

**Figure 8: Avalanche Hazard Areas Recommended for Re-evaluation and Mapping, Crow Creek and Upper Glacier Creek Valley:** The areas circled in red above represent general locations of avalanche hazard areas that are incorrectly mapped on MOA avalanche maps and require re-mapping (see Figure 7 also). These include:

- *Area 4:* California Creek to Crow Creek (Problem, inaccurate mapping/misleading information).
- *Area 5:* Crow Creek drainage from Glacier Creek to Crow Creek Trailhead (Problem: inaccurate mapping/misleading information).
