#### ANCHORAGE TELEPHONE UTILITY

In 1915, The Alaska Engineering Commission purchased and installed a magneto switchboard and 300 telephones at the Anchorage construction base of the Alaska Railroad. In 1932 the system was acquired by the City of Anchorage. The telephone system has since evolved from a 200-line manual switchboard into a modern and sophisticated telecommunications network, providing approximately 114,700 business and residential access lines on the average for 1988.

In the telephone industry, ATU is ranked 22nd in the number of access lines according to comparative statistics for 1988 prepared by the United States Telephone Association. ATU provides service in the Anchorage Bowl, Turnagain Arm and the town of Hope. It is the largest local operating telephone system (not affiliated with a holding company) in Alaska and the largest municipally-owned local operating system in the United States.

#### Operating Budget

ATU is affected by industry deregulation, as are all telecommunications companies. The FCC has deregulated telecommunication areas such as customer premise equipment and inside wiring; detariffed billing and collection; re-allocated commercial expense; and modified the allocation factors (SPF and COE) used in the separations procedure to determine the relative cost of long-distance and local service. The impact in 1990 will be a \$3.1 million jurisdictional shift from state and interstate toll to local service.

ATU is responding aggressively to these challenges and has implemented a plan to adjust to this transition period. Material and supply purchases continue to be critically reviewed. In 1986, ATU employeed 1,047 full and part time employees. By 1989, these had been reduced to a total workforce of 686 positions. ATU management will continue to match the workforce levels to operational requirements. Although ATU plans a workforce of 684 in 1990, it is assumed that 5% or 34 positions will be vacant during the year. In addition to reducing expenses, ATU is seeking alternative sources of revenue.

#### Capital Budget

Capital expenditures during the last few years have provided ATU with a fully digital switching system interconnected by fiber optics, making it one of the most modern exchange telephone companies in the nation. ATU is now in the mode of maintaining its existing network. The 1990 capital budget is \$16,830,000.

### 1990 Budget Impacts

#### Operating |

- Anchorage recession has stabilized and access lines are projected to grow by 2% in 1990.
- Toll revenues will decrease \$3.1 million in 1990 due to regulatory changes that shift toll subsidies to local exchange companies.
- ATU will apply for a 15% local rate increase worth \$3.1 million in 1989 with the expectation that it will be granted in January 1990.

#### Capital

- ATU will sell \$20 million in revenue bonds in 1990 in order to finance the 1990 and 1991 capital programs. The capital programs will maintain the network rather than change or expand it. Engineering says there are no major technology changes that will impact the network in the near future.
- Network Services will upgrade the central office switching network and fiber optic cable to the distribution areas. ATU will continue to upgrade existing ducting extension in conjunction with city road improvement plans.
- Management Information Services Department will upgrade hardware and ATU will purchase software in order to support ATU computer requirements.

#### 1990 BUDGET ASSUMPTIONS

#### SALARIES AND WAGES

Employment levels for 1990 will remain stable and the size of the workforce will be matched to the operating requirements of ATU. Wages and salary rates are projected at current levels for represented employees with all contractual increases. Non-represented employees are budgeted to receive a 3% salary increase in 1989 and step increases during 1990. Executive employees are projected at 1989 levels. A 5% vacancy rate is included.

#### BENEFITS

Benefits are projected at 40% based on 1989 experience and adjusted for known changes in medical benefits, FICA, retirement and worker's compensation.

#### RATE INCREASES

A rate filing is anticipated in late 1989 with a January 1990 implementation date. The rate increase is due to the continued FCC and APUC mandated shifts of expense recovery from interstate and intrastate toll to local. ATU will apply for a 15% local rate increase, worth \$3.1 million. ATU will attempt to minimize increases by generating new sources of revenue such as Directory Assistance Charging.

#### INFLATION

Inflation for 1990 on non-labor is assumed at 3%.

#### DEBT SERVICE INTEREST RATES

ATU plans to sell \$20 million in revenue bonds in 1990. Interest rates are assumed at 7.75%

#### INTEREST INCOME

General cash pool investments will be calculated at an interest rate of 7.5%.

| Utility                     | Division | Budget Year |
|-----------------------------|----------|-------------|
| ANCHORAGE TELEPHONE UTILITY |          | 1990        |

#### Continued 1990 Budget Assumptions

#### INTRAGOVERNMENTAL CHARGES

Budget estimates are based on the requests received from general government departments' operating budgets. These are calculated according to agreed upon allocation methodologies. Self insurance is included in ATU's benefit rate; therefore it is not included in the IGC's.

### MUNICIPAL UTILITY SERVICE ASSESSMENT (MUSA)

MUSA mill rates are projected to increase 10% during 1990. Payment will also include 1.25% of the gross revenue from regulated services.

#### UTILITY REVENUE DISTRIBUTION

Utility revenue distribution is planned at \$4,000,000 per the Office of Management and Budget.

RECONCILIATION OF 1989 PRO FORMA TO 1990 BUDGET EXPLANATION OF VARIANCE

- A. Increase due to the 1990 jurisdictional rate shift from intrastate and interstate toll to local service.
- B. Small increase in usage and number of public telephones.
- C. Decrease in toll revenues due to 1990 jurisdictional rate shift to local service.
- D. Increase in sales to the Anchorage business community and statewide marketing of services.
- E. Increase in Customer Premise Equipment rents due to statewide expansion of sales.
- F. Increase resulting from having directory assistance charging in place for the full year.
- G. Increase in sales and leases of Customer Premise Equipment due statewide expansion of sales.
- H. Increase in Customer Premise Equipment installation revenue due to statewide expansion of sales.
- I. Miscellaneous revenue such as leases, rents, and late fees. The major reason for increase is the implementation of the 1% and 5% late fee charges.
- J. Increase in interest charged to non-regulated activities.
- K. Uncollectible accounts are expected to decrease as ATU's collection effort improves.
- L. 1989 cost of goods sold included a non-recurring sale to Exxon for the Prince William Sound oil cleanup.
- M. Increase due to non-represented employee 3% wage increase.
- N. 3% increase in supplies over 1989.
- O. A decrease in ATU personnel resulted in a decrease in Intragovernmental charges from municipal departments that allocate costs based on workforce.
- P. ATU will fund the Anchorage Economic Development Commission at a reduced amount

Between 1986 and 1993, the FCC mandated a shift of costs from the interstate toll jurisdiction to the local rate payer. It is anticipated that the APUC will mandate similar shifts from the intrastate jurisdiction to the local rate payer beginning in 1990 and continuing through 1993. Between 1990 and 1993, these shifts aquate to an annual local rate increase of \$3.1 million. The \$3.1 million represents a smaller percent of local revenue as the local revenue base increases each year.

\$9.90

Although the FCC mandated shifts began in 1986, ATU did not request an increase in local rates In 1988, the APUC granted a 20.5% interim rate increase, worth \$2.9 million. 1989 budget forecasted an increase of 33%. In July 1989, the interim local rates were replaced by a lower permanent local rate increase of 9.42%, an actual decrease of 11.08% or \$2,057 million on an annualized basis.

The 1989 rate order disallowed some plant and regulated expenses. The projected rate increase of 21.8% in 1991 assumes a 9.5% increase resulting from a re-instatement of these items plus a 12.3% jurisdictional shift.

Rate shown is the average single party residential service and does not include additional charge for unlimited calling and customer premise equipment.
