Default under this Agreement or the Water Supply Agreement or Transportation Agreement, AWWU shall reimburse the Owners for the costs of such removal.

11.4 Automatic Cross-Agreement Termination. If this Agreement is terminated for any reason, the Water Supply Agreement and the Transportation Agreement shall automatically terminate effective as of the same date as this Agreement's termination.

11.5 Dispute Resolution. In the event of any dispute arising under this Agreement (a "Dispute"), within ten (10) Business Days following notice by either Party, (i) each Party shall appoint a representative, and (ii) the representatives shall meet, negotiate and attempt in good faith to resolve the Dispute quickly, informally and inexpensively. In the event the representatives cannot resolve the Dispute within thirty (30) Days after the first meeting, either Party may request that consideration and resolution of the Dispute be transferred to a designated representative of each Party's senior management. Within ten (10) Days following such a request, each Party shall submit a written summary of the Dispute describing the issues and claims to a senior officer of each Party designated to address the Dispute. Within ten (10) Business Days after receipt of each Party's Dispute summaries, the senior management representatives for both Parties shall negotiate in good faith to resolve the Dispute. If such senior management representatives are unable to resolve the Dispute within thirty (30) Days thereafter, either Party may pursue any available legal remedies.

ARTICLE 12.
REPRESENTATIONS

12.1 General Representations and Warranties. Each Owner and AWWU hereby represents and warrants that:

(a) It is duly organized, validly existing and in good standing under the Laws of the state of its formation and is duly qualified to do business in the jurisdiction where the Site is located.

(b) It has all necessary power and authority to execute, deliver and perform its obligations under this Agreement; its execution, delivery and performance of this Agreement have been duly authorized by all necessary corporate, municipal, or other action on its part; and this Agreement has been duly and validly executed and delivered by it and constitutes its legal, valid and binding obligation enforceable against it in accordance with its terms, except as the enforceability thereof may be limited by bankruptcy, insolvency, reorganization or moratorium or other similar Laws relating to the enforcement of creditors' rights generally and by general equitable principles.

(c) It is not in violation of any applicable Law, or any judgment entered by any federal, state, local or other Governmental Authority, which violations, individually or in the aggregate, would adversely affect its performance of any obligations under this Agreement. There are no legal or arbitration proceedings or any proceeding by or before any Governmental Authority, now pending or (to its best knowledge) threatened against it which, if adversely determined, could have a material adverse effect upon its financial condition, operations, prospects or business, as a whole, or its ability to perform under this Agreement.

(d) No authorization, approval, exemption, or consent of or by any Person is required by it in connection with the execution, delivery, and performance of this Agreement. In addition, each Party represents and warrants to the other Party that the Governmental Approvals required to be obtained by such Party either have been obtained by such Party and are in full force and effect on the date hereof or will be obtained by such Party and will be in full force and effect on or prior to the date on which they are required, under applicable Law, to be in full force and effect, so as to permit the Owners to commence and prosecute the Work to completion in accordance with the Project Schedule.

(e) The execution and delivery of this Agreement, and the consummation of the transactions herein contemplated and compliance with the terms and provisions hereof by it, will not conflict with or result in a material breach of, or require any consent under, any of its constitutive documents, or any applicable Law, or any agreement or instrument to which it is a party or by which it is bound or to which it is subject, or constitute a material default under any such agreement or instrument.

ARTICLE 13.
NOTICES

13.1 Writing. Except as set forth in Section 13.2, any notice, statement, demand, claim, offer or other written instrument required or permitted to be given pursuant to this Agreement shall be in writing signed by the Party giving such notice and shall be sent by email, facsimile, hand messenger delivery, overnight courier service, or certified mail (receipt requested) to the other Party at the address set forth in Exhibit L. Each Party shall have the right to change the address information to which notice shall be sent or delivered or to specify additional addresses to which copies of notices may be sent, in either case by similar notice sent or delivered in like manner to the other Party. All notices shall be effective upon receipt.

13.2 Technical Communications. Any technical or other communications pertaining to the Work shall be between the Project Manager and the AWWU Representative or other representatives appointed by the Project Manager or the AWWU Representative. Each Party shall notify the other in writing of the name of such representatives. The Project Manager or other designated representatives shall be reasonably satisfactory to AWWU, have knowledge of the Work, and be available at all reasonable times for consultation.

ARTICLE 14.

CONFIDENTIALITY; PUBLIC STATEMENTS

14.1 Confidentiality. The Parties agree that the Parties' proposals, communications, negotiations, and information exchanged prior to the Effective Date concerning this Agreement and the development thereof, and technical and other information regarding or relating to the Facility, the Access Bridges or the Work exchanged between the Parties that is or otherwise clearly communicated to the receiving Party as "Confidential" constitute "Confidential Information" of the disclosing Party. The Owners and AWWU each agree to hold such Confidential Information wholly confidential. Such Confidential Information may only be used by the Parties for the purposes related to the approval, or administration or enforcement of this Agreement.

14.2 Disclosure. Each Party agrees not to disclose Confidential Information of the other Party to any other Person (other than its Affiliates, counsel, consultants, lenders, partners, members, employees, officers and director, and then only to Persons subject to similar confidentiality restrictions as those set forth herein), without the prior written consent of the other Party, provided, that, either Party may disclose Confidential Information, if such disclosure is required by Law, including without limitation, pursuant to an order of a court or regulatory agency or in order to enforce this Agreement or to seek approval of this Agreement. In the event a Party is required by Law or a Governmental Authority to disclose Confidential Information, such Party, prior to such disclosure, shall provide reasonable advance notice to the other Party of the time and scope of the intended disclosure, in order to permit such non-disclosing Party the opportunity to obtain a protective order or to otherwise seek to prevent or limit the scope or otherwise impose conditions upon such disclosure.

14.3 Injunctive Relief. Each Party agrees that violation of the terms of Sections 14.1 and 14.2 constitutes irreparable harm to the other, and that the harmed Party may seek any and all remedies available to it at law or in equity, including but not limited to injunctive relief.

14.4 Release of Agreement. The Parties agree that this Agreement, upon execution, shall not be considered Confidential Information. Except as required by Law, releasing the Agreement to the public shall be the sole responsibility of the Owners, to be released in the manner at a time decided in their sole discretion.

14.5 AWWU Public Statements.

(a) Until that date upon which the Fish and Wildlife Program is approved by the Governor of Alaska, and absent any pending judicial review or appeal, any public statements made by AWWU about the Fish and Wildlife Program or the development of the Facility must be approved by the Owners, such approval not to be unreasonably withheld or delayed. Notwithstanding the foregoing, AWWU may respond to any inquiries from any Governmental Authority in a manner consistent with this Agreement.

(b) AWWU shall make best efforts to ensure that all of the employees, agents, contractors and consultants of AWWU do not engage in any public activities while acting as employees, agents, contractors or consultants of AWWU, to include the public expression of statements that are reasonably likely to have an adverse effect on the public's perception of the Fish and Wildlife Program and the development of the Facility, it being understood by both AWWU and the Owners that such negative public statements may undermine the ability of the Owners to satisfy their obligations under the 1991 Agreement; provided, however, that the Parties

acknowledge that AWWU cannot restrict the rights of such people to express their personal opinions as private citizens.

ARTICLE 15.
MISCELLANEOUS

15.1 Reasonability. The Parties shall act in a reasonable manner and in accordance with principles of good faith and fair dealing in the performance of this Agreement. Unless expressly provided otherwise in this Agreement and whether or not stated: (a) where this Agreement requires the consent, approval, or similar action by a Party, such consent or approval shall not be unreasonably withheld, conditioned, or delayed; and (b) wherever this Agreement gives a Party a right to determine, require, request, specify, or take similar action with respect to a matter, such determination, requirement, request, specification, or similar action must be reasonable.

15.2 Entire Agreement. This Agreement, together with all Schedule and Exhibits hereto, embodies the entire agreement and understanding of the Parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements and understandings of the Parties, verbal or written, relating to the subject matter hereof.

15.3 Waiver. Any waiver of the provisions of this Agreement must be in writing and shall not be implied by any usage of trade, course of dealing or course of performance. No exercise of any right or remedy by AWWU or the Owners constitutes a waiver of any other right or remedy contained or provided by Law. Any delay or failure of a Party to exercise, or any partial exercise of, its rights and remedies under this Agreement shall not operate to limit or otherwise affect such rights or remedies. Any waiver of performance hereunder shall be limited to the specific performance waived and shall not, unless otherwise expressly stated in writing, constitute a continuous waiver or a waiver of future performance.

15.4 Assignment. Neither Party shall assign this Agreement or any of its rights hereunder without the prior written consent of the other Party, which consent shall not be unreasonably withheld, conditioned or delayed. Notwithstanding the foregoing, either Party, without relieving itself from liability hereunder, and without the need for consent from the other Party, provided that any such assignee shall agree to be bound by all terms and conditions hereof, may transfer, pledge or assign this Agreement: (a) to any person or entity succeeding to all or substantially all of the assets of the assigning Party; or (b) to a successor entity in a merger or acquisition transaction. Any assignment made in contravention of this Section 15.4 shall be void and unenforceable.

15.5 Governing Law; Submission to Jurisdiction; Venue; No Jury Trial.

(a) Governing Law. THIS AGREEMENT SHALL BE GOVERNED BY, AND INTERPRETED AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF ALASKA, EXCLUDING ANY CHOICE OF LAW RULES.

(b) Submission to Jurisdiction, Venue. The Parties agree that any suit, action or other legal proceeding by or against any Party (or its Affiliates or designees) with respect to or arising out of this Agreement shall be brought exclusively in the courts of the State of Alaska, in the Municipality of Anchorage, as the Party instituting such suit, action or other legal proceeding

may elect, provided that claims related to federal water rights, federal legislation enabling the Facility or AWWU Facilities, or the 1991 Agreement may be brought in the United States District Court for the District of Alaska. By execution and delivery of this Agreement, each Party (for itself, its Affiliates and its designees) irrevocably and unconditionally consents and submits to the exclusive jurisdiction of such courts and the appellate courts therefrom, and waives any right it may have to assert the doctrine of forum non conveniens or similar doctrine or to object to venue with respect to any proceeding. The Parties irrevocably consent to the service of process in any such action or proceeding by the mailing of copies thereof by registered or certified mail, first class postage prepaid to the addresses set forth in Section 13.1.

(c) No Jury Trial. EACH OF THE PARTIES HEREBY WAIVES ANY AND ALL RIGHTS TO DEMAND A TRIAL BY JURY IN ANY ACTION, SUIT, OR PROCEEDING ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY.

(d) Duty to Proceed. Pending final resolution of any Dispute, the Owners and AWWU shall continue to fulfill their respective obligations hereunder that are not the subject of the Dispute.

15.6 Construction. This Agreement is to be construed so as to effectuate the normal and reasonable expectations of a sophisticated buyer and seller of the equipment and services covered by this Agreement and shall not be construed either for or against either Party. No provision of this Agreement shall be construed or interpreted for or against either Party because such Party drafted or caused its legal representative to draft the provision.

15.7 Headings. The titles or headings of the various sections, articles and paragraphs hereof are intended solely for convenience and ease of reference and are not intended, and are not to be deemed for any purpose, to modify or explain or place any interpretation or construction upon any of the provisions of this Agreement.

15.8 Status of the Parties. The Owners and its Subcontractors shall be independent contractors in relation to AWWU with respect to the Work; and neither the Owners nor their Subcontractors, nor the employees or agents of either, shall be deemed to be the employees, representatives or agents of AWWU in connection with any matter relating to this Agreement. No provision of this Agreement shall be construed or represented as creating a partnership, trust, joint venture, fiduciary or any similar relationship between the Parties.

15.9 Insurance. The Owners shall maintain the required insurance policies as set forth on Exhibit J-1 and AWWU shall maintain the required insurance policy as set forth on Exhibit J-2.

15.10 No Third Party Beneficiaries. This Agreement is made and entered into for the sole protection and legal benefit of the Owners and AWWU, and their permitted successors and assigns, and no other person shall be a direct or indirect legal beneficiary of, or have any direct or indirect cause of action or claim in connection with, this Agreement.

15.11 Further Assurances. Each Party agrees to execute and deliver all further instruments and documents, and take all further action, as may be reasonably necessary to

complete performance by the Parties hereunder and to effectuate the purposes and intent of this Agreement.

15.12 Amendments. Except for any Change Order issued pursuant to ARTICLE 7, a removal of an Owner pursuant to Section 2.5, or a redesignation of the Project Manager, the AWWU Representative or notice information under Section 13.1, no change, amendment or modification of this Agreement shall be valid or binding upon the Parties unless such change, amendment or modification shall be in writing and duly executed by the Parties.

15.13 Severability. If any provision of this Agreement is determined to be illegal or unenforceable, such determination will not affect any other provision of this Agreement and all other provisions will remain in full force and effect.

15.14 Conflicting Provisions. In the event of any conflict between this document and any Schedule or Exhibit attached hereto, the terms and provisions of this document, as amended from time to time, shall control. In the event of any conflict among the Exhibits, the Exhibit of the latest date mutually agreed to by the Parties shall control.

15.15 Survival. The provisions of ARTICLE 1, ARTICLE 6, ARTICLE 8, ARTICLE 9, ARTICLE 10, ARTICLE 11, ARTICLE 12, ARTICLE 13, and ARTICLE 15 shall survive termination of this Agreement for any reason.

15.16 Counterparts. This Agreement may be executed in any number of separate counterparts and delivered by electronic means, each of which when so executed shall be deemed an original, and all of said counterparts taken together shall be deemed to constitute but one and the same instrument.

[***Remainder of page intentionally left blank***]

IN WITNESS WHEREOF, the Parties have caused this Water Facilities Interconnection Agreement to be executed by their duly authorized representatives as of the Effective Date.

Schedule 1.1

Definitions

"1991 Agreement" means that certain Agreement between the Municipality of Anchorage, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., the United States Fish and Wildlife Service, the National Marine Fisheries Service, the State of Alaska, and the Alaska Energy Authority Relative to the Eklutna and Snettisham Hydroelectric Projects, dated August 7, 1991, as amended.

"Access Bridges" has the meaning set forth in the Recitals.

"Affiliate" means, with respect to any Person, any other Person controlling, controlled by or under common control with such first Person. For purposes of this definition and the Agreement, the term "control" (and correlative terms) means (1) the ownership of 50% or more of the equity interest in a Person, or (2) the power, whether by contract, equity ownership or otherwise, to direct or cause the direction of the policies or management of a Person.

"Agreement" has the meaning set forth in the Preamble, and shall include all Exhibits and Schedules hereto.

"Approvals" means Governmental Approvals and third-party approvals.

"AWWU" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of AWWU.

"AWWU Approvals" has the meaning set forth in Section 3.2.

"AWWU Event of Default" has the meaning set forth in Section 4.1.

"AWWU Isolation Valve" has the meaning set forth in Exhibit A-1.

"AWWU Facilities" has the meaning set forth in the Recitals.

"AWWU Representative" means the person designated by AWWU in accordance with Section 3.3 to act as the Owners' primary point of contact with AWWU.

"AWWU's Portion" has the meaning set forth in Exhibit A-1.

"AWWU's Water Permit" means that permit belonging to AWWU (LAS 2569) to use Owners' Water Rights for up to 41 million gallons per day for public water supply pursuant to the Act of October 30, 1984, 98 Stat. 2823, as may be replaced as described in Section 3.1 of the Water Supply Agreement.

"AWWU's Water" means any and all water belonging to AWWU pursuant to AWWU's Water Permit.

"Business Day" means any day other than a Saturday, Sunday or legal holiday in the state of Alaska.

"Change Order" means a written order signed by Project Manager and AWWU authorizing a change in the Work or an adjustment in the Project Schedule for performance or delivery of the Work.

"Chugach" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of Chugach.

"Commercial Operation" means that: (a) Owners have completed the Commissioning Procedures and the Facility has met the Facility Criteria; and (b) Owners have provided the Commercial Operation Certificate to AWWU.

"Commercial Operation Certificate" has the meaning set forth in Section 4.7.

"Commercial Operation Date" means the date upon which Commercial Operation is achieved.

"Commissioning Procedures" means a test of function of the Facility in accordance with the Commissioning Procedures Guidelines and Section 4.5.

"Commissioning Procedures Guidelines" means the guidelines for the Commissioning Procedures set forth on Exhibit E.

"Confidential Information" has the meaning set forth in Section 14.1.

"Construction Start CPs" has the meaning set forth in Section 4.1.

"Cost Responsibility Proportion" shall mean, with respect to each Owner, the percentage of the total applicable Eklutna Hydroelectric Project costs that such Owner is obligated to pay as agreed to by the Owners, which as of the Effective Date shall be, with respect to MOA, 19.05%, with respect to Chugach, 64.28%, and with respect to MEA, 16.67%, and which may be changed hereunder upon agreement between the Owners at any time.

"Day" or "day" means a calendar day, unless expressly specified otherwise.

"Delivery Point" has the meaning set forth in Exhibit A-1 and is depicted on the schematic included as part of Exhibit B.

"Delivery Point Meter" has the meaning set forth in Exhibit A-1.

"Dispute" has the meaning set forth in Section 11.5.

"Effective Date" has the meaning set forth in the Preamble.

"Eklutna Hydroelectric Project" means the Eklutna Hydroelectric Project initially authorized, constructed and operated pursuant to the Eklutna Project Act of July 31, 1950 (64 Stat. 382, as amended), including any and all property and facilities acquired or used in connection therewith, all of which was then sold to the Owners by the United States of America on October 2, 1997.

"Equipment" means all of the equipment, materials, apparatus, structures, supplies and other goods required by the terms of this Agreement to complete the Work and to be incorporated into the Facility. Equipment shall not include any materials, apparatus or tools owned by the Owners or any Subcontractor that are used to complete the Work but are not contemplated under this Agreement to become part of the Work or the Facility.

"Equipment Documentation" means copies or originals of all recommended operating specifications, warranties, manuals, test reports, vendor information and all other similar information obtained or prepared, and to be delivered, by the Owners in accordance with the terms of this Agreement.

"Event of Default" has the meaning set forth in Section **Error! Reference source not found.**1.

"Facility" has the meaning set forth in the Recitals.

"Facility Criteria" means the criteria set forth in Exhibit I.

"Final Acceptance" means the final acceptance of the Work by AWWU, as demonstrated by the process set forth in Section 4.5.

"Final Acceptance Items" has the meaning set forth in Section 4.5.

"Fish and Wildlife Program" has the meaning set forth in the Recitals.

"Force Majeure Event" means the occurrence of any act or event beyond the reasonable control of the Party affected that prevents the affected Party from performing its obligations under this Agreement, in full or part, if such act or event is beyond the reasonable control of, and not the result of the fault or negligence of, the affected Party and such Party has been unable to overcome such act or event with the exercise of due diligence (including the expenditure of reasonable sums), including the following: drought, flood, earthquake, storm, fire, lightning, epidemic, war, riot, civil disturbance, sabotage, terrorism or threat of terrorism, strike or labor difficulty, accident or curtailment of supply or equipment, total casualty to equipment, or restraint, order or decree by a Governmental Authority. Notwithstanding the foregoing, Force Majeure Events shall expressly not include mechanical or equipment failures (except to the extent any such failure is itself caused by a Force Majeure Event), nor any diminution in water quality in Eklutna Lake.

"Governmental Approvals" means all authorizations, consents, licenses, leases, rulings, certifications, registrations, exemptions, permits, certificates, and approvals from any Governmental Authority.

"Governmental Authority" means any federal, state or local government, any political subdivision thereof, or any governmental, quasi-governmental, judicial, public or statutory instrumentality, administrative agency, authority, body or other entity having jurisdiction over the performance of the Work, the Facility or its operations, or the health, safety or environmental conditions of the Site or otherwise over the Parties.

"Hazardous Material" means any waste, chemical or other substance or material that is defined as "hazardous" or "toxic" or by any other similar term under any applicable Law relating to environmental, health or safety matters.

"Indemnified Parties" has the meaning set forth in Section 10.1.

"Indemnifying Party" has the meaning set forth in Section 10.3.

"Injection Point" means the point where AWWU Facilities meet facilities owned by the Owners near the outlet of the Eklutna Lake, where AWWU receives all of AWWU's Water from Eklutna Lake, as depicted in the schematic included as part of Exhibit B.

"Isolation Valve Structure" has the meaning set forth in Exhibit A-1.

"Isolation Valves" has the meaning set forth in Exhibit A-1.

"Law" means any constitution, charter, act, statute, law, ordinance, code, rule, regulation, order, specified standards or objective criteria contained in any applicable permit or approval (which standards or criteria must be met in order for the Work to be performed lawfully) or other legislative or administrative action of any Governmental Authority or a final decree, judgment or order of a court or tribunal.

"Liabilities" has the meaning set forth in Section 10.1.

"MEA" has the meaning set forth in the Preamble, and shall include all successor sand assigns of MEA.

"MOA" has the meaning set forth in the Preamble, and shall include all successor sand assigns of MOA.

"Non-Owner Work" has the meaning set forth in Section 8.4.

"Owners" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of the Owners.

"Owner" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of an Owner.

"Owners' Isolation Valve" has the meaning set forth in Exhibit A-1.

"Owners' Portion" has the meaning set forth in Exhibit A-1.

"Owners' Water" means any and all water belonging to the Owners pursuant to the Owners' Water Rights.

"Owners' Water Rights" means that certain senior priority water right held by the Owners for the water in Eklutna Lake for use in generating power for the Eklutna Hydroelectric Project as described in water rights certificate ADL 44944.

"Party" and "Parties" has the meaning set forth in the Preamble.

"Person" means any individual, partnership, corporation, limited liability company, association, business, trust, government or political subdivision thereof, Governmental Authority or other entity.

"Project Manager" means the Project Manager designated by the Owners in accordance with Section 2.5.

"Project Schedule" means the Project Schedule attached hereto as Exhibit D.

"Prudent Industry Standards" means those standards of care and diligence normally practiced by water transportation infrastructure engineering, construction and installation firms in performing services of a similar nature in a similar jurisdiction in which the Work will be performed. Prudent Industry Standards are not intended to be limited to optimum practice or methods, but rather to be a spectrum of reasonable

and prudent practices and methods that must take the conditions specific to any given water transportation facility under consideration.

"River Release Structure" has the meaning set forth in Exhibit A-1.

"Scope of Work" means the Scope of Work attached hereto as Exhibit C.

"Site" means the location of the Facility as further described in Exhibit B.

"Standard of Work" has the meaning set forth in Section 2.2.

"Subcontractor" means any Person with whom the Owners, or any individual Owner, enters into an arrangement for the performance of any portion of the Work, including Persons at any tier with whom any Subcontractor has further subcontracted any portion of the Work, and the legal or personal representatives, successors, and assigns of such Person.

"Transportation Agreement" has the meaning set forth in the Recitals.

"Unanticipated Conditions" has the meaning set forth in Section 7.3.

"Warranty Period" has the meaning set forth in Section 8.2.

"Water Supply Agreement" has the meaning set forth in the Recitals.

"Work" means all phases of Owners' performance of their construction-related obligations under this Agreement, including engineering, design, procurement, construction, erection, installation, training, testing with respect to the Facility, and the installation of the Access Bridges. For the sake of clarity, any operation and maintenance of the Facility occurring after Final Acceptance does not constitute Work hereunder, unless such operation or maintenance is being conducted pursuant to the warranty provisions set forth in ARTICLE 8.

Schedule 3.5[5]

Site and AWWU Facilities Conditions

[5] **Note to Accompany Final Draft**: This Exhibit will be populated by AWWU after Governor approval and prior to signing.

Exhibit A-1[6]

Eklutna River Release Facility Description and Definitions

The ***"Eklutna River Release Facility"*** shall consist of an Isolation Valve Structure and the River Release Structure.

The "***Isolation Valve Structure***" shall include:

- a new tee to be built in the AWWU pipeline downstream of the AWWU tunnel/pipeline transition and upstream of the AWWU portal valve (the "***Delivery Point***")
- A 54-inch gate valve on the main segment of AWWU pipeline intended to provide dual means of isolation for AWWU's pipeline segment ("***AWWU Isolation Valve***")
- A 42-inch gate valve on the branch segment of AWWU pipeline intended to provide isolation to the river release structure ("***Owners' Isolation Valve***", together with the AWWU Isolation Valve, the "***Isolation Valves***").
- Related controls and communication technology to be installed by the Owners in the main line of the AWWU Facilities.

The "***River Release Structure***" shall include:

- [A new pipeline from the Isolation Valve Structure to the Eklutna River]
- Control valves
- A new meter installed at the Delivery Point ("***Delivery Point Meter***")
- Monitoring and control equipment to be installed by Owners [*describe where]*.

"***AWWU's Portion***" of the Facility shall consist of the Isolation Valve Structure [and _____]

The "***Owners' Portion***" of the Facility shall consist of the River Release Structure [and _____]

---

Execution Version

Exhibit C

Scope of Work[10]

(a) Supply and Procurement. Owners shall at their own expense procure or supply and pay for all of the Equipment, and arrange and pay for the delivery of all of the Equipment to the Site.

(b) Engineering and Design. Owners shall at their own expense design and provide engineering services with respect to the Facility in a manner that shall be:

(i) Consistent with the actual conditions existing at the Site;

(ii) Consistent with the requirements set forth in this Scope of Work;

(iii) Sufficient, complete, and adequate in all respects necessary to enable the Facility to satisfy (A) the Facility Criteria and (B) all required Governmental Approvals;

(iv) In conformance with applicable Laws, including national, state, and local engineering, construction, safety, and electrical codes and standards, as specified in the Scope of Work, or if none are specified for the particular matter, with Prudent Industry Standards; and

(v) In form and content acceptable to all Governmental Authorities.

(c) Construction and Installation. Owners shall provide, install, complete and pay for all labor, Equipment, tools, supplies, construction equipment and machinery, utilities and consumables, transportation and other facilities and services (including any temporary materials, equipment, supplies and facilities) necessary for the proper execution and completion of the Work. All construction and installation performed by the Owners under this Agreement shall be in accordance with the given manufacturer's written instructions and Prudent Industry Standards, in each case unless otherwise agreed by AWWU in advance in writing.

(d) Utilities. The Owners shall provide all of the transmission, power, and communication facilities necessary for construction.

(e) Equipment Documentation and Equipment Training. The Owners shall provide AWWU with all Equipment Documentation for the AWWU Portion, and shall provide AWWU's personnel with up to five (5) days of on-site training in the use and operation of the AWWU Portion, as further detailed in the Transportation Agreement.

---

[10] **Note to Accompany Final Draft**: This Exhibit is subject to further revisions and will be finalized after Governor approval and prior to signing.

(f) Approvals. Except for applicable AWWU Approvals, the Owners shall obtain and maintain all Approvals (including all fees and permits) required to perform the Work, including (without limitation) approvals and agreements required to interconnect the Facility with the AWWU Facilities. The Owners shall pay for all such Approvals, and shall reimburse AWWU for costs associated with obtaining and maintaining all AWWU Approvals. Owners shall promptly provide AWWU with copies of all such Approvals upon the Owners' obtaining such Approvals. In order to assist the Owners in obtaining such Approvals, AWWU shall provide the Owners with such reasonable assistance as the Owners may request.

(g) Security. The Owners shall be responsible for the security of the Work and shall construct security facilities (e.g. fencing surrounding the Facility at the Site) to ensure the security of the Work. The Owners shall coordinate with AWWU for the ingress and egress of the Owners' personnel to and from the Site to minimize disruption of AWWU operations.

(h) Conduct at Site. AWWU shall have access to the Site at all times, and the Owners shall, and shall require their Subcontractors to, use commercially reasonable efforts to avoid inhibiting the operations of AWWU at the Site, and the operation of the AWWU Facilities. The Owners shall comply with work rules and work hours reasonably established by AWWU with regard to Work involving the AWWU Facilities.

LONG-TERM WATER TRANSPORTATION AGREEMENT

This LONG-TERM WATER TRANSPORTATION AGREEMENT (this "Agreement"), dated as of [_____] (the "Effective Date"), is entered into by and between Anchorage Water and Wastewater Utility ("AWWU"), and Chugach Electric Association, Inc. ("Chugach"), Matanuska Electric Association, Inc. ("MEA"), and the Municipality of Anchorage ("MOA") (each of Chugach, MEA, and MOA is an "Owner" and collectively they are referred to as the "Owners"). The Owners and AWWU are sometimes referred to herein as a "Party" or collectively as the "Parties".

RECITALS

WHEREAS, the Owners own and operate the Eklutna Hydroelectric Project, commissioned in 1954, which includes an earthen dam at the outlet of Eklutna Lake and which, under normal operating conditions, diverts all inflows of water into the Eklutna Lake for hydroelectric production rather than into the Eklutna River;

WHEREAS, AWWU owns and operates certain existing water transportation facilities integrated with the Eklutna Hydroelectric Project as further described and depicted in Exhibit B (the "AWWU Facilities") located near the outlet of Eklutna Lake and adjacent to the Eklutna River, which AWWU uses to provide public water supply for its customers;

WHEREAS, the Owners are parties to the 1991 Agreement (as defined below), pursuant to which they are required to develop and implement a Fish and Wildlife program every thirty-five years to protect, mitigate damages to, and enhance fish and wildlife impacted by the development of the Eklutna Hydroelectric Project (the "Fish and Wildlife Program");

WHEREAS, as a result of the process set forth in the 1991 Agreement, the Owners have developed a draft Fish and Wildlife Program in which the Owners propose to: (1) develop an Eklutna River release facility consisting in part of AWWU Facilities and facilities constructed pursuant to the Interconnection Agreement, all as further described in Exhibit A and as will be depicted as-built in the Operating Procedures (the "Facility"); (2) to transport water from Eklutna Lake through the Facility and release it into the Eklutna River; and (3) to maintain and operate the Facility;

WHEREAS, in connection with the execution of this Agreement and in order to enable future implementation of the Fish and Wildlife Program (if approved by the Governor of Alaska) and address compensation for AWWU's use of Owners' Water Rights, the Parties also entered into a Water Facilities Interconnection Agreement (the "Interconnection Agreement") pursuant to which the Parties will construct the Facility, and a new Public Water Supply Agreement (the "Water Supply Agreement");

WHEREAS, after the Facility achieves Final Acceptance pursuant to the terms of the Interconnection Agreement and all other conditions precedent set forth herein are achieved, (1) the Owners' desire to engage AWWU to provide, and AWWU desires to provide, the Water Transportation Services; and (2) the Owners and AWWU each desire to operate and maintain portions of the Facility pursuant to the terms and conditions set forth in this Agreement;

NOW, THEREFORE, in consideration of the premises of this Agreement, the Interconnection Agreement, and the Water Supply Agreement, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Owners and AWWU, intending to be legally bound, hereby agree as follows:

ARTICLE 1.
DEFINITIONS; INTERPRETATION; EXHIBITS

1.1 Defined Terms. Capitalized terms used in this Agreement without other definition shall have the meanings set forth in Schedule 1.1, unless the context requires otherwise.

1.2 Interpretation. As used in this Agreement, the terms "herein," "herewith" and "hereof" are references to this Agreement, taken as a whole; the terms "includes" or "including" shall mean "including, without limitation"; and references to a "Section," "Article", "Exhibit" or "Schedule" shall mean a Section, Article, Exhibit or Schedule of this Agreement, as the case may be, unless in any such case the context requires otherwise. All references to a given Exhibit, Schedule, agreement, instrument or other document shall be a reference to that agreement, instrument or other document as modified, amended, supplemented and restated through the date as of which such reference is made. A reference to a Person includes its permitted successors and permitted assigns. The singular shall include the plural and the masculine shall include the feminine and neuter, and vice versa.

ARTICLE 2.
TERM

2.1 Term.

(a) The term of this Agreement shall commence on the Effective Date and continue until the conclusion of the Delivery Term or unless earlier terminated pursuant to the terms of this Agreement (the "Term").

(b) AWWU's obligation to provide the Water Transportation Services and the Parties' obligations to commence the Operational Work hereunder shall be effective on the date upon which the Facility achieves Final Acceptance under terms of the Interconnection Agreement (the "Delivery Term Effective Date") and shall continue in full force and effect for 35 years thereafter, subject to any early termination provisions set forth herein (the "Initial Delivery Term"). At the conclusion of the Initial Delivery Term, the Agreement shall automatically renew each year, unless a Party notifies the other Party at least 60 days prior to the expiration of the Initial Delivery Term or each extended year thereafter that it does not wish to renew the Agreement. The Initial Delivery Term as so extended is the "Delivery Term".

ARTICLE 3.
WATER TRANSPORTATION AND SCHEDULING

3.1 Water Transportation Services. During the Delivery Term, AWWU shall, pursuant to the schedules set forth in Section 3.2 and the Operating Procedures developed pursuant to Section 3.3, transport Owners' Water, comingled with and undifferentiated from AWWU's Water, through AWWU Facilities from the Injection Point to the Delivery Point, in any amount requested

by the Owners (the "Water Transportation Services"), provided, that, such requested amount shall under no circumstances: (a) inhibit the ability of AWWU to deliver a daily flow rate of at least 41 MGD to the downstream Eklutna Water Treatment Facility at a pressure sufficient to allow normal operation of the EWTF as currently configured; (b) exceed the hydraulic capacity or design criteria of the AWWU Facilities; or (c) exceed any then-active Curtailment Limit (clauses (a)-(c), the "Water Release Limits").

3.2 Scheduling.

(a) During the first week of each month of each year of the Delivery Term, and in accordance with the Operating Procedures, the Owners shall provide AWWU with a written anticipated daily Owners' Water release schedule for the following month (e.g., on the first Business Day of January, the Owners shall provide the anticipated schedule for each day of February) based on Eklutna Lake levels and Fish and Wildlife Program obligations, all subject to the Water Release Limits (the "Monthly Water Release Schedule").

(b) No later than the last Business Day of each week of the Delivery Term, the Owners may submit in writing in accordance with the Operating Procedures, updated daily Owners' Water release amounts for the following week, provided that under no circumstance shall such updates exceed the Water Release Limits.

3.3 Metering.

(a) At all times during the Delivery Term, AWWU shall maintain an Injection Point Flow Meter to measure real-time water flowing into AWWU's Facilities from Eklutna Lake.

(b) At all times during the Delivery Term, the Owners shall maintain the Delivery Point Meter to measure real-time water quantities flowing into the River Release Structure at the Delivery Point, which shall be used to calculate the amount of Owners' Water received by the Owners as part of the Water Transportation Services.

(c) Each Party shall take reasonable measures to ensure that the other Party has access to real-time water flow quantity information from both the Injection Point Flow Meter and the Delivery Point Meter, as applicable, pursuant to procedures set forth in the Operating Procedures.

(d) For each month of the Delivery Term, the Owners shall prepare a written report for AWWU detailing the actual water flow amounts through the Injection Point Flow Meter and the Delivery Point Meter, and the amount of Owners' Water delivered to the Delivery Point, all as compared with the Monthly Water Release Schedule (as updated by Section 3.2(b) and pursuant to the procedures detailed in the Operating Procedures).

ARTICLE 4.
OPERATION AND MAINTENANCE

4.1 AWWU Facilities and AWWU's Portion. Throughout the Delivery Term, the AWWU Facilities and AWWU's Portion shall be exclusively operated, managed, and maintained by AWWU or any AWWU designee in accordance with all Governmental Approvals, applicable

Law, Prudent Industry Standards, all subject to the Owners' maintenance access rights to the Owners' Isolation Valve as set forth in Section 4.3.

4.2 Owners' Portion. Throughout the Delivery Term, the Owners' Portion shall be exclusively operated, managed, and maintained by the Owners or any designee of the Owners in accordance with all Governmental Approvals, applicable Law, and Prudent Industry Standards.

4.3 Owners' Isolation Valve. Throughout the Delivery Term, the Owners shall be responsible for all operation and maintenance of the Owners' Isolation Valve contained within AWWU's Portion. As part of the Access License granted by AWWU to the Owners pursuant to Section 9.1, AWWU shall ensure that at all times the Owners have access to the Owners' Isolation Valve as necessary to enable the Owners to maintain and operate the Owners' Isolation Valve in accordance with the Operating Procedures, provided, that, AWWU may from time to time assume operational responsibility for the Owners' Isolation Valve temporarily only to the extent necessary to address urgent security or safety issues and to avoid putting AWWU's public water supply at risk of interruption or contamination.

4.4 Approvals. Throughout the Delivery Term, AWWU shall be responsible for obtaining and maintaining all Approvals necessary for the provision of Water Transportation Services and all Operational Work set forth herein, except for those Approvals set forth on Exhibit C hereto, for which the Owners will be responsible for obtaining and maintaining (the "Owners' Approvals"). Each Party shall provide the other Party with such reasonable assistance as such first Party may request in obtaining applicable Approvals.

4.5 Duty to Cooperate. Each Party shall, throughout the Delivery Term, cooperate with the other Party as necessary to facilitate the provision of the Water Transportation Services, the Operational Work and all other responsibilities and obligations under this Agreement in a timely manner.

4.6 Skill and Expertise. Each Party shall, throughout the Delivery Term, use commercially reasonable efforts to ensure that all employees and contractors engaged in connection with the provision of the Water Transportation Services, the Operational Work or any other maintenance of, operation of, service of, and any future modification to (to include design, construction, commissioning, and installation) the Facility shall have the appropriate and necessary experience, skill and expertise to carry out the tasks efficiently, professionally, and in accordance with Prudent Industry Standards and applicable Law.

4.7 Successor Operator. If, during the Term, the Owners wish to no longer be responsible for any of the operation and maintenance responsibilities set forth in Sections 4.2 and 4.3, for any reason, prior to turning over such operation and maintenance to a third-party entity, AWWU must consent to such third-party entity, such consent not to be unreasonably withheld, conditioned, or delayed. For the sake of clarity, this Section 4.7 does not impact the Owners' right to freely use Subcontractors to conduct any of its responsibilities under Sections 4.2 and 4.3; this Section 4.7 only applies in situations where the Owners plan to no longer be ultimately liable for such obligations hereunder.

ARTICLE 5.
OPERATING PROCEDURES

5.1 Operating Procedures.

(a) At least 60 days prior to the commencement of the Delivery Term, AWWU and the Owners shall develop written detailed operating procedures governing the Water Transportation Services pursuant to the terms in this Agreement (the "Operating Procedures"). Such Operating Procedures shall comply with all applicable Approvals, Prudent Industry Standards and applicable Law and shall, at a minimum, set forth (i) the agreed methods for day-to-day communication and reporting requirements of each Party; (ii) key personnel lists for AWWU and for the Owners necessary for the facilitation of the Operational Work and the provision of the Water Transportation Services; (iii) processes for planning and communication between the Parties to coordinate regarding scheduling pursuant to Section 3.2 and Excused Events pursuant to Article 8; (iv) reporting and determining Curtailment Durations and Curtailment Limits for Excused Events pursuant to Article 8; (v) sharing of information from the Delivery Point Meter and the Injection Point Flow Meter pursuant to Section 3.3; (vi) ongoing reporting requirements of the Owners of metered water flow quantities measured at the Delivery Point and the Injection Point pursuant to Section 3.3; (vii) the process for obtaining and maintaining necessary Approvals throughout the Delivery Term; (viii) reference to necessary Facility equipment specifications and operation and maintenance manuals; (ix) inclusion of the final as-built drawings for the Facility developed pursuant to the Interconnection Agreement; (x) a clear process for ensuring that at all times during the Delivery Term, the Water Release Limits are met; (xi) each Party's legal notice address information for the delivery of notices required under this Agreement; and (xii) any other procedures related to the provision of the Water Transportation Services and Operational Work that the Parties deem necessary. Such Operating Procedures shall include any and all detailed definitions, drawings, and descriptions of the AWWU Facilities and the Facility as necessary to facilitate the coordination and responsibilities of the Parties as set forth herein. In the event of any disagreement in the development of the Operating Procedures, the Parties shall work in good faith to promptly resolve differences. AWWU's actual costs of developing such Operating Procedures shall be reimbursed by the Owners pursuant to Section 6.3.

(b) Throughout the Delivery Term, the Operating Procedures shall be updated from time to time by AWWU as needed upon written notice to the Owners, or upon written request by the Owners, to reflect ministerial changes to ensure continued accuracy and relevancy (e.g. personnel, contact/notice information, and Facility equipment upgrades), provided, that, such changes made pursuant to this Section 5.1(b) shall under no circumstances materially modify the obligations and responsibilities of the Parties as set forth herein.

ARTICLE 6.
COSTS; TAXES; REIMBURSEMENT

6.1 Costs and Compensation. Unless specifically stated otherwise, all costs borne initially by each Party in connection with the exercising of its rights and the performance of its obligations under this Agreement shall be the responsibility of such Party initially incurring such costs. In partial consideration of the costs to AWWU incurred in provision of the Water Transportation Services provided under this Agreement for the benefit of the Owners, the Parties

entered into the Water Supply Agreement for the same duration as this Agreement, pursuant to which AWWU shall have access to the use of certain of the Owners' facilities without additional compensation for its provision of public water supply.

6.2 Taxes. The Owners shall be responsible for and shall reimburse AWWU for any sales, use, gross receipts, occupation, and other taxes (excluding income, and franchise tax) imposed upon AWWU from time to time payable related to AWWU's provision of services set forth herein.

6.3 Reimbursement. For those AWWU costs that the Owners are specifically required to reimburse hereunder, AWWU shall submit to each of the Owners a detailed accounting of such cost for which AWWU is seeking reimbursement, together with such supporting documentation as the Owners shall reasonably require, including a reference to the applicable section of this Agreement demonstrating the Owners' responsibility for such costs. Within sixty (60) Days after receiving a properly completed application for reimbursement and all required supporting documentation, each of the Owners shall individually: (i) pay AWWU their respective Cost Responsibility Proportion of the amounts set forth in AWWU's application for payment; or (ii) notify AWWU in writing that such Owner believes in good faith that a requested payment amount is not due and owing and shall request the commencement of negotiations pursuant to Section **Error! Reference source not found.**. In addition to the requirement that each Owner pay its Cost Responsibility Proportion as required in this Section, the Owners shall each be jointly and severally liable for all reimbursement obligations owed to AWWU under this Article 6.

ARTICLE 7.
TITLE

7.1 Title; Custody; Risk of Loss

(a) Legal title to and ownership of all Owners' Water shall remain with the Owners at all times during the provision of Water Transportation Services.

(b) For Owners' Water flowing through AWWU's Facilities as part of the Water Transportation Services: control, custody and risk of loss of such Owners' Water shall transfer from the Owners to AWWU at the Injection Point, where such Owners' Water shall comingle with AWWU's Water until reaching the Delivery Point, at which point the custody, control and risk of loss for an amount of water equal to the original amount of Owners' Water released into the AWWU Facilities at the Injection Point shall pass back to the Owners.

ARTICLE 8.
EMERGENCY CURTAILMENT; FORCE MAJEURE

8.1 Outages

(a) Planned Outages. AWWU shall be excused from the performance of the Water Transportation Services in the event of Planned Outages noticed by and compliant with this Section 8.1(a). AWWU and the Owners shall develop a schedule and protocol, pursuant to the procedures set forth in the Operating Procedures, for Planned Outages of the Facility or the AWWU Facilities in order to allow for routine maintenance and inspection activities. Such

schedule for each Planned Outage shall specify the associated Curtailment Limits and Curtailment Duration. Such schedule and protocol shall take into account routine hydropower operations to ensure that Planned Outages only be scheduled at times when there is sufficient water available in Eklutna Lake to allow water releases through the maintenance gate of the diversion dam in the amounts necessary for the Owners to meet their obligations under the Fish and Wildlife Program. In addressing Planned Outages on AWWU Facilities and the AWWU Portion, AWWU shall use commercially reasonable efforts to minimize the length of the Curtailment Duration and the level of Curtailment Limits. For the sake of clarity, planned outages to AWWU Facilities or other AWWU property downriver of the Isolation Valve Structure do not meet the definition of Planned Outage and are addressed in Section 8.1(c)(i) below.

(b) Forced Outages. AWWU shall be excused from the performance of the Water Transportation Services in the event of Forced Outages noticed by and compliant with this Section 8.1(b). AWWU shall (i) use commercially reasonable efforts to notify the Owners of any Forced Outage, and (ii) provide an initial written or email estimate of the expected Curtailment Duration and Curtailment Limit within two (2) hours thereafter. In managing Forced Outages, AWWU shall use commercially reasonable efforts to minimize the duration of resulting Curtailment Duration and the level of Curtailment Limits. For the sake of clarity, forced outages to AWWU Facilities or other AWWU property downriver of the Isolation Valve Structure do not meet the definition of Forced Outage and are addressed in Section 8.1(c)(ii) below. During a Forced Outage, the Owners shall be responsible for complying with their Fish and Wildlife Program obligations through other means (such as releasing water into the river through the maintenance gate of the diversion dam).

(c) Outages to Downstream AWWU Infrastructure.

(i) In the event of any planned outage in the AWWU Facilities or in other AWWU property downstream of the Isolation Valve Structure that, without the closing of the Owners' Isolation Valve, would have an effect on the flow of water through the AWWU Facilities from the Injection Point to the River Release Structure, AWWU must notify the Owners at least thirty (30) days in advance of such planned outage to allow the Owners to adjust the Owners' Isolation Valve in such a way that allows for continued Water Transportation Services during such outage.

(ii) In the event of any forced, unexpected outage in the AWWU Facilities or at the Eklutna Water Treatment Facility downstream of the Isolation Valve Structure that, without the closing of the Owners' Isolation Valve, would have an effect on the flow of water through the AWWU Facilities from the Injection Point to the River Release Structure, AWWU shall notify the Owners as soon as possible to allow for the Owners to adjust the Owners' Isolation Valve to allow for the greatest possible continued flows of water into the Eklutna River through the River Release Structure during the duration of such forced outage.

8.2 Force Majeure. Each Party shall be excused from performance and shall not be considered to be in default with respect to any obligation hereunder, except for the Owners' obligation to reimburse AWWU for costs pursuant to Section 6.3, if and to the extent that such Party's failure of, or delay in, performance is due to a Force Majeure Event; provided, that:

(a) such Party gives the other Party prompt written notice describing the particulars of the Force Majeure Event as soon as is reasonably practicable after becoming aware of the occurrence of the Force Majeure Event;

(b) the suspension of performance is of no greater scope and of no longer duration than is reasonably required by the Force Majeure Event;

(c) no obligations of affected Party that arose before the occurrence of the Force Majeure Event causing the suspension of performance shall be excused as a result of such Force Majeure Event, unless and only to the extent that the performance of such obligations is impaired by the Force Majeure Event;

(d) the Party uses diligent commercially reasonable efforts to overcome or mitigate the effects of the Force Majeure Event; and

(e) when the Party is able to resume performance of its obligations under this Agreement, such Party shall give the other Party written notice to that effect and shall promptly resume performance hereunder.

ARTICLE 9.
ACCESS; ROADS AND BRIDGES

9.1 Site Access. Throughout the Delivery Term, AWWU shall, with respect to the land and access roads within its control, provide the Owners with a non-exclusive license to access the Site (through use of AWWU's access road), AWWU's Portion, and the AWWU Facilities as necessary to enable the Owners to operate and maintain the Owners' Isolation Valve and the Owners' Portion, and as otherwise reasonably necessary to facilitate the Owners' rights and obligations hereunder (the "Access License"), provided, that, AWWU may from time to time limit access to the Site or the AWWU Facilities temporarily only to the extent necessary to address reasonable security or safety issues and to avoid putting AWWU's public water supply at risk of interruption or contamination. To the extent that any additional access permissions from third-party landowners adjacent to the Site may be required for the Owners to exercise their rights or perform their obligations hereunder, obtaining such Approvals shall be the responsibility of the Owners, subject to AWWU's duty to assist and cooperate under Section 4.5, and provided that such assistance and cooperation with respect to such third-party approvals may require that AWWU be the first and primary point of contact with such third party in situations where AWWU has an existing easement or applicable existing relationship with such third party. AWWU shall be reimbursed for any and all of its reasonable and documented costs or expenses of providing such assistance and cooperation with respect to such third-party approvals. To the extent that AWWU adds access or other security or safety limitations to the Site, to AWWU's Portion or to the AWWU Facilities, the Owners and AWWU shall cooperate in ensuring continuous access for the Owners and their contractors to enable operation and maintenance of the Owners' Isolation Valve and the Owners' Portion, subject to the new limitations.

9.2 AWWU Access Road. AWWU shall be responsible, at its own expense, for brushing, clearing, plowing, and maintaining its access road and all bridges thereon to the AWWU Facilities, both upstream and downstream of the Facility. The Owners may use such access road

as part of its Access License granted pursuant to Section 9.1, and may, at their discretion, brush, clear, and plow the access road as needed to facilitate the Owners' access to the Facility, provided that under no circumstances shall the Owners be required to conduct such brushing, clearing or plowing.

9.3 Access Bridges. Pursuant to the Interconnection Agreement, the Owners agreed to install Access Bridges to improve Facility access and account for the additional traffic on the AWWU access road connected with the activities described in the Interconnection Agreement and this Agreement. As set forth in the Interconnection Agreement, upon completion of Access Bridge construction, the full responsibility for (and associated costs of) such bridge maintenance passes to AWWU, provided, that the Owners shall be responsible for any maintenance associated with damage caused by the Owners' gross negligence or intentional misconduct.

ARTICLE 10.
LIMITATIONS ON LIABILITY

10.1 Aggregate Limitation of Liability. Notwithstanding any other provision of this Agreement, the total aggregate liability of the Owners and the total aggregate liability of AWWU arising out of or relating to this Agreement, from any and all causes, whether based on contract, tort (including negligence), strict liability or any other cause of action, shall in no event exceed ten million dollars ($10,000,000.00) for AWWU, and ten million dollars ($10,000,000.00) for the Owners collectively, provided that such limit shall not apply in the case of such Party's (i) gross negligence or willful misconduct, (ii) third-party indemnity obligation, or (iii) breach of any representation or warranty.

10.2 CUMULATIVE REMEDIES. IF NO REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY PROVIDED, OR IF A REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY NON-EXCLUSIVE, THE NON-DEFAULTING PARTY SHALL HAVE THE RIGHT TO EXERCISE ALL RIGHTS AND REMEDIES AVAILABLE TO IT AT LAW OR IN EQUITY; PROVIDED, HOWEVER, THAT THE LIABILITY OF THE DEFAULTING PARTY SHALL BE LIMITED TO DIRECT, ACTUAL DAMAGES ONLY AND ALL OTHER DAMAGES AND REMEDIES ARE WAIVED.

10.3 WAIVER OF CERTAIN DAMAGES. EXCEPT WITH RESPECT TO INDEMNIFICATION OF THIRD-PARTY CLAIMS PURSUANT TO ARTICLE 11, OR AS OTHERWISE EXPRESSLY PROVIDED FOR HEREIN, IN NO EVENT SHALL EITHER PARTY BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY, INDIRECT, BUSINESS INTERRUPTION OR SIMILAR DAMAGES, WHETHER BY STATUTE, IN TORT, BY CONTRACT OR OTHERWISE.

ARTICLE 11.
INDEMNIFICATION

11.1 Indemnity. To the fullest extent permitted by Law, each Party shall indemnify, hold harmless and defend the other Party and its directors, officers, shareholders, partners, agents and employees, and the Affiliates of the same (collectively, the "Indemnified Parties"), from and against any and all claims, loss, damage, expense and liability, including court costs and reasonable

attorneys' fees (collectively, "Liabilities") incurred by the Indemnified Parties in connection with or arising from: (i) the Water Transportation Services and (ii) any claim for physical damage to or physical destruction of any part of the Facility, the AWWU Facilities, or death of or bodily injury to any person, to the extent such Liabilities were caused by the negligence of the Indemnifying Party or its agents or employees or others under such Indemnifying Party's control, except any Liabilities incurred due to the negligence or willful misconduct of an Indemnified Party. For the purpose of the definition of "Indemnified Parties" AWWU shall not be considered to be an "Affiliate" of the MOA.

11.2 Additional Owners Indemnity. To the fullest extent permitted by Law, the Owners shall indemnify, hold harmless, and defend AWWU and its Indemnified Parties from any Liabilities incurred by AWWU and its Indemnified Parties arising from damage to AWWU's water line and other infrastructure, including but not limited to its infrastructure downstream of the Facility (*i.e.* conditions caused by scouring or erosion of the river bed or banks that damage AWWU's water line and/or facilities) as a direct result of the instream water flows conveyed into the Eklutna River as part of the Water Transportation Services. The Owners shall further indemnify, defend and hold AWWU harmless from any Liabilities directly related to fish and wildlife mitigation measures and arising out of normal operation of the AWWU Facilities, the Facility, or any other facilities of AWWU, in a manner consistent with this Agreement, the Interconnection Agreement, the Water Supply Agreement, Prudent Industry Standards, the most current edition of the AWWU Design and Construction Practices Manual, the Municipality of Anchorage Standard Specifications and Anchorage Municipal Code, unless such Liabilities arose out of the negligence, violation of Law, or intentional misconduct by AWWU.

11.3 Defense of Claims. A Party with an indemnification obligation pursuant to this ARTICLE 11 (an "Indemnifying Party") shall have the right to defend the Indemnified Parties pursuant to this ARTICLE 11 by counsel of the Indemnifying Party's selection (including insurance counsel) reasonably satisfactory to the Indemnified Party, unless in the opinion of counsel for the Indemnifying Party a conflict of interest between the Parties may exist with respect to such claim. If the Indemnifying Party does not assume the defense of the Indemnified Party, or if a conflict precludes counsel for the Indemnifying Party from providing the defense, then the Indemnifying Party shall reimburse the Indemnified Party on a monthly basis for the Indemnified Party's defense through separate counsel of the Indemnified Party's choice. Even if the Indemnifying Party assumes the defense of the Indemnified Party with acceptable counsel, the Indemnified Party, at its sole option, may participate in the defense, at its own expense, with counsel of its own choice without relieving the Indemnifying Party of any of its obligations hereunder. The Parties shall give each other prompt written notice of any asserted claims or actions indemnified against hereunder and shall cooperate with each other in the defense of any such claims or actions. Without the prior written consent of the Indemnified Party, which consent shall not be unreasonably withheld, conditioned or delayed, no Indemnifying Party shall settle any such claims or actions in a manner that would require any action or forbearance from action by any Indemnified Party.

ARTICLE 12.
DEFAULT AND REMEDIES; TERMINATION; DISPUTE RESOLUTION

12.1 Event of Default. The following shall constitute events of default on the part of either party (each, an "Event of Default") under this Agreement:

(a) If a Party makes a general assignment for the benefit of its creditors, or if a receiver is appointed on account of the insolvency of such Party, or if such Party files a petition seeking to take advantage of any other Law relating to bankruptcy, insolvency, reorganization, winding up or composition of or readjustment of debts and, in the case of any such proceeding instituted against such Party (but not by such Party) such proceeding is not dismissed within sixty (60) days of such filing;

(b) If a Party fails to comply with any material terms of this Agreement not otherwise set forth as an Event of Default in this Section 12.1(b) and fails to cure or remedy such failure within thirty (30) days after notice and a written demand is made by the non-defaulting Party to the defaulting Party to cure the same or, if such failure cannot be cured within thirty (30) days, the defaulting Party fails to commence to cure such failure within thirty (30) days after such notice and written demand and thereafter diligently pursue such cure to completion, which shall in no event be later than ninety (90) days after such notice;

(c) If a Party defaults under the Water Supply Agreement or the Interconnection Agreement;

(d) If a Party fails to make any payment due hereunder within sixty (60) days after written notice from the non-defaulting Party; or

(e) If any representation or warranty of a Party in this Agreement proves to have been false or misleading in any material respect when made, and such Party has not, within thirty (30) days after written notification thereof from the non-defaulting Party, either fully remedied, or commenced and diligently pursued the remedy, of all adverse impacts on the non-defaulting Party resulting therefrom, all to the reasonable satisfaction of the non-defaulting Party.

12.2 Remedies Upon Event of Default. Upon the occurrence and continuation of an Event of Default, the non-defaulting Party shall have the right to terminate this Agreement and the Water Supply Agreement upon ten (10) days written notice and pursue any other remedy available to such non-defaulting party at law or in equity arising out of such Event of Default, including a claim for monetary damage or specific performance.

12.3 Automatic Cross-Agreement Termination. If this Agreement is terminated for any reason during the Delivery Term, the Interconnection Agreement and the Water Supply Agreement shall automatically terminate effective as of the same date of this Agreement's termination.

12.4 Termination for Failure of Conditions Precedent. If, prior to the Delivery Term, the Owners, in their reasonable discretion, decide to not construct the Facility due to the failure to achieve the Construction Start CPs as defined in the Interconnection Agreement, the Owners may terminate this Agreement without liability.

12.5 Dispute Resolution. In the event of any dispute arising under this Agreement (a "Dispute"), within ten (10) Business Days following notice by either Party, (i) each Party shall appoint a representative, and (ii) the representatives shall meet, negotiate and attempt in good faith to resolve the Dispute quickly, informally and inexpensively. In the event the representatives cannot resolve the Dispute within thirty (30) Days after the first meeting, either Party may request that consideration and resolution of the Dispute be transferred to a designated representative of each Party's senior management. Within ten (10) Days following such a request, each Party shall submit a written summary of the Dispute describing the issues and claims to a senior officer of each Party designated to address the Dispute. Within ten (10) Business Days after receipt of each Party's Dispute summaries, the senior management representatives for both Parties shall negotiate in good faith to resolve the Dispute. If such senior management representatives are unable to resolve the Dispute within thirty (30) Days thereafter, either Party may pursue any available legal remedies.

ARTICLE 13.
REPRESENTATIONS

13.1 General Representations and Warranties. Each Owner and AWWU hereby represents and warrants as of the Effective Date and the Delivery Term Effective Date that:

(a) It is duly organized, validly existing and in good standing under the Laws of the state of its formation and is duly qualified to do business in the jurisdiction where the Site is located.

(b) It has all necessary power and authority to execute, deliver and perform its obligations under this Agreement; its execution, delivery and performance of this Agreement have been duly authorized by all necessary corporate, municipal, or other action on its part; and this Agreement has been duly and validly executed and delivered by it and constitutes its legal, valid and binding obligation enforceable against it in accordance with its terms, except as the enforceability thereof may be limited by bankruptcy, insolvency, reorganization or moratorium or other similar Laws relating to the enforcement of creditors' rights generally and by general equitable principles.

(c) It is not in violation of any applicable Law, or any judgment entered by any federal, state, local or other Governmental Authority, which violations, individually or in the aggregate, would adversely affect its performance of any obligations under this Agreement. There are no legal or arbitration proceedings or any proceeding by or before any Governmental Authority, now pending or (to its best knowledge) threatened against it which, if adversely determined, could have a material adverse effect upon its financial condition, operations, prospects or business, as a whole, or its ability to perform under this Agreement.

(d) No authorization, approval, exemption, or consent of or by any Person is required by it in connection with the execution, delivery, and performance of this Agreement. In addition, each Party represents and warrants to the other Party that the Governmental Approvals required to be obtained by such Party either have been obtained by such Party and are in full force and effect on the date hereof or will be obtained by such Party and will be in full force and effect on or prior to the date on which they are required, under applicable Law, to be in full force and

effect, so as to permit AWWU to perform the Water Transportation Services and the parties to otherwise complete their obligations hereunder.

(e) The execution and delivery of this Agreement, the consummation of the transactions herein contemplated and compliance with the terms and provisions hereof by it will not conflict with or result in a material breach of, or require any consent under, any of its constitutive documents, or any applicable Law, or any agreement or instrument to which it is a party or by which it is bound or to which it is subject, or constitute a material default under any such agreement or instrument.

ARTICLE 14.
NOTICES

14.1 Writing. Except as set forth in Section 14.2, any notice, statement, demand, claim, offer or other written instrument required or permitted to be given pursuant to this Agreement shall be in writing signed by the Party giving such notice and shall be sent by email, facsimile, hand messenger delivery, overnight courier service, or certified mail (receipt requested) to the other Party as follows: (i) prior to the finalization of the Operating Procedures, such notices shall be sent to the addresses set forth in Exhibit E; and (ii) after the finalization of the Operating Procedures, such notices shall be sent to the legal notice addresses listed in such Operating Procedures. Each Party shall have the right to change the address information to which notice shall be sent or delivered or to specify additional addresses to which copies of notices may be sent, in either case by similar notice sent or delivered in like manner to the other Party, which, after the development of the Operating Procedures, shall be reflected in such Operating Procedures. All notices shall be effective upon receipt.

14.2 Technical Communications. Any technical or other communications pertaining to the Facility, the Water Transportation Services, and the Operational Work shall follow the procedures set forth in the Operating Procedures, to be updated from time to time pursuant to Section 5.2.

ARTICLE 15.

CONFIDENTIALITY; PUBLIC STATEMENTS

15.1 Confidentiality. The Parties agree that the Parties' proposals, communications, negotiations and information exchanged prior to the Effective Date concerning this Agreement and the development thereof, and technical and other information regarding or relating to the Facility, the AWWU Facilities, the Access Bridges, and the provision of the Water Transportation Services exchanged between the Parties that is marked, or otherwise clearly communicated to the receiving Party as "Confidential" constitutes "Confidential Information" of the disclosing Party. The Owners and AWWU each agree to hold such Confidential Information wholly confidential. Such Confidential Information may only be used by the Parties for the purposes related to the approval, or administration or enforcement of this Agreement.

15.2 Disclosure. Each Party agrees not to disclose Confidential Information of the other Party to any other Person (other than its Affiliates, counsel, consultants, lenders, partners, members, employees, officers and director, and then only to Persons subject to similar

confidentiality restrictions as those set forth herein), without the prior written consent of the other Party, provided, that, either Party may disclose Confidential Information, if such disclosure is required by Law, including without limitation, pursuant to an order of a court or regulatory agency or in order to enforce this Agreement or to seek approval of this Agreement. In the event a Party is required by Law or a Governmental Authority to disclose Confidential Information, such Party, prior to such disclosure, shall provide reasonable advance notice to the other Party of the time and scope of the intended disclosure in order to permit such disclosing Party the opportunity to obtain a protective order or otherwise seek to prevent or limit the scope or otherwise impose conditions upon such disclosure.

15.3 Injunctive Relief. Each Party agrees that violation of the terms of Sections 15.1 and 15.2 constitutes irreparable harm to the other, and that the harmed Party may seek any and all remedies available to it at law or in equity, including but not limited to injunctive relief.

15.4 Release of Agreement. The Parties agree that this Agreement, upon execution, shall not be considered Confidential Information. Except as required by Law, releasing the Agreement to the public shall be the sole responsibility of the Owners, to be released in the manner at a time decided in their sole discretion.

ARTICLE 16.
MISCELLANEOUS

16.1 Reasonability. The Parties shall act in a reasonable manner and in accordance with principles of good faith and fair dealing in the performance of this Agreement. Unless expressly provided otherwise in this Agreement and whether or not stated: (a) where this Agreement requires the consent, approval, or similar action by a Party, such consent or approval shall not be unreasonably withheld, conditioned, or delayed; and (b) wherever this Agreement gives a Party a right to determine, require, request, specify, or take similar action with respect to a matter, such determination, requirement, request, specification, or similar action must be reasonable.

16.2 Entire Agreement. This Agreement, together with all Schedule and Exhibits hereto, embodies the entire agreement and understanding of the Parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements and understandings of the Parties, verbal or written, relating to the subject matter hereof.

16.3 Waiver. Any waiver of the provisions of this Agreement must be in writing and shall not be implied by any usage of trade, course of dealing or course of performance. No exercise of any right or remedy by AWWU or the Owners constitutes a waiver of any other right or remedy contained or provided by Law. Any delay or failure of a Party to exercise, or any partial exercise of, its rights and remedies under this Agreement shall not operate to limit or otherwise affect such rights or remedies. Any waiver of performance hereunder shall be limited to the specific performance waived and shall not, unless otherwise expressly stated in writing, constitute a continuous waiver or a waiver of future performance.

16.4 Assignment. Neither Party shall assign this Agreement or any of its rights hereunder without the prior written consent of the other Party, which consent shall not be unreasonably withheld, conditioned or delayed. Notwithstanding the foregoing, either Party,

without relieving itself from liability hereunder, and without the need for consent from the other Party provided that any such assignee shall agree to be bound by all terms and conditions hereof, may transfer, pledge or assign this Agreement: (a) to any person or entity succeeding to all or substantially all of the assets of the assigning Party; or (b) to a successor entity in a merger or acquisition transaction. Any assignment made in contravention of this Section 16.4 shall be void and unenforceable.

16.5 Governing Law; Submission to Jurisdiction; Venue; No Jury Trial.

(a) Governing Law. THIS AGREEMENT SHALL BE GOVERNED BY, AND INTERPRETED AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF ALASKA, EXCLUDING ANY CHOICE OF LAW RULES.

(b) Submission to Jurisdiction, Venue. The Parties agree that any suit, action or other legal proceeding by or against any Party (or its Affiliates or designees) with respect to or arising out of this Agreement shall be brought exclusively in the courts of the State of Alaska, in the Municipality of Anchorage, as the Party instituting such suit, action or other legal proceeding may elect, provided that claims related to federal water rights, federal legislation enabling the Facility or AWWU Facilities, or the 1991 Agreement may be brought in the United States District Court for the District of Alaska. By execution and delivery of this Agreement, each Party (for itself, its Affiliates and its designees) irrevocably and unconditionally consents and submits to the exclusive jurisdiction of such courts and the appellate courts therefrom, and waives any right it may have to assert the doctrine of forum non conveniens or similar doctrine or to object to venue with respect to any proceeding. The Parties irrevocably consent to the service of process in any such action or proceeding by the mailing of copies thereof by registered or certified mail, first class postage prepaid to the addresses set forth in Section 14.1.

(c) No Jury Trial. EACH OF THE PARTIES HEREBY WAIVES ANY AND ALL RIGHTS TO DEMAND A TRIAL BY JURY IN ANY ACTION, SUIT, OR PROCEEDING ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY.

(d) Duty to Proceed. Pending final resolution of any Dispute, the Owners and AWWU shall continue to fulfill their respective obligations hereunder that are not the subject of the Dispute.

16.6 Construction. This Agreement is to be construed so as to effectuate the normal and reasonable expectations of a sophisticated buyer and seller of the equipment and services covered by this Agreement and shall not be construed either for or against either Party. No provision of this Agreement shall be construed or interpreted for or against either Party because such Party drafted or caused its legal representative to draft the provision.

16.7 Headings. The titles or headings of the various sections, articles and paragraphs hereof are intended solely for convenience and ease of reference and are not intended, and are not to be deemed for any purpose, to modify or explain or place any interpretation or construction upon any of the provisions of this Agreement.

16.8 Status of the Parties. AWWU and its Subcontractors shall be independent contractors to the Owners with respect to the Water Transportation Services and neither the AWWU nor its Subcontractors, nor the employees or agents of either, shall be deemed to be the employees, representatives or agents of the Owners in connection with any matter relating to this Agreement. No provision of this Agreement shall be construed or represented as creating a partnership, trust, joint venture, fiduciary or any similar relationship between the Parties.

16.9 Status of Individual Owners. Each of the Owners shall be jointly and severally liable for the obligations of the Owners under this Agreement. The delineation of specific responsibilities set forth hereunder as among the Owners shall be at the sole discretion of the Owners, not AWWU. If at any time, the Owners agree that one or two of the Owners need no longer be party to this Agreement, such unnecessary Owner(s) may be removed as parties to this Agreement upon written notice to AWWU, if agreed, and shall retain no liability upon removal, with the remaining Owner(s) automatically assuming the full obligations of the Owners hereunder. If an Event of Default exists hereunder at any time with respect to an Owner, it shall be considered an Event of Default with respect to the Owners together as one Party hereunder, provided, that if another Owner agrees to assume such defaulting Owner's obligations under this Agreement by removing such Owner as a party pursuant to the preceding sentence of this Section 16.9 prior to the expiration of any applicable cure period, this shall not be considered an Event of Default hereunder.

16.10 Insurance. Throughout the Delivery Term, the Owners shall maintain the required insurance policies as set forth on Exhibit D-1 and AWWU shall maintain the required insurance policy as set forth on Exhibit D-2.

16.11 No Third-Party Beneficiaries. This Agreement is made and entered into for the sole protection and legal benefit of the Owners and AWWU, and their permitted successors and assigns, and no other person shall be a direct or indirect legal beneficiary of, or have any direct or indirect cause of action or claim in connection with, this Agreement.

16.12 Further Assurances. Each Party agrees to execute and deliver all further instruments and documents, and take all further action, as may be reasonably necessary to complete performance by the Parties hereunder and to effectuate the purposes and intent of this Agreement.

16.13 Amendments. No change, amendment or modification of this Agreement shall be valid or binding upon the Parties unless such change, amendment or modification shall be in writing and duly executed by the Parties.

16.14 Severability. If any provision of this Agreement is determined to be illegal or unenforceable, such determination will not affect any other provision of this Agreement and all other provisions will remain in full force and effect.

16.15 Conflicting Provisions. In the event of any conflict between this document and any Schedule or Exhibit attached hereto, the terms and provisions of this document, as amended from time to time, shall control. In the event of any conflict among the Exhibits, the Exhibit of the latest date mutually agreed to by the Parties shall control.

16.16 Survival. The provisions of ARTICLE 1, ARTICLE 7, ARTICLE 10, ARTICLE 11, ARTICLE 12, ARTICLE 13, ARTICLE 14, and ARTICLE 16 shall survive termination of this Agreement for any reason.

16.17 Counterparts. This Agreement may be executed in any number of separate counterparts and delivered by electronic means, each of which when so executed shall be deemed an original, and all of said counterparts taken together shall be deemed to constitute but one and the same instrument.

[***Remainder of page intentionally left blank***]

IN WITNESS WHEREOF, the Parties have caused this Long-Term Water Transportation Agreement to be executed by their duly authorized representatives as of the Effective Date.

Schedule 1.1

Definitions

"1991 Agreement" means that certain Agreement between the Municipality of Anchorage, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., the United States Fish and Wildlife Service, the National Marine Fisheries Service, the State of Alaska, and the Alaska Energy Authority Relative to the Eklutna and Snettisham Hydroelectric Projects, dated August 7, 1991.

"Access Bridges" means those bridges installed by the Owners on the Eklutna River pursuant to the terms of the Interconnection Agreement.

"Affiliate" means, with respect to any Person, any other Person controlling, controlled by or under common control with such first Person. For purposes of this definition and the Agreement, the term "control" (and correlative terms) means (1) the ownership of 50% or more of the equity interest in a Person, or (2) the power, whether by contract, equity ownership or otherwise, to direct or cause the direction of the policies or management of a Person.

"Access License" has the meaning set forth in Section 9.1.

"Agreement" has the meaning set forth in the Preamble, and shall include all Exhibits and Schedules hereto.

"Approvals" means Governmental Approvals and third-party approvals.

"AWWU" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of AWWU.

"AWWU Design and Construction Practices Manual" means the edition dated _____, 20__, as updated and amended from time to time.[2]

"Event of Default" has the meaning set forth in Section 12.1.

"AWWU's Isolation Valve" has the meaning set forth in Exhibit A-1.

"AWWU Facilities" has the meaning set forth in the Recitals.

"AWWU's Portion" has the meaning set forth in Exhibit A-1.

"AWWU's Water Permit" means that permit belonging to AWWU (LAS 2569) to use Owners' Water Rights for up to 41 MGD for public water supply pursuant to the Act of October

---

[2] **Note to Accompany Final Draft**: To be populated after Governor approval and prior to execution to reflect the most up to date version.

30, 1984, 98 Stat. 2823, as may be replaced as described in Section 3.1 of the Water Supply Agreement.

"AWWU's Water" means any and all water belonging to AWWU pursuant to AWWU's Water Permit.

"Business Day" means any day other than a Saturday, Sunday or legal holiday in the state of Alaska.

"Chugach" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of Chugach.

"Confidential Information" has the meaning set forth in Section 14.1.

"Cost Responsibility Proportion" shall mean, with respect to each Owner, the percentage of the total applicable Eklutna Hydroelectric Project costs that such Owner is obligated to pay as agreed to by the Owners, which as of the Effective Date shall be, with respect to MOA, 19.05%, with respect to Chugach, 64.28%, and with respect to MEA, 16.67%, and which may be changed hereunder upon agreement between the Owners at any time.

"Curtailment Duration" means, with respect to a curtailment in Water Transportation Services during an Excused Event, the duration of such curtailment.

"Curtailment Limit" means, with respect to each day of the Delivery Term where there exists an Excused Event, the amount of Owners' Water in MGD that can be transported to the Delivery Point on such day. For the avoidance of doubt, this amount can equal zero (0) MGD.

"Day" or "day" means a calendar day, unless expressly specified otherwise.

"Delivery Point" has the meaning set forth in Exhibit A-1 and is depicted on the schematic included as part of Exhibit B.

"Delivery Point Meter" has the meaning set forth in Exhibit A-1.

"Delivery Term" has the meaning set forth in Section 2.1.

"Delivery Term Effective Date" has the meaning set forth in Section 2.1.

"Dispute" has the meaning set forth in Section 12.5.

"Effective Date" has the meaning set forth in the Preamble.

"Eklutna Hydroelectric Project" means the Eklutna Hydroelectric Project initially authorized, constructed and operated pursuant to the Eklutna Project Act of July 31, 1950 (64 Stat. 382, as amended), including any and all property and facilities acquired or used in connection therewith, all of which was then sold to the Owners by the United States of America on October 2, 1997.

"Eklutna Water Treatment Facility" means the water treatment plant owned by AWWU located alongside the Eklutna River.

"Event of Default" has the meaning set forth in Section 12.1.

"Excused Event" means a Planned Outage, a Forced Outage, or an Force Majeure Event causing a reduction or suspension of the Water Transportation Services.

"Facility" has the meaning set forth in the Recitals.

"Final Acceptance" has the meaning set forth in the Interconnection Agreement.

"Fish and Wildlife Program" has the meaning set forth in the Recitals.

"Force Majeure Event" means the occurrence of any act or event beyond the reasonable control of the Party affected that prevents the affected Party from performing its obligations under this Agreement, in full or part, if such act or event is beyond the reasonable control of, and not the result of the fault or negligence of, the affected Party and such Party has been unable to overcome such act or event with the exercise of due diligence (including the expenditure of reasonable sums), including the following: drought, flood, earthquake, storm, fire, lightning, epidemic, war, riot, civil disturbance, sabotage, terrorism or threat of terrorism, strike or labor difficulty, accident or curtailment of supply or equipment, total casualty to equipment, or restraint, order or decree by a Governmental Authority. Notwithstanding the foregoing, Force Majeure Events shall expressly not include mechanical or equipment failures (except to the extent any such failure is itself caused by a Force Majeure Event), diminution in water quality in Eklutna Lake, Planned Outages, or Forced Outages (unless such Forced Outage is caused by a Force Majeure Event).

"Forced Outage" means; (i) any unplanned necessary reduction or suspension of Water Transportation Services available from the Facility; or (2) any other unavailability of the AWWU Facilities of Facility in whole or in part, each in response to an equipment malfunction or other emergency condition determined by AWWU in its reasonable discretion to be a threat to any AWWU Facilities. For the sake of clarity, forced outages in AWWU infrastructure downstream of the Isolation Valve Structure are not considered a Forced Outage.

"Governmental Approvals" means all authorizations, consents, licenses, leases, rulings, certifications, registrations, exemptions, permits, certificates, and approvals from any Governmental Authority.

"Governmental Authority" means any federal, state or local government, any political subdivision thereof, or any governmental, quasi-governmental, judicial, public or statutory instrumentality, administrative agency, authority, body or other entity having jurisdiction over the performance of the Water Transportation Services, the Operational Work, the Facility or its operations, or the health, safety or environmental conditions of the Site or otherwise over the Parties' rights and obligations under this Agreement.

"Indemnified Parties" has the meaning set forth in Section 11.1.

"Indemnifying Party" has the meaning set forth in Section 10.4.

"Initial Delivery Term" has the meaning set forth in Section 3.1.

"Injection Point" means the point where AWWU Facilities meet facilities owned by the Owners near the outlet of the Eklutna Lake, where AWWU receives all of AWWU's Water from Eklutna Lake, as depicted in the schematic included as part of Exhibit B.

"Interconnection Agreement" has the meaning set forth in the Recitals.

"Injection Point Flow Meter" means a meter measuring the flow of water passing into AWWU Facilities at the Injection Point.

"Isolation Valve Structure" has the meaning set forth in Exhibit A-1.

"Isolation Valves" has the meaning set forth in Exhibit A-1.

"Law" means any constitution, charter, act, statute, law, ordinance, code, rule, regulation, order, specified standards or objective criteria contained in any applicable permit or approval (which standards or criteria must be met in order for the Water Transportation Services or Operational Work to be performed lawfully) or other legislative or administrative action of any Governmental Authority or a final decree, judgment or order of a court or tribunal.

"Liabilities" has the meaning set forth in Section 11.1.

"MEA" has the meaning set forth in the Preamble, and shall include all successor sand assigns of MEA.

"MGD" means millions of gallons per day.

"MOA" has the meaning set forth in the Preamble, and shall include all successor sand assigns of MOA.

"Monthly Water Release Schedule" has the meaning set forth in Section 3.2.

"Operating Procedures" has the meaning set forth in Section 5.1.

"Operational Work" means all phases of AWWU and the Owners' performance of their obligations under this Agreement to operate and maintain the Facility and the AWWU Facilities.

"Owners" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of the Owners.

"Owner" has the meaning set forth in the Preamble, and shall include all successors and permitted assigns of such Owner.

"Owners' Isolation Valve" has the meaning set forth in Exhibit A-1.

"Owners' Approvals" has the meaning set forth in Section 4.4.

"Owners' Portion" has the meaning set forth in Exhibit A-1.

"Owners' Water Rights" means that certain senior priority water rights held by the Owners for the water in Eklutna Lake for use in generating power for the Eklutna Hydroelectric Project as described in water rights certificate ADL 44944.

"Owners' Water" means any and all water belonging to the Owners pursuant to the Owners' Water Right.

"Party" and "Parties" has the meaning set forth in the Preamble.

"Person" means any individual, partnership, corporation, limited liability company, association, business, trust, government or political subdivision thereof, Governmental Authority or other entity.

"Planned Outage" means the removal of Facility equipment from service availability for inspection and/or overhaul or repair in such a way that requires a reduction or halt in flow of Owners' Water through the AWWU Facilities to the Delivery Point. For the sake of clarity, planned outages in AWWU infrastructure downstream of the Isolation Valve Structure are not considered a Planned Outage. To qualify as a Planned Outage, the maintenance (a) must actually be conducted during the Planned Outage, and in AWWU's reasonable discretion must be of the type that is necessary to reliably maintain the Facility or the AWWU Facilities, and (b) cannot be reasonably conducted during normal Facility or AWWU Facilities' operations.

"Prudent Industry Standards" means those standards of care and diligence normally practiced by water transportation infrastructure operation and maintenance firms in performing services of a similar nature in a similar jurisdiction in which the Water Transportation Services and Operational Work will be performed. Prudent Industry Standards are not intended to be limited to optimum practice or methods, but rather to be a spectrum of reasonable and prudent practices and methods that must take the conditions specific to any water transportation facility under consideration.

"River Release Structure" has the meaning set forth in Exhibit A-1.

"Site" means the location of the Facility as further described and depicted in Exhibit B.

"Subcontractor" means any Person with whom the Owners, or any Owner, enters into an arrangement for the performance of any portion of the Water Transportation Services or Operational Work, including Persons at any tier with whom any Subcontractor has further subcontracted any portion of the Water Transportation Services or Operational Work, and the legal or personal representatives, successors, and assigns of such Person.

"Term" has the meaning set forth in Section 2.1(a).

"Water Release Limits" has the meaning set forth in Section 3.1.

"Water Supply Agreement" has the meaning set forth in the Recitals.

"Water Transportation Services" has the meaning set forth in Section 3.1.

Exhibit A

Eklutna River Release Facility Description and Definitions[3]

The ***"Eklutna River Release Facility"*** shall consist of an Isolation Valve Structure and the River Release Structure.

The "***Isolation Valve Structure***" shall include:

- a new tee to be built in the AWWU pipeline downstream of the AWWU tunnel/pipeline transition and upstream of the AWWU portal valve (the "***Delivery Point***")
- A 54-inch gate valve on the main segment of AWWU pipeline intended to provide dual means of isolation for AWWU's pipeline segment ("***AWWU's Isolation Valve***")
- A 42-inch gate valve on the branch segment of AWWU pipeline intended to provide isolation to the river release structure ("***Owners' Isolation Valve***", together with AWWU's Isolation Valve, the "***Isolation Valves***").
- Related controls and communication technology to be installed by the Owners in the main line of the AWWU Facilities.

The "***River Release Structure***" shall include:

- [A new pipeline from the Isolation Valve Structure to the Eklutna River]
- Control valves
- A new meter installed at the Delivery Point ("***Delivery Point Meter***")
- Monitoring and control equipment to be installed by Owners [*describe where]*.

"***AWWU's Portion***" of the Facility shall consist of the Isolation Valve Structure [and _____]

The "***Owners' Portion***" of the Facility shall consist of the River Release Structure [and _____]

PUBLIC WATER SUPPLY AGREEMENT

This PUBLIC WATER SUPPLY AGREEMENT (this "Agreement"), dated as of [_____] (the "Effective Date"), is entered into by and between Anchorage Water and Wastewater Utility ("AWWU"), and Chugach Electric Association, Inc. ("Chugach"), Matanuska Electric Association, Inc. ("MEA"), and the Municipality of Anchorage ("MOA") (each of Chugach, MEA, and MOA is an "Owner" and collectively they are referred to as the "Owners"). The Owners and AWWU are sometimes referred to herein as a "Party" or collectively as the "Parties".

RECITALS

WHEREAS, the federal Alaska Power Administration ("APA") originally developed, owned and operated the Eklutna Hydroelectric Project, which began operations in 1954 for the production of electric power that APA sold to electric utilities serving the Anchorage and Matanuska Valley areas;

WHEREAS, as then-owner of the Eklutna Hydroelectric Project assets, the APA possessed senior water rights (both federal reserved water rights and water rights granted under State of Alaska law), with a priority date of 1954, to all the water that may be feasibly appropriated from Eklutna Lake for use in generating electric power for the Eklutna Hydroelectric Project as reflected in water rights certificate ADL 44944 ("Project Water Rights");

WHEREAS, in the 1980s, AWWU:

(i) determined that Eklutna Lake was a necessary source of water for the City of Anchorage;

(ii) entered into that certain "Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska" with APA, dated February 17, 1984, as amended (the "1984 Agreement"), which among other things provides terms and conditions relating to (i) AWWU facility interconnection to Eklutna Hydroelectric Project; and (ii) the compensation by AWWU to the Owners for AWWU's diversion of water for public water supply that reduces the Project Water Rights otherwise available for use to generate energy at the Eklutna Hydroelectric Project;

(iii) obtained: (1) "preferred use status" from the Alaska Department of Natural Resources ("DNR") through an application that demonstrated the need for AWWU to take prior-appropriated water for public water supply purposes and which is conditioned upon the validity and existence of the 1984 Agreement (the "Preferred Use Status") pursuant to Alaska Statute 46.15.150(b); (2) a permit (LAS 2569) to use Project Water Rights for up to 41 million gallons per day for public water supply pursuant to the Act of October 30, 1984, 98 Stat. 2823, (the "AWWU Water Permit"); and

(iv) constructed and began operations of the water project diverting water from the Eklutna Hydroelectric Project intake tunnel to AWWU's water system (the "AWWU Water Project");

WHEREAS, the 1984 Agreement remains in effect "until the year 2025" and the AWWU Water Permit expires on December 31, 2025;

WHEREAS, in October 1997, the Owners purchased from APA the Eklutna Hydroelectric Project and all related project assets, including Project Water Rights and became parties to the 1984 Agreement through assignment (the "Owners' Facilities");

WHEREAS, pursuant to the 1991 Agreement (as defined below), the Owners have studied and developed a Fish and Wildlife program to protect, mitigate damages to, and enhance fish and wildlife impacted by the development of the Eklutna Hydroelectric Project centered on establishing instream flows in the Eklutna River as part of the implementation of the Fish and Wildlife Program (the "Fish and Wildlife Program");

WHEREAS, in order to establish such instream flows, the Owners and AWWU have negotiated two agreements: (1) a Water Facilities Interconnection Agreement (the "Interconnection Agreement"), which shall govern the construction and interconnection of the Parties' respective facilities for conveyance of water from the Eklutna Lake to the Eklutna River using AWWU facilities; and (2) a Long-Term Water Transportation Services Agreement (the "Transportation Agreement"), which shall govern the provision of conveyance services for transporting water from the Eklutna Lake to the Eklutna River;

WHEREAS, in coordination and joint consideration with the Interconnection Agreement and the Transportation Agreement, the Parties desire to enter into this Agreement in order to replace the 1984 Agreement and set forth new terms and conditions relating to (i) the compensation from AWWU to the Owners for AWWU's use of the Project Water Rights in accordance with Alaska Statute 46.15.150 and; (ii) the extension of other future rights to AWWU; and

NOW, THEREFORE, in consideration of the premises of this Agreement, the Transportation Agreement, and the Interconnection Agreement, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Owners and AWWU, intending to be legally bound, hereby agree as follows:

ARTICLE I
DEFINITIONS; INTERPRETATION

Section 1.1 Defined Terms. Capitalized terms used in this Agreement without other definition shall have the meanings set forth in Schedule 1.1, unless the context requires otherwise.

Section 1.2 Interpretation. As used in this Agreement, the terms "herein," "herewith" and "hereof" are references to this Agreement, taken as a whole; the terms "includes" or "including" shall mean "including, without limitation"; and references to a "Section," "Article", "Exhibit" or "Schedule" shall mean a Section, Article, Exhibit or Schedule of this Agreement, as the case may be, unless in any such case the context requires otherwise. All references to a given Exhibit, Schedule, agreement, instrument or other document shall be a reference to that agreement, instrument or other document as modified, amended, supplemented and restated through the date as of which such reference is made. A reference to a Person includes its permitted successors and permitted assigns. The singular shall include the plural and the masculine shall include the feminine and neuter, and vice versa.

ARTICLE II
EFFECTIVE DATE; TERM

Section 2.1 Effective Date. This Agreement shall become binding on the Parties on the Effective Date, subject to Section 2.2.

Section 2.2 Conditions Precedent. The rights and obligations of the Parties as set forth in Articles III – VI in this Agreement shall not be effective until the achievement of the following conditions precedent (the "Conditions Precedent"), a written notice of which shall be sent to AWWU by Owners:

(a) The Owners receive final approval from the Governor of Alaska, with such approval for a Fish and Wildlife Program that requires the use of the AWWU Facilities for instream flows as contemplated in this Agreement, provided that such approval includes no unexpected conditions materially adverse to the Owners or to AWWU, as determined in good faith by the Parties and in the exercise of commercially reasonable business judgment, and neither the approval from the Governor of Alaska nor the Fish and Wildlife Program is subject to any pending judicial review or appeal;

(b) Owners and AWWU obtain and provide evidence of lawful water rights from DNR for the use and transport of water as contemplated under the Agreement, including but not limited to a renewal, extension, or replacement of the AWWU Water Permit, Preferred Use Status, and all other approval(s) authorizing continued use of the Owners' Water Rights by AWWU;

(c) Chugach obtains final Regulatory Commission of Alaska ("RCA") approval of its applicable tariff rates necessary to implement the compensation outlined in Section 3.2 below pursuant to, and in a manner consistent with, Section 6.23 of the MOA-Chugach APSA as such terms are defined therein; and

(d) The Interconnection Agreement and the Transportation Agreement are in full force and effect and are valid, binding and enforceable against AWWU and the Owners in accordance with their terms.

Section 2.3 Failure to Achieve Conditions Precedent. In the event that this Agreement does not become fully effective (i) due to the failure to achieve the Conditions Precedent as set forth in Section 2.2 by [June 1, 2025], or (ii) because the Governor of Alaska approves a Fish and Wildlife Program that does not require the use of the AWWU Facilities for instream flows as contemplated in this Agreement, then: (A) this Agreement will be terminated upon thirty (30) days' written notice by either Party (B) the automatic cross-agreement termination provisions of Section 10.3 shall apply; and (C) the Parties shall meet promptly to negotiate in good faith an alternate agreement to replace the 1984 Agreement that expires in 2025 with terms and conditions that include but are not limited to adequate compensation, risk mitigation, potential transfer or purchase of water rights, and other terms and conditions then deemed appropriate by the Parties without prejudice due to the prior existence, or the subsequent termination, of this Agreement.

Section 2.4 Term. Unless agreed to otherwise by the Parties, this Agreement will continue in full force and effect starting on the Effective Date and terminating on October 30, 2060, subject to any early termination provision set forth herein (the "Term").

Section 2.5 Effect on 1984 Agreement. The Parties intend that, upon thirty (30) days' written notice by the Owners of the achievement of the Conditions Precedent as set forth in Section 2.2, this Agreement shall become fully effective and replace the 1984 Agreement in its entirety, and the 1984 Agreement will be terminated.

ARTICLE III
WATER USE AND COMPENSATION

Section 3.1 Water Use. The Owners shall make available and allow AWWU to continue to interconnect the AWWU Water Project to the Eklutna Hydroelectric Project, use the project's intake, tunnel, and other Owners' Facilities necessary to divert and use a portion of Project Water Rights up to 41 million gallons per day for public water supply purposes in a manner consistent with AWWU's Preferred Use Status, the AWWU Water Permit, and Alaska Statute 46.15.150(b). The Parties understand that after the Effective Date, AWWU may initiate a process to replace all or part of the AWWU Water Permit with a certificated water right under Alaska Statute 46.15. The Owners consent to such conversion provided that AWWU's certificated water right does not exceed 41 million gallons per day for public water supply purposes, such certification is subject to all requirements of Alaska Statute 46.15.150 and any and all regulations implementing AWWU's Preferred Use Status, and AWWU remains committed to compensate Owners for such water as set forth in Section 3.2 below.

Section 3.2 Compensation.

(a) Compensation. Subject to the limitation in subsection (b) below, AWWU and the MOA shall compensate the Owners for all reductions in electrical energy generation at the Eklutna Hydroelectric Project, costs, and losses that result from water diversions for the AWWU Water Project as set forth in Exhibit A (collectively, the "Replacement Energy"). The compensation paid by AWWU for the Replacement Energy shall be both in kind through electrical energy recovered by AWWU at the Eklutna Water Treatment Facility ("EWTF") in excess of AWWU's own needs at the EWTF ("Recovered Electrical Energy"), and in cash payments (the cash portion shall be referred to as the "Replacement Energy Payment(s)"). The Recovered Electrical Energy shall act as an offset to the Replacement Energy Payment obligations. All costs associated with such deliveries of Recovered Electrical Energy, including metering, will be borne by AWWU.

(b) Compensation Limitations and Procedures. The compensation owed to the Owners by AWWU, calculated and accounted for as set forth in Exhibit A and Section 3.2(a), shall be subject to the following limitations: (a) in no event shall the Replacement Energy Payment owed and payable to Chugach by AWWU exceed six hundred thousand dollars ($600,000) per year in value in aggregate, as such amount will be adjusted annually for inflation reflected in the Bureau of Labor Statistics' Consumer Price Index; (b) in no event shall any such compensation be required in the event that the Owners permanently cease operations of the Eklutna Hydroelectric Project; and (c) in no event shall any such compensation be required in the event of a transfer of a priority water right from the Owners to AWWU as contemplated in Article VI. For the purposes of clarity, the words "total compensation owed and payable to Chugach by AWWU," in the preceding sentence applies to the Replacement Energy Payment and specifically includes the independent in-kind compensation through the Recovered Electrical Energy. The Recovered Electrical Energy shall not include any power generated by AWWU at any location other than the EWTF, which

power generated at other locations may be sold by AWWU as co-generated power. Notwithstanding the foregoing limitation on compensation to be paid by AWWU, nothing in this Agreement is intended to change the MOA's obligations set forth in any of: (i) the MOA-Chugach Eklutna PPA; (ii) Section 6.23 of the MOA-Chugach APSA; and (iii) the MOA-MEA Eklutna PPA. In any month of the Term, to the extent that AWWU does not fully compensate Chugach for the total amount of Replacement Energy in such month due to application of the AWWU compensation cap set forth above, such matters will be resolved among the Owners and the MOA will make Chugach whole as outlined in Exhibit A.

(c) Costs. Other than the compensation for water diversions set forth in Sections **Error! Reference source not found.** and (b) above, all costs borne initially by each Party in connection with the exercising of its respective rights and the performance of its respective obligations under this Agreement shall be the responsibility of such Party initially incurring such costs. In partial consideration of the costs to Owners incurred in maintaining its facilities necessary for AWWU to continue to interconnect to Eklutna Hydroelectric Project, and to divert and use a portion of Project Water Rights under this Agreement for the benefit of the AWWU, the Parties entered into the Transportation Agreement for the same duration as this Agreement, pursuant to which AWWU will provide conveyance services for transporting water from the Eklutna Lake to the Eklutna River at no cost to Owners.

ARTICLE IV
OWNERS' RESPONSIBILITIES

Section 4.1 Reservoir Operations. Subject to the terms herein, Owners shall retain full authority and responsibility to operate the Eklutna Hydroelectric Project and manage and allocate water in Eklutna Lake in accordance with ADL 44944 and the requirements of the Eklutna Hydroelectric Project.

Section 4.2 Assurance of Water Project Allocation, Quality, and Access. Subject to the terms herein, Owners will operate the Eklutna Lake reservoir in such a manner that the projected allocations of water to the AWWU Water Project are available to MOA upon request at a flow rate of at least 41 MGD to the EWTF at a pressure sufficient to allow normal operation of the EWTF as currently configured. The Owners will take no action regarding Eklutna Lake that has the effect of reducing the quality or increasing the turbidity of the lake water from those conditions which exist as of the Effective Date; nor will the Owners take or authorize any other action with regard to Eklutna Lake that may have the effect of reducing its present suitability for use as a source of public water supply. This Section 4.2 is not intended to preclude or inhibit maintenance and repair activities determined to be necessary by the Owners, nor does it apply to the management of the lake surface and surrounding areas for public recreation, which is outside the scope of this Agreement. For the avoidance of doubt, the Owners shall ensure continued use and access to AWWU of the Owners' Facilities that are necessary to supply water to the AWWU Facilities to the extent that Owners' Facilities continue in commercial operation.

ARTICLE V
AWWU RESPONSIBILITIES

Section 5.1 Compensation. AWWU shall compensate the Owners as set forth in Section 3.2(a) subject to the limitation in Section 3.2(b). To the extent that the total compensation owed to the Owners by AWWU under Section 3.2 is not satisfied by the netting against the MOA's ownership share of the water used in the Eklutna Hydroelectric Project, AWWU will pay the Owners directly within thirty (30) days of receipt of invoice.

Section 5.2 Maintenance, Repair, and Material Modifications to AWWU Water Project.

(a) AWWU Water Project. To the extent AWWU must perform maintenance, repairs, or make any material modification to the AWWU Water Project that adversely affects the Eklutna Hydroelectric Project, prior to the commencement of such action, AWWU shall furnish to the Owners copies of all plans, specifications, and schedules regarding such work. AWWU shall coordinate with the Owners all such activities in order to avoid or minimize disruption of the Owner's activities at the Eklutna Hydroelectric Project, to the maximum extent possible. AWWU will take commercially reasonable steps to minimize any of its actions set forth in this subsection that may adversely affect energy generation from the Eklutna Hydroelectric Project. AWWU shall reimburse the Owners, by payment of lost revenues to the Owners or by Replacement Energy, as may be mutually agreed by the Parties, for any such losses incurred by the Owners that are attributable to such maintenance or material modifications of the AWWU Water Project that impacts the Eklutna Hydroelectric Project, such as maintenance or material modifications to the project's intake tunnel connected to Eklutna Lake.

(b) AWWU Water Project Interconnection. Notwithstanding Section 5.2, AWWU shall obtain specific plan approval from the Owners before initiating any material modification on any existing facilities for the delivery of water from the Eklutna Hydroelectric Project to the AWWU Water Project, including any facilities that are interconnected to the present Owners' water intake tunnel. AWWU will take commercially reasonable steps to minimize any of its actions set forth in this subsection that may adversely affect energy generation from the Eklutna Hydroelectric Project.

ARTICLE VI
RIGHTS UPON CEASING OPERATIONS OR TERMINATION

Section 6.1 Right of First Offer. If the Owners elect to permanently cease operations of the Eklutna Hydroelectric Project, the Owners shall provide written notice to AWWU of such intention. For a period of six (6) months after such notice, neither Owners nor their successors and assigns, nor their respective Affiliates, shall enter into an obligation or agreement to sell or transfer the Eklutna Hydroelectric Project, unless the (i) Owners first offer, in writing, to sell to AWWU that portion of Owners' Facilities that are necessary to supply water from Eklutna Lake to the AWWU Facilities; and (ii) AWWU declines to purchase such portion of Owners' Facilities within thirty days after notification of the offer to sell. If, within thirty days after notification of the offer to sell, AWWU indicates a good faith intention to purchase such portion subject to a need for ongoing review, then this shall trigger an additional 90-day period during which the Parties shall meet and negotiate in good faith terms and conditions then deemed appropriate and the

Owners shall in good faith provide necessary documentation to facilitate such review. If at the end of such 90-day period, AWWU has not yet purchased such portion, then the Owners shall be permitted to pursue other options for the transfer of the Eklutna Hydroelectric Project.

Section 6.2 Option to Acquire Owners' Water Rights and Termination. Upon the earlier of October 31, 2055, or the MOA's sale of its interests in the Eklutna Hydroelectric Project, AWWU may exercise an option to acquire sole ownership of a portion of the Owners' first-priority water rights that is then operative and reflected in the AWWU Water Permit and any subsequent certificate, which shall in no event exceed 41 million gallons per day, by quitclaim deed or other then-acceptable means of transfer, in exchange for relinquishing its AWWU Water Permit and Preferred Use Status (and associated legal rights) as no longer being legally functional or operative; provided, however, that AWWU shall (a) issue a written notice to the Owners of its intention to exercise such option no later than October 30, 2050; (b) prepare all legal documents necessary to transfer such water rights from the Owners to AWWU (subject to Owners' review and approval prior to execution); and (c) obtain all required Governmental Approvals to effectuate such acquisition at AWWU's sole cost and expense (the "AWWU Option"). Upon closing of the AWWU Option, this Agreement and the Parties' obligations hereunder shall terminate except for the right of first offer in Section 6.1 above, which shall survive and continue while Owners continue operations of the Eklutna Hydroelectric Project.

ARTICLE VII
TITLE; LOSS OR DAMAGE; FORCE MAJEURE

Section 7.1 Title.

(a) Legal title to and ownership of the Owners' Facilities, including Owners' Water Rights, shall remain with Owners throughout the Term of this Agreement, free and clear of any and all liens, claims, security interests or other encumbrances imposed by AWWU.

(b) Legal title to and ownership of the AWWU Facilities, including the AWWU Water Permit, and any resulting certificate of appropriation, shall remain with AWWU throughout the Term of this Agreement.

Section 7.2 Force Majeure. Each Party shall be excused from performance and shall not be considered to be in default with respect to any obligation hereunder, if and to the extent that such Party's failure of, or delay in, performance is due to a Force Majeure Event; provided, that:

(a) such Party gives the other Party prompt written notice describing the particulars of the Force Majeure Event as soon as is reasonably practicable after becoming aware of the occurrence of the Force Majeure Event;

(b) the suspension of performance is of no greater scope and of no longer duration than is reasonably required by the Force Majeure Event;

(c) no obligations of the affected Party that arose before the occurrence of the Force Majeure Event causing the suspension of performance shall be excused as a result of such Force Majeure Event, unless and only to the extent that the performance of such obligations is impaired by the Force Majeure Event;

(d) the Party uses diligent commercially reasonable efforts to overcome or mitigate the effects of the Force Majeure Event; and

(e) when the Party is able to resume performance of its obligations under this Agreement, such Party shall give the other Party written notice to that effect and shall promptly resume performance hereunder.

ARTICLE VIII
LIMITATIONS ON LIABILITY

Section 8.1 Aggregate Limitation of Liability. Notwithstanding any other provision of this Agreement, the total aggregate liability of the Owners and the total aggregate liability of AWWU arising out of or relating to this Agreement, from any and all causes, whether based on contract, tort (including negligence), strict liability or any other cause of action, shall in no event exceed ten million dollars ($10,000,000) for AWWU, or ten million dollar ($10,000,000) for the Owners collectively, provided that such limits shall not apply in the case of such Party's (i) gross negligence or willful misconduct, (ii) third-party indemnity obligation, or (iii) breach of any representation or warranty.

Section 8.2 CUMULATIVE REMEDIES. IF NO REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY PROVIDED, OR IF A REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY NON-EXCLUSIVE, THE NON-DEFAULTING PARTY SHALL HAVE THE RIGHT TO EXERCISE ALL RIGHTS AND REMEDIES AVAILABLE TO IT AT LAW OR IN EQUITY; PROVIDED, HOWEVER, THAT THE LIABILITY OF THE DEFAULTING PARTY SHALL BE LIMITED TO DIRECT, ACTUAL DAMAGES ONLY AND ALL OTHER DAMAGES AND REMEDIES ARE WAIVED.

Section 8.3 WAIVER OF CERTAIN DAMAGES. EXCEPT WITH RESPECT TO INDEMNIFICATION OF THIRD PARTY CLAIMS PURSUANT TO ARTICLE XI, OR AS OTHERWISE EXPRESSLY PROVIDED FOR HEREIN, IN NO EVENT SHALL EITHER PARTY BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY, INDIRECT, BUSINESS INTERRUPTION OR SIMILAR DAMAGES, WHETHER BY STATUTE, IN TORT, BY CONTRACT OR OTHERWISE.

ARTICLE IX
INDEMNIFICATION

Section 9.1 Indemnity. To the fullest extent permitted by Law, each Party shall indemnify, hold harmless and defend the other Party and its directors, officers, shareholders, partners, agents and employees, and the Affiliates of the same (collectively, the "Indemnified Parties"), from and against any and all loss, damage, expense and liability, including court costs and reasonable attorneys' fees (collectively, "Liabilities") arising incurred by the Indemnified Parties in connection with or arising from any claim for physical damage to or physical destruction to any property of any third party, or death of or bodily injury to any person, to the extent caused by the negligence of the Indemnifying Party or its agents or employees or others under such Indemnifying Party's control, except any Liabilities incurred due to the negligence or willful

misconduct of an Indemnified Party. For the purpose of the definition of "Indemnified Parties" AWWU shall not be considered to be an "Affiliate" of the MOA.

Section 9.2 Defense of Claims. A Party with an indemnification obligation pursuant to this Article IX (an "Indemnifying Party") shall have the right to defend the Indemnified Parties pursuant to this Article IX by counsel of the Indemnifying Party's selection (including insurance counsel) reasonably satisfactory to the Indemnified Party, unless in the opinion of counsel for the Indemnifying Party a conflict of interest between the Parties may exist with respect to such claim. If the Indemnifying Party does not assume the defense of the Indemnified Party, or if a conflict precludes counsel for the Indemnifying Party from providing the defense, then the Indemnifying Party shall reimburse the Indemnified Party on a monthly basis for the Indemnified Party's defense through separate counsel of the Indemnified Party's choice. Even if the Indemnifying Party assumes the defense of the Indemnified Party with acceptable counsel, the Indemnified Party, at its sole option, may participate in the defense, at its own expense, with counsel of its own choice without relieving the Indemnifying Party of any of its obligations hereunder. The Parties shall give each other prompt written notice of any asserted claims or actions indemnified against hereunder and shall cooperate with each other in the defense of any such claims or actions. Without the prior written consent of the Indemnified Party, which consent shall not be unreasonably withheld, conditioned or delayed, no Indemnifying Party shall settle any such claims or actions in a manner that would require any action or forbearance from action by any Indemnified Party.

ARTICLE X
DEFAULT AND REMEDIES; TERMINATION; DISPUTE RESOLUTION

Section 10.1 Event of Default. The following shall constitute events of default on the part of either party (each, an "Event of Default") under this Agreement:

(a) If a Party makes a general assignment for the benefit of its creditors, or if a receiver is appointed on account of the insolvency of such Party, or if such Party files a petition seeking to take advantage of any other Law relating to bankruptcy, insolvency, reorganization, winding up or composition of or readjustment of debts and, in the case of any such proceeding instituted against such Party (but not by such Party), such proceeding is not dismissed within sixty (60) days of such filing;

(b) If a Party fails to comply with any material terms of this Agreement not otherwise set forth as an Event of Default in this Section 10.1(b) and fails to cure or remedy such failure within thirty (30) days after notice and a written demand is made by the non-defaulting Party to the defaulting Party to cure the same or, if such failure cannot be cured within thirty (30) days, the defaulting Party fails to commence to cure such failure within thirty (30) days after such notice and written demand and thereafter diligently pursue such cure to completion, which shall in no event be later than ninety (90) days after such notice;

(c) If a Party defaults under the Interconnection Agreement or the Transportation Agreement;

(d) If a Party fails to make any payment due hereunder within sixty (60) days after receipt of written notice from the non-defaulting Party; or

(e) If any representation or warranty of a Party in this Agreement proves to have been false or misleading in any material respect when made, and such Party has not, within thirty (30) days after written notification thereof from the non-defaulting Party, either fully remedied, or commenced and diligently pursued the remedy, of all adverse impacts on the non-defaulting Party resulting therefrom, all to the reasonable satisfaction of the non-defaulting Party.

Section 10.2 Remedies Upon Event of Default. Upon the occurrence and continuation of an Event of Default, the non-defaulting Party shall have the right to terminate this Agreement and the Interconnection Agreement and the Transportation Agreement; upon ten (10) days written notice and pursue any other remedy available to such non-defaulting party at law or in equity arising out of such Event of Default, including a claim for monetary damage or specific performance.

Section 10.3 Automatic Cross-Agreement Termination. If this Agreement is terminated for any reason during the Term, the Interconnection Agreement and the Transportation Agreement shall automatically terminate, effective as of the same date as this Agreement's termination date.

Section 10.4 Dispute Resolution. In the event of any dispute arising under this Agreement (a "Dispute"), within ten (10) Business Days following notice by either Party, (i) each Party shall appoint a representative, and (ii) the representatives shall meet, negotiate and attempt in good faith to resolve the Dispute quickly, informally and inexpensively. In the event the representatives cannot resolve the Dispute within thirty (30) Days after the first meeting, either Party may request that consideration and resolution of the Dispute be transferred to a designated representative of each Party's senior management. Within ten (10) Days following such a request, each Party shall submit a written summary of the Dispute describing the issues and claims to a senior officer of each Party designated to address the Dispute. Within ten (10) Business Days after receipt of each Party's Dispute summaries, the senior management representatives for both Parties shall negotiate in good faith to resolve the Dispute. If such senior management representatives are unable to resolve the Dispute within thirty (30) Days thereafter, either Party may pursue any available legal remedies.

ARTICLE XI
REPRESENTATIONS

Section 11.1 General Representations and Warranties. Each Owner and AWWU hereby represents and warrants that:

(a) It is duly organized, validly existing and in good standing under the Laws of the state of its formation and is duly qualified to do business in the State of Alaska.

(b) It has all necessary power and authority to execute, deliver and perform its obligations under this Agreement; its execution, delivery and performance of this Agreement have been duly authorized by all necessary corporate, municipal, or other action on its part; and this Agreement has been duly and validly executed and delivered by it and constitutes its legal, valid and binding obligation enforceable against it in accordance with its terms, except as the

enforceability thereof may be limited by bankruptcy, insolvency, reorganization or moratorium or other similar Laws relating to the enforcement of creditors' rights generally and by general equitable principles.

(c) It is not in violation of any applicable Law, or any judgment entered by any federal, state, local or other Governmental Authority, which violations, individually or in the aggregate, would adversely affect its performance of any obligations under this Agreement. There are no legal or arbitration proceedings or any proceeding by or before any Governmental Authority, now pending or (to its best knowledge) threatened against it which, if adversely determined, could have a material adverse effect upon its financial condition, operations, prospects or business as a whole, or upon its ability to perform under this Agreement.

(d) No authorization, approval, exemption, or consent of or by any Person is required by it in connection with the execution, delivery, and performance of this Agreement. In addition, each Party represents and warrants to the other Party that the Governmental Approvals required to be obtained by such Party either have been obtained by such Party and are in full force and effect on the date hereof, or will be obtained by such Party and will be in full force and effect on or prior to the date on which they are required, under applicable Law, to be in full force and effect.

(e) The execution and delivery of this Agreement, the consummation of the transactions herein contemplated and compliance with the terms and provisions hereof by it will not conflict with or result in a material breach of, or require any consent under, any of its constitutive documents or any applicable Law, or under any agreement or instrument to which it is a party or by which it is bound or to which it is subject, or will constitute a material default under any such agreement or instrument.

ARTICLE XII
NOTICES

Section 12.1 Writing. Except as set forth in Section 14.2, any notice, statement, demand, claim, offer or other written instrument required or permitted to be given pursuant to this Agreement shall be in writing and signed by the Party giving such notice, and shall be sent by email, facsimile, hand messenger delivery, overnight courier service, or certified mail (receipt requested) to the other Party, and shall be sent to the addresses set forth in Exhibit B. Each Party shall have the right to change the address information to which notice shall be sent or delivered or to specify additional addresses to which copies of notices may be sent. All notices shall be effective upon receipt.

ARTICLE XIII
CONFIDENTIALITY

Section 13.1 Confidentiality. The Parties agree that the Parties' proposals, communications, negotiations and information exchanged prior to the Effective Date concerning this Agreement and the development thereof, and technical and other information regarding or relating to the subject of this Agreement exchanged between the Parties that is marked, or otherwise clearly communicated to the receiving Party as "Confidential," constitutes "Confidential

Information" of the disclosing Party. The Owners and AWWU each agree to hold such Confidential Information wholly confidential. Such Confidential Information may only be used by the Parties for the purposes related to the approval, administration or enforcement of this Agreement.

Section 13.2 Disclosure. Each Party agrees not to disclose Confidential Information of the other Party to any other Person (other than its Affiliates, counsel, consultants, lenders, partners, members, employees, officers and directors, and then only to Persons subject to similar confidentiality restrictions as those set forth herein), without the prior written consent of the other Party, provided, that either Party may disclose Confidential Information if such disclosure is required by Law, including without limitation, pursuant to an order of a court or regulatory agency to enforce this Agreement or to seek approval of this Agreement. In the event a Party is required by Law or a Governmental Authority to disclose Confidential Information, such Party, prior to such disclosure, shall provide reasonable advance notice to the other Party of the time and scope of the intended disclosure in order to permit such other Party the opportunity to obtain a protective order, or to otherwise seek to prevent or limit the scope or otherwise impose conditions upon such disclosure.

Section 13.3 Injunctive Relief. Each Party agrees that a violation of the terms of Sections 13.1 and 13.2 constitutes irreparable harm to the other Party, and that the harmed Party may seek any and all remedies available to it at law or in equity, including but not limited to injunctive relief.

Section 13.4 Release of Agreement. The Parties agree that this Agreement, upon execution, shall not be considered Confidential Information. Except as required by Law, releasing the Agreement to the public shall be the sole responsibility of the Owners, to be released in the manner at a time decided in their sole discretion.

ARTICLE XIV
MISCELLANEOUS

Section 14.1 Reasonability. The Parties shall act in a reasonable manner and in accordance with principles of good faith and fair dealing in the performance of this Agreement. Unless expressly provided otherwise in this Agreement and whether or not stated: (a) where this Agreement requires the consent, approval, or similar action by a Party, such consent or approval shall not be unreasonably withheld, conditioned, or delayed; and (b) wherever this Agreement gives a Party a right to determine, require, request, specify, or take similar action with respect to a matter, such determination, requirement, request, specification, or similar action must be reasonable.

Section 14.2 Entire Agreement. This Agreement, together with all Schedules and Exhibits hereto, embodies the entire agreement and understanding of the Parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements and understandings of the Parties, verbal or written, relating to the subject matter hereof.

Section 14.3 Waiver. Any waiver of the provisions of this Agreement must be in writing and shall not be implied by any usage of trade, course of dealing or course of performance. No exercise of any right or remedy by AWWU or the Owners constitutes a waiver of any other right

or remedy contained in or provided by Law. Any delay or failure of a Party to exercise, or any partial exercise of, its rights and remedies under this Agreement shall not operate to limit or otherwise affect such rights or remedies. Any waiver of performance hereunder shall be limited to the specific performance waived and shall not, unless otherwise expressly stated in writing, constitute a continuous waiver or a waiver of future performance.

Section 14.4 Assignment. Neither Party shall assign this Agreement or any of its rights hereunder without the prior written consent of the other Party, which consent shall not be unreasonably withheld, conditioned or delayed. Notwithstanding the foregoing, either Party, without relieving itself from liability hereunder, and without the need for consent from the other Party provided that any such assignee shall agree to be bound by all terms and conditions hereof, may transfer, pledge or assign this Agreement: (a) to any person or entity succeeding to all or substantially all of the assets of the assigning Party; or (b) to a successor entity in a merger or acquisition transaction. Any assignment made in contravention of this Section 13.4 shall be void and unenforceable.

Section 14.5 Governing Law; Submission to Jurisdiction; Venue; No Jury Trial.

(a) Governing Law. THIS AGREEMENT SHALL BE GOVERNED BY, AND INTERPRETED AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF ALASKA, EXCLUDING ANY CHOICE OF LAW RULES.

(b) Submission to Jurisdiction, Venue. The Parties agree that any suit, action or other legal proceeding by or against any Party (or its Affiliates or designees) with respect to or arising out of this Agreement shall be brought exclusively in the courts of the State of Alaska, in the Municipality of Anchorage, as the Party instituting such suit, action or other legal proceeding may elect, provided that claims related to federal water rights, federal legislation enabling the Eklutna Hydroelectric Project or AWWU Facilities, or the 1991 Agreement may be brought in the United States District Court for the District of Alaska. By execution and delivery of this Agreement, each Party (for itself, its affiliates and its designees) irrevocably and unconditionally consents and submits to the exclusive jurisdiction of such courts and the appellate courts therefrom, and waives any right it may have to assert the doctrine of forum non conveniens or similar doctrine or to object to venue with respect to any proceeding. The Parties irrevocably consent to the service of process in any such action or proceeding by the mailing of copies thereof by registered or certified mail, first class postage prepaid to the addresses set forth in Exhibit B.

(c) No Jury Trial. EACH OF THE PARTIES HEREBY WAIVES ANY AND ALL RIGHTS TO DEMAND A TRIAL BY JURY IN ANY ACTION, SUIT, OR PROCEEDING ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY.

(d) Duty to Proceed. Pending final resolution of any Dispute, the Owners and AWWU shall continue to fulfill their respective obligations hereunder that are not the subject of the Dispute.

Section 14.6 Headings. The titles or headings of the various sections, articles and paragraphs hereof are intended solely for convenience and ease of reference and are not intended,

and are not to be deemed for any purpose, to modify or explain or place any interpretation or construction upon any of the provisions of this Agreement.

Section 14.7 Status of the Parties. No provision of this Agreement shall be construed or represented as creating a partnership, trust, joint venture, fiduciary or any similar relationship between the Parties.

Section 14.8 Status of Individual Owners. Each of the Owners shall be jointly and severally liable for the obligations of the Owners under this Agreement. The delineation of specific responsibilities set forth hereunder as among the Owners shall be at the sole discretion of the Owners, not AWWU. If at any time, the Owners agree that one or two of the Owners need no longer be party to this Agreement, such unnecessary Owner(s) may be removed as parties to this Agreement upon written notice to AWWU, if agreed, and shall retain no liability upon removal, with the remaining Owner(s) automatically assuming the full obligations of the Owners hereunder. If an Event of Default exists hereunder at any time with respect to an Owner, it shall be considered an Event of Default with respect to the Owners together as one Party hereunder, provided, that if another Owner agrees to assume such defaulting Owner's obligations under this Agreement by removing such Owner as a party pursuant to the preceding sentence of this Section 14.8 prior to the expiration of any applicable cure period, this shall not be considered an Event of Default hereunder.

Section 14.9 Insurance. Throughout the Term, the Owners shall maintain the required insurance policies as set forth on Exhibit D-1 and AWWU shall maintain the required insurance policy as set forth on Exhibit D-2.

Section 14.10 No Third Party Beneficiaries. This Agreement is made and entered into for the sole protection and legal benefit of the Owners and AWWU, and their permitted successors and assigns, and no other person shall be a direct or indirect legal beneficiary of, or have any direct or indirect cause of action or claim in connection with, this Agreement.

Section 14.11 Further Assurances. Each Party agrees to execute and deliver all further instruments and documents, and take all further action, as may be reasonably necessary to complete performance by the Parties hereunder and to effectuate the purposes and intent of this Agreement, including (1) support of amendment of water rights necessary to implement this Agreement; and (2) AWWU's support of Chugach's tariff revisions necessary to implement the compensation and gain RCA approval as outlined in Section 2.2.

Section 14.12 Amendments. No change, amendment or modification of this Agreement shall be valid or binding upon the Parties unless such change, amendment or modification shall be in writing and duly executed by the Parties.

Section 14.13 Severability. If any provision of this Agreement is determined to be illegal or unenforceable, such determination will not affect any other provision of this Agreement and all other provisions will remain in full force and effect.

Section 14.14 Conflicting Provisions. In the event of any conflict between this document and any Schedule or Exhibit attached hereto, the terms and provisions of this document, as

amended from time to time, shall control. In the event of any conflict among the Exhibits, the Exhibit of the latest date mutually agreed to by the Parties shall control.

Section 14.15 Survival. The provisions of Article I, Article VII, Article VIII, Article IX, Article X, Article XI, Article XII, Article XIV, and Article XIV shall survive termination of this Agreement for any reason.

Section 14.16 Counterparts. This Agreement may be executed in any number of separate counterparts and delivered by electronic means, each of which when so executed shall be deemed an original, and all of said counterparts taken together shall be deemed to constitute but one and the same instrument.

2

[Remainder of page intentionally left blank]

[2] Note to AWWU: this Agreement will not be signed until Assembly approval has been gained; see note on cover page; 14.17 should be removed because we cannot abide the risk that the Assembly approves, we execute, and then the Assembly subsequently withdraws such approval.

IN WITNESS WHEREOF, the Parties have caused this Public Water Supply Agreement to be executed by their duly authorized representatives as of the Effective Date.

Schedule 1.1
Definitions

"1984 Agreement" has the meaning set forth in the Recitals.

"1991 Agreement" means that certain Agreement between the Municipality of Anchorage, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., the United States Fish and Wildlife Service, the National Marine Fisheries Service, the State of Alaska, and the Alaska Energy Authority Relative to the Eklutna and Snettisham Hydroelectric Projects, dated August 7, 1991.

"Affiliate" means, with respect to any Person, any other Person controlling, controlled by or under common control with such first Person. For purposes of this definition and the Agreement, the term "control" (and correlative terms) means (1) the ownership of 50% or more of the equity interest in a Person, or (2) the power, whether by contract, equity ownership or otherwise, to direct or cause the direction of the policies or management of a Person.

"Agreement" has the meaning set forth in the introductory paragraph, and shall include all Exhibits and Schedules hereto.

"APA" has the meaning set forth in the Recitals.

"AWWU" has the meaning set forth in the introductory paragraph, and shall include all successors and permitted assigns of AWWU.

"AWWU Facilities" means the existing water transportation facilities owned and operated by AWWU, including the AWWU Eklutna Lake raw water diversion bypass tunnel interconnected with the intake tunnel of the Eklutna Hydroelectric Project and pipeline.

"AWWU Option" has the meaning set forth in Section 6.2.

"AWWU Water Permit" has the meaning set forth in the Recitals and as may be replaced as described in Section 3.1.

"AWWU Water Project" has the meaning set forth in the Recitals.

"Business Day" means any day other than a Saturday, Sunday or legal holiday in the state of Alaska.

"Chugach" has the meaning set forth in the introductory paragraph, and shall include all successors and permitted assigns of Chugach.

"Conditions Precedent" has the meaning set forth in Section 2.2.

"Confidential Information" has the meaning set forth in Section 13.1.

"Day" or "day" means a calendar day, unless expressly specified otherwise.

"Dispute" has the meaning set forth in Section 10.4.

"DNR" has the meaning set forth in the Recitals.

"Effective Date" has the meaning set forth in the introductory paragraph.

"Eklutna Hydroelectric Project" means the Eklutna Hydroelectric Project initially authorized, constructed and operated pursuant to the Eklutna Project Act of July 31, 1950 (64 Stat. 382, as amended), including any and all property and facilities acquired or used in connection therewith, all of which was then sold to the Owners by the United States of America on October 2, 1997.

"Equivalent Energy Production" has the meaning set forth in Exhibit A – Compensation.

"EWTF" has the meaning set forth in Section 3.2(a).

"Fish and Wildlife Program" has the meaning set forth in the Recitals.

"Force Majeure Event" means the occurrence of any act or event beyond the reasonable control of the Party affected that prevents the affected Party from performing its obligations under this Agreement, in full or part, if such act or event is beyond the reasonable control of, and not the result of the fault or negligence of, the affected Party and such Party has been unable to overcome such act or event with the exercise of due diligence (including the expenditure of reasonable sums), including the following: drought, flood, earthquake, storm, fire, lightning, epidemic, war, riot, civil disturbance, sabotage, terrorism or threat of terrorism, strike or labor difficulty, accident or curtailment of supply or equipment, total casualty to equipment, or restraint, order or decree by a Governmental Authority. Notwithstanding the foregoing, Force Majeure Events shall expressly not include mechanical or equipment failures (except to the extent any such failure is itself caused by a Force Majeure Event) nor diminution in water quality in Eklutna Lake.

"Governmental Approvals" means all authorizations, consents, licenses, leases, rulings, certifications, registrations, exemptions, permits, certificates, and approvals from any Governmental Authority.

"Governmental Authority" means any federal, state or local government, any political subdivision thereof, or any governmental, quasi-governmental, judicial, public or statutory instrumentality, administrative agency, authority, body or other entity having jurisdiction over the Eklutna Hydroelectric Project or AWWU Water Project or their operations, or the health, safety or environmental conditions or otherwise over the Parties.

"Indemnified Parties" has the meaning set forth in Section 9.1.

"Indemnifying Party" has the meaning set forth in Section 9.2.

"Interconnection Agreement" has the meaning set forth in the Recitals.

"Law" means any constitution, charter, act, statute, law, ordinance, code, rule, regulation, order, specified standards or objective criteria contained in any applicable permit or approval or other legislative or administrative action of any Governmental Authority or a final decree, judgment or order of a court or tribunal.

"Liabilities" has the meaning set forth in Section 9.1.

"MEA" has the meaning set forth in the introductory paragraph, and shall include all successor sand assigns of MEA.

"MOA" has the meaning set forth in the introductory paragraph, and shall include all successor sand assigns of MOA.

"MOA-Chugach APSA" means that certain Asset Purchase and Sale Agreement by and between the MOA and Chugach, as amended on December 28, 2018.

"MOA-Chugach Eklutna PPA" means that certain Power Purchase Agreement by and between the MOA and Chugach, dated December 28, 2018, as amended.

"MOA-MEA Eklutna PPA" means that certain Power Purchase Agreement by and between the MOA and MEA, dated September 16, 2019, as amended.

"Owners" has the meaning set forth in the introductory paragraph, and shall include all successors and permitted assigns of the Owners.

"Owners' Facilities" has the meaning set forth in the Recitals.

"Owners' Water Rights" has the meaning set forth in the Recitals.

"Party" and "Parties" has the meaning set forth in the Recitals.

"Person" means any individual, partnership, corporation, limited liability company, association, business, trust, government or political subdivision thereof, Governmental Authority or other entity.

"Preferred Use Status" has the meaning set forth in the Recitals.

"Project Water Rights" has the meaning set forth in the Recitals.

"RCA" has the meaning set forth in Section 2.2(c).

"Recovered Electrical Energy" has the meaning set forth in Section 3.2(a).

"Replacement Energy" has the meaning set forth in Section 3.2(a).

"Replacement Energy Amount" has the meaning set forth in Exhibit A.

"Replacement Energy Payments" has the meaning set forth in Section 3.2(a).

"Term" has the meaning set forth in Section 2.4.

"Transportation Agreement" has the meaning set forth in the Recitals.

EXHIBIT A

Water Scheduling and Compensation

Scheduling & Reporting:

1. Prior to April 1 of each year, AWWU will furnish to the Owners its estimate of:

    a) Anticipated annual diversions of water for public water supply in the AWWU Water Project for the next five water years (June 1 – May 31), by year, for that same period; and

    b) Anticipated monthly diversions of water for public water supply in the AWWU Water Project for the next water year.

2. Within ten (10) days of the beginning of each month, AWWU will furnish to the Owners, on a monthly basis, the daily actual meter readings showing (a) water used by the AWWU Water Project in the preceding month, and (b) electric energy generated by the AWWU Water Project and delivered to the Owners.

Compensation:

As set forth in Section 3.2(a) and (b) of the Agreement and as was previously agreed to by the Parties in the 1984 Agreement, AWWU's use of the Project Water Rights shall remain a burden solely on the MOA's proportionate ownership share of the Project, and for the avoidance of doubt, shall not be allocated to Chugach's or MEA's proportionate ownership shares. Allocation of cost responsibility to the MOA shall be accounted for in the Eklutna Hydroelectric Project's water balancing account maintained among the Owners rather than through billing or other payment compensation owed by AWWU, except as set forth in Section 3.2 and in this Exhibit A. If the MOA's allocation of the Eklutna Hydroelectric Project's water in any given month is insufficient to cover AWWU's use of the Eklutna Hydroelectric Project's water in that month, AWWU will remain entitled to take its water needs within the parameters set forth in the Agreement and AWWU's Water Permit, and the Owners will make necessary adjustments to the MOA's water position within the Eklutna Hydroelectric Project's water balancing account accordingly.

AWWU will compensate the Owners for Replacement Energy (the reduction in electric energy generation attributable to AWWU's use of the Eklutna Hydroelectric Project's water) through Recovered Electrical Energy and Replacement Energy Payments. In other words, AWWU will pay Owners for MWhs not produced, rather than for the quantity of water used by AWWU.

AWWU will not, however, be required to compensate the Owners for water used by AWWU for public water supply in the AWWU Water Project during unplanned reservoir spill events at the Eklutna Hydroelectric Project (i.e., water spills over Eklutna Hydroelectric

Project's dam or through the spillway other than such releases by Owners as part of their implementation of the Fish and Wildlife Program) as measured on a day for day basis. In other words, during days of unplanned reservoir spill events, AWWU will not be required to compensate the Owners for water and equivalent energy generation.

Each month during the term of the Agreement, Chugach (as the Owners' representative designated by the Owners) shall compute the compensation owed by AWWU to Owners pursuant to Section 3.2 of the Agreement and as provided below. Chugach shall provide an invoice to AWWU showing billing determinants, charges, rebates (if any), total amount due, as well as detail regarding the Replacement Energy Payment calculation and Recovered Electrical Energy accounting. As set forth in Section 5.1 of the Agreement, Chugach shall collect such payments from AWWU, allocate values among the Owners as applicable (e.g., pass through its share of the compensation to the MOA), and maintain records as appropriate.

Monthly Compensation Calculation

1. Following receipt of the meter readings from AWWU, the total number of gallons of water used by AWWU during that month, less water used during days in which the unplanned reservoir spill events described above, shall be converted to acre-feet.

2. The energy equivalent for AWWU's water shall then be calculated by multiplying the acre-feet of water used by AWWU by the Eklutna Hydroelectric Project's average energy production per unit of water (kWh/acre-foot) for the month; the result of this calculation is the Equivalent Energy Production (kWh) attributable to AWWU's water usage. Equivalent Energy Production for a given month will be the Replacement Energy for that month.

3. The Replacement Energy in that month shall then be reduced by metered Recovered Electrical Energy at EWTF delivered to MEA and as reported by MEA meter readings to determine the amount of net Replacement Energy (kWh) for which AWWU owes compensation to Chugach for that billing period (the "Replacement Energy Amount").

4. The billing charges for Replacement Energy Amount shall then be calculated as the product of the Replacement Energy (kWh) (after deduction of the Recovered Electrical Energy) and the monthly energy rate set forth in Chugach's Tariff -- "Replacement Energy Service -AWWU" (as may be amended); such charges for Replacement Energy may be adjusted on a kilowatt-hour basis to recover the cost of power as described in Chugach's Tariff -- Fuel and Purchased Cost of Power Adjustment (comprised of fuel, purchased power, and renewable energy adjustment factors) and the Beluga River Unit Contributed Capital Surcharge and Rebate (when applicable).

5. Compensation for Replacement Energy owed by AWWU to Chugach will be capped at $600,000 per water year in value in aggregate as set forth in Section 3.2(b) of the Agreement, as such amount will be adjusted annually for inflation rate using a 15 year rolling average reflected in the Bureau of Labor Statistics' Urban Alaska Consumer Price Index (CPI-U) (as currently reported by State of Alaska Department of Labor and Workforce Development at https://live.laborstats.alaska.gov/cpi/table) ("AWWU Compensation Cap"). In any month of the Term, to the extent that AWWU does not fully compensate Chugach for the total Replacement Energy Amount owed due to application of the AWWU Compensation Cap, the MOA will make Chugach whole through the calculation of a monetary sum equal to the Replacement Energy Amount multiplied by rates set forth in the Chugach tariff for the Replacement Energy Service -- AWWU that shall paid by the MOA to Chugach (i) as an offset against the MOA's ownership share of AWWU payments owed by Chugach pursuant to Section 6.23 of the MOA-Chugach APSA, (ii) cash payments from the MOA to Chugach, or (iii) if necessary, as an offset against other payment obligations owed by Chugach to the MOA pursuant to the MOA-Chugach Eklutna PPA.

Owners' Allocations

1. The Owners hold the following proportionate ownership shares of the Project: MOA – 53.33%; Chugach – 30.00%; MEA – 16.67%.

2. Pursuant to reallocations, terms and conditions set forth in the (i) the MOA-Chugach Eklutna PPA, (ii) Section 6.23 of the MOA-Chugach APSA, and (iii) the MOA-MEA Eklutna PPA, the Project's water (and resulting power output) is allocated to the Owners in the following proportionate shares: MOA – 0%; Chugach – 64.29%; MEA – 35.71%.

3. The cost responsibility for implementation of the Fish and Wildlife Program is borne by the Owners as follows: MOA – 19.04%; Chugach – 64.29%; MEA – 16.67%.

4. MEA shall compensate the MOA for Recovered Electrical Energy at the EWTF received by MEA through the Eklutna Hydroelectric Project's water balancing account.

Execution Version

BINDING TERM SHEET

WATER FACILITIES INTERCONNECTION AND LONG-TERM WATER TRANSPORTATION SERVICES

EFFECTIVE DATE: OCTOBER 27, 2023

In furtherance of their obligations to implement a Fish and Wildlife Program (defined below) pursuant to the 1991 Agreement,[1] the Eklutna Owners (defined below) desire to transport a portion of the water reserved for hydroelectric production in their Eklutna Hydroelectric Project through the water utility tunnel and pipeline system owned by Anchorage Water and Wastewater Utility for the purpose of establishing instream water flows in the Eklutna River. Anchorage Water and Wastewater Utility is willing to allow its water utility tunnel, pipeline, and other infrastructure as appropriate to be used for this purpose should the Governor of Alaska approve the Fish and Wildlife Program inclusive of the proposed usage of Anchorage Water and Wastewater Utility's infrastructure. In entering into this Term Sheet and the Agreements (as defined below), however, Anchorage Water and Wastewater Utility does not, and shall not, take any position on whether or not using Anchorage Water and Wastewater Utility's infrastructure is the best alternative for establishing instream water flows in the Eklutna River as the foundation of the Fish and Wildlife Program. Instead, Anchorage Water and Wastewater Utility merely states its willingness to allow use of its infrastructure under the agreed terms and conditions, pursuant to a Governor-approved Fish and Wildlife Program. The parties, as Customer and Service Provider as defined below, have investigated the engineering, interconnection, operational, and regulatory requirements necessary for Service Provider to operate water facilities interconnections and long-term water transportation services to Customer and have agreed to the terms set forth below, which will be memorialized in detailed contractual agreements by March 1, 2024, subject to certain conditions precedent. This Term Sheet shall bind the parties as set forth in this Term Sheet and inure to the benefit of the respective successors and permitted assigns of each of the Parties signatory hereto; provided, however, that neither this Term Sheet nor any rights, benefits, obligations or duties hereunder may be assigned, transferred, hypothecated or otherwise conveyed without the prior express written consent of the other Party. Any such purported assignment, transfer, hypothecation or other conveyance without such prior express written consent shall be void.

1. **Eklutna Owners/ Customer**	Chugach Electric Association, Inc., Matanuska Electric Association, Inc., and the Municipality of Anchorage ("***Eklutna Owners***" or collectively, the "***Customer***").
2. **Service Provider**	Anchorage Water and Wastewater Utility ("***Service Provider***" or "***AWWU***", and collectively with Customer, the "***Parties***").

[1] Agreement between the Municipality of Anchorage, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., the United States Fish and Wildlife Service, the National Marine Fisheries Service, the State of Alaska, and the Alaska Energy Authority Relative to the Eklutna and Snettisham Hydroelectric Projects, dated August 7, 1991 (the "1991 Agreement").

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

3. **Agreements**	(1) Water Facilities Interconnection Agreement ("***Interconnection Agreement***"); and (2) Long-Term Water Transportation Services Agreement ("***Transportation Agreement***") (collectively with the Interconnection Agreement, the "***Agreements***").
4. **Binding Term Sheet**	The Parties will use commercially reasonable efforts to negotiate and execute the Agreements and associated documentation promptly following the date of this binding Term Sheet ("***Term Sheet***") in accordance with the substantive terms set forth below. Until such time as this Term Sheet is replaced by any such further documentation, or is terminated pursuant to the terms herein, this Term Sheet remains binding on the signatory parties, and memorializes the legal and enforceable rights and obligations of, the Parties. If the Parties fail to enter into the Agreements by March 1, 2024, either Party may terminate this Term Sheet upon thirty (30) days written notice. The Parties also acknowledge that design is in its early stages and that the current concept for development of the Eklutna River Release Facility, and use of the AWWU Facilities (as defined below) may be further refined after the date of this Term Sheet. Accordingly, the substantive terms of this Term Sheet are subject to change during the course of the negotiation of the Agreements due to any material refinement of such designs and neither Party shall be in breach of this Term Sheet by seeking to change said substantive terms to address such material refinements arising out of the design process, provided that in seeking such a change or changes, such Party is operating in good faith to preserve the primary purpose of this Term Sheet that the Customer and AWWU cooperate to use AWWU Facilities to transport water from Eklutna Lake into the Eklutna River as part of the Eklutna Owners' implementation of the Fish and Wildlife Program.
5. **Purpose**	The Parties intend to enter into definitive Agreements, the key terms of which are set forth in this Term Sheet (subject to the right to change said terms due to material refinements in design process provided in Article 4 above), to enable the Eklutna Owners to implement a fish and wildlife program as required by the 1991 Agreement (the "***Fish and Wildlife Program***"), upon approval by the Governor of Alaska. Specifically, the Eklutna Owners intend to reestablish and preserve instream flows of the Eklutna River to implement the Fish and Wildlife Program through

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

	two primary mechanisms, and to mitigate the impact of the Fish and Wildlife Program on AWWU's public water system as required under Section 2 of the 1991 Agreement: (1) the construction of the Eklutna River Release Facility (as defined in Section 6 below), to consist of a River Release Structure (as defined below) to be owned and managed by Customer and an Isolation Valve Structure (as defined below) to be owned by Service Provider and managed in part by Service Provider and in part by Customer (as further described herein), all to be interconnected to the existing AWWU Facilities (as defined in Subsection (2) below), which shall be used for the ultimate delivery of water to the Eklutna River; and (2) the use of existing water transportation facilities owned and operated by AWWU on terms defined below, including but not limited to the AWWU Eklutna Lake raw water diversion bypass tunnel and pipeline ("***AWWU Facilities***"), which will allow for the transport of Customer's water from the Injection Point to the Delivery Point defined and described below ("***Water Transportation Services***"). A more detailed overview of the Eklutna River Release Facility is set forth in Appendix A. Appendix A also shows: • the "***Injection Point***" (the existing "T" in the tunnel downstream of the Eklutna power plant intake in Eklutna Lake where the AWWU tunnel begins) at which the custody, control, and risk of loss of water is exchanged from Customer to Service Provider, • the AWWU Facilities, an existing tunnel and pipeline covering a distance of roughly 1.6 miles, • the "***Delivery Point***" (the outlet of a new "T" to be built in the AWWU pipeline downstream of the AWWU tunnel/pipeline transition and upstream of the AWWU portal valve) at which the custody, control, and risk of loss of water is exchanged from Service Provider back to Customer, • A 54-inch gate valve on the main segment of AWWU pipeline intended to provide dual means of

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

	isolation for AWWU's pipeline segment (the "***AWWU Isolation Valve***"); and • A 42-inch gate valve on the branch segment of AWWU pipeline intended to provide isolation to the river release structure ("***Customer Isolation Valve***", together with the AWWU Isolation Valve, the "***Isolation Valves***"). Accordingly, this binding Term Sheet sets forth key terms of definitive Agreements, wherein the Eklutna Owners desire for (1) the Parties to mutually set forth certain obligations and understandings regarding the development, construction, and operation of the Eklutna River Release Facility, which shall be connected to AWWU Facilities, and (2) compensate AWWU for the provision of Water Transportation Services.
6. **Eklutna River Release Facility Definition**	The "***Eklutna River Release Facility***" shall consist of the proposed Isolation Valve Structure and the River Release Structure. The "Isolation Valve Structure" shall include the tee, the Isolation Valves, controls, and communication technology to be installed in the main line of the AWWU Facilities and owned and operated by Service Provider, provided that Customer shall have coordinated control of the Customer Isolation Valve for maintenance throughout the Delivery Term; and the "River Release Structure" shall include a new pipeline, control valve, the Delivery Point Meter (as defined below) and monitoring and control equipment and will be owned and operated by Customer. The Eklutna River Release Facility shall be designed, engineered, and constructed by Customer, all potentially as shown in Appendix B (the 15% design), which is subject to change and approval by both Parties in all respects during the design and approval stages of project development.
7. **Effective Dates and Conditions Precedent**	The definitive Agreements will become effective upon execution (the "***Execution Date***"), but the construction and operational obligations set forth in the definitive Agreements will become binding upon the Parties only upon the satisfaction of the following conditions precedent (such date, the "***Construction Start Effective Date***"): (1) The Eklutna Owners gain final approval of their Fish and Wildlife Program by the Governor of Alaska that requires use of AWWU Facilities as contemplated in this

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

	Term Sheet without any conditions materially adverse to the Eklutna Owners or AWWU, as determined in good faith and in the exercise of commercial reasonable business judgment, and that such Eklutna Owners' Fish and Wildlife Program and the Governor's final approval is not subject to any pending judicial review or appeal; (2) The Eklutna Owners obtain all permits necessary to construct the Eklutna River Release Facility; and (3) The Eklutna Owners obtain or provide evidence of lawful Certificates of Appropriation from the Alaska Department of Natural Resources for the use and transport of water as contemplated under the Transportation Agreement, including but not limited to an amendment of existing water rights or other approval(s) authorizing a change of use allowing Eklutna Owners' use of a portion of their certificated water right to establish and continue instream flows. The Eklutna Owners will commence final engineering and construction of the Eklutna River Release Facility on the Construction Start Effective Date, and endeavor to complete construction within a reasonable time to be defined in the Agreements following the Governor's approval in a manner consistent with the approved Fish and Wildlife Program and the 1991 Agreement. The obligations to provide and take Water Transportation Services shall begin when the Eklutna Owners achieve Commercial Operation of the Eklutna River Release Facility. "***Commercial Operation***" means, with respect to the Eklutna River Release Facility, that all construction, testing and operational conditions have been fulfilled as evidenced by a certificate from a licensed professional engineer.
8. **Term**	The Agreements shall continue for 35 years from the Commercial Operation date (the "***Delivery Term***"), unless terminated earlier in accordance with the terms thereof. The "***Term***" of the Agreements shall begin on the Execution Date and continue until the expiration of the Delivery Term. At the conclusion of the Term, the Agreements shall thereafter renew on a year-to-year basis, unless terminated earlier in accordance with the terms hereof.

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

9. **Interconnection Agreement**	Commencing on Effective Date, the Parties shall take all commercially reasonable efforts to develop the Eklutna River Release Facility pursuant to the Interconnection Agreement, which shall include, but not be limited to, the following terms: a. **Customer Responsibilities**. Following the Effective Date, the Customer shall be responsible, solely at its own expense, to (i) design, engineer, permit, and construct the Eklutna River Release Facility to meet the layout and design criteria as presented in Appendix B (15% design), which may be updated and refined from time to time hereafter; for the avoidance of doubt, this shall include all transmission, power, and communication facilities associated with construction; (ii) provide to Service Provider the design drawings pertaining to the Eklutna River Release Facility and any updates to the specifications for the Service Provider's review and approval; (iii) obtain all real property interests necessary for the construction, operation, and maintenance of the Eklutna River Release Facility; (iv) complete all permitting and environmental impact studies necessary for the construction, operation, and maintenance of the Eklutna River Release Facility; (v) acquire and maintain all governmental authorizations and other necessary Approvals for the design, construction, commissioning, ownership, operation, and maintenance of the Eklutna River Release Facility; achieve all milestones to be set forth in a definitive Interconnection Agreement; (vi) construct the Eklutna River Release Facility; (vii) construct security facilities (e.g., fencing, [cameras]) surrounding the Eklutna River Release Facility; (viii) enable Service Provider to have access at all times, (ix) operate the River Release Structure, which is connected to the Isolation Valve Structure at the Delivery Point, and (x) operate the Customer Isolation Valve for maintenance in close coordination with Service Provider. Upon commissioning, the Customer will provide the Service Provider with all as-built/record drawings and operation/maintenance documentation for all constructed facilities.

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

b. **Service Provider Responsibilities**. Following the Effective Date, Service Provider shall be responsible to (i) provide assistance and cooperation to all reasonable requests of Customer regarding the design, engineering, permitting, construction, installation, testing, start-up and commissioning of the Eklutna River Release Facility (including timely written review and approval of Customer's design and engineering), and on obtaining and maintaining all governmental authorizations and third party owned real property interests necessary for the construction, operation, and maintenance of the AWWU Facilities to the Delivery Point, and (ii) operating the AWWU Facilities and the Isolation Valve Structure, but in such a way that allows Customer to access and operate the Customer Isolation Valve for maintenance on a coordinated basis. Service Provider shall further agree to not suspend or otherwise halt access to the AWWU Facilities during the period of construction, except to the extent needed to address reasonable security or safety issues and to avoid putting AWWU's water supply at risk of interruption or contamination. The foregoing responsibilities described in this Subsection b are referred to herein as the "***Service Provider Responsibilities***".

c. **Development Costs**. The Customer shall be solely responsible for and shall pay all costs and expenses incurred in connection with performing the responsibilities necessary to build the Eklutna River Release Facility; Customer shall reimburse Service Provider for its actual costs related to or arising out of the development and construction of the Eklutna River Release Facility and related Service Provider Responsibilities, including but not limited to documented direct and indirect costs, overhead, general and administrative costs, staff time, and all other costs related to or arising out of the planning, engineering and project management associated with Eklutna River Release Facility and Service Provider Responsibilities, provided that Service Provider shall use commercially reasonable efforts to minimize such costs.

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

	d. **Tie-In / Installation Costs**. Customer will be responsible for, and will pay or reimburse Service Provider, all costs required to connect the Eklutna River Release Facility to the AWWU Facilities; provided that, for any easements or other rights-of-way or land use permits required on AWWU-owned land to so connect AWWU Facilities to Eklutna River Release Facility, Service Provider shall provide such easements at a reasonable or no cost to Customer. To the extent necessary but not held by AWWU, Customer shall be solely responsible for obtaining and paying for any and all easements, rights-of-way, or land use rights from third parties which are necessary for the connection of the River Release Structure to the AWWU Facilities through the Isolation Valve Structure. Connection costs include but are not limited to engineering, soil testing, site preparation, demolition, implementation of civil work, mechanical improvements, structural upgrades, piping, electrical improvements, instrumentation and controls upgrades, communications improvements, safety, fire protection, environmental testing, equipment rentals, permitting, and construction support.
10. **Transportation Agreement**	Commencing on Commercial Operation, AWWU shall perform, and the Customer shall take, on an exclusive basis, the Water Transportation Services pursuant to the Transportation Agreement, which shall include, but are not limited to, the following terms: a. **Amount.** During the Delivery Term Service Provider shall transport Customer's water from the Injection Point to the Delivery Point commingled with and undifferentiated from Service Provider's raw water deliveries to the Eklutna Water Treatment Facility ("***EWTF***"). At the Delivery Point, Customer's water (not intended for municipal water) supply may be released to the Eklutna River through the Eklutna River Release Facility. Control valves in the Eklutna River Release Facility downstream of the Delivery Point will be used to set the rate of release of Customer water to the Eklutna River, in accordance with a predetermined dynamic delivery schedule established in the final Fish and Wildlife Program

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

documentation. The total amount released will be measured by flow meters at the Delivery Point by the Delivery Point Meter (as defined below). The maximum daily rate of conveyance (the "***Contract Maximum***") will be determined based on hydraulic analysis of the AWWU Facilities and the Eklutna River Release Facility under various operating scenarios. The maximum daily flow available at the Eklutna River Release Facility will not inhibit the ability to deliver a flow rate of at least 41 MGD to the EWTF at a pressure sufficient to allow normal operation of the EWTF as currently configured, or exceed the hydraulic capacity or design criteria of the AWWU Facilities. The Contract Maximum shall be reduced as a result of any Excused Events, force majeure or other unforeseen outages or conditions.

b. **Control.** The AWWU Facilities shall be solely operated, managed, and maintained by Service Provider or its designee materially in accordance with all governmental authorizations and in accordance with applicable law, prudent industry practices, the most current editions of the AWWU Design and Construction Practices Manual, Municipality of Anchorage Standard Specifications and Anchorage Municipal Code, provided that as part of such operation, management and maintenance, Service Provider shall cooperate and provide access as needed to Customer for Customer's operation, management, and maintenance of Customer Isolation Valve on a coordinated basis.

c. **Costs and Exchange of Services.** All costs of water transportation, operations, management and maintenance borne by AWWU (including but not limited to the use of the AWWU Facilities, the tee and the valves described above) will be exchanged on an equal basis for AWWU's continued use of the Customer's intake, hydrotunnel and any other facilities necessary to supply water from the Eklutna Lake to the AWWU tunnel and related water transportation, operations, management and maintenance costs borne by Customer.

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

	d. **Operating Procedures and Coordination.** Service Provider shall, at Customer's expense, develop proposed written operating procedures for the provision of Water Transportation Services (the "***Operating Procedures***") in close coordination with the Customer as set forth in the Transportation Agreement. The Operating Procedures shall include the Parties' respective obligations for the following considerations: (i) method of day-to-day communication and reporting; (ii) key personnel lists for Service Provider and Customer; (iii) reasonable coordination regarding timing of planned outages; (iv) reporting of emergencies, planned outages and forced outages of AWWU Facilities; (v) reporting of curtailment periods; (vi) ongoing reporting of metered quantities measured at the Delivery Point and Injection Point; and (vii) reasonable coordination regarding requisite permits and all other necessary federal, state, and local Approvals; and (viii) a clear statement of operational priority of the Service Provider's public water supply.
11. **Title**	Control, custody, and risk of loss, of the Customer's water shall transfer to Service Provider between the Injection Point and the Delivery Point. Control, custody, and risk of loss, of the Customer's water shall then revert back to the Customer once the water is delivered to the Customer at the Delivery Point. For the avoidance of doubt, the Customer, as holders of water rights certificate ADL 44944, shall retain title at all times to all its water transported by Service Provider. The AWWU Facilities shall remain the property of AWWU; the Eklutna River Release Facility downstream of the Delivery Point will be owned by the Customer; the Isolation Valve Structure will be owned by AWWU, provided that Customer shall have coordinated control of the Customer Isolation Valve for maintenance throughout the Delivery Term. The Parties shall collaborate in good faith to determine the exact demarcation of ownership of the new facilities in the Interconnection Agreement.
12. **Public Water Supply Agreement and Water Rights Application**	a. **Public Water Supply Agreement.** As part of the negotiations of the Agreements, the Parties shall negotiate a new agreement to replace the Agreement for Public Water Supply and Energy

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

Generation from Eklutna Lake, Alaska, dated February 17, 1984 ("***1984 Agreement***"), as amended, which expires in 2025. The 1984 Agreement and the new agreement are required by Alaska state law, AS 46.15.150, which permits AWWU's preferred water use status only if AWWU agrees to compensate Customer, who holds a senior water right to AWWU, for damages sustained by the preferred use. Such new agreement replacing the 1984 Agreement shall provide that the Service Provider shall:

(i) as required under AS 46.15.150, continue to compensate the Customer (or any individual Eklutna Owner, as applicable) for water or replacement energy and use of Customer's facilities pursuant to substantially similar terms as those included in the 1984 Agreement; provided, however, that (x) AWWU's compensation shall be capped at $600,000 per year, which amount shall be adjusted annually to reflect inflationary changes as reflected in Bureau of Labor Statistics' Consumer Price Index (CPI-U) and such compensation payments shall end upon AWWU obtaining priority water rights from Customer pursuant to Subsection b of this Section 12 below or otherwise, (y) such AWWU payments shall be payable to Chugach; and (z) all other costs and losses attributable to AWWU's decreased compensation shall be netted out of the Municipality of Anchorage's (MOA's) ownership share of the water used in the Eklutna Project pursuant to provisions in the two power purchase agreements among the Eklutna Owners, effective October 30, 2020,

(ii) be entitled to continued use of the Customer's intake, hydrotunnel and any other facilities necessary to supply water to the AWWU Facilities, so long as such facilities are being used by the Eklutna Owners to generate power for the Eklutna Hydroelectric Project

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

(iii) receive a first right of refusal to purchase the Customer's intake, hydrotunnel and any other of the Customer's facilities necessary to supply water to the AWWU Facilities in the event Customer's power production facilities are permanently shut down, and

(iv) have the right to approve any successor to Customer as operator of the Eklutna River Release Facility, provided that such approval will not be unreasonably withheld, conditioned, or delayed.

The term of the new agreement replacing the 1984 Agreement shall begin upon approval of the Fish and Wildlife Program by the Governor of Alaska and shall continue through October 30, 2060; provided, however, that in the event that litigation or other legal challenges lead to a final Fish and Wildlife Program that does not include the use of the AWWU Facilities for instream flows as contemplated in this Term Sheet, the new agreement replacing the 1984 Agreement shall be terminated and AWWU and the Eklutna Owners shall meet in good faith to negotiate a replacement agreement with terms and conditions then deemed appropriate, including compensation, risk mitigation, transfer or purchase of priority water rights, etc.

b. **Water Permit and Certificate Application.** Customer acknowledges and agrees that Service Provider has a permit for preferred water use for up to 41 million gallons per day for public water supply pursuant to the Act of October 30, 1984, 98 Stat. 2823; Alaska Statutes 46.15.150(a), LAS 2569, and Certificate of Appropriation ADL 44944, and the 1984 Agreement and its successor agreement. Customer acknowledges that the Service Provider's water permit provides for public water supply priority and preference for Service Provider's permitted water rights. In addition, upon the earlier of October 31, 2055 or the MOA's sale of its interests in the Eklutna Project, AWWU may exercise an option to exchange its rights for preferred water use for public water supply for an equal portion of Eklutna Owners' priority state

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

	water rights (i.e., Certificate of Appropriation ADL 44944), but not to exceed 41 million gallons per day, by quitclaim deed (or other then-acceptable means of transfer); provided (i) AWWU must issue notice of its intention to exercise such option no later than October 30, 2050 (which date aligns with a purchase option related to the Eklutna Project in a power purchase agreement among the Eklutna Owners); (ii) no additional compensation will be due from AWWU to the Eklutna Owners; and (iii) adjustments among the Eklutna Owners to accommodate AWWU's rights will be handled separately.
13. **Measurement and Metering**	Water shall be measured at the Injection Point by an existing flow meter in the AWWU Facilities (the "***Injection Point Meter***"). Water shall be measured at the Delivery Point by a new meter installed as part of the River Release Structure (the "***Delivery Point Meter***"). Delivery Point Meter measurements shall be used to calculate the amount of water received by Customer, but both Parties shall have real-time information as to such metering measurements. Reports for both the Delivery Point Meter and Injection Point Meter shall be included in a report by the Customer for each Month throughout the Delivery Term and shared with AWWU on a monthly basis.
14. **Taxes**	Customer shall be responsible for and shall pay any sales, use, gross receipts, occupation, and other taxes (excluding income, and franchise tax imposed upon Service Provider) from time to time payable as a consequence of the Interconnection Agreement and provision of Water Transportation Services.
15. **Standard of Performance; Obligations re Facilities.**	a. During the Term, the Customer shall cause the Eklutna River Release Facility to be constructed, operated, maintained, permitted and serviced in accordance with all prudent industry practices, applicable law, and the Interconnection Agreement. During the Term, Service Provider will cause the AWWU Facilities to be constructed, operated, maintained, permitted and serviced in accordance with all prudent industry practices, applicable law, and the Transportation Agreement.

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

Both Parties shall use commercially reasonable efforts to ensure that all employees and contractors engaged in connection with the maintenance, operation, service, and any future modification (to include design, construction, commissioning, and installation) to have the appropriate and necessary experience and skill, and expertise to carry out the tasks efficiently, professionally, and in accordance with prudent industry practice and applicable law.

b. Customer shall, in its sole discretion, develop and implement at its own expense an alternative method, plan, or procedures for dealing with emergencies, maintenance, and other planned or unplanned shutdowns or partial shutdowns of the Eklutna River Release Facility, the AWWU Facilities, or any of the Customer's intake, hydrotunnel or other facilities needed for the public water supply, provided that Service Provider (i) in the case of all non-emergency shutdowns, follows the schedules and protocols to be developed pursuant to Subsection c, (ii) in the case of emergency shutdowns, (a) uses best efforts to first address the situation in such way that does not involve a shutdown that would affect the Water Transportation Services; (b) provides as much notice as is practicable prior to any shutdown that will affect the Water Transportation Services; and (c) uses best efforts to minimize the duration of such shutdown.

c. Customer and Service Provider shall develop a schedule and protocol for routine planned shutdowns in order to allow for maintenance and inspection activities in their respective facilities to occur in a coordinated manner that minimizes impacts on Service Provider's utility water supply obligations and Customers' obligations under the Fish and Wildlife Program. Such schedule and protocol shall take into account routine hydropower operations to ensure that planned shutdowns only be scheduled at times when there is sufficient water available in Eklutna Lake to allow water releases through the maintenance gate of the diversion dam in the amounts necessary for Customer to meet its obligations under the Fish and Wildlife Program.

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

16. Site Access License	Service Provider shall provide Customer with a non-exclusive license for the purpose of installation, operation and maintenance of certain equipment, meters and other facilities owned by Customer and reasonable access thereto during the term of the Agreements and a reasonable right to enter upon Service Provider's property for all other purposes contemplated under the Agreements, subject to the reasonable scheduling and security requirements. Customer acknowledges that it may need to seek a site access license from one or more third parties in order to secure access the site.
17. **Road and Bridges**	Service Provider shall be responsible at its own expense for brushing, clearing and maintaining its access road along the AWWU Facilities, both above and below the Isolation Valve Structure. Customer may use such access road as part of its site license granted pursuant to Section 16. At eight (8) locations where such access road crosses the Eklutna River, and which are currently only accessible by ford-style crossings, Customer shall be responsible for installing at its own expense new bridges allowing the access road to cross the Eklutna River. Once installed, Service Provider shall perform, or cause to be performed, all maintenance of the bridges. The cost of such bridge maintenance shall be borne by Service Provider unless such cost is caused, directly or indirectly, by the Customer's negligence or intentional misconduct.
18. EWTF Power Production	Service Provider shall continue to be compensated for excess power it produces at the EWTF and delivers to Matanuska Electric Association ("***MEA***") pursuant to terms consistent with the terms of 1984 Agreement, as amended, and the terms of MEA's tariff for purchasing cogenerated power.
19. **Excused Events**	The Parties shall negotiate and include terms related to forced or planned outages or in response to any force majeure event, emergency, or other condition determined by Service Provider in its reasonable discretion to be a threat to any of the AWWU Facilities requiring interruption or reduction of flow to Customer. An Interruption or curtailment in these cases shall be known as an "***Excused Event***" in the Agreements. It is understood that the exercise of an Excused Event will be in accordance with Agreements, Operating Procedures, and in close coordination between Parties and (i) Customer shall not interfere with or otherwise adversely affect Service

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

	Provider's provision of water service as a public utility, unless any such Excused Event is closely coordinated with Service Provider, and (ii) Service Provider shall not interfere with or otherwise adversely affect Customer's provision of water for instream flows pursuant to the 1991 Agreement, unless any such Excused Event is closely coordinated with Customer or, if close coordination is not possible, coordination as soon as is reasonable under the circumstances.
20. **Force Majeure**	The Agreements shall contain customary definitions of force majeure events. Neither Party shall be liable to the other Party in the event it is prevented from performing its obligations hereunder in whole or in part due to a force majeure event. The Party rendered unable to fulfill any obligation by reason of a Force Majeure event shall take all commercially reasonable actions necessary to remove such inability with due speed and diligence. Nothing herein shall be construed as permitting that Party to continue to fail to perform after said cause has been removed. The obligation to use due speed and diligence shall not be interpreted to require acceleration of labor supply or resolution of labor disputes by acceding to demands of the opposition when such course is inadvisable in the discretion of the Party having such difficulty. Neither Party shall be considered in breach or default of the Agreements if and to the extent that any failure or delay in the Party's performance of one or more of its obligations hereunder is caused by a force majeure event. The occurrence and continuation of a force majeure event shall not suspend or excuse the obligation of a Party to make any payments due hereunder.
21. **Liability**	No party to the Agreements shall be liable for any consequential, incidental, indirect, special, or punitive damages with respect to the construction of the Eklutna River Release Facility. Except for a Party's (i) gross negligence or willful misconduct, (ii) third-party indemnity obligation, or (iii) breach of any representation or warranty, the party's maximum liability under the Agreements shall be equal to amount to be set forth in the definitive Agreements.

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

22. **Governmental Approvals**	Service Provider shall be responsible for obtaining and maintaining all permits, waivers, licenses, authorizations, and governmental approvals ("***Approvals***") required for the operations, maintenance, and management of the AWWU Facilities. The Customer shall be responsible for obtaining and maintaining all Approvals required for the construction, operations, and maintenance of the Eklutna River Release Facility, and Customer shall obtain or provide evidence of lawful Certificates of Appropriation from the Alaska Department of Natural Resources for the use and transport of water as contemplated under the Transportation Agreement, including but not limited to an amendment of existing water rights or other approval(s) authorizing a change of use allowing Eklutna Owners' use of a portion of their certificated water right to establish and continue instream flows. Service Provider shall not object or interfere with Customer's application for such amendment of Customer's water rights. The Parties shall use commercially reasonable efforts to cooperate with each other in obtaining and retaining the foregoing Approvals and water rights amendment.
23. **Governing Law**	This Term Sheet and the Agreements shall be interpreted, construed, and enforced in accordance with, and otherwise governed in all respects by, the laws of the State of Alaska.
24. **Confidentiality**	a. The Parties agree that this Term Sheet, the contents therein, and negotiations of the Agreements shall remain confidential subject to the Common Interest Agreement, dated effective September 15, 2017, as amended and confirmed. Upon execution, however, the Agreements shall become non-confidential, subject to Subsections b-c below. b. The Parties agree that any public release of the Agreements and the Term Sheet, each after execution, shall be the sole responsibility of Customer, and until that date upon which the Fish and Wildlife Program is approved without any pending judicial review or appeal, any public statements to be made by AWWU about the Fish and Wildlife Program or the proposals contained therein, including but not limited to about the use of AWWU infrastructure to transport water into the Eklutna River must first be approved by the Eklutna Owners, such approval not to be unreasonably withheld or

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

	delayed. For the purposes of any public release of such information, the Municipality of Anchorage and not AWWU, shall represent the Municipality of Anchorage in its role as an Eklutna Owner. Notwithstanding the foregoing, Service Provider may respond to any inquiries from the Municipal Assembly, RCA, and other regulatory and judicial authorities in a manner consistent with this Term Sheet and the Agreements. c. Service Provider shall make best efforts to ensure that all of the employees, agents, contractors and consultants of AWWU do not engage in activities as employees or agents of AWWU, including making public statements, that are reasonably likely to have an adverse effect on the public's perception of the Fish and Wildlife Program and the proposals contained therein, including but not limited to about the use of AWWU infrastructure to transport water into the Eklutna River, it being understood by both AWWU and the Eklutna Owners that such negative public statements can undermine the ability of the Eklutna Owners to satisfy their obligations under the 1991 Agreement; provided, however, that Service Provider cannot restrict the rights of such people as private citizens.
25. **Representations and Warranties**	Service Provider and the Customer shall provide customary representations and warranties, including (without limitation): due organization and good standing; due authorization, execution, and delivery; enforceability; solvency; and no conflicts.
26. **Indemnification**	Service Provider and the Customer shall provide customary reciprocal third-party indemnities for (i) any breach by such party of the Agreements, or (ii) its negligence or willful misconduct. Customer shall also indemnify and defend, and hold Service Provider harmless from any damage to AWWU's infrastructure, including but not limited to its infrastructure downstream from the Eklutna River Release Facility (*i.e.*, scouring or erosion of the river bed or banks that damages AWWU's water line and/or facilities). Customer shall further be solely responsible for, and shall indemnify, defend and hold Service Provider harmless from all claims or liability of any kind directly related to fish and wildlife mitigation measures and arising out of normal operation of the AWWU Facilities, the

DocuSign Envelope ID: E3323328-BC4E-4834-B96F-E87AE1D0E7EE

	Eklutna River Release Facility or any other facilities of the Service Provider, in a manner consistent with the definitive Agreements, prudent industry practices, the most current editions of the AWWU Design and Construction Practices Manual, Municipality of Anchorage Standard Specifications and Anchorage Municipal Code unless such claim or liability arose directly out of negligence, violation of law, or intentional misconduct by the Service Provider.
27. **Insurance**	During the Term, each Party shall maintain, at its own cost and expense, such insurance as shall be determined by the Parties in the Agreements. Notwithstanding the foregoing, Service Provider shall at all times during the Term maintain insurance coverage in compliance with Applicable Law in connection with the provision of Water Transportation Services.
28. **Other Terms**	The definitive Agreements will contain other usual and customary terms for transactions of a similar nature to those addressed thereby.
29. **Counterparts**	The Term Sheet may be executed by a number of counterparts, each of which shall be deemed an original, and all of which, together, shall constitute a single agreement.

GENERAL NOTES:

1. THESE ABBREVIATIONS APPLY TO THE ENTIRE SET OF CONTRACT DRAWINGS.
2. LISTING OF ABBREVIATIONS DOES NOT IMPLY ALL ABBREVIATIONS ARE USED IN THE CONTRACT DRAWINGS.
3. ABBREVIATIONS SHOWN ON THIS SHEET INCLUDE VARIATIONS OF THE WORD. FOR EXAMPLE, "MOD" MAY MEAN MODIFY OR MODIFICATION; "INC" MAY MEAN INCLUDED OR INCLUDING; "REINF" MAY MEAN EITHER REINFORCE OR REINFORCING.
4. SCREENING OR SHADING OF WORK IS USED TO INDICATE EXISTING COMPONENTS OR TO DE-EMPHASIZE PROPOSED IMPROVEMENTS TO HIGHLIGHT SELECTED TRADE WORK. REFER TO CONTEXT OF EACH SHEET FOR USAGE.

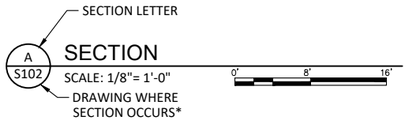
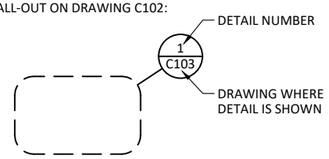
(1) SECTION CUT ON DRAWING C102:

(2) ON DRAWING C103 THIS SECTION IS IDENTIFIED AS:

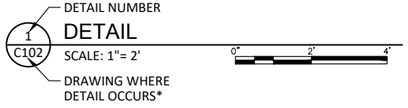


DETAIL IDENTIFICATION

(1) DETAIL CALL-OUT ON DRAWING C102:



(2) ON DRAWING C103 THIS SECTION IS IDENTIFIED AS:

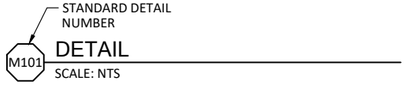


*NOTE: IF PLAN AND SECTION (OR DETAIL CALL-OUT AND DETAIL) ARE SHOWN ON SAME DRAWING. DRAWING NUMBER IS REPLACED BY A LINE.

STANDARD DETAIL IDENTIFICATION

(1) DETAIL CALL-OUT ON PLAN OR SECTION:

(2) ON DETAIL DRAWINGS, IDENTIFIED AS:



ELEVATION/IMAGE IDENTIFICATION

SITE PLAN LINE TYPES

- FENCE LINE
- OVERHEAD POWER
- MAJOR CONTOUR
- MINOR CONTOUR
- EXIST MAJOR CONTOUR
- EXIST MINOR CONTOUR
- EDGE OF WATERLINE
- TOE OF SLOPE
- TOP OF BANK
- SANITARY SEWER
- STORM DRAIN
- EDGE OF PAVEMENT
- EDGE OF GRAVEL
- WATTLE
- SILT FENCE
- CONSTRUCTION FENCE
- GAS LINE
- TURBIDITY CURTAIN
- IRRIGATION LINE
- WATER LINE
- TELEPHONE LINE
- COMMUNICATION LINE
- OVERHEAD ELECTRICAL/POWER
- UNDERGROUND ELECTRICAL
- PROPERTY LINE
- EXISTING OVERHEAD POWER LINE
- EXISTING OVERHEAD POWER & TELEPHONE LINE
- EXISTING OVERHEAD TELEPHONE LINE
- EXISTING BURIED TELEPHONE LINE EVIDENCED BY PEDESTALS & WARNING PADDLES
- EXISTING FENCE LINE
- PROJECT BOUNDARY
- TREE PROTECTION FENCE
- LIMITS OF DISTURBANCE
- SHORING

SITE PLAN SYMBOLS

- ARROW INDICATES DIRECTION OF PLAN NORTH
- CONIFER TREE: FIR, SPRUCE, LARCH OR PINE, 8" DIAMETER OR LARGER.
- DECIDUOUS TREE: COTTONWOOD, HAWTHORN, ASPEN, 8" DIAMETER OR LARGER.
- MH — MANHOLE
- EB — ELECTRIC BOX
- STORM DRAIN MANHOLE
- FH — FIRE HYDRANT
- YH-X — YARD HYDRANT
- SURVEY CONTROL POINT, AS NOTED.
- POLE ANCHOR
- POWER POLE
- LIGHT POLE
- SIGN
- SURVEY HUB
- SECTION CORNER
- BENCH MARK
- EXISTING HEADWALL
- EXISTING MONITORING STATION
- EXISTING FENCE
- STATE PLANE COORDINATE MARKER
- EXISTING TREE LINE
- EXISTING BUILDING, STRUCTURES
- EXISTING SECTION CORNER MONUMENT FOUND AS DESCRIBED
- EXISTING 5/8" REBAR CONTROL POINT MONUMENT, BORING LOCATION
- W — EXISTING HOSE BIB
- EXISTING PORTABLE IRRIGATION WATER PUMP
- WELL — EXISTING 6" WATER WELL
- EXISTING ELECTRICAL OUTLET
- P — EXISTING POWER POLE
- T — EXISTING TELEPHONE PEDESTAL
- CONTROL POINT
- PUMP
- PUMP
- TP — TEST PIT LOCATION

MISCELLANEOUS SYMBOLS

- CHANGE OF PIPE MTL
- OR — END OF PIPE
- ℄ — CENTERLINE
- Ø — DIAMETER
- ∠ — ANGLE
- PL — PLATE
- ± — PLUS/MINUS

GENERAL NOTES:

1. ALL SYMBOLS ARE NOT NECESSARILY USED. THIS IS A STANDARD DRAWING SHOWING COMMON SYMBOLS ON THIS PROJECT.
2. SCREENING OR SHADING OF WORK IS USED TO INDICATE EXISTING COMPONENTS OR TO DE-EMPHASIZE PROPOSED IMPROVEMENTS TO HIGHLIGHT SELECTED TRADE WORK. REFER TO CONTEXT OF EACH DRAWING FOR USAGE.

HATCH SYMBOLS

- ROCK, TYPE AS NOTED (PLAN/SECTION)
- BED ROCK
- EXISTING GRADE (SECTION)
- NEW SOIL (SECTION)
- CONCRETE EXISTING (SECTION/PLAN)
- CONCRETE 1ST STAGE (SECTION/PLAN)
- CONCRETE 2ND STAGE (SECTION/PLAN)
- SAND, GROUT (PLAN/SECTION)
- STEEL (SECTION)
- GRATING (PLAN)
- MASONRY (PLAN)
- WOOD, SIZE/TYPE AS NOTED (PLAN)
- WOOD, SIZE/TYPE AS NOTED (SECTION)
- RIP RAP (PLAN/SECTION)
- RIGID INSULATION (SECTION)
- ASPHALT CONCRETE PAVEMENT SURFACE (PLAN/SECTION)
- GRASS/VEGETATION (PLAN)
- BATT INSULATION (SECTION)
- NEW CONSTRUCTION
- EXISTING
- EXISTING TO BE REMOVED OR DEMOLISHED
- CLEARING AND GRUBBING
- ASPHALT
- GRASS/VEGETATION
- GRAVEL

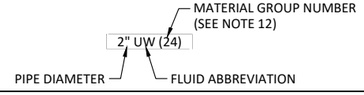
FLUID ABBREVIATION	FUNCTION	ALLOWABLE PIPING MATERIAL GROUP NO. (SEE NOTE 1 AND 4)				FIELD TEST REQUIREMENTS (SEE NOTE 3 AND NOTE 4)		
	THIS LIST MAY INCLUDE FLUIDS NOT USED IN THIS PROJECT	EXPOSED PIPING (SEE NOTE 14)		BURIED PIPING (SEE NOTE 13)		MINIMUM TEST PRESSURE PSI	TEST MEDIUM	LEAKAGE ALLOWANCE (SEE NOTE 2)
		3" DIA AND SMALLER	4" DIA AND LARGER	3" DIA AND SMALLER	4" DIA AND LARGER			
COMMONLY USED FUNCTIONS								
DR	DRAIN	2	2	2	2	NOTE 6	WATER	(D)
RW	RAW WATER	2,8	2,8	8	8	150	WATER	(A)

PIPING MATERIAL SCHEDULE (SEE NOTE 1)

GROUP NO.	PIPE MATERIAL	FITTINGS / JOINTS	LININGS AND COATINGS (SEE NOTE 13)
2	STEEL, ASTM A53, SCHEDULE 40, BLACK WELDED, GALVANIZED	2 1/2" AND SMALLER, MALLEABLE IRON, ASME B16.3, THREADED, BANDED, GALVANIZED 150 PSI. 3" AND LARGER, CAST IRON, ASME B16.1, 125 PSI FLANGED OR MECHANICAL COUPLING.	SEE SECTION 40 23 15
8	WELDED STEEL PIPE (AWWA C200 & MODIFIED PER SECTION 331111) (ALL PIPE CALLOUT DIAMETERS ARE 'ID' OF MORTAR LINING)	WELDED STEEL, AWWA C208 MODIFIED PER SECTION 331111, FABRICATED.	SEE SECTION 33 11 11

TYPICAL PIPE DESIGNATION:



NOTES:

NOTE 1
ALTHOUGH SEVERAL PIPE MATERIAL GROUPS MAY BE LISTED ON THIS SHEET FOR A GIVEN FLUID SERVICE, CONTRACTOR SHALL PROVIDE ONLY THE PIPE MATERIAL GROUP SHOWN ON THE DRAWINGS AND SPECIFIED FOR THAT FLUID SERVICE.

NOTE 2
LEAKAGE ALLOWANCE IS AS FOLLOWS
A. PIPES SO DESIGNATED SHALL SHOW ZERO LEAKAGE.
B. PIPES SO DESIGNATED SHALL SHOW ZERO LEAKAGE FOR UNBURIED PIPE AND NOT MORE THAN 0.02 GALLON PER HOUR PER INCH DIAMETER PER 100 FEET OF BURIED PIPE.
C. PIPES SO DESIGNATED SHALL NOT SHOW A LEAKAGE OF MORE THAN 0.15 GALLON PER HOUR PER INCH OF DIAMETER PER 100 FEET OF PIPE.
D. PIPES SO DESIGNATED SHALL NOT SHOW A LOSS OF PRESSURE OF MORE THAN 5 PERCENT.
E. PIPE SO DESIGNATED SHALL NOT SHOW A LOSS OF VACUUM OF MORE THAN 4 INCHES MERCURY COLUMN.

NOTE 3
FOR FIELD TEST PROCEDURES AND ADDITIONAL TEST REQUIREMENTS, SEE PIPING SECTION OF SPECIFICATIONS.

NOTE 4
NO SUBSTITUTIONS U.N.O. IN THE SPECIFICATIONS.

NOTE 5
NOT USED

NOTE 6
STATIC WATER TEST WITH SURFACE 5 FEET ABOVE HIGH POINT OF PIPE.

NOTE 7
INSPECTION AND TESTING SHALL BE IN ACCORDANCE WITH APPLICABLE PLUMBING CODE.

NOTE 8
NOT USED

NOTE 9
NOT USED

NOTE 10
NOT USED

NOTE 11
NOT USED

NOTE 12
CHANGE IN PIPING MATERIAL GROUP NUMBER IS INDICATED THUS: ——◆

NOTE 13
FOR FULL PIPE LINING AND COATING REQUIREMENTS, SEE SPECIFICATIONS.

NOTE 14
EXPOSED OUTDOOR PIPING SHALL BE PAINTED IN ACCORDANCE WITH SPECIFICATIONS. COLORS TO BE SELECTED BY OWNER.

GENERAL STRUCTURAL NOTES:
THE FOLLOWING NOTES ARE GENERAL AND APPLY TO THE ENTIRE PROJECT, UNLESS SPECIFICALLY NOTED OTHERWISE (UNO)

1) GENERAL:

A. CONSTRUCTION DOCUMENTS:
   1. THE CONTRACTOR SHALL REVIEW THE APPROVED CONTRACT DOCUMENTS AND NOTIFY THE ENGINEER OF ANY ERRORS OR DISCREPANCIES PRIOR TO THE START OF CONSTRUCTION.
   2. THE CONTRACTOR SHALL NOTIFY THE OWNER IMMEDIATELY IF ANY UNIDENTIFIED EXISTING UNDERGROUND UTILITIES ARE DISCOVERED.
   3. THE STRUCTURAL CONTRACT DRAWINGS REPRESENT THE FINISHED STRUCTURE. THEY DO NOT INDICATE THE METHOD OF CONSTRUCTION. THE CONTRACTOR SHALL PROVIDE ALL MEASURES NECESSARY TO PROTECT THE STRUCTURE DURING CONSTRUCTION. SUCH MEASURES SHALL INCLUDE, BUT ARE NOT LIMITED TO, BRACING AND/OR SHORING FOR LOADS DUE TO CONSTRUCTION EQUIPMENT, ETC.
   4. UNDER NO CIRCUMSTANCES CAN STRUCTURAL COMPONENTS BE SUBSTITUTED, OMITTED, OR ALTERED FROM THE APPROVED SET OF CONSTRUCTION DOCUMENTS WITHOUT WRITTEN APPROVAL FROM THE ENGINEER.

B. DIMENSIONS AND NOTATIONS:
   1. WRITTEN DIMENSIONS SHALL TAKE PRECEDENCE OVER SCALED DIMENSIONS. DO NOT SCALE DRAWINGS.
   2. ABBREVIATIONS USED ON THE APPROVED CONSTRUCTION DOCUMENTS SHALL BE CONSIDERED TYPICAL ABBREVIATIONS FOR THE INDUSTRY. THE CONTRACTOR SHALL BE RESPONSIBLE TO NOTIFY THE ENGINEER IMMEDIATELY OF ANY ABBREVIATIONS THAT ARE UNKNOWN TO THE CONTRACTOR.

C. TYPICAL NOTES AND DETAILS:
   1. SPECIFIC NOTES AND DETAILS SHALL TAKE PRECEDENCE OVER STANDARD TYPICAL NOTES AND DETAILS.
   2. STANDARD TYPICAL NOTES AND DETAILS ARE TO BE USED WHEN REFERRED TO OR WHEN NO OTHER MORE RESTRICTIVE OR DIFFERENT DETAILS ARE SHOWN ON THE DRAWINGS.
   3. WORK NOT PARTICULARLY SHOWN OR SPECIFIED SHALL BE THE SAME AS SIMILAR PARTS THAT ARE SHOWN OR SPECIFIED.

D. CODE REQUIREMENTS:
   1. ALL WORK SHALL CONFORM TO THE MINIMUM STANDARDS OF REGULATING AGENCIES WHICH MAY HAVE AUTHORITY OVER ANY PORTION OF THE WORK.
   2. SPECIFICATIONS, CODES AND STANDARDS NOTED SHALL BE OF THE LATEST APPROVED ISSUE, INCLUDING SUPPLEMENTS, UNLESS NOTED OTHERWISE.
   3. MINIMUM UNIFORM (BLANKET) ROOF SNOW LOAD, AS DEFINED BY LOCAL BUILDING OFFICIAL OR STATE, SHALL BE DESIGNED FOR, AND IT IS THE RESPONSIBILITY OF THE ENGINEER TO CONFIRM IF ONE EXISTS BY CONTACTING THE LOCAL BUILDING OFFICIAL.

E. DEFERRED SUBMITTALS:
   1. DEFERRED STRUCTURE SUBMITTAL ITEMS HAVE NOT BEEN PERMITTED UNDER THE BASE BUILDING APPLICATION.
   2. THE CONTRACTOR SHALL SUBMIT COMPONENT SYSTEM DOCUMENTS FOR DEFERRED SUBMITTAL ITEMS, STAMPED BY A PROFESSIONAL ENGINEER LICENSED IN THE JURISDICTION HAVING AUTHORITY, TO THE REGISTERED DESIGN PROFESSIONAL IN RESPONSIBLE CHARGE FOR REVIEW AND FORWARD THE REVIEWED DOCUMENTS TO THE BUILDING OFFICIAL IN COMPLIANCE WITH SECTION 107.3.4.1 OF THE CBC.
   3. DEFERRED SUBMITTAL ITEMS SHALL NOT BE INSTALLED UNTIL THE COMPONENT SYSTEM DOCUMENTS HAVE BEEN APPROVED BY THE BUILDING OFFICIAL.
   4. THE FOLLOWING CONTRACTOR-DESIGNED PROJECT ELEMENTS ARE DEFINED AS DEFERRED STRUCTURAL SUBMITTAL ITEMS:

      PRE-ENGINEERED METAL BUILDINGS

2) CODES, STANDARDS, AND REFERENCES:

A. ASCE 7-16: MINIMUM DESIGN LOADS AND ASSOCIATED CRITERIA FOR BUILDINGS AND OTHER STRUCTURES.
B. ACI 318-14: BUILDING CODE REQUIREMENTS FOR STRUCTURAL CONCRETE.
C. ACI 350-06: CODE REQUIREMENTS FOR ENVIRONMENTAL ENGINEERING CONCRETE STRUCTURES.
D. AISC 360-16 SPECIFICATION FOR STRUCTURAL STEEL BUILDINGS.

3) FOUNDATIONS AND GEOTECHNICAL:

A. GEOTECHNICAL DESIGN CRITERIA IS BASED ON THE RECOMMENDATIONS DOCUMENTED IN THE DESIGN DOCUMENTATION REPORT:

4) GRATING:

A. WEIGHT OF GRATING SECTION SHALL NOT EXCEED 80 LBS.
B. PROVIDE A MINIMUM OF 4 CLIPS PER GRATING PANEL, APPROX 4" FROM PANEL CORNERS.
C. WIDTH OF GRATING SECTIONS SHALL NOT EXCEED 3'-0".
D. SHOP DRAWINGS BASED ON FIELD DIMENSIONS SHALL BE SUBMITTED TO THE ENGINEER PRIOR TO FABRICATION.
E. PROVIDE GRATING FASTENERS AS REQUIRED.
F. THE HORIZONTAL CLEARANCE BETWEEN THE GRATING AND GRATING SUPPORTS SHALL NOT BE LESS THAN ¼" NOR GREATER THAN ½"
G. ALL GRATING SECTIONS, WHEN IN PLACE, SHALL ALWAYS BE FIRMLY ANCHORED TO THEIR SUPPORTS.
H. PROVIDE MINIMUM BEARING PER MANUFACTURERS RECOMMENDATIONS FOR ALL GRATING.

5) NON-SHRINK GROUT:
1. ALL GROUT WORK SHALL CONFORM TO THE LATEST EDITION OF ACI 301.
2. FORMWORK: DESIGN, ERECT, SUPPORT, BRACE AND MAINTAIN FORMWORK TO SUPPORT VERTICAL, LATERAL, STATIC AND DYNAMIC LOADS THAT MIGHT BE APPLIED UNTIL STRUCTURE CAN SUPPORT SUCH LOADS.

6) STRUCTURAL AND MISCELLANEOUS STEEL:

A. STRUCTURAL STEEL SHALL CONFORM TO THE FOLLOWING ASTM STANDARDS:
   a) WIDE FLANGE SHAPES — A992, GR 50 GALV
   b) OTHER SHAPES, PLATES, ANGLES AND BARS — A36 GALV
   c) STEEL PIPE — A53, GRADE B GALV
   d) HOLLOW STRUCTURAL SECTIONS — A500, GRADE B GALV
C. WELDS: PROVIDE 70KSI LOW HYDROGEN ELECTRODE OR PROCESS IN ACCORDANCE WITH AWS A5.1.
D. BOLTS, U.N.O.:
   1. STAINLESS STEEL: ASTM A193, GRADE 8, CLASS 2, AISI TYPE 316
H. DRILL AND EPOXY ANCHOR BOLTS:
   1. STAINLESS STEEL ASTM A193, GRADE 8, CLASS 2, AISI TYPE 316 OR EQUAL APPROVED BY ENGINEER
I. EPOXY BOLT OR EXPANSION BOLT SUBSTITUTIONS FOR EMBEDDED BOLTS IS PROHIBITED WITHOUT WRITTEN CONSENT FROM THE ENGINEER.
J. UNLESS NOTED OTHERWISE ON THE DRAWINGS, ALL EPOXY BOLTS SHALL BE AS SPECIFIED.
K. ALL STRUCTURAL STEEL SHALL BE DETAILED, FABRICATED, AND ERECTED IN ACCORDANCE WITH THE AISC CODE OF STANDARD PRACTICE, EXCEPT AS MODIFIED IN THESE NOTES AND THE PROJECT SPECIFICATIONS.
L. ALL STAINLESS STEEL SHALL BE TYPE 316.
M. SPLICING OF STEEL MEMBERS, UNLESS SHOWN ON THE DRAWINGS, IS PROHIBITED WITHOUT WRITTEN APPROVAL OF THE PROJECT ENGINEER.
N. GALVANIC PROTECTION SHALL BE PROVIDED BETWEEN DISSIMILAR METALS.
O. WELDING SHOWN FOR STAINLESS STEEL ELEMENTS SHALL COMPLY WITH AWS D1.6/D1.6M.

7) CONCRETE:

A. ALL CONCRETE WORK SHALL CONFORM TO THE LATEST EDITION OF ACI 301 AND ACI 117, EXCEPT AS MODIFIED BY THE FOLLOWING SUPPLEMENTAL REQUIREMENTS:
B. ALL CONCRETE SHALL BE NORMAL WEIGHT CONCRETE.
C. CONCRETE MIX DESIGN SHALL BE ESTABLISHED IN ACCORDANCE WITH CHAPTER 5 OF ACI 350.
D. COMPRESSIVE STRENGTH (28 DAYS)
   F'C — 4,500 PSI
E. REINFORCEMENT FOR CONCRETE:
1. ALL REINFORCING SHALL BE SUPPORTED IN FORMS SPACED WITH NECESSARY ACCESSORIES AND SHALL BE SECURELY WIRED TOGETHER IN ACCORDANCE WITH THE LATEST EDITION OF THE CRSI "MANUAL OF STANDARD PRACTICE"
2. CLEAR COVER
   a) CONCRETE CAST AGAINST EARTH = 3"
   b) ALL OTHER CONCRETE, UNO = 2"
F. SLAB-ON-GRADE REINFORCEMENT SHALL BE PLACED AT THE MID-DEPTH OF THE SLAB, UNO.
G. FORMWORK: DESIGN, ERECT, SUPPORT, BRACE AND MAINTAIN FORMWORK TO SUPPORT VERTICAL, LATERAL, STATIC AND DYNAMIC LOADS THAT MIGHT BE APPLIED UNTIL STRUCTURE CAN SUPPORT SUCH LOADS.

8) ALUMINUM:

A. ALL ALUMINUM WORK SHALL CONFORM TO THE LATEST EDITION OF THE ALUMINUM DESIGN MANUAL BY THE ALUMINUM ASSOCIATION.
B. UNLESS OTHERWISE INDICATED, ALUMINUM METALWORK SHALL BE FABRICATED FROM ALLOY 6061-T6, EXCEPT GRATING WHICH SHALL BE PER DESIGN.

9) REINFORCEMENT:

A. ASTM A615 - FY = 60,000 PSI
B. SEE SPECIFICATIONS FOR REINFORCING PLACEMENT REQUIREMENTS.
C. ABSOLUTELY NO WELDING OF REINFORCING BARS OR TORCHING TO BEND REINFORCING BARS SHALL BE ALLOWED WITHOUT SPECIFIC APPROVAL FROM THE STRUCTURAL ENGINEER.

10) TESTS AND INSPECTIONS:

A. INSPECTIONS
   1. CONSTRUCTION SHALL BE SUBJECT TO INSPECTION BY THE BUILDING OFFICIAL OR THE AUTHORITY HAVING JURISDICTION AND SUCH CONSTRUCTION OR WORK SHALL REMAIN ACCESSIBLE AND EXPOSED FOR INSPECTION PURPOSES UNTIL APPROVED.
   2. THE CONTRACTOR IS RESPONSIBLE TO NOTIFY THE BUILDING OFFICIAL OR THE AUTHORITY HAVING JURISDICTION WHEN WORK IS READY FOR INSPECTION. IN ADDITION, THE CONTRACTOR IS RESPONSIBLE TO PROVIDE ACCESS TO AND MEANS FOR INSPECTIONS OF SUCH WORK THAT ARE REQUIRED BY THE BUILDING OFFICIAL OR AUTHORITY HAVING JURISDICTION.

B. STATEMENT OF SPECIAL INSPECTIONS
   1. THE DESIGN ENGINEER HAS PREPARED AND SUBMITTED A STATEMENT OF SPECIAL INSPECTIONS TO THE BUILDING OFFICIAL SPECIFYING THE SCOPE OF WORK TO BE INSPECTED BY A SPECIAL INSPECTION AGENCY (IN ADDITION TO THE INSPECTIONS BY THE BUILDING OFFICIAL OR AUTHORITY HAVING JURISDICTION) TO SATISFY THE REQUIREMENTS OF THE CALIFORNIA BUILDING CODE, SECTION 1704. THE CONTRACTOR SHALL REVIEW THIS DOCUMENT AND SUBMIT A WRITTEN STATEMENT OF RESPONSIBILITY TO THE BUILDING OFFICIAL AND OWNER (OR THE OWNER'S AUTHORIZED AGENT) PRIOR TO COMMENCEMENT OF THE WORK THAT ACKNOWLEDGES AWARENESS OF THE REQUIREMENTS CONTAINED IN THE STATEMENT OF SPECIAL INSPECTIONS.
   2. THE CONTRACTOR IS RESPONSIBLE FOR COORDINATING THEIR WORK WITH THE SPECIAL INSPECTION AGENCY. THE CONSTRUCTION OR WORK FOR WHICH SPECIAL INSPECTION OR TESTING IS REQUIRED SHALL REMAIN ACCESSIBLE AND EXPOSED FOR SPECIAL INSPECTION AND TESTING PURPOSES UNTIL COMPLETION OF THE REQUIRED SPECIAL INSPECTIONS OR TESTS.

IEEE STANDARD CONTROL AND PROTECTION DEVICES FUNCTION NUMBERS

01	MASTER ELEMENT
02	TIME-DELAY STARTING OR CLOSING RELAY (TDPU)
03	CHECKING OR INTERLOCKING RELAY
04	MASTER CONTACTOR
05	STOPPING DEVICE
06	STARTING CIRCUIT BREAKER
07	RATE-OF-CHANGE RELAY
08	CONTROL POWER DISCONNECTING DEVICE
09	REVERSING DEVICE
10	UNIT SEQUENCE SWITCH
11	MULTIFUNCTION DEVICE
12	OVER-SPEED DEVICE
13	SYNCHRONOUS-SPEED DEVICE
14	UNDER-SPEED DEVICE
15	SPEED OR FREQUENCY MATCHING DEVICE
16	DATA COMMUNICATIONS DEVICE
17	SHUNTING OR DISCHARGE SWITCH
18	ACCELERATING OR DECELERATING DEVICE
19	STARTING-TO-RUNNING TRANSITION CONTACTOR
20	ELECTRONICALLY OPERATED VALVE
21	DISTANCE RELAY
22	EQUALIZER CIRCUIT BREAKER
23	TEMPERATURE CONTROL DEVICE
24	VOLTS PER HERTZ RELAY
25	SYNCHRONIZING OR SYNCHRONISM - CHECK DEVICE
26	APPARATUS THERMAL DEVICE
27	UNDERVOLTAGE RELAY
28	FLAME DETECTOR
29	ISOLATING CONTACTOR
30	ANNUNCIATOR RELAY
31	SEPARATE EXCITATION DEVICE
32	DIRECTIONAL POWER RELAY
33	POSITION SWITCH
34	MASTER SEQUENCE DEVICE
35	BRUSH-OPERATING OF SLIP-RING SHORT-CIRCUITING DEVICE
36	POLARITY OR POLARIZING VOLTAGE DEVICE
37	UNDERCURRENT OR UNDERPOWER RELAY
38	BEARING PROTECTIVE DEVICE
39	MECHANICAL CONDITION MONITOR
40	FIELD (OVER/UNDER EXCITATION) RELAY
41	FIELD CIRCUIT BREAKER
42	RUNNING CIRCUIT BREAKER
43	MANUAL TRANSFER OR SELECTOR DEVICE
44	UNIT SEQUENCE STARTING RELAY
45	ATMOSPHERIC CONDITION MONITOR
46	REVERSE-PHASE OR PHASE-BALANCE CURRENT RELAY
47	PHASE-SEQUENCE OR PHASE-BALANCE VOLTAGE RELAY
48	INCOMPLETE SEQUENCE RELAY
49	MACHINE OR TRANSFORMER THERMAL RELAY
50	INSTANTANEOUS OVERCURRENT OR RATE-OF-RISE RELAY
51	AC INVERSE TIME OVERCURRENT RELAY
52	AC CIRCUIT BREAKER
53	EXCITER OR DC GENERATOR RELAY
54	TURNING GEAR ENGAGING DEVICE
55	POWER FACTOR RELAY
56	FIELD APPLICATION RELAY
57	SHORT-CIRCUITING OR GROUNDING DEVICE
58	RECTIFICATION FAILURE RELAY
59	OVERVOLTAGE RELAY
60	VOLTAGE OR CURRENT BALANCE RELAY
61	DENSITY SWITCH OR SENSOR
62	TIME-DELAY STOPPING OR OPENING RELAY (TDDO)
63	PRESSURE SWITCH
64	GROUND DETECTOR RELAY
65	GOVERNOR
66	NOTCHING OR JOGGING DEVICE
67	AC DIRECTIONAL OVERCURRENT RELAY
68	BLOCKING RELAY
69	PERMISSIVE CONTROL DEVICE
70	RHEOSTAT
71	LEVEL SWITCH
72	DC CIRCUIT BREAKER
73	LOAD-RESISTOR CONTACTOR
74	ALARM RELAY
75	POSITION CHANGING MECHANISM
76	DC OVERCURRENT RELAY
77	PULSE TRANSMITTER
78	PHASE-ANGLE MEASURING OR OUT-OF-STEP PROTECTIVE RELAY
79	AC RECLOSING RELAY
80	FLOW SWITCH
81	FREQUENCY RELAY
82	DC RECLOSING RELAY
83	AUTOMATIC SELECTIVE CONTROL OR TRANSFER RELAY
84	OPERATING MECHANISM
85	CARRIER OR PILOT-WIRE RECEIVER RELAY
86	LOCKOUT RELAY
87	DIFFERENTIAL PROTECTIVE RELAY
88	AUXILIARY MOTOR OR MOTOR GENERATOR
89	LINE SWITCH
90	REGULATING DEVICE
91	VOLTAGE DIRECTIONAL RELAY
92	VOLTAGE AND POWER DIRECTIONAL RELAY
93	FIELD-CHANGING CONTACTOR
94	TRIPPING OR TRIP-FREE RELAY
95	RESERVED FOR FUTURE APPLICATION
96	RESERVED FOR FUTURE APPLICATION
97	RESERVED FOR FUTURE APPLICATION
98	CREEP DETECTOR DEVICE
99	RESERVED FOR FUTURE APPLICATION

METERING SYSTEMS AND DEVICES INDEX

A	AMMETER
AH	AMPERE HOUR METER
AS	AMMETER SELECTOR SWITCH
C	COUNTER
CMA	CONTACT MAKING AMMETER
CMC	CONTACT MAKING CLOCK
CMV	CONTACT MAKING VOLTMETER
CS	CONTROL STATION
DM	DEMAND METER
ETM	ELAPSE TIME METER
F	FREQUENCY METER
G	GALVANOMETER
GD	GROUND FAULT DETECTOR
KV	KILO-VOLTMETER
KW	KILO-WATTMETER
KWH	KILO-WATT HOUR METER
mA	MILLI-AMMETER (TRANSDUCER)
MOC	MECHANISM-OPERATED CONTACT
OHM	OHMMETER
OSC	OSCILLOGRAPH
PB	PUSHBUTTON
PF	POWER FACTOR METER
PH	PHASE METER
PI	POSITION INDICATOR
REC	RECORDER
RF	REACTIVE FACTOR METER
RPM	SPEED INDICATOR
SW	TRANSFER SWITCH
SY	SYNCHROSCOPE
T	TEMPERATURE METER
TLM	TELEMETER
TOC	TRUCK-OPERATED CONTACT
TS	TIME SWITCH
V	VOLTMETER
VAR	VARMETER
VH	VAR HOUR METER
VS	VOLTMETER SELECTOR SWITCH
W	WATTMETER
WH	WATT HOUR METER
WHDM	WATT HOUR DEMAND METER

NOTE: "R" IN FRONT OF LETTERS INDICATES A RECORDING TYPE METER.

PILOT - INDICATOR LIGHT INDEX

A	AMBER
B	BLUE
C	CLEAR
G	GREEN
NE	NEON
O	ORANGE
OP	OPALESCENT
P	PURPLE
R	RED
W	WHITE
Y	YELLOW

FIRST LETTER SUFFIX OF IEEE DEVICE DESIGNATION

A	GOVERNOR SYSTEM (OR ACTUATOR SYSTEMS - GATES)
B	BATTERY CHARGING AND MONITORING SYSTEM OR BUS
C	HIGH-VOLTAGE CABLE SYSTEM OR CLOSING RELAY/CONTACTOR
D	DATA ACQUISITION SYSTEM
E	EXCITATION SYSTEM INCLUDING TRANSFORMER AND REGULATOR BUT NOT MAIN FIELD
F	FIRE AND CO2 SYSTEM
G	MAIN GENERATOR INCLUDING AUXILIARY SYSTEMS OR GROUND
G/M	GENERATOR MOTOR INCLUDING AUXILIARY SYSTEMS IN PUMPED STORAGE APPLICATIONS
H	TURBINE OR MAIN PUMP INCLUDING AUXILIARY SYSTEMS
I	ISOLATED AND OTHER POWER BUS SYSTEMS (NOT HIGH VOLTAGE CABLE)
J	POWER CIRCUIT BREAKER INCLUDING AUXILIARY SYSTEMS
K	POWER TRANSFORMER INCLUDING AUXILIARY SYSTEMS
L	ANNUNCIATOR SYSTEM, SECURITY SYSTEM, LINE, OR LOWERING RELAY/CONTACTOR
M	MAIN PUMP MOTOR INCLUDING AUXILIARY SYSTEMS AND VARIABLE SPEED DRIVE
N	AIR (PNEUMATIC) SYSTEM OR NEUTRAL
O	OPENING RELAY/CONTACTOR
P	PENSTOCK OR DISCHARGE LINE SYSTEM
Q	OIL STORAGE, HANDLING, PURIFICATION SYSTEM
R	FIELD FLASHING SYSTEM, PHASE REVERSAL SWITCH INCLUDING AUXILIARY SYSTEM, OR RAISING RELAY/CONTACTOR
S	STATION SERVICE SUBSTATION SYSTEM INCLUDING ENGINE/GENERATOR SYSTEM
T	TONE AND TRANSFER TRIP SYSTEM OR TRANSFORMER
U	UNIT CONTROL CIRCUIT SYSTEM OR UNINTERRUPTIBLE POWER SUPPLY SYSTEM
V	INTAKE AND/OR DISCHARGE VALVE SYSTEM
W	WATER SYSTEMS INCLUDING INTAKE/OUTLET WORKS AND PLANT WATER AND SUMP SYSTEMS
X	DEFINED FOR SYSTEMS UNIQUE TO A FACILITY
Y	DEFINED FOR SYSTEMS UNIQUE TO A FACILITY
Z	DEFINED FOR SYSTEMS UNIQUE TO A FACILITY

SECOND AND SUBSEQUENT LETTER SUFFIXES OF THE IEEE DEVICE DESIGNATION

A	ABNORMAL, A.C., ACCELERATION, ADMISSION, ALARM, AMPERES, AUTOMATIC, AUXILIARIES, PHASE A, ECT.
B	BACKUP, BEARING, BLOCK, BLOWER, BOOSTER, BRAKES, BUS, BUTTON, BYPASS, PHASE B, ETC.
C	CABLE, CARRIER, CHARGER, CHECK, CHLORINATION, CLOSE, COLLECTOR, COMMON, COMPENSATOR, COMPRESSOR, CONTROL, COOLING, CURRENT, CYCLE, CYLINDER, PHASE C, CONVEYOR, ECT.
D	D.C, DECELERATION, DELAY, DEPRESS, DETECTOR, DIELECTRIC, DIFFERENTIAL, DISCHARGE, DISCONNECT, DISCORDANCE, DOMESTIC, DOWN, DOWNSTREAM, DRAFT TUBE, DRAIN, ETC.
E	EJECTOR, ELEVATOR, EMERGENCY, EXPLOSIVE, ETC.
F	FAILURE, FAN, FAULT, FEEDER, FIELD, FILTER, FIRE, FLAME, FLOW, FOLLOWER, FORWARD, FREQUENCY, FULL, FUMES, FUSE, ETC.
G	GAS, GATE, GATING (SCR), GENERATE, GROUND, GUIDE BEARING, ETC.
H	HALON, HAND, HEAT, HEATER, HIGH, HOIST, HORN, HOT, HOUSING, HYDROPNEUMATIC TANK, ETC.
I	INDICATION, INITIAL, INLET, INOUT, INSTANTANEOUS, INTAKE, INTERFACE, INTERLOCK, INTERRUPT, INVERTER, IONIZATION, ETC.
J	JACKING, JET, ETC.
K	KEY, TRANSFORMER
L	LAMPS, LEFT, LEVEL, LIGHTS, LIMITS, LINE, LIQUID, LOCAL, LOGIC, LOSS, LOUVERS, LOW, LOWER, LUBRICATION, ETC.
M	MAIN, MALFUNCTION, MANUAL, METER, METERING, MOTOR, ETC.
N	NEGATIVE, NETWORK, NEUTRAL, NORMAL, ETC.
O	OPEN, OUTLET, OUTPUT, ETC.
P	PACKING BOX, PARALLEL, PARAMETER, PENSTOCK, PHASE, PHASEBACK, PILOT, PIT, POSITION, POTENTIAL, POTHEAD, POWER, PRESSURE, PRIMARY, PROTECTION, PULSE, PUMP, PURIFICATION, PUSH, ETC.
Q	OIL, ETC.
R	RAISE, REACTOR, RECLOSE, RECORD, RECTIFIER, REED, REFRIGERATION, REGULATE, RELAY, RELEASE, RELIEF, REMOTE, RESERVOIR, RESET, RESISTOR, RIGHT, ROTATION, ROTOR, RUNNER, ETC.
S	SEALS, SECONDARY, SELECTOR, SEWAGE, SHORTING, SHUTDOWN, SIGNAL, SKIMMER, SLUDGE, SMOKE, SOLENOID, SPEED, SPIRAL OR SCROLL CASE, SPLICE, STABILIZER, STANDBY, STARTING, STATOR, STEPPING, STORAGE, STRAINER, SUCTION, SUMP, SUPPLY, SWITCH, SYNCHRONIZING, ETC.
T	TANK, TEMPERATURE, TEST, THERMAL, THRUST BEARING, THYRATRON, TIE, TIME, TRANSDUCER, TRANSER, TRANSMITTER, TRIP, TROUBLE, TRASHRAKE, ETC.
U	UNIT, UNLOADER, UNWATERING, UP, UPPER, UPSTREAM, ETC.
V	VALVE, VARS, VIBRATION. VOLTAGE, ETC.
W	WATER, WATTS, WINDINGS, ETC.
X	AUXILIARY DEVICE, ETC.
Y	AUXILIARY TO DEVICE X, ANTIPUMP RELAY, ETC.
Z	AUXILIARY TO DEVICE Y

ABBREVIATIONS

A, AMP	AMP, AMPERE
AAAC	ALL ALUMINUM ALLOY CONDUCTOR
AC	ALTERNATING CURRENT
AF	AMPERE FRAME SIZE
AFD	ADJUSTABLE FREQUENCY DRIVE
AFF	ABOVE FINISHED FLOOR
AH	AMPERE HOURS
AHJ	AUTHORITY HAVING JURISDICTION
AHU	AIR HANDLING UNIT
AL	ALUMINUM
A/R	AS REQUIRED
AT	AMPERE TRIP
ATS	AUTOMATIC TRANSFER SWITCH
AVR	AUTOMATIC VOLTAGE REGULATOR
BAT	BATTERY
C	CONDUIT
CB	CIRCUIT BREAKER
CKT	CIRCUIT
CLF	CURRENT LIMITING FUSE
CO	CONDUIT ONLY
CP	CONTROL PANEL
CPT	CONTROL POWER TRANSFORMER
CR	CONTROL RELAY
CS	CONTROL SWITCH
CT	CURRENT TRANSFORMER
DC	DIRECT CURRENT
DCS	DISTRIBUTED CONTROL SYSTEM
DISC	DISCONNECT
DP	DISTRIBUTION PANEL
DPDT	DOUBLE-POLE, DOUBLE-THROW
DPST	DOUBLE-POLE, SINGLE-THROW
EDH	ELECTRIC DUCT HEATER
EG	ENGINE GENERATOR
EPT	EXCITATION POWER TRANSFORMER
EUH	ELECTRIC UNIT HEATER
EV	ELECTRICAL VAULT
F, FU	FUSE
FA	FIRE ALARM
FACP	FIRE ALARM CONTROL PANEL
FAS	FIRE ALARM SYSTEM
FREQ	FREQUENCY
FS	FLOAT SWITCH
FT	FLOW TRANSMITTER
FVNR	FULL VOLTAGE NON-REVERSING
FVR	FULL VOLTAGE REVERSING
GEN	GENERATOR
GFI	GROUND-FAULT INTERRUPTION
GFP	GROUND-FAULT PROTECTION
GND	GROUND
GPR	GENERATOR PROTECTION RELAY
GSU	GENERATOR STEP-UP TRANSFORMER
HMI	HUMAN-MACHINE INTERFACE
HOA	HAND-OFF-AUTO
HOR	HAND-OFF-REMOTE
HPU	HYDRAULIC POWER UNIT
HTR	HEATER
HZ	HERTZ (CYCLES PER SECOND)
IC	INTERRUPTING CAPACITY
I & C	INSTRUMENTATION AND CONTROL
I/O	INPUT/OUTPUT
INST	INSTANTANEOUS
INTLK	INTERLOCK
IP	INTERNET PROTOCOL
K	KEY INTERLOCK
kV	KILOVOLTS
kVA	KILOVOLT AMPERES (APPARENT POWER)
kVAR	KILOVARS (REACTIVE POWER)
kW	KILOWATTS (REAL POWER)
kWH	KILOWATT HOUR
LC	LIGHTING CONTROLLER
LCP	LOCAL CONTROL PANEL
LE	LEVEL ELEMENT
LIT	LEVEL INDICATING TRANSMITTER
LOR	LOCAL-OFF-REMOTE
LP	LIGHTING PANEL
LS	LEVEL SWITCH
LT	LEVEL TRANSMITTER
mA	MILLIAMPERES
M	MOTOR, MAN, MANUAL
MAG	MAGNETIC
MCC	MOTOR CONTROL CENTER
MDP	MAIN DISTRIBUTION PANEL
MFM	MULTIFUNCTIONAL METER
MPR	MOTOR PROTECTION RELAY
MTS	MANUAL TRANSFER SWITCH
mV	MILLIVOLTS
MVA	MEGAVOLT AMPERES (APPARENT POWER)
MVAR	MEGAVARS (REACTIVE POWER)
MW	MEGAWATTS (REAL POWER)
MWH	MEGAWATT HOUR
NEUT	NEUTRAL
NGR	NEUTRAL GROUNDING RESISTOR
OHM	OHMMETER
OL	OVERLOAD
OPER	OPERATOR, OPERATED
PB	PANELBOARD, PULLBOX, PUSH BUTTON
PC	PHOTOCELL
PCB	POWER CIRCUIT BREAKER
PCC	POINT OF COMMON CONNECTION
PF	POWER FACTOR
PH, Ø	PHASE
PMP	PUMP
PNL	PANEL
PLC	PROGRAMMABLE LOGIC CONTROLLER
POI	POINT OF INTER-CONNECTION
PS	PRESSURE SWITCH
PTT	PUSH-TO-TEST
PWR	POWER
R	RELAY, REVERSE, RUN
RCP	RECEPTACLE
RIO	REMOTE I/O
RTD	RESISTANCE TEMPERATURE DETECTOR
RVNR	REDUCED VOLTAGE NON-REVERSING
RVR	REDUCED VOLTAGE REVERSING
S	SYNC SCOPE
SA	SURGE ARRESTER
SC	SURGE CAPACITOR
SDP	STANDBY DISTRIBUTION PANEL
SEL	SELECTOR, SCHWEITZER ENGINEERING LABORATORIES
SPD	SURGE PROTECTION DEVICE
SPDT	SINGLE-POLE, DOUBLE-THROW
SPST	SINGLE-POLE, SINGLE-THROW
S/S	STATION SERVICE
SV	SOLENOID VALVE
SW	SWITCH
SWBD	SWITCHBOARD
SWGR	SWITCHGEAR
T	THERMOSTAT
TB	TERMINAL BLOCK, TERMINAL BOX
TD	TEMPERATURE DETECTOR, TIME DELAY
TEL	TELEPHONE
TS	THERMOSTAT
TSP	TWISTED SHIELDED PAIR
TST	TWISTED SHIELDED TRIAD
TX	TRANSMITTER
UH	UNIT HEATER
UP	UTILITY POWER
UPS	UNINTERRUPTIBLE POWER SUPPLY
V	VOLTS
VAC	VOLTS ALTERNATING CURRENT
VC	VIDEO CAMERA
VCB	VACUUM CIRCUIT BREAKER
VDC	VOLTS DIRECT CURRENT
VFD	VARIABLE FREQUENCY DRIVE
W	WIRE, WATTS
WP	WEATHER PROOF
XD	TRANSDUCER
XFMR	TRANSFORMER
XLP	CROSS LINKED POLYETHYLENE
XP	EXPLOSION PROOF

Office of the Governor
P.O. Box 110001
Juneau, AK 99811

Re: Eklutna Hydroelectric Project, Proposed Final Fish and Wildlife Program

Dear Governor Dunleavy:

We, the owners (the "Project Owners") of the Eklutna Hydroelectric Project ("Project"), are delighted to submit for your approval the Proposed Final Fish and Wildlife Program and supporting information in compliance with the requirements of the 1991 Agreement.[1]

The complete attached package includes the Proposed Final Fish and Wildlife Program (Proposed Final Program), Explanatory Statement, and Supporting Information Document with applicable hyperlinks to the Project website (www.eklutnahydro.com). Copies are also being distributed to the other Parties to the 1991 Agreement and the Native Village of Eklutna (NVE) and have been posted for public review on the Project website.

As required by the 1991 Agreement, the Parties have 60 days from the submittal of the Proposed Final Program to submit written comments on the Proposed Final Program, and any alternative recommendations for the protection, mitigation, and enhancement of fish and wildlife resources, to the Governor. The Project Owners then have 30 days to submit written reply comments to the Governor.

The Project Owners understand that the 1991 Agreement calls for the Governor to review the Proposed Final Program, the comments, testimony, summary and analysis materials, and any alternative recommendations for the protection, mitigation, and enhancement of fish and wildlife resources, and that the Governor shall attempt to reconcile any differences between the Parties, giving due weight to the recommendations, expertise, and statutory responsibilities of U.S. Fish and Wildlife Service (USFWS), National Marine Fisheries Service (NMFS), the state resource management agencies (Alaska Department of Fish and Game [ADFG], Alaska Department of Natural Resources [ADNR], and the Alask Department of environmental Conservation [ADEC]), and the Project Owners. Further, in order to ensure that the Project is best adapted for power generation and other beneficial public uses, the Governor shall give equal consideration to the purposes of efficient and economical power production, energy conservation, the protection, mitigation of damage to, and enhancement of fish and wildlife (including related spawning grounds and habitat), the protection of recreation opportunities, municipal water supplies, the

[1] Agreement among the Municipality of Anchorage, d/b/a Anchorage Municipal Light and Power, Chugach Electric Association, Inc., Matanuska Electric Association, Inc., U.S. Fish and Wildlife Service, National Marine Fisheries Services, Alaska Energy Authority, and the State of Alaska, relative to the Eklutna and Snettisham Hydroelectric Projects, dated August 7, 1991 (the "1991 Agreement").

preservation of other aspects of environmental quality, other beneficial public uses, and requirements of state law.

Please note that, while this submission is being made on behalf of all three Project Owners, the decision to submit the Proposed Final Program at this time has been made by Chugach Electric Association, Inc. and Matanuska Electric Association, Inc. following board approval of both utilities. While representatives of the third owner of the Project, the Municipality of Anchorage's Anchorage Hydropower Utility ("Anchorage Hydropower"), have participated at every step in the process leading to the Proposed Final Program, Anchorage Hydropower does not currently have voting rights with respect to compliance with the 1991 Agreement due to the Municipality's Surrender of Eklutna Operating Committee Voting Rights on October 30, 2020 and the Regulatory Commission of Alaska's ("RCA's) Order No. U-18-102(44)/U-19-020(39)/U-19-021(39). Just last Friday, the RCA reaffirmed this situation,[2] so we find a process of seeking Municipality approval to be both unnecessary and contrary to the RCA's orders.

We are proud of the Proposed Final Program and believe our significant commitments to establish instream flows in the Eklutna River and support fish habitat will protect, mitigate, and enhance the environment as required under the 1991 Agreement. We look forward to working with the Governor through the final steps of the 1991 Agreement process and stand ready to support these efforts.

Sincerely,

Arthur W. Miller

ORDER ON PLAINTIFF'S MOTION FOR ORDER TO SHOW CAUSE AND TO ENFORCE SUBPOENA

This matter comes before the court on Plaintiff's *Ex Parte* Motion for Order to Show Cause and to Enforce Subpoena, filed pursuant to Alaska Rule of Civil Procedure 90(b) and Anchorage Municipal Code 2.30.085. Plaintiffs contacted Defendant regarding the *ex parte* motion prior to filing it with the court.

The court has considered Plaintiff's motion on an expedited basis and will hold a hearing on the motion on May 1, 2024, at 11:00 a.m. Defendant is invited to respond to Plaintiff's motion in writing but must do so before the close of business on Tuesday, April 30, 2024. Should Defendant choose to file a written response, Defendant shall provide a courtesy copy to chambers. The show-cause hearing may be vacated if Defendant complies with the subpoena by close of business on Tuesday, April 30, 2024. In that event, the parties shall file a Joint Notice of Compliance and provide a courtesy copy to chambers.

IT IS SO ORDERED.

4. I have reviewed the Assembly's Complaint to Enforce Subpoena Issued Issued by the Anchorage Assembly and can verify that each of the factual allegations stated therein are true and correct to the best of my knowledge.

5. **Exhibit 1** is a true and accurate copy of AO No. 2023-133, amending AMC 2.30.085.

6. **Exhibit 2** is a true and accurate copy of AO No. 2024-28, As Amended.

7. **Exhibit 3** is a true and accurate copy of AR No. 2024-103.

8. **Exhibit 4** is a true and accurate copy of the March 27, 2024 subpoena and cover letter to Municipal Manager Kent Kohlhase.

9. **Exhibit 5** is a true and accurate copy of the March 27, 2024 subpoena and cover letter to Anchorage Water and Wastewater Utility General Manager Mark Corsentino.

10. **Exhibit 6** is a true and accurate copy (with redactions) of the response emails from Mr. Kohlhase and Mr. Corsentino in response to the Assembly's March 27 subpoenas.

11. **Exhibit 7** is a true and accurate copy (with redactions) of the April 16, 2024 subpoena and cover letter to Municipal Attorney Anne Helzer.

12. **Exhibit 8** is a true and accurate copy of an email exchange between myself and Ms. Helzer regarding the April 16 subpoena.

13. On April 16, 2024, at 5:08 p.m. I emailed a true and accurate copy of the Subpoena (Exhibit 7) to Ms. Helzer. *See* Exhibit 8 at 2.

14. On April 17, 2024, at 2:32 p.m., Ms. Helzer responded by email acknowledging receipt of the Subpoena (Exhibit 7). Ms. Helzer stated that she was "in receipt of a subpoena delivered to my office after 4:00 PM on April 16, 2024." Ms. Helzer also stated that she was "unable to substantively respond within the limited time provided." *See* Exhibit 8 at 2.

15. On April 17, 2024, at 6:59 p.m., I emailed Ms. Helzer to ask "[h]ow much time would [she] request to provide a response" to the Subpoena. *See* Exhibit 8 at 1.

16. On April 18, 2024, at 11:15 a.m., Ms. Helzer emailed me, stating, "I think the 30th is reasonable . . . I will need time to consult with the affected Municipal departments in order to meaningfully respond." *See* Exhibit 8 at 1.

17. Based on my knowledge of the Assembly meetings in 2024 and Assembly interactions with Ms. Helzer, I know that Assembly members have requested the documents described in the Subpoena since at least February 2, 2024. I also know that Ms. Helzer has had time to consult, and stated she did consult, with the affected Municipal departments regarding production of the requested documents to the Assembly, prior to April 17, 2024.

18. On April 18, 2024, at 5:02 p.m., at the direction of Assembly Chair Christopher Constant and Vice-Chair Meg Zaletel, I responded to Ms. Helzer's April 18 email. My email stated that "we are willing to wait until the close of business Monday, April 22 . . . we understand that the documents to be readily accessible and,

THIRD JUDICIAL DISTRICT AT ANCHORAGE

ANCHORAGE MUNICIPAL ASSEMBLY, and CHRISTOPHER CONSTANT, in his official capacity as Chair of the Anchorage Assembly, Plaintiffs, vs. ANNE HELZER, in her official capacity as the Anchorage Municipal Attorney, Defendants.	)	Case No. 3AN-24-05979CI

JOINT NOTICE REGARDING PROVISION OF DOCUMENTS DEMANDED BY SUBPOENA

On April 24, 2024, Plaintiffs Anchorage Municipal Assembly, through its Chair, Christopher Constant (collectively the "Assembly"), concurrently filed a Complaint to Enforce Subpoena Issued by the Municipal Assembly, an *Ex Parte* Motion for Order to Show Cause and to Enforce Subpoena, and a Motion for Expedited Consideration. At issue in this case are various documents negotiated between at least three entities under a confidentiality agreement signed in 2017. By the morning of April 25, 2024, all three parties to the confidentiality agreement had waived both lawyer-client privilege and confidentiality as to the documents requested by Plaintiffs in this case. Given the waiver of lawyer-client privilege and confidentiality, Defendant Anne Helzer—through the

assistance of the Deputy Municipal Attorney—provided the documents to Plaintiffs and this Court on April 25, 2024.

Neither party to this litigation disputes that Plaintiffs are in the possession of the requested documents. While the Defendant does not concede that AMC 2.30.085 and the subpoena issued under its authority are valid under Alaska law, the Alaska Constitution, and the United States Constitution, the parties agree that the Defendant has substantially complied with the subpoena. Therefore, the parties agree a show cause hearing is unnecessary.

Neither party to this joint notice waives their right to make any arguments related to the underlying dispute. And both parties agree to meet and confer to determine whether the matter can be dismissed.

Respectfully submitted this 30th day of April, 2024

NOTICE TO PARTIES: VACATING HEARING ON PLANTIFFS' ORDER TO SHOW CAUSE

The court is in receipt of the joint notice from the parties regarding compliance with the outstanding subpoena in this case. The parties agree that defendant have provided the requested documents to plaintiffs. The court notes that defendants provided the requested documents without conceding the validity of the issued subpoena.

The parties agree that a hearing on the plaintiffs' motion for an order to show cause is unnecessary and, therefore, the hearing scheduled for Wednesday, May 1, 2024 at 11:00 a.m., is hereby vacated. The court notes that by filing this notice, neither party waives their right to make any argument related to the underlying dispute, and that the parties agree to meet and confer to decide whether the matter can be dismissed.

The parties shall notify the court in writing with a status of the parties' discussion no later than noon on Friday, May 10, 2024.

IT IS SO ORDERED.

DATED this 30th day of April, 2024, at Anchorage, Alaska.

ANCHORAGE MUNICIPAL ASSEMBLY, and CHRISTOPHER CONSTANT, in his official capacity as Chair of the Anchorage Assembly, Plaintiffs, vs. ANNE HELZER, in her official capacity as the Anchorage Municipal Attorney, Defendants.	)	Case No. 3AN-24-05979CI

STATUS REPORT REGARDING DISMISSAL

Pursuant to the Court's April 30, 2024 Order, Municipal Attorney Anne Helzer provides notice to the court that the Parties met and conferred regarding whether this matter can be dismissed. The Municipal Attorney encourages dismissal of this matter at this time and offered to stipulate to the dismissal of this matter pursuant to Rules of Civil Procedure Rule 41(a)(1)(B). The Plaintiffs did not agree to that offer and indicated they would file their own Notice to the Court.

MUNICIPALITY OF ANCHORAGE

P.O. Box 196650
Anchorage, Alaska
99519-6650

Telephone: 343-4545
Facsimile: 343-4550

This lawsuit was initiated to enforce a subpoena for documents now in the Plaintiffs' possession. There is no dispute that the Plaintiffs have the documents as stated in the Joint Notice Regarding Provision of Documents Demanded by Subpoena filed on April 30, 2024. The Municipal Attorney's position is that because the underlying document dispute is resolved, there is no live controversy before the Court and the case should be dismissed.

Because Plaintiff was unwilling to agree to a stipulated dismissal, the Municipal Attorney's Office respectfully requests 20 days to prepare a motion to dismiss.

Respectfully submitted this 10th day of May, 2024.

ANCHORAGE MUNICIPAL ASSEMBLY, and CHRISTOPHER CONSTANT, in his official capacity as Chair of the Anchorage Assembly, Plaintiffs, v. ANNE HELZER, in her official capacity as the Anchorage Municipal Attorney, Defendant.	)	Case No. 3AN-24-05979CI

ASSEMBLY'S RESPONSE TO NOTICE TO PARTIES: VACATING HEARING ON PLAINTFFS' ORDER TO SHOW CAUSE

Plaintiffs Anchorage Municipal Assembly, though its Chair, Christopher Constant (collectively the "Assembly"), submit this response to the Court's Notice to Parties: Vacating Hearing on Plaintiffs' Order to Show Cause. On May 9, 2024, the undersigned counsel for the Assembly conferred with Assistant Municipal Attorney Kate Buerer, counsel for the Defendant Anne Helzer. The undersigned informed Ms. Buerer that following Ms. Helzer's substantial compliance with the Subpoena on April 25, the Assembly believed that this matter was fully resolved and could be dismissed. However, on April 30, Ms. Helzer filed a Joint Notice Regarding Provision of Documents Demanded by Subpoena in which Ms. Helzer represented that "the

LANDYE BENNETT BLUMSTEIN LLP

ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152. FAX (907) 276-8433

Defendant does not concede that AMC 2.30.085 and the subpoena issued under its authority are valid under Alaska law, the Alaska Constitution, and the United States Constitution." The Assembly strenuously disagrees with Ms. Helzer's stated position regarding the validity of AMC 2.30.085 and the Subpoena.

Ms. Helzer calls into question the Assembly's authority to issue *any* subpoena under AMC 2.30.085, undermining the Assembly's exercise of its legitimate legislative functions, including gathering information necessary for legislative oversight of municipal agencies and utilities. At issue here is the Assembly's ongoing legislative oversight of the Administration's handling of the Eklutna Project, which was the subject of the Subpoena. Accepting dismissal of this case under the specter of Ms. Helzer's representation that the Assembly lacked authority to issue the Subpoena in the first place would mean that any further efforts to shed light on the Administration's secret negotiations with the private Eklutna Project Owners would be effectively ended.[1] The Assembly agreed to the Joint Notice with the expectation that this important legal issue would be litigated.[2]

On May 9, the undersigned advised Ms. Buerer that if Ms. Helzer does not disavow her representation regarding the validity of AMC 2.30.085 and the Subpoena,

---

[1] Here, the requested documents were only provided to the Assembly after the private utilities had released the documents publicly.

[2] *See EEOC v. Fed. Express Corp.*, 558 F.3d 842, 846-47 (9th Cir. 2009) (reviewing validity and authority to issue a subpoena *after* the recipient had substantially complied with the subpoena).

the Assembly intends to move forward in this case by seeking declaratory relief, as requested in the Complaint at Prayer for Relief ¶ E. In an email response on May 9, Ms. Buerer reiterated Ms. Helzer's position that the Assembly's subpoena powers are invalid and that Ms. Helzer would not withdraw her representation, further demonstrating the need for a judicial resolution of this issue.[3]

The Assembly believes that this matter can and should resolved as quickly as possible. During the May 9 meet-and-confer, Ms. Buerer expressed optimism that the Municipal Attorney's Office could meet all deadlines, and she did not mention the need for any extensions of time.

DATED: May 10, 2024.

LANDYE BENNETT BLUMSTEIN LLP

/s/ Andrew Erickson

Andrew Erickson, Alaska Bar No. 1605049
Leslie R. Need, Alaska Bar No. 0712113

ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152. FAX (907) 276-8433

[3] *See* Exhibit 1 (Email from Kate Buerer to Andy Erickson, May 9, 2024). The admission that Ms. Helzer's statement "preserved issues relating to how the subpoena was applied to her in this case" is telling; there would be no need to "preserve" any issues if Ms. Helzer believed that compliance with the subpoena ended this case.

Subject: RE: Meet and Confer Response
Date: Thursday, May 9, 2024 5:50:51 PM
Attachments: image[illegible].png

Hi Andy,

As we discussed today on the phone during the meet and confer, the documents requested by your client were provided on April 25, 2024 by the Municipal Attorney. My understanding from our conversation is that your client is willing to dismiss the lawsuit if the Municipal Attorney "retracts" her statement in the Joint Notice that she did not "concede that AMC 2.30.085 and the subpoena issued under its authority are valid under Alaska law, the Alaska Constitution, and the United States Constitution." However, that statement had no legal effect in the case beyond preserving potential issues if the case continued beyond the provision of the documents. Accordingly, we see no reason to retract a statement that has no legal effect.

Please see the Municipal Attorney's position below on the issue of whether the matter can be dismissed per the Court's April 30, 2024 order in 3AN-24-05979CI.

This case should be dismissed. The documents requested by your client were provided to you on April 25, 2024. The Municipal Attorney was served with electronic notice of this suit on April 24, 2024, at 4:25pm. The requested documents were made public within hours after the lawsuit was filed. As stipulated in the Joint Notice, there is no dispute that your client has possession of the requested documents.

The Joint Notice did not place additional issues before the court. The Joint Notice simply did not concede the lawfulness of AMC 2.30.085 as it was applied in this case. The Municipal Attorney has not challenged the validity of the Assembly's legislative subpoena powers if those powers are lawfully executed. The Municipal Attorney merely preserved issues relating to how the subpoena power was applied to her in this case.

The subpoena addressed to Ms. Helzer, as Municipal Attorney, did not name a specific Municipal department or Director with actual control and authority to release the requested documents. The Subpoena supplied only 25 hours for compliance while the Municipal Attorney was out of state on Municipal business and attending a funeral that day.

The State's legislative subpoena powers provide far more due process protections to the recipient than were afforded to the Municipal Attorney. Some reasonable protections include requirements that the subpoena provide reasonable notice, be addressed to a person with custody and control of the requested documents and provide a means to raise applicable privileges. The Municipal Attorney did not neglect to respond or refuse to comply with the subpoena but did assert a privilege and requested more time. Your client declined to acknowledge the asserted privilege and declined to provide a reasonable amount of time, but instead chose to file this lawsuit seeking to hold the Municipal Attorney in "contempt of court."

Dismissal is appropriate in this case because your clients have possession of the requested documents and there is no current case or controversy properly before the Court.

With my best regards,

Kate Buerer
Assistant Municipal Attorney

AFFIDAVIT OF COUNSEL IN SUPPORT OF THE MUNICIPAL ATTORNEY'S MOTION FOR EXPEDITED CONSIDERATION

STATE OF ALASKA)
) ss.
THIRD JUDICIAL DISTRICT)

I, Kate M. Buerer, being first duly sworn upon oath, states as follows:

1. I am an Assistant Municipal Attorney for the Municipality of Anchorage.

2. I am an attorney of record for the Municipal Attorney in this case.

MUNICIPALITY OF ANCHORAGE

OFFICE OF THE MUNICIPAL ATTORNEY

P.O. Box 196650
Anchorage, Alaska
99519-6650

Telephone: 343-4545
Facsimile: 343-4550

3. Jason A. Thomas and I became counsel of record in this case on May 8, 2024.

4. May 14, 2024, is the current deadline for any motions allowable before a responsive pleading is filed as allowed under Alaska Rules of Civil Procedure and the responsive pleading, unless the Court grants an extension.

5. The Municipal Attorney's Office needs further time to review the Complaint and file appropriate responses in this case to adequately represent the Municipal Attorney.

6. Upon information and belief, on May 6, 2024, the Municipal Attorney requested opposing counsel agree to an unopposed extension of time and opposing counsel declined to agree to an extension of time. *See* Exhibit A.

7. Because opposing counsel declined to agree to an extension of time one week ago, the undersigned did not repeat the request that opposing counsel agree to an unopposed extension of time for motions allowable before a responsive pleading is filed as allowed under Alaska Rules of Civil Procedure and to file a responsive pleading.

[EXTERNAL EMAIL]

Anne,

Given the important issues that you raised in the Joint Notice, in which you disputed the validity of AMC 2.30.085 and the Assembly's subpoena powers, we're not inclined to agree to an extension for filing an answer. It may be helpful to schedule a call tomorrow or Wednesday to discuss the next steps in this case, as required by the Court's April 30 order. We're interested in setting a briefing schedule for resolving those legal issues as quickly as possible.

Are you available for a call either Tuesday, 2:15-3:30 pm; or Wednesday before 11:30 am or after 2:15 pm?

Andy

ANCHORAGE MUNICIPAL ASSEMBLY, and CHRISTOPHER CONSTANT, in his official capacity as Chair of the Anchorage Assembly, Plaintiffs, vs. ANNE HELZER, in her official capacity as the Anchorage Municipal Attorney, Defendant.	)	Case No. 3AN-24-05979CI

MUNICIPAL ATTORNEY'S MOTION TO DISMISS

The Municipal Attorney, by and through the Municipal Attorney's Office, hereby moves the Court to dismiss this case pursuant to Alaska Rules of Civil Procedure Rule 12. The Court should dismiss this case, in whole or in part pursuant to Alaska R. Civ. P. Rule 12(b)(6) for failure to state a claim upon which relief can be granted, because there is no live controversy properly before the Court, and the request for declaratory relief is not ripe.

FACTS

On March 27, 2024, the Assembly passed and approved AR No. 2024-103. In AR No. 2024-103, the Assembly resolved to approve the use of "subpoenas to compel testimony and document production related to the 1991 Fish and Wildlife Agreement . . ."[1] On March 27, 2024, the Assembly Chair issued subpoenas to produce documents.[2] Those subpoenas were addressed to the Municipal Manager and the Anchorage Water and Wastewater Utility ("AWWU") General Manager.[3] The subpoenas sought documents the Assembly had previously viewed during a February 2, 2024 Assembly Meeting Executive Session and related documents.[4] The Assembly stated it sought possession of the documents "so that the Assembly may share the agreement with its counsel for legal review prior to a determination by the Assembly regarding whether it is appropriate and in the public interest to make the agreement a disclosable public record."[5] Those subpoenas provided one week for compliance with a deadline of April 3, 2024.[6]

On April 2, 2024, the Mayor vetoed AR No. 2024-103.[7] In that veto, the Mayor stated "Indeed, disclosure has already been made, and is available to members of the Assembly and their paid outside counsel – if the confidentiality is properly maintained, and the Common Interest Agreement is not breached." On April 3, 2024, the Municipal Manager and AWWU General Manager responded to the subpoenas by email.[8] That response stated

that they had already "substantially complied" with the subpoenas and asserted that the documents were subject to lawyer-client privilege.[9] This assertion of lawyer-client privilege incorporated the privilege recognized by Anchorage Municipal Code ("AMC") 2.30.085A. stating that Assembly subpoenas are "[s]ubject to the privileges which witnesses have in courts of this state."[10] Alaska Rules of Evidence Rule 503 delineates the parameters of the lawyer-client privilege in Alaska.

On April 4, 2024, the Assembly Chair, Assembly Counsel, and the Assembly's outside legal counsel reviewed copies of the Common Interest Agreement, Term Sheet, and an amendment to the Term Sheet ("Subject Documents") for several hours in the Municipal Attorney's Office.[11] On April 9, 2024, during an Assembly meeting, Assembly members continued to request (personal) possession of copies of the Subject Documents.[12]

At 5:08 p.m. on April 16, 2024, the Assembly Chair issued another subpoena—this time addressed to the Municipal Attorney ("Subpoena").[13] The new Subpoena, on its face, required the Municipal Attorney to produce the Subject Documents by 5 p.m. the next day, April 17, 2024.[14] The Municipal Attorney responded to that Subpoena by asserting the Subject Documents were lawyer-client privileged, stating that she was out of state on Municipal business, and stating that she would not be able to substantively confer with the affected Municipal clients within twenty-four hours.[15] This response renewed the lawyer-

client privilege in response to Assembly subpoena as previously asserted by the Municipal Manager and AWWU General Manager. In response to being asked "[h]ow much time would you request to provide a response?," the Municipal Attorney stated that April 30th would be reasonable due to her current travel plans and need for "time to consult with the affected Municipal departments."[16] Assembly Counsel, in consultation with Assembly leadership, chose to require compliance with the Subpoena by April 22, 2024. Assembly Counsel appears to have misunderstood with whom the Municipal Attorney needed to consult because he stated that they "see no reason that counsel for the other Eklutna Owners would be unreachable by phone or email."[17] Assembly Counsel further stated that "[the Assembly and Assembly Counsel] have reason to believe that the owners intend to transmit the document to the State by the 30th."[18] This statement indicates that Plaintiffs were aware that as of April 30, the subpoenaed documents would be public.

This case was filed by Plaintiffs on April 24, 2024, against the Municipal Attorney in her official capacity.[19] Plaintiffs requested the Court enforce the subpoena by granting various forms of relief.[20] Those forms of relief include requesting the Court hold the Municipal Attorney "in contempt of court for willfully refusing to comply with the Subpoena;" order the Municipal Attorney to show cause why she "should not be punished for the contempt," or alternatively, be ordered to comply with the Subpoena; impose punishment for contempt including "referring the Defendant's conduct to the Alaska Bar

Association and/or holding the Defendant personally liable for civil fines and the Assembly's attorney's fees;" other relief; and "subsequent declaratory or injunctive relief that may be appropriate after the documents described in the Subpoena have been produced by the Assembly and reviewed by the Assembly Counsel."[21]

Concurrently with filing the Complaint, the Plaintiffs filed an Ex Parte Motion to Show Cause requesting the Court "require immediate compliance with the Subpoena"[22] and a Motion for Expedited Consideration. The following morning, the Municipal Attorney provided a Cover Letter, the Binding Term Sheet, and Amendment to Binding Term Sheet to Plaintiffs and filed the same with the Court. On April 26, 2024, the Court set a hearing for May 1, 2024, and ordered the parties to file a Joint Notice of Compliance if the Municipal Attorney produced the documents "by close of business on Tuesday, April 30, 2024."[23] On April 30, 2024, the parties filed a Joint Notice with the Court agreeing "that the Defendant has substantially complied with the subpoena" and "a show cause hearing is unnecessary."[24] That same day, the Court vacated the May 1 hearing and ordered the parties to meet and confer to decide whether the matter can be dismissed and notify the Court in writing with a status of the parties' discussion by noon on Friday, May 10, 2024.[25] The parties met and conferred regarding dismissal and filed separate status reports with the Court.

LEGAL STANDARD

A. *Motion to Dismiss Under Rule 12(b)(6)*

Alaska Rules of Civil Procedure Rule 12(b)(6) allows dismissal of a complaint for "failure to state a claim upon which relief can be granted."[26] Generally, motions to dismiss for failure to state a claim under Rule 12(b)(6) "are viewed with disfavor and should only be granted on the rare occasion where it appears beyond doubt that the plaintiff can prove no set of facts in support of the claims that would entitle the plaintiff to relief."[27] The Complaint must allege "a set of facts consistent with and appropriate to some enforceable cause of action."[28]

When reviewing a Rule 12(b)(6) motion, the court "assume[s] the factual allegations pled in the complaint are true for purposes of deciding the motion but unwarranted factual inferences and conclusions of law are not considered admitted in resolving the merits of such motion[]."[29] A complaint is subject to dismissal under this rule if an affirmative defense appears clearly on the face of the pleading.[30] The party raising an affirmative defense generally carries the burden of proof.[31] In considering a motion to dismiss, a court can rely on attachments incorporated into the complaint.[32] The superior court can also "consider

Umialik Ins.*, 108 P.3d 876, 878 n. 1 (Alaska 2005)) ("Attachments to a complaint are properly considered a part of the complaint in connection with a motion to dismiss."); *see also Ahwinona v. State*, 922 P.2d 884, 886 (Alaska 1996) (stating the trial court could properly rely on documents attached to the plaintiff's complaint without converting the defendant's motion to dismiss to a motion for summary judgment).

matters of public record, including [ ] court files . . . although normally a motion to dismiss under Civil Rule 12(b)(6) is determined solely on the basis of the pleadings."[33]

B. *Mootness*

Courts "will refrain from deciding questions where events have rendered the legal issue moot."[34] A claim is moot "if it has lost its character as a present, live controversy."[35] A "controversy" is one that is "appropriate for judicial determination," is "definite and concrete, touching the legal relations of parties having adverse legal interests."[36]

C. *Ripeness for declaratory judgment under AS 22.10.020(g).*

Declaratory judgment is available in Alaska courts through AS 22.10.020(g) providing that "[i]n case of an actual controversy in the state, the superior court, upon the filing of an appropriate pleading, may declare the rights and legal relations of an interested party seeking the declaration, whether or not further relief is or could be sought."[37] "The 'actual controversy' language 'reflects a general limitation on the power of courts to entertain cases ... [and] encompasses a number of more specific reasons for not deciding cases, including lack of standing, mootness, and lack of ripeness.'"[38]

"A ripe suit for declaratory judgment will present 'a substantial controversy, between parties having adverse legal interests, of sufficient immediacy and reality.'"[39] "[T]here is 'no set formula' for determining whether a case is ripe for adjudication. Instead, '[courts]

examine the fitness of the issues for judicial decision and the hardship to the parties of withholding court consideration' in an effort to 'balance[ ] the need for decision against the risks of decision.'"[40]

ARGUMENT

A. *The Complaint Fails to State a Claim Upon Which Relief Can Be Granted.*

The Plaintiffs' Complaint is based on a claim for enforcement of the Subpoena.[41] The stated grounds for relief are (1) "[t]he Subpoena is proper in all respects" and (2) "[t]he Defendant has willfully refused to comply with the Subpoena without a valid legal basis."[42]

Because the Court recognized that the parties agreed that the Municipal Attorney provided the requested documents to the Assembly before the Court's deadline, there does not appear to be any set of facts the Plaintiffs can prove in support of the claim for enforcement of the Subpoena that would entitle the plaintiff to relief.[43] The Municipal Attorney has not disputed the Assembly's ability to issue a legislative subpoena.

Regarding the claim that the Municipal Attorney "willfully refused to comply with the Subpoena without a valid legal basis," the Plaintiffs' Complaint, on its face, shows that the Municipal Attorney responded to the Subpoena by asserting that the Subject Documents were privileged under lawyer-client privilege.

Lawyer-client privilege is incorporated by reference in AMC 2.30.085A. which states that Assembly subpoenas are "[s]ubject to the privileges which witnesses have in courts of

this state."[44] Lawyer-client privilege is available to witnesses in Alaska courts through Alaska Rule of Evidence 503. The lawyer-client privilege recognizes a client's "privilege to refuse to disclose and to prevent any other person from disclosing confidential communications made for the purpose of facilitating the rendition of professional legal services to the client . . ." "A communication is confidential if not intended to be disclosed to third persons other than those to whom disclosure is in furtherance of the rendition of professional legal services to the client or those reasonably necessary for the transmission of the communication."

Here, the Subject Documents were communications from Municipal clients to the Municipal Attorney. Those communications were made to obtain the legal services of the Municipal Attorney and the Municipal Attorney's Office. As such, the Municipal Attorney properly responded to the Subpoena by the only method available to her—asserting that she, in her capacity as Municipal Attorney, was not able to produce the Subject Documents because they were lawyer-client privileged. She responded to the Assembly Subpoena by stating that she would consult with her clients—the only persons who could waive lawyer-client privilege and authorize her to produce the Subject Documents to the Assembly.[45] This proper assertion of lawyer-client privilege is an available defense utilized by the Defendant and is present on the face of the Complaint and attached documents. Therefore, the Defendant is entitled to an order to dismiss for failure to state a claim upon which relief can be granted.

[44] Compl. at 3.
[45] Compl., Ex. 8.

B. *This Case Is Moot.*

A claim is moot "if it has lost its character as a present, live controversy."[46] A "controversy" is one that is "appropriate for judicial determination," is "definite and concrete, touching the legal relations of parties having adverse legal interests."[47]

Here, as discussed above, the claims against the Municipal Attorney are based on the enforcement of the Subpoena and the production of documents in response to the Subpoena. As discussed above, the documents are in the possession of the Assembly, the Municipal Attorney has not disputed the Assembly's ability to subpoena documents for legislative purposes, and it is clear that the Municipal Attorney did not "willfully refuse[] to comply with the Subpoena without a valid legal basis."

Further, there is no longer any definite and concrete controversy properly before the Court that is appropriate for judicial determination. As discussed below, the request for further declaratory relief is not sufficiently definite and concrete so as to affect the legal relations of parties having adverse legal interests.

C. *This Case Is Not Ripe for Declaratory Judgment Under AS 22.10.020(g).*

"A ripe suit for declaratory judgment will present 'a substantial controversy, between parties having adverse legal interests, of sufficient immediacy and reality.'"[48] Here, the Plaintiffs' Complaint presents a controversy about *when* production of the documents demanded by the Subpoena should be required.[49] Because the Court recognized that the

[49] Compl. at 10 ¶26-28; *Id.* at Ex. 8

Municipal Attorney provided the documents to the Assembly before the Court's deadline, the underlying controversy no longer exists.[50] The issue of whether the Assembly has the ability to issue a legislative subpoena was never at issue before this Court.

Further, Plaintiffs' request in the Complaint asking the Court to retain jurisdiction for subsequent declaratory relief does not provide sufficient "information from which a court could conclude that a valid claim is alleged showing the pleader is entitled to relief."[51] Nor does it meet the main purpose of the Complaint—"to provide notice to the opposing party of the nature of the claim being asserted."[52] The Plaintiffs state as follows in the Prayer for Relief: "That this Court retain jurisdiction over this matter to issue any subsequent declaratory or injunctive relief that may be appropriate after the documents described in the Subpoena have been produced by the Assembly and reviewed by the Assembly Counsel."[53]

Here, the Plaintiffs have not provided the Defendant notice in a pleading or motion before the Court of the Plaintiffs' basis for declaratory relief. Nor have the Plaintiffs amended the Complaint to provide notice to the Court and the Defendant of their basis for requesting the Court continue to exercise jurisdiction over this case for the purpose of granting declaratory relief.

CONCLUSION

The Municipal Attorney respectfully requests that this Court dismiss the Complaint, in whole or in part, because there is no longer any live controversy before the Court upon which relief can be granted, the case is moot, and/or the request for declaratory relief is not ripe.

Attorneys for the Appellant Anchorage Assembly

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

THIRD JUDICIAL DISTRICT AT ANCHORAGE

ANCHORAGE MUNICIPAL ASSEMBLY, Appellant v. REGULATORY COMMISSION OF ALASKA, et al., Appellees.	)	Case No. 3AN-24-06001CI

MOTION FOR EXTENSION OF TIME FOR TRANSMITING THE RECORD ON APPEAL

Appellant Anchorage Municipal Assembly (the "Assembly"), through counsel and pursuant to Alaska Rules of Appellate Procedure 503 and 612(b)(2), respectfully requests a 60-day extension of time to prepare the Record on Appeal.

LANDYE BENNETT BLUMSTEIN LLP
701 WEST EIGHTH AVENUE, SUITE 1100
ANCHORAGE, ALASKA 99501
TELEPHONE (907) 276-5152, FAX (907) 276-8433

On April 25, 2024, the Clerk of Court issued a Notice of Preparation of Record in Administrative Appeal pursuant to Appellate Rule 604(b), ordering the Regulatory Commission of Alaska ("RCA") to forward to the Court a copy of the agency file in this matter within 40 days, or by June 4. According to the RCA, the agency file is voluminous—spanning 6 years of proceedings, involving over 14 different parties, and consisting of over 35,000 pages of filings. However, not all of the documents contained in the RCA file may be necessary for resolving this appeal.

Pursuant to AS 44.62.560(b), the Assembly intends to designate parts of the RCA file that are relevant to the issues presented in this appeal. Based on the volume of the RCA record and the work required to identify and designate relevant parts of the record, and the need for the RCA to number the pages consecutively and transmit the designated record to the Court, the Assembly requests a 60-day extension of time. If this motion for an extension is granted the new due date for preparation of the administrative record will be **August 5, 2024**.

DATED: May 22, 2024.

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

THIRD JUDICIAL DISTRICT AT ANCHORAGE

ANCHORAGE MUNICIPAL ASSEMBLY, and CHRISTOPHER CONSTANT, in his official capacity as Chair of the Anchorage Assembly, Plaintiffs, v. ANNE HELZER, in her official capacity as the Anchorage Municipal Attorney, Defendant.	Case No. 3AN-24-05979CI

ASSEMBLY'S NOTICE OF DISMISSAL

Plaintiffs Anchorage Municipal Assembly, though its Chair, Christopher Constant (collectively the "Assembly") provide notice of voluntary dismissal pursuant to Alaska Rule of Civil Procedure 41(a)(1).

On May 14, 2024, Ms. Helzer filed a Motion to Dismiss in which she conceded that the Assembly's authority to issue a subpoena pursuant to AMC 2.30.085 is not at issue in this case: "The Municipal Attorney has not disputed the Assembly's ability to issue a legislative subpoena."[1] Ms. Helzer's concession represents a reversal of her earlier position that "AMC 2.30.085 and the subpoena issued under its authority" are *invalid* under "Alaska law, the Alaska Constitution, and the United States

[1] Motion to Dismiss at 8.

ANCHORAGE MUNICIPAL ASSEMBLY, and CHRISTOPHER CONSTANT, in his official capacity as Chair of the Anchorage Assembly, Plaintiffs, v. ANNE HELZER, in her official capacity as the Anchorage Municipal Attorney, Defendant.	Case No. 3AN-24-05979CI

ASSEMBLY'S NOTICE OF CLARIFICATION

Plaintiffs Anchorage Municipal Assembly, though its Chair, Christopher Constant (collectively the "Assembly") provide this Clarification in response to the Municipal Attorney's Notice to Court Re: Assembly's Notice of Dismissal, in which the Municipal Attorney stated that the Assembly's "assertions are a mischaracterization of the Municipal Attorney's actual position." The Assembly stands by its characterization of the record in this case. The Assembly's Notice of Voluntary Dismissal was premised on the fact that the Municipal Attorney does not dispute the Assembly's authority to issue a legislative subpoena. Based on the Municipal Attorney's Motion to Dismiss, it is apparent that the parties are now in agreement that the Assembly's legislative subpoena power is valid.

STATE OF ALASKA

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners:

Robert A. Doyle, Chair
John M. Espindola
Robert M. Pickett
John C. Springsteen

In the Matter of the Notice and Request for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee, filed by the MUNICIPALITY OF ANCHORAGE, d/b/a ANCHORAGE HYDROPOWER	U-24-024

NOTICE AND REQUEST FOR ACKNOWLEDGMENT OF ANCHORAGE HYDROPOWER'S ACQUISITION OF EXPERTISE REQUIRED TO PARTICIPATE AS A VOTING MEMBER OF THE EKLUTNA OPERATING COMMITTEE

The Municipality of Anchorage ("MOA"), d/b/a Anchorage Hydropower ("AHP") hereby provides notice of its acquisition of the expertise required to participate as a voting member of the Eklutna Operating Committee ("EOC"). AHP respectfully requests that the Regulatory Commission of Alaska ("Commission") provide written acknowledgment that AHP has acquired the expertise required to participate as a voting member of the Eklutna Operating Committee ("EOC"), within **30 days** of this filing, in order to facilitate reasonably timely certainty regarding reinstatement of voting rights.[1]

[1] Pursuant to the October 27, 2020 Surrender of Eklutna Operating Committee Voting Rights, the Municipality of Anchorage's prior surrender will automatically terminate with Commission approval, reinstating voting rights. Exhibit 1, Surrender of Eklutna Operating Committee Voting Rights, October 27, 2020 ("Surrender") (stating that the surrender of voting rights "shall remain in effect until ML&P's successor complies with the RCA requirements pertaining to qualifications for ML&P's representation on the EOC").

I. Background

In Order No. U-18-102(44)/U-19-020(39)/U-19-021(39) ("Order No. 39"),[2] the Commission approved, subject to conditions, the sale of most of the electric utility assets of the Municipality, d/b/a Municipal Light and Power ("ML&P"), to Chugach Electric Association, Inc. ("Chugach") (the "Transaction" or "Acquisition"). The MOA retained its ownership interest in the Eklutna Hydroelectric Project ("Eklutna"), from which it sells wholesale electric power to Chugach and Matanuska Electric Association, Inc. ("MEA"), pursuant to power purchase agreements approved by the Commission.[3] Since the closing of the Transaction on October 30, 2020,[4] the MOA has conducted its wholesale electric generation business under the name "Anchorage Hydropower."[5] The Commission issued Certificate of Public Convenience and Necessity ("CPCN") No. 780 authorizing the MOA d/b/a Anchorage Hydropower to provide wholesale electric public utility service.

In Order 39, the Commission conditioned the issuance of a CPCN to the MOA on the filing of documentation that the MOA has surrendered its voting rights on the Eklutna

[2] May 28, 2020.

[3] Order No. 39 at 75 (approving the Chugach Purchase Power Agreement as amended; Letter Order #L2000410, TA379-121 (approving the MEA Purchase Power Agreement).

[4] *See,* Chugach's October 30, 2020 "Notice of Transaction Closing – Chugach Electric Association Inc.'s Acquisition of the Municipality of Anchorage d/b/a Municipal Light & Power; Compliance with Order No. U-18-102(44)/U-19-020(39)/U-19-021(39)."

[5] *See* Anchorage Ordinance No. 2020-109 (October 13, 2020) ("An Ordinance of the Anchorage Assembly Amending Anchorage Municipal Code Chapters 3.20, 4.70, 26.10, 26.20, and 26.30 Governing the Municipality's Provision of Electric Utility Service").

Operating Committee ("EOC").[6] On October 30, 2020, ML&P filed notice with the Commission of its October 27, 2020 Surrender of Eklutna Operating Committee Voting Rights.[7] Order 39 required that the surrender must remain in effect until the MOA "has shown to [the Commission's] satisfaction that MHP[8] has acquired the expertise required to fully participate as a voting member of the EOC."[9]

II. AHP has acquired the expertise required for the MOA to exercise voting rights and full participation on the EOC.

With this filing, AHP provides notice that it has acquired the expertise that the Commission requires for the MOA to exercise voting rights and participate fully on the EOC. In Order 39, the Commission identified two characteristics for an owner representative on the EOC that are required to lift surrender of voting rights: knowledge of prudent utility practice and knowledge of the Railbelt generation and transmission system.[10] Mark Corsentino, P.E., was unanimously approved by the Anchorage Assembly to be the Utility Director of Anchorage Hydropower on July 2, 2024.[11] As such, Mr. Corsentino will also serve as AHP's representative

on the EOC, and has the requisite expertise to exercise voting rights and fully participate on the EOC.[12]

Mr. Corsentino, a licensed engineer with approximately 20 years of utilities experience, has extensive experience in prudent utility practice, including as defined in the Chugach and MEA Purchase Power Agreements ("PPAs").[13] He also has experience in Railbelt electric generation and a sound knowledge of the Railbelt transmission system.[14] Mr. Corsentino has been the General Manager of the Anchorage Water and Wastewater Utility ("AWWU") since February 2019, directing and overseeing two economically regulated utilities, with a combined annual revenue of $130 million, annual capital budgets of $35 million, and a net book value of over one billion dollars.[15] Mr. Corsentino also oversees over 280 full-time AWWU employees, as well as AWWU's two water treatment plants, three wastewater treatment plants, 1,600 miles of underground pipelines, and 200 water and sewer remote facilities.[16]

In his role as General Manager, and previously in his AWWU roles of Director of Operations and Maintenance and Project Management Engineer/Supervisor, Mr. Corsentino has gained significant experience with operation capital expenditures, leading projects such as SCADA control system upgrades and providing project management design and construction

expertise in water transmission main projects, sewer pump station projects, and wastewater treatment process improvement projects (e.g., replacing chlorination with UV disinfection, clarifier rehabilitation, etc.).[17] He has overseen several utility rate cases,[18] and is versed in compliance with the uniform system of accounts pursuant to 3 AAC 48.277 (including subsections (9) through (13) (electric public utilities) and subsections (14) through (17) (water utilities).[19]

Of particular relevance for EOC owner representation, Mr. Corsentino is experienced with hydropower generation, scheduling, maintenance, and integration with other Railbelt resources. AWWU generates electricity totaling up to one megawatt capacity, spread across three existing units, with at least one additional unit under consideration for development.[20] As General Manager, Mr. Corsentino oversees AWWU operation and maintenance of the hydropower generation from AWWU's Eklutna Energy Recovery Station (equivalent to roughly 750KW capacity, which connects to and feeds power back into the MEA system), as well as AWWU's Reservoir 3&4 Facility and AWWU's 92nd Street PRV Facility, which together provide another combined approximate 100KW capacity to the Chugach system.[21] Additionally, Mr. Corsentino oversees AWWU's co-location with Chugach's Plant 2A, which increases the efficiency of the plant (colocation provides cooling to the Chugach infrastructure, simultaneously

[17] *Id.*

[18] *Id*.

[19] Additionally, since the Acquisition, day-to-day accounting and annual reporting for AHP has been performed by MOA finance employees knowledgeable in the uniform system of accounts pursuant to 3 AAC 48.277.

warming AWWU's infrastructure, reducing the natural gas needed to heat water in homes and businesses).

In addition to his direct experience with hydropower generation, Mr. Corsentino's educational background and career experience provide additional expertise in electric generation and transmission. As a licensed engineer with a background in electrical engineering, Mr. Corsentino understands the mechanics and theory of electricity generation and transmission.[22] Through his employment at AWWU, one of CEA and MEA's largest customers, Mr. Corsentino is regularly involved in the construction of pump stations and other projects requiring significant power supply from the grid.[23] As such, Mr. Corsentino understands power systems and related issues such as power correction, phase, amplitude, and frequency of AC power.

Further, Mr. Corsentino has specific experience previously representing AHP on the EOC in a non-voting capacity.[24] Thus, Mr. Corsentino has knowledge of Eklutna Project matters including hydropower generation, scheduling, integration with other Railbelt resources, SCADA (as managed through CEA), and project maintenance.

Finally, in the event Mr. Corsentino encounters an issue where any assistance is required, he has access to additional resources through both in-house engineering expertise at the MOA and the ability to engage the expertise of MOA consultants and contractors. Mark Schimscheimer, Engineering Director of AWWU, has been designated to provide additional

[22] *Id.*

technical and engineering support to AHP (at AHP's expense).[25] Mr. Schimscheimer has extensive experience with infrastructure development projects, including over a decade of experience as a project development manager with the Alaska Industrial Development and Export Authority ("AIDEA") and the Alaska Energy Authority ("AEA").[26] Mr. Schimscheimer's experience with AIDEA and AEA included projects involving rural power systems, the Healy Clean Coal Project, the Alaska Intertie, Railbelt generation and transmission studies, and Southcentral Alaska energy analysis.[27] Mr. Schimscheimer has experience in negotiation of agreements regarding power sales, fuel source, plant purchase and sale, and operations and maintenance.[28] Additionally, Mr. Schimscheimer's work has included negotiation of federal compliance orders, state and federal power plant permitting, federal grants management, and overall financial due diligence for such work including: village to village electric interties, modular power plant size and placement, and general utility business agreements.[29]

In addition to the auxiliary in-house expertise that Mr. Schimscheimer provides, AHP will also have access to, and the right to use (at AHP's expense), contracts of the MOA in order to access any additional technical and engineering expertise necessary.[30]

(907) 277-1604

Given Mr. Corsentino's background and experience (and his ability to access additional MOA expertise as needed), AHP now has the managerial and technical expertise to fully participate as a voting member of the EOC. Mr. Corsentino has the requisite knowledge of prudent utility practice and the Railbelt electric generation and transmission system required to be a voting owner representative on the EOC.

III. Pursuant to a Memorandum of Understanding between AWWU and AHP, Mr. Corsentino will act solely as director of AHP, with loyalty to AHP's interests, in any instances of competing interests between AHP and AWWU.

A Memorandum of Understanding between AWWU and AHP ("Memorandum") establishes that in any instance of conflicting interests between AHP and AWWU, Mr. Corsentino will act solely as the Utility Director of AHP, and he will abstain from any decisions that need to be made by the General Manager of AWWU.[31] Under the Memorandum, Mr. Corsentino will not take any action in his role as General Manager on "issues that affect the interests, operations, or obligations" of AHP.[32] Instead, AWWU's interests will be represented by the AWWU Assistant General Manager (currently David A. Persinger).[33] Thus, if a voting issue arises which directly affects AWWU, Mr. Corsentino will "act solely as director of [AHP], with loyalty to [AHP's] interests."[34] This ensures that all decisions by Mr. Corsentino in his role as the AHP representative on the EOC are made consistent with (1) prudent utility practices (as defined in the Chugach and

MEA PPAs) and (2) the rights and obligations of Chugach and MEA (pursuant to the Chugach and MEA PPAs).

These procedures will also be followed by Mark Schimscheimer, AWWU's Engineering Director, who has also been designated to provide technical and engineering support to AHP.[35] Further, management expenses, including compensation for Mr. Corsentino and Mr. Schimscheimer, will be apportioned on a cost-causer, cost-payer basis.[36] Thus, as AHP's EOC representative, Mr. Corsentino will make any required decision as AHP Utility Director—e.g., consistent with prudent utility practices and the rights and obligations of Chugach and MEA.

IV. CONCLUSION

As described above, AHP hereby provides notice that it has acquired the expertise required to fully participate as a voting member of the EOC. AHP requests that the Commission provide a written acknowledgment notifying AHP that AHP has acquired the expertise required to participate as a voting member of the EOC. With this acknowledgment, the October 27, 2020 Surrender of EOC voting rights by MOA, d/b/a ML&P, will automatically terminate, reinstating AHP as a voting member of the EOC. To provide reasonably timely certainty to AHP and Mr. Corsentino regarding the restoration of EOC voting rights, AHP respectfully requests that the Commission provide this acknowledgment within **30 days** of AHP's request.

October 27, 2020

Surrender of Eklutna Operating Committee (EOC) Voting Rights

In accordance with the requirements of order U-18-102(44), the Municipality of Anchorage, dba Municipal Light & Power(ML&P), hereby surrenders its voting rights as an EOC member and under the Fish and Wildlife Agreement effective as of the Closing of the Asset Purchase Agreement between ML&P and Chugach Electric Association (Chugach). This surrender of voting rights shall remain in effect until ML&P's successor complies with the RCA requirements pertaining to qualifications for ML&P's representation on the EOC.

Until ML&P's successor complies with the qualification terms of RCA order U-18-102(44), all EOC decisions will be by unanimous vote of Chugach and Matanuska Electric Association, Inc. (MEA). Eklutna hydro operations, dispatch and maintenance will continue to follow past practices and policies unless changes are approved through the EOC process.

EXPERIENCE

February 2019 –Present *General Manager of the Anchorage Water and Wastewater Utility (AWWU), Anchorage, AK*

Directs and oversees all operations of a Municipal Department with two separate State Economically Regulated Utilities with a combined annual revenue of $130M, annual capital budgets over $35M, over 280 full time employees, 8 work divisions, a net book value of over $1B with a replacement value over $10B, with over 1,600 miles of underground pipelines, 2 water treatment plants, 3 wastewater treatment plants, 200 water and sewer remote facilities, 1 MW hydropower generation across three units (Eklutna Energy Recovery Station, Reservoir 3&4 Facility, 92nd Street PRV Facility), with a Utility wide SCADA network, including 35 lift stations, 20 finished water reservoirs, 12 high production wells, dozens of booster stations and PRV facilities with 55 pressure zones, 7,500 fire hydrants, 15,000 mainline valves, and approximately 60,000 customer parcels and service lines all within a certificated service area larger than the state of Rhode Island with a population served of approximately 230,000. Oversaw several successful utility rate cases and multiple NACWA Peak Performance Awards, FEMA earthquake recovery reimbursement efforts, lean and green utility operations, COOP through the COVID pandemic. Represented the Municipality in the Anchorage Hydropower Plant Operations Committee as part of the Municipality's ownership of 40MW hydropower plant and its associated federal fish and wildlife study in lieu of FERC relicensing. Oversaw the Stormwater Utility Evaluation and Implementation Program for the Municipality.

August 201 –January 2019 *Director of Operations and Maintenance with the Anchorage Water and Wastewater Utility (AWWU), Anchorage, AK*

Lead and managed a group of ninety five employees, mostly union represented, whose mission is to operate and maintain the Utility's plant, collection and distribution facilities. As a member of the Utility Leadership Team, was integrally engaged in the execution and implementation of the Utility 2016-2021 Strategic Plan. Initiated large diameter line cleaning program and reclassified employee positions to improve retention and to be in alignment with ADEC Operator Certification program. Oversaw emergency recovery of utility assets during magnitude 7.1 earthquake and oversaw implementation of computerized maintenance management system upgrade and integration with Municipal ERP system and Utility asset management system.

August 2007–July 2016 *Project Management Engineer/Supervisor with the Anchorage Water and Wastewater Utility (AWWU), Anchorage, AK*

Managed engineering design and construction projects and supervised employees for the AWWU Engineering capital program. Communicated and coordinated with multiple stakeholders, including all divisions within the Utility, municipal departments, permitting agencies, the public and consultants. Additional duties consisted of managing Utility soil remediation projects, providing corrosion technical assistance for projects, and providing technical input to the AWWU Asset Management Plans and the AWWU DCPM and MASS re-writes. Project Management design and construction experience in water transmission main projects, large diameter sewer conveyance projects, water storage reservoir projects, sewer pump station projects, water booster stations projects, water distribution main projects, sewer collection system projects, and wastewater treatment process improvement projects (eg replacing wastewater chlorination with UV disinfection, clarifier rehab, etc.)

August 2002–August 2007 *Project Management Engineer with the Water Business Group in CH2M HILL's Anchorage, AK and Seattle, WA offices. In Anchorage since May 2005.*

Duties consisted of project management, project engineering and construction management services for water and wastewater projects throughout the Pacific Northwest including water treatment plant design and construction (Cedar Water Treatment Plant, Skagit Water Plant Expansion), wastewater plant design and construction (Centralia, Barrow), large diameter sewer conveyance (King County), water transmission main design and construction (Tacoma and Anchorage) and water transmission main impressed current design support efforts.

September 2000–July 2002 *Civil Engineer Trainee (GS-7), United States Geological Survey, Water Resources Division), Middleton, Wisconsin.*

Collected and processed water quality samples for an airport stormwater toxicity study and a cryptosporidium and urban stormwater runoff study. Processed and analyzed the collected field data. Performed maintenance and calibration of gaging stations and automatic data samplers.

July 2001-May 2002 *Graduate Research Assistant, Marquette University, Milwaukee, Wisconsin.*

Studied aerobic and anaerobic biodegradation of the suspected endocrine disrupter precursor nonylphenol ethoxylate found in aircraft deicing fluid. Operated a system of biological reactors under differing environmental conditions.

PUBLIC SPEAKING, PAPERS, PRESENTATIONS, CERTIFICATIONS AND MORE:

- Experienced and versed in creating presentations and speaking publicly to community councils, business associations, Municipal Boards, Municipal and Borough Assemblies, Regulatory Commission of Alaska, State of Alaska Legislature Senate Finance Committee, ADEC Commissioner, and Mayoral Administrations
- Registered Professional Civil Engineer, State of Alaska; AELC11653
- 2006: PNCWA Lead & Copper Rule Lessons Learned for SE Alaska Communities
- 2007: ASCE Pipelines Paper & Presentation: Design and Construction of a Large Welded Steel Pipe Bridge Crossing for Potable Water Supply in Anchorage, Alaska
- 2010: NACE AK Chapter presentation; Corrosion Mitigation of AWWU Infrastructure
- 2011: AWWMA Corrosion presentation: Corrosion Mitigation of AWWU Infrastructure
- 2011-2018: UAA ME 664, Corrosion Processes and Engineering course guest lecturer: Presented Corrosion Problems and Solutions in the Water & Wastewater Industry
- 2013: NACE International Corrosion Conference paper/presentation; DIP External Surface Preparation and Coatings for Buried Water Service from an Owner's Perspective
- 2013: NASTT No Dig presentation; Sewer Condition Assessment in the Far North
- 2023: AWWMA Presentation: Disinfection with On-Site Generation
- NACE International past certifications, 2016; (CP2-Cathodic Protection Technician, CIP2-Coating Inspector Level 2, CP3-Cathodic Protection Technologist successful test)
- Master's thesis; Aquatic toxicity of aircraft deicing runoff on adult fathead minnows, 2002
- Master's thesis work supported September 2003 EST paper; Nonylphenol Ethoxylates and other Additives in Aircraft Deicers, Anti-icers and Airport Runoff
- FEMA ICS 100 Certifications, 2013
- AK CESL and CPR past certifications, 2013, 2015
- OSHA 10 Hour Safety Course
- Volunteer Member of Local Road Service Area Board, 2022-present
- Volunteer high school wrestling coach, 2007-2009
- College summer internship at Abbott Laboratories Diagnostics Division, 1999

MEMORANDUM OF UNDERSTANDING BETWEEN ANCHORAGE WATER AND WASTEWATER UTILITY AND ANCHORAGE HYDROPOWER UTILITY RE RESOLUTION OF CONFLICTS OF INTEREST

WHEREAS, Mark Corsentino has been appointed and confirmed as the general manager of Anchorage Water and Wastewater Utility (AWWU), but has also been appointed and confirmed as the director of Anchorage Hydropower Utility (AHU);

WHEREAS, Mark Schimscheimer is the Engineering Director of AWWU, but has also been designated to provide technical and engineering support to AHU;

WHEREAS, both AWWU and AHU utilize Eklutna Lake as part of their operations; AWWU as a source of drinking water and AHU as a hydropower production water source and storage; and

WHEREAS, AWWU currently purchases its water from the Eklutna Hydroelectric Owners ("Owners"), comprised of Chugach Electric Association, Inc., Matanuska Electric Association, Inc., and AHU;

WHEREAS, decisions regarding the management of AHU and AWWU may impact and conflict with the other utility, rendering it essential to address and resolve potential conflict issues that Mr. Corsentino and Mr. Schimscheimer may face in their performance of their duties;

WHEREAS, it is also necessary to apportion management expenses for both AWWU and AHU on a cost-causer, cost-payer basis;

NOW THEREFORE, AWWU and AHU agree as follows:

1. Mr. Corsentino and Mr. Schimscheimer shall not take any action in their roles as AWWU employees on issues that affect the interests, operations, or obligations of AHU. Specifically, in all instances of conflicting interest between AWWU and AHU:
    a. Mark Corsentino shall abstain from any decisions that need to be made by the General Manager of AWWU, and he shall instead act solely as director of AHU, with loyalty to AHU's interests.
    b. AWWU's interests shall be represented by, and the General Manager's authority delegated to, the AWWU Assistant General Manager (currently David Persinger).

Docusign Envelope ID: C04BC1CE-4428-45FF-BC6C-F1930FFA46FD

   c. Mr. Schimsheimer shall similarly abstain and his AWWU duties shall be delegated to another AWWU staff member. When acting on behalf of AHU, Mark Schimscheimer shall not act in his role as an employee of AWWU or represent AWWU's interests.
2. AHU may utilize Mr. Schimscheimer, at its own expense, to provide additional technical and engineering support of AHU operations.
3. AHU will have access to and right to use, at AHU's expense, contracts of the MOA to access technical and engineering expertise necessary to oversee and conduct operations.
4. To reflect this arrangement, Mr. Corsentino's and Mr. Schimscheimer's salaries shall be apportioned as follows, effective July 8, 2024:
   a. AWWU shall pay 80% of Mr. Corsentino's salary and AHU shall pay 20% of his salary; and
   b. AWWU shall pay 90% of Mr. Schimscheimer's salary and AHU shall pay 10% of his salary.

Education & Registration

BS - Civil Engineering; CSUC; 1993
MSPM - (Master of Science in Project Management) UAA, various classes
PE - State of Alaska, Civil Engineer 10955
PMP - Project Management Professional 1925650 (lapsed)
Arctic Engineering – University of Alaska, 1993
CDT - Contract Document Technologist, Construction Specification Institute (CSI)
IEDC/CDFA – Development Finance, various classes

Experience

2019-present: ***Director of Engineering, Anchorage Water and Wastewater Utility (AWWU):*** Responsible for a staff of 45 and annual budgets more than $50 million. Sections of the Engineering Division includes Development Services, Project Management, and Asset Management Planning. Utility serves a metropolitan population of 300,000, processes and distributes 50 MGPD of drinking water and process 45 MGPD of wastewater. Distribution and collection systems are deep-bury for frost conditions. All assets are located in a high seismic region. Step-up General Manager as required. Significant interface with Municipal Assembly, Administration, and State and Federal elected officials. Accomplishments include:

- Division & Utility reorganization: reconfigured division to achieve cost and deliverable efficiencies (eliminated former position).
- Pioneered utility first Public-Private Partnership to develop infrastructure in support of economic development projects

2017- 2019: ***Planning and Development Services Manager*** AWWU, Anchorage, Alaska. Responsible for special assessment districts, development services, real estate management, third party project coordination, and addressing miscellaneous public and utility concerns. Position requires diplomatic abilities towards conflict resolution and negotiations with municipal departments, government officials, and the public at large.

- Water Master Plan: 50,000 customers with a peak daily demand of 40 MGD.
- Risk and Resiliency Assessment: Federal requirements stipulate Assessment be completed to AWWA J100 standards by March 2020.
- Asset Management Plan(s): facility assessments, O&M procedures, break rates, ROI

2015: ***Managing Partner***: Alaska LNG Exporters, Anchorage, Alaska. In conjunction with international business partners created a Delaware based LLC with the goal of exporting excess and stranded Cook Inlet Basin natural gas to Pacific Rim customers. Formulated business plan, confidentiality agreements, and qualified investor presentations. Currently on hold pending Natural Gas price recovery.

2010- 2017: ***Managing Partner***: SMR Developers, Anchorage, Alaska. Formed in 2010, Owner and Managing Partner of a real estate development company. Responsible for all aspects of the corporation: Investor management, financing, accounting, subcontractor management, engineering & permitting, financial and risk analysis.

2013-2015: ***Project Manager***: NANA WorleyParsons, Anchorage, Alaska. Project Manager for mining and energy related projects. Clients include Teck Alaska, Pebble Limited Partnership (PLP) and ConocoPhillips Alaska (CPAI). Specific activities include preparation of proposals, management of work share partners, client interface and overall project management activities. Project types included green-field North Slope drill sites, power grid extensions, subcontracting (EPS), water treatment facilities and LNG handling facilities

2001-2013: ***Project Development Manager***: AIDEA/AEA, Anchorage, Alaska (AIDEA is a small capital-intensive enterprise investment corporation of the State of Alaska wherein each person has wide authority and responsibilities, AEA is a similar not-for-profit energy authority)

- AIDEA: Responsible for approximately $1 Billion of projects at any given time. Duties included all development (concept through execution and closure) and operational aspects of mining, power generation, and vertical construction projects financed by AIDEA.
- AEA: Bulk fuel upgrade and replacement projects throughout rural Alaska (20 projects with a value of $50 million). Responsible for all project phases from conception through close-out including contract negotiation, award and management of Multi-Discipline Design Contracts and Construction Management contracts.
- Projects included village to village electric interties, modular power plant size and placement, utility business agreements

Specific AIDEA activities included:

- Oversee the planning and conceptual design study for an Arctic deep-water port proposed to serve both the Red Dog Mine District and the Western Arctic Coal
- Responsible for an Arctic-grade ore concentrate trans-shipment
- Manage professional technical, legal and construction (EPC, CM, DB, DBB) and asset specific operations contracts
- Reviews all specialty inspection reports such as feasibility, design, design review, value engineering
- Facility inspection to observe condition, maintenance activities, and operation procedures
- Highly familiar with applicable regulations and permitting agencies (EPA, State) regarding NEPA, Clean Air Act, EIS, NPDES
- Negotiation of contracts and litigation settlements in excess of $150 million
- Healy Clean Coal, a 50MW coal-fired power plant: management of litigation team in an unresolved $175 million dispute, plant permitting, negotiation of power sales agreement, project development agreement, coal supply contract, O&M, custodial and transmission contracts, and various agreements and contracts as required. Negotiated sale of asset.
- Negotiated Consent Decree for Title V air permit for plant.

Specific AEA activities included:

- Authored and negotiated master Business Plan requiring sustainability of a rural Alaskan village utility (power & bulk fuel) that became a funding requirement of the Denali Commission. Interfaced with Denali Commission (Federal Agency), USDA/RUS funding program, HUD funding, State and Federal regulators, and village leaders and communities throughout Alaska.

- Authored program manual for $200 million energy program, created master funding schedule. Negotiated all aspects of the program with local leaders, and funding agencies (Federal & State Grants)

1998-2001: ***Project Manager****:* Arctic Slope Consulting Inc., (full time in Barrow) Barrow, Alaska (This company was a subsidiary of ASRC, sold to NANA and is now DBA WHPacific)

- Sr. Project Manager on all Alaska Arctic North Slope village water & sewer projects (approx. $350 million). Responsible for client contact (marketing), office workload management among various project managers, financial tracking and reporting, construction administration proposals & budgeting. Reorganized office and revised & updated document control system including creation of project control tracking procedures. Part of negotiation team on multiple $50 million projects.

- Owner's Construction Representative (OCR) on Alaska Arctic North Slope water and sewer projects for Pt Hope, Nuiqsut, & Anaktuvuk Pass (combined cost approx. $150 million). Projects included construction of sewer treatment and water treatment facilities, all direct-bury collection and distribution systems, and related auxiliary construction. Responsible for pay requests, DC/VRs, change orders, site visits, inspectors, and communication between the owner & the contractor.

1998: ***Superintendent, Surveyor***: UIC Construction, Inc., Anchorage, Alaska

- Site Supervisor and General Foreman for 20-person Alaska Native crew ($4 million per season). Responsibilities included all site paperwork, time sheets, quantity tracking, and scheduling, HR issues, interface with the owner's representative.
- Survey Party Chief on NSB Village Sewer and Water Projects (Anaktuvuk Pass & Pt. Lay). Included project layout, and substantial redesign work.

1994-1998: ***Project Engineer***: Bristol Environmental Services Corporation, Anchorage, Alaska (The business unit no longer exists in the same form)

- Environmental site investigations, geophysical surveys, product recovery systems, large-scale HAZMAT cleanups.
- Experience in environmental cleanup associated with Arctic production facilities

1995 (summer): ***Project Engineer***: South Coast, Inc., Ketchikan, Alaska (This company no longer exists)

- Survey Party Chief and Construction Engineer for Bethel runway rebuild project. ($4 million). Surveyor of road realignment and utilities placement ($1.5 million).
- Survey Party Chief and Construction Supervisor of new airport runway, apron, and access roads ($5.5 million).
- Surveyor for marine ferry terminal dock ($7.75 million). Redesigned highway alignment, drainage flows and culvert placement and utility conflicts on highway and bridge reconstruction project ($4 million).
- General Foreman on Petersburg seaplane float dredging and construction project ($2.5 million).

1993-1994: ***Project Engineer***: Arctic GeoScience, Inc., Anchorage, Alaska, (This company no longer exists)

- Engineered and designed drill pad and road system to support oil exploration activities in Arctic Russia. Design issues included geotechnical analysis, thermal analysis of permafrost stability, and layout of man-camp, flare pit, tank farm, and power modals.
- Served as CONOCO's on-site representative overseeing the winter construction of the system and the placement of the drill rig and ancillary equipment units.

Public Service Activities

- Chair, South Golden View Rural Road Service Area
    - Public Official, seat won through Municipal Election, April 2008, re-elected 2010, 2013, 2016
    - Annual budget $750K of direct tax revenue, grants of up to $4.5 million

- **Candidate for Assembly:** April 2016
- **Participant**: November 2014 Governor Walker/Mallott "Transition Team Member" for Consumer Energy Issues.
- **Participant**: June 2015 "Conversations with Alaskan", Fairbanks, Alaska. Three-day event to give feedback to the Administration on current budget issues and proposed solutions.
- **Storm Water Utility Steering Committee (2017-18)**: member representing rural road service areas

Notice of Utility Request

The REGULATORY COMMISSION OF ALASKA (Commission) gives notice that on July 18, 2024, the Municipality of Anchorage d/b/a Anchorage Hydropower (AHP) filed a request that we acknowledge AHP's acquisition of the expertise required to fully participate as a voting member of the Eklutna Operating Committee (EOC). Docket No. U-24-024 was opened to address this matter.

AHP, Chugach Electric Association, Inc. (Chugach), and Matanuska Electric Association, Inc. (MEA) own the Eklutna Hydroelectric Project and operate it through the EOC. AHP is authorized under Certificate of Public Convenience and Necessity (Certificate) No. 780 to provide wholesale public electric utility service through its ownership share of the Eklutna Hydroelectric Project but currently does not have voting rights on the EOC. In Order U-19-021(39), the Commission required AHP to acquire the expertise required to fully participate as a voting member of the EOC before those voting rights could be reinstated.

You may obtain information about this request by contacting Dean Thompson, Counsel for AHP, at 255 East Fireweed Lane, Suite 200, Anchorage, AK 99503; phone: (907) 277-1604. The complete filing is also available for inspection at the Commission's office, 701 West 8th Avenue, Suite 300, Anchorage, AK, 99501; Phone: (907) 276-6222, or may be viewed at the Commission's website, http://rca.alaska.gov/ by typing Docket No. "U-24-024" in the *Find a Matter* search box.

To comment on this filing, please file your comments by 5:00 p.m., August 26, 2024, at the Commission's address above or via our website at:

https://rca.alaska.gov/RCAWeb/WhatsNew/PublicNoticesComments.aspx

Please reference Docket No. U-24-024 and include a statement that you have filed a copy of the comments with AHP at the address given above. Individuals or groups of people with disabilities, who require special accommodations, auxiliary aids or service, or alternative communications formats, please contact Naomi Johnston at (907) 276-6222, toll-free at 1-800-390-2782, TTY/Alaska Relay: 7–1–1 or 1 (800) 770-8973, or send a request via electronic mail to rca.mail@alaska.gov by August 19, 2024.

DATED at Anchorage, Alaska, this 26th day of July 2024.

REGULATORY COMMISSION OF ALASKA

Chairman

REGULATORY COMMISSION OF ALASKA

Certification of Electronic Transmission

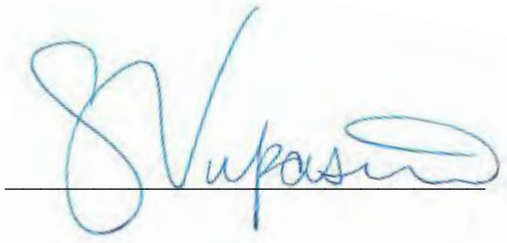
I, Samantha Vukasin, a Law Office Assistant III for the Regulatory Commission of Alaska, 701 West Eighth Avenue, Suite 300, Anchorage, Alaska, hereby certify that on July 30, 2024, I transmitted by electronic mail true and accurate copies of:

Order U-24-024(1)

ORDER DENYING REQUEST FOR DECISION IN 30 DAYS; DESIGNATING PARTIES; INVITING PARTICIPATION BY THE ATTORNEY GENERAL AND INTERVENTION; ADDRESSING TIMELINE FOR DECISION; SCHEDULING PREHEARING CONFERENCE; DESIGNATING COMMISSION PANEL; AND APPOINTING ADMINISTRATIVE LAW JUDGE
(Issued July 30, 2024)

to the persons set out on the attached email list.

DATED at Anchorage, Alaska, this 30th day of July, 2024.



Samantha.Vukasin@alaska.gov

STATE OF ALASKA

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners: Robert A. Doyle, Chairman
John M. Espindola
Robert M. Pickett
John C. Springsteen

In the Matter of the Petition Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee	U-24-024 ORDER NO. 1

ORDER DENYING REQUEST FOR DECISION IN 30 DAYS; DESIGNATING PARTIES; INVITING PARTICIPATION BY THE ATTORNEY GENERAL AND INTERVENTION; ADDRESSING TIMELINE FOR DECISION; SCHEDULING PREHEARING CONFERENCE; DESIGNATING COMMISSION PANEL; AND APPOINTING ADMINISTRATIVE LAW JUDGE

BY THE COMMISSION:

Summary

We deny the request filed by the Municipality of Anchorage d/b/a Anchorage Hydropower (AHP) for a decision in 30 days without prejudice to filing a motion for expedited consideration. We designate Chugach Electric Association, Inc. (Chugach) and Matanuska Electric Association, Inc. (MEA) as parties, subject to filing a notice of non-participation. The chairman invites participation by the Office of the Attorney General (AG) and we invite intervention by interested persons. We address a timeline for a final decision in this proceeding. We schedule a prehearing conference. The chairman designates a Commission Panel and Commission Docket Manager and appoints an administrative law judge.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

Background

The Eklutna Hydroelectric Project (Eklutna Project) is a 39-MegaWatt (MW) generation facility jointly owned by AHP (53.33%), Chugach (30%), and MEA (16.67%). The three utilities operate the Eklutna Project through the Eklutna Operating Committee (EOC). As part of its sale of most Municipal Light and Power Department (ML&P) assets to Chugach, the Municipality of Anchorage (Municipality) proposed retaining its ownership interest in the Eklutna Project under a new business name. The Municipality indicated that it would retain no employees qualified to sit on the EOC. Under these circumstances, we could not unconditionally find that the Municipality was managerially or technically fit to maintain a majority ownership interest in the Eklutna Project. We allowed the Municipality to maintain its ownership interest in the Eklutna Project subject to the condition that it surrender its vote on the EOC.[1]

However, we stated AHP could regain those voting rights if certain conditions were met:

> We can only find that [the Municipality] is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without [the Municipality] having a vote on operation or management decisions. This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as [the Municipality] has shown to our satisfaction that [the Municipality] has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit [the Municipality] from attending EOC meetings, but may not allow [the Municipality] any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.[2]

---

[1]Order U-18-102(44)/U-19-020(39)/U-19-021(39), *Order Accept Stipulation in Part, Subject to Conditions; Transferring and Issuing Certificates of Public Convenience and Necessity, Subject to Conditions; Addressing Beluga River Unit Management, Gas Transfer Prices, and Third-Party Sales Gas Pricing; and Requiring Filings*, dated May 28,2020 (Order U-18-102(44)), at 60-67.

[2]Order U-18-102(44) at 67.

The Municipality surrendered its voting rights on the EOC effective October 27, 2020.[3] We issued Certificate of Public Convenience and Necessity No. 780 authorizing AHP to provide Wholesale Electric Service from the Eklutna Project on April 9, 2021.[4] On July 18, 2024, AHP filed a petition requesting that we acknowledge its acquisition of the expertise required to participate as a voting member of the EOC and reinstatement of those voting rights.[5]

Discussion

Request for Early Decision

AHP requests that we acknowledge that it has acquired the expertise required to participate as a voting member of the EOC within 30 days of the date it filed its Request. The only justification provided for this request is to "facilitate timely certainty regarding reinstatement of voting rights."[6]

AS 42.05.175(i) states in relevant part:

> In adjudicated docket matters that come before the commission under state law or federal law and are not subject to a timeline under federal law or (a) – (e) of this section, the commission shall issue a final order not later than 180 days after the filing of an initiating petition.

3 AAC 48.091(g) states:

> In a separate motion, a party may move for expedited consideration of its principal motion by requesting relief in less time than would normally be required for the commission to issue a decision. If the party files electronically under 3 AAC 48.095, the party shall also use the commission's website features to indicate that the filing includes a motion for expedited consideration, if the motion is required to be submitted with

[3] *Notice of ML&P's Surrender of Eklutna Operating Committee Voting Rights*, filed October 30, 2020, in Dockets U-18-102, U-19-020, U-19-021, and the Tariff filing designated as TA379-121.

[4] Certificate of Public Convenience and Necessity No. 780.

[5] *Notice and Request for Acknowledgments of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee,* filed July 18, 2024 (Request).

> (2) comply with other applicable provisions of this section;
>
> (3) include an affidavit or other evidence showing the facts that justify expedited consideration and the date by which a decision on the principal motion is needed;
>
> and (4) if the motion requests a decision before the usual time for response to the motion, include a certificate indicating when and how the opposing party was served with the motion, or, if the opposing party was not notified, what efforts were made to notify the opposing party and why it was not practical to notify the opposing party in a manner and at a time that a response could be made; in the certificate, the moving party shall indicate the position of the other parties on the request for expedited consideration if that position is known by the party.

With its Request, AHP is asking for a decision in this matter within less time than we are required to issue a final order under AS 42.05.175(i). AHP failed to file a motion for expedited consideration with its Request, or otherwise provide evidence showing facts that justify expedited consideration of its Request. Therefore, we deny that portion of AHP's Request seeking a decision in this matter within 30 days of the date the Request was filed. This denial is without prejudice to AHP's filing a motion for expedited consideration in this matter consistent with the requirements of 3 AAC 48.091(g).

Designation of Parties

The Eklutna Project is an integral part of the generation and transmission system providing electric public utility service to consumers in the Municipality of Anchorage and the Matanuska-Susitna Borough. Chugach and MEA are the certificated public utilities with responsibility for providing safe and reliable electric utility services to these consumers. Chugach and MEA are also part-owners of the Eklutna Project and members of the EOC who will have to work directly with AHP if we reinstate AHP's voting

Regulatory Commission of Alaska

Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

rights on the EOC. Additionally, we relied on the expertise of Chugach in determining that we needed to condition the Municipality's continued ownership of an interest in the Eklutna Project on surrender of its EOC voting rights.[7]

Therefore, we designate Chugach and MEA as parties, subject to filing a notice of non-participation, and anticipate being informed by their expertise on the question of whether AHP has acquired the expertise required to fully participate as a voting member of the EOC.

Participation by AG and Petitions to Intervene

We believe it is in the public interest for the AG to participate in this proceeding as a party. The chairman invites the AG to do so.[8]

We invite others with an interest in this proceeding to consider filing a petition for permission to intervene as a party after examining 3 AAC 48.110.

Decision Timeline

In adjudicated docket matters that come before the Commission under state or federal law and are not subject to a timeline under federal law or AS 42.05.175(a)–(e), we are required by AS 42.05.175(i) to issue a final decision not later than 180 days after the filing of an initiating petition. Therefore, we will issue a final order in this proceeding no later than January 14, 2025.

Prehearing Conference

We schedule a prehearing conference to establish a procedural schedule and address any other matters that may expedite the orderly conduct and disposition of

[7]Order U-18-102(44) at 65-67.

[8]AS 42.04.070(c).

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

this proceeding. We will hold a prehearing conference at 10:00 a.m. on Thursday, August 29, 2024, via Cisco WebEx video conferencing.[9]

Any representative, witness, or public person wishing to participate in the prehearing conference should email our law office assistants at LOA.RCA@alaska.gov to request an invitation by 12:00 p.m., Tuesday, August 27, 2024

Commission Panel

The chairman designates Commissioners John M. Espindola, Robert M. Pickett, and John C. Springsteen and himself as the Commission Panel and further designates Commissioner Springsteen as the Commission Docket Manager for this docket.[10]

Administrative Law Judge

Under AS 42.04.070(b), the chairman appoints Administrative Law Judge James L. Walker to facilitate conduct of the docket. Orders issued by the administrative law judge will be considered orders of the Commission for purposes of petitions for reconsideration.

ORDER

THE COMMISSION FURTHER ORDERS:

[9]If you are a person with a disability who may need a special accommodation, auxiliary aid or service, or alternative communication format in order to participate in the scheduled event, please contact Naomi Johnston at 1-907-276-6222, toll free at 1-800-390-2782, or TTY/Alaska Relay: 7-1-1 or 1-800-770-8973, or send your request by electronic mail to rca.mail@alaska.gov by Tuesday, August 27, 2024.

Teleconferencing can be arranged if requested in advance of the scheduled conference by contacting the Law Office Assistants at 907-276-6222 or LOA.RCA@alaska.gov. Please note that all visitors must sign in and out at the front desk when visiting the RCA.

[10]Under AS 42.04.080(a), the chairman designates a Commission Panel to hear, or, if a hearing is not required, to otherwise consider and decide docketed matters.

Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501
(907) 276-6222; TTY 1-800-770-8973

1. The request for a decision in 30 days by the Municipality of Anchorage d/b/a Anchorage Hydropower is denied without prejudice to filing a motion for expedited consideration in conformance with 3 AAC 48.091.

2. Chugach Electric Association, Inc. and Matanuska Electric Association, Inc. are designated as parties to this docket subject to filing a notice of non-participation by Tuesday, August 27, 2024, 2024.

3. By Tuesday, August 27, 2024, interested persons may file a petition to intervene in accordance with 3 AAC 48.110.

4. A prehearing conference is scheduled to convene at 10:00 a.m Thursday, August 29, 2024, via Cisco WebEx as discussed in the body of this order.

5. Commissioners Robert A. Doyle, John M. Espindola, Robert M. Pickett, and John C. Springsteen are designated as the Commission Panel for this docket.

6. Commissioner John C. Springsteen is designated as the Commission Docket Manager for this docket.

7. James L. Walker is appointed as the administrative law judge for this docket.

DATED AND EFFECTIVE at Anchorage, Alaska, this 30th day of July, 2024.

BY DIRECTION OF THE COMMISSION

Re: Docket Number U-~~19~~ 24SN-024

Dear Chairman Doyle:

The Native Village of Eklutna strongly endorses the return of the Anchorage Hydropower's voting rights on the Eklutna Operating Committee (EOC). We believe the Municipality of Anchorage has retained an individual with the required expertise to fully participate as a voting member of the EOC.

We have filed a statement with Alaska Hydropower at 255 East Fireweed Lane, Suite 200, Anchorage, Alaska, 99503 as well.

Thank you for the RCA's consideration.

Sincerely,

Aaron Leggett

Subject: Order U-24-024(2) (Anchorage Hydropower)

BY ORDER OF ADMINISTRATIVE LAW JUDGE JAMES L. WALKER

Order U-24-024(2)

ORDER VACATING AND RESCHEDULING PREHEARING CONFERENCE

By Order U-24-024(1), a prehearing conference was scheduled in this proceeding for 10:00 a.m. on August 29, 2024 via Cisco WebEx video conferencing. Counsel for the Municipality of Anchorage d/b/a Anchorage Hydropower (AHP) requested that this prehearing conference be rescheduled by one day to avoid conflict with a Federal Bar Association conference scheduled for August 29, 2024. I reviewed the Commission's calendar, conferred with the Commission Panel, and determined that 2:00 p.m. on August 30, 2024, was available for the prehearing conference in this proceeding. I forwarded AHP's request to counsel for AHP, the Office of the Attorney General, Regulatory Affairs and Public Advocacy Section (RAPA), and designated parties Chugach Electric Association, Inc. (Chugach) and Matanuska Electric Association, Inc. (MEA), and inquired if it would be acceptable to reschedule the prehearing conference to 2:00 p.m. on August 30, 2024. Counsel for AHP responded that holding the prehearing conference at 2:00 p.m. on August 30, 2024, was acceptable to AHP. Counsel for RAPA responded that holding the prehearing conference at 2:00 p.m. on August 30, 2024, was acceptable to RAPA so long as the conference was concluded by 3:00 p.m. Counsel for Chugach and MEA have

not responded.

In the absence of objection and to accommodate the rescheduling request of AHP I vacate the prehearing conference scheduled in this proceeding for 10:00 a.m. on August 29, 2024, and reschedule that prehearing conference for 2:00 p.m. on August 30, 2024. The purpose of this prehearing conference will be to establish a procedural schedule and address any other matters that may expedite the orderly conduct and disposition of this proceeding. This prehearing conference will be held via Cisco WebEx video conferencing. If you are a person with a disability who may need a special accommodation, auxiliary aid or service, or alternative communication format in order to participate in the scheduled event, please contact Naomi Johnston at 1-907-276-6222, toll free at 1-800- 390-2782, or TTY/Alaska Relay: 7-1-1 or 1-800-770-8973, or send your request by electronic mail to rca.mail@alaska.gov by Tuesday, August 27, 2024. Participation in the teleconference can be arranged by request in advance of the scheduled conference by contacting the Law Office Assistants at 907-276-6222 or LOA.RCA@alaska.gov. Please note that all visitors must sign in and out at the front desk when visiting the RCA.

I electronically notified the following:

RE: Final Proposed Fish and Wildlife Program, Eklutna Hydro Project

Dear Parties:

On behalf of Governor Dunleavy, thank you for your recent submissions concerning the Final Proposed Fish and Wildlife Program for the Eklutna Hydro Project in accordance with the 1991 Fish and Wildlife Agreement (Agreement). The Governor is cognizant of the importance of this issue to all involved. Pursuant to his responsibilities under the Agreement – to review the final proposed program and attempt to reconcile differences – the Governor wants to obtain additional

information from the parties to the Agreement, and the Native Village of Eklutna, concerning the Owners' final proposed program and all subsequently received comments.

With the assistance of the Alaska Department of Law, I will conduct a meeting on the Governor's behalf where each of you can present your position, respond to questions about the submissions, and make arguments on various legal issues that have arisen in the submissions. Although your participation is not mandatory, your involvement will certainly assist the Governor in rendering his decision as required by the Agreement.

Accordingly, the meeting is scheduled for September 9, 2024, at 1 P.M., in the North Conference Room on the 17th floor of the Atwood Building. This meeting is not open to the public, and due to space limitations, each party will be permitted to bring two representatives, including attorneys, that may participate concerning the legal issues outlined below. Each party will be provided 15 minutes to present their position on the program and legal issues. For this purpose, the Owners' group will be allotted two 15 minute slots divided as follows: a combined 15 minutes for Chugach Electric Association, Inc. (CEA) and Matanuska Electric Association, Inc. (MEA); and 15 minutes for the Municipality of Anchorage (MOA). Additionally, the Fish and Wildlife Service, the National Marine Fisheries Service, the Alaska Energy Authority, and the Native Village of Eklutna will each be provided with 15 minutes for a presentation. Your attendance is encouraged, even if your party chooses not to provide a presentation.

To adequately prepare for the meeting, I request each of the parties, and the Native Village of Eklutna, provide a legal brief (Brief) to share your perspective on the following issues:

1. The Governor is required to give equal consideration to eight factors identified in Section 5 of the Agreement. Please identify how the proposed final program or an alternate program promoted by any other parties, or the Native Village of Eklutna, does or does not meet those eight factors.
2. Does the Agreement require complete connection between the river and the lake to support fish passage?
3. Is MOA Assembly approval required for approval of the Owners' program?
4. What effect, if any, did the MOA's lack of a vote on the Owners' program have on the process set forth in the Agreement?
5. Does the Governor have the authority under the Agreement to impose a two-year extension on the process as requested by the MOA?
6. Whether the Owners and Anchorage Water and Wastewater Utility ("AWWU") have reached a final and binding agreement concerning the use of AWWU infrastructure as outlined in the Owners' program. If a final agreement has not been reached, what effect will that have on the Owners' ability to implement the final proposed program?

The Briefs shall be limited to 25 pages per party. Similar to above, for purposes of the Briefs CEA and MEA are considered one party and should submit a joint Brief. Please submit Briefs via email to rachel.bylsma@alaska.gov, with a copy to all parties, and the Native Village of Eklutna, by close of business on September 4, 2024. Parties shall not submit responses to the submission of other parties. If a party does not plan to submit a Brief, please let me know in advance of the deadline. Your attendance and participation is encouraged, even if your party

chooses not to submit a Brief. For questions regarding the meeting please contact Gene Hickey, Senior Assistant Attorney General, at 907-465-6713 or via email at gene.hickey@alaska.gov. Please RSVP by August 29, 2024, and provide the names of your attendees to Juliana Soane at 907-269-7450 or via email at juliana.soane@alaska.gov.

The Governor appreciates the efforts of all involved and we look forward to the meeting on September 9, 2024.

Sincerely,

Rachel Bylsma
Deputy Chief of Staff

RECEIVED
By the Regulatory Commission of Alaska on Aug 15, 2024

STATE OF ALASKA

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners:

Robert A. Doyle, Chair
John M. Espindola
Robert M. Pickett
John C. Springsteen

In the Matter of the Petition Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee	U-24-024

MUNICIPALITY OF ANCHORAGE D/B/A ANCHORAGE HYDROPOWER'S, MOTION FOR EXPEDITED CONSIDERATION OF REQUEST FOR ACKNOWLEDGMENT OF ACQUISITION OF EXPERTISE REQUIRED TO PARTICIPATE AS A VOTING MEMBER OF THE EKLUTNA OPERATING COMMITTEE

Pursuant to 3 AAC 48.091(g), the Municipality of Anchorage ("MOA") d/b/a Anchorage Hydropower ("AHP") respectfully moves for expedited consideration of its July 18, 2024, Request for Acknowledgment of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee ("Request for Acknowledgment"). For the reasons stated below, AHP requests that the Regulatory Commission of Alaska ("Commission") require written briefing on the Request for Acknowledgment, conduct a hearing for Commission questions if necessary, and issue a decision on AHP's Request for Acknowledgment by no later than **October 2, 2024**. This motion is supported by the August 15, 2024, Affidavit of Mark A. Corsentino, P.E.,[1] and Exhibits 1-6.

[1] "Corsentino Affidavit."

KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

Counsel for AHP consulted with counsel for Chugach Electric Association, Inc. ("Chugach"), Matanuska Electric Association, Inc. ("MEA"), and the Attorney General, Regulatory Affairs & Public Advocacy Section ("RAPA"). Chugach did not reply to AHP by the time of this filing. Counsel for MEA represented that MEA opposes AHP's Motion for Expedited Consideration. RAPA does not oppose expedited consideration or AHP's proposed schedule.

I. Proposed Schedule

AHP proposes the following schedule in this matter to provide the parties and the Commission time to consider AHP's Request for Acknowledgment and for the Commission to issue a decision no later than October 2, 2024:

August 30, 2024: Prehearing Conference (already scheduled)

September 11, 2024: Responses to AHP's Request for Acknowledgment due

September 18, 2024: AHP reply to responses due

September 23, 2024: Parties available for Commission questions as required

October 2, 2024: Issuance of Order regarding Request for Acknowledgment

AHP proposes the following schedule for responses to this Motion for Expedited Consideration, which will provide the other parties adequate time to prepare their responses to AHP's Request for Acknowledgment if this Motion for Expedited Consideration is granted:

August 19, 2024 Responses to Motion for Expedited Consideration due

August 20, 2024 AHP Reply for the Motion for Expedited Consideration due

August 23, 2024 Issuance of Decision on Motion for Expedited Consideration

A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

II. Discussion

On July 18, 2024, AHP requested that the Commission provide written acknowledgment that AHP had acquired the expertise required to participate as a voting member of the Eklutna Operating Committee ("EOC"). AHP requested that the Commission issue acknowledgment within 30 days, in order to facilitate reasonably timely certainty regarding reinstatement of voting rights.[2] The Commission denied the request for a decision in 30 days, stating that a final order would be issued no later than January 14, 2025, pursuant to AS 42.05.175(i).[3] The Commission noted that the denial of the request for a decision in 30 days was, "without prejudice to AHP's filing a motion for expedited consideration in this matter consistent with the requirements of 3 AAC 48.091(g)."[4]

AHP moves for expedited consideration of this matter so that AHP can begin to meaningfully participate on the EOC—in particular, with any planning and budgeting decisions that will commence as a result of the Governor's establishment of a final Fish and Wildlife Program ("Final Program"), pursuant to the August 8, 1991, "Fish and Wildlife Agreement Snettisham and Eklutna Projects" ("1991 Fish and Wildlife Agreement"), by October 2, 2024.[5]

---

[2] *Id.* at 1.

[3] Order No. 1, at 3-4.

[4] *Id.* at 4.

[5] Corsentino Aff. ¶ 3; Exhibit 1, 1991 Fish and Wildlife Agreement (Section 7). Pursuant to Section 7 of the August 8, 1991, "Fish and Wildlife Agreement Snettisham and Eklutna Projects," ("1991 Fish and Wildlife Agreement"), the "consultation process leading to the [Fish and Wildlife Program] shall **be initiated no later than 25 years** after the Transaction Date," which is **October 2, 2022,** because the **Transaction Date was October 2, 1997**. *Id.* (emphasis added). The Study Plans referenced in the 1991 Fish and Wildlife Agreement "shall include a **schedule for the**

LAW OFFICES OF

(907) 277-1604

Therefore, AHP respectfully requests that the Commission issue a final decision regarding AHP's Request for Acknowledgment no later than October 2, 2024.

A. Expedited consideration is required because the EOC will soon be making significant decisions about operations, maintenance, and budgeting related to the issuance of the Final Program, regardless of how the Governor acts on the Proposed Program.

Once the Governor issues a Final Program, implementation of the program by the Eklutna Project owner utilities (AHP, Chugach, and MEA) is scheduled to begin no later than October 2, 2027.[6] The EOC will therefore need to begin making decisions related to operation, maintenance, and budgeting for the Final Program.[7] The Governor might choose to adopt the Proposed Final Fish & Wildlife Program submitted to Governor Dunleavy on April 25, 2024

---

consultation, comments, and decisionmaking, called for in [the 1991 Fish and Wildlife Agreement], which shall be adopted by the parties in consultation with the Governor." *Id.* (emphasis added). That **schedule** "shall call for **implementation** of all provisions of the Fish and Wildlife Program [(Final Program")] by the Eklutna Purchasers **to begin** no later than **30 years** after the Transaction Date," which is **October 2, 2027**. *Id.* (emphasis added). That schedule also shall call for the Fish Final Program "to be **completed** no later than **35 years** after the Transaction Date," which is **October 2, 2032**. *Id.* (emphasis added). That schedule also "shall call for the issuance of the [Final Program] by the Governor at least **three years prior** to the **commencement** of the period for implementation," which is **October 2, 2024**. *Id.* (emphasis added). A copy of the Fish and Wildlife Agreement and other documents relevant to the process under the Fish and Wildlife Agreement can be found at https://eklutnahydro.com/background/ and https://eklutnahydro.com.

("Proposed Program"),[8] adopt an alternative idea submitted to him,[9] or issue a Final Program that contains some, or none, of the proposed ideas before him. Regardless of how the Governor acts on the Proposed Program, EOC decisions will need to be made promptly.[10] For instance, the Proposed Program contemplates a one-time payment of $234,000 to Chugach State Park for lakeside trail repairs will occur within 120 days of the Governor's approval or by January 31, 2025 (whichever comes later).[11] It also contemplates commencing a detailed feasibility study of installing a fixed wheel gate within three years of the Governor's issuance of a Final Program.[12]

Further, whether the Final Program is the same as, or different from, the Proposed Program, the EOC will need to commence planning and decisions to implement the Final Program. For instance, in June 21, 2024, public comments to the Governor, the Native Village of Eklutna ("NVE") proposed an alternative final program ("NVE Proposal") that would involve construction of a pump station that takes water from the bottom of Eklutna Lake, discharging it in "the glacial moraine area upstream of the dam," then releasing the water "downstream through the existing dam outlet gate instead of the [Anchorage Water and Wastewater Utility ("AWWU")] Portal Valve

[8] Corsentino Aff. ¶ 7; Exhibit 2, "Proposed Final Fish and Wildlife Program," April 25, 2024. The full submission, including a cover letter to the Governor, explanatory statement, supporting information document, and attachments can be found at https://eklutnahydro.com/documents/#April2024Final|1. Corsentino Aff. ¶ 8.

[9] For example, the Native Village of Eklutna ("NVE") proposed an alternative final program in its June 21, 2024, comments to the Governor. Corsentino Aff. ¶ 8; Exhibit 3, June 21, 2024, Native Village of Eklutna Comments on Proposed Final Program ("NVE Comments").

[10] Corsentino Aff. ¶ 5.

[11] Exhibit 2 at 16.

ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

facility."[13] NVE noted in its public comments that under its proposal, "the Eklutna Project Owners would have two years from [the Governor's] decision to design and permit [its proposed "Eklutna River Release Facility] (no later than Oct. 2, 2026)."[14] In addition, the MOA has supported use of "two years of the three-year implementation period to identify an alternative infrastructure and engineering solution . . ." as set out in Anchorage Assembly Resolution 2024-218(S) and Mayor LaFrance's July 9, 2024, letter to Governor Dunleavy.[15] If one of these alternative proposals were adopted by the Governor, the EOC would need topromptly begin making decisions related to operation, maintenance, and budgeting to implement the proposal according to schedule.

The EOC typically prepares and discusses the next year's (e.g., 2025) operating and capital budgets for the Eklutna Project starting in September/October, and they are voted on by the end of the year.[16] Therefore, regardless of what Final Program is issued by the Governor, the need for the EOC to expeditiously commence decision-making to implement any such program (including 2025 costs) will be certain. AHP, as a majority interest owner of the Project, should be able to actively engage and vote on such important financial commitments.[17]

Additionally, any Final Program will likely require there to be significant coordination and consultation with AWWU. For instance, the Proposed Program includes

[13] Exhibit 3, June 21, 2024, NVE Comments at 5.

[14] *Id.*

[15] Corsentino Aff. ¶ 9; Exhibit 4, MOA Comments dated July 22, 2024, at 4 (AR 2024-28(S), As Amended); *Id.* at 7-8 (AM 557-2024(A)).

construction of a new valve and release structure adjacent to the existing AWWU portal valve.[18] As noted in the Proposed Program, AWWU approval would need to be obtained on all final designs, and resolution of water transportation services, compensation, and water rights issues will need to be resolved in order to use AWWU infrastructure.[19] In order to avoid delays, discussions with AWWU would need to commence promptly if the Proposed Program were adopted. This potential for prompt discussions to commence with AWWU is likely regardless of the nature of the Final Program.[20]

AHP previously attached to its Request for Acknowledgment a Memorandum of Understanding between AWWU and AHP ("Memorandum") that establishes that in any instance of conflicting interests between AHP and AWWU, Mr. Corsentino will act solely as director of AHP, and AWWU's interests will be represented by the AWWU Assistant General Manager.[21] However, if the Commission determines in the course of this matter that any additional procedures are needed to clarify the independence of AHP's EOC representative, those procedures should be in place *before* decisions are made by the EOC regarding whatever program the Governor issues, as virtually any potential program will require early coordination with AWWU. This will ensure that Mr. Corsentino will be able to serve as AHP's EOC representative in full compliance with any requirements from the Commission.

[18] Exhibit 2, Proposed Program at 9.

[19] *Id.* at 10.

B. Expedited consideration is required because AHP will be responsible for a portion of the costs of decisions that the EOC will soon make regarding the Final Program.

Expedited consideration is also required because AHP will be responsible for a portion of the costs resulting from EOC decisions about operations, maintenance, and capital investments for any Final Program issued by the Governor. AHP, even now, without voting representation on the EOC, is responsible for 19.05% of Eklutna Project operations, maintenance, capital, and environmental compliance costs ("Eklutna Project Costs").[22] AHP's 19.05% share of Eklutna Project Costs comprises the portion of AHP's share of project output that it sells to MEA through the MEA Purchase Power Agreement ("PPA").[23] Expedited consideration is necessary so that AHP can participate in cost decisions that will occur following issuance of a Final Program by the Governor. This is true even if, as contemplated for the Proposed Program, AHP's share of Eklutna Project Costs is expected to be less than its revenues as a result of the Chugach and MEA PPAs.[24] First, final costs could exceed expected costs, whatever program is adopted as final.

[22] Corsentino Aff. ¶ 11.

[23] Order No. 39 at 76; Appendix H to Order No. 39, MEA Purchase Power Agreement ("MEA PPA" in Order No. 39) at 5. Pursuant to the Eklutna PPA, Chugach receives 64.29% of AHP's share of output, and also has "the obligation to pay a proportionate share of [AHP's] Eklutna Project costs, including capital and Fish and Wildlife Agreement costs, for the 35-year term of the Eklutna PPA." Order No. 39 at 73. Thus, Chugach is responsible for 64.29% of Eklutna Project Costs (costs related to the 64.29% of AHP's 53.33% ownership interest share of output which Chugach receives, as well as costs related to Chugach's own 33% project ownership interest). Finally, MEA is responsible for 16.67% of Eklutna Project Costs (MEA's ownership interest). *Id.* at 60.

[24] *See, e.g.,* Exhibit 5, Response to Comments on Proposed Final Program, July 24, 2024 at 27; Corsentino Aff. ¶ 10.

Second, even if AHP's costs do not exceed PPA revenues, expedited consideration will still ensure that AHP can be part of the decision-making for these important cost decisions, providing input that could assist the other project owners and provide AHP with a voice in capital and operational cost decisions.

Further, depending on what program the Governor adopts as the Final Fish and Wildlife Program, AHP's costs—even only in the short term—could potentially exceed its revenues. Based on AHP's 2024 approved budget,[25] there are scenarios that could be selected by the Governor in which the annualized costs of AHP's share of any Final Program costs would exceed future revenues, even with the $3,000,000 fund that AHP created to support Eklutna Project capital expenditures.[26]

AHP cannot increase Eklutna Project revenues to address increased costs resulting from any Final Program. Through the MEA PPA, AHP receives revenues based on MEA's Avoided Cost Rate.[27] Pursuant to the Eklutna PPA with Chugach, AHP receives payments yearly from Chugach, pursuant to a schedule set out in the PPA.[28] Because the payments from the PPAs with MEA and Chugach are not based in any part on AHP's actually incurred costs, the costs of

ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

any Final Program could exceed PPA revenues, potentially impacting AHP and the MOA budget.[29] Without a vote on the EOC, AHP has no control over these costs, which could impact whether its PPAs remain profitable. Expedited consideration will ensure that AHP's Utility Director will timely participate in implementation of the Final Fish and Wildlife Program and decision-making regarding any such costs.

C. A Commission decision by October 2, 2024, will not prejudice the other parties.

Issuance of a decision by October 2, 2024, will not prejudice the other parties. The other parties and the public will have ample time to provide input through the public comment period, which ends August 26, 2024, and through the briefing schedule for parties proposed in this Motion for Expedited Consideration. If the Commission issues a decision on AHP's Request for Acknowledgment in this matter by October 2, 2024, AHP will have a voice on the EOC regarding budgeting and implementation of the Final Fish and Wildlife Program. Its participation and input will not only benefit AHP and the MOA, but also the other owners of the Eklutna Project and the public.

The only issue in this docket is a straightforward one—whether AHP "has shown to [the Commission's] satisfaction that [it] has acquired the expertise required to fully participate as a voting member of the EOC."[30] AHP's proposed expedited schedule provides ample time for parties to brief the issue after the conclusion of the public comment period, and for AHP and the

other parties to be available for any questions the Commission might have on the topic before making its decision.

III. Conclusion

For the reasons discussed above, AHP respectfully requests that the Commission grant AHP's Motion for Expedited Consideration, and issue a decision on the Request for Acknowledgment by October 2, 2024, pursuant to the schedule proposed above. AHP suggests that any additional scheduling issues can be discussed at the August 30, 2024, prehearing conference.

RESPECTFULLY SUBMITTED this 15th day of August, 2024, at Anchorage, Alaska.

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners: Robert A. Doyle, Chair
John M. Espindola
Robert M. Pickett
John C. Springsteen

In the Matter of the Petition Filed by the Municipality of Anchorage d/b/a Anchorage Hydropower for Acknowledgment of Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee	U-24-024

AFFIDAVIT OF MARK A. CORSENTINO, P.E.

STATE OF ALASKA)
) **SS:**
)

Mark A. Corsentino, P.E., being first duly sworn, deposes and states:

1. I have personal knowledge of the facts set forth in this affidavit.

2. I am the Utility Director of Anchorage Hydropower ("AHP"). I previously served as a non-voting member of the Eklutna Operating Committee ("EOC") in a non-voting capacity for AHP from approximately January 2022 until September 2023. I am familiar with utility decision-making processes in general, and the EOC decision-making process in particular.

3. Pursuant to Section 7 of the August 8, 1991, "Fish and Wildlife Agreement Snettisham and Eklutna Projects," ("1991 Fish and Wildlife Agreement"), the "consultation process leading to the [Fish and Wildlife Program] shall **be initiated no later than 25 years** after the Transaction Date," which is **October 2, 2022,** because the **Transaction**

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS

ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

Date was October 2, 1997. The Study Plans referenced in the 1991 Fish and Wildlife Agreement "shall include a **schedule for the consultation, comments, and decisionmaking**, called for in [the 1991 Fish and Wildlife Agreement], which shall be adopted by the parties in consultation with the Governor." That **schedule** "shall call for **implementation** of all provisions of the Fish and Wildlife Program [(Final Program")] by the Eklutna Purchasers **to begin** no later than **30 years** after the Transaction Date," which is **October 2, 2027**. That schedule also shall call for the Fish Final Program "to be **completed** no later than **35 years** after the Transaction Date," which is **October 2, 2032**. That schedule also "shall call for the issuance of the [Final Program] by the Governor at least **three years prior** to the **commencement** of the period for implementation," which is **October 2, 2024**. **Exhibit 1** is a true and accurate copy of the 1991 Fish and Wildlife Agreement.

4. In addition to the above, the EOC typically prepares and discusses the 2025 operating and capital budgets for the Eklutna Project starting in September/October, and they are voted on by the end of the year. AHP, as a majority interest owner of the Project should be able to actively engage and vote on such important financial commitments.

5. Once a Final Program is issued by October 2, 2024, the EOC will need to start making decisions regarding engineering, planning, budgeting, funding, and legal issues and challenges for implementation of the Final Program, which must begin by October 2, 2027. Many of these tasks will require long-lead planning, permitting, evaluation, etc., and binding votes by the EOC on those matters.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS
A PROFESSIONAL CORPORATION
255 E. FIREWEED LANE, SUITE 200
ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

6. As part of EOC decision-making to implement any potential Final Program, consultation and discussion with Anchorage Water and Wastewater Utility ("AWWU") will be necessary, and will need to commence promptly.

7. **Exhibit 2** is a true and accurate copy of the "Proposed Final Fish and Wildlife Program," April 25, 2024 ("Proposed Program"). The full submission, including a cover letter to the Governor, explanatory statement, supporting information document, and attachments, can be found at: https://eklutnahydro.com/documents/#April2024Final|1.

8. **Exhibit 3** is a true and correct copy of the June 21, 2024 Native Village of Eklutna Comments on Proposed Final Program ("NVE Comments").

9. **Exhibit 4** is a true and correct copy of the Municipality of Anchorage ("MOA") Comments dated July 22, 2024.

10. **Exhibit 5** is a true and correct copy of the July 24, 2024, "Response to Comments on Proposed Final Program."

11. AHP is responsible for 19.05% of Eklutna Project operations, maintenance, capital, and environmental compliance costs ("Eklutna Project Costs"). Through the Matanuska Electric Association Purchase Power Agreement ("MEA PPA"), AHP receives revenues based on MEA Avoided Cost Rate.[1] Pursuant to the Eklutna Purchase Power Agreement ("Eklutna PPA") with Chugach Electric Association, Inc. ("Chugach"), AHP receives payments yearly from Chugach pursuant to a schedule set out in Exhibit

[1] Order No. U-18-102(44)/U-19-020(39)/U-19-021(39) (May 28, 2020) at 62 ("Order No. 39"), Appendix H (MEA PPA) at 45.

LAW OFFICES OF
KEMPPEL, HUFFMAN AND ELLIS

ANCHORAGE, ALASKA 99503-2025
(907) 277-1604

D to the PPA.[2] Because the revenues from the PPAs with MEA and Chugach are not based on AHP's costs, AHP's portion of costs for any Final Program could potentially exceed PPA revenues.

12. **Exhibit 6** is a true and correct copy of the "2024 Approved Utility/Enterprise Budget for Anchorage Hydropower." Based on AHP's 2024 approved budget, there are scenarios that could be selected by the Governor in which the annualized costs of AHP's share of any Final Program could exceed future annual revenues, even with the $3,000,000 fund which AHP created to support Eklutna Project capital expenditures. In other words, if AHP's expenses exceed its revenues, MOA could be responsible for the difference.

13. This completes my affidavit.

Dated this 15th day of August, 2024 at Anchorage, Alaska.

Mark A. Corsentino, P.E.

AGREEMENT

AGREEMENT BETWEEN
THE MUNICIPALITY OF ANCHORAGE,
DBA ANCHORAGE MUNICIPAL LIGHT AND POWER,
CHUGACH ELECTRIC ASSOCIATION, INC.,
MATANUSKA ELECTRIC ASSOCIATION, INC.,
U.S. FISH AND WILDLIFE SERVICE,
NATIONAL MARINE FISHERIES SERVICE,
ALASKA ENERGY AUTHORITY,
AND THE
STATE OF ALASKA,
RELATIVE TO THE EKLUTNA AND SNETTISHAM
HYDROELECTRIC PROJECTS

This Agreement is entered into on August 7, 1991, between The Municipality of Anchorage, dba, Anchorage Municipal Light and Power, Chugach Electric Association, Inc., and Matanuska Electric Association, Inc. (hereinafter collectively "Eklutna Purchasers"), the United States Fish and Wildlife Service (hereinafter "USFWS"), the National Marine Fisheries Service (hereinafter "NMFS"), the Alaska Energy Authority (hereinafter "AEA") and the State of Alaska (hereinafter "the State"), regarding protection, mitigation of damages to, and enhancement of fish and wildlife (including related spawning grounds and habitat) affected by hydroelectric development of the Eklutna and Snettisham Projects. With respect to the implementation provisions called for in this Agreement, the Eklutna Purchasers will be responsible for the consultation, study and implementation provisions applicable to the Eklutna Project and AEA shall be responsible for the consultation, study and implementation provisions applicable to the Snettisham Project.

WITNESSETH THAT:

WHEREAS, subject to the approval of Congress, the Eklutna and Snettisham Projects will be transferred from the Federal Alaska Power Administration to the Eklutna Purchasers and AEA (collectively, "the Purchasers") without the necessity of their having to obtain a Federal Energy Regulatory Commission (FERC) License for project operation; and

WHEREAS, the Eklutna and Snettisham hydroelectric developments may have resulted in a yet to be quantified impact to fish and wildlife resources; and

WHEREAS, concerns have been expressed that without FERC licensing, there is no opportunity to determine the extent of that fish and wildlife impact, develop measures to protect, mitigate

damages to, and enhance fish and wildlife (including related spawning grounds and habitat), and implement fish and wildlife measures found to be in the public interest.

NOW THEREFORE, the parties agree as follows:

1. **FERC Licensing.**

NMFS, USFWS and the State agree that the following mechanism to develop and implement measures to protect, mitigate damages to, and enhance fish and wildlife (including related spawning grounds and habitat) obviate the need for the Eklutna Purchasers and AEA to obtain FERC licenses.

2. **Study Plan.**

The Purchasers agree to fund studies to examine, and quantify if possible, the impacts to fish and wildlife from the Eklutna and Snettisham Projects. The studies will also examine and develop proposals for the protection, mitigation, and enhancement of fish and wildlife affected by such hydroelectric development. This examination shall consider the impact of fish and wildlife measures on electric rate payers, municipal water utilities, recreational users and adjacent land use, as well as available means to mitigate these impacts.

3. **Carrying Out The Study Plan.**

Study Plans shall be developed by the Purchasers in consultation with the USFWS, NMFS, the Alaska Department of Fish and Game, the Alaska Department of Environmental Conservation and the Alaska Department of Natural Resources (the "State Resource Management Agencies"), or their successors to aid in the formulation of the Program called for in this Agreement. Prior to implementation, the parties to this Agreement shall review the plans and concur with their scope of work.

The Purchasers shall conduct the studies and prepare the evaluations called for in the plans, seeking input from the USFWS, NMFS, the State Resource Management Agencies and other interested parties as the studies progress. The USFWS, NMFS, and State Resource Management Agencies shall have an opportunity to comment on draft study reports, and their comments and a response to their comments shall be included in the final study reports. All study plans, data, reports and comments will be made available to the parties and, upon request, to the public.

4. **Review of Findings.**

After final study reports are prepared, the Purchasers shall prepare a draft Summary of Study Results and prepare a draft Fish and Wildlife Program. The draft Fish and Wildlife Program shall consist of the measures recommended by the Purchasers for the protection, mitigation of damages to, and enhancement of fish and wildlife (including related spawning grounds and habitat) and set a tentative schedule for their implementation. The Purchasers shall provide copies of the draft Summary and draft Fish and Wildlife Program to the USFWS, NMFS, and State Resource Management Agencies for comments or recommendations. If USFWS, NMFS, or the State Resource Management Agencies' comments or recommendations differ from those of the Purchasers, the Purchasers will attempt to resolve such differences giving due weight to the recommendations, expertise, and statutory responsibilities of USFWS, NMFS, and the State Resource Management Agencies.

Once comments and recommendations have been received, the Purchasers shall hold at least one public meeting each in Anchorage and the Matanuska Valley (with respect to the Eklutna Project) and in Juneau (with respect to the Snettisham Project) to receive public comment on the draft Summary, the draft Fish and Wildlife Program, and the comments and recommendations of the USFWS, NMFS, and the State Resource Management Agencies. At least thirty days prior to the proposed public meetings, copies of the draft Fish and Wildlife Program, reports and recommendations will be distributed to representative public libraries in the Anchorage and Matanuska Valley areas (in the case of the Eklutna Project) and in the Juneau area (in the case of the Snettisham Project). Public notice will also be posted in at least two newspapers serving the Anchorage and Matanuska Valley areas (for Eklutna) and the Juneau area (for Snettisham). The public notice shall specify meeting places, times and dates; where studies, reports and recommendations may be obtained for review; and where written comments may be sent. The Purchasers will provide copies of the draft Summary, draft Fish and Wildlife Program, and the comments and recommendations of the USFWS, NMFS, and State to interested members of the public at no charge.

5. **Public Interest Determination.**

The Purchasers shall compile all comments and testimony received; prepare a summary and analysis of them; develop a Proposed Final Fish and Wildlife Program to protect, mitigate, and enhance fish and wildlife resources; and prepare an explanatory statement describing the basis for its Proposed Final Fish and Wildlife Program. All comments, testimony, summary, and analysis materials and the Proposed Final Fish and Wildlife Program shall be provided to the parties to this Agreement and to the Governor

of Alaska. The parties shall have 60 days to submit written comments on the proposed Fish and Wildlife Program, and any alternative recommendations for the protection, mitigation, and enhancement of fish and wildlife resources, to the Governor. The Purchasers shall have 30 days to submit written reply comments to the Governor.

The Governor shall review the Proposed Final Fish and Wildlife Program, the comments, testimony, summary and analysis materials, and any alternative recommendations for the protection, mitigation, and enhancement of fish and wildlife resources. The Governor shall attempt to reconcile any differences between the parties, giving due weight to the recommendations, expertise, and statutory responsibilities of USFWS, NMFS, the State Resource Management Agencies and the Purchasers. In order to ensure that Eklutna and Snettisham are best adapted for power generation and other beneficial public uses, the Governor shall give equal consideration to the purposes of efficient and economical power production, energy conservation, the protection, mitigation of damage to, and enhancement of fish and wildlife (including related spawning grounds and habitat), the protection of recreation opportunities, municipal water supplies, the preservation of other aspects of environmental quality, other beneficial public uses, and requirements of State law. Based on his/her review and consideration, the Governor shall establish a final Fish and Wildlife Program that adequately and equitably protects, mitigates damage to, and enhances fish and wildlife resources (including affected spawning grounds and habitat) affected by the Eklutna Project and the Snettisham Project.

6. **Implementation**.

The Purchasers shall implement the Fish and Wildlife Program established by the Governor, subject to their right to judicial review as provided in Section 9 hereof. However, the Purchasers will implement all provisions of the Program that do not require major capital expenditures pending judicial review, unless otherwise agreed among the Parties or unless a stay is granted by the Court.

7. **Schedule**.

The consultation process leading to the Programs shall be initiated no later than 25 years after the Transaction Date specified in the respective Eklutna and Snettisham Agreements. The Study Plans shall include a schedule for the consultation, comment, and decision making, called for in this Agreement, which shall be adopted by the parties in consultation with the Governor. The schedule shall call for implementation of all provisions of the Fish and Wildlife Program by the Eklutna Purchasers to begin no

later than 30 years after the Transaction Date, and to be completed no later than 35 years after the Transaction Date. The schedule shall call for implementation of all provisions of the Fish and Wildlife Program by AEA (Snettisham) to begin no later than 35 years after the Transaction Date, and to be completed no later than 40 years after the Transaction Date. The schedules shall call for the issuance of the Fish and Wildlife Program by the Governor at least three years prior to the commencement of the period for implementation.

The Purchasers shall repeat the process called for in Sections 2 through 6 of this Agreement on a recurring basis every 35 years, beginning within 25 years of the time implementation of the Fish and Wildlife Program has been completed for the prior consultation process. In addition, prior to undertaking any major structural or operational modification substantially affecting water usage or fish and wildlife at the projects, the Purchasers shall follow the process called for in Sections 2 through 6 of this Agreement. Compliance with the terms of the Agreement for Public Water Supply and Energy Generation from Eklutna Lake, Alaska, entered into between the Alaska Power Administration and the Municipality of Anchorage on February 17, 1984, as amended by a Supplemental Agreement dated August 2, 1988, shall not be construed to be a major structural or operational modification. However, the Eklutna Purchasers will discuss major structural or operational changes from current operations with NMFS and USFWS and will consider any recommendations they have for fisheries mitigation related to such changes.

8. **Dam Construction, Modification, Removal or Abandonment.**

The Purchasers agree to comply with 11 AAC 93.151-.201 with respect to safety inspections, new construction or modifications to existing structures, removal and/or abandonment of all or part of the project.

9. **Enforcement of Fish and Wildlife Program and Agreement.**

The provisions of this Agreement, including the decisions of the Governor and the provisions of the Fish and Wildlife Program, shall be reviewable and enforceable in the United States District Court for the District of Alaska and the Court may order specific performance thereof.

At least thirty days prior to seeking review or enforcement in the United States District Court for the District of Alaska, a party shall send written notice of its concerns to all parties and hold a meeting to attempt informal resolution of its concerns. During the period of informal resolution, any statute of limitations shall toll.

10. Authority of Parties.

Each party to this Agreement warrants that it has the legal authority to sign this Agreement and be fully bound by its terms, subject to any administrative or regulatory approval, if required. This Agreement shall be binding upon and inure to the benefit of the parties and their successors and assigns.

11. Term of Agreement.

This Agreement shall be effective, as to each project, upon the Transaction Date specified in the respective Purchase Agreement and shall remain in full force and effect so long as that project remains in operation. The Agreement shall terminate, as to either project, if that Project becomes subject to the provisions of the Federal Power Act.

12. Severability.

If any section, paragraph, clause or provision of this Agreement or any agreement referred to in this Agreement shall be finally adjudicated by a court of competent jurisdiction or administrative agency to be invalid or unenforceable as to either project, the Agreement shall nonetheless remain in full force and effect as to the other project.

13. Cooperation With Studies.

The Parties agree that they will cooperate with one another in conducting studies pertaining to fish and wildlife other than those called for in this Agreement by:

a. Notifying and consulting with the other parties before beginning a new fish and wildlife study,

b. Providing each other with data on flows, fish populations, and other data already in their possession,

c. Having the option of funding fish and wildlife studies before the process called for in Sections 2 and 3 of this Agreement would otherwise require, whether such studies are conducted by the parties themselves, or by third parties.

IN WITNESS WHEREOF, the parties hereto have executed this agreement as of the day and year first above written.

1.0 Introduction

The Eklutna Hydroelectric Project (Project) is located in Southcentral Alaska, approximately 30 miles northeast of downtown Anchorage near the Native Village of Eklutna (NVE). The federal government completed construction of the Project in 1955. Decades later, Chugach Electric Association, Matanuska Electric Association, and the Municipality of Anchorage (collectively the "Project Owners") agreed to purchase the Project and entered into a Purchase Agreement with the federal government in 1989. Shortly thereafter, concerns were raised about the Project's potential impacts on fish and wildlife. This led to the execution of a binding agreement in 1991 (referred to as the "1991 Agreement") amongst the Project Owners, National Marine Fisheries Service (NMFS), U.S. Fish and Wildlife Service (USFWS), and the State of Alaska (collectively the "Parties") that requires the Project Owners to (1) study the Project's impacts to fish and wildlife, (2) develop proposals for the protection, mitigation, and enhancement of fish and wildlife affected by the development of the Project, (3) consider the impact of fish and wildlife measures on electric rate payers, municipal water utilities, recreational users and adjacent land use, and (4) identify available means to mitigate these impacts. The Project Owners must repeat this process every 35 years and it replaces regulation by the Federal Energy Regulatory Commission. The sale of the Project was authorized by U.S. Congress in 1995, and the Project was sold to the Project Owners in October 1997.

Per the 1991 Agreement, the Project Owners were required to initiate this process no later than 25 years after the sale of the Project. Since the Project was sold in October 1997, the Project Owners were not required to initiate this process until October 2022. However, in order to allow adequate time for a comprehensive analysis, the Project Owners initiated the process in March 2019, more than three years early. After several years of study and consultation with all interested stakeholders detailed in the Supporting Information Document, the Project Owners issued a Draft Fish and Wildlife Program (Draft Program) as required in the 1991 Agreement in October 2023. The Project Owners met with the Parties and the Native Village of Eklutna several times from December 2023 through March 2024 to attempt to resolve differences. They also held six public meetings in January 2024 to solicit public comments. After considering all comments received, and giving due weight to the recommendations and expertise of the Parties and the Native Village of Eklutna, the Project Owners have developed this Proposed Final Fish and Wildlife Program (Proposed Final Program) for submittal to the Governor.

Accordingly, the Project Owners are excited for the next phase of the Project. Details of the Proposed Final Program are described in subsequent sections and include the following:

- Construction of the Eklutna River Release Facility and establishment of year-round instream flows in the Eklutna River;
- Automation of the existing outlet gate at the dam to provide periodic channel maintenance flows in the Eklutna River;
- Construction of eight new bridges along the Anchorage Water and Wastewater Utility (AWWU) access road to enable AWWU's access to critical infrastructure year-round following the establishment of instream flows;
- Payment to Chugach State Park for lakeside trail repairs;
- Establishment of a Committee to oversee implementation of the Monitoring and Adaptive Management Plan;
- Funding to conduct monitoring studies in the Eklutna River throughout the 35-year program;
- Funding for physical habitat enhancement in the Eklutna River based on the monitoring results;
- Procedures for the Committee to adaptively manage the flow regime in the Eklutna River based on the monitoring results;
- Provisions for banking water in Eklutna Lake and potentially increasing the water budget for instream flows in the future;
- Potential installation of a fixed wheel gate to accommodate higher inflows in the future and/or allow higher channel maintenance flows if needed; and
- Potential installation of upstream and downstream fish passage facilities that meet specific criteria.

Approval of the Proposed Final Program will enable the Project Owners to implement these significant fish and wildlife measures at the Project, while simultaneously protecting the municipal water supply and continuing to provide low cost, renewable energy to Southcentral Alaska. The Project Owners anticipate the Governor's issuance of a Final Fish and Wildlife Program by October 2024.

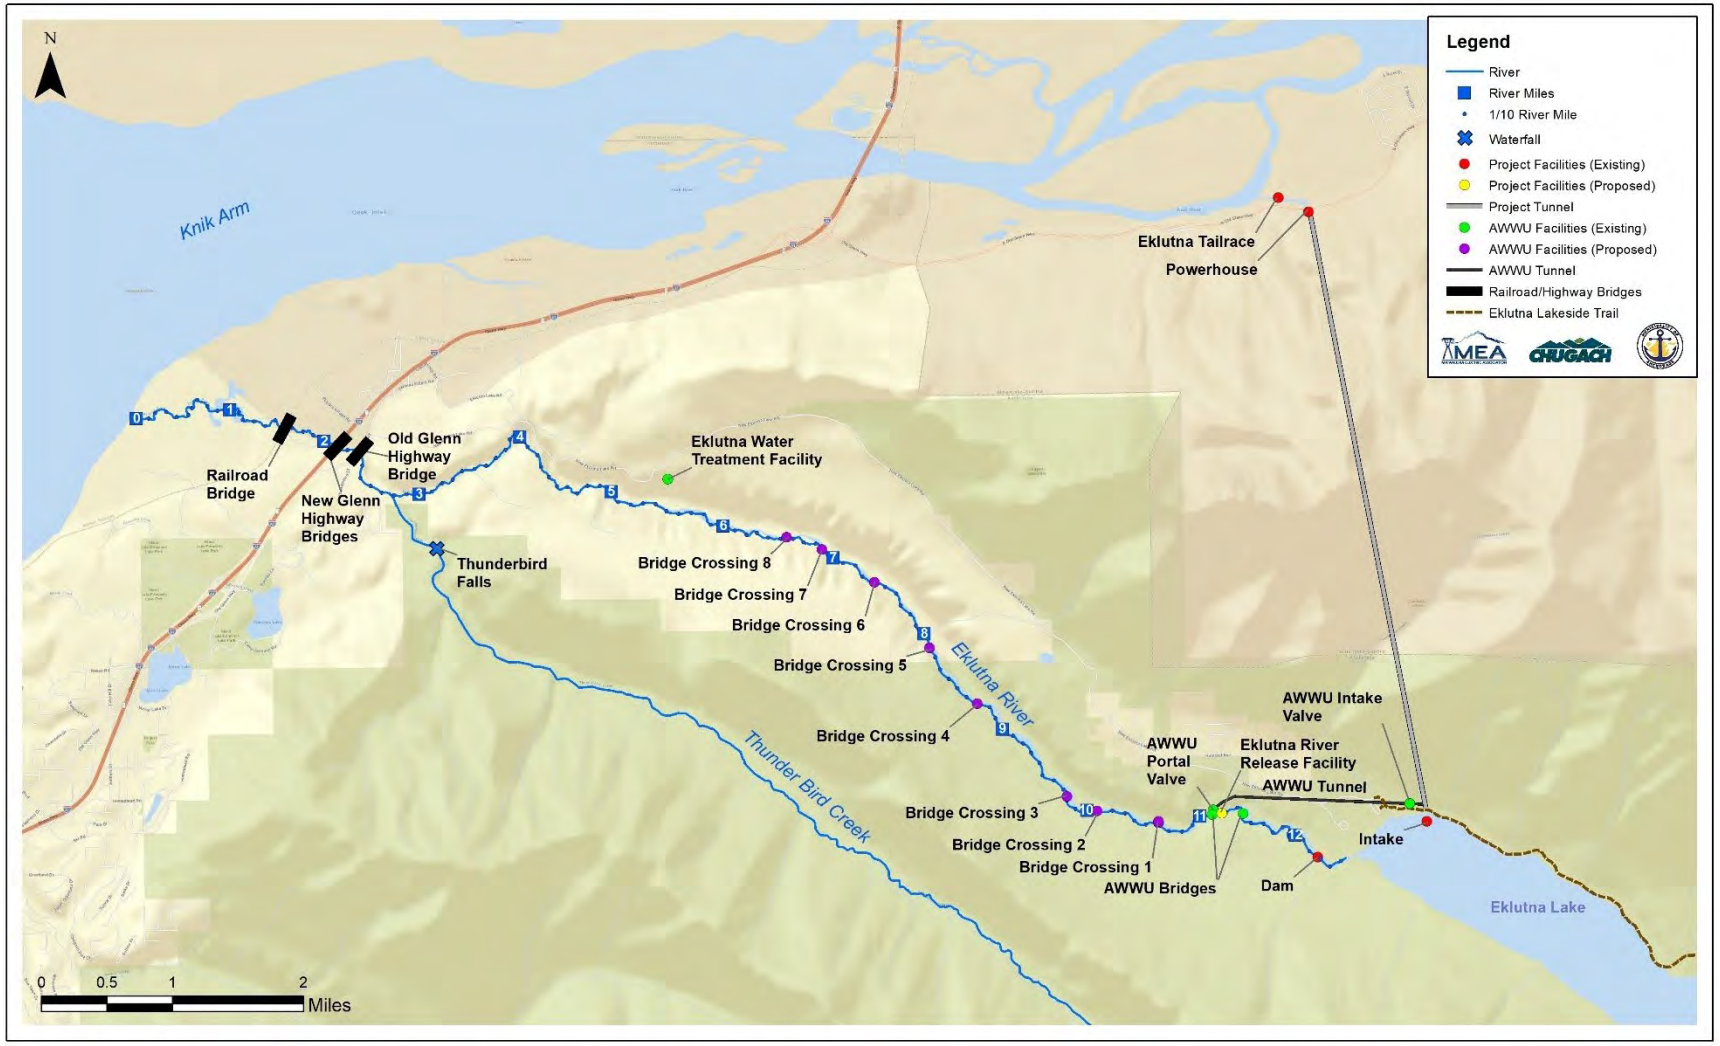

Figure 1-1. Existing and Proposed Infrastructure.

2.0 Protection, Mitigation, and Enhancement Measures

The Project Owners will continue to operate the Project in a manner consistent with the current operating procedures. In addition, The Project Owners will implement the following protection, mitigation, and enhancement (PME) measures for fish and wildlife habitat, the municipal water supply, and recreational facilities.

2.1 Year-Round Instream Flows

2.1.1 Eklutna River Release Facility

In order to provide year-round instream flows to the Eklutna River for fish and wildlife habitat, the Project Owners will construct a new valve and release structure located adjacent to the existing Anchorage Water and Wastewater Utility (AWWU) portal valve approximately one mile downstream of Eklutna Dam. The proposed infrastructure, referred to as the Eklutna River Release Facility, will consist of a tee off the existing 54-inch pipeline that conveys water from Eklutna Lake as part of AWWU's Eklutna Water Project and new control valves to bypass water into the Eklutna River. The 30% design drawings for the Eklutna River Release Facility are provided in the Supporting Information Document. The infrastructure included as part of the 30% level of design for the Eklutna River Release Facility is as follows:

- Construction of a new isolation gate structure immediately upstream of the AWWU portal valve shaft;
- Replacement of approximately 25-ft of existing pipeline with a newly fabricated steel 54-inch x 42-inch tee;
- Installation of a 54-inch gate valve on the main segment of pipe intended to provide dual means of isolation for AWWU's pipeline segment P-4;
- Installation of a 42-inch gate valve on the branch segment intended to provide isolation to the river release structure;
- Installation of a draining and filling system around each isolation valve;
- Installation of a pressure monitoring system and flow meter to provide dual redundancy to AWWU's portal release valve facility;
- Construction of a new river release structure approximately 30-ft downstream of the isolation gate structure;

- Installation of a 30-inch sleeve valve or alternative energy dissipation valve to control flow into the Eklutna River;
- Installation of a flow monitoring system to monitor flow releases into the Eklutna River;
- Construction of a bypass channel from the river release structure to the Eklutna River; and
- Upgrades to communication infrastructure to provide direct communication between the Eklutna River Release Facility, AWWU portal valve shaft, AWWU intake valve shaft, Eklutna Water Treatment Facility, and the Eklutna Power Plant.

The addition of this release facility on the existing Eklutna Water Project will not reduce or impact flow available for water supply purposes, as required by state law. Flow releases through the facility will be limited to a maximum of 80 cfs to protect the AWWU valves and pipeline. The closure rate of the proposed river release valve will be set to keep transient pressures within the rating of the lake diversion tunnel and AWWU pipeline. Additional instrumentation including new flow meters and pressure transducers will be installed to monitor the new facility and protect AWWU infrastructure in the event of an emergency.

The current design allows the AWWU pipeline to be dewatered for maintenance, and in the event of a pipeline rupture, it allows for emergency closure at the AWWU portal valve, in both cases allowing continued operation of the Eklutna River Release Facility. Any maintenance activities that may be required to replace the intake valve shaft will be planned for the fall when the lake level is high and instream flows can be released through the existing outlet gate at the dam.

The Project Owners have closely coordinated with AWWU throughout the preliminary design of the Eklutna River Release Facility and will obtain AWWU approval on all final designs related to AWWU infrastructure. The Project Owners and AWWU have also discussed the water transportation services, compensation, and water rights issues that need to be resolved in order to utilize AWWU infrastructure for providing instream flows to the Eklutna River. A summary of proposed arrangements with AWWU is set forth in the Supporting Information Document. Upon the Governor's approval, the Project Owners will enter into long-term agreements with AWWU following, and subject to, all necessary approvals. If such approvals are delayed or are not able to be obtained, the Project Owners will continue with the other PME measures outlined in this program to the degree possible.

2.1.2 Default Year-Round Instream Flow Regime

Once construction is complete, the Project Owners will utilize the existing Project intake, excess capacity in the AWWU tunnel, and new Eklutna River Release Facility to provide year-round instream flows to approximately 11 out of 12 miles of the Eklutna River. The default year-round instream flow regime, shown in Table 2-1 and Figure 2-1, varies seasonally and was developed based on field studies and modeling.

Table 2-1. Default Year-Round Instream Flow Regime.

Month	Flow (cfs)	Volume (acre-feet)
January	27	1,660
February	27	1,500
March	27	1,660
April	27	1,607
May	34	2,060
June	40	2,380
July	40	2,460
August	40	2,460
September	40	2,380
October	40	2,460
November	34	1,993
December	27	1,660
Total	-	**24,280**

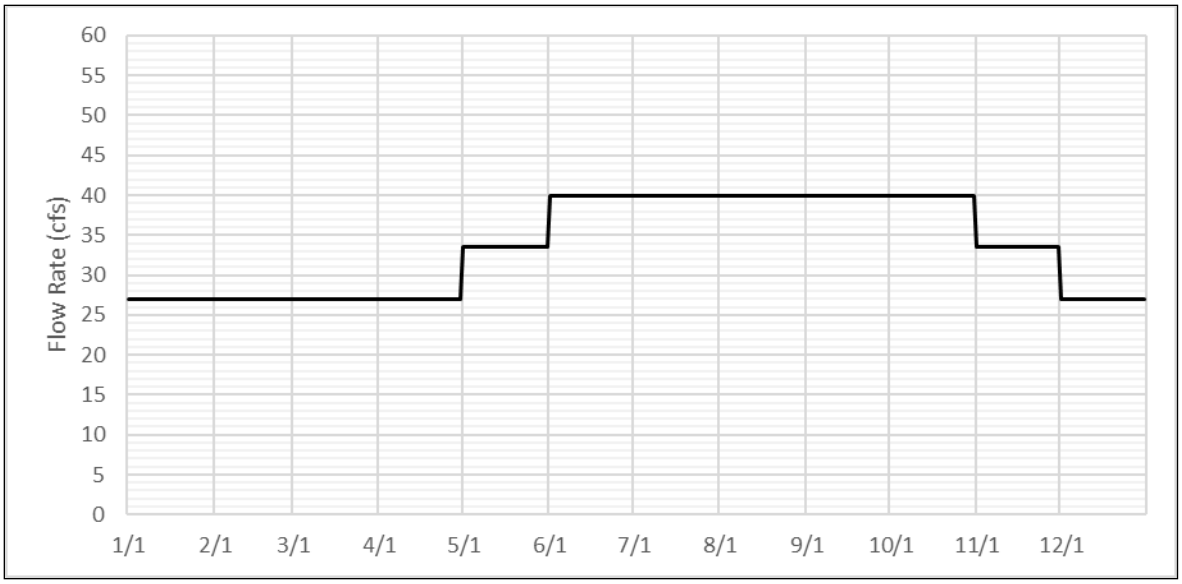

Figure 2-1. Default Year-Round Instream Flow Regime.

The default winter flow releases (27 cfs) when combined with natural accretion in the Eklutna River should promote favorable ice conditions to protect redds during incubation and provide overwintering habitat for juvenile salmon in the Eklutna River.

The default summer flow releases (40 cfs) when combined with natural accretion in the Eklutna River should (1) significantly increase the available spawning habitat for Chinook, coho, pink, and chum salmon, (2) provide sufficient flows for migrating adult salmon to navigate the potential upstream passage barriers identified in the confined canyon reach, and 3) provide additional rearing habitat for salmon.

The default November flow releases (34 cfs) reflect a downramping rate of less than 1 to 2 inches per hour to reduce the risk of any fish stranding downstream when transitioning from summer flows to winter flows.

The total volume of water to be released annually from Eklutna Lake into the Eklutna River for year-round base flows is 24,280 acre-ft/yr, equivalent to approximately 10% of the average annual inflow to the lake.

2.2 Channel Maintenance Flows

2.2.1 Existing Outlet Gate

In order to provide periodic channel maintenance flows to the Eklutna River, the Project Owners will automate the existing outlet gate within the base of the spillway at Eklutna Dam so that it can be controlled remotely. The 30% design drawings for automating the gate are

provided in the Supporting Documentation Document. The infrastructure included as part of the 30% level of design for automating the existing outlet gate is as follows:

- Replacement of existing manual actuator for the dam outlet gate with electric motor actuator with position sensing;
- Construction of new access platform and stilling well with level transducer to measure water surface elevation in Eklutna Lake; and
- Installation of 0.5 miles of new buried power line from Eklutna Lake Road to the dam.

The 30-inch by 30-inch outlet gate has a maximum capacity of approximately 190 cfs at the normal maximum water surface elevation of El 871.0 ft.

2.2.2 Channel Maintenance Flow Regime

Once year-round instream flows have been established in the Eklutna River and the existing outlet gate has been automated, the Project Owners will use both the Eklutna River Release Facility and the automated outlet gate to provide periodic channel maintenance flows to the Eklutna River. The default channel maintenance flow, shown in Table 2-2 and Figure 2-2, was developed based on field studies, modeling, and peak flow statistics in similar unmanaged Alaskan rivers and is shaped to resemble a natural peak flow hydrograph.

Table 2-2. Default Channel Maintenance Flow Releases.

Steps	Duration (hours)	Total Flow (cfs)	Base Flow (cfs)	Additional Flow (cfs)	Additional Volume (acre-feet)
1	3	150	40	110	27
2	3	200	40	160	40
3	36	220	40	180	535
4	12	200	40	160	159
5	6	160	40	120	59
6	6	140	40	100	50
7	6	110	40	70	35
8	6	90	40	50	25
9	6	80	40	40	20
10	6	70	40	30	15
11	4	60	40	20	7
Total for 1 flow	**94**	-	-	-	**971**
Total for 3 flows	**282**	-	-	-	**2,913**

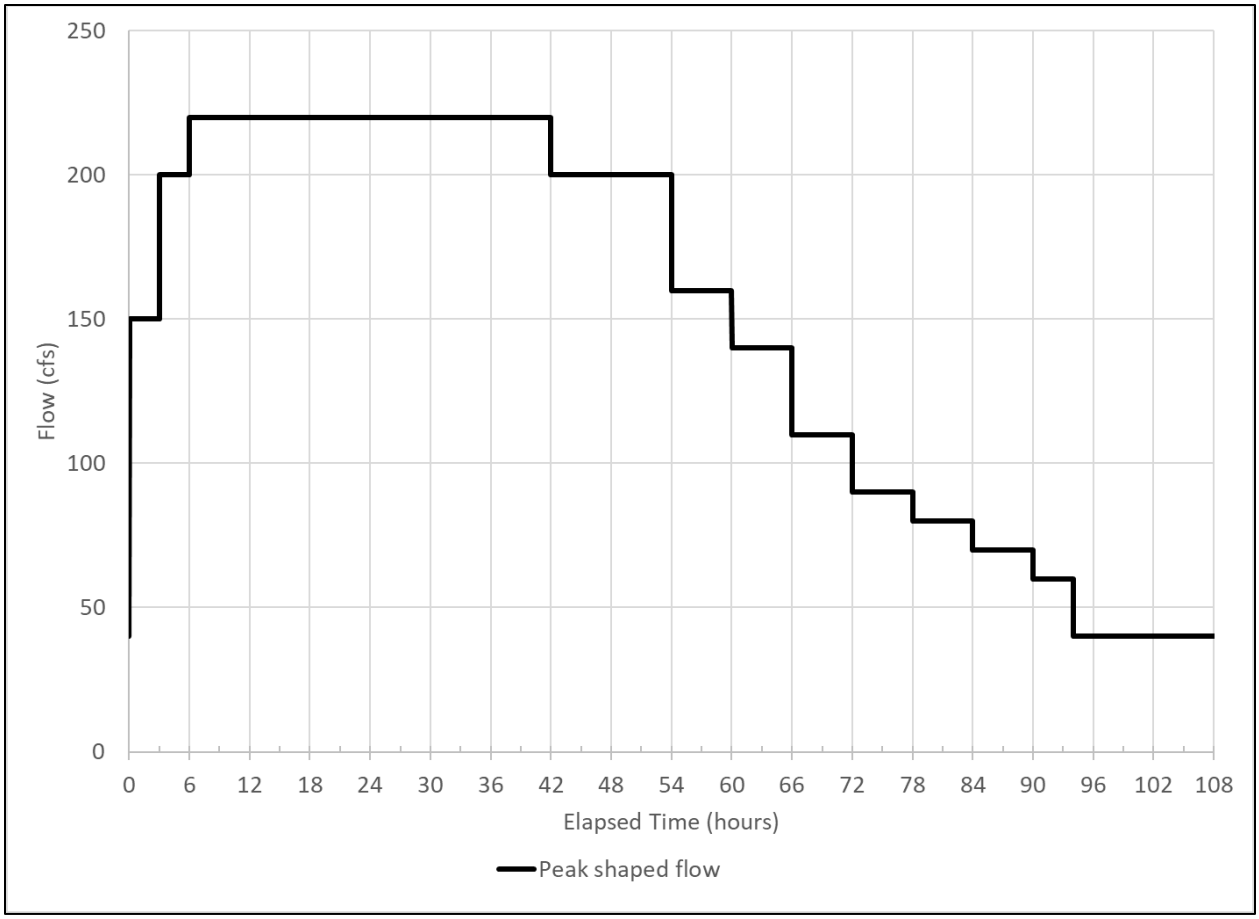

Figure 2-2. Default Channel Maintenance Flow Releases.

The default channel maintenance flow (peaking at 220 cfs for 36 hours) should complement the base flow regime and help create and maintain channel dimensions and substrate characteristics to support physical fish habitat over the long term.

The default downramping schedule (steps 4-11 in Table 2-2) reflects a downramping rate of less than 1 to 2 inches per hour to reduce the risk of any fish stranding downstream when transitioning back to base flows.

Channel maintenance flows will be conducted in the fall when the lake level is highest. The default schedule calls for the Project Owners to conduct a channel maintenance flow in years 2, 5, and 8 of each 10-year period. The first 10-year period will start with the first full calendar year after year-round instream flows are established. The total volume of water to be released in a 10-year period from Eklutna Lake into the Eklutna River for channel maintenance flows is 2,913 acre-ft. Any spill event that exceeds 220 cfs for 36 hours will count as one of the required channel maintenance flows for the current 10-year period.

The intent of providing flexibility in scheduling channel maintenance flows is to allow the Project Owners to take advantage of wet water years. If a planned channel maintenance flow coincides with a dry water year, the Project Owners may choose to postpone the channel maintenance flow to a subsequent year in the current 10-year period. However, if it is already the final year in the current 10-year period, then to the extent possible the Project Owners will curtail generation in order to raise the lake level high enough to achieve the desired flow rate. If due to unforeseen circumstances the Project Owners are unable to provide all three channel maintenance flows in any given 10-year period, then the Project Owners will provide the missed channel maintenance flows in the subsequent 10-year period.

2.3 Flow Monitoring

In order to monitor the year-round flow releases into the Eklutna River, the Project Owners will install a flow meter on the river release pipeline within the Eklutna River Release Facility. The accuracy of this meter is anticipated to utilize the ultrasonic transit time method and have an accuracy of ±1%.

In order to monitor channel maintenance flow releases into the Eklutna River, the Project Owners will utilize the rating curve for the existing outlet gate to calculate flow as a function of gate position and water surface elevation in the reservoir. The gate position will be monitored remotely via a new position feedback sensor within the electric motor operator of the gate. To monitor the water surface elevation of the reservoir, a new stilling well and pressure transducer will be located upstream of the gate within the entrance to the Eklutna Dam spillway channel. The addition of this transducer will avoid any potential inaccuracies with the existing USGS gauge measuring water surface elevation near the Project intake. The flow measurement at the gate is anticipated to have an accuracy of ±2%.

2.4 AWWU Bridges

Providing year-round instream flows to the Eklutna River will likely make all of the existing ford crossings along the AWWU access road impassable for most of the year. To mitigate these potential impacts, the Project Owners will construct eight new bridges, one at each of the existing ford crossings to allow AWWU year-round access to the AWWU pipeline for maintenance. The new bridges will be designed to pass the same flows as the two existing AWWU bridges. The existing ford crossings will be removed to prevent anyone from attempting to drive through the riverbed in the future. The 15% design drawings for the new AWWU bridges are provided in the Supporting Information Document. The Project Owners will obtain AWWU approval on all final designs related to AWWU infrastructure and will work with AWWU to obtain all necessary permits and easements as may be necessary.

2.5 Recreation

2.5.1 Lakeside Trail Repairs

The Project Owners operate the Project to not spill any water. However, due to various circumstances, spill events have occurred in the past. During past spill events, high lake levels have caused erosion along discrete segments of the lakeside trail. Chugach State Park has received $234,000 in funding for general lakeside trail repairs. Within 120 days of the Governor's approval or by January 31, 2025, whichever comes later, the Project Owners will provide a one-time payment of $234,000 to Chugach State Park (or another entity as directed by Chugach State Park) for lakeside trail repairs that address erosion impacts. This funding match brings the total budget for lakeside trail repairs to $468,000. State Parks will be responsible for seeking and obtaining approval from Eklutna, Inc. if needed. The Project Owners will not be responsible for funding the repair of any future erosion impacts to the lakeside trail that may result from continued Project operations.

2.5.2 Annual Powerhouse Maintenance

The Project Owners conduct annual maintenance activities that require Project shutdown for approximately two weeks every year. In order to avoid having multiple generation assets offline at the same time, the Project Owners coordinate with the other Railbelt utilities when scheduling the annual maintenance shutdown for the Project. In some previous years, this annual maintenance shutdown has coincided with peak fishing times and has had a negative impact on the tailrace fishery. The Project Owners will endeavor to avoid peak fishing times when scheduling the annual maintenance shutdown and any other maintenance activities that would require Project shutdown, taking into consideration the overall system maintenance needs.

2.5.3 Public Access to the Eklutna River

There is currently no free, un-permitted public access to most of the Eklutna River. The land under and surrounding the Eklutna River is largely owned by Eklutna, Inc., which requires permits for access to the Eklutna River. The Project Owners are therefore requesting that Eklutna, Inc. provide free, non-permitted public access to the Eklutna River once the ADFG Board of Fisheries has determined that the Eklutna River fishery for Chinook, coho, or sockeye salmon is sustainable and can be opened for recreational fishing.

3.0 Monitoring and Adaptive Management Plan

The PME measures described in the previous sections are based on the results of field studies, modeling, and extensive consultation. However, the Project Owners recognize there is some inherent uncertainty in modeling and physical habitat conditions in the Eklutna River will evolve over time. Therefore, the following Monitoring and Adaptive Management Plan will be implemented. This approach allows for flexibility and adjustments to PME measures, if needed.

3.1 Committee

Upon the Governor's issuance of the Final Fish and Wildlife Program, a Monitoring and Adaptive Management Committee (Committee) will be established to execute the Monitoring and Adaptive Management Plan. The Committee will consist of one voting representative from each of the following entities: ADFG, ADNR, NMFS, USFWS, and NVE. The Committee will make decisions through consensus, and the Committee chair will be selected by the members of the Committee. One or more representatives from the Project Owners will serve as non-voting participants on the Committee to provide technical expertise about Project operations. All voting and non-voting representatives named to serve on the Committee should possess the technical expertise necessary to carry out the responsibilities of the Committee and should ideally be local to the Project area. Each entity shall bear all costs for its representative to participate on the Committee.

Once the Committee is established, it will develop appropriate evaluation criteria for the Fish and Wildlife Program. These evaluation criteria will help inform monitoring efforts and adaptive management decisions. Decisions made by the Committee shall not be imputed to the Project Owners; implementation of actions pursuant to guidance provided by the Committee shall not create liability to the Project Owners.

3.2 Monitoring

The Project Owners will provide a total of $450,000 in April 2024 U.S. dollars (see Section 5.0) to ADFG over the length of the Program to fund additional monitoring efforts in the Eklutna River. The Committee will develop a plan to monitor aquatic habitat conditions and fish utilization in the Eklutna River and the straying rate of hatchery fish from the Eklutna Tailrace to the Eklutna River. The Committee may pursue other funding sources to supplement the monitoring budget if desired. ADFG will implement the monitoring plan based on direction from the Committee and must request funds from the Project Owners by July 1 each year based on the planned monitoring efforts for the subsequent year. The Project Owners will then budget accordingly and submit payment to ADFG by January 31 of the subsequent year.

Reports that summarize the various monitoring results will be prepared by ADFG and provided to the Committee by February 1 each year. The Committee will review and provide a composite report to the Project Owners by March 1 each year. The Committee shall maintain a database/archive for all monitoring results and reports.

3.3 Adaptive Management

3.3.1 Water Budget

The total volume of water available for release into the Eklutna River in the first water year (June 1 to May 31) following completion of the Eklutna River Release Facility is 24,280 acre-feet. This is based on the default year-round instream flow regime. An additional 24,280 acre-feet will become available at the beginning of each subsequent water year. An additional 2,913 acre-feet of water will become available at the beginning of each 10-year period, starting the first water year after instream flows are initiated. This is based on the default channel maintenance flow being released three times in each 10-year period.

3.3.2 Water Banking

If the entire annual water budget (24,280 acre-feet) is not released into the Eklutna River in a given water year, either intentionally or unintentionally, then that "banked water" can be released in subsequent water years with the following limitations: (1) water can only be banked for up to 5 years, (2) no more than 50% of the total annual water budget can be banked at any given time; and (3) in the event of any unplanned spill event at the Project, banked water is spilled first.

The additional water budget for each 10-year period (2,913 acre-feet) must be used within that period and cannot be carried over to the following 10-year period. However, as described in Section 2.2.2, if due to unforeseen circumstances the Project Owners are unable to provide all of the planned channel maintenance flows in any given 10-year period, then the Project Owners will provide the missed channel maintenance flows in the subsequent 10-year period.

3.3.3 Allocation of Additional Inflow

Climate change is anticipated to cause increased glacial melt in the coming decades. Increased glacial melt would likely result in more inflow to Eklutna Lake, and therefore more water available for both hydropower generation and instream flows. Because of this, the Project Owners will calculate the inflows to Eklutna Lake each year using the available lake level and flow monitoring data. Then 10 years after instream flows are established, the Project Owners will compare the average annual inflows to Eklutna Lake for the last 10 years to the previous 10-year period. Any increase in average annual inflows will be split 50/50 between

hydropower and the annual water budget for instream flows. If there is a decrease in average annual inflows, the annual water budget for instream flows will not be decreased. The Project Owners will repeat this process every 10 years.

3.3.4 Water Accounting Report

The Project Owners will prepare an annual report that summarizes (1) the inflows to Eklutna Lake, (2) instream flow releases, and (3) channel maintenance flow releases for all prior water years as well as the available water budget for the upcoming water year and provide it to the Committee by March 1 each year.

3.3.5 Requests to Modify the Flow Regime

Based on the results of the monitoring program, the Committee may request modifications to the default year-round instream flow regime and/or the magnitude, duration, frequency, or shape of the scheduled channel maintenance flow releases, as long as (1) the requested flows do not exceed the operational limitations of the Project infrastructure, and (2) the ramping rates conform to fisheries ramping rate requirements. If the total volume of water to be released exceeds the available water budget (which includes any banked water that may be available), then that deficit will be carried over into the next water year.

The Committee must provide a 60-day notice to the Project Owners for any requests to modify the default year-round instream flow regime or the default channel maintenance flow schedule. If the requested flows exceed the operational limitations of the Project infrastructure, the available water budget, or the approved ramping rates, then the Project Owners may reject the requested flow modifications. If the Project Owners reject the requested flow modifications, then they must notify the Committee so that the Committee may request alternative flows if desired. The Committee may request modifications to flows within 60 days; however, the Project Owners are not required to meet the request if it is not operationally feasible.

3.3.6 Physical Habitat Enhancement

The Project Owners will provide a total of $350,000 in April 2024 U.S. dollars (see Section 5.0) to ADFG during the Program to fund physical habitat enhancement and vegetation management efforts in the Eklutna River. The Committee will develop a plan to implement physical habitat enhancement and vegetation management efforts in the Eklutna River. These efforts will focus on enhancing rearing habitat in the Eklutna River. All physical habitat enhancement and vegetation management efforts must occur downstream of the Eklutna River Release Facility. The Committee may pursue other funding sources to supplement the physical habitat enhancement and vegetation management budget if desired. ADFG will implement the

plan based on direction from the Committee and must request funds from the Project Owners by July 1 each year based on the planned physical habitat enhancement and vegetation management efforts for the subsequent year. The Project Owners will then budget accordingly and submit payment to ADFG by January 31 of the subsequent year.

Reports that summarize the various physical habitat enhancement and vegetation management efforts will be prepared by ADFG and provided to the Committee by February 1 each year. The Committee will review and provide a composite report to the Project Owners by March 1 each year. The Committee shall maintain a database/archive for all physical habitat enhancement and vegetation management reports.

The Project Owners are not responsible for responding to natural processes that result in undesirable conditions in the river such as debris flow associated with precipitation or earthquakes, beaver activity, large wood build-up, etc.

3.4 Annual Meeting

The Committee will meet annually in April of each year to (1) review the results of the monitoring efforts conducted in the previous calendar year, (2) review the available water budget for the upcoming water year, (3) discuss any potential adaptive management actions for the upcoming water year, and (4) determine what monitoring efforts and/or physical habitat enhancement should be conducted in the subsequent calendar year. The Committee must notify the Project Owners of any planned monitoring efforts and/or physical habitat enhancement activities for the subsequent calendar year by July 1 so that the Project Owners can budget accordingly.

4.0 Limited Reopeners

Per the 1991 Agreement, the Project Owners are required to repeat this process every 35 years and must initiate the next process by October 2057. In addition, the Project Owners are required to repeat this process before making any major structural or operational modification to the Project that would substantially affect water usage or fish and wildlife. The following two limited reopeners are intended to enable consideration and potential execution of the specified structural and operational modifications during the period between processes without triggering the need to repeat this entire process outlined in the 1991 Agreement.

As set forth below, the two limited reopeners may occur no sooner than 10 years following completion of the Eklutna River Release Facility (Section 2.1.1) and establishment of year-round instream flows (Section 2.1.2). If the Eklutna River Release Facility and instream flows are delayed due to any reason such as litigation or appeals of the Final Fish and Wildlife Program or a failure to complete permitting or gain necessary approvals, the 10-year timeframe leading to the reopeners will be delayed until such time as the Eklutna River Release Facility is completed and the instream flows established.

4.1 Fixed Wheel Gate

During the consultation process, several stakeholders requested that the existing overflow spillway be replaced with a fixed wheel gate because either (1) climate change may cause inflows to the reservoir to increase significantly, which may increase the likelihood of future spill events, and a fixed wheel gate will allow the Project Owners to better manage those future spill events, or (2) while modeling results show that the default channel maintenance flow regime will maintain spawning gravels in the wetted reach of the Eklutna River, future monitoring may show that a higher magnitude channel maintenance flow that exceeds the combined hydraulic capacity of the existing outlet gate and the Eklutna River Release Facility may be warranted. Replacement of the existing overflow spillway with a new fixed wheel gate was evaluated during the study program and alternatives analysis and the Project Owners determined that it was not warranted at this time due to significant dam safety concerns, and the need for future monitoring. Recognizing that the fixed wheel gate might be warranted in the future, however, the Project Owners will continue to investigate the fixed wheel gate as described below and will construct it if certain criteria are met.

Within three years of the Governor's issuance of the Final Fish and Wildlife Program, the Project Owners will conduct a more detailed feasibility study of the fixed wheel gate (including a stability analysis and Class 3 cost estimate). The Project Owners will report the results of that analysis to the Committee.

If the fixed wheel gate is considered feasible and cost effective, then on the 10th anniversary after initiating instream flows, the Project Owners will confer with the Committee to reevaluate the need for the fixed wheel gate. If the monitoring efforts during that 10-year period indicate that (1) average annual inflows to the lake have increased by 20,000 acre-feet, or (2) the Committee determines that higher channel maintenance flows are warranted to maintain spawning gravels, then the Project Owners will commit up to $10M in April 2024 U.S. dollars (see Section 5.0) to demolish the existing overflow spillway and construct a new fixed wheel gate.

If the demolition/construction costs are estimated to be less than $10M in April 2024 U.S. dollars, then the Project Owners will obtain necessary permits, demolish the existing overflow spillway, and construct a new fixed wheel gate. If the demolition/construction costs are estimated to be greater than $10M in April 2024 U.S. dollars, then the Committee may seek supplemental funding payable to the Project Owners from other sources. If the supplemental funding is federal funding and triggers additional NEPA requirements, then the Committee will be responsible for ensuring that outside funding is available and payable to the Project Owners in order to meet those requirements. Upon receipt of such supplemental funding, the Project Owners will obtain necessary permits, demolish the existing overflow spillway, and construct a new fixed wheel gate.

This is a limited reopener and will not reopen any other components of the Fish and Wildlife Program or trigger the process requirements outlined in the 1991 Agreement. Governor approval of the decision to replace the fixed wheel gate will not be required.

4.2 Fish Passage

During the consultation process, several stakeholders requested that upstream fish passage of adult salmon into Eklutna Lake and downstream fish passage of juvenile salmon out of Eklutna Lake be evaluated. All fish passage measures proposed by the Project Owners and other stakeholders were evaluated during the study program and alternatives analysis. See alternatives analysis in Supplemental Information Document. All of the volitional upstream fish passage measures that were evaluated either (1) would have significant impacts to the hydropower project (i.e., would reduce the storage capacity of the reservoir by approximately 40% or would require the Project to be shutdown throughout the winter when energy is needed most), or (2) are cost prohibitive (the estimated present worth for the stakeholders' preferred alternatives that included volitional fish passage ranged from $221M to $385M including capex, operations and maintenance, and replacement energy). In addition, there are still significant concerns regarding the effectiveness of all the downstream fish passage facilities studied (i.e., low attraction flow velocities and/or the inability to operate the

downstream fish passage facilities while the lake is frozen over). Therefore, fish passage measures are not proposed at this time.

Nonetheless, the Project Owners recognize that fish passage may become feasible in the future and fish passage is important to NVE, the federal and state agencies, and others who have commented on the Draft Program. If a new, proven methodology or technology becomes available, then the Committee may reevaluate the potential for the construction and operation of fish passage facilities both into and out of Eklutna Lake on its own initiative or at the request of any of the resource agencies or NVE. Any fish passage measures must meet the following criteria:

1. Fish passage facilities must be safe and effective for human health, the environment, and operations of the Project, the Eklutna River Release Facility, and AWWU's Eklutna Water Project and its water supply;

2. Fish passage facilities must address both upstream and downstream fish passage for anadromous fish (i.e., no effective upstream passage without effective downstream passage);

3. Fish passage facilities cannot affect reservoir operations in a manner that would cause AWWU operation shutdown for any amount of time or Project shutdown for more than two weeks annually (except during construction);

4. Fish passage facilities cannot result in more than 10% loss of storage capacity in the reservoir (i.e., the active storage capacity in the reservoir cannot be reduced by more than 17,480 acre-feet);

5. Fish passage facilities must operate within the available water budget administered by the Committee.

Because fish passage into the lake has the potential to impact recreational use or facilities within Chugach State Park and/or the water quality of the municipal water supply, both of these potential impacts must be evaluated by the Committee. The Committee must also consult with the State Park and AWWU regarding any such impacts and the appropriate mitigation for those impacts. The Committee must ultimately obtain written consent or approval from both the State Park and AWWU for any proposed fish passage measures, including the construction schedule.

The cost of any fish passage measures (including scientific studies, engineering, construction, operation, maintenance, and mitigation for any impacts to recreational use or facilities and/or

the municipal water supply, etc.) must be completely funded by parties other than the Project Owners.

At any time more than 10 years after initiating instream flows, if (1) the Committee has identified fish passage measures that meet all of the listed criteria, (2) the Committee has obtained written consent or approval from both the State Park and AWWU, (3) the Committee has obtained the necessary funding for all fish passage measures, and (4) the Anadromous Waters Catalog maintained by ADFG has been updated to reflect that migrating or spawning adult sockeye salmon have been documented within 1 mile of the Eklutna River Release Facility, then the Committee may propose those fish passage measures to the Project Owners with supporting information. As long as all of the above criteria and prerequisites are met, then the Project Owners will support the development and operation of the proposed fish passage facilities. The Project Owners may choose to waive criteria numbers 3, 4, and/or 5 upon unanimous decision, provided that AWWU must independently consent or approve fish passage measures affecting its facilities or its water supply.

Upon receiving a statement of support from the Project Owners, the Committee and the Project Owners will coordinate and cooperate to obtain the Governor's approval of the proposed fish passage measures. Governor approval of the decision to add the fish passage facilities will be required.

If the Governor approves the proposed fish passage measures, then the 35-year timeframe requirement to repeat the consultation process required by the 1991 Agreement will restart from the date the Governor's approval.

The construction schedule must minimize impacts to Project operations. The Project Owners will oversee all construction activities and will support the development and operation of the fish passage facilities. However, the Project Owners will not operate the fish passage facilities and will be held harmless from the development and operation of such facilities.

This is a limited reopener and will not reopen any other components of the Fish and Wildlife Program.

5.0 Funding Commitments and Inflation Adjustment

All monetary amounts in this Proposed Final Program are in 2024 U.S. dollars, unless otherwise stated. All monetary amounts will be adjusted annually for inflation using a 15-year rolling average reflected in the Bureau of Labor Statistics' Urban Alaska Consumer Price Index (CPI-U) (as currently reported by State of Alaska Department of Labor and Workforce Development at https://live.laborstats.alaska.gov/cpi/table).

Exhibit 3

Native Village of Eklutna
Tribal Government

June 21, 2024

Submitted via Email

The Honorable Mike Dunleavy
Governor of Alaska
Office of the Governor
P.O. Box 110001
Juneau, AK 99811

Dear Governor Dunleavy:

The Native Village of Eklutna (NVE) respectfully provides the following comments on the Chugach Electric Association (CEA) and Matanuska Electric Association (MEA)'s (collectively, the utilities) proposed final Eklutna Fish and Wildlife Program (proposed final program) pursuant to the 1991 Fish and Wildlife Agreement for the Snettisham and Eklutna Projects (1991 Agreement).[1] NVE is deeply disappointed in the utilities' proposed final program, which will cost ratepayers and taxpayers up to $72 million, threaten public drinking water infrastructure, and fail to meaningfully recover and maintain salmon in the Eklutna River for the benefit of our people and all Alaskans.

As a matter of fact, in promulgating such a problematic proposal, the utilities have stepped far beyond their authority under the 1991 Agreement and assumed the job of the Governor. The 1991 Agreement is clear that the utilities' only consideration in drafting and submitting a proposed final program to the Governor is meeting the purpose of the Agreement, which is "the protection, mitigation of damages to, and enhancement of fish and wildlife (including related spawning grounds and habitat)."[2] The Governor of Alaska, not the utilities, is then responsible for evaluating and considering the criteria listed in the Agreement in making your final program determination.[3] The utilities overreach their authority under the Agreement by claiming that they are charged not just with undertaking the study process and drafting a program of measures to protect, mitigate damages to, and enhance fish and wildlife and their habitat but also with undertaking the policy analysis explicitly left to the Governor.[4] They are neither qualified nor authorized to make policy determinations and have plain conflicts of interest.

[1] We also submit our previous comments on the utilities' Draft Program and references cited for your consideration.
[2] CEA & MEA, Eklutna Draft Fish and Wildlife Program at 3 (2023).
[3] *Id.* at 4.
[4] *Id.* at 44.

The good news is that per the 1991 Agreement, you have the sole ability to decide on a final Eklutna Fish and Wildlife Program (final program) and are in no way required to adopt the utilities' proposed final program. Per the 1991 Agreement, you may choose from any alternatives suggested by the utilities, other signatories to the 1991 Agreement, or members of the public; alter any of the alternatives as you see fit; promulgate a final program that combines various alternatives provided; or decide on a completely novel alternative.

The utilities have submitted a proposed final program that fails NVE, Alaskans, salmon, and the Eklutna watershed. We urge you to use your powers to reject it for failing to equitably balance myriad public interests, specifically protecting, mitigating damage to, and enhancing salmon in the Eklutna River and protecting municipal water supplies. As discussed below, the primary reason for the 1991 Agreement was to restore and maintain sockeye salmon that depend on free passage into and out of Eklutna Lake, their preferred spawning habitat. The utilities admit their proposed final program fails to meet this primary objective, and for that reason alone, it does not meet the purpose, intent, and terms of the 1991 Agreement.

We instead provide an alternative: a visionary solution for the Eklutna River that is supported by Eklutna, Inc., the Native village corporation whose lands surround the area, the Alaska Federation of Natives, the late Congressman Don Young, and many others; takes into account public feedback, which overwhelmingly rejected the utilities' proposal; secures the Anchorage drinking water supply; and will truly restore salmon and the Eklutna River, providing a thriving personal use and sport fishery for all Alaskans to enjoy.

Our Vision for the Eklutna River

Our elders tell us that Eklutna (*Idlughet*) is an old, old Village located by the Eklutna River, which was once an abundant salmon system. The Eklutna River (*Idluytnu*) has provided nutritional and cultural benefits to Eklutna Dena'ina since time immemorial, but hydroelectric dams have severely degraded its productivity. Eklutna Dena'ina's health, families, and culture depend on restoring salmon to the Eklutna River. NVE has adopted a vision for fully restoring the Eklutna River for fish and wildlife habitat, traditional subsistence uses, and sustainable natural resource development from the top of the watershed to Cook Inlet.[5]

NVE has broad support for this vision.[6] Eklutna Inc. recently remarked that "the restoration of the Eklutna River is more than a conservation effort; it is a strategic investment that will protect salmon habitat, boost tourism, elevate recreational activities, and increase property values.

including all Southcentral Alaska."[7] The Alaska Federation of Natives passed a resolution in 2020 proclaiming that "[AFN] supports efforts to restore traditional rivers and streams for fish and wildlife habitat, traditional subsistence uses, and sustainable natural resources development, and in particular, supports tribes like Native Village of Eklutna […] to restore the Eklutna River for salmon habitat."[8] Alaska's late Representative Don Young, who was largely responsible for the sale and divestiture of the Eklutna Project, affirmed his "keen[] interest[] in seeing the timely restoration of the Eklutna River and the recovery of salmon for the

[5] Native Village of Eklutna, "Our Vision for the Eklutna River" (accessed Nov. 20, 2023).
[6] *See* Additional resolutions and letters of support from CIRI, Inc., Matanuska-Susitna Borough Fish and Wildlife Commission, Kenaitze Tribe, Ninilchik Tribal Council, and the National Tribal Water Council included in the attached references.

benefit of the Native people of Eklutna," and further that "[r]estoring healthy salmon runs in the Eklutna River will benefit a great many Alaskans who live in Anchorage and the Mat-Su Valley."[9] Alaska's current Congresswoman, Mary Peltola, maintains that commitment, stating that "[l]ike my predecessor, Congressman Don Young, I support the efforts of the Eklutna Dena'ina to restore their river and the salmon runs they depend on."[10] The Assembly of the Municipality of Anchorage passed a resolution in February 2024 committing to "the restoration of the Eklutna watershed, including providing instream flow and fish passage the length of the Eklutna River and into Eklutna Lake […]."[11]

1991 Fish & Wildlife Agreement Background

Since the Eklutna Hydroelectric Project ("Project") became operational in 1955, it has caused the Eklutna River to run dry. Currently, no water spills over the Eklutna Lake Dam down the river except during floods. A 4.5-mile bypass tunnel diverts water from the lake to the power plant. Of the water diverted, 90% is diverted to the Knik River for hydropower, while 10% is diverted for Anchorage drinking and wastewater, effectively blocking the remaining 12 miles of Eklutna River from its water source.[12]

The Project's adverse effects on fish and wildlife resources in the Eklutna River were not evaluated for almost 70 years after project construction due, in part, to the existence of the lower diversion dam, which prevented salmon from ascending to Eklutna Lake (*Idlu bena*) and the upper reaches of the river, which are critical for sockeye, Chinook, and chum salmon, in particular. However, since Eklutna Inc. and partners 2018 removed the lower diversion dam, the Project's continued diversion of all controllable flow at Eklutna Lake to the Project's powerhouse on Knik Arm (*Nuti*) and the complete disconnection of the river to the lake and upper tributaries are, and will continue to be under the Project Owners' Program, the primary causes for ongoing degradation of fish and wildlife habitat in the Eklutna River system.

The purpose of the 1991 Eklutna Fish and Wildlife Agreement ("Agreement") and the resultant Fish and Wildlife Program is to develop and implement measures to "protect, mitigate damages to, and enhance fish and wildlife (including related spawning grounds and habitat)" from the harms of the Project.[13] Salmon spawning grounds and habitat harmed and disconnected by the project include the lower Eklutna river below the dam, Eklutna Lake, and the upper tributaries to Eklutna Lake. The Divestiture Summary Report for the Sale of Eklutna and Snettisham Hydroelectric Projects ("Divestiture Report"), to which the Agreement is an appendix, notes that mitigating harms to sockeye salmon and their spawning habitat was particularly important in creating the Agreement. The Divestiture Report explained that "[d]uring reviews of the legislative proposal, loss of a sockeye salmon run that once spawned in Eklutna Lake was identified[...] This

specific problem and the desires of the fish and wildlife agencies to provide appropriate consideration to fish and wildlife resources over the long run led to the August 7, 1991 Agreement."[14]

The Utilities' Proposed Final Program is a Failure and Should Be Rejected

In their proposed final program, the utilities' "AWWU Portal" plan completely disconnects Eklutna Lake and its upper tributaries from the lower Eklutna River and maintains over a mile of dry streambed.[15] Furthermore, the flows the utilities propose to release from the AWWU Portal are severely inadequate to restore and maintain fish in the Eklutna River and are lower than any flows considered by signatory parties to the Agreement during the study process.[16] The proposed final program also proposes similarly inadequate channel maintenance high flow events in only three out of every ten years.[17] This proposal provides no solution for the complete blockage of salmon reaching the extensive lake spawning habitat required by sockeye salmon (which was the key driver for the Agreement in the first place). In addition, 15 miles of upper tributary spawning habitat above the lake that would otherwise be highly suitable to Chinook and coho salmon are left completely stranded.[18] Without a connection to Eklutna Lake and its upper tributaries, restoring those key spawning and rearing grounds and habitat is impossible. The utilities admit in the Draft Program that "no change in sockeye rearing habitat is anticipated."[19] The proposed nominal flow releases from the AWWU Portal will only minimally enhance Chinook and coho salmon and their habitat in the lower Eklutna River. In their comments on the utilities' draft program, the Alaska Department of Fish and Game, U.S. Fish and Wildlife Service, and NOAA Fisheries agreed that the AWWU Portal combined with the minimal flow releases would not adequately provide for the recovery and maintenance of salmon populations in the Eklutna River, nor would it restore natural river processes.[20] We do not believe any of the utilities changes from the draft program to the proposed final program meaningfully alleviate the issues articulated by the state and federal fish and wildlife agencies.[21]

As such, we reject the AWWU Portal alternative because it:

1. Fails to remedy the harms to sockeye salmon and their spawning habitat that instigated the 1991 Agreement process;
2. Leaves one mile of dry riverbed that prevents fish from reaching Eklutna Lake;[22]

[21] *See* NVE Letters to USFWS and NOAA Fisheries Requesting Tribal Consultation (May 2024).
[22] Eklutna Draft Fish and Wildlife Program at 46 ("Release of water from the portal valve will provide year-round flow to 11 of the 12 river miles.").

3. Blocks access to the majority of sockeye, Chinook, and coho salmon spawning and rearing habitat in the lake and its tributaries.
4. Delivers inadequate flows for fish below the Eklutna Lake dam;[23]
5. Ignores the requests of the Eklutna Dena'ina for the recovery of a natural river after 94 years of harm;
6. Jeopardizes the Anchorage drinking water system; and,
7. Burdens ratepayers and taxpayers with up to $72 million in unnecessary cost increases. [24]

The "limited reopeners" proposed by the utilities are mere apparitions of action and are completely discretionary. As such, they do not constitute actual provisions of a fish and wildlife program but are merely statements of potential action for future utility boards to consider. The fish passage reopener is the worst of the reopeners. It specifically makes it *more difficult* to implement fish passage in the future because of the addition of novel criteria and funding barriers that are nowhere to be found in the 1991 Agreement.

NVE's Proposed Alternative Final Program

NVE's proposed alternative final program is guided by the following principles:

- We seek a fair balance of energy production, drinking water protection, river conservation, public recreation, and cultural restoration.
- The Eklutna River must flow with adequate water for abundant salmon habitat, continuously and without interruption from its source to the sea.
- Fish must be able to freely swim the entire length of the Eklutna River, upstream to the lake and its headwater tributaries and back downstream.
- A healthy salmon population will support a thriving personal use and sport fishery, boosting the local and regional economy.
- Restoration of the Eklutna River and its fisheries will address 100 years of cultural harm to the Eklutna Dena'ina and enhance Southcentral Alaska.

Following our principles, we propose the following alternative final program:

1. Alternative "Eklutna River Release Facility"
    a. Construct a pump station that takes water directly from the bottom of Eklutna Lake and discharges it at the glacial moraine area upstream of the dam. The water would be released downstream through the existing dam outlet gate instead of the AWWU Portal Valve facility.[25]
    b. This alternative system would provide continuous instream flow to all 12 miles of the Eklutna River below the dam, operate completely independent from any existing AWWU or hydropower infrastructure, and support future fish passage by ensuring that AWWU can maintain its full drinking water withdrawals.
    c. The Eklutna Project Owners would have two years from your decision to design and permit the facility (no later than Oct. 2, 2026) and two more years for construction and implementation (no later than Oct. 2, 2028).

[23] *See, e.g.*, USFWS, Upper Eklutna River Survey Preliminary Fish Habitat Flow Assessment; *see also*, *e.g.*, Trout Unlimited, Eklutna River Workshop: Summary of Outcomes, Recommendations, and Future Needs at 4-6.
[24] Eklutna Draft Fish and Wildlife Program at 64.
[25] *See* Alternative Eklutna River Release Facility Engineering Drawings and Description (2024). If this can be achieved through a gravity system without pumps, we are amenable to that solution.

2. Existing Outlet Gate & Other Infrastructure Improvements
    a. Automate the existing outlet gate at the Eklutna Lake dam as proposed by the utilities following the same implementation schedule as the Alternative Eklutna River Release Facility (implemented no later than Oct. 2, 2028).
    b. Construct new AWWU bridges as proposed by the utilities, but to have the hydraulic capacity for a free-flowing river, also following the same implementation schedule as the Alternative Eklutna River Release Facility (implemented no later than Oct. 2, 2028).

3. Mandatory 1991 Agreement Reopener for Dam Removal or Other Fish Passage Solution No Later than 2034
    a. No later than ten years from your decision (Oct. 2, 2034), the Project Owners must reopen the 1991 Agreement and follow the process called for in sections 2 through 6, proposing a solution to the Governor of Alaska that meets our resource goal principles that "fish must be able to freely swim the entire length of the Eklutna River, upstream to the lake and its headwater tributaries and back downstream" and "the Eklutna River must flow with adequate water for abundant salmon habitat, continuously and without interruption from its source to the sea."[26]
    b. While any solution that meets these resource goal principles may be considered in the reopener, our preferred solution is the removal of Eklutna Lake Dam.[27]

4. Waters Flows, Water Budget & Monitoring and Adaptive Management Plan
    a. We do not believe the flow regime in the utilities proposed final program is adequate to attract, maintain, and recover fish nor restore natural river processes.[28] However, should you adopt all of the core components outlined above, we are willing to accept the utilities' inadequate proposed year-round instream flow regime, as well as the channel maintenance flow regime, the annual water budget, and the monitoring and adaptive management plan as proposed until the dam is removed or other acceptable fish passage solutions are implemented. The Alternative Eklutna River Release Facility and the automated existing outlet gate must deliver this flow regime.
    b. The flows would be implemented once the Alternative Eklutna River Release Facility was completed and no later than Oct. 2, 2028.

5. Seek Federal Funding
    a. The Native Village of Eklutna will assist in seeking federal funding through grants and/or direct appropriation from the federal government in partnership with the Eklutna Project Owners to implement this program, reducing the burden of Alaska residents and governments to levy additional burdensome taxes and utility rate increases.

6. Adaptive Management Committee Membership

[26] Per section 7 of the 1991 Agreement, the Project Owners may reopen the 1991 Agreement at any time.
[27] *See* NVE's letter to Samantha Owen Re: Technical Risk Assessment of the Removal of Eklutna Dam (April 9, 2024).
[28] *See* CEA, MEA, MOA, Supporting Information Document at 40, 41 (April 2024) (we believe that the Year-Round Instream Flow Regimes and Channel Maintenance Flows alternatives proposed by NMFS, USFWS, TCF, TU, and NVE are supported by scientific expert flow studies (*see supra* note 22) and would provide the minimum flow amounts necessary to recover and maintain salmon in the Eklutna River).

a. As proposed by the utilities, NVE shall be a permanent voting member of the Eklutna River Adaptive Management Committee, which can propose changes to the flow regimes to increase further and improve fish and river restoration.

We believe our alternative proposed final program is the best compromise: continuing to allow the Eklutna Project to provide needed power to the Railbelt in the short term while protecting Anchorage's water supply and taking a phased but timely approach to transitioning to full fish passage and recovery in the Eklutna watershed.

The Eklutna Hydroelectric Project only produces ~2-4% of the Railbelt's power supply. While we understand the need to avoid putting any more strain on the Railbelt's power mix right now, over the next decade, continued electric grid improvements and efficiencies, installation of battery banks, large-scale new alternative renewable energy sources, and more will make the small amount of energy produced by Eklutna hydroelectric power ever more inconsequential, and certainly unnecessary to continue to sacrifice this river and the tremendous salmon restoration opportunity possible. The utilities certainly can and should plan for a future without Eklutna. It's time for a new future for the Eklutna River, replacing a destructive power project of diminishing importance with a thriving personal use and sport fishery in the heart of Southcentral Alaska.

With agreement from all signatories to the 1991 Agreement, we would also support a two-year extension of the 1991 Agreement process to continue to collaboratively explore alternatives that would adequately meet the purpose, intent, and requirements of the 1991 Agreement, as requested by the Anchorage Assembly.[29]

Conclusion

The utilities' Proposed Final Program to maintain a dead-end river is inadequate to protect, mitigate, and enhance the Project's harm to fish and wildlife. Adequate and equitable fish and wildlife protection, mitigation, and enhancement require the lake and upper tributary streams to be connected to the lower river and adequate flows for salmon to thrive. Without more meaningful measures, fish in the Eklutna River will continue to exist only in exceedingly low numbers and will not be able to recover, let alone flourish. As such, we respectfully request that you consider our proposed alternative to comply with the Agreement's purpose, intent, and requirements and provide myriad public interest benefits, including restoring fish to the Eklutna watershed for our people and all Alaskans to enjoy.

Łiq'a nagh qinqtudeł – We are hopeful the salmon will return to us.

Exhibit 4

Municipality of Anchorage
Mayor Suzanne LaFrance

July 22, 2024

The Honorable Mike Dunleavy
Governor of Alaska
Office of the Governor
P.O. Box 110001
Juneau, AK 99811

Governor Dunleavy:

I write to you in a spirit of collaboration and opportunity for Southcentral Alaska.

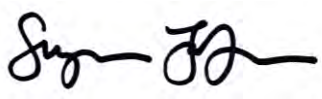
While we are often facing difficult tradeoffs, we have an opportunity before us now to achieve simultaneous goals: a reliable, affordable energy future in Southcentral Alaska; continuous water flow in the Eklutna River; and a reliable drinking water supply for Anchorage residents. We can achieve these goals if we work creatively and collaboratively.

Attached you will find comments from the Municipality of Anchorage (MOA), the majority owner of the Eklutna Hydroelectric Project, in response to stakeholder comments received regarding the Proposed Final Fish and Wildlife Program.

The Municipality of Anchorage is aligned in our position and in our ask, as detailed in the attached letter and Assembly Resolution – AR 2024-218 (S). We ask that you consider a final program that requires the owners to use two years of the three-year pre-implementation period to identify an alternative infrastructure and engineering solution for the Eklutna Hydroelectric Project. Our goal is not mere delay, but for the time to work together with the other owners and stakeholders toward a better solution.

I thank you and your team for the work you do, and look forward to more collaboration ahead on behalf of Alaskans.

Sincerely,



Mayor Suzanne LaFrance

AR No. 2024-218(S), As Amended

A RESOLUTION OF THE ANCHORAGE ASSEMBLY FORMALLY SUBMITTING ITS COMMENT AS THE MAJORITY OWNER OF THE EKLUTNA HYDROELECTRIC PROJECT AS REQUIRED BY 1991 FISH AND WILDLIFE AGREEMENT INCLUDING A REQUEST FOR A TWO-YEAR EXTENSION TO RESOLVE DISAGREEMENTS REGARDING THE PROPOSED FINAL FISH AND WILDLIFE PROGRAM OF THE EKLUTNA HYDROELECTRIC PROJECT FOR GUBERNATORIAL APPROVAL.

WHEREAS, the Municipality of Anchorage, Chugach Electric Association (CEA), and Matanuska Electric Association (MEA) (collectively "the Hydroelectric Project Owners") jointly own the Eklutna Hydroelectric Project and are parties to the 1991 Fish and Wildlife Agreement (the "1991 Agreement") with the State of Alaska, the U.S. Fish and Wildlife Service, and the National Marine Fisheries Service (an agreement that notably excludes a key stakeholder, the Native Village of Eklutna ("NVE"), the federally recognized tribe whose ancestral homelands are encompassed by this project) to fund studies to examine and quantify the impacts of the Eklutna Power Project on fish and wildlife; examine and develop proposals for the protection, mitigation, and enhancement of fish and wildlife affected by such hydroelectric development; and prepare a Proposed Final Fish and Wildlife Program (the "Fish and Wildlife Program") for approval by the Governor; and

WHEREAS, if approved by the Governor, the Proposed Fish and Wildlife Program will have significant impacts on the operations of the Eklutna Hydroelectric Project and the Anchorage Water and Wastewater Utility ("AWWU"), as well as Anchorage taxpayers and ratepayers for the next 35 years; and

WHEREAS, the 1991 Agreement directs the Governor to give equal consideration to the purposes of

- efficient and economical power production,
- energy conservation,
- the protection, mitigation of damage to, and enhancement of fish and wildlife (including related spawning grounds and habitat),
- the protection of recreation opportunities,
- municipal water supplies,
- the preservation of other aspects of environmental quality,
- other beneficial public uses, and
- requirements of State law;

and

WHEREAS, in their Proposed Final Fish and Wildlife Program to mitigate their impacts to fish and wildlife pursuant to the 1991 Agreement, the Chugach Electric Association and Matanuska Electric Association propose to utilize AWWU

infrastructure to deliver water into the Eklutna River via a Portal Valve (the "Portal Valve Alternative") one mile downstream of Eklutna Lake, leaving that mile dewatered and impassable to salmon; and

WHEREAS, the policy of the Municipality of Anchorage has been to support restoration of the full length Eklutna River since the Anchorage Assembly adopted AR 2017-324(S), "A Resolution in Support of Efforts to Restore the Eklutna River," AR 2022–262, As Amended, "A Resolution of the Anchorage Municipal Assembly in Support of Efforts to Restore the Eklutna River," and AR 2024-40, As Amended, "A Resolution of the Anchorage Assembly Submitting Public Comment on the Draft Fish and Wildlife Program for the Eklutna Hydroelectric Project"; and

WHEREAS, through the passage of AO 2023-131, As Amended, the Assembly, through the creation of a specific law enacting Anchorage Municipal Code section 26.30.025, reinforced and declared that it is the official policy of the Municipality of Anchorage, inclusive of the Anchorage Hydropower Utility, to "restore the continuous water flow of the Eklutna River and the fish populations of the River and Eklutna Lake, to the greatest extent possible, subject to all provisions of the 1991 Agreement"; and

WHEREAS, the Assembly, through the passage of both AR 2024-40, As Amended, and AR 2024-182(S-1), has repeatedly requested the other Hydroelectric Project Owners to seek a two-year extension of the 1991 Agreement from the signatories to perform additional analysis, consultation, and coordination with affected parties, including the Anchorage Assembly and the Native Village of Eklutna; and

WHEREAS, on April 26, 2024, the former mayor submitted a letter in support of the Eklutna Hydroelectric Project, however, those comments were not adopted or approved by the Assembly as required by AMC 26.30.025 and cannot be considered official comments of the Municipality as a matter of law; and.

WHEREAS, on July 2, 2024, a Director of the Anchorage Hydropower Utility was appointed by Mayor LaFrance and was confirmed by the Assembly through AM 550-2024; this Director is a licensed professional engineer with extensive experience in utility operations and knowledge of the Railbelt generation and transmission systems, and is the Municipality's voting seat on the Eklutna Hydroelectric Project owners' group which has been vacant in recent years disenfranchising the Municipality of its vote; and

WHEREAS, with the appointment and confirmation of this Director, the Municipality of Anchorage has filed expediently with the Regulatory Commission of Alaska ("RCA") a notice and request for acknowledgment of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee, submitted to the RCA on July 18, 2024, that the Municipality has acquired the expertise required to fully participate as a voting member of the Eklutna Operating Committee and regain its 53.33% voting right; now, therefore

THE ANCHORAGE ASSEMBLY RESOLVES:

Section 1. For the reasons described in this Resolution, in addition to the process

and technical concerns put forth through AR 2024-182(S-1), the Anchorage Assembly requests the Governor attempt to reconcile differences between the parties as called for in the 1991 Agreement by establishing a final program that requires the owners group use two years of the three-year pre-implementation period to identify an alternative infrastructure and engineering solution to ensure continuous water flow to all 12 miles of the Eklutna River. Since the AWWU Portal Valve must not be used to implement this measure, this will enable the owners to define and develop a practical alternative that will:

- Ensure river restoration of continuous waterflow to all 12 miles of the Eklutna River,
- Protect drinking water supply for Anchorage residents, and
- Further contribute to a reliable, affordable energy future for Southcentral Alaska.

We also urge the Governor to remove the "limited reopeners" from the final program to enable the owners to remain open on an ongoing basis to additional river restoration solutions as technology and conditions evolve. The MOA's position is clear: the proposed final Program should not be adopted in its current form. Ultimately, the policy direction of the Eklutna River should reflect the will of Anchorage residents, who will bear significant financial, social, and environmental costs of the final restoration plan into the future.

Section 2. The Anchorage Assembly hereby finds the letter attached to AM 557-2024 from Mayor LaFrance to Governor Dunleavy dated July 19, 2024, regarding this matter is aligned with the official adopted policy of the Municipality and approves the comments therein.

Section 3. This resolution shall be effective immediately upon passage and approval by the Assembly.

PASSED AND APPROVED by the Anchorage Assembly this 19th day of July, 2024.

Christopher Constant

Chair

ATTEST:

Municipal Clerk

MUNICIPALITY OF ANCHORAGE

Assembly Memorandum

No. AM 557- 2024 (A)

Meeting Date: July 19, 2024

From: **MAYOR**

Subject: Comments to the Governor from the Municipality of Anchorage, in response to stakeholder comments to the Eklutna Hydroelectric Project's Proposed Final Fish and Wildlife Program put forth on April 25, 2024.

Attached are the Mayor's updated comments for submittal to the Governor from the Municipality of Anchorage, the majority owner of the Eklutna Hydroelectric Project, in response to stakeholder comments to the Proposed Final Fish and Wildlife Program put forth on April 25, 2024. Pursuant to AMC 26.30.025B.2., as amended by AO 2024-28, these comments are put forth for approval by the Anchorage Assembly before the comment deadline on July 24, 2024.

Updates have been made to pp. 2-3 of the mayor's July 15 letter to the governor. The updated version, dated July 19, clarifies the Municipality's request to the governor to establish a final program that requires the owners to use two years of the three-year implementation period to identify an alternative infrastructure and engineering solution to ensure continuous water flow to all 12 miles of the Eklutna River.

THE ADMINISTRATION RECOMMENDS APPROVAL.

Prepared by:	Katie Scovic, Chief of Staff
Approved by:	Lance Wilber, Acting Municipal Manager
Concur:	Mark Corsentino, Anchorage Hydropower Director
Concur:	Eva Gardner, Municipal Attorney
Respectfully submitted:	Suzanne LaFrance, Mayor

Municipality of Anchorage
Mayor Suzanne LaFrance

July 19, 2024

The Honorable Mike Dunleavy
Governor of Alaska
Office of the Governor
P.O. Box 110001
Juneau, AK 99811

Governor Dunleavy:

I write to you on behalf of the Municipality of Anchorage (MOA), the majority owner of the Eklutna Hydroelectric Project. On April 25, 2024, Chugach Electric Association and Matanuska Electric Association, on behalf of the Eklutna Hydroelectric Project Owners, submitted to you a Proposed Final Fish and Wildlife Program.

Stakeholders subsequently provided comments on the proposed Program. This letter represents the MOA's formal response to the stakeholder comments received.

Under prior mayoral administrations, the MOA lost its right to vote on the Owners' Council and thus did not have the option to approve or disapprove the proposed Program; but my Administration is working to regain the MOA's vote, which reflects a majority ownership.[1]

The MOA has, by law, adopted an official position on Eklutna River restoration:

> It is the policy of the Municipality of Anchorage and the Anchorage Hydropower utility to restore the continuous water flow of the Eklutna River and the fish populations of the River and Eklutna Lake, to the greatest extent possible, subject to all provisions of the 1991 Fish and Wildlife Agreement.[2]

It is also a priority of my Administration to protect our local water supply and ensure a reliable energy future for Anchorage residents.

In this, the MOA is aligned with the Native Village of Eklutna (NVE). In its comments, NVE notes that it, like the MOA, "seek[s] a fair balance of energy production, drinking water protection, river conservation, public recreation, and cultural restoration."

Of note, the majority of comments submitted by stakeholders express doubt about whether the optimal "balance" between these interests would actually be achieved by the alternative advanced

[1] As part of the 2018 sale of Municipal Light & Power to Chugach Electric, Inc., the Regulatory Commission of Alaska (RCA) required the Municipality to temporarily surrender its vote on all matters regarding the implementation of the 1991 Fish and Wildlife Agreement until the Municipality hired a qualified manager for the Anchorage Hydropower utility. The Anchorage Assembly currently has a challenge to the legality of the RCA's order pending in Alaska Superior Court (Case No. 3AN-24-06001CI), and, additionally, the Municipality has placed Mark Corsentino in that role and filed with the RCA to regain its vote (Notice and Request for Acknowledgement of Anchorage Hydropower's Acquisition of Expertise Required to Participate as a Voting Member of the Eklutna Operating Committee, submitted to the RCA on July 18, 2024).

[2] Anchorage Municipal Code 26.30.025A.

by the proposed Program.

The current Proposed Final Fish and Wildlife Program would not result in a "continuous water flow of the Eklutna River," or restoration of "fish populations...to Eklutna Lake."[3] The agencies that submitted stakeholder comments recognized that the proposed Program therefore "has limitations" [4] and "does not meet the goal of full ecosystem connectivity."[5] They expressed preferences for an alternative that would "re-water[] the river with staged implementation of meaningful mitigation measures to support restoration and resilience of salmon runs in the Eklutna River watershed,"[6] and "[return] flows to the river that provide wetland connectivity, both instream and off-channel spawning and rearing habitats, and the return of salmon runs and marine derived nutrients into the entire river, lake, and its tributaries."[7]

Alternatives that would preserve power production while also resulting in this majority-preferred "continuous water flow" were proposed. As a result of time pressures, at least one received only an "initial analysis."[8]

My Administration believes that all practical alternatives to the proposed Program should be fully developed. Some of these alternatives have already been identified. The best alternative may not yet be discovered.

It is incumbent upon us to take the time to convene the necessary stakeholders and seriously consider practical alternatives to the proposed Program—including those, as yet generally undeveloped, that could lead to better outcomes.

The 1991 Agreement gives you the authority to establish the final program, which could incorporate and include further process. The 1991 Agreement also states: "The Governor shall attempt to reconcile any differences between the parties."[9]

The Municipality respectfully requests that you consider its position and reconcile the Parties' differences by establishing a final program that requires the owners to use two years of the three-year pre-implementation period to identify an alternative infrastructure and engineering solution to ensure continuous water flow to all 12 miles of the Eklutna River. This will enable the owners to define and develop a practical alternative that will:

- Ensure continuous water flow to all 12 miles of the Eklutna River,
- Protect drinking water supply for Anchorage residents, and
- Further contribute to a reliable, affordable energy future for Southcentral Alaska.

In addition, the "limited reopeners" in the proposed final Program are unnecessary, as under the existing 1991 Agreement, the Owners can and should remain open on an ongoing basis to additional river restoration solutions as technology and conditions evolve. We propose you

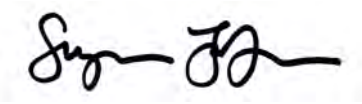
remove the limited reopeners from the final program to ensure clarity on this point.

Ultimately, the Proposed Final Program should reflect the will of Anchorage residents, who will bear significant financial, social, and environmental costs of the final restoration plan for the next several decades.

MOA welcomes the opportunity to collaborate with your administration and stakeholders to identify a productive path forward.

Respectfully,



Mayor Suzanne LaFrance

1.0 Introduction

The Eklutna Hydroelectric Project (Project) is located in Southcentral Alaska, approximately 30 miles northeast of downtown Anchorage near the Native Village of Eklutna (NVE). The federal government completed construction of the Project in 1955. Decades later, Chugach Electric Association (CEA), Matanuska Electric Association (MEA), and the Municipality of Anchorage (MOA) (Project Owners) agreed to purchase the Project and entered into a Purchase Agreement with the federal government in 1989. Shortly thereafter, concerns were raised about the Project's potential impacts on fish and wildlife. This led to the execution of a binding agreement in 1991 (1991 Agreement) amongst the Project Owners, National Marine Fisheries Service (NMFS), U.S. Fish and Wildlife Service (USFWS), and the State of Alaska (Parties) that requires the Project Owners to, beginning no later than 25 years after the Project sale, and every 35 years thereafter: (1) study the Project's impacts to fish and wildlife, (2) develop proposals for the protection, mitigation, and enhancement of fish and wildlife affected by the development of the Project, (3) consider the impact of fish and wildlife measures on electric rate payers, municipal water utilities, recreational users and adjacent land use, and (4) identify available means to mitigate these impacts.

The Project Owners initiated the process required in the 1991 Agreement for the first time in March 2019. After four years of consultation, studies, and alternatives analysis, the Project Owners issued a Draft Fish and Wildlife Program (Draft Program) in October 2023 as required by the 1991 Agreement. The Project Owners met with the Parties and NVE several times from December 2023 through April 2024 to attempt to resolve differences, as required by the 1991 Agreement.

The Project Owners also held six public meetings in January 2024 to solicit public comments. After considering all comments received and giving due weight to the recommendations and expertise of the Parties and NVE, the Project Owners developed the Proposed Final Fish and Wildlife Program (Proposed Final Program) and submitted it to the Governor on April 25, 2024.[1] The schedule outlined in the 1991 Agreement calls for Governor issuance of a Final Fish and Wildlife Program no later than October 2024.

The 1991 Agreement allows a 60-day period during which the other Parties to the 1991 Agreement may review the Proposed Final Program and submit comments to the Governor.

[1] While the MOA did not sign on to submission of the Proposed Final Program given the fact that they did not have decision-making authority with respect to the 1991 Agreement, Anchorage Mayor Dave Bronson, who was mayor during the development of the Proposed Final Program, submitted a letter to the Governor in support of the Proposed Final Program on April 26, 2024 in his role representing the MOA as a Project Owner-Party to the 1991 Agreement.

Two non-Project Owner Parties to the 1991 Agreement, NMFS and USFWS, submitted public comment letters on the Proposed Final Program on June 21, 2024, and June 24, 2024, respectively. In addition, NVE submitted comments on June 21, 2024, and the Anchorage Assembly (Assembly) submitted comments on June 26, 2024.

The 1991 Agreement allows the Project Owners a 30-day period in which to respond to comments on the Proposed Final Program. This document sets forth the Project Owners' responses to the four comment letters on the Proposed Final Program.

2.0 Short Summary of Proposed Final Program

The Project Owners' Draft Program included the following fish and wildlife protection, mitigation, and enhancement measures:

- Construction of an Eklutna River Release Facility to provide year-round instream flows to the Eklutna River, and establishment of a default flow regime and water budget for year-round instream flows;
- Automation of the existing outlet gate at the dam to provide periodic channel maintenance flows in the Eklutna River, and establishment of a default schedule and water budget for periodic channel maintenance flows;
- Construction of eight new bridges along the Anchorage Water and Wastewater Utility (AWWU) access road to enable AWWU's access to critical infrastructure year-round following the establishment of instream flows;
- Establishment of a Committee to oversee implementation of the Monitoring and Adaptive Management Plan (Committee), which would include the resource management agencies and NVE;
- Funding to conduct monitoring studies in the Eklutna River throughout the 35-year program;
- Procedures for the Committee to adaptively manage the flow regime in the Eklutna River based on the monitoring results; and
- Provisions for the Committee to bank water in Eklutna Lake.

The Project Owners met with the Parties and NVE several times from December 2023 through April 2024 to attempt to resolve differences. These good faith discussions led to significant changes to the Draft Program, which are reflected in the Project Owners' Proposed Final Program. These changes included:

- Adding a funding commitment for lakeside trail repairs;
- Having the Committee chair be elected by members of the Committee, instead of designated by the Governor;
- Adding a commitment for the Project Owners to participate in the Committee as non-voting members;

- Increasing the funding commitment for monitoring studies;
- Specifying that ADFG would implement the monitoring studies as directed by the Committee;
- Adding a commitment for the Committee to define success criteria that will inform monitoring and adaptive management decisions;
- Combining the water budgets for instream flows and channel maintenance flows in order to provide as much flexibility as possible;
- Increasing the Committee's ability to bank water in the reservoir;
- Increasing the Committee's ability to request changes to the flow regime;
- Adding procedures for allocating any additional inflows to the reservoir in the future, which will be split 50/50 between instream flows and hydropower;
- Adding a funding commitment for physical habitat enhancement focused on fish rearing habitat;
- Adding a commitment for the Project Owners to conduct a more detailed feasibility study for the fixed wheel gate, and a limited reopener for implementing the fixed wheel gate 10 years after initiating instream flows; and
- Adding a framework for the Committee to continue discussions regarding potential fish passage into and out of Eklutna Lake, and a second limited reopener (in addition to the fixed wheel gate reopener) for fish passage 10 years after initiating instream flows or anytime thereafter.

Governor approval of the Proposed Final Program as the Final Fish and Wildlife Program will enable the Project Owners to implement these significant fish and wildlife measures at the Project, while simultaneously protecting the municipal water supply and continuing to provide low cost, renewable energy to Southcentral Alaska.

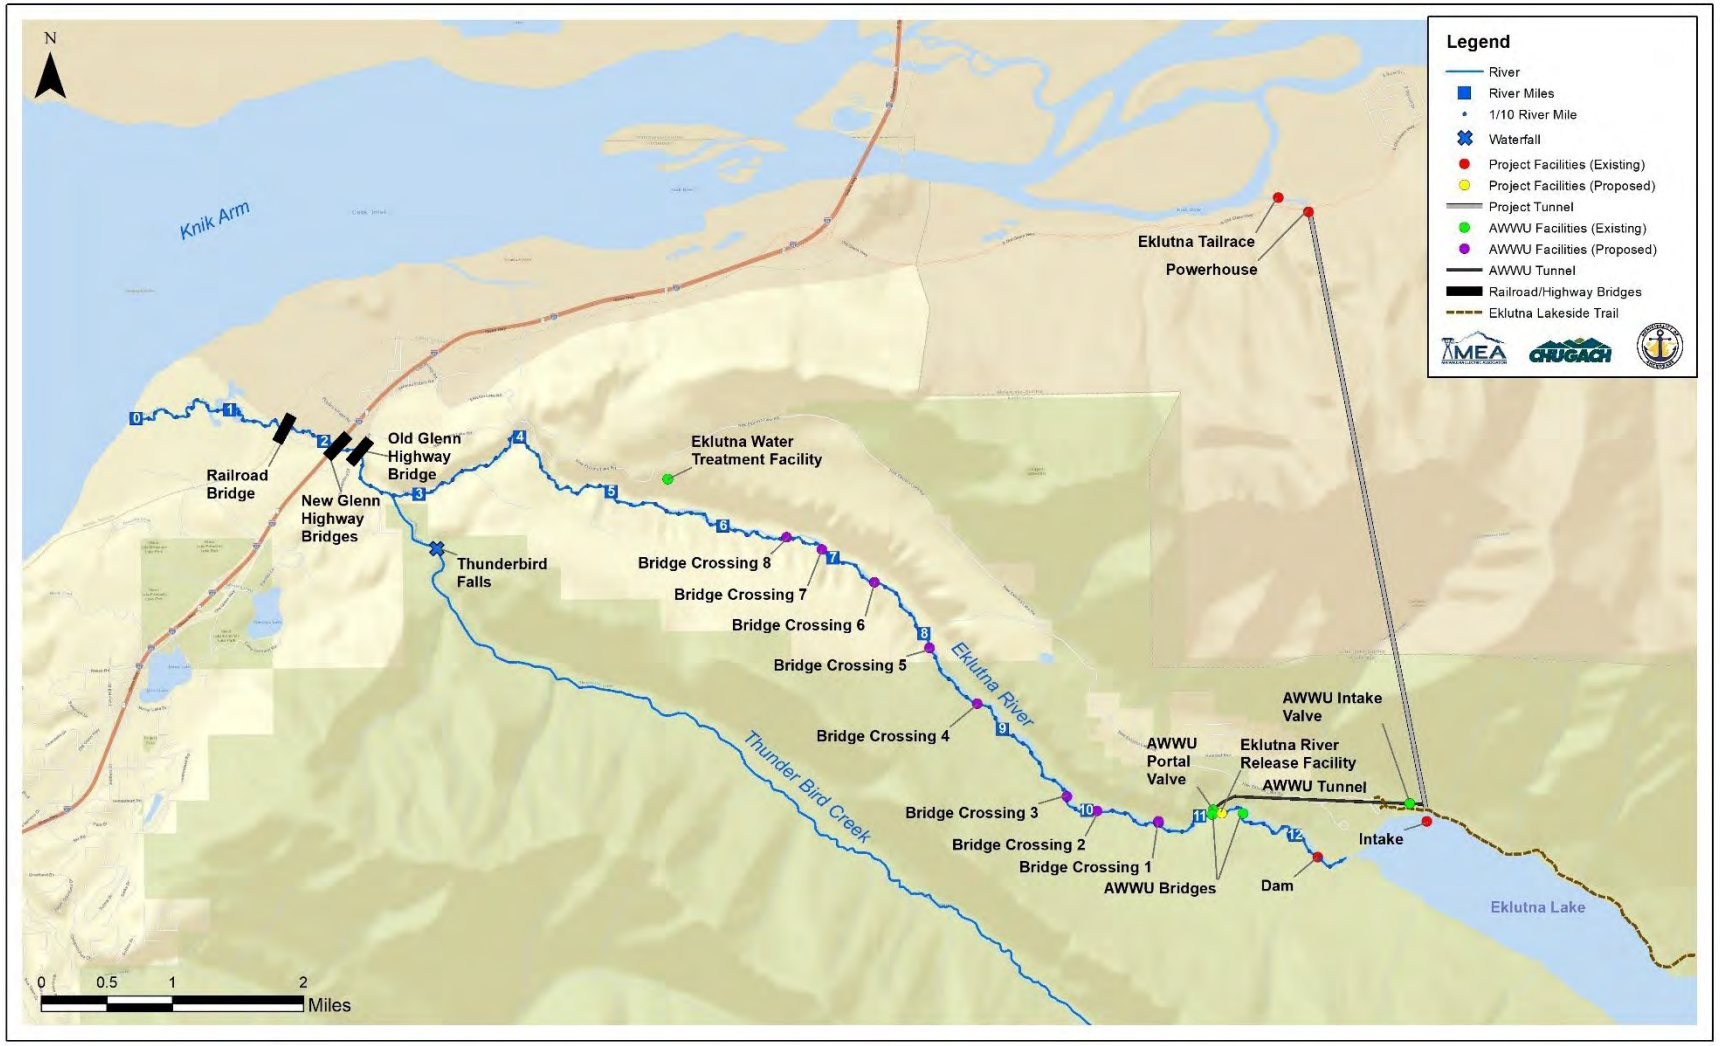

Figure 2-1. Existing and Proposed Infrastructure.

3.0 Response to Comments Submitted by Parties to the 1991 Agreement

Two non-Project Owner Parties to the 1991 Agreement submitted public comment letters on the Proposed Final Program: NMFS on June 21, 2024, and USFWS on June 24, 2024. The comment letters from the federal agencies followed a similar cadence. Both agencies reiterated their overall resource management goals, described their preferred alternatives, compared their preferred alternatives to the Proposed Final Program, and described how the Proposed Final Program met many of their resource management goals. In addition, both letters identified some limitations of the Proposed Final Program, but they also acknowledged the reason for these limitations and the need to balance the associated costs and impacts to hydropower generation. Finally, both agencies made one additional request to modify the limited reopener for the fixed wheel gate. This request for modification and the areas of agreement are described below in more detail.

3.1 Agencies' Agreement on Components on Proposed Final Program

In their letter, NMFS stated that the Proposed Final Program "includes provisions supporting habitat restoration initiatives" and that "several provisions will support near-term and long-term mitigation actions, such as the mitigation and monitoring funds, overseen by the Monitoring and Adaptive Management Committee, and the future flows allocation provision." They acknowledge that these provisions will take time to complete; however, they anticipate that these provisions, once completed, "will have substantive results toward mitigating Project related effects." NMFS concluded that the Proposed Final Program "provides a framework to initiate the protection, mitigation and enhancement of fish and wildlife resources, and will support the next iteration of a mitigation plan" in 35 years. They also "look forward to assisting in the implementation of the Program as proposed."

At multiple points in their letter, NMFS acknowledged the Project Owners' efforts to address their concerns and resource management goals in the Proposed Final Program. For example, NMFS stated that "the climate change related provisions for potential new infrastructure, such as a new gate at the dam, and water allocations… address the messages of the Fifth National Climate Assessment for Alaska and our overall management interests." NMFS also pointed out their concern that one mile of the river below the dam will remain dewatered, and that the proposed flows are less than their preferred alternative. But they also acknowledged that as a means to address this concern, the Proposed Final Program "includes an adaptive management strategy that adjusts the overall mitigation water budget based on future inflows to Eklutna Lake. This adaptive and forward-looking approach considers a changing

environment to support the long-term advancement of mitigating Project related impacts on fish and wildlife while balancing water availability for hydropower generation."

Similarly, the USFWS recognized "the reality of the current infrastructure's constraints on instream and maintenance flows and the high capital investment necessary for a new dam and fish passage structures." Therefore, in September 2023, they requested "a phased approach to fish passage and ecosystem connectivity, whereby water would be returned to the river as soon as possible, with additional time provided for planning, fund raising, and construction." They go on to state that the Proposed Final Program, with the commitment of all stakeholders, could be an interim step to reconnecting the river, consistent with their request for a phased approach.

Both agencies pointed out that the 1991 Agreement was designed to function "at least as well as Federal regulation for the intended purpose of mitigation and enhancement of affected fish and wildlife resources." However, they also acknowledged that they do not have authority to prescribe fish passage under the 1991 Agreement, and that the Federal Energy Regulatory Commission (FERC) does not have jurisdiction over the Project. That said, they both consider the fish passage limited reopener in the Proposed Final Program to be analogous to reserving their authority to prescribe fish passage under Section 18 of the Federal Power Act (FPA), and the USFWS further states that they "appreciate the Owners including a mechanism to explore fish passage opportunities in the future."

The Project Owners appreciate the federal agencies' continued participation in this process and feel that their valuable input has led to a more robust and balanced Proposed Final Program, and the Project Owners look forward to continuing to work with both federal agencies during implementation.

3.2 Agencies' Request for Modification of Proposed Final Program

The Proposed Final Program includes a provision for the Project Owners to conduct a detailed feasibility study of a new fixed wheel gate at the existing dam (including a stability analysis and Class 3 cost estimate). If the new gate is structurally feasible and monitoring efforts during the defined 10-year period indicate that average annual inflows to the lake have increased by 20,000 acre-feet or the Committee determines that higher channel maintenance flows are warranted to maintain spawning gravels, then the Project Owners will commit up to $10M in 2024 U.S. dollars to install the new gate.

The NMFS recommended one change to the Proposed Final Program in reference to the funds for a fixed wheel gate: "If the feasibility study indicates the dam is insufficiently stable to support a new gate structure and this action does not proceed, then one of two alternatives

should be given consideration. In lieu of a new gate, we recommend further analysis for the construction of a pump station that takes water from Eklutna Lake and discharges it through, or adjacent to, the existing dam outlet gate. We reviewed the Owner's response to this alternative by NVE and understand their concerns. However, a more in-depth analysis is warranted if the feasibility study for a new gate indicates an unfavorable stability result… Alternatively, if the new gate is infeasible, the funds identified for the potential new gate should be designated for other mitigation measures related to water management for the protection, mitigation, and enhancement of fish and wildlife in the Eklutna River in coordination with the Monitoring and Adaptive Management Committee. We propose this modification to the Program to ensure the value of the negotiated mitigation program is not lost but instead may be used to improve habitat through other means."

The USFWS recommended the same change, although they did not specifically mention the pump station alternative: "If a fixed wheel gate is not found to be structurally feasible, those funds should be used for other infrastructure related to water management for protection, mitigation, and enhancement measures for fish and wildlife including impacted habitat loss and other effects related to the Project. Thus, if a fixed wheel gate is not feasible, the funding included for proposed mitigation is not lost, but instead funds may be used to improve habitat through other means."

In the event that the fixed wheel gate is not found to be structurally feasible, the Project Owners are willing to discuss with the Committee the possibility of allocating some of that funding not spent on the fixed wheel gate due to infeasibility to other mitigation activities that would, like the fixed wheel gate, benefit both fish and wildlife and Project operations, subject to board approval. Regarding the pump station proposed by NVE in April 2024, the Project Owners have since conducted a more in-depth analysis of the pump station and have decided not to adopt this alternative for reasons discussed in Section 4.4.1 of this document. The full Cost and Risk Assessment of NVE's Pump Station Alternative has been included in **Appendix D**.

4.0 Responses to Other Comments

NVE submitted comments on the Proposed Final Program on June 21, 2024, and the Assembly submitted comments on June 26, 2024. Both sets of comments disagree with the Project Owners Proposed Final Program.

The Project Owners appreciate the importance of the Proposed Final Program to NVE and the Assembly, which is why both were included in the program development process from the beginning. In June 2020, the Project Owners formally elevated NVE's participating status over all other interested non-Parties, as detailed in **Appendix A** and discussed more below. Beginning in February 2020, the Project Owners regularly presented the status of the study, consultation, and program development process to the Assembly. This included presentations in February 2020, October 2020, March 2021, June 2021, October 2021, February 2022, July 2022, November 2022, March 2023, July 2023, and December 2023.

Ultimately, despite these efforts, the process followed by the Project Owners reached outcomes that the Assembly and NVE believe do not go far enough to mitigate all impacts on fish and wildlife in the Eklutna River and on the Eklutna Dena'ina people by hydroelectric development since the 1920s. The Project Owners acknowledge this perspective but find that the Assembly and NVE's desired outcomes and obligations of the Project Owners go well beyond the scope of that required under the 1991 Agreement. While the Proposed Final Program does significantly improve habitat for fish and wildlife in the Eklutna River affected by the Project and allows the Governor to appropriately balance numerous other public interests as required by the 1991 Agreement, it is not surprising generally that a process that requires the balancing of so many objectives simply cannot fully satisfy all interested parties. There are, however, numerous statements from the Assembly and NVE in their comments that are inaccurate and not supported by facts. The Project Owners have attempted in good faith to explain and correct these inaccuracies on numerous occasions. For examples of such previous attempts, please refer to the Project Owners' letter to the Anchorage Assembly, dated February 12, 2024, attached as **Appendix B**, and Chugach's Board Chair and CEO's letter to the Anchorage Assembly, dated May 23, 2024, attached as **Appendix C**.

The Project Owners provide the following responses to the comments of both NVE and the Assembly, which have been organized by topic for ease of review due to their similarity.

4.1 Process

The Assembly states that the process engaged in by the Project Owners is not as robust as a FERC license process, the federal National Environmental Policy Act analysis, and the alternative analyses that the Assembly uses on its own capital projects. These same assertions

were made in the Assembly's AR-2024-40 (as amended). In short, how this process compares to other processes does not change the fact that the Project Owners were required by law to follow a certain process and timeline set forth in the 1991 Agreement, and which the Project Owners did, carefully and fully. Additionally, where permitted by the 1991 Agreement, the Project Owners used industry best practices, hired FERC licensing expertise, and used FERC relicensing processes to do more than required of the Project Owners by the 1991 Agreement. The Project Owners refer the Governor to their response to "Concern 1.A" in their February 12, 2024, letter (**Appendix B**) and Section 1 of Chugach's Board Chair and CEO's letter to the Anchorage Assembly, dated May 23, 2024 (**Appendix C)**. Note that Attachment 1 to **Appendix C** sets forth a short summary of the process with hyperlinks to key documents in the Project website, found at www.eklutnahydro.com. Please also see a more detailed description of the Project Owners' compliance with process requirements of the 1991 Agreement in Section 4 of the Supporting Information Document (SID).

4.2 Objectives

In their comments, NVE and the Assembly take issue with the Project Owners' treatment of the public interest objectives laid out in the 1991 Agreement. They are concerned both that the Project Owners have overreached by considering all objectives listed in the 1991 Agreement, while also alleging the Projects Owners missed objectives and purposes to the 1991 Agreement that are not there. To each such concern, the Project Owners again point to the fact that in conducting this process, they followed the 1991 Agreement to the letter. To do any less, or to read objectives into the agreement that are not there, would potentially be a violation of the rights of the Parties, rights that were negotiated carefully in 1991 leading up to the sale of the Project from the federal government to the Project Owners in 1997 and rights that informed Congressional authorization of such sale.

4.2.1 The Eight Objectives in the 1991 Agreement

NVE states that the Project Owners engaged in overreach when considering all the objectives listed in the 1991 Agreement that the Governor must weigh when reviewing of a Proposed Final Program. For reference, the Governor is required to review the Proposed Final Program as well as any comments or recommendations for alternative PME measures while giving equal consideration to:

1. Efficient and economical power production
2. Energy conservation
3. The protection, mitigation of damages to, and enhancement of fish and wildlife (including related spawning grounds and habitat)

4. The protection of recreational opportunities
5. Municipal water supplies
6. The protection of other aspects of environmental quality
7. Other beneficial public uses
8. Other requirements of State law

NVE suggests, however, that the Project Owners *should have* focused solely on objective number 3 and reserved solely for the Governor consideration objective numbers 1, 2, 4, 5, 6, 7, and 8. The Project Owners believe that creating a Proposed Final Program that ignores the impacts it has on the other objectives would be irresponsible given the Governor's responsibilities to consider all eight objectives. Further, under Section 2 of the 1991 Agreement, the Project Owners are required to conduct studies to "consider the impact of fish and wildlife measures on electric rate payers, municipal water utilities, recreational users and adjacent land use." Because the Project Owners are required to study the impacts of fish and wildlife measures on such interests and because the Project Owners are required to present a Proposed Final Program to the Governor who is then required to weigh multiple objectives when reviewing it, the Project Owners had a responsibility to develop a Program that had all such considerations and objectives in mind. The alternatives analysis exercise voluntarily conducted by the Project Owners with all of the Parties and NVE was intended to ensure that the Governor is provided with consistent, apples-to-apples comparisons of information across all evaluated alternatives as a starting point for his consideration, with the full expectation that the Governor would then conduct his own independent assessment.

4.2.2 Sockeye Restoration is Not a Requirement of the 1991 Agreement

NVE and the Assembly further take issue with the fact that the Project Owners did not read a requirement to restore sockeye salmon into the 1991 Agreement. This requirement, however, is not listed in the 1991 Agreement and to do so would have been an overreach of the Project Owners authority under the 1991 Agreement.

NVE points to a selective reading of the Divestiture Summary Report , which was written a year after the 1991 Agreement was negotiated in support of the federal legislation necessary for the federal government to sell the Project to the Project Owners. The full quote is instructive:

Specific fish and wildlife measures were not contemplated in the earlier divestiture studies and reports or in negotiations for the Purchase Agreements. This was because the projects were generally viewed as not involving fish and wildlife problems.

During reviews of the legislative proposal, loss of a sockeye salmon run that once spawned in Eklutna Lake was identified. The loss was caused by a small private power project constructed in the 1920's. The loss was not identified in pre-authorization studies for the Federal Eklutna Project and the Federal project does not include mitigation. This specific problem and the desires of the fish and wildlife agencies to provide appropriate consideration to fish and wildlife resources over the long run led to the August 7, 1991 Agreement.

The formal process to develop fish and wildlife programs is to begin no later than 25 years after the Transaction Date with formal fish and wildlife programs to be in place within 30 years for Eklutna and 35 years for Snettisham. The agreement provides for an earlier start if the parties find that to be desirable. These timing provisions are designed primarily to reduce uncertainties in financing and repayment of new debt while recognizing that known fish and wildlife concerns are not of the type that will require near future action.

Nowhere in the Divestiture Summary Report does it state that "restoring the Eklutna River to its natural habitat" or "restoring sockeye runs" is, or should be, a requirement of the 1991 Agreement. Rather, the Divesture Summary Report states that the intent of the fish and wildlife agencies in negotiating the 1991 Agreement was to "provide appropriate consideration to fish and wildlife resources over the long run" in recognition that sockeye salmon runs had been eliminated by hydroelectric development in the 1920s completely independent of the Project that the Project Owners purchased. Further, neither the 1991 Agreement nor the Divesture Summary Report place upon the Project Owners an obligation to address or remedy the damage to fish by others long before and beyond effects of the Project. Rather the Divestiture Summary Report makes clear that the Project did not eliminate sockeye runs in the Eklutna River.

4.2.3 Dam Removal

The Assembly includes comments stating that dam removal is the only alternative to meet the purpose of the 1991 Agreement.[2] While the Project Owners understand that there are some

[2] The comments that the Assembly quotes state that this is the purpose of the "Purchase Agreement" at AR No. 2024-182(S-1), 1.E.2. Based on context and the Assembly's header, the Project Owners understood this to be an error in identifying the correct agreement and is intended to reference the 1991 Agreement. The Purchase Agreement's purpose was entirely unrelated to fish and wildlife, with the sole purpose of such agreement being to facilitate the sale of the Eklutna Hydroelectric Project from the federal government to the Project Owners. Please refer to Section 2 of the Eklutna Purchase Agreement.

who wish to see the dam removed, dam removal was not the desired intent behind the 1991 Agreement. At its core, the 1991 Agreement was written and signed in support of the sale to – and continued long-term operation of the Project by – the Project Owners. It was negotiated to address concerns that impacts of the Project on fish and wildlife were not otherwise going to be accounted for if the Project remained in Federal ownership or Congress granted the Project Owners an exemption to FERC relicensing requirements related to fish and wildlife that would otherwise apply to a privately owned dam. The process required by the 1991 Agreement is clearly supposed to be repeated every 35 years – which indicates that the intent was not to remove the Project the first time the Project Owners go through the process. The Project Owners would have never entered into the 1991 Agreement and purchased the Project to operate it for 35 years and then incur the costs, risks and liabilities associated with removing the dam and decommissioning the Project. As discussed above, the 1991 Agreement balances multiple objectives in its text, and further it contemplates an indefinite repetition of the study and program development process over the life of the Project, suggesting clearly that this agreement was intended to protect, mitigate damages to, and enhance fish and wildlife over the long run in the vicinity of an operating facility.

As the Project Owners outlined in the Proposed Final Program and the SID, the Project Owners have carefully followed the process outlined in the 1991 Agreement to meet its stated objectives. The Project Owners are unable to comply with suggestions that the Project Owners ignore those stated objectives or follow those not stated as asserted by the Assembly and NVE. The Project Owners will not depart from prudent utility practices to incur costs or take on risks to attempt to satisfy objectives not in the 1991 Agreement.

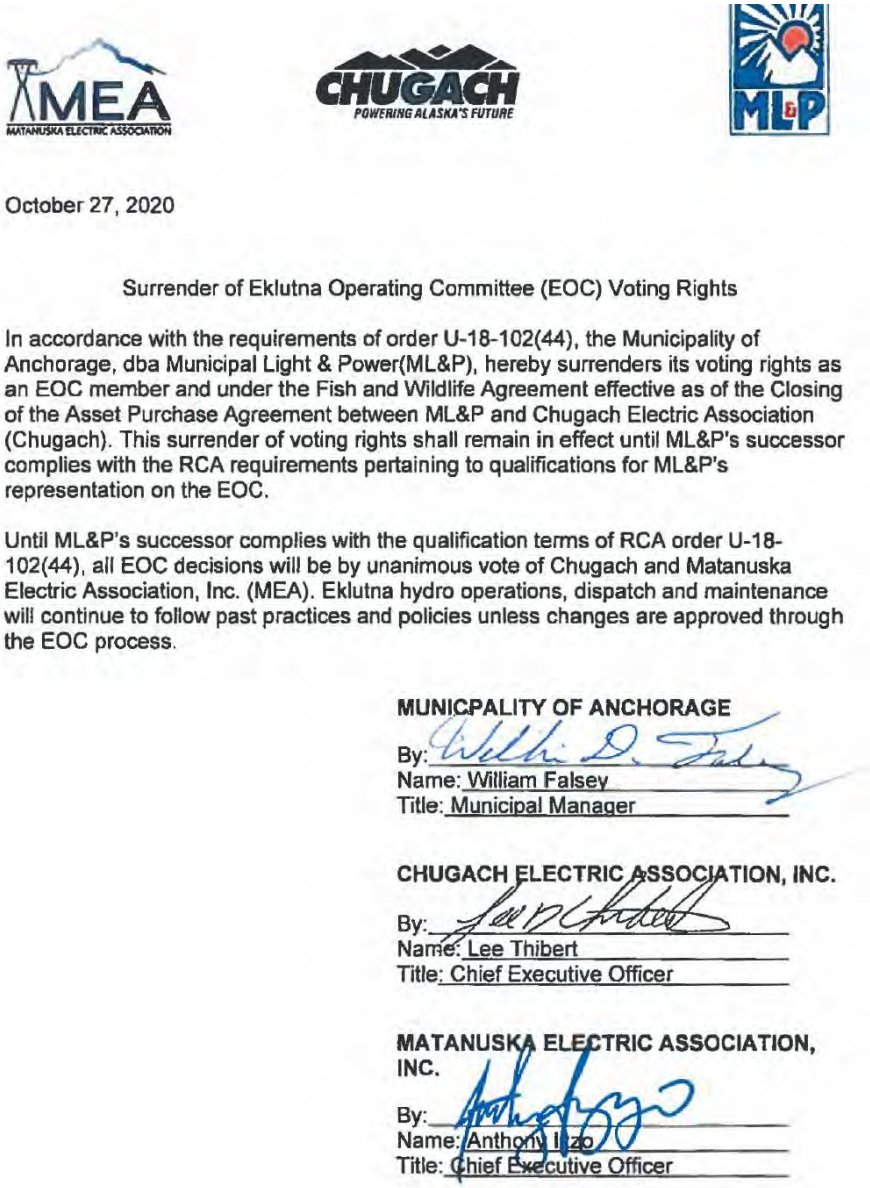
4.2.4 The Assembly's Attempt to Impose New Objectives

Through the passage of various ordinances (such as AO 2023-131, As Amended) and resolutions (such as AR 2017-342(S), AR 2022-262, As Amended, and AR 2024-182(S-1), the Assembly has attempted to impose new objectives and requirements on the Project Owners. Specifically, the Assembly has argued that the Project Owners must "restore the Eklutna River" and "restore continuous water flow of the Eklutna River and the fish populations of the River and Eklutna Lake, to the greatest extent possible. . . ." No such words or concepts appear within the four corners of the 1991 Agreement.

While the Municipality of Anchorage is a governmental entity duly organized under Alaska state law, it has no authority under the 1991 Agreement or through legislative or regulatory powers under state or federal common law to unilaterally impose new provisions into a contract to which it is one of several parties. No single party to the 1991 Agreement can simply add new provisions into the 1991 Agreement or demand that its interpretation of objectives must include objectives that do not appear in the 1991 Agreement. As explained

in Section 4.5.1 below, no provisions allowing such amendment exist within the 1991 Agreement, creating legal ambiguity about whether such an amendment requires an act of Congress.

In short, the Assembly has no special powers with respect to interpreting the 1991 Agreement or mandating any particular result. Of course, it can declare its policy position, but its policy determination pertains only to the MOA -- one of the seven parties to the 1991 Agreement. Even as one of the three Project Owners, it cannot impose its view on the other Project Owners because it surrendered its rights to determine how the 1991 Agreement would be implemented to Chugach and MEA on October 27, 2020:



October 27, 2020

Surrender of Eklutna Operating Committee (EOC) Voting Rights

In accordance with the requirements of order U-18-102(44), the Municipality of Anchorage, dba Municipal Light & Power(ML&P), hereby surrenders its voting rights as an EOC member and under the Fish and Wildlife Agreement effective as of the Closing of the Asset Purchase Agreement between ML&P and Chugach Electric Association (Chugach). This surrender of voting rights shall remain in effect until ML&P's successor complies with the RCA requirements pertaining to qualifications for ML&P's representation on the EOC.

Until ML&P's successor complies with the qualification terms of RCA order U-18-102(44), all EOC decisions will be by unanimous vote of Chugach and Matanuska Electric Association, Inc. (MEA). Eklutna hydro operations, dispatch and maintenance will continue to follow past practices and policies unless changes are approved through the EOC process.

4.3 The Project Owners' Proposed Final Program

The Assembly criticizes the Proposed Final Program for misrepresentation of data, incomplete analysis, and insufficient mitigation. These same assertions were made in the Assembly's AR-2024-40 (as amended). The Project Owners refer the Governor to their response to Concern 1.B and 1.C in their February 12, 2024 letter (**Appendix B**). Also, the Project Owners refer the Governor to Sections 3-4 of the SID which demonstrate that the Project Owners completed a thorough study program, analysis of alternatives, and engineering cost and risk analysis.

NVE criticizes the Proposed Final Program for several reasons. The Project Owners respond to each below.

"1. Fails to remedy the harms to the sockeye salmon and their spawning habitat"

Response: As overviewed above, the 1991 Agreement does not require that the Project Owners remedy harms to sockeye salmon and habitat caused by all historical hydroelectric project development in the Eklutna River. As detailed in the Initial Information Package (IIP), the Study Reports, and the SID, the sockeye salmon runs, to the extent they existed, were eliminated by the construction of a private hydroelectric dam in the 1920s, nearly three decades before the current Project was built upriver by the federal government, and more than 70 years before the Project Owners purchased the Project from the federal government. The Project Owners bear no legal or contractual *liability* for a loss that long predated the Project, and even longer predated the Project Owners' ownership of the Project, and therefore bear no legal or contractual *responsibility* to restore the sockeye salmon runs or remove all impediments to allowing sockeye salmon, should they return, to swim to Eklutna Lake or its tributaries.

Despite this lack of obligation, in order to be thorough and responsive to community requests, all fish passage measures proposed by NVE, NMFS, USFWS, and other stakeholders were evaluated during the study program and alternatives analysis. All of the volitional upstream fish passage measures that were evaluated either (1) would have significant impacts to the hydropower project (i.e., would reduce the storage capacity of the reservoir by approximately 40% or would require the Project powerhouse to be shutdown throughout the winter when energy is needed most), or (2) were found to be cost prohibitive (the estimated present worth for the stakeholders' preferred alternatives that included volitional fish passage ranged from $221M to $385M including capex, operations and maintenance, and replacement energy). In addition, there are still significant concerns regarding the effectiveness of all the downstream fish passage facilities studied (i.e., low attraction flow velocities and/or the inability to operate

the downstream fish passage facilities while the lake is frozen over). Therefore, fish passage measures are not proposed at this time.

Nonetheless, the Project Owners recognize that fish passage may become feasible in the future and that fish passage is important to NVE and the federal resource management agencies. The Project Owners have therefore included a limited reopener for fish passage in the Proposed Final Program, which provides an opportunity 10 years after flows begin to assess whether fish passage measures are warranted and technically feasible. If, for instance, sockeye salmon return to the Eklutna River and travel in numbers sufficient to warrant investigation of fish passage, the Committee is specifically charged with initiating that investigation. As noted in the NMFS and USFWS letters, the Project Owners believe that the Proposed Final Program is a significant first phase of measures as part of a long-term program.

"2. Leaves one mile of dry riverbed that prevents fish from reaching Eklutna Lake"

Response: The Project that the Project Owners purchased, and that had been in operation at that time for over 40 years, eliminated the flow of water from Eklutna Lake into the Eklutna River. The water is instead primarily used for Anchorage drinking water and hydroelectric power. This was the fundamental design of the Project. The lack of water in the river has had impacts on the fish and wildlife in the river. The 1991 Agreement simply charged the Project Owners to study these impacts and then develop a Proposed Final Program to protect, mitigate, and enhance fish and wildlife resources affected by hydroelectric development of the Project. The 1991 Agreement does not require restoration of flows (natural or controlled) through the entire Eklutna River.

From the outset, however, the Project Owners were committed to returning water to the Eklutna River in flows sufficient to enhance fish habitat. The Project Owners have submitted a Proposed Final Program that capitalizes on efficiencies of existing infrastructure to rewater 11 out of 12 miles of a currently un-watered riverbed, achieving 96.5% of maximum spawning habitat for Chinook below the AWWU portal valve and 99.5% of maximum spawning habitat for coho, and indirectly benefiting the wildlife the depend on these salmon. In addition, the default flow regime should increase the available rearing habitat by 53% for Chinook and by 67% for coho. The Proposed Final Program's monitoring, adaptive management and habitat funding provisions will provide the Committee with the tools and opportunity to further increase rearing habitat as the river adjusts to the new flow regime. It also includes significant reopener provisions that would allow for (1) the replacement of the existing overflow spillway with a fixed wheel gate to provide higher magnitude channel maintenance flows if needed, and (2) the construction and operation of fish passage facilities both into and out of Eklutna Lake based on specific criteria.

On the whole, this Proposed Final Program meets and exceeds the requirement to protect, mitigate damages to, and enhance fish and wildlife resources affected by development of the Project. It also does so while keeping costs manageable, preserving the year-round benefits available from the Project as a low-cost electric power generation and capacity resource, which is particularly essential during extremely cold weather as discussed in greater detail in Section 4.4.3 to this document, protecting the public water supply, avoiding impacts to recreation, and decreasing carbon emissions.

There is no basis for the idea that the only way to meet the obligations of the 1991 Agreement would be to fully re-water all 12 miles of the river, and in fact doing so would present exorbitant cost for ratepayers and could significantly impair the many other beneficial public uses that the Proposed Final Program effectively balances.

"3. Blocks access to the majority of sockeye, Chinook, and coho salmon spawning and rearing habitat in the lake and its tributaries"

Response: As discussed in Section 4.11.9 of the SID, the Project Owners fully acknowledge that the Traditional Ecological Knowledge (TEK) from NVE indicates that there was a sockeye salmon run in Eklutna Lake before the lower dam was constructed in 1929. Furthermore, as part of their study program, the Project Owners did identify some potentially suitable spawning habitat around the lake shoreline (~1.5 acres) and in the East and West Forks of Eklutna Creek (0.765 – 3.61 acres). However, in a 2011 report, the USACE stated "It is doubtful that significant numbers of sockeye salmon ever spawned in the Eklutna River drainage because suitable spawning area upstream of the lake is limited and water quality in the lake would likely have limited opportunities for spawning in the littoral zone of the lake. Fully 80 percent of the water entering Eklutna Lake comes from two glacial streams that would not be conducive to the consistent survival of sockeye salmon from egg to fry, and the remaining spawning area would not be sufficient to support large numbers of spawning anadromous salmon. In addition, the physical limnology studies of Eklutna Lake suggest that the turbidity in Eklutna Lake during much of the year is not conducive to significant primary production." The USACE's statements are supported by the Project Owners' study results. The kokanee in Eklutna Lake are much smaller than those reported in many other lake systems (4.5-6.5 inches vs. 10-12 inches), have low fecundity (only 20-30 eggs compared to hundreds or thousands), and lack sexual dimorphism and development of spawning color that is typical of the species. This is likely due to the poor nutrient conditions and high turbidity levels in the lake, which causes low primary productivity and limited food sources in the environment.

It should also be noted that a separate study was conducted by Loso et al. several years ago to try to determine "whether there was an anadromous salmon run into Eklutna Lake prior to 1929" by using marine derived nutrients (MDN) as a biochemical marker in lake sediment. The

study found that there was no significant difference in the composition of sediment layers from before and after 1929. However, a sensitivity test was conducted to assess the possibility that a small salmon run may have gone undetected by the isotopic analysis. It was determined that "a salmon run of up to 1,000 per year, and potentially as many as 15,000 per year, would be possible without noticeably altering the measured isotopic composition of the sediments in Eklutna Lake." Therefore, the results "provide no evidence that such runs occurred, but do not preclude the possible existence of a relatively small sockeye fishery in Eklutna Lake before 1929."

"4. Delivers inadequate flows for fish below the Eklutna Lake Dam"

Response: The proposed flows were established following numerous detailed studies to quantify habitat. Based on these modeling results, and as discussed in Section 4.10.1 of the SID, the default flow regime should achieve 96.5% of the maximum available Chinook spawning habitat in the Eklutna River below the AWWU Portal Valve, and 99.6% for coho (Figure 4-1).

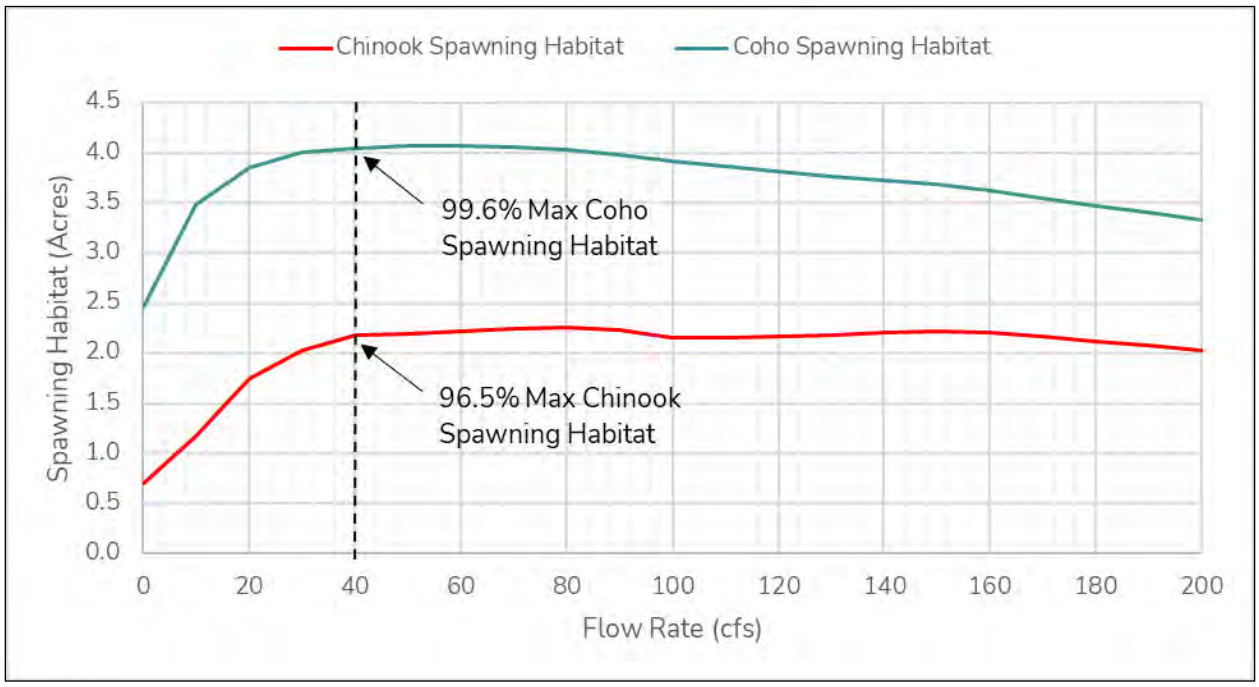

Figure 4-1. Spawning Habitat Curves for the Eklutna River below the AWWU Portal Valve.

In addition, the default flow regime should increase the available rearing habitat by 53% for Chinook and by 67% for coho. Study results also show that the proposed summer flows should allow adult salmon to migrate through the entirety of the canyon reach in order to access the habitat created in the upper reaches of the river, and the proposed winter flows

should promote the creation of surface ice (instead of anchor ice) to maintain over wintering habitat for juveniles.

"5. Ignores the requests of the Eklutna Dena'ina for the recovery of a natural river after 94 years of harm"

Response: The Project Owners acknowledge the losses and injustices experienced by the Eklutna Dena'ina on their historical lands along the Eklutna River. For this reason, and due to NVE's status as a government, and Eklutna, Inc.'s significant land ownership in lands under and adjacent to the Eklutna River, the Project Owners have from the outset accorded NVE a significantly elevated role in the consultation and program development process under the 1991 Agreement, despite the fact that they are not a named party to the 1991 Agreement. For further background on how the Project Owners have included NVE and recognized its interests, the Project Owners refer the Governor to (1) the letter that the Project Owners sent to NVE on June 30, 2020 committing to work closely with NVE during the 1991 Agreement process pursuant to an NVE-specific participation framework, elevating their role to more closely resemble the role of a Party to the 1991 Agreement, attached as **Appendix A** hereto, (2) Section 5 of Chugach's Board Chair and CEO's letter to the Anchorage Assembly, dated May 23, 2024, attached as **Appendix C**, and (3) Section 4.1.6 of the SID. NVE has been an important partner to the Project Owners in the development of the Proposed Final Program and will continue to be essential to implementation.

Ultimately, however, the 1991 Agreement itself is not the vehicle for remedying all harms done to the Eklutna Dena'ina in and along the Eklutna River. As overviewed above, the 1991 Agreement was drafted to accompany the sale transaction of the Project from the federal government to the Project Owners and is narrowly drafted to require the Project Owners to propose protection, mitigation of damages to, and enhancement measures for fish and wildlife affected only by the Project that can be balanced effectively by the Governor against other public benefit objectives. It is not a legal vehicle for remedying nearly a century of harm, and it does not require a recovery of the natural river, and in fact, adhering to this request would significantly, negatively impact numerous other public uses of Eklutna Lake.

The Project Owners have employed a methodical, scientific process closely following the requirements of the 1991 Agreement, including extensive consultation with NVE, to develop a Proposed Final Program that does exactly what the 1991 Agreement calls for. Contrary to NVE's conclusion that the Proposed Final Program is a failure, the Project Owners believe that it will meet NVE's first stated primary objective: to return substantial flows to the Eklutna River for fish and wildlife and all those will benefit (including the Eklutna Dena'ina).

"6. Jeopardizes the Anchorage drinking water system"

Response: The Assembly writes in Section 1.B of its comments that the Project Owners have not adequately assessed the potential impacts of the Proposed Final Program on the Anchorage water supply with respect to the Project Owners' preferred alternative to use existing AWWU infrastructure. The Project Owners have previously, and continue to, strongly disagree with this unsubstantiated assertion. The design of the Eklutna River Release Facility was and continues to be developed in close collaboration with AWWU. AWWU's engineers have reviewed and provided feedback on all plans to date and incorporated additional design elements to ensure that the municipal water supply is not put at risk. The Project Owners know of no unaddressed or outstanding concerns from AWWU or requests for changes to the Proposed Final Program.

As described in Section 4.6 of the SID, the Project Owners worked closely with AWWU leadership over many months to develop carefully crafted legal terms and agreements by which AWWU would be comfortable with the potential use of their infrastructure should the Governor approve an option which uses the AWWU Lake Diversion Tunnel to release water into the Eklutna River. The forms of agreement detailing this arrangement are attached as Attachment D to the SID. They include robust protections for and benefits to AWWU, AWWU's infrastructure, and the public water supply. The Project Owners commit expressly to not taking any action that would compromise the Anchorage water supply and expressly take on the liability should they do so. The Project Owners are covering all costs of constructing and interconnecting new facilities and are indemnifying AWWU for risks associated with the Proposed Final Program, but AWWU still has design approval rights, and a say over the development of long-term operating procedures. AWWU will receive eight new bridges over the Eklutna River at the Project Owners' cost, along with the replacement of outdated communication systems, the installation of new flow meters, and the installation of a new isolation valve structure for safer maintenance of their facilities. The agreements will also address and extend AWWU's access to the Project Owners' water rights for Anchorage drinking water at a capped compensation rate lower than current costs; the new agreement dealing with such water rights and compensation replaces the 1984 agreement that expires in 2025. AWWU would also be gaining a right to purchase the Project Owners' water infrastructure used to transport AWWU's water allocation in the event that the Project Owners cease operating the Project, as well as rights to priority water rights without the need for further compensation at the end of the new public water supply agreement in 2060.

Many of the same concerns raised by the Assembly about the drinking water system (including Mr. Spiegel's assessment) were made in the Assembly's AR-2024-40 (as amended). The Project Owners refer the Governor to their response to "Concern 1.B Potential Impacts to Anchorage Drinking Water" in their February 12, 2024 letter attached as **Appendix B**.

The Assembly also details its frustrations with the Project Owners' confidential negotiations with AWWU of the terms by which AWWU's infrastructure could be used for the Eklutna River Release Facility if approved by the Governor. Such negotiations included first a binding term sheet, and then three final agreements attached as Attachment D to the SID. Confidentiality in negotiation was a necessary part of reaching agreement, and all such documents have since been made fully public. For a more detailed response on why such confidentiality was necessary and reasonable, the Project Owners refer the Governor to sections 3 and 4 of Chugach's Board Chair and CEO's letter to the Anchorage Assembly, dated May 23, 2024, attached as **Appendix C**.

"7. Burdens ratepayers and taxpayers with up to $72 million in unnecessary cost increases"

Response: The Assembly asserts that the Proposed Final Program reflects poor coordination and questionable use of public funds. In fact, as detailed throughout the SID, in both letters attached hereto, and in numerous public forums, briefings and meetings, the Project Owners conducted a methodical years-long study and consultation process with regular, systematic coordination with the 1991 Agreement Parties, NVE, and numerous interested stakeholders. The Assembly was regularly updated on the status of the studies and consultation process. Costs of multiple options were transparently shared and compared as part of a robust alternatives analysis. The Project Owners' preferred alternative was selected because it meaningfully protects, mitigates, and enhances fish and wildlife impacted by the Project, while balancing costs and all requirements of the 1991 Agreement. In total, the Project Owners' preferred alternative will come with $16.47M (without the fixed wheel gate) to $20.48M (with the fixed wheel gate) in capital costs, $1.33M in annual replacement energy costs, and $315,900 in annual operations and maintenance costs, coming to a total of $58.2M to $63.8M in total annualized costs.[3]

The alternatives favored by NVE and the Assembly, on the other hand, would cost significantly more than the Owners' preferred alternative for ratepayers and taxpayers. As detailed in Section 4.4 below, NVE's Alternative Final Program, which the Assembly also favors, would cost the Project Owners and their ratepayers and taxpayers significantly more than the Project Owners' Proposed Final Program. From dam replacement, dam removal, and NVE's Alternative Final Program (pump station alternative, plus dam removal), neither NVE nor the Assembly have identified any alternative that is less expensive or poses less risk than the Proposed Final Program.

[3] This is the estimated present value of total annualized costs; please see Section 4.10.2 (and Table 4-12) of the SID for more information.

In the face of such costly proposals, the Governor should recognize that pursuant to the power purchase agreements between the MOA and Chugach and MEA approved by the Regulatory Commission of Alaska (RCA) in October 2020, the cost allocation with respect to Proposed Final Program costs is as follows:

- Chugach is responsible for 64.29% of all fish and wildlife costs, including capital costs, operations and maintenance costs, and the cost to replace any power output lost due to associated changes in operations due to implementation of the 1991 Agreement (Replacement Energy Costs);

- MEA is responsible for 16.67% of the capital costs and operations and maintenance costs, and 35.71% of Replacement Energy Costs; and

- MOA is responsible for 19.04% (this is the portion of the Project from which it sells power to MEA) of the capital costs and operations and maintenance costs but, because it does not have any rights to any of the power output, it would incur no Replacement Energy Costs.

Thus, despite the MOA's protests about cost burden on the MOA, **the MOA will only be responsible for 8-9% of the total annualized costs of the Proposed Final Program**, all of which will be more than offset by the revenues the MOA receives from Chugach and MEA under the PPAs.

For a more detailed and accurate overview of costs and allocations, the Project Owners also refer the Governor to section 2 of Chugach's Board Chair and CEO's letter to the Anchorage Assembly, dated May 23, 2024 (**Appendix C**).

4.4 NVE's Proposed Alternative Final Program

NVE's Proposed Alternative Final Program is based on its own set of principles not found in the 1991 Agreement and includes (1) a pump station alternative release facility, (2) existing outlet gate and other infrastructure improvements, (3) mandatory reopener for dam removal, (4) flow regime and adaptive management, (5) assistance in seeking federal funding, and (6) adaptive management committee membership. Responses to each are included below in turn. Broadly, however, NVE's Alternative Final Program would impose exorbitant costs and risks on the Project Owners and member-ratepayers that the Project Owners simply cannot accept.

4.4.1 NVE's Pumped Station Alternative: Cost and Risk Assessment

NVE proposes an alternative Eklutna River Release Facility centered on a pump station. This proposal is substantially the same as what NVE proposed on April 9, 2024 (NVE's Pumped

Station Alternative). The Project Owners first addressed this alternative in Section 4.12.3 of the SID, submitted on April 25, 2024. The timeframe for responding at the time was truncated; however, since then the Project Owners have had more time to analyze and consider NVE's alternative.

NVE does not provide any evidence that in developing this alternative, it conducted any detailed engineering studies, cost estimations, or risk assessments. In order to consider the proposal, compare the proposal to the Proposed Final Program and other options analyzed by the Project Owners in developing the Proposed Final Program, and respond to NVE's proposed alternative, the Project Owners therefore commissioned McMillen to conduct such analysis. The resulting "Cost and Risk Assessment of the Eklutna Pump Station Alternative" is attached to this document as **Appendix D**.

In summary, McMillen found:

- The capital cost of the NVE's Pumped Station Alternative is significantly more expensive than the Project Owners' preferred alternative. As detailed in the SID, the Project Owners' Eklutna River Release Facility using AWWU infrastructure has an estimated capital cost of $10,106,000. As detailed in **Appendix D**, NVE's proposed pump station has an estimated capital cost of $38,524,000.

- There are significant risks associated with NVE's Pump Station Alternative, including:

    - Reliability – The pump station is a mechanical system, which has a much higher risk of failure than the gravity fed system proposed by the Project Owners. In the event of failure, the pumps would "fail closed" and dry up the river until they can be restarted. The Project Owners are unaware of any existing Project in the United States that provides year-round instream flows via a mechanical system.

    - Feasibility – NVE's proposal calls for the installation of a 36-inch diameter pipe for a length of 2,800 feet at a depth of up to 75 feet adjacent to and underneath Eklunta Lake. Based on consultation with NVE's engineer, it is assumed that microtunneling would be the preferred approach. However, the overall length of the proposed microtunnel is on the upper end of what has been performed to date in the United States. This is a significant engineering challenge and brings significant risk.

    - Geotechnical – The region around Eklutna Lake is capable of generating strong earthquakes which pose a significant risk to the proposed facilities. The 1964 earthquake caused densification of unconsolidated sediments within Eklutna Lake resulting in substantial movement of the lakebed, damaging the Project

intake and dam. A subsurface pipeline spanning 2,800 feet underneath the lakebed is at substantial risk of separation or failure during a seismic event.

- NVE's proposal does not allow for the proposed channel maintenance flows to occur without an unregulated spill over Eklutna Dam. The Project Owners have proposed to provide the default channel maintenance flows (220 cfs) through a combination of the Eklutna River Release Facility near the AWWU portal valve (which would have a capacity of 80 cfs) and the existing outlet gate at the dam (which has a capacity of 190 cfs when the lake is at full pool). Without an additional mechanism for releasing water downstream of the dam, controlled flow releases would be limited to the capacity of the drainage outlet gate and would heavily rely on lake level.

In view of increased costs and increased risks noted above, the Project Owners find that it would be unnecessary and contrary to prudent utility practice to choose a more costly and risky alternative for purposes (restoring historical sockeye runs) not required by the 1991 Agreement. As a result, the Project Owners decline NVE's proposed Pumped Station Alternative.

4.4.2 Existing Outlet Gate and Other Infrastructure Improvements

The Project Owners have already proposed to automate the outlet gate at the Eklutna Dam as part of the Proposed Final Program (Section 2.2.1). Clarification of the implementation dates, however, is required here: the 1991 Agreement requires that the Project Owners begin implementation of the Final Program by October 2, 2027, and complete such implementation no later than October 2, 2032. Please refer to Section 3.2 of the SID.

The Project Owners have committed to building eight new AWWU bridges as part of the Proposed Final Program (Section 2.4) according to the implementation schedule outlined above. Note, however, that the Project Owners have not designed the AWWU bridges to withstand "the hydraulic capacity of a free-flowing river" as NVE proposes. Based on the flow data developed by its consultants and set forth in Appendix F of the SID, the location and design of the bridges would not withstand flows up to 6,600 cfs. The location, design, and cost of bridges that could withstand such flows is completely unknown because it has not been studied. Indeed, it may be impossible or prohibitively costly to locate bridges that AWWU requires that can sustain such flows. Consequently, the Project Owners cannot agree to build AWWU bridges to withstand "the hydraulic capacity of a free-flowing river" as NVE proposes. Additionally, as noted in the Dam Removal Assessment (Appendix F of the SID, Section 4.1.2.5), the AWWU pipeline within the river is at significant risk of damage or failure under a free-flowing river, which may require re-routing of the pipeline outside of the valley or

abandonment of Eklutna Lake as a water supply, which would negate the need for O&M bridges within the Eklutna River valley entirely.

4.4.3 Mandatory Reopener for Dam Removal

In addition to the considerable costs of the NVE's Pumped Station Alternative outlined above, NVE proposes to replace the Project Owners' proposed limited reopener for fish passage and turn it into an unlimited mandatory reopener to restart the process outlined in the 1991 Agreement with its "preferred solution to remove the dam", NVE proposes that the Project Owners spend more than $43M on the pump station and AWWU bridges and then more than $460M in estimated capital costs on dam removal, decommissioning of the project, construction of a new power project, and mitigating risks to downstream infrastructure including potential rerouting of the AWWU pipeline and replacement of the railroad and highway bridges. Details associated with the costs and risk assessment of the NVE alternative are presented in **Appendix D**.

At the most fundamental level, the Project Owners cannot agree to any requirement to start a process to remove the Project "no later than 2034". Dam removal is not required under the 1991 Agreement and is inconsistent with several criteria that must be considered equally under the 1991 Agreement. It is also at odds with the background and reasoning behind the 1991 Agreement, which was developed to accompany the sale of the Project to the Project Owners for ongoing operation and was drafted such that the Fish and Wildlife Program development process repeats every 35 years. It would fundamentally frustrate power purchase transactions centered around the ongoing operation of the Project, transactions that were approved by the Anchorage Assembly and were essential to the sale of Anchorage-owned Municipal Light & Power to Chugach in October of 2020. Fundamentally, it is simply not prudent or rational for the Project Owners, as public utilities with public service obligations to member-ratepayers and the communities served by the Project Owners, to agree to such a costly and risky alternative during the first cycle of the 1991 Agreement. At some point in the future, the Project may be considered for decommissioning, but it is currently a critical generating asset that the Project Owners need now and for the foreseeable future for its low-cost clean energy and support of Railbelt reliability.

The current energy supply situation in Southcentral Alaska is very dynamic and challenging given the declining natural gas fuel supplies and considerable unknowns surrounding the development of new renewable generation resources which will require new transmission lines and regulating resources due to their intermittent natures. There are many open questions relating to how such resources will be contracted, permitted, financed, constructed, interconnected, and integrated within the existing Railbelt electric system. Considering wind or solar resources as an equivalent replacement for the Project is simply not a valid assumption

as those types of resources are not an adequate substitute for the firm dispatchable energy, capacity, and ancillary services that the Project provides.

The importance of the Project was recently demonstrated during an extended period of cold weather in the Anchorage area when ENSTAR experienced gas deliverability problems with CINGSA, the gas storage facility that the Railbelt depends on. During this time of ENSTAR's difficulties, Chugach and MEA voluntarily maximized their usage of the Project (and other hydro resources) to maintain system reliability during a time of critical operations, saving 87,300 MCF of natural gas during the cold snap, and avoiding significantly increased gas bills for ENSTAR customers. The role that the Project played during this cold spell is further described in the Project Owners' letter to the Anchorage Assembly, dated February 12, 2024 (**Appendix B)**.

Considering new hydroelectric development as a replacement is also unrealistic within NVE's proposed 10-year timeframe. New hydroelectric facilities typically take far longer than 10 years to license, finance, and construct even after a project site has been located. The Project Owners are already working hard to meet existing clean energy development and acquisition goals but creating a critical 40 MW hole in the Project Owners' generation portfolio will make attaining such clean energy goals even more difficult and costly and will be operationally, economically, and reliably detrimental to overall electric generation supply in the Southcentral region of the state. The Project Owners are not willing to impose such costs and risks on ratepayers. The Project Owners respectfully request that the Governor consider these logistical, contractual, reliability, and regulatory hurdles associated with meeting existing renewable portfolio goals also in the context of considering any request to replace the Project in 10 years.

The Project Owners also cannot ignore the significant costs of Project removal. Such costs will include replacement power, dam removal, power plant decommissioning, rerouting AWWU pipelines, replacing highway and railroad bridges, and more. As not-for-profit, member-owned cooperatives and a municipal hydro utility, the Project Owners' ratepayers and taxpayers – not investors or shareholders – will ultimately have to pay for the costs of all new generation, interconnection, and transmission facilities. Replacing the Project's low-cost, firm, renewable generation with replacement firm, renewable energy and capacity will increase the cost of such generation at least three to four times more than it costs today, and those costs will be borne by member-ratepayers in the rates charged by the Project Owners. Additionally, the Project Owners have no intention of upsetting the 35-year long-term power purchase agreements through which the MOA receives significant compensation (>$4M per year) for the Project's generation.

Beyond the logistics and costs of replacement energy, capacity, and integration, the Project Owners have determined that the physical removal of the Project would be unreasonably expensive and risky to the Project Owners as utilities, as well as to AWWU and other downstream owners of land and infrastructure. After receiving NVE proposed Project removal as its "recommended alternative" in December 2023, the Project Owners engaged engineers and hydrologists at McMillen to conduct a high-level analysis of the technical risks and cost implications associated with the removal of the Project. This investigation evaluated the effects that an unregulated river hydrograph may have on infrastructure in or adjacent to the Eklutna River downstream of the existing dam, summarized the costs associated with dam removal and decommissioning of Project infrastructure, investigated potential mitigation measures where necessary to address such risks, and analyzed the use of other comparable renewable energy sources to determine how to offset the lost generation from the Project. This analysis revealed that if the Project were removed, AWWU water pipeline infrastructure would be at significant risk and the new Glenn Highway bridges and Alaska Railroad bridge would need to be replaced. Note that this analysis was limited to large public infrastructure and did not include an assessment of negative effects (and potential liabilities) arising from the inundation of lands of downstream landowners during high water flood events, including Eklutna, Inc. and the Native Village of Eklutna.

The Project Owners submitted that analysis to the Governor in April as Appendix F of the SID. See Section 4.12.2 of the SID.

4.4.4 Flow Regime and Adaptive Management

NVE has stated it is willing to accept the instream flow regime set forth in Sections 2.1 and 2.2 of the Proposed Final Program. The Project Owners welcome this acceptance, along with agreement of the agencies to such flows (see Section 3.1). Note, however, that the Project Owners do not support NVE's Pumped Station Alternative because it is more costly and creates additional risks as outlined in the "Cost and Risk Assessment of the Eklutna Pump Station Alternative" attached to this document as **Appendix D**. Additionally, the Project Owners note the flows will begin only when the Eklutna River Release Facility is completed within the timeframe outlined in the 1991 Agreement: begin implementation of the Final Program by October 2, 2027 and complete such implementation no later than October 2, 2032.

4.4.5 NVE's Assistance in Seeking Federal Funding

NVE's commitment to assist the Project Owners in seeking federal funding support is welcomed and acknowledged, but the Project Owners see no plausible path to gaining federal funding at a level that would adequately fund the costs, risks, and liabilities of removing the

Project. The Project Owners have investigated all available federal programs and found none for which they are eligible (as municipal and cooperative utilities) to pay for such costs.

4.4.6 NVE's Adaptive Management Committee Membership.

The Project Owners will continue to welcome NVE to participate in the Adaptive Management Committee if one is approved as part of the Final Program.

4.5 Two Year Extension

In their comments on the Proposed Final Program, the Assembly and NVE have asked the Project Owners to "seek a two-year extension of the 1991 Agreement from the signatories" to delay obligations under the Agreement for two years for additional study, consultation, and negotiations. Given the content of, and history surrounding the development of, the 1991 Agreement, the Project Owners do not believe the Parties are authorized to amend the 1991 Agreement and therefore decline to do so, and they will continue to work hard to meet the deadlines of the 1991 Agreement. Furthermore, a two-year delay will increase costs and delay the very thing all parties agree to which is instream flows in the Eklutna River for fish habitat.

4.5.1 Legal Problems with a Two-Year Delay

At the outset, it is worth stating that the Project Owners do not enter into contracts lightly or interpret them with creativity. Rather, as regulated utilities, the Project Owners endeavor to comply with, and expect enforcement of, every term of the contracts they negotiate and execute in a manner consistent with state and federal law. While this is a conservative approach as compared to some others, the Project Owners believe it is foundational to how they operate as utilities and that it is what is expected by their member-ratepayers and regulators. This approach also governs how the Project Owners have looked at their implementation of the 1991 Agreement, but with an even further added level of scrutiny given the fact that multiple government agencies are party to the 1991 Agreement and given the fact that Congress reviewed and relied upon the 1991 Agreement as drafted when it authorized the sale of the Project to the Project Owners.

The Project Owners and its lawyers reviewed the Water and Power Law Group's memorandum cited by NVE in its comments, and its conclusion that the parties to the 1991 Agreement have a clear right to modify the 1991 Agreement without Congressional action. The Project Owners find this analysis falls short by failing to acknowledge key facts and legal considerations behind the 1991 Agreement that add significant ambiguity to the question of a right to amend without Congressional approval.

The 1991 Agreement as currently written reflects the negotiated consensus of three utilities, two federal agencies, and the State of Alaska in coming up with an alternative to FERC hydropower licensing pursuant to Part I of the Federal Power Act for two hydroelectric projects in Alaska. (Note that the 1991 Agreement also deals with the Snettisham Project and any amendment of the 1991 Agreement would impact that project too.) It is well documented in the Congressional record that such consensus and the resulting 1991 Agreement were the reason why federal agencies and Congress were comfortable with, and ultimately provided, an exemption to Part I of the Federal Power Act for the Project in the Alaska Power Administration Asset Sale and Termination Act ("Sale Act") in 1995.

Had the parties intended to allow for amendment to the 1991 Agreement in the future, they could have and would have done so. Contractual provisions for amendment of agreements were as common in 1991 as they are today. Yet, all of the principals and lawyers representing the utilities, federal agencies, and the State of Alaska omitted any provision for amendment of the 1991 Agreement. The Project Owners cannot assume such omission was simply an oversight. If anything, federal contractual interpretation principles require us to assume that there was either a lack of consensus regarding amendment or that such a right was intentionally excluded in order to ensure the preservation of the consensus reached in the 1991 Agreement.

The 1991 Agreement (with this omission) was reviewed and acknowledged and made enforceable by Congress in the act authorizing the sale of the Project to the Project Owners – the Alaska Power Administration Asset Sale and Termination Act (Sale Act) – and Congress also omitted any mention of future amendments. Section 3(c) of the Sale Act conveys full authority to implement the 1991 Agreement to the parties on an "as-is" basis by making it legally enforceable and reviewable in federal court. When Congress refers to the 1991 Agreement in this section and throughout the Sale Act, there is no language stating "as may be amended" or otherwise contemplating further changes. The Sale Act refers simply to the "Memorandum of Agreement entered into among the State of Alaska, the Eklutna Purchasers, the Alaska Energy Authority, and Federal fish and wildlife agencies regarding the protection of, mitigation of damages to, and enhancement of fish and wildlife, dated August 7, 1991" and the "Memorandum of Agreement". Interpretation of the 1991 Agreement must respect the due weight of Congressional review and action.

Despite the lack of clear authority to amend the 1991 Agreement within the 1991 Agreement, or as subsequently granted by Congress, the Water and Power Law Group invites the Project Owners to depend upon a common law principle that parties have an inherent authority to modify contracts by unanimous consent. Attorneys supporting the Project Owners reviewed the cited cases and freely acknowledge that such state common law exists. Here, however, the Project Owners cannot rely on any such state common law. The 1991 Agreement is unique in

many ways from its parties to its unlimited term, but not the least of which is that it is not grounded on any state law; rather it is based in federal law and enforceable only in federal court. Federal contracts are governed by federal common law, and the Project Owner attorneys found no such federal common law principle that would automatically grant amendment authority, and the Project Owners also see substantial risk in assuming that federal common law would recognize a right to amend the 1991 Agreement without Congressional approval.

This leaves the following facts: (1) there is no stated mechanism for amendment in the 1991 Agreement, (2) there is no mention of future amendment when the 1991 Agreement is mentioned in the Sale Act, including in those provisions which make the 1991 Agreement legally enforceable in federal court, (3) there is no clear federal common law principle that would enable amendment of the 1991 Agreement without Congressional approval, and (4) the 1991 Agreement represents the result of negotiation of private and public entities agreeing on a unique fish and wildlife mitigation process that was (a) carefully modeled off a FERC regulatory processes, and (b) used as justification for including a major regulatory exemption for the Eklutna Project in a federal statute. Congress therefore built significant public policy based on the existence of the 1991 Agreement in its exact current form and did not contemplate amendment of the 1991 Agreement when referencing it directly in federal law.

Given this unique history, the significant value that the 1991 Agreement brought in its current form to the transfer of the Project to the Eklutna Purchasers from the federal government, and the Project Owners' responsibility to comply with the exact terms of the 1991 Agreement, the Project Owners decline to depend on any ambiguous assumed amendment possibility for the 1991 Agreement absent clear authority to do so.

4.5.2 Cost and Program Impacts of a Two-Year Delay

The Project Owners have spent approximately $8M over five years executing on the process outlined in the 1991 Agreement. The Project Owners conducted study scoping and planning with a wide range of interested entities and NVE that went well beyond the Parties to the 1991 Agreement, engaged in numerous studies requested by the participants in the study process, drafted study reports and sought interested entity review. The Project Owners engaged in an open, inclusive, and transparent alternatives analysis process in which more than 36 alternatives were reviewed (all those requested by the participants in the alternative analysis process), plus two more alternatives submitted by NVE after the alternatives process was concluded. The Project Owners regularly engaged the MOA, at both the Mayor's office and the Assembly, as well as with AWWU management and technical staff throughout the five years of efforts conducted to date. The opportunities to identify needed information, design and conduct studies and evaluate alternatives were fully available for the MOA to

participate in and indeed the record shows that these opportunities were taken full advantage of.

Following this robust process, the Project Owners issued a Draft Program, held public meetings, conducted good faith negotiations with the Parties to the 1991 Agreement, and modified the Program to gain their agreement (including reopeners to accommodate future possibilities), and negotiated with NVE. The Project Owners then submitted the Proposed Final Program reflecting those efforts to the Governor for review and approval.

NVE and the Assembly are now not satisfied because their specific objectives (not in the 1991 Agreement) and preferred alternative(s) have not been adopted by the Project Owners. They now request that the Governor delay the implementation of the Program for two more years for further discussions, studies, and negotiations. Yet, they have not put forth any specific process, study, or analysis details as to what could be accomplished with such a delay, nor how it would be paid for.

In truth, there are no more opportunities to "reconcile the Parties' differences" that can be solved with more time and more process because there is a fundamental disagreement about what is required under the 1991 Agreement, and what are the responsibilities of the Project Owners. There are no known alternatives not yet studied and there are no further possibilities for compromise. NVE wants what the Project Owners cannot give without unacceptable cost and impacts: a restored, free-flowing Eklutna River with full upstream and downstream fish passage.

The Project Owners are proud to have submitted a Proposed Fish and Wildlife Program that is based off significant effort, cost, public participation, and scientific study. Any year of delay will be another year without water in the river and without increased habitat for fish and wildlife, as well as increased costs of construction and implementation due to inflation and rising labor and equipment costs. With Governor approval, the Project Owners are eager to begin implementing measures to protect, mitigate impacts to, and enhance fish and wildlife affected by the Project.

4.5.3 Assembly's AR No. 2024-218(S)

On Friday, July 19, 2024, the Assembly passed another resolution related to the Eklutna Project purportedly conveying the MOA's response to the comments submitted by NMFS, USFWS, NVE and the Assembly. Yet AR2024-218(S) does not mention any such comments. Rather, in AR2024-218(S), the Assembly requests that the Governor establish "a final program that requires the owners group use two years of the three-year pre-implementation

period to identify an alternative infrastructure and engineering solution to ensure continuous flow to all 12 miles of the Eklutna River."

The Project Owners have reviewed the Assembly's AR No. 2024-218(S), As Amended, and its attached MOA letter, dated July 19, 2024. Based on this review, AR No. 2024-218(S) and its requests are inconsistent with the 1991 Agreement and fail to respect the five-year implementation process executed by the Project Owners (with the MOA's active involvement) and the resulting negotiated Proposed Final Program and its reopeners.

1) As noted in Section 4.5.2 above, a two-year delay in implementation of the Final Fish and Wildlife Program will increase costs, risks, and liability consequences to Chugach and MEA and their member-ratepayers. The requested delay in implementation of the Final Program by two years in order to further explore alternatives (unknown at this time) and fails to recognize that implementation cannot begin until the additional alternatives process is complete. The 1991 Agreement provides for three years between Governor decision and the start of implementation for good reason because the Project Owners must obtain land rights and permits, amend water rights, advancing project design, contract for construction, etc. Eliminating two of those three years for further evaluation of alternatives is not acceptable or consistent with prudent utility practices because requires the Project Owners to initiate and complete three years of work in one year, thereby increasing costs, risk, and liability. The Governor has no authority to unilaterally change the implementation schedule set forth in the 1991 Agreement.

2) While the MOA accurately states that it is the majority owner of the Project, it fails to acknowledge the contractual commitments between the MOA and Chugach and MEA, such as the long-term power purchase agreements that reallocate the costs of implementing the 1991 Agreement. As noted in Section 4.3, the MOA will only be responsible for 8-9% of the total annualized costs of the Proposed Final Program, all of which will be more than offset by the revenues the MOA receives from Chugach and MEA under the PPAs. Presumably, because the MOA bears such a minor portion of the costs, it has no problem committing Chugach and MEA to two more years of process and a more expensive program that will inevitably result.

3) AR No. 2024-218(S) ignores the contractual commitments among the Project Owners relating to the 1991 Agreement, including the MOA's obligation to act in a manner consistent with prudent utility practice (e.g., the obligation to "accomplish the desired result at the lowest reasonable cost consistent with good business practice, reliability,

safety, expedition and the requirements of any governing authority having jurisdiction.").

4) AR No. 2024-218(S) also fails to acknowledge RCA's Order 39[4] that states that during the surrender period, Anchorage Hydropower shall not have "any ability to delay or change the Eklutna Project decisions made by [Chugach and MEA]":

> Under these circumstances, we cannot unconditionally find that MHP is managerially or technically fit to maintain majority ownership of the Eklutna Project. We can only find that MHP is managerially and technically fit to maintain an ownership interest in the Eklutna Project subject to the condition that before the effective date of either the Eklutna PPA or the MEA PPA, ML&P surrenders its vote on the EOC under the Eklutna Project agreements so that Chugach and MEA can jointly manage and operate the Eklutna Project, including negotiating compliance with the Fish and Wildlife Agreement, without MHP having a vote on operation or management decisions. This surrender must have a term at least equal to the term of the Eklutna PPA and the MEA PPA, as those agreements may be extended, and cannot be lifted until such time as MHP has shown to our satisfaction that MHP has acquired the expertise required to fully participate as a voting member of the EOC. This does not prohibit MHP from attending EOC meetings, but may not allow MHP any ability to delay or change the Eklutna Project decisions made by the Chugach and MEA representatives on the EOC.

5) Notably, the positions outlined in AR No. 2024-218(S) depart from previous positions taken by Anchorage Hydropower and its representatives throughout the five-year implementation process. The changing of municipal leadership should not be allowed to negate the efforts incurred by all the Parties to the 1991 Agreement or unilaterally force a do-over.

6) Finally, AR No. 2024-218(S) requests that the Governor eliminate the two reopeners negotiated into the Proposed Final Program, which directly contradicts the desires and interests of the Parties (and their managements and boards) that devoted years

[4] Regulatory Commission of Alaska, Order No. U-18-102(44)/U-19-020(39)/U-19-021(39), May 28, 2020, (Order 39), at 67 of 152.

involved in the process leading to the Proposed Final Program. Further, NMFS, USFWS and the State Resource Agencies found great value in these two reopeners, as discussed above.

While the Project Owners recognize the desire to find a solution that will satisfy all Parties, NVE, the Assembly and others, the Project Owners do not believe it is possible to satisfy those who seek more time to pursue costly and risky alternatives (such as dam removal) to meet objectives not found in the 1991 Agreement. No party to the 1991 Agreement has the unilateral right to add new decision-making criteria or requirements to the process outlined in the 1991 Agreement.

Appendix A. Project Owners' Letter to Aaron Leggett, President, Native Village of Eklutna, dated June 30, 2020

MEA
MATANUSKA ELECTRIC ASSOCIATION

June 30, 2020

Aaron Leggett, President
Native Village of Eklutna
Chugiak, Alaska 99567

Dear Mr. Leggett:

Thank you for your letters on April 24, 2020 and May 13, 2020 regarding your request for the Native Village of Eklutna (NVE) to be added as a party to the 1991 Fish and Wildlife Agreement (Agreement) through a formal amendment to the Agreement.

We, the owners of the Eklutna Project, greatly appreciate the unique importance of the Eklutna River to the members of the Native Village of Eklutna (NVE). We also honor and acknowledge the breadth and depth of knowledge the Dena'ina people have to share regarding the Eklutna River and the adjacent lands that serve the people of Eklutna and the surrounding communities in many critical ways.

Respectfully receiving your input and hearing your voice is critical to the owners of the Eklutna project as we satisfy our contractual obligations as detailed in the Agreement. It is with the utmost respect that we invite you to join us in the conversation and specifically seek your input in the review and development of the Study Plan and Fish and Wildlife Program we are developing as required under the Agreement. We look forward to a close and productive working relationship with NVE in the development of the Fish and Wildlife Program.

We have conferred and are happy to send you this joint letter committing to work closely with NVE based on NVE's significant and long-term interests in the Eklutna River, its fish, wildlife and other resources, and adjacent lands.

As you correctly noted in your letter, the process necessary to amend the Agreement to include NVE as a party to the Agreement would take a significant amount of time, effort and legal process. We do not want to slow down the study program and fish and wildlife program development process required under the Agreement to wait for the Agreement to be amended. Time, however, is not the only factor. The Agreement itself does not lay out a process for amendment and there are numerous open questions about how such an amendment might be procured, and whether and how an amendment would be enforceable absent further federal legislation.

DocuSign Envelope ID: 73C2E437-139D-4028-A45F-2E0B5D2410B9

We understand from your letter, however, that we share in a common goal of moving forward with focus and efficiency in developing the Fish and Wildlife Program with NVE's critical input and participation. We are confident that we also share in the goal of devoting the time and resources necessary to craft a Fish and Wildlife Program consisting of measures for the protection, mitigation of damages to, and enhancement fish and wildlife (including related spawning grounds and habitat) – the requirement of the Agreement. We therefore thank you very much for proposing an alternative approach for facilitating NVE's participation in the process, rather than delaying the process and redirecting resources to an uncertain, lengthy, and complex amendment process.

The Agreement requires that the Eklutna Owners studiously consider the impacts of any proposed fish and wildlife measures on other uses of the Eklutna River.

We therefore commit to the following review and participation framework to ensure that information NVE and its members share regarding the Eklutna River and development of the Fish and Wildlife Program is appropriately considered and addressed:

1) The Eklutna Owners commit to providing significance and due weight to NVE's expertise throughout the development of the Fish and Wildlife Program;

2) The Eklutna Owners commit to recognizing and including Traditional Environmental Knowledge (TEK) in their review and development of the Study Plan and Fish and Wildlife Program;

3) The Eklutna Owners will work with NVE to schedule additional meetings with the goal of hearing input from NVE and its members (one after the Study Program is completed and another following the development of the draft Fish and Wildlife Program); and will coordinate with NVE on developing the agenda items for these meetings, which will be conducted by a neutral facilitator to ensure all voices are honored and heard.

4) Understanding that NVE is requesting heightened involvement, the Eklutna Owners will recommit to sharing all study plans, data, reports, and comments directly with NVE when developed to seek feedback; and

5) When submitting materials to the Governor, the Owners will submit an NVE-specific comment summary to the Governor for consideration along with a Proposed Fish and Wildlife Program.

We value the unique perspectives of NVE's members regarding the Eklutna River, and we also understand that NVE is primarily interested in the presence of both water and salmon in the lower Eklutna River. While we are contractually and legally bound by the terms of the Agreement, please know that if the process set forth in the Agreement bears out the release of water from Eklutna Lake and the addition of salmon into the Eklutna River as part of the Fish and Wildlife Program, we will be prepared to support it.

DocuSign Envelope ID: 73C2E437-139D-4028-A45F-2E0B5D2410B9

As our study program continues to move forward this summer, we would also like to request a meeting with the leadership of NVE at your earliest convenience at a place of your choosing. We would be delighted to meet with you to hear your feedback on this participating framework, understand your interests first-hand, and discuss next steps.

Sincerely,

Eklutna Project Owners

Re: AR No. 2024-40: Corrections and Responses

Dear Chair Constant, Vice Chair Zaletel, and Members of the Municipal Assembly:

We, the owners of the Eklutna Hydroelectric Project ("Project"), are writing to respond to your Assembly Resolution AR-2024-40, as amended ("AR-2024-40"). We appreciate the Municipal Assembly's interest in the Project and our implementation of the 1991 Agreement.

With due respect, however, we cannot abide by certain incorrect factual and legal assertions in AR-2024-40 and in your public statements made during the Anchorage Assembly's special meeting on February 2, 2024. We only received a draft of AR-2024-40 on February 1 and were not given an opportunity to appear at the special meeting and respond in detail before AR-2024-40 was introduced, discussed, and passed, so we are doing so now.

Concern 1.A "Non-Compliant Process"

We agree that the process required under the 1991 Agreement is very similar to a FERC licensing process under Part I of the Federal Power Act. Thus, we hired a team of FERC hydroelectric consultant experts to run this process for the Project – the very team that led the FERC relicensing process for Chugach's Cooper Lake Hydroelectric Project that ended in a successful FERC order and approved settlement requiring measures to enhance fish and wildlife in 2006. We know what a FERC process entails and are following and implementing the modified process outlined in the 1991 Agreement to the letter.

The major differences between the FERC process and that required under the 1991 Agreement are that the final decision for approving the Proposed Final Fish and Wildlife Program will belong to the Governor of Alaska, rather than FERC, and the federal agencies do not have mandatory conditioning authority. These differences were agreed to in 1991 when authorized representatives of NMFS and USFWS, the Governor of the State of Alaska, the CEOs of Chugach and MEA, and the Mayor of Anchorage (on behalf of the Municipality of Anchorage) signed the 1991 Agreement. It is wrong to read provisions and requirements into the 1991 Agreement that are simply not there.

We disagree that the process outlined in the 1991 Agreement requires an analysis and process under the federal National Environmental Policy Act ("NEPA"). The process prescribed in the 1991 Agreement leading to the Governor's approval is simply not a federal process, does

not trigger a federal action, and does not fall within FERC licensing jurisdiction; no provision of the 1991 Agreement requires compliance with NEPA. Throughout the consultation, study, and alternatives assessment processes, however, we have been and remain fully engaged with federal and state resource agencies as required in the 1991 Agreement. We have met and are continuing to meet with the agencies to understand their comments and critiques of the Draft Fish and Wildlife Program and attempt to resolve differences. As contemplated in the 1991 Agreement, we are revising the program such that the Final Proposed Fish and Wildlife Program better meets the expectation of the agencies with expertise. We are also meeting with and continue to seek to resolve differences with the Native Village of Eklutna ("NVE"); we hope that the improvements we have discussed with the agencies will provide an acceptable path forward for agreement with NVE when we meet with them again.

We agree that the process under the 1991 Agreement "diverges substantially" from the process the Municipality of Anchorage uses for its own capital projects. The 1991 Agreement is simply a different process, based on different legal precedents and requirements. The 1991 Agreement does not call for the Project owners to bring a handful of alternative proposals to the Anchorage Assembly for it to make a selection. Rather, Section 4 of the 1991 Agreement specifically requires us to propose a Draft Fish and Wildlife Program to the parties of the 1991 Agreement (as we did on October 27, 2023) and work to resolve differences, hold public meetings, and receive and consider comments and suggestions before preparing a Proposed Final Fish and Wildlife Program.

It is categorically incorrect for anyone to assert that we have not studied more than one alternative. Rather we have analyzed dozens of alternatives. Starting in April 2023, the Project owners, parties to the 1991 Agreement, NVE, members of the Technical Work Groups (including state and federal fish and wildlife agencies, Trout Unlimited, and The Conservation Fund) engaged in a robust examination of alternatives. Attendees at six meetings over five months were invited to submit comprehensive alternatives for analysis using a form listing the various component options; then these alternatives were discussed at subsequent alternatives analysis meetings. Alternatives such as dam replacement were proposed and analyzed, along with over 30 comprehensive alternatives submitted by the Project owners and several stakeholders. Each of the comprehensive alternatives was analyzed using engineering analysis and a Cost Effectiveness and Incremental Cost Analysis (CE/ICA) model, examining outputs such as water flows and effects on fish habitat, operations, and costs. The results of these analyses were presented at the meetings and attendees were invited to revise and resubmit their comprehensive alternatives, if desired, for further discussion at upcoming alternatives analysis meetings with the aim of narrowing down potential alternatives. At the end of the process, we had thoroughly examined all suggested alternatives (36 in total).

The first time that any participant proposed dam removal as an "alternative solution" to be studied and recommended in the alternative analysis process was by NVE on December 4, 2023 – more than a month after we circulated the Draft Fish and Wildlife Program. We are now studying that alternative, but it was not proposed for study during the April – August period

during which the 36 alternatives were studied, so it was not studied and presented in the Draft Fish and Wildlife Program.

Concern 1.B "Potential Impacts to Anchorage Drinking Water"

We fundamentally disagree with the assertion that we have not considered implications related to Anchorage's drinking water supplies from Eklutna Lake. To be clear, we would never propose any action that would compromise or threaten the Municipal water supply. Rather, we recognize, and have been living up to, our commitment set forth in Section 7 of the 1984 "Public Water Supply and Energy Generation from Eklutna Lake, Alaska" (the "1984 Agreement") to "take no action regarding Eklutna Lake of reducing the quality or increasing the turbidity of the lake water from those conditions which presently exist; nor will the [Project owners] take or authorize any other action with regard to Eklutna Lake which may have the effect of reducing its present suitability for use as a source of public water supply."

During the alternative analysis process, we met and engaged with AWWU senior executives and its board regarding the possibility of using AWWU infrastructure to create instream flows in Eklutna River. Our engineers engaged with AWWU's engineers to ensure that we understood AWWU's system, operations, and concerns, and AWWU understood what we were trying to achieve through the construction and operation of the alternative Eklutna River Release Facility to establish instream flows in Eklutna River. We even compensated AWWU for its engineering time and review of our proposed plans.

Our respect for AWWU, its mission, its water rights, and the 1984 Agreement led us to engage with AWWU *before* we publicly proposed use of AWWU facilities to create instream flows. We explored whether AWWU would be amenable to such cooperation in support of instream flows *if, and only if,* the use of AWWU infrastructure is included in the Final Fish and Wildlife Program approved by the Governor. It would have been imprudent for the Project owners to propose publicly such an alternative without exploring whether AWWU, the owner of the facilities, is willing to do so.

In late October 2023, AWWU and the Project owners executed a binding term sheet that outlines the basic contractual terms that would govern the interconnection of a new water release facility to the AWWU pipeline, water transportation through AWWU's infrastructure, associated compensation, and associated water rights. At this time, the term sheet is protected as confidential and privileged under an agreement between the MOA, Chugach, and MEA. Accordingly, all parties must treat the document as confidential in order to protect privileges such as the attorney-client privilege.

Importantly, the term sheet and its commitments are expressly conditioned on the contemplated usage of the AWWU infrastructure being in the Final Fish and Wildlife Program approved by the Governor as required in the 1991 Agreement. To be clear, if the Project owners' final Fish and Wildlife Program does not include the use of the AWWU facilities or if the Governor does not approve the Fish and Wildlife Program with such use, the term sheet and its commitments will be terminated. Furthermore, the term sheet expressly recognizes that

AWWU takes no position as to whether using AWWU infrastructure is the best alternative for the Fish and Wildlife Program. Rather, the term sheet outlines the terms and conditions under which AWWU would be willing to provide the requested services *if* the AWWU infrastructure is in the Project owners' final Fish and Wildlife Program approved by the Governor.

While the term sheet is binding with respect to its basic terms, it is still preliminary to the execution of definitive contracts between the Project owners and AWWU that are currently under negotiation and will include a greater level of detail. Term sheets are not complete legal contracts. As is typical with contractual negotiations, the parties may choose to voluntarily agree to deviate from or refine terms as written in the term sheet when negotiating and finalizing definitive contracts. Disclosure of the term sheet now would violate agreed confidentiality obligations and also interfere with, and potentially disadvantage, the parties' ability to freely engage in the negotiation process necessary to move from the term sheet to the definitive documentation.

With all due respect to the consultant hired by the Anchorage Assembly, we view the analysis referenced in Section 1.B of AR-2024-40 as fundamentally flawed and out of date. While the analysis is accurate that a 70 million gallons per day (MGD) flow rate was the planned full buildout capacity of the Eklutna Water Treatment Facility in the 1980s, we were told by AWWU that this is not a flow rate they envision pursuing in the future. The actual capacity of the tunnel and pipeline is 100 MGD, but AWWU's water permit (LAS 2569) is limited to 41 MGD which corresponds to the maximum capacity of the water treatment facility. Our direction was to use 41 MGD for the basis of our design, which is about double what AWWU currently takes (an annual average 22-24 MGD). Furthermore, the consultant asserts that planned maintenance or emergency events will stop flow to the Eklutna River. While it is true that either a failure of the intake shaft valve or a collapse of the tunnel will stop flow to the Eklutna River, the current design allows the pipeline to be dewatered for maintenance, and in the event of a pipeline rupture, it allows for emergency closure at the portal valve, in both cases allowing continued operation of the Eklutna River Release Facility. In the event planned maintenance is required to replace the intake valve shaft, we have also discussed proposing that this be planned for the fall when water could alternately be released at the dam.

Concern 1.C "Incomplete Analysis and Insufficient Mitigation"

We believe you may not fully understand our proposal with regard to construction and operation of the alternative Eklutna River Release Facility to establish instream flows in Eklutna River. Contrary to the suggestion in AR-2024-40, our engineers have designed the Eklutna River Release Facility, interconnections, and controls to be able to operate at all lake levels contemplated under the operation of the Project while also maintaining AWWU's full operational flexibility up to 41 MGD. As mentioned above, we have anticipated regular and unplanned maintenance and discussed such operations with AWWU. We have specifically designed the Eklutna River Release Facility to avoid dewatering the Eklutna River and fish kills.

We understand that the Anchorage Assembly is intrigued by the dam removal alternative proposed by NVE. We are assessing the costs, risks, and benefits of NVE's new alternative and will release our assessment to NVE, the Anchorage Assembly, and the public in due course. In the meantime, it is worthwhile to point out two considerations to the dam removal alternative. First, NVE asserted that one of the benefits of removing the Project and enabling a "free-flowing Eklutna River" would be "[s]ecuring the AWWU drinking water system". Given our past conversations about the AWWU infrastructure and instream flows, however, NVE's assessment does not seem consistent with AWWU's assessment of risks to the AWWU water supply system with increased flows in the Eklutna River. Based on hydrologic calculations of flows into Eklutna Lake, removal of the Project dam would result in instream flows peaking at 2,500 cfs every few years to 4,000 cfs every 10 years. We asked AWWU for its assessment of dam removal on its infrastructure. Please see **Attachments A (our request)** and **B (AWWU's response)**. We are reviewing AWWU's preliminary assessment and intend to engage AWWU as we study dam removal, but as AWWU's response points out, AWWU has concerns about the effects of dam removal on Anchorage's water supply.

Second, we caution the Anchorage Assembly from relying too heavily on the assertion that two environmental organizations will pay for dam removal. Removal of hydroelectric facilities and associated restoration requirements are not minimal financial commitments. Removal and restoration work at the Elwha and Glines Canyon projects in Washington State was estimated to cost more than $350 million (2011 Dollars)[1], including $79 million for water treatment facilities to protect municipal and industrial water supplies during and after dam removal.[2] The ongoing removal of the Lower Klamath River dams has been estimated to be $397.7 million (2018 Dollars).[3] These numbers for these dam removal efforts may or may not be indicative of the costs of removing the Project, restoring the Eklutna River, and hardening the downstream infrastructure to withstand increased flows, but it would be imprudent to assume that all such costs would be borne by environmental organizations who have put forth no such commitment to pay in writing.

Concern 1.D "Poor Coordination and Questionable Use of Public Funds"

As stated above, we reject the characterizations that we investigated only one alternative, that such alternative is "stand alone", and that such alternative is self-serving and fails to meet the goals and objectives of the 1991 Agreement. To be frank, we know of no alternative that, when compared with the Eklutna River Release Facility alternative, (i) establishes similar year-round instream flows, (ii) creates as much fish spawning and rearing habitat, while (iii) also

protecting the public water supply, and (iv) without exposing ratepayers and taxpayers to significantly higher costs.

That said, we are not done considering and analyzing all alternatives, comments, suggestions, and public input necessary to put forward our Proposed Final Fish and Wildlife Program. Please note, however, that the 1991 Agreement does not set forth only one criterion we must optimize – whether fish habitat or cost. Rather, the 1991 Agreement sets forth the following approval criteria for a final Fish and Wildlife Program: "In order to ensure that [the Project is] best adapted for power generation and other beneficial uses, the Governor shall give equal consideration to the purposes of efficient and economical power production, energy conservation, the protection, mitigation or damage to, and enhancement of fish and wildlife (including related spawning grounds and habitat), the protection of recreation opportunities, municipal water supplies, the preservation of the other aspects of environmental quality, other beneficial uses, and requirements of State law".

Concern 2 No MOA Funding for F&W Program that Does Not Restore Full Length of Eklutna River

While we recognize that NVE, the Conservation Fund, Trout Unlimited, and the Anchorage Assembly prefer full "restoration" of the Eklutna River, no such requirement exists in the 1991 Agreement. The word "restore" does not appear in the 1991 Agreement; similarly, neither "fish passage into Eklutna Lake" nor "restoration of sockeye salmon" are required. Rather, the 1991 Agreement requires us to develop a Proposed Final Fish and Wildlife Program "to protect, mitigate and enhance fish and wildlife resources."

It is important to note that anadromous fish runs were eliminated in the Eklutna River decades before the Project we purchased was built in 1953-55. Contrary to assertions by some, the hydroelectric developments in the lower Eklutna River that blocked fish passage in the 1920s are distinct from, and were <u>not</u> part of, the Eklutna Project we purchased in 1997. While we fully acknowledge the consequential impacts of all hydroelectric projects on NVE and its members, the 1991 Agreement simply does not place upon us (and our ratepayers and taxpayers) the legal or contractual requirement or responsibility to address *all* adverse effects of all hydroelectric development in the Eklutna River basin over the past 100 years. We are fully committed to doing the one thing that only we can do: establish year-round flows of water in the Eklutna River for fish spawning and rearing habitat as a foundation of our Proposed Final Fish and Wildlife Program, while balancing all the other interests required under the 1991 Agreement. We continue to work towards creating the best means to provide such instream flows and create fish habitat that satisfies all the criteria set forth in the 1991 Agreement.

Concern 3 RCA Investigation Before Governor Approval

As regulated public utilities, we understand very well the jurisdiction and authorities that the Regulatory Commission of Alaska ("RCA") has over our decisions, actions, and the rate recovery of the costs we incur in providing electric service to our member-ratepayers. We completely disagree that it is appropriate for the RCA to initiate an investigation regarding the

development of the Fish and Wildlife Program required under the 1991 Agreement. The 1991 Agreement does not contemplate such RCA investigation or approval. Rather, the RCA will have its opportunity to review and approve costs incurred under the Fish and Wildlife Program in the normal course of utility rate cases filed with the RCA pursuant to its authorities under AS 42.05.

The Anchorage Assembly is correct, however, to point out that we should remain focused on impacts to ratepayers and their access to uninterrupted electric service. As we have repeatedly stated, this Project is very important to providing low cost, reliable, and dispatchable power year-round. The importance of this generation asset was recently demonstrated during an extended period of cold weather in the Anchorage area when ENSTAR experienced gas deliverability problems with CINGSA, the gas storage facility that the Railbelt depends on. During this time of ENSTAR's difficulties, Chugach and MEA voluntarily maximized their usage of the Project (and other hydro resources) to maintain system reliability during a time of critical operations. The Project provided 8% and 9% of their respective energy needs to meet MEA's load and Chugach's load during the cold snap; The Project's operations created an estimated fuel savings of over 27,300 thousand cubic feet (MCF) of natural gas for MEA consumers at a time when ENSTAR was seeing record high natural gas demand compounded by deliverability issues. Likewise, Chugach also voluntarily maximized its use of the Project during the cold snap and accordingly reduced its gas consumption by approximately 60,000 MCF over the same period. Chugach and MEA's combined use of the Project saved 87,300 MCF of natural gas during the cold snap and allowed the gas utility to avoid issuing a yellow designation for natural gas delivery. A yellow designation from ENSTAR would have included requiring MEA and Chugach to shift to available diesel generation to provide additional gas to ENSTAR. Diesel generation by both utilities is more than twice as expensive as natural gas and would have increased bills for all ENSTAR customers under the terms of utility cooperation agreements. This recent situation demonstrated how critical the Project's hydro capacity and energy can be to Railbelt reliability and cost during critical times.

Concern 4 Request for Two Year Extension

The 1991 Agreement is a contract between the State of Alaska, two federal agencies, and the three owners of the Project. The 1991 Agreement does not have any provision for extensions or amendment; it has no decision-making process or authority empowered to grant an extension or impose changes to the 1991 Agreement. Consequently, the Project owners see no path to pausing the process required under the 1991 Agreement without liability. Accordingly, we will not delay the implementation of the Fish and Wildlife Program for two years in order to perform additional analysis, consultations and coordination.

We have been fully engaged in this process since 2019 and we have performed each step of the process deliberately and with consultation with the Parties to the 1991 Agreement, NVE, State and federal resource agencies, and others interested in the Project or the 1991 Agreement. We excluded no key stakeholders. Even though they were not a party to the 1991 Agreement, we afforded NVE enhanced opportunities for engagement. Additionally, we have presented

status reports to, and have held quarterly updates with, the Assembly and its Enterprise and Utility Oversight Committee 11 times as listed on https://eklutnahydro.com/project-updates/.

There has been no "rush to judgment" or effort to "exclude stakeholders". Rather, we have been developing and continue to seek a measured and comprehensive approach guided by respectful coordination to reach a solution the enjoys broad consensus. We are now revising our draft Fish and Wildlife Program to reflect input from the parties to the 1991 Agreement, NVE, state and federal resource agencies, and the general public as solicited in six public meetings and as received in the form of hundreds of comments submitted by email and via our website. We hope that the Proposed Final Fish and Wildlife Program we deliver to the Governor for approval meets all legal requirements of the 1991 Agreement and provides a set of protection, mitigation, and enhancement measures grounded on year-round flows in the Eklutna River that all parties will accept and appreciate.

Sincerely,

Andrew Laughlin

Re: Assessment of Dam Removal

Dear Mark:

We, the owners of the Eklutna Hydroelectric Project, are writing to request that Anchorage Water and Wastewater Utility (AWWU) provide us with an assessment of a new alternative for the Fish and Wildlife Program proposed by the Native Village of Eklutna (NVE).

As you are well aware, we are in the process of developing a Fish and Wildlife Program related to fish and wildlife protection, mitigation, and enhancement measures pursuant to the 1991 Agreement. We circulated our Draft Fish and Wildlife Program on October 27, 2023, and requested comments and input from the parties to the 1991 Agreement and the NVE. We received comments from all of the parties and NVE in the past few weeks and met with each of them independently this week in an attempt to resolve differences as required under the 1991 Agreement.

Among the comments and feedback, we received one new preferred alternative that we had not previously studied as part of our analysis of alternatives during the past six months. NVE's new recommended alternative states:

> To meaningfully meet the purpose of the Agreement, NVE proposes an alternative solution – removing the Eklutna Lake dam within ten years when sufficient renewable power generation is available to offset the lost power generation from dam removal.[14] In 2011, the U.S. Army Corps of Engineers ("USACE") proclaimed that "[t]rue restoration of the Eklutna River ecosystem would require removal of both dams [...]."[15] The Eklutna Lake dam does not impound Eklutna Lake but merely increases lake storage capacity for hydropower generation. Doing so severs the connection between the lower Eklutna River, Eklutna Lake, and upper tributaries, blocking all outflow of water, drying up the Eklutna River, and decimating the salmon runs.[16] Now that the lower Eklutna dam is gone, it is time to plan for a future with a free-flowing Eklutna River and salmon runs truly restored.

See attached NVE letter, dated December 4, 2023.

We are planning to assess the costs, risks, and benefits of NVE's new alternative to the extent possible given the limited available time before our April 2024 filing with the Governor and we need your input. NVE states that one of the benefits of removing the Eklutna Project and enabling a "free-flowing Eklutna River" would be "[s]ecuring the AWWU drinking water system". Given our past conversations about the AWWU infrastructure and instream flows, NVE's assessment does not seem consistent with your assessment of risks to the AWWU water

supply system with increased flows in the Eklutna River and fish migration into Eklutna Lake. We have estimated that, based on calculations of historical inflows into Eklutna Lake, removal of the Eklutna Project dam would result in uncontrolled instream flows into the Eklutna River peaking at ~1,200 cfs every July/August on average. Every few years flows would exceed 2,000 cfs, and every ten years flows would exceed 4,000 cfs for a significant period. We have not conducted a scour analysis, but we would guess that such flows might significantly impact AWWU pipeline infrastructure below the existing portal valve facility. That being said, we know that you know your infrastructure far better than we do, so we would like AWWU's assessment of NVE dam removal alternative.

If possible, please provide us with your assessment of potential effects of the NVE's dam removal alternative on AWWU infrastructure and operations by February 2, 2024, so that we can include the information in our assessment of alternatives and deliberations on the best path forward. In the meantime, we can make members of our team available to meet and discuss this topic with you and your staff if that would be helpful.

Sincerely,

Andrew Laughlin

AWWU Response re NVE's Dam Removal Alternative

[See Attached]

February 1, 2024

Attention: **Andrew Laughlin, Chief Operating Officer, CEA**
Tony Zellers, Chief Operating Officer, MEA
Kolby Hickel, Deputy Municipal Manager, MOA
Eklutna Hydroelectric Project
Sent via email

Re: Assessment of Dam Removal

Dear Eklutna Hydroelectric Project Owners,

Anchorage Water and Wastewater Utility (AWWU) appreciates the request to provide initial comments on the Native Village of Eklutna proposed alternative to remove the existing Eklutna Lake Dam under the Fish and Wildlife Program as part of the mitigation measures for fish and wildlife protection, mitigation, and enhancement pursuant to the 1991 Agreement for your consideration.

AWWU understands that the alternative described in the letter dated December 16, 2023, will include the eventual removal of the Eklutna Lake Dam and allow for a free-flowing river with full connection between Eklutna Lake and the Knik Arm. Further details of the dam removal alternative were not provided; nor did the letter indicate what changes may occur to operations of the Eklutna Hydroelectric Project (EHP).

The importance of Eklutna Lake for public health to meet community drinking water and fire protection needs cannot be overstated, as it provides over 90% of Anchorage's water supply. Eklutna Lake provides resilience to Anchorage's water supply by operating via gravity supply versus pumped, so it can continue to operate during emergency power outages.

It is important to note that AWWU is not taking a position with respect to the benefits of any of the proposed fish and wildlife alternatives, including this one. Our obligation is to provide feedback specifically about the impacts of any proposed alternative on Anchorage's water supply and the evaluation and mitigation measures necessary to protect that essential community service.

To that end, your letter of December 16 asks AWWU to assess potential effects of this dam removal alternative. More details about dam removal are needed to make a full assessment; however, the following list reflects some of AWWU's general concerns and topics requiring further consideration and study.

1. **Water Rights:** Eklutna Lake is the primary source of potable water and public fire protection for the Municipality of Anchorage and its nearly 300,000 residents. AWWU began diverting Eklutna Lake water for its Eklutna Water Treatment Facility (EWTF) in 1988, and it will soon apply to the Alaska Department of Natural Resources (ADNR) to transform its water use permit into a permanent certificate of appropriation. The EHP also holds a certificate of appropriation for Eklutna Lake water. The removal of the dam and resulting changes to EHP operations will likely impact EHP's water appropriation certificate for power production, and this, in turn, may affect AWWU's portion of the water certificate.

   As stated in our comments on the Draft Study Plan, dated January 4, 2021, AWWU needs its full appropriation quantity from Eklutna Lake to support Anchorage's public water and fire safety demands. *There are no other practical public water supply sources known that can match the existing Eklutna Lake diversions; further analysis would be necessary to find, locate and fund other water sources to meet Anchorage's public water supply needs.*

2. **Intake and Lake Level Evaluation:** There is substantial annual variation in the level of Eklutna Lake. Modeling anticipated water surface elevations and lake depths after dam removal will be essential to forecasting the impact removing the dam will have on AWWU's water rights, operations, and infrastructure.

   Changes in lake water levels and water quality impact AWWU's existing intake and other mechanical equipment (i.e., valves and gates). The effect of removing the dam on velocities, temperature, sediment and debris loading, and water quality will need to be studied. These factors may affect the design of water intake infrastructure and its maintenance.

   If it is determined that the existing intake will cease to function at lower lake levels, then an alternative water supply or a new water intake system needs to be evaluated as part of the dam removal alternative.

   Agreements between the EHP and AWWU are likely to require updating to account for impacts to the cost of water, ownership, and operations resulting from changes to EHP operations.

3. **Raw Water Quality & Supply:** Evaluation of Eklutna Lake impacts relate both to the intake systems and the raw water supplied to EWTF. A determination of whether Eklutna Lake can provide sufficient capacity for continuous raw water supply after dam removal is needed, especially in the winter when there are minimal flows into the lake.

Increased fish counts in the lake may impact biological loading. Lake level and velocity changes can be expected to change debris and sediment loads. These potential changes may affect lake water quality. Further study of the impact on AWWU operations, including the equipment needed for treatment and operator certification, is required as part of studying the dam removal alternative.

4. **Pipe Protection, Stream, and Scour Modeling:** AWWU is concerned that scour action from uncontrolled flows by the reestablished river may expose the water main, which could damage the water main and threaten AWWU's ability to reliably provide water to the Municipality.

   The impacts to AWWU's raw water infrastructure are unknown and will require further study. Stream and scour modeling analysis would need to be updated and extensively studied. The AWWU raw water main lies within the Eklutna River floodplain for over five miles from the AWWU portal valve shaft to the canyon's terminus exit, with the crown of the pipe as little as six feet below ground currently. The pipeline is a large prestressed concrete cylinder pipe that ranges in size from 54 to 60 inches in diameter. According to as-built drawings, the pipeline closely parallels the existing channel and crosses underneath it at eight locations.

   The original raw water pipe design contemplated irregular dam spillage into the river with flows up to 2,240 cubic feet per second (cfs). Measures were put in place to protect the pipe as part of the original design conditions. However, the current location and depth of the streambed has likely changed in the past 30 or more years. Critical sections of the pipeline vulnerable to damage with increased flows will need to be identified for mitigation measures.

5. **Meandering River Channels:** AWWU anticipates that the reestablished river may meander over time, exposing AWWU's infrastructure to damage at locations that are not currently predicted to be at risk. A risk assessment will be necessary to identify how a meandering river will impact canyon walls, sloughing, and erosion. Such a risk assessment will be needed to assess potential increasing soil loading over the pipe or scouring. A meandering river may also hinder AWWU's ability to access the pipeline to perform maintenance.

6. **Maintenance Road & Bridge Analysis:** Reestablished Eklutna River flows can be expected to impact maintenance access. AWWU must maintain the ability to inspect, physically access, and service all segments of its water main. An overall assessment of the existing maintenance access road and associated bridge crossings will be necessary to provide for appropriate mitigation. Existing and proposed bridge designs will need to be evaluated for stability based on anticipated flows, updating span, freeboard, and scour protection, as needed.

7. **Pipeline Maintenance:** The segments of the water main located under the reestablished Eklutna River will require access for maintenance and operations. The effect of increased river flows, and the presence of salmon on maintenance of AWWU infrastructure, needs to be studied, and appropriate mitigation considered.

   If a pipe failure occurs, a mechanism for permitting will be needed for AWWU to complete repairs, including, but not limited to, obtaining permits for excavation dewatering and diversions of the river. Analysis will be necessary to define the requirements for AWWU to inspect, repair, and possibly replace segments of its water main.

   For segments not directly under the reestablished Eklutna River, increased groundwater in the vicinity will likely impact pipeline stability and access. Buried access points, cathodic protection, etc., will be harder to expose and access when maintenance or repairs are required. Changes to overall operations will need to be assessed.

This concludes our initial assessment of the potential effects of the dam removal proposed alternative on Anchorage's primary source of drinking water and fire protection.

When reviewing this letter, understand that AWWU has limited information on the dam removal proposal.

As such, the assessment is, by nature, not comprehensive, and other items and issues could be revealed later.

I hope this provides you with information of value in your analysis. AWWU appreciates the opportunity to comment on the proposed alternative.

Regards,

Mark A. Corsentino, P.E.

Appendix C. Chugach's Board Chair and CEO Letter to the Anchorage Assembly, dated May 23, 2024

May 23, 2024

Assembly Chair Constant
Assembly Vice Chair Zaletel
Anchorage Assembly
Municipality of Anchorage
PO Box 196650
Anchorage, AK 99519-6650

Subject: ***The Proposed Final Fish and Wildlife Program Process; Correcting Misunderstandings***

Dear Chair Constant, Vice Chair Zaletel, and Members of the Anchorage Assembly:

We, as senior leadership representatives of Chugach Electric Association, Inc. (Chugach), are writing to you to explain certain key aspects of our joint process with Matanuska Electric Association, Inc. (MEA) and the Municipality of Anchorage (MOA) (collectively, Project Owners) in developing the Proposed Final Fish and Wildlife Program (Proposed Final Program) that was submitted to the Governor on April 25, 2024. We would like to use this letter as an opportunity to correct certain misunderstandings that appear to be at the heart of the many negative public statements made to date about the Proposed Final Program, the Project Owners, and our team. Fundamentally, despite our differences with respect to the Proposed Final Program to date, we share many common interests, as Chugach's membership includes most Anchorage residents.

It is our responsibility to provide the people of Anchorage – your constituents and our members – with electricity that is essential to their lives and livelihoods and at a cost that does not overburden them. We take that responsibility very seriously. We do not take on excessive operational or legal risks. We do not enter into contracts lightly, and we approach our work and our obligations methodically. In this vein, we have approached each step of our work on the Proposed Final Program with the necessary level of integrity and care required to effectively serve our members pursuant to our mission. Below, we provide a detailed overview of our process, focusing broadly on the points which have been of greatest concern to the Anchorage Assembly to date.

1. **Proposed Final Program Process Was the Culmination of a Careful Years-Long Study, Consultation and Negotiation Process Involving Federal and State Agencies, the Native Village of Eklutna, Other Interested Stakeholders, and the Public**

In connection with the 1997 sale of the Eklutna Hydroelectric Project (Project) from the federal government to the MOA d/b/a Municipal Light & Power (ML&P), MEA, and Chugach, the Project Owners had entered into the 1991 Agreement with federal and state agencies, and the Governor of Alaska, for the protection, mitigation of damages to, and enhancement of fish and wildlife affected by the development of the Eklutna Project. The 1991 Agreement lays out a process for developing and carrying out study plans, reviewing findings, and developing a fish and wildlife program, modeled off a traditional Federal Energy Regulatory Commission (FERC) hydroelectric

relicensing process. Yet, there are key differences and departures from federal law, including the fact that the Governor of Alaska, rather than FERC, has final approval authority over the resulting fish and wildlife program. Distinctly, the Governor is required to "give equal consideration to" a broader set of considerations than under the Federal Power Act: efficient and economical power production, energy conservation, the protection, mitigation of damage to and enhancement of fish and wildlife (including relating spawning grounds and habitat), the protection of recreational opportunities, municipal water supplies, the preservation of other aspects of environmental quality, other beneficial public uses, and requirements of State law. See Section 5 of the 1991 Agreement. This public interest determination, along with the process requirements and lack of guiding precedent, makes the 1991 Agreement completely unique. In total, it contains only six-pages of text and therefore is limited in detail.

We have taken the view that it is essential to follow each of the enumerated requirements of the 1991 Agreement carefully and fully. We have also, however, where there is either no specific requirement on a process in the 1991 Agreement or only a minimum "floor" requirement, opted to look to industry best practice and FERC relicensing processes to do more than required of us by the 1991 Agreement. This approach has allowed us to provide consultation, documentation, and alternatives analysis well above and beyond the minimum of what is required in the 1991 Agreement. It has also limited us, however, when there is a clear process or timeline requirement laid out in the 1991 Agreement, as we see no path to changing or ignoring such requirements and have therefore followed them strictly.

For example, the 1991 Agreement required the Project Owners to begin a consultation process "no later than" 25 years after the sale of the Project or October 2022. To ensure a robust and meaningful process, we started three years early in 2019. However, the 1991 Agreement also states that implementation of the Fish and Wildlife Program shall begin no later than 30 years after the sale of the Project. It was important to us to release the Proposed Final Program to the public as soon as possible before that deadline and provide the Governor with ample time for review. We therefore worked backward from such 30-year hard implementation deadline of October 2027, and developed the schedule set forth in Sections 3.2 and 4.10.3 of the Supporting Information Document (SID). While we were free to start early, the schedule requirements of the 1991 Agreement afford no room for delaying implementation.

Since initiating the process in 2019, the Project Owners have similarly followed and where permissible under the 1991 Agreement, expanded upon each requirement of the 1991 Agreement in developing the Proposed Final Program. The five-year process was methodical, scientific, and robust in complete adherence to the requirements of the 1991 Agreement. We engaged with experts across federal and state agencies, the Native Village of Eklutna (NVE), and other interested stakeholders, and we worked closely with interested parties to review alternatives and revise our plans to address concerns. We have included a detailed overview of only some of the key steps taken by the Project Owners as we moved through the process as **Attachment 1** hereto.

Overall, we are proud of this work and have submitted a Proposed Final Program that meaningfully protects, mitigates, and enhances fish and wildlife impacted by the Project, while balancing costs and all requirements of the 1991 Agreement, including potential impacts to municipal water supply, power generation, and recreation. With our Proposed Final Program, significant flows of water

will return to all but one mile of the Eklutna River, where it has not been since long before the Project Owners bought the Project from the federal government. It will create new habitat for Chinook and coho. Modeling results indicate that spawning and rearing habitat for Chinook will increase by 209% and 53% respectively, and that spawning and rearing habitat for coho will increase by 65% and 67% respectively.[1] The increased flow and salmon abundance will directly benefit several other wildlife species.

The Proposed Final Program also includes robust monitoring and adaptive management principles. As compared with other alternatives that were proposed and studied, it balances costs to ratepayers and taxpayers with habitat gains and limits impacts to municipal water supply and recreation.

The Proposed Final Program is just the beginning of a decades long process to protect, mitigate damages to, and enhance fish and wildlife affected the Project. The Proposed Final Program's provisions and limited reopeners leave open the possibility of increased water flows and fish passage in the future – before the 1991 Agreement calls upon the Project Owners to begin the process again – based on ongoing monitoring.[2] We are committed to continuing to work with stakeholders, including NVE, during implementation, to adapt and improve the program based on new data, and these reopeners allow for this. The federal agencies involved in the process to date have commended our work, and ultimately, we believe that the federal and state agencies that were engaged in the process of developing the Proposed Final Program will support it.

Finally, we note that the Assembly was kept up to date throughout the process. Beginning in February 2020, the Project Owners regularly presented the status of the study, consultation, and program development process to the Assembly. This included presentations in February 2020, October 2020, March 2021, June 2021, October 2021, February 2022, July 2022, November 2022, March 2023, July 2023, and December 2023. Information about and recordings of each of these meetings – and other relevant community meetings – are available here.

2. Costs Allocation Among Project Owners; MOA Will Pay Less Than 10% and Has Already Committed Contractually To Pay Its Share of Program Costs

Throughout the development of the Proposed Final Program, many questions have been asked about costs, how ratepayers and taxpayers will potentially be impacted, and such how impacts were analyzed. Before reviewing such background, it is important to note that the alternative ultimately selected by the Project Owners was the most cost-effective alternative by far in producing significant habitat gains without soaring, unmanageable costs. Alternatives that requested replacement dams with volitional fish passage, for example, were estimated to have capital costs up to $170.8 million, where the Project Owners' alternative is projected to cost $16.47 to $20.48 million in capital costs (depending on whether the fixed wheel gas is installed). Still, the up to $20.48 million in capital expenses (and the $63.8 to $72.2 million in total costs) will be significant for the Project Owners,[3] and some of this will be borne by the MOA.

[1] For more information, please see Section 4.10.1 of the SID.

[2] Please read the reopeners set forth in Section 4 of the Proposed Final Program, pages 16-19.

[3] For a breakdown of such costs, please see Section 4.10.2 of the SID.

At the time of their purchase of the Project in October 1997, the Project Owners agreed to allocate all capital and operational costs of the Project among themselves directly according to their respective ownership shares, with MOA responsible at the time for 53.33% of all costs.

On October 30, 2020, this cost allocation was significantly altered when Chugach acquired ML&P. In connection with that transaction, while the MOA retained its ownership interests in the Project in what became Anchorage Hydroelectric Utility (Anchorage Hydro), the MOA executed two long-term power purchase agreements (PPAs) pursuant to which it sells its allocation of the power output to MEA and Chugach. Under its PPA, Chugach agreed to pay for the operating costs, including the fish and wildlife cost responsibility, associated with the portion of Anchorage Hydro's power output that it is purchasing. Under MEA's PPA, however, the MOA remains responsible for the fish and wildlife program costs associated with the output that MEA is purchasing from Anchorage Hydro. The Anchorage Assembly approved the terms of the ML&P acquisition and PPA[4], as did the Regulatory Commission of Alaska (RCA).

Today, therefore, the cost breakdown with respect to Proposed Final Program costs is as follows:

- Chugach is responsible for **64.29%** of all fish and wildlife costs, including capital costs, O&M costs, and the cost to replace any power output lost due to associated changes in operations due to implementation of the 1991 Agreement (Replacement Energy Costs);
- MEA is responsible for **16.67%** of the capital costs and O&M costs, and **35.71%** of Replacement Energy Costs; and
- MOA is responsible for **19.04%** (this is the portion of the Project from which it sells power to MEA) of the capital costs and O&M costs but, because it does not have any rights to any of the power output, it would incur **no** (0.00%) of Replacement Energy Costs.

Chugach's annual payments to the MOA under its PPA are set according to a schedule in the PPA, rising from $2,614,483 in the year starting November 1, 2024, to $3,523,928 in the final year of the 35 year contract. In total, Chugach is paying the MOA $48.2 million under the MOA-Chugach PPA. MEA's annual payments under its PPA are not fixed like Chugach's, but instead are set at 85% of its MEA's avoided cost rate, adjusted annually. In 2020, the MOA estimated that its total annual revenue under the PPAs and compensation from AWWU for diversion of water to domestic use will be $4,654,793.

In 2020, the Regulatory Commission of Alaska (RCA) examined the financial fitness of Anchorage Hydro as a utility in consideration of whether to issue a certificate of public convenience and necessity. As part of the examination, the MOA then estimated that its annual costs of operations of the Project to be $143,762, depreciation expense to be $210,035, and working capital requirement to be $17,970. The RCA then considered that Anchorage Hydro would have to pay its portion of the costs of the fish and wildlife program, then estimated to be $30 million (in capital costs and O&M costs, but not Replacement Energy) and noted that Anchorage Hydro would establish and maintain a $3 million reserve account. The RCA specifically concluded that Anchorage Hydro "will have sufficient Eklutna Project revenue to cover its allocated share of normal Project operations and maintenance expenses."

[4] See AO 2018-89 and AO 2019-387.

Due to such 2020 reallocation of costs, and the fact that the MOA does not bear any of the Replacement Energy costs, the MOA will actually only be required to pay **8.3%** of the total estimated annualized costs of the Proposed Final Program without the fixed wheel gate ($297,160/year) or **8.8%** of the total annualized costs of the Proposed Final Program if the fixed wheel gate is installed ($343,848/year). These numbers are *less* than what was anticipated and modeled in 2020 as part of the ML&P acquisition.

Based on the foregoing information, Anchorage Hydro has ample revenues from the PPAs to cover the annual costs of operations of the Project, depreciation expense, working capital requirements, as well as its portion of the total estimated annualized costs of the Proposed Final Program. Further, these costs were already anticipated by the MOA as part of the ML&P acquisition. The terms of the acquisition were approved by the Anchorage Assembly before the RCA approved the acquisition, and should already be more than accounted for in Anchorage Hydro's budget with respect to its receipt of Chugach and MEA funds and its reserve account. Finally, the MOA has also already committed in its contract with MEA to paying these expenses.[5]

Therefore, (1) due to the considerable revenues received from Chugach and MEA under the PPAs, the MOA should not need to increase taxes or issue debt to be able to pay its portion of the Project costs; and (2) additional approvals from the MOA or Assembly to cover its share of the costs - which have already been modeled, allocated, contractually committed to, approved and relied upon by Chugach and MEA when executing the PPAs with the MOA, and by the RCA, when approving the PPAs – are not necessary.

3. The Agreements Between AWWU and the Project Owners Were Necessary for the Proposed Final Program Approval; the AWWU Agreements Contemplate Assembly Approval Before Execution

As part of the alternatives analysis process, we proposed the "AWWU Portal Valve" option for instream flows, the option which we subsequently selected. Multiple participants in addition to the Project Owners also selected this option for analysis. The reasoning is self-explanatory: AWWU water transportation infrastructure already takes water from Eklutna Lake (from Project infrastructure) and transports water downstream in close proximity to the Eklutna River. Modifying such infrastructure to establish instream flows in the river presented an attractive possible solution that would allow us to create habitat in all but one mile of the river while minimizing the huge capital costs associated with dam replacement or new water transportation infrastructure, and minimizing Project operational impacts, allowing us to balance the 1991 Agreement priorities.

As we moved through the alternatives analysis and began to see the data on habitat and cost indicate that this option could indeed be a valuable piece of our Proposed Final Program, the

[5] Section 4.2 of the MOA-MEA PPA expressly confirms the MOA "shall be responsible for all capital costs, all operations and maintenance expenses, and all costs and expenses for environmental compliance and compliance with Applicable Laws related to the MEA portion." In both PPAs, the MOA waived sovereign immunity. At no time before or during its joint ownership of the Project has the MOA ever asserted that its payment of its proportionate costs of the Project been subject to appropriation approval.

Project Owners knew we would not be able to release a draft proposal containing such option unless we were certain that using AWWU infrastructure for this purpose was even feasible. This required that we come to some level of understanding with AWWU about the unused capacity of its facilities, what exactly the use of such infrastructure might look like, and how certain key operational and legal issues would be addressed.

In August 2023, after the alternatives analysis pointed toward the Portal Valve Option, we began discussions with AWWU about what the potential use of their infrastructure for this purpose would look like. After multiple rounds of discussion and negotiation, we executed a term sheet in October, prior to Draft Program release, laying out the fundamental terms such an arrangement would take if included in a Final Program approved by the Governor. This term sheet was then extended in March 2024. We also then negotiated and agreed upon forms of three key agreements further detailing this arrangement and attached them as Attachments D to the SID.

It is very important to note what these agreements **are** and what they are **not**.

These agreements **are**, based on their terms, positive for AWWU. AWWU drove a hard bargain. Setting aside whether the AWWU Portal Valve option and the Proposed Final Program is adequate under the 1991 Agreement, the terms in the agreements are beneficial to AWWU and its ratepayers, and it therefore makes commercial sense for AWWU, as a utility, to agree to these terms. The Project Owners are covering all costs of constructing and interconnecting new facilities and indemnifying AWWU for risks associated with the Proposed Final Program, but AWWU still has design approval rights, and a say over the development of long-term operating procedures. AWWU will receive eight new bridges over the Eklutna River at the Project Owners' cost. The agreements will also address and extend AWWU's access to the Project Owners' water rights for Anchorage drinking water at a capped compensation rate lower than current costs; the new agreement dealing with such water rights and compensation replaces the 1984 agreement that expires in 2025. AWWU would also be gaining a right to purchase the Project Owners' water infrastructure used to transport AWWU's water allocation in the event that the Project Owners cease operating the Project, as well as rights to priority water rights without the need for further compensation at the end of the new public water supply agreement in 2060.

These agreements **are not**, however, effective without Governor approval of a Final Program with the AWWU Portal Valve option included. They reflect the negotiations of utility operators, engineers, and lawyers practically allocating costs, responsibility, and risks in a situation only where the AWWU Portal Valve option becomes a reality. **The agreements also contemplate Assembly approval**. The agreements, therefore, show the Governor that this option is fundamentally feasible and on what terms AWWU would be willing to proceed with such an option should it receive necessary approvals.

4. **Confidentiality During Negotiations Was Customary and Necessary; Documents Have All Since Been Released**

There has been significant concern from the Assembly about the fact that the AWWU term sheet and form of agreements were negotiated confidentially, and that certain final aspects of the development of the Proposed Final Program were completed in secrecy. We find negative

aspersions related to our maintaining confidentiality during negotiations to be unfair and reflective of unreasonable expectations.

For the period from when the Project Owners filed the Draft Program on October 27, 2023, until we released our Proposed Final Program on April 25, 2024, we have been operating under a set of confidentiality commitments and expectations. When we started meeting with the federal and state agencies and NVE to attempt to resolve differences related to the Draft Program, as required by the 1991 Agreement, we agreed that, in order to foster open and frank discussions to reach agreement, we would hold such conversations and exchanges as confidential. Similarly, as we negotiated form agreements for water interconnection, transportation, and compensation for water supply with AWWU, we also agreed to keep those negotiations confidential until we reached agreement and submitted all materials to the Governor. Sensitive discussions and negotiations involving compromise are simply not conducted in an open public forum. As public utilities, we also do not negotiate our legal agreements about our important assets in public. We rely on being able to discuss operations, costs, and risks among ourselves and with our counterparties in confidence. Like any major business transaction, we also need to be able to deliberate and negotiate with counterparties and opposing parties with the candor and efficiency that confidentiality provides. The need for this type of confidentiality is widely understood, and in our experience, both private and public entities do not typically negotiate terms of agreements in public; when public approval is required, it is the final form of agreement that is released.

We always intended to release the final forms of term sheets and agreements to the public along with the Proposed Final Program, and we have now done so. Now that we have concluded both sets of negotiations, submitted the Proposed Final Program to the Governor, and released the AWWU form agreements, we can speak more freely about the component parts of the Proposed Final Program, significant changes since the Draft Program and our rationales, as well as the agreements reached with AWWU which remain subject to your approval.

5. NVE Has Been an Important Partner Throughout the Process and Will Continue to Be Included During Implementation

NVE has been and will continue to be an important partner to the Project Owners in the Proposed Final Program development process. We acknowledge and appreciate the losses and injustices experienced by the Eklutna Dena'ina on their historical lands along the Eklutna River. We are sympathetic to their ongoing desire to be a formal part of the decision-making processes about the Eklutna River and its habitat going forward. At this time, absent any clear authority to amend the 1991 Agreement, we have been and are committed to accord NVE a significant role in the consultation and program development process under the 1991 Agreement.

We first met with NVE as part of our initial consultation efforts when the process started. In April 2020, NVE requested formal recognition as a consulting government, with their Land and Environment Department analogous to other governmental signatories, for purpose and processes of the 1991 Agreement applicable to the Project. In a May 2020 letter to the Project Owners, NVE recognized that amending the 1991 Agreement may entail substantial time and effort, and as an alternative invited a joint letter from the Project Owners to the effect that the Project Owners will act in good faith to help mitigate impacts to the Eklutna River and that the Project Owners will

recognize NVE as a consulting government on a basis comparable to the governmental signatories to the 1991 Agreement. In June 2020, the Project Owners responded to NVE's request and committed to the following:

- Providing significance and due weight to NVE's expertise throughout the development of the Fish and Wildlife Program;
- Recognizing and including Traditional Ecological Knowledge (TEK) in the review and development of the study plans and Fish and Wildlife Program;
- Working with NVE to schedule additional meetings with the goal of hearing input from NVE and its members (one after the study program is completed and another following the development of the Draft Program) and coordinating with NVE on developing the agenda items for these meetings;
- Recommitting to sharing all study plans, data, reports, and comments directly with NVE when developed to seek feedback; and,
- Submitting an NVE-specific comment summary to the Governor for consideration along with the Project Owners' Proposed Final Program.

As part of the process, NVE was involved in all Technical Working Groups, the alternatives analysis, and attempts to resolve differences. The Project Owners also met with the NVE Tribal Council on several occasions, and NVE submitted three preferred alternatives for analysis. All NVE comments are also summarized in their own Section 4.12 of the SID.

As part of this participation, in July 2023, NVE identified a replacement dam as a first preferred alternative, with year-round instream flows ranging from 350 cfs in July and August, 150 cfs in September and October, and 65 cfs throughout the winter, with channel maintenance flows of 700 cfs annually provided through a fixed wheel gate with upstream fish passage provided through a fish ladder. Downstream fish passage would be provided through spill. The Project Owners analyzed this alternative along with all others. It was not selected given high costs significant impacts on reservoir operations. In recognition of NVE's and the agencies' desires for more flows and fish passage, however, we included significant reopener provisions that would allow for (1) increased water flows through a fixed wheel gate based on ongoing monitoring of annual inflows to the lake and other criteria; and, (2) the construction and operation of fish passage facilities both into and out of Eklutna Lake based on increased feasibility (e.g. technological improvements or new, proven methodologies).

Following the completion of the alternatives analysis and after the publication of the Draft Program, in December 2023, NVE proposed a second preferred alternative requesting removal of the dam and decommissioning of the Project. The Project Owners responded by engaging engineers and hydrologists to conduct a high-level analysis of the technical risks and cost implications of this request. A memorandum documenting this analysis and the results is included in Attachment F to the SID. We did not select this alternative because we found that that the alternative would put Anchorage's water supply at risk and require substantial infrastructure changes to downstream infrastructure, with a cost of more than $500 million.

Finally, on April 9, 2024, NVE proposed a third preferred alternative still centered on dam removal but also including requirements to obtain 40 MW of replacement renewable energy within 10 years

and the obligation to construct and operate an alternative Eklutna River Release Facility through the construction of a pump station that would pump water from Eklutna Lake to the small pond upstream of Eklutna Dam, and then release water from the dam into the river year round. Even though such alternative came only two weeks before our planned submission to the Governor, the Project Owners still included initial analysis of this proposal in the SID (see page 71-73).

Further, throughout the entire study, consultation, and party negotiation process, we have been working closely with the federal agencies that are signatories to the 1991 Agreement and that have government-to-government consultation responsibilities with NVE. We understand that the agencies have been engaging with NVE as part of their responses to and collaboration with the Project Owners. NVE has therefore had a significant role, both with the Project Owners, and with the federal agency parties in developing the Proposed Final Program.

We recognize that ultimately, NVE may be disappointed that we determined we cannot agree to its alternatives to replace the dam, remove the Project, or build an alternative Eklutna River Release Facility. We remain, however, committed to working with NVE through implementation of the program. We have invited NVE to participate in the Monitoring and Adaptive Management Committee as an equal partner to the federal and state agencies. In that role, NVE will have equal voice in implementation of the limited reopeners as described above, and we will continue to look to NVE for their input going forward.

Summary

As stated earlier in this letter, we are proud of the work we have done over the past five years culminating in the submission of the Proposed Final Program. It represents an enormous amount of work from dedicated members of our team and stakeholders who have been integral to the process. It was conducted scientifically, transparently, and methodically, and met and exceeded all requirements of the 1991 Agreement. The resulting Proposed Final Program appropriately balances the many interests highlighted in the 1991 Agreement and includes meaningful measures to protect, mitigate damages to, and enhance fish and wildlife in the Eklutna River. The Proposed Final Program is also just the start of a long process to protect, mitigate damages to, and enhance fish and wildlife affected the Project. We look forward to the Governor's decision and are eager to begin planning for implementation.

Sincerely,

CHUGACH ELECTRIC ASSOCIATION, INC.

Mark C. Wiggin
Chair, Board of Director

Arthur W. Miller
Chief Executive Officer
Chugach Electric Association, Inc.

Attachment 1 – Proposed Final Program Development Process

- Beginning in March and April of 2019, the Project Owners conducted in-person consultation meetings with 14 agencies and interested stakeholders, including NVE and identified additional interested stakeholders to be subsequently included in the consultation process. See Section 4.1 of the SID and Attachment A.

- Although not required by the 1991 Agreement, in 2020, the Project Owners also developed an Initial Information Package (IIP) for the process participants and the public, establishing a baseline of existing information and information for the study planning process to follow. A draft was distributed to stakeholders in March 2020 for review and comment, comments were incorporated, and the final was released in September of 2020. The Draft and Final IIP and all comments received are available on the Project website. All reference documents used to develop the IIP are available here.

- In April 2020, a Technical Working Group (TWG) of stakeholder and agency experts focused on aquatic resources was established to solicit technical input throughout study planning, implementation, and reporting. In October 2021, three more TWGs were established to address other resource areas, including the Terrestrial TWG, Cultural TWG, and Recreation TWG. The TWGs met regularly to assist in study planning and review technical information developed by the study program and by others. A total of 28 TWG meetings were held during the study program. The table below shows the entities that participated in each TWG.

Table 4-1. Technical Working Group Members.

Entity	Aquatics	Terrestrial	Recreation	Cultural
Native Village of Eklutna	x	x	x	x
Alaska Department of Fish and Game	x	x	x	
ADNR Chugach State Park			x	
ADNR Office of History and Archaeology				x
U.S. Fish and Wildlife Service	x	x		x
National Marine Fisheries Service	x			
Trout Unlimited	x		x	
Alaska Pacific University	x	x		
Project Owners	x	x	x	x

- Early study consultation efforts by the Project Owners began in 2020 and based on this work, the Project Owners then developed a Proposed Study Program Framework and presented it to the Aquatics TWG for comment, leading to revisions to the draft study plans based on such comments. Multiple agency and stakeholder meetings were held and the Project Owners received concurrence letters from all state and federal agencies signatory to the 1991 Agreement. Each version of the year 1 study plans, all comments received, and each of the concurrence letters are available on the Project website.

- Year 1 studies were then initiated in 2021 including an instream flow study, a geomorphology and sediment transport study, a fish species composition and distribution

study, a water quality study, a macroinvertebrate study, stream gaging, a lake aquatic habitat and fish utilization study, a lakeside trail erosion study, hydro operations model development, and an existing infrastructure assessment. TWG meetings were held in November 2021 to discuss preliminary results, and draft reports were distributed for TWG and other interested party review and comment in February 2022. Study reports were finalized based on comments. The year 1 study reports and all comments received are available on the Project website.

- Year 2 studies were then developed with certain studies from year 1 continuing and with the addition of an engineering feasibility and cost assessment, a hydropower valuation study, a wetland and wildlife habitat study, a terrestrial wildlife study, a recreation study, a cultural resources study, and LiDAR and ortho imagery acquisition. Draft year 2 study plans were distributed to the TWGs in February 2022 for review and comment and meetings were held in March 2022 to address comments. The Project Owners received concurrence letters from each of the state agencies. The NMFS and USFWS also provided concurrence letters but only concurred with 10 of the 12 study plans. The federal agencies did not concur with the Geomorphology and Sediment Transport Study Plan or the Instream Flow Study Plan due to their uncertainty about the Project Owners ability to model higher flows without a significantly higher calibration flow. The Project Owners documented this area of non-agreement and distributed the Proposed Final Year 2 Study Plans and State concurrence letters to the Alaska Energy Authority (AEA) as the Governor's representative for review and feedback; however, the Project Owners did not receive any additional feedback from AEA. The Year 2 Study Plans, all comments received, and each of the concurrence letters are available on the Project website.

- Study results were presented to the Aquatics TWG, which then determined which potential engineering solutions should be advanced to phase 1 engineering which involved the development of 5% conceptional designs and cost estimates. Preliminary study results, potential fish and wildlife protection, mitigation and enhancement measures, and all comments received are available on the Project website.

- Over the spring and summer of 2023, the Project Owners then engaged in an alternatives analysis, another process not required by the 1991 Agreement but also not prohibited by it, and which we felt was necessary to bridge the gap between study reporting and development of a Draft Fish and Wildlife Program (Draft Program). The Project Owners reached out to the 1991 Agreement parties, the TWGs, and other stakeholders about participating. In sum, five meetings were held, and participants asked us to evaluate their preferred alternatives for facilitating Eklutna River instream flows, channel maintenance flows, upstream and downstream fish passage and other items. We analyzed each alternative carefully, looking at potential ratepayer and taxpayer impacts, acres of potential habitat gains for multiple fish species, capital costs, O&M costs, Replacement Energy costs, and costs per year per acre of habitat gained. The results were released at successive meetings to encourage discussion; with results summarized in the Draft Program distributed in October 2023 and the presentations are available on the Project website.

- After release of the Draft Program, per the requirements of the 1991 Agreement, the Agreement parties and NVE had 30 days to review and provide comments to the Project Owners. The Draft Program, Draft Summary of Study Results, and all comments received are available on the Project website. Responses to comments on the Draft Program are available as Attachment E to the SID.

- Per the 1991 Agreement, the Project Owners were required to attempt to resolve differences with the 1991 Agreement parties giving due weight to their recommendations, expertise, and statutory responsibilities. The Project Owners held individual meetings with each of the parties in December 2023 to discuss their comments. The Project Owners continued to meet and negotiate with the parties through April 2024 and made substantive changes to the program based on these discussions. The Project Owners also met with NVE in December 2023 to discuss their comments on Draft Program and underlying interests.

- After meeting with the parties and NVE in December 2023 to attempt to resolve differences, the Project Owners were required to hold at least two public meetings, one in Anchorage and one in the Matanuska-Susitna Valley. The Project Owners ultimately held six public meetings, two in Anchorage, two in Palmer, and two in Eagle River. All six meetings were held in January 2024 and were an open house format with a brief presentation followed by an opportunity for participants to meet with the Project Owners and their subject matter experts, ask questions, and submit comments. The public comment period was open from October 27, 2023, through February 19, 2024. The Project Owners received a total of 1,672 public comments, including 1,299 form letters. Individual comments primarily addressed dam removal and the Draft Program, with comments supporting and opposing both dam removal and the Draft Program essentially evenly split. All of the form letters called for removal of Eklutna Dam; however, most of these form letters were from individuals out of state. The Public Comment Summary and Analysis is provided in Attachment G to the SID.

Appendix D. Cost and Risk Assessment of NVE's Eklutna Pump Station Alternative

Technical Memorandum

To:	Eklutna Project Owners	Project:	Eklutna Fish & Wildlife Program
From:	Sean P. Ellenson, P.E. McMillen, Inc.	cc:	Samantha Owen McMillen, Inc.
Date:	July 10, 2024	Job No:	24-021
Subject:	Cost and Risk Assessment of the Eklutna Pump Station Alternative		

Revision Log

Revision No.	Date	Revision Description
0	06/19/2024	Initial Draft
1	07/10/2024	Final Draft

1.0 Introduction

The Eklutna Hydroelectric Project (Project) is located in Southcentral Alaska approximately 30 miles northeast of downtown Anchorage near the Native Village of Eklutna. The Project was originally constructed by the Federal government in the 1950s but was later sold to and is currently owned by Chugach Electric Association (Chugach), Matanuska Electric Association (MEA), and the Municipality of Anchorage (MOA), collectively the "Project Owners". As part of the sale of the Project, the current Project Owners entered into the 1991 Fish and Wildlife Agreement (1991 Agreement) with the National Marine Fisheries Service (NMFS), U.S. Fish and Wildlife Service (USFWS), and the State of Alaska (the Parties). The 1991 Agreement requires the Project Owners to develop and propose to the Governor of Alaska (Governor) a program to protect, mitigate damages to, and enhance fish and wildlife impacted by the development of the Project. The Project Owners submitted their Proposed Final Fish and Wildlife Program to the Governor on April 25, 2024.

1.1 Background

Beginning in 2019, the Project Owners consulted with agencies and interested stakeholders regarding the availability of existing information and development of a study program. This study program took place over the course of two years to investigate the impact of the Project on fish and wildlife. The results of the study program indicated that releasing water back into

the Eklutna River would provide benefits to fish and wildlife, particularly in terms of providing new fish habitat. Subsequently, the Project Owners conducted an alternatives analysis process between April and August 2023 to compare potential methods for providing water into the Eklutna River as well as other protection, mitigation, and enhancement (PME) measures as part of the future Fish and Wildlife Program.

Ultimately the alternatives analysis process evaluated over 36 comprehensive alternatives proposed by agencies and stakeholders. A cost effectiveness and incremental cost analysis was performed to identify the relative benefits and costs of each measure to help narrow down the list of proposed alternatives. The final list of preferred alternatives proposed by each participant in the alternatives analysis effort encompassed variations on infrastructural improvements (i.e. upstream and downstream fish passage, spillway gates, water release facilities in the river), flow release regimes, and habitat improvement measures to mitigate impacts from the Project. The alternatives analysis and selection of a preferred alternative was presented in the Draft Fish and Wildlife Program (Draft Program) published in October 2023[1].

Following the publication of the Draft Program, the Native Village of Eklutna (NVE) proposed on December 4, 2023 an alternative to remove Eklutna Dam. The Project Owners evaluated the costs and risks of this alternative in a separate technical memorandum dated April 24, 2024, submitted with the Final Fish & Wildlife Program[2]. The Project Owners then met with each of the parties to the 1991 agreements and NVE to attempt to resolve differences. These meetings continued throughout April 2024. On April 9, 2024 NVE proposed a new alternative Fish and Wildlife Program that consists of the following core components[3]:

1. Construct a new instream flow release facility consisting of a pump station located upstream of Eklutna Dam with an intake pipe located within Eklutna Lake;

2. Automate the existing outlet gate and construct new AWWU bridges;

3. Secure 40 MW of replacement renewable energy no later than 2034 and remove Eklutna Dam;

[3] Native Village of Eklutna. Proposed Eklutna Final Fish & Wildlife Program. (April 9, 2024) https://s3.documentcloud.org/documents/24563457/nve-eklutna-river-proposal-all-documents-4172024.pdf

4. Deliver the instream flow regime and channel maintenance flow regime within the annual water budgets as described in the Project Owner's Proposed Final Fish and Wildlife Program through the proposed pump station and outlet gate;

5. Establish a fund reserve, consisting of an interest-bearing account holding all earnings from the Eklutna Hydro project over and above the cost to operate it, to be used to pay for the alternatives stated above;

6. Seek federal funding for the alternatives stated above in partnership with the Project Owners; and

7. Appoint NVE as a permanent member of the Eklutna River Committee.

In response to the letter, the Project Owners provided an initial written reply on April 25, 2024 to the counterproposal identifying which of the core components have been included in the Proposed Final Fish and Wildlife Program and explaining the reasoning why other proposed components are not being incorporated into the program. In addition, the Project Owners pledged to perform a more detailed analysis of the costs and risks associated with the proposed construction of a new pump station at Eklutna Lake as an alternative to the currently proposed Eklutna River Release Facility.

1.2 Purpose

The purpose of this memorandum is to conduct a high-level analysis of the proposed design of the pump station, document the risks associated with utilizing the structure for meeting the objectives of the Fish and Wildlife Program, and to develop a cost estimate for the construction of the facility. This memorandum does not provide an assessment on the other core components of the NVE counterproposal such as the removal of Eklutna Dam or methods for funding the implementation of the facility. Refer to Attachment F of the proposed Final Program for the Technical Risk Assessment for the removal of Eklutna Dam.

2.0 Description of Alternative

This section defines the project description for the Pump Station Alternative as proposed by NVE in their April 2024 letter and following further consultation with NVE's engineer in May 2024. The following subsections document the components associated with the alternative, the preliminary design features, and the assumptions made for the construction methodology of each feature for use in developing the cost estimate.

2.1 General Description

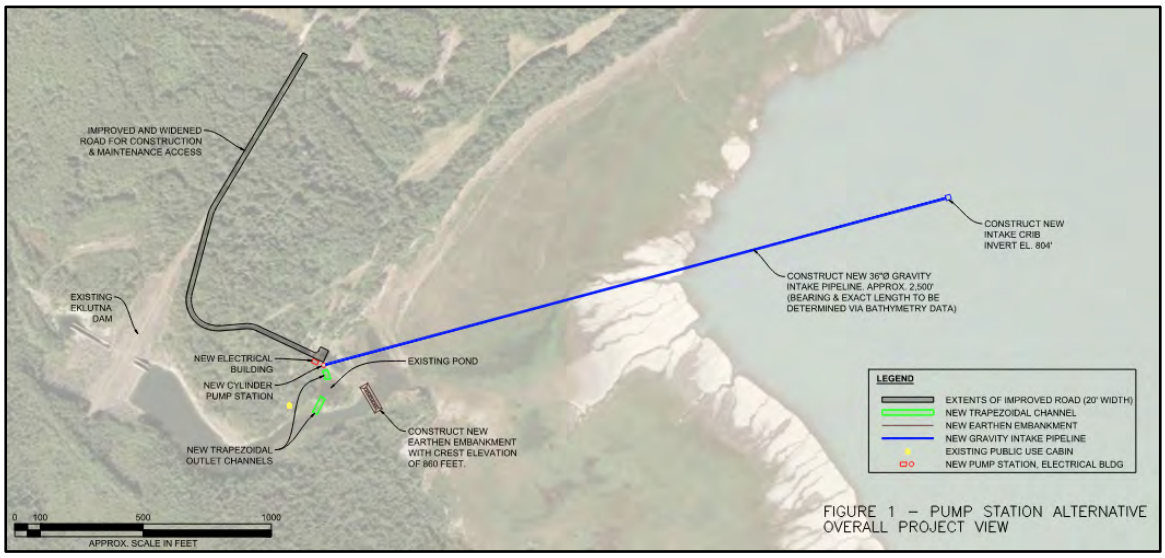

Figure 2-1. Pump Station Alternative - Overall Project View[4].

The general layout of the alternative consists of a new pump station located atop a cylindrical wet well constructed on the shore of Eklutna Lake approximately 650-feet to the east of Eklutna Dam. The wet well would draw water from the lake through a new buried gravity flow intake pipeline spanning a distance of approximately 2,500-feet to a screened intake crib located on the lakebed. The pumps would discharge to the pond located upstream of the dam which exists year-round independent of the water surface elevation of Eklutna Lake.

To release instream flows from the dam into the river before ultimate dam removal as proposed by NVE, it is proposed that the existing drainage outlet gate located within the base of the dam spillway would be automated to control flow from the pond into the river based on the seasonal variation of the instream flow regime. To operate the pumps and perform the gate actuation, a new three phase power supply would be brought to the dam from the Eklutna Water Treatment Facility located approximately 6 miles down the road from the project site. A new electrical and controls building would be constructed to house all electrical and instrumentation equipment.

The primary benefit associated with this alternative is that it continues to allow the lake to be drawn down seasonally for water supply and hydroelectric generation purposes while also allowing for releases to be made to the full 12 miles of Eklutna River year-round during the

[4] Native Village of Eklutna. Final Eklutna Figures. (April 9, 2024).
Note – This figure is not representative of the final configuration assessed within this report and includes features such as the earthen embankment that are not necessary for the operation of this alternative.

initial 10-year period of operation. It shall be noted that fish passage around the dam is not incorporated as part of the pump station alternative prior to dam removal and costs associated with this are excluded from this assessment.

Following the removal of the dam and implementation of fish passage into the lake, it is assumed that the pump station would remain in place as a safety measure to prevent the river from running dry. During dry years, the withdrawals from the lake for public water supply purposes have the potential to draw down the reservoir from the outlet during the winter. The pump station would then be able to operate periodically to maintain a wetted river until the lake inflows are such that the river resumes its natural flow.

The following sections provide additional details on the proposed design of each feature and the assumptions made regarding the constructability of each component for the cost estimate.

2.2 Intake Crib

2.2.1 Description

The intake crib is proposed to be a precast concrete structure with dimensions 8'-0"W x 6'-0"L x 6'-0"H. The front face and sides of the structure would be screened utilizing a steel trash rack with a spacing of 1.5" for debris and fish exclusion. The structure is sized to reduce the maximum approach velocities to the intake to less than 0.3 ft/s which is typically suitable to reduce the risk of fish entrainment. The crib would be located on the lakebed at an invert elevation of El. 804.0 ft (local datum[5]), sufficient to prevent vortexing or air entrainment within the intake at low lake water surface elevations.

2.2.2 Constructability

It is assumed that the concrete structure would be precast, and the screens prefabricated and assembled prior to being delivered to the site. The intake crib would be delivered by barge to the proposed location, lowered to the lakebed and secured to the pump intake pipe by a dive team.

2.3 Intake Pipe

2.3.1 Description

The intake pipe is proposed to be a 36-inch diameter reinforced concrete drainage pipe with bell and spigot connections, conforming to ASTM C76 or equal. The pipe is proposed by NVE

[5] Multiple vertical survey datums are reported in and around the main features of the Project. Throughout this document, the elevation datum that shall be used is the "local datum" tied to the crest of Eklutna Dam.

to be approximately 2,500 linear feet to reach a lakebed elevation of El. 804.0 ft, however a review of the lake bathymetry by McMillen requires this length to increase to approximately 2,800 linear feet to achieve the proposed depth. The pipe would start at the bottom of the wet well at El. 801.0 ft and end at the intake crib invert El. 804.0 ft with a uniform slope of approximately 0.1 percent. The topography of the ground surface along the proposed alignment requires this pipe to be buried at a depth of up to 75-feet at the wet well, increasing the complexity of the installation and limiting the available methodologies for construction.

2.3.2 Constructability

Installing a 36-inch diameter pipe for a length of 2,800 feet at a depth of up to 75-feet adjacent to and underneath a lake is a significant engineering challenge that would require in-depth studies prior to selecting the preferred construction methodology. Options such as horizontal directional drilling, microtunneling, or the development of an open cut trench (with benching) may be suitable means for construction. Each would require careful planning to understand the quality of the rock and substrate the pipe would be installed in, groundwater impacts, the suitability to connect into the lake via a wet tap, and the necessity of building a coffer dam for construction.

The assumption used as the basis for the cost estimate is that a microtunneling approach may be utilized for this application, as it would likely be preferable to an open cut trench due to the proposed depth of the pipe. The wet well would serve as the launch shaft for the microtunnel boring machine (MTBM) and would be expanded to a footprint of approximately 25’-0”L x 15’-0”W. The MTBM would have a diameter of approximately 44-inches to accommodate the jacking pipe to drive a pipe with a finished diameter of 36-inches as specified. The profile of the intake pipe is assumed to pass primarily through relatively soft grounds consisting of silt, sand, and clay based on drilling records from boreholes investigated during the initial construction of the project. Based on the assumed geologic conditions, the MTBM would likely use a pressure balanced cutting head suitable for soft soils for this construction. The overall length of the proposed microtunnel is on the upper end of what has been performed to date in the United States and may necessitate the use of an intermediate jacking station located at the midpoint of the alignment. The microtunnel connection to Eklutna Lake is assumed to take place underwater as a lake tap, with bulkheads within the MTBM preventing flooding of the tunnel during the breakout into the lake. Following the lake tap, the MTBM would be removed by a dive team and the ground prepared for placement of the intake crib.

2.4 Pump Station

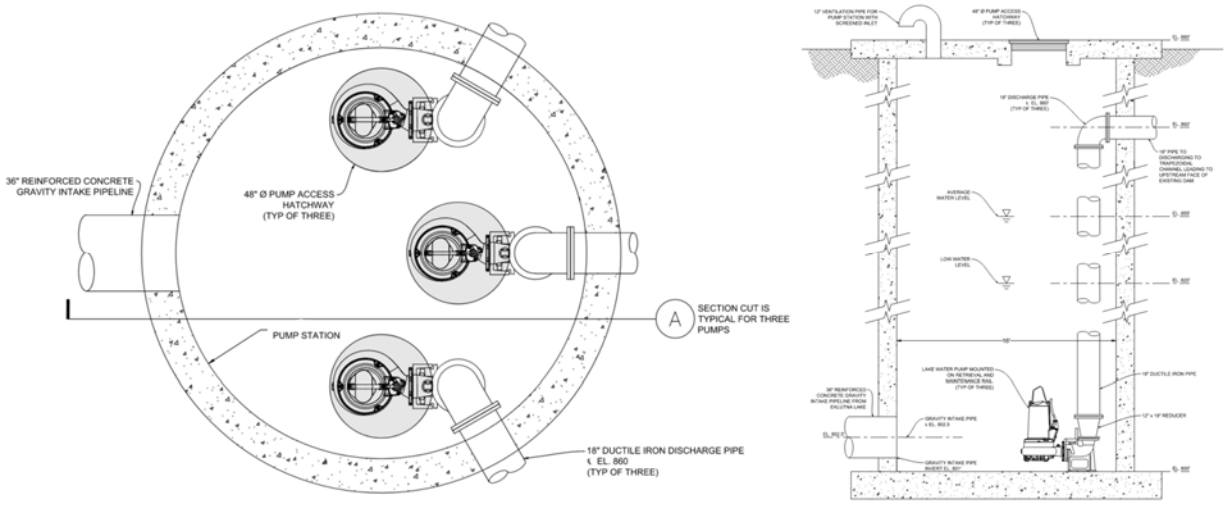

Figure 2-2. Proposed Pump Station Plan (Left) and Profile (Right).

2.4.1 Description

The proposed pump station design consists of a wet pit triplex sump with a diameter of 16-feet and a depth of 80-feet. The sump would house three wet pit submersible style pumps with a rated flow of 13.3 cubic feet per second (cfs) at a rated head of 45-feet and a motor sizing of 100 horsepower (HP) each. The pumps would be located at the base of the sump and attached to a guide rail for ease of removal and maintenance. Each pump would discharge to an 18-inch diameter discharge pipe exiting the structure approximately 20-feet below grade. The outlet pipes would require a throttling and isolation valve at the discharge to prevent the pumps from operating at a run-out condition at low head.

The structure as proposed in the alternative has a top elevation of El. 880.0 ft. This indicates that the structure would be located below the maximum spillway water surface elevation of El. 884.8 ft. To prevent inundation during an extreme spill event, the structure would likely be relocated to a point higher in elevation, which has not been accounted for as part of the cost estimate.

2.4.2 Constructability

To accommodate the staging requirements for the MTBM launch shaft as proposed in the previous section, the wet well would likely be larger than proposed and reconfigured to a rectangular pit or alternate intake style. Due to the presence of clays, silt, and sand in the vicinity of the proposed wet well location, the structure is anticipated to be constructed of secant pile walls with a base slab for mounting the pumps and a reinforced concrete thrust

wall for driving the MTBM. Groundwater would likely be continuously pumped out of the well during construction until the structure is complete, and the base slab fully formed. Care must be taken to ensure the structure is designed to prevent buoyancy or uplift and may require a substantially thick base slab or larger diameter secant pile wall construction than proposed as part of the cost estimate.

2.5 Discharge Channel

2.5.1 Description

The discharge piping from each pump is proposed to exit the wet pit sump and discharge directly onto a reinforced shotcrete pad and into the existing pond formed upstream of the dam. NVE had additionally proposed the construction of a new earthen embankment structure with a crest elevation of 860.0 ft located at the eastern edge of the pond, to ensure that the outlet gate has sufficient driving head to make releases year-round and so that the pumps do not simply recirculate water back to Eklutna Lake when the lake elevation is low. In consultation with NVE's engineer in the development of this assessment, it was determined that this earthen embankment is not necessary from a hydraulic design standpoint as the glacial moraine at the eastern edge of the pond has an existing crest elevation of ± 860.0 ft msl and has sufficient depth to deliver the required flow rate through the drainage outlet gate. The costs associated with the structure have been excluded from this assessment.

2.5.2 Constructability

The channel connecting the pump station with the existing pond would be excavated when the lake levels are low. To avoid the use of a cofferdam for construction activities, the existing pond would be drained through the dam prior to work being performed.

2.6 Access Road

2.6.1 Description

A 20-ft wide, 1,600-foot-long gravel access road would be developed from the Eklutna Lake Day Use Area to the proposed pump station. Approximately 700-feet of the road would involve the improvement and widening of an existing unnamed access road to the right abutment of Eklutna Dam, and the remaining 900-feet would be newly developed, partially following the alignment of the existing trail to the Dolly Varden cabin.

2.6.2 Constructability

The road would be constructed as a low-speed rural access road with no public access. Trees would be cleared along the proposed alignment, existing material removed, and aggregate base would be places with gravel for the road surfacing,

2.7 Electrical Supply

2.7.1 Description

A three-phase power supply would be brought to the Eklutna Dam and proposed pump station to provide electrical service to the pumps. Approximately 6 miles of the existing single-phase line was proposed by NVE to be upgraded to three-phase, however a secondary review indicates approximately 8.2 miles of line must be upgraded to support this alternative. Additionally, a new transmission line would run approximately 1 mile from the nearest distribution pole to the project site. Portions of the line running along the access road would be buried. For reliability purposes two 300 kVA transformers would be provided and arranged in a main-tie-main arrangement to provide power to the pumps. An electrical building would be constructed adjacent to the pump station to house all electrical equipment and instrumentation.

In the event of a power outage the proposed design includes the use of a standby diesel generator set rated at 300 kW with an automatic transfer switch to maintain power to the pumps. The generator would come with a tank of roughly 750 gallons of fuel rated for 24 hours of continuous load.

2.7.2 Constructability

The existing single phase transmission line would be converted by MEA to a 1/0 ACSR three-phase line and the poles would be upgraded accordingly. The electrical and control building and pump house is anticipated to be of concrete masonry unit (CMU) block wall construction with lighting and associated heating, ventilation, and cooling needs.

3.0 Risk Assessment Summary

The proposed design and construction of the pump station alternative to provide instream flows to the Eklutna River presents some unique challenges and risks when compared to other alternatives that have been studied. This section documents some of the risks associated with the alternative proposed by NVE.

3.1 Reliability

The design aspects of the proposed pump station alternative present reliability risks for the project that may restrict the ability to provide year-round, uninterrupted flow to the Eklutna River. Some of the reliability risks identified are as follows:

1. The pumps are intended to operate continuously for the duration of the year that the lake is disconnected from the dam. This necessitates being reliant on a constant supply of power from the existing and upgraded transmission line on Eklutna Lake Road. Loss of power to the pumps caused by a regional blackout, downed line, downed pole, malfunctioning transformer or other event would result in the pump station shutting off unexpectedly. The emergency standby diesel generator would provide power to the pumps for approximately 24 hours at full load. If power is not restored or more fuel is not delivered to the site within approximately 24 hours, stored water within the pond may provide a few hours of continued release, after which the river would run dry.

   It shall be noted that there are additional risks with being reliant on a diesel generator to supply flow to the Eklutna River in the event of an emergency. There are known concerns with fuel gelation, water contamination, and general starting issues in cold temperatures. Additionally, loss of battery capacity over time may prevent the unit from starting up when needed and ice and snow may restrict operation of the engine and proper ventilation. Routine maintenance of the generator would be critical to ensuring the reliability of the pump system in the event of an outage.

2. The proposed pump station layout consists of three pumps, each with a rated flow of 13.3 cfs for a total station capacity of 40 cfs. With an instream flow of 40 cfs required in the river between June and October, there is no redundancy proposed in the design to eliminate a single point of failure or allow for maintenance of one pump during the high flow season. This introduces some risk to the pump station's ability to provide the necessary flow to the river year-round.

3.2 Flow Regime

Being reliant on the pumping station and dam outlet gate to provide flow to the Eklutna River introduces some risks and technical challenges to being able to meet the instream flow and peak flow regime as proposed in the Proposed Final Fish & Wildlife Program. These risks are summarized as follows:

1. Controlling the flow rate into the river requires coordination of the number of pumps in operation, the speed of the pumps in operation, the position of the throttling valve on each discharge line, and the position of the drainage outlet gate to meet the instream

flow criteria. The flow rate required in the river, which varies seasonally as well as annually within the water budget, is highly sensitive to changes in valve position, gate position, and pump speed, all of which must be carefully monitored as part of this alternative.

2. A periodic channel maintenance flow is required to be released in the river in three years out of every 10 years as indicated in the Proposed Final Fish & Wildlife Program. The channel maintenance flow regime as proposed ramps up to 220 cfs and is held for 36 hours before ramping back down to 40 cfs over the course of approximately two days. The drainage outlet gate has the potential to release a maximum of 190 cfs at a water surface elevation of 871.0 ft. The proposed pump station alternative does not allow for the periodic channel maintenance flows to occur without an unregulated spill over Eklutna Dam. This introduces considerable risk to all downstream infrastructure, as the magnitude and duration of an unregulated spill is unable to be controlled by the Project Owners.

3.3 Geotechnical

The construction of the intake pipe and lake tap presents some significant risks and challenges from a geotechnical standpoint. These risks are summarized as follows:

1. The various methodologies that may be used for construction of the intake pipe such as microtunneling or directional drilling would present some unique challenges for the designer and the contractor due to the distance required, ground conditions, and proximity to the lake. The soft soils of the lakebed may present some stability concerns including the potential for ground settlement and subsidence. Water infiltration is a significant concern for this application underneath the lake, presenting risks to workers and to the tunneling operation during construction. Detailed geotechnical investigations must be performed to reduce some of the unknowns associated with the tunneling operation, the costs of which have not been included in this assessment.

2. Mapped geologic structures in the Upper Cook Inlet and the region around Eklutna Lake are capable of generating strong earthquakes which pose a significant risk to the proposed project facilities. During the Great Alaska Earthquake in 1964, the earthquake caused densification of unconsolidated sediments within Eklutna Lake resulting in substantial movement of the lakebed. The existing intake within the lake experienced lateral movement of up to 10 inches at conduit joints, causing failure of the structure. A subsurface pipeline spanning 2,800 feet underneath the lakebed is at substantial risk of separation or failure during a seismic event.

3. The geology of the lakebed may vary, and trenchless excavation may encounter unforeseen geologic intrusions. These unexpected conditions could cause significant delays or substantially increase the costs of the tunneling project.

3.4 Environmental

The location of the pump station and proximity to the lake, cabins, campsites and recreation areas may present some additional risks and environmental impacts that would need further study. These risks are summarized as follows:

1. The structure as proposed by NVE is within 150 feet of an existing public use cabin, within 1,000 feet of public campsites, and on the shore of Eklutna Lake. Impacts to recreational opportunities during construction must be further studied and better understood for this alternative.

2. The storage of at least 750 gallons of diesel adjacent to the shore of Eklutna Lake poses potential risk of spill and discharge of fuel into the public water supply. This risk may be mitigated by appropriate spill prevention, control, and countermeasure plans but would be an ongoing risk for the life of the project.

4.0 Anticipated Costs

4.1 Capital Costs

An Opinion of Probable Construction Costs (OPCC) was developed for the pump station alternative based on the construction methodologies and assumptions discussed within this memorandum. We have utilized historical cost data from similarly technical projects which we have designed or constructed as a self-performing general contractor, as the basis of our estimate. Appropriate overhead and profit markups have been included below the subtotal to account for the competitive bidders' markups they are likely to apply on their bid prices. Additionally, a 25% contingency has been included at this stage to account for details and minor project features which are not yet included in the project documents at the conceptual level of detail. This OPCC is consistent with a Class 5 estimate as defined by the Association for the Advancement of Cost Engineering (AACE) standard practice 69R-12. A summary of the OPCC is provided in Table 4-1 and the complete document is provided in Appendix A.

Table 4-1. Capital Cost Summary.

Description	Cost ($2024)
Mobilization	$1,770,000
General Requirements	$2,650,000
Site Construction and Access Roads	$377,500
Pump Station Construction	$18,294,000
Dam Outlet Modifications	$350,155
Electrical and Transmission	$3,072,250
Subtotal	**$26,513,905**
GC Overhead and Profit	$3,924,563
Construction Bonds	$380,481
Contingency (25%)	$7,704,737
Total Cost	**$38,523,685**
Lower Limit (-50%)	$19,261,842
Upper Limit (+100%)	$77,047,370

4.2 Operations and Maintenance Costs

Operations and maintenance costs associated with this facility include time for the operator to monitor and control the flow releases for the facility and a technician to visit the site weekly. Additionally, each pump is assumed to undergo an annual maintenance check by a trained mechanic and electrical technician. A significant portion of the operations costs for this facility include the energy costs to operate the pumps.

To determine the average annual energy estimates for operation of the pumps, an operations model was developed. This model considered the number of pumps in operation, the speed of operation to control the flow rate, and an estimated hydraulic efficiency of 80%. During the portions of the year that the lake is connected with the existing pond (i.e. elevation of El. 861 or higher), then the pumps are powered down. The monthly energy consumption of the pumps is presented in Figure 4-1.

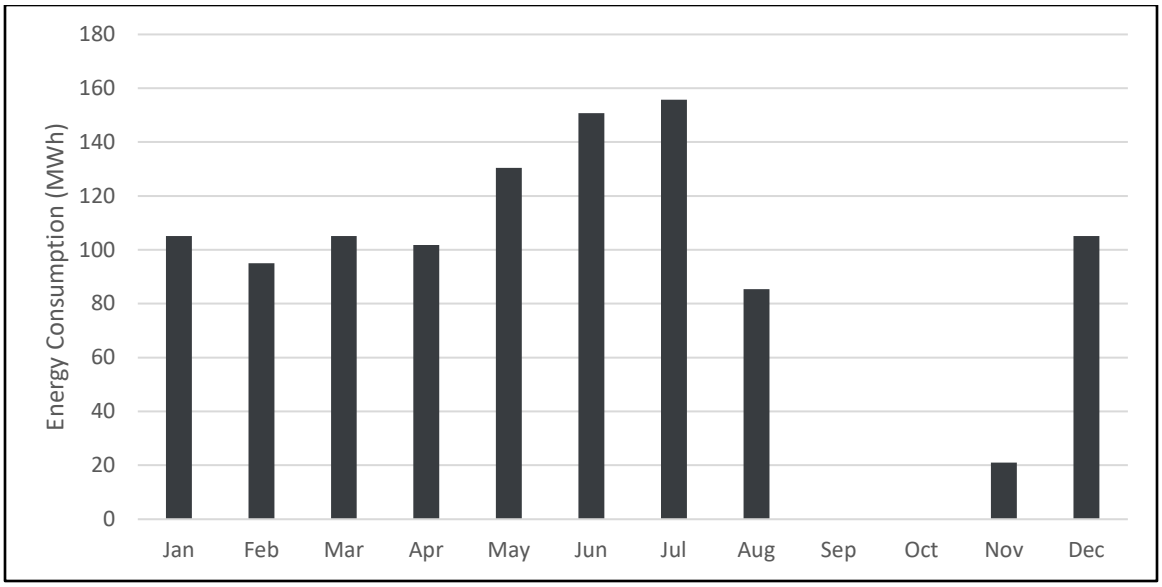

Figure 4-1. Estimated Energy Consumption of Pumps by Month.

The average annual energy consumed by the pumps to deliver the instream flow as proposed in the Fish and Wildlife Program is 1,056 MWh/Yr. At an average energy cost of $84.65/MWh the annual costs for operating the pumps are approximately $89,400/Yr. The summary of operating and maintenance costs for the facility is presented in Table 4-2. A detailed breakdown of the operations and maintenance costs is provided in Appendix A.

Table 4-2. O&M Cost Summary.

Description	Annual Cost ($2024)
Operations Personnel	
Facility Technician	$76,700
Facility Operator	$57,500
Maintenance Personnel	
Electrician	$14,500
Mechanic	$13,300
Power	
Pump Operations	$89,400
Pump Controls	$800
General Site Consumption	$3,000
Materials	
Valves/Seals	$6,000
Pumps/Seals/Repair	$10,500
O&M Subtotal	$272,000

Contingency	$81,600
O&M Annual Total	**$353,600**

4.3 Replacement Energy Costs

The estimated replacement energy cost for the alternative is derived from the reduction in energy generation potential of the powerhouse due to flows being released in the Eklutna River. The replacement energy cost for the pump station alternative is identical to that of the Project Owner's preferred alternative presented in the Fish and Wildlife Program and equates to a reduction in generation of 15,749 MWh/Yr at a cost of $1,333,000/Yr.

4.4 Present Value of Annualized Costs

To better understand the anticipated costs of the alternative, the capital costs are annualized over the life of the project and added to the O&M and replacement energy costs. The annualized costs are then used to calculate utility rate impacts, projected spending, or can be combined and converted to a present value for comparison purposes. For this alternative, the costs for the pump station are annualized over 10 years. The present value of these annualized costs is then calculated using a 5% discount rate and added to the capital costs associated with dam removal. Additional information on the calculation for determining the present worth is provided in Attachment C of the Proposed Final Fish & Wildlife Program[6]. The summary of the present worth of the proposed alternative is presented in Table 4-3.

Table 4-3. Overall Cost Summary.

Cost Description	Value ($2024)
Capital Costs	
Pump Station and Outlet Gate Capital Cost	$38,523,685
AWWU Bridges Capital Cost	$4,558,256
Subtotal Capital Costs	$43,081,941
O&M Costs	
Pump Station and Outlet Gate O&M Cost	$353,600
Replacement Energy Costs	
Average Annual Energy Reduction	15,749
Replacement Energy Costs ($/MWh)	$84.65
Replacement Energy Costs ($/MWh)	$1,333,188

[6] Chugach Electric Association, Matanuska Electric Association, and Municipality of Anchorage. Attachment C – Supporting Data for Cost Effectiveness Modeling. (Aug 30,2023) https://eklutnahydro.com/wp-content/uploads/2024/04/Attachment-C-Supporting-Data-for-Cost-Effectiveness-Modeling.pdf

Pump Station Annualized Costs	
Annualized Costs for 10 Years of Operation	$8,617,807
CEA Share of Pump Station Annualized Costs ($/Yr)	$5,693,522
MEA Share of Pump Station Annualized Costs ($/Yr)	$1,743,556
MOA Share of Pump Station Annualized Costs ($/Yr)	$1,180,729
10-Year Present Value of Pump Station Annualized Costs ($)	$66,546,709
Dam Removal Capital Costs[7]	
Eklutna Dam Removal	$10,496,000
Eklutna Power Plant Decommissioning	$3,439,000
New Hydroelectric Project	$243,820,000
Re-route AWWU Pipeline	$37,880,000
New Glenn Highway Bridge Replacement	$39,830,000
Railroad Bridge Replacement	$65,639,000
Total Costs	
Estimated Present Value of Complete Alternative	$467,650,709
